INTERNATIONAL RELATIONS (INTR)

INTR 101 Transnational Issues in Global Politics
This course is designed to provide students with an introduction to transnational issues and world politics and to acquaint them with some of the leading issues, theories, concepts and processes, and history that shape and define world events. It is suitable for students embarking on long-term study of international affairs as well as for students with other majors and intellectual interest who simply want to know more about how the world works and how the material covered in this class affects their lives. It is expected that students taking the course will gain an ability to analyze, understand objectively evaluate and appreciate the complex dynamics that affect “global politics” writ large, including issues relating to trade, diplomacy, people-to-people and business transactions, and shifts in demography, borders, international institutions and global governance. In additional to issues of diplomacy, statecraft, and security we will assess some of the major international issues of our time (i.e. climate change, proliferation of weapons of mass destruction, genocide and human trafficking) and debate the prospects for bringing peace and prosperity to a world that is rife with conflict and poverty.
One-term course offered either term
Activity: Lecture
1.0 Course Unit

INTR 199 Independent Study
One-term course offered either term
Activity: Independent Study
1.0 Course Unit

INTR 250 Political Risk Analysis
This course teaches students to apply social science theories and concepts together with futures methodologies (e.g. Delphi method; country risk assessments used by ratings agencies) to the challenges of addressing international political risks to the continuity, effectiveness and operations of business, government and other organizations in their international transactions.
Taught by: Frank Plantan
One-term course offered either term
Activity: Lecture
1.0 Course Unit

INTR 265 Counterintelligence: History, Theory, and Practice
This course will address the conceptual and practical issues of the practice of counterintelligence as it relates to the national defense, economic competitiveness, and foreign policy decision-making and the role of the intelligence community in thwarting intelligence gathering and espionage against the United State and the United Kingdom. Because the closer is to the contemporary world and the inherent secrecy that surrounds intelligence and counterintelligence activities, much of this class focuses on historical cases where long term public research and declassification of government documents have allowed us to look into the system and process of intelligence gathering, analysis, and recommendations for action. We will explore recurrent and prominent themes of intelligence failures, the trade-offs and calculations of a strong CI infrastructure as it relates to ethics, democracy and national power and prestige that shape our understanding of the subject and how it directly and indirectly impacts our lives and our society. Students will gain an appreciation of how the practice has been utilized by government, specifically its structure, analytical processes, organizational culture, practice-related ethics, perception(s) by the public, guiding charter, and governmental oversight. This class covers the diverse array of counterintelligence applications - within the government as well as in the private sector and our individual lives.
Taught by: Plantan
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit

INTR 290 Topics in International Relations
Topics in International Relations focuses on specialized issues, practical or applied approaches, policy and other topics of contemporary relevance in modern study of international relations. INTR 350 Research Methods/Practice in IR
International Relations is concerned with both theory and practice so we employ a range of analytical tools to examine actors and events in world politics. The purpose of this course is to introduce students to the various research methods utilized by students and scholars in the field of IR including: case studies, historical - comparative and archival research, survey research, interviewing techniques, simulations, quantitative and statistical analysis.
One-term course offered either term
Prerequisite: PSCI 150
Activity: Lecture
1.0 Course Unit
Notes: MAJORS ONLY

2021-22 Catalog | Generated 08/18/21
INTR 390 Senior Seminar for Thesis Research
Seminar in International Relations. A two semester sequence including review of advanced International Relations theory and research methods for the preparation of the senior thesis.
Course usually offered in fall term
Prerequisite: INTR 350 AND PSCI 150
Activity: Seminar
1.0 Course Unit
Notes: MAJORS ONLY

INTR 391 Senior Seminar For Thesis Research
Seminar in international relations. Second semester of a two semester sequence including review of advanced international relations theory and research methods for the preparation of the senior thesis.
Course usually offered in spring term
Prerequisite: INTR 390
Activity: Seminar
1.0 Course Unit
Notes: MAJORS ONLY

INTR 395 Senior Project I
This seminar will prepare students to plan, implement, and present their senior research project. Students will draw on the experience and insight they have gained in the course of their fieldwork or internship to develop defensible policy recommendations for their target audience. As such, the seminar will introduce students to the policy formation process as they develop the practical skills needed to formulate and produce actionable policy recommendations. Students will produce a formal report and will present their findings to relevant stakeholders at the conclusion of the Seminar. This class will ensure that students develop the skills necessary to undertake a substantive research project.
Course usually offered in fall term
Prerequisite: INTR 350 AND PSCI 150
Activity: Seminar
1.0 Course Unit
Notes: MAJORS ONLY

INTR 396 Senior Project II
This course is a continuation of INTR-395, culminating with the production of a policy research paper and presentation.
Course usually offered in spring term
Prerequisite: INTR 395
Activity: Seminar
1.0 Course Unit
Notes: MAJORS ONLY

INTR 399 Independent Study for Thesis Research
One-term course offered either term
Activity: Independent Study
1.0 Course Unit
Notes: MAJORS ONLY
