

# CELL AND MOLECULAR BIOLOGY: CELL BIOLOGY, PHYSIOLOGY, AND METABOLISM, PHD

## Cell and Molecular Biology

The Cell and Molecular Biology Graduate Group (CAMB) is an interdisciplinary graduate program, providing rigorous training in modern cell and molecular biology, preparing students for leadership careers in biomedical research. Within this integrated program are six discipline areas: Cancer Biology (<http://catalog.upenn.edu/graduate/programs/cell-molecular-biology-cancer-biology-phd>); Cell Biology, Physiology, and Metabolism (p. 1); Developmental, Stem Cell and Regenerative Biology (<http://catalog.upenn.edu/graduate/programs/cell-molecular-biology-developmental-stem-cell-regenerative-biology-phd>); Gene Therapy and Vaccines (<http://catalog.upenn.edu/graduate/programs/cell-molecular-biology-gene-therapy-vaccines-phd>); Genetics and Epigenetics (<http://catalog.upenn.edu/graduate/programs/cell-molecular-biology-genetics-epigenetics-phd>); and Microbiology, Virology and Parasitology (<http://catalog.upenn.edu/graduate/programs/cell-molecular-biology-microbiology-virology-parasitology-phd>). Program faculty include more than 300 scientists representing 35 departments from the Perelman School of Medicine, the Schools of Arts and Sciences, Dental Medicine, and Veterinary Medicine, Children's Hospital of Philadelphia, the Wistar Institute and Fox Chase Cancer Center. The research efforts of these scientists are diverse in their focus, experimental system, methodology, and represent the leading edge of basic and translational biomedical science.

Students from colleges and universities around the nation and the world are enrolled in the program, selecting one discipline area based on their scientific interests, yet have access to the full breadth of curricular and research opportunities provided by this large and diverse program. Our students participate in core courses in cell and molecular biology, specialized coursework in one or more discipline areas, and original hypothesis-driven thesis research. Upon completion of the PhD, they pursue successful research careers at top academic institutions, in the biotech and pharmaceutical industries, and in other biomedicine-related career paths.

## Cell Biology, Physiology, and Metabolism

Modern cell biology is a dynamic discipline that integrates multiple fields, including molecular biology, biochemistry, biophysics, microbiology, physiology, developmental biology, cytology and genetics. Cell biologists investigate the basic structural and functional units of life: cells that compose all living organisms. Once reliant primarily on microscopic methods, cell biologists now take advantage of cutting edge methods in ultrastructure, biochemistry, genetics and molecular biology, and utilize a diverse range of model organisms. Program faculty conduct research in cellular metabolism; cell motility, the cytoskeleton, and muscle physiology; intracellular trafficking and organelle function; membrane transport; and signal transduction and cell cycle regulation.

View the University's Academic Requirements for PhD Degrees (<http://catalog.upenn.edu/pennbook/academic-rules-phd>).

## Required Courses

Code	Title	Course Units
<b>Coursework</b>		
BIOM 555	Regulation of the Genome	
BIOM 600	Cell Biology	
BIOM 611	Statistics in Experimental Design and Analysis <sup>1</sup>	
CAMB 532	Human Physiology	
CAMB 605	CAMB First Year Seminar	
CAMB 691	Advanced Topics in Cell Biology & Physiology	
CAMB 692	Advanced Topics in Cell Biology and Physiology II: Cell Signaling and Metabolism	
Select two electives		
<b>Research</b>		
CAMB 699	Lab Rotation	
CAMB 899	Pre-dissertation Research	
CAMB 995	Dissertation	

<sup>1</sup> Or other statistics course with approval of the Graduate Group.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

## Sample Plan of Study

Code	Title	Course Units
<b>Year 1</b>		
<i>Fall</i>		
BIOM 600	Cell Biology	
CAMB 605	CAMB First Year Seminar	
CAMB 699	Lab Rotation	
<i>Spring</i>		
BIOM 555	Regulation of the Genome	
BIOM 611	Statistics in Experimental Design and Analysis	
CAMB 692	Advanced Topics in Cell Biology and Physiology II: Cell Signaling and Metabolism	
CAMB 699	Lab Rotation	
CAMB 699	Lab Rotation	
<i>Summer</i>		
CAMB 899	Pre-dissertation Research	
<b>Year 2</b>		
<i>Fall</i>		
CAMB 532	Human Physiology	
CAMB 899	Pre-dissertation Research	

Electives

*Spring*

CAMB 691 Advanced Topics in Cell Biology & Physiology

CAMB 899 Pre-dissertation Research

Elective

**Year 3 and Beyond**

CAMB 995 Dissertation
