

GLOBAL HEALTH, MINOR

Available exclusively to Penn Nursing students at both the undergraduate and graduate level, our Global Health minor is an opportunity to increase your knowledge of the world and the factors that contribute to the health of populations. We take a cross-disciplinary approach to help you integrate your knowledge of nursing, culture, and diversity to more effectively engage with patients locally, nationally, and around the world. Open to students in full- or part-time Master's or Post-Master's study, this three-course concentration builds on three core dimensions of global health: sociocultural influences of health; methods for assessing population health; and coursework in a geographic area of interest to you.
