PSCI 010 Freshman Seminar: The World After 1800
Freshmen seminars are small, substantive courses taught by members of the faculty and open only to freshmen. These seminars offer an excellent opportunity to explore areas not represented in high school curricula and to establish relationships with faculty members around areas of mutual interest. See www.college.upenn.edu/admissions/freshmen.php
One-term course offered either term
Also Offered As: AFRC 012, LALS 107
Activity: Seminar
1.0 Course Unit

PSCI 012 Information Communication Technologies for Development
The seminar will focus on the role that innovations in Information Communication Technologies can play in improving development outcomes in low-income countries. The seminar will focus especially on the promises and perils for utilizing mobile technologies and GIS for better governance: to improve citizen voice and government accountability. This is an exciting area of research that brings together tech gurus, policy makers, Non-government organizations and researchers. The seminar will be of interest to undergraduates from diverse backgrounds, such as political science, engineering, communication, sociology and business administration. The idea will be to highlight not only the promise of ICT4D but also the challenges (e.g., that it widens participation, since it tends to exclude marginalized populations). The course will survey innovative applications in agriculture, financial services, health services, but also governance. The trip to Uganda during spring semester will allow students to meet with NGOs and local governments that are experimenting with new products and applications; hear their challenges and participate in meetings to brainstorm new apps; Permission needed from instructor to enroll.
Taught by: Grossman

PSCI 077 Introduction to Data Science
Understanding and interpreting large, quantitative data sets is increasingly central in political and social science. Whether one seeks to understand political communication, international trade, inter-group conflict, or other issues, the availability of large quantities of digital data has revolutionized the study of politics. Nonetheless, most data-related courses focus on statistical estimation, rather than on the related but distinctive problems of data acquisition, management and visualization- in a term, data science. This course addresses that imbalance by focusing squarely on data science. Leaving this course, students will be able to acquire, format, analyze, and visualize various types of political data using the statistical programming language R. This course is not a statistics class, but it will increase the capacity of students to thrive in future statistics classes. While no background in statistics or political science is required, students are expected to be generally familiar with contemporary computing environments (e.g. know how to use a computer) and have a willingness to learn a variety of data science tools. You are encouraged (but certainly not required) to register for both this course and PSCI 338 at the same time, as the courses cover distinct, but complimentary material.
Taught by: Hopkins
Course not offered every year
Activity: Recitation
1.0 Course Unit

PSCI 107 Introduction to Data Science
This course is designed to introduce students to comparative political analysis. How can the political behavior, circumstances, institutions, and dynamic patterns of change that people experience in very different societies be analyzed using the same set of concepts and theories? Key themes include nationalism, political culture, democratization, authoritarianism, and the nature of protracted conflict.

PSCI 110 Introduction to Comparative Politics
This course tackles four theoretical and empirical challenges related to gender and political equality: the extension of citizenship rights and voting rights to women; the problem of women's persistent under-representation in politics; the nature of the gender gap in preferences across time and space; and the possibilities for substantive representation. We will focus about half the class on the US (contrasting the experiences of white and black women and men in politics) and the other half on other countries, detailing how different party systems, variation in electoral rules (like proportional representation), and institutional innovations such as gender quotas, enable or constrain gender equality in politics.

PSCI 111 Gender and Elections in America and Beyond
This course will introduce students to socialism in theory and practice, with an understanding of how and why some people advocate it as an ideology that supports economic equality; others decry it as a path towards excessive state control. But what does the word socialism really mean? Why does it seem to mean different things to different people? What is the historical background of socialism? Are there meaningful differences between different forms of socialism or are they more or less the same thing? Which societies are socialist in practice, both past and present? What about the US? What are the different proposals US and other Socialists make today? What is their logic? How socialist are they? Are their policy ideas or bad? What effects would they have? This course will introduce students to socialism in theory and practice, with an emphasis on different models of Western social democracy and how they are impacting political discourse right now.

PSCI 116 Comparative Politics of Developing Areas
This is a comparative politics course that examines patterns of political and socio-economic change across the developing post-colonial areas of Asia, Africa, and Latin America. The course is not as concerned with keeping up with current events as with analyzing the relationships between colonial legacies, the initial challenges of post-colonial political and socio-economic development, and how these interact with contemporary problems and global trends. Although chiefly concerned with the potential change within countries, it will also devote substantial attention to economic, socio-cultural and international factors. The course is divided into three parts. The first examines the common and distinctive features of colonial rule in different regions as well as the varying challenges of political and economic development in diverse post-colonial settings. The second part focuses on elaborating on the themes developed in the first by looking more closely at the developmental experiences of Brazil, India, Algeria, Iran, Nigeria, and South Korea (with passing references to other countries as comparative references). The third part focuses on trends and challenges that have emerged over the last two decades - including market reforms, democratization, and problems related to gender and the environment. The concluding lecture considers the implications of the distinctive perspectives offered above for revising some of the assumptions behind U.S. foreign policy and the organization of global institutions.

PSCI 130 Introduction to American Politics
This course is intended to introduce students to the national institutions and political processes of American government. What are the historical and philosophical foundations of the American Republic? How does American public policy get made, who makes it, and who benefits? Is a constitutional fabric woven in 1787 good enough for today? How, if at all, should American government be changed, and why? What is politics and why bother to study it? If these sorts of questions interest you, then this course will be a congenial home. It is designed to explore such questions while teaching students the basics of American politics and government.

Course not offered every year
Also Offered As: HSOC 135
Activity: Lecture
1.0 Course Unit

PSCI 136 Urban Politics in the United States
This course explores the political character of contemporary urban American life. Particular attention is given to the relationship between urban politics and policymaking – including the structural and ideological factors (e.g., dynamics of political economy, race, ethnicity, pluralism and gender) that constrain the policy context and shape the urban environment as a terrain for commingling, competition and conflict over uses of space. It makes considerable use of case studies to throw into relief the complex and sometimes subtle processes that shape urban life.

Taught by: Summers
Course not offered every year
Activity: Seminar
1.0 Course Unit
PSCI 144 Communism
The rise and fall of Communism dominated the history of the short twentieth century from the Russian revolution of 1917 to the collapse of the Soviet Union in 1991. As a system of government, Communism is more or less dead, but its utopian ideals of liberation from exploitation and want live on. Communism remains the one political-economic system that presented, for a time, an alternative to global capitalism. In this course, students will gain an introduction to socialist and Communist political thought and explore Communist political and economic regimes - their successes and failures, critics and dissidents, efforts at reform, and causes of collapse. We will learn about the remnants of Communism in China, North Korea, and Cuba and efforts of contemporary theorists to imagine a future for Communism.

1.0 Course Unit

PSCI 151 International Security
This lecture course introduces students to the subfield of international security or strategic studies. In order to grasp the usefulness of the theoretical ideas presented in readings and lectures, abstract concepts are linked with a study of the national security policies states have adopted in the decades following World War II. Topics include current debates about nuclear proliferation, terrorism, the Iraq war, Europe’s changing international role, the rise of China, Asian ‘flashpoints’ (Korea, the Taiwan Strait), and US security policy for the 21st century - considering some of the main strategic alternatives to the US as well as their implications for the types of forces deployed (the impact of the ‘revolution in military affairs,’ the future of missile defense, and the economic burden to be shouldered).

Taught by: Goldstein
One-term course offered either term
Activity: Recitation
1.0 Course Unit

PSCI 152 International Political Economy
This course examines the politics of international economic relations. The course will analyze the interplay between politics and economics in three broad areas: international trade, international finance, and economic development. In each section, we will first discuss economic theories that explain the causes and consequences of international commerce, capital flows, and economic growth. We will then explore how political interests, institutions, and ideas alter these predictions, examining both historical examples and current policy debates.

Taught by: Gray, Brutger
Course not offered every year
Activity: Recitation
1.0 Course Unit

PSCI 153 International Law & Institutions
This lecture course examines the role that international law and institutions play in international relations. The course begins by exploring broad theoretical questions - questions about why states create international law and international institutions; how states design institutions; the impact that institutional design may have on the effectiveness of international institutions; and the conditions under which states are likely to comply with the rules set out by international institutions and the dictates of international law. Specific topics include collective security institutions such as the League of Nations, the United Nations, and NATO; human rights law; the laws of war; international intervention and peacekeeping; international justice and the International Criminal Court; environmental law; international trade law and the World Trade Organization; economic development and the World Bank; and international finance and the role of the International Monetary Fund.

One-term course offered either term

Taught by: Norton, Green
Course not offered every year
Also Offered As: CLST 185
Activity: Recitation
0.0 Course Units
PSCI 181 Modern Political Thought
This course will provide an overview of major figures and themes of modern political thought. We will focus on themes and questions pertinent to political theory in the modern era, particularly focusing on the relationship of the individual to community, society, and state. Although the emergence of the individual as a central moral, political, and conceptual category arguably began in earlier eras, it is in the seventeenth century that it takes firm hold in defining the state, political institutions, moral thinking, and social relations. The centrality of 'the individual' has created difficulties, even paradoxes, for community and social relations, and political theorists have struggled to reconcile those throughout the modern era. We will consider the political forms that emerged out of those struggles, as well as the changed and distinctly 'modern' conceptualizations of political theory such as freedom, responsibility, justice, rights and obligations, as central categories for organizing moral and political life.

Course not offered every year
Activity: Recitation
1.0 Course Unit

PSCI 182 Contemporary Political Thought
This course is intended as a general introduction to political theory since 1900, examining prominent theorists of politics including Max Weber, Hannah Arendt, Carl Schmitt, Isaiah Berlin, Jurgen Habermas, John Rawls, Michel Foucault, and Jacques Derrida. Our theme for the Fall 2012 course will be: The Disenchantment of the World? Topics include: the nature of the the political and the concern, particular to the last century, that politics is itself under attack; the spread of liberal democracy across the globe and a critical appraisal of the moral meaning of this regime; contemporary theories of social justice; and an exploration of various issues pertaining to violence and the politics of security.
Taught by: Green, Hirschmann
Course usually offered in fall term

Activity: Lecture
1.0 Course Unit

PSCI 208 International Organizations in Latin America
International Organizations (IOs) play a powerful role in mitigating conflict at the global level. What role do they play in solving problems related to global politics, economic development, corruption, inequality and civil society in Latin America? How much power, influence and control do they possess in the region? This course examines the role and impact international organizations have had on Latin America since the mid-20th century. After a review of theoretical and methodological perspectives on the significance of IOs in international relations, students will examine the workings, issues and often controversies surrounding IOs in Latin America, including the IMF, World Bank, UN, OAS and ICC as well as regional organizations such as the Inter-American Court of Human Rights and area trade blocs and agreements of Mercosur, NAFTA and others. There will be a special focus on the Organization of American States in preparation for the Washington Model OAS students will be invited to attend from April 6-10, 2020 in Washington, D.C. Students attending this simulation will represent the delegation of Dominican Republic. In addition, the course hosts policymakers and scholars as guest speakers throughout the semester.

PSCI 210 Contemporary African Politics
This class provides an introduction to contemporary African politics. The core questions that motivate the course are (i) to what extent are political outcomes in contemporary Africa a consequence of its history, culture and geography? (ii) Why are state structures and institutions weaker in Africa than elsewhere? (iii) What accounts for Africa's relatively slow economic growth? (iv) Why have some African countries been plagued by high levels of political violence while others have not? (v) What explains the behavior of key African actors: parties or politicians?

PSCI 217 Russian Politics
This course will present an in-depth examination of political, economic and social change in post-Soviet Russia within a historical context. After a brief discussion of contemporary problems in Russia, the first half of the course will delve into the rise of communism in 1917, the evolution of the Soviet regime, and the tensions between ideology and practice over the seventy years of communist rule up until 1985. The second part of the course will begin with an examination of the Gorbachev period and the competing interpretations of how the events between 1985 and 1991 may have contributed to the collapse of the Soviet Union. We will then proceed to make sense of the continuities and changes in politics, economics and society in contemporary Russia. Important topics will include the confrontations accompanying the adoption of a new constitution, the emergence of competing ideologies and parties, the struggle over economic privatization, the question of federalism and nationalism, social and political implications of economic reform, and prospects for Russia’s future in the Putin and post-Putin era.
Taught by: Lynch
Course not offered every year
Activity: Recitation
1.0 Course Unit

PSCI 218 Politics of Post War Western Europe
This course examines political institutions, processes and events in postwar Western Europe. The focus will be a comparative analysis of such topics as political parties and systems, electoral behavior, as well as social and economic policy. We will also examine the way in which domestic processes and policies interact with membership in the European Union.
Taught by: Lynch
Course not offered every year
Activity: Recitation
1.0 Course Unit

PSCI 219 Contemporary Chinese Politics
This lecture course introduces students to the politics of the Peoples Republic of China. Complementing offerings in other departments, this course emphasizes events in the period since the Chinese Communist Party established its regime in 1949. In addition to surveying the political history of contemporary China, we will assess the meaning of these events by drawing upon theories about the nature and significance of ideology and organization in communist regimes, factionalism and its relationship to policy formulation and implementation, and general issues of political and economic development. Although the principal focus is on the domestic politics of the PRC, the course includes several lectures examining China’s international relations.
Taught by: Goldstein
One-term course offered either term
Activity: Recitation
1.0 Course Unit
**PSCI 220 The Politics of Slow Moving Crises**

Slow-moving policy crises like climate change, population growth/change (aging, immigration, pensions), and water availability involve policy areas with a seemingly high probability of negative consequences, where the need for policy coordination seems clear but the pressures for coordination are often somewhat removed, since the consequences of policy action or inaction may be felt only years down the road.

The questions underlying these cases are: how does a democratic political system, which operates on the short time horizon of elections, complicate policy decisions regarding social and natural processes with much longer time horizons (say decades rather than years), and for which the policy consequences may be quite serious, not to say catastrophic, but far removed from the political timeframe. How do politicians and policy makers evaluate the appropriate response to the problems posed by these processes? If the usual policy making framework is inadequate to responding to these kinds of processes and the problems they pose, then how can the institutions and processes of policy-making be amended to allow for improvement? What lessons can be drawn from other fields (psychology, economics, political science, sociology, etc.) and other decision-making arenas? On one level the goal of this course is to introduce students to key concepts of rational choice, externalities, risk assessment, time horizons, event probabilities, path dependency and unintended consequences through readings in political science, economics and sociology; and on another level to give students the tools to evaluate failures (and successes) of policy responses in areas in which policy consequences are often far removed, temporally and otherwise, from those making decisions.

---

**PSCI 223 Issues Comp Pol/Gender**

Struggles over gender roles and rights have been prominent in the Middle East and North Africa since the 19th century and continue to mark contemporary political and social discourses. Since the colonial period, gender categories and sexualities have been critiqued and negotiated on behalf of empire, the nation, modernity, personal freedom; today debates and struggles over global rights, Islamic law, and modernity continue to mark politics. Despite the particularity of ideas and events in the region, a comparative framework helps to overcome exoticization of the region and develop a more acute understanding. The topics of the course include engagement with the discourse of the Exotic Other, the effects of modernity, the role of nationalism and the state, state-society negotiation, Islamic formulations, and continuously, the question: where does change come from? Issues of the veil and Islamic dress the expansion of anti-gay laws, the disciplining of bodies in state and social settings - these issues of gender and sexuality extend the realm of the political into intimate spaces. Assignments include a midterm and a short paper that develops research and analytical skills. The course is 200 level. While background in the study of the Middle East or gender is not necessary, an introductory political science or social science course is required.

---

**PSCI 224 Political Economy of Development**

The course surveys some of the principal themes in the political economies of lower income countries. The questions we shall seek to address cover a broad terrain. Who are the key actors? What are their beliefs, interests and motivations? What are their constraints? How are these being affected by closer economic linkages between national economies? While there is no single integrative framework or paradigm into which these themes neatly fit, a common thread is the changing dynamics and interplay between the local, the national, and the global. A familiarity with basic economic concepts will be helpful, but is not necessary.

Taught by: Kapur
Course not offered every year
Activity: Recitation
1.0 Course Unit
**PSCI 225 Sex and Power**

Gender has been a primary way of organizing power relations throughout history. This class asks how transformations in the global economy, technological change, new patterns of household formation, and social movements, have influenced women’s access to economic and political positions over the past two centuries. We will examine how women’s mobilization contributed to the abolition of slavery, reform of property and franchise laws, and to the formation of the welfare state. Next, we turn to thinking about how women's increasing labor force participation was hindered by institutions like marriage bars and union policy. Third, we look at cross-national patterns of women’s political participation and descriptive representation including whether and how the adoption of electoral quotas influences gender equality more generally. Finally we study how institutional norms and gender stereotypes affect political representation. This class will draw on examples from around the world, and will look a experiences of women from all economic, social, and aspirutive backgrounds.

Taught by: Teele
Course not offered every year
Also Offered As: GSWS 227
Activity: Lecture
1.0 Course Unit

**PSCI 226 Ethnic Conflict**

This course explains ethnic conflict, focusing on its most violent form, civil war. There have been more than 170 civil wars and many more episodes of lower-level armed conflict around the world since 1945. Most of these conflicts have been fought along ethnic lines. Antipathies and competition between ethnic groups are a constant feature of human history. Across societies, there is evidence of in-group bias and out-group prejudice in human behavior. Some theorists argue that people are hard-wired to dislike, and even fight against, members of ethnic out-groups. But large-scale ethnic violence is relatively rare. Under what conditions does ethnic conflict become violent and when does that violence rise to the level of civil war? What interventions are effective in ending these wars and returning countries to peace? Is ethnic conflict rooted in economic factors, such as poverty, growth decline, commodity price shocks, or dependence on mineral wealth? Or is it due to political reasons, such as repression, authoritarianism, or political exclusion of minority groups? This course addresses these questions from an interdisciplinary perspective, drawing on qualitative political science, history, social psychology, and behavioral economics. By the end of the course, students should be able to discuss these questions with reference to ongoing cases of civil war in Iraq, Afghanistan, and Syria as well as historical cases such as Bosnia and Rwanda. Prerequisite: Introductory courses in Comparative Politics, International Relations, and Economics. At least one course in Quantitative Methods will be helpful.

**PSCI 227 China: Institution & the Economy**

The rise of China since its economic reform starting from 1978 is one of the most important developments the world witnessed in the twenty-first century. In this seminar course, we explore topics including the political logic of China’s economic reform, the institutional foundations of the Chinese economic growth miracle, as well as detailed analysis of Chinese financial markets, housing markets, fiscal reform, corruption/anti-corruption, labor market transitions, China's integration into the world economy, village democracy and its impact on resource allocation, the impact of population ageing, the impact of China on US economy and politics, among others. The discussions will focus on China, but will relate broadly to emerging and developed economies. The course will be based on reading and discussing research articles and books selected by the instructors.

1.0 Course Unit

**PSCI 231 Race and Ethnic Politics**

This course examines the role of race and ethnicity in the political discourse through a comparative survey of recent literature on the historical and contemporary political experiences of the four major minority groups (Blacks or African Americans, American Indians, Latinos or Hispanic Americans, and Asian Americans). A few of the key topics will include assimilation and acculturation seen in the Asian American community, understanding the political direction of Black America in a pre and post Civil Rights era, and assessing the emergence of Hispanics as the largest minority group and the political impact of this demographic change. Throughout the semester, the course will introduce students to significant minority legislation, political behavior, social movements, litigation/court rulings, media, and various forms of public opinion that have shaped the history of racial and ethnic minority relations in this country. Readings are drawn from books and articles written by contemporary political scientists.

Taught by: Gillon
Course not offered every year
Also Offered As: AFRC 232, LALS 232
Activity: Recitation
1.0 Course Unit
PSCI 232 Introduction to Political Communication
This course is an introduction to the field of political communication and conceptual approaches to analyzing communication in various forms, including advertising, speech making, campaign debates, and candidates’ and office-holders’ uses of social media and efforts to frame news. The focus of this course is on the interplay in the U.S. between media and politics. The course includes a history of campaign practices from the 1952 presidential contest through the election of 2020.
Taught by: Jamieson
Course usually offered in fall term
Also Offered As: COMM 226
Activity: Lecture
1.0 Course Unit

PSCI 233 Introduction to African American Politics
This course is an historical survey of the main bases and substances of politics among black Americans and the relation of black politics to the American political order. Its two main objectives are: 1) to provide a general sense of pertinent historical issues and relations as a way of helping to make sense of the present and 2) to develop criteria for evaluating political scientists’ and others’ claims regarding the status and characteristics of black American political activity.
Taught by: Reed
Course not offered every year
Activity: Lecture
1.0 Course Unit

PSCI 234 Changing American Electorate
In 1960, a Democratic candidate won a very narrow Presidential victory with just 100,000 votes; in 2000, the Democratic candidate lost but received 500,000 more votes than his opponent. Still, contemporary scholars and journalists have made a variety of arguments about just how much the American political landscape changed in the intervening 40 years, often calling recent decades a transformation. This course explores and critically evaluates those arguments. Key questions include: how, if at all, have Americans political attitudes and ideologies changed? How have their connections to politics changed? What has this meant for the fortunes and strategies of the two parties? How have the parties base voters and swing voters changed? What changes in American society have advantaged some political messages and parties at the expense of others? Focusing primarily on mass-level politics, we consider a wide range of potential causes, including the role of race in American politics, suburbanization, economic transformations, the evolving constellation and structure of interest groups, declining social capital, the changing role of religion, immigration, and the actions of parties and political elites. For three weeks in the semester, we will take a break from considering broader trends to look at specific elections in some depth.
Taught by: Hopkins
Course not offered every year
Activity: Recitation
1.0 Course Unit

PSCI 236 Public Policy Process
This course introduces students to the theories and practice of the policy-making process. There are four primary learning objectives. First, understanding how the structure of political institutions matter for the policies that they produce. Second, recognizing the constraints that policy makers face when making decisions on behalf of the public. Third, identifying the strategies that can be used to overcome these constraints. Fourth, knowing the toolbox that is available to participants in the policy-making process to help get their preferred strategies implemented. While our focus will primarily be on American political institutions, many of the ideas and topics discussed in the class apply broadly to other democratic systems of government.
Taught by: Levendusky, Meredith
Course usually offered in fall term
Also Offered As: PPE 312
Activity: Recitation
1.0 Course Unit

PSCI 237 The American Presidency
This course surveys the institutional development of the American presidency from the Constitutional convention through the current administration. It examines the politics of presidential leadership, and how the executive branch functions. An underlying theme of the course is the tensions between the presidency, leadership, and democracy.
Taught by: Gottschalk
Course usually offered in fall term
Activity: Recitation
1.0 Course Unit

PSCI 241 Polarization
Are ordinary Americans polarized? What about political elites? Is there any connection between mass and elite polarization? What do we even mean when we say some group is ‘polarized’? This class will explore these questions in some detail, and try to sort out all of the discussions about polarizations, red states and blue states, and the like.
Taught by: Levendusky
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 243 Dilemmas of Immigration
Beneath the daily headlines about refugees blocked entry, and undocumented migrants deported there is a set of hard questions which deserve closer attention: Should countries have borders? If countries have borders, how should they decide who is kept out and who is allowed in? How many immigrants is ‘enough’? Are immigrants equally desirable? What kinds of obligations do immigrants have to their receiving society? What kinds of obligations do host societies have to immigrants? Should there be ‘pathways’ to citizenship? Should citizenship be automatic? Can citizenship be earned? This course explores these and other dilemmas raised by immigration.
Taught by: Jones-Correa
Course offered spring; even-numbered years
Activity: Lecture
1.0 Course Unit
PSCI 247 American Campaigns and Elections
This lecture course will teach students about American campaigns and elections, from the local level to the presidential level. We will cover as many topics as possible including: the nominating process, the general campaign, campaign strategy, turnout, campaign finance, the role of issues, the importance of the economy, the power of party identification, and the role of data analysis used by campaign professionals. We will also consider how these factors matter in terms of who wins the election. In addition to the literature on campaigns and election, this lecture will put major focus on the most recent 2016 presidential election relative to what the literature would have predicted. After the first part of the course about presidential elections, the second part will focus on Congressional elections (and a bit about state and local elections). Lastly, the third part of the course will examine how data analytics that originated in political science are now being used by campaign practitioners to win elections. Taught by: Gooch
Course not offered every year
Activity: Lecture
1.0 Course Unit

PSCI 250 U.S. Intervention in Latin America
Why has the United States government participated in regime change in Latin America? How have these interventions affected Latin American political and economic outcomes? How have they helped or hurt U.S. interests in the region? This lecture course provides an introduction to the history and politics of U.S. participation in regime change in Latin America since 1949. For each event, the course will help students understand (1) the goals of the U.S. government; (2) the historical and political context of the intervention; and (3) the outcomes and consequences, both in Latin America and for the United States. One set of short writing assignments will train students to identify the main argument of a reading and assess the quality of the evidence presented in support of that argument; a second set of short writing assignments will train students to make and defend their own argument (see draft syllabus for details).
Taught by: Kronick
Course offered spring; even-numbered years
Also Offered As: LALS 250
Activity: Recitation
1.0 Course Unit

PSCI 251 Arab Israeli Relations
In this course the Arab-Israeli dispute from 1948 to the present will serve as a vehicle for understanding how domestic and global political processes interact to shape, contain, or aggravate Middle Eastern wars between states and non-state actors. Particular stress will be placed on understanding how wars affect international politics in states and political organizations and how ideological and structural features of states and organizations find expression in wars and complicate or enable the search for peace. In addition, the key features of the conflict will be interpreted as both a clash between the political interests of national and/or religious groups and as a reflection of global political power struggles. Attention will be given toward the end of the course to alternative ideas about possible resolution of the conflict as well as to the increasingly prominent argument that, in this case, there is no solution.
Taught by: Lustick
One-term course offered either term
Also Offered As: JWST 248
Activity: Recitation
1.0 Course Unit

PSCI 252 War, Strategy and Politics
This class examines the strategy and politics of warfare, focusing on the way actors plan military campaigns and the factors that are likely to lead to victory and defeat. The course readings center in particular on the factors driving changes in warfare and civil-military relations. The course will cover a wide range of topics from theories of war-fighting to historical military campaigns to insurgency warfare, terrorism, and the future of war.
Taught by: Horowitz
One-term course offered either term
Activity: Recitation
1.0 Course Unit

PSCI 253 International Politics of the Middle East
This course will focus primarily on episodes of external intervention by Great Powers in the politics of Middle Eastern states. We shall begin by examining the emergence of the Middle Eastern state system after the disappearance of the Ottoman Empire in the early part of the 20th century. This discussion will provide opportunities to develop key concepts in the study of international politics and will serve as crucial historical background. We shall then turn our attention to the primary concern of the course - a systematic consideration of the motives, operational results, and long-term implications of a number of important examples of intervention by Great Powers in the Middle East. Among the episodes to be considered will be British policies toward the end of World War I, in Palestine in the 1930s, and, along with the French, in Suez in 1956. Soviet intervention in the first Arab-Israeli war, in 1948, will be analyzed along with Soviet policies toward Egypt in the early 1970s. American intervention in Iran in 1953 and in the Gulf War in 1991 will also be examined.
Taught by: Lustick
Course usually offered in spring term
Also Offered As: JWST 253
Activity: Recitation
1.0 Course Unit

PSCI 255 The Causes of War & Peace
The existence and endurance of war provides one of the most important puzzles of politics: why is it that people keep making use of such a destructive and painful way of resolving their disputes? This course addresses this question and the related question of what factors contribute to peace, focusing on both academic and popular explanations for conflict, including among others anarchy, over-optimism, shifting power, diversionary war, the malevolent influence of war profiteers, and a variety of explanations grounded in culture, religion and other ideational variables. In this discussion, we will focus on both interstate and civil wars, and on both the onset and the eventual termination of war. At various points in the course we will discuss a wide range of historical and contemporary cases, including the World Wars, Vietnam, the Gulf War, the Iraq War, the various Arab-Israeli wars, the India-Pakistan rivalry, and a number of recent civil conflicts such as the wars in Yugoslavia, Congo, and Sudan. The course concludes with a discussion of strategies for managing ongoing conflicts and for securing peace in post war settings.

PSCI 259 Chinese Foreign Policy
This seminar examines the influences on and patterns of China's international relations. Topics to be covered include the following: theoretical approaches to analyzing foreign policy; the historical legacy and evolution of China's foreign policy; contemporary China’s foreign policy on traditional national security concerns as well as economic, environmental, and humanitarian issues; China’s military modernization; China’s foreign policy in Asia, Africa, Europe, and Latin America; China’s rise and its implications for relations with the United States. The class is a seminar in which student preparation and participation will be essential. Students planning to enroll in the course must have taken PSCI 219 (or, with the instructor’s permission, its equivalent). You are expected to complete all required readings each week and come to seminar meetings prepared to discuss them.

PSCI 261 Emerging Technologies and the Future of the World
Technological change is always occurring, but the rate of change seems to be accelerating. Advances in robotics, artificial intelligence, cyber, biotechnology, and other arenas generate promise as well as peril for humanity. Will these emerging technologies unleash the innovative capacity of the world, generating new opportunities that help people live meaningful lives? Alternatively, are automation and other technologies chipping away at the labor market in a way that could create severe generational dislocation at best, and national and international turmoil at worst? These questions are important, and have consequences for how we live our lives, how nations interact, and the future of the world writ large. Emerging technologies could shape public policy at the local, national, and international level, and raise questions of fairness, ethics, and transparency. This course takes a unique approach, combining insights from engineering, political science, and law in an interdisciplinary way that will expose students both to the key technologies that could shape the future and ways to think about their potential politics, and society.

Activity: Seminar
1.0 Course Unit

PSCI 267 Russia and Eastern Europe in International Affairs
Russia and the European Union (EU) are engaged in a battle for influence in Eastern Europe. EU foreign policy towards its Eastern neighbors is based on economic integration and the carrot of membership. With the application of this powerful incentive, Central and Southeastern European countries such as Poland, Hungary, the Czech Republic, and Croatia have progressed rapidly towards integration with the EU (and NATO). Yet, given Russia’s opposition to the further enlargement, membership is off the table for the large semi-Western powers such as Russia itself and Turkey and the smaller countries inhabiting an emerging buffer zone between Russia and the EU, such as Georgia, Ukraine, Azerbaijan, Moldova, and Belarus. These in-between countries find themselves subject to intense competition for influence between Eastern and Western powers. In this context, EU countries must balance their energy dependence on Russia and need for new markets and geopolitical stability with concern for human rights, democratic governance, and self-determination. What are the trade-offs implicit in the foreign policies of Russia, EU member states, and Eastern Europe? What are the best policy approaches? What are the main opportunities and obstacles?

1.0 Course Unit

PSCI 271 Constitutional Law: Public Power & Civil Rights to 1912
This course examines American constitutional development from the eve of WWI through the period of Progressive reforms, the rise of the Jim Crow system, and the Spanish American War. Issues include the division of powers between state and national governments, and the branches of the federal government; economic powers of private actors and government regulators; the authority of governments to enforce or transform racial and gender hierarchies; and the extent of religious and expressive freedoms and rights of persons accused of crimes. We will pay special attention to the changing role of the Supreme Court and its decisions in interpreting and shaping American constitutionalism, and we will also read legislative and executive constitutional arguments, party platforms, and other influential statements of American constitutional thought.

**PSCI 282 Lying, Cheating, Stealing, and Killing: How to Think About Professional Ethic**
Professionals - in business, medicine, law, and politics - face myriad ethical dilemmas in their daily work life that challenge, and sometimes conflict with, the moral commitments that guide their everyday life. This course systematically examines the ethical dimensions of these four professional roles, asking questions such as: Are there limits to what we should sell? How far should competitors go to ‘win’? Who should get ventilators in a flu pandemic? Is it morally permissible for physicians to assist in suicide? Should lawyers represent terrorists or child killers? How far does attorney-client privilege go? Is it morally justifiable to torture enemy combatants? Should politicians lie?

Also Offered As: BIE 282
Activity: Lecture
1.0 Course Unit

**PSCI 286 Islamist Political Theory: From al-Banna to bin Laden**
This course focuses on one of the most important but least understood strands of Muslim political theory. Islamist political thought. We begin by defining such politically-laden terms as Islam, Islamism, the West, terrorism, jihadism, etc. We then systematically analyze the arguments of a range of Islamist thinkers and organizations, including al-Banna, Qutb, Mawdudi, al-Ghazali, Khomeini, al-Qaradawi, bin Laden, Hamas and ISIS. Among the questions central to the course are: what is the relationship, if any, between Islamism and democracy? How do Islamists seek to remake the modern state? What explicit claims about women, and implicit assumptions about gender, characterize the work of many Islamist thinkers, and why does this matter? What does jihad mean, and does it necessarily legitimate violence? Relatedly, is violence ever justifiable, and under what conditions? What are the arguments for globalizing jihad? And importantly: why ask these questions rather than others; what assumptions are built into them; and what kinds of political dangers do they court? Prior coursework in political theory, philosophy or on Islam is strongly recommended. Open to first years with permission of the instructor.
Taught by: Euben
Prerequisites: There are no prerequisites, but prior coursework in political theory, philosophy or on Islam is strongly recommended. Open to first years with permission of the instructor.

**PSCI 313 People of the Land: Indigeneity and Politics in Argentina and Chile**
This undergraduate seminar compares the evolution of relations between settler colonial nation-states and indigenous peoples and movements throughout the Americas, with a particular focus on the Mapuche people of the Patagonia region, in the south of nowadays Argentina and Chile. The main goal of the course is to comparatively study the organization of indigenous communities and analyze their political demands regarding plurinationality, self-determination, territory, prior consultation, living well, and intercultural education and health care, as well as the different ways in which settler colonial nation-states accommodate or respond to such demands. The course is organized in three parts. The first part of the course studies indigenous rights in international law and in global affairs, particularly in the United Nations, the Organization of American States, and the International Labor Organization. The second part of the course studies indigenous organization, movements, parties, and political representation, in Latin America since the 1990s, when indigenous demands acquired national and international notoriety throughout Latin America. The third part of the course zooms in a comparative analysis of the relationship between the Mapuche (Mapu: land; -che: people) and the formation and evolution of the settler colonial nation-states in Argentina and Chile. Once international travel resumes, the course will have an eight-day travel component. Students will travel to the south of Argentina to visit indigenous Mapuche communities to experience and learn first-hand about their culture, intercultural education and health, recuperation of identity and language practices, different models of economic sustainability, and of territorial claims and arrangements - including co-management between indigenous communities and the National Parks system.
Taught by: Falletti
Course offered spring; odd-numbered years
Prerequisite: Intermediate to Advance Level of Spanish
Activity: Seminar
1.0 Course Unit

**PSCI 314 Democracy in Latin America**
Since the inception of the twenty first century, Latin America has undergone major economic, social, and political transformations. Many of the neoliberal policies of the last quarter of the twentieth century were reversed or revisited, economic inequality decreased significantly across the region, and anumber of governments turned to the left of the political spectrum, often instituting major public policy and constitutional reforms. How have those changes affected citizenship and democracy in the region? In particular, have citizens' channels for representation and participation changed in the recent past? What has happened to local participatory institutions since the return to power in some countries of the region? The course will explore these and related questions. Students will develop their own research projects throughout the semester. While not a requirement, the ability to read Spanish or Portuguese will significantly enhance students' learning experience.
Taught by: Falletti
One-term course offered either term

PSCI 320 Who Gets Elected and Why? The Science of Politics
What does it take to get elected to office? What are the key elements of a successful political campaign? What are the crucial issues guiding campaigns and elections in the U.S. at the beginning of the 21st century? This class will address the process and results of electoral politics at the local, state, and federal levels. Course participants will study the stages and strategies of running for public office and will discuss the various influences on getting elected, including: Campaign finance and fundraising, demographics, polling, the media, staffing, economics, and party organization. Each week we will be joined by guest speakers who are nationally recognized professionals, with expertise in different areas of the campaign and election process. Students will also analyze campaign case studies and the career of the instructor himself. Edward G. Rendell is the former Mayor of Philadelphia, former Chair of the Democratic National Committee, and former Governor of Pennsylvania. A note if you are not able to gain a seat in this course: Please write to urbs@sas.upenn.edu to be added to a waitlist. Waitlisted students are encouraged not to miss the first class. The professors will be able to register many waitlisted students in the first week of the semester, but only after the first class session on Monday, Sept. 14th, 6-9pm.
Taught by: Rendell
Course usually offered in fall term
Also Offered As: GAFL 509, URBS 320
Activity: Lecture
1.0 Course Unit

PSCI 327 Modern India
This course attempts to examine the experience of representative democracy in India and the country’s development record in a historical framework. It will ask questions such as: How did representative democracy emerge in India and what explains its persistence? What are the sources of its vulnerability? What kind of a sense of nationhood does this democratic experience rest upon? What are the exclusions built into this conception of nationhood? What is the relationship between India’s development experience and its democratic experiment? How have India’s ‘traditional’ institutions adapted or failed to adapt to modern circumstances? Why has India performed well in certain economic sectors such as IT even while its record in providing basic social services has been poor? How has India’s self-perception about its place in the world changed in recent years and what are its implications?

1.0 Course Unit

PSCI 328 Diplomacy in the Americas - The Penn Model OAS Program
‘Diplomacy in the Americas’ an academically based community service course in which students work with Philadelphia and Norristown public school students to explore solutions to critical problems facing the Americas. Entrenched political, economic, and social inequality, combined with environmental degradation, weak institutions, pervasive health epidemics, weapon proliferation, and other issues pose formidable hurdles for strengthening democratic ideals and institutions. The Organization of the American States (OAS), the world’s oldest regional organization, is uniquely poised to confront these challenges. ‘Diplomacy in the Americas’ guides students through the process of writing policy resolutions as though the students were Organization of the American States (OAS) diplomats, basing their research and proposals on democracy, development, security, and human rights - the four pillars of the OAS. Students will also read literature about what it means to educate for a democracy and global citizenry, and they will have the opportunity to turn theory into practice by creating and executing curriculum to teach and mentor the high school students through interactive and experiential pedagogies.
Taught by: Bartch
Course usually offered in fall term

PSCI 333 Political Polling
Political polls are a central feature of elections and are ubiquitously employed to understand and explain voter intentions and public opinion. This course will examine political polling by focusing on four main areas of consideration. First, what is the role of political polls in a functioning democracy? This area will explore the theoretical justifications for polling as a representation of public opinion. Second, the course will explore the business and use of political polling, including media coverage of polls, use by politicians for political strategy and messaging, and the impact polls have on elections specifically and politics more broadly. The third area will focus on the nuts and bolts of election and political polls, specifically with regard to exploring traditional questions and scales used for political measurement; the construction and considerations of likely voter models; measurement of the horserace; and samples and modes used for election polls. The course will additionally cover a fourth area of special topics, which will include exit polling, prediction markets, polling aggregation, and other topics. It is not necessary for students to have any specialized mathematical or statistical background for this course.
Equivalent R based course if prerequisite not met.

PSCI 338 Statistical Methods PSCI
The goal of this class is to expose students to the process by which quantitative political science research is conducted. The class will take us down three separate, but related tracks. Track one will teach some basic tools necessary to conduct quantitative political science research. Topics covered will include descriptive statistics, sampling, probability and statistical theory, and regression analysis. However, conducting empirical research requires that we actually be able to apply these tools. Thus, track two will teach us how to implement some of these basic tools using the computer program R. However, if we want to implement these tools, we also need to be able to develop hypotheses that we want to test. Thus, track three will teach some basics in research design. Topics will include independent and dependent variables, generating testable hypotheses, and issues in causality. You are encouraged to register for both this course and PSCI 107 at the same time, as the courses cover distinct but complementary material. But there are no prerequisites nor is registering for PSCI 107 necessary, in order to take this course. The class satisfies the College of Arts and Sciences Quantitative Data Analysis (QDA) requirement.

PSCI 353 Security & Anxiety at International Borders: Turkey & USA in Global Perspective
Borders are increasingly contested in global order, yet function as distinct markers of statehood and sovereignty. How states control their borders physically is an important manifestation of their sovereign rights. In this course, we explore the meaning attached to international borders for two allies in very different regions of the world, Turkey and the United States. We inquire into the role that national territorial and international borders have come to play in their national identities. We will place these two countries in the context of their 'neighborhoods' to understand the threats and opportunities seem to attend border spaces. With their extensive coastlines and land boundaries, these states are subject in different ways to external influences. Both have extensive trade relations with the rest of the world, as well as extensive illicit economies along their borders. The United States is 'a nation of immigrants' currently questioning the value of immigration. Turkey is host to the largest number of refugees in the world. Each state faces its own version of an ontological crisis, as they decide how to engage, filter or deflect extraterritorial flows and influences. These developments raise intense issues of identities and boundaries - in particular the question of how different societies engage in border protection. This seminar focuses on the comparative experiences of Turkey and the USA in their methods of maintaining borders and dealing with anxiety about uncontrolled transnational flows of products and people across their borders. The seminar explores how security and insecurity are understood, produced, and implemented in the form of border security policies. The comparative study of American and Turkish border control will uncover both similarities in the framing of border policies, but also distinct differences on how these two countries deal with border security. The international focus will enable students to appreciate the global aspect of border security issues, and research multiple questions on the extent to which what is facing the USA in terms of border security is not unique on its own. This course will be co-taught with a professor and students at Sabanci University. We will overlap with their classroom for roughly half of out three hour seminar meeting, and the professors will co-teach the course. Common readings will be discussed each week, but each Professor will assign additional readings of her choice to complement the common discussions. In the Penn seminar, we will aim to produce a research paper, so in addition to discussing the substantive readings, we will concentrate on formulating interesting research questions, think carefully about how to bring data to bear on specific questions or hypotheses, become familiar with data sources, and discuss research design. Instructor permission (students must apply).

PSCI 395 Power Sharing in Deeply Divided Places - BFS
This course examines conceptual, explanatory and normative debates over power-sharing systems. We explore the circumstances in which federal, consociational and other power-sharing institutions and practices are proposed and implemented to regulate deep national, ethnic, religious or linguistic divisions. We evaluate these systems, seeking to explain why they are formed or attempted, and why they may endure or fail, paying special attention to bi- and multi-national, multi-ethnic, multi-religious and multi-lingual environments. Restricted to Benjamin Franklin Scholars, seniors and juniors in Political Science, seniors in PPE; others by permission.
Taught by: O'Leary
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 398 Selected Topics in Political Science
Consult department for detailed descriptions. More than one course may be taken in a given semester. Recent titles have included: Sustainable Environmental Policy & Global Politics; Shakespeare and Political Theory.
Taught by: Gans
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSCI 404 Media and Politics
Media and Politics will examine multiple issues specific to the past and present political media environment in the United States. Focus will be primarily, though not exclusively, on the contemporary news media. Topics covered will include political primaries, how elections have been influenced by the rise of partisan media, selective exposure, freedom of political speech as it relates to elections, the theoretical purpose of elections, money and media, political targeting, etc. We will also explore the quantitative and qualitative methods underlying what is and is not known about how elections work. Reading expectations will be relatively heavy, and under the supervision of the professor, students will write an original research paper examining a specific topic in greater depth.
Taught by: Mutz
Course not offered every year
Also Offered As: COMM 404
Activity: Seminar
1.0 Course Unit
PSCI 410 Race and Racism in the Contemporary World
This undergraduate seminar is for advanced undergraduates seeking to make sense of the upsurge in racist activism, combined with authoritarian populism and neo-fascist mobilization in many parts of the world. Contemporary manifestations of the phenomena noted above will be examined in a comparative and historical perspective to identify patterns and anomalies across various multiple nation-states. France, the United States, Britain, and Italy will be the countries examined.
Taught by: Hanchard
Course not offered every year
Also Offered As: AFRC 465, LALS 465
Activity: Seminar
1.0 Course Unit

PSCI 412 Comparative Politics
This seminar focuses on comparative political systems. Themes include political participants, leadership, institutions, instability, and system transformation in developed and less developed countries.
Course not offered every year
Also Offered As: AFRC 417, HIST 467, LALS 417, SOCI 417
Activity: Lecture
1.0 Course Unit

PSCI 413 Evidence Based Policies of Economic and Political Development
This class provides a 'hands-on' introduction to the promises and limitations of using Randomized Control Trials (RCTs) to inform policy makers, practitioners, and academics of the conditions under which policies likely would have a positive effect on economic and political outcomes, in the context of international development. This course has three parts: the first is devoted to understanding the 'nuts and bolts' of running field experiments / RCTs in developing countries. In part, we will be reading Glennester and Takavarasha's Running Randomized Evaluations: A Practical Guide. In addition, we will discuss core behavioral concepts from both behavioral economics and social psychology (prospect theory). The second part of the course will be devoted to demonstrating how schools have used RCTs to inform core policy debates (e.g. What are some effective ways to reduce corruption? How can we improve the performance of frontline service providers? How can politicians be more responsive to their constituents?) In the third part, students will be presenting their own research proposals, explicitly designed to address either a core policy question in the developing world or—for those interested—in the USA. Here students will have an opportunity to partner with the Social and Behavioral Sciences Team (https://sbst.gov), which is under the National Science and Technology Council.
Taught by: Grossman
One-term course offered either term
Also Offered As: GAFL 530
Activity: Seminar
1.0 Course Unit

PSCI 418 Evolution, Politics, and Computer Simulation
In this course we shall explore how recent developments in evolutionary theory relate to larger questions raised by students of complexity and complex adaptive systems. We shall study how they together provide a basis for important critiques of standard approaches in political science and enable fascinating and powerful understandings of politics and political phenomena -- including national identity and identity change, state formation, revolution, globalization, and leadership. An important vehicle for the application of these insights for understanding politics is computer simulations featuring agent-based modeling. Students will use 'PS-i' an agent based computer simulation platform, to develop their own models, conduct experiments, test hypotheses, or produce existence proofs in relation to popular theoretical positions in contemporary political science. No knowledge of computer programming is required.
Taught by: Lustick
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSCI 433 Social Movements
Social movements and political protest have become some of the most effective tools for citizens and non-citizens to influence the political system. This course is designed to introduce students to the theoretical and methodological approaches taken in understanding these behaviors. Analyzing social movements that range from civil discontent to contentious political protest, the course will address a variety of questions: What is the origin of movement behavior and why do individuals turn to these actions in lieu of simply engaging in institutional modes of political action such as voting? What were the strategies of these movements? What are the political conditions that allow social movements to resonate with the American public? In addition to addressing these topics, this course explores the policy successes of major social and political movements. From the Civil Rights and Women's Right Movement to the recent Tea Party movement and Hong Kong demonstrations over democracy, this course explores the various public policies that have resulted from citizens' protest actions. While state level and local level government responsiveness will be addressed, special attention will be given to how political protest influences public policy in all three branches of the federal government.
Taught by: Gillion
Course not offered every year
Also Offered As: AFRC 433
Activity: Seminar
1.0 Course Unit

PSCI 434 Advanced Topics in American Politics
This seminar is designed to serve as a 'capstone' experience for advanced undergraduates interested in American politics. It exposes students to some of the issues currently being studied and debated by the leading scholars in the field. For each topic we will read works that take competing or opposing positions on an issue; for example we will examine the current controversy over the causes and and consequences of divided government. Students will write a research paper analyzing one of the debates.
Taught by: Gillion
Course not offered every year
Also Offered As: AFRC 435
Activity: Seminar
1.0 Course Unit
PSCI 436 Political Psychology
How do campaign advertisements influence voters' perceptions and behavior? What roles do emotions play in politics? Do we all harbor some measure of racism, sexism, or homophobia, and what role do these stereotypes play in political behavior? How and why do ideologies form, and how does partisanship influence the way that voters understand the political world? How do people perceive threat, and what are the psychological consequences of terrorism? These questions, and many others, are the province of political psychology, an interdisciplinary field that uses experimental methods and theoretical ideas from psychology as tools to examine the world of politics. In this course, we will explore the role of human thought, emotion, and behavior in politics and examine the psychological origins of citizens' political beliefs and actions from a variety of perspectives. Most of the readings emphasize politics in the United States, though the field itself speaks to every aspect of political science.
Taught by: Margolis
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 437 Race & Criminal Justice
Why are African Americans and some other minority groups disproportionately incarcerated and subjected to penal sanctions? What are the political, social and economic consequences for individuals, communities, and the wider society of mass incarceration in the United States? What types of reforms of the criminal justice system are desirable and possible? This advanced seminar analyzes the connection between race, crime, punishment, and politics in the United States. The primary focus is on the role of race in explaining why the country's prison population increased six-fold since the early 1970s and why the United States today has the highest incarceration rate in the world. The class will likely take field trips to a maximum-security jail in Philadelphia and to a state prison in the Philadelphia suburbs.
Taught by: Gottschalk
Course not offered every year
Also Offered As: AFRC 437, AFRC 638, PSCI 638
Activity: Seminar
1.0 Course Unit

PSCI 484 Meaning of Democracy
This course provides a broad, humanistic survey to some of the most important ideas, debates, and problems connected to the study of democracy. The course is divided into three segments: the democratic citizen (in which we explore ethical issues pertaining to the experience of democracy as a way of life); the democratic People (in which we examine some of the best and most recent attempts to come to grips with the difficult, yet fundamental, notion of the People); and the democratic world (in which we examine issues pertaining to democratization and development, including the tension between democracy and individual liberty and the relationship between democracy and global capitalism).
Taught by: Green
Course not offered every year
Activity: Seminar

PSCI 496 Andrea Mitchell Center Undergraduate Research Seminar
The course is intended for Andrea Mitchell Center Undergraduate Fellows to present their research ideas, share with the class progress on their ongoing projects, and receive constructive feedback from fellow students and the course instructor. Students who take the seminar are obligated to present their research in a conference in the following spring, as well as attend monthly meetings in the spring semester in preparation for that conference. Class is limited to undergraduates who have been accepted as Andrea Mitchell Center research fellows. Undergraduates apply in the spring for seminar in the following fall.
Taught by: Green
Course not offered every year
Activity: Seminar
0.5 Course Units

PSCI 497 Political Science Honors
This is a mandatory seminar for all students planning to submit an honors thesis for the purpose of possibly earning distinction in Political Science upon graduation. The course is aimed at helping students identify a useful and feasible research question, become familiar with the relevant literatures and debates pertaining to that question, develop a basic understanding of what might constitute 'good' and 'original' research in different subfields, and set up a plan for conducting and presenting the research. The course is also aimed at building a community of like-minded student researchers, which can complement and enrich the honor student's individual experience of working one-on-one with a dedicated faculty thesis advisor. Students apply in the spring of their junior year for admissions to the honors program and enrollment in PSCI497.
Taught by: Doherty-Sil
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSCI 498 Selected Topics in Political Science
Consult department for detailed descriptions. Recent topics include:
Globalization; Race & Criminal Justice; Democracy & Markets in Postcommunist Europe.
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSCI 499 Independent Study - Honors
Individual research to be taken under direction of faculty member. Students wishing to complete work on an honors paper should contact the Political Science Department.
One-term course offered either term
Activity: Independent Study
1.0 Course Unit
PSCI 511 Society and Politics in India
This course examines the experience of representative democracy in India and the country's development record in a historical framework. It will ask questions such as: How did representative democracy emerge in India, and what explains its persistence? What are the sources of its vulnerability? What kind of a sense of nationhood does this democratic experience rest upon? What are the exclusions built into this conception of nationhood? What is the relationship between India's development experience and its democratic experiment? How have India's 'traditional' institutions adapted or failed to adapt to modern circumstances? How has India performed well in certain economic sectors even while its record in providing basic social services has been dismal? How have the Indian State and its public institutions managed and coped with these changes? And how has India's self-perception about its place in the world changed in recent years, and what are its implicatons?
Taught by: Kapur, Frankel
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 513 Latin American Politics
This graduate level course will be embedded in course PSCI/LALS 213, the same way that PSCI 517 (Russian Politics) is embedded in PSCI 217. In other words, graduate students taking this course will have to attend lectures twice a week, but instead of discussing materials in recitations will meet with Professor Falleti, either weekly (one hour) or biweekly (two hours), to discuss the main topics of the course and research questions and proposals related to the course.
Taught by: Falleti
Course usually offered in fall term
Also Offered As: LALS 513
Activity: Lecture
1.0 Course Unit

PSCI 517 Russian Politics
This course will present an in-depth examination of political, economic and social change in post-Soviet Russia within a historical context. After a brief discussion of contemporary problems in Russia, the first half of the course will delve into the rise of communism in 1917, the evolution of the Soviet regime, and the tensions between ideology and practice over the seventy years of communist rule up until 1985. The second part of the course will begin with an examination of the Gorbachev period and the competing interpretations of how the events between 1985 and 1991 may have contributed to the collapse of the Soviet Union. We will then proceed to make sense of the continuities and changes in politics, economics and society in contemporary Russia. Important topics will include the confrontations accompanying the adoption of a new constitution, the emergence of competing ideologies and parties, the struggle over economic privatization, the question of federalism and nationalism, social and political implicatons of economic reform, and prospects for Russia's future in the post-Yeltsin era. This course may also be taken as a graduate seminar (PSCI 517) with the permission of the instructor and the completion of additional requirements.
Taught by: Sil
Course usually offered in spring term
Also Offered As: PSCI 217, REES 217
Activity: Recitation
1.0 Course Unit

PSCI 530 The Political Economy of Gender
Over the past two hundred years, with the rise industrial production, growing educational attainment, and availability of contraception, women have entered the formal labor market in vast numbers. Yet despite advances, there are still important disparities between the sexes, often exacerbated by class and racial politics. This course unpacks the elements of the transition in the political economy of gender and examines its limits. We set out to understand women's labor in emerging industrial and post-industrial economies; the causes and consequences of women's political inclusion; gendered opportunities in the labor force including the persistence of pay gaps; and the formation of economic and political preferences across the genders. Theoretically, we will engage with Marxist political economy, and new institutionalist approaches to understand how political and economic institutions reproduce or remedy contemporary problems including the gender gap in wages, in political representation, and in women's economic opportunities. Throughout the course we will pay special attention to challenges faced by minority groups and by women in developing countries.
Taught by: Teele
Course usually offered in fall term
Also Offered As: GSWS 598
Activity: Seminar
1.0 Course Unit

PSCI 531 Public Opinion & Elections
This course is designed to give advanced undergraduates and graduate students exposure to the literature on political behavior in American politics (the course is part of the departments 3-course graduate sequence in American politics). The course will cover both the classics of public opinion and political behavior from the Columbia, Michigan, and Rochester schools, as well as more current topics and debates in the literature. Topics include (but are not limited to) the early voting studies, the role of partisanship, the nature and origins of ideology, mass-elite interactions, heuristics and low information rationality, the nature of the survey response, campaign and media effects, framing effects, and the role of institutions in structuring behavior. Undergraduates are welcome in the class, but they should know that the class assumes familiarity with quantitative approaches to studying politics.
Taught by: Levendusky

PSCI 545 Politics and Education
How is education a form of political action? In this course we look at the governance of schools, the trust in them and their relations to socio-economic conditions in society, among other topics, using research in education, political science, and political theory.
Taught by: BEN-PORATH
Course usually offered in fall term
Also Offered As: EDUC 595
Activity: Seminar
1.0 Course Unit

PSCI 550 Borders & Boundaries in International Relations
This research seminar explores the meanings, rules and consequences of borders and boundaries in international relations. How was a political world based on territorial sovereignty created, how are international borders determined, and how are they adjudicated and maintained? How do international borders influence war and peace between states? How do borders, border regions, and border activities speak to national encounters with neighbors and the rest of the world? How do they affect international trade and development? When and how are international borders ‘securitized,’ and how does this affect the flow of goods, people, and illicit activities around and across the border? How do states ‘cooperate’ across international borders? We will examine the meaning and function of boundary-making between states from multiple disciplines and perspectives: political science, international law, international relations, history, geography, sociology, and economics. Borders, border regions and border crossings have multiple significance as designations of state authority, security buffers, expressions of social meaning and opportunities for economic integration. We explore their creation, challenges, and reinforcement over time and around the world. As a seminar designed primarily to stimulate research, this course will be concerned with historical and current problems relating to international borders around the world. We will concentrate on formulating interesting research questions, think carefully about how to bring data to bear on specific questions or hypotheses, become familiar with data sources, and design our own research. All assignments are related to developing research skills; there are no in-class exams.
Taught by: Simmons
Course not offered every year
Also Offered As: LAW 989
Activity: Seminar
1.0 Course Unit

PSCI 552 Game Theory
This course provides an introduction to non-cooperative game theory and its applications to political science. The goal of the course is to provide students with the background and understanding necessary to read published game-theoretic work in political science journals. To that end, the course covers the basic concepts of game theory, including Nash equilibrium and its main refinements, simultaneous and sequential games, repeated games, evolutionary game theory, and games of incomplete and private information. In addition, we will cover some of the central models used in political science, notably models of public choice (such as the median voter theorem) and models of bargaining.
Taught by: Weisiger
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 558 Human Rights
This course will examine the theoretical, historical and political foundations of contemporary human rights debates. The course will cover not only broad conceptual issues, but also specific issue areas (e.g., civil rights, economic rights, women’s rights, business and human rights), as well as the question of how new rights norms emerge and diffuse in the international arena. The course is open to students in the Master of Liberal Arts Program, as well as students who are actively pursuing the Graduate Certificate in Interdisciplinary Studies in Global Human Rights.
Taught by: Doherty-Sil
Also Offered As: PSCI 258
Activity: Recitation
1.0 Course Unit

PSCI 582 Gender, Power & Fem Theory
This seminar will examine the theme of power as it engages questions of sex and gender. Subsidiary themes that will be developed over the course of the semester include: the modernism/postmodernism debate as it particularly relates to feminism; the intersectionality of race, gender, sexuality and class and how feminists can and do talk about ‘women’; the relevance of feminist theory to policy issues, and which theoretical approaches are the most appropriate or have the most powerful potential. The readings will start with ‘foundational’ texts in feminist theory–texts that anyone who wants to work in or teach feminist theory needs to have in their repertoire, they set out the background and history of contemporary feminist theory, and they operate from a variety of disciplinary frameworks. We then will move onto some newer scholarship and some more specific political issues and topics, depending on what students in the course are interested in studying. This course is open to undergraduates who have had some prior course work in feminist theory, gender and sexuality studies, and/or political theory, in consultation with the professor.
Taught by: Hirschmann
Course not offered every year
Also Offered As: GSWS 582
Activity: Seminar
1.0 Course Unit

PSCI 584 Political Philosophy
An examination of basic theoretical problems of political science divided into three parts. First, specific features of social sciences will be examined and three most important general orientations of social sciences (analytical, interpretative and critical) will be compared and analyzed. Second, basic concepts of social and political sciences will be studied: social determination, rationality, social change, politics, power, state, democracy. Third, the problem of value judgments will be considered: Is there a rational, objective method for the resolution of conflicts in value judgments? Is morality compatible with politics? Course not offered every year
Also Offered As: GSWS 584
Activity: Seminar
1.0 Course Unit

PSCI 598 Selected Topics
Consult department for detailed descriptions. More than one course may be taken in a given semester. Recent titles have included: Race Development and American International Relations, Hegel and Marx, and Logic of the West.
One-term course offered either term
Activity: Seminar
1.0 Course Unit
PSCI 600 International Relations Theory
This purpose of this course is two-fold. First, the survey course is designed to introduce students to a wide range of theories of international politics. During the course of the semester we will examine neo-realism, power transition theory, hegemonic stability theory, the modern world system, international regimes and interdependence, the democratic peace, bureaucratic politics, organizational theory, constructivism, and decision making theory. Second, the course will sharpen students’ research design skills. The written assignments require students to take the often abstract theories presented in the readings and develop practical research designs for testing hypotheses derived from the theories. The papers will not include data collection or the execution of actual tests. Rather, they will focus on the conceptual problems of designing tests which eliminate competing hypotheses, operationalizing variables, and identifying potential sources of data. Student’s grades will be based on five short research designs and discussion leadership.
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 605 Great Books Comp Pol
Activity: Seminar
1.0 Course Unit

PSCI 610 Comparative Political Analysis
This seminar is aimed primarily at graduate students planning to take doctoral exams in comparative politics. It provides a critical survey of the field of comparative politics, tracing the intellectual history of the field, examining shifts in conceptual frameworks and research traditions, and comparing alternative methodological approaches. The first half of the course generally examines how processes of political, economic, and social change have been theorized in the social sciences from the mid-19th century to the present. In this process, particular attention is paid to the bifurcation between theories that emphasize the ‘universal’ (e.g. the homogenizing effects of specific processes or variables) and the ‘particular’ (e.g. the persistence of distinctive historical legacies and trajectories). Since this bifurcation is reinforced by distinct styles and methods of research, the seminar also probes the recent battles between rational-choice, cultural, and structuralist scholars, while considering the trade-offs between varieties of formal, quantitative, and qualitative methods. In the second half, the focus shifts to the range of substantive problems investigated by scholars in the field of comparative politics. These topics cover the complex relations among nations, states and societies; the origins, consolidation, and patterns of democratic governance; political economy in relation to development processes and social policies; the intersection of international/global economy and domestic politics; the dynamics of revolutions and social movements; and alternative problematics constructed from the point of view of real actors such as workers, women, and local communities. In all cases, As a whole, the course is designed to provide an introduction to important issues and debates that comparativists have regularly engaged in; to help you understand the assumptions behind, and differences between, particular approaches, methods, and styles of research; to examine whether current debates are spurring new or better research in a given field in light of past approaches; and to gauge whether there has been progress, fragmentations, or stagnation in the field of comparative politics as a whole.
Taught by: Sil
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 612 Topics in Black Political Thought: Difference And Community
This course is designed to familiarize graduate students with some of the key texts and debates in Africana Studies concerning the relationship between racial slavery, modernity and politics. Beginning with the Haitian Revolution, much of black political thought (thinking and doing politics) has advocated group solidarity and cohesion in the face of often overwhelming conditions of servitude, enslavement and coercion within the political economy of slavery and the moral economy of white supremacy. Ideas and practices of freedom however, articulated by political actors and intellectuals alike, have been as varied as the routes to freedom itself. Thus, ideas and practices of liberty, citizenship and political community within many African and Afro-descendant communities have revealed multiple, often competing forms of political imagination. The multiple and varied forms of political imagination, represented in the writings of thinkers like Eric Williams, Richard Wright, Carole Boyce Davies and others, complicates any understanding of black political thought as having a single origin, genealogy or objective. Students will engage these and other authors in an effort to track black political thought’s consonance and dissonance with Western feminisms, Marxism, nationalism and related phenomena and ideologies of the 20th and now 21st century.
Taught by: Hanchard
Also Offered As: AFRC 655, GSWS 655, LALS 656
Activity: Seminar
1.0 Course Unit

PSCI 614 Political Identity & Political Institution
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 615 Political Economy of Development
This course examines the debate in development studies arising from recognition that economic models, theories, methods, and strategies abstracted from the specific experience of western societies and cultures do not have general applicability. A broader social science approach is adopted, one which emphasizes the need to understand the social structures and cultures of the developing countries, the capabilities of weak versus strong states, and the links with the international system that influence transformative processes to which industrializing economies are subjected. The readings offer an overview of the most influential theories of development and underdevelopment that structured debate from the 1960’s through the 1990’s, and focus on the elements of these approaches that advance understanding of development and stagnation in several key countries, including Brazil, Mexico, India and selected countries in East and Southeast Asia.
Taught by: Grossman
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 618 International Political Economy
Examination of the relationship between the international, political, and economic systems from a variety of theoretical perspectives that have emerged in the postwar period, including liberalism, transnationalism, statism, Marxism, and dependency.
Taught by: Mansfield
Course not offered every year
Activity: Seminar
1.0 Course Unit
**PSCI 619 Strategic Studies Seminar**

This seminar offers graduate students an introduction to the subfield of international relations labeled strategic studies (or security studies). In addition to exploring key theoretical issues, we consider their usefulness for understanding relevant events in international politics since World War II. Although the course emphasizes the distinctive features of great power strategy in the nuclear age, we also look at the continuing role of conventional forces, the strategic choices of lesser powers, and selected security problems in the post-Cold War world (e.g., proliferation, terrorism).

Taught by: Goldstein
Course not offered every year
Activity: Seminar
1.0 Course Unit

---

**PSCI 631 American Political Development**

Analyzes important patterns of continuity and change in American politics by examining the development of the American State from a comparative and historical perspective. Covers issues and debates central to not only the subfield of American politics, but also the discipline of political science more broadly. These include the role of the state, political culture, interests, ideas, and institutions in political development, and the role of history in political analysis. Open to advanced undergraduates with the permission of the instructor.

Activity: Seminar
1.0 Course Unit

---

**PSCI 633 Hegemonic Analysis: Theories and Applications**

An important strain within contemporary political science has been the attempt to explain how power is exercised through the manipulation or exploitation of consciousness, habits, and cultural predispositions. One of the key concepts in the study of these issues is that of 'hegemony' – the establishment of particular beliefs as commonsensical presumptions of political life. In this course that notion will be systematically explored. Of particular interest will be how authors who conduct hegemonic analysis cope with the problem of analyzing the effect of what the objects of their analysis, by definition, do not and, in some sense, cannot, think about. Illustrations of hegemonic phenomena and attempts to analyze them will be drawn from a variety of fields, such as political theory, historiography, comparative politics, American politics, rational choice theory, agent based modeling, and epistemology.

---

**PSCI 635 Experimental Design and Issues in Causality**

The main goal of this course is to familiarize students with experiments, quasi-experiments, survey experiments and field experiments as they are widely used in the social sciences. Some introductory level statistics background will be assumed, though this is a research design course, not a statistics course. By the end of the course, students will be expected to develop their own original experimental design that makes some original contribution to knowledge. Throughout the course of the semester, we will also consider how to deal with the issue of causality as it occurs in observational studies, and draw parallels to experimental research.

**PSCI 805 Analysis of Election Data**

This course is intended to serve as a workshop for students interested in the empirical analysis of elections, public opinion and political communication more generally. The centerpiece of the course will be an original research paper produced by each student on a topic of his or her own choosing. The requirements for these papers are fairly open, but demanding: the research papers must a) involve empirical analysis of a major election data set, b) be oriented toward answering an original research question selected with the guidance of the instructor, and c) aim to be of publishable quality. There are no formal prerequisites for the course. However, if you have less than two semesters of statistical training, and/or no formal background in the study of elections, public opinion or political communication, then this is probably not the right course for you. In order to be able to formulate an original research question, you need some background in the literature, which is provided by other courses, but is not a formal part of this course.

Taught by: Mutz
