

CELL AND MOLECULAR BIOLOGY: GENETICS AND EPIGENETICS, PHD

Cell and Molecular Biology

The Cell and Molecular Biology Graduate Group (CAMB) is an interdisciplinary graduate program, providing rigorous training in modern cell and molecular biology, preparing students for leadership careers in biomedical research. Within this integrated program are six discipline areas: Cancer Biology (<http://catalog.upenn.edu/graduate/programs/cell-molecular-biology-cancer-biology-phd>); Cell Biology, Physiology, and Metabolism (<http://catalog.upenn.edu/graduate/programs/cell-molecular-biology-cell-biology-physiology-metabolism-phd>); Developmental, Stem Cell and Regenerative Biology (<http://catalog.upenn.edu/graduate/programs/cell-molecular-biology-developmental-stem-cell-regenerative-biology-phd>); Gene Therapy and Vaccines (<http://catalog.upenn.edu/graduate/programs/cell-molecular-biology-gene-therapy-vaccines-phd>); Genetics and Epigenetics (p. 1); and Microbiology, Virology and Parasitology (<http://catalog.upenn.edu/graduate/programs/cell-molecular-biology-microbiology-virology-parasitology-phd>). Program faculty include more than 300 scientists representing 35 departments from the Perelman School of Medicine, the Schools of Arts and Sciences, Dental Medicine, and Veterinary Medicine, Children's Hospital of Philadelphia, the Wistar Institute and Fox Chase Cancer Center. The research efforts of these scientists are diverse in their focus, experimental system, methodology, and represent the leading edge of basic and translational biomedical science.

Students from colleges and universities around the nation and the world are enrolled in the program, selecting one discipline area based on their scientific interests, yet have access to the full breadth of curricular and research opportunities provided by this large and diverse program. Our students participate in core courses in cell and molecular biology, specialized coursework in one or more discipline areas, and original hypothesis-driven thesis research. Upon completion of the PhD, they pursue successful research careers at top academic institutions, in the biotech and pharmaceutical industries, and in other biomedicine-related career paths.

Genetics and Epigenetics

The Program in Genetics and Epigenetics provides students an opportunity to undertake concentrated study in the areas of model organism genetics, human genetics, transcriptional and post-transcriptional gene regulation, epigenetics, genomics and bioinformatics. Program faculty include members of the Genetics Department, Epigenetics Program, and other basic science and clinical departments at Penn, The Children's Hospital of Philadelphia, and the Wistar Institute. Students also have the opportunity to undertake training in the application of computational and modeling approaches in genetics, epigenetics and genomics.

View the University's Academic Requirements for PhD Degrees (<http://catalog.upenn.edu/pennbook/academic-rules-phd>).

Required Courses

Code	Title	Course Units
Coursework		
BIOM 555	Regulation of the Genome	
BIOM 600	Cell Biology	
BIOM 611	Statistics in Experimental Design and Analysis ¹	
CAMB 550	Genetic Principles	
CAMB 605	CAMB First Year Seminar	
GCB 535	Introduction to Bioinformatics	
Select three electives		
Research		
CAMB 699	Lab Rotation	
CAMB 899	Pre-dissertation Research	
CAMB 995	Dissertation	

¹ Or other statistics course with approval of the Graduate Group.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sample Plan of Study

Code	Title	Course Units
Year 1		
<i>Fall</i>		
BIOM 600	Cell Biology	
CAMB 605	CAMB First Year Seminar	
CAMB 699	Lab Rotation	
<i>Spring</i>		
BIOM 555	Regulation of the Genome	
BIOM 611	Statistics in Experimental Design and Analysis	
CAMB 550	Genetic Principles	
CAMB 699	Lab Rotation	
CAMB 699	Lab Rotation	
<i>Summer</i>		
CAMB 899	Pre-dissertation Research	
Year 2		
<i>Fall</i>		
CAMB 899	Pre-dissertation Research	
	Elective	
	Elective	
<i>Spring</i>		
CAMB 695	Scientific Writing	
CAMB 899	Pre-dissertation Research	
GCB 535	Introduction to Bioinformatics	
	Elective	
Year 3 and Beyond		

CAMB 995 Dissertation
