

# APPLIED POSITIVE PSYCHOLOGY, MAPP

Rapidly becoming one of psychology's most transformative fields, positive psychology is the scientific study of the strengths that enable humans and organizations to flourish. The Master of Applied Positive Psychology (MAPP) program at the University of Pennsylvania was the first in the world to offer a degree in this rigorous field of study. Dr. Martin E.P. Seligman, founder of the discipline of positive psychology, along with leading researchers and practitioners educate students at the cutting edge of the field. The MAPP curriculum is designed to educate you in the history, theory and research methods of positive psychology, as well as its application in professional settings.

## Curriculum

The program consists of nine courses, completed in one year of full-time study during consecutive fall, spring and summer semesters.

- During the fall semester, you will begin the program with courses that focus on the science, research and theoretical underpinnings of positive psychology, giving students a strong foundation to build on throughout the remainder of the program.
- The spring semester courses offer content to help you learn how to apply positive psychology in various professional settings, including creating a plan for positive interventions in a real organization.
- The capstone project, which is completed during the summer semester, allows you to integrate what you've learned throughout the program, and apply it in the professional or research domain most significant to you. It often serves as a stepping stone to the application of positive psychology in a particular professional domain or to further research in a specific area.

Code	Title	Course Units
<b>Core Courses</b>		
MAPP 6000	Introduction to Positive Psychology	1
MAPP 6010	Research Methods and Evaluation	1
MAPP 6020	Foundations of Positive Interventions	1
MAPP 6030	Perspectives on Well-Being	1
MAPP 7080	Positive Psychology and Individuals	1
MAPP 7100	Humanities and Human Flourishing	1
MAPP 7120	The Psychology & Neuroscience of Character	1
MAPP 7140	Applying Positive Interventions in Institutions	1
<b>Capstone Course</b>		
MAPP 8000	Capstone	1
<b>Total Course Units</b>		<b>9</b>

### Capstone

The capstone project is a distinguishing feature of the Master of Applied Positive Psychology program, blending academic and professional experiences and serving as the culmination of your work in the program. Through the capstone project, you will explore,

in depth, the theories and practical applications you've learned in the program, to advance the field of positive psychology itself. If you are interested in exploring more capstones, you can visit Penn's Scholarly Commons website to browse project abstracts ([http://repository.upenn.edu/mapp\\_capstones/](http://repository.upenn.edu/mapp_capstones/)) or download full projects ([http://repository.upenn.edu/mapp\\_capstone/](http://repository.upenn.edu/mapp_capstone/)).

The capstone is completed during the summer semester and has no on-site course requirements. You will conduct this project work independently, with your advisor's ongoing guidance, in a setting that is significant to you and most relevant to your future professional goals.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2022 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
