CITY & REGIONAL PLANNING: URBAN DESIGN, MCP

The Master of City Planning core curriculum encompasses the basic skills and knowledge required of all planners regardless of their specialization, and is a hallmark of our cutting-edge and practical approach to educating city planners. Students who complete the core will understand the legal and historical basis of city planning; they will know how to use a wide variety of population and economic data to understand local communities; and they will understand the form and arrangement of cities and metropolitan areas around the world. Most important, they will understand which planning approaches work best in which contexts and circumstances.

The Urban Design concentration focuses on understanding the links between the physical form and structure of cities and regions and the economic, social and political forces that shape them. It provides knowledge about alternative theories and methods for the physical improvement of urban places and includes courses in graphic communication, the history and theory of design, and the context and operation of development incentives and controls. Graduates from the Urban Design concentration typically work in local government or for private design firms developing urban design plans, neighborhood and district plans, public space and street plans, and, increasingly, plans for new communities.

Spatial Analysis Requirement

Select one of the following: 1

- CPLN 5030 Modeling Geographical Objects
- CPLN 6320 Modeling Geographic Space
- ENVS 5706 Modeling Geographical Objects

General Electives

Select 5-6 course units 5-6

Urban Design Requirements

- CPLN 6600 Fundamentals of Urban Design 2
- CPLN 5040 Site Planning 1
- CPLN 7600 Public Realm Studio 2

Students in the Urban Design concentration may not take CPLN 5040 to meet their Core Breadth Methods requirement.

Internship Requirement

Because a planning education extends beyond the classroom, all MCP students are required to complete a planning internship, usually between their first and second years. Internships may be paid or unpaid, for at least six weeks. Internships can be completed at any government agency or commission, private consulting firm, or non-profit or advocacy organization involved in planning practice, or research.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2022 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
