

# BIOL SUBS FOR MOLECULAR/ CELL OR GENETICS/ GENOMICS (ABSM)

---

| Code      | Title  | Course<br>Units |
|-----------|--|-----------------|
| BIOL 3054 | Developmental Biology  | 1               |
| BIOL 4233 | Genes in Conflict: How sex and selfish genetic elements drive genome evolution | 1               |
| BIOL 4235 | The RNA World: A functional and computational analysis                         | 1               |
| BIOL 4266 | Molecular Genetics of Neurological Disease                                     | 1               |
| BIOL 4310 | Molecular Physiology   | 1               |
| BIOL 4701 | Prokaryotic Microbiology: A Pragmatic View                                     | 1               |
| BIOL 5220 | Human Evolutionary Genomics  | 1               |
| BIOL 5233 | Genes in Conflict: How sex and selfish genetic elements drive genome evolution | 1               |
| BIOL 5310 | Molecular Physiology   | 1               |
| CAMB 4850 | The RNA World: A functional and computational analysis                         | 1               |
| CAMB 5220 | Human Evolutionary Genomics  | 1               |
| NRSC 4266 | Molecular Genetics of Neurological Disease                                     | 1               |
