

# DENTAL - ORAL MEDICINE (DOMD)

---

## **DOMD 7610 Admissions and Emergency**

1.5 Credit Hour

## **DOMD 7640 Od&E Medical Clerkship**

This course is designed to give students a foundation for understanding physical diagnosis, medical workups, consultations, and conditions that directly affect management of the dental patient. Students learn the skills of physical diagnosis, how to complete the "History and Physical," how to interpret and evaluate clinical, laboratory, radiographic, and other diagnostic information and procedures. In addition, students learn how to recognize the normal range of clinical findings as well as significant abnormalities requiring medical management of the dental patient.
