This course is designed to help you build upon what you have learned in Elementary Persian I. Emphasis is placed on using the language for interpersonal, interpretive, and presentational modes of communication. Therefore use of English is restricted. Listening, speaking, reading, and writing-as well as culture, vocabulary, grammar, and pronunciation-are integrated into the course. Students must either have successfully completed PERS-611, or take the departmental exam.
For BA Students: Language Course
Taught by: Entezari
Course usually offered in spring term
Also Offered As: PERS 012
Activity: Lecture
1 Course Unit

PERS 613 Intermediate Persian I
This course is conducted in Persian and designed to help you continue expanding upon what you have learned in Elementary Persian II (PERS-012). In this course, we will begin to address a broader variety of cultural topics in order to increase your proficiency in linguistic as well as cultural terms. Emphasis is placed on actively using the language for interpersonal, interpretive and presentational modes of communication. Therefore use of English is restricted. Listening, speaking, reading, and writing are integrated into the course, as are culture, grammar, vocabulary, and pronunciation. Students must either have successfully completed PERS-612 or take the departmental placement exam.
For BA Students: Language Course
Taught by: Entezari
Course usually offered in fall term
Also Offered As: PERS 013
Prerequisite: For the second semester: Completion of the first semester or permission of the instructor
Activity: Lecture
1 Course Unit

PERS 614 Intermediate Persian II
In this course, we will continue to address a broader variety of cultural topics in order to increase your proficiency in linguistic as well as cultural terms. Emphasis is place on actively using Persian for interpersonal, interpretive and presentational modes of communication. Therefore use of English is restricted. Listening, speaking, reading, and writing are integrated into the course, as are culture, grammar, vocabulary, and pronunciation. Students must either have successfully completed PERS-613, or take the departmental placement exam.
For BA Students: Language Course
Taught by: Entezari
Course usually offered in spring term
Also Offered As: PERS 014
Activity: Lecture
1 Course Unit

PERS 615 Advanced Persian I
For BA Students: Advanced Language Course
Course usually offered in fall term
Also Offered As: PERS 015
Prerequisites: For the second semester completion of the first semester or permission of the instructor; PERS 013 or PERS 017 or permission of the instructor.
Activity: Lecture
1 Course Unit
PERS 616 Advanced Persian II
For BA Students: Advanced Language Course
Course usually offered in spring term
Also Offered As: PERS 016
Activity: Lecture
1 Course Unit

PERS 617 Persian Reading and Writing for Fluent Speakers
An intensive, one-semester course designed to teach the reading and writing of standard Tehran Persian to those with a speaking knowledge of that language. In recent years there has been an increasing demand from Persian-speaking Iranian-American students for formal instruction in Persian. While many of these students have some degree of spoken fluency in Persian, they are often unable to read or write it. Their speaking ability makes it difficult to integrate them into first- or second-year classes of students who have started with no knowledge of Persian. If these Persian-speaking students could be brought to at least a second-year level of reading and writing, they could then be enrolled in more advanced courses in Persian where they would be more or less at the same level as other students. The course will focus on the lexical and syntactic differences between written and spoken Persian, and the problems of Persian spelling.
One-term course offered either term
Also Offered As: PERS 017
Prerequisites: Fluency in spoken Persian.
Activity: Lecture
1 Course Unit

Pharmacology (PHRM)

PHRM 495 High Throughput Discover
Course usually offered in spring term
Also Offered As: CHEM 495
Activity: Laboratory
1 Course Unit

PHRM 510 Neurotransmitter Signalling & Neuropsychopharmacology
The goals of this course are three-fold: 1) Provide an overview of major psychiatric disorders. 2) Provide in-depth information on neurotransmitters, emphasizing the wealth of new molecular information on how neurons function and communicate, as well as the basis for psychotherapeutics (one class per week). 3) Develop skills to appreciate, present and critically evaluate the current literature in neurotransmitter signaling and neuropsychopharmacology (one class per week).
Taught by: Staff Dr. Steve Thomas; Dr. Chris Pierce; Dr. Wade Berrettini; Dr. Liz Heller
Course offered spring; even-numbered years
Also Offered As: NGG 510
Prerequisite: Permission of course director
Activity: Lecture
1 Course Unit
Notes: Meets two times per week.

PHRM 522 Human Physiology
Also Offered As: CAMB 532
Activity: Lecture
1 Course Unit

PHRM 534 Experimental Genome Sci
Also Offered As: GCB 534
Activity: Lecture
0.01 Course Units

PHRM 535 Intro To Bioinformatics
Course usually offered in spring term
Also Offered As: GCB 535
Activity: Lecture
1 Course Unit

PHRM 542 Topics in Molecular Medicine
TiMM is planned as a once-weekly seminar course whose goal is to introduce students to the ways in which biomedical research can provide new insights into clinical medicine and, conversely, how knowledge of clinical disease impacts scientific discovery.
Taught by: Skip Brass, MD, PhD; Gary Koretzky, MD, PhD; Mark Kahn, MD
Course usually offered in fall term
Also Offered As: CAMB 542
Prerequisite: Permission of the course directors
Activity: Seminar
1 Course Unit
Notes: The course is designed primarily for combined degree (MD/PhD) students, but will be available to all medical and graduate students as space permits. Priority will be given to 2st and 2nd year combined degree students. The optimal class size will be 14. Tentatively, the course will meet for one hour from 4 - 5 pm on Wednesday afternoons with occasional double sessions that will be two hours long.

PHRM 550 Advanced Topics in Neuropsychopharmacology
Biological issues relevant to neuropsychiatric illnesses are covered in detail in four sections. The first section covers clinical aspects of major psychiatric disorders and includes some contact with patients. The second section presents the neuroanatomy of the limbic system. In the third section, emphasis is on the mechanisms of action of psychotropic drugs, including antidepressants, antipsychotics, anxiolytics, and stimulants. The final section covers information relevant to understanding biological processes that may be abnormal in neuropsychiatric illnesses, such as stress, sleep, and circadian rhythms, as well as quantitative genetics.
Taught by:Lucki and staff
Course usually offered in spring term
Also Offered As: PSYC 750
Prerequisite: Permission of instructor
Activity: Lecture
1 Course Unit
Notes: Meets two times per week.

PHRM 564 DRUG DELIVERY
In this course, students will learn about drug delivery systems with emphasis on targeted therapeutics and translational nanomedicine. The course will be directed and taught by Miriam Wattenbarger (CBE) and Vladimir Muzykantov (PHRM). Lectures will also be given by other faculty from the Penn School of Engineering and Applied Science and the School of Medicine. The four main topics for the course are traditional drug delivery, drug delivery systems and nanocarriers, targeted and smart drug delivery systems, and translational aspects of drug delivery systems. There will be a midterm, final, and a group project for the course. Students will form small groups for the project and research a drug delivery topic to propose an extension of a current research area. An oral and written proposal will be given by each group to the class at the end of the semester. The course is open to SEAS seniors and graduate students, SAS college pre-med, pre- BE and pre-BGS seniors, biotechnology MS students, PGG and BGS graduate students, Wharton and Dental School students.
Also Offered As: CBE 564
Activity: Lecture
1 Course Unit
PHRM 570 Principles of Cardiovascular Biology
Lectures to be presented by various Medical School faculty members. Topics covered include: general principles of vascular biology and hemodynamics, endothelial cells and integral vascular functions, signaling in the cardiovascular system, angiogenesis, hemostasis and thrombosis, platelets, platelet/vascular interactions, vascular integrins and adhesion molecules, vascular inflammation and oxidative stress, white blood cells, vasoactive compounds and drugs, mechanisms of atherosclerosis, cholesterol and lipid metabolism, hypertension, novel vascular directed gene and enzyme therapies. Taught by: Drs. Vladimir Muzykantov and Tilo Grosser Course usually offered in spring term Prerequisite: Permission of course director Activity: Lecture 1 Course Unit

PHRM 590 Molecular Toxicology: Chemical and Biological Mechanisms
Course Goals: Exposures to foreign compounds (drugs, carcinogens, and pollutants) can disrupt normal cellular processes leading to toxicity. This course will focus on the molecular mechanisms by which environmental exposures lead to end-organ injury and to diseases of environmental etiology (neurodegenerative and lung diseases, reproduction disruption and cardiovascular injury). Students will learn the difficulties in modeling response to low-dose chronic exposures, how these exposures are influenced by metabolism and disposition, and how reactive intermediates alter the function of biomolecules. Mechanisms responsible for cellular damage, aberrant repair, and end-organ injury will be discussed. Students will learn about modern predictive molecular toxicology to classify toxicants, predict individual susceptibility and response to environmental triggers, and how to develop and validate biomarkers for diseases of environmental etiology. Students are expected to write a term paper on risk assessment on an environmental exposure using available TOXNET information. Taught by: Dr. Trevor M. Penning Course usually offered in spring term Also Offered As: REG 590 Prerequisites: Pre-requisites: Must have taken or will take Fundamentals of Pharmacology concurrently. Undergraduate course work in biochemistry and chemistry essential. Exceptions allowed based on past course work. Please consult with Course Director. Students: All 1st and 2nd year GGPS, CAMB, Neuro and BSTA students with required prerequisites; residents in Environmental and Occupational Health, and professional masters students (MPH and MTR). Activity: Lecture 1 Course Unit

PHRM 600 Medical Pharmacology BIOM 600
This course will review basic human physiology pertinent to drug action, and then focus on the mechanisms of action of the various classes of agents used in the therapy of human disease. It consists of lectures by an array of faculty with special interests and expertise in the topic being presented. Drug classes covered include: Neuropsychiatric drugs, cardiovascular and hematological drugs, anticancer drugs, antimicrobial drugs, endocrine and metabolic drugs. Taught by: Axelsen and staff. This course focuses on the mechanism of action of various classes of agents used in the therapy of human disease. Drug classes covered include neuropsychiatric drugs, anesthetics, sedatives and hypnotics, cardiovascular and hematological drugs, drugs affecting renal function, inflammation and immune modulation, anticancer drugs, antimicrobial drugs, endocrine and metabolic drugs. The course is comprised of four 1-hour lectures per week by faculty with special interests and expertise in the topic being presented. Student evaluation is based on four short answer exams. This course is intendedfor non-PGG students with an interest in molecular basis of drug action. Prerequisites: Cell Biology (BIOM 600). Prerequisite: Permission of the instructor Activity: Lecture 1 Course Unit Notes: Class meets four days a week

PHRM 623 Fundamentals of Pharmacology
This course is designed to introduce students to basic pharmacological concepts with special emphasis on the molecular actions of drugs. Subject matter includes use of microcomputers to analyze pharmacological data. Taught by: Dr. Jeffrey Field and staff Course usually offered in fall term Also Offered As: REG 623 Prerequisite: Permission of the course director Activity: Lecture 1 Course Unit Notes: Meets three times per week

PHRM 624 Medical Pharmacology
Taught by: Axelsen and staff. This course is centered on the molecular basis of drug action. It is comprised of four 1-hour lectures per week (as described for PHRM 600) and supplemented with weekly problem sets and readings designed to reinforce and expand upon materials presented in lecture. Student evaluation is based on four exams and weekly problem sets. PHRM 624 is required of all 2nd year PGG students. PGG students must co-enroll in PHRM 532/CAMB 532 (Human Physiology). Prerequisites:Cell Biology (BIOM 600). Activity: Lecture 2 Course Units
PHRM 630 Frontiers in Bioorganic and Medicinal Chemistry
This advanced course for graduate students will be based primarily on didactic lectures from three Penn faculty. Permission for a student to participate should first be obtained from one of the participating faculty. A solid background in chemistry and biochemistry will be required. Overviews of current and emerging topics in bioorganic and medicinal chemistry will be presented. Students will be given short "take home" problem sets, two formal interim examinations, and a formal final examination during the semester. Topics that will be covered over the semester include: Mass spectrometry of DNA and DNA-adducts, Synthetic peptides/peptide mimics/proteins, including the expansion of the genetic code; methods of synthesis and applications, Synthetic RNAs, DNAs and nucleic acid mimics: methods of synthesis and applications, Synthetic oligosaccharides: methods of synthesis and applications, Combinatorial chemistry, Enzymology of translation, Antibiotic biosynthesis, Introduction to drug metabolism, Characterization of drug metabolites, Characterization of reactive metabolites from drugs and endogenous molecules, DNA-adducts from drugs and endogenous molecules, Lipidomics in drug development.
Taught by: Dr. Ian Blair, Dr. Barry Cooperman, Dr. Dewey McCafferty
Course usually offered in fall term
Prerequisite: Permission of the courses directors
Activity: Lecture
1 Course Unit

PHRM 632 Cell Cont Sig Trans Path.
Course usually offered in spring term
Also Offered As: CAMB 632
Activity: Seminar
1 Course Unit

PHRM 640 Topics in Cancer Pharmacology
Reviews of current literature on topics such as cancer cell signaling, cancer genetics, hormonal carcinogens, environmental carcinogens, chemoo- and gene therapy of cancer, cancer epidemiology and prevention. New hypotheses in cancer etiology, prevention and treatment will be discussed as they appear in the literature. The aim of the course is to introduce the students to the latest development in the above areas related to cancer pharmacology.
Taught by: Dr. Judy Meinloth and Dr. Wenchao Song
Course usually offered in spring term
Prerequisite: permission of course directors
Activity: Lecture
1 Course Unit
Notes: Class meets Wednesdays, 1:00 - 3:00; Fall semester

PHRM 650 Participation in the "Dr. George W. Raiziss Biochemical Rounds", a weekly seminar program sponsored by the Department of Biochemistry and Biophysics. Program deals with a wide range of modern biochemical and biophysical topics presented by established investigators selected from our faculty, and by leading scientists from other institutions.
Taught by: Black, B. & Shorter, J.
Also Offered As: BMB 650, CAMB 702
Prerequisites: Course is limited to BGS graduate students and undergrads from the Vagelos Scholars Program.
Activity: Seminar
1 Course Unit

PHRM 657 Haz Waste Health Effects
Also Offered As: ENVS 657
Activity: Lecture
1 Course Unit

PHRM 660 Frontiers in Cancer Pharmacology
This advanced course for graduate students combines didactic lectures from Penn faculty with oral presentations and oral assignments from the students. Students should have either completed PHRM 560, Principles in Cancer Signaling and Therapeutics or PHRM 640, Topics in Cancer Pharmacology or equivalent classes. The faculty will present overviews of current and emerging topics in cancer pharmacology. Emphasis of the presentations will be on the translation of basic science discoveries into therapeutic agents. Students will choose related topics to explore in more detail. In consultation with Dr. Blair, students will prepare a 45-minute presentation (using Power Point slides). Each student will give at least two presentations during the semester. The faculty teaching the course will be available for help with the presentations. The written assignment will involve a 10-page double spaced paper (exclusive of references) with a maximum of 25 references. The assignment will consist of a literature review in the area of one of the presentation topics chosen by the student. Additional information can be obtained from the Center for Cancer Pharmacology web site: http://www.med.upenn.edu/ccp/
Taught by: Dr. Ian A. Blair
Course usually offered in fall term
Prerequisite: Permission of the course director
Activity: Lecture
1 Course Unit

PHRM 699 Laboratory Rotation
Activity: Laboratory
1 Course Unit

PHRM 799 Independent Study
One-term course offered either term
Activity: Independent Study
0.5 Course Units

PHRM 899 Pre-Dissertation Lab Rotation
Activity: Laboratory
1 Course Unit

PHRM 999 Research in Pharmacology
Independent or collaborative research in various fields of pharmacology arranged individually with members of the staff.
One-term course offered either term
Prerequisite: Permission of staff member
Activity: Independent Study
1 Course Unit
**Philosophy (PHIL)**

**PHIL 001 Introduction to Philosophy**
Problems of Philosophy. The aim of this course is to introduce some of the major topics and methods of analytic philosophy. As the course goes on, the questions we consider will become more explanatorily deep. It begins with questions about what we should do (Normative Ethics). We then move to questions about how we can even do anything at all (Free Will). We then consider how we might know about any of this (Epistemology). Finally we ask what we even are and what it means for us to be at all (Mind and Personal Identity). This course will not assume any background in philosophy. For most students, it will be a challenging, though hopefully worthwhile, course. The course will push you to understand and communicate clearly about material that is often difficult to understand. Along with introducing you to analytic philosophy, this course will help students become better skilled in understanding and intelligently questioning sophisticated arguments, which can come in handy in a large number of pursuits.
For BA Students: Humanities and Social Science S
Taught by: Detlefsen, Singer, Weisberg
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Also fulfills General Requirement in History Tradition for Class of 2009 and prior. Freshman Seminar sections offered

**PHIL 002 Ethics**
Ethics is the study of right and wrong behavior. This introductory course will introduce students to major ethical theories, the possible sources of normativity, and specific ethical problems and questions. Topics may include euthanasia, abortion, animal rights, the family, sexuality, bioethics, crime and punishment and war.
For BA Students: Society Sector
Taught by: S. Meyer, Tan, Lord, M. Meyer
One-term course offered either term
Activity: Seminar
1 Course Unit

**PHIL 003 History of Ancient Philosophy**
This course is an introduction to philosophy in the ancient world. While today, philosophy is considered a branch of academic inquiry, many of the ancient Greeks and Romans, however, held a radically different conception of the discipline. For them, philosophy was nothing less than an entire way of life—not just a set of doctrines or arguments, but an orientation and set of lived practices, a conscious and continual reforming of the self in light of some principle or principles. In this course, we will examine the major movements and figures of ancient philosophy. Major figures will include Socrates, Plato, Aristotle, the Stoics, the Epicureans, and the Skeptics.
For BA Students: History and Tradition Sector
Taught by: S. Meyer
Course usually offered in fall term
Also Offered As: CLST 103
Activity: Lecture
1 Course Unit

**PHIL 004 History of Modern Philosophy**
This course is an introduction to a few central themes in philosophy in the 17th and 18th centuries, and to some of the crucial thinkers who addressed those themes. Topics to be covered may include, among others, the nature of the human being (including the human mind), the relationship between God and the created world, the nature of freedom, and the relations among natural sciences, philosophy and theology in this rich period of human history.
For BA Students: History and Tradition Sector
Taught by: Hatfield, Detlefsen, Chignell
Course usually offered in spring term
Also Offered As: GSWS 006
Activity: Lecture
1 Course Unit

**PHIL 005 Formal Logic I**
This course provides an introduction to some of the fundamental ideas of logic. Topics will include truth functional logic, quantificational logic, and logical decision problems.
Taught by: Domotor, Weinstein
One-term course offered either term
Also Offered As: LGIC 010, PHIL 505
Activity: Lecture
1 Course Unit
Notes: This is a Formal Reasoning course.

**PHIL 006 Formal Logic II**
An introduction to first-order logic including the completeness, compactness, and Lowenheim-Skolem theorems, and Godel's incompleteness theorems.
Taught by: Weinstein
Course usually offered in spring term
Also Offered As: PHIL 506
Activity: Lecture
1 Course Unit

**PHIL 007 Critical Thinking**
This course will provide the student with informal techniques for identifying and analyzing arguments found in natural language. Special attention will be paid to developing the ability to assess the strength of natural language arguments, as well as statistical arguments.
Course not offered every year
Activity: Lecture
1 Course Unit

**PHIL 008 The Social Contract**
This is a critical survey of the history of western modern political philosophy, beginning from the Early Modern period and concluding with the 19th or 20th Century. Our study typically begins with Hobbes and ends with Mill or Rawls. The organizing theme of our investigation will be the idea of the Social Contract. We will examine different contract theories as well as criticisms and proposed alternatives to the contract idea, such as utilitarianism. Besides the above, examples of authors we will read are Locke, Rousseau, Hume, Mill and Marx.
For BA Students: Society Sector
Taught by: Freeman, Tan
Course usually offered in spring term
Also Offered As: PPE 008
Activity: Lecture
1 Course Unit
PHIL 010 Topics in Philosophy I
In classical Athens the question of how a government should work was an urgent one. They invented democracy, adopted it successfully for decades, and then it faced challenges, from oligarchs and others. At this time of tumult, the philosopher Plato set out to explore the question of the best form of government by framing it as a question of justice. Which mode of governing is the one that delivers justice? But to understand this question, a person first needs to understand what justice itself is. Coming up with an answer to this is a thorny and difficult prospect. By focusing on Plato’s Republic, this course aims to explore how best to govern a society, what kinds of qualities one should expect in a leader, and how these questions are connected to very basic understandings about human nature, society, and the world in general.
Taught by: Tan, Taylor
Course not offered every year
Also Offered As: CLST 005
Activity: Seminar
1 Course Unit

PHIL 015 Logic and Formal Reasoning
This course offers an introduction to three major types of formal reasoning: deductive, inductive (probabilistic and statistical), and practical (decision-making). The course will begin with the study of classical sentential and predicate logics. It will move on to elementary probability theory, contemporary statistics, decision theory and game theory.
For BA Students: Formal Reasoning and Analysis
Taught by: Domotor
Course usually offered in spring term
Activity: Lecture
1 Course Unit

PHIL 024 Philosophy of Biology
In this course, we will investigate whether or not there is such a thing as "human nature", and, if there is, what it comprises. We will begin by surveying the history of philosophical and scientific theories about the relationship between bodies and minds. We will then consider what, if anything, makes humans unique within the animal kingdom. Finally, we will examine (purported) racial, sexual, and ethical differences between humans. Throughout the course, we will come to understand and critically assess a variety of philosophical and scientific methods of studying human beings (and other animals).
Activity: Seminar
1 Course Unit

PHIL 025 Philosophy of Science
What counts as a scientific theory? What counts as evidence for a scientific theory? Are scientific inferences justified? Does science give us truths or approximate truths about a world that exists independently of us? How can we know? Does it matter? These are all perennial questions in the philosophy of science, and the goal of this course is to look at how philosophers have answered these questions since the scientific revolution. In addition to reading classic work by philosophers of science, we will read material from living and dead scientists in order to gain a deeper appreciation of the philosophical questions that have troubled the most brilliant scientists in Western science.
For BA Students: Natural Science and Math Sector
Taught by: Weisberg, Spencer
One-term course offered either term
Activity: Lecture
1 Course Unit

PHIL 026 Philosophy of Space and Time
This course provides an introduction to the philosophy and intellectual history of space-time and cosmological models from ancient to modern times with special emphasis on paradigm shifts, leading to Einstein’s theories of special and general relativity and cosmology. Other topics include Big Bang, black holes stellar structure, the metaphysics of substance, particles, fields, and superstrings, unification and grand unification of modern physical theories. No philosophy of physics background is presupposed.
For BA Students: Natural Science and Math Sector
Taught by: Domotor
Course usually offered in fall term
Also Offered As: STSC 026
Activity: Lecture
1 Course Unit

PHIL 028 Introduction to Feminist Philosophy
This course is an introduction to feminist thought, both in theory and in practice. We will consider how feminist thought emerged and evolved, as well as how feminist theories respond to various intellectual, social and political challenges. Questions we will address include: What exactly is feminism? How does one’s gender identity impact one’s lived experiences? How should we revise, reformulate, or rethink traditional answers to political and ethical issues in light of feminist theories? How can feminist analyses contribute to the development of better science, and our conceptions of knowledge?
Taught by: M. Meyer
Course not offered every year
Also Offered As: GSWS 028
Activity: Seminar
1 Course Unit
Notes: Offered through the College of General Studies

PHIL 029 Philosophy of Sport
This is an introductory philosophy course that uses philosophical tools to understand and answer questions that arise in and about sports. The central question to be answered is what constitutes cheating in sports, especially by methods that enhance athletic performance. Other topics may include the nature of competition in sport, the appropriate competitors in sporting events, and the ethics of team loyalty.
Taught by: M. Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 032 Topics in Contemporary Philosophy
Transhumanists seek to extend the capacities of the human mind beyond the bounds of the human brain and body through technology. Indeed, for them, such an extension of human thinking and feeling represents the next big step in human cognitive evolution. In this course, we will examine the philosophical conception of a mind that underpins this movement to extend the human mind beyond human biology. Through an examination of the hypothesis that there can be non-biological thinking and feeling, we consider whether technologies that enable or enhance human mental faculties might one day completely supplant the biological machinery of the human body. We will also consider the moral issues surrounding the creation of transhumans. The questions that we consider in this course will get to the heart of what it means to possess a human mind and indeed to be a human being.
Taught by: Varying instructors
Course not offered every year
Activity: Seminar
1 Course Unit
PHIL 034 Philosophy of Religion
An introductory philosophical examination of questions regarding the nature of religious experiences and beliefs; arguments for and against the existence of God; the problem of evil; the relationships of faith, reason and science, the possibility of religious knowledge, the role of religious communities, etc. Readings from the history of philosophy, 20th century and contemporary analytic philosophy, and the European phenomenological, existential, and hermeneutic traditions.
Taught by: Steinberg
Course not offered every year
Also Offered As: RELS 011
Activity: Lecture
1 Course Unit

PHIL 044 Introduction to Cognitive Science
Scope and limits of computer representation of knowledge, belief and perception, and the nature of cognitive processes from a computational perspective.
Taught by: Kearns, Liberman, Weinstein, Hatfield
Course usually offered in fall term
Also Offered As: CIS 140, COGS 001, LING 105, PPE 140, PSYC 207
Activity: Lecture
1 Course Unit
Notes: Formal Reasoning Course. All Classes

PHIL 045 Animal Minds
In this course, we will examine philosophical issues in nonhuman animal cognition. We will consider questions such as the following: Do nonhuman animals use concepts? How do we assess different interpretations of their behaviour? What is the role of anthropomorphism in thinking about nonhuman animal cognition? How are intelligence and sociality related?
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 050 Introduction to Indian Philosophy
This course will take the student through the major topics of Indian philosophy by first introducing the fundamental concepts and terms that are necessary for a deeper understanding of themes that pervade the philosophical literature of India—arguments for and against the existence of God, for example the ontological status of external objects, the means of valid knowledge, standards of proof, the discourse on the aims of life. The readings will emphasize classical Hindu, Buddhist, and Jain philosophical articulations (from 700 B.E. E. to 16th century CE) but we will also supplement our study of these materials with contemporary or relatively recent philosophical writings to modern India.
For BA Students: History and Tradition Sector
Also Offered As: RELS 155, SAST 050, SAST 152
Activity: Lecture
1 Course Unit

PHIL 051 Yoga and Philosophy
"Yoga" means to yoke in Sanskrit. Metaphorically, this is often interpreted as union, or integration. This course will explore central aspects of yogic philosophy and practice, and how they relate to, and might be integrated with, contemporary analytic philosophy, college life, and beyond. We will focus on three key issues: (1) What is yogic philosophy? How does it relate to the western philosophical tradition more commonly taught in philosophy departments in the U.S.? (2) What does the practice of yoga have to do with theoretical understanding? (3) Is it possible to integrate a yogic worldview and a scientific worldview? Is there scientific evidence that yoga "works"? What does that even mean? This course will contain both a theoretical component and a practice component. In addition to writing analytical essays on these topics, students will maintain a yoga practice and a reflective journal throughout the course. No prior experience with yoga is required.
Taught by: Miracchi
Activity: Seminar
1 Course Unit

PHIL 054 Contemporary Continental Philosophy
An introduction to 20th century continental European philosophy, focusing on the origins and development of phenomenology and existentialism and their influence on contemporary thought. The course will include an introduction to the phenomenology of Edmund Husserl and examine the subsequent development of modern philosophic existentialism by critics of Husserl, such as Martin Heidegger, Jean-Paul Sartre or Maurice Merleau-Ponty. Finally, the important influence of phenomenology and existentialism on contemporary trends in French, German, and American philosophy will be explored, including hermeneutics, deconstruction, post-modernism, and post-analytic philosophy. No previous study of philosophy is required.
Course not offered every year
Activity: Lecture
1 Course Unit

PHIL 055 Existentialism
This course treats "existentialism" as an historical, philosophical, and literary phenomenon. In addition to close readings of philosophical texts by Nietzsche, Kierkegaard, Heidegger, Sartre, Simone de Beauvoir, and Camus, we will read literary works by Dostoyevsky, Ibsen, Kafka, Beckett, Knut Hamsun, and Richard Wright. There will also be semi-regular film screenings. Topics include death, anxiety, resentment, and will-to-power, authenticity, faith, the absurd, racism and sexism, sources of art and morality, and the nature of human existence.
Course not offered every year
Activity: Seminar
1 Course Unit
PHIL 067 19th Century Philosophy
"God is dead," this famous, all too famous death sentence, issued by the 19th-century German philosopher Friedrich Nietzsche, also signaled the genesis of a radical challenge to traditional notions of morality, cultural life, and the structure of society as a whole. In this course we will examine both the "modernity" of Nietzsche's thought and the ways in which his ideas have helped to define the very concept of Modernity (and, arguable, Postmodernity) itself. In exploring the origin and evolution of Nietzsche's key concepts, we will trace the ways in which his work has been variously revered or refuted, championed or co-opted, for more than a century. We will survey his broad influence on everything from philosophy and literature to music and art, theater and psychology, history and cultural theory, politics and popular culture. Further, we will ask how his ideas continue to challenge us today, though perhaps in unexpected ways. As we will see, Nietzsche wanted to teach us "how to philosophize with a hammer."
Taught by: Jarosinski
Course not offered every year
Also Offered As: GRMN 248
Activity: Lecture
1 Course Unit

PHIL 071 Animal Ethics
We all face difficult moral decisions on occasion. This course introduces students to the idea that we face such a decision several times a day in deciding what to eat. How should facts about animal life and death inform this decision? Is the suffering involved in meat, egg, and dairy production really bad enough to make the practices immoral? How do our dietary choices affect local and non-local economies, the environment, and other people generally? Finally, given the deep connections between eating practices and various ethnic, religious and class identities, how can we implement a reasonable food policy for an expanding world population while also respecting these important differences? The goal of this course is not to teach some preferred set of answers to these questions. The goal is rather to give participants the basic tools required to reflect clearly and effectively on the questions themselves. These tools include a working knowledge of major moral theories developed by philosophers, and an understanding of basic empirical issues related to food. In addition to readings, lectures, and required sections, the course may involve trips to some local food-production facilities, as well as supplemental lectures by experts from Penn, Philadelphia, and beyond.
Taught by: Chignell
Course not offered every year
Also Offered As: HSOC 171, STSC 171
Activity: Lecture
1 Course Unit

PHIL 072 Biomedical Ethics
This course is an introduction to bioethics, focusing on ethical questions arising at the beginning and end of life. Topics will include procreative responsibilities, the question of wrongful life, and prenatal moral status as well as questions of justice related to markets for sperm, eggs and gestation. We will also attend to dilemmas at the end of life, including the authority of advance directives, euthanasia and the allocation of life-saving therapies.
For BA Students: Society Sector
Course not offered every year
Also Offered As: PPE 072
Activity: Lecture
1 Course Unit

PHIL 073 Topics in Ethics
This course examines some of the central theoretical and applied questions of ethics. For example, what is the good life? By what measure or principles do we evaluate the rightness and wrongness of actions? How does ethical reasoning help us understand and address real world problems such as world hunger, social injustice, sex and race discrimination, allocation of scarce resources and the like. The course can be organized around an applied topic or practical issue such as global ethics, just war, biomedical ethics or environmental ethics.
Taught by: Gibbons, M.Meyer
Course not offered every year
Also Offered As: ENVS 073, PPE 073
Activity: Seminar
1 Course Unit

PHIL 074 Business Ethics
In this course we will begin by examining practical ethical dilemmas facing businesses. Since usually people, not businesses, face ethical quandaries, we will consider how a business can face an ethical dilemma at all. Maybe it doesn't even make sense to attribute responsibilities, liabilities, or agency to corporations. If businesses do indeed have moral responsibilities, perhaps that means that employees have corresponding rights against their employers. With a better understanding of how the ethical world intersects with the business world, we can thoughtfully discuss the place of the corporation in society.

1 Course Unit

PHIL 076 Political Philosophy
Taught by: Freeman
Course not offered every year
Activity: Lecture
1 Course Unit
PHIL 077 Philosophy of Law
This course is an introduction to the Philosophy of law. The central question of the course is this: why have law? Answering that question requires engaging with another question: what is law? We will approach those two questions in a variety of ways throughout the semester. In the first section of the course, we will begin by discussing one important feature of law: its close connection to coercion and punishment. Many have argued that the close relationship between law and coercion creates a demand for justification: what can or does justify law, given that law involves coercion? We will explore answers to that question. We will also consider a more general question: what good is law? (if we didn’t have law, why might we want it?) The second section of the course engages with these same issues but in more concrete settings: the areas of criminal law and property law. We will consider what, if anything, is distinctive about those two areas of law, and we will consider whether the purported purpose(s) of law in general that we discuss in the first section make more or less sense when we consider these two specific areas of law. We will also consider distinctive aspects of the sources of law in these two areas of law: democratically enacted statutes, in the case of criminal law, and judge-made common law, in the case of property law. The third and final section of the course will consider an unusual and particularly significant kind of law: constitutional law. We will consider the purpose(s) of constitutions, how constitutionalism relates to democracy, and how constitutions ought to be understood and interpreted, in light of our answers to these first two questions. Throughout the course, we will engage with both classic and contemporary work, reading work by Michelle Alexander, Jeremy Bentham, Angela Davis, Ronald Dworkin, John Hart Ely, H.L.A. Hart, Thomas Hobbes, John Locke, John Stuart Mill, Robert Nozick, Martha Nussbaum, Richard Posner, Jeremy Waldron, and others. For BA Students: Society Sector Taught by: Freeman, Tan Course not offered every year Activity: Lecture 1 Course Unit

PHIL 079 Environmental Ethics
In this course we will investigate some of the ethical issues that arise from our relationship with the environment. We will examine important issues in environmental ethics, supplementing our discussions by considering how the latest scientific results affect environmental thinking and policy. Topics covered will include (but not be limited to): What are our responsibilities toward the environment, as individuals and as members of institutions? How do our responsibilities toward the environment relate to other ethical considerations? Do non-human animals/species/ecosystems have intrinsic value? What should conservationists conserve (Conservation vs restoration, keystone species vs ecosystems)? Course not offered every year Activity: Seminar 1 Course Unit

PHIL 080 Aesthetics
This course examines philosophical issues centering on the nature and value of the arts. Some questions we’ll consider are: What is art? What does it mean to have an aesthetic experience? How are aesthetic experiences different from non-aesthetic ones? What is the relation between art and truth? How do the moral qualities in a work of art affect its aesthetic qualities? Why are emotions important in our interpretations of artworks? What is the relation between art and expression? Do forgeries necessarily have less aesthetic value than original artworks? What are aesthetic judgments, and are they merely expressions of taste? Lecture and discussion will center on both classical and contemporary works in aesthetics. For BA Students: Arts and Letters Sector Course not offered every year Activity: Seminar 1 Course Unit

PHIL 155 Continental Philosophy
In this course we read various texts in the Enlightenment tradition and more recent ones critical of modern distortions of this tradition. We shall begin briefly with Kant and Marx, two exemplars of this tradition, and then we shall study in some detail the views of the Frankfurt School (especially the writing of Horkheimer and Adorno), Foucault, and Derrida. Background readings from Nietzsche and Saussure shall also be assigned to place the material from Foucault and Derrida in its proper context. Course not offered every year Activity: Lecture 1 Course Unit

PHIL 202 Topics in Ethics I
As an account of the standard of right conduct, consequentialism is sometimes said to be the view that the rightness of an act is determined entirely by the value of its consequences. Since the 1970s, consequentialism and its most widely-endorsed version, utilitarianism, have been the subjects of a number of influential critiques. Philosophers have contended that consequentialism cannot account for the distinctive values of justice and fairness, for the significance of character, for the agent-relativity of some moral demands, and for the action-guiding function that moral theories are thought to possess. These critiques recommend a close study of the alternative, deontological ethical framework from which many of these critiques originate a framework contending that the right is prior to the good, in John Rawls words. But these critiques have also prompted spirited responses from consequentialists and sophisticated modifications to their theories; these responses are also worth exploring. The focus of this course is to consider and assess some of the important strands in this debate, including the suggestion that neither moral framework adequately captures human concerns about morality and value. We will begin by looking at some of the historical antecedents to the contemporary debate, starting with work by Bentham, Mill, and Sidgwick. We will then move forward to the contemporary debate, reading important critiques by John Rawls, Bernard Williams, Thomas Nagel, Philippa Foot and others, as well as responses by Peter Railton, Samuel Scheffler, and others. Finally, we will look at recent work by Susan Wolf that provides an alternative perspective on morality, value, and meaningfulness. Activity: Seminar 1 Course Unit
PHIL 203 Thinking with Models
When a flu pandemic strikes, who should get accinated first? What's our best strategy for minimizing the damage of global climate change? Why is Philadelphia racially segregated? Why do most sexually reproducing species have two sexes, in roughly even proportions? These and many other scientific and practical problems required us to get a handle on complex systems. And an important part of deepening our understanding and sharpening our intuitions requires us to think with models. Students in this laboratory-based course will learn about the varied practices of modeling, and will learn how to construct, analyze, and validate models.
For BA Students: Formal Reasoning and Analysis
Taught by: Weisberg
Course not offered every year
Also Offered As: OIDD 325
Activity: Seminar
1 Course Unit

PHIL 205 What is Meaning?
This course will survey several central topics in philosophy of mind and language, as well as investigate how these areas of philosophy interact with the scientific study of the mind. Among the questions we'll be asking are: What is it to have a mind? What is consciousness? What is it to think, to perceive, to act, to communicate, to feel emotions? What is the relationship between the mind and the brain? Can there be a science of the mind? Of language? What can it tell us? What can philosophy contribute to cognitive science? We will look for more precise ways of asking these questions, and we will study some canonical answers to them. We will also look for places where more precise ways of asking these questions build in hidden assumptions, and what that might mean for both a philosophy and a science of the mind.
Course not offered every year
Also Offered As: PHIL 294
Activity: Lecture
1 Course Unit

PHIL 209 Introduction to Plato
This course involves a close reading of the most important dialogues written by Plato, one of the greatest philosophers of all time. We will examine a wide range of topics in metaphysics, epistemology, and ethics: What is the nature of the soul? Is there an afterlife? What are the fundamental entities in the world? What are Plato's "forms"? What is knowledge and what can be known? Are we born as a blank slate or is something innate in us? What is the good life? What is the best way for us to live our lives? We will see how Plato attempts to answer these questions in his early, middle, and late dialogues, and we will ask whether and how exactly he is self-critical and changes his views over time.
Taught by: S.Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 210 Introduction to Aristotle
Aristotle (384-323 BCE) was one of the most important philosophers in Classical Greece, and his legacy had unparalleled influence on the development of the Western philosophical thought through the medieval period. We will study a selection of his works in natural philosophy, metaphysics, epistemology, psychology, ethics and politics. All texts will be read in English translation. No background in Greek philosophy or knowledge of Greek is required.
Taught by: S.Meyer
Course not offered every year
Also Offered As: CLST 210
Activity: Lecture
1 Course Unit

PHIL 211 Ancient Moral Philosophy
The Nicomachean Ethics is considered to be Aristotle’s major ethical work, and it is still counted among the most influential ethical texts altogether. This course will focus on Aristotle’s Nicomachean Ethics with a special emphasis on questions that are systematically relevant for problems discussed in contemporary approaches to virtue ethics. These questions concern, for example, the Aristotelian conception of virtue, the scope and nature of practical wisdom, and the relationship between virtue and justice.
For BA Students: Society Sector
Taught by: S.Meyer
Course not offered every year
Also Offered As: CLST 211
Activity: Seminar
1 Course Unit

PHIL 220 Proof in Mathematics, Philosophy and Law
Proofs are vital to many parts of life. They arise typically in formal logic, mathematics, the testing of medication, and convincing a jury. How do you prove that the earth is essentially a sphere (in particular, not flat)? In reality, proofs arise anywhere one attempts to convince others. However, the nature of what constitutes a proof varies wildly depending on the situation -- and on whom you are attempting to convince. Convincing your math teacher or a judge is entirely different from convincing your mother or a jury. The course will present diverse views of Proof. On occasion there may be guest lecturers.
Taught by: Weinstein
Course not offered every year
Also Offered As: MATH 220
Prerequisite: MATH 103 or PHIL 005
Activity: Seminar
1 Course Unit

PHIL 221 Philosophy East and West
Our goal in this course is to bring Western Philosophy and Eastern Philosophy into dialogue. Topics we will cover include skepticism and knowledge, ethics and the good life, moral responsibility and personal relationships, and political obligations and justice. Do the Western and Eastern philosophical traditions approach these topics in the same way? Do they even share an understanding of what the problems and issues at stake are? And what can we learn from comparative philosophy? This freshman seminar does not presuppose prior knowledge of philosophy. Examples of authors we will study include Descartes, Aristotle, Mencius, and Confucius.
Taught by: Tan.
Course not offered every year
Activity: Seminar
1 Course Unit
PHIL 223 Philosophy and Visual Perception
In this course, we’ll use the biology, psychology and phenomenology of vision to explore philosophical questions about color, such as these: Color vision helps us get around in our environments, but in what sense is it a window onto reality, if it is? Are colors properties of objects, or are they inherently private, subjective properties of minds? What can non-human forms of color vision teach us about the nature of color, and how should we empirically study color vision? Do we need to see in color to understand it? How do our ordinary ways of talking and thinking about colors relate to the experiences we have in color? How does color vision figure in aesthetic judgment? And to what degree can it be influenced by learning, or by social biases like sexist or racist prejudices?
Taught by: Hatfield, Connolly
Also Offered As: PHIL 423, VLST 223
Activity: Seminar
1 Course Unit

PHIL 225 Introduction to Philosophy of Science
A discussion of some philosophical questions that naturally arise in scientific research. Issues to be covered include: The nature of scientific explanation, the relation of theories to evidence, and the development of science (e.g., does science progress? Are earlier theories refuted or refined?).
Taught by: Domotor
One-term course offered either term
Also Offered As: STSC 108
Activity: Seminar
1 Course Unit

PHIL 226 Philosophy of Biology
This course consists of a detailed examination of evolutionary theory and its philosophical foundations. The course begins with a consideration of Darwin’s formulation of evolutionary theory and the main influences on Darwin. We will then consider two contemporary presentations of the theory: Richard Dawkins’ and Richard Lewontin’s. The remainder of the course will deal with a number of foundational issues including adaptation, the units of selection, the evolution of altruism, and the possibility of grounding ethics in evolutionary theory.
For BA Students: Natural Science and Math Sector
Taught by: Domotor, Spencer, Weisberg
Course not offered every year
Also Offered As: PHIL 521, PPE 225, PPE 421
Activity: Seminar
1 Course Unit

PHIL 227 Conceptions of the Self
Investigation of such topics as the unity of consciousness and personal identity. Some attention will be given to the relations between conceptions of the self and conceptions of morality.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 228 Philosophy of Social Science
This course is about the foundations of contemporary social science. It focuses on the nature of social systems, the similarities and differences between social and natural sciences, the construction, analysis, and confirmation of social theories, and the nature of social explanations. Specific topics may include: What are social norms and conventions? What does it mean to have one gender rather than another, or one sexual orientation rather than another? Should social systems be studied quantitatively or qualitatively?
Taught by: Weisberg, Bicchieri
Course not offered every year
Prerequisites: PPE 008, ECON 001, ECON 002, PSCI 182, PPE 153, PPE 201
Activity: Lecture
1 Course Unit

PHIL 231 Epistemology
Two basic assumptions of academic research are that there are truths and we can know them. Epistemology is the study how knowledge, what it is, how it is produced, and how we can have it. Metaphysics, the study of the basic constituents of reality, the study of being as such. In this introduction to metaphysics and epistemology, we will ask hard questions about the nature of reality and knowledge. No philosophy background is required for this course.
Taught by: Singer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 233 Philosophy of Economics
In this course, general philosophy of science issues are applied to economics, and some problems specific to economics are tackled. While analytical questions like "What is economics?" or "What is an economic explanation" must be pursued, the ultimate goal is practical: What is good economics? How can economists contribute to a better understanding of society, and a better society? How can we make economics better? Topics to be discussed include the following: specific object and method of economics as a social science; its relation with other disciplines (physics, psychology and evolutionary theory); values in economics (welfare, freedom, equality and neutrality); the role of understanding and possible limits of a quantitative approach to human behavior (purposefulness, freedom, creativity, innovation); prediction, unpredictability and the pretension of prediction; causation in econometrics and in economic theory (equilibrium); selfishness and utility maximization (cognitive and behaviorist interpretations); economic models and unrealistic assumptions (realism and instrumentalism); empirical basis of economics (observation and experiment); microeconomics and macroeconomics (reductionism and autonomy); pluralism in economics (mainstream economics and heterodox schools).
Course not offered every year
Also Offered As: PPE 333
Activity: Lecture
1 Course Unit
PHIL 234 Philosophy of Religion
This course will focus on arguments for and against the existence of God. It will begin by examining the ontological, cosmological, and design arguments for the existence of God. Included will be a discussion of purported evidence for the existence of God from modern biology and cosmology. It will then examine arguments against the existence of God based on human and animal suffering, followed by arguments against the existence of God arising from the scarcity of credible miracle claims.
Course not offered every year
Also Offered As: RELS 204
Activity: Seminar
1 Course Unit

PHIL 242 Freedom of the Will
A discussion of various challenges to our self-understanding that arise from thinking about persons and their actions as part of the order of nature. Questions to be considered include: what it is to be a free agent and what it means to have a free will, the degree to which our beliefs about physical causality undermine our beliefs about agency, the nature and importance of moral responsibility, and the relationship between freedom and responsibility. Readings are drawn from both historical and contemporary sources.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 243 Topics in Metaphysics
In this class we employ science fiction thought experiments as a means of reflecting on questions like: What is reality? What is the nature of the self and mind? Might you be in a computer simulation (e.g., as in The Matrix)? Is time travel possible? Can your mind survive the death of your brain by uploading? Is time real or is it merely an illusion?
Taught by: Domotor
Course not offered every year
Prerequisites: PHIL 001 or PHIL 003 or PHIL 004, or permission of instructor.
Activity: Seminar
1 Course Unit

PHIL 244 Introduction to Philosophy of Mind
This course will survey several central topics in philosophy of mind, as well as investigating how philosophy of the mind interacts with scientific study of the mind. Among the questions we'll be asking are: What is it to have a mind? What is the relationship between the mind and the brain? Can there be a science of the mind? What can it tell us? What can philosophy contribute to a science of the mind? What is consciousness? What is it to think, to perceive, to act? How are perception, thought, and action related to one another?
Taught by: Domotor, Miracchi
One-term course offered either term
Also Offered As: PPE 244, VLST 221
Activity: Lecture
1 Course Unit

PHIL 245 Philosophy & Science Fiction
In this class we employ science fiction thought experiments as a means of reflecting on questions like: What is reality? What is the nature of the self and mind? Might you be in a computer simulation (e.g., as in The Matrix)? Is time travel possible? Can your mind survive the death of your brain by uploading? Is time real or is it merely an illusion?
Activity: Seminar
1 Course Unit

PHIL 247 Marx
Precious few, if any, communist states exist today as Karl Marx would have imagined them. Indeed, almost every part of the 19th-century culture Marx put under his philosophical microscope has in one way or another vanished or been radically transformed: the state, the school, even sex have been fundamentally altered during a long 20th century filled with revolutions of culture. This class asks: is there a future for a philosopher whose political projects seem so precarious—if they have not failed outright—in the face of global capitalism? We will try to answer this question by examining the origins and the implications of Marx's writings, but also his complex legacy, from Lenin through Guevara to Foucault and Zizek. The course will conclude with a consideration of the role of the radical in today's global politics and cultural sphere.
For BA Students: Humanities and Social Science S

Course not offered every year
Also Offered As: COML 247, GRMN 247
Activity: Lecture
1 Course Unit

PHIL 249 Philosophy of Education
The philosophy of education asks questions about the foundational assumptions of our formal institutions for the reproduction of culture. It ranges therefore, from epistemology and philosophy of mind to ethics and political philosophy. For instance: What is the nature of learning and teaching? How is it possible to come to know something we did not know already—and how can we aid others in doing that? How, if at all, should formal institutions of education be concerned with shaping students' moral and civic character? What is the proper relation between educational institutions and the state? We also ask questions more specific to our own time and context. For example: how, in a multicultural state, should we educate students of varied social identities, like race, gender, and religion? What is the relationship between education and justice.

Course not offered every year
Also Offered As: EDUC 576, GSWS 249
Activity: Seminar
1 Course Unit
PHIL 252 African American Philosophy
A new field has slowly begun to emerge within the traditional discipline of academic philosophy. African-American Philosophy. "African American Philosophy" refers here to conceptually and analytically rigorous philosophical studies of topics closely related to the social, legal, economic, historical, and cultural experiences of US peoples of African descent. The field has appeared in tandem with a striking increase in the number of professionally trained philosophers of African descent holding the Ph.D. in philosophy, and employed as full-time teachers and scholars. A recent estimate puts the number of philosophers of African descent working in the US at about one hundred; and about twenty of these are African-American women. A significant body of scholarship now describes, explains, critiques, and evaluates African American culture, slavery, oppression, discrimination, integration, segregation, equality, gender politics, labor, families, health, mental health, and the significance of race to identity, morality, ethics, politics, democracy, public policy, law, science, technology, the humanities and the arts. This unique lecture course will be a thematic introduction to African American Philosophy since 1960. Weekly topics will be chosen from among these clusters: Slavery, Colonialism, Oppression and Freedom; Segregation, Integration and Equality; Gender, Sex and Sexualities; Reproductive Rights and Responsibilities; Religion and Spiritualism; Rebellion, Protest, Social Movements and Citizenship; Economic Welfare, Labor and Inequality; Violence, Crime and Punishment; Education, Affirmative Action and Diversity; Reparations and Forgiveness; Identities and Stereotypes; Nature, Science and Health; Psychology, Psychiatry and Mental Health; Pragmatism; Existentialism; and the Sociology of Philosophy. We will read works by Cornell West, Adrian Piper, Charles Mills, Lewis Gordon, Anita Allen, Anthony Appiah, Lucius Outlaw, Naomi Zack, Lawrence Thomas, Bill Lawson, Michele Moody Adams and others. For most undergraduate students, evaluation in the course will be based on a mid-term and final exam with essay and objective components. Advanced students and graduate students enrolled in the course will have an opportunity to write a substantial supervised paper on a topic of their own choosing in lieu of the exams.
Taught by: Allen-Castellitto
Course usually offered in spring term
Also Offered As: AFRC 254, AFRC 552, PHIL 552
Activity: Seminar
1 Course Unit

PHIL 255 Topics in Continental Philosophy
Martin Heidegger is counted among the most controversial thinkers of the 20th century. He is best known, however, for his early book "Being and Time". This unfinished project was supposed to be completed by several works on major figures of western philosophy, one of which is Kant. In fact, only shortly after Being and Time, Heidegger published his first book on Kant: Kant and the Problem of Metaphysics. With this book Heidegger’s so called metaphysical phase (which lasted at least until the mid 1930’s) was initiated. In this course, we will read and discuss not only large parts of Being and Time but also a selection of these later works that are primarily concerned with the nature and object of Metaphysics.
Course not offered every year
Also Offered As: GRMN 255
Activity: Seminar
1 Course Unit

PHIL 257 Kant and the 19th Century
After an orientation to Kant's philosophy, we will examine Hegel, Feuerbach, Marx, and Nietzsche.
Course not offered every year
Prerequisite: PHIL 004
Activity: Seminar
1 Course Unit

PHIL 271 Global Justice
This course is an introduction to some of the central problems in global justice. Samples of these topics include: What are our duties to respond to world poverty and what is the basis of this duty? Is global inequality in itself a matter of justice? How universal are human rights? Should human rights defer to cultural claims at all? Is there a right to intervene in another country to protect human rights there? Indeed can intervention to protect human rights ever be a duty? Who is responsible for the environment? We will read some influential contemporary essays by philosophers on these topics with the goal of using the ideas in these papers as a springboard for our own further discussion and analysis.
Taught by: Tan
Course not offered every year
Also Offered As: PPE 271
Activity: Seminar
1 Course Unit

PHIL 272 Ethics & the Professions
Since Louise Brown, the first so-called "test tube baby" was born in 1978, reproductive technologies have generated many new ways to "make" babies. These technologies mean that a number of difficult ethical questions are inescapable, not only for individuals who otherwise couldn’t have children (due to biological and/or social constraints) but for the larger society. This course will consider the prenatal moral status and identity of the fetus. It explores prenatal (and pre-implantation) genetic interventions and their possible effects on the autonomy of the child later in life as well as the possible eugenic implications of such interventions. It examines the potential conflict between a mother’s autonomy and an infant’s prenatal harm in the larger context created by new kinds of parents and new forms of kinship. Finally, it investigates the market for sperm, eggs, embryos and gestation and reflects on the questions of justice they imply.
Taught by: Tan
Course not offered every year
Prerequisites: At least one of: PHIL 002, PHIL 009, PHIL 008 or equivalent.
Activity: Seminar
1 Course Unit

PHIL 273 Ethics in the Profession
This introductory course considers the ethical issues and challenges that arise in the professions. Topics may include Legal Ethics, Business Ethics, Medical Ethics, and Political Ethics. No prior background in Philosophy or Ethics is presupposed.
Course not offered every year
Also Offered As: PHIL 473
Activity: Seminar
1 Course Unit
PHIL 277 Justice, Law and Morality
The course will focus on the philosophical background to the individual rights protected by the U.S. Constitution, including 1st Amendment freedoms of religion, expression, and association; the 14th amendment guarantee of Due Process and the rights of privacy, abortion, assisted suicide, and marriage; the Equal Protection clause and equal political rights and the legitimacy of affirmative action; and the Takings and Contract clauses and their bearing on rights of private property and economic freedoms. In addition to Supreme Court decisions on these issues, we will read works by political philosophers and constitutional theorists, including J.S. Mill, Ronald Dworkin, Cass Sunstein, Martha Nussbaum, Katherine MacKinnon and others.
Taught by: Freeman, Allen
Course not offered every year
Also Offered As: PPE 277
Activity: Lecture
1 Course Unit

PHIL 279 Contemporary Political Philosophy
This course will examine contemporary theories of justice, including libertarianism, liberalism, contemporary Marxism and feminism. Examples of topics we will examine are distributive justice, liberty, human rights, republicanism, and global justice. Philosophers we will read include John Rawls, Ronald Dworkin, Robert Nozick, Michael Walzer, Martha Nussbaum, Susan Moller Okin, and G.A. Cohen.
Taught by: Hussain, Tan
Course not offered every year
Activity: Lecture
1 Course Unit

PHIL 280 Topics in Aesthetics
What is beauty? What is the relationship between beauty and goodness? What does aesthetic judgment tell us, if anything, about the world? This course addresses these and other questions by focusing predominantly on Kant's highly influential aesthetic theory. It situates this text in the context of other works on aesthetics. We begin with Plato's view expressed in The Symposium that beauty is a form to which humans gain (some) access through love. We then turn to essays by Shaftesbury and Hume that introduce key aesthetic notions that Kant will elaborate (and revise) -- including those of taste, common sense, harmony, and aesthetic disinterest. We also read selections from the work of Friedrich Schiller, John Dewey, and A. K. Coomaraswamy who offer alternative accounts of the relationship between beauty and ethical life -- a relationship that Kant acknowledges but considers to be importantly limited. The question of the relationship between ethics and aesthetics will form the backdrop for this semester's reading overall.
Course not offered every year
Also Offered As: ENGL 394
Activity: Seminar
1 Course Unit

PHIL 281 Philosophy of Race
Historically, philosophical questions about race have been about the nature and reality of race, the nature of racism, and social or political questions related to race or racism. In fitting with that history, the first part of the course will focus on the nature and reality of race, as understood in biology and as understood by ordinary people. We will begin by looking at biological race theories from Francois Bernier in 1684 to Pigliucci and Kaplan in 2003. Next, we will look at the philosophical work that has been done on the nature and reality of race as ordinarily understood in the contemporary United States. We will discuss racial anti-realism, social constructionism about race, and biological racial realism from well-known philosophers of race like Anthony Appiah, Sally Haslanger, and Joshua Glasgo. The second part of the course will focus on the nature of racism and social or political questions related to race or racism. In our discussion of racism, we will cover, at least, intrinsic racism, extrinsic racism, and institutional racism. In our discussion of social or political issues related to race or racism, we will look at whether any US racial groups should be used to diagnose, study, or treat genetic disorders.
Taught by: Spencer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 294 The Human Animal
To ask "what is an animal?" entails wondering about what is being human. We have become increasingly aware that animals are not to be relegated to the category of pure otherness, can be disposed off and slaughtered at will, and that they may even have some rights. Taking a philosophical point of departure with Derrida (The Animal that therefore I am) and Agamben (The Open: Man and Animal), we will explore a literary corpus (with Aesop, Cervantes, Poe, Soseki, Ted Hughes, Marianne Moore, Kafka, J.M. Coetzee) as well as a few films, (The Fly, Grizzly Man) so as to question our usual assumptions about the limits separating humanity from animality.
Course not offered every year
Also Offered As: ENGL 394
Activity: Seminar
1 Course Unit

PHIL 295 Identity
The content of the course may include the following, and related, themes: what makes a human the same human over time? What constitutes our identities? Are gender, race, sexual orientation, and the like essential features of our identities, and if so, how do they become so? How do ethics, politics and identity interact? After learning this philosophical content, Penn students will develop lesson plans for introducing this content to Philadelphia public high school students. Mid way through the semester, Penn students will start to prepare the high school students to present their own original work on the philosophy of identity at a conference to be held at Penn in May 2017. Penn students will be assessed on their own written and other work for the course, and in no way on the written or oral work of the high school students. Enrollment by permit only. Please contact Professor Detlefsen detlefsen@sas.upenn.edu to schedule an interview for admission to the course.

PHIL 299 Independent Study
Student arranges with a faculty member to pursue a program of reading and writing on a suitable topic.
One-term course offered either term
Activity: Independent Study
1 Course Unit

PHIL 300 Research Methods
An intensive research seminar for undergraduates, aimed at developing philosophical skills in the context of a supportive student community. Students will learn to present, discuss, and write philosophy, drawing on canonical texts in a range of philosophical areas and methods, along with readings which they identify in the course of articulating their own philosophical interests. The course may be taken alone or as part of a two-semester sequence, and with or without a stand-alone honors thesis. In addition to philosophy majors, the course is also suitable for less advanced students or majors in related fields who want to sharpen their analytic skills. Admission is by application only. Students should have demonstrated philosophical interest and ability, whether through past enrollment in upper-division philosophy courses or through other means; and should submit a transcript, the names of 1-2 supporting faculty, and a brief statement (300 words) describing how they expect the course to contribute to their philosophical and intellectual development, to Professor Karen Detlefsen (detlefsse@sas.upenn.edu) by November 2, 2012.
Activity: Seminar
1 Course Unit

PHIL 301 Directed Honors Research
Open only to senior majors in philosophy. Student arranges with a faculty member to do an honors thesis on a suitable topic.
One-term course offered either term
Activity: Independent Study
1 Course Unit

PHIL 325 Topics in Philosophy of Science
The aim of this course is to explore the relationships between philosophy and physics, with a focus on prominent foundational issues in modern physics. The course is organized around four main areas. In the first part, we focus on the philosophy and (classical and relativistic) structure of space and time, including the proliferations of physical geometries (Lobachevskian and Riemannian) of curved space time. Are space and time real? If so, what kind of entities are they? Metaphysically, we have a choice between presentism and eternalism, and regarding the nature of physical objects in space-time, there is a choice between endurantism and perdurantism. Is time travel possible? In the second part, we concentrate on the basic metaphysical and epistemological questions posed by physics: causality, determinism, randomness, and the nature of physical laws. How is cause conveyed from one physical body to another? Are the laws of physics true? In the third part, we turn to the principal philosophical issues raised by quantum physics: structural realism and the interpretations of quantum mechanics, non-locality and Bell's theorem, the infamous Schrodinger cat paradox, hidden variables, and quantum measurement. What is primary -- particles or waves? Finally in the fourth part, we investigate the metaphysics underlying Big Bang and Ekpyrotic cosmological theories, and evidence for a parallel universe and baby universes. All these philosophical issues will be addressed by looking at some simple examples or episodes taken from modern physics. The bulk of the readings will come from two textbooks (available at the Barnes & Nobel University Bookstore) and articles in journals.
PREREQUISITES: The course is entirely self-contained: All topics in physics that are necessary for understanding the pertinent philosophical problems will be reviewed in class.
Taught by: Weisberg
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 330 Philosophy of Perception
Taking our perceptual experience as a given, what causes it? In a realistic mood, we accept that objects in the environment, or in the "external world," cause us to have the perceptual experiences that we do (as of a table with food, or of a garden with flowers in it). Yet on this realistic view, our perception is the result of a causal chain that leads from object to eye to brain to experiences, and we are only given the last element: the experience. So how do we really know how our experiences are caused, and where do we get the idea that they are caused by an external world of physical objects? The seminar will focus on the problem of the external world as examined by David Hume, Thomas Reid, G. E. Moore, and Bertrand Russell, along with recent authors.
Taught by: Hatfield
Course not offered every year
Also Offered As: VLST 222
Activity: Seminar
1 Course Unit
Notes: Department Majors Only
PHIL 331 Epistemology
A seminar for philosophy majors on some main problems of contemporary epistemology, with readings on justification, contextualism, non-conceptual content, normativity of rationality, and related topics. Student presentations are required as are regular attendance and active participation. There are brief written assignments on the readings and a final term paper on a topic approved by the instructor.
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 342 Topics in Metaphysics
Various topics in Metaphysics.
Taught by: Weisberg
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 343 Philosophy of Mind
This majors seminar will closely read Susan Hurley’s interesting and provocative 1998 book Consciousness in Action, along with some supplementary readings. This book touches on many central issues in philosophy of mind, including the relationship between the personal and sub-personal levels, the role of computation in understanding the mind, the relationship between the “inner” and “outer” world, the nature of mental architecture, and the relationship between perception, action, and consciousness.
Taught by: Miracchi
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 344 Wittgenstein: Mind and Language
In this class, we will engage in a close reading of Wittgenstein’s major writings: the Tractatus Logico-Philosophicus and the Philosophical Investigations. Some of the main topics to be considered include: how language relates to the world; what philosophy is and what it can accomplish; the nature of understanding; what is involved in following a rule; and the phenomenon of seeing-as. A distinctive feature of Wittgenstein’s approach to philosophy is his commitment to philosophy as an activity rather than a set of doctrines. In keeping with this, the main goal of this class is for you to learn to do philosophy: to read closely, to grapple with foundational questions, and to talk seriously with others. This class is very much a seminar, and I will avoid lecturing as much as possible.
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 345 Topics in Theoretical Philosophy
This is an undergraduate research seminar covering interdisciplinary research in psychology, philosophy, sociology and behavioral economics related to social norms. Social norms are informal institutions that regulate social life. We will devote particular attention to the following questions: 1. What is a good, operational definition of social norms? 2. Is there a difference between social and moral norms? 3. How can we measure whether a norm exists, and the conditions under which individuals are likely to comply with it? 4. Are behavioral experiments a good tool to answer question 3? 5. How do norms emerge? 6. How are norms abandoned? 7. What is the role of trendsetters in norm dynamics?
Taught by: Spencer
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 361 Ancient Philosophical Figures
A study of selected topics, texts, and figures from classical Greek philosophy.
Taught by: S.Meyer
Course not offered every year
Prerequisite: PHIL 003
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 362 Modern Philosophical Figures
This seminar is dedicated to Kant’s critical philosophy. In particular, the Critique of Pure Reason, which is the first of three Critiques, ranks amongst the most important texts of modern philosophy. Even in contemporary debates, Kantian claims still play a crucial role and basic knowledge of Kant’s critical philosophy is often assumed. In this seminar, we will deal with central passages from different works which, taken together, give a good picture of Kant’s critical revision of classical metaphysics. We shall discuss important conceptions and ideas of Kant’s mature philosophy, such as the nature of transcendental aesthetics and the resulting distinction between a think-in-itself and appearance, the meaning and application of the categories, the justification and determination of human freedom, and the role of the moral law for Kant’s so-called practical metaphysics.
Taught by: Hatfield, Detlefsen
Course not offered every year
Also Offered As: GRMN 363, PHIL 565
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 366 Epistemology
A seminar for philosophy majors on some main problems of contemporary epistemology, with readings on justification, contextualism, non-conceptual content, normativity of rationality, and related topics. Student presentations are required as are regular attendance and active participation. There are brief written assignments on the readings and a final term paper on a topic approved by the instructor.
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 367 Kant and Hegel
We will examine the main theses of Kant’s theoretical and practical philosophy and the role of Hegel’s criticisms in them in the development of the latter’s system of philosophy. Subjects will include Kant’s theory of space, time, substance, and causation; his transcendental idealism; and his analysis of the fundamental principles of morality and his defense of freedom of the will. We will then examine Hegel’s attempt to overcome the dichotomies of Kant’s theoretical philosophy in his objective idealism and his criticism of the formalism of Kant’s practical philosophy.
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only
PHIL 368 Topics in German Idealism
The course will start with a brief review of some features of Kant's philosophy, will focus on Fichte and Schelling, and will end with a discussion of the reaction to Idealism by Schopenhauer and Nietzsche. Taught by: Horstmann
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 372 Topics in Ethics
This is a special course on topics in ethics. The content of the course will vary from semester to semester, but will focus on issues in applied ethics. Because of the interdisciplinary nature of the topics, readings may come from philosophy as well as other fields including sociology, public health, biology, and complex systems research. PHILOSOPHY MAJORS ONLY.
Taught by: Freeman,
Course not offered every year
Prerequisite: PHIL 002 (or consent of the instructor)
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 376 Justice
The course will focus on contemporary works on liberalism, democracy, capitalism, and distributive justice. Among the questions to be discussed: Which rights and liberties are fundamental in a constitutional democracy? What is equality and what requirements does it impose? Are economic rights of property and freedom of contract equally important as personal liberties of speech, religion, and association? Does capitalism realize a just distribution of income and wealth? What is socialism and is it potentially just, or necessarily unjust? Readings from works by John Rawls, Robert Nozick, Milton Friedman, and others.
Taught by: Freeman,
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 377 Philosophy and the Constitution
The aim of this course is to investigate the philosophical background of our constitutional democracy. What is the appropriate role and limits of majority legislative rule? How are we to understand First Amendment protections of freedom of religion, speech, and assembly? What is the conception of equality that underlies the 14th Amendment's Equal Protection Clause? Is there a right of privacy implicit in the Constitution? Do rights of property deserve the same degree of protection as other constitutional rights? To investigate these and other constitutional issues, we will read from both Supreme Court opinions and relevant philosophical texts.
Taught by: Freeman
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: For Philosophy and Philosophy, Politics, and Economics Majors (PPE) Only

PHIL 379 Topics in Political Philosophy
Various topics in political philosophy.
Taught by: Freeman, Tan
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 380 Topics in Aesthetics
This course will study particular periods in the history of aesthetics and the philosophy of art or particular current problems in the field. Examples of the former would be ancient, eighteenth-century, nineteenth-century, or twentieth-century aesthetics; examples of the latter would be the definition of art, the nature of representation and/or expression in the arts, and art and morality.
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 405 Philosophy of Language
This course provides an overview of 20th century analytic philosophy of language. Here are some of the questions we will ask: How do words refer? How do they combine to express thoughts? How do words relate to concepts or to thoughts more generally? What do words and sentences mean? How do we use them to communicate with each other? How does word and sentence meaning depend on the contexts in which they are spoken or heard, or on stable features of environments of linguistic speakers? Prerequisites: This course will be most suitable for advanced undergraduates and graduate students in philosophy or linguistics; others need instructor's permission. Familiarity with symbolic logic is highly recommended, but not required.
Taught by: Miracchi
Course not offered every year
Prerequisite: PHIL 005 or PHIL 505 or permission of instructor
Activity: Seminar
1 Course Unit

PHIL 407 Aristotle
A study of Aristotle's main writings on language, reality, knowledge, nature and psychology. All texts will be read in English translation. No background in Greek philosophy or knowledge of Greek is required, although previous work in philosophy is strongly recommended.
Taught by: S.Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 409 Plato's Selected Dialogues
A study of selected dialogues of Plato. All texts will be read in translation. No prior experience in Plato is required, but students should have some background in philosophy. The course will be run as a seminar. Topic for Spring 2017: Plato on Pleasure. We will read Plato's Gorgias, Protagoras, Republic (selections), Philebus, and Laws (selections). All these texts discuss pleasure, either its relation to the good or its role in human motivations.
Taught by: S.Meyer
Course not offered every year
Activity: Seminar
1 Course Unit
PHIL 410 Introduction to Logic and Computability
Taught by: Weinstein
Course not offered every year
Also Offered As: LGIC 310, MATH 570
Prerequisite: Math 371 or Math 503
Activity: Lecture
1 Course Unit

PHIL 412 Topics in Logic
This course will examine the expressive power of various logical languages over the class of finite structures. The course begins with an exposition of some fundamental results about first-order logic in the context of finite structures and then proceeds to consider various extensions of first-order logic including fixed-point operators, generalized quantifiers, infinitary languages, and higher-order languages. The expressive power of these extensions will be studied in detail and connections with the theory of computational complexity and with combinatorics will be explored.
Taught by: Weinstein
Course not offered every year
Also Offered As: CIS 518, CIS 682, LGIC 320, LGIC 499
Activity: Seminar
1 Course Unit

PHIL 414 Philosophy of Mathematics
The course will focus on the development of the foundations and philosophy of mathematics from the late nineteenth-century through the present day. Topics will include logicism, formalism, intuitionism, and the foundations of set theory. Ample consideration will be given to some of the fundamental results of mathematical logic, such as the Godel incompleteness theorems and the independence of the Continuum Hypothesis from Zermelo-Fraenkel set theory, that have had a profound impact on contemporary approaches to the philosophy of mathematics.
Taught by: Weinstein, Ewald
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 421 Philosophy of Biology
This course consists of a detailed examination of evolutionary theory and its philosophical foundations. The course begins with a consideration of Darwin's formulation of evolutionary theory and the main influences on Darwin. We will then consider two contemporary presentations of the theories of Richard Dawkins and Richard Lewontin. The remainder of the course will deal with a number of foundational issues and may include discussions of adaptation, what constitutes a species, evolutionary progress, the concept of fitness, the units of selection, the alleged reduction of classical genetics to molecular genetics, and the possibility of grounding ethics in evolutionary theory. The evolution of altruism will also be discussed, time permitting. PREREQUISITES: Either two philosophy courses OR Biology 101/102 (or equivalent)
Taught by: Weisberg
Course not offered every year
Also Offered As: PHIL 226, PPE 421
Prerequisite: Either two philosophy courses OR Biology 101/102 (or equivalent)
Activity: Lecture
1 Course Unit

PHIL 423 Philosophy and Visual Perception
The course starts with some central issues in the philosophy of perception from the modern period, which many include what we perceive, the meaningful content of perception, and its relation to a mind-independent external world. It will then focus on two or three more specific topics, yet to be chosen. These may include: (1) color perception and color metaphysics; (2) object perception in its interplay between Gestalt organizational factors and background knowledge; (3) the role of ecological regularities in the formation of our visual system and in the ongoing tuning of the system to the environment; (4) the geometry of visual space and the phenomenology of visual appearances of size and shape; (5) the problem of how visual scenes are experienced by means of means of images and the representational relation between images and things imaged, including the characteristics of linear perspective and its status as arbitrary convention or optically and naturally based system. Readings from authors such as Bertrand Russell, R. W. Sellars, Tim Crane, Evan Thompson, Robert Swartz, Wolfgang Metzger, Nelson Goodman, Richard Wollheim, and William Hopp, among others.
Taught by: Hatfield, Connolly
One-term course offered either term
Also Offered As: PHIL 223, VLST 223
Activity: Seminar
1 Course Unit
PHIL 425 Philosophy of Science.
This self-contained course (presupposing no substantive prior background in philosophy nor any extensive knowledge of science) provides an advanced introduction to the central philosophical questions concerning the nature of scientific knowledge and its relation to experience, and the metaphysical assumptions underlying the natural sciences. Topics to be covered include: science versus pseudoscience, laws of nature, causation, determinism and randomness, theories and models in science, scientific explanation, underdetermination of theories by observation and measurement, realism and antirealism, reductionism and intertheory relations, objectivity and value judgments in science, hypothesis testing and confirmation of scientific theories, and classical paradoxes in scientific methodology.
Taught by: Domotor
One-term course offered either term
Also Offered As: STSC 325
Prerequisites: Background in elementary logic and some rudiments of science
Activity: Seminar
1 Course Unit

PHIL 426 Philosophy of Psychology
An examination of major trends of thought in experimental psychology in relation to philosophy and the philosophy of science. Questions to be asked include: What is the subject matter and object of explanation of experimental psychology? What is the relation between psychology and neuroscience? How is scientific psychology related to traditional philosophical investigations of the mental? The course covers the classical systems and schools of psychology, starting with Wundt and James, and proceeding to behaviorism, Gestalt psychology, cognitive and perceptual psychology, and cognitive science. The second half of the course examines contemporary problems, including: introspection and consciousness; philosophical foundations of cognitive science (computation vs. information); theories of the extended and embodied mind; methodological and conceptual problems in investigating the evolution of mind, brain, and culture; and the relation between neuroscience and psychology, using cases from particular areas such as attention and memory. Readings will include works by Koehler, Skinner, Fodor, Shapiro, and others.
Taught by: Hatfield
Course not offered every year
Also Offered As: STSC 426
Activity: Seminar
1 Course Unit

PHIL 428 Philosophy of Social Science
An examination of fundamental philosophical issues concerning forms of social organization. Consideration of philosophical critiques of society.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 430 Philosophy of Mind
This course studies particular topics in contemporary philosophy of mind and cognitive science. Examples include: the nature of consciousness, naturalistic accounts of intentionality, the nature scope of scientific explanation in studying the mind, the intersection of philosophy of mind and epistemology, and theories of agency. Typically, readings include both philosophy and empirical work from relevant sciences. Prerequisites: This course will be most suitable for advanced undergraduates and graduate students in philosophy or related sciences; others need instructor’s permission.
Taught by: Miracchi
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 431 Theory of Knowledge
This course introduces students to the field of formal epistemology. Although some formal methods will be used, the principal objective is to explore various conceptual issues arising in modeling and representing knowledge. Topics include: bridging the gap between mainstream and formal epistemology by exploring various versions of the familiar tripartite definition of knowledge (knowledge as justified true belief) in light of folksy examples and counterexamples, basic logical and probabilistic models of knowledge (Hintikka, Aumann, and Bayesian), and their multi-agent variants, logical omniscience and other problems (including the epistemic closure principle), attempts at formalizing joint and common knowledge, resource-bounded knowledge, knowledge under limited logical powers, and empirical knowledge obstructed by system complexity. There are no prerequisites for this course, except some logical maturity.
Taught by: Domotor
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 436 Hellenistic Philosophy
A survey of the natural philosophy, ethics, and epistemology of the three major schools of post-Aristotelian philosophy in the West in the period up to approximately 200 CE: the Stoics (followers of Zeno of Citium), the Epicureans (followers of Epicurus), and the Sceptics—both the “Academics” (later members of Plato’s Academy) and the “Pyrrhonists” (inspired by Pyrrho of Elis). Although less well known today, the Stoics, in particular, were influential in the development of early Christian philosophy, and all three schools were highly influential in the development of early modern philosophy. Authors to be read include Cicero, Seneca, Lucretius, Sextus Empiricus, and Stobaeus. All texts will be read in English translation. No Latin or Greek is required.
Taught by: S.Meyer
Course not offered every year
Also Offered As: CLST 436
Prerequisites: This course will be most suitable for advanced undergraduates and graduate students in Philosophy or Classics; others need instructor’s permission.
Activity: Lecture
1 Course Unit
PHIL 441 Metaphysics

Fictionalism: There are fictionalist accounts of morality, possible worlds, mathematical objects, and even truth. In this course we will examine these accounts and the metaphysical repercussions that the fictionalist strategy commits us to. We will be covering various case studies of fictionalism, and assessing the validity of such accounts. Authors read will include Sainsbury, Kalderon, Everett, and Friend.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 442 Origins of Analytic Philosophy

This course will explore the history of analytic philosophy through the lens of two of its most influential figures: Gottlob Frege and Ludwig Wittgenstein. In the first half of the course, we will explore Frege's project in *The Foundations of Arithmetic* to ground the truths of mathematics in the truths of logic and the wider contributions to the philosophy of language and mind he made in attempting to carry out this project. In the second half of the course, we will explore Wittgenstein's *Philosophical Investigations* with particular attention to the skeptical worries about rule-following and its implications for the social basis of mental and linguistic representation. In addition to an in-depth study of these primary texts, secondary readings will be drawn from the work of Tyler Burge, Michael Dummett, Meredith Williams, Peter Hacker and others. The ultimate goal of the class is to both introduce students to the work of Frege and Wittgenstein, and to highlight the ways in which their different philosophical methodologies continue to animate debates in analytic philosophy.
Course not offered every year
Prerequisites: PHIL 005 and one other philosophy course, or permission of instructor
Activity: Seminar
1 Course Unit

PHIL 444 Wittgenstein

A study of the later philosophy of Ludwig Wittgenstein.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 448 19th Century Philosophy

The aim of the course is to discuss major elements of Schopenhauer’s and Nietzsche’s philosophy, especially their epistemological and aesthetic teachings and their relation to other philosophers in the 18th and 19th century. Texts will include Schopenhauer’s *The World as Will and Representation*, Nietzsche’s *The Birth of Tragedy; Human, All Too Human; Beyond Good and Evil*.
Taught by: Horstmann
Course not offered every year
Also Offered As: GRMN 548
Activity: Seminar
1 Course Unit

PHIL 450 African, Latin American and Native American Philosophy

This course is an introduction to philosophical work from Africa, Latin America, and the indigenous peoples of North America, covering topics in ethics, metaphysics, epistemology, philosophy of mind, aesthetics, social philosophy, and political philosophy. The course aims to give work from these traditions greater exposure and to provide a chance for students to encounter work that might spark an interest in future research. We will cover in some depth views held by Akán, Axtec, Blackfoot, Dogon, Iroquois, Lakota, Navajo, Ojibwa, and Yoruba peoples. We will also read work by a number of philosophers, including: Kwame Anthony Appiah, Kwame Gyekye, Julius Nyerere, Sor Juanna Ines de la Cruz, Simon Bolívar, Jose Martí, Jose Vasconcelos, Enrique Dussel, Gregory Cajete, Anne Waters, and many others. Throughout, we will also engage with related meta-philosophical issues that emerge with work from all three areas, allowing for interesting cross-discussion. Are these really proper forgotten fields of philosophy? How do we make sense of the idea of African (or Latin American, or Native American) Philosophy as a field? Are there philosophically important differences between oral traditions and written traditions? How should we understand ethnophysics and cultural worldviews as philosophical contributions? How should we think of the "sage" figure in relation to philosophy? How do these traditions engage discussions of identity, autonomy, and post-colonialism? Should this work be incorporated into the mainstream philosophical canon?
Activity: Seminar
1 Course Unit

PHIL 460 Continental Rationalism

In this course, we will read closely some of the definitive texts of seventeenth century European philosophy, using the concept of the human being as our focal point. We will concentrate primarily on the human considered as a biological being (thus developing our understanding of the scientific advances of this century), as a conscious being (thus developing our understanding of theories of mind in this century), and (where relevant) as a moral being. We will focus our attention on Descartes, Spinoza and Leibniz, but draw as well upon texts from other thinkers, particularly Elisabeth, Malebranche and Cavendish. There will be two lectures per week, and discussion is strongly welcome.
Taught by: Hatfield, Detteisen
Course not offered every year
Prerequisite: PHIL 004 or permission of instructor
Activity: Seminar
1 Course Unit

PHIL 463 British Philosophy I

A study of epistemology and metaphysics in classical British philosophy. Authors studied included Bacon, Hobbes, Locke, Berkeley, Hume, Reid, and Mill.
Course not offered every year
Prerequisite: PHIL 004 or permission of instructor
Activity: Seminar
1 Course Unit

PHIL 464 British Philosophy II

A study of moral philosophy, political philosophy, and aesthetics in classical British philosophy. Authors studied include Hobbes, Locke, Hutcheson, Hume, Kames, Adam Smith, and Reid.
Course not offered every year
Prerequisite: PHIL 002 or PHIL 004 or permission of instructor
Activity: Seminar
1 Course Unit
PHIL 465 Kant I
The course will concentrate on the Critique of Pure Reason and discuss in detail Kant's conception of knowledge and experience, his criticism of traditional metaphysics and the resulting project of a system of transcendental philosophy.
Taught by: Hatfield, Horstmann
Course not offered every year
Also Offered As: GRMN 551
Prerequisites: PHIL 004, one advanced Philosophy course, or permission of instructor
Activity: Seminar
1 Course Unit

PHIL 466 Kant II
This course is a study of Kant's moral and political philosophy. The central theme of the course is Kant's conviction that freedom or "Autonomy" is our most basic value, and that the fundamental law of morality as well as the more particular principles of both justice and personal virtue are the means that are necessary in order to preserve and promote the existence and exercise of human freedom. Central questions will be how Kant attempts to motivate or prove the fundamental value of freedom and the connection between this normative issue and his metaphysics of free will. Texts will include Kant's Lectures on Ethics, Groundwork for the Metaphysics of Morals, Critique of Practical Reason, Religion within the Boundaries of Mere Reason, and Metaphysics of Morals. Written work for the course will include one short paper and one term paper.
Course not offered every year
Also Offered As: GRMN 552
Prerequisites: PHIL 002, PHIL 004, or permission of instructor
Activity: Seminar
1 Course Unit

PHIL 467 Topics in History of Philosophy
In this course, we will study figures and themes from the 17th through the 18th centuries, an especially fertile period in the history of philosophy. Topics will vary from year to year. Please see individual course descriptions.
Taught by: Hatfield, Delhefsen
Course not offered every year
Also Offered As: GRMN 567
Prerequisites: Previous course in Philosophy or History and Sociology of Science
Activity: Seminar
1 Course Unit

PHIL 468 Hegel
Hegel is famous (or rather infamous) for entertaining and endorsing startling and obscure claims like 'Contradiction is the rule of truth'. 'The Truth is the whole', 'What is rational is real, and what is real is rational'. Before one is in the position to evaluate, to criticize (and to dismiss) these claims one has to become familiar with their philosophical background. The aim of the seminar is to find out what is meant with claims like these and why Hegel thought of them as reasonable. In order to achieve this aim one has to get acquainted with the basic metaphysical assumptions of his philosophy and with the problems these assumptions are supposed to solve. The seminar will focus primarily on some of Hegel's early Jena writings, his Phenomenology of Spirit, on passages from different versions of Hegel's Logic and (maybe) on aspects of his Philosophy of Right. Topics that are dealt with include:
(1) Hegel's conception of philosophy, (2) the development of his system, (3) the problem of an introduction to his system (Phenomenology of Spirit), (4) Hegel's criticism of traditional metaphysics, (5) his notion of a 'concept' (Begriff), his theory of the Idea. Other topics might become of interest as well.
Taught by: Horstmann
Course not offered every year
Also Offered As: GRMN 583
Activity: Seminar
1 Course Unit

PHIL 472 Survey of Ethical Theory
Murder is wrong. Slavery is unjust. Everyone has reason not to torture their neighbor. Having inconsistent preferences is irrational. On these matters most agree. But what do we mean when we say these things? What state of mind are we in when we think these things? What, is anything, do these claims refer to in the world? Is it the same kind of things that we investigate when we do science? Do we know these things? If so, how? Are these claims even true? If they are ever true, are they true for everyone? These are some of the core questions of metaethics. This course is an investigation of the main questions and problems in metaethics since the turn of the 20th century. We will investigate questions about the metaphysics of morality, the philosophy of language of moral talk, the philosophy of mind of moral thought, the epistemology of morality, and the objectivity of morality.
Taught by: Lord
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 473 Topics in Ethics
Is abortion wrong? Or euthanasia? Are we justified in eating animals? Why, or why not? we will explore these and other "life and death" ethical problems in a systematic way, seeing how the reasons we give in answer to one question may influence what we can consistently say about others.
Taught by: Chappell
One-term course offered either term
Also Offered As: PHIL 273
Activity: Lecture
1 Course Unit
PHIL 475 Political Philosophy
This is a research seminar covering interdisciplinary research in psychology, philosophy, cognitive science and behavioral economics. Our focus will be on identifying and discussing issues of philosophical significance raised by recent work in moral psychology, experimental economics and behavioral decision making.
Taught by: Freeman, Bicchieri
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 477 Philosophy and the Law
This first half of the course will provide an introduction to the main currents of thought about the nature and function of law. It will consider, among other things, the classic problem of the source of law's authority, exploring whether an unjust law is still a law, and whether law does or ought to bear a close relation to morality. Should Nazi officials or East German border guards be punished if they were "just following orders"?
What about the judges who enforced the implementation of such laws? Do the conclusions we would reach in the foregoing contexts apply to the conduct of Americans in dealing with suspected terrorists or other detainees? We will consider the divergent answers to these questions suggested by the work of J.L. Austin, H.L.A. Hart, Ronald Dworkin, Joseph Raz, and others. After addressing these traditional jurisprudential inquiries, we will turn to more recent philosophical inquiries in philosophy of law. What is the justification for punishment and how do the various debates in this area play out in specific controversial cases? Is torture ever permissible, whether as part of a scheme of punishment or as part of a system of law enforcement? Is targeted killing a permissible part of just war theory? What should be our stance to government officials who violate the law? As we shall see, each one of these applied topics divides into deontological theorists, on the one hand, and utilitarian, or economic, theorists on the other. We will raise the question of whether these two theories exhaust the possible moves one might make on these various topics, or whether other approaches, such as a contractarian approach, are viable options. The course will require a final, take home exam, as well as attendance, preparation and participation in discussion. The latter will count towards roughly 10% of students' grades. This course is cross listed with LAW 544.
Taught by: Finkelstein
Course not offered every year
Activity: Lecture
1 Course Unit

PHIL 479 Modern Political Philosophy
A survey of several works in modern political philosophy, including Thomas Hobbes's, Leviathan; John Locke's, Second Treatise on Government and Letter Concerning Toleration; David Hume's Of the Original Contract and On Justice, John Stuart Mill's Utilitarianism, On Liberty, and The Subjection of Women; excerpts from Karl Marx's Capital and other writings; and John Rawls's A Theory of Justice.
Taught by: Freeman
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 480 Topics in Aesthetics
Walter Benjamin: Art, Philosophy, Literature. Walter Benjamin (1892-1940) is a philosopher whose writings on art, literature, and politics have had tremendous influence on cultural studies. He has been variously described as one of the leading German-Jewish thinkers, and a secular Marxist theorist. With the publication of a new four-volume collection of his works in English, many more of his writings have been made accessible to a wider public. Our seminar will undertake a survey of the work that begins with his studies on language and allegory, and continues with his autobiographical work, his writings on art and literature, and finally on the imaginary space of the nineteenth-century.

Also Offered As: COML 582, GRMN 580
Activity: Seminar
1 Course Unit

PHIL 485 Topics in Gender Theory
This course seeks to assemble some of the philosophical evidence for feminist claims that traditional political theories are fundamentally inadequate because they have not, and presumably cannot, deal with basic facts of gender and the oppression of women. we will begin by examining the nature of the distinction between sex and gender. This will take us through discussions of: the meaning and significance of categories being socially constructed, the possibility that sexual differences (and inequalities) are in some sense natural and what normative force this has. We will then consider varous attempts to describe the nature of women's oppression. What is it? How does it manifest itself in the lives of women? This will take us through discussions of freedom, constrained choice, ideology, "consciousness raising", androcentrism and the relation between, and methodological importance of, ideal and non-ideal theory. Along the way we will be constructing a version of the feminist framework known as the dominance approach and seeing how it analyzes three presumed sites of oppression: sexuality, reproduction and work/family. Among the authors we will be reading are: Elizabeth Anderson, Marily Frye, Sally Haslanger, Rae Langton, Anthony Laden, Catherine Mackinnon, and Susan Okin. The prerequisite for UNDERGRADUATES taking this course is: two philosophy courses (ONE of which is in moral or political philosophy) OR ONE of the following Gender Studies courses: GSWS/PHIL 028, GSWS/Polisci 280, GSWS 320. There will be one short paper (6-8 pages) with revision, a longer final paper (15 pages) and weekly one-page reflections on a topic from the previous week's discussion.
Course not offered every year
Also Offered As: GSWS 485
Activity: Seminar
1 Course Unit
PHIL 488 The Idea of Nationalism
Nationalism has been the most important geo-political phenomenon of the past two hundred years. Its continuing power has been amply demonstrated by recent events in many parts of the world. This seminar course will explore the ideology of nationalism, what it means, its philosophical foundations, underlying assumptions about the nature of human identity, moral implications, and political consequences. In the process, we will explore such questions as: What is a nation? Does every identifiable ethnic or national group have a valid claim to a nation-state of its own? How are claims to national self-determination justified? How do nations differ from states, peoples, groups, communities, and citizenries? How does nationalism relate to notions of “chosenness” or ethnic and cultural superiority? Why do nationalist movements seem to so often engender political extremism and violent ethno-political conflicts? Is national self-determination compatible with our commitments to individualism, rationality, and universal human rights?
Taught by: Steinberg

Activity: Seminar
1 Course Unit

PHIL 489 Ethnicity, Identity and Nationhood
Contemporary public discourse -- in politics, in the media, on the Internet, and throughout our culture -- gives expression to intense, sometimes violent, disagreements and conflicts that often frustrate the solution of important public policy questions, curtail productive public deliberation and dialogue, and profoundly challenge our leaders and institutions. This course will deepen our understanding of the role that political and cultural ideologies -- such as liberalism, conservativism, nationalism, totalitarianism, fundamentalism, etc. -- play in these conflicts and the psychology of ideological thinking that makes them so difficult to resolve. We will begin by considering a series of case studies in contemporary political, social and cultural conflict, drawn from contemporary events such as the 2012 political campaigns, the 2011 debt ceiling debate in Congress, nationalist movements around the globe, etc. We will identify and examine the ideologies driving such conflicts, and from these we will draw out the common philosophical characteristics and psychological features of ideological thinking. Throughout, we will seek to understand the deep attraction of ideological commitments and why they tend to push public discourse and behavior to extremes and even violence. Finally, we will consider efforts to reduce or resolve ideological conflicts through strategies of political compromise, dialogue, toleration, and democratic deliberation.

Activity: Seminar
1 Course Unit

PHIL 506 Formal Logic II
An introduction to first-order logic including the completeness, compactness, and Lowenheim-Skolem theorems, and Godel’s incompleteness theorems. UNDERGRADUATES NEED PERMISSION
Taught by: Weinstein
Course usually offered in spring term
Also Offered As: MATH 570, PHIL 006
Activity: Lecture
1 Course Unit
Notes: Undergraduates Need Permission.

PHIL 508 Early Plato
A study of Plato’s earlier dialogues, from the Apology to the Republic, focussing on the moral and political background motivating the doctrine of Forms, and tracing the emergence of that doctrine first as a theory of essences (in the dialogues of definition) and finally as a metaphysical theory in the Symposium, Phaedo and Republic. UNDERGRADUATES NEED PERMISSION
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 510 Late Plato
Tracing the development of Plato’s metaphysics from the Parmenides to the Timaeus, including key passages from the Theaetetus and Sophist.
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 513 Plotinus
A study of the thought of the major philosopher of late antiquity, founder of Neo-Platonism. Readings will include generous selections from the Enneads.
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 521 Philosophy of Biology
This course consists of a detailed examination of evolutionary theory and its philosophical foundations. The course begins with a consideration of Darwin’s formulation of evolutionary theory and the main influences on Darwin. We will then consider two contemporary presentations of the theory: Richard Dawkins’ and Richard Lewontin’s. The remainder of the course will deal with a number of foundational issues including adaption, the units of selection, the evolution of altruism, and the possibility of grounding ethics in evolutionary theory. UNDERGRADUATES NEED PERMISSION
Taught by: Weisberg
One-term course offered either term
Also Offered As: PHIL 226, PPE 225
Activity: Lecture
1 Course Unit
Notes: Undergraduates need permission

PHIL 522 Philosophy and Film
Taught by: Detlefsen
Course not offered every year
Also Offered As: CIMS 502
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission
PHIL 525 Topics in the Philosophy of Science
For the last four centuries, scientific research has provided our most reliable understanding of the world. Although the scientific revolution started modestly with attempts to understand stellar movement, we now know the age and constitution of the universe, the basis of heredity, and we can make and break chemical bonds at will. By all appearances, science seems to have made substantial progress from the scientific revolution to the global scientific enterprise of the 21st century. This course is about how science has generated this knowledge, and whether it has been as progressive and reliable as it seems. We will consider methodological issues such as the sources of scientific knowledge, objectivity, the growing importance of computation in the natural sciences, and the nature of modeling. We will examine products of scientific research: explanations, models, theories, and laws of nature. And we will discuss questions about science and values, including whether non-scientific values can and should enter scientific research, the relationship between science and religion, and the role of the public in guiding the scientific enterprise.
Taught by: Weisberg, Bicchieri
Course not offered every year
Also Offered As: COML 525
Prerequisites: Familiarity with behavioral game theory and psychology.
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 526 Philosophy of Psychology
Where is mind to be found in nature? Is it revealed by end-driven behavior, by mental contents, by the ability to perceive an external environment? This seminar will consider these and related questions as they arise in selected episodes from the history of philosophy and in contemporary discussions of the evolution of minds, brains, and behavior.
Taught by: Hatfield, Steinberg
Course not offered every year
Also Offered As: GRMN 527
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 527 Conceptual Foundations of Quantum Mechanics
Quantum theory provides the fundamental underpinning of modern physical science, yet its philosophical implications are so shocking that Einstein could not accept them. By following the historical development of 20th century quantum science, the student should gain an appreciation of how a scientific theory grows and develops, and of the strong interplay between scientific observation and philosophical interpretation. Although students will not be expected to carry out mathematical derivations, they should gain an understanding of basic quantum findings. Students enrolling in 527 must register for the recitation section that is reserved for that number, which is for graduate students.
Taught by: Hatfield, Steinberg
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 528 Philosophy of Social Science
Taught by: Bicchieri
Prerequisites: Familiarity with behavioral game theory and psychology.
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 530 Philosophy of Mind
Agent Architectures: In philosophy of mind, we spend a lot of time asking about particular kinds of mental states—about the nature of perception, belief, desire, intention, etc. But what about how it all fits together? How do you put the pieces together to get an intelligent agent out of it? And what does that in turn tell us about the nature of mental states? We will spend the first part of the course discussing some of the classical positions in philosophy of mind and artificial intelligence—especially functionalism and the classical "sandwich model" of AI. Then we will explore some new alternatives. We will investigate the possible role of the body, the environment, competences, and emotions in determining agent architectures. Of particular interest to us will be the question of whether we can understand the architecture of intelligent agents in a way that helps to explain how they might be improved upon and made more sophisticated (e.g. by evolution). UNDERGRADUATES NEED PERMISSION.
Taught by: Hatfield, Miracchi
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 531 Social Norms
This is a graduate research seminar covering interdisciplinary research in psychology, philosophy, sociology and behavioral economics related to social norms. Social norms are informal institutions that regulate social life. We will devote particular attention to the following questions: 1. What is a good, operational definition of social norms? 2. Is there a difference between social and moral norms? 3. How can we measure whether a norm exists, and the conditions under which individuals are likely to comply with it? 4. Are behavioral experiments a good tool to answer questions 3? 5. How do norms emerge? 6. How are norms abandoned? 7. What is the role of trendsetters in norm dynamics?
Taught by: Bicchieri
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 532 Topics in Epistemology
This is a graduate seminar intended for graduate students in Philosophy. It will cover some topics of interest to contemporary epistemologists, at the discretion of the instructor. Possible topics may include skepticism, accounts of knowledge and justification, virtue epistemology, formal epistemology, social epistemology, feminist epistemology, meta-epistemology and epistemic normativity.
Taught by: Singer
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission
PHIL 536 Stoicism
A study of some major texts in Ancient Greek Scepticism. We will begin with Plato’s Academy, more than a century after the death of its founder, when the head of the school Arcesilaus (315-240 BCE) advocates a turn away from “doctrinal Platonism” (that is, working out and defending the tenets of Plato’s philosophy) and a return to the critical stance of Socrates in many Platonic dialogues, who advances no doctrines himself but criticizes the claims of others. Much of the intellectual activity of the so-called “Sceptical Academy” is directed at contesting the doctrines of their contemporaries in Hellenistic Athens: Stoic, Epicurean, and Peripatetic philosophers, with particular emphasis on the Stoic doctrine of the “cognitive impression”, which the Stoics invoked as the foundation of all knowledge. Many of these debates are reported in Cicero’s On Academic Scepticism, which is the first text we will study. By the late first century BCE, the Academy departed far enough from this “skeptical stance” that in reaction, the Academic Aenesidemus left that institution to found Pyrrhonism, which takes the fourth-century figure Pyrrho of Elis (360-270 BCE) as its symbolic figure head. The fullest account of Pyrrhonist Scepticism is in the writings of a 2nd century CE physician, Sextus Empiricus, whose Outlines of Pyrrhonism and Against the Ethicists will be the other major texts studied in this course. All readings will be in English translation. No knowledge of Greek or Latin is required.

Taught by: S. Meyer
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 540 Topics in Philosophy of Language
Expressivism: Emotions, Evaluations, and Linguistic Meaning: In this seminar, we will explore the virtues and drawbacks of expressivism, broadly construed. Most contemporary philosophers of language analyze meaning in terms of truth-conditional content: how the world would have to be for an assertion or other speech act to be satisfied. But in many cases, it’s unclear just what ontologically respectable facts could make our utterances true. Further, much of our communicative activity appears to be aimed at affecting our interlocutors’ hearts and actions as much as their minds. If some aspects of conventional linguistic meaning involve the expression of evaluative or emotional attitudes rather than (just) truth-conditional content, how should a theory of meaning analyze this? We’ll begin with classic discussions of moral emotivism (e.g. Ayer, Hare) and more recent versions of expressivism in ethics (e.g. Gibbard, Blackburn), paying special attention to the Frege-Geach problem. Next, we’ll turn to recent discussions of epithets, especially racial slurs, in the philosophy of language (e.g. Williamson, Brandom, Hornsby), tracing out similarities and contrasts with moral expressivism.

Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 547 Leibniz/Locke
This course focuses on topics in philosophy of the 17-18th centuries. Topics may include one of the following, according to the interests of the class: An examination of the development of a few topics in natural philosophy in the early modern period, such as: method (the evolution of hypotheses and their reception, the relation of theory to empirical work, and the importance of different kinds of empirical work, e.e. observation, experiment, use of instruments); the relation of metaphysics to the ‘sciences’ (including what is meant by “metaphysics”, and what falls under the scope of the various sciences); and the special role played by the life sciences.

Taught by: Detlefsen
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 550 Topics in Philosophy of Education
In this course, we will examine some of the most pressing problems in contemporary philosophy of education. These problems include: how much control over a child’s education ought to be allocated to parents and how much to the state; what role, if any, ought religion to play in education; how do race and gender impact individuals’ educational experiences and how should such issues be addressed in the classroom; what sort of (if any) civic education ought to be taught in schools (especially in wartime such as in the post 9-11 USA); and how should schools be funded? We will deal with a number of case studies, mostly recent, but some crucial historical cases as well. Our readings will be primarily philosophical texts, supplemented with those from other fields, such as psychology, history and sociology, in order to provide empirical context to the theoretical problems facing education today. As a seminar, the instructor welcomes student participation, including students bringing their own interests in educational theory to the classroom. At the same time, the instructor will lecture to the extent necessary to make classroom discussion especially rich.

Taught by: Detlefsen
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 551 Topics in Early Modern Philosophy
A seminar on Kant’s religious thought in the context of his metaphysics, epistemology, ethics, and philosophy of history. Topics include: theistic arguments; non-classical conceptions of God; radical evil; grace, forgiveness, and moral revolution; belief, faith, and hope; rational approaches to scripture and miracles; the threat of counterfeit service and priestcraft; religious community versus ethical community; the prospects for moral progress. Primary readings come from the pre-critical period, the Critiques, Religion within the Limits of Reason Alone, and various lectures and secondary sources. Some previous formal study of modern philosophy (17th-19th century) or Kant is recommended as preparation.

Taught by: Detlefsen, Chignell
Course not offered every year
Also Offered As: GRMN 560
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission
PHIL 552 African American Philosophy
A new field has slowly begun to emerge within the traditional discipline of academic philosophy: African-American Philosophy. "African American Philosophy" refers here to conceptually and analytically rigorous philosophical studies of topics closely related to the social, legal, economic, historical and cultural experiences of US peoples of African descent. The field has appeared in tandem with a striking increase in the number of professionally trained philosophers of African descent holding the Ph.D. in philosophy, and employed as full-time teachers and scholars. A recent estimate puts the number of philosophers of African descent working in the US at about one hundred; and about twenty of these are African-American women. A significant body of scholarship now describes, explains, critiques and evaluates African American culture, slavery, oppression, discrimination, integration, segregation, equality, gender politics, labor, families, health, mental health, and the significance of race to identity, morality, ethics, politics, democracy, public policy, law, science, technology, the humanities and the arts. This unique lecture course will be a thematic introduction to African American Philosophy since 1960. Weekly topics will be chosen from among these clusters: Slavery, Colonialism, Oppression and Freedom; Segregation, Integration and Equality; Gender, Sex and Sexualities; Reproductive Rights and Responsibilities; Religion and Spiritualism; Rebellion, Protest, Social Movements and Citizenship; Economic Welfare, Labor and Inequality; Violence, Crime and Punishment; Education, Affirmative Action and Diversity; Reparations and Forgiveness; Identities and Stereotypes; Nature, Science and Health; Psychology, Psychiatry and Mental Health; Pragmatism; Existentialism; and the Sociology of Philosophy. We will read works by Cornell West, Adrian Piper, Charles Mills, Lewis Gordon, Anita Allen, Anthony Appiah, Lucius Outlaw, Naomi Zack, Lawrence Thomas, Bill Lawson, Michele Moody Adams, and others. For most undergraduate students, evaluation in the course will be based on a mid-term and final exam with essay and objective components. Advanced students and graduate students enrolled in the course will have an opportunity to write a substantial supervised paper on a topic of their own choosing in lieu of the exams.
Taught by: Allen-Castellitto
Course usually offered in spring term
Also Offered As: AFRC 254, AFRC 552, PHIL 252
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 554 Contemporary Continental Philosophy
This seminar course is an introduction to 20th-century continental European philosophy, focusing on the origins and development of phenomenology, existentialism, hermeneutics, and deconstruction. The centrality of phenomenology (and its interpretation) to an understanding of these movements and other contemporary trends in European thought will be emphasized throughout. No previous background in philosophy is required. Human beings live in a world permeated and defined by meanings. How we create, communicate, and comprehend meaning has been one of the central questions of continental European philosophy for the past century. In this course, we will explore why meaning plays such a central role in all attempts to understand human experience and how this insight has profoundly influenced major trends in contemporary thought. We will begin the semester with an introduction to the phenomenology of Edmund Husserl and the contemporary debate over its proper interpretation. This will be followed by an examination of three existentialist critics of Husserl, whose philosophies have influenced much of recent continental thought: Martin Heidegger, Jean-Paul Sartre, and Maurice Merleau-Ponty. Finally, we will examine the important influence of phenomenology and existentialism on contemporary trends in continental philosophy as exhibited in works by Paul Ricoeur, Hans-Georg Gadamer, Jacques Derrida, Hannah Arendt, and Emmanuel Levinas.
Course not offered every year
Also Offered As: GRMN 580
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 558 Truth & Concealment
This course is an exploration of traditional philosophical questions concerning objectivity in science. We will start by addressing central questions in feminist philosophy of science, such as what is objective reality and what is objective knowledge? Next, we will explore whether science discovers objective real entities or relations, which is a central topic in the scientific realism debate. We will also explore whether scientific knowledge is objective. We will read mostly 20th and 21st century philosophers of science, such as Goodman, Kuhn, Psillos, and Longino. We will also apply what we learn to at least one case study.
UNDERGRADUATES NEED PERMISSION
Taught by: Spencer
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates need permission.

PHIL 560 Descartes
In this course, we will undertake an intensive study of the thought of Descartes, one of philosophy’s most important figures. We will read his major works - Rules for the Direction of the Mind, The World, Discourse on Method, Meditation on First Philosophy, Principles of Philosophy, and Passions of the Soul - as well as some less well-known works and some of his correspondence. We will study his ideas on method and epistemology, metaphysics, physics and the life sciences, medicine, the nature of the human being, and value theory. While our primary aim will be to understand his philosophy as a whole and how his thoughts developed and changed through his life, we will devote some time to evaluating his legacy.
Taught by: Hatfield
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission
PHIL 562 MLA Proseminar in Philosophy
In sixteenth century Europe, what we now think of as philosophy, science and religion were all part of a single integrated way of studying the world. By the late eighteenth to early nineteenth century, these three areas of study, had to a large degree, diverged into distinct disciplines. In this course we will study this separation of disciplines in order to come to some understanding about how and why this radical shift in western thought occurred.
Taught by: Detlefsen
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 565 Kant's Critique of Metaphysics
A study of Kant's critique of metaphysics and theory of regulative ideas in the "Transcendental Dialectic" and related texts such as CRITIQUE OF JUDGEMENT, ONLY POSSIBLE PROOF OF THE EXISTENCE OF GOD, and LECTURES ON PHILOSOPHICAL THEOLOGY. Collateral readings in such authors as Descartes, Leibniz, Spinoza, Wolff, Baumgarten, Mendelssohn, Bayle, and Hume.
Course not offered every year
Also Offered As: PHIL 465 or permission of instructor
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 567 Development of German Idealism
This course will start with a brief review of some features of Kant's philosophy and will focus on Fichte and Schelling, and will end with a discussion of the reaction to Idealism by Schopenhauer and Nietzsche.
Taught by: Horstmann
Course not offered every year
Also Offered As: GRMN 525
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 568 Hegel
Hegel's "Lectures on Aesthetics" are a seminal work in the philosophy of art. They conceptualize the different kinds of art, and they understand art in the context of a philosophy of history that is centered on the concept of freedom. We will explore the intellectual background of Hegel's thinking, especially Kant, Schiller, and Schlegel, and investigate the conceptual articulation of art with which Hegel provides us.
Taught by: Horstmann.
Course not offered every year
Also Offered As: GRMN 568
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 572 Contemporary Ethics
A venerable idea throughout the history of ethics is that rationality is a fundamental or foundational part of the metaphysics of the normative. The course will be an investigation of several different strains of this rationalist idea. We'll discuss four rationalist views of the nature of normative reasons (Kantian, Humean, Aristotelian, and new-fangled constructivism). Our aim will be to investigate the plausibility of these rationalist views against the backdrop of a more recent hypothesis about the metaphysics of the normative—viz., the claim that normative reasons themselves are the fundamental constituents of the normative.
Taught by: Freeman, Meyer
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 576 Rationality, Morality and Law
This class will be dedicated to investigating topics related to rationality in its many forms. Potential areas of study are metaethics, epistemology, moral psychology, and the philosophies of mind, language and action.
Taught by: Freeman, Lord
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates need permission.

PHIL 577 Topics in Philosophy of Law
This seminar will examine leading academic theories of constitutional interpretation, starting with classic texts by (for illustration) Thayer, Wechsler, Ely, Bobbitt, Dworkin, and Scalia, and emphasizing current debates within originalism and between originalists and their critics. While the focus will be on American constitutional interpretation, we will also see how that literature is currently running up against, and possibly contributing to, more "philosophical" or "jurisprudential" accounts of the contents of law. Consistent with the nature of the material, the reading load is likely to be somewhat heavier and more demanding than in the average seminar. Students will be expected to read the assigned material carefully and to participate actively in class discussions; they will have the option of submitting either a single research paper or several shorter papers.
Taught by: Perry, Berman, Finkelstein
Course not offered every year
Also Offered As: LAW 918, LAW 949, LAW 992
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 578 Topics in Political Philosophy
Three Liberalisms: In this course we will investigate and compare three types of liberalism: (1) the Classical Liberalism of classical and modern economists such as F.A. Hayek and Milton Friedman; (2) the Libertarianism of Robert Nozick and similar advocates of absolute property and contract rights, and (3) the High Liberal Tradition of John Rawls and other advocates of progressive economic systems and egalitarian justice.
Taught by: Freeman, Tan
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission
PHIL 579 Social Philosophy
During the last dozen years there has been an explosion of interest in empirically informed moral psychology. In this seminar, we will review some of the cutting empirical and theoretical work that is being done in moral psychology and explore its philosophical implications. About half of the sessions of the seminar will be led by Professor Bicchieri, Professor Harman or Professor Stitch. The other half will be led by leading philosophers and scientists from other departments and other universities.
Taught by: Bicchieri
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 600 Proseminar.
An intensive seminar for first-year doctoral students, with readings drawn from recent and contemporary eistemology and metaphysics, broadly construed. Students will develop their abilities to present and discuss philosophical texts, and to write and revise their own papers.
Course usually offered in fall term
Activity: Seminar
1 Course Unit
Notes: Graduate Students Only

PHIL 601 Consortium Course
For graduate students taking courses at other institutions belonging to the Philadelphia area Philosophical Consortium.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Graduate Students Only

PHIL 607 Presocratic Philosophy
Close study of fragments and doxography for the earliest Greek philosophers in the original texts.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 609 Plato's Republic
A close reading and discussion of Plato's work. As much as possible of the text will be read in Greek.
Course not offered every year
Also Offered As: COML 609
Activity: Seminar
1 Course Unit

PHIL 610 Plato's Symposium and Phaedrus
A close reading and analysis of Plato's two major dialogues on love.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 611 Plato's Philebus
A close reading of the text of one of Plato's latest and most difficult dialogues. Questions to be discussed include: the unity of the dialogue, relation to other late dialogues (such as the TIMAEUS), relation to the doctrine of Forms, relation to the "unwritten doctrines". Knowledge of Greek is not required.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 612 Topics in Hellenistic Philosophy
The ancient Stoics famously rejected the tripartite psychology of Plato and the Aristotelian division of the psyche into rational and non-rational parts. Everything we think, say, feel, and do is an exercise of reason, specifically, an assent to an impression. This includes the pathe--emotions such as fear, anger, and pity and love. According to the Stoic doctrine of apatheia, we should eradicate the pathe from our lives. But there are some emotions of which the Stoics approve: the so-called "good feelings" (eupatheiai) which include joy, reverence, and goodwill. We will examine the difference between the pathe and the eupatheia in the context of their Stoic doctrine of "impulse" (horne), and of their ethical theory more generally. All texts will be read in translation, and will include selections from: Cicero: Tusculan Disputations, On Ends, On Duties, Epicctetus: Discourses, Seneca: Letters, Stobaeus: Eclogues, Galen: On the Doctrines of Hippocrates and Plato.
Taught by: S. Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 613 Topics in Medieval Philosophy
Close reading of selected texts in medieval philosophy.
Course not offered every year
Also Offered As: LAW 618
Activity: Seminar
1 Course Unit

PHIL 625 Contemporary Metaphysical Problems
An examination of selected problems at the intersection of philosophy of psychology, philosophy of mind, and metaphysics.
Taught by: Hatfield
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 626 Topics in Philosophy of Psychology
We will investigate the notions of function, adaptation, and teleology as found in biology and as analyzed in the philosophy of biology; we will then apply these notions to selected problems in the philosophy of psychology pertaining to representation and content.
Taught by: Hatfield
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 630 Topics in Philosophy of Mind
Topics will vary, and may be historical or contemporary.
Taught by: Hatfield
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 633 Colloquium in American History
HIST 610 is a topics course. When the subject is appropriate, the course will be cross-listed with Philosophy. Please refer to the current timetable.
Taught by: Kuklick, B.
Course not offered every year
Also Offered As: HIST 610
Activity: Seminar
1 Course Unit
PHIL 642 Contemporary Metaphysics
This course will deal with the nature of necessity, essentialism, idealism and the concept of truth from a contemporary perspective.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 643 Carnap
A survey of Carnap's writings, with special attention to The Logical Construction of the World and The Logical Syntax of Language.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 644 Quine
A survey of Quine's philosophy with special attention to the critique of analyticity, truth and reference, indeterminacy of translations, ontological relativity, and physicalism.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 645 Reference
Contemporary discussions of reference with special attention to referential inscrutability, first person authority, and anti-individualism.
Readings from Quine, Davidson, Putnam, Field, Wallace, Burge, and McDowell.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 646 Topics in Early Analytic Philosophy
Selected interpretive and philosophical issues from Frege, Russell, and early Wittgenstein.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 647 Hume's Philosophy of Mind
An examination of Hume's theory of mind, focusing on the Treatise and first Enquiry.
Taught by: Hatfield
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 648 Kant's Theoretical Philosophy
This course will study not Kant's system of philosophy but his philosophy of system, that is, the role of the concept of systematicity throughout his philosophical work. Special topics will include the role of systematicity in empirical knowledge and science, practical reasoning, and meta-philosophy, where systematicity functions as the criterion of the adequacy of philosophical theories themselves. Some prior acquaintance with the main themes of Kant's theoretical and practical philosophy will be assumed.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 672 Topics in Ethics
PHIL 672 will be a workshop on writing papers for submission to either conferences or journals. Papers may address any topic in value theory, broadly construed, and some participants may choose to revise papers written for previous seminars. All participants will be responsible for generating short bibliographies and then leading class discussions on their topics, providing drafts of their papers for critique by the class, and presenting their papers to the class. Students who have passed their prelims are encouraged to participate as auditors.
Taught by: S.Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 674 Topics in Bioethics
Topics will vary.
Course not offered every year
Activity: Lecture
1 Course Unit

PHIL 678 Advanced Topics in Political Philosophy
In this course, we will examine various problems and questions in political philosophy. The focus will be on contemporary topics. This is an advanced seminar for graduate students who want to develop a professional-level paper on a particular subject, and the course will consist of readings on selected topics (selected by students) and students presenting their own papers (in various stages) on these topics. For graduate students in Philosophy only.
Taught by: Tan
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 679 Liberalism and its Critics
This course will examine some of the fundamental these of liberalism and some of the criticisms they have encountered. In particular, we will examine the classical formulation of liberal theory in Immanuel Kant as well as his near-contemporaries Moses Mendelssohn and Wilhelm von Humboldt, and criticisms of this view by writers like G.W.F. Hegel and F.H. Bradley; we will then examine modern versions of liberalism in John Rawls and Ronald Dworkin, and its criticism, especially by "communitarians" like Michael Sandel, Charles Taylor, Alasdair MacIntyre, and Michael Walzer. We will be concerned with differences between the classical (Kantian) and contemporary (Rawlsian) foundations of liberalism as well as with the validity of the criticisms which have been made of each.
Taught by: Freeman
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 680 History of Aesthetics
A study of 18th century aesthetics focussing on Kant, his contemporaries, and successors.
Course not offered every year
Activity: Seminar
1 Course Unit
PHIL 681 Philosophy of Literature
This course will begin with a survey of current topics and writings in the philosophy of literature: what is a narrative? what makes literary language expressive? what can we learn from fiction or poetry? The text here will consist largely of selected readings from the new Blackwell Companion to the Philosophy of Language. We will then explore the relation between philosophy and literature in more depth by discussing Eva Dadlez’s new book, “Mirrors to one another: emotion and value in Jane Austen and David Hume.”
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 699 Independent Study
Directed readings in consultation with individual faculty members.
One-term course offered either term
Activity: Independent Study
1 Course Unit

PHIL 700 Dissertation Workshop
Registration required for all third-year doctoral students. Fourth year students and beyond attend and present their work in the Dissertation Seminar. From time to time, topics pertaining to professional development and dissertation writing will be discussed.
Taught by: Freeman, Hatfield, Singer
Two terms. student must enter first term.
Activity: Seminar
1 Course Unit

PHIL 990 Masters Thesis
Taught by: Staff.
One-term course offered either term
Activity: Masters Thesis
1 Course Unit

PHIL 995 Dissertation
Ph.D. candidates, who have completed all course requirements and have an approved dissertation proposal, work on their dissertation under the guidance of their dissertation supervisor and other members of their dissertation committee.
One-term course offered either term
Activity: Dissertation
1 Course Unit

PHIL 998 Teaching Practicum (Independent Study)
Supervised teaching experience. Four semesters are required of all Doctoral students in philosophy.
One-term course offered either term
Activity: Independent Study
1 Course Unit

PHIL 999 Independent Study
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: May be repeated for credit
PPE 062 Soviet and Post-Soviet Economy
The course will cover the development and operation of the Soviet centrally planned economy—one of the grandest social experiments of the 20th century. We will review the mechanisms of plan creation, the push for the collectivization and further development of Soviet agriculture, the role of the Soviet educational system and the performance of labor markets (including forced labor camps—GULags). We will discuss the strengths and weaknesses of the Soviet system and the causes of its collapse. Privatization, called by some “piratization,” will be one of the central issues in our consideration of the transition from central planning to a market economy in the early 1990s. Even though our main focus will be on the Soviet economy and post-Soviet transition, we will occasionally look back in time to the tsarist era and even further back to find evidence to help explain Soviet/Russian economic development.
Taught by: Vekker
Also Offered As: RUSS 189
Activity: Lecture
1 Course Unit

PPE 072 Biomedical Ethics
This course is an introduction to bioethics, focusing on ethical questions arising at the beginning and end of life. Topics will include procreative responsibilities, the question of wrongful life, and prenatal moral status as well as questions of justice related to markets for sperm, eggs and gestation. We will also attend to dilemmas at the end of life, including the authority of advance directives, euthanasia and the allocation of life-saving therapies.
For BA Students: Society Sector
Taught by: Gibbons
Course not offered every year
Also Offered As: PHIL 072
Activity: Lecture
1 Course Unit

PPE 073 Topics in Ethics
This course examines some of the central theoretical and applied questions of ethics. For example, what is the good life? By what measure or principles do we evaluate the rightness and wrongness of actions? How does ethical reasoning help us understand and address real world problems such as world hunger, social injustice, sex and race discrimination, allocation of scarce resources and the like. The course can be organized around an applied topic or practical issue such as global ethics, just war, biomedical ethics or environmental ethics.
Taught by: Gibbons, M.Meyer
Course not offered every year
Also Offered As: PHIL 073
Activity: Seminar
1 Course Unit

PPE 140 Introduction to Cognitive Science
How do minds work? This course surveys a wide range of answers to this question from disciplines ranging from philosophy to neuroscience. The course devotes special attention to the use of simple computational and mathematical models. Topics include perception, learning, memory, decision making, emotion and consciousness.
Also Offered As: CIS 140, COGS 001, LING 105, PHIL 044, PSYC 207
Prerequisites: An introductory course in Computer Science, Linguistics, Neuroscience, Philosophy or Psychology
Activity: Lecture
1 Course Unit
Notes: This is a Formal Reasoning course.

PPE 153 Judgment and Decisions
Thinking, judgment, and personal and societal decision making, with emphasis on fallacies and biases.
One-term course offered either term
Also Offered As: PSYC 253
Prerequisite: One semester of statistics OR microeconomics
Activity: Lecture
1 Course Unit
Notes: An LPS section may be given

PPE 225 Philosophy of Biology
This course consists of a detailed examination of evolutionary theory and its philosophical foundations. The course begins with a consideration of Darwin’s formulation of evolutionary theory and the main influences on Darwin. We will then consider two contemporary presentations of the theory: Richard Dawkins’ and Richard Lewontin’s. The remainder of the course will deal with a number of foundational issues including adaptation, the units of selection, the evolution of altruism, and the possibility of grounding ethics in evolutionary theory.
For BA Students: Natural Science and Math Sector
Taught by: Domotor, Spencer, Weisberg
Course not offered every year
Also Offered As: PHIL 226, PHIL 521
Activity: Lecture
1 Course Unit

PPE 232 Political Economy
This course examines the political and economic determinants of government policies. The course presents economic arguments for government action in the private economy. How government decides policies via simple majority voting, representative legislatures, and executive veto and agenda-setting politics will be studied. Applications include government spending and redistributive policies.
Course usually offered in spring term
Also Offered As: ECON 232
Prerequisites: ECON 101; MATH 104 and MATH 114 or MATH 115. ECON 103 is recommended.
Activity: Lecture
1 Course Unit

PPE 244 Introduction to Philosophy of Mind
This course will survey several central topics in philosophy of mind, as well as investigating how philosophy of the mind interacts with scientific study of the mind. Among the questions we’ll be asking are: What is it to have a mind? What is the relationship between the mind and the brain? Can there be a science of the mind? What can it tell us? What can philosophy contribute to a science of the mind? What is consciousness? What is it to think, to perceive, to act? How are perception, thought, and action related to one another?
Taught by: Domotor, Miracchi
Course not offered every year
Also Offered As: PHIL 244
Activity: Lecture
1 Course Unit
PPE 270 Constitutional Law: Public Power & Civil Rights to 1912
This course explores the creation and transformations of the American constitutional system's structures and goals from the nation's founding through the period of Progressive reforms, the rise of the Jim Crow system, and the Spanish American War. Issues include the division of powers between state and national governments, and the branches of the federal government; economic powers of private actors and government regulators; the authority of governments to enforce or transform racial and gender hierarchies; and the extent of religious and expressive freedoms and rights of persons accused of crimes. We will pay special attention to the changing role of the Supreme Court and its decisions in interpreting and shaping American constitutionalism, and we will also read legislative and executive constitutional arguments, party platforms, and other influential statements of American constitutional thought.
Taught by: Smith
One-term course offered either term
Also Offered As: PSCI 271
Activity: Recitation
1 Course Unit

PPE 271 Global Justice
This course is an introduction to some of the central problems in global justice. Samples of these topics include: What are our duties to respond to world poverty and what is the basis of this duty? Is global inequality in itself a matter of justice? How universal are human rights? Should human rights defer to cultural claims at all? Is there a right to intervene in another country to protect human rights there? Indeed can intervention to protect human rights ever be a duty? Who is responsible for the environment? We will read some influential contemporary essays by philosophers on these topics with the goal of using the ideas in these papers as a springboard for our own further discussion and analysis.
Taught by: Tan
Course not offered every year
Also Offered As: PHIL 271
Activity: Seminar
1 Course Unit

PPE 275 Introduction to Political Psychology
This course will explore psychological approaches to understanding political beliefs, attitudes, and actions at the levels of both individual citizens and national leaders. It will also explore the possibility that psychological science itself is not immune to the political debates swirling around it. Specific topics will include: the workings of belief systems (and their power to shape what we "see"), cognitive biases (and their power to cause miscalculations), sacred values and their role in stabilizing belief systems and social interaction, personality and ideology (the linkages between the personal and the political), and clashing conceptions of morality and distributive and corrective justice (striking variations among people in what they consider to be fair). We shall also explore some topics that have sparked controversy in the psychological research literature and that tend to polarize opinion along political lines, including work on intelligence and unconscious bias.
Taught by: Tetlock
One-term course offered either term
Also Offered As: PSYC 275
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit
Notes: NOTE: Students who are more interested in business-related issues may want Wharton 276x which is a modified version of this course specifically for Wharton undergraduates.

PPE 277 Justice, Law and Morality
The course will focus on the philosophical background to the individual rights protected by the U.S. Constitution, including 1st Amendment freedoms of religion, expression, and association; the 14th amendment guarantee of Due Process and the rights of privacy, abortion, assisted suicide, and marriage; the Equal Protection clause and equal political rights and the legitimacy of affirmative action; and the Takings and Contract clauses and their bearing on rights of private property and economic freedoms. In addition to Supreme Court decisions on these issues, we will read works by political philosophers and constitutional theorists, including J.S. Mill, Ronald Dworkin, Cass Sunstein, Martha Nussbaum, Katherine MacKinnon and others.
Taught by: Freeman, Allen
Course not offered every year
Also Offered As: PHIL 277
Activity: Lecture
1 Course Unit

PPE 311 Strategic Reasoning
This course is about strategically interdependent decisions. In such situations, the outcome of your actions depends also on the actions of others. When making your choice, you have to think what the others will choose, who in turn are thinking what you will be choosing, and so on. Game Theory offers several concepts and insights for understanding such situations, and for making better strategic choices. This course will introduce and develop some basic ideas from game theory, using illustrations, applications, and cases drawn from business, economics, politics, sports, and even fiction and movies. Some interactive games will be played in class. There will be little formal theory, and the only pre-requisites are some high-school algebra and having taken Econ 1. However, general numeracy (facility interpreting and doing numerical graphs, tables, and arithmetic calculations) is very important. This course will also be accepted by the Economics department as an Econ course, to be counted toward the minor in Economics (or as an Econ elective).
Taught by: Dillenberger
Course usually offered in fall term
Also Offered As: ECON 013
Prerequisites: Some high school algebra, ECON 001.
Activity: Lecture
1 Course Unit
Notes: This course may NOT be taken concurrently with or after Econ 212.

PPE 312 The Public Policy Process
This course introduces students to the theories and practice of the policy-making process. There are four primary learning objectives. First, understanding how the structure of political institutions matter for the policies that they produce. Second, recognizing the constraints that policy makers face when making decisions on behalf of the public. Third, identifying the strategies that can be used to overcome these constraints. Fourth, knowing the toolbox that available to participants in the policy-making process to help get their preferred strategies implemented. While our focus will primarily be on American political institutions, many of the ideas and topics discussed in the class apply broadly to other democratic systems of government.
Taught by: Levendusky, Meredith
Course usually offered in fall term
Also Offered As: PSCI 236
Activity: Recitation
1 Course Unit
PPE 313 Behavioral Economics and Psychology
Our understanding of markets, governments, and societies rests on our understanding of choice behavior, and the psychological forces that govern it. This course will introduce you to the study of choice, and will examine in detail what we know about how people make choices, and how we can influence these choices. It will utilize insights from psychology and economics, and will apply these insights to domains including risky decision making, intertemporal decision making, and social decision making.
Taught by: Bhatia
One-term course offered either term
Also Offered As: PSYC 265
Prerequisites: ECON 001.
Activity: Lecture
1 Course Unit
Notes: Prerequisite: ECON 1

PPE 314 Philosophy of Social Science
This course is about the foundations of contemporary social science. It focuses on the nature of social systems, the similarities and differences between social and natural sciences, the construction, analysis, and confirmation of social theories, and the nature of social explanations. Specific topics may include: What are social norms and conventions? What does it mean to have one gender rather than another, or one sexual orientation rather than another? Should social systems be studied quantitatively or qualitatively?
Taught by: Bicchieri, Weisberg
Course usually offered in spring term
Also Offered As: PHIL 228
Prerequisites: ECON 001, ECON 002, PHIL 008 and PPE 201.
Activity: Lecture
1 Course Unit

PPE 333 Philosophy of Economics
In this course, general philosophy of science issues are applied to economics, and some problems specific to economics are tackled. While analytical questions like "What is economics?" or "What is an economic explanation" must be pursued, the ultimate goal is practical: What is good economics? How can economists contribute to a better understanding of society, and a better society? How can we make economics better? Topics to be discussed include the following: specific object and method of economics as a social science; its relation with other disciplines (physics, psychology and evolutionary theory); values in economics (welfare, freedom, equality and neutrality); the role of understanding and possible limits of a quantitative approach to human behavior (purposefulness, freedom, creativity, innovation); prediction, unpredictability and the pretension of prediction; causation in econometrics and in economic theory (equilibrium); selfishness and utility maximization (cognitive and behaviorist interpretations); economic models and unrealistic assumptions (realism and instrumentalism); empirical basis of economics (observation and experiment); microeconomics and macroeconomics (reductionism and autonomy); pluralism in economics (mainstream economics and heterodox schools).
Course not offered every year
Also Offered As: PHIL 233
Activity: Lecture
1 Course Unit

PPE 401 Independent Study
Student arranges with a faculty member to pursue a research project on a suitable topic. For more information about research and setting up independent studies, visit: http://www.sas.upenn.edu/ppe/Requirements/PPEmajor/research.html
One-term course offered either term
Activity: Independent Study
1 Course Unit

PPE 402 Research in Philosophy, Politics & Economics
Led by postdoctoral fellows in the Philosophy, Politics and Economics program, this course teaches students how to conduct research in PPE with an emphasis on creating a well-formed research question, determining what kinds of data or scholarly research bears on that question, and how to carry out an interdisciplinary, research-driven project on that question.
One-term course offered either term
Activity: Seminar
1 Course Unit

PPE 421 Philosophy of Biology
This course consists of a detailed examination of evolutionary theory and its philosophical foundations. The course begins with a consideration of Darwin's formulation of evolutionary theory and the main influences on Darwin. We will then consider two contemporary presentations of the theories of Richard Dawkins' and Richard Lewontin's. The remainder of the course will deal with a number of foundational issues and may include discussions of adaptation, what constitutes a species, evolutionary progress, the concept of fitness, the units of selection, the alleged reduction of classical genetics to molecular genetics, and the possibility of grounding ethics in evolutionary theory. The evolution of altruism will also be discussed, time permitting. PREREQUISITES: Either two philosophy courses OR Biology 101/102 (or equivalent)
Taught by: Weisberg
Course not offered every year
Also Offered As: PHIL 226, PHIL 421
Prerequisite: Either two philosophy courses OR Biology 101/102 (or equivalent)
Activity: Lecture
1 Course Unit

PPE 460 Experiments in Behavioral Ethics
In reality, our understanding of different mechanisms and (economic) relationships is hampered by the lack of data. More often than not, either the observation itself is difficult or the data is not reliable. Over the last decades, economic experiments have become a vital part of the scientific discourse, facilitating our understanding of the world we live in (much like in Biology, Chemistry, Physics or the like). Economic experiments allow exploring economic behavior under controlled conditions by generating observations under different experimental designs and controlled conditions. Pioneering this field of research, Daniel Kahneman and Vernon Smith were awarded the Nobel memorial prize in recognition of their work on behavioral and experimental economics. In this course, we provide you with the methodology of how to develop a research idea and a proper experimental design that allows to explore this idea. Essentially, you will learn how to think about ideas, generate predictions, and how to use economic experiments to test them.
Taught by: Bicchieri, Dimant
Activity: Seminar
1 Course Unit
PPE 470 Capstone: Social Policy
Social policy is the study of human wellbeing and is concerned with the
effects in areas of health care, criminal justice, inequality, and education,
among others. As a PPE Capstone, this is an integrative senior seminar
(open to others by departmental permission).
Taught by: Dimant
Course usually offered in fall term
Activity: Seminar
1 Course Unit

PPE 471 Capstone: Political Economy
Political Economy studies the relationships between individuals and
society and between markets and the state.
Taught by: Sontuoso
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 472 Capstone: Networks
Network Theory studies graphs as a representation of the structure of
relationships between social entities. It can be used to examine how the
of individuals in a socio-economic system affects - and is affected by -
the structure of connections of the system.
Taught by: Sontuoso
Course usually offered in fall term
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 473 Capstone: Modeling
Modeling provides a way to identify and analyze the salient features of
complex problems or dynamic social situations. Using models can further
provide a way to see what strategies may be rational over time.
Taught by: Funcke
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 474 Capstone: Judgment and Decision Making
The interdisciplinary study of individuals’ and groups’ judgments and
decisions, including normative, descriptive, and prescriptive theories.
Taught by: Hart
Course usually offered in fall term
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 475 Capstone: Philosophy, Politics and Economics
This is an integrative senior seminar (open to others by departmental
permission). The following website will give descriptions of the
specific capstone courses that will be offered each semester: http://
www.sas.upenn.edu/ppe/Courses/general
Course usually offered in fall term
Also Offered As: PSCI 418
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 476 Capstone: Social Psychology
Social psychology explores how an individual’s judgments and behaviors
can be influenced or determined by others and their social context.
Taught by: Royzman
Course usually offered in spring term
Also Offered As: PSYC 478
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 477 Capstone: Political Science
A PPE capstone offered by faculty in Political Science.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 478 Capstone: Psychology
A PPE Capstone offered by faculty in Psychology.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 479 Capstone: Economics
A PPE Capstone seminar offered by faculty in Economics.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 480 Capstone: Philosophy
A PPE Capstone seminar offered by faculty in Philosophy.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 481 Capstone: Political Science
A PPE capstone offered by faculty in Political Science.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 482 Capstone: Psychology
A PPE Capstone offered by faculty in Psychology.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 483 Capstone: Economics
A PPE Capstone seminar offered by faculty in Economics.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 484 Capstone: Philosophy
A PPE Capstone seminar offered by faculty in Philosophy.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 485 Capstone: Political Science
A PPE Capstone offered by faculty in Political Science.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 486 Capstone: Psychology
A PPE Capstone offered by faculty in Psychology.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).

PPE 487 Capstone: Economics
A PPE Capstone seminar offered by faculty in Economics.
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to
others by departmental permission).
PPE 498 Directed Honors Research
Student arranges with a faculty member to do an honors thesis on a suitable topic. For more information on honors visit: http://www.sas.upenn.edu/ppe/Requirements/honors.html
One-term course offered either term
Activity: Independent Study
1 Course Unit

PPE 499 Advanced Research
This course may be taken by a PPE student for advanced research. Enrollment by permit only.
Course not offered every year
Activity: Independent Study
1 Course Unit

Physics (PHYS)

PHYS 008 Physics for Architects I
An introduction to the classical laws of mechanics, including static equilibrium, elasticity, and oscillations, with emphasis on topics most relevant to students in architecture. Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 091 or 093 who complete PHYS 008 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered fall; odd-numbered years
Prerequisites: Entrance credit in algebra and trigonometry.
Activity: Lecture
1 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 091 or 093 who complete PHYS 008 will thereby surrender the AP or Transfer Credit.

PHYS 009 Physics for Architects II
A continuation of PHYS 008 introducing waves, sound, light, fluids, heat, electricity, magnetism, and circuits, with emphasis on topics most relevant to students in architecture. Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 092 or 094 who complete PHYS 008 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered spring; even-numbered years
Prerequisites: Entrance credit in algebra and trigonometry.
Activity: Lecture
1 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 092 or 094 who complete PHYS 008 will thereby surrender the AP or Transfer Credit.

PHYS 009 Physics for Architects II
A continuation of PHYS 008 introducing waves, sound, light, fluids, heat, electricity, magnetism, and circuits, with emphasis on topics most relevant to students in architecture. Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 091 or 093 who complete PHYS 008 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered spring; even-numbered years
Prerequisites: Entrance credit in algebra and trigonometry.
Activity: Lecture
1 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 091 or 093 who complete PHYS 008 will thereby surrender the AP or Transfer Credit.

PHYS 016 Energy, Oil, and Global Warming
The developed world's dependence on fossil fuels for energy production has extremely undesirable economic, environmental, and political consequences, and is likely to be mankind's greatest challenge in the 21st century. We describe the physical principles of energy, its production and consumption, and environmental consequences, including the greenhouse effect. We will examine a number of alternative modes of energy generation - fossil fuels, biomass, wind, solar, hydro, and nuclear - and study the physical and technological aspects of each, and their societal, environmental and economic impacts over the construction and operational lifetimes. No previous study of physics is assumed. For BA Students: Natural Science and Math Sector
One-term course offered either term
Prerequisites: Algebra and Trigonometry
Activity: Lecture
1 Course Unit
Notes: May be counted as Science Studies for students in Class of 2009 and prior. Target audience: Non-science majors (although science/engineering students are welcome).

PHYS 050 Physics Laboratory I
Experiments in classical mechanics.
One-term course offered either term
Prerequisites: AP score of 5 on the Physics B or Physics C - Mechanics exam, or transfer credit for PHYS 91 or PHYS 93. Only for students with above prerequisites.
Activity: Laboratory
0.5 Course Units
Notes: Course carries .5 course unit and student receives grade. Permit required. Only for students with above prerequisites.

PHYS 051 Physics Laboratory II
Experiments in electromagnetism and optics.
One-term course offered either term
Prerequisites: AP score of 5 on the Physics B or Physics C - Electricity and Magnetism exam, or transfer credit for PHYS 92 or PHYS 94. PHYS 050. Only for students with above prerequisites.
Activity: Laboratory
0.5 Course Units
Notes: Course carries .5 course unit and student receives grade. Permit required. Only for students with above prerequisites.

PHYS 101 General Physics: Mechanics, Heat and Sound
An introduction to the classical laws of motion requiring a background in calculus. Suggested for students in a pre-health program. Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 101 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered summer, fall and spring terms
Prerequisites: Entrance credit in algebra and trigonometry, and a background in calculus.
Corequisite: PHYS 101 LAB
Activity: Lecture
1.5 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 101 will thereby surrender the AP or Transfer Credit.
PHYS 102 General Physics: Electromagnetism, Optics, and Modern Physics
A continuation of PHYS 101 emphasizing an introduction to classical electricity and magnetism, relativity theory, optics, and the quantum theory of matter, requiring a background in calculus. Suggested for students in a pre-health program. Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 92 or PHYS 94 who complete PHYS 102 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered summer, fall and spring terms
Prerequisite: PHYS 101
Corequisite: PHYS 102 LAB
Activity: Lecture
1.5 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 92 or PHYS 94 who complete PHYS 102 will thereby surrender the AP or Transfer Credit.

PHYS 137 Community Physics Initiative
This is an Academically Based Community Service Course (ABCS). It will be aligned to the Philadelphia School District curriculum in introductory physics at University City High School (UCHS). The UCHS curriculum roughly parallels the contents of first semester introductory physics (non-calculus) at Penn.
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PHYS 140 Principles of Physics I (without laboratory)
Classical laws of motions; interactions between particles; conservation laws and symmetry principles; particle and rigid body motion; gravitation, harmonic motion. Engineering students only.
One-term course offered either term
Corequisite: MATH 104
Activity: Lecture
1 Course Unit
Notes: For Engineering students whose course of study does not require a physics laboratory course. Those who are enrolled in a dual degree program with the College must register for the lab-based version of this course, PHYS 150.

PHYS 141 Principles of Physics II (without laboratory)
Electric and magnetic fields; Coulomb's law, Ampere's law, and Faraday's law; Maxwell's equations; emission, propagation, and absorption of electromagnetic radiation; interference, reflection, refraction, scattering, and diffraction phenomena. Engineering students only.
Course offered summer, fall and spring terms
Prerequisite: PHYS 140
Corequisite: MATH 114
Activity: Lecture
1 Course Unit
Notes: For Engineering students whose course of study does not require a physics laboratory course. Those who are enrolled in a dual degree program with the College must register for the lab-based version of this course, PHYS 151.

PHYS 150 Principles of Physics I: Mechanics and Wave Motion
This calculus-based course is recommended for science majors and engineering students. Classical laws of motion; interactions between particles; conservation laws and symmetry principles; particle and rigid body motion; gravitation, harmonic motion. Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 150 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
One-term course offered either term
Prerequisites: Students in PHYS 150 should already have taken MATH 104 or the equivalent, or be taking it simultaneously with PHYS 150
Corequisite: PHYS 150 LAB
Activity: Lecture
1.5 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 150 will thereby surrender the AP or Transfer Credit.

PHYS 151 Principles of Physics II: Electromagnetism and Radiation
The topics of this calculus-based course are electric and magnetic fields; Coulomb's, Ampere's, and Faraday's laws; Maxwell's equations; emission, propagation, and absorption of electromagnetic radiation; interference, reflection, refraction, scattering, and diffraction phenomena. Credit is awarded for only one of the following courses. PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 92 or PHYS 94 who complete PHYS 151 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered summer, fall and spring terms
Prerequisite: PHYS 150
Corequisite: PHYS 151 LAB
Activity: Lecture
1.5 Course Unit
Notes: Credit is awarded for only one of the following courses. PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 92 or PHYS 94 who complete PHYS 151 will thereby surrender the AP or Transfer Credit.

PHYS 170 Honors Physics I: Mechanics and Wave Motion
This course parallels and extends the content of PHYS 150, at a significantly higher mathematical level. Recommended for well-prepared students in engineering and the physical sciences, and particularly for those planning to major in physics. Classical laws of motion: interaction between particles; conservation laws and symmetry principles; rigid body motion; non-inertial reference frames; oscillations. Credit is awarded for only one of the following courses: PHYS 008 PHYS 101, 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 170 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course usually offered in fall term
Prerequisites: MATH 104 or permission of the instructor.
Corequisite: MATH 114 or permission of instructor
Activity: Seminar
1.5 Course Unit
Notes: Benjamin Franklin Seminar. Credit is awarded for only one of the following courses: PHYS 008 PHYS 101, 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 170 will thereby surrender the AP or Transfer Credit.
PHYS 171 Honors Physics II: Electromagnetism and Radiation
This course parallels and extends the content of PHYS 151, at a somewhat higher mathematical level. Recommended for well-prepared students in engineering and the physical sciences, and particularly for those planning to major in physics. Electric and magnetic fields; Coulomb’s, Ampere’s, and Faraday’s laws; special relativity; Maxwell’s equations, electromagnetic radiation. Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 092 or PHYS 094 who complete PHYS 171 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course usually offered in spring term
Prerequisites: MATH 114 and PHYS 150 or PHYS 170, or permission of instructor
Corequisite: MATH 240 or permission of instructor
Activity: Seminar
1.5 Course Unit
Notes: Benjamin Franklin Seminar. Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 092 or PHYS 094 who complete PHYS 171 will thereby surrender the AP or Transfer Credit.

PHYS 230 Principles of Physics III: Thermal Physics and Waves
Elementary thermodynamics and statistical physics including heat engines and the Maxwell-Boltzmann distribution, independent and forced harmonic motion, coupled oscillators, normal modes, longitudinal and transverse sound and light waves, interference and diffraction, and elementary Fourier analysis and the uncertainty principle.
Course usually offered in fall term
Prerequisites: PHYS 150/151 or PHYS 170/171 and MATH 104, MATH 114 or 116
Corequisite: MATH 240
Activity: Lecture
1 Course Unit

PHYS 240 Principles of Physics IV: Modern Physics (without laboratory)
Special relativity, an introduction to the principles of quantum mechanics, properties of electrons, protons, neutrons, and the elements of atomic structure and nuclear structure. Electromagnetic radiation and photons; interaction of photons with electrons, atoms, and nuclei.
Course usually offered in spring term
Prerequisites: PHYS 150/151 or PHYS 170/171
Corequisite: MATH 240 (Note: MATH 240 will become a prerequisite in Spring 2019)
Activity: Lecture
1 Course Unit

PHYS 250 Principles of Physics IV: Modern Physics
Special relativity, an introduction to the principle of quantum mechanics, properties of electrons, protons, neutrons, and the elements of atomic structure and nuclear structure. Electromagnetic radiation and photons; interaction of photons with electrons, atoms, and nuclei.
Course usually offered in spring term
Prerequisites: PHYS 150/151 or PHYS 170/171
Corequisites: MATH 240. (Note: MATH 240 will become a prerequisite in Spring 2019)
Activity: Lecture
1.5 Course Unit
Notes: PHYS 250 students take a two-hour lab

PHYS 280 Physical Models of Biological Systems
Classic case studies of successful reductionistic models of complex phenomena, emphasizing the key steps of making estimates, using them to figure out which physical variables and phenomena will be most relevant to a given system, finding analogies to purely physical systems whose behavior is already known, and embodying those in a mathematical model, which is often implemented in computer code. Topics may include bacterial genetics, genetic switches and oscillators; systems that sense or utilize light; superresolution and other microscopy methods; and vision and other modes of sensory transduction.
Course usually offered in fall term
Also Offered As: BCHE 280
Prerequisites: PHYS 101 (or higher), MATH 104-MATH 114 or MATH 104-MATH 115 or MATH 116. Recommended: previous or concurrent PHYS 102; basic background in chemistry and biology.
Activity: Lecture
1 Course Unit

PHYS 299 Independent Study
Special projects and independent study under the direction of faculty member.
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: Repetitive credit

PHYS 314 Ocean-Atmosphere Dynamics and Implications for Future Climate Change
This course covers the fundamentals of atmosphere and ocean dynamics, and aims to put these in the context of climate change in the 21st century. Large-scale atmospheric and oceanic circulation, the global energy balance, and the global hydrological cycle. We will introduce concepts of fluid dynamics and we will apply these to the vertical and horizontal motions in the atmosphere and ocean. Concepts covered include: hydrostatic law, buoyancy and convection, basic equations of fluid motions, Hadley and Ferrel cells in the atmosphere, thermohaline circulation, Sverdrup ocean flow, modes of climate variability (El-Nino, North Atlantic Oscillation, Southern Annular Mode). The course will incorporate student led discussions based on readings of the 2007 Intergovernmental Panel on Climate Change (IPCC) report and recent literature on climate change. Aimed at undergraduate or graduate students who have no prior knowledge of meteorology or oceanography or training in fluid mechanics. Previous background in calculus and/or introductory physics is helpful. This is a general course which spans many subdisciplines (fluid mechanics, atmospheric science, oceanography, hydrology).
Taught by: Marinov
Also Offered As: ENVS 312, ENVS 640
Prerequisites: MATH 114 or permission of the instructor.
Activity: Lecture
1 Course Unit

PHYS 351 Analytical Mechanics
An intermediate course in the statics and dynamics of particles and rigid bodies. Lagrangian dynamics, central forces, non-inertial reference frames, and rigid bodies.
Course usually offered in spring term
Prerequisites: PHYS 150/151 or PHYS 170/171, MATH 104/114, and MATH 240, or permission of instructor.
Activity: Lecture
1 Course Unit
PHYS 361 Electromagnetism I: Electricity and Potential Theory
An intermediate course. Electrostatic fields and potentials, dielectrics, and direct currents.
Course usually offered in fall term
Also Offered As: PHYS 561
Prerequisites: PHYS 151 or 171, and MATH 241
Activity: Lecture
1 Course Unit

PHYS 362 Electromagnetism II: Magnetism, Maxwell's Equations, and Electromagnetic Waves
Course usually offered in spring term
Also Offered As: PHYS 562
Prerequisite: PHYS 361
Activity: Lecture
1 Course Unit

PHYS 364 Laboratory Electronics
A laboratory-intensive survey of analog and digital electronics, intended to teach students of physics or related fields enough electronics to be comfortable learning additional topics on their own from a reference such as Horowitz and Hill. Specific topics will vary from year to year from the selection of topics listed below. Analog topics may include voltage dividers, impedance, filters, operational amplifier circuits, and transistor circuits. Digital topics may include logic gates, finite-state machines, programmable logic devices, digital-to-analog and analog-to-digital conversion, and microcomputer concepts. Recommended for students planning to do experimental work in physical science.
Course usually offered in fall term
Also Offered As: PHYS 564
Prerequisites: Familiarity with electricity and magnetism at the level of PHYS 102, 141, 151 or 171.
Activity: Lecture
1 Course Unit

PHYS 401 Thermodynamics and the Introduction to Statistical Mechanics and Kinetic Theory
Temperature, entropy and generalized potentials, phase transitions, and introduction to ensemble theory and distribution functions.
Course usually offered in fall term
Also Offered As: PHYS 581
Prerequisite: PHYS 240 or 250
Activity: Lecture
1 Course Unit

PHYS 411 Introduction to Quantum Mechanics I
An introduction to the principles of quantum mechanics designed for physics majors and graduate students in physics-related disciplines. The Schrodinger equation operator formalism, central field problem, angular momentum, and spin. Application to one-dimensional and central field problems.
Course usually offered in fall term
Also Offered As: PHYS 511
Prerequisites: PHYS 150 or 170, 240 or 250, and MATH 241
Activity: Lecture
1 Course Unit

PHYS 412 Introduction to Quantum Mechanics II
Perturbation theory, variational principle, application of the quantum theory to atomic, molecular, and nuclear systems, and their interaction with radiation.
Course usually offered in spring term
Also Offered As: PHYS 512
Prerequisite: PHYS 411
Activity: Lecture
1 Course Unit

PHYS 414 Laboratory in Modern Physics
Supervised experiments in modern physics.
Course usually offered in spring term
Also Offered As: PHYS 521
Prerequisite: PHYS 411
Activity: Lecture
1 Course Unit

PHYS 421 Modern Optics
Interaction of light with matter. Interference and diffraction, absorption and dispersion, stimulated emission and coherence, spectroscopy, nonlinear processes.
Course offered spring; even-numbered years
Also Offered As: PHYS 529
Prerequisites: PHYS 240 or 250 and 362, or permission of instructor
Activity: Lecture
1 Course Unit

PHYS 433 Order of Magnitude Physics
This course focuses on the art of estimating physical quantities to within the nearest factor of ten. Problem solving techniques such as dimensional analysis and scaling relations will be covered and applied to a wide range of topics including fluid mechanics, waves and sound, atomic physics, material properties, astrophysics, everyday life, and more. The course is intended for advanced undergraduate students.
One-term course offered either term
Prerequisite: Prerequisites: PHYS 411 or permission from instructor
Activity: Lecture
1 Course Unit

PHYS 499 Senior Honor Thesis
Experimental and theoretical research projects in various areas of physics planned by student in consultation with a member of faculty. A written thesis and an oral presentation and defense are required.
One-term course offered either term
Prerequisites: PHYS 412 and 414
Activity: Independent Study
1 Course Unit

PHYS 500 Mathematical Methods of Physics
A discussion of those concepts and techniques of classical analysis employed in physical theories. Topics include complex analysis. Fourier series and transforms, ordinary and partial equations, Hilbert spaces, among others.
Course usually offered in fall term
Also Offered As: MATH 594
Activity: Lecture
1 Course Unit
PHYS 501 Introduction to Research
Introduction to research in particle, nuclear, condensed matter and astrophysics. Selected current topics from journals.
One-term course offered either term
Activity: Lecture
0 Course Units
Notes: Taken by all first-year graduate students. This is a required seminar that does not carry credit or a grade.

PHYS 503 General Relativity
This is a graduate level, introductory course in general relativity. The basics of general relativity will be covered with a view to understanding the mathematical background, the construction of the theory, and applications to the solar system, black holes, gravitational waves and cosmology. The latter part of the course will cover some of the basic modern topics in modern cosmology, including the current cosmological model, the accelerating universe, and open questions driving current research.
One-term course offered either term
Activity: Lecture
1 Course Unit

PHYS 505 Introduction to Cosmology
Introduction to physical cosmology emphasizing recent ideas on the very early evolution of the universe. The course will introduce standard big bang cosmology, new theories of the very early universe, and the key observations that have tested and will be testing these ideas. No prior knowledge of astrophysics, cosmology, general relativity, or particle physics will be assumed, although aspects of each will be introduced as part of the course. The course is intended for graduate students and advanced undergraduates.
Course not offered every year
Prerequisite: Graduate standing in physics or permission of instructor
Activity: Lecture
1 Course Unit

PHYS 506 Electromagnetic Phenomena
Survey of electrodynamics, focusing on applications to research done in the Department. Topics include mathematical structure and relativistic invariance properties of Maxwell equations, tensor methods, and the generation and scattering of radiation, in vacuum and in materials. Applications vary from year to year but include optical manipulation, astrophysical phenomena, and the generalizations from Maxwell's theory to those of other fundamental interactions (strong, electroweak, and gravitational forces).
Course usually offered in spring term
Activity: Lecture
1 Course Unit

PHYS 516 Modern Optical Physics and Spectroscopy
Introduction to contemporary optics. Topics include propagation and guiding of light waves, interaction of electromagnetic radiation with matter, lasers, non-linear optics, coherent transient phenomena, photon correlation spectroscopies and photon diffusion.
Course offered spring; odd-numbered years
Activity: Lecture
1 Course Unit

PHYS 517 Particle Cosmology
This introduction to cosmology will cover standard big bang cosmology, formation of large-scale structure, theories of the early universe and their observational predictions, and models of dark energy. It is intended for graduate students or advanced undergraduates. No prior knowledge of general relativity or field theory will be assumed, although aspects of each will be introduced as part of the course.
One-term course offered either term
Activity: Lecture
1 Course Unit

PHYS 518 Introduction to Condensed Matter Physics
An introduction to condensed matter physics designed primarily for advanced undergraduate and graduate students desiring a compact survey of the field. Band theory of solids, phonons, electrical magnetic and optical properties of matter, and superconductivity.
Course usually offered in spring term
Prerequisites: Undergraduate training in quantum mechanics and statistical thermodynamics
Activity: Lecture
1 Course Unit

PHYS 521 Advanced Laboratory
Directed experiments in classical and modern physics designed to acquaint the student with modern laboratory instrumentation and techniques.
Course usually offered in spring term
Also Offered As: PHYS 414
Activity: Lecture
1 Course Unit

PHYS 522 Introduction to Elementary Particle Physics
An introduction to elementary particles (photons, leptons, hadrons, quarks), their interactions, and the unification of the fundamental forces.
Course not offered every year
Prerequisites: Permission of instructor required.
Activity: Lecture
1 Course Unit

PHYS 526 Astrophysical Radiation
This is a course on the theory of the interaction of light and matter designed primarily for graduate and advanced undergraduate students to build the basic tools required to do research in astrophysics. Topics to be discussed include structure of single- and multi-electron atoms, radiative and collisional processes, spectral line formation, opacity, radiation transfer, analytical and numerical methods, and a selection of applications in astrophysics based on student research interest.
Course offered fall; even-numbered years
Activity: Lecture
1 Course Unit

PHYS 528 Introduction to Liquid Crystals
Overview of liquid crystalline phases, their elasticity, topology, and dynamics.
One-term course offered either term
Activity: Lecture
1 Course Unit

PHYS 530 Modern Optical Physics and Spectroscopy
Introduction to contemporary optics. Topics include propagation and guiding of light waves, interaction of electromagnetic radiation with matter, lasers, non-linear optics, coherent transient phenomena, photon correlation spectroscopies and photon diffusion.
Course offered spring; odd-numbered years
Prerequisites: Working knowledge of electricity and magnetism and quantum mechanics.
Activity: Lecture
1 Course Unit

Notes: Graduate level course designed for beginning or intermediate graduate students in physics, but it is likely to be of use to a broader community including beginning graduate students whose research involves light scattering in electrical engineering, chemistry, and biophysics, and advanced undergraduates.
PHYS 531 Quantum Mechanics I
Wave mechanics, complementarity and correspondence principles, semi-classical (WKB) approximation, bound state techniques, periodic potentials, angular momentum, scattering theory, phase shift analysis, and resonance phenomena.
Course usually offered in fall term
Prerequisites: A minimum of one semester of quantum mechanics at the advanced undergraduate level.
Activity: Lecture
1 Course Unit

PHYS 532 Quantum Mechanics II
Spin and other two dimensional systems, matrix mechanics, rotation group, symmetries, time independent and time dependent perturbation theory, and atomic and molecular systems.
Course usually offered in spring term
Prerequisite: PHYS 531
Activity: Lecture
1 Course Unit

PHYS 533 Topics in Cosmology
This course aims to survey three or four topics of current research interest in cosmology, mostly at the level of review articles. The topics will be covered in greater depth and with more connections to ongoing research than the introductory cosmology course, ASTR 525. The course will be largely accessible to first and second year graduate students. Some exposure to cosmology and general relativity will be helpful but the first two weeks will attempt to bridge that gap. The topic selection will be done in part with input from the students. For the Fall 2009 semester, Dark Energy will be the first topic, Nonlinear Dynamics the likely second topic and Gravitational Lensing (focus on strong lensing) a possible third topic. A few short problem sets and a presentation/write-up on a topic of interest, based on a review article or selected papers, will make up the course requirement.
Course not offered every year
Activity: Lecture
1 Course Unit

PHYS 535 Topics in Theory of Living Systems
The goal of this course is to discuss broad conceptual theories that address complex phenomena of living systems. Example questions include: what is the molecular architecture of information processing in cells and developing organisms? What is the functional architecture of cooperative organization from molecules in a cell to whole organism social interactions? How is complex multi-factorial information represented in organisms? The course will meet once a week and students will research relevant papers, lead discussions, and generate synopsis of group discussions. At the end of the semester, faculty and students are expected to co-author a review report of the discussed topics.
Taught by: Kim, Goulian, Akcay, Balasubramanian, Raj, Mossel
Course not offered every year
Also Offered As: BIOL 535
Prerequisite: Permission of instructor
Activity: Seminar
0.5 Course Units

PHYS 536 Laboratory Electronics
A laboratory-intensive survey of analog and digital electronics, intended to teach students of physics or related fields enough electronics to be comfortable learning additional topics on their own from a reference such as Horowitz and Hill. Specific topics will vary from year to year from the selection of topics listed below. Analog topics may include voltage dividers, impedance, filters, operational amplifier circuits, and transistor circuits. Digital topics may include logic gates, finite-state machines, programmable logic devices, digital-to-analog and analog-to-digital conversion, and microcomputer concepts. Recommended for students planning to do experimental work in physical science.
Course usually offered in fall term
Also Offered As: PHYS 364
Activity: Lecture
1 Course Unit

PHYS 580 Biological Physics
The course will explore the basic physical principles behind the structure and function of life across many length and time scales (molecule, cell, organism, population). Emphasis will be given on overarching physical themes such as entropy and biological noise, and how they affect the organization of living matter and its emergent properties. Topics may include biopolymers and single molecule biophysics, molecular motors, gene and transcription networks, pattern formation in biological systems, phyllotaxis, neural computing and evolution.
Course not offered every year
Also Offered As: BCHE 580
Prerequisites: MATH 240 and MATH 241 (or equivalent preparation), PHYS 401 or familiarity with statistical mechanics and thermodynamics.
Activity: Lecture
1 Course Unit
Notes: Recommended: Basic background in biology.
PHYS 585 Theoretical and Computational Neuroscience
This course will develop theoretical and computational approaches to structural and functional organization in the brain. The course will cover: (i) the basic biophysics of neural responses, (ii) neural coding and decoding with an emphasis on sensory systems, (iii) approaches to the study of networks of neurons, (iv) models of adaptation, learning and memory, (v) models of decision making, and (vi) ideas that address why the brain is organized the way that it is. The course will be appropriate for advanced undergraduates and beginning graduate students. A knowledge of multi-variable calculus, linear algebra and differential equations is required (except by permission of the instructor). Prior exposure to neuroscience and/or Matlab programming will be helpful.
Course usually offered in spring term
Also Offered As: BE 530, BIBB 585, NGG 594, PSYC 539
Activity: Lecture
1 Course Unit

PHYS 601 Introduction to Field Theory
Elementary relativistic quantum field theory of scalar, fermion, and Abelian gauge fields. Feynman Diagrams.
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PHYS 611 Statistical Mechanics
Course usually offered in fall term
Prerequisites: PHYS 401, 531, or equivalent
Activity: Lecture
1 Course Unit

PHYS 612 Advanced Statistical Mechanics
In depth study of classical and quantum lattice spin models, perturbation techniques, and the renormalization group.
Course not offered every year
Prerequisite: PHYS 611 or equivalent
Activity: Lecture
1 Course Unit

PHYS 622 Introduction to Elementary Particle Physics
Introduction to the phenomenology of elementary particles, strong and weak interactions, symmetries.
Course not offered every year
Prerequisite: PHYS 601
Activity: Lecture
1 Course Unit

PHYS 632 Relativistic Quantum Field Theory
Advanced topics in field theory, including renormalization theory.
Course not offered every year
Prerequisite: PHYS 601
Activity: Lecture
1 Course Unit

PHYS 633 Relativistic Quantum Field Theory
A continuation of PHYS 632, dealing with non-Abelian gauge theories.
Course not offered every year
Prerequisite: PHYS 632
Activity: Lecture
1 Course Unit

PHYS 661 Solid State Theory I
This course is intended to be an introductory graduate course on the physics of solids, crystals and liquid crystals. There will be a strong emphasis on the use and application of broken and unbroken symmetries in condensed matter physics. Topics covered include superconductivity and superfluidity.
Course not offered every year
Activity: Lecture
1 Course Unit

PHYS 662 Solid State Theory II
A continuation of PHYS 661.
Course not offered every year
Activity: Lecture
1 Course Unit

PHYS 696 Advanced Topics in Theoretical Physics
Course not offered every year
Activity: Lecture
1 Course Unit

PHYS 990 Masters Thesis
One-term course offered either term
Activity: Masters Thesis
1 Course Unit

PHYS 995 Dissertation
One-term course offered either term
Activity: Dissertation
1 Course Unit

PHYS 999 Independent Study
One-term course offered either term
Activity: Independent Study
1 Course Unit

Political Science (PSCI)

PSCI 009 Critical Writing Seminar in Political Science
This is a critical writing seminar. It fulfills the writing requirement for all undergraduates. As a discipline-based writing seminar, the course introduces students to a topic within its discipline but throughout emphasizes the development of critical thinking, analytical, and writing skills. For current listings and descriptions, visit the Critical Writing Program's website at http://writing.upenn.edu/critical.
For BA Students: Writing Requirement Course
Course not offered every year
Also Offered As: WRIT 076
Activity: Seminar
1 Course Unit

PSCI 010 Freshman Seminars
Freshmen seminars are small, substantive courses taught by members of the faculty and open only to freshmen. These seminars offer an excellent opportunity to explore areas not represented in high school curricula and to establish relationships with faculty members around areas of mutual interest. See www.college.upenn.edu/admissions/freshmen.php
One-term course offered either term
Also Offered As: AFRC 010, GSWS 010, LALS 107
Activity: Seminar
1 Course Unit
PSCI 105 The Study of Politics
This course introduces fundamental political questions, including the nature of political authority and political rights, the relationship between power and values, variation in the role and quality of government, origins of political institutions, and dynamics of international politics. Substantial consideration is given to contributions by classical political thinkers as well as contemporary political scientists. Attention is also paid to how the systematic study of politics – comparative politics, international politics, and political philosophy – can deepen our understanding of complex public policy questions.
For BA Students: Society Sector
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 107 Introduction to Data Science
Understanding and interpreting large, quantitative data sets is increasingly central in political and social science. Whether one seeks to understand political communication, international trade, inter-group conflict, or a host of other issues, the availability of large quantities of digital data has revolutionized the study of politics. Nonetheless, most data-related courses focus on statistical estimation, rather than on the related but distinctive problems of data acquisition, management and visualization - in a term, data science. This course seeks to address that imbalance by focusing squarely on the tools of data science. Leaving this course, students will be able to acquire, format, analyze, and visualize various types of political data using the statistical programming language R. This course is not a statistics class, but it will increase the capacity of students to thrive in future statistics classes. ENTERING THIS CLASS... students are expected to have a basic familiarity with computation. While no background in statistics, political science is required, students are expected to be generally familiar with contemporary computing environments (e.g., know how to use a computer) and have a willingness to learn a wide variety of data science tools.
Taught by: Hopkins
Course not offered every year
Activity: Recitation
1 Course Unit

PSCI 110 Introduction to Comparative Politics
This course is designed to introduce students to comparative political analysis. How can the political behavior, circumstances, institutions, and dynamic patterns of change that people experience in very different societies be analyzed using the same set of concepts and theories? Key themes include nationalism, political culture, democratization, authoritarianism, and the nature of protracted conflict.
For BA Students: Society Sector
One-term course offered either term
Also Offered As: PSCI 412
Activity: Recitation
1 Course Unit

PSCI 113 Intro To Decision Theory
For BA Students: Formal Reasoning and Analysis
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 115 Comparative Western European Politics
Comparative analysis of the political systems of Britain, France and West Germany, focusing on the making and implementation of public policy.
Taught by: Kennedy
One-term course offered either term
Activity: Lecture
1 Course Unit

PSCI 116 Political Change in the "Third World"
This is a comparative politics course that examines political and socio-economic change in the so-called "Third World" defined here as post-colonial developing areas in Asia, Africa and Latin America. The course is not as concerned with keeping up with current events as with analyzing the relationships between colonial legacies, the initial challenges of post-colonial political and socioeconomic development, and how these interact with contemporary problems and global trends. Although chiefly concerned with "political change" within countries, it will also devote substantial attention to economic, socio-cultural and international factors. The course is divided into three parts. The first examines the common and distinctive features of colonial rule in different regions as well as the varying challenges of political and economic development in diverse post-colonial settings. The second part focuses on elaborating on the themes developed in the first by looking more closely at the developmental experiences of Brazil, India, Algeria, Iran, Nigeria, and South Korea (with passing references to other countries as comparative referents). The third part focuses on trends and challenges that have emerged over the last two decades - including market reforms, democratization, and problems related to gender and the environment.
For BA Students: Society Sector
Taught by: Sil
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 130 Introduction to American Politics
This course is intended to introduce students to the national institutions and political processes of American government. What are the historical and philosophical foundations of the American Republic? How does American public policy get made, who makes it, and who benefits? Is a constitutional fabric woven in 1787 good enough for today? How, if at all, should American government be changed, and why? What is politics and why bother to study it? If these sorts of questions interest you, then this course will be a congenial home. It is designed to explore such questions while teaching students the basics of American politics and government.
For BA Students: Society Sector
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 131 American Foreign Policy
This course analyzes the formation and conduct of foreign policy in the United States. The course combines three elements: a study of the history of American foreign relations; an analysis of the causes of American foreign policy such as the international system, public opinion, and the media; and a discussion of the major policy issues in contemporary U.S. foreign policy, including terrorism, civil wars, and economic policy.
Taught by: Horowitz, Vitalis
One-term course offered either term
Activity: Recitation
1 Course Unit
PSCI 133 Introduction to African American Politics
This course is designed to provide an introduction to contemporary African American politics. We will examine how the underlying theory and structure of American political institutions affect African Americans' efforts to organize for effective political action. We will also analyze some of the political behaviors and strategies utilized by African Americans as they seek to impact the political system.
Course usually offered in fall term
Activity: Recitation
1 Course Unit

PSCI 134 United States Political Parties
This course is an analysis of parties in the United States, with special attention to democratic theory, the electoral process, electronic media, as well as political organizations and their influence on government decisions.
Course usually offered in spring term
Activity: Lecture
1 Course Unit

PSCI 135 The Politics of Food and Agriculture
Students will use course readings and their community service to analyze the institutions, ideas, interests, social movements, and leadership that shape the "politics of food" in different arenas. Service opportunities include work with the Urban Nutrition Initiative, Community School Student Partnerships, and the possibility of other placements as approved by the professors.
Taught by: Summers
Course not offered every year
Also Offered As: HSOC 135
Activity: Lecture
1 Course Unit

PSCI 136 Urban Politics in the United States
This course explores the political character of contemporary urban American life. Particular attention is given to the relationship between urban politics and policymaking – including the structural and ideological factors (e.g., dynamics of political economy, race, ethnicity, pluralism and gender) that constrain the policy context and shape the urban environment as a terrain for commingling, competition and conflict over uses of space. It makes considerable use of case studies to throw into relief the complex and sometimes subtle processes that shape urban life.
For BA Students: Society Sector
Taught by: Reed
Course usually offered in spring term
Also Offered As: AFRC 136, URBS 136
Activity: Lecture
1 Course Unit

PSCI 137 Politics Of Poverty & Development
This academically based community service seminar will explore the ideas and theories, alliances and opposition that have shaped policy and organizing efforts addressed to the problems associated with urban poverty in the United States. There will be a special focus on the issues of increasing inequality, education, low wage work, health and nutrition, welfare reform and social security. Students will evaluate contemporary policy debates and programs in the light of selected case studies, readings, and their own experience working with community groups, institutions, and federal programs in West Philadelphia.
For BA Students: Humanities and Social Science S
Taught by: Summers
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 138 Policymaking in the US
This course is an opportunity for students to combine the major theoretical perspectives on the policy process with practical application to current policy issues. Students will gain the theoretical tools to explain policy change, a comprehensive understanding of the actors that influence policymaking and politics, an overview of the major policy issues being debated, and experience writing policy documents.
Taught by: Martinez
Course usually offered in fall term
Activity: Seminar
1 Course Unit

PSCI 139 Introduction to International Relations
This course is an introduction to the major theories and issues in international politics. The goals of the course are to give students a broad familiarity with the field of international relations, and to help them develop the analytical skills necessary to think critically about international politics. The course is divided into four parts: 1) Concepts and Theories of International Relations; 2) War and Security; 3) The Global Economy; and 4) Emerging Issues in International Relations.
For BA Students: Society Sector
Taught by: Mansfield, Stanton
One-term course offered either term
Activity: Recitation
1 Course Unit
PSCI 151 International Security
This lecture course introduces students to the subfield of international security or strategic studies. In order to grasp the usefulness of the theoretical ideas presented in readings and lectures, abstract concepts are linked with a study of the national security policies states have adopted in the decades following World War II. Topics include current debates about nuclear proliferation, terrorism, the Iraq war, Europe’s changing international role, the rise of China, Asian “flashpoints” (Korea, the Taiwan Strait), and US security policy for the 21st century - considering some of the main strategic alternatives to the US as well as their implications for the types of forces deployed (the impact of the “revolution in military affairs,” the future of missile defense, and the economic burden to be shouldered).
Taught by: Goldstein
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 152 International Political Economy
This course examines the politics of international economic relations. The course will analyze the interplay between politics and economics in three broad areas: international trade, international finance, and economic development. In each section, we will first discuss economic theories that explain the causes and consequences of international commerce, capital flows, and economic growth. We will then explore how political interests, institutions, and ideas alter these predictions, examining both historical examples and current policy debates.
Taught by: Gray
Course not offered every year
Activity: Recitation
1 Course Unit

PSCI 153 International Law & Institutions
This lecture course examines the role that international law and institutions play in international relations. The course begins by exploring broad theoretical questions - questions about why states create international law and international institutions; how states design institutions; the impact that institutional design may have on the effectiveness of international institutions; and the conditions under which states are likely to comply with the rules set out by international institutions and the dictates of international law. Specific topics include collective security institutions such as the League of Nations, the United Nations, and NATO; human rights law; the laws of war; international intervention and peacekeeping; international justice and the International Criminal Court; environmental law; international trade law and the World Trade Organization; economic development and the World Bank; and international finance and the role of the International Monetary Fund.
Taught by: Stanton
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 154 Politics of Global Environment
This course explores the emerging politics of global ecological decay and restoration occurring at the individual, local, nation-state, and international levels.
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 155 Terrorism
This course is designed to stimulate an interest in the philosophy and methods of terrorism; to illustrate the varieties of conditions under which methods of terrorism are used; to outline the institutional conditions which permit and support the use of terrorism; and to understand the problems involved in "solving" the terrorism dilemma.
One-term course offered either term
Activity: Lecture
1 Course Unit

PSCI 156 Terrorism
This course will provide an overview of major figures and themes of modern political thought. We will focus on themes and questions pertinent to political theory in the modern era, particularly focusing on the relationship of the individual to community, society, and state. Although the emergence of the individual as a central moral, political, and conceptual category arguably began in earlier eras, it is in the seventeenth century that it takes firm hold in defining the state, political institutions, moral thinking, and social relations. The centrality of "the individual" has created difficulties, even paradoxes, for community and social relations, and political theorists have struggled to reconcile those throughout the modern era. We will consider the political forms that emerged out of those struggles, as well as the changed and distinctly "modern" conceptualizations of political theory such as freedom, responsibility, justice, rights and obligations, as central categories for organizing moral and political life.
For BA Students: History and Tradition Sector
Taught by: Hirschmann, Kennedy, Norton
Course not offered every year
Also Offered As: CLST 185
Activity: Recitation
0 Course Units

PSCI 180 Ancient Political Thought
Through reading texts of Plato (Socrates), Aristotle, Augustine and Aquinas, the student encounters a range of political ideas deeply challenging to--and possibly corrosive of--today's dominant democratic liberalism. Can classical and medieval thinking offer insight into modern impasses in political morality? Is such ancient thinking plausible, useful, or dangerous?

PSCI 183 American Political Thought
Whether America begins with the Puritans and the Mayflower Compact, or with the Declaration of Independence and the Revolution, it is founded in resistance to empire. In the generations between, Americans have desired, dreaded and debated empire. This course will focus on empire and imperialism in American political thought. We will read primary texts addressing empire: from the departure and dissent of the Puritans, and Burke’s Speech on Conciliation with the Colonies, to twentieth and twenty-first century debates over America’s role in the world. These texts will include political pamphlets and speeches, poetry, novels, policy papers and film.

PSCI 198 Selected Topics in Political Science
Consult department for detailed descriptions. More than one course may be taken in a given semester. Recent titles have included: The Analysis of Presidential Elections, Conservative Political Economy, and Political Geography.
One-term course offered either term
Activity: Seminar
1 Course Unit

PSCI 201 Politics, Society and Social Science
Everyday human behavior poses puzzles that political scientists, economists, sociologists, and other social scientists have attempted to answer. Often their respective answers or "theories" differ widely; and sometimes even their most widely agreed-upon answers seem to defy common sense or ask us to believe in highly improbable findings. This new lecture course familiarizes students with different approaches to understanding politics, society, and social science in relation to everyday questions, intriguing puzzles, and improbable findings about human behavior. It focuses on contemporary American politics and society, and draws mainly on literatures featuring work by leading U.S. social scientists. In addition, the course explores the conceptual boundaries between the political, social, and economic domains in which people interact with one another; the differences among and between different much-acclaimed models for understanding human behavior; and the philosophical underpinnings and moral implications associated with schools of thought about how best to describe, analyze, and evaluate what people do—and why they do it!
Taught by: Dilulio
Course usually offered in fall term
Activity: Recitation
1 Course Unit

PSCI 204 Political Participation
The course offers a broad understanding of the political tactics citizens implement to voice their policy preferences to government. This course introduces students to the mode, scope, and theoretical perspectives of political engagement. Analyzing political behavior that ranges from voting behavior to political protest, the course will address a variety of questions: Who engages in politics and why? What are the individual factors that hinder or facilitate engagement in the political arena? How have citizens political actions changed over time? While the course will mainly focus on the United States setting, it does offer a comparative perspective by considering political engagement in non-democratic regimes.
Taught by: Gillion
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PSCI 208 International Organizations in Latin America
International Organizations play a powerful role in mitigating conflict at the global level. What role do they play in solving problems related to global politics, economic development, corruption, inequality and civil society in Latin America? How much power, influence and control do they possess in the region? This course examines the role and impact of international organizations have had on Latin America since the mid-20th century. After a review of theoretical and methodological perspectives on the significance of IOs in international relations, students will examine the workings, issues and often controversies surrounding IOs in Latin America, including the IMF, World Bank, UN, OAS and ICC as well as regional organizations such as the Inter-American Court of Human Rights and area trade blocs and agreements of Mercosur, NAFTA and others. Students will also explore the regional impact of transnational civil society organizations, such as human rights organizations and the International Olympic Committee. Students will be invited to participate in the Washington Model OAS from April 10-17.
Taught by: Bartch
Also Offered As: LALS 208
Activity: Seminar
1 Course Unit

PSCI 210 Contemporary African Politics
This class provides an introduction to contemporary African politics. The core questions that motivate the course are (i) to what extent are political outcomes in contemporary Africa a consequence of its history, culture and geography? (ii) Why are state structures and institutions weaker in Africa than elsewhere? (iii.) What accounts for Africa's relatively slow economic growth? (iv.) Why have some African countries been plagued by high levels of political violence while others have not? (v.) What explains the behavior of key African actors: parties or politicians?
Taught by: Grossman

Also Offered As: AFRC 257, AFST 257
Activity: Lecture
1 Course Unit
PSCI 211 Politics in the Contemporary Middle East
This course is an introduction to the most prominent historical, cultural, institutional, and ideological features of Middle Eastern politics. Typical of the questions we shall address are why processes of modernization and economic change have not produced liberal democracies, why Islamic movements have gained enormous strength in some countries and not others, why conflicts in the region—between Israel and the Arabs, Iran and Iraq, or inside of Lebanon—have been so bitter and protracted; why the era of military coups was brought to an end but transitions to democracy have been difficult to achieve; why Arab unity has been so elusive and yet so insistently a theme; and why oil wealth in the Gulf, in the Arabian Peninsula, and in North Africa, has not produced industrialized or self-sustaining economic growth.

Activity: Recitation
1 Course Unit

PSCI 212 Japanese Politics
This course examines the politics and policies of contemporary Japan, applying a range of theoretical perspectives to analyze both recent history and current events. We will survey the core political institutions of the postwar era, examine patterns of political interaction, and investigate current debates over policy. The 1990s have been marked by political change at many different levels in Japan and the course will investigate the significance of these changes, as well as enduring continuities.
Recent changes have included the introduction of a new electoral system, shift from one party rule to coalition government rule, breaking the bureaucracy, a financial crisis and prolonged economic stagnation. In the latter part of the course, we will focus in particular on the puzzle of how Japan's political economic structures and policies could have proven so successful for so long and yet so disastrous of late. Throughout the course, students will be encouraged to think about Japanese politics in a comparative context and to consider the functioning of the Japanese political system in the context of more theoretical debates in political science.
Taught by: Amyx

1 Course Unit

PSCI 214 Political Economy of East Asia
This course examines the interplay between politics and economics in East Asia. A major course objective is to reconcile the region's past success with the difficulties experienced in many of these countries more recently. Another primary objective is to consider in what ways and to what degree the growth experiences of the high-performing economies in East Asia shed light on the prospects for long-term success of reforms currently underway in China and Vietnam. The first half of the course begins by exploring the causes and consequences of the rise of industrial Asia. The second half of the course examines the challenges to sustained growth faced by many countries in this region in recent years. The course concludes by examining the challenges faced by China and Vietnam today in their attempt to embrace more market-oriented economic systems.

Activity: Recitation
1 Course Unit

PSCI 216 Government and Politics of East Asia
The course will examine the relationship between culture, state, and economy of Japan, North Korea, and South Korea. It will also analyze the nature and workings of political institutions (including political parties and bureaucracy).
One-term course offered either term
Activity: Lecture
1 Course Unit
PSCI 217 Russian Politics
This course will present an in-depth examination of political, economic and social change in post-Soviet Russia within a historical context. After a brief discussion of contemporary problems in Russia, the first half of the course will delve into the rise of communism in 1917, the evolution of the Soviet regime, and the tensions between ideology and practice over the seventy years of communist rule up until 1985. The second part of the course will begin with an examination of the Gorbachev period and the competing interpretations of how the events between 1985 and 1991 may have contributed to the collapse of the Soviet Union.
We will then proceed to make sense of the continuities and changes in politics, economics and society in contemporary Russia. Important topics will include the confrontations accompanying the adoption of a new constitution, the emergence of competing ideologies and parties, the struggle over economic privatization, the question of federalism and nationalism, social and political implications of economic reform, and prospects for Russia's future in the Putin and post-Putin era.

1 Course Unit

PSCI 219 Contemporary Chinese Politics
This lecture course introduces students to the politics of the Peoples Republic of China. Complementing offerings in other departments, this course emphasizes events in the period since the Chinese Communist Party established its regime in 1949. In addition to surveying the political history of contemporary China, we will assess the meaning of these events by drawing upon theories about the nature and significance of ideology and organization in communist regimes, factionalism and its relationship to policy formulation and implementation, and general issues of political and economic development. Although the principal focus is on the domestic politics of the PRC, the course includes several lectures examining China's international relations.
Taught by: Goldstein
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 220 Comparative South Asian Politics
The comparative study of South Asian politics begins with many antecedent questions. What are the reasons why a strong national political identity in the Indian subcontinent was no consolidated and territorial boundaries defined until the advent of the British Raj?
Alternatively, given major regional diversities, why did the subcontinent not become differentiated into a large number of national states on the model of Europe? To what extent was the movement toward a unified territorial state weakened by colonial policies that recast social groups in terms of new pan-Indian categories based on caste and religious identities? What factors led to the partition of the subcontinent at the time of independence on the basis of religion, and what consequences did partition have for the strategies adopted by each state to develop an overarching national identity and universal principles of legitimate state power? Although the greater part of the course will address these questions by analyzing the social and political dynamics of democracy in India, they are equally relevant for understanding the difficulties encountered by Pakistan in defining a core identity and a stable form of government.
Taught by: Frankel
Course not offered every year
Activity: Lecture
1 Course Unit

PSCI 221 Comparative Health Politics
This course examines the relationship between politics and the health of populations in the world's rich democracies, including the United States. The key questions the course addresses are how and why countries differ in their health care policies, public health policies, and policies that affect the social determinants of health. There are no prerequisites, but prior coursework in comparative politics at the 100 or 200 level will be helpful.
Taught by: Lynch
Course not offered every year
Activity: Lecture
1 Course Unit

PSCI 223 Issues Comp Pol/Gender
Struggles over gender roles and rights have been prominent in the Middle East and North Africa since the 19th century and continue to mark contemporary political and social discourses. Since the colonial period, gender categories and sexualities have been critiqued and negotiated on behalf of empire, the nation, modernity, personal freedom; today debates and struggles over global rights, Islamic law, and modernity continue to mark politics. Despite the particularity of ideas and events in the region, a comparative framework helps to overcome exoticization of the region and develop a more acute understanding. The topics of the course include engagement with the discourse of the Exotic Other, the effects of modernity, the role of nationalism and the state, state-society negotiation, Islamic formulations, and continuously, the question: where does change come from? Issues of the veil and Islamic dress the expansion of anti-gay laws, the disciplining of bodies in state and social settings - these issues of gender and sexuality extend the realm of the political into intimate spaces. Assignments include a midterm and a short paper that develops research and analytical skills. The course is 200 level. While background in the study of the Middle East or gender is not necessary, an introductory political science or social science course is required.
Taught by: Harold
Course not offered every year
Also Offered As: GSWS 225
Activity: Seminar
1 Course Unit
PSCI 224 Political Economy of Development
The course surveys some of the principal themes in the political economies of lower income countries. The questions we shall seek to address cover a broad terrain. Who are the key actors? What are their beliefs, interests and motivations? What are their constraints? How are these being affected by closer economic linkages between national economies? While there is no single integrative framework or paradigm into which these themes neatly fit, a common thread is the changing dynamics and interplay between the local, the national, and the global. A familiarity with basic economic concepts will be helpful, but is not necessary.

PSCI 229 China’s Domestic Politics
This is an advanced course on the main issues of contemporary Chinese politics, economy and social change. There is a strong focus on the reform period (post 1978). We will spend considerable time and energy on understanding the major themes and challenges of China's reforms, including the political system, the legal system, the inequality, foreign direct investment, village elections, lawmaking, environmental degradation, social opposition, corruption, and religion. We also investigate the many political and social consequences of reform and changing landscape of Chinese politics. A prior course on Chinese politics (for example, PSCI219) is highly recommended.

Activity: Lecture
1 Course Unit

PSCI 233 Introduction to African American Politics
This course is an historical survey of the main bases and substances of politics among black Americans and the relation of black politics to the American political order. Its two main objectives are: 1) to provide a general sense of pertinent historical issues and relations as a way of helping to make sense of the present and 2) to develop criteria for evaluating political scientists’ and others’ claims regarding the status and characteristics of black American political activity.
Taught by: Reed
Course not offered every year
Activity: Lecture
1 Course Unit

PSCI 234 Changing American Electorate
In 1960, a Democratic candidate won a very narrow Presidential victory with just 100,000 votes; in 2000, the Democratic candidate lost but received 500,000 more votes than his opponent. Still, contemporary scholars and journalists have made a variety of arguments about just how much the American political landscape changed in the intervening 40 years, often calling recent decades a transformation. This course explores and critically evaluates those arguments. Key questions include: how, if at all, have Americans political attitudes and ideologies changed? How have their connections to politics changed? What has this meant for the fortunes and strategies of the two parties? How have the parties base voters and swing voters changed? What changes in American society have advantaged some political messages and parties at the expense of others? Focusing primarily on mass-level politics, we consider a wide range of potential causes, including the role of race in American politics, suburbanization, economic transformations, the evolving constellation and structure of interest groups, declining social capital, the changing role of religion, immigration, and the actions of parties and political elites. For three weeks in the semester, we will take a break from considering broader trends to look at specific elections in some depth.
Taught by: Hopkins
Course not offered every year
Activity: Recitation
1 Course Unit

PSCI 236 The Public Policy Process
This course introduces students to the theories and practice of the policy-making process. There are four primary learning objectives. First, understanding how the structure of political institutions matter for the policies that they produce. Second, recognizing the constraints that policy makers face when making decisions on behalf of the public. Third, identifying the strategies that can be used to overcome these constraints. Fourth, knowing the toolbox that available to participants in the policy-making process to help get their preferred strategies implemented. While our focus will primarily be on American political institutions, many of the ideas and topics discussed in the class apply broadly to other democratic systems of government.
Taught by: Levendusky, Meredith
Course usually offered in fall term
Activity: Recitation
1 Course Unit
PSCI 237 The American Presidency
This course surveys the institutional development of the American presidency from the Constitutional convention through the current administration. It examines the politics of presidential leadership, and how the executive branch functions. An underlying theme of the course is the tensions between the presidency, leadership, and democracy.
Taught by: Gottschalk
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PSCI 238 Congress
This course is designed to introduce students to the study of Congress and of legislative behavior generally. The course will examine legislative procedures, congressional institutions (committees, subcommittees, leadership structure), campaigns and elections, legislative behavior (voting, constituency service, policy leadership), and the policymaking environment (interest groups, executive branch, media). Particular emphasis will be placed on consideration of whether and how electoral concerns affect legislative behavior and the structure of congressional institutions. In addition, the course will consider congressional behavior within a broader context of representation. There are no prerequisites for this class, but students are expected to have at least a rudimentary understanding of American politics and government.

PSCI 251 Arab Israeli Relations
In this course the Arab-Israeli dispute from 1948 to the present will serve as a vehicle for understanding how domestic and global political processes interact to shape, contain, or aggravate Middle Eastern wars between states and non-state actors. Particular stress will be placed on understanding how wars affect international politics in states and political organizations and how ideological and structural features of states and organizations find expression in wars and complicate or enable the search for peace. In addition, the key features of the conflict will be interpreted as both a clash between the political interests of national and/or religious groups and as a reflection of global political power struggles. Attention will be given toward the end of the course to alternative ideas about possible resolution of the conflict as well as to the increasingly prominent argument that, in this case, there is no solution.

One-term course offered either term
Also Offered As: JWST 248
Activity: Recitation
1 Course Unit

PSCI 252 War, Strategy and Politics
This class examines the strategy and politics of warfare, focusing on the way actors plan military campaigns and the factors that are likely to lead to victory and defeat. The course readings center in particular on the factors driving changes in warfare and civil-military relations. The course will cover a wide range of topics from theories of war-fighting to historical military campaigns to insurgency warfare, terrorism, and the future of war.
Taught by: Horowitz
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 253 International Politics of the Middle East
This course will focus primarily on episodes of external intervention by Great Powers in the politics of Middle Eastern states. We shall begin by examining the emergence of the Middle Eastern state system after the disappearance of the Ottoman Empire in the early part of the 20th century. This discussion will provide opportunities to develop key concepts in the study of international politics and will serve as crucial historical background. We shall then turn our attention to the primary concern of the course - a systematic consideration of the motives, operational results, and long-term implications of a number of important examples of intervention by Great Powers in the Middle East. Among the episodes to be considered will be British policies toward the end of World War I, in Palestine in the 1930s, and, along with the French, in Suez in 1956. Soviet intervention in the first Arab-Israeli war, in 1948, will be analyzed along with Soviet policies toward Egypt in the early 1970s. American intervention in Iran in 1953 and in the Gulf War in 1991 will also be examined.
Taught by: Lustick
Course usually offered in spring term

Activity: Recitation
1 Course Unit

PSCI 254 Politics of the European Union
This course explores the political economy of European integration. It is organized in three parts: First, we analyze the political and economic forces that have driven the process of European integration since World War II. We review the milestones of European integration in historical perspective and discuss different theoretical perspectives explaining the path and outcome of European integration. Second, the course takes an in-depth look at the institutions and decision-making processes of the European Union (EU). It analyzes the structure and operation of the Council of Ministers, the European Commission, the European Parliament, and the European Court of Justice, and explores how these institutions interact to shape EU policy. Third, we examine EU policymaking in key policy areas, including regulatory policies, redistributive politics, economic and monetary affairs, and external relations.

Activity: Lecture
1 Course Unit
PSCI 255 The Causes of War & Peace
The existence and endurance of war provides one of the most important puzzles of politics: why is it that people keep making use of such a destructive and painful way of resolving their disputes? This course addresses this question and the related question of what factors contribute to peace, focusing on both academic and popular explanations for conflict, including among others anarchy, over-optimism, shifting power, diversionary war, the malevolent influence of war profiteers, and a variety of explanations grounded in culture, religion and other ideational variables. In this discussion, we will focus on both interstate and civil wars, and on both the onset and the eventual termination of war. At various points in the course we will discuss a wide range of historical and contemporary cases, including the World Wars, Vietnam, the Gulf War, the Iraq War, the various Arab-Israeli wars, the India-Pakistan rivalry, and a number of recent civil conflicts such as the wars in Yugoslavia, Congo, and Sudan. The course concludes with a discussion of strategies for managing ongoing conflicts and for securing peace in post war settings.

Activity: Recitation
1 Course Unit

PSCI 256 International Relations of the United States and Asia
This course is one of the first arising out of scholarship on cold war international history. It draws on declassified government documents and other archival records to provide a window into the world-view of decision-makers who need to make national security policy based on incomplete information about ambiguous threats. The materials reveal a great deal about the importance of divergent historical perspectives and strategic cultures in the foreign policy-making process. The main focus of the course is on the intersection of the cold war and the rise of Asian nationalism. At the core of the analysis is the clash between America’s global strategy of military containment against the Soviet Union and the assertion of Indian, and Chinese nationalism, concerned with preventing the United States from succeeding to Great Britain's imperial rule. The course examines new patterns of power after the Cold War, especially the emergence of two major powers in Asia - China and India - and the issues raised by the U.S. unilateralist use of military power to preserve its predominant position.

One-term course offered either term
Activity: Lecture
1 Course Unit

PSCI 257 International Relations of South Asia
One of the great accidents of history is the Partition of the subcontinent into the two states of India and Pakistan, and the onset of the cold war as a global struggle between the United States and the Soviet Union. Indo-Pakistan wars over Kashmir, the dismantling of Pakistan by India and the creation of Bangladesh, Pakistan's support for Al Qaeda and other terrorist groups, and the acquisition by both countries of nuclear arsenals has marked the region as potentially the most dangerous area in the world. This course analyzes the changing security environment from 1947 until the present including the involvement of the United states, Soviet Union/Russia and China, and assesses the prospects for averting chaos in greater South Asia.

Taught by: Frankel
One-term course offered either term
Activity: Lecture
1 Course Unit

PSCI 258 International Human Rights
What exactly should be considered a fundamental "human right"? What is the basis for something is a fundamental human right? This course will examine not only broad conceptual debates, but will also focus on specific issue areas (e.g., civil rights, economic rights, women's rights), as well as the question of how new rights norms emerge in international relations.

1 Course Unit

PSCI 259 Chinese Foreign Policy
This seminar examines the influences on and patterns of China's international relations. Topics to be covered include the following: theoretical approaches to analyzing foreign policy; the historical legacy and evolution of China's foreign policy; contemporary China's foreign policy on traditional national security concerns as well as economic, environmental, and humanitarian issues; China's military modernization; China's foreign policy in Asia, Africa, Europe, and Latin America; China's rise and its implications for relations with the United States. The class is a seminar in which student preparation and participation will essential. Students planning to enroll in the course must have taken PSCI 219 (or, with the instructor's permission, its equivalent). You are expected to complete all required readings each week and come to seminar meetings prepared to discuss them.

Taught by: Goldstein

PSCI 271 Constitutional Law: Public Power & Civil Rights to 1912
This course explores the creation and transformations of the American constitutional system's structures and goals from the nation's founding through the period of Progressive reforms, the rise of the Jim Crow system, and the Spanish American War. Issues include the division of powers between state and national governments, and the branches of the federal government; economic powers of private actors and government regulators; the authority of governments to enforce or transform racial and gender hierarchies; and the extent of religious and expressive freedoms and rights of persons accused of crimes. We will pay special attention to the changing role of the Supreme Court and its decisions in interpreting and shaping American constitutionalism, and we will also read legislative and executive constitutional arguments, party platforms, and other influential statements of American constitutional thought.

Taught by: Smith
One-term course offered either term
Also Offered As: AFRC 269, PPE 270
Activity: Recitation
1 Course Unit
**PSCI 272 American Constitutional Law II**
This course examines American constitutional development from the eve of WWI through the second Obama administration. Topics include the growth of the New Deal and a Great Society regulatory and redistributive state, struggles for equal rights for racial and ethnic minorities, women and GLBT Americans, contests over freedoms of religion and expression, criminal justice issues, the Reagan Revolution and the revival of federalism and property rights, and issues of national security powers after September 11, 2001. Lectures are on videos and class time is devoted to in-depth discussions.
Taught by: Smith

**PSCI 275 Muslim Political Thought**
This seminar offers an introduction to Muslim political thought. Chronologically the course ranges from the medieval period to the present. Particular attention will be given in the later part of the course to the renaissance of Muslim political thought in recent years and to the development of political Islam, including the work of such thinkers as Said Qutb and Hasan Turabi. We will also study the roots of this renaissance in classical philosophy of the medieval period (Al Farabi, Al Ghazali, Ibn Khaldun, Ibn Tufayl) and the liberal age.
Taught by: Norton

**PSCI 280 Feminist Political Thought**
This course is designed to provide an overview of the variety of ideas, approaches, and subfields within feminist political thought. Readings and divided into three sections: contemporary theorizing about the meaning of "feminism"; women in the history of Western political thought; and feminist theoretical approaches to practical political problems and issues, such as abortion and sexual assault.
For BA Students: Society Sector
Taught by: Hirschmann
Course not offered every year
Also Offered As: GSWS 280
Activity: Lecture
1 Course Unit

**PSCI 282 Lying, Cheating, Stealing, and Killing: How to Think About Professional Ethics**
Professionals - in business, medicine, law, and politics - face myriad ethical dilemmas in their daily work life that challenge, and sometimes conflict with, the moral commitments that guide their everyday life. This course systematically examines the ethical dimensions of these four professional roles, asking questions such as: Are there limits to what we should sell? How far should competitors go to "win"? Who should get ventilators in a flu pandemic? Is it morally permissible for physicians to assist in suicide? Should lawyers represent terrorists or child killers? How far does attorney-client privilege go? Is it morally justifiable to torture enemy combatants? Should politicians lie?
Taught by: Allen/Emanuel/Hirschmann/Strudler
Also Offered As: BIOE 282
Activity: Lecture
1 Course Unit

**PSCI 298 Selected Topics in Political Science**
Consult department for detailed descriptions. More than one course may be taken in a given semester. Recent titles have included: Leadership & Democracy; Conservative Regimes.

Activity: Seminar
1 Course Unit

**PSCI 312 Democracy in Africa**
In this course, we will examine the impact of historical context, leadership, constitutionalism, political parties, civil society, economic reform, regime legitimacy, and the international community of the democratic transition process in sub-Saharan Africa. Specific country case studies will be examined both comparatively and regionally, given the increasingly interdependent nature of political and economic transition on the continent. The goal of the seminar is to provide students with the tools necessary to understand the democratic transition process in Africa in a way that is also relevant to other regions in the world.
Course not offered every year
Activity: Seminar
1 Course Unit

**PSCI 314 Democracy in Latin America**
Since the inception of the twenty first century, Latin America has undergone major economic, social, and political transformations. Many of the neoliberal policies of the last quarter of the twentieth century were reversed or revisited, economic inequality decreased significantly across the region, and anumber of governments turned to the left of the political spectrum, often instituting major public policy and constitutional reforms. How have those changes affected citizenship and democracy in the region? In particular, have citizens' channels for representation and participation changed in the recent past? What has happened to local participatory institutions since the return to the right in some countries of the region? The course will explore these and related questions. Students will develop their own research projects throughout the semester.
While not a requirement, the ability to read Spanish or Portuguese will significantly enhance students' learning experience.

1 Course Unit

**PSCI 320 Who Gets Elected and Why? The Science of Politics**
What does it take to get elected to office? What are the key elements of a successful political campaign? What are the crucial issues guiding campaigns and elections in the U.S. at the beginning of the 21st century? This class will address the process and results of electoral politics at the local, state, and federal levels. Course participants will study the stages and strategies of running for public office and will discuss the various influences on getting elected, including: Campaign finance and fundraising, demographics, polling, the media, staffing, economics, and party organization. Each week we will be joined by guest speakers who are nationally recognized professionals, with expertise in different areas of the campaign and election process. Students will also analyze campaign case studies and the career of the instructor himself. Edward G. Rendell is the former Mayor of Philadelphia, former Chair of the Democratic National Committee, and former Governor of Pennsylvania.

PSCI 335 Healthy Schools
This Fox Leadership and academically based community service seminar will use course readings and students’ own observations and interviews in their service learning projects in West Philadelphia schools to analyze the causes and impact of school health and educational inequalities and efforts to address them. Course readings will include works by Jonathan Kozol, studies of health inequalities and their causes, and studies of No Child Left Behind, the CDC’s School Health Index, recess, school meal, and nutrition education programs. Course speakers will help us examine the history, theories, politics and leadership behind different strategies for addressing school-based inequalities and their outcomes. Service options will focus especially on the West Philadelphia Recess Initiative. Other service options will include work with Community School Student Partnerships and the Urban Nutrition Initiative.

PSCI 338 Statistical Methods PSCI
The goal of this class is to expose students to the process by which quantitative political science research is conducted. The class will take us down three separate, but related tracks. Track one will teach some basic tools necessary to conduct quantitative political science research. Topics covered will include descriptive statistics, sampling, probability and statistical theory, and regression analysis. However, conducting empirical research requires that we actually be able to apply these tools. Thus, track two will teach how to implement some of these basic tools using the computer program Stata. However, if we want to implement these tools, we also need to be able to develop hypotheses that we want to test. Thus, track three will teach some basics in research design. Topics will include independent and dependent variables, generating testable hypotheses, and issues in causality. Students are expected to have one semester of Calculus or permission of instructor. The class satisfies the College of Arts and Science Quantitative Data Analysis requirement.

Also Offered As: AFRC 417
Activity: Lecture
1 Course Unit

PSCI 413 Evidence Based Policies of Economic and Political Development
This class provides a "hands-on" introduction to the promises and limitations of using Randomized Control Trials (RCTs) to inform policy makers, practitioners, and academics of the conditions under which policies likely would have a positive effect on economic and political outcomes, in the context of international development. This course has three parts: the first is devoted to understanding the "nuts and bolts" of running field experiments / RCTs in developing countries.
In part, we will be reading Glennester and Takavarasha's Running Randomized Evaluations: A Practical Guide. In addition, we will discuss core behavioral concepts from both behavioral economics and social psychology (prospect theory). The second part of the course will be devoted to demonstrating how schools have used RCTs to inform core policy debates (e.g. What are some effective ways to reduce corruption? How can we improve the performance of frontline service providers? How can politicians be more responsive to their constituents?) In the third part, students will be presenting their own research proposals, explicitly designed to address either a core policy question in the developing world or--for those interested--in the USA. Here students will have an opportunity to partner with the Social and Behavioral Sciences Team (https://sbst.gov), which is under the National Science and Technology Council.

PSCI 418 Evolution, Politics and Computer Simulation
In this course we shall explore how recent developments in evolutionary theory relate to larger questions raised by students of complexity and complex adaptive systems. We shall study how they together provide a basis for important critiques of standard approaches in political science and enable fascinating and powerful understandings of politics and political phenomena – including national identity and identity change, state formation, revolution, globalization, and leadership. An important vehicle for the application of these insights for understanding politics is computer simulations featuring agent-based modeling. Students will use "PS-I" an agent based computer simulation platform, to develop their own models, conduct experiments, test hypotheses, or produce existence proofs in relation to popular theoretical positions in contemporary political science. No knowledge of computer programming is required.
Taught by: Lustick
One-term course offered either term

Activity: Seminar
1 Course Unit
PSCI 419 Democ & Decentralization
Are decentralization reforms fostering local community participation and improving the quality of democracy in Latin America? Are they, instead, posing a threat to democracy and development? In the last thirty years, Latin American countries have undergone major reforms that devolved fiscal resources, administrative responsibilities, and political authority from the central governments to the states and municipalities. These decentralization reforms have radically altered the political landscape in Latin America, even in the countries that have since then tried to recentralize power, such as Venezuela. What were the main causes of the decentralization movement? Who were the main national and international actors who pushed forward these reforms? What have the main political, fiscal, and policy consequences of decentralization been? These are some of the questions this course will focus on. The experiences of decentralization in Argentina, Brazil, Colombia, Bolivia, Venezuela, and Mexico will be studied. Although prior knowledge of Latin American politics is not required, additional readings will be assigned to the students who have not taken at least one introductory course in Latin American politics, history or cultures.

1 Course Unit

PSCI 436 Political Psychology
How do campaign advertisements influence voters’ perceptions and behavior? What roles do emotions play in politics? Do we all harbor some measure of racism, sexism, or homophobia, and what role do these stereotypes play in political behavior? How and why do ideologies form, and how does partisanship influence the way that voters understand the political world? How do people perceive threat, and what are the psychological consequences of terrorism? These questions, and many others, are the province of political psychology, an interdisciplinary field that uses experimental methods and theoretical ideas from psychology as tools to examine the world of politics. In this course, we will explore the role of human thought, emotion, and behavior in politics and examine the psychological origins of citizens' political beliefs and actions from a variety of perspectives. Most of the readings emphasize politics in the United States, though the field itself speaks to every aspect of political science.
Taught by: Margolis
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 437 Race & Criminal Justice
Why are African Americans and some other minority groups disproportionately incarcerated and subjected to penal sanctions? What are the political, social and economic consequences for individuals, communities, and the wider society of mass incarceration in the United States? What types of reforms of the criminal justice system are desirable and possible? This advanced seminar analyzes the connection between race, crime, punishment, and politics in the United States. The primary focus is on the role of race in explaining why the country’s prison population increased six-fold since the early 1970s and why the United States today has the highest incarceration rate in the world. The class will likely take field trips to a maximum-security jail in Philadelphia and to a state prison in the Philadelphia suburbs.

PSCI 470 Executive Power in Metropolitan American Politics
Focusing on presidents, governors, and big-city mayors, this course will explore a wide range of historical and recent examples of executive leadership and decision-making. How do their actions in office shape and get shaped by long-term historical and political forces? How and why do executive office holders use (and occasionally abuse) their power? What opportunities exist to transform both policy and public opinion? What kinds of constraints circumscribe the options available and limit the impact of executive choices? Exploring presidents such as Franklin Roosevelt, Lyndon Johnson and Barack Obama, governors including Ronald Reagan, Nelson Rockefeller and Bill Clinton and mayors like Richard Daley, Sr. and Jr., Ed Koch, and Ed Rendell, this course at once examines the personalities and predilections of individuals as well as the political ideas and institutions that shape their time in office. Registration in this course is by permission of the instructors only. To seek a permit for the course please provide a short personal statement of not more than one page with the following information: your name and contact information; your year; your major; other courses you have taken on related subjects; how this course would fit into your larger academic and intellectual development; any other personal or extenuating circumstances you think it would be useful for us to know about you. Email personal statements to Peter Siskind (siskind@sas.upenn.edu) no later than April 3 and enrollment decisions will be made by April 18.
Taught by: Rendell; Siskind

Activity: Seminar
1 Course Unit

PSCI 481 Political Theory & Public Policy
This course will explore the relevance of canonical work in modern political theory - Locke, Kant, Mill, and Marx - to various public policy and practical political issues. We will consider what political philosophy has to contribute to practical issues: not only what philosophy can tell us about the ethics of practical issues, but also how public policy makers might utilize political philosophy to create better policy. We will also explore whether and how reading political philosophy in light of specific concrete issues encourages us to look at both the theories and the policies differently than if each were considered on their own.
Taught by: Hirschmann
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 484 Meaning of Democracy
This course provides a broad, humanistic survey to some of the most important ideas, debates, and problems connected to the study of democracy. The course is divided into three segments: the democratic citizen (in which we explore ethical issues pertaining to the experience of democracy as a way of life); the democratic People (in which we investigate some of the best and most recent attempts to come to grips with the difficult, yet fundamental, notion of the People); and the democratic world (in which we examine issues pertaining to democratization and development, including the tension between democracy and individual liberty and the relationship between democracy and global capitalism).

PSCI 497 Political Science Honors
This is a mandatory seminar for all students planning to submit an honors thesis for the purpose of possibly earning distinction in Political Science upon graduation. The course is aimed at helping students identify a useful and feasible research question, become familiar with the relevant literatures and debates pertaining to that question, develop a basic understanding of what might constitute "good" and "original" research in different subfields, and set up a plan for conducting and presenting the research. The course is also aimed at building a community of like-minded student researchers, which can complement and enrich the honor student's individual experience of working one-on-one with a dedicated faculty thesis advisor. Students apply in the spring of their junior year for admissions to the honors program and enrollment in PSCI497.

Activity: Seminar
1 Course Unit

PSCI 505 The American Legislative Process
The theory of legislative process with a focus on the American Congress and its antecedents. The evolution of legislative rules will be stressed. The evolution will be used to analyze Congressional "reform." The course format is a combination of lectures, discussions, and guest speakers.
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 510 Electoral Systems
This course examines alternative arrangements by which democracies choose leaders, representatives, and governments through competitive elections. Some of the material is also relevant to voting on policies in legislatures, committees, and referendums. The treatment is comparative and theoretical, but students may focus on particular systems through reports and papers.
Taught by: Nagel
Course not offered every year
Activity: Seminar
1 Course Unit
PSCI 511 Society and Politics in India
This course examines the experience of representative democracy in India and the country’s development record in a historical framework. It will ask questions such as: How did representative democracy emerge in India, and what explains its persistence? What are the sources of its vulnerability? What kind of a sense of nationhood does this democratic experience rest upon? What are the exclusions built into this conception of nationhood? What is the relationship between India’s development experience and its democratic experiment? How have India’s “traditional” institutions adapted or failed to adapt to modern circumstances? Why has India performed well in certain economic sectors even while its record in providing basic social services has been dismal? How have the Indian State and its public institutions managed and coped with these changes? And how has India’s self-perception about its place in the world changed in recent years, and what are its implications?
Taught by: Kapur, Frankel

Activity: Seminar
1 Course Unit

PSCI 514 Political Economy of East Asia
This course begins by exploring the causes and consequences of the rise of industrial Asia, paying particular attention to the role played by political institutions. It then examines the political economic challenges faced in recent years by many countries in this region. What explanations may be given for the rapid growth experienced in the region? And, how can we reconcile the success of the past with the difficulties experienced in more recent years? The role of national financial systems in supporting or undermining growth and the politics of financial crisis management and financial system reform will be explored in depth.

1 Course Unit

PSCI 517 Russian Politics
This course will present an in-depth examination of political, economic and social change in post-Soviet Russia within a historical context. After a brief discussion of contemporary problems in Russia, the first half of the course will delve into the rise of communism in 1917, the evolution of the Soviet regime, and the tensions between ideology and practice over the seventy years of communist rule up until 1985. The second part of the course will begin with an examination of the Gorbachev period and the competing interpretations of how the events between 1985 and 1991 may have contributed to the collapse of the Soviet Union. We will then proceed to make sense of the continuities and changes in politics, economics and society in contemporary Russia. Important topics will include the confrontations accompanying the adoption of a new constitution, the emergence of competing ideologies and parties, the struggle over economic privatization, the question of federalism and nationalism, social and political implications of economic reform, and prospects for Russia’s future in the post-Yeltsin era. This course may also be taken as a graduate seminar (PSCI 517) with the permission of the instructor and the completion of additional requirements.

PSCI 552 Game Theory
This course provides an introduction to non-cooperative game theory and its applications to political science. The goal of the course is to provide students with the background and understanding necessary to read published game-theoretic work in political science journals. To that end, the course covers the basic concepts of game theory, including Nash equilibrium and its main refinements, simultaneous and sequential games, repeated games, evolutionary game theory, and games of incomplete and private information. In addition, we will cover some of the central models used in political science, notably models of public choice (such as the median voter theorem) and models of bargaining.

1 Course Unit

PSCI 557 Politics of the Soviet Successor States and Eastern Europe
This course is an advanced research seminar on Soviet and post-Soviet politics. Students will be expected to develop and complete a substantial research paper. Class sessions will center on recent developments in the study of the politics of Russia and other Soviet successor states and on student presentations of research in progress.
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 558 Human Rights
This course will examine the theoretical, historical and political foundations of contemporary human rights debates. The course will cover not only broad conceptual issues, but also specific issue areas (e.g., civil rights, economic rights, women’s rights, business and human rights), as well as the question of how new rights norms emerge and diffuse in the international arena. The course is open to students in the Master of Liberal Arts Program, as well as students who are actively pursuing the Graduate Certificate in Interdisciplinary Studies in Global Human Rights.
Taught by: Doherty-Sil
Also Offered As: PSCI 258
Activity: Recitation
1 Course Unit

PSCI 560 The Organization of World Politics
This course examines the organizational features of international life. Instead of focusing on one or several international organizations by means of an institutional analysis the scope of this course is more analytical; it explores the role of norms in structuring interactions (informal organizations) as well as the organizational designs of formal international organizations.
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 566 Government and Politics of East Asia
This course will explore the changing character of the state in Japan and Korea (North and South), and its relationship with the society and economy. The nature of politics in these countries will be studied through political parties, pressure groups, and elections? Questions explored will include the following: "Who governs?" How does the state in Japan and Korea differ from those in Western nations? How did the state in these countries evolve and how did its relationship with the society evolve? What role did the state play in developing respective economies?
One-term course offered either term
Activity: Seminar
1 Course Unit
PSCI 567 East Asian International Relations
This course will begin with an examination of the changing context of East Asian International Relations & will survey the foreign policy strategies employed by the United States, the Soviet Union, China, Japan and Korea since the turn of the century. This will be followed by analyses of interaction among these countries. What were the forces, assumptions and motives behind each strategy? Who chose the policy and why? How effective were various strategies? What are the problems underlying various sets of relationships now? Who makes the decisions, and under what domestic and foreign environment? What are the future prospects?

Significant contributions to political philosophy in the twentieth century. This course will alternate with PSCI 581.
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 582 Gender Power and Feminist Theory
This seminar will take up some of the "foundational" texts in contemporary feminist theory as well as some of the newest work, to explore the ways in which power operates through gender and sex. Subsidiary themes that will be developed include: the still relevant modernism/postmodernism debate as it relates to feminism; the intersectionality of race, gender, sexuality and class; and how feminists can and do talk about "women"; the role of "the body" in relation to social constructivism; the relevance of feminist theory to policy issues, and which theoretical approaches are the most appropriate or have the most powerful potential. Room will be left on the syllabus for student input into the readings. This course is open to undergraduates who have had some prior course work in GSWS and/or political theory; undergraduates are advised to contact the professor to discuss their preparation before enrolling.
Taught by: Hirschmann

PSCI 583 American Political Thought
A consideration of one or a few topics, individuals, or eras in American political thought.
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 584 Political Philosophy
An examination of basic theoretical problems of political science divided into three parts. First, specific features of social sciences will be examined and three most important general orientations of social sciences (analytical, interpretative and critical) will be compared and analyzed. Second, basic concepts of social and political sciences will be studied: social determination, rationality, social change, politics, power, state, democracy. Third, the problem of value judgments will be considered: Is there a rational, objective method for the resolution of conflicts in value judgments? Is morality compatible with politics?

One-term course offered either term
Activity: Seminar
1 Course Unit

PSCI 600 International Relations Theory
This purpose of this course is two-fold. First, the survey course is designed to introduce students to a wide range of theories of international politics. During the course of the semester we will examine neo-realism, power transition theory, hegemonic stability theory, the modern world system, international regimes and interdependence, the democratic peace, bureaucratic politics, organizational theory, constructivism, and decision making theory. Second, the course will sharpen students' research design skills. The written assignments require students to take the often abstract theories presented in the readings and develop practical research designs for testing hypotheses derived from the theories. The papers will not include data collection or the execution of actual tests. Rather, they will focus on the conceptual problems of designing tests which eliminate competing hypotheses, operationalizing variables, and identifying potential sources of data. Student's grades will be based on five short research designs and discussion leadership.

1 Course Unit

PSCI 610 Comparative Political Analysis
This seminar is aimed primarily at graduate students planning to take doctoral exams in comparative politics. It provides a critical survey of the field of comparative politics, tracing the intellectual history of the field, examining shifts in conceptual frameworks and research traditions, and comparing alternative methodological approaches. The first half of the course generally examines how processes of political, economic, and social change have been theorized in the social sciences from the mid-19th century to the present. In this process, particular attention is paid to the bifurcation between theories that emphasize the "universal" (e.g. the homogenizing effects of specific processes or variables) and the "particular" (e.g. the persistence of distinctive historical legacies and trajectories). Since this bifurcation is reinforced by distinct styles and methods of research, the seminar also probes the recent battles between rational-choice, cultural, and structuralist scholars, while considering the trade-offs between varieties of formal, quantitative, and qualitative methods. In the second half, the focus shifts to the range of substantive problems investigated by scholars in the field of comparative politics. These topics cover the complex relations among nations, states and societies; the origins, consolidation, and patterns of democratic governance; political economy in relation to development processes and social policies; the intersection of international/global economy and domestic politics; the dynamics of revolutions and social movements; and alternative problematiques constructed from the point of view of real actors such as workers, women, and local communities. In all cases, As a whole, the course is designed to provide an introduction to important issues and debates that comparativists have regularly engaged in; to help you understand the assumptions behind; and differences between, particular approaches, methods, and styles of research; to examine whether current debates are spurring new or better research in a given field in light of past approaches; and to gauge whether there has been progress, fragmentation, or stagnation in the field of comparative politics as a whole.

1 Course Unit

PSCI 614 Political Identity & Political Institution
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 615 Political Economy of Development
This course examines the debate in development studies arising from recognition that economic models, theories, methods, and strategies abstracted from the specific experience of western societies and cultures do not have general applicability. A broader social science approach is adopted, one which emphasizes the need to understand the social structures and cultures of the developing countries, the capabilities of weak versus strong states, and the links with the international system that influence transformative processes to which industrializing economies are subjected. The readings offer an overview of the most influential theories of development and underdevelopment that structured debate from the 1960's through the 1990's, and focus on the elements of these approaches that advance understanding of development and stagnation in several key countries, including Brazil, Mexico, India and selected countries in East and Southeast Asia.

Activity: Seminar
1 Course Unit

PSCI 616 Financial Statecraft
This graduate level seminar explores the evolving political dynamics of 'FINANCIAL STATECRAFT'. We will examine the relationship between financial flows and traditional foreign policy concerns, seeking to understand why and how governments have attempted to harness or constrain financial markets and institutions in the service of foreign policy goals. Specific topics include the introduction of capital flow guarantees or restrictions, imposition of financial sanctions on non-state actors, underwriting of foreign debt in currency crises, currency unions and other forms of currency cooperation, and foreign exchange reserve management.

Activity: Seminar
1 Course Unit

PSCI 618 International Political Economy
Examination of the relationship between the international, political, and economic systems from a variety of theoretical perspectives that have emerged in the postwar period, including liberalism, transnationalism, statism, Marxism, and dependency.
Taught by: Mansfield
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 619 Strategic Studies Seminar
This seminar offers graduate students an introduction to the subfield of international relations labeled strategic studies (or security studies). In addition to exploring key theoretical issues, we consider their usefulness for understanding relevant events in international politics since World War II. Although the course emphasizes the distinctive features of great power strategy in the nuclear age, we also look at the continuing role of conventional forces, the strategic choices of lesser powers, and selected security problems in the post-Cold War world (e.g., proliferation, terrorism).

Course not offered every year  
Activity: Seminar  
1 Course Unit  

**PSCI 623 The Politics of Gender**  
This is a course on the categories and construction of gender, sex and sexuality. The literature is so vast, the debate so vigorous, and the changing shape of thought so rapid that the absurdity of the pretense to provide a "comprehensive" or a "definitive" account is more than usually evident. The course foregrounds works that put gender, sex and sexuality - and with them the subject - in question. One set of works is drawn from political and feminist theory and includes writings by Judith Butler, Jacques Lacan, Guy Hocquenham, Monique Wittig, and Nancy Fraser. Through the use of works from comparative politics and cultural studies, the interrogation of the sexual subject reveals itself as an interrogation of political economies and political institutions. This aspect of the course addresses the question of gender in relation to race, class, and diverse political situations, including those of colonialism and liberalism, welfare policy and immigration law.

**PSCI 631 American Political Development**  
Analyzes important patterns of continuity and change in American politics by examining the development of the American State from a comparative and historical perspective. Covers issues and debates central to not only the subfield of American politics, but also the discipline of political science more broadly. These include the role of the state, political culture, interests, ideas, and institutions in political development, and the role of history in political analysis. Open to advanced undergraduates with the permission of the instructor.  
Taught by: Gottschalk  
One-term course offered either term  
Activity: Seminar  
1 Course Unit  

**PSCI 633 Hegemonic Analysis: Theories and Applications**  
An important strain within contemporary political science has been the attempt to explain how power is exercised through the manipulation or exploitation of consciousness, habits, and cultural predispositions. One of the key concepts in the study of these issues is that of "hegemony" -- the establishment of particular beliefs as commonsensical presumptions of political life. In this course that notion will be systematically explored. Of particular interest will be how authors who conduct hegemonic analysis cope with the problem of analyzing the effect of what the objects of their analysis, by definition, do not and, in some sense, cannot, think about. Illustrations of hegemonic phenomena and attempts to analyze them will be drawn from a variety of fields, such as political theory, historiography, comparative politics, American politics, rational choice theory, agent based modeling, and epistemology.

PSCI 693 Research Methods in Political Science
An introduction to the design and execution of research to generate information about the nature and behavior of political actors, organizations and systems. Techniques covered include unobtrusive measures, case studies, direct observation, experimentation, content analysis and survey research. Historical and interpretive approaches may also be covered.
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 694 Advanced Research Method
The purpose of this class is three-fold. First, the course is designed to introduce students to a wide range of statistical models (e.g., event count models, limited dependent variables, and survival analysis) as well as problems associated with statistical research (e.g., heteroscedasticity, autocorrelation, and selection bias). Second, the course is designed to give students practical experience in data analysis. Students will complete a number of assignments using a wide variety of well know data sets (e.g., Polity III, World Value Systems, National Election Studies, Democratic and Local Governance, Correlates of War, Militarized Interstate Disputes, International Crisis Behavior, Penn World Tables, General Social Survey, United Nations Crime Survey). Third, the course will explore the relationship between qualitative and quantitative analysis. Requirements will include weekly assignments, discussion leadership, and a final paper. While PSCI692 is not a prerequisite for this course, some prior exposure to statistical analysis (including regression) is recommended.
One-term course offered either term

Portuguese (PRTG)

PRTG 110 Elementary Portuguese I
Portuguese 110 is a first-semester introductory language course for students who have not studied Portuguese before, or who have had very little exposure to the language. The course will emphasize the development of foundational reading, writing, listening and speaking abilities within a cultural context. Students will participate in paired and group activities designed to elicit meaningful and accurate exchanges of information. The course will introduce students to Portuguese and Lusophone culture through a variety of authentic materials, including texts, songs, films and other audio and video material. Classes will be conducted in Portuguese.
For BA Students: Language Course
Course usually offered in fall term
Activity: Seminar
1 Course Unit

PRTG 114 Portuguese for Spanish Speakers
Portuguese 114 is designed for students who have studied Spanish. The course begins with exposure to basic vocabulary and structures, advancing at an accelerated pace. Classroom activities will emphasize pronunciation, spoken production as well as language structures and vocabulary. Students will participate in pairs, small-groups and whole-class activities that focus on the meaningful and accurate exchange of information. The class will be conducted in Portuguese.
For BA Students: Language Course
One-term course offered either term
Activity: Seminar
1 Course Unit
PRTG 120 Elementary Portuguese II
This class continues the development of a basic proficiency that will help reinforce the student's abilities and confidence. A broad range of lively, high-interest readings such as newspaper and magazine articles in current events on Brazilian culture will allow the student to gain a genuine sense of current usage. A Brazilian movie is presented and discussed in groups. Daily homework assignments involve writing exercises, short compositions and group projects.
For BA Students: Language Course
Course usually offered in spring term
Prerequisites: PRTG 110 or equivalent.
Activity: Seminar
1 Course Unit

PRTG 130 Intermediate Portuguese I
This is an intermediate course designed, in a four-course strand, for students who have taken at least two semesters of Portuguese. Classroom activities will emphasize pronunciation, spoken production as well as language structures and vocabulary with the objective to develop your skills in Portuguese. In addition, students will explore movies, music and other media to further develop reading, speaking and interpretive skills in Portuguese. The course will be conducted in Portuguese.
For BA Students: Language Course
Course usually offered in fall term
Prerequisite: PRTG 120 or instructor's permission
Activity: Seminar
1 Course Unit

PRTG 134 Intermediate Portuguese: Accelerated
Portuguese 134 is an accelerated intermediate course designed for students who have taken Portuguese for Spanish Speakers I, or its equivalent. Classroom activities will emphasize the development of pronunciation and spoken production, the use of language structures and vocabulary at the intermediate level. In addition, students will explore movies, music, short stories, and other media as they further develop reading, speaking and interpretive skills in Portuguese. The course will be conducted in Portuguese.
For BA Students: Last Language Course
Course usually offered in spring term
Prerequisite: PRTG 114
Activity: Seminar
1 Course Unit
Notes: Offered through the Penn Language Center. Restricted to students admitted by permission of the instructor.

PRTG 140 Intermediate Portuguese II
This is a forth-semester intermediate course, in a four-course strand, designed for students who have taken at least three semesters of Portuguese. Classroom activities will emphasize pronunciation, spoken production, grammar and language structures, and vocabulary at the advanced intermediate level. Students will explore movies, readings, news, music and other media as they further develop speaking, writing, reading and interpretive skills in Portuguese. The course will be conducted in Portuguese.
For BA Students: Last Language Course
Course usually offered in spring term
Prerequisite: PRTG 130 or instructor's permission
Activity: Seminar
1 Course Unit

PRTG 202 Advanced Portuguese
This course is designed for students who have already taken basic and intermediate levels of Portuguese. It complements students' knowledge of Portuguese by emphasizing the use of advanced grammatical structures and vocabulary. Classes will focus on practicing such advanced language structures by reading a diverse range of texts, including short stories by different authors of the Lusophone countries, and two novels; speaking and writing about a variety of contemporary texts; watching movies and documentaries; and listening to news, songs and other authentic audio material. The emphasis will be on language usage and culture. This course will be conducted in Portuguese.
For BA Students: Advanced Language Course
Course not offered every year
Prerequisites: PRTG 134, PRTG 140 or instructor's permission
Activity: Seminar
1 Course Unit

PRTG 215 Portuguese for the Professions
Portuguese for the Professions is designed for advanced-level students to develop their ability to use a wide technical vocabulary. The course will cover an array of topics in the areas of Economy, Politics, Science, Technology, Law and others as they pertain to the societies and cultures of the Lusophone countries, with particular emphasis placed on Brazil. Through readings, movies, discussions, essays and presentations, students will enhance their ability to write about and discuss these topics while employing the appropriate technical vocabulary.
Two terms. student may enter either term.
Prerequisite: Portuguese 202
Activity: Seminar
1 Course Unit

PRTG 217 Portuguese for the Professions II
Portuguese for the Professions II is a second-semester course designed to provide advanced-level students with exposition to, and practice in, a wide variety of technical vocabulary, and to develop their communicative skills on topics related to Brazil's economic, social and historical context. Classroom activities will be based on the readings and discussions of articles, papers, the viewing of documentaries and other visual media, covering an array of topics within the proposed themes. The course will be conducted in Portuguese.
For BA Students: Advanced Language Course
Course usually offered in spring term
Prerequisite: PRTG 202
Activity: Seminar
1 Course Unit

PRTG 221 Perspectives in Brazilian Culture
Topics vary. For current course description, please see department's webpage: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc

1 Course Unit

Psychology (PSYC)

**PSYC 001 Introduction to Experimental Psychology**
This course provides an introduction to the basic topics of psychology including our three major areas of distribution: the biological basis of behavior, the cognitive basis of behavior, and individual and group bases of behavior. Topics include, but are not limited to, neuropsychology, learning, cognition, development, disorder, personality, and social psychology.
For BA Students: Living World Sector
One-term course offered either term
Activity: Lecture
1 Course Unit

**PSYC 070 Psychology of Food**
Taught by: Rozin
Activity: Seminar
1 Course Unit
Notes: Does not count for the Psych major. To apply: https://www.curf.upenn.edu/spring-2017-bfs-seminars

**PSYC 097 Psych Abroad**
One-term course offered either term
Activity: Lecture
1 Course Unit

**PSYC 111 Perception**
How the individual acquires and is guided by knowledge about objects and events in their environment.
One-term course offered either term
Also Offered As: VLST 211
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit

**PSYC 127 Physiology of Motivated Behaviors**
This course focuses on evaluating the experiments that have sought to establish links between brain structure (the activity of specific brain circuits) and behavioral function (the control of particular motivated and emotional behaviors). Students are exposed to concepts from regulatory physiology, systems neuroscience, pharmacology, and endocrinology and read textbook as well as original source materials. The course focuses on the following behaviors: feeding, sex, fear, anxiety, the appetite for salt, and food aversion. The course also considers the neurochemical control of responses with an eye towards evaluating the development of drug treatments for: obesity, anorexia/cachexia, vomiting, sexual dysfunction, anxiety disorders, and depression.
Taught by: Grill
One-term course offered either term
Also Offered As: BIBB 227
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

**PSYC 149 Cognitive Neuroscience**
The study of the neural systems that underlie human perception, memory and language, and of the pathological syndromes that result from damage to these systems.
Taught by: Epstein or Mackey
One-term course offered either term
Also Offered As: BIBB 249
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit

**PSYC 151 Language and Thought**
This course describes current theorizing on how the human mind achieves high-level cognitive processes such as using language, thinking, and reasoning. The course discusses issues such as whether the language ability is unique to humans, whether there is a critical period to the acquisition of a language, the nature of conceptual knowledge, how people perform deductive reasoning and induction, and how linguistic and conceptual knowledge interact.
One-term course offered either term
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit
PSYC 160 Personality and Individual Differences
This course provides an introduction to the psychology of personality and individual differences. Many psychology courses focus on the mind or brain; in contrast to those approaches of studying people in general, the focus in this course is on the question “How are people different from each other?” It will highlight research that take a multidimensional approach to individual differences and attempts to integrate across the biological, cognitive-experimental, and social-cultural influences on personality.
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 162 Abnormal Psychology
The concepts of normality, abnormality, and psychopathology; symptom syndromes; theory and research in psychopathology and psychotherapy.
Taught by: Ruscio
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 170 Social Psychology
An overview of theories and research across the range of social behavior from intra-individual to the group level including the effects of culture, social environment, and groups on social interaction.
For BA Students: Society Sector
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 181 Intro to Developmental Psychology
The goal of this course is to introduce both Psychology majors and non-majors majors to the field of Developmental Psychology. Developmental Psychology is a diverse field that studies the changes that occur with age and experience and how we can explain these changes. The field encompasses changes in physical growth, perceptual systems, cognitive systems, social interactions and and much more. We will study the development of perception, cognition, language, academic achievement, emotion regulation, personality, moral reasoning, and attachment. We will review theories of development and ask how these theories explain experimental findings. While the focus is on human development, when relevant, research with animals will be used as a basis for comparison.
Taught by: Brannon
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 193 Study Abroad
Activity: Lecture
1 Course Unit

PSYC 207 Introduction to Cognitive Science
Cognitive Science is founded on the realization that many problems in the analysis of human and artificial intelligence require an interdisciplinary approach. The course is intended to introduce undergraduates from many areas to the problems and characteristic concepts of Cognitive Science, drawing on formal and empirical approaches from the parent disciplines of computer science, linguistics, neuroscience, philosophy and psychology. The topics covered include Perception, Action, Learning, Language, Knowledge Representation, and Inference, and the relations and interactions between such modules. The course shows how the different views from the parent disciplines interact, and identifies some common themes among the theories that have been proposed. The course pays particular attention to the distinctive role of computation in such theories, and provides an introduction to some of the main directions of current research in the field. It is a requirement for the BA in Cognitive Science, the BAS in Computer and Cognitive Science, and the minor in Cognitive Science, and it is recommended for students taking the dual degree in Computer and Cognitive Science.
Taught by: Brainard/Ungar
One-term course offered either term
Also Offered As: CIS 140, COGS 001, LING 105, PHIL 044, PPE 140
Prerequisites: An Introductory Course in Computer Science, Linguistics, Neuroscience, Philosophy, or PSYC 001
Activity: Lecture
1 Course Unit

PSYC 217 Visual Neuroscience
An introduction to the scientific study of vision, with an emphasis on the biological substrate and its relation to behavior. Topics will typically include physiological optics, transduction of light, visual thresholds, color vision, anatomy and physiology of the visual pathways, and the cognitive neuroscience of vision.
Taught by: Stocker
Course usually offered in spring term
Also Offered As: BIBB 217, VLST 217
Prerequisite: PSYC 109
Activity: Lecture
1 Course Unit

PSYC 225 Drugs, Brain, and Mind
The course will begin with a review of basic concepts in pharmacology: routes of drug administration, drug metabolism, the dose response curve, tolerance, and sensitization. Following a brief overview of cellular foundations of neuropharmacology (cell biology, synaptic and receptor function), the course will focus on various classes of drugs used to treat neuropsychiatric disorders including, among others, depression, schizophrenia, and anxiety. We will additionally consider mechanisms mediating the mind-altering, addictive and neurotoxic effects of abused drugs.
Taught by: Kane
Course usually offered in spring term
Also Offered As: BIBB 270
Prerequisite: PSYC 109 or BIBB 109
Activity: Lecture
1 Course Unit
PSYC 231 Animal Behavior
The evolution of social behavior in animals, with special emphasis on group formation, cooperation among kin, mating systems, territoriality and communication.
One-term course offered either term
Also Offered As: BIBB 231, BIOL 231
Prerequisite: PSYC 001 or BIOL 102 or COGS 001
Activity: Lecture
1 Course Unit

PSYC 235 Psychology of Language
This course describes the nature of human language, how it is used to speak and comprehend, and how it is learned. The course raises and discusses issues such as whether language ability is innate and unique to humans, whether there is a critical period for the acquisition of a language, and how linguistic and conceptual knowledge interact.
Taught by: Dahan
One-term course offered either term
Prerequisite: PSYC 151 or LING 001
Activity: Lecture
1 Course Unit

PSYC 239 Neuroendocrinology
This course is designed to examine the various roles played by the nervous and endocrine systems in controlling both physiological processes and behavior. First, the course will build a foundation in the concepts of neural and endocrine system function. Then we will discuss how these mechanisms form the biological underpinnings of various behaviors and their relevant physiological correlates.
Taught by: Flanagan-Cato
One-term course offered either term
Also Offered As: BIBB 260
Prerequisite: PSYC 109
Activity: Lecture
1 Course Unit

PSYC 247 Neuroscience and Society
Cognitive, social, and affective neuroscience have made tremendous progress in the last two decades. As this progress continues, neuroscience is becoming increasingly relevant to all of the real-world endeavors that require understanding, predicting and changing human behavior. In this course we will examine the ways in which neuroscience is being applied in law, criminal justice, national defense, education, economics, business, and other sectors of society. For each application area we will briefly review those aspects of neuroscience that are most relevant, and then study the application in more detail.
Taught by: Gerstein
One-term course offered either term
Also Offered As: PSYC 549
Prerequisite: PSYC 109 or PSYC 149
Activity: Lecture
1 Course Unit

PSYC 253 Judgment and Decisions
Thinking, judgment, and personal and societal decision making, with emphasis on fallacies and biases.
One-term course offered either term
Also Offered As: PPE 153
Prerequisite: One semester of statistics or microeconomics
Activity: Lecture
1 Course Unit

PSYC 256 Behavioral Economics and Psychology
This course will introduce you to the study of choice, and will examine in detail what we know about how people make choices, and how we can influence these choices. It will utilize insights from psychology and economics, and will apply these insights to domains including consumer choice, risky decision making, and prosocial decision making.
Taught by: Bhatia
One-term course offered either term
Also Offered As: PPE 313
Prerequisites: Microeconomics and PSYC 001
Activity: Lecture
1 Course Unit

PSYC 266 Introduction to Positive Psychology
An introduction to the study of positive emotions, positive character traits, and positive institutions. The positive emotions consist of emotions about the past (e.g., serenity, satisfaction, pride), about the future (e.g., hope, optimism, faith), and emotions about the present (pleasure and gratification). The distinction among the pleasant life, the good life, and the meaningful life is drawn. The positive traits include wisdom, courage, humanity, justice, temperance, and spirituality, and the classification of these virtues is explored. The positive institutions are exemplified by extended families, free press, humane leadership, and representative government.
Course usually offered in spring term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 275 Introduction to Political Psychology
This course will explore psychological approaches to understanding political beliefs, attitudes, and actions at the levels of both individual citizens and national leaders. It will also explore the possibility that psychological science itself is not immune to the political debates swirling around it. Specific topics will include: the workings of belief systems (and their power to shape what we "see"), cognitive biases (and their power to cause miscalculations), sacred values and their role in stabilizing belief systems and social interaction, personality and ideology (the linkages between the personal and the political), and clashing conceptions of morality and distributive and corrective justice (striking variations among people in what they consider to be fair). We shall also explore some topics that have sparked controversy in the psychological research literature and that tend to polarize opinion along political lines, including work on intelligence and unconscious bias.
Taught by: Tetlock
One-term course offered either term
Also Offered As: PPE 275
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit
Notes: NOTE: Students who are more interested in business-related issues may want Wharton 276x which is a modified version of this course specifically for Wharton undergraduates.
**PSYC 280 Developmental Psychology**

This course will cover theory and research related to the development of attachment, emotional regulation, peer and intimate relationships, personality, moral reasoning, and emotional and behavioral disorders. The course will emphasize the degree to which family, peer, and community contexts influence development from infancy into adulthood. Efforts will be made to integrate biological and environmental accounts of development across the lifespan.

One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

**PSYC 281 Cognitive Development**

What infants and young children come to know about the world, and how they learn it. Topics will include changes in children's thinking, perceptual development, language acquisition, and current theories of cognitive development.

Taught by: Swingley or Weisberg
One-term course offered either term
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit

**PSYC 311 Research Experience in Perception**

In this research course, students will begin by first replicating earlier experiments to measure human visual memory capacity. After several class discussions to discuss ideas, each student will design and conduct their own experiment to further investigate visual and/or familiarity memory.

Taught by: Rust
One-term course offered either term
Also Offered As: VLST 212
Prerequisites: One semester of statistics, and one of the following: PSYC 111, 149, 151, 217, or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Dept permission required. Undergraduates only.

**PSYC 362 Research Experience in Abnormal Psychology**

PSYC 362-301 is a two-semester course starting in the Fall. Class size limited to 8 students.

Taught by: Dr. Melissa Hunt
Prerequisites: PSYC 162 and one semester of statistics. Psych majors only. Instructor permission required.
Activity: Seminar
1 Course Unit
Notes: PSYC 362-301 is a two-semester course starting in the Fall.

**PSYC 280 Developmental Psychology**

In this course, students will work in small groups to develop, empirically test, and report on a research question within one of the domains of social psychology. Depending on the nature of the project, students will employ survey/experimental, or observational research methodology, and learn how to conduct and report the appropriate statistical tests with Excel and/or SPSS (typically, correlations, t-tests, ANOVA and ANCOVA, multiple regression, factor analysis, and measures of reliability). Class discussions will help students craft their projects, and in-class presentations will provide the opportunity to develop and refine presentation skills. Psychology majors only. Class size is limited to 14 students.

Prerequisites: PSYC 170 AND one semester of statistics.
Activity: Seminar
1 Course Unit
Notes: Dept permission required. Psychology majors only.

**PSYC 399 Individual Empirical Research**

Individual research involving data collection. Students do independent empirical work under the supervision of a faculty member, leading to a written paper. Normally taken in the junior or senior year.
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: Dept permission required

**PSYC 400 Senior Honors Seminar in Psychology**

Open to senior honors candidates in psychology. A two-semester sequence supporting the preparation of an honors thesis in psychology. Students will present their work in progress and develop skills in written and oral communication of scientific ideas.

Taught by: Thompson-Schill
Prerequisite: acceptance into the Honors Program in Psychology
Activity: Seminar
0.5 Course Units
Notes: Dept permission required

**PSYC 407 Behavioral Genetics**

This course will cover basic principles of human and animal behavior genetics, including the genetics of normal variation as well as extreme phenotypes represented by behavioral, psychiatric and neurologic disorders. The course will focus on methods necessary to critically evaluate research findings on normal and abnormal human behavior. Animal models will also be reviewed.

Taught by: Price
One-term course offered either term
Prerequisite: Basic statistics or permission of instructor
Activity: Seminar
1 Course Unit

**PSYC 421 Neurobiology of Learning and Memory**

This advanced course focuses on the current state of our knowledge about neurobiological basis of learning and memory. Students will explore the molecular and cellular basis of learning invertebrates and vertebrates from a behavioral and neural perspective.

Taught by: Gerstein
One-term course offered either term
Also Offered As: BIBB 442, BIOL 442, NGG 575
Activity: Seminar
1 Course Unit
PSYC 423 Seminar in Motivation
One-term course offered either term
Prerequisite: Permission of the instructor
Activity: Seminar
1 Course Unit

PSYC 429 Big Data, Memory, and the Human Brain
Advances in brain recording methods over the last decade have generated vastly more brain data than had been collected by neuroscientists during the previous century. To understand the human brain, scientists must now use computational methods that exploit the power of these huge data sets. This course will introduce you to the use of big data analytics in the study of human memory and its neural basis. Through hands-on programming projects, we will analyze multi-terabyte data sets both to replicate existing phenomena and to make new discoveries. Although the course has no formal neuroscience or psychology prerequisites it does require CIS121 and Python experience. Because of the heavy computing resources required to perform the assignments, enrollment is limited to 15 students and there is a required course application. http://psychology.sas.upenn.edu/undergraduate/forms
Taught by: Kahana
Also Offered As: BIBB 429
Prerequisite: CIS121 & Python experience
Activity: Seminar
1 Course Unit
Notes: Instructor permission required. Application form can be found here: http://psychology.sas.upenn.edu/undergraduate/forms

PSYC 431 Seminar in Animal Cognition
The aim of this course will be to provide advanced undergraduates with a detailed review of a number of research areas in behavioral ecology. Topics will change each year, and students will be able to take the course more than once.
One-term course offered either term
Also Offered As: BIBB 431
Prerequisite: PSYC 231/Biol 231 / BIBB 231
Activity: Seminar
1 Course Unit

PSYC 435 Psycholinguistics
Taught by: Dahan
Prerequisites: PSYC 151, or PSYC 235, or LING 001, or permission of instructor.
Activity: Seminar
1 Course Unit

PSYC 439 Neuroendocrinology Seminar
This course is designed to examine the various roles played by the nervous and endocrine systems in controlling both physiological processes and behavior. First, the course will build a foundation in the concepts of neural and endocrine system function. Then, we will discuss how these mechanisms form the biological underpinnings of various behaviors and their relevant physiological correlates. We will focus on sexual and parental behaviors, stress, metabolism, neuroendocrine-immune interactions, and mental health.
Taught by: Flanagan-Cato
One-term course offered either term
Also Offered As: BIBB 460
Prerequisite: PSYC 109
Activity: Seminar
1 Course Unit

PSYC 440 Sleep and Sleep Disorder
Activity: Lecture
1 Course Unit

PSYC 447 Brains Behind Radiolab
Radiolab is a show about curiosity. Where sound illuminates ideas, and the boundaries blur between science, philosophy, and human experience. This seminar is a course about curiosity. In particular, this seminar will develop and nurture your curiosity about the mind and the brain, about human thought and behavior, and about the biology of the human experience. Every month, hours of radio programs and podcasts are aired-ranging from science-themed shows such as Radiolab and Invisibilia (and locally produced The Pulse) to more general interest shows like This American Life and TED Radio Hour—that highlight the scientific study of the human mind. Behind every podcast are dozens of laboratories, publications, and investigators (including students) who make the science behind the show. We will explore the "Brains behind Radiolab" through a careful study of the primary sources that report the psychological and neuroscientific findings that thousands of listeners tune every week. You will practice the craft of conveying scientific findings to audiences with different levels of expertise and background in science; and you will learn about the important role that scientists play in enhancing public understanding of human behavior.
Taught by: Thompson-Schill
One-term course offered either term
Activity: Seminar

PSYC 449 Seminar in Cognitive Neuroscience
Topics vary each semester. PSYC 449-301 (Gerstein) Neuroscience for Policymakers: This seminar will provide an overview of the neuroscience behind some of the most relevant issues in public health policy today. Why are clinical trials for Alzheimer's disease treatments so difficult to run and why do so many fail? How does the teenage brain make decisions and who should be considered an adult in court? What is implicit bias and why do we make snap decisions based on mental associations? If you could 'improve' your brain with devices or drugs, should you? We will examine the primary scientific literature as well as delve into lay articles about the science and policy surrounding each issue. A basic understanding of neuroscience and some comfort working with primary literature is assumed. PSYC 449-302 (Epstein) Consciousness: Consciousness is our subjective experience of the world, including both perceptions and felt internal states. In this seminar, we will explore the the burgeoning scientific literature on the neural basis of consciousness. We will focus in particular on three topics: What are the neural systems underlying visual awareness? What are the mechanisms that control the progression of conscious contents to create our stream of thought? What is the relationship between consciousness and behavior?
Prerequisite: PSYC 109 or PSYC 149
Activity: Seminar
1 Course Unit
Notes: PSYC 449-601 is an LPS course. PSYC 449-301-302 are Psych Dept courses.

PSYC 451 Seminar in Cognitive Psychology
Topics vary each semester.
One-term course offered either term
Also Offered As: BIBB 431
Prerequisite: PSYC 231
Activity: Seminar
1 Course Unit
PSYC 453 Seminar in Decision Making
Topics vary each semester.
One-term course offered either term
Prerequisite: PSYC 253
Activity: Seminar
1 Course Unit
Notes: Undergraduates only.

PSYC 462 Seminar in Abnormal Psychology
Topics vary each semester. PSYC 462-601 (Fall 2017): Anxiety Disorders, OCD, and PTSD: Theory, Diagnosis, and Evidence Based Practice
Taught by: Staff, PSYC 462-601 (Fall 2017): Jeremy Tyler
Prerequisite: PSYC 162
Activity: Seminar
1 Course Unit
Notes: Undergraduates only.

PSYC 464 Seminar in Positive Psychology: Imagination and Creativity in Psychology
By forming mental representations of things not immediately present to the senses (imagination), and/or simulating possible futures (prospection), humans can generate novel ideas and products (creativity) that contribute to human progress and flourishing. This course will specifically focus on imagination and creativity within the field of psychology. Students will learn about the cognitive, motivational, and social processes that shaped important creative insights (or big moments) in the history of the discipline. In addition, students will be given the opportunity to apply knowledge gained from the course by designing their own original creative research proposal as the final project for the course. Note: This course constitutes a research study designed to investigate how scientific creativity can best be taught to undergraduate students. Student participation in the research study is voluntary, subject to informed consent, and will not affect their performance in the course.
Prerequisite: PSYC 001
Activity: Seminar
1 Course Unit
Notes: Instructor permission required. Course does not fulfill the research requirement for psych majors.

PSYC 470 Seminar in Social Psychology
Topics vary each semester.
One-term course offered either term
Prerequisite: PSYC 170
Activity: Seminar
1 Course Unit
Notes: Undergraduates only. PSYC 470-301 (Bermant)

PSYC 472 Behavioral Biology of Women
A course that explores female behavior focusing on evolutionary, physiological, and biosocial aspects of women’s lives from puberty, through reproductive processes such as pregnancy, birth, lactation to menopause and old age. Examples are drawn from traditional and modern societies and data from nonhuman primates are also considered.
Taught by: Apicella
One-term course offered either term
Prerequisites: PSYC 272 or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Department permit required.

PSYC 473 Neuroeconomics
This course will review recent research that combines psychological, economic, and neuroscientific approaches to study human and animal decision-making. A particular focus will be on how evidence about the neural processes associated with choices might be used to constrain economic and psychological theories of decision-making. Topics covered will include decisions involving risk and uncertainty, reinforcement learning, strategic interactions and games, and social preferences.
Taught by: Kable
One-term course offered either term
Also Offered As: BIBB 473, NGG 706
Prerequisites: PSYC 149, 253, or 265
Activity: Seminar
1 Course Unit

PSYC 474 Cultural Psychology
Humans are a cultural species, constantly navigating a complex web of cultural bound practices, norms, and worldviews. This seminar will survey the theory and research of the young but rapidly expanding field of cultural psychology. In the seminar, we will explore how culture shapes and is shaped by an array of psychological domains, ranging from perception, information processing, and language, to concepts of the self, motivations, emotion, morality, and physical and mental health.
Prerequisite: PSYC 170 or PSYC 272
Activity: Seminar
1 Course Unit

PSYC 475 Behavioral Law and Economics
Topics vary each semester.
One-term course offered either term
Prerequisite: PSYC 253 or PSYC 265
Activity: Seminar
1 Course Unit
Notes: Undergraduates only.

PSYC 477 CAPSTONE: SOCIAL PSYCHOLOGY
Though almost half a century old, Milgram’s 1961-1962 studies of “destructive obedience” continue to puzzle, fascinate, and alarm. In this seminar, we will take an in-depth look at these famous studies (along with the more recent replications) and explore their various psychological, historical, and philosophical ramifications. This course has a number of intellectual goals that go beyond simply rarifying one’s understanding of a particular content area (important and generative as it may be). One such a goal is to enable you to think critically (though not disparagingly) about other people’s research and theoretical claims that ensue from it, all with the hope that you can then apply the self-same critical acumen to your own future work. Second, this course will offer a hospitable environment for developing (and exchanging) creative ideas of your own. Your work on your individual reaction papers and on the term paper in particular will be a key element in achieving this goal.
Taught by: Royzman
Also Offered As: PPE 477
Prerequisite: PSYC 170
Activity: Seminar
1 Course Unit
PSYC 480 Seminar in Developmental Psychology
This seminar will examine how the imagination works and how it develops. Students in this course will read and discuss the latest research in this area, learn to analyze empirical articles in cognitive and developmental psychology, and explore the links between imaginative processes and other important cognitive skills.
Taught by: Weisberg
Prerequisite: PSYC 181 or PSYC 280 or PSYC 281
Activity: Seminar
1 Course Unit
Notes: Undergraduates only.

PSYC 481 Seminar: Cognitive Development
Taught by: Swingley
Prerequisites: PSYC 281 or PSYC 280.
Activity: Seminar
1 Course Unit

PSYC 501 Mathematical Foundations for Language and Communication Science I
This two-semester sequence will provide basic mathematical modeling and algorithmic tools for interdisciplinary research in animal, human or machine communication, in association with the IRCS IGERT program. Topics include signal processing, statistical modeling and machine learning, information theory, game theory, and formal language theory. The courses will be taught in a laboratory setting, and will emphasize practical skills as well as basic concepts.
Taught by: Liberman
Two terms. Student may enter either term.
Also Offered As: COGS 501, LING 545
Activity: Lecture
1 Course Unit

PSYC 502 Mathematical Foundations for Language and Communication Science II
This two-semester sequence will provide basic mathematical modeling and algorithmic tools for interdisciplinary research in animal, human or machine communication, in association with the IRCS IGERT program. Topics include signal processing, statistical modeling and machine learning, information theory, game theory, and formal language theory. The courses will be taught in a laboratory setting, and will emphasize practical skills as well as basic concepts.
Taught by: Liberman
Two terms. Student may enter either term.
Also Offered As: COGS 502, LING 546
Activity: Lecture
1 Course Unit

PSYC 511 Prob Models of Perception
Activity: Lecture
1 Course Unit

PSYC 525 Controversies in Psychology and Neuroscience
In this seminar, we will discuss several recent controversies in psychology and neuroscience, for example: “p-hacking,” replicability, methodological terrorists, neural activity in dead salmon and failures to control the false positive rate in neuroimaging, “voodoo correlations” and double dipping, whether Tic-Tacs can improve self-control and whether reading “old” makes you walk slower. Our goal is not just to engender ennui and/or schadenfreude, but also to ask what we can learn from these discussions about how to do science in the most rigorous, reproducible manner possible.
Activity: Seminar
1 Course Unit

PSYC 530 Research Methods in Psychology
This course will develop theoretical and computational approaches to structural and functional organization in the brain. The course will cover: (i) the basic biophysics of neural responses, (ii) neural coding and decoding with an emphasis on sensory systems, (iii) approaches to the study of networks of neurons, (iv) models of adaptation, learning and memory, (v) models of decision making, and (vi) ideas that address why the brain is organized the way that it is. The course will be appropriate for advanced undergraduates and beginning graduate students. A knowledge of multi-variable calculus, linear algebra and differential equations is required (except by permission of the instructor). Prior exposure to neuroscience and/or Matlab programming will be helpful.
Taught by: Balasubramanian
Course not offered every year
Also Offered As: BIBB 585, NGG 594, PHYS 585
Activity: Lecture
1 Course Unit

PSYC 547 Fndtions Soc Cog Neurosc
Activity: Lecture
1 Course Unit

PSYC 549 Neuroscience and Society
Also Offered As: PSYC 247
Activity: Lecture
1 Course Unit

PSYC 557 Neuroscience, Ethics & Law
How does the neuroscience of human decision-making and emotion impact our understanding of ethics and law? What can neuroscience tell us about why people find actions moral or immoral, worthy of praise or punishment? What, if anything, can it tell us normatively about morality, agency and responsibility? And what other insights might neuroscience offer regarding other morally and legally relevant phenomena such as stereotyping and bias, the causes of antisocial behavior and the detection of deception?
Activity: Seminar
1 Course Unit

PSYC 579 Exp Methods Perception
Activity: Lecture
1 Course Unit

PSYC 600 Proseminar in General Psychology
Choice of half or full course units each sem. covering a range of subjects and approaches in academic psychology.
One-term course offered either term
Also Offered As: NGG 589
Activity: Seminar
1 Course Unit
Notes: Dept permission required
PSYC 603 Behavioral Neuroscience
Current research on the neural basis of behavior is organized in six subsections: animal communication, sex behavior, circadian rhythms, variety energy and water balance, synaptic plasticity and learning, and communication, addiction. Topics are selected based on excitement surrounding recent research developments. Each topic is analyzed initially at thermal receptors behavioral level, followed by the systems and the cell and molecular control of levels. Throughout the course, attention is paid to the analysis of behavior interesting stereotyped behaviors, e.g., bird song, lordosis, licking, whose description and neurology has provided insights into the neural basis systems that contribute to overall neural control of behavior. Attention is also paid to the development of understanding of the neuroanatomy of selected neural systems.
Taught by: Grill
Course offered fall; even-numbered years
Also Offered As: NGG 595
Activity: Seminar
1 Course Unit
Notes: Fulfills the "Brain" requirement

PSYC 604 Cognitive Neuroscience
Review of what has been learned about the neural mechanisms underlying intelligent behavior in humans and animals. Traditional topic areas of cognitive science are covered, specifically: vision (early vision through object recognition), attention, learning and memory, motor control, planning and problem-solving, and language. Attempts are made to integrate results of different neuroscience approaches to each topic, including the study of human neurological patients, lesion studies in animals, single unit recordings, neural network modeling, and functional imaging techniques.
Taught by: Farah
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 605 Behavioral Neuropharmacology
The effects of various drug classes on animal behavior are examined. Behavioral studies identifying the neurochemical mechanisms of action of psychotropic drugs are reviewed. Animal models of neurological and psychiatric illnesses are discussed.
Taught by: Lucki and Staff
One-term course offered either term
Also Offered As: NGG 582
Prerequisite: Permission of course director
Activity: Lecture
1 Course Unit

PSYC 608 Judgment and Decisions
Thinking, judgment, decision making, beliefs, and probability, with emphasis on fallacies and errors.
Taught by: Baron
One-term course offered either term
Also Offered As: OID 900
Activity: Lecture
1 Course Unit

PSYC 609 Systems and Integrative Neuroscience
Course usually offered in fall term
Also Offered As: NGG 573
Activity: Lecture
1 Course Unit
Notes: Fulfills the Brain requirement

PSYC 610 Mathematics for Psychologists
Course not offered every year
Also Offered As: STAT 501
Activity: Lecture
1 Course Unit
Notes: A two-term course.

PSYC 611 Statistics for Psychologists
Course usually offered in fall term
Also Offered As: BSTA 550, STAT 500
Activity: Lecture
1 Course Unit

PSYC 612 Introduction to Nonparametric Methods and Log-linear Models
Course usually offered in spring term
Also Offered As: STAT 501
Activity: Lecture
1 Course Unit

PSYC 630 Cognitive Neuroscience of Memory
This course will review the neural mechanisms of learning and memory. Readings will include both seminal and cutting-edge papers on topics ranging from perceptual memory to higher order functions, including working memory, declarative memory, skill learning, and semantic memory. Within each topic we will attempt to integrate the results of different neuroscience approaches, including the study of human neurological patients, lesion studies and single unit recordings in animals, neural network modeling, event-related potentials, and functional imaging techniques.
One-term course offered either term
Also Offered As: NGG 630
Activity: Seminar
1 Course Unit
Notes: Fulfills the Brain requirement

PSYC 631 Cognitive Neuroscience of Affect
We will survey, and as far as possible, synthesize, three bodies of literature on emotion and the brain, specifically: (1) neuroimaging and pharmacologic studies of emotion and the normal human brain; (2) the neuroscience of affective disorders in humans; and (3) relevant studies of reinforcement and learning in animals.
Taught by: Farah
One-term course offered either term
Activity: Lecture
1 Course Unit

PSYC 632 Cognitive Neuroscience of Vision
This course will review the neural basis of visual cognition. Emphasis will be placed on linking cognitive theory to neuroscientific methods. Topics will include object and face recognition, scene perception, visual attention, mental imagery, and visual awareness.
Taught by: Epstein
One-term course offered either term
Activity: Lecture
1 Course Unit

PSYC 633 Cognitive Neuroscience of Development
This course will review the neural basis of developmental processes. Emphasis will be placed on linking cognitive theory to neuroscientific methods. Topics will include early development, language development, and cognitive development.
Taught by: Lucki and Staff
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Fulfills the Brain requirement

PSYC 634 Cognitive Neuroscience of Cognition
This course will review the neural basis of cognitive processes. Emphasis will be placed on linking cognitive theory to neuroscientific methods. Topics will include attention, learning, memory, and decision making.
Taught by: Baron
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Fulfills the Brain requirement

PSYC 635 Cognitive Neuroscience of Development
This course will review the neural basis of development processes. Emphasis will be placed on linking cognitive theory to neuroscientific methods. Topics will include early development, language development, and cognitive development.
Taught by: Lucki and Staff
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Fulfills the Brain requirement
PSYC 671 Violence: A Clinical Neuroscience Approach
Developed for both Psychology and Criminology graduate students, this interdisciplinary course outlines a clinical neuroscience approach to understanding violence in which the tools of neuroscience—neuroanatomy, neurophysiology, neurocognition, neuroendocrinology, neuropharmacology, molecular and behavioral genetics—are used to help inform the etiology and treatment of violence. Clinical components include psychopathy, proactive and reactive aggression, homicide, domestic violence, conduct disorder, oppositional defiant disorder, antisocial personality disorder, crime, and delinquency as well as their comorbid conditions (schizophrenia, drug abuse, hyperactivity). The interaction between social, psychological, and neurobiological processes in predisposing to violence will be highlighted, together with neurodevelopmental perspectives on violence focusing on prospective longitudinal and brain imaging research. Key implications for the criminal justice system, neuroethics, forensics psychology, and intervention will also be outlined.
Taught by: Raine
Course usually offered in fall term
Also Offered As: CRIM 671
Activity: Lecture
1 Course Unit
Notes: Graduate students only.

PSYC 699 Individual Research for First-Year Graduate Students
Two terms. student must enter first term.
Activity: Independent Study
3 Course Units

PSYC 703 Special Topics in Psychology
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 704 Research Methods and Statistical Procedures for Social and Clinical Sciences
This course has three primary objectives: 1) developing criteria and strategies for strong inference of causal relationships in social and clinical psychology research; 2) examining the array of research designs employed in the social/clinical sciences together with the threats to internal and external validity associated with each; 3) learning and applying statistical analytical methods appropriate for questions in the social/clinical sciences. The course will employ a seminar format and a project-oriented approach to learning. Students will be encouraged to utilize examples from their own research programs in applying the design and analysis concepts covered in the course.
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 705 Neuroethics
Neuroscience is increasingly affecting all aspects of human life, from the relatively familiar medical applications in neurology and psychiatry, to new applications in education, business, law, and the military. Today's neuroscience graduate students will be among the scientists, citizens, and policymakers who will lead society through the maze of decisions regarding the appropriate uses of neuroscience. This course provides a survey of the key ethical, legal, and social issues at the intersection of neuroscience and society. It will include a combination of traditional classroom lectures, discussion and debates, as well as an online component coordinated with a course at Wisconsin's Neuroscience and Public Policy graduate program.
Taught by: Farah
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Dept permission required.

PSYC 709 Special Topics in Clinical Psychology
In this seminar we will survey substantive, methodological and statistical issues that arise in the planning, conduct, and interpretation of empirical inquiries about the effects of psychotherapies. Challenges presented in efforts to disseminate evidence-based clinical practices will also be addressed.
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Graduate students only.

PSYC 711 Basic Problems in Developmental II
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 712 Regression & Anova II
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 715 Teaching Seminar
This course is designed to aid graduate students in developing fundamental teaching skills. The focus will be on lecturing, applicable to job talks as well as classroom lectures, but there will also be some attention to discussion sections and handling of questions.
Taught by: Rozin
One-term course offered either term
Prerequisite: For graduate students in Psychology
Activity: Seminar
1 Course Unit

PSYC 719 Experimental Methods in Perception
This IGERT foundational course covers experimental methods and data analysis techniques used in the study of human perception.
Taught by: Brainard
Activity: Seminar
1 Course Unit
Notes: This is an IGERT foundational course.

PSYC 730 Special Topics in Motivation
One-term course offered either term
Activity: Seminar
1 Course Unit
PSYC 733 Special Topics in Vision
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 736 Special Topics in Language
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 739 Special Topics in Perception
Probability theory has become an increasingly popular and successful framework for modeling human perceptual and cognitive behavior. This course will provide a careful introduction to probability theory and the various ways it has been applied in psychology and neuroscience. Goal is to make students understand the most important state-of-the-art probabilistic models in perception and cognition, what they reveal about the brain's underlying computations and strategies in dealing with uncertainty, and how such computations can potentially be performed by populations of neurons.
Taught by: STOCKER
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 745 Special Topics in Cognitive Neuroscience
One-term course offered either term
Also Offered As: NGG 583
Activity: Seminar
1 Course Unit

PSYC 750 Special Topics in Neuropsychopharmacology
Biological issues relevant to neuropsychiatric illnesses are covered in detail in four sections. The first section covers clinical aspects of major psychiatric disorders and includes some contact with patients. The second section presents the neuroanatomy of the limbic system. In the third section, emphasis is on the mechanisms of action of psychotropic drugs, including antidepressants, antipsychotics, anxiolytics, and stimulants. The final section covers information relevant to understanding biological processes that may be abnormal in neuropsychiatric illnesses, such as stress, sleep, and circadian rhythms, as well as quantitative genetics.
Taught by: Lucki and Staff
One-term course offered either term
Also Offered As: PHRM 550
Prerequisite: Permission of Instructor
Activity: Lecture
1 Course Unit

PSYC 751 Special Topics in Cognitive Psychology
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 757 Language and Communication Sciences Research Seminar
Taught by: Trueswell
Course not offered every year
Activity: Seminar
1 Course Unit

PSYC 770 Special Topics in Social Psychology
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 790 Self-Regulation & Behav
This seminar will cover psychological theories of goals, research on self-control, and models of behavior change, tailored to the interests of the students. We will read classic and contemporary research related to goal setting, conscious and unconscious goal processes, and mechanisms of behavior change.
Taught by: ALBARRACIN
Also Offered As: COMM 890
Activity: Seminar
1 Course Unit

PSYC 810 Psychodiagnostic Testing
Course usually offered in fall term
Activity: Seminar
1 Course Unit

PSYC 811 Psychodiagnostic Interviewing
Course usually offered in fall term
Activity: Seminar
1 Course Unit

PSYC 815 Introductory Practicum
Course usually offered in spring term
Activity: Seminar
1 Course Unit

PSYC 820 Advanced Practicum
Intensive studies of single individuals including interviews, tests, and experiments; also clinical experience at appropriate community agencies.
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 999 Individual Study and Research
One-term course offered either term
Activity: Independent Study
0.5 Course Units

Public Health Studies (PUBH)

PUBH 500 Foundations of Public Health
This course will provide a topical overview of the inter-disciplinary field of public health and provides grounding in the public health paradigm. Through a series of lectures and recitation sessions, students will learn about the history of public health and the core public health sciences including behavioral and social sciences, biostatistics, epidemiology, environmental health, and policy and management. Other topics include ethics in public health, context analyses (specifically sociographic mapping and urban health), community participation in research, public health promotion, and the prevention of chronic and infectious diseases.
Course usually offered in fall term
Also Offered As: NURS 570
Activity: Lecture
1 Course Unit
PUBH 501 Introduction to Biostatistics
Introduction to Biostatistics This course is designed to provide a broad overview of biostatistics methods as well as applications commonly used for public health research. Topics covered include measurement and categorizing variables, use and misuse of descriptive statistics, testing hypotheses, and applying commonly used statistical tests. An emphasis will be placed on the practical application of data to address public health issues, rather than theoretical and mathematical development. Students will learn how to choose and apply statistical tools to data sources, when and how statistical tools can be used to analyze data, and how to interpret others' quantitative studies. Students will gain experience using online datasets and the STATA statistical software package.
Taught by: Shofer, Hanlon
One-term course offered either term
Activity: Lecture
1 Course Unit

PUBH 502 Introduction to the Principles and Methods of Epidemiology
This course will provide an introduction to the principles and methods of epidemiology as a research science. The course introduces the student designs applied to human populations, including randomized trials and observational studies (cohort, case-control, cross-sectional, ecological). Homework and in-class assignments focus on building skills in locating, assessing, and synthesizing evidence from the epidemiologic literature, with an emphasis on critical thinking, causal inference, and understanding bias and confounding.
Taught by: Smith, Cannuscio
One-term course offered either term
Also Offered As: NURS 500
Activity: Lecture
1 Course Unit

PUBH 503 Environmental and Occupational Health
This course will provide a broad introduction to the scientific basis of occupational and environmental health. Content will address issues in the ambient, occupational and global environments as well as the tools, concepts and methods used in environmental health.
Taught by: Howarth, Pepino, Klinger Kutcher
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PUBH 504 Public Health Theories & Frameworks
This course provides students with a solid foundation in behavioral and social science theory, research, and interventions as they pertain to public health. Content will provide exposure to a broad range of theories, including the theoretical foundations of social science applications for help-seeking, gender, race, ethnicity and social class. These theories will be discussed using examples of their applications to numerous public health problems including HIV/AIDS, violence, cancer, cardiovascular diseases, obesity, and diabetes.
Taught by: Ruggieri, Fleisher
One-term course offered either term
Activity: Lecture
1 Course Unit

PUBH 505 Public Health Policy and Administration
This course is an introduction to health policy and management. It examines both the historical and current state of health policy in America and integrates these concepts within the context of public health practice. We will examine key concepts in understanding US health care organization, financing and delivery, our current political and economic debate on health care reform, examining the role and management issues of public health departments, and case studies in public health policy and management.
Taught by: Noonan, Klusaritz
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PUBH 506 Methods for Public Health Practice
This is a course designed around modules whose objective is to provide students with greater familiarity in a range of methods essential to public health practice. The course will be framed around an in-depth capacity and needs assessment and community public health planning in Philadelphia. Topics covered will include data collection and evaluation, both quantitative and qualitative, uses of informatics in public health, analysis of vital statistics, working with communities, methods for developing and facilitating solutions to public health problems, including concepts of advocacy and policy formation and development of interventions. The course demonstrates how core public health competency areas in data analysis and communication provide foundations for applications for both practice and practice-based research.
Taught by: Solomon, Hall, Leary
One-term course offered either term
Activity: Lecture
1 Course Unit

PUBH 507 Public Health Law & Ethics
What is best - or, at least, seems best - for the public's health is not always consistent with society's view of what is legal, ethical, or good policy. This course introduces key concepts of legal, ethical, and policy analysis and attempts to demonstrate with current examples how these forces empower, guide, and constrain public health decision-making and actions. The course will combine lecture, Socratic dialogue, and group discussion in an informal setting. The course will feature guest lectures by several distinguished experts from Penn and from other universities.
Taught by: Anderson
Course usually offered in fall term
Activity: Lecture
1 Course Unit
PUBH 508 Capstone Seminar I
The Capstone is a culminating experience required for graduation in the Master of Public Health Program. In two Capstone seminars, students will have an opportunity to synthesize the knowledge and public health competencies they have developed through their coursework. Capstone students will apply their knowledge and skills to public health problems in a chosen area of interest. They will engage their peers in scholarly discussion, drawing from relevant scientific literature and public health experience in order to begin to develop a common grounding and identity as public health professionals. The Capstone incorporates two semester-long seminars and a research project. over the course of the Castone, students will develop, propose, revise, implement, and present their projects. As their projects successfully come to fruition they will also advise their junior colleagues still in the proposal stage.
Taught by: Frasso, Anderson, Levy, Grisso
Two terms. student may enter either term.
Activity: Lecture
1 Course Unit

PUBH 515 Community Development
Course usually offered in spring term
Also Offered As: CPLN 622
Activity: Lecture
1 Course Unit

PUBH 517 Introduction to the Epidemiologic Study of Geography and Health
This course will provide an introduction to GIS in public health research and practice. Through a series of lectures and labs students will explore theories linking health and the environment, spatial analysis and spatial epidemiology, and applications of GIS-related data collection and analysis.
Taught by: Branas, Weibe
Course usually offered in fall term
Also Offered As: EPID 518
Activity: Lecture
1 Course Unit

PUBH 519 Issues in Global Health
This course presents an overview of issues in global health from the viewpoint of many different disciplines, with emphasis on economically less developed countries. Subjects include: millennium goals; measures of disease burden; population projections and control; environmental health and safe water; demography of disease and mortality; zoonotic infectious diseases; AIDS and HIV prevention; vaccine utilization and impact; eradication of polio virus; chronic diseases; tobacco-associated disease and its control; nutritional challenges; social determinants of global health; harm reduction and behavioral modifications; women's reproductive rights; health economics and cost-effective interventions; health manpower and capacity development; bioethical issues in a global context.
Taught by: McLaughlin
Course usually offered in fall term
Prerequisites: Undergraduates must have completed HSOC-010-401.
Activity: Lecture
1 Course Unit

PUBH 521 Program Evaluation in Public Health
There are many public health programs developed to promote change. The question most funders have for public health programs is: what outcomes do you expect? This course is designed to review the principles of identifying short term, mid term and long term outcomes and methods of measurement. Students learn about the application of date collection skills to all phases of developing a public health program or service innovation, from needs assessment to analysis of finding to implementation of changes based on results. Students learn to appreciate how these skills can be used as practical tools for identifying public health problems, program development, program implementation including taking a reflective practice approach, ensuring equity and fairness in program delivery (i.e. combating disparities), and generally promoting public health through effective and efficient programmatic efforts.
Taught by: Karpyn
Course offered spring; odd-numbered years
Activity: Lecture
1 Course Unit

PUBH 525 Developing Effective Public Health Programs Using a Humans Rights Based Approach
This course will engage students in discussion of how a human rights approach, informed by international human rights declarations and covenants as well as gender theory, can more comprehensively inform the development of a variety of public health programs. Specifically, the class will discuss how health policies, programs and practices can impact on human rights (e.g. mandatory reporting of certain communicable diseases, quarantine, accessibility of services, etc.); how violations of human rights affect health (e.g. torture, discrimination, etc.) and how health and human rights are ultimately inextricably linked and programming for public health must use a framework that ensures a balance of interests between the two disciplines.
Taught by: Voet
Course usually offered summer term only
Activity: Lecture
1 Course Unit

PUBH 526 Anthropology and Public Health
Taught by: Barg
Course not offered every year
Also Offered As: ANTH 426
Activity: Lecture
1 Course Unit
Notes: In this course, we examine three types of relationships between anthropology and public health. Anthropology and public health will examine complementary and competing concepts fundamental to each discipline and ways that these concepts make it essential and difficult for the disciplines to work together. Anthropology on public health takes a critical look at assumptions in public health praxis. Anthropology in public health will focus on ways that anthropology theory and methods inform the practice of public health. Using these three approaches, we will examine topics in public health such as mental health, health promotion/disease prevention communication, cancer disparities, reproductive health, violence and infectious disease. Students will learn and apply anthropologic research methods to these problems.
PUBH 527 Media, Advocacy and Public Health
This course will examine the ways in which the media can be used as a tool to improve health. It will also investigate the ways in which the media has had a negative impact on health behaviors in the population. Looking at specific topics like tobacco, food and nutrition, and HIV/AIDS, we will explore the intersection of media, advocacy, advertising and entertainment and the impact of media broadly on health behavior and society. The course will also provide students the opportunity to practice strategically working with the media to address health problems.
Taught by: TBA
Course not offered every year
Activity: Seminar
1 Course Unit

PUBH 528 Class, Inequality and Health: Ethnographic Perspectives
Taught by: Bourgois
Course usually offered in spring term
Also Offered As: ANTH 623
Activity: Seminar
1 Course Unit
Notes: This seminar examines anthropological approaches to the concept of class and social inequality through a close reading of a dozen ethnographies that deal with a broad definition of health, illness, and social suffering. Readings span many of the theoretical, political, sub-disciplinary and area studies debates in anthropology and the larger fields of poverty, social inequality, international development, violence studies, science studies, governmentality, and social policy interventions over the past century.

PUBH 529 Topics in Family Planning
This course will survey a range of key current and historic topics in family planning nationally and internationally. Policy, epidemiology, clinical practice, advocacy, and service delivery topics will be covered through presentations and conversations with leaders in the field of reproductive health. The course will provide students with a broad general introduction to family planning which is appropriate for those interested in either public health or clinical aspects of the field. For students who wish to pursue a focused career in this area this course is a necessary introduction, while students who will be working in related areas of public health will have a broad general understanding of family planning. Students will participate through an interactive seminar style and will prepare an oral presentation on a relevant topic of their choice.
Taught by: Bennett, Schreiber
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PUBH 530 Environmental Toxicology: Risk Assessment and Health Effects
This course presents general principles of toxicology and the disposition of toxins in the body. Case studies of the effects of environmental and occupational toxins on individuals will be analyzed. This course is designed for students who desire a strong foundation in toxicological concepts and principles and provides an overview of major toxins in our environment and their association with human health.
Taught by: Liu
Course usually offered in fall term
Also Offered As: NURS 677
Activity: Lecture
1 Course Unit
Notes: Undergrads need Permission

PUBH 531 Public Health Nutrition
Activity: Lecture
1 Course Unit

PUBH 534 Guns and Health
Taught by: Sorenson
Course usually offered in fall term
Also Offered As: HSOC 471
Activity: Seminar
1 Course Unit
Notes: The purpose of this course is for students to gain an understanding of the role of guns in population health. We will approach the topic with a healthy skepticism about the assumption and ideologies that dominate formal and informal discourse about the topic. We will view guns as a consumer product (and examine the life span of the product beginning with design and manufacture) and review the health outcomes of gun use. In addition, we will address key aspects of the social context in which firearms exist and within which firearm policy is made.

PUBH 535 Urban Poverty and Violence
Taught by: Bourgois
Course not offered every year
Also Offered As: ANTH 625
Activity: Seminar
1 Course Unit
Notes: This seminar examines anthropological approaches to poverty and violence through a close reading of eight ethnographies. Readings span many of the theoretical, political, sub-disciplinary and area studies debates in anthropology and the larger fields of poverty, social inequality, international development, and violence studies over the past century. My hope is to bring the subjects of urban poverty, violence, social suffering and a critique of neoliberal governmentality into the center of the disciplines of anthropology and public health specifically, and the social sciences, humanities and medicine more broadly. In the seminar we will be bringing students from anthropology, and other social science and humanities disciplines in dialogue with students in public health, science studies, and clinical medicine.

PUBH 537 Evidence-Based Health Policy
Achieving Evidence-Based Health Policy examines how research can influence health policy. Individual sessions will be devoted to topics such as the Nurse-Family Partnership program, health insurance, smoking, and early childhood mental health. Sessions will examine how selection of research methods may influence results; the dialectical relationship between research and policy; and the role of various stakeholders (the media, foundations, government, advocates) in both research and policy debates. Didactic topical research presentations will be followed by interactive discussions examining how research finds translates (or, as the case may be, do not translate) into policy. Guest speakers will include research and policy experts from the public and private sectors. Prerequisites are Fundamentals of Health Policy (offered through the Master's of Science in Health Policy); PUBH 505 Public Health Administration and Policy; or permission of instructor. Enrollment limited to 12.
Taught by: Gerdes, Zlotnik
Course usually offered in spring term
Also Offered As: HPR 610
Prerequisites: HPR 606 and PUBH 505 or permission of instructor
Activity: Lecture
1 Course Unit
PUBH 538 Qualitative Methods in Health
The purpose of this course is to expose students to a variety of qualitative approaches/methodologies that may be used in health services/policy research. In didactics we will discuss the pros and cons of various methods, explaining how the method is actually implemented (with multiple experts presenting their approaches), and pair the presentation with a broader discussion in which we compare and contrast health-oriented articles in which the method was used.
Taught by: Barg, Shea
Course usually offered summer term only
Also Offered As: HPR 503
Activity: Lecture
1 Course Unit

PUBH 539 Designing Interventions
Also Offered As: NURS 823
Activity: Seminar
1 Course Unit

PUBH 540 Go Global
Activity: Lecture
1 Course Unit

PUBH 541 Social Epi
Activity: Lecture
1 Course Unit

PUBH 545 Contemporary Issues in Maternal Child Health
Activity: Lecture
1 Course Unit

PUBH 548 Advanced Leadership Skills in Community Health
Grounded in a social justice perspective, this course aims to provide the student with a foundational overview of the field of community health and leadership skills in public health advocacy. The course encourages critical thinking about health outcomes framed by the broad context of the political and social environment. This course analyzes the range of roles and functions carried out by leaders in healthcare advocacy for marginalized communities; integrates knowledge of health policy and the key influence of government and financing on health outcomes; explores community-based participatory research and interventions as tools for change; and discuss ways to develop respectful partnerships with community organizations. An assets-based approach that draws upon the strengths of communities and their leaders provides a foundation for community-engagement skill building. The course emphasizes the development of skills and techniques to lead effective, collaborative, health-focused interventions for disenfranchised groups, including residents of urban neighborhoods.
Taught by: Margo; Klusaritz; Lipman
Course usually offered in spring term
Also Offered As: NURS 587
Prerequisite: Enrollment in a Masters or Doctoral program
Activity: Lecture
1 Course Unit
Notes: Undergraduates with permission of the instructor

PUBH 589 Pub Health & Cog Aging
Activity: Lecture
1 Course Unit

One-term course offered either term
Corequisites: For BGS Public Health Certificate students only.
Activity: Seminar
1 Course Unit

PUBH 597 History of Public Health
Taught by: Barnes
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: This masters-level seminar examines the health of human populations and the science of improving it in historical perspective. Special attention is given to the city of Philadelphia as a living laboratory of public health in the past and present. Lectures, readings and discussions cover various societies’ attempts to respond to and prevent disease since antiquity. Case studies focus on the roots of contemporary public health knowledge and policy in the nineteenth and twentieth centuries. Topics include responses to epidemics, the Bacteriological Revolution, racial and economic disparities in health, the development of policy infrastructures, and global health. Periodic field trips will be arranged to public health-related historical sites in Philadelphia and vicinity.
PUBH 598 Immersion Experience in Global Public Health
Taught by: Nguyen
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: This independent educational experience seeks to provide motivated students with the opportunity to expand their knowledge in global health through focused experiential learning at international sites that provide direct public health services. Such learning will allow students to gain real-world experience concerning the core competencies of public health (health policy, behavior/social sciences, environmental health, epidemiology, or biostatistics).

PUBH 599 Independent Study in Public Health
One-term course offered either term
Activity: Independent Study
1 Course Unit

PUBH 601 Cancer Epidemiology and Prevention
Taught by: McCarthy
Course usually offered in fall term
Prerequisites: Enrollment limited to master degree or doctoral degree students only; pubh502 or permission of the instructor required.
Activity: Lecture
1 Course Unit
Notes: This course will provide an overview of current topics in cancer epidemiology and prevention. The course will survey cancer incidence and mortality trends in the U.S. and abroad. Several major cancer risk factors will be examined, such as tobacco exposure, diet and obesity, environmental exposures, viruses, and genetics, along with primary prevention strategies. In addition, the course will review important concepts in cancer screening such as sensitivity, specificity, and lead time bias. Current issues in cancer screening will be discussed, along with controversies surrounding national cancer screening guidelines. In addition, the course will explore racial/ethnic and socioeconomic disparities in cancer incidence and mortality. A main focus of the course will be how epidemiologic evidence is used to identify causes of cancer and inform cancer prevention strategies on the individual and population level.

PUBH 602 Epi Methods Dis/Prev
Activity: Lecture

Punjabi (PUNJ)

PUNJ 404 Beginning Punjabi Part I
This course emphasizes speaking and reading skills in Punjabi. Upon completion of this course, students should be able to interact meaningfully and in a socially acceptable manner in a variety of simple situations involving everyday conversational topics. Further, students should be able to read and understand the main idea and most details of simple connected texts. This course will utilize authentic printed, audio, and video materials and will provide opportunities for natural communication both within and outside the classroom.
For BA Students: Language Course
Taught by: Gahunia
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PUNJ 405 Beginning Punjabi Part II
This course emphasizes speaking and reading skills in Punjabi. Upon completion of this course, students should be able to interact meaningfully and in a socially acceptable manner in a variety of simple situations involving everyday conversational topics. Further, students should be able to read and understand the main idea and most details of simple connected texts. This course will utilize authentic printed, audio, and video materials and will provide opportunities for natural communication both within and outside the classroom.
For BA Students: Language Course
Taught by: Gahunia
Course usually offered in spring term
Prerequisites: Beginning Punjabi Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

PUNJ 424 Intermediate Punjabi Part I
This course is designed as a continuation of Beginning Punjabi, but can also be taken by anyone who can demonstrate a similar level in proficiency of the language. The course objectives are to expand the mastery of sentence patterns and augment vocabulary and its usage through intensive grammar review and comprehension exercises. A special emphasis will also be placed on greater cultural awareness. Upon completion of this course students should be able to interact socially with added confidence and greater expressiveness. Students should also experience a great improvement in their comprehension of the spoken and written language.
For BA Students: Language Course
Taught by: Gahunia
Two terms. student must enter first term.
Activity: Lecture
1 Course Unit
PUNJ 425 Intermediate Punjabi Part II
This course is designed as a continuation of Beginning Punjabi, but can also be taken by anyone who can demonstrate a similar level in proficiency of the language. The course objectives are to expand the mastery of sentence patterns and augment vocabulary and its usage through intensive grammar review and comprehension exercises. A special emphasis will also be placed on greater cultural awareness. Upon completion of this course students should be able to interact socially with added confidence and greater expressiveness. Students should also experience a great improvement in their comprehension of the spoken and written language.
For BA Students: Last Language Course
Taught by: Gahunia
Course usually offered in spring term
Prerequisites: Intermediate Punjabi Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

PUNJ 434 Advanced Punjabi
The objective of the course is to improve proficiency in speaking, listening, reading and writing. This course addresses the individual needs of learners. The focus of the course will be to study the interpretation of written and oral materials on social, political and contemporary cultural topics from modern literature, television, internet, magazines, newspaper, music and film. Weekly written compositions and oral presentations will be assigned. Grading will be based on this.
For BA Students: Advanced Language Course
Taught by: Gahunia
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: This course is offered through the Penn Language Center.

Real Estate (REAL)

REAL 204 Real Estate Law
This course examines the fundamentals of real estate finance and development from a legal and managerial perspective. The course serves as a foundation course for real estate majors and provides an introduction to real estate for other students. It attempts to develop skills in using legal concepts in a real estate transactional setting. The course will be of interest to students contemplating careers in accounting, real estate development, real estate finance, city planning, or banking. The main topics covered may include the following: land acquisition, finance; choice of entity; tax aspects; management (leasing, environmental); disposition of real property (sale of mortgaged property, foreclosures, wraparound mortgages, sale-leasebacks); and recent legal developments.
One-term course offered either term
Also Offered As: LGST 204, LGST 804, REAL 804
Activity: Lecture
1 Course Unit

REAL 206 Urban Public Policy & Private Economic Development
This course considers a range of local policies in cities and regions. Examples include: clusters and other local development initiatives, large scale regional policies, employment zones and other targeted policies. More traditional urban policies such as zoning and planning and constraints, transportation pricing, and parking policies among many others will also be considered. Practical examples will be extremely diverse and include the Silicon Valley and attempts to copy it, the Tennessee Valley Authority, housing restrictions in developing countries such as Brazil, congestion pricing in London, etc. Students will be expected to actively participate and make presentations. The course emphasizes the importance of the economic context, the understanding of the underlying rationale for policies, and how the private agents respond to public incentives. The main learning goals are the following: be able to use simple empirical tools of economic evaluations, be able to articulate a critical analysis of competing viewpoints and assessments, and be able to integrate various analytic steps into an overall assessment of economic policies that relies on sound principles and is well argued.
Taught by: Gilles Duranton
Course usually offered in spring term
Also Offered As: BEPP 206, BEPP 772, REAL 772, REAL 972
Activity: Lecture
1 Course Unit

REAL 208 Housing Markets
This course is designed for students interested in the economics and operations of housing markets. It is primarily a U.S.-focused course, but does include a limited amount of international material for comparative purposes. The class is divided into four sections: (1) supply and demand for housing, including the operations of homebuilders and rental landlords; (2) house prices, including cycles and price dynamics; (3) international comparisons; and (4) public policy analysis applied to a current housing markets-related issue. This course presumes knowledge of intermediate economics, as we will apply that knowledge throughout the semester. For Wharton students, this means you must have passed BEPP 250 (undergrads) or MGEC 611 and 612 for MBA’s. Non-Wharton students should have taken the equivalent course in the College.
Taught by: GYOURKO
Course usually offered in spring term
Also Offered As: BEPP 208, BEPP 708, REAL 708
Prerequisites: Intermediate Punjabi (PUNJ 425 or equivalent). Managerial Economics (BEPP 250) or equivalent.
Activity: Lecture
1 Course Unit
Notes: Lecture with discussion required.

REAL 209 Real Estate Investment: Analysis and Financing
This course provides an introduction to real estate with a focus on investment and financing issues. Project evaluation, financing strategies, investment decision making and real estate capital markets are covered. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate markets. Classes are conducted in a standard lecture format with discussion required. The course contains cases that help students evaluate the impact of more complex financing and capital markets tools used in real estate. There are case studies and two midterms, (depending on instructor).
Taught by: Ferreira, Handbury, Harari, Keys, Sinai, Wong
One-term course offered either term
Also Offered As: FNCE 209, FNCE 721, REAL 721
Prerequisite: FNCE 100
Activity: Lecture
1 Course Unit
REAL 215 Urban Real Estate Economics
Urban Real Estate Economics uses economic concepts to analyze real estate markets, values and trends. The course focuses on market dynamics in the U.S. and internationally, with an emphasis on how urban growth and local and federal government policies impact urban development and real estate pricing. A group development project gives hands on experience, and invited guest speakers bring industry knowledge. Besides the group project and presentation, problem sets are required along with a midterm and an optional second exam.
Taught by: Wachter
One-term course offered either term
Also Offered As: REAL 724, REAL 945
Prerequisite: FNCE 100 & FNCE 101
Activity: Lecture
1 Course Unit

REAL 230 Urban Fiscal Policy
The purpose of this course is to examine the financing of governments in the urban economy. Topics to be covered include the causes and consequences of the urban fiscal crisis, the design of optimal tax and spending policies for local governments, funding of public infrastructures and the workings of the municipal bond market, privatization of government services, and public financial systems for emerging economies. Applications include analyses of recent financial crises, local services and taxes as important determinants of real estate prices, the infrastructure crises, financing and the provision of public education, and fiscal constitutions for new democracies using South Africa as an example.
Taught by: Inman
Course usually offered in fall term
Also Offered As: BEPP 230, BEPP 899, FNCE 230
Prerequisites: FNCE 101 and ECON 001
Activity: Lecture
1 Course Unit

REAL 236 International Housing Comparisons
This course analyzes housing finance systems and housing market outcomes across the globe. In the US, the course focuses on the development of securitization markets and addresses the current challenges of housing finance reform, including the future of Fannie Mae and Freddie Mac. Internationally, the course covers issues of access to housing and housing informality in developing countries, financial crises arising out of the housing sector, and market-oriented and public policy solutions. The course features a wide array of speakers in finance, government and academia who contribute their perspectives to pressing issues of mortgage market design.
Taught by: Wachter
Course usually offered in spring term
Also Offered As: BEPP 236, BEPP 836, REAL 836
Prerequisites: FNCE 101 MONETARY ECON & GLOBAL ECO, ECON 010 INTRO TO ECON FOR BUS
Activity: Lecture
1 Course Unit

REAL 240 Advanced Real Estate Investment and Analysis
This course is designed for majors in Real Estate, but is also open to finance-oriented students who wish a deeper analysis of real estate investment and investment analysis issues than that offered in REAL 209. The class will contain a mixture of lectures, guest speakers and case discussions. Academic research is paired with recent industry analysis of key issues in order to marry sound theory and empirical results with current events and practices. Several classes will include lectures outlining what economics and finance tell us about a number of topics. Generally, these will be followed by guest lectures from industry professionals who will focus on a specific application of the principles introduced in the lectures.
Taught by: Sinai
Course usually offered in spring term
Also Offered As: REAL 840
Prerequisite: REAL 209 or FNCE 209
Activity: Lecture
1 Course Unit

REAL 321 Real Estate Development, (see REAL 821)
One-term course offered either term
Also Offered As: ARCH 768, REAL 821
Activity: Lecture
1 Course Unit

REAL 390 International Real Estate Comparisons
As a truly non-U.S. focused course, we explore the world of cross-border real estate development, with a focus on fast growing emerging market economies. Topics will emphasize the importance of strategy and implementation in cross-border real estate investment and include: the rationale, opportunities and risks of international real estate investing; the macro factors that influence the performance of real estate markets across countries; market specific factors that impact RE investment performance (property rights, taxes, transparency, planning procedures); the qualitative aspects of identifying and achieving successful projects; and the growing market for international RE securities and strategies for portfolio management. Classes will combine a lecture on specific aspects of global cross-border RE in the first half of the class and international case presentations in the second half. Cases will be presented by leading executives in charge of major international RE projects or funds. Cases have been selected to cover different types of RE development-residential, office, retail, hospitality and logistics- important emerging market countries/continents (East/South Asia, Latin America, Sub-Saharan Africa, the Middle East) and different development and investment strategies.
Course usually offered in fall term
Also Offered As: REAL 890
Prerequisite: REAL 890 or FNCE 209
Activity: Seminar
0.5 Course Units
Notes: This class is offered in the second half of the semester.
REAL 396 Real Estate Entrepreneur
What makes a successful entrepreneur in the real estate industry? This half semester mini-course exposes undergraduates and MBA students to the broad entrepreneurial aspects of creating and executing real estate investments. The course consists of lectures by the professor, case discussions and guest lectures by leading entrepreneurs. Lectures and discussions will emphasize real estate entrepreneurship, leadership and challenges often encountered in creating successful real estate investments rather than development processes. Cases will be used to illustrate investment decision making and financial evaluations. Short written responses to questions raised in each case will be assigned. Class members are expected to engage the speakers with questions and discussion as well as explain their views on cases. Class participation and writings will each represent 50% of the grade.
One-term course offered either term
Also Offered As: REAL 891
Activity: Lecture
0.5 Course Units
Notes: Offered in the first half of the semester.

REAL 399 Student Research Seminar/Independent Study
All independent studies must be arranged and approved by a Real Estate department faculty member with the exception of the Annual Student Research Competition. Annual Student Research Seminar: This class meets in the Spring semester to analyze how to conduct research in the real estate market - where to find data; how to critique research; how to frame research questions; how to write a business research report; how to present a business research report. Topics are provided each year. For more information regarding the Annual Student Research Competition see the Real Estate Department’s website: http://real-estate.wharton.upenn.edu/.
One-term course offered either term
Activity: Independent Study
1 Course Unit

REAL 708 Housing Markets
This course is designed for students interested in the economics and operations of housing markets. It is primarily a U.S. focused course, but does include a limited amount of international material for comparative purposes. The class is divided into four sections: (1) supply and demand for housing, including the operations of homebuilders and rental landlords; (2) house prices, including cycles and price dynamics; (3) international comparisons; and (4) public policy and analysis applied to a current housing markets-related issue. This course presumes knowledge of intermediate economics, as we will apply that knowledge throughout the semester. For Wharton students, this means you must have passed BEPP 250 (undergrads) or MGEC 611 and 612 for MBA’s. Non-Wharton students should have taken the equivalent course in the College.
Taught by: GYOURKO
Course usually offered in spring term
Also Offered As: BEPP 208, BEPP 708, REAL 208
Prerequisites: Microeconomics for Managers (MGEC 611) and Microeconomics for Managers (Advanced) (MGEC 612) or equivalent.
Activity: Lecture
1 Course Unit
Notes: Lecture with discussion required.

REAL 721 Real Estate Investment: Analysis and Financing
This course provides an introduction to real estate with a focus on investment and financing issues. Project evaluation, financing strategies, investment decision making and capital markets are covered. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate markets. Classes are conducted in a standard lecture format with discussion required. The course contains cases that help students evaluate the impact of more complex financing and capital markets tools used in real estate. There are case studies and two mid-terms, (depending on instructor). Cross-listed with FNCE 721.
Taught by: Ferreira, Handbury, Harari, Keys, Sinai, Wong
One-term course offered either term
Also Offered As: FNCE 209, FNCE 721, REAL 209, REAL 944
Prerequisite: FNCE 611 or FNCE 612
Activity: Lecture
1 Course Unit
Notes: Lecture with discussion required.

REAL 723 INTRODUCTION TO REAL ESTATE
The goal of this class is to help students become informed consumers of real estate advice. The class material breaks down into four major sections: 1) The financial risk and return of property level real estate investments. Be able to interpret, understand and evaluate a real estate property investment pro forma. 2) The legal landscape for investing in real estate and using legal structures to manage risk. 3) The economics of commercial real estate markets. Understanding the forces that will determine the value and income-producing potential of a real estate investment. 4) Important real estate issues of the day.
Taught by: Sinai
One-term course offered either term
Activity: Lecture
0.5 Course Units
Notes: WEMBA COURSE

REAL 724 Urban Real Estate Economics
Urban Real Estate Economics uses economic concepts to analyze real estate markets, values, and trends. The course focuses on market dynamics in the U.S. and internationally, with an emphasis on how urban growth and local and federal government policies impact urban development and real estate pricing. A group development project gives hands on experience, and invited guest speakers bring industry knowledge. Besides the group project and presentation, problem sets are required along with a midterm and optional second exam.
Taught by: Wachter
One-term course offered either term
Also Offered As: REAL 215, REAL 945
Prerequisites: MGEC 621, Managerial Economics
Activity: Lecture
1 Course Unit
Notes: Lecture.
REAL 730 Urban Fiscal Policy
The purpose of this course is to examine the financing of governments in the urban economy. Topics to be covered include the causes and consequences of the urban fiscal crisis, the design of optimal tax and spending policies for local governments, funding of public infrastructures and the workings of the municipal bond market, privatization of government services, and public financial systems for emerging economies. Applications include analyses of recent fiscal crises, local services and taxes as important determinants of real estate prices, the infrastructure crises, financing and the provision of public education, and fiscal constitutions for new democracies using South Africa as an example.
Taught by: Inman
Course usually offered in fall term
Also Offered As: BEPP 773, FNCE 730
Prerequisites: MGEC 621, FNCE 611
Activity: Lecture
1 Course Unit
Notes: Lecture, discussion.

REAL 772 Urban Public Policy & Private Economic Development
This course considers a range of local policies in cities and regions. Examples include: clusters and other local development initiatives, large scale regional policies, employment zones and other targeted policies. More traditional urban policies such as zoning and planning and constraints, transportation pricing, and parking policies among many others will also be considered. Practical examples will be extremely diverse and include the Silicon Valley and attempts to copy it, the Tennessee Valley Authority, housing restrictions in developing countries such as Brazil, congestion pricing in London, etc. Students will be expected to actively participate and make presentations. The course emphasizes the importance of the economic context, the understanding of the underlying rationale for policies, and how the private agents respond to public incentives. The main learning goals are the following: be able to use simple empirical tools of economic evaluations, be able to articulate a critical analysis of competing viewpoints and assessments, and be able to integrate various analytic steps into an overall assessment of economic policies that relies on sound principles and is well argued.
Taught by: Gilles Duranton
Course usually offered in spring term
Also Offered As: BEPP 206, BEPP 772, REAL 206, REAL 972
Prerequisites: Microeconomics, basic familiarity with Statistics
Activity: Lecture
1 Course Unit
Notes: Although some of the material is presented by lecture, the instructor expects considerable class participation.

REAL 804 Real Estate Law
This course examines the fundamentals of real estate finance and development from a legal perspective. The course serves as a foundation course for real estate majors and provides an introduction to real estate for other students. It attempts to develop skills in using legal concepts in a real estate transactional setting. The course will be of interest to students contemplating careers in accounting, real estate development, real estate finance, city planning, or banking. The main topics covered may include the following: land acquisition, finance; choice of entity; tax aspects; management (leasing, environmental); disposition of real property (sale of mortgaged property, foreclosures, wraparound mortgages, sale-leasebacks); and recent legal developments. Format: Although some of the material is presented by lecture, the instructor expects considerable class participation. Cross-listed with LGST 804.
One-term course offered either term
Also Offered As: LGST 204, LGST 804, REAL 204
Activity: Lecture
1 Course Unit
Notes: Although some of the material is presented by lecture, the instructor expects considerable class participation.

REAL 821 Real Estate Development
This course evaluates “ground-up” development as well as re-hab, re-development, and acquisition investments. We examine raw and developed land and the similarities and differences of traditional real estate product types including office, R & D, retail, warehouses, single family and multi-family residential, mixed use, and land as well as “specialty” uses like golf courses, assisted living, and fractional share ownership. Emphasis is on concise analysis and decision making. We discuss the development process with topics including market analysis, site acquisition, due diligence, zoning, entitlements, approvals, site planning, building design, construction, financing, leasing, and ongoing management and disposition. Special topics like workouts and running a development company are also discussed. Course lessons apply to all markets but the class discusses U.S. markets only. Throughout the course, we focus on risk management and leadership issues. Numerous guest lecturers who are leaders in the real estate industry participate in the learning process. Format: predominately case analysis and discussion, some lectures, project visits.
One-term course offered either term
Also Offered As: ARCH 768, REAL 321
Prerequisites: REAL 721 OR FNCE 721. The prerequisite is STRICTLY enforced for this class unless it is undersubscribed.
Activity: Lecture
1 Course Unit
Notes: Predominately case analysis, discussion, some lectures, and project visits.
REAL 836 International Housing Comparisons
This course analyzes housing finance systems and housing market outcomes across the globe. In the US, the course focuses on development of securitization markets and addresses current challenges of housing finance reform, including the future of Fannie Mae and Freddie Mac. Internationally, the course covers issues of access to housing and housing informality in developing countries, financial crises arising out of the housing sector, and potential market-oriented and public policy solutions. The course features a wide array of speakers in finance, government and academia who contribute their perspectives to pressing issues of mortgage market design.
Taught by: Wachter
Course usually offered in spring term
Also Offered As: BEPP 236, BEPP 836, REAL 236
Prerequisites: FNCE 613 Macroeconomics and the Global Economic Environment
Activity: Lecture
1 Course Unit

REAL 840 Advanced Real Estate Investment and Analysis
This course, is designed for majors in Real Estate, but is also open to finance-oriented students who wish a deeper analysis of real estate investment and investment analysis issues than that offered in REAL/FNCE 721. The class will contain a mixture of lectures, guest speakers and case discussions. Academic research is paired with recent industry analysis of key issues in order to marry sound theory and empirical results with current events and practices. Several classes will include lectures outlining what economics and finance tell us about a number of topics. Generally, these will be followed by guest lectures from industry professionals who will focus on a specific application of the principles introduced in the lectures. Format: Lecture, industry speakers.
Taught by: Sinai
Course usually offered in spring term
Also Offered As: REAL 240
Prerequisite: REAL 721 OR FNCE 721
Activity: Lecture
1 Course Unit

REAL 890 International Real Estate Comparisons
As a truly non-U.S. focused course, we explore the world of cross-border real estate development, with a focus on fast growing emerging market economies. Topics will emphasize the importance of strategy and implementation in cross-border real estate investment and include: the rationale, opportunities and risks of international real estate investing; the macro factors that influence the performance of real estate markets across countries; market specific factors that impact RE investment performance (property rights, taxes, transparency, planning procedures); the qualitative aspects of identifying and achieving successful projects; and the growing market for international RE securities and strategies for portfolio management. Classes will combine a lecture on specific aspects of global cross-border RE in the first half of the class and international case presentations in the second half. Cases will be presented by leading executives in charge of major international RE projects or funds. Cases have been selected to cover different types of RE development-residential, office, retail, hospitality and logistics- important emerging market countries/continents (East/South Asia, Latin America, Sub-Saharan Africa, the Middle East) and different development and investment strategies.
Course usually offered in fall term
Also Offered As: REAL 390
Prerequisites: REAL 721 OR FNCE 721 or comparable knowledge/work experience.
Activity: Seminar
0.5 Course Units
Notes: This class is offered in the second half of the semester.

REAL 891 Real Estate Entrepreneurship
What makes a successful entrepreneur in the real estate industry? This half semester mini-course exposes undergraduates and MBA students to the broad entrepreneurial aspects of creating and executing real estate investments. The course consists of lectures by the professor, case discussions and guest lectures by leading entrepreneurs. Lectures and discussions will emphasize real estate entrepreneurship, leadership and challenges often encountered in creating successful real estate investments rather than development processes. Cases will be used to illustrate investment decision-making and financial evaluations. Short written responses to questions raised in each case will be assigned. Class members are expected to engage the speakers with questions and discussion as well as explain their views on cases. Class participation and writings will each represent 50% of the grade.
Course usually offered in fall term
Also Offered As: REAL 396
Activity: Lecture
0.5 Course Units
Notes: Offered in the first half of the semester.

REAL 899 Independent Study
All independent studies must be arranged and approved by a Real Estate Department faculty member with the exception of the Annual Student Research Competition. Annual Student Research Seminar: This class meets in the Spring semester to analyze how to conduct research in the real estate market, where to find data; how to critique research; how to frame research questions; how to write a business research report; how to present a business research report. Topics are provided each year. For further information regarding the Annual Student Research Competition see the Real Estate department's website: http://real-estate.wharton.upenn.edu/
One-term course offered either term
Activity: Independent Study
1 Course Unit
REAL 900 Real Estate Proseminar
Real estate is a rapidly changing and evolving field. Traditional course offerings are not always able to incorporate the most recent advances in the many areas that make up the field of real estate. In this course, the participants - both faculty and students - research and present current topics and recent advances in real estate. The content will vary depending on the participants’ interests and areas of expertise, but will typically cover urban economics, spatial issues, the economics of housing and commercial real estate markets, and real estate finance and investment. This course is intended to expand students’ awareness of current topics in real estate and to prepare them to conduct their own academic quality research. The proseminar is organized as a series of lectures by faculty and students on topics of their own choosing. These lectures may involve well-known areas of knowledge, research, and methodology, as well as subjects currently under study. The main course requirements are preparing and presenting a series of lectures on a real estate topic (subject to the organizing faculty member’s approval) and writing a research proposal that describes a workable project building upon or extending one of the topics covered in the course.
One-term course offered either term
Activity: Seminar
1 Course Unit

REAL 944 Real Estate Investment: Analysis and Financing
This course provides an introduction to real estate with a focus on investment and financing issues. Project evaluation, financing strategies, investment decision making and real estate capital markets are covered. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate markets. Classes are conducted in a standard lecture format with discussion required. The course contains cases that help students evaluate the impact of more complex financing and capital markets tools used in real estate. There are case studies and two mid-terms, (depending on instructor). All PhD students will be expected to complete a research paper in addition to the successful completion of the course examination requirements.
Taught by: Ferreira, Handbury, Harari, Keys, Sinai, Wong
One-term course offered either term
Also Offered As: FNCE 721, REAL 721
Prerequisite: FNCE 611 or FNCE 612
Activity: Lecture
1 Course Unit

REAL 945 Urban Real Estate Economics
Urban Real Estate Economics uses economic concepts to analyze real estate markets, values, and trends. The course focuses on market dynamics in the U.S. and internationally, with an emphasis on how urban growth and local and federal government policies impact urban development and real estate pricing. A group development project gives hands on experience, and invited guest speakers bring industry knowledge. Besides the group project and presentation, problem sets are required along with a midterm and optional second exam. All PhD students will be expected to complete a research paper in addition to the successful completion of the course examination requirements.
Taught by: WACHTER
One-term course offered either term
Also Offered As: REAL 215, REAL 724
Prerequisite: MGEC 601
Activity: Lecture
1 Course Unit

REAL 946 Advanced Topics in Urban Economics
This course addresses advanced topics in urban and real estate economics. The course will mix theory and empirics and will cover a broad range of topics including the modeling and estimation of agglomeration economies, land use and urban costs, transportation in cities, urban growth, migration between cities etc. The classes will mix formal presentations made by the instructor and student-led discussions of recent academic papers. In addition to presentations, students will be expected to complete a series of assignments including a short original research paper.
Taught by: FERREIRA,DURANTON
One-term course offered either term
Prerequisites: The course assumes that students have familiarity with standard first year econometrics and microeconomics.
Activity: Lecture
1 Course Unit
Notes: All PhD students will be expected to complete a research paper in addition to the successful completion of the course examination requirements.

REAL 947 Advanced Real Estate and Urban Economics
This course covers fundamental and cutting-edge topics in urban economics and real estate as well as the most important econometric issues that arise in the estimation of urban economics and real estate models. The first part of the course focuses on the application of modern econometric methods to analyze empirical questions in the broad urban economics field, which includes topics from public economics and local finances, such as household sorting and valuation of public goods. This part of the course is especially concerned about dealing with non-experimental data, and also provides a guide for tools that are useful for applied research. The second and third parts of the course examine the economic modeling and intuition of a range of topics in urban economics and real estate, such as spacial equilibrium, supply and demand of space, housing prices and cycles. In addition, special emphasis is given to how the understanding of economic theory and institutions can help any empirical analysis. At the end of the course students should have a firm grasp of theory and econometric tools that lead to convincing empirical applications. All Ph.D. students will be expected to complete a research paper in addition to the successful completion of the course examination requirements.
Taught by: Ferreira
One-term course offered either term
Activity: Lecture
1 Course Unit

REAL 962 Applied Economics Seminar
The goal of this course is to help doctoral students develop critical thinking skills through both seminar participation and writing of referee reports. To this end students will attend the Wharton Applied Economics each Wednesday at noon seminar when it meets; prepare two written referee reports on WAE papers per semester, due before the seminar is presented. After attending the seminar and the ensuing discussion of the paper, students will prepare follow-up evaluations of their referee report reports, due one week after the seminar.
Taught by: Fernando Ferreira
Two terms. student may enter either term.
Also Offered As: BEPP 962
Prerequisites: None.
Activity: Seminar
0.5 Course Units
REAL 972 Urban Public Policy & Private Economic Development
This course considers a range of local policies in cities and regions. Examples include: clusters and other local development initiatives, large scale regional policies, employment zones and other targeted policies. More traditional urban policies such as zoning and planning and constraints, transportation pricing, and parking policies among many others will also be considered. Practical examples will be extremely diverse and include the Silicon Valley and attempts to copy it, the Tennessee Valley Authority, housing restrictions in developing countries such as Brazil, congestion pricing in London, etc. Students will be expected to actively participate and make presentations. The course emphasizes the importance of the economic context, the understanding of the underlying rationale for policies, and how the private agents respond to public incentives. The main learning goals are the following: be able to use simple empirical tools of economic evaluations, be able to articulate a critical analysis of competing viewpoints and assessments, and be able to integrate various analytic steps into an overall assessment of economic policies that relies on sound principles and is well argued.

Regulation (REG)

REG 510 Introduction to Clinical and Translational Research
This introductory course lays the foundation for understanding practical aspects of conducting clinical research in an academic environment. The course is divided into two modules: Module 1: Research Methods & Protocol Development and Module 2: Regulatory Environment for Clinical Trials. The first module introduces clinical research, clinical protocols, study designs and biostatistics that underlie such studies. The second module covers ethical considerations in clinical research, study execution and oversight, and the regulatory environment for clinical research. Upon completion, students should have a strong foundation in the fundamentals of clinical research and should be able to apply contemporary research tools to clinically relevant areas of investigation.
Taught by: Emma Meagher, MD
Course usually offered in fall term
Also Offered As: MTR 510
Activity: Lecture
1 Course Unit
Notes: This course requires permission to register. Please contact Anna Greene (acgreene@upenn.edu) to register.

REG 610 Fundamentals of FDA Regulation
This introductory course provides an overview of Regulatory Affairs in relation to three key areas of development: Drugs, Biologics, and Medical Devices. The course will look at the rules governing prescription and over-the-counter drugs as well as the changes introduced by the influence of genetic engineering and biological product development. Throughout the course, practical issues facing regulatory specialists as they work with the FDA and other international regulatory bodies to secure and keep product approval will be addressed.
Taught by: Monica Ferrante
Course usually offered summer term only
Prerequisites: Permission needed to register. Contact Anna Greene (acgreene@upenn.edu) to register.
Activity: Lecture
1 Course Unit

REG 611 Clinical Study Management
This course will focus on the practical aspects of conducting clinical research in an academic environment. Upon course completion students will be able to apply scientific principles of research to the implementation and management of both investigator-initiated and industry-sponsored clinical research studies. Students will be guided through the operational aspects and regulatory processes for the three stages of study management: pre study start-up, ongoing study management and study close out. Students will learn strategies for navigating the complex regulatory/operational clinical research environment and for successful protocol development and approval, subject recruitment, data management and IRB clinical practices guiding research in humans is a critical concept that will be integrated throughout each of the lectures.
Taught by: Emma A. Meagher, MD
Activity: Lecture
1 Course Unit
REG 612 Introduction to Drug Development
This introductory course lays the foundation for conducting pharmaceutical research in many ways. It begins with a brief review of the history of drug development and explains the phases of drug development in detail. The decision making process, drug development milestones and compound progression metrics are defined and explained with examples. At the conclusion of this course, students should have a working knowledge of the drug development process, understand the regulatory basis by which new chemical entities are evaluated and ultimately approved, and appreciate the time and expense of drug development.
Taught by: Jeffrey S. Barrett, PhD, FCP
Course usually offered in spring term
Prerequisites: Undergraduates and graduate students from other departments are welcome. Please contact acgreene@upenn.edu to request permission to register.
Activity: Lecture
1 Course Unit

REG 613 Drug Development Decision Criteria
This course reviews the critical junctures over which innovative and generic drugs are evaluated and the decision criteria used to judge performance and plan next steps. The nature of the collective data under review, the decision paths and the decision makers themselves often change depending on the stage of development. This course covers decision criteria from drug discovery through post marketing and even entertains decision points for generic drugs (pharmaceutical-and bio- equivalence). Metrics for evaluation, company and regulatory expectations and the tools used to facilitate decision (e.g., modeling and simulation techniques to generate what-if scenarios) making are all discussed in detail. A key feature of the course is 7 labs which involve instructor-led decision analysis role playing. The class will be divided into small teams that review data generated at different stages to examine the thought processes and decision criteria evaluable at different stages of drug development. Labs are constructed from actual case study examples and team performance will be evaluated at the conclusion of the lab session.
Taught by: Jeffrey S. Barrett, PhD, FCP
Course usually offered in fall term
Activity: Lecture
1 Course Unit

REG 621 Cell and Gene Therapy
This course will provide students with a general overview of translational research in the area of gene and cell therapy. This includes technical considerations, translating preclinical investigation into therapeutics, the execution of gene and cell therapies clinical trials, and key regulatory issues. Entrepreneurial considerations will be discussed as well. By the end of this course, students will understand the basic technologies employed for gene and cell therapy along with approaches and pitfalls to translating these therapies into clinical applications including regulatory and commercial aspects of this emerging area.
Taught by: Michael C. Milone, MD, PhD
Course usually offered in spring term
Also Offered As: CAMB 707, MTR 621
Prerequisites: At least one course in immunology.
Activity: Lecture
1 Course Unit

REG 622 New Trends in Medicine and Vaccine Discovery
Modern drug discovery has evolved to include human genetic diagnosis and various biological approaches which has enabled progress in a variety of fields, including rare diseases, immuno-oncology, precision medicine, and biomarkers. The goal of this course is for students to understand newer treatment modalities and approaches beyond one size fits all small molecule drugs, as well as the technologies that empower them. Students will learn regulatory processes that govern medicine discovery and development and also consider business and societal aspects of medical progress. Students will be able to apply concepts directly to work in the healthcare industry. Students will be taught by experts in the field internal and external to Penn.
Taught by: Claudine Bruck, PhD
Course usually offered in fall term
Activity: Lecture
1 Course Unit

Religious Studies (RELS)

RELS 001 Religions of Asia
Summer 2012 Description: This course is an introduction to the religious traditions of Southern and Eastern Asia. It surveys the beliefs, rituals, and thought of major traditions-Hinduism, Buddhism, Confucianism, Taoism, and less well known traditions-Jainism, Zoroastrianism, Sikhism, Shintoism. The focus of the course will be on the lived experience of each tradition, looking at the worldviews, motives and aspirations of religious figures. Further, we will trace historical developments by examining moments of sharing and contestation of religious, political, and social ideas between traditions in order to question their boundaries and integrity. Special emphasis is placed on the role of the visual in each religious culture. As religions often do not draw the same boundaries between the sacred and profane as western traditions do, we will also interrogate the ways we approach the study of religion and problematize the very study of "Asian Religions" and "World Religions" in general. This course seeks to foster effective skills and to promote critical and independent inquiry into the ways the sacred has been and continues to be made, and how the vicissitudes of life are made meaningful in Asia.
For BA Students: History and Tradition Sector
Taught by: Vose
One-term course offered either term
Also Offered As: EALC 004
Activity: Lecture
1 Course Unit

RELS 002 Religions of the West
This course surveys some of the core beliefs and practices within Judaism, Christianity, and Islam. To do so, we will focus on history and memory, exploring how key figures and formative events from the past have been made present, from generation to generation, through scripture, ritual, liturgy, and remembrance. Special attention will be given to points of interaction between Jews, Christians, and Muslims, as well as to the impact of their intertwined histories on the formation and development of Western cultures. Fulfills History & Tradition Sector.

RELS 003 Religion and Literature
A consideration of how great works of literature from different cultural traditions have reclaimed and reinterpreted compelling religious themes. The focus this semester will be on themes of creation, especially the creation of human beings, from ancient myths of different cultures to modern science fiction. This course fulfills the General Requirement in Sector 3, Arts and Letters.

Notes: Theme of the course will change from term to term. See syllabus for more info.

RELS 004 Art and Religion
What is religious art and what makes art religious? This course will survey a wide variety of artistic expressions from a number of religious traditions which draw on spiritual themes, are inspired by religious experiences or texts, and which serve an important role in religious practice and belief. Some of the themes which this course will explore are: visualization and action within the cosmos, passion and religious ecstasy, the material culture of personal devotion, icons and iconoclasm, depictions of the miraculous, and the relationship between word and image. Objects and images from Christianity, Islam, Judaism, and Buddhism and will be explored along with examples from other traditions.

RELS 005 Women and Religion
This course looks at the contrast between the model of the virtuous woman, and the instructive power of the uncontrollable woman, from 1800 to present in Hinduism, Christianity, and Islam. Drawing examples from a variety of historical contexts and traditions, this course will touch on issues of religious empowerment, piety, leadership, and theoretical questions involving gender, spirituality, the body and the intersection of class status and religious performance.

RELS 007 Introduction to Africana Studies
The aim of this course is to provide an interdisciplinary examination of the complex array of African American and other African Diaspora social practices and experiences. This class will focus on both classic texts and modern works that provide an introduction to the dynamics of African American and African Diaspora thought and practice. Topics include: What is Afro-American Studies?; The History Before 1492; Creating the African Diaspora After 1500; The Challenge of Freedom; Race, Gender and Class in the 20th Century; From Black Studies to Africana Studies: The Future of Afro-American Studies.

RELS 010 Religion in Public Life
This seminar is an introduction to several aspects of the hotly debated relation between religion and public life in America. In the first half of the course we will study two books by law professors, one Jewish and the other Christian. Their debate will introduce us to the legal and historical background, and to the continuing challenges of church-state separation in America. The second half of the course will examine the claim that we now live in a "new religious America," one in which the increasing presence of Hindus, Buddhists and Muslims has created a new pluralism and a new set of challenges. We will then consider the argument of one historian that diversity and difference have characterized religious groups in America since at least the 19th century, and that this has resulted in a number of paradoxical social situations. Finally, we will close with a brief look at the claim that there exists in America a "civil religion," one that unites all citizens despite their other religious differences.

Activity: Seminar
1 Course Unit

RELS 012 Introduction to Religion
This course is an introduction to the study of religion as an academic discipline. We will consider issues such as the role of religion in human societies, how religion addresses perennial questions of life and death, and how religious traditions change, evolve, and influence one another. Although this is NOT a primarily an introduction to different religious traditions in sense of a "world religions" survey course, students will become acquainted with major teachings of several faith traditions.
Our focus, though, will be the big questions: Does religious do more good than harm or is it the other way around? Has the modern emergence of a more secular worldview been an improvement or a diminishment? Can we know or experience who or what "ultimaterality" is, or is "it" really beyond us? How can we explain the relationship religion, peace, and violence? Is suffering and meaninglessness so pervasive that no traditional concept of a loving and powerful God can be affirmed credibly? How has anything changed as we've moved from ancient to modern times in terms of our own worldviews, so that the the ways people used to think about God must be radically revised if not abandoned entirely? or are there ways for modern women and men to become or remain religious without ceasing to be modern? The goals of this freshman seminar include: 1. an enhanced working knowledge of some significant elements of religion, especially symbol, doctrine, experience, and systems of cosmic, social and order, as they are manifested in several religious traditions. 2. an enhanced capacity to make critical comparisons among religious traditions across time. 3. a greater capacity to analyze and reflect on the meaning of religious beliefs and practices. 4. a greater capacity to read and critically interpret religious and scholarly texts. 5. development of your written and verbal communication skills.

RELS 013 Gods, Ghosts, and Monsters
This course seeks to be a broad introduction. It introduces students to the diversity of doctrines held and practices performed, and art produced about "the fantastic" from earliest times to the present. The fantastic (the uncanny or supernatural) is a fundamental category in the scholarly study of religion, art, anthropology, and literature. This course will focus on both theoretical approaches to studying supernatural beings from a Religious Studies perspective while drawing examples from Buddhist, Shinto, Christian, Hindu, Jain, Zoroastrian, Egyptian, Central Asian, Native American, and Afro-Caribbean sources from earliest examples to the present including mural, image, manuscript, film, codex, and even comic books. It will also introduce students to related humanistic categories of study: material and visual culture, theology, cosmology, shamanism, transcendentalism, soteriology, eschatology, phantasmagoria, spiritualism, mysticism, theophany, and the historical power of rumor. It will serve as a gateway course into the study of Religion among numerous Asian, and East Asian Studies, as well as Visual Culture and Film Studies. It will include guest lectures from professors from several departments, as well as an extensive hands-on use of the collections of the Penn Museum of Archaeology and Anthropology and the manuscripts held in the Schoenberg Collection of Van Pelt Library. It aims to not only introduce students to major approaches, and terms in the study of religion and the supernatural, but inspire them to take more advanced courses by Ilya Vinitsky, Liliane Weissberg, Projit Mukharji, Talya Fishman, Annette Reed, David Barnes, David Spafford, Frank Chance, Michael Meister, Paul Goldin, Renata Holod, and several others.

RELS 015 The Bible as Literature
Successive generations have found the Bible to be a text which requires--even demands--extensive interpretation. This course explores the Bible as literature, considering such matters as the artistic arrangement and stylistic qualities of individual episodes as well as the larger thematic patterns of both the Old and New Testaments and the Apocrypha. A good part of the course is spent looking at the place of the Bible in cultural and literary history and the influence of such biblical figures as Adam and Eve, David, and Susanna on writers of poetry, drama, and fiction in the English and American literary traditions.

RELS 021 Religion in the African Diaspora
This introductory course examines the practices, beliefs, and deities within African-based religions in the United States and the Caribbean. While television shows such as American Horror Story presented African gods and their worshippers in pejorative ways, this course seeks to dispel these caricatures. The course will include Cuban Lukumi (Santeria), Brazilian Candomblé, Haitian Vodou, and other traditional African Religions in African Diaspora. Special attention will be paid to gender, ritual, and performance, and the growth of these religions in the United States in immigrant communities and the African American community. Film clips and YouTube videos will accompany our readings and fuel our discussion. Course requirements will include regular participation, readings, short response papers, quizzes, and a final research paper.

Activity: Seminar
1 Course Unit

RELS 024 Archaeology and the Bible
The Hebrew Bible (Tanak) and archaeological research provide distinct, and at times conflicting, accounts of the origins and development of ancient Israel and its neighbors. Religion, culture and politics ensures that such accounts of the past have significant implications for the world we live in today. In this course we will discuss the latest archaeological research from Israel, the Palestinian Territories and Jordan as it relates to the Bible, moving from Creation to the Babylonian Exile. Students will critically engage the best of both biblical and archaeological scholarship. Open discussions of the religious, social and political implications of the material covered will be an important aspect of the course.

Activity: Lecture
1 Course Unit
REL 027 Great Books of Judaism
The Babylonian Talmud (Bavli), a product reflecting the collaborative effort of generations of sages, is the foundational legal and ethical document of rabbinic Judaism. Both the methods of interpreting this text—and their theoretical frameworks—have varied dramatically, evolving creatively throughout the generations. In the past century, theories of how to read the Talmud and hypotheses about its formation and redaction have opened up new avenues for understanding what the text says and, more importantly, how it works. Through in-depth examination of demonstrative legal passages, this course will contrast the insights generated by the major critical schools of the past century and with the interpretations of selected medieval scholars, the Rishonim. English translations will be provided alongside the original texts. Previous study of the Talmud is helpful.

REL 030 Gurus, Prophets & Aliens: Understanding New Religious Movements
This course offers a thematic introduction to the history of New Religious Movements (NRM) from the mid-19th century to the present day. Often labeled as "cults" by the state and established religious institutions, new religions offer modern believers alternative spiritual and ideological solutions to age-old problems. In this class, students will be introduced to the teachings and practices of prominent NRMs in North America, Europe, Asia, and Australia, from wide-spread movements such as Scientology, Mormonism, and the Unification Church to lesser known groups such as the Church of the Almighty God, Neo-Paganism, and Raelism. We will explore the emergence of the anti-cult campaign in the second half of the 20th century, the relationship between apocalyptic sects such as the Peoples Temple and the Branch Davidians and political and social protest, and the role of Asian religions such as the Maharishi Mahesh Yogi's Transcendental Meditation in the development of New Age religiosity. In addition, we will learn how new religious movements such as Wicca and the Children of God helped reshape gender roles and changed mainstream views about sexuality, and how developments in mass media and popular culture contributed to the creation of new groups such as the Star Wars inspired Temple of the Jedi Order (Jediism), the Church of the Latter-Day Dude (Dudeism), as well as UFO religions such as Heaven's Gate. Throughout the semester, students will be exposed to a wide variety of primary and secondary sources, from academic articles and scholarly essays to documentaries, feature films, and TV shows. No previous knowledge in Religious Studies is required.

1 Course Unit

REL 031 Religion and Violence
Perhaps nothing haunts modern politics more than religious violence. Killing sprees done in the name of God reveal the limits of political power. What space is left for the rule of law when appeals to dogma and the divine supersede reason? The causes and nature of divinely motivated violence are so mystifying that they are a constant topic of debate among academics, political parties, and news commentators. What really motivates religious violence? Is it just economic of class grievances in disguise? Are all religions prone to violence? Are some religions more violent than others? Or, are religions only violent when they go awry, denying their true messages? And does religion need to be quarantined and privatized, to keep us all safe? In this course, we'll probe the dividing line separating religion from politics in an effort to better understand the causes and nature of religious violence. How do we know the difference between religious violence and political violence? What makes religion violent, and what makes violence religious?
Activity: Seminar
1 Course Unit

REL 033 Mod Catholic Christianity
At the turn of the twentieth century, Sigmund Freud hypothesized that religion was a dead duck. Many other thinkers of "modernity" have agreed with his thesis; and yet, over a century later, it is clear that religion is still a forceful presence in human culture. One religious tradition that has survived to the surprise (and even consternation) of some critics, is Roman Catholic Christianity. This Freshman Seminar will look closely at the Catholic Church in the twenty-first century, to explore the ways in which Catholicism has (and has not) adapted to modernity. We will begin with an investigation into the history of Roman Catholicism; how it is defined, and how it developed in relation to politics and culture in the Roman Empire, medieval and early modern Europe, and in the Americas; but most of the semester will focus on the Catholic Church of the past 200 years, especially as it appears in the United States. We will consider the relationship of Catholicism to many aspects of modern life, including science and technology, political systems and leaders, aesthetics (visual arts, music, literature and film), and understandings of gender and sexuality. There will be a mid-term examination and a final paper of 6 to 10 pages.

REL 103 Approaches to the Study of Mysticism
Introduction to "mysticism" as a subject of academic investigation and to selected representations in various religious traditions. Special attention to problems of definition and historical context.
One-term course offered either term
Activity: Seminar
1 Course Unit

REL 105 Religion and Film
Introduction to different ways in which religion is represented in film. Emphasis upon religious themes, but some attention to cinematic devices and strategies. Although most films studied will deal with only one of the major historical religious traditions (Hinduism, Buddhism, Judaism, Christianity and Islam), the selection will always include at least two of those traditions.
One-term course offered either term
Activity: Lecture
1 Course Unit

REL 106 Modern Religious Thought
Evil and its justifications, theodicy, are a dominant and recurring problem formodern religious thought. We will examine various explanations for the nature and origin of evil in the writings of Leibniz, Kant, Nietzsche, Arendt, and Camus along with other philosophers and religious thinkers both ancient and modern. Through close readings of primary sources and secondary materials we will trace this problem of evil from its ancient formulations to its modern instantiations. The question, "whence evil?" becomes most pertinent in an era when many ills are surmountable through education and technological improvements yet ills persist and the greatest volumes of people in human history have been slain in mass killings.
One-term course offered either term
Activity: Lecture
1 Course Unit

REL 111 God & Money
The relationship between how people understand god(s) and money has always been a complicated one. Many religions have a relationship to money, whether in offerings, asking for blessings, or to build and create places worship. God and Money explores the relationship between how religions view money, capitalism, and religion, and how movements like the prosperity gospel have expanded and complicated the interplay between religion, money and capitalism around the world.
Taught by: Butler
One-term course offered either term
Activity: Lecture
1 Course Unit

REL 112 Religious Ethics and Modern Society
Religious beliefs of Malcolm X and MLK formed their social action during the Civil Rights for African Americans. This seminar will explore the religious historical biographies of each leader, how religion shaped their public and private personas, and the transformative and transgressive role that religion played in the history of the Civil Rights movement in the United States and abroad. Students in this course will leave with a clearer understanding of religious beliefs of Christianity, The Nation of Islam, and Islam, as well as religiously based social activism. Other course emphases include the public and private roles of religion within the context of the shaping of ideas of freedom, democracy, and equality in the United States, the role of the "Black church" in depicting messages of democracy and freedom, and religious oratory as exemplified through MLK and Malcolm X.

RELS 122 History of Jewish Civilization: 17th Century to the Present
This course offers an intensive survey of the major currents in Jewish culture and society from the late middle ages to the present. Focusing upon the different societies in which Jews have lived, the course explores Jewish responses to the political, socio-economic, and cultural challenges of modernity. Topics to be covered include the political emancipation of Jews, the creation of new religious movements within Judaism, Jewish socialism, Zionism, the Holocaust, and the emergence of new Jewish communities in Israel and the United States. No prior background in Jewish history is expected.
For BA Students: History and Tradition Sector
Taught by: Wenger
Course usually offered in spring term
Also Offered As: HIST 141, JWST 158, NELC 053
Activity: Lecture
1 Course Unit

RELS 124 American Jewish Experience
This course offers a comprehensive survey of American Jewish history from the colonial period to the present. It will cover the different waves of Jewish immigration to the United States and examine the construction of Jewish political, cultural, and religious life in America. Topics will include: American Judaism, the Jewish labor movement, Jewish politics and popular culture, and the responses of American Jews to the Holocaust and the State of Israel.
Taught by: Wenger
One-term course offered either term
Also Offered As: HIST 150, JWST 130
Activity: Lecture
1 Course Unit

RELS 125 Introduction to the Bible (Old Testament)
An introduction to the major themes and ideas of the Hebrew Bible (the Old Testament), with attention to the contributions of archaeology and modern Biblical scholarship, including Biblical criticism and the response to it in Judaism and Christianity. All readings are in English.
For BA Students: Humanities and Social Science Sector
Taught by: Tigay
Course usually offered in fall term
Also Offered As: JWST 150, NELC 150
Activity: Seminar
1 Course Unit

RELS 126 Jewish Mysticism
Survey of expressions of Jewish mysticism from Hebrew Scripture through the 21st century. Topics include rabbinic concerns about mystical speculation, the ascent through the celestial chambers - heikhalot-, the Book of Creation, the relationship of Jewish philosophy and mysticism, techniques of letter permutation, schematization of the Divine Body, the prominence of gender and sexuality in kabbalistic thought, the relationship of kabbalah to the practice of the commandments, Zohar, Lurianic kabbalah, Hasidism, New-Age Jewish spirituality and the resurgence of Jewish mysticism in the 20th century. All readings will be in English translation.
For BA Students: Arts and Letters Sector
Taught by: Fishman
Course not offered every year
Also Offered As: JWST 126, NELC 186
Activity: Lecture
1 Course Unit
REL 127 Jewish Law and Ethics
An introduction to the literary and legal sources of Jewish law within an historical framework. Emphasis will be placed upon the development and dynamics of Jewish jurisprudence, and the relationship between Jewish law and social ethics.
Course usually offered in fall term
Also Offered As: JWST 152
Activity: Seminar
1 Course Unit

REL 128 Jews, Judaism, and Modernity
A survey of Jewish thinkers and movements of the modern period focusing on the historical, intellectual, and social foundations of modern Judaism. Through careful reading of primary sources in translation, students will be exposed to seminal writings that respond both to new challenges and the broader issues of religious continuity and discontinuity.
Course not offered every year
Activity: Lecture
1 Course Unit

REL 129 Themes in the Jewish Tradition
Course topics will vary; have included The Binding of Isaac, Responses to Catastrophes in Jewish History, Holy Men & Women (Ben-Amos); Rewriting the Bible (Dohrmann); Performing Judaism (Fishman); Jewish Political Thought (Fishman); Jewish Esotericism (Lorberbaum). Democratic culture assumes the democracy of knowledge - the accessibility of knowledge and its transparency. Should this always be the case? What of harmful knowledge? When are secrets necessary? In traditional Jewish thought, approaching the divine has often assumed an aura of danger. Theological knowledge was thought of as restricted. This seminar will explore the "open" and "closed" in theological knowledge, as presented in central texts of the rabbinic tradition: the Mishnah, Maimonides and the Kabbalah. Primary sources will be available in both Hebrew and English.
For BA Students: History and Tradition Sector
Taught by: Ben-Amos/Stern/Dohrmann/Fishman
One-term course offered either term
Also Offered As: JWST 100, NELC 252, NELC 552
Activity: Seminar
1 Course Unit

REL 130 How to Read the Bible
While the Bible may be the most read text in the world, it is not clear that anyone understands what it actually means. Secular scholars read the Bible as they would any other ancient document, trying to understand who wrote it and what it reveals about the past, but that is not how the Bible is understood by hundreds of millions of readers who embrace it as a message from God and read its contents not just to learn about the past but to understand what the meaning of life is, how to be a good person, and where the world is headed. How is it that the Bible is read in such different ways by the secular and the religious? Who is right in the struggle over its meaning, and how does one go about deciphering that meaning in the first place?
Taught by: WEITZMAN
Also Offered As: JWST 131, NELC 153
Activity: Seminar
1 Course Unit

REL 132 The History of God
This course introduces the history of God as understood by modern scholars of religion. Why do people believe in gods in the first place? How is the God of the Old Testament different from earlier Near Eastern deities, or different from God as represented in the New Testament and the Quran? When and why did people come to question the existence of God, and how has the idea of God changed in the last century in light of experiences like the Holocaust, social movements like feminism, and the rise of new technologies like the Internet? This course will address these questions as it surveys the approaches scholars have developed to comprehend the history of a being who would seem beyond human comprehension.
Taught by: Wietzman
Also Offered As: ANCH 133, JWST 132
Activity: Seminar
1 Course Unit

REL 133 An Introduction to Christianity
A survey of the classical Christian Traditions (Orthodoxy, Roman Catholicism, Protestant groups). The basic perspective is phenomenological, but historical and folkloric considerations are also raised. Topics include the symbols of Christian faiths, perspectives on human nature, and views of evil.
Taught by: Matter
One-term course offered either term
Activity: Seminar
1 Course Unit

REL 135 Introduction to the New Testament
What can be known - from historical perspectives - about the life and teachings of Jesus and his earliest followers? Did Jesus see himself as a teacher and/or a revolutionary and/or the messiah? If Jesus and the apostles were all Jews, how did Christianity emerge as a distinct "religion" distinct from Judaism? And how is it that this small Galilean and Judean movement came to shape world history and Western culture even to this day? This course explores these questions through a focus on the formation of the New Testament - from the letters of Paul in the early first century CE, to the collection and closure of the canon of Christian Scriptures in the fourth century CE. In the process, we will explore the lived worlds of the first followers of Jesus through readings of texts within and outside the New Testament but also through art, artifacts, and manuscripts at Penn and in Philadelphia.

RELS 136 Death and the Afterlife in Ancient Judaism and Christianity
This course surveys the development of concepts about death and the afterlife in Judaism and Christianity, exploring the cultural and socio-historical contexts of the formation of beliefs about heaven and hell, the end of the world, martyrdom, immortality, resurrection, and the problem of evil. Readings cover a broad range of ancient sources, including selections from the Hebrew Bible and New Testament, as well as other Jewish and Christian writings (e.g., "apocrypha," "pseudepigrapha," Dead Sea Scrolls, classical rabbinic literature, Church Fathers, "gnostic" and "magical" materials). In the process, this course introduces students to formative eras and ideas in the history of Judaism, Christianity, and Western culture.
One-term course offered either term
Also Offered As: JWST 136
Activity: Lecture
1 Course Unit

RELS 142 Islam in South Asian Culture
Islam reached South Asia in the eighth century and Muslim rulers held sway over large parts of the Subcontinent for much of the period from the late 12th century until the colonial period. However, the majority of the population never converted to Islam, and since independence in 1947 Islam—its interpretation, relization, and influence—has been a major factor underlying many difficult political issues. This has been true not only in the largest country, India, where Muslims form 12% (unevenly distributed) of the population, but in Bangladesh and Pakistan where non-Muslims are relatively insignificant minorities. This course explores the realities and the perceptions related to Muslim identities and the Islamic heritage in the subcontinent, and sets it in global context by comparison with other parts of the world which share various aspects of the South Asian experience. The course will conclude with an assessment of the larger significance—social, economic and political, as well as cultural—of Islam in South Asia today.
Taught by: Spooner
Course not offered every year
Also Offered As: SAST 141
Activity: Lecture
1 Course Unit

RELS 134 Introduction to Islam
This course is an introduction to Islam as a religion as it exists in societies of the past as well as the present. It explores the many ways in which Muslims have interpreted and put into practice the prophetic message of Muhammad through historical and social analyses of varying theological, philosophical, legal, political, mystical and literary writings, as well as through visual art and music. The aim of the course is to develop a framework for explaining the sources and symbols through which specific experiences and understandings have been signified as Islamic, both by Muslims and by other peoples with whom they have come into contact, with particular emphasis given to issues of gender, religious violence and changes in beliefs and behaviors which have special relevance for contemporary society.

1 Course Unit

RELS 145 Islamic History and Culture
This course introduces students to the history of Islam as both a religion and as a civilization, from pre-Islamic Arabia to the rise of the gunpowder empires in the 16th century. The course will use key moments, texts, and figures in Islamic history to examine notions of religion, culture, and civilization as they have been understood by Muslims, in a variety of contexts, as well as the problems and politics surrounding the representation of Islamic history and Islam in the contemporary world. Some major topics to be covered include the development of Islamic institutions, the participation of Jews, Christians, and others in Islamic civilization, Arabic and Persian literature, as well as Europeans’ encounters with Islam.

RELS 149 The Mullah & The Englishman - Islam in Modern South Asia
This course introduces students to Islam in modern South Asia, with a particular focus on the development of 'new' Muslim religious idioms, orientations, pedagogies and movements in 19th and 20th century South Asia. This course is divided into three parts. In the first part of this course, students are provided with an overview of: Muslim institutions and spaces in pre-colonial South Asia, the historical emergence of South Asia as a prominent global center of Islam, and the development of Urdu as an Islamic idiom. The second and main part of this course introduces students to academic literature concerning sophisticated encounters between the Muslim elite in north India and modern political and technological developments. The intimate interactions of the 'Mullah' and the 'Englishman' from the 19th to 20th century will thus be revealed to students. This part focuses upon, on the one hand, the role of Islam and pious Muslims in the colonial army, and on the other hand, Muslim initiatives to educate an Islamic 'modernism', 'traditionalism', 'fundamentalism' and 'Sufism', and appropriate print technologies for the creation of public spheres. Students will be introduced to historical scholarship revelatory of how these Muslim pedagogies and print initiatives were based upon sophisticated transcultural networks and exchange. In the third part of this course, students will be encouraged to engage with contemporary literature on South Asian Muslim political philosophy and nationalism, and the transcultural intellectual exchanges that produced key Muslim political ideologies.
Taught by: Sevea
Course usually offered in fall term
Also Offered As: RELS 549, SAST 502
Activity: Seminar
1 Course Unit
RELS 155 Introduction to Indian Philosophy
This course will take the student through the major topics of Indian philosophy by first introducing the fundamental concepts and terms that are necessary for a deeper understanding of themes that pervade the philosophical literature of India – arguments for against the existence of God, for example, the ontological status of external objects, the means of valid knowledge, standards of proof, the discourse on the aims of life. The readings will emphasize classical Hindu, Buddhist, and Jain philosophical articulations (from 700 B.C.E. to 16th century C.E.) but we will also supplement our study of these materials with contemporary or relatively recent philosophical writings in modern India.

Taught by: Patel
One-term course offered either term
Also Offered As: PHIL 050, SAST 050
Activity: Lecture
1 Course Unit

RELS 162 Epic Traditions of India
This course examines various key aspects of the epic traditions of India. The Ramayana and the Mahabharata are two great Indian epics that have deeply influenced the Indian religious and cultural ethos. The course inspects scholarly studies regarding the multiple renditions of these epics. The students will view folk performances from various regions in India that continue to bring these epics to life. These performances form a significant part of the epic tradition as they connect the stories in the epics with material realities of the Indian religious and cultural life. The course investigates the role played by the two epics, especially the Ramayana, in the Indian political discourse in both the past and the present. Beyond India, their historical birthplace, these epics traveled to South East Asian regions such as Indonesia and Malaysia. We will also consider the ways in which the traditions in these regions are similar or dissimilar to those in India. Lastly, the students will study the role of the media such as television shows, cinema, and comic books in the manifestation of these epics in popular imagination.
One-term course offered either term
Activity: Lecture
1 Course Unit

RELS 163 Introduction to Hinduism
This course introduces students to the history, texts, philosophies and rituals of South Asia’s oldest living religious traditions, represented today by the term “Hinduism.” At the same time, it problematizes the idea of a monolithic “Hindu Tradition,” in favor of an approach that recognizes several distinct, dynamic, yet symbiotic Hindu religious cultures. The course also places emphasis on the vitality of today’s Hinduism(s), and the various historical, ritual, cultural, and social contexts that they represent and constitute. The course is organized around six modules: (1) Issues in the Academic Study of Hinduism; (2) Sanskrit (textual) tradition; (3) Philosophy; (4) Theology; (5) Ritual; (6) Modernity and Contemporary Politics.

1 Course Unit

RELS 172 East Asian Religions
This course introduces religious traditions in China, Japan, and Taiwan from ancient to contemporary times, with emphases on their sociopolitical contexts, visual and material dimensions, and entanglement with gender, sexuality and the body. We will examine the history of Confucianism, Daoism, Buddhism, Shinto, as well as the practices, thoughts, and institutions that do not fall squarely into those categories. We will pay attention to the relationship between textual and oral traditions, and that between canons, rituals and the popular practices from both historical and anthropological perspectives.
Taught by: Cheng H
Also Offered As: EALC 008
Activity: Lecture
1 Course Unit

RELS 173 Introduction to Buddhism
This course seeks to introduce students to the diversity of doctrines held and practices performed by Buddhists in Asia. By focusing on how specific beliefs and practices are tied to particular locations and particular times, we will be able to explore in detail the religious institutions, artistic, architectural, and musical traditions, textual production and legal and doctrinal developments of Buddhism over time and within its socio-historical context. Religion is never divorced from its place and its time. Furthermore, by geographically and historically grounding the study of these religions we will be able to examine how their individual ethic, cosmological and soteriological systems effect local history, economics, politics, and material culture. We will concentrate first on the person of the Buddha, his many biographies and how he has been followed and worshipped in a variety of ways from Lhasa, Tibet to Phrae, Thailand. From there we touch on the foundational teachings of the Buddha with an eye to how they have evolved and transformed over time. Finally, we focus on the practice of Buddhist ritual, magic and ethics in monasteries and among lay communities in Asia and even in the West. This section will confront the way Buddhists have thought of issues such as "Just-War," Women’s Rights and Abortion. While no one quarter course could provide a detailed presentation of the beliefs and practices of Buddhism, my hope is that we will be able to look closely at certain aspects of these religions by focusing on how they are practiced in places like Nara, Japan or Vietnam, Laos.

RELS 191 Multicultural American Literature and Spirituality
This course will focus on the Multicultural Renaissance (1980-2000) when literary masterpieces appeared from African American, Native American, Asian American, and Latina/o writers such as Toni Morrison, Leslie Marmon Silko, Maxine Hong Kingston, and Rudolfo Anaya. As these writers were accepted into the canon of "American Literature," they forced the country to rethink the myth of the Manifest Destiny by updating ancient stories of Buddhism, Native American ceremonies, African religions, brought over on slave ships, and the unique blend of Christianity and indigenous spirituality that animates Mexican American Catholicism. In the 21st century, the Multicultural Renaissance continues, albeit in new forms. Television shows like "Orange is the New Black" and "Ru Paul's Drag Race" make visible and empower LGBT cultures; "Catfish" explores how cultural identities become ever more fluid in the age of the internet. Stand up comedians Key & Peel, Margaret Cho, and Ahmed Ahmed explore issues of religion, race, ethnicity, sexuality. This course will unfold against the backdrop of the 2016 election, as issues of cultural diversity divide the country, even as it becomes ever more multicultural.

RELS 204 The Graphic Novel and Religious Identities
Graphic novels and comic books express a variety of popular conceptions concerning religion and, as such, are capable of showing us where (and how) religious identities and phenomena exist in modern societies. Viewing comics as material-semiotic objects with multiple origins, audiences, and effects, this course investigates how religions, religious identity, and religious phenomena are expressed in and through the comic book. Situated at the intersection of religious studies, critical theory, media studies, and literary analysis, the course asks students to consider a number of issues and concerns, including: the appropriateness of the medium to express religious ideas, practices, texts, and histories; the different ways in which narratives of salvation and spiritual transformation are visualized; the role of alternative comix in the critique of popular religion; the use of comics as a means to proselytize, confess, memorialize, and historicize; and the cultural status of comics as material objects of religious import.

1 Course Unit

RELS 208 Native American Religion and Literature
This course will examine films by and about Native Americans. From the very beginnings of film history, Native Americans have been a centrally important subject. While much of the writing about Native American films tends to focus on the perpetuation of stereotypes, this class will concentrate on four primary themes: 1) the role that film plays in helping the audience to understand the exceedingly complex place of indigenous people in "American" identity (with "American" signifying, in this instance, a hemispheric sense of identity); 2) the myriad of ways that indigenous people have been involved in the history of film as extras, actors, directors, producers; 3) how representations changed when Native Americans took control of production; 4) the ways in which films by and about Native Americans have helped to heal the historical trauma resulting from the "Indian Wars" that have gone on for 500+ years on the North American continent.

RELS 235 Eastern Christianities
The history of Christianity is often told from the perspective of its spread westward from Israel to Rome. Yet, in the first millenium, there were more Christians living in the East, in places as far away as Persia, Yemen, India, China, and Mongolia, than in the West. Spread across the Asian continent, these Christians were actively involved in local and imperial politics, composed theological literature, and were deeply embedded in the cultural fabric of their host societies. This course traces the spread of Christianity eastward, paying particular attention to its regional developments, its negotiations with local political powers, and its contact with other religions, including Buddhism, Manichaeism, and Islam. Readings will cover a broad range of sources, including selections from classical Syriac literature, Manichaean texts, Mesopotamian magic bowls, the so-called “Jesus Sutras,” and the Quran. All readings will be provided in English, and no background is presumed.
Taught by: Han
Also Offered As: NELC 385, SAST 245
Activity: Lecture
1 Course Unit
RELS 236 The Devil’s Pact in Literature, Music and Film
For as long as we have been modern, the legend of the devil’s pact has been the preferred metaphor for the desire to surpass the limits of human knowledge and power at any cost. Starting with the sixteenth-century Faust Book, which recounts the story of a scholar, alchemist and necromancer who sold his soul to the devil, and extending to the present, this course offers students a chance to explore our enduring fascination with the forbidden.

Notes: All readings and discussions in English.

RELS 239 Death, Disease & Demons in the Medieval World
How did life end for people in the medieval world? For most, death was not considered an end point because the soul journeyed on after the end of the body. But to where did it journey? And how would it be reunited with the body in the future? Between the classical period and the High Middle Ages, death shifted from a moment of quiet release to a frightening struggle in which angels and demons lay in wait for a soul as soon as it exited the body. This course will examine these changing beliefs about dying, focusing primarily on Christian medieval Europe but drawing comparative examples from Judaism, the Roman world, and Byzantine Christianity. Other topics we will consider include martyrdom and fears of bodily dismemberment; the emergence of purgatory and depictions of the afterworld; and the development of Christian rites for the dead. We’ll also investigate beliefs about the invisible powers of demons and the apocalyptic end of times. The course will also explore not only the process by which people entered the afterlife in the Middle Ages but also the causes of their deaths—what kinds of disease primarily afflicted medieval society, and how did age, class and gender intersect with disease to affect certain populations? We will end the semester by examining that most apocalyptic of Medieval events—the Black Death—in light of recent scientific discoveries, medieval medical explanations, and social changes brought on by this demographic catastrophe. Students will be exposed to a range of primary sources as well as evidence from tombstone inscriptions, architecture and manuscript illuminations, and archaeology. No prior knowledge of Medieval history is necessary.

RELS 242 Muslim Sainthood Practices
This course aims at introducing various classical, popular and modern Muslim saints in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will learn about the major concepts initiated and circulated by these saints and their distinctive ways of dealing with spiritual aspects. While focusing on their sainthood practices, we also study the nature of the dialogue which addresses the questions such as pluralism, localism, and a new paradigm of spirituality that continually interacts with diverse modes of everyday life in South Asia. In order to understand their impact on visual and media cultures, we also watch two documentaries and compare these visual sources with sainthood literature and practices.
Taught by: Mohammad, M.A.
Also Offered As: SAST 251
Activity: Seminar
1 Course Unit

RELS 244 From Miracles to Mindfulness
In 1902, the most famous philosopher in America, William James, revolutionized the study of religion by analyzing religion as an experience rather than as a set of doctrines or scriptures. In this course, we will pick up the inquiry that James and scholars such as Sigmund Freud began by exploring new approaches to the science and philosophy of religious experience. We will invite a series of experts from a wide range of fields—neuroscience, psychoanalysis, phenomenology, psychology, anthropology, to name only a few—to present their cutting-edge research on the nature of religious experience. How can religious experience be studied? What does the research reveal about religious experience? And what can we learn from such experiences about the workings of the human mind and human society? The course has two components: 1) a discussion-centered mini-seminar from 3:30-5:00 will open consideration of the subject with help from relevant readings 2) a guest lecture series every Tuesday from 5:00-6:30, featuring leading scholars who approach religious experience from different disciplinary angles or in light of different questions.
Taught by: Steve Weitzman and Phil Webster
Also Offered As: JWST 244
Activity: Lecture
1 Course Unit

RELS 245 Sufism
This course is a survey of the large complex of Islamic intellectual and social perspectives subsumed under the term Sufism. Sufi philosophies, beliefs, practices, and social organizations have been a major part of the Islamic tradition in all historical periods and Sufism has also served as a primary muse behind Islamic aesthetic expression in poetry, music, and the visual arts. In this course, we will attempt to understand the nature and importance of Sufism by addressing both the world of ideas and socio-cultural practices. We will trace the development of Sufism as a form of Muslim piety linked to key notions in the Quran as well as living practices of venerating the Prophet Muhammad. We will then immerse ourselves in Sufi theoretical writings through a select list of primary sources introducing foundational Sufi concepts concerning the annihilation of oneself in God, and the various stages of the Sufi quest for spiritual union. From there, we will shift to a discussion of the interactions between Sufism and philosophy by looking at the writings of two of the most influential Sufi thinkers, Al-Ghazali and Ibn al-Arabi. We will also study the important role of Sufi poetry through a close reading of a selection of Rumi’s works. In our discussion of the social and political dimensions of Sufism, we will explore the relations between Sufi movements and religious and political authority, focusing on antinomianism and patronage in the Ottoman Empire, and on Sufi responses to colonial rule. The last part of the course will look at the roles of Sufis and Sufism in contemporary societies from South Asia to North America.
Taught by: Harris
Course usually offered in spring term

1 Course Unit
**RELS 246 Spirituality in the Age of Global Warming: How Can Science & the Humanities Work Together?**

We are living in the midst of one of the most severe crises in the Earth’s history. Science confirms the glaciers are melting, hurricanes are growing more intense, and the oceans are rising. But there is also a deeply spiritual dimension to global warming that does not factor into the scientific explanations. This part of the problem has been more powerfully expressed in film, literature, and art. We will be looking at films like Spike Lee’s “When the Levees Broke,” about how the people of New Orleans turned to music and storytelling to rebuild their communities in the wake of Hurricane Katrina and Linda Hogan’s novel, “Solar Storm,” which explores how Native American women draw upon spirituality to heal their community after a dam flooded their ancestral homeland. The class will also work on an ongoing research project in partnership with the Canadian government and Ojibwe First Nations who submitted a successful UNESCO World Heritage Site application to preserve the boreal forest and the Native people’s traditional knowledge about their land. The class will be working on an interactive map to document how photographs, oral histories, and artwork helped convince UNESCO to preserve the land and the Traditional Ecological Knowledge (TEK) of the people who have lived on that land for thousands of years.

**RELS 248 Introduction to Islamic Law**

This course will introduce students to classical Islamic law, the all-embracing sacred law of Islam. Among the world’s various legal systems, Islamic law may be the most widely misunderstood and even misrepresented; certainly, misconceptions about it abound. Islamic law is, however, the amazing product of a rich, fascinating and diverse cultural and intellectual tradition. Most of the readings in this course will be taken from primary sources in translation. Areas covered will include criminal law, family law, law in the Quran, gender and sexuality, the modern application of Islamic law, Islamic government and other selected topics.

**RELS 249 Re-enchanting Modernity: A Guide to Sufism in South Asia**

This undergraduate level course introduces students to Sufism in modern South Asia, with a particular focus on how Muslim ‘mystics’ and their ‘mystical’ methods interacted with modernity, colonialism, technological developments and globalization. This course is divided into three parts. In the first part of this course, students are provided with an overview of the theological and historical background of the dominant expression of Islam that came to be identified as ‘Sufism’ of ‘Islamic mysticism’, the historical development of Sufi institutions and spaces in South Asia, and the historical emergence of South Asia as a prominent global center of Sufism. The second and main part of this course introduces students to a range of anthropological and historical works that are revelatory about how Sufi in modern South Asia were and remain intimately connected to modern political and technological developments. Providing students with an overview of Sufi re-enchantments of modernity from the 19th to 21st century, this section of the course focuses upon Sufi movements and masters who perpetuated or defended customary Islam through sophisticated appropriations of technologies and print networks, and negotiations with non-Muslim rulers and societies. Moreover, students will be introduced to anthropological and historical scholarship on religious worlds in modern South Asia that were and remain steeped in ‘customary Islam’ and Sufi performances and interpretations of Islam. These sources reveal how ‘mystical’ methods of performing Sufism through ecstasy and spiritual restoration, and interpretations of dreams and visions, have regularly interacted with contemporaneous technologies. The third part of this course introduces students to the globalization of South Asian Sufism in North America, Europe and Southeast Asia. Herein, students will be encouraged to engage with anthropological and literary works pertaining to itinerant South Asian Sufi masters and their devotional cults, and introduced to active South Asian Sufi centers in Philadelphia.

RELS 256 Existential Despair
This is an experimental course that seeks to combine creative pedagogical methods and alternative scheduling to encourage intellectual reflection and emotional vulnerability through an in depth study of the way people cope with existential despair. Through a reading of memoirs, novels, poetry, and essays in an atmosphere conducive to close-reading and full-participation students will explore a wide-range of ways of coping with, describing, and comprehending moments of great despair. Lectures will explain the ritual, liturgical, homiletic, meditative, reflective, self-destructive, psycho-somatic, and ascetic ways despair is both conditioned and mitigated by different thinkers from various traditions over time. Format: This course is different from most others in that there is no homework, no class participation, no outside reading, and no research papers. There will be no work given to students or expected of them outside of class. All work is done in class and class is very long (8 hours straight, once a week, from four PM to midnight). Students will eat together in class, there will be three bathroom breaks, but there will be no internet, no phones, no computers, and no auditors. Each student must be fully committed to the class and 75% of the grade will be determined by class participation.
Taught by: McDaniel
Prerequisite: Permission needed from instructor

RELS 259 Ultimate Meanings
Does life have some ultimate meaning? In their search for an answer to this question, people tell stories—stories about the creation of the world, about great human beings confronted with the mysteries of existence, about what happens to people after death. To explore the role of stories in finding meaning in life, we will focus on some of the most meaningful stories ever composed: the biblical stories of Adam and Eve, Abraham and his family, the Exodus, Job and his friends, and the life and death of Jesus. One of our goals is to try to retrieve the original meaning of these narratives, what their authors intended, but we will also explore what they have come to mean for readers in our own day for believers and skeptics, scientists and artists, fundamentalists and feminists.

RELS 303 Power and Peril
We imagine ancient Greece and Rome as the cradles of democracy and republicanism, the early Judent as pious theocracy, but the evidence tells us that monarchy was the most common and prevalent form of government in antiquity (and the premodern world in general). Despite their ubiquity, the King was a polarizing figure—both in reality and in conception. On the one hand, some idealized the monarchy as the ideal leader, and monarchy provided the language with which to describe and even imagine the very gods—but on the other, monarchs were widely reviled in both theory and practice, from the Greek tyrant to the biblical Saul. The Emperor Augustus loudly denied his own affinity to the office of “king” even as he ruled alone and was revered as a god. In other words, kings stood for both the ideal ruler and the worst form of government. This class confronts the paradox of the King. This class will take a special look at the idea and institution of kingship in the Near East, among the Jews, Greeks, and Romans to assess and discuss similarities, differences, and mutual influences among these cultures. Through the lens of the “king” we will explore the idea of god, government, human frailty, and utopianism. Why did the rule of one prevail, why was it so attractive to so many? How was the royal rule legitimized? What role did religious beliefs play for keeping a monarchical system stable? What did people expect from their rulers and what happened if the ruler failed to fulfill these expectations? How was the concept of monarchical rule adopted and transferred into other spheres, such as religious belief systems or hopes for messianic kingship? While kingship is a rich field of scholarly inquiry, the question of its ubiquity, and the entanglement and divergences of these three cultures is rarely studied in context and comparison.

RELS 311 Muslim, Christian, and Jewish Relations in the Middle East and North Africa: Historical Perspectives
This class is a reading- and discussion-intensive seminar that addresses several recurring questions with regard to the Middle East and North Africa. How have Islam, Judaism, and Christianity influenced each other in these regions historically? How have Jews, Christians, and Muslims fared as religious minorities? To what extent have communal relations been characterized by harmony and cooperation, or by strife and discord, and how have these relations changed in different contexts over time? To what extent and under what circumstances have members of these communities converted, intermarried, formed business alliances, and adopted or developed similar customs? How has the emergence of the modern nation-state system affected communal relations as well as the legal or social status of religious minorities in particular countries? How important has religion been as one variable in social identity (along with sect, ethnicity, class, gender, etc.), and to what extent has religious identity figured into regional conflicts and wars? The focus of the class will be on the modern period (c. 1800-present) although we will read about some relevant trends in the early and middle Islamic periods as well. Students will also pursue individually tailored research to produce final papers. Prior background in Islamic studies and Middle Eastern history is required. This class is intended for juniors, seniors, and graduate students.
Taught by: Sharkey
Course not offered every year
Also Offered As: JWST 335, NELC 335
Activity: Seminar
1 Course Unit

RELS 320 Modern Jewish Intellectual and Cultural History
An overview of Jewish intellectual and cultural history from the late 18th century until the present. The course considers the Jewish enlightenment Reform, Conservative and Neo-Orthodox Judaism, Zionist and Jewish Socialist thought, and Jewish thought in the 20th century, particularly in the context of the Holocaust. Readings of primary sources including Mendelsohn, Geiger, Hirsch, Herzl, Achai-da-Am, Baeck, Buber, Kaplan, and others. No previous background is required.
Taught by: Ruderman
One-term course offered either term
Also Offered As: HIST 380, JWST 380
Activity: Lecture
3 Course Units

RELS 329 Wisdom in the Hebrew Bible
What does God want from us? Why are we here? How can we make the most of our existence? In this course we will explore how the Bible answers above questions and what this can tell us about the human condition during biblical times. Students will read select passages in the Book of Proverbs, Job and Qohelet (Ecclesiastes) in conjunction with Near Eastern texts. We will learn how ancient sages faced the uncertainties of life and the fleeting nature of human existence.

Activity: Seminar
1 Course Unit

RELS 332 Topics in Byzantine Art
Topic Varies. Fall 2017: This undergraduate seminar explores the Byzantine icon and its legacy. Spanning nearly two millennia, from the emergence of Christian sacred portraiture to the reception of icon painting by the early twentieth-century avant-garde, the seminar will introduce you to the history, historiography, and theories of the icon. While our focus will be on Byzantium and the wider world of Orthodox Christianity, the seminar will also engage with fundamental questions concerning the nature, status, and agency of images across cultures. Topics to be addressed include iconoclasm and the problem of idolatry; the social and ritual lives of icons; authorship, originality, and replication; viewer response and the cultural construction of vision; the frontier between art and the sacred image; and the afterlife of the icon in modernity.

RELS 335 St. Paul and his interpreters
Taught by: Webster
Activity: Seminar
1 Course Unit

RELS 352 Jewish Political Thought & Action
Weekly seminar explores expressions of Jewish political thought—and, where possible, political action—from biblical times to the present. Themes include the leadership of biblical priests, prophets and kings; covenant as the basis of the theocratic polity; the status of outsiders in biblical and rabbinic societies; constructions of political authority; changing understandings of Jewish "nationhood"; messianism; medieval Jewish ruminations on ideal government; the non-sovereign Jewish community's relationship to rulers; manifestations of Jewish communal autonomy; tensions between rabbinic and lay leadership; biblical Israel as a model for governance in early modern political thought; debates over Jewish Emancipation; expressions of Jewish socialism; varieties of pre-state Zionist thought; contemporary messianic Zionism; contemporary manifestations of Jewish political concerns. Primary sources (English translation) include readings from Hebrew Bible, ancient rabbinic texts, Jewish communal decrees, Moses Maimonides and other medieval Jewish thinkers; Baruch Spinoza, Moses Mendelssohn, Ber Baruchov, Theodor Herzl, Martin Buber, Rabbi Abraham Isaac Kook, Yeshayahu Leibovitz and contemporary writers. One session will take place in the Rare Book Room of Van Pelt Library. No prior knowledge is assumed.

RELS 356 Living Deliberately: Monks, Saints, and the Contemplative Life
Students who are not Religious Studies Majors and are not honors students must gain permission from instructor to enroll in this course. This is an experimental course in which students will experience monastic and ascetic ways of living. There will be no examinations, no formal papers, and very little required reading. However, each participant will need to be fully committed intellectually and participate in the monastic rules in the course involving restrictions on dress, technology, verbal communication, and food. The course subject matter is about ways in which nuns, monks, shamens, and swamis in various religious traditions (Buddhist, Muslim, Catholic, Jain, Taoist, Hindu, Animist, among others) have used poetry, meditation, mind-altering chemicals, exercise, magic, and self-torture to cope with pain and suffering, as well as struggle with spiritual, ethical, and metaphysical questions concerning the nature of the soul, the afterlife, and reality. Through monastic and spiritual practice, this course hopes to provide students with an opportunity to struggle with these questions themselves. Taught by: McDaniel Course not offered every year
Prerequisites: Students must complete an interview with instructor before acquiring a permit. Activity: Seminar 1 Course Unit

RELS 370 Corpse as Material Culture in the Study of Religion
Taught by: Toulson Activity: Seminar 1 Course Unit

RELS 399 Directed Reading
Students arrange with a faculty member to pursue a program of reading and writing on a suitable topic. One-term course offered either term Activity: Independent Study 1 Course Unit

RELS 400 The Religious Right in America
From the Scopes Monkey Trial to Sarah Palin, conservative religion figures and groups have attempted to define and shape government and public policy in the United States. This course will look at the impact of conservative religion in American Politics and the ideas, personalities, and policy it has shaped. Special attention will focus on the 2008 and 2012 Election cycles, the use of media in the Religious Right, political personalities, and grassroots organizing integral to the Religious Right and its impact on American politics. Taught by: Butler Course usually offered in fall term Activity: Seminar 1 Course Unit

RELS 409 Native American Spirituality, Health, and Contemporary Concerns
Spring 2014 Topic: "Native American Spirituality, Health, and Contemporary Concerns" will focus on traditional and contemporary conceptions of Health in four Native American communities—Lakota or Sioux, Navajo or Dine, Cherokee, and Ojibwe or Anishinaabe. The methodology will be interdisciplinary, drawing upon writings from the fields of health care, anthropology, literature, history, film studies, and religious studies. Students will learn about the the complex interrelationships between traditional knowledge systems’ and modern, western conceptions of "medicine." Some examples of this include the Lakota Ghost Dance, Navajo sand paintings, Cherokee protocols regarding sacred knowledge, and Anishinaabe herbal medicine. The readings will include anthropological studies of these forms of "medicine," a history of Indian Health Services, first hand accounts of a female Navajo doctor trained in western medicine who then returned home to practice on the Navajo reservation, studies of historical trauma resulting from the massacre of Lakota at Wounded Knee, and contemporary studies of health care on Indian reservations. Students will be evaluated on the basis of in-class presentations and two research papers. The class will also participate in an ongoing project to develop a Cultural Sensitivities workshop that is being implemented at the Indian Health Care clinic at the Cass Lake Hospital on the Leech Lake Ojibwe reservation. Taught by: Powell One-term course offered either term Also Offered As: AFRC 409, ANTH 409 Activity: Lecture 1 Course Unit

RELS 410 American Religion and the LGBTQ Experience
Taught by: Philip Francis One-term course offered either term Activity: Lecture 1 Course Unit

RELS 412 African American Spiritual Autobiography
This seminar will engage works of autobiography in the African American tradition with particular attention to the spiritual and religious contexts of the authors. We will discuss recurring themes, scriptural motifs, and religious and social tensions expressed in the works. Gender, political ideology, social activism, and religious identification will also be explored. Course not offered every year Also Offered As: AFRC 412 Activity: Seminar 1 Course Unit
RELS 418 Ancient Interpretation of the Bible
Christianity and Judaism are often called "Biblical religions" because they are believed to be founded upon the Bible. But the truth of the matter is that it was less the Bible itself than the particular ways in which the Bible was read and interpreted by Christians and Jews that shaped the development of these two religions and that also marked the difference between them. So, too, ancient Biblical interpretation—Jewish and Christian—laid the groundwork for and developed virtually all the techniques and methods that have dominated literary criticism and hermeneutics (the science of interpretation) since then. The purpose of this course is to study some of the more important ways in which the Bible was read and interpreted by Jews and Christians before the modern period, and particularly in the first six centuries in the common era. We will make a concerted effort to view these interpretive approaches not only historically but also through the lens of contemporary critical and hermeneutical theory in order to examine their contemporary relevance to literary interpretation and the use that some modern literary theorists (e.g. Bloom, Kermode, Derrida, Todorov) have made of these ancient exegetes and their methods. All readings are in English translation, and will include selections from Philo of Alexandria, the Dead Sea Scrolls, Rabbinic midrash, the New Testament and early Church Fathers, Gnostic writings, Origen, and Augustine. No previous familiarity with Biblical scholarship is required although some familiarity with the Bible itself would be helpful.
Course not offered every year
Also Offered As: COML 556, JWST 356, JWST 555, NELC 356
Activity: Seminar
1 Course Unit

RELS 419 Jewish-Christian Relations Through the Ages
This is a Bi-directional course which explores attitudes toward, and perceptions of, the religious "Other", in different periods of history. Themes include legislation regulating interactions with the Other, polemics, popular beliefs about the Other, divergent approaches to scriptural interpretation, and cross-cultural influences, witting and unwitting. Different semesters may focus on Late Antiquity, the Middle Ages, Early Modern period, or contemporary times. May be repeated for credit.

1 Course Unit

RELS 422 Jewish Intellectual and Cultural History in the Early Modern Era: From the Spanish Expulsion to Spinoza
God and Nature examines the place of the natural world, medicine, and science in Jewish thought from antiquity to the modern era. It looks especially at a body of primary sources in Hebrew written during the age of the so-called "scientific revolution" and during its aftermath. The course is a seminar open to undergraduate and graduate students with a reading knowledge of classical Hebrew. Students without Hebrew with special interest in the subject might enroll with special permission from the instructor.
Taught by: Ruderman
One-term course offered either term
Also Offered As: HIST 449, JWST 449
Activity: Seminar
1 Course Unit

RELS 426 Rabbinic Writers on Rabbinic Culture
The course traces reflections on rabbinic culture produced within Jewish legal literature of the classic rabbinic period - Midrash, Mishna and Talmud - and in later juridical genres - talmudic commentary, codes and responsa. Attention will be paid to the mechanics of different genres, the role played by the underlying prooftext, the inclusion or exclusion of variant opinions, the presence of non-legal information, the balance between precedent and innovation. Reading knowledge of Hebrew is required.
Taught by: Fishman
Course not offered every year
Also Offered As: HEBR 486, JWST 426

RELS 433 Christian Thought From 200-1000
This course introduces students to the major intellectual issues of Christianity from the period of the formulation of orthodox theology (the third to the fifth centuries), through the early medieval era, to the dawn of scholastic theology around the year 1000. Although the emphasis is on the evolution of Christian thought, several aspects of social and political history will also be considered, for example, the growth of ascetic movements and the monastic ideal, relationship between Christianity and the Roman Empire, and the role of women in Christian history. Readings will be largely from primary sources, with several secondary authors (especially Peter Brown) serving as foils to interpretation. Students will be expected to do independent research in the library and on line, beyond the assigned readings of the course.
Taught by: Matter
Course not offered every year
Prerequisites: None—some background in European history helpful.
Activity: Seminar
1 Course Unit
RELS 434 Christian Thought From 1000-1800
This course will trace the development of Christian thought (including philosophy, theology, spirituality and mysticism) from the early Scholastic period to early Methodism. Readings will be from both primary and secondary sources. A research paper will be required of each student. Spring 2014. This course will give an overview of the main currents of Western Christian thought from the first age of reform (that is, the Central Middle Ages) through the Reformations of the sixteenth century, to the eve of the Enlightenment. In these centuries, "Christendom" underwent an almost constant process of internal and external self-definition. The most striking results of this process were the definitive separation of eastern and western Christianity and the division of the western church into what became known as Protestant and Catholic Christianity. Our focus will be on the changing definitions of Christian culture, including theological formulations (definitions of orthodoxy and heterodoxy), trends of spirituality and mysticism, forms of worship, and gender roles and definitions. Attention will also be given to institutional questions such as ecclesiastical hierarchy, monasticism, scholasticism and the rise of universities, and the changing relationship between the secular and religious worlds. Readings will be from both original and secondary sources. Additional primary sources will be available online, attached to the course Blackboard page. I will supply copies of other readings. Taught by: Matter
Course not offered every year
Prerequisites: None-some background in European history helpful.
Activity: Seminar
1 Course Unit

RELS 438 Topics in Medieval History
This seminar introduces students to the development of Jewish and Christian biblical interpretation by focusing on ancient, medieval, and modern interpretations of the Sermon on the Mount. The Sermon on the Mount is part of the Gospel of Matthew and is often considered to summarize the essential teachings of Jesus of Nazareth. Students will encounter a variety of important interpreters (including Origen, John Chrysostom, Augustine of Hippo, Thomas Aquinas, Martin Luther, Leo Tolstoy, Albert Schweitzer, Dietrich Bonhoeffer, Clarence Jordan, and Hans Dieter Betz), guided by appropriate secondary sources. The seminar will utilize a combination of lecture, discussion, student presentations, reports, close reading, and a research paper. Students will be encouraged to do original research in the primary sources. This course has no prerequisites. The readings will be made available in English. The class will utilize a combination of lecture, discussion, student presentations, reports, close reading, and a research paper. Taught by: Treat
One-term course offered either term
Also Offered As: JWST 410

RELS 439 Religion, Social Justice & Urban Development
Urban development has been influenced by religious conceptions of social and economic justice. Progressive traditions within Judaism, Christianity, Islam, Buddhism, Hinduism, Jainism, Baha'i, Humanism and other religions and systems of moral thought have yielded powerful critiques of oppression and hierarchy as well as alternative economic frameworks for ownership, governance, production, labor, and community. Historical and contemporary case studies from the Americas, Europe, Africa, Asia, and the Middle East will be considered, as we examine the ways in which religious responses to poverty, inequality, and ecological destruction have generated new forms of resistance and development. Taught by: Lamas
Course usually offered in spring term
Also Offered As: AFRC 405, URBS 405
Activity: Seminar
1 Course Unit

RELS 440 Later Islamic Art & Architecture
Istanbul, Samarkand, Isfahan, Cairo and Delhi as major centers of art production in the fourteenth to seventeenth centuries. Attention is given to urban and architectural achievement as well as to the key monuments of painting and metalwork. The visual environment of the "gunpowder empires" is discussed. Taught by: Holod
Also Offered As: AAMW 531, ARTH 436, COML 417, NELC 436
Activity: Lecture
1 Course Unit

RELS 446 Digital Humanities
Penn recently opened the Price Lab for Digital Humanities as part of the universitys new strategic plan, so it is a very exciting moment for DH at Penn. This class might be considered an advanced introduction to the relatively short history of DH. It will focus on one of the questions that has vexed the field from the beginning: Why are the Digital Humanities So White? as Tara McPherson put it rather bluntly in a chapter of Debates in the Digital Humanities. The class will provide an overview of some of the foundational texts of DH, but the primary focus of the class will be involving students in a new DH project to construct an interactive timeline, built in Omeka. The spatio-temporal timeline seeks to represent Iroquois history as seen from the perspective of Iroquois scholar and Faithkeeper, Richard Hill. Hill is the director of the Deyohahage: Indigenous Knowledge Centre on the Six Nations reserve in the Grand River region of Ontario and one of the most highly regarded traditional knowledge keepers of his generation, so it is a great honor to be able to work with him. On a more theoretical level, the class will be addressing the relationship between cultural codes and digital codes. In other words, how to represent Iroquois spiritual history (i.e., mythical events) on a chronological timeline? How to represent indigenous space on maps created by the people who colonized the Iroquois (e.g., the boarder between Canada and the US cuts the Iroquois traditional homeland in half)? Students will learn how to evaluate a complex and challenging project like this, which is still in its earliest stages. On a more practical level, students will learn skills in the exhibit building software Omeka. The class will engage many different forms of history from archival documents to You Tube videos, in its study of how digital technology makes it possible to represent the indigenous oral tradition much more accurately than is possible on the printed page. Taught by: Tim Powell
Also Offered As: HIST 446
Activity: Seminar
1 Course Unit
RELS 471 Religion in Eleven Objects
This advanced course for Religious Studies majors and minors approaches the study of religion through material objects. By looking at both sacred and everyday objects like rosaries melted in atomic blasts, magical amulets used in healing rituals, temple murals defaced by invading armies, manuscript stained by flood water, we will explore the many ways people express their spiritual aspirations and existential fears through objects. Not only will a different object from a variety of religious traditions be examined each week (eleven in total), but we will also explore different methodological and theoretical approaches to the study of religion. Psychological, phenomenological, bio-genetic, sociological, art historical, discursive, post-modern, and narrative approaches will be discussed.
Taught by: Justin McDaniel
Activity: Seminar
1 Course Unit

RELS 473 Southeast Asian Buddhism
This course traces the history and development of Buddhist culture and religion in Southeast Asia. It is a discussion seminar course that examines the role of foundational texts like the Traibhumikatha and Mulasasana, as well as debating the role of kingship, magic, politics, economics, and art in the growth of Buddhism and Buddhist teachings in the region. It is open to undergraduates and graduates.

RELS 500 Theory and Method in the Study of Religion
This graduate seminar will map the theories and methods underpinning the contemporary study of religion. To draw this map, we will consider the history of the field. We'll proceed by examining how problems within religious studies have been resolved in different ways at different times, constructing a web of dialogues and debates between different figures across history. Specific topics to be considered will include experience, discourse, embodiment, feminism, postcolonialism, science, and materiality.
Taught by: Schaefer
Course not offered every year
Activity: Seminar
1 Course Unit

RELS 509 Teaching Religious Studies
Many faculty in academia, especially at a research university, think of themselves as scholars first and teachers second. The emphasis on scholarship is essential for a position at a research university, but what the culture of such institutions can obscure is the importance of teaching as part of the academic vocation. The purpose of this course is to help prepare graduate students to teach academic religious studies, not to teach them how to teach, a skill developed through experience and feedback, but to encourage students to plan in advance for their work as educators and to develop their teaching aspirations and approach in dialogue with issues and debates in Religious Studies, the Humanities and the field of Education.
Taught by: Weitzman
Course usually offered in fall term
Activity: Seminar
1 Course Unit

RELS 510 Civil Religion
In the first half of the course, we will examine the theoretical question of whether modern liberal societies need a civil religion—a concept first proposed in the late eighteenth century by the writer who feared that without some unifying ideal or principle the centrifugal forces at work in modern societies would lead them to disintegrate. We will examine various authors who have defended the idea of civil religion in these terms (including J.J. Rousseau, J.G. Herder, and G.W.F. Hegel) as well as several who (implicitly or explicitly) have rejected the argument (Max Weber, Michael Oakeshott, Daniel Bell, and Niklas Luhmann). In the second half of the class, we will turn to the American context and explore the way these arguments have played themselves out from the time of the constitutional frames to today. In this part of the class, we will read and discuss excerpts from the Federalist Papers and Tocqueville's Democracy in America, selected presidential speeches, nineteenth- and twentieth-century debates surrounding Manifest Destiny and American Exceptionalism, John Dewey/Richard Rorty's proposal for a religion of democratic "common faith," and the neoconservative case for a civil religion of "national greatness." Along the way we will also have occasion to examine sociological treatments of civil religion by such authors as Emile Durkheim, Robert Bellah, and Seymour Martin Lipset.

RELS 517 Topics in American Religion
From Marvin Gaye, to Tammy Faye Baker, to Sarah Palin and James Baldwin, Pentecostalism has influenced many, including politicians, preachers, writers, and the media. One of the fastest growing religious movements in the world, Pentecostalism continues to have a profound effect on the religious landscape. Pentecostalism's unique blend of charismatic worship, religious practices, and flamboyant, media-savvy leadership, has drawn millions into this understudied and often controversial religious movement. This course will chronicle the inception and growth of Pentecostalism in the United States, giving particular attention to beliefs, practices, gender, ethnicity, and Global Pentecostalism.

**Religious Studies (RELS)**

**RELS 519 An Introduction to Religion in South Asia**
This undergraduate-level course introduces students to the multi-religious complexion of South Asia as a region, with a particular focus upon key religious traditions and the resemblances and interactions between them. This course is divided into two parts. In the first part of this course, students are introduced to key religious traditions of South Asia, Hinduism, Buddhism, Jainism, Islam and Sikhism. Students will be encouraged to survey academic works pertaining to, on the one hand, the literature, doctrines, cosmologies, rituals and histories of, and prominent places of worship in, the Hindu, Buddhist, Jain, Muslim and Sikh religious traditions. On the other hand, the development of South Asia into a distinctive space and spiritual 'homeland' for multi-religious communities. Whilst the first part of the course focuses upon religious traditions autonomously, the subsequent section of the course is thematic and encourages students to make comparisons, and discover sophisticated relationships and dynamic interactions between religious traditions in South Asia. Students are introduced to scholarly writings that are revelatory of the materiality of religious traditions in pre-modern and modern South Asia; everyday forms of piety in South Asia; gender positions in religious traditions; encounters of religious traditions with European colonialism; and, perceptions of the 'other' in pre-modern religious traditions. Herein, students will find multiple sites of resemblances or differences, and cultural negotiations, engagements and contests, within religious traditions in South Asia.

One-term course offered either term
Also Offered As: RELS 119, SAST 529
Activity: Lecture
1 Course Unit

**RELS 520 Spirit and Law**
While accepting “the yoke of the commandments”, Jewish thinkers from antiquity onward have perennially sought to make the teachings of revelation more meaningful in their own lives. Additional impetus for this quest has come from overtly polemical challenges to the law, such as those leveled by Paul, medieval Aristotelians, Spinoza and Kant. This course explores both the critiques of Jewish Law, and Jewish reflections on the law's meaning and purpose, by examining a range of primary sources within their intellectual and historical contexts. Texts (in English translation) include selections from Midrash, Talmud, medieval Jewish philosophy and biblical exegesis, kabbalah, Hasidic homilies, Jewish responses to the Enlightenment, and contemporary attempts to re-value and invent Jewish rituals.

Taught by: Fishman

Also Offered As: HEBR 583, HIST 523, JWST 523
Prerequisites: Reading knowledge of Hebrew.
Activity: Seminar
1 Course Unit

**RELS 533 Ancient and Medieval Church History**
Many historians have argued that the most successful type of religious life in the Christian tradition is that founded by Saint Benedict of Nursia in early medieval Italy. The vision of a devout life in community dominated the medieval Christian landscape, and inspired some of the greatest classics of western Christian spirituality. This course will trace the Benedictine ideal from its roots in the Desert Fathers of the early Church, through Benedict's life and the formation of his Rule, to the role played by Benedictines in the development of medieval secular learning, theology, music, and spirituality. We will end by reading some contemporary works on the Benedictine ideal in the modern world.

Taught by: Matter

RELS 541 Religion and the Visual Image: Seeing is Believing
Seeing is Believing engages in a historical, theoretical, and cross-cultural analysis of the place of visuality in religion and of religion in visual culture. We will examine images, buildings, places, objects, performances and events. The geographical, cultural and historical scope of the material is broad, including subjects from Europe, the Islamic World, non-Muslim South Asia, the US and Latin America from the medieval period until the present. Theoretical works will be read in conjunction with representative examples to invite intellectual engagement in a socially and historically grounded way. Important issues to be covered include the relationship of visual to material culture; visual theories versus theories of vision; locating religion in human sensory experience; perception at individual and collective levels; authenticies, fakes and simulacra; iconoclasm and image veneration; aesthetics, use and utility; and things.

Taught by: Jamal Elias

Activity: Seminar
1 Course Unit

RELS 543 RELS Graduate Methodology Course
This course is an introduction to a variety of critical approaches to religion. The first part of the course will take an historical approach to the development of Religious Studies through the lens of seven foundational theorists: Muller, Marx, Weber, Durkheim, Eliade, Geertz, and Said. The second part of the course will explore contemporary approaches to these theorists, in the process discussing anthropological, sociological, and phenomenological approaches to topics of concern currently to Religious Studies. Throughout the semester, we will trace different approaches to these themes across multiple theorists. In this course, we will consider the category of 'religion' as constructed. We will cultivate a critical approach that orients itself toward the disciplinary object (and the conditions for its emergence), the disciplinary subject (and the conditions for its emergence), and their dialectical interaction. Objects and ideas will not be approached as intrinsically or exclusively religious. Rather, we will explore historical, ideological, political, and cultural dynamics.

Also Offered As: NELC 534
Prerequisite: Reading knowledge of Arabic
Activity: Seminar
1 Course Unit

RELS 549 The Mullah & The Englishman - Islam in Modern South Asia
This course introduces students to Islam in modern South Asia, with a particular focus on the development of 'new' Muslim religious idioms, orientations, pedagogies and movements in 19th and 20th century South Asia. This course is divided into three parts. In the first part of this course, students are provided with an overview of: Muslim institutions and spaces in pre-colonial South Asia, the historical emergence of South Asia as a prominent global center of Islam, and the development of Urdu as an Islamic idiom. The second and main part of this course introduces students to academic literature concerning sophisticated encounters between the Muslim elite in north India and modern political and technological developments. The intimate interactions of the 'Mullah' and the 'Englishman' from the 19th to 20th century will thus be revealed to students. This part focuses upon, on the one hand, the role of Islam and pious Muslims in the colonial army, and on the other hand, Muslim initiatives to educate an Islamic 'modernism', 'traditionalism', 'fundamentalism' and 'Sufism', and appropriate print technologies for the creation of public spheres. Students will be introduced to historical scholarship revelatory of how these Muslim pedagogies and print initiatives were based upon sophisticated transcultural networks and exchange. In the third part of this course, students will be encouraged to engage with contemporary literature on South Asian Muslim political philosophy and nationalism, and the transcultural intellectual exchanges that produced key Muslim political ideologies.

Also Offered As: RELS 149, SAST 502
Activity: Seminar
1 Course Unit

RELS 551 History of Hinduism
This course will explore the history of the religion(s) designated by the term 'Hinduism' from their earliest articulations down to the rise of modern reforms in the nineteenth century. The study of Hinduism is perhaps unique among the scholarly traditions on world religions in that it has to date had no serious connected account of its historical development, as scholars have preferred to take structural, sociological, phenomenological, and doctrinal approaches to the religion. The course, after a brief review of scholarly approaches to Hinduism and their interpretive legacies, will seek to develop a historical sense of the religion through attention to shifts in liturgy, ritual, theology, doctrine, sacrality, kingship, and soteriology. The course will include the reading of primary sources relevant to understanding these changes as well highlight both modern and premodern traditions of their interpretation. It will also consider and assess some of the key interpretive ideas in the study of Hinduism, including, Sanskritization, Great and Little Traditions, cult formation, regional and popular religious movements, and canon formation. There will also be sustained consideration of the question of religion and socio-political power as well as relations between Hinduism and other religions like Buddhism and Islam.

RELS 555 History of Print Culture in South Asia, 1600 to the present
This course asks the question: what changes with the arrival of print in South Asia? The printing press arrived in India in force in 1800, within 25 years, hundreds of publications proliferated in several South Asian languages. The adoption and response to print in South Asia offers understanding not only regarding information dissemination but also authority production among a wide range of religious and cultural groups in South Asia. We will consider critically the relationship between material culture, networks of political power, modes of authority transmission and religious meaning in South Asia from 1600 to the present. This course will start with a unit considering the techniques of manuscript knowledge reproduction and transmission across South Asia from 1600 to 1800. We will then consider the rise of the East India Company’s Press in the late 18th century, the development of print techniques, and the appearance of the private publishing company. We will then consider the rise of Lahore as a printing hub and center of print culture in the 19th century, alongside the wider entrenchment of a newspaper print network, railway and postal networks. The early 20th century sees the rise of both large urban and qasbah-based newspaper networks, alongside a thriving print culture in the context of nationalist movements and communal conversations. A final unit on the post-Partition milieu looks at the rise of digital and new medias. Crucial to our conversation will be the symbiotic role of print and formation of new boundaries around the category of religion.

1 Course Unit

RELS 571 Advanced Topics in Buddhism
This is an advanced course for upper level undergraduates and graduate students on various issues in the study of Buddhist texts, art, and history. Each semester the theme of the course changes. In recent years themes have included: Magic and Ritual, Art and Material Culture, Texts and Contexts, Manuscript Studies. Fall 2013 Topic: Buddhist repertoires (idiosyncratic and personal assemblages of beliefs, reflections, wonderings, possessions, and practices) for a large part, material and sensual. Buddhists are often sustained by their collection, production, and trading of stuff amulets, images, posters, protective drawings, CDs, calendars, films, comic books, and even Buddhist-themed pillow cases, umbrellas, and coffee mugs. Aspirations are interconnected with objects. Beliefs are articulated through objects. Objects are not empty signifiers onto which meaning is placed. The followers and the objects, the collectors and their stuff, are overlooked in the study of religion, even in many studies in the growing field of material culture and religion. What is striking is that these objects of everyday religiosity are often overlooked by art historians as well. Art historians often remove (through photography or physical movement to museums or shops) images and ritual implements from their ritual context and are seen as objets d’art.

RELS 581 How Digital Humanities Can Help Save the Planet
Students will be taught each phase of designing a sophisticated digital exhibit of museum quality. This includes choosing a platform, designing a compelling exhibit, writing metadata, learning about grant writing to support and sustain digital exhibits, and theorizing how digital technology can be used to educate the general public about the importance of preserving forests in the Anthropocene (Age of Climate Change). A significant part of the course will be dedicated to learning about Environmental Humanities including: 1) Scientific studies of climate change in the Arctic, the Amazon, the forests of North America; 2) Contemporary politics effecting the Environmental Protection Agency; 3) Why Native Americans were successful at the first standoff at Standing Rock; and 4) the Data Rescue project that Penn is participating in to save Environmental data being removed from the web by the present administration. We will also study state-of-the-art digital exhibits like the WWhat is Missing?: Creating a Global Memorial to the Planet site by Maya Lin, who designed the Vietnam Memorial in Washington D.C.

RELS 586 History of Islam in Asia
This class looks at the history of Islam across South Asia, East Asia, and Southeast Asia with a focus on the last three centuries. Contrary to the popular perception that the Middle East defines Islam, Asia has been the source of some of Islams most important social and reform movements. Students will contrast different Muslim societies over the last three centuries, examine points of confluence for geographically- or culturally-distinct Muslim peoples, and in their writing assignments focus on the history of one society in a wider Islamic context.

RELS 605 Theories of Myth
Theories of myth are the center of modern and post-modern, structural and post-structural thought. Myth has served as a vehicle and a metaphor for the formulation of a broad range of modern theories. In this course we will examine the theoretical foundations of these approaches to myth focusing on early thinkers such as Vico, and concluding with modern twentieth century scholars in several disciplines that make myth the central idea of their studies.

RELS 609 Divination and Semiotics
This seminar will explore ancient Greek (and some Roman) approaches to the arts. Greek audiences and critics alike were deeply interested in both theoretical and practical questions about the arts, especially literature. We will consider not only the philosophical tradition, but also popular notions of aesthetic value, including the varieties of audience responses and fandom. Among the authors we will study are various early Greek philosophical and sophistic thinkers, Plato, Aristotle, Hellenistic literary theorists, including Philodemus, Horace, Longinus, and selected theorists of late antiquity.

1 Course Unit

RELS 610 Religion in Public Life
This seminar is an introduction to six of the most debated areas involving religion in public life: diversity in American religions; church-state relations and the Constitution; issues in specific eastern and western religions; religious dimensions of contemporary ethical and social debates (abortion, euthanasia, minority and gender roles); religious symbolism in the public sphere; and the prevailing understandings of religion in the media and modern society. Teachers, school administrators, journalists, public policy specialists, social workers, lawyers, and health care professionals all encounter situations in which the religious sensitivities of "clients" (students, parents, readers, etc.) affect the ways in which they discharge their duties. This seminar serves as an introduction to the Religion in Public Life concentration within the Master of Liberal Arts Program, which is designed to provide professionals with an understanding of the many historical, social and legal issues that complicate discussions of religion in public situations.

RELS 620 Godliness, Miracles, Madness
This graduate-level course introduces students to religious worlds within port cities of the modern Indian Ocean that were centered upon peripatetic Muslim, Savia, Christian and Sikh miracle-workers, missionaries and 'gods.' This course will particularly consider how extant, published sources reveal how religion in the 19th and 20th century cosmopolitan port cities and islands: was centered upon holy men and women or spiritual beings, and intricately connected to modern economic, political and technological developments in the India Ocean. On the other hand, to anthropological, historical and literary works on Muslim saints, Christian missionaries and Saiva gods in the Indian Ocean. In the second and main section of this course, students will be introduced to contemporary academic literature pertaining to the inter-linkages between itinerant miracle-workers, missionaries, 'gods' and devotional cults, and economic, political and technological developments in the Indian Ocean. As well as works that explore European institutions, barracks, plantations, cells, and asylums, and steam travel being steeped in customary religion, carnivals, ecstasy, madness and miracle stories. Here, students will be encouraged to consider ways in which a study of religion and religious economies of modern Indian Ocean port cities can be recovered through extracts from a range of anthropological, literary and historical sources. In the third part of this course, students will be encouraged to engage with the question of whether the religion of devotional cults preoccupied with the powers of Muslim, Saiva, Christian, and Sikh miracle-workers, missionaries and 'gods' in cosmopolitan port cities, was a distinct product of circulations within the Indian Ocean.

RELS 632 Hinduism & Colonial Modernity
This seminar deals with the question of modernity in South Asia, with a specific focus on the construction, dissemination, and politicization of Hinduism in nineteenth and twentieth century India. It focuses on three central heuristic lenses—namely those of European imperialism, Orientalism, and nationalism—to study modernity and its discontents. What was at stake in the encounter between colonial modernity and India's religions in nineteenth and early twentieth centuries? How did colonial and native discourses on “reform” and “revival” shape Indian religions as we understand them today? How is modern "Hinduism" inextricably hinged to early forms of cultural transnationalism, Orientalism, and incipient forms of nationalism? This seminar approaches questions such as these and others, with an eye to understanding how nineteenth and early twentieth century discourses continue to shape contemporary understandings of Hinduism in deep and highly politicized ways.

Activity: Seminar
1 Course Unit
RELS 643 The Persian Intellectual Tradition
What makes Persian culture distinctive within broader Islamic intellectual history, and what constitutes the historical and geographical boundary of the Persianate intellectual and cultural zone? These questions lie at the center of inquiry in this seminar in which participants will read and discuss a broad range of works from the 11th to the 20th centuries. Readings will include works on philosophy and language, Sufi epic poems, religious and cultural geographies, accounts of natural and manufactured wonders, urban and political histories, as well as other kinds of texts. All readings will be in English for the regular meeting of the seminar; students with a reading knowledge of Persian and an interest in participating in an additional meeting to read the assignments in their original language should register for the higher of the two numbers listed for this course.

RELS 670 Religious Bodies and Sex in South Asia
This graduate-level course introduces students to the writings of key religious scholars in modern South Asia who associated the regeneration of Hinduism, Islam, and Sikhism with the cultivation of bodies and sexual practices. Particular attention will be paid towards religious texts produced in modern India, Pakistan and Bangladesh pertaining to sexual bodies, exercises and health; celibacy; body-building; the transmission of sexual knowledge; and the political roles of the ‘Hindu’, ‘Muslim’ and ‘Sikh’ body. In this course, students will be encouraged to engage a range of sources including religio-sexual manuals, autobiographies, novels, speeches, pamphlets, official records, recipes and films. Moreover, students will be introduced to the academic literature on South Asian religious scholars and ‘sex gurus’ in South and Southeast Asia; religious sexuality in South Asia, Southeast Asia, the Middle East and Europe; and, the transcultural literary networks that led to the production of religio-sexual texts in modern South Asia.

RELS 702 Topics in Medieval Art
Spring 2017: For the Christians of Medieval Europe, pilgrimages were one of the key embodied experiences of faith. Reliquaries, churches with their welcoming portals, manuscripts and music: all were crafted to augment the corporeal experience of the divine. This seminar will take the material culture surrounding the relic and its veneration as a lens for exploring the Middle Ages, from the Early Christian to the High Gothic. Cross-disciplinary methodologies and cross-cultural examples will be considered to advance our understanding of these phenomena. While proceeding chronologically, each week will focus on a distinct strategy for shaping the interaction between faith and matter.

ROML 690 Language Teaching and Learning
This is a year-long course required of all first-year Teaching Assistants in French and Italian. It is designed to provide new instructors with the necessary practical support to carry out their teaching responsibilities effectively. It will also introduce students to various approaches to foreign language teaching as well as to current issues in second language acquisition.
Course not offered every year
Also Offered As: FREN 601, ITAL 690
Activity: Seminar
1 Course Unit

ROML 691 Technology and Foreign Languages
This course will introduce participants to the field of technology and foreign language teaching and learning. It will review the pertinent theoretical underpinnings for the pedagogically-sound use of technology in the teaching of languages starting with a brief overview of the historical development of the field. Students will learn to evaluate existing programs and applications with a critical eye through a systematic examination of projects which have been implemented both here at Penn and elsewhere. The course will also have weekly hands-on workshops to introduce participants to the design and development of multimedia materials, including image, video and sound editing. The focus will be primarily on Web-based design and delivery. All participants will select a project to work on during the course of the semester; in addition they develop an online teaching portfolio.
Course not offered every year
Also Offered As: EDUC 673, GRMN 517
Prerequisite: Romance Languages 690 or its equivalent
Activity: Seminar
1 Course Unit
RUSS 001 Elementary Russian I
This course develops elementary skills in reading, speaking, understanding and writing the Russian language. We will work with an exciting range of authentic written materials, the Internet, videos and recordings relating to the dynamic scene of Russia today. At the end of the course students will be comfortable with the Russian alphabet and will be able to read simplified literary, commercial, and other types of texts (signs, menus, short news articles, short stories) and participate in elementary conversations about daily life (who you are, what you do every day, where you are from, likes and dislikes).
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: RUSS 501
Activity: Lecture
1 Course Unit

RUSS 002 Elementary Russian II
Continuation of RUSS001. Further work developing basic language skills using exciting authentic materials about life in present-day Russia. At the conclusion of the course, students will be prepared to negotiate most basic communication needs in Russia (getting around town, ordering a meal, buying goods and services, polite conversation about topics of interest) and to comprehend most texts and spoken material at a basic level.
For BA Students: Language Course
Taught by: Peeney/Alley
Course usually offered in spring term
Also Offered As: RUSS 502
Prerequisite: RUSS 001 or equivalent
Activity: Lecture
1 Course Unit

RUSS 003 Intermediate Russian I
This course will develop your ability to use the Russian language in the context of typical everyday situations, including university life, family, shopping, entertainment, etc. Role-playing, skits, short readings from literature and the current press, and video clips will be used to help students improve their language skills and their understanding of Russian culture. At the end of the semester you will be able to read and write short texts about your daily schedule and interests, to understand brief newspaper articles, films and short literary texts, and to express your opinions in Russian. In combination with RUSS 004, this course prepares students to satisfy the language competency requirement.
For BA Students: Language Course
Taught by: Peeney/Alley
Course usually offered in fall term
Also Offered As: RUSS 503
Prerequisites: RUSS 001 and 002 or placement exam.
Activity: Lecture
1 Course Unit

RUSS 004 Intermediate Russian II
A continuation of RUSS003. This course will further develop your ability to use the Russian language in the context of everyday situations (including relationships, travel and geography, leisure activities) and also through reading and discussion of elementary facts about Russian history, excerpts from classic literature and the contemporary press and film excerpts. At the end of the course you will be able to negotiate most daily situations, to comprehend most spoken and written Russian, to state and defend your point of view. Successful completion of the course prepares students to satisfy the language competency requirement.
For BA Students: Last Language Course
Taught by: Peeney/Alley
Course usually offered in spring term
Also Offered As: RUSS 504
Prerequisite: RUSS 003 or placement exam
Activity: Lecture
1 Course Unit

RUSS 009 Central and Eastern Europe: Cultures, Histories, Societies
The reappearance of the concept of Central and Eastern Europe is one of the most fascinating results of the collapse of the Soviet empire. The course will provide an introduction into the study of this region its cultures, histories, and societies from the foundation of the Holy Roman Empire to the enlargement of the European Union. Students are encouraged to delve deeper into particular countries, disciplines, and sub-regions, such as Central Europe, Eastern Europe, and the Balkans, through an individual research paper and class presentations.
Taught by: Steiner/Orenstein/Verkholantsev
Course usually offered in spring term
Also Offered As: COML 010, EEUR 010
Activity: Seminar
1 Course Unit
Notes: This course is one of two required core courses for the Russian and East European Studies (REES) Major.

RUSS 010.INTRO TO RUSSIA AND EURASIA: HISTORIES, CULTURES, SOCIETIES
This course is designed as a broad introduction to the study of Russia and Eurasia that will offer students a multi-disciplinary overview of the cultures, histories and societies of this large and diverse region of the world. It is organized in units that illustrate the approaches of various disciplines to the study of the region, including history, literary studies, cinema studies, art history, and social scientific inquiry. At the conclusion of the course, students will be acquainted with these various disciplinary frameworks and the differences between them, with the modes of analysis and writing that pertain to them, and with fundamental knowledge of the region. They will be prepared for further study of the region in a variety of programs of study, including the Russian and East European Studies major, for which the course serves as a foundation.

Activity: Lecture
1 Course Unit
RUSS 048 The Rise and Fall of the Russian Empire, 1552-1917
How and why did Russia become the center of the world's largest empire, a single state encompassing eleven time zones and over a hundred ethnic groups? To answer this question, we will explore the rise of a distinct political culture beginning in medieval Muscovy, its transformation under the impact of a prolonged encounter with European civilization, and the various attempts to re-form Russia from above and below prior to the Revolution of 1917. Main themes include the facade vs. the reality of central authority, the intersection of foreign and domestic issues, the development of a radical intelligentsia, and the tension between empire and nation.
For BA Students: History and Tradition Sector
Taught by: Nathans/Holquist
One-term course offered either term
Also Offered As: HIST 048
Activity: Lecture
1 Course Unit

Out of an obscure, backward empire, the Soviet Union emerged to become the great political laboratory of the twentieth century. This course will trace the roots of the world's first socialist society and its attempts to recast human relations and human nature itself. Topics include the origins of the Revolution of 1917, the role of ideology in state policy and everyday life, the Soviet Union as the center of world communism, the challenge of ethnic diversity, and the reasons for the USSR's sudden implosion in 1991. Focusing on politics, society, culture, and their interaction, we will examine the rulers (from Lenin to Gorbachev) as well as the ruled (peasants, workers, and intellectuals; Russians and non-Russians). The course will feature discussions of selected texts, including primary sources in translation.
For BA Students: History and Tradition Sector
Taught by: Nathans/Holquist

RUSS 105 Accelerated Elementary Russian
TWO IN ONE: This is an intensive two-credit course covering two semesters of the first-year sequence (RUSS001 and 002). The course is designed for students with no background in Russian and develops language competence in speaking, reading, writing and understanding contemporary Russian. Class work emphasizes development of communication skills and cultural awareness. Together with RUSS003 and 004 fulfills Penn Language Requirement.
Course not offered every year
Activity: Lecture
2 Course Units

RUSS 107 Russian Outside the Classroom I
The goal of RUSS107 is to provide students of Russian language and students who spoke Russian at home with formalized opportunities to improve their conversation and comprehension skills while experiencing various aspects of Russian culture. There will be no weekly assignments or readings, but all students will be expected to contribute at a level equivalent to their Russian-speaking abilities both in class and on the newsletter final project. The course consists of attending regular conversation hours in addition to a tea-drinking hour in the department (F 4-5pm), film viewings, and a single outside cultural event (e.g., a concert of Russian music at the Kimmel Center).
Taught by: Yakubova
One-term course offered either term
Prerequisite: At least four semesters of Russian
Activity: Seminar
0.5 Course Units

RUSS 108 Russian Outside the Classroom II
This is a half-credit course that consists of a variety of fun and entertaining non-classroom Russian language activities. Students who have taken at least one semester of Russian will take part in: 1. Russian lunch and dinner table; 2. Russian Tea and conversation, featuring cartoons, poetry readings, music listening, news broadcast, games, cooking lessons, and informal visits by guests; 3. The Russian Film Series; 4. field trips to Russian cultural events in the area (symphony, drama, film, etc.); 5. other Russian Program events.
Taught by: Yakubova
One-term course offered either term
Prerequisites: At least four semesters of Russian, and RUSS107
Activity: Seminar
0.5 Course Units
Notes: Continuation of RUSS107.

RUSS 115 Before Transgender: Hermaphrodites in 19th Century Literature
This course provides a literary and cultural prehistory to contemporary discourses on transgender identity by focusing on the figure of the hermaphrodite in 19th Russia and the West. Far from a marginal subject, the hermaphrodite and intersex characters played central roles in the novels of Balzac, Tolstoy, Dostoevsky, and many others whose work we will read in this course. Interdisciplinary in nature, this course draws on 19th century discourses in medicine, psychology, opera, religious philosophy, and political theory to understand why characters who exist outside of the male/female gender binary feature so prominently in 19th century literature and cultural texts across a wide range of traditions (Anglophone, French, and Russian, and others.)
Taught by: Wilson
Also Offered As: GSWS 115
Activity: Lecture
1 Course Unit
RUSS 123 Russia and Eastern Europe in International Affairs
Russia and the European Union (EU) are engaged in a battle for influence in Eastern Europe. EU foreign policy towards its Eastern neighbors is based on economic integration and the carrot of membership. With the application of this powerful incentive, Central and Southeastern European countries such as Poland, Hungary, the Czech Republic, and Croatia have progressed rapidly towards integration with the EU (and NATO). Yet, given Russia's opposition to the further enlargement, membership is off the table for the large semi-Western powers such as Russia itself and Turkey and the smaller countries inhabiting an emerging buffer zone between Russia and the EU, such as Georgia, Ukraine, Azerbaijan, Moldova, and Belarus. These in-between countries find themselves subject to intense competition for influence between Eastern and Western powers. In this context, EU countries must balance their energy dependence on Russia and need for new markets and geopolitical stability with concern for human rights, democratic governance, and self-determination. What are the trade-offs implicit in the foreign policies of Russia, EU member states, and Eastern Europe? What are the best policy approaches? What are the main opportunities and obstacles?
For BA Students: Society Sector
Taught by: Orenstein
Course not offered every year
Also Offered As: EEUR 152, PSCI 267
Activity: Lecture
1 Course Unit

RUSS 125 The Adultery Novel
The object of this course is to analyze narratives of adultery from Shakespeare to the present and to develop a vocabulary for thinking critically about the literary conventions and social values that inform them. Many of the themes (of desire, transgression, suspicion, discovery) at the heart of these stories also lie at the core of many modern narratives. Is there anything special, we will ask, about the case of adultery—once called “a crime which contains within itself all others”? What might these stories teach us about the way we read in general?
By supplementing classic literary accounts by Shakespeare, Pushkin, Flaubert, Chekhov, and Proust with films and with critical analyses, we will analyze the possibilities and limitations of the different genres and forms under discussion, including novels, films, short stories, and theatre. What can these forms show us (or not show us) about desire, gender, family and social obligation? Through supplementary readings and class discussions, we will apply a range of critical approaches to place these narratives of adultery in a social and literary context, including formal analyses of narrative and style, feminist criticism, Marxist and sociological analyses of the family, and psychoanalytic understandings of desire and family life.
For BA Students: Arts and Letters Sector
Taught by: Platt
One-term course offered either term
Also Offered As: CIMS 125, COML 127, GSWS 125
Activity: Seminar
1 Course Unit
Notes: All readings and lectures in English.

RUSS 130 Russian Ghost Stories
In this course, we will read and discuss ghost stories written by some of the most well-known Russian writers. The goal of the course is threefold: to familiarize the students with brilliant and thrilling texts which represent various periods of Russian literature; to examine the artistic features of ghost stories and to explore their ideological implications. With attention to relevant scholarship (Freud, Todorov, Derrida, Greenblatt), we will pose questions about the role of the storyteller in ghost stories, and about horror and the fantastic. We will also ponder gender and class, controversy over sense and sensation, spiritual significance and major changes in attitudes toward the supernatural. We will consider the concept of the apparition as a peculiar cultural myth, which tells us about the ”dark side” of the Russian literary imagination and about the historical and political conflicts which have haunted Russian minds in previous centuries. Readings will include literary works by Pushkin, Gogol, Dostoevsky, Turgenev, Chekhov, and Bulgakov, as well as works by some lesser, yet extremely interesting, authors. We will also read excerpts from major treatises regarding spiritualism, including Swedenborg, Kant, Arthur Conan Doyle, and Mme Blavatsky. The course consists of 28 sessions ("nights") and includes film presentations and horrifying slides.
One-term course offered either term

RUSS 134 Communism
The rise and fall of Communism dominated the history of the short twentieth century from the Russian revolution of 1917 to the collapse of the Soviet Union in 1991. As a system of government, Communism is more or less dead, but its utopian ideals of liberation from exploitation and want live on. Communism remains the one political-economic system that presented, for a time, an alternative to global capitalism. In this course, students will gain an introduction to socialist and Communist political thought and explore Communist political and economic regimes their successes and failures, critics and dissidents, efforts at reform, and causes of collapse. We will learn about the remnants of Communism in China, North Korea, and Cuba and efforts of contemporary theorists to imagine a future for Communism.
For BA Students: Society Sector

Activity: Lecture
1 Course Unit

RUSS 135 Cold War: A Global History
The Cold War was more than a military confrontation between the United States and the Soviet Union: it was a global force-field within which the world developed for nearly five decades. This course will explore the Cold War as an international phenomenon, using some of the newest literature covering not only the military and diplomatic history of the period but the social and cultural impact of the confrontation between capitalism and communism. We will explore the origins of the conflict, the formation of opposing blocs, the interplay between periods of tension and détente, and the relationship between the “center” of the conflict in the North Atlantic/European area and the global “periphery”, as well as the remarkable way the Cold War ended. Curiosity about Cold War history and a willingness to explore its drama and complexity are the only prerequisites for this course. No prior knowledge of the subject is assumed.
For BA Students: Humanities and Social Science Sector
Taught by: Nathans
Also Offered As: HIST 135
Activity: Recitation
1 Course Unit
RUSS 136 Portraits of Russian Society: Art, Fiction, Drama
This course covers 19C Russian cultural and social history. Each week-long unit is organized around a single medium-length text (novella, play, memoir) which opens up a single scene of social history—birth, death, duel, courtship, tsar, and so on. Each of these main texts is accompanied by a set of supplementary materials—paintings, historical readings, cultural-analytical readings, excerpts from other literary works, etc. The object of the course is to understand the social codes and rituals that informed nineteenth-century Russian life, and to apply this knowledge in interpreting literary texts, other cultural objects, and even historical and social documents (letters, memoranda, etc.). We will attempt to understand social history and literary interpretation as separate disciplines yet also as disciplines that can inform one another. In short: we will read the social history through the text, and read the text against the social history.

Taught by: Steiner
Course usually offered in fall term
Activity: Lecture
1 Course Unit

RUSS 149 Slavery, Serfdom, and Cultures of Bondage in the U.S. and Russia
During the Cold War, the United States and Russia were locked in an ideological battle, as capitalist and communist superpowers, over the question of private property. So how did these two countries approach the most important question regarding property that ever faced human civilization: how could governments justify the treatment of its subjects, people, as property? In 1862, Russia abolished serfdom, a form of human bondage that had existed in its territories since the 11th century. Just a year later, in 1863, Abraham Lincoln signed the Emancipation Proclamation, declaring America’s slaves “then, thenceforward, and forever free.” What forces, both domestic and international, both political and cultural, influenced this near simultaneous awakening in which huge swaths of the Russian and U.S. populations were liberated?
While scholars have often sought to compare slavery and serfdom as institutions, this course does not attempt to draw connections between the two. Rather, we will focus on how the slavery/anti-slavery and serfdom/anti-serfdom debates were framed in each respective country as well as how Russia used American slavery and the U.S. used Russian serfdom to shape their own domestic debates.

RUSS 160 SEX AND SOCIALISM
This seminar examines classic and current scholarship and literature on gender and sexuality in contemporary Eastern Europe, and examines the dialogue and interchange of ideas between East and West. Although the scholarly and creative works will primarily investigate the changing status of women during the last three decades, the course will also look at changing constructions of masculinity and LGBT movements and communities in the former communist bloc. Topics will include: the woman question before 1989; gender and emerging nationalisms; visual representations in television and film; social movements; work; romance and intimacy; spirituality; and investigations into the constructed concepts of freedom and human rights.
Course not offered every year
Also Offered As: EEU 160, GSWS 160
Activity: Lecture
1 Course Unit

RUSS 165 Russian and East European Film After WWII
This course examines the Russian and East European contribution to world cinema after WWII - Stalinist aesthetics and desalinization, WWII in film, the installation of totalitarianism in Eastern Europe and the Cold War in film, the fall of the Berlin Wall, the collapse of the Soviet Union and the post-soviet condition, cinematic representations of Yugoslavia’s violent breakup; the new Romanian waive. Major filmmakers in discussion include Kalatozov, Tarkovsky, Wajda, Polanski, Forman, Mentzel, Sabo, Kusturitsa, Konchalovsky, Mikhailov and others.

1 Course Unit
RUSS 171 THE SOCIALIST CITY
This course will explore the ideology and politics of the socialist city in the Soviet Union, Eastern Europe, and the Second World. We will focus on how design professionals, politicians, and residents realized utopian socialist values in the face of national design traditions, local politics, and limited resources. Beginning with the Soviet case, the course will consider how planners and architects addressed modernization, multi-family housing, and neighborhood units in new city plans. We will consider capitals, like Moscow, as well as less well-known regional centers that had strong local identities, such as Tashkent, Belgrade, and Prague. We will examine the state's use of public spaces for commemorations and preservationists' reinterpretation of existing historic sites. In addition, we will consider how everyday residents experienced the socialist city, including its multi-family housing, shopping centers, and subway systems. We will address how citizens circumvented official state channels to obtain state housing and illegally build homes for themselves, sometimes in a folk style. The course will center on Soviet and East European cities, but also address socialist cities in Cuba and Africa whose design was influenced by transnational exchanges.
Taught by: Aplenc
Course not offered every year
Also Offered As: EEUR 171
Activity: Seminar
1 Course Unit

RUSS 189 Soviet and Post-Soviet Economy
The course will cover the development and operation of the Soviet centrally planned economy—one of the grandest social experiments of the 20th century. We will review the mechanisms of plan creation, the push for the collectivization and further development of Soviet agriculture, the role of the Soviet educational system and the performance of labor markets (including forced labor camps—GULags). We will discuss the strengths and weaknesses of the Soviet system and the causes of its collapse. Privatization, called by some “piratization,” will be one of the central issues in our consideration of the transition from central planning to a market economy in the early 1990s. Even though our main focus will be on the Soviet economy and post-Soviet transition, we will occasionally look back in time to the tsarist era and even further back to find evidence to help explain Soviet/Russian economic development.
Taught by: Vekker
Also Offered As: PPE 062
Activity: Lecture
1 Course Unit

RUSS 190 Terrorism: Russian Origins and 21st Century Methods
This course studies the emergence of organized terrorism in nineteenth-century Russia. It examines the philosophy of the terrorist struggle through its methods, causes, various codes, and manifestoes that defined its nature for the times to come. We critique intellectual movements such as nihilism, anarchism, and populism that inspired terrorism defining the political violence and disorder as beneficial acts. The issue of policing terrorism becomes central when we study a police experiment to infiltrate, delegitimize and ultimately neutralize terrorist networks in late imperial Russia. The discussions draw on the ideology and political efficacy of the conspiratorial mode of operation, terrorist tactics such as assassination and hostage-taking, the cell structure of the groups and underground incognito of the strikers, their maniacal self-denial, revolutionary asceticism, underground mentality, faceless omnipotence, and other attributes-intensifiers of its mystique.

RUSS 191 Putin's Russia: Culture, Society and History
Winston Churchill famously said that Russia "is a riddle, wrapped in a mystery, inside an enigma. Strikingly, today many informed Russians would agree: no one can provide definitive answers concerning what has driven Russian public life and politics over the past three years, as it ricocheted from the mass protests of 2011 and 2012, into the Pussy Riot scandal, then the Olympics, and most recently to the intense patriotism driving the Russian annexation of Crimea and intervention in Ukraine. In this course we will examine how Russians themselves communicate about and represent Russia and what this reveals about this complex society and its development. We will consider print journalism, novels, films, televised media, and the internetpaying close attention both to particular representations and to social institutions for their production, dissemination and consumption. Topics of special concern will include: conspiracy theories, representations of Russian history, collective identity and patriotism, intellectuals and elites, gender and sexuality, consumption and wealth. Putins Russia is an introductory level course for which no prior knowledge Russian history, culture or society is required.
All readings and screenings will be in English.

Activity: Lecture
1 Course Unit
Notes: No prior knowledge of Russian is required.

RUSS 193 War and Representation in Russia, Europe and the U.S.
Representations of war have been created for as many reasons as wars are fought: to legitimate conflict, to celebrate military prowess, to critique brutality, to mobilize popular support, to vilify an enemy, and to generate national pride. In this course we will examine literary and cinematic representations of war, produced in Russia, Europe, and the United States. Over the course of the semester we will reflect on the tension between the need for memorialization and the limits of representation: How is war represented in literature and film? How do those mediums both enable and thwart us in our attempt to capture wartime experiences? What is the relationship between perspective, politics, and representation? And finally, how is the experience of being in a war refracted through gender, race, class, and sexuality? Authors we will read in this class might include Leo Tolstoy, Harriet Beecher Stowe, Stephen Crane, Ernest Hemingway, Albert Camus, John Okada, Virginia Woolf, Kurt Vonnegut, Rabih Alameddeine, and Toni Morrison.

RUSS 195 History as Culture
The object of the course is to investigate what happens when historical events and personages are represented in cultural life. We will study plays, novels, paintings, film and television as well as a bit of history-taking us from Shakespeare to Downton Abbey. Auxiliary readings in theory and method will allow us to grapple with the deeper questions of our readings: How and why do modern societies care about the past? What is the difference between a historical novel and a work of historiography? Do different kinds of writing offer different forms of truth about human events? As we will learn, the representation of history has a history of its own, which we can trace from the renaissance up to the present day. Readings will include works by: Shakespeare, Scott, Tolstoy, Hughes, Eisenstein, Marquez, Eco and others. In the course of the semester, students will gain competence in the interpretation of literary texts from a variety of cultures and periods, and also improve their analytical writing skills.
For BA Students: Arts and Letters Sector

RUSS 196 Russian Short Story
This course studies the development of 19th and 20th century Russian literature through one of its most distinct and highly recognized genres, the short story. The readings include great masters of fiction such as Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Solzhenitsyn, and others. The course presents the best works of short fiction and situates them in a literary process that contributes to the history of a larger cultural-political context. Students will learn about the historical formation, poetic virtue, and thematic characteristics of major narrative modes such as romanticism, utopia, realism, modernism, socialist realism, and post-modernism. We critique the strategic use of various devices of literary representation such as irony, absurd, satire, grotesque, anecdote, etc. Some of the main topics and issues include: culture of the duel; the role of chance; the riddle of death; anatomy of madness; imprisonment and survival; the pathologies of St. Petersburg; terror and homo sovieticus.
Taught by: Todorov

Activity: Lecture
1 Course Unit

RUSS 201 Dostoevsky and His Legacy
This course explores the ways Fyodor Dostoevsky (1821-1881) portrays the "inner world(s)" of his characters. Dostoevsky's psychological method will be considered against the historical, ideological, and literary contexts of middle to late nineteenth-century Russia. The course consists of three parts: External World (the contexts of Dostoevsky), "Inside" Dostoevsky's World (the author's technique and ideas) and The World of Text (close reading of Crime and Punishment and The Brothers Karamazov).
Students will write three essays on various aspects of Dostoevsky's "spiritual realism."
Course usually offered in fall term
Also Offered As: COML 207
Activity: Seminar
1 Course Unit

RUSS 202 Tolstoy
Few authors have ever been able to combine their moral and artistic visions as closely as Tolstoy. Over the course of the semester, we will plot how Tolstoy's ethical concerns changed over the course of his life and how this was reflected in works, which include some of the greatest prose ever written. We will begin by surveying the majestic and far-reaching world of his novels and end with some of Tolstoy's short later works that correspond with the ascent of Tolstoyism as virtually its own religion.

Also Offered As: COML 204
Activity: Seminar
1 Course Unit
Notes: Ben Franklin Seminar

RUSS 213 Saints and Devils in Russian Literature and Tradition
This course is about Russian literary imagination, which is populated with saints and devils, believers and religious rebels, holy men and sinners. In Russia, where people's frame of mind had been formed by a mix of Eastern Orthodox Christianity and earlier pagan beliefs, the quest for faith, spirituality, and the meaning of life has invariably been connected with religious matters. How can one find the right path in life? Is humility the way to salvation? Should one live for God or for the people? Does God even exist? In "Saints and Devils" we read works of great masters of Russian literature and learn about the historic trends that have filled Russia's national character with religious and mystical spirit. We start with old Russian fanciful stories and legends of crafty demons and all-forgiving saints. The master of fantastic writing, Nikolai Gogol, will teach us how to triumph over the devil. Together with Anton Chekhov and Leo Tolstoy, we contemplate an ambivalent cultural image of woman as a victim or a sinful agent of the devil. Immersed in the world of Dostoevsky's The Brothers Karamazov, we follow the characters in their search for truth, faith, and love. In The Master and Margarita, Mikhail Bulgakov will tell us his fantastic and devilish story of Pontius Pilate and we will see for ourselves that "A man will receive his deserts in accordance with his beliefs."

RUSS 217 Russian Politics
This course will present an in-depth examination of political, economic and social change in post-Soviet Russia within a historical context. After a brief discussion of contemporary problems in Russia, the first half of the course will delve into the rise of communism in 1917, the evolution of the Soviet regime, and the tensions between ideology and practice over the seventy years of communist rule up until 1985. The second part of the course will begin with an examination of the Gorbachev period and the competing interpretations of how the events between 1985 and 1991 may have contributed to the collapse of the Soviet Union. We will then proceed to make sense of the continuities and changes in politics, economics and society in contemporary Russia. Important topics will include the confrontations accompanying the adoption of a new constitution, the emergence of competing ideologies and parties, the struggle over economic privatization, the question of federalism and nationalism, social and political implications of economic reform, and prospects for Russia's future in the Putin and post-Putin era.

RUSS 220 Russia and the West
This course will explore the representations of the West in eighteenth- and nineteenth-century Russian literature and philosophy. We will consider the Russian visions of various events and aspects of Western political and social life Revolutions, educational systems, public executions, resorts, etc. within the context of Russian intellectual history. We will examine how images of the West reflect Russia's own cultural concerns, anticipations, and biases, as well as aesthetic preoccupations and interests of Russian writers. The discussion will include literary works by Karamzin, Pushkin, Gogol, Dostoevsky, Leskov, and Tolstoy, as well as non-fictional documents, such as travelers' letters, diaries, and historiosophical treatises of Russian Freemasons, Romantic and Positivist thinkers, and Russian social philosophers of the late Nineteenth century. A basic knowledge of nineteenth-century European history is desirable. The class will consist of lectures, discussion, short writing assignments, and two in-class tests.

RUSS 222 Imagining Asia: Russia and the East
This course examines the important role of the East in Russian literature and nationalism. Focusing specifically on the Caucasus, Central Asia, Iran, and Turkey, this course will analyze how Russian writers connected the East to Russian identity, and how their approaches implicate different artistic periods (Romanticism, Realism, Socialist Realism, Post-Modernism) and different political atmospheres (Tsarist Russia, Soviet Union, Post-Soviet). Students will also ascertain how Russian literature on the East has affected and influenced literature and political movements produced in the East. In particular, students will analyze how Soviet Central Asian writers, Iranian Socialists, and contemporary Turkish writers were influenced by Russian literature and Soviet ideology. Ultimately, this course examines the impact of Russian cultural and political history in 20th century Central Asia and the Middle East.
Readings will include works by: Pushkin, Lermontov, Tolstoy, Dostoievsky, Platonov, Chingiz Aitmatov, Sadek Hedayaat, Orhan Pamuk, and others. Also Offered As: COML 217, NELC 222
Activity: Seminar
1 Course Unit

RUSS 234 Medieval Russia: Origins of Russian Cultural Identity
This course offers an overview of the cultural history of Rus from its origins to the eighteenth century, a period which laid the foundation for the Russian Empire. The course takes an interdisciplinary approach to the evolution of the main cultural paradigms of Russian Orthodoxy viewed in a broader European context. Although this course is historical in content, it is also about modern Russia. The legacy of Medieval Rus is still referenced, often allegorically, in contemporary social and cultural discourse as the Russian, Ukrainian and Belarusian societies attempt to reconstruct and reinterpret their histories. In this course, students learn that the study of the medieval cultural and political history explains many aspects of modern Russian society, its culture and mentality.

RUSS 240 Napoleonic Era and Tolstoy
In this course we will read what many consider to be the greatest book in world literature. This work, Tolstoy's War and Peace, is devoted to one of the most momentous periods in world history, the Napoleonic Era (1789-1815). We will study both the novel and the era of the Napoleonic Wars: the military campaigns of Napoleon and his opponents, the grand strategies of the age, political intrigues and diplomatic betrayals, the ideologies and human dramas, the relationship between art and history. How does literature help us to understand this era? How does history help us to understand this great novel? Because we will read War and Peace over the course of the entire semester, readings will be manageable (circa 100 pages of the epic and 50 pages of additional reading per week) and very enjoyable.
Taught by: Holquist
Course not offered every year
Also Offered As: COML 236, HIST 333
Activity: Lecture
1 Course Unit

RUSS 250 Tarkovsky's Passions
Andrei Tarkovsky is universally acknowledged to be the greatest Soviet filmmaker of the last half of the twentieth century. In Kurosawas assessment following Tarkovskys death in the late 1980s, he had no equal among film directors alive now. In Ingmar Bergmans words, Tarkovskys work was a miracle. His films are beautiful, intellectually challenging, and spiritually profound. They range from Ivans Childhood, an exploration of wartime experience through the eyes of a child; to Solaris, a philosophical essay in the form of a science-fiction thriller; to Andrei Rublev, an investigation of the power of art and spirituality. In this course, we will study Tarkovskys films and life, with attention both to his formal and artistic accomplishments, his thought and writings concerning art and film, and the cultural and political contexts of his work.

RUSS 260 USSR after Stalin
How are human behaviors and attitudes shaped in a socialist society? What forms do conformity and dissent take under a revolutionary regime? This course will explore the cultural history of the Soviet Union from the end of the Second World War to the collapse of communism in 1991. We will investigate a variety of strategies of resistance to state power as well as the sources of communisms enduring legitimacy for millions of Soviet citizens. Above all, we will be concerned with the power of the word and image in Soviet public and private life. Assigned texts will include memoirs, manifestos, underground and officially approved fiction & poetry, films, works of art, and secondary literature.

RUSS 261 Russian Thinkers
This class focuses on the complex relations between philosophy, history, and art in Russia and offers discussions of works of major Russian authors (such as Dostoevsky, Tolstoy, Khebnikov), religious and political thinkers (Chadaev, Herzen, Berdiaev, Lenin, Bogdanov), avant-garde artists (Filonov, Malevich), and composers (Scriabin) who created and tested in their lives their own, sometimes very peculiar and radical, worldviews. We will consider these worldviews against a broad cultural background and will reenact them in class in the form of philosophical mini-dramas. The only prerequisite for this course is intellectual curiosity and willingness to embrace diverse, brave and often very weird ideas.

Course not offered every year
Also Offered As: COML 255
Activity: Seminar
1 Course Unit

RUSS 275 Russian History in Film
This course draws on fictional, dramatic and cinematic representations of Russian history based on Russian as well as non-Russian sources and interpretations. The analysis targets major modes of imagining, such as narrating, showing and reenacting historical events, personae and epochs justified by different, historically mutating ideological postulates and forms of national self-consciousness. Common stereotypes of picturing Russia from "foreign" perspectives draw special attention. The discussion involves the following themes and outstanding figures: the mighty autocrats Ivan the Terrible, Peter the Great, and Catherine the Great; the tragic ruler Boris Godunov; the brazen rebel and royal impostor Pugachev; the notorious Rasputin, his uncanny powers, sex-appeal, and court machinations; Lenin and the October Revolution; images of war; times of construction and times of collapse of the Soviet Colossus.

RUSS 408 Reading Russian History
The course explores defining episodes, concepts, and figures in Russian history, from the earliest time to the present day, and their reception in today's scholarship and society. Students learn about Russian historical heritage through the reading of primary sources and analytical essays, as well as examining how this history is used in the present socio-political and ideological discourse. Work on language focuses on matters of style, sentence structure, and vocabulary building.
Taught by: Verkholantsev
Course not offered every year
Activity: Seminar
1 Course Unit

RUSS 412 Nineteenth-Century Russian Literature and Culture: Romantics and Realists
This course continues developing students' advanced skills in Russian, and combines advanced study of the Russian language with an examination of the fundamental literary movements and figures of nineteenth-century Russian literature and culture. Course materials include prosaic and poetic texts by Pushkin, Gogol', Lermontov, Dostoevsky, Tolstoy, Chekhov, as well as films and art. Language work will be devoted to writing, syntactical and stylistic analysis, vocabulary, academic speech, and listening comprehension.
Taught by: Verkhолantsev
Course not offered every year
Prerequisites: Russian 312 or placement exam.
Activity: Lecture
1 Course Unit
Notes: Conducted in Russian.

RUSS 413 Twentieth-Century Russian Literature, Film and Culture: Utopia, Revolution and Dissent
This course continues developing students' advanced skills in Russian, and introduces students to major movements and figures of twentieth-century Russian literature and culture. We will read the works of modern Russian writers, and watch and discuss feature films. The course will introduce the first Soviet films and works of the poets of the Silver Age and beginning of the Soviet era as well as the works from later periods up to the Perestroika and Glasnost periods (the late 1980s).
Taught by: Bourlatskaya
Course not offered every year
Prerequisites: Russian 312 or placement exam.

Course not offered every year
Prerequisites: RUSS 312 or placement exam.
Activity: Seminar
1 Course Unit

RUSS 417 Russian Modernism: Literature, Music & Visual Arts
This course continues developing students' advanced skills in Russian, while closely studying a representative selection of texts from the modernist period. The course will explore central issues of the period, such as the relationship between literature and revolution, reconceptualizations of society, history and the self. Of particular interest will be authors' experimentation in form and language in order to present afresh the experience of life. Textual study is combined with a general overview of the period, including reference to parallel trends in the visual arts, architecture and music, as well as contemporary intellectual movements. Principal writers studied will include Belyi, Sologub, Remizov, Andreev, Artsybashev, Gorky, Zamoskvorecky, Platonov, Zoshchenko, Babel, Olesha, and Khalmagomedov.
Course offered spring; even-numbered years
Prerequisites: RUSS 312 or placement exam.
Activity: Lecture
1 Course Unit
Notes: Conducted in Russian.
RUSS 418 Russian Culture and Society Now
This course continues developing students’ advanced skills in Russian, while surveying main social, political and cultural developments in Russia since 1991. In these two turbulent decades Russia has undergone colossal changes ranging from disintegration of the Soviet Empire to the rapid development of new gastronomic tastes and new trends in literature and culture. The course will explore diverse and often conflicting cultural sensibilities in contemporary Russian fiction, poetry, journalism, scholarly writing, performance art, as well as in pop-culture and film. Topics under consideration will include reassessing Russia’s luminous cultural heritage as well as traumatic periods in Soviet history; search for identity and the recent drift towards neo-nationalism; gender issues and the contemporary focus on fatherlessness; changing attitudes towards former cultural taboos; dealing with Russia’s current political and cultural dilemmas. The course also incorporates two advanced Russian colloquiums with guest appearances of Prof. Kevin Platt and Ilya Vinitsky.
Course usually offered summer term only
Prerequisites: Russian 312 or placement exam.
Activity: Lecture
1 Course Unit
Notes: Conducted in Russian.

RUSS 419 Russian Song and Folklore
This course continues developing students’ advanced skills in Russian. Song and, in particular, folk song is an essential and exciting component of Russian culture and social life, and an important language learning tool. The course offers a general introduction to the history of Russian folklore, song and musical culture. Students will explore the historical trajectory of Russian song and its various genres (from folk to the modern Estrada), examine the poetic and literary principles of song, discuss its aesthetic properties, and analyze the educational, community-building and ideological roles of song in Russian society.
Taught by: Verkholantsev
Course not offered every year
Prerequisites: Russian 312 or placement exam.
Activity: Seminar
1 Course Unit
Notes: Conducted in Russian.

RUSS 420 Contemporary Russia Through Film
This course continues developing students’ advanced skills in Russian and offers intensive study of Russian film, arguably the most powerful medium for reflecting changes in modern society. This course will examine Russia’s transition to democracy and market economy through the eyes of its most creative and controversial cinematographers. The course will focus on the often agonizing process of changing values and attitudes as the country moves from Soviet to Post-Soviet society. Russian films with English subtitles will be supplemented by readings from contemporary Russian media sources. The course provides an excellent visual introduction to the problems of contemporary Russia society.
Taught by: Bourlatskaya
One-term course offered either term
Prerequisites: Russian 312 or placement exam.
Activity: Lecture
1 Course Unit
Notes: Conducted in Russian.

RUSS 426 Chekhov: Stage & Screen
Whats so funny, Mr. Chekhov? This question is often asked by critics and directors who still are puzzled with Chekhov’s definition of his four major plays as comedies. Traditionally, all of them are staged and directed as dramas, melodramas, or tragedies. Should we cry or should we laugh at Chekhovian characters who commit suicide, or are killed, or simply cannot move to a better place of living? Is the laughable synonymous to comedy and the comic? Should any fatal outcome be considered tragic? All these and other questions will be discussed during the course. The course is intended to provide the participants with a concept of dramatic genre that will assist them in approaching Chekhov’s plays as comedies. In addition to reading Chekhov’s works, Russian and western productions and film adaptations of Chekhov’s works will be screened. Among them are, Vanya on 42nd Street with Andre Gregory, and Four Funny Families. Those who are interested will be welcome to perform and/or direct excerpts from Chekhov’s works.
Taught by: Zubarev
Course not offered every year
Also Offered As: CIMS 430, EEUR 430
Activity: Seminar
1 Course Unit
Notes: Forms a part of the LPS Masters in Liberal Arts Program.

RUSS 430 Nationalism and Ethnic Conflict in Film
This course studies the cinematic representation of civil wars, ethnic conflicts, nationalistic doctrines, and genocidal policies. The focus is on the violent developments that took place in Russia and on the Balkans after the collapse of the Soviet Bloc and were conditioned by the new geopolitical dynamics that the fall of communism had already created. We study media broadcasts, documentaries, feature films representing the Eastern, as well as the Western perspective. The films include masterpieces such as "Time of the Gypsies", "Underground", "Prisoner of the Mountains", "Before the Rain", "Behind Enemy Lines", and others.
Taught by: Todorov
Course not offered every year
Also Offered As: CIMS 365
Activity: Seminar
1 Course Unit
Notes: Forms a part of the LPS Masters in Liberal Arts Program.

RUSS 432 Fate and Chance in Literature and Culture
In Fate and Chance in Literature and Culture, we will explore these two interrelated concepts in comparative perspective over a broad historical range. As a result, the students will learn how the philosophy of fate and chance has been reflected in works of different Russian authors and in different cultural and political environments. In Russian as well as western systems of belief fate and chance represent two extreme visions of the universal order, or, perhaps, two diametrically opposed cosmic forces: complete determinism, on the one hand, and complete chaos or unpredictability, on the other. These visions have been greatly reflected by various mythopoetic systems. In this course, we will investigate religious and folkloric sources from a series of Russian traditions compared to other Indo-European traditions (Greek, East-European). Readings will include The Song of Prince Igor’s Campaign, The Gambler by Dostoevsky, The Queen of Spades by Pushkin, Vij by Gogol, The Black Monk by Chekhov, The Fatal Eggs by Bulgakov, and more.
Taught by: Zubarev
Course not offered every year
Also Offered As: CIMS 432, COML 196
Activity: Seminar
1 Course Unit
Notes: Forms a part of the LPS Masters in Liberal Arts Program.
RUSS 434 Media and Terrorism
This course draws on fictional, cinematic and mass-media representation of terrorism based on Russian as well as Western examples. We study how the magnitude of the political impact of terrorism relates to the historically changing means of production of its striking iconology. The course exposes students to major modes of imagining, narrating, showing, reenacting terrorism and forging its mystique. We examine the emergence of organized terrorism in nineteenth-century Russia as an original political-cultural phenomenon. We trace its rapid expansion and influence on the public life in the West, and on the Balkans. Historical, political, and aesthetic approaches converge in a discussion of several case studies related to intellectual and spiritual movements such as nihilism, anarchism, populism, religious fundamentalism, and others. The public appearance of the terrorist activism and its major attributes are viewed as powerful intensifiers of its political effect: self-denial, ascetic aura, and stratagem of mystification, underground mentality, and martyrdom. The pedagogical goal of this course is to promote and cultivate critical view and analytical skills that will enable students to deal with different historical as well as cultural modes of (self-)representation of terrorism. Students are expected to learn and be able to deal with a large body of historical-factual and creative-interpreted information.

Taught by: Todorov
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: Forms a part of the LPS Masters in Liberal Arts Program.

RUSS 444 Haunted House: Russian Realism in European Context
In this class we will examine works of major Russian Realist writers, painters, and composers considering them within Western ideological contexts of the 1850-1880s: positivism, materialism, behaviorism, spiritualism, etc. We will focus on Russian Realists ideological and aesthetic struggle against Romantic values and on an unpredicted result of this struggle -- a final spectralization of social and political realities they claimed to mirror in their works. Paradoxically, Russian Realism contributed to the creation of the image of Russia as a house haunted by numerous apparitions: nihilism and revolution, afflicted peasants and perfidious Jews, secret societies and religious sects. The spectropoetics (Derrida) of Russian Realism will be examined through works of Dostoevsky, Tolstoy, Turgenev, Leskov, Chekhov, as well as paintings by Ilya Repin and operas by Mussorgsky and Tchaikovsky. Requirements include one oral presentation, mid-term theoretical survey essay, and a final paper. Relevant theories include M.H. Abrams, Brookes, Levine, Greenblatt, Castle, and Derrida.

Course not offered every year
Also Offered As: COML 541, RUSS 544
Activity: Seminar
1 Course Unit

RUSS 455 The Living & the Dead: The Great Patriotic War in Russ Cultural Imagination
This course is dedicated to the 70th anniversary of the Great Patriotic War, 1941-45. Students will explore the cultural myth of the war, created in the 1960-80s. The materials will include literary texts, documentaries, photographs, and films. We will focus on three major themes of this myth: 1. moral strength and courage; 2. respect for Russia's military past; and 3. the rise of national consciousness.

Prerequisites: Prior language experience required.
Activity: Seminar
1 Course Unit

RUSS 460 Post-Soviet Russia in Film
This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. Film is arguably the most powerful medium for reflecting changes in modern society. This course will examine Russia's transition to democracy and market economy through the eyes of its most creative and controversial cinematographers. The course will focus on the often agonizing process of changing values and attitudes as the country moves from Soviet to Post-Soviet society. Russian films with English subtitles will be supplemented by readings from contemporary Russian media sources. The course provides an excellent visual introduction to the problems of contemporary Russia society.

Taught by: Bourlatskaya
One-term course offered either term
Prerequisites: RUSS361 or comparable language competence.
Activity: Lecture
1 Course Unit
Notes: Conducted in Russian.

RUSS 461 20th Century Russian Literature: Fiction and Reality
This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. Russian 461 introduces the major movements and figures of twentieth-century Russian literature and culture, works of modern Russian writers, and feature films. In studying the poetry of Mayakovsky, Block, and Pasternak, students will become familiar with the important literary movements of the Silver Age. The reality of the Soviet era will be examined in the works of Zamyatin, Babel, and Zoshchenko. There will be a brief survey of the development of Soviet cinema, including films of Eisenstein, Tarkovsky, and Mikhalkov. Literary trends in the later Soviet period will be seen in war stories, prison-camp literature, village prose, and the writings of female authors of that time.

Taught by: Bourlatskaya

Activity: Seminar
1 Course Unit
Notes: Conducted in Russian.
**RUSS 464 Russian Humor**

One of the most fascinating and most difficult things for a student of foreign culture is to understand national humor, as it is presented in various stories and films, jokes and shows. To an extent, humor is a gateway to national mentality. In the present course we will examine Russian cultural history, from the sixteenth through the twenty-first centuries, through the vehicle of Russian humor. How does Russian humor depend on religion and history? What was considered funny in various cultural trends? What are the peculiarities of Russian humorist tradition? Students will be familiarized with different Russian theories of humor (Bakhtin, Likhachev, Panchenko, Tynianov, etc.) and, of course, with a variety of works by Russian kings of humor Pushkin and Gogol, Chekhov and Zoshchenko, Bulgakov and Ilf and Petrov, Erofeev and Kibirov, etc. Class lectures will be supplemented by frequent video and musical presentations ranging from contemporary cartoons to high comedies and from comic songs (Chaliapins The Flea) to the music of Shostakovich (The Nose). This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language.

Course not offered every year

**RUSS 465 Singing in the Snow: The History of Russian Song**

This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. Song is an essential and exciting component of Russian culture and social life, and an important language learning tool. The course offers a general introduction to the history of Russian song. Students will explore the historical trajectory of Russian song and its various genres (from folk to the modern Estrada), examine the poetic and literary principles of song, discuss its aesthetic properties, and analyze the educational, community-building and ideological roles of song in Russian society. Among the wide-ranging topics and genres that we will discuss and work with are lyrics of folk songs, romances, Soviet and patriotic songs, Anti-Soviet songs, Russian/Soviet anthems, bard song, film and theater songs, childrens songs, Soviet and Russian Rock and Pop.

Taught by: Verkholantsev

Course not offered every year
Prerequisites: RUSS361 or comparable language competence.
Activity: Lecture
1 Course Unit

Notes: Conducted in Russian.

**RUSS 466 RUSSIAN REVOLUTION**

This course is a content-based course intended for students who speak Russian at home and seek to improve their command of formal and professional registers of the Russian language. Paying tribute to the centennial of the Russian Revolution, the course examines the sociopolitical milestone of the 20th century through the works of literature, art, music, film, and material culture that both refracted the revolutionary situation and responded to the revolutionary change. The course’s primary sources include works of Russian symbolist poets (e.g. Blok) and realist writers (e.g. Korolenko, Chekhov, Gorky, Andrei Platonov), the music of modernist composers, Soviet montage films, and the Soviet architecture of the International Style. The specific attention will be on the relationship between sociopolitical transformation and the rise of avant-garde movements in visual arts and poetry known as the artistic revolution (e.g. Khlebnikov, Maiakovskii, Kandinskii, Goncharova, Malevich, Chagall).

Taught by: Nazyrova

Course not offered every year
Prerequisite: RUSS361 or equivalent proficiency
Activity: Seminar
1 Course Unit

**RUSS 467 Classic Russian Literature Today**

This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. A study of classic Russian literature in the original. Readings will consist of some of the greatest works of 19th and 20th-century authors, such as Pushkin, Gogol, Tolstoy, Dostoevsky, and Bulgakov. Students will examine various forms and genres of literature, learn basic techniques of literary criticism, and explore the way literature is translated into film and other media. An additional focus of the course will be on examining the uses and interpretations of classic literature and elitist culture in contemporary Russian society. Observing the interplay of the "high" and "low" in Russian cultural tradition, students will develop methodology of cultural analysis.

Course not offered every year
Prerequisites: RUSS361 or comparable language competence.
Activity: Lecture
1 Course Unit

Notes: Conducted in Russian.

**RUSS 468 Post-Soviet Russian Society: People, Business, Democracy**

This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. It offers an introduction to contemporary Russian society, its historical background and its present political and economic structure. The course will focus on the political, economic and sociological developments in Russia from Perestroika (late 1980s) to Putin. The course will discuss the society’s changing values, older and younger generations, political parties and movements, elections, the business community and its relations with the government, common perceptions of Westerners and Western society, and the role of women in the family and at work. Emphasis will be placed on the examination, interpretation and explanation of peoples behavior and their perception of democracy and reforms, facilitating comparison of Western and Russian social experience.

Course not offered every year
Prerequisites: RUSS361 or comparable language competence.
Activity: Lecture
1 Course Unit

Notes: Conducted in Russian.
RUSS 469 Russian Utopia in Literature, Film, and Politics
This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. In this course we will undertake a fascinating journey to the Dreamland of Russian culture. Students will read and discuss Russian utopian imagination as presented in a variety of literary texts, paintings, musical works, films, as well as philosophical texts and economic theories. Topics for discussion will include Russian fairy tales and legends, religious prophesies and communist projects, history and imagination, technological and patriarchal utopias.
Course not offered every year
Prerequisites: RUSS361 or comparable language competence.
Activity: Seminar
1 Course Unit
Notes: Conducted in Russian.

RUSS 471 Moscow: Cultural History
This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. An extraordinary diverse city, Moscow has acquired a number of names, referring both to its size and role in the national history: The Third Rome, The Whitestone One, The First Throne, The Forty Forties, The Hero City, and even The Big Village. In this course, students will examine the cultural history of the great city from 1147 to the present. The "itinerary" for this imaginary trip will include the Kremlin and the banyas, Saint Basil's Cathedral and the Bolshoi Theater, the Ostankino Tower and the underground palaces of the Metro, the workers' canteen and the dining rooms of the posh restaurants, etc. The course discussions will be centered on literary texts, travelers' accounts, films, and works of art and architecture.
Activity: Seminar
1 Course Unit

RUSS 475 Doctor Zhivago in Historical Context
Russian heritage students are invited to read in original and discuss in class one of the most unusual novels of 20th century Russian literature, Doctor Zhivago. In 1958, the author of this novel Boris Pasternak was awarded the Nobel Prize "for his important achievement both in contemporary lyrical poetry and in the field of the great Russian epic tradition," an event which enraged the Soviet government. Students will follow the main characters of this poetic saga in the most terrible and glorious moments of the Russian history, from the Russian Revolution of 1905 to the beginning of the Great War.
Prerequisites: RUSS361 or comparable language competence.
Activity: Seminar
1 Course Unit

RUSS 485 Russian Poetics
Introduction to the analysis of poetic texts, based on the works of Batyushkov, Lermontov, Tyutchev, Fet, Mandelshtam, and others.
Taught by: Steiner
Course usually offered in fall term
Also Offered As: COLL 224
Prerequisites: RUSS312, RUSS361 or comparable language competence
Activity: Seminar
1 Course Unit
Notes: This course is open to all advanced students of Russian (including students who speak Russian at home).

RUSS 506 Pushkin
The writer's lyrics, narrative poems, and drama.
Taught by: Steiner
Course usually offered in spring term
Prerequisites: RUSS312, RUSS361 or comparable language competence.
Activity: Seminar
1 Course Unit
Notes: This course is open to all students of Russian (including students who speak Russian at home)

RUSS 508 Advanced Russian for Business
This advanced language course focuses on developing effective oral and written communication skills for working in a Russian-speaking business environment. Students will discuss major aspects of Russian business today and learn about various Russian companies using material from the current Russian business press. In addition, students will be engaged in a number of creative projects, such as business negotiation simulations, and simulation of creating a company in Russia.
For BA Students: Advanced Language Course
Taught by: Bourlatskaya
Course not offered every year
Prerequisites: At least one RUSS400-level course or comparable language competence.
Activity: Seminar
1 Course Unit

RUSS 519 History of Russian Literary Language and Culture
This course examines the linguistic, literary, and social history of the Russian language from the medieval period to the modern day. Course topics include: the creation of the Slavic alphabets and the first literary language of the Slavs, Old Church Slavonic; the beginnings and development of writing and literacy in Old Russia; the evolution of the Russian literary language, its styles, and registers; grammatical categories of Russian; features of Russian lexicography; the social history and politics of language use; analysis of texts. Taught in Russian; readings in Russian & English; advanced language proficiency required. Taught by: Verkholantsev
Prerequisites: Any RUSS 400 level course or comparable proficiency.
Activity: Seminar
1 Course Unit
RUSS 528 From Late-Soviet to Non-Soviet Literature and Culture
The aims of this course are threefold: to introduce students to some signature literary and cultural texts form roughly the post-Stalin era to the present, to equip them with relevant theoretical approaches and concerns, and finally, to offer a space where they can develop their own research projects. A major theme will be the relations between "Russian" literature and history, in which literature is not only a mimesis of the historical process but often an active agent. Throughout, we will be particularly attentive to the periphery of literature. In the first place, this means an expanded geography, the inclusion of non-Russian Soviet and emigre writers before and after 1991, as well as an effort to theorize their structural position. Secondly, we will adopt the late Formalists' understanding of literary periphery as the genres, cultural forms, institutions, and phenomena that abutted the literary field and affected its processes. Depending on student interest, our attention to these objects of inquiry could be directed toward bardic song and the later lyric-centric Russian rock, samizdat and literary internet, thick journals and literary prizes, Soviet-era dissidence and today's protest culture.
Taught by: Platt
Also Offered As: COML 528
Activity: Seminar
1 Course Unit

RUSS 544 Haunted House: Russian Realism in European Context
In this class we will examine works of major Russian Realist writers, painters, and composers considering them within Western ideological contexts of the 1850-1880s: positivism, materialism, behaviorism, spiritualism, etc. We will focus on Russian Realists ideological and aesthetic struggle against Romantic values and on an unpredicted result of this struggle -- a final spectralization of social and political realities they claimed to mirror in their works. Paradoxically, Russian Realism contributed to the creation of the image of Russia as a house haunted by numerous apparitions: nihilism and revolution, afflicted peasants and perfidious Jews, secret societies and religious sects. RUSS 548 Borderland Literature and Minority Nationalism: The role of Central Asia in Russian-Iranian Relations
Advanced graduate course on Central Asian and Iranian literature and history. Particular attention is given to the role of literature in Tajik-Iranian cultural exchange, the culture and history of Persian-speaking minorities in late 19th and early 20th century Caucasus and Central Asia, and the relations between center and periphery. Theories concerning Orientalism, minority nationalism and subaltern studies are also examined.
Taught by: Yountchi
Course not offered every year
Activity: Seminar
1 Course Unit

RUSS 549 Stalinist Culture
In the Soviet Union in the late 1920s the dynamic cultural life of the revolutionary era, characterized by avant-gardism, experimentation, and diversity, gave way to a new organization of Soviet cultural life-one dominated by the newly formulated official style of "Socialist Realism" and bureaucratic institutions such as the Soviet Writers Union. In this course we will study the conditions that gave rise to this new era, its institutional realities, and masterworks in film, photography and literature of official art, including those by Kavelin, Pasternak and Eisenstein. We will also examine the social phenomena of cultural resistance and non-conformism of this period and its works written "for the drawer" or for non-official consumption, such as those of Akhmatova, Mandelstam, Bulgakov, Kharm's and Druskin. Taught by: Platt/Staff
Course not offered every year
Also Offered As: COML 550
Activity: Seminar
1 Course Unit

RUSS 555 History of Emotions: Russia and the West
One of the most eccentric heroes of Yuri Olesha's novel Envy (1927), contemplates a spectacular farewell parade of individual human emotions, rejected by the new, Soviet, collectivist regime: love, envy, friendship, etc. Clearly, the emotions for him have rhetorical, ideological, and historical nature. They can be legitimate and illegitimate, they extinct, like some species of animals and plants, they can be banned, and even violently annihilated by the government (along with the social groups, the collective subjectivity of which they express). To replace them, either naturally or by means of violence, "a new series of states of the human soul" must be installed. The hero believes that this historical process is inevitable, and the only thing the patriot of the old subjectivity can do is to organize a farewell procession of the departed emotional culture, a conspiracy of the doomed feelings. Yet, can the feelings, related to the "old" culture, be completely destroyed? Can they survive in some new, cryptic, forms? Do feelings have history? How do they influence history? Do "pure," "natural," emotions exist? How do political regimes control the emotional sincerity of their subjects? What is the role of emotions in the formation of certain cultural communities (a family in the age of sensibility, a circle of political conspirators, etc.)? What is the role of literature in cultivating and preserving certain emotional modes (styles, codes, or regimes)? How do people interpret and express their emotions in different periods and in different national traditions?

Sanskrit (SKRT)

SKRT 460 Sanskrit 1st Year, Part I
During the first semester of beginning Sanskrit, students will be introduced to the script, phonetics, and grammar of the Sanskrit language. By the end of the semester they will be able to begin to read Sanskrit texts and compose Sanskrit sentences in addition to carrying out simple conversation. They will build the requisite skills to read, by the second semester, simple inscriptions and sections from texts like the Ramayana, the Mahabharata, the Bhagavad Gita, Pancatantra, and Yoga Sutra. Students will also be introduced to many features of Sanskrit culture.

For BA Students: Language Course
Taught by: Obrock
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Contact professor to discuss actual class times that work for all students.

SKRT 461 Sanskrit 1st Year Part II
During the first semester of beginning Sanskrit, students will be introduced to the script, phonetics, and grammar of the Sanskrit language. By the end of the semester they will be able to begin to read Sanskrit texts and compose Sanskrit sentences in addition to carrying out simple conversation. They will build the requisite skills to read, by the second semester, simple inscriptions and sections from texts like the Ramayana, the Mahabharata, the Bhagavad Gita, Pancatantra, and Yoga Sutra. Students will also be introduced to many features of Sanskrit culture.

Taught by: Obrock
Prerequisites: Beginning Sanskrit Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

SKRT 470 Sanskrit 2nd Year Part I
This course will lead students to consolidate their knowledge of Sanskrit grammar and increase their familiarity with Sanskrit literature of all kinds, including epic, literary, philosophical, and narrative genres of texts. It will also introduce students to the study and reading of inscriptive materials.

Taught by: Obrock
Two terms. student must enter first term.
Prerequisite: SKRT 460
Activity: Lecture
1 Course Unit
Notes: Contact professor to discuss actual class times that work for all students.

SKRT 471 Intermediate Sanskrit Part II
This course will lead students to consolidate their knowledge of Sanskrit grammar and increase their familiarity with Sanskrit literature of all kinds, including epic, literary, philosophical, and narrative genres of texts. It will also introduce students to the study and reading of inscriptive materials.

For BA Students: Last Language Course
Taught by: Obrock
Prerequisites: Intermediate Sanskrit II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

SCND 101 Elementary Swedish I
Basic language course stressing grammatical structures and vocabulary, pronunciation, simple conversation and reading of elementary texts. Credit for this course will only be given upon successful completion of SCND 102.

For BA Students: Language Course
Taught by: Williams
Course offered fall; odd-numbered years
Also Offered As: SCND 501
Activity: Lecture
1 Course Unit

SCND 102 Elementary Swedish II
Continuation of SCND 101. This is a two-semester course designed to teach beginning skills in Swedish reading comprehension, vocabulary acquisition, listening comprehension, writing, and conversation. Swedish social development will also be examined in relation to its cultural milieu. A trip to Gloria Dei Old Swedes Church in Philadelphia for their Luciafest will be included on a December weekend, a visit to a Swedish film during the Philadelphia Film festival will take place in late April, and other events as announced.

For BA Students: Language Course

Science, Technology & Society (STSC)

STSC 001 Emergence of Modern Science  
During the last 500 years, science has emerged as a central and transformative force that continues to reshape everyday life in countless ways. This introductory course will survey the emergence of the scientific world view from the Renaissance through the end of the 20th century. By focusing on the life, work, and cultural contexts of those who created modern science, we will explore their core ideas and techniques, where they came from, what problems they solved, what made them controversial and exciting and how they relate to contemporary religious beliefs, politics, art, literature, and music. The course is organized chronologically and thematically. In short, this is a "Western Civ" course with a difference, open to students at all levels.

Activity: Lecture  
1 Course Unit

STSC 002 Medicine in History  
This course surveys the history of medical knowledge and practice from antiquity to the present. No prior background in the history of science or medicine is required. The course has two principal goals: (1) to give students a practical introduction to the fundamental questions and methods of the history of medicine, and (2) to foster a nuanced, critical understanding of medicine's complex role in contemporary society. The course takes a broadly chronological approach, blending the perspectives of the patient, the physician, and society as a whole—recognizing that medicine has always aspired to "treat" healthy people as well as the sick and infirm. Rather than history "from the top down" or "from the bottom up," this course sets its sights on history from the inside out. This means, first, that medical knowledge and practice is understood through the personal experiences of patients and caregivers. It also means that lectures and discussions will take the long-discredited knowledge and treatments of the past seriously, on their own terms, rather than judging them by today's standards. Required readings consist largely of primary sources, from elite medical texts to patient diaries. Short research assignments will encourage students to adopt the perspectives of a range of actors in various historical eras.

Activity: Lecture  
1 Course Unit
STSC 003 Technology and Society
Technology plays an increasing role in our understandings of ourselves, our communities, and our societies, in how we think about politics and war, science and religion, work and play. Humans have made and used technologies, though, for thousands if not millions of years. In this course, we will use this history as a resource to understand how technologies affect social relations, and conversely how the culture of a society shapes the technologies it produces. Do different technologies produce or result from different economic systems like feudalism, capitalism and communism? Can specific technologies promote democratic or authoritarian politics? Do they suggest or enforce different patterns of race, class or gender relations? Among the technologies we'll consider will be large objects like cathedrals, bridges, and airplanes; small ones like guns, clocks and birth control pills; and networks like the electrical grid, the highway system and the internet.

STSC 021 From Darwin to DNA
Evolution has been one of the productive and important ideas in the history of biology. It has also been a scientific idea with many complex social and political meanings. In this freshman seminar, we explore the history of ideas about evolution, heredity, DNA and genomics, attentive to the profound social dimensions of biological ideas. We consider the political and intellectual history of genetics and genomics, from pre-Darwinian ideas about evolution (there were many theories before Darwin's) to contemporary debates about ancestry testing and creation science. We look at evolution's role in the politics of race, eugenics, creation science and identity. This course will provide students with critical historical and social perspectives on science, technology and medicine.

STSC 032 Risky Business
This freshman seminar on medical decision making will focus on personal and public medical and health decisions - how we make them and how they can be improved. While in theory medical decisions are in large part both informed and constrained by scientific evidence, in reality they are much more complex. Drawing upon a range of information sources including original research and popular media, the seminar will introduce students to the challenges of making personal and public (i.e., policy) decisions under conditions of inherent uncertainty and resource constraint. We will examine how research and scholarship can inform and improve such decisions and decision making processes. Using a variety of approaches (class discussions, examination of primary research, popular media, simple experiments, expert guests) this highly interactive seminar will provide a strong introductory foundation to medical decision making specifically and, by extension, to decision making under conditions of uncertainty more generally. Using a variety of approaches (class discussions, examination of primary research, popular media, simple experiments, expert guests) this highly interactive seminar will provide a strong introductory foundation to medical decision making specifically and, by extension, to decision making under conditions of uncertainty more generally.

STSC 062 American Way of War
Do Americans fight wars differently than do the people of other nations? Are there unique American tactics or technologies? Does America's success in war owe to its arsenal of sophisticated weapons, or to the fighting spirit of its people? What characterizes the American experience in combat? A respect for limits, or a willingness to win at any cost? And can we even answer these questions, or do the myths we tell ourselves about our past get in the way? This seminar explores the scientific and technological development of warfare in the United States from the time of European settlement of the Americas to the era of unmanned aerial vehicles. The changing nature of warfare beginning in 1775 and continuing through 2014 involved the creation and deployment of increasingly complex and powerful weapons, as well as a corresponding evolution in tactics and strategy.

STSC 077 Voyages of Discovery
Across the nineteenth century, voyages of sail and steam made possible the creation of empires and a globalized world, through the transportation of people and commodities. Similarly, this course is a voyage of discovery based on the study of actual ship’s logs held in Penn’s Rare Book collection. We will use these accounts to guide our investigation into the science, technology, medicine, economic and environmental history of life at sea and in the ports of call for these ships around the Indian and Atlantic Oceans. Collectively, the seminar will produce an online exhibition built on logs, diaries and other sources held at Penn, in other local collections and gleaned from archives around the world.
Taught by: Petrie
Course not offered every year
Activity: Seminar
1 Course Unit

STSC 078 Everyday Technologies and the Making of the Modern World
Long before iPhones and Fitbits, personal technology — small(ish), portable, purchasable — had a tremendous impact on the lives of people around the globe. Items such as wristwatches, bicycles, sewing machines and radios could empower their users (or sometimes discipline them), creating economic, educational or recreational opportunities while also being associated with grander ideas and ideologies. This course will explore such everyday technologies across the nineteenth and twentieth centuries, in locations spanning the Americas, Europe, Africa and Asia. We will consider how the use and significance of particular technologies varied according to time and place; how these everyday items contributed to “self-fashioning” for individuals, nations, and empires; and how, through use and modification, consumers themselves could become part of the story of technological change. In addition to reading a variety of classic and recent scholarship, students will work with a wide array of primary sources (newspapers, photographs, patent records, trade cards) and use digital tools to present their own research projects.
Taught by: Petrie
Activity: Seminar
1 Course Unit

STSC 079 Animal City: Humans & Animals in Urban America 1850-present
Cities are popularly viewed as the opposite of Nature; animals are popularly viewed as the embodiment of Nature. Yet history and our own observations inform us that animals have always been and continue to be part of city life. Furthermore, most of the many roles that animals play in human lives, and most of the relationships between animals and humans take place in urban settings. In this freshman seminar, we examine human/animal relationships in urban society since the early 19th century, through readings, movies and speakers. This course will help students understand the different ways that Americans interact with animals and how those interactions have changed over time. It will address the way that science, technology and medicine have shaped human-animal interactions, and introduce students to the fields of animal history and the animal sciences.
Taught by: Greene, A

1 Course Unit

STSC 107 Science, Technology & Medicine in Colonial India
In this course we will explore the broad contours of the histories of Science, Medicine and Technology in Colonial India (c. 1757 - 1947). This broad overview will be developed each week through a case study based on any one particular scientific discipline, technological project or medical event. Overall the course will attempt to locate the development of science, technology and medicine within the social, political and cultural context of colonial India. It is also worth noting that 'Colonial India', will include discussions of regions which today make up the Republic of India, Pakistan and Bangladesh.
Taught by: Mukharji
One-term course offered either term
Also Offered As: HSOC 107
Activity: Seminar
1 Course Unit

STSC 108 Introduction to Philosophy of Science
A discussion of some philosophical questions that naturally arise in scientific research. Issues to be covered include: The nature of scientific explanation, the relation of theories to evidence, and the development of science (e.g., does science progress? Are earlier theories refuted or refined?).
Taught by: Domotor
Course not offered every year
Also Offered As: COML 224, PHIL 225
Activity: Seminar
1 Course Unit

STSC 110 Science and Literature
This course will explore the emergence of modern science fiction as a genre, the ways it has reflected our evolving conceptions of ourselves and the universe, and its role as the mythology of modern technological civilization. We will discuss such characteristic themes as utopias, the exploitation of space and time, biological engineering, superman, robots, aliens, and other worlds—and the differences between European and American treatment of these themes. For BA Students: Arts and Letters Sector
Taught by: Adams
Course usually offered in spring term

Activity: Lecture
1 Course Unit

STSC 123 Darwin's Legacy: The Evolution of Evolution
Darwin's conceptions of evolution have become a central organizing principle of modern biology. This lecture course will explore the origins and emergence of his ideas, the scientific work they provoked, and their subsequent re-emergence into modern evolutionary theory. In order to understand the living world, students will have the opportunity to read and engage with various classic primary sources by Darwin, Mendel, and others. The course will conclude with guest lectures on evolutionary biology today, emphasizing current issues, new methods, and recent discoveries. In short, this is a lecture course on the emergence of modern evolutionary biology—its central ideas, their historical development and their implications for the human future. For BA Students: Living World Sector
Taught by: Gil-Riano
Course usually offered in spring term
Also Offered As: HSOC 123
Activity: Seminar
1 Course Unit
STSC 135 Modern Biology and Social Implications
This course covers the history of biology in the 19th and 20th centuries, giving equal consideration to three dominant themes: evolutionary biology, classical genetics, and molecular biology. The course is intended for students with some background in the history of science as well as in biology, although no specific knowledge of either subject is required. We will have three main goals: first, to delineate the content of the leading biological theories and experimental practices of the past two centuries; second, to situate these theories and practices in their historical context, noting the complex interplay between them and the dominant social, political, and economic trends; and, third, to critically evaluate various methodological approaches to the history of science. For BA Students: Natural Science and Math Sector Taught by: Cecatti One-term course offered either term Also Offered As: HIST 035 Activity: Seminar 1 Course Unit

STSC 145 Comparative Medicine
This course explores the medical consequences of the interaction between Europe and the “non-West.” It focuses on three parts of the world Europeans colonized: Africa, South Asia, and Latin America. Today's healing practices in these regions grew out of the interaction between the medical traditions of the colonized and those of the European colonizers. We therefore explore the nature of the interactions. What was the history of therapeutic practices that originated in Africa or South Asia? How did European medical practices change in the colonies? What were the effects of colonial racial and gender hierarchies on medical practice? How did practitioners of “non-Western” medicine carve out places for themselves? How did they redefine ancient traditions? How did patients find their way among multiple therapeutic traditions? How does biomedicine take a different shape when it is practiced under conditions of poverty, or of inequalities in power? How do today's medical problems grow out of this history? This is a fascinating history of race and gender, of pathogens and conquerors, of science and the body. It tells about the historical and regional roots of today’s problems in international medicine. For BA Students: History and Tradition Sector Taught by: Mukharji Course usually offered in fall term Also Offered As: HIST 146, HSOC 145 Activity: Lecture 1 Course Unit

STSC 152 Chinese Science
This course explores the social, cultural and political contexts of scientific knowledge in China over the course of two millennia, through a diverse cast of historica actors spanning emperors and midwives, Buddhist monks and Jesuits, eminent authorities and everyday people. We will examine the evolution of various learned traditions (astronomy, alchemy, medicine, natural history) that sought to define and understand the heavens, the earth and the body - and the manner in which those forms of knowledge could be deployed for the good of state, society or individual. In the process, we will compare Chinese experience to other cultures and evaluate the status and dynamics of Chinese traditions in the modern era of Western political and scientific dominance. No prior knowledge of Chinese history is assumed. Class discussion will be a part of each meeting. One-term course offered either term Also Offered As: HSOC 157 Activity: Lecture 1 Course Unit

STSC 160 The History of the Information Age
Certain new technologies are greeted with claims that, for good or ill, they must transform our society. The two most recent: the computer and the Internet. But the series of social, economic and technological developments that underlie what is often called the Information Revolution include much more than just the computer. In this course, we explore the history of information technology and its role in contemporary society. We will explore both the technologies themselves—calculating machines, punched card tabulators, telegraph and telephone networks, differential analyzers, digital computers, and many others—and their larger social, economic and political contexts. To understand the roots of these ideas we look at the prehistory of the computer, at the idea of the post-industrial or information society, at parallels with earlier technologies and at broad historical currents in the United States and the world. For BA Students: Humanities and Social Science S Taught by: Dick One-term course offered either term Also Offered As: SOCI 161 Activity: Lecture 1 Course Unit

STSC 162 Technology and Medicine in Modern America
Medicine as it exists in contemporary America is profoundly technological; we regard it as perfectly normal to be examined with instruments, to expose our bodies to many different machines; and to have knowledge produced by those machines mechanically/electronically processed, interpreted and stored. We are billed technologically, prompted to attend appointments technologically, and often buy technologies to protect, diagnose, or improve our health: consider, for example, HEPA-filtering vacuum cleaners; air-purifiers; fat-reducing grills; bathroom scales; blood pressure cuffs; pregnancy testing kits; blood-sugar monitoring tests; and thermometers. Yet even at the beginning to the twentieth century, medical technologies were scarce and infrequently used by physicians and medical consumers alike. Over the course of this semester, we will examine how technology came to medicine's center-stage, and what impact this change has had on medical practice, medical institutions and medical consumers - on all of us! Taught by: Johnson Course usually offered summer term only Also Offered As: HSOC 152 Activity: Seminar 1 Course Unit

STSC 168 Environment and Society
This course examines contemporary environmental issues such as energy, waste, pollution, health, population, biodiversity and climate through a historical and critical lens. All of these issues have important material, natural and technical aspects; they are also inextricably entwined with human history and culture. To understand the nature of this entanglement, the course will introduce key concepts and theoretical frameworks from science and technology studies and the environmental humanities and social sciences. For BA Students: Humanities and Social Science S Taught by: Benson Course not offered every year Activity: Lecture 1 Course Unit
STSC 169 Engineering Planet Earth

Also Offered As: ENVS 169
Activity: Lecture
1 Course Unit

STSC 179 Environmental History
This course provides an introduction to environmental history—the history of the interrelationship between humans and the rest of nature. In the words of historian J.R. McNeill, “Human history has always and will always unfold within a larger biological and physical context, and that context evolves in its own right. Especially in recent millennia, that context has co-evolved with humankind.” In this course we will study this co-evolution between human actors and non-human actors in global history, analyzing political, social, cultural and economic factors that affect ideas about nature and material effects on nature. We will consider the concept of the Anthropocene and study current environmental changes and challenges.

Course not offered every year
Also Offered As: HSOC 179
Activity: Lecture
1 Course Unit

STSC 201 Hist Phys Sci 19th & 20th Century
Over the last two centuries, scientists have produced a broad range of knowledge about the physical world, from light to electromagnetism to atoms to nuclei, facilitating or explaining an ever increasing mastery over the natural world. Because of their success, these developments played an important role in forming our views of how to effectively generate knowledge of the natural world. This course will examine some of the major developments in the physical sciences during the 19th and 20th century, asking how that knowledge and the means by which it was produced related to institutions, technical practices and broader cultural knowledge and knowledge production to explore how past practices have, or have not, left their traces in later science. The course will meet twice a week for lecture and discussion. Readings will consist of Pursuing Power and Light: Technology and Physics from James Watt to Albert Einstein by Bruce J. Hunt When Physics Became King by Iwan Rhys Morus Night Thoughts of a Classical Physicist by Russel McCormmach as well as articles from a course reader. Students will produce three short papers (about three pages) and a term paper (about ten pages)

STSC 208 Science and Religion: Global Perspectives
This survey course provides a thematic overview of science and religion from antiquity to the present. We will treat well-known historical episodes, such as the emergence of Muslim theology, the Galileo Affair and Darwinism, but also look beyond them. This course is designed to cover all major faith traditions across the globe as well as non-traditional belief systems such as the New Age movement and modern Atheism
Taught by: Kucuk
Course not offered every year
Activity: Seminar
1 Course Unit

STSC 209 Race and Gender in Global Science
This course critically examines the creation of scientific conceptions of ‘race’ and ‘sex’ in the modern era and their global impact. How did ‘race’ and ‘sex’ come to be the primary categories through which human variation has been classified in the modern West? What concepts of "race" and "sex" did colonial scientists, doctors, naturalists, and other experts invent, and how and why did they do this? How have scientific conceptions of ‘race’ and ‘sex’ been adapted to fit the sociopolitical projects of formerly colonized regions? And how have recent developments in genomic science sought to reinvent these categories? With these questions in mind, this course challenges us to think critically about the political contexts in which conceptions of ‘race’ an’sex’ have been crafted as well as how they have been contested and re-defined.
Taught by: Gil-Riano
Course usually offered in spring term
Also Offered As: HSOC 209
Activity: Seminar

Taught by: Petrie
Course not offered every year
Activity: Seminar
1 Course Unit
STSC 231 Insect Epidemiology Pests, Pollinators and Disease Vectors
Malaria, Dengue, Chagas disease, the Plague- some of the most deadly and widespread infectious diseases are carried by insects. The insects are also pernicious pests; bed bugs have returned from obscurity to wreak havoc on communities, invasive species decimate agricultural production, and wood borers are threatening forests across the United States. At the same time declines among the insects on which we depend- the honeybees and other pollinators--threaten our food security and ultimately the political stability of the US and other nations. We will study the areas where the insects and humans cross paths, and explore how our interactions with insects can be cause, consequence or symptom of much broader issues. This is not an entomology course but will cover a lot about bugs. It's not a traditional epidemiology course but will cover some fascinating epidemiological theory originally developed for the control of disease vectors. It will cover past epidemics and infestations that have changed the course of the history of cities and reversed advancing armies. HSOC 241. Stem Cells, Science and Society. Gearhart/Zaret.

STSC 260 Cyberculture
Computers and the internet have become critical parts of our lives and culture. In this course, we will explore how people use these new technologies to develop new conceptions of identity, build virtual communities and affect political change. Each week we'll see what we can learn by thinking about the internet in a different way, focusing successively on hackers, virtuality, community, sovereignty, interfaces, algorithms and infrastructure. We'll read books, articles, and blogs about historical and contemporary cultures of computing, from Spacewar players and phone phreaks in the 1970s to Google, Facebook, World of Warcraft, WikiLeaks, and Anonymous today. In addition, we'll explore some of these online communities and projects ourselves and develop our own analyses of them.

STSC 269 Computers, Ethics, and Social Values
This course will explore the various social implication of information technology: social, cultural, political and economic. Topics will include technology policy, organizational change, globalism and the digital divide, intellectual property rights, Linux and the free software movement, cyber libertarianism, and the rise and fall of the dot.com economy.
Course not offered every year
Activity: Seminar
1 Course Unit

STSC 270 Digital Democracy
Technological infrastructure shapes what forms of political life are possible within a society. Political campaigns, investigative journalism, public engagement, protest, government - all unfold on different time scales, in different forms, and with different consequences depending on what machines mediate them. This course explores the forms of American political life that have taken shape in and through modern digital computing. We will investigate especially a perceived tension at the heart of computing technologies - from artificial intelligence to social media - as they have been introduced to so many corners of American political life: Are computing technologies agents of liberation, or of control? The internet, for example, was embraced by some as an inherently democratizing and liberating force, giving users equal access to voice and information. On the other hand, many feared the internet as an unprecedented platform for corporate and government surveillance and manipulation. This course will analyze and historicize this tension, looking to unpack the complex and controversial role of computers in American political life from the Cold War to @POTUS.
Taught by: Dick
Course usually offered in fall term
Activity: Seminar
1 Course Unit

STSC 272 Energy in America
Energy issues are central to all aspects of American life - social, cultural, environmental, political and economic. The United States possesses abundant energy resources, and Americans have long enjoyed high, even profligate energy consumption. With 5% of the world's population, the United States currently consumes 24% of the world energy. How did the United States' energy system come to be? This course looks at how this energy system developed over time, in order to understand how Americans' energy choices have been shaped by environmental conditions, economic arrangements, political practices, social structures, and cultural values. It examines the kinds of energy and power used by Americans, energy adoption and transitions, the development of power systems, the role of consumption, and the influence of energy beliefs. It emphasizes the themes of system, contingency, complementarity, and choice. Ongoing topics are the history of energy at the University of Pennsylvania and in the mid-Atlantic region, the meaning of energy efficiency, and the problem of sustainable energy.
Taught by: Greene, A
Course not offered every year

STSC 279 Nature's Nation: Americans and Their Environment
The United States is "nature's nation." Blessed with an enormous, resource-rich geographically diverse and sparsely settled territory, Americans have long seen "nature" as central to their identity, prosperity, politics and power, and have transformed their natural environment accordingly. But what does it mean to be "nature's nation?" This course describes and explores how American "nature" has changed over time. How and why has American nature changed over the last four centuries? What have Americans believed about the nation's nature, what have they known about the environment, how did they know it and how have they acted on beliefs and knowledge? What didn't or don't they know? How have political institutions, economic arrangements, social groups and cultural values shaped attitudes and policies? How have natural actors (such landscape features, weather events, plants, animals, microorganisms) played roles in national history? In addition to exploring the history of American nature, we will look for the nature in American history. Where is "nature" in some of the key events of American history that may not, on the surface, appear to be "environmental?"

STSC 307 Globalization & Medicine in Colonial & Postcolonial South Asia
This seminar will explore a wide range of themes at the intersection of globalization and therapeutic cultures in South Asia and amongst South Asian diasporas. To begin with the course understands 'supraterritoriality' as the key feature of globalization and to interrogate the myriad ways in which this supraterritoriality was produced, consumed, used an dabused within the theraeutic cultures that have been, and on occasion still are, available in South Asia both in reality and symbolically. Each week, through a specific case study, framed by a few theoretical readings, we will attempt to deepen and problematize the simple definition of globalization with which we start the course. Throughout the course there will be a strong emphasis on combining case study-based empirical material and theoretical interventions in Cultural Theory and Postcolonial Studies.
Taught by: Mukharji
One-term course offered either term

STSC 308 Science, Technology and Global Capitalism
Modern capitalism has been defined by the circulation of commodities, from gold in the 16th century to sugar in the 17th, tobacco in the 18th, cotton in the 19th, oil in the 20th, and financial derivatives in the 21st. But the world is always messy and complex, rather than neatly divided into products and goods. How, why, and for whose benefit do we divide nature into the abstractions of the marketplace? Who holds power over where, why, and how that happens? In this seminar, we'll use a wide range of scholarship from the humanities, social sciences, and the sciences, along with primary texts and other sources, in order to understand the close links among global capitalism, science and technology, and the natural world.??
One-term course offered either term
Activity: Seminar
1 Course Unit

STSC 310 Futurology
This seminar will explore past attempts by scientists and visionaries to predict the future. After exploring the nature and methodological problems inherent in prognostication that have caused most such attempts to fail, we will focus on a series of interesting essays, stories, and visionary works that seem to have successfully foreseen aspects of the world we live in, and attempt to analyze what they got right, what they got wrong, and why. We will conclude with critical, historically informed analysis of some current scientific prognostications about our short, intermediate, and longer term destiny. Grading will be based on class participation, student reports, several short papers, and a final research paper.

STSC 318 Experiment in the Modern Life Sciences
Experiments on living material are now controversial for ethical reasons (think stem cells, animal experimentation and animal rights, etc), but the scientific merit of experimenting onthe living is rarely challenged. We tend to take for granted that experiments are the best way to understand biology, but inthe nineteenth century, the opposite was true. Why has this changed, and what are the implications of the change? Is the appearance of consensus around the role of experiment in biology simply a false impression? These are the sorts of questions that this course will explore through popular, scientific, and historical literature.

1 Course Unit

STSC 322 Edgar Allan Poe's Science
You probably read Poe first in junior high, and his works are often treated as juvenile: cheap thrills, campy horror, self-indulgent longing. But Poe also engaged with the most serious issues faced by his period, from politics and philosophy to industrialization and science. His works dealt with these concerns in a variety of ways, while reflecting all along about the conditions of literature in a newly commercialized marketplace. This seminar will look at Poe's literary innovations through the lens of the developing technology and science of the early republic. It will examine the political importance of new institutions for research and diffusion as well as various emerging venues for popular science, including the journals in which Poe wrote as an early science reporter. The course thus explores the peculiar situtation of science and technology in the early USA, at the same time as it reveals the varied and complex literary production of Poe in a new and revealing light.

STSC 328 What is Prediction?
This course is an investigation into the notion of prediction from antiquity to the present. By looking closely at key practices from Homeric divination to modern actuarial science and from early modern astrology to contemporary climate models, the course seeks to historicize the way we engage with the future. As part of the course, students also explore the role that methodology, models, causation and big data have played in predictive practices. The readings include a mixture of primary sources, modern scholarship and journalism.

Course not offered every year
Activity: Seminar
1 Course Unit

STSC 329 Gender and Science
This course explores the gendered nature of science as social endeavor, intellectual construct and political resource. We consider the rise of gentlemanly science, masculinity and the arms race, the notion of a "Successor science" grounded in feminist theory, and the historical role of gender in defining who can do science and what counts as scientific data. We also explore how science has interpreted male-female differences. Our goal is to understand the profound impact of social place in the history of science, and thereby to understand the social nature of scientific knowledge.

STSC 338 Hybrid Science: Nature, health, and society in Latin America
What role did science and medicine play in the creation and growth of the Spanish and Portuguese empires? And why was the creation of science and health institutions crucial to the revolutionary movements for independence in Latin America? This course examines science and medicine in Latin America by attending to the ways that knowledge of nature and health has been central to the political struggles of the countries in this region. A crucial dynamic shaping the history and culture of this region is the interplay between the healing practices and cosmologies of European settlers, indigenous Americans, and the descendants of African slaves. Bearing this interplay in mind, this course explores how Latin America has been a fertile site of scientific creativity. It also examines the ways in which Latin American scientists and medical experts have refashioned concepts and practices from Europe and North America to fit local circumstances.

STSC 363 Technology & Democracy
What is the relationship between technology and politics in global democracies? This course explores various forms of technology, its artifacts and experts in relation to government and political decision-making. Does technology "rule" or "run" society, or should it? How do democratic societies balance the need for specialized technological expertise with rule by elected representatives? Topics will include: industrial revolutions, factory production and consumer society, technological utopias, the Cold War, state policy, colonial and post-colonial rule, and engineers' political visions.
Taught by: Voskuhl
Course not offered every year

1 Course Unit
STSC 364 Technologies of Research: Digital Methods in Action
This course asks three questions: What is technology? What is research? And how does technology aid research? These three questions beg a fourth: how can we spend a semester on three questions? Well, the answers to each of these questions may seem apparent, but think about them for more than a few seconds and you'll be hard pressed to offer a satisfactory answer. The term technology conjures images of recent, micro-processors, robots, or the Internet. But think deeper about the terms meaning for a moment and you'll see that such ancient, elemental things as mathematics and the alphabet are technologies, too. Likewise, you'll find that something we have all done before: research is an opaque and contestable term. The question of research gets at the very processes through which knowledge is produced.

Activity: Seminar
1 Course Unit

STSC 368 Sustainability & Utopianism
This seminar explores how the humanities can contribute to discussions of sustainability. We begin by investigating the contested term itself, paying close attention to critics and activists who deplore the very idea that we should try to sustain our, in their eyes, dystopian present, one marked by environmental catastrophe as well as by an assault on the educational ideals long embodied in the humanities. We then turn to classic humanist texts on utopia, beginning with More's fictive island of 1517. The "origins of environmentalism" lie in such depictions of island edens (Richard Grove), and our course proceeds to analyze classic utopian tests from American, English, and German literatures. Readings extend to utopian visions from Europe and America of the nineteenth and twentieth centuries, as well as literary and visual texts that deal with contemporary nuclear and flood catastrophes. Authors include: Bill McKibben, Jill Kerr Conway, Christopher Newfield, Thomas More, Francis Bacon, Karl Marx, Henry David Thoreau, Robert Owens, William Morris, Charlotte Perkins Gilman, Ayn Rand, Christa Wolf, and others.

STSC 369 Bioethics and National Security
At least since Augustine proposed a theory of "just war," armed conflict has been recognized as raising ethical issues. These issues have intensified along with the power and sophistication of weapons of war, and especially with increasing engineering capabilities and basic knowledge of the physical world. The life sciences have had their place in these developments as well, perhaps most vividly with the revelations of horrific experiments conducted by the Nazi and Imperial Japanese militaries, but with much greater intensity due to developments in fields like genetics, neuroscience and information science, and the widely recognized convergence of physics, chemistry, biology and engineering. The fields of bioethics and national security studies both developed in the decades following World War II. During the cold war little thought was given to the fact that many national security issues entail bioethical questions, but this intersection has been increasingly evident over the past two decades. In spite of the overlapping domains of bioethics and national security, there has been remarkable little systematic, institutional response to the challenges presented by these kinds of questions: - What rules should govern the conduct of human experiments when national security is threatened? - Is it permissible to study ways that viruses may be genetically modified in order to defeat available vaccines, even for defensive purposes? - What role may physicians or other health care professionals play in interrogation of suspected terrorists? - Must warfighters accept any and all drugs or devices that are believed to render them more fit for combat, including those that may alter cognition or personality? - What responsibilities does the scientific community have to anticipate possible "dual purpose" uses or other unintended consequences of its work? Deploying the resources of ethics, philosophy, history, sociology and theory, this course will address these and other problems.

STSC 379 Animals in Science Medicine Technology
This course explores human-animal relationships: the wide range of these relationships, why they originated and how they have changed over time. How have humans classified, valued, utilized, consumed, behaved toward and understood animals? Where is the boundary between humans and other animals, and how do we know, since humans are also animals? How is that boundary been maintained and redefined? Are humans part of the animal "natural" world- or apart from it? How are humans similar to and different from other kinds of animals? How do we know about animals and what is it we know? To what extent are questions about animals really questions about humans? How has the meaning of animal changed over time? The course focuses in particular to the roles and relationships of animals within science and medicine, and as biotechnologies.

1 Course Unit

STSC 388 Who Owns the Past
Stories told about the past have long been understood as moral lessons. And historical narratives have also been susceptible to different readings by opposed parties. But the strength of appeals to the past is not a constant: historical experience has at some times and in some places been seen as irrelevant to practical action. Today, in the United States as well as in many other parts of the world, appeals to historical precedent carry considerable weight, and are made for many purposes. For example, the dissolution of Yugoslavia, has been explained as a result of centuries-old ethnic tensions, yet when Yugoslavia was created at the end of World War I, objections were countered with the anthropological judgment that the new nation's ethnic divisions were not really significant. Or consider the debate over the ownership of the bones of so-called "Kennewick Man," which pitted Native Americans against scientists over questions of identity and legal claims. Or, historical generalizations in biology over the value of Darwin's theory, resulting in political debates in local and school board elections and presidential contests. This course will discuss the uses of history in contemporary and past situations, drawing examples from the United States, Europe, the Middle East, and Africa.

STSC 400 Undergraduate Seminar in Science Technology and Society
This is a capstone seminar for STSC majors, and a required seminar for any STSC junior who wishes to write a senior thesis for honors in the major. It is designed to provide the tools necessary to undertake original research by guiding students through the research and writing process. Students will produce either a polished proposal for a senior thesis project, or a completed research paper by the end of the term. Although each student will work on a different topic, the class will focus on general aspects of historical, and social scientific research and guide students through a close reading of key texts in science and technology studies. Course usually offered in spring term
Activity: Seminar
1 Course Unit

STSC 408 Depicting Data and Picturing Nature
Scientific knowledge has always relied on images, as in the cases of big, beautiful books of pictures like Audubon's Birds of America, photographs taken through telescopes, maps, readouts and today, digital images. These images can be a shorthand or guide to make patterns clearer-or sometimes are taken to represent the natural world itself. With questions about how to represent "big data," the interpretation of medical images, and about the manipulability of digital images, the role of images in contemporary science is hardly straightforward. This course will look at the development of image-making as a part of knowledge production in medicine and the sciences. We will read works by visual specialists, historians, scientists and artists, and critically examine scientific images themselves, developing our own visual literacy.
Taught by: Berkowitz
Course usually offered in spring term
Activity: Seminar
1 Course Unit

STSC 411 Sports Science Medicine Technology
Why did Lance Armstrong get caught? Why do Kenyans win marathons? Does Gatorade really work? In this course, we won't answer these questions ourselves but will rely upon the methods of history, sociology, and anthropology to explore the world of the sport scientists who do. Sport scientists produce knowledge about how human bodies work and the intricacies of human performance. They bring elite (world-class) athletes to their laboratories or their labs to the athletes. Through readings, discussions, and original research, we will find out how these scientists determine the boundary between "natural" and "performance-enhanced," work to conquer the problem of fatigue, and establish the limits and potential of human beings. Course themes include: technology in science and sport, the lab vs. the field, genetics and race, the politics of the body, and doping. Course goals include: 1) reading scientific and medical texts critically, and assessing their social, cultural, and political origins and ramifications; 2) pursuing an in-depth The course fulfills the Capstone requirement for the HSOC/STSC majors. Semester-long research projects will focus on "un-black-boxing" the metrics sport scientists and physicians use to categorize athletes' bodies as "normal" or "abnormal." For example, you may investigate the test(s) used to define whether an athlete is male or female, establish whether an athlete's blood is "too" oxygenated, or assess whether an athlete is "too" fast (false start). Requirements therefore include: weekly readings and participation in online and in-class discussions; sequenced research assignments; peer review; and a final 20+page original research paper and presentation.

Course not offered every year
Also Offered As: PHIL 426
Activity: Seminar
1 Course Unit

STSC 429 The Neurological Condition
Few aspects of our physical makeup are as closely linked to who we are as people as the nervous system. We define our selves by our capacity to think, to react, by our memories. In large part, we believe we are our brains. Yet such perceptions have a history far deeper than our current neuro-obsessed moment. In this course we explore the neurological condition as the human condition: the growing sense since the nineteenth century that we are defined by our nervous systems, and the science that has fostered this vision. From theories of diminishing "nerve force" and the electric cures of the Victorian era, to fMRIs and Obama's 2013 BRAIN Initiative, we explore how science, medicine, and technology have shaped our understanding of the brain and nervous system as the center of human identity. Course topics include the rise of professional neurology and neuroscience, cultural meanings of nerves and the brain, and the intimate role of patients and human subjects in formulating this science from the nineteenth century to the present.

STSC 436 Biopiracy: Medicinal Plants and Global Power
Biopiracy has emerged as the name of conflict between multinational pharmaceutical companies attempting to get genetic patents on medicinal plants and indigenous communities in the Global South who have long known and used these plants for medicinal purposes. Today the story of Biopiracy is an unfolding story of plants, patents and power. The extraction and commercial exploitation of plants and knowledge about them from the Global South however is not new. It has been happening at increasing pace for at least the last two centuries. Both the anti-malarial drug quinine and the cancer drug vincristine for instance have their plant-origins in the Global South where local communities used them medicinally long before their discovery by biomedicine. This course will put the current debates around Biopiracy in context and explore how the entanglements of plants and power have changed or not changed.

**STSC 442 Hospital as Curing Machine**
This course examines the technological, scientific, and spatial evolution of the modern hospital from the miasmatic, vermin-infested medieval European hospital-as-alms house, to the late twentieth-century ideal of the modern hospital as a condenser of sophisticated technologies, scientific expertise, and Taylorist efficiencies. In so doing, we will see how designers of hospital space, consciously or not, have striven to realize the mechanized, technological vision of the hospital as curing machine a phrase first invoked by 18th century French surgeon and anatomist Jacques Tenon. While the early nineteenth-century hospital had been a locus for fears about contagion, death, and disease in a pre-germ theory world, through its eventual integration of antiseptic practices, spatially produced zones of medical expertise (the operating suite, the laboratory, pediatric and maternity wards), novel technologies (incubators, hyperbaric chambers, x-rays, ultrasounds) and factory-like efficiencies the hospital came into its own as the epitome of rational modernist space. But, over the course of its evolution, the modern hospital has undergone other changes as well: as an incubator for super-bugs, as an engine for projects of renewal, and as a site for the cultural transformation of the meaning of birth, death, and health itself.

Also Offered As: HSOC 442
Activity: Seminar
1 Course Unit

**STSC 443 Science and the Senses: Visual Culture, Material Objects**
Using various types of readings, podcasts, and visits to area museums and centers of research, this course examines the relationships between seeing, sensing, and knowing in science. What roles do the senses and the material objects they observe play in production of science, and how has that changed historically? Are the senses reliable and standardizable, and if so, how can we talk about them with a common vocabulary? Are some more important than others? We will begin to answer these questions historically, following the role of the senses in science from the early modern period up to the present. We will look at ways in which vision was constructed as the primary sense during the Enlightenment and at ways in which it was made objective and instrumentalized in the modern period. We will also look at objects themselves. How do museum displays, illustrations jarred specimens, photographs, and movies make and convey knowledge?
Taught by: Berkowitz
Course not offered every year
Activity: Seminar
1 Course Unit

**STSC 446 The Child in the City**
This course examines the problem of the child in urban space in 19th and 20th century European and American discourses. This course does not propose to recover the subjective experience of the child but, rather, views the child as an object around which numerous adult anxieties connected to industrialization, urbanization, and modernity itself cohered. Discourses on public health, environmental pollution, sexuality, criminality, and racial degeneration all focused their attention, anxieties, and energies on how to deal with the unique vulnerability of the child in modern urban space. This interdisciplinary course focuses specifically on atmospheres, environments, and architectures in urban settings as diverse as Chicago, New York, Paris, and London. We will examine how the built environment was envisioned as part of a set of critical technologies for resolving the threat that urban space posed to the child. We will explore objects and envy as diverse as tenement baby cages, wartime floating hospitals, open-air schools, adventu playgrounds in post-WWII London, car-less communities in Radburn, NJ, and American children's books about urban blight and renewal.
Taught by: Greene, G
Also Offered As: HSOC 461

Slavic (SLAV)

SLAV 100 Slavic Civilization
This introductory course examines selected topics in the cultural and political history of Slavic peoples. Topics include: the origins and prehistory of the Slavs, Slavic languages and literary culture, religions of the Slavs (Orthodoxy, Catholicism, Protestantism, Islam), the origins of Slavic nationalism and Pan-Slavism and the formation of Eastern/Central Europe. The course combines lectures with discussions of literary texts in translation, film, music and art.
For BA Students: History and Tradition Sector
Taught by: Verkholantsev
Course offered fall; odd-numbered years
Also Offered As: HIST 231, RUSS 103
Activity: Lecture
1 Course Unit

SLAV 109 Central European Culture and Civilization
This course is normally offered through Penn-in-Prague during summer. The reappearance of the concept of Central Europe is one of the most fascinating results of the collapse of the Soviet empire. The course will provide an introduction into the study of this region based on the commonalities and differences between Austria, Czechoslovakia, Hungary, Poland and Germany. The topics will include the history of arts and literature, as well as broader cultural and historical patterns characteristic of this part of Europe.
Taught by: Steiner
Course not offered every year
Activity: Lecture

Activity: Independent Study
1 Course Unit
Notes: May be repeated for credit

SLAV 500 History of Literary Theory
Over the last three decades, the fields of literary and cultural studies have been reconfigured by a variety of theoretical and methodological developments. Bracing and often confrontational dialogues between theoretical and political positions as varied as Deconstruction, New Historicism, Cultural Materialism, Feminism, Queer Theory, Minority Discourse Theory, Colonial and Post-colonial Studies and Cultural Studies have, in particular, altered disciplinary agendas and intellectual priorities for students embarking on the professional study of literature. In this course, we will study key texts, statements and debates that define these issues, and will work towards a broad knowledge of the complex rewriting of the project of literary studies in process today. The reading list will keep in mind the Examination List in Comparative Literature we will not work towards complete coverage but will ask how crucial contemporary theorists engage with the longer history and institutional practices of literary criticism. There will be no examinations. Students will make one class presentation, which will then be reworked into a paper (1200-1500 words) to be submitted one week after the presentation. A second paper will be an annotated bibliography on a theoretical issue or issues that a student wishes to explore further. The bibliography will be developed in consultation with the instructor; it will typically include three or four books and six to eight articles or their equivalent. The annotated bibliography will be prefaced by a five or six page introduction; the whole will add up to between 5000 and 6000 words of prose. Students will prepare position notes each week, which will either be posted on a weblog or circulated in class.

SLAV 501 Elementary Polish I
This course is for students who want to acquire the linguistic skills necessary for communication in everyday situations and that would constitute a solid base for further study of the Polish language. In addition students will become acquainted with various aspects of Polish culture (including Polish films), history and contemporary affairs. Students will learn through classroom exercises based on a modern textbook, completion of individual and group assignments and work with various audio and video materials. The textbook Hurra - Po Polsku 1 is written in the spirit of the communicative approach, which makes it possible to communicate from the very beginning of the learning process. The special attention, however, will be paid on systematic development of all language skills: listening, reading, speaking and writing.
For BA Students: Language Course
Taught by: Dziedzic
Two terms. student may enter either term.
Prerequisites: No prerequisite.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 502 Elementary Polish II
This course is a continuation of the SLAV501 680. This is for students who want to acquire the linguistic skills necessary for communication in everyday situations and that would constitute a solid base for further study of the Polish language. In addition students will become acquainted with various aspects of Polish culture (including Polish films), history and contemporary affairs. Students will learn through classroom exercises based on a modern textbook, completion of individual and group assignments and work with various audio and video materials. The textbook Hurra - Po Polsku 1 is written in the spirit of the communicative approach, which makes it possible to communicate from the very beginning of the learning process. The special attention, however, will be paid on systematic development of all language skills: listening, reading, speaking and writing.
For BA Students: Language Course
Taught by: Dziedzic
Two terms. student may enter either term.
Prerequisites: SLAV 501 or Instructor's permission.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 503 Intermediate Polish I
This is a first-semester intermediate -level language course that emphasizes the development of the four basic skills (reading, writing, listening, and speaking) within a culturally based context. Class time will focus on communicative activities that combine grammatical concepts, relevant vocabulary, and cultural themes. Students will learn through classroom exercises based on a modern textbook: Hurra Po Polsku 2, completion of individual and group assignments and work with various audio and video materials. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the Polish cases; the aspect of the verbs, the development of writing skills.
For BA Students: Language Course
Taught by: Wolski-Moskoff
Two terms. student may enter either term.
Prerequisites: SLAV 502 or placement exam.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 504 Intermediate Polish II
This course is a continuation of the SLAV503 680. This is a second-semester intermediate -level language course that emphasizes the development of the four basic skills (reading, writing, listening, and speaking) within a culturally based context. Class time will focus on communicative activities that combine grammatical concepts, relevant vocabulary, and cultural themes. Students will learn through classroom exercises based on a modern textbook: Hurra Po Polsku 2, completion of individual and group assignments and work with various audio and video materials. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the Polish cases; the aspect of the verbs, the development of writing skills.
For BA Students: Last Language Course
Taught by: Wolski-Moskoff
Two terms. student may enter either term.
Prerequisites: SLAV 503 or placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 505 Polish for heritage speakers I.
The course is addressed to students who have spoken Polish at home and seek to achieve proficiency in the language. The main goal of this course is to provide instruction directed at students continued development of existing competencies in the Polish language. Students will acquire skills that range from learning grammar and spelling, and developing vocabulary, to interpretation and analysis of different literary genres. Students will explore a broad variety of cultural themes. Topics will include: Polish literature - classic and modern, social life, contemporary affairs and films. Upon completion of the Polish for Heritage Speakers course, students are expected to confidently understand, read, write and speak Polish with an increased vocabulary and a better command of Polish grammar. They will increase their reading skills through interpretation and analysis of different Polish literary genres. Students will be able to organize their thoughts and write in a coherent manner. They will increase their writing skills by writing personal essays, compositions and others. Students will further their knowledge of the Polish language and will engage in class discussion on various topics. Students will gain a better understanding of the Polish culture.
For BA Students: Language Course
Taught by: Dziedzic
Course not offered every year
Prerequisite: Instructor permission required
Activity: Lecture
1 Course Unit
Notes: STUDENTS WHO COMPLETE TWO SEMESTERS OF THIS COURSE SATISFY THE PENN LANGUAGE REQUIREMENT. Polish is used exclusively in the classroom.

SLAV 506 Polish for Heritage Speakers II
Continuation of SLAV505
For BA Students: Last Language Course
Taught by: Dziedzic
Course not offered every year
Prerequisites: SLAV505 or placement test.
Activity: Lecture
1 Course Unit
SLAV 526 In Defiance of Babel: the Quest for a Universal Language
This is a course in intellectual history. It explores the historical trajectory, from antiquity to the present day, of the idea that there once was, and again could be, a universal and perfect language to explain and communicate the essence of human experience. The idea that the language spoken in the Garden of Eden was a language which perfectly expressed the essence of all possible objects and concepts has occupied the minds of scholars for more than two millennia. In defiance of the myth of the Tower of Babel and the confusion of languages, they strove to overcome divine punishment and discover the path back to harmonious existence. For philosophers, the possibility of recovering or recreating a universal language would enable apprehension of the laws of nature. For theologians, it would allow direct experience of the divinity. For mystic-cabalists it would offer access to hidden knowledge. For nineteenth-century philologists the reconstruction of the proto-language would enable a better understanding of human history. For contemporary scholars, linguistic universals provide structural models both for human and artificial languages. For writers and poets of all times, from Cyrano de Bergerac to Velimir Khlebnikov, the idea of a universal and perfect language has been an inexhaustible source of inspiration. Above all, the course examines fundamental questions of what language is and how it functions. Among the course readings are works by Plato, Aristotle, St. Augustine, Dante, Horapollo, Bacon, Giordano Bruno, John Wilkins, Cyrano de Bergerac, Jonathan Swift, and Zamenhof.
Taught by: Verkholantsev
Course not offered every year
Also Offered As: COML 526, ENGL 705, HIST 526
Activity: Seminar
1 Course Unit

SLAV 530 Elementary Czech I
An introduction to the fundamentals of the Czech language, acquisition of conversational, reading and writing skills.
For BA Students: Language Course
Two terms. student may enter either term.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 531 Elementary Czech II
Continuation of SLAV 530
For BA Students: Language Course
Taught by: Stejskal
Two terms. student may enter either term.
Prerequisite: SLAV 530 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 532 Intermediate Czech I
Emphasis on vocabulary building, conversation and reading skills. Grammar review.
For BA Students: Language Course
Taught by: Stejskal
Two terms. student may enter either term.
Prerequisite: SLAV 531 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 533 Intermediate Czech II
Continuation of SLAV 532
For BA Students: Last Language Course
Taught by: Stejskal
Two terms. student may enter either term.
Prerequisite: SLAV 532 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 534 Advanced Czech I
Emphasis on advanced vocabulary building, conversation and reading skills. Advanced grammar review.
Taught by: Stejskal
Two terms. student may enter either term.
Prerequisite: Two years of Czech or placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 535 Advanced Czech II
Continuation of SLAV 534
Taught by: Stejskal
Two terms. student may enter either term.
Prerequisite: SLAV 534 or placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 535 Slavic Literary Theory in Western Context
This course will compare selected theoretical concepts advanced by Russian Formalists, Prague Structuralists, and the Bakhtin group (e.g., defamiliarization, aesthetic sign, dialogue) with similar or analogous notions drawn from Western intellectual tradition.
Taught by: Steiner
Also Offered As: COML 579
Activity: Seminar
1 Course Unit

SLAV 590 Elementary Ukrainian I
An introduction to the fundamentals of the Ukrainian language, acquisition of conversational, reading and writing skills.
For BA Students: Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 591 Elementary Ukrainian II
Continuation of SLAV 590
For BA Students: Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Prerequisite: SLAV 590 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.
SLAV 592 Intermediate Ukrainian I
Emphasis on vocabulary building, conversation and reading skills. Grammar review.
For BA Students: Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Prerequisites: SLAV 591 or placement test.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

SLAV 593 Intermediate Ukrainian II
Continuation of SLAV 592
For BA Students: Last Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Prerequisite: SLAV 592 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

SLAV 594 Advanced Ukrainian I
Emphasis on advanced vocabulary building, conversation and reading skills. Advanced grammar review.
For BA Students: Advanced Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Prerequisite: SLAV 593 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

SLAV 595 Advanced Ukrainian II
Continuation of SLAV 594
For BA Students: Advanced Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Prerequisite: SLAV 594 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

SLAV 599 Independent Study

SLAV 610 Topics in Second Language Acquisition
Taught by: Shardakova
Course not offered every year
Activity: Seminar
1 Course Unit

SLAV 619 East & West in Medieval Europe: Bohemia as Center in the Age of the Luxemburgs
The seminar will examine a range of topics in Medieval Studies viewing European medieval civilization as encompassing the whole ("global") geographic and cultural space of Europe and ignoring reference to contemporary socio-political division of Europe into "Western" and "Eastern." As a case study, the course focuses on the 14th-century Holy Roman Empire from Henry VII to the Emperor Sigismund, and particularly on the reign of Charles IV, in a context in which Prague becomes the imperial capital and Bohemia a center of Europe. A detailed examination of this monarch's vision of a "Global Europe" will allow us to explore a network of connections, a network that stretches from Prague to the farthest western, eastern and southern corners of the European continent. We will examine correspondences and differences between various linguistic, textual, political, and religious communities, while attempting to show how Latin and Slavic European cultures were interwoven. Some of the titles from the reading list are Charles IV's The Life of St. Wenceslas and Autobiography, The Golden Bull, Dante's Letters & Monarchia, Machaut's Jugement of the King of Bohemia, Petrarch's Epistolae & Poems, Froissart's Prison of Love, Johannes von Tepi's The Plowman of Bohemia, The Life of St. Constantin the Philosopher, fragments from Czech, French, Italian, Polish, Hungarian and Rus medieval chronicles, etc. All reading will be done in English, with original language versions always available.
Taught by: Brownlee and Verkholyantsev
Also Offered As: COML 619
Activity: Seminar
1 Course Unit

SLAV 620 Europe: From Idea to Union
Employing the methods from the humanities and social sciences this interdisciplinary seminar will explore the variety of factors that contributed to dividing and uniting Europe. The continent will be considered as a geographical and cultural space and the construction of its identity will be examined through several historical periods-from the Middle Ages to Modernism—comprising the rich layer of pan-European civilization across the ethnic or national borders. Finally, the structure of the European Union will be scrutinized including its institutions, decision-making mechanism, shared currency, collective security, and Europe's changing relationship with the USA. Participants will be encouraged to select a particular topic in European studies and research it through assigned readings, film, literature, and other media. The individual projects will be developed through consultations with the instructor into a class presentation leading to a final paper (about 6,000 words).
Taught by: Steiner
Course not offered every year
Activity: Seminar
1 Course Unit
SLAV 623 Historiography of Imperial and Soviet Russia
We will cover the development of Russian historical research and writing from the start of the eighteenth century to the present, focusing on major texts, schools and figures. Alongside this traditional historiographical architecture, segments of the course will be devoted as well to a variety of theoretical models and approaches to research, including: institutional history, cultural history, poetics of history, philosophy of history, "invention of tradition," trauma studies, and others.
Taught by: Platt
Course usually offered in fall term
Also Offered As: HIST 620
Prerequisites: At least advanced reading knowledge of Russian. Seminar discussion will be conducted in English, but a fair amount of reading will be assigned in Russian.
Activity: Seminar
1 Course Unit

SLAV 651 Theories of Representation
The course will examine major Western theories of sign and representation from Socrates to Derrida. Primary focus will be on twentieth-century trends including phenomenology, structuralism, and Marxism. Readings will include: Plato, St. Augustine, Pierce, Husserl, Jakobson, Bakhtin, Voloshinov, Eco, Derrida and others.
Taught by: Steiner
Course not offered every year
Also Offered As: COML 650
Activity: Seminar
1 Course Unit

SLAV 655 History, Memory, Trauma
This course will be devoted to study of the theory and practice of representation of the past in major European traditions during the modern era, with special emphasis on three topics of broad concern: revolution, genocide, and national becoming. The object of inquiry will be construed broadly, to include all manner of historiographic, artistic, filmic, literary and rhetorical representation of the past. Each of the three segments of the course will begin with examination of important theoretical readings in conjunction with case studies in major European traditions that have been among the central foci of this theoretical work (French Revolutionary history, Holocaust, English nationalism). Next we will add analogous Russian cases to the picture (Russian Revolution, Gulag memory, Ivan the Terrible and Peter the Great as national myths). Finally, at the conclusion of each segment students will bring theoretical tools to bear on the national traditions and contexts relevant to their own work. Our readings in the theory and philosophy of history and historiography will include works by: Anderson, Caruth, Guha, Hegel, LaCapra, Putnam, Ricoeur, White and others.
Taught by: Platt
Course not offered every year
Also Offered As: COML 654
Activity: Seminar
1 Course Unit
Notes: All readings and lectures in English.

SLAV 657 Formalism, Bakhtin et al.
This course deals in depth with the three seminal literary-theoretical trends in Slavic philology during the inter war and the early post-war periods. It starts with Russian Formalism, a school striving to pin down what differentiates literary discourse from all other forms of language and continues with the Prague Structuralism that redefined the tenets of Formalisms from a semiotic perspective. Finally, the Bakhtin circle’s key concepts meta-linguistics, dialogue and carnivals are discussed. All readings are in English.
Taught by: Steiner

SWRK 601 History and Philosophy of Social Work and Social Welfare
This course traces the development of social welfare policy in the United States and its relationship to social work. It analyzes the values and assumptions that form the foundation of existing welfare programs and institutions and explores the social, economic, political and cultural contexts in which they have developed. The course examines the development of cash assistance and social services programs in light of the enduring legacy of poverty, racism, and sexism. The view of "outsiders" in U.S. society - low-income persons, people of color, gays and lesbians - allows us to gain perspective on the source of conflict and consensus in American history, which augments material about institutional racism learned in SWRK 603 and content about behavioral responses learned in SWRK 602. The course traces, as well, the roles that social workers have played in the formulation and implementation of social welfare policy and links these historical examples to contemporary policy practice.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
SWRK 602 Human Behavior in the Social Environment
This course introduces the student to the individual and family components of social interaction in a variety of different milieux. Theories of self and personality are studied, along with theories related to traditional and non-traditional family styles, different social and ethnic groups, and of assimilation and acculturation. Emphasis is given to the impact of different cultures and traditions on individual functioning. Additional attention is given to selected social characteristics of the larger society, such as factors of socio-economic class which influence individual and family behavior and functioning.
Course usually offered in fall term
Activity: Lecture
1 Course Unit

SWRK 603 American Racism and Social Work Practice
This course explores racism in America as an historical and contemporary phenomenon. It emphasizes the development of evidence-based knowledge about institutional systems of racism, analytical skill in understanding the complexity of institutional racism and other forms of oppression more broadly defined, self-awareness, and the implications of racism for social work services and practices.
Course usually offered in fall term
Activity: Lecture
1 Course Unit

SWRK 604 Foundations of Social Work Practice I
This is a first of a four-course sequence designed to help students develop a professional stance and evidence-based framework for social work services to individuals, groups, families, and communities. It integrates the student’s theoretical learning with the experience in the field placement agency. The student is introduced to a holistic process-oriented approach to social work practice and to methods for implementation. The course emphasizes the social context for practice with special attention to agency purpose, functions and structure; the client system and its perceptions of need; goals and resources and the social worker as a facilitator of change.
Course usually offered in fall term
Activity: Lecture
1 Course Unit

SWRK 604 Foundations of Social Work Practice II
This is the second in a four-course sequence and continues to examine varied practice frameworks and methods for service delivery in working with individuals, groups, families and communities. It emphasizes the eradication of institutional racism and other forms of oppression along with the integration of a culturally-sensitive approach to social work practice. Attention is given to understanding client problems in the context of different social work practice approaches and service requirements and to increased use of professional values to guide and inform practice.
Course usually offered in spring term
Prerequisite: SWRK604
Activity: Lecture
1 Course Unit

SWRK 615 Introduction to Social Work Research
This course presents the broad range of research tools that social workers can use to improve the effectiveness and efficiency of their practice. The course emphasizes the process of theory development, conceptualization, and hypothesis formulation across a broad spectrum of social work practice situations. The course includes methodological considerations relating to concept operationalization; research design (experimental, survey, and field), sampling instrumentation, methods of data collection and analysis, and report preparation and dissemination. The course also emphasizes how social work research can help professionals better understand and more effectively impact problems of racism and sexism in contemporary American society.
Course usually offered in spring term
Activity: Seminar
1 Course Unit

SWRK 620 Integrative Seminar
All Advanced Standing students are required to take the Integrative Seminar in the summer upon beginning the program. The seminar meets weekly during the second summer session and supports students as they begin their field placement. In order to enroll in the fall, students must achieve satisfactory performance in the Integrative Practice Seminar and summer field placement.
Course usually offered summer term only
Prerequisite: Advanced Standing MSW students only
Activity: Seminar
0 Course Units

SWRK 701 Health and Mental Health Policy
This course provides an overview of the historical, social and economic dimensions of the health care delivery system: how health policies are developed and implemented, and how such policies influence social work practice, program planning, and research. Key health policy issues such as financing, cost, access, and the allocation of resources are explored in the context of health reform proposals. Students investigate how health policy affects specific population groups such as women and children, persons with chronic mental illnesses, persons with AIDS, older adults, and minorities.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: MSW Policy Option

SWRK 702 Social Work Practice in Health Care
This course focuses on key issues in social work practice in health care settings. Social aspects of health and illness, including cultural variations, health beliefs and behavior, and the impact of illness on the patient and the family, are examined and their relevance for practice is discussed. Appropriate theoretical models for practice are identified and applied to practice in the areas of prevention, primary care, chronic and long-term care. New roles for social work in varied health delivery systems and inter-professional collaboration are explored.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective
SWRK 703 Impacting Government: Policy Analysis & Coalition Building
This course focuses on developing a theoretical foundation for actionable skills in policy analysis and coalition building across a wide range of constituencies. The material begins with a structured focus on the ideological underpinnings of social welfare in the United States and the ways in which these perspectives shape our conception of equity, equality, and allocation of resources along the lines of race, class, gender, immigration status, and other identities. We will then utilize this basis for developing analysis frameworks, policy briefs, and media messaging that students will utilize when working with legislative bodies to advocate for and with the populations they serve. Distinct emphasis is placed on becoming conversant across differential systems, ideas, values, and assumptions while remaining grounded in relevant research and empirical approaches.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective

SWRK 704 Advanced Clinical Social Work Practice I
Clinical Social Work Practice I and Field Practice builds on the generalist model of practice established in the foundation social work practice courses. The course work and assignments in SWRK 704 are closely linked to the students’ learning objectives and experiences in the field. This course has students critically examine and deepen their understanding of advanced theoretical frameworks and specific skills to be applied in clinical practice with children, adolescents, adults, and families. Students begin with classic and modern formulations of psychodynamic work and use this as a foundation for understanding theoretically and empirically drive models of family intervention. In addition, use of self and social work values and ethics and working with diverse clients are addressed at an advanced level.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Required for Clinical Practice Concentration

SWRK 706 Policies for Children and Their Families
This course examines policies for children and their families with a specific focus on child welfare policy. The course examines the interrelationship between: the knowledge base on child abuse and neglect; evaluations of interventions; programs and policies designed to protect maltreated children; and child welfare policy at the state and national level. The course also examines federal and state laws that govern the funding and operation of child welfare systems; the history of child welfare policies; the operation of child welfare systems; and the legal, political and social forces that influence the structure and function of child welfare systems in the United States.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Policy Option

SWRK 707 Impacting Government: Policy Analysis & Coalition Building for Clinical Practice Concentration
This course focuses on developing a theoretical foundation for actionable skills in policy analysis and coalition building across a wide range of constituencies. The material begins with a structured focus on the ideological underpinnings of social welfare in the United States and the ways in which these perspectives shape our conception of equity, equality, and allocation of resources along the lines of race, class, gender, immigration status, and other identities. We will then utilize this basis for developing analysis frameworks, policy briefs, and media messaging that students will utilize when working with legislative bodies to advocate for and with the populations they serve. Distinct emphasis is placed on becoming conversant across differential systems, ideas, values, and assumptions while remaining grounded in relevant research and empirical approaches.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: Required for Clinical Practice Concentration

SWRK 708 Advanced Macro Social Work Practice I
Advanced Macro Social Work Practice I and Field builds on the foundation social work practice courses and focuses on three areas: (1) context of macro practice; (2) organizational structure with a focus on nonprofits; and (3) program design and development. The course begins with providing theoretical frameworks for macro practice and then moves to focus on delivery of services at the community level. Knowledge and skill development focuses primarily on social work practice within communities and organizations. Students learn how to organize and build relationships with communities and develop, plan, manage, fund and assess/evaluate community-based programs. Specific skill development includes learning how to research, develop, write, and pitch a grant proposal. Course content is integrated with fieldwork and is specific to the service needs of the populations with whom students are working in their field agencies.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Required for Macro Practice Concentration

SWRK 709 Heterosexualism and Social Work
This course builds on the foundation year focus on institutional oppression by applying this model to the status of lesbian, gay, bisexual, and transgender people in U.S. society and in social welfare systems. The course assesses the relationship of heterosexualism and homophobia to other forms of institutional oppression, including racism and sexism. The course includes an overview of the treatment of sexual minorities in the U.S. and in the social work profession with a focus on issues related to lesbian, gay, bisexual, and transgender clients as an under-served and mis-served population. The intersection of racism and heterosexism is a focal point to explore the concerns and needs of LGBTQ people of color. Current theoretical frameworks for understanding sexual identity and the unique situations of lesbian, gay, bisexual, transgender and questioning people throughout the life cycle will be identified. Social work strategies for addressing heterosexism in social welfare agencies and communities will be explored by examining both micro and macro social work practice issues. The course will include a critical assessment of the state of social work education on the topic.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: MSW Elective

SWRK 710 Supervision Seminar
Students in the Employed Practitioners Program are required to take this non-credit seminar in the fall and spring terms of their second year of study. The class meets every other week. In a limited number of cases, advanced-year students may be placed in agencies where there is no available MSW field instructor. In such instances, the student is required to attend the Clinical or Macro Supervision Seminar (depending on their concentration), which meets every other week during the academic year. Students who are required to participate in the clinical or macro supervision seminars will be given 1.5 hours of compensatory time off from their field placement every other week.
Activity: Seminar
0 Course Units
Notes: Non-credit course required for students in the Employed Practitioners Program OR Non-credit course required for students without an MSW supervisor at their field placement
SWRK 711 Contemporary Social Policy
This course introduces students to the analysis of contemporary social welfare policy. Several social welfare policy areas, including social inequality, poverty, health care, and housing are examined. Each topic area is also used to illustrate a component of the policy analysis process, including the analysis of ideologies and values as they shape policy formulation, the process by which legislation is proposed and enacted, the roles of advocacy and lobbying organizations, and the challenges of policy implementation and evaluation.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Policy Option

SWRK 712 City Limits: The Impact of Urban Policy
This course assesses the changing role of public policy in American cities. In the past, government often believed that it could direct urban development. New realities - the rise of an informal labor market, global capital and labor flows, the flight of businesses and the middle class to the suburbs - have demonstrated that government must see itself as one - but only one - 'player' in a more complex, transnational process of policy making that crosses political boundaries and involves business, organized interest groups, and citizens. This seminar uses a case-study method to study how public policy can make a difference in the revitalization of distressed American cities. The seminar is designed for advanced undergraduates and graduate students. Seminar readings and projects will be organized around three themes: 1) history and vision, 2) data and analysis, and 3) policy and implementation. Students will be divided into project teams assigned to work on current development issues that will be reviewed by both public and private-sector experts. Extensive use will be made of real estate, economic development, and social indicator data to understand the complex forces at work in both large and small cities. Students will learn to access, analyze, and map information; to frame and interpret these data within a regional perspective; and to construct profiles of cities and neighborhoods. Students will study recent urban redevelopment initiatives in the Philadelphia region, including Philadelphia's Neighborhood Transformations Initiative and New Jersey's Camden Revitalization plans.
Course usually offered in spring term
Also Offered As: URBS 454
Prerequisites: Students must have taken an introduction to research methods.
Activity: Seminar
1 Course Unit

SWRK 713 Understanding Social Change: Issues of Race and Gender
This course builds upon the foundation of historical, psychological, sociological, economic, political, and personal knowledge about institutionalized forms of racism and discrimination developed in SWRK 603, American Racism and Social Work Practice. The course uses understanding elements of oppression to critically examine strategies for addressing racism and sexism in organizations and communities through systematic assessment and planning for social change. The course examines change at three levels: organizations, communities, and social movements.
Course usually offered in spring term
Prerequisite: SWRK 603
Activity: Lecture
1 Course Unit

SWRK 714 Advanced Clinical Social Work Practice II
The focus of learning in this semester is theories and skills related to clinical practice with individuals and groups, differential intervention, and the broadening of the professional role and repertoire. The course content and assignments for SWRK 714 are closely linked with the students’ learning objectives and experiences in the field. Students extend and refine their practice knowledge and skills and learn to intervene with cognitive, behavioral, and narrative modalities. This semester focuses also on work with complex trauma across systems and populations. Students consolidate their identification as professionals and learn to constructively use the environment to effect systems changes.
Course usually offered in spring term
Prerequisite: SWRK 704
Activity: Lecture
1 Course Unit
Notes: Required for Clinical Practice Concentration

SWRK 716 Comprehensive School Reform: From 'No Child Left Behind' through 'Race to the Top' to 'Every Student Succeeds Act'
This course examines how K-12 education policy is designed and implemented in the United States. It uses a systems analysis as the framework for looking at who makes what kinds of demands on the education policy system, how these demands are placed on the policy agenda, the decision making process, and resulting education policies and policy outcomes. The course pays particular attention to the roles of federal, state and local governments in education policy, and the impact of our intergovernmental system on the design and implementation of policy. Students will also examine major education policies and debate key education policy issues that arise at each level of government.
Also Offered As: EDUC 712
Activity: Seminar
1 Course Unit
Notes: Required for Clinical Practice Concentration

SWRK 718 Advanced Macro Social Work Practice II
Advanced Macro Social Work Practice II and Field helps students broaden and deepen the specific knowledge and skills required to become an effective and creative social work practitioner. The course focuses on five areas of macro practice: (1) community assessment and practice; (2) policy advocacy; (3) fiscal management and fundraising; (4) global human rights; and (5) emerging areas of macro practice. Students learn how to conduct a community practice analysis, engage in policy advocacy, develop an idea for a social enterprise, write an agency fundraising plan, and conduct an agency fiscal evaluation. Students learn to utilize administrative skills to promote social change within a variety of systems that influence the lives of client populations. Course content is integrated with fieldwork and is specific to the service needs of the populations with whom students are working in their field agencies.
Course usually offered in spring term
Prerequisite: SWRK 708
Activity: Lecture
1 Course Unit
Notes: Required for Macro Practice Concentration
**SWRK 719 Prenatal and Early Childhood Development**
This course presents a coherent portrait of the development that transforms a person from the prenatal period to infancy to young childhood. The course bridges standard theories of development with new approaches such as social learning, cognitive development, developmental psychobiology, and other psychological theories used to understand the child. Integration of different perspectives on development is geared to demonstrate the interrelated nature of growth in cognition, learning, language, emotions, personality, physical growth and social behaviors. Students research areas of individual interest. MSW Elective
Course not offered every year
Activity: Lecture
1 Course Unit

**SWRK 720 Middle Childhood and Adolescence**
This course focuses initially on growth and behavior in the often overshadowed period of middle childhood, and in greater depth on the adolescent period. Change in the psychological, physical, cognitive and social domains of growth is examined and is related to changing relationships and overt behaviors. The influence of social factors is a continuing theme. Concepts like "adolescent rebellion" are questioned and re-evaluated. Connections between uneven development and social problem behavior are examined. Knowledge is salient to school social work as well as to other practice domains. Students research areas of individual interest.
Course not offered every year
Activity: Lecture
1 Course Unit

**SWRK 722 Practice with Children and Adolescents**
This course provides a foundation for social work practice with children and adolescents. Beginning with an overview of normative child and adolescent development and psychosocial developmental theory, the course covers various methods for helping at-risk children and adolescents and their families. Emphasizing the complex interplay between children and adolescents and their social environments, consideration will be given to biological, temperamental, and developmental status; the familial/cultural context; the school context; and other aspects of the physical and social environment. Particular attention is paid to working with socially, emotionally, financially, and physically challenged and deprived children and adolescents and their families.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; Option for Home and School Visitor (HSV) specialization

**SWRK 724 Developmental Disabilities**
This course enhances the students’ ability to practice social work with and on behalf of people with developmental disabilities and their families. The course provides a base of knowledge about developmental disabilities and differences, their causes and characteristics. Students learn how disabilities and learning differences impact personal, familial, educational, social, and economic dimensions for the individual, family and society, with attention to the person’s special life cycle needs and characteristics. The course also emphasizes legislative, programmatic, political, economic, and theoretical formulations fundamental to service delivery.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; required for students in the HSV program

**SWRK 726 Brief Treatment and Crisis Intervention**
This course focuses on theory and practice of planned brief treatment in social work practice, primarily with individuals but with attention to couples, families and other groupings. The course covers the history of and different approaches to brief treatment. Topics include treatment issues such as criteria for selection of clients, understanding the importance of time in the treatment relationship, the use of history, the importance of focusing, the process of termination and other issues related to brief interventions. Particular attention will be paid to the use of brief treatment approaches in crisis situations. The course presents various methods of assessing an individual’s crisis and of helping clients mobilize their strengths to utilize customary methods of coping and learn newer ways of coping.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

**SWRK 727 Practice with Families**
This course provides students with assessment and intervention skills for social work practice with varied family/partner configurations. The course begins with a grounding in family systems theory and proceeds to explore patterns of interaction in terms of the wide range of problems that families and partners bring to social agencies. Emphasis is given to exploring ways of supporting change in interaction patterns. Readings are augmented by videotapes of family sessions and simulations of clinical situations from students’ field practice.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective
SWRK 729 Social Statistics
This course provides students with a broad range of statistical methods and applications. It introduces social work students to the use of quantitative data for planning and evaluating social programs and social policy. Course topics include conceptualization and measurement of variables and basic techniques and concepts for exploring and categorizing data, for generalizing research findings and testing hypotheses, and for statistical data processing. Students will gain experience in using a Windows-based statistical software package on personal computers. Emphasis is placed on the practical application of data to address social policy and social work practice issues. Students have the opportunity to critique the application of data analysis and presentation in technical reports and professional journals. One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Research Option

SWRK 730 Community Mapping
Geographic space is important to family and community well-being, as we know. Community Mapping introduces students to geographic information systems (GIS), computer software for making maps and analyzing spatial data. Students will learn how maps have been used in social welfare history as well as how GIS can be used for needs assessments, asset mapping, program evaluation, and program planning. The course builds on research skills developed in SWRK 615. For the final project, students have an opportunity to apply their GIS skills to creating maps related to their field placement. The use of such maps may lead to both program and policy change in neighborhoods and communities. Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective

SWRK 731 Clinical and Macro Child Welfare Practice
Students enrolled in this course will learn about the various contexts in which child welfare practice and policy services take place and the skills and modalities that are used with children, youth, and families who are the focus of child welfare intervention. Students learn about the social conditions and unmet needs that have typically precipitated child welfare policy and ideological debates informing child welfare policy. How to structure organizations and implement planning in support of strengthening front-line practice is also addressed. Taking stock of these policies and organizational factors, students gain a firm understanding of how they influence, shape, and govern direct clinical practice in child protection and casework. Particular attention will be devoted to developing students’ practice skills in safety assessment and safety planning, risk assessment, and permanency planning. Implementation of evidence-based, trauma-informed interventions to promote positive developmental outcomes among the racially/ethnically diverse pool of children and adolescents placed in out-of-home care will also be a focus of attention. Other topics include separation, loss, and identity development; disproportionality and disparity; and self-care in child welfare practice. In the spirit of bridging connections between macro and clinical practice, course content will delve into how direct casework services influence dependency actions in the juvenile courts. How these direct practices or interventions influence case outcomes as reported by a number of federal data reporting systems will also be discussed. A social justice framework will be applied to understand how child welfare policies and organizational services sustain child and family inequalities, especially for historically oppressed and marginalized populations who are disproportionately represented in the child welfare system. Course usually offered in fall term
Prerequisites: Acceptance to the Child Well-Being and Child Welfare Specialization
Activity: Seminar
1 Course Unit
Notes: Clinical and Macro Practice Elective

SWRK 732 Integrative Seminar in Child Welfare
This capstone course in the Child Well-Being and Child Welfare specialization will integrate direct/micro and macro levels of practice; research in child welfare and related fields, as the research relates to all levels of practice; the relationship of child maltreatment and other social problems; and perspectives from several disciplines, specifically social work, other mental health professions, law, and medicine, as these disciplines address problems of child maltreatment and child welfare. The seminar will highlight issues of social justice, disproportionality - particularly the over-representation of children and families of color in the child welfare system, and disadvantaged populations, including children in general and poor children in particular. Faculty from other disciplines will be features as guest speakers throughout the course. Course usually offered in spring term
Prerequisites: Acceptance to the Child Well-Being and Child Welfare Specialization
Activity: Seminar
1 Course Unit
Notes: Clinical and Macro Practice Elective
**SWRK 736 Building Community Capacity**
This course provides an introduction to community organization and community capacity building. The course encompasses strategies, models, and techniques for the creation of organizations, the formation of federations of existing organizations, and coalition-building, all designed to address problems requiring institutional or policy changes or reallocation of resources to shift power and responsibility to those most negatively affected by current socio-economic and cultural arrangements. The course emphasizes development of strategies and techniques to organize low-income minority residents of urban neighborhoods, and to organize disenfranchised groups across geographic boundaries as the first required steps in an empowerment process.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective

**SWRK 738 Anxiety and Depression**
Anxiety and depression are two of the most common mental disorders seen in social work clients, and frequently they occur concurrently. This course describes the medical and “physical” concomitants and psychosocial factors associated with both conditions and introduces diagnostic and assessment procedures and methods of intervention that social workers use in working with clients with these conditions. The course also considers how culture, social class, gender, and other social differences affect the expression of these disorders and their concomitant treatment.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

**SWRK 739 Illness and Family Caregiving**
This course focuses on social work practice in medicine and the relationships between physical health, social environments, and psychosocial functioning. Student learning will be grounded in the biopsychosocial-spiritual model, and will address a number of domains, including the impact of illness on families over the life course, the impact of a diagnosis on family functioning, medical decision making, coping, health beliefs and spirituality, culture and social class. Classroom content will include conceptualization of illness challenges from the presentation/prevention of symptoms to the end of life, in addition to writing case material, building self-awareness and identifying clinical interface issues, and the compilation of a “clinician’s toolbox” for direct practice on the front lines. Activities will include the unique opportunity to participate in hands-on, interdisciplinary training at the Simulation Center in the School of Nursing.
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

**SWRK 740 Strategic Planning and Resource Development for Public and Nonprofit Organizations**
Resilient organizations engage in a continuous process of self-review and refocusing. Referred to as “strategic planning,” this process requires the active participation of a broad range of agency “stakeholders” who, in their work together, seek to realign the organization’s goals, structures, and programs to make them more responsive to the changing needs of their service populations. Building on the content of foundation practice foundation courses, “Strategic Planning and Resource Development” has been designed to strengthen the student’s leadership capacity for engaging in strategic planning and resource development practice across a broad range of governmental (GOs) and civil society organizations (CSOs). The importance of organizational flexibility, innovation, and the creation of cooperative public-private partnerships is emphasized throughout the course.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective

**SWRK 741 Gender & Social Policy**
Gender and Social Policy develops an advanced understanding of social policies through a focus on social issues and conditions through the lens of gender, economic and critical theory. The specialized focus on gender and social policy provides students with the opportunity to develop more specialized knowledge about how market dynamics and government policies respond to the needs and risks faced by women. Specific emphasis is placed on utilizing theoretical frameworks to evaluate the intersection between social policy, history and social science in relation to gender issues. Students are also expected to conduct a policy analysis that includes an evaluation of how current and former social movements surrounding gender issues shaped their policy of interest.
Taught by: Baker
Course usually offered in spring term
Also Offered As: MSSP 741
Activity: Lecture
1 Course Unit
Notes: Policy Option

**SWRK 742 Practice with At-Risk Youth**
The discourse on juvenile justice in the United States, once driven by themes of treatment and rehabilitation, has been dominated in recent years by vocabularies of punishment and incapacitation. The juvenile court, an enterprise founded by social reformers and the social work profession at the turn of the century to "save children," is now under severe political and legislative pressure to impose harsher penalties on younger and younger offenders who are increasingly portrayed as violent "super-predators," while its most vulnerable segments, children and youth, stand in greatest need of what a social service system can offer. Not surprisingly, those most likely to wind up under supervision are economically poor, under-educated, disproportionately of color and disproportionately at-risk to become victims of violent crimes. How does the profession situate itself in this discourse and what are individual social workers to do?
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Clinical and Macro Practice Elective; Option for Home and School Visitor Requirement
SWRK 743 Action Research
Action research is a form of social research that combines research with intervention. It is characterized by a collaborative relationship between the researcher and a client organization that is in an immediate problematic situation. The research process is directed toward addressing the problem situation and producing knowledge that contributes to the goals of social science. Action research is compatible with many of the values and principles of social work. This course also addresses issues of social work ethics and values encountered by the action researcher.
One-term course offered either term
Prerequisite: SWRK 615
Activity: Lecture
1 Course Unit
Notes: Research Option

SWRK 744 Direct Practice Research
This course provides graduate social work students with research knowledge and skills aimed at enhancing their direct practice with clients. The course examines methods of assessment, methods for choosing and evaluating techniques of intervention, methods for determining the effectiveness of practice and the use of research in social work decision-making. A successful outcome of the course will be that students perceive a more positive relationship between research and social work practice and possess a set of tools that they will be able to utilize in their future careers as social workers. The course starts from an assumption that students have some familiarity with research and are primarily engaged in direct practice with individuals, families or groups.
Course usually offered in spring term
Prerequisites: SWRK 615, Introduction to Social Work Research
Activity: Online Course
1 Course Unit
Notes: Research Option; Course may be offered online or in classroom setting

SWRK 746 Political Social Work
This course focuses on the role of social workers and the social work profession in advocacy and the political arena. It examines the methods of advocacy (e.g., case, class, and legislative) and political action through which social workers can influence social policy development and community and institutional change. The course also analyzes selected strategies and tactics of change and seeks to develop alternative social work roles in the facilitation of purposive change efforts. Topics include individual and group advocacy, lobbying, public education and public relations, electoral politics, coalition building, and legal and ethical dilemmas in political action.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective

SWRK 748 Microfinance and Women's Empowerment in India
This course examines microfinance and its engagement with marginalized communities such as those in India. It is designed to provide students with an understanding of the phenomena of microfinance and its role in poverty alleviation. By studying the use of self-help groups with NGO facilitation, their impact on women's empowerment will be examined and understood through interaction with women engaged in microfinance activities.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Application required; Program fee

SWRK 749 Civil Society Promoting Coexistence in Israel
This course offers a unique opportunity to experience the challenges and complexities of coexistence in Israel, the Holy Land for Christians, Jews and Muslims; a key point of interest and dispute for the international community, and the homeland shared and claimed by both Israelis and Palestinians. The course will focus on activities carried out by nonprofit organizations operating within the Israeli civil society, dealing with issues related to coexistence and to the protection and advancement of the civil and social rights of different populations, with special emphasis on the Arab-Palestinian population in Israel. These activities include educational and social services programs, community work and advocacy activities, aimed at creating dialogues and building coexistence among the different populations in the Israeli society and Palestine.
Course usually offered summer term only
Activity: Seminar
1 Course Unit
Notes: Application required; Program fee

SWRK 754 International Social Work: Practicing in the Global South
This interdisciplinary course will introduce students to societal problems in the developing world; familiarize them with global professions in social work, education, public health, etc.; identify numerous strategies and skills social workers and other professionals have used to collaboratively build interventions within the human rights, social welfare, education, health care and sustainable community development arenas. The course will expose students to views of development as they relate to individual, interpersonal, family, community, societal and international change. Students will learn about the history of specific global problems, how cultures affect response, different social services delivery systems and initiatives aimed at resolution. Students will explore a specific development issue within a country and community.
One-term course offered either term
Activity: Lecture
1 Course Unit

SWRK 756 Human Sexuality
The aim of this course is to increase students’ ability to deal more comfortably with the sexual aspect of human functioning. Readings, written assignments, and classroom presentations are directed to realizing the diversity, complexity, and range of human sexual expression. Current information about sexuality from the biological and physiological sciences is reviewed to increase comfort and skill in discussion and handling of sex-related behavior, personal and societal attitudes will be explored. A variety of sex-related social problems encountered by social workers in family, education, health, and criminal justice settings are discussed. Diagnostic interviewing and treatment methods are presented in role play, group exercises and case studies.
Course not offered every year
Activity: Lecture
1 Course Unit
SWRK 757 Loss through the Life Cycle
This course considers loss as a central theme throughout the life cycle. Content focuses on the physical, psychosocial, spiritual, and cultural aspects of loss, dying and bereavement processes and the interaction among individuals, families and professionals. Students examine historical trends of family, community, and institutional support for the terminally ill and those experiencing traumatic loss and learn ways to advocate for a system of services that supports full decision-making on the part of the client. Course materials, journals, and special projects identify how self and other factors impact service delivery to individuals, families, and communities experiencing loss, including ethical considerations prompted by cost, technology, and end of life issues.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 758 Faith-Based Practice and Management
This course prepares students to work to existing and newly formed faith-based social service agencies. It also serves as a national laboratory to extract new knowledge of best practices and the variability of managing and practicing in faith-based social service agencies.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: Clinical and Macro Practice Elective

SWRK 759 Substance Abuse Interventions
This course addresses intervention approaches used in social work practice with individuals, families, and groups who misuse addictive substances themselves or are affected by another’s misuse. Students learn about addictive substances, models of intervention, how to engage and assess clients, and how to intervene and evaluate the effectiveness of their interventions. The course incorporates theory and research findings on various strategies of intervention.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; Attendance at first class required

SWRK 760 Mental Health Diagnostics
This course familiarizes students with mental health and mental disorders within the context of the life cycle, viewed from a biopsychosocial perspective. Prevalent categories of psychiatric disorders are considered with respect to their differentiating characteristics, explanatory theories, and relevance for social work practice, according to the DSM and other diagnostic tools. The course includes biological information and addresses the impact of race, ethnicity, social class, age, gender, and other sociocultural variables on diagnostic processes.
Course offered summer, fall and spring terms
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; Required for Clinical Practice Concentration

SWRK 761 Spirituality and Social Work Practice
This course strives to seek a balance in exploring the universalistic and pluralistic in relationship to spirituality. Some pluralistic religious and/or spiritual traditions are studied as they exemplify commitments of spirituality and as they intersect with a more universalistic spirituality. The course considers how spiritual and religious systems are related to diversity, including gender, social class, ethnicity and culture, and sexual orientation.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 763 Immigration: Policy & Practice
This course will begin with the history of migration to the US, as well as legal definitions of newcomers, including obtaining documents for lawful permanent residence, refugee status, as well as grounds for exclusion and deportation, and paths to naturalized citizenship. We will then review how a framework of cultural competence, and a strength or asset-based approach can inform service to immigrant clients. The core portion of the course will then focus first on the intersection of immigrants and health, mental health, employment, crimes, public entitlements, and public education. The course will conclude with family issues relevant to immigrant families: women, children, lesbian and gay, and elderly immigrants. Public policy issues will be integrated throughout, and the course will end with specific suggestions on systems change at various levels. By the end of the course students should be able to identify strategies for individual clients advocacy (micro); agency and community strategies (mezzo), and government advocacy (macro) to empower immigrant clients to become full community participants.
Taught by: Chany-Muy
Activity: Lecture
1 Course Unit
Notes: Policy Option; Macro Practice Elective

SWRK 765 Supervision and Leadership in Human Services Organizations
This course builds on social work knowledge, values, and skills gained in foundation practice courses and links them to the roles and functions of social workers as supervisors and managers in human service organizations. Course focus is on providing students with an overview of basic supervisory and human resource development concepts so they may be better prepared as professional social workers to enter agencies and provide direct reports (supervisees) with meaningful and appropriate direction, support, and motivation.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: Clinical and Macro Practice Elective

SWRK 768 Social Policy Through Literature
This course uses works of fiction that pertain to a specific social issue in order to examine the effect these issues have in human terms on the individual, the family, and the community. Through appreciation of the human condition as portrayed in literature, students learn to frame issues more precisely and present arguments in compelling and convincing ways, thus enhancing the role of social worker as advocate for policy change.
Course not offered every year
Activity: Lecture
1 Course Unit
SWRK 769 Aging: The Intersection of Policy and Practice

This course examines a variety of social welfare policies that affect the rights and interests of older adults. These include policies related to economic security, health, long term care, and civil rights. In addition, the course reviews the policy-making process with a discussion of the influence of legislative sanctions and case law in establishing aging policy in the U.S. The focus of the course is on critical analysis of the key assumptions driving policy and policy change, e.g. social responsibility vs. individual responsibility. Finally, the course includes a critical examination of the intersection between policy and practice, that is, the influence that policy has on the design of interventions and service delivery practices at the state and local level and the impact of changing policies on communities, providers, and older adults.

Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective; required for students in the PAC program

SWRK 771 Social Work Values and Ethics

The purpose of this course is to familiarize students with the philosophical base, theory and practice of ethical decision making in social work. We will review some of the foundational readings including Mill, Kant, and Aristotle. We will develop ways of becoming aware of our own moral ideas and search for their impact on our professional actions. The basics of ethical decision-making will be studied. A critical examination of social and economic policies in the light of moral values will also be performed. In addition, social work distinguishes itself from other professions through its code of ethics, and in particular, its focus on issues of social justice. Accordingly, this course will explore concepts regarding the nature of rights and social justice by prominent thinkers such as Rawls, Sen, and Nozick. This course will also focus on the role of ethics in clinical decision making by addressing the unique moral challenges associated with clinical work in hospital settings as well as work with children, adolescents, and persons with mental illness.

Course not offered every year
Activity: Lecture
1 Course Unit

SWRK 772 Postcolonial Social Work Practice: International Social Welfare in India

In this course, students examine the global welfare system and its engagement with marginalized communities. This six-week course in Kolkata, India, centers around a sex workers' collaborative in Sonagachi, one of Asia's largest red light districts. Interviews with the collaborative's workers and study of their grassroots movement are combined with class discussions and research projects in which students engage with texts on HIV, sex work, feminist postcolonial theory and international social work.

Taught by: Ghose
Course usually offered summer term only
Activity: Lecture
1 Course Unit
Notes: Clinical and Macro Practice Elective; Application Required; Program Fee

SWRK 773 Mental Health Challenges in Childhood and Adolescence

This course will be an opportunity for the student and the instructor to explore the concept "psychopathology" as it has been and is applied to childhood and adolescence. There are some psychopathological challenges that are unique to childhood and which can manifest themselves throughout childhood into adolescence and adulthood. The social worker/practitioner will encounter a wide range of symptomatic presentations among his/her clients. At this time in the fields of clinical social work, psychology, psychiatry, and psychotherapy there are numerous frameworks available to the practitioner to aid in understanding of symptoms in children and adolescents. During the next several weeks three conceptual frameworks will be articulated. These three frameworks will elucidate the possible meaning, origin, and/or function of the symptoms and offer to the student a vocabulary with which to engage the situation. At the turn of the 19th century into the 20th century, psychoanalysis emerged in Europe as a method of understanding symptoms from the point of view of internal conflict within the child or adolescent. After World War II in the U.S.A., a model of understanding symptoms from a systemic/cybernetic point of view revolutionized the diagnostic processes involved in working with children and adolescents. Since the late 1980's, postmodern ideas, primarily from Europe and Australia, have greatly influenced and informed the understanding of psychopathology in children and adolescents. Narrative, social constructivist, and linguistic usage patterns have become a common vocabulary in the discourse on psychopathology. This course is not intended to be a reading of the history of child psychopathology. It is intended to expose the student to the most influential paradigms in the field of child psychopathology.

One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: MSW Elective

SWRK 774 Program Evaluation

This course introduces students to theoretical and practical aspects of social service program evaluation. Students learn about the design and implementation of all phases of an evaluation, from needs assessment to analysis of findings. Skills such as survey construction and budgeting are introduced. Intensive analysis of existing studies illustrates how evaluations are designed and how findings affect social programs and policy.

One-term course offered either term
Prerequisites: SWRK 615, Introduction to SW Research
Activity: Lecture
1 Course Unit
Notes: Research Option

SWRK 775 Intimate Violence

The purpose of this course is to familiarize students with the definition, theories, causes, processes, consequences, and social interventions in intimate violence. The course will attempt to provide insight on the phenomenon of intimate violence by examining the ways in which it affects survivors, perpetrators, and their children. This will be accomplished by reviewing the current research as well as by exploring how intimate violence is constructed by the participants on the personal, interpersonal, and social structural level.

Course not offered every year
Also Offered As: PUBH 575
Activity: Lecture
1 Course Unit
SWRK 777 Cognitive Behavioral Therapy
This Cognitive Behavioral Therapy course will be taught in a one-week intensive class Monday-Friday 9am-5pm. Students are expected to start a pre-course assignment approximately 2 months prior to the first day of the course. Students will receive an information request from the instructor during course registration and must reply in a timely fashion. Cognitive Behavioral Therapy (CBT) is the world’s most effective, empirically-based psychotherapy with strong scientific evidence. CBT is a collaborative and empowering psychotherapy that educates and helps clients to motivate themselves, set goals, develop, and implement treatment plans to reach those goals. This experiential/didactic advanced clinical skills course will present a CBT model to evidence-based practice that can serve as a conceptual framework for clinical applications to a wide variety of presenting problems and populations. The purpose of this course is to introduce graduate students to the theory of CBT and to begin to apply the basic principles through the stages of a self-directed case.
One-term course offered either term
Prerequisite: Completion of MSW Foundation year curriculum or equivalent
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective.

SWRK 778 Dialectical Behavioral Therapy
In this 5-day intensive course we will examine the underlying theories, empirical foundations, and fundamental skill sets associated with dialectical behavioral therapy (DBT). Students will be expected to participate in role plays, lead mindfulness exercises, and carry out chain analyses. Prior to the class start date, students will have to submit a 15 to 30 page outline of the required text (Linehan, M.M. (1993), Cognitive-behavioral treatment of borderline personality disorder, Guildford Press) and to review and complete the study guide for the HBSE text. Students will not be admitted to the first day of class unless these requirements have been met prior to class. No exceptions; you will be dropped from the class.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 780 Policy and "Difference" in Postmodernity
Social constructions of "difference" permeate the institutions, spaces, and assumptions of our society. These social constructions include but are not limited to the racialized, gendered, sexed, classed, and dis/abled constructions of the body. By leaning on postmodern thinkers such as Iris Marion Young, Pierre Bourdieu, Judith Butler, Jacques Derrida, Ernesto Laclau, and Michel Foucault, this seminar course will begin by engaging the questions of what is "difference" and how is "difference" discursively constructed and reproduced in society. Using a postmodern lens, the remainder of the course will engage various social science texts that deal with the varieites of "difference" (i.e. race, gender, class, sexuality) and the explicit and/or implicit policy implications of these works. Thus, we will critically engage policies such as welfare, affirmative action, economic policies of taxation, and same-gender marriage, among others. The underlying questions throughout the course will be to what extent does social policy enable the possibilities of freedom, justice, and democracy for the "Other", the deviant, the abject, the marginalized, those of assumed "difference"? And, to what extent does policy constrain those possibilities at the same time?
Taught by: Dixon-Roman
One-term course offered either term
Also Offered As: MSSP 780
Activity: Seminar
1 Course Unit
Notes: Policy Option

SWRK 781 Qualitative Research
Qualitative research encompasses a variety of methods that enable the researcher to enter into the "lived experience" of research participants. These methods are particularly sensitive to the voices of populations whose perspectives are silenced by dominant societal discourses. The course begins by giving attention to underlying philosophical issues and traditions of qualitative research and proceeds to examine qualitative research design, methods of data collection, strategies to ensure rigor, data analysis, and presentation of findings. Students will learn about research interviewing, focus groups, and participant observation and ways in which qualitative research can be used to inform and evaluate social work practice and programs. Students will have the opportunity to apply qualitative research methods to in-class activities and individual or group projects.
One-term course offered either term
Also Offered As: PUBH 604
Prerequisites: SWRK 615, Introduction to Social Work Research
Activity: Lecture
1 Course Unit
Notes: Research Option
SWRK 783 Advanced Mental Health Practice with U.S. Veterans
Although this course is open to all students, it is designed for students in the clinical concentration and is required for students in the Cohen Veterans Network Scholars program. The course will focus on clinical knowledge and evidence-based practice skills for common mental health problems in veteran settings. The course will introduct students to the assessment and treatment of Post-Traumatic Stress Disorder (PTSD), Depression and Anxiety Disorders, Substance Abuse, Military Sexual Trauma (MST) and Suicide Assessment and Management among veteran populations. Other topics may include cultural competency, homelessness, and combat stress disorders. Since this is a seminar course, some classes will be taught by social workers/psychologists from the Veterans Hospital in Philadelphia and the Cohen Veterans Outpatient Clinic.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; Required for Cohen Veteran Network students

SWRK 785 Criminal Justice Policies: Implications for Social Work
The United States prison population has risen more than three hundred percent in the last three decades. More people are currently incarcerated than at any other point in the history of the United States, and that of the world. This unprecedented period of incarceration has gone largely invisible although it represents one of the greatest social epidemics in the history of the United States. This course provides a critical analysis of the criminal justice system in the United States from a historical and contemporary perspective. It examines the implications of significant criminal justice policies such as the Rockefeller Drug Laws, 3-Strike Legislations, and Mandatory Minimums on the current state of incarceration, and the phenomenon of "Reentry" and "Recidivism". The intersections of criminal justice and social work practice are unmistakable when examining staples of social work practice such as homelessness, mental health and substance abuse, thus the course is intended to facilitate a more informed/holistic practice for all social work students.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Policy Option

SWRK 786 Social Work Practice & Trauma
This course integrates trauma theory and practice and expands practice knowledge to include the treatment and assessment of the survivors of trauma. Emphasis is placed on differentiating PTSD from Complex Trauma in order to identify appropriate, evidence-based intervention strategies. Topics covered in the course include an historical overview of the development of our understanding of trauma and the exploration of various types of trauma including war trauma, domestic violence, childhood sexual and physical abuse, natural disasters, the experiences of political refugees and organizational trauma. Among the interventions covered in this course are CBT, EMDR, group and psychodynamic treatment. Students will consider issues that affect those treating the survivors of trauma, such as vicarious trauma, and will explore approaches to self-care. This is an advanced clinical course. Through assignments and class discussions, students are encouraged to use their experiences in the field to deepen their understanding of the material covered in the course.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 788 Harm Reduction on the Borders: Substance Use and HIV Treatment in Puerto Rico
This course examines the U.S.-based substance use and HIV treatment systems, and its engagement with injection drug users in Fajardo, Puerto Rico. It is designed to provide the students with an understanding of the political economy of harm reduction initiatives, and the manner in which it is shaped by the complicated relationship between Puerto Rico and the U.S. Students are expected to gain an understanding of Puerto Rico's welfare environment, the role of social welfare and social workers in such a context, and the intertwining of social control and social change embedded in welfare initiatives in "borderlands" such as Fajardo. During the four week course in Fajardo, students will complete a placement in a needle exchange program, and engage with texts on HIV, substance use, postcolonial theory and international social work.
Course usually offered summer term only
Activity: Seminar
1 Course Unit
Notes: Clinical Practice Elective and Macro Practice Elective; Application required

SWRK 792 Psychodynamic Theory
The purpose of this course is to review the evolution of psychodynamic theory and consider key concepts in psychoanalysis, ego psychology, object relations theory, self-psychology, attachment theory, relational and intersubjective theories and current findings in cognitive neuroscience.
Participants will explore human psychological functioning as explained by these various psychodynamic theories and through the biopsychosocial lens that informs social work practice. Students will examine how external factors such as race, class, gender, culture and biology are interwoven with often unconscious, internal psychological determinants, creating the complexities of human behavior that challenge us in our clinical work. Case presentations by students, the instructor and guest lecturers will demonstrate how concepts from psychodynamic theory can be applied to social work practice with diverse clients in varied settings.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective
SWRK 793 Global Health and Health Policy
This participatory interdisciplinary seminar course examines contemporary issues in public health policy and global health. The organizing framework is social determinants of health. We consider evidence that inequalities in education, income, and occupation influence health status, and the policy dilemma that broad interventions to improve population health may increase health disparities. We critically examine whether prevention is always better than cure, and what modern medicine has to offer in terms of health. We explore the public policy process in health using the "tobacco wars" as a case example, of how politics, policy, law, commercial interests, and research intersect to affect the public's health. We examine whether global health is in a state of decline, and the extent to which failures in public health, public policy, and foreign policy have contributed to increasing threats to world health. Likewise we will examine the potential for greater integration of health into foreign policy to create global infrastructure upon which to advance health. We will examine the global health workforce and the impact of widespread global migration of health professionals on receiving and sending countries.

There are no prerequisites. The course is designed for graduate students in the social and behavioral sciences, health professions, public health, business and law. Advanced undergraduate students will be admitted with permission.
Course not offered every year
Also Offered As: NURS 640, PUBH 551
Activity: Lecture
1 Course Unit

SWRK 794 Practice with Older Adults and Families
This course focuses on practice with older adults and families within a life course and resiliency perspective. It examines the nature of the aging process, needs and life issues, the ways in which persons adapt to changes, and the ways in which interventions may assist with these adaptations. Students learn assessment, case management, and intervention skills, including the use of rapid assessment and diagnostic tools, needed to work effectively with older populations and family caregivers in a variety of community-based and institutional settings. The course emphasizes evidence-based practices that enhance quality of life, dignity, respect for differences, and maximum independent functioning.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; Required for Penn Aging Concentration (PAC) students

SWRK 796 Family Economic Mobility
In this course, the experiences and voices of mothers, fathers, children, employers, children's school teachers, human service workers, job training providers, policymakers, and others in cities across America graphically illustrate the "real life" economic challenges facing today's families and organizations. These people, organizations, and policies dramatically show how economic, educational, and cultural practices and conditions intersect to perpetuate inequality among low-income and even many middle-income working families. The labor market, welfare and workforce programs, public schools and government are some of the institutions implicated in this intersection. In the course, notions such as "work ethic," "family-friendly workplace," "good jobs" and "hard work pays off" are deconstructed in terms of their meaning for today's families, organizations and policies. At base, this course examines occupational mobility in America from multiple perspectives within the broad framework of capitalism, democracy, race, ethnicity, and gender. Students read classic and contemporary literature from occupational social work, sociology, cultural anthropology, and political science to explore generative roles and directions for "meso-oriented" clinical, macro, and policy professionals.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: Policy Option

SWRK 798 Advanced Topics
Titles and Topics vary. See department website for descriptions: https://www.sp2.upenn.edu/degree-programs/master-of-social-work/academics/course-descriptions/

SWRK 803 History and Philosophy of Social Welfare
This seminar traces the evolution of social welfare from ancient to modern times focusing on its implications for the development of contemporary social welfare in the United States. The course examines the development of social welfare systems and the underlying philosophies in the context of the social, economic, political, and cultural environments in which they emerged. Topics include the evolution of modern conceptions of the "welfare state," the role of public, private and voluntary sectors in the social services, trends in social and family history and their relationship to social welfare, the professionalization of social work, and methods of historical and social policy analysis.
Taught by: Stern
Activity: Lecture
1 Course Unit
Notes: PhD students only
SWRK 804 Methods of Inquiry: Quantitative Research Methods
The purpose of this course is to teach the basics of practice research, with an emphasis on intervention research. This course will focus on research ethics, building a conceptual framework, source credibility, question and hypothesis formulation, design, design, sampling, measurement, and scale construction and selection. Special emphasis will be placed on the development of designing feasible and practical research studies to answer questions of importance to social work practice. The course will emphasize the selection and development of outcome measures, intervention manuals, and fidelity measures. It will closely examine the use and development of practice guidelines, evidence-based practice and meta-analytic procedures.
Prerequisites: Must be enrolled in D.S.W. program.
Activity: Lecture
0 Course Units

SWRK 805 Methods of Inquiry: Qualitative Research Methods
This course will cover the essentials of qualitative research. Students will learn how to "situate themselves" in the research process so as to best capture the lived experience of the subjects under investigation. The course will explore the appropriate use of intensive interviews, grounded theory and ethnography. Mixed methods that employ both qualitative and quantitative approaches, will also be covered.
Prerequisites: SWRK 804. Must be enrolled in D.S.W. program
Activity: Online Course
1 Course Unit

SWRK 811 Social Theory
Course reading consists of the original works of theorists who offer classical, contemporary and postmodern perspectives on social thought, social interaction and issues germane to social welfare. Through intensive examination of multiple theoretical frameworks, students are expected to increase their analytical and critical orientation to theory. This ore nuanced understanding about epistemology, underlying assumptions, and theory construction can then be used to inform the student's substantive field of study and methodological orientation to research. This course is conducted in mixed lecture-seminar format.
Students have the opportunity to practice pedagogical techniques and exercise class leadership.
One-term course offered either term
Activity: Lecture
1 Course Unit

SWRK 812 Clinical Theory I
The purpose of this course is to broaden and deepen participants' mastery of several theories of development, personality, and behavior that have contributed to social work's knowledge base across the decades and continue to inform clinical social work epistemology today. Drawing primarily from original sources, we will consider key assumptions, constructs, and propositions of each theory in terms of its congruence with social work's principles, values, and mission and in relation to the profession's person-in-environment perspective. In this first semester, we will study the evolution of theories central to psychodynamic thought, from Freud's early biological model of the mind, through various relational perspectives, to contemporary work in the fields of attachment and interpersonal neurobiology. This examination will constitute a case study of the manner in which theories are socially constructed and will lay the foundation for critical inquiry into the social and political biases inherent in the Western European intellectual tradition from which most theories of human behavior have emerged.
Prerequisites: Must be enrolled in D.S.W. program
Activity: Lecture
0 Course Units

SWRK 813 Clinical Theory II
This course critically examines theories, perspectives, and frameworks informing clinical social work practice. These theoretical perspectives provide means for practitioners to understand a client or client system in context and offer strategies for intervention. The course begins by considering the development of social work practice theory thematically and from a historical perspective. Practice theories that have contributed to the knowledge base of clinical social work practice will be examined within the social, political, and ideological contexts of their times and against the backdrop of the development of the profession. The course will explore debates within the profession (e.g., art vs. science; empirical practice vs. constructivism; what constitutes professionalism) and in related fields (modernism vs. postmodernism) and evaluate the discourse on these topics. As the course moves into contemporary times, recent developments in clinical social work practice theory will be examined.
Attention will be paid to factors that influence clinical social work practice now and are likely to influence the profession in the future.
Prerequisites: SWRK 812. Must be enrolled in D.S.W. program.
Activity: Online Course
1 Course Unit

SWRK 852 Social Work Research
This is the foundation course in social work research. It deals with the nature of scientific inquiry; theory and its relation to research design and hypothesis testing; and various models of data collection, sampling, and analysis of research and is supported in following personal interests within the structure of ethical scientific research. Each student prepares an original study which demonstrates integration of the semester's work. Students learn to work on their own. At the end of SWRK 852, they are prepared for more advanced coursework in research.
Taught by: Solomon
Course usually offered in fall term
Prerequisites: Completion of concurrent enrollment in a course on introductory Social Statistics.
Activity: Lecture
1 Course Unit

SWRK 853 Qualitative Research
This course offers the advanced graduate student an in-depth study of the theory and methods of interpretive qualitative inquiry. Topics include the philosophic assumptions and positions within qualitative research, design issues and alternatives, data collection methods, data sources, sampling, criteria for rigor, data analysis, and reporting strategies. Special attention will be given to grounded theory, ethnography, and the analysis of interviews, as well as methods of identifying and engaging hidden populations. Students will have the opportunity to use qualitative research strategies in class and in field assignments. This course is intended for doctoral students in the social sciences. Master's students will be admitted with permission.
Course usually offered in spring term
Prerequisite: SWRK 852 or an equivalent
Activity: Lecture
1 Course Unit
SWRK 855 Advanced Research Methods
The methodology of accountability research in human service programs is studied. Emphasis is placed on social program evaluation, idiographic research, and secondary data analysis in policy research as specialized methods of social work research. Students undertake a laboratory experience in an ongoing program evaluation project.
Course usually offered in spring term
Prerequisites: SWRK 852 and Introduction to Statistics
Activity: Lecture
1 Course Unit

SWRK 861 Policy Analysis
This course examines alternative models of policy development and applies them to current issues in social welfare. It emphasizes frameworks for policy research and secondary analysis of governmental data. Topics include: race, class, and sex in policy outcomes; major social welfare programs; and the design, implementation, and evaluation of social service systems.
Course usually offered in spring term
Prerequisite: Must have successfully completed a course in multivariate statistics
Activity: Lecture
1 Course Unit

SWRK 900 Clinical DSW
Topics vary; see department for current course descriptions
Prerequisites: Must be enrolled in D.S.W. program
Activity: Seminar
0 Course Units

SWRK 968 Social Welfare and Social Economics
This course examines the social welfare aspects of major economic decisions in the United States. Particular attention is paid to exploring the implications of social choices in relation to the goals of the achievement of increased equity and equality in the distribution of income and power, the elimination of unemployment, and the control of inflation. The growth of public welfare programs and the base of funding for social services are examined in terms of the nation's economic and political objectives.
Activity: Lecture
1 Course Unit

SWRK 995 Doctoral Dissertation
Doctoral Dissertation
Activity: Dissertation
1 Course Unit

Sociology (SOCI)

SOCI 001 Introduction to Sociology
Sociology provides a unique way to look at human behavior and social interaction. Sociology is the systematic study of the groups and societies in which people live. In this introductory course, we analyze how social structures and cultures are created, maintained, and changed, and how they affect the lives of individuals. We will consider what theory and research can tell us about our social world.
For BA Students: Society Sector
Taught by: Imoagene, Jacobs, Lareau, Wilde, Zuberi
One-term course offered either term
Also Offered As: AFRC 002
Activity: Lecture
1 Course Unit

SOCI 002 Social Problems and Public Policy
This course approaches some of today's important social and political issues from a sociological vantage point. The course begins by asking where social problems come from. The main sociological perspectives of Marx, Weber and Durkheim are developed in connection with the issues of inequality, social conflict and community. We then turn to the social construction of social problems by examining how various issues become defined as social problems. This involves a consideration of the role of the media, social experts and social movements. The last section of the course considers how social problems are addressed. Here we discuss the relative strengths and weaknesses of government programs and regulations versus market-based approaches. We also discuss the role of philanthropy and volunteerism. Finally, we consider the risk of unanticipated consequences of reforms. Along the way, we will consider a variety of social issues and social problems, including poverty, immigration, crime, global warming, and education.
Taught by: Bosk, Jacobs
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 003 Deviance and Social Control
A sociological analysis of the origins, development, and reactions surrounding deviance in contemporary society. Topics include labeling theory, stigma, social organization, tradition, social power, crime, sexual deviance, drug use, and racism. Theoretical and methodological issues will be discussed and evaluated.
For BA Students: Society Sector
Taught by: Bosk
One-term course offered either term
Activity: Lecture
1 Course Unit

SOCI 004 The Family
Most men and women get married during their lifetimes. In addition, most men and women become fathers and mothers at some point. This class presents social science evidence on the family. For example, it shows how "greedy" workplaces, which require long work hours, create work-family conflicts for husbands and wives. The class also illuminates how men and women have different experiences within families. The lectures will also examine how economic inequality shapes family life. Students will have the opportunity to apply key concepts to daily life. All are welcome.
For BA Students: Society Sector
Taught by: Lareau, Staff
One-term course offered either term
Also Offered As: GSWS 004
Activity: Lecture
1 Course Unit
**SOCI 005 American Society**
What is American Society? The literary critic, Leslie Fielder once wrote: "...to be an American...precisely to imagine a destiny rather than to inherit one; since we have always been, insofar as we are Americans at all, inhabitants of myth rather than history..." In this course we will explore the elements of the myth that form the basis of the civil religion as well as the facts on the ground that contradict our conceptions of American Society. Examples of mythic elements and their contradiction that we will explore are: A nation founded to pursue liberty and freedom yet allowed slavery, equality of opportunity and persistent structural inequality, and a welcoming of the Immigrant coupled with a suspicion of the outsider.
For BA Students: Humanities and Social Science S
Taught by: Bosk
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Also fulfills General Requirement in Society for Class of 2009 and prior

**SOCI 006 Race and Ethnic Relations**
The course will focus on race and ethnicity in the United States. We begin with a brief history of racial categorization and immigration to the U.S. The course continues by examining a number of topics including racial and ethnic identity, interracial and interethnic friendships and marriage, racial attitudes, mass media images, residential segregation, educational stratification, and labor market outcomes. The course will include discussions of African Americans, Whites, Hispanics, Asian Americans and multiracials.
Taught by: Charles, Zuberi
One-term course offered either term
Also Offered As: AFRC 006, ASAM 006, URBS 160
Activity: Lecture
1 Course Unit

**SOCI 007 Population and Society**
The course serves as an introduction to the study of population and demography, including issues pertaining to fertility, mortality, migration, and family formation and structure. Within these broad areas we consider the social, economic, and political implications of current trends, including: population explosion, baby bust, the impact of international migration on receiving societies, population aging, racial classification, growing diversity in household composition and family structure, population and environmental degradation, and the link between population and development/poverty.
For BA Students: Society Sector
Taught by: Flippen, Kohler, Zuberi
One-term course offered either term
Also Offered As: GSWS 007
Activity: Lecture
1 Course Unit

**SOCI 008 Introduction to Political Sociology**
This course will introduce students to sociological approaches to politics, broadly understood. The class will begin by discussing the nature of power and authority, the rise of the nation-state and the significance of nationalism. Later topics will include social movements, urban political regimes, globalization and transnationalism, citizenship, revolutions, and the rise (and fall?) of welfare states.
Course not offered every year
Activity: Seminar
1 Course Unit

**SOCI 010 Social Stratification**
In this course we study the current levels and historical trends of inequality in the United States especially in cross-national comparative perspective. We discuss causes and consequences of inequality as well as various policy efforts to deal with inequality. Topics include intergenerational social mobility, income inequality, education, gender, race and ethnicity among others.
For BA Students: Society Sector
Taught by: Jacobs, Staff
Course not offered every year
Activity: Lecture
1 Course Unit

**SOCI 011 Urban Sociology**
This course is a comprehensive introduction to the sociological study of urban areas. This includes more general topics as the rise of cities and theories urbanism, as well as more specific areas of inquiry, including American urbanism, segregation, urban poverty, suburbanization and sprawl, neighborhoods and crime, and immigrant ghettos. The course will also devote significant attention to globalization and the process of urbanization in less developed counties.
Taught by: Flippen
Course not offered every year
Also Offered As: AFRC 011, URBS 112
Activity: Seminar
1 Course Unit

**SOCI 012 Globalization**
This course analyses the current state of globalization and sets it in historical perspective. It applies the concepts and methods of anthropology, history, political economy and sociology to the analysis and interpretation of what is actually happening in the course of the semester that relates to the progress of globalization. We focus on a series of questions not only about what is happening but about the growing awareness of it and the consequences of the increasing awareness. In answering these questions we distinguish between active campaigns to cover the world (e.g. Christian and Muslim proselytism, free-trade agreements, democratization) and the unplanned diffusion of new ways of organizing trade, capital flows, tourism and remote interaction via the Internet. The body of the course deals with particular dimensions of globalization, reviewing both the early and recent history of each. The overall approach is historical and comparative, setting globalization on the larger stage of the economic, political and cultural development of various parts of the modern world. The course is taught collaboratively by an anthropologist, an historian, and a sociologist, offering the opportunity to compare and contrast distinct disciplinary approaches. It seeks to develop a general social-science-based theoretical understanding of the various historical dimensions of globalization: economic, political, social and cultural.
For BA Students: Humanities and Social Science S
Taught by: Guillen, Spooner
Course usually offered in spring term
Also Offered As: ANTH 012, HIST 012
Activity: Lecture
1 Course Unit
SOCI 027 Introduction to Africana Studies
The aim of this course is to provide an interdisciplinary examination of the complex array of African American and other African Diaspora social practices and experiences. This class will focus on both classic texts and modern works that provide an introduction to the dynamics of African American and African Diaspora thought and practice.
For BA Students: Humanities and Social Science S
Taught by: Charles, Zuberi
Two terms. student may enter either term.
Also Offered As: AFRC 001
Activity: Lecture
1 Course Unit

SOCI 033 Technology & Society
Technology plays an increasing role in our understandings of ourselves, our communities, and our societies, in how we think about politics and war, science and religion, work and play. Humans have made and used technologies, though, for thousands if not millions of years. In this course, we will use this history as a resource to understand how technologies affect social relations, and conversely how the culture of a society shapes the technologies it produces. Do different technologies produce or result from different economic systems like feudalism, capitalism and communism? Can specific technologies promote democratic or authoritarian politics? Do they suggest or enforce different patterns of race, class or gender relations? Among the technologies we'll consider will be large objects like cathedrals, bridges, and airplanes; small ones like guns, clocks and birth control pills; and networks like the electrical grid, the highway system and the internet.
For BA Students: Society Sector
One-term course offered either term
Also Offered As: STSC 003
Activity: Lecture
1 Course Unit

SOCI 041 Freshman Seminars
Two terms. student may enter either term.
Also Offered As: AFRC 041, GSWS 041, URBS 010
Activity: Seminar
1 Course Unit
Notes: Freshman Seminars. Topics vary from semester to semester. See Freshman Seminar and Sociology websites for current offerings.

SOCI 100 Introduction to Sociological Research
One of the defining characteristics of all the social sciences, including sociology, is a commitment to empirical research as the basis for knowledge. This course is designed to provide you with a basic understanding of research in the social sciences and to enable you to think like a social scientist. Through this course students will learn both the logic of sociological inquiry and the nuts and bolts of doing empirical research. We will focus on such issues as the relationship between theory and research, the logic of research design, issues of conceptualization and measurement, basic methods of data collection, and what social scientists do with data once they have collected them. By the end of the course, students will have completed sociological research projects utilizing different empirical methods, be able to evaluate the strengths and weaknesses of various research strategies, and read (with understanding) published accounts of social science research.
Taught by: Armenta, Koppel, Park, Smith, Wilde
One-term course offered either term
Also Offered As: HSOC 100
Activity: Lecture
1 Course Unit

SOCI 101 Bioethics
This course will take an historical approach to the development of modern bioethics, which is the study of ethical issues in medicine and the life sciences. The first part of the course will be devoted to an introduction to the standard principles of academic bioethics and the way they have structured the field over the last 35 years. We will then consider topics to which the principles have long been applied, such as the care of gravely ill newborns, death and dying, and the ethics of research involving human subjects. The last part of the course will address more recent life sciences policy areas including genetics, cloning, stem cells, biodefense, and neuroscience in relation to national security. Throughout the course I will emphasize the interplay between the development of bioethics and its cultural context.
Taught by: Moreno
One-term course offered either term
Also Offered As: HSOC 102
Activity: Lecture
1 Course Unit

SOCI 103 Asian Americans In Contemporary Society
This class will introduce you to sociological research of Asian Americans and engage in the "model minority" stereotype. We begin by a brief introduction to U.S. immigration history and sociological theories about assimilation and racial stratification. The class will also cover research on racial and ethnic identity, educational stratification, mass media images, interracial marriage, multiracials, transracial adoption, and the viability of an Asian American panethnic identity. We will also examine the similarities and differences of Asian Americans relative to other minority groups.
For BA Students: Society Sector
Course not offered every year
Also Offered As: ASAM 001
Activity: Lecture
1 Course Unit

SOCI 105 Indus Rel & Hum Res Mgmt
One-term course offered either term
Activity: Lecture
1 Course Unit

SOCI 110 The Rich and The Poor
Who is rich? Who is poor? This course examines how wealth and income are distributed in the United States, and how its distribution affects individuals, groups, institutions, and society. We will gain a fuller understanding of what social class is and discuss how it affects all aspects of life, including: quality of schooling, access to employment, child rearing, and even tastes, preferences, and identity.
Taught by: Armenta, Lareau, Staff
Course not offered every year
Activity: Lecture
0 Course Units
**SOCI 111 Health of Populations**
This course is designed to introduce students to the quantitative study of factors that influence the health of populations. Topics to be addressed include methods for characterizing levels of health in populations, comparative and historical perspectives on population health, health disparities, health policy issues and the effectiveness of interventions for enhancing the health of populations. These topics will be addressed both for developed and developing world populations. The course will focus on specific areas of health and some of the major issues and conclusions pertaining to those domains. Areas singled out for attention include chronic diseases and their major risk factors, such as smoking, physical activity, dietary factors and obesity. Throughout the course, the focus will be on determining the quality of evidence for health policy and understanding the manner in which it was generated.

Taught by: Elo, Kohler
One-term course offered either term
Also Offered As: HSOC 111
Activity: Lecture
1 Course Unit

**SOCI 112 Discrimination: Sexual and Racial Conflict**
This course is concerned with the structure, the causes and correlates, and the government policies to alleviate discrimination by race and gender in the United States. The central focus of the course is on employment differences by race and gender and the extent to which they arise from labor market discrimination versus other causes, although racial discrimination in housing is also considered. After a comprehensive overview of the structures of labor and housing markets and of nondiscriminatory reasons (that is, the cumulative effects of past discrimination and/or experiences) for the existence of group differentials in employment, wages and residential locations, various theories of the sources of current discrimination are reviewed and evaluated. Actual government policies and alternatives policies are evaluated in light of both the empirical evidence on group differences and the alternative theories of discrimination.

For BA Students: Society Sector
Taught by: Madden
Course not offered every year
Also Offered As: AFRC 112, GSWS 114
Activity: Lecture
1 Course Unit

**SOCI 117 Sociology of Work**
The material world is shaped and maintained through work, but so is the social world. How work is organized, allocated, and rewarded determines the opportunities people have for developing their own capacities, the kinds of ties they will have with others, and how much control they will have over their own lives. We will consider various sociological perspectives on work and compare alternative ways of organizing work, with a focus on the contemporary United States.

Taught by: Jacobs, Leidner
Course not offered every year
Activity: Lecture
1 Course Unit

**SOCI 118 Sociology of Bioethics**
The Sociology of Bioethics explores the sociological approach to bioethics. The Sociology of Bioethics is not a course in bioethics itself; rather than discussing the merits of a position (Is assisted suicide ethical?), we will ask how the debate has been framed, who is promoting which arguments, why the debate has arisen now, and how the issue is reflected in policy. In order to do so we will make use of social science research, along with philosophical treaties, legislation, and the popular media. The course is also not designed as a comprehensive treatment of the field; it will focus instead on choice topics that we will explore in depth. Our goal is to understand the nature of the bioethics profession and its modes of argumentation, and to explore the cultural, social, political, and professional underpinnings of bioethical debates.

Taught by: Bosk
One-term course offered either term
Activity: Lecture
1 Course Unit

**SOCI 120 Social Statistics**
This course offers a basic introduction to the application/interpretation of statistical analysis in sociology. Upon completion, you should be familiar with a variety of basic statistical techniques that allow examination of interesting social questions. We begin by learning to describe the characteristics of groups, followed by a discussion of how to examine and generalize about relationships between the characteristics of groups. Emphasis is placed on the understanding/interpretation of statistics used to describe and make generalizations about group characteristics. In addition to hand calculations, you will also become familiar with using PCs to run statistical tests.

Taught by: Allison, Charles, Guillot, Koppel, Park, Parrado
One-term course offered either term
Also Offered As: AFRC 120
Activity: Recitation
0 Course Units

**SOCI 122 The Sociology of Gender**
Gender is an organizing principle of society, shaping social structures, cultural understandings, processes of interaction, and identities in ways that have profound consequences. It affects every aspect of people's lives, from their intimate relationships to their participation in work, family, government, and other social institutions and their place in the stratification system. Yet gender is such a taken for granted basis for differences among people that it can be hard to see the underlying social structures and cultural forces that reinforce or weaken the social boundaries that define gender. Differences in behavior, power, and experience are often seen as the result of biological imperatives or of individual choice. A sociological view of gender, in contrast, emphasizes how gender is socially constructed and how structural constraints limit choice. This course examines how differences based on gender are created and sustained, with particular attention to how other important bases of personal identity and social inequality--race and class--interact with patterns of gender relations. We will also seek to understand how social change happens and how gender inequality might be reduced.

For BA Students: Society Sector
Taught by: Leidner
One-term course offered either term
Also Offered As: GSWS 122
Activity: Lecture
1 Course Unit
SOCI 125 Classical Sociological Theory
This course will cover the founding classics of the sociological tradition including works of Tocqueville, Marx and Engels, Weber, Durkheim, Mauss, Simmel, and G.H. Mead. We will also examine how the major traditions have continued and transformed into theories of conflict, domination, resistance and social change; social solidarity, ritual and symbolism; symbolic interactionist and phenomenological theory of discourse, self and mind. This course satisfies the theory requirement for sociology majors.
One-term course offered either term
Activity: Lecture
1 Course Unit

SOCI 126 Contemporary Sociological Theory
A review of theoretical perspectives developed since the second half of the 20th century. Includes micro-sociological perspectives of phenomenology, ethnomethodology, symbolic interactionism, and neo-Durkheimian interaction theory; social behaviorism and exchange theory; neo-Weberian and neo-Marxian perspectives on power, conflict, and class; and attempts at synthesis by Habermas, Luhmann, and Giddens.
One-term course offered either term
Activity: Lecture
1 Course Unit

SOCI 128 Introduction to Demographic Methods
This course provides an introduction to basic demographic concepts, data, indicators, and techniques. The course emphasizes hands-on applications of techniques in the analysis of population dynamics in the U.S. and elsewhere. Students will learn about the main sources of demographic data, including censuses, surveys, and vital statistics, and methods to estimate demographic processes (e.g. mortality, fertility). Students will leave the course with a solid grounding in a) the sources and limitations of demographic indicators; b) the construction of basic demographic techniques to answer questions about human populations.
Taught by: Elo, Hannum, Smith
One-term course offered either term
Activity: Lecture
1 Course Unit

SOCI 134 Health and Social Policy
Health and Social Policy is an interdisciplinary course examining health care and social policy from domestic and international perspectives. The course is designed to engage students in critical thinking about social determinants of health, the organization and outcomes of health care systems and institutions, global health priorities and challenges, and the implications for public policy. Topics include the social inequalities and health; how organizational context of health care impacts outcomes; management of human resources in health nationally and globally; analysis of medical error, its causes, and consequences; review and critique of public policies in U.S. health care; and global health priorities and international health policy. Issues of current public debate in health and health care will provide a context for learning. There are no prerequisites. The course is intended for general lists as well as for those planning careers in health care.
For BA Students: Society Sector
Taught by: Aiken, Lake
Course not offered every year
Also Offered As: NURS 134
Activity: Lecture
1 Course Unit

SOCI 135 Law and Society
After introducing students to the major theoretical concepts concerning law and society, significant controversial societal issues that deal with law and the legal systems both domestically and internationally will be examined. Class discussions will focus on issues involving civil liberties, the organization of courts, legislatures, the legal profession and administrative agencies. Although the focus will be on law in the United States, law and society in other countries of Africa, Asia, Europe and Latin America will be covered in a comparative context. Readings included research reports, statutes and cases.
Taught by: Bosk, Feti
One-term course offered either term
Also Offered As: AFRC 135
Activity: Lecture
1 Course Unit

SOCI 137 The Sociology of Media and Popular Culture
This course relies on a variety of sociological perspectives to examine the role of media and popular culture in society, with a particular emphasis on the power of the mass media industry, the relationship between cultural consumption and status, and the social organization of leisure activities from sports to shopping.
For BA Students: Society Sector
Taught by: Grazian
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Also fulfills General Requirement in Arts Letters for Class of 2009 and prior

SOCI 140 Social Conflict
This course will emphasize violent conflict, what leads up to it, and what determines whether it actually happens or not. Micro-sociological observations of conflict and violence as it appears in real-life observations, photos and videos. Topics include: fights and brawls; military combat; crowd and crowd-control violence; bullying and holdups; fair fights and dueling; carousing; sports violence; police violence; gangs violence; terrorist and clandestine violence; school and workplace rampages.
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 143 Modern Social Movements
Throughout modern times groups of people have come together in an attempt to change their social world. Their successes and failures teach us about society, organizations, and individuals. This course will examine case studies of historical and contemporary social movements. Using these case studies, this course will evaluate different approaches to understanding social movements, and investigate what these different approaches suggest about individuals, the society in which they live, and the potential for social change.
Course not offered every year
Activity: Lecture
1 Course Unit
SOCI 152 American Health Policy
This lecture course will introduce students to a broad range of topics that fall under the heading of American health policy. Its main emphasis will be on the history of health care in America from the U.S. Civil War to Obamacare. The primary objective of the course will be to consider why the U.S., until very recently, remained one of the only industrialized nations to have a private, non-nationalized health care system. Some of the themes addressed include: private health insurance(such as Blue Cross/Blue Shield), industrial health and workers' compensation, the welfare state (in Europe, Canada, and the U.S.), women's health, especially maternal and infant care programs, Medicare/Medicaid, the Clinton Health Plan of 1993, injured soldiers and the Veterans Administration.
Taught by: Linker

SOCI 153 Lang & Social Identity
Also Offered As: LING 152
Activity: Lecture
1 Course Unit

SOCI 154 Afro-Latinos in the U.S.
This course will explore the arrival, establishment and contributions of free and enslaved Africans in Ibero-America, the region presently known as Latin America, and the Spanish Speaking Caribbean. It will look at how these actors and their descendants known today as Afro-Latinos, shaped and built the foundations of Latin American society and culture throughout the centuries from colonial period to present. The course will seek to understand Afro-Latinos' agency and negotiations as intellectual contributors to the ideologies that led to independence and the creation of Latin American nations. Likewise, the course will also explore the accomplishments, controversies and tensions in race dynamics and politics, gender relations, socio-economic issues, among others factors that took and continue to take place as people of African descent negotiate their identity and struggle to uphold their space in Latin America and the U.S.A. today.
Also Offered As: LALS 155
Activity: Lecture
1 Course Unit

SOCI 161 The History of the Information Age
Certain new technologies are greeted with claims that, for good or ill, they must transform our society. The two most recent: the computer and the Internet. But the series of social, economic and technological developments that underlie what is often called the Information Revolution include much more than just the computer. In this course, we explore the history of information technology and its role in contemporary society. We will explore both the technologies themselves—calculating machines, punched card tabulators, telegraph and telephone networks, differential analyzers, digital computers, and many others—and their larger social, economic and political contexts. To understand the roots of these ideas we look at the prehistory of the computer, at the idea of the post-industrial or information society, at parallels with earlier technologies and at broad historical currents in the United States and the world.

SOCI 175 Medical Sociology
This course will give the student an introduction to the sociological study of medicine. Medical sociology is a broad field, covering topics as diverse as the institution and profession of medicine, the practice of medical care, and the social factors that contribute to sickness and well-being. Although we will not explore everything, we will attempt to cover as much of the field as possible through four thematic units: (1) the organization and development of the profession of medicine, (2) the delivery of health-care, especially doctor-patient interaction, (3) the social and cultural factors that affect how illness is defined, and (4) the social causes of illness. The class will emphasize empirical research especially but not only quantitative research.
For BA Students: Society Sector
Taught by: Schnittker
Also Offered As: HSOC 275
Activity: Lecture
1 Course Unit

SOCI 200 Criminal Justice
This course examines how the criminal justice system responds to crime in society. The course reviews the historical development of criminal justice agencies in the United States and Europe and the available scientific evidence on the effect these agencies have on controlling crime. The course places an emphasis on the functional creation of criminal justice agencies and the discretionary role decision makers in these agencies have in deciding how to enforce criminal laws and whom to punish. Evidence on how society measures crime and the role that each major criminal justice agency plays in controlling crime is examined from the perspective of crime victims, police, prosecutors, jurors, judges, prison officials, probation officers and parole board members. Using the model of social policy evaluation, the course asks students to consider how the results of criminal justice could be more effectively delivered to reduce the social and economic costs of crime.
For BA Students: Society Sector
Taught by: MacDonald
One-term course offered either term
Also Offered As: CRIM 200
Activity: Lecture
1 Course Unit

SOCI 221 Sample Survey Methods
This course provides an introduction to survey data collection. In meeting this objective, we examine the major planning tasks necessary for conducting surveys, including problem formulation, study design, questionnaire and interview design, pretesting, sampling, interviewer training and field management, code development and coding of data, and data cleaning and management. We critically explore the design of surveys and collection of data from epistemological and ethical perspectives. Students will leave the class with a solid understanding of the basic process of survey data collection and a familiarity with its strengths and weaknesses as a method of inquiry into human behavior.
Taught by: Hannum, Parrado
Course not offered every year
Activity: Seminar
1 Course Unit
SOCI 222 Field Methods of Sociological Research
This course is designed to introduce students to field methods in sociological research, with a focus on participant-observation and interviewing. During this course, students will read original research based on field methods and discuss their strengths, limitations, and ethical dilemmas. Most importantly, students will design their own research projects and become ethnographers and interviewers. Students will be guided through the fieldwork process from data collection to analysis, and will turn in multiple assignments and original research paper.

SOCI 233 Criminology
This introductory course examines the multi-disciplinary science of law-making, law-breaking, and law-enforcing. It reviews theories explaining where, when, by whom and against whom crimes happen. Police, courts, prisons, and other institutions are also critically examined. This course meets the general distribution requirement.

Taught by: Adler
One-term course offered either term
Also Offered As: CRIM 100
Activity: Lecture
1 Course Unit

SOCI 235 Law and Social Change
Beginning with discussion of various perspectives on social change and law, this course then examines in detail the interdependent relationship between changes in legal and societal institutions. Emphasis will be placed on (1) how and when law can be an instrument for social change, and (2) how and when social change can cause legal change. In the assessment of this relationship, emphasis will be on the laws of the United States. However, laws of other countries and international law relevant to civil liberties, economic, social and political progress will be studied. Throughout the course, discussions will include legal controversies relevant to social change such as issues of race, gender and the law. Other issues relevant to State-Building and development will be discussed. A comparative framework will be used in the analysis of this interdependent relationship between law and social change.
Taught by: Fetni
One-term course offered either term
Also Offered As: AFRC 235, SOCI 460
Activity: Lecture
1 Course Unit

SOCI 238 Media Culture & Society in Contemporary China
This course studies contemporary Chinese media, culture, and society in the context of globalization. Major topics include Internet expression and censorship, mass media commercialization, entertainment media, middle class and consumerism, environmental degradation, new forms of inequality, and civil society and popular protest. Taking a sociological approach, this course introduces methods and theories for analyzing media, institutions, inequality, and social change.
Taught by: Yang
One-term course offered either term
Also Offered As: COMM 203
Activity: Lecture
1 Course Unit

SOCI 239 Sociology of Religion
Classic theory of religion in Durkheim and Weber, as well as contemporary theories of religious movements. Topics include ritual, magic, and mystical experience; religious ethics and salvation beliefs; the dynamics of cults, sects and mainstream churches; origins, expansion and decline of religions; religions and social class; religions and politics. The spectrum of religions in the contemporary United States will be examined, as well as historical comparisons.
Taught by: Wilde
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 252 Human Rights
Sociology provides a unique way to look at human behavior and the world. We live in a world of diverse and conflicting values in which human rights and respect for human dignity have provided a platform for convergence. One important instance of such convergence has been the development of international norms prohibiting genocide, crimes against humanity, war crimes and ethnic cleansing. While there is agreement on fundamental principles as reflected in the Universal Declaration of Human Rights, differences in interpretation remain. A platform for convergence requires the engagement of a number of constituencies, in particular, state and inter-state entities, corporations, civil society and individuals, as well as the mutual reinforcement of their rights and duties. This course will critically cover the history, practice and social significance of human rights.

Also Offered As: AFRC 252
Activity: Lecture
1 Course Unit

SOCI 254 Cities, Suburbs, Regions
This course will explore the political, economic, social, and demographic forces impacting development patterns in metropolitan areas, with a particular focus on Philadelphia. We will examine the government policies, economic forces, and social attitudes that affect the way a region grows, and the impact of these forces on poverty, equity and segregation. Specific topics to be discussed include the factors that make a region competitive, the city’s changing role in the region, the impact place has on opportunity, and approaches to revitalizing and improving communities.

1 Course Unit
SOCI 259 Social Determinants of Health
Over the last century, we have witnessed dramatic historical change in population incidence and mortality, e.g. rising numbers of women diagnosed with breast cancer and dramatic declines in death from stomach cancer. There has also been a highly visible social patterning of health and disease, such as socio-economic disparities in AIDS, substance abuse, and asthma in the U.S. today or the association of breast cancer with affluence globally. This course will explore the way researchers, activists, politicians and others in different eras have made sense of these changes and patterns and have responded to them. The course is historical and sociological. At the same time that we examine evidence and theories about the way poverty, affluence, and other social factors influence individual and population health, we will try to understand how social and historical forces have shaped how health and disease have been understood and categorized. In examining our current obesity "epidemic," for example, we will not only consider evidence and claims made about the causal role of market forces and changes in the built environment, but ask why (besides the fact that we are heavier) obesity has become such a visible and important medical and public health issue in the U.S. today.

Activity: Lecture
1 Course Unit

SOCI 260 Cyberculture
Computers and the internet have become critical parts of our lives and culture. In this course, we will explore how people use these new technologies to develop new conceptions of identity, build virtual communities and affect political change. Each week we will see what we can learn by thinking about the internet in a different way, focusing successively on hackers, virtuality, community, sovereignty, interfaces, algorithms, and infrastructure. We will read books, articles, and blogs about historical and contemporary cultures of computing, from Spacewar players and phone phreaks in the 1970s to Google, Facebook, World of Warcraft, WikiLeaks, and Anonymous today. In addition, we will explore some of these online communities and projects ourselves and develop our own analyses of them.
Course not offered every year
Also Offered As: STSC 260
Activity: Seminar
1 Course Unit

SOCI 264 Poverty, Race and Health
This course is designed to introduce students to current literature on race/ethnic difference in health and mortality in the United States, covering such topics as explanations for why some race/ethnic groups fare better than others, how inner city poverty and residential segregation may contribute to racial/ethnic differences in health outcomes, and health of immigrants versus native-born populations. Current policy debated and recent policy developments related to health are also briefly discussed. The course is organized as a seminar with a combination of lectures and class discussions.

SOCI 266 Latinos in United States
This course presents a broad overview of the Latino population in the United States that focuses on the economic and sociological aspects of Latino immigration and assimilation. Topics to be covered include: construction of Latino identity, the history of U.S. Latino immigration, Latino family patterns and household structure, Latino educational attainment. Latino incorporation into the U.S. labor force, earnings and economic well-being among Latino-origin groups, assimilation and the second generation. The course will stress the importance of understanding Latinos within the overall system of race and ethnic relations in the U.S., as well as in comparison with previous immigration flows, particularly from Europe. We will pay particular attention to the economic impact of Latino immigration on both the U.S. receiving and Latin American sending communities, and the efficacy and future possibilities of U.S. immigration policy. Within all of these diverse topics, we will stress the heterogeneity of the Latino population according to national origin groups (i.e. Mexican, Puerto Rican, Cuban, and other Latinos), as well as generational differences between immigrants and the native born.

SOCI 270 The Immigrant City
Immigration is among the most important yet controversial forces shaping cities, regions, and neighborhoods. The diversity of immigrant and receiving communities means that the dynamics and impacts of migration are varied and complex. This course examines the development of immigrant and receiving communities in the United States. It surveys public policy and community and economic development practices related to migration at the local, regional, national, and trans-national scale. Class readings, discussions, and visits to Philadelphia’s immigrant neighborhoods explore themes including labor markets, housing experiences, political mobilization, civil society, cultural preservation, and the built environment. The first half of the course surveys migration and community formation among a broad range of ethnic groups in different parts of the city and suburbs, mainly through history, sociology, and geography; the second half focuses on specific policy and community and economic development initiatives. Ultimately, the class aims to provide students with 1) a broad knowledge of immigration and its impacts on cities and regions; 2) an in-depth understanding of urban policies and institutions working on immigration in U.S. cities; and 3) familiarity with community and economic development strategies for migrant and receiving communities.

Taught by: Hanson, R. Scott
Course not offered every year
Also Offered As: URBS 270
Activity: Seminar
1 Course Unit
SOCI 275 Medical Sociology
This course will give the student an introduction to the sociological study of medicine. Medical sociology is a broad field, covering topics as diverse as the institution and profession of medicine, the practice of medical care, and the social factors that contribute to sickness and well-being. Although we will not explore everything, we will attempt to cover as much of the field as possible through four thematic units: (1) the organization and development of the profession of medicine, (2) the delivery of health-care, especially doctor-patient interaction, (3) the social and cultural factors that affect how illness is defined, and (4) the social causes of illness. The class will emphasize empirical research especially but not only quantitative research.
Taught by: Schnittker
One-term course offered either term
Also Offered As: HSOC 275
Activity: Lecture
1 Course Unit

SOCI 277 Mental Illness
This course is designed to give a general overview of how sociologists study mental illness. We will be concerned with describing the contributions of sociological research and exploring how these contributions differ from those of psychology, psychiatry, and social work. This overview will be done in three parts: we will discuss (i) what "mental illness" is, (ii) precisely how many Americans are mentally ill, (iii) how social factors (e.g. race, gender, class) and social arrangements (e.g. social networks) lead to mental illness, and (iv) how we as a society respond to and treat the mentally ill. Throughout the course, we will be concerned with uncovering the assumptions behind different definitions of mental health and exploring their political, social, and legal implications.
Taught by: Schnittker
One-term course offered either term
Also Offered As: HSOC 277
Activity: Lecture
1 Course Unit

SOCI 280 Social Issues in Contemporary China
China’s transition to a market-oriented society has effected fundamental changes in the lives of citizens. This class will consider pressing social concerns that China must struggle to address as it continues down the path of market reforms. Using topical problems to illustrate broader issues of social inequality along lines of gender, ethnicity, residence status, and poverty status, we will consider questions such as the following: How are women and men faring differently in China's new labor market and workplaces? Are rural peasants and the emerging underclass of urban laid-off workers being left behind by market transition? How are minorities faring in China's transition? How does the emerging digital divide play into the dichotomies of east-west and urban-rural in China? What is the plight of millions of "floaters" migrating into China's cities, with minimal legal rights and protections? Can China's rapidly-changing public health system handle emerging diseases such as SARS and AIDS? How has the one-child policy affected women, children, and society in China? Who are the "missing girls" of China, and what are the social implications of their disappearance? How was the welfare of children and adolescents changed with market reforms? The class will combine lectures, academic readings, case studies, films, and discussions.

One-term course offered either term
Activity: Lecture
1 Course Unit

SOCI 282 Knowledge and Social Structure
This course focuses on science in various institutional contexts and discusses situations ranging widely over time and place. We consider examples drawn from the seventeenth century to the present, the social settings in which science is found (e.g. the prince's court, the society of amateurs, the university, the academic laboratory, industry and in the field, outdoors), and the effects of changes in publishing and patronage. For comparative purposes, we also consider such phenomena as the symphony orchestra, the art market, motion pictures, and literature. Assigned authors range from time-honored authorities, such as Robert Merton, to science writers for The New Yorker.

SOCI 300 Thesis Workshop
The purpose of this course is to guide senior sociology majors in writing a research proposal for a senior honors thesis. Students will learn about various research approaches, how to write a focused literature review, and kinds of data necessary to answer a wide variety of research questions, including their own. Throughout the course, students will work on designing a research question, generation researchable hypotheses, and coming up with a design for their proposed study. The final paper for this course will be a research proposal that is the basis for students’ independent research project. This course satisfies the research requirement for sociology majors and is designed primarily for seniors who are planning to write an honors thesis.
One-term course offered either term
Prerequisite: SOCI 100
Activity: Seminar
1 Course Unit

SOCI 322 Advanced Topics in Gender and Sexuality Studies
Violence against Women in Conflict: Sexuality, Terrorism, and Human Rights This course explores how women’s experiences of violence in conflict are guided by traditional patriarchal views of femininity, and further how this violence impacts their human rights. Through academic texts, documents produced by the U.N. and NGOs globally, and documentaries, we will consider women’s experiences of violence in contexts such as: how rape is used to decipher the borders and boundaries of emerging nations, as in the 1994 genocide in Rwanda; the highly complex experiences of women suicide bombers in the Israeli-Palestinian and Sri Lankan conflicts; the relationship between domestic violence in the private/home space and the violence of war in the public space; and sexual violence against women in the U.S. military.

SOCI 380 Neighborhood Dynamics of Crime
Crime varies in time, space and populations as it reflects ecological structures and the routine social interactions that occur in daily life. Concentrations of crime can be found among locations, with antisocial activities like assaults and theft occurring at higher rates because of the demographic make-up of people (e.g. adolescents) or conflicts (e.g. competing gangs), for reasons examined by ecological criminology. Variation in socio-demographic structures (age, education ratios, and the concentration of poverty) and the physical environment (housing segregation, density of bars, street lighting) predicts variations between neighborhoods in the level of crime and disorder. Both ethnographic and quantitative research methods are used to explore the connections between the social and physical environment of areas and antisocial behavior.

SOCI 411 Field Observations in Criminal Courts
The course will serve as an introduction both to qualitative research and to an understanding of the routine workings of the courts in Philadelphia. After a brief discussion of the theoretical underpinnings and practical techniques of ethnography, students will undertake supervised field projects leading to the writing of 5000 words long, examined research reports about different aspects of the social organization of the courthouse and court room.
One-term course offered either term
Activity: Seminar
1 Course Unit

SOCI 420 Perspectives on Urban Poverty
This course provides an interdisciplinary introduction to 20th century urban poverty, and 20th century urban poverty knowledge. In addition to providing an historical overview of American poverty, the course is primarily concerned with the ways in which historical, cultural, political, racial, social, spatial/geographical, and economic forces have either shaped or been left out of contemporary debates on urban poverty. Of great importance, the course will evaluate competing analytic trends in the social sciences and their respective implications in terms of the question of what can be known about urban poverty in the contexts of social policy and practice, academic research, and the broader social imaginary. We will critically analyze a wide body of literature that theorizes and explains urban poverty. Course readings span the disciplines of sociology, anthropology, urban studies, history, and social welfare. Primacy will be granted to critical analysis and deconstruction of course texts, particularly with regard to the ways in which poverty knowledge creates, sustains, and constrasts meaningful channels of action in urban poverty policy and practice interventions.

Activity: Seminar
1 Course Unit
Over the past two decades, the public imagination has been gripped by the concept of globalization. Scholars, corporations, advertisers and government officials have latched onto this idea as a defining feature of our current era. These various constituencies use globalization not only to account for epochal shifts in our economy and society, but also to justify new types of business strategy and public policy. This course will examine three interlinked dimensions of globalization: Global economic processes (e.g. the transnational operations of multinational firms that have given rise to a new international division of labor); cultural globalization (e.g. the spread of American brands like Coca Cola, Nike and Hollywood films), and political globalization (e.g. the rise of supranational organizations like the IMF, World Bank and WTO that promote the idea of free markets). Moreover, we will study globalization in the context of cities because, given their centrality to globalization processes, it is in cities that we can best understand how globalization takes place. In cities, we can study the global economic processes that restructure urban space, giving rise to new financial districts, international art exhibits and post-modern architecture and entrepreneurial strategies that seek to elevate cities to world city status. The course will examine these processes in a comparative light, contrasting urban globalization processes in Europe and North America with those in Latin America, Asia and Africa.

One-term course offered either term
Activity: Seminar
1 Course Unit

The purpose of this academic-based service learning course is to examine the development of art, culture and media in cities, with an emphasis on how cultural organizations operate in the urban environment. Through classroom readings and discussions, students will explore a variety of sociological approaches to the analysis of urban culture and the creative economy, local arts and entertainment, new media technology and public policy. In addition, students will conduct several hours per week of community service in one of a variety of local nonprofit arts and other cultural institutions in Philadelphia.

Taught by: Grazian
Course not offered every year
Activity: Seminar
1 Course Unit

How do American cities grow? Studies of urban transformation have focused on anchor institutions, the growth model of big business-generated employment, and “creative class” gentrification. After decades of decline, many major cities like Philadelphia are seeing gains in population again, as well as new commercial activity and street life, spurred by the influx of new immigrant communities. Yet few scholars have asked: What role do immigrants play in the current revival of the American metropolis? In this Social Science Studio course, 16 students will work collaboratively as in a design studio to conduct research that can answer this important social-scientific question. Students will work on independent projects that engage multiple methods and fields to produce new types of knowledge. They will be introduced to multiple methods drawn from architecture, planning, anthropology and political science, including mapping, interviewing, fieldnotes, socio-economic surveys, sketching, photography and web design to develop independent projects. No prior knowledge is required but students with experience in GIS, STATA, photography, drawing or web design are encouraged to apply.

Taught by: Choudhury, Kushanava
Course not offered every year
Activity: Seminar
1 Course Unit

This course analyzes the role of metropolitan regions in the U.S. and global economies, including the sources of metropolitan productivity, the ways that metropolitan structures affect residents, and analyses of public policy in metropolitan areas. The economic, political, and social forces that have shaped World War II urban and regional development are explored, including technology, demography, and government. Special attention is paid to how metropolitan change affects residents by income and race. Topics include: gentrification, schools, suburbanization, sprawl, metropolitan fragmentation, concentration of poverty, race, and various economic revitalization initiatives.

SOI 473 Community Organizing: History and Theory
Power is the ability to create change. This course will integrate the history and theories of community organizing so that each student will be able to develop a transformational praxis. We will examine social inequality and intersectionality, and explore effective strategies in organizing for social change. This course is inter-disciplinary, involving political economy, sociology, history, social work and leadership theory. Inquiry-based and problem-posing methods will serve as the primary means of formative assessment.
Taught by: Becker
Course not offered every year
Also Offered As: URBS 473
Activity: Seminar
1 Course Unit

SOI 488 Culture, Sexuality and Global Health
What, if anything, is global in "global health"? Whatever this field might be, it is more often than not actively produced through a range of conflicting ethical commitments of multiple expert cultures, social movements and laypersons. This course explores critical themes in the historical and sociocultural study of global health. Students will engage a number of disciplinary perspectives within the social sciences including the history, sociology, and anthropology of science, and we will pay particular attention to feminist, queer, and postcolonial science studies perspectives. Throughout, we will consider how both global and local cultural transformations have shaped the emergence of this multidisciplinary field of study. To understand the complexity of global health, students will engage with a number of theoretical and ethnographic texts while questioning its stability and coherence as a self-same object given its interdisciplinary character. In doing so, we will explore the ways in which diverse sets of interests converge to constitute as well as contest the ever-shifting boundaries of global health.

1 Course Unit

SOI 535 Quantitative Methods in Sociology I
This course is an introduction to the practice of statistics in social and behavioral sciences. It is open to beginning graduate students and with the permission of the instructor–advanced undergraduates. Topics covered include the description of social science data, in graphical and non-graphical form; correlation and other forms of association, including cross-tabulation; bivariate regression; an introduction to probability theory; the logic of sampling; the logic of statistical inference and significance tests. There is a lecture twice weekly and a mandatory "lab."
Taught by: Allison, Smith
Course usually offered in fall term
Also Offered As: DEMG 535
Prerequisite: Basic algebra
Activity: Lecture
1 Course Unit

SOI 536 Quantitative Methods in Sociology II
As the second part of a two-semester sequence, this graduate course focuses on regression analysis as used in social science research. In particular, we discuss features and assumptions of linear regression and logistic regression models. We learn how to apply regression models to real social science data using Stata and how to interpret the results.
Taught by: Allison, Kohler, Park, Schnittker, Smith
Course usually offered in spring term
Also Offered As: DEMG 536
Prerequisite: SOI 535 or permission of instructor
Activity: Lecture
1 Course Unit

SOI 541 Gender, the Labor Force, and Markets
Drawing from sociology, economics and demography, this course examines the causes and effects of gender differences in labor force participation, earnings and occupation in the United States and in the rest of the developed and developing world. Differences by race, ethnicity and sexual preference are also considered. Theories of labor supply, marriage, human capital and discrimination are explored as explanations for the observed trends. Finally, the course reviews current labor market policies and uses the theories of labor supply, marriage, human capital and discrimination to evaluate their effects on women and men.
Taught by: Madden
Course not offered every year
Also Offered As: DEMG 541, GSWS 532
Activity: Seminar
1 Course Unit

SOI 542 Work and Gender
This seminar examines the relevance of gender to the organization and experience of paid and unpaid work. Combining materialist and social constructionist approaches, we will consider occupational segregation, the relation of work and family, gender and class solidarity, the construction of gender through work, race and class variation in work experiences, and related topics.
Taught by: Leidner
Course not offered every year
Also Offered As: GSWS 542
Activity: Seminar
1 Course Unit
SOCI 546 Feminist Theory
Feminist activists and academics have posed fundamental challenges to existing approaches to social theory. This seminar explores the development of feminist theory since the 1960s, focusing on approaches that have the most relevance for social science. The relations among feminist theorizing, research, and activism will be emphasized.
Taught by: Leidner
Course not offered every year
Also Offered As: GSWS 546
Activity: Seminar
1 Course Unit

SOCI 550 Social Inequality
This course will study social stratification primarily in contemporary societies. We will examine both the distribution of social rewards as well as process for the allocation of these rewards. Stratification theory and research on social mobility will be considered. Topics include the influence of education, race and gender, and structural and organizational factors on individual success. Acquaintance with stratification theory and quantitative methods would be helpful but not required.
Taught by: Jacobs
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 553 Field Methods in Qualitative Research
This course is designed to introduce graduate students to basic skills and concepts in ethnographic field research, including participant observation, interviewing, field documentation, and the scholarly presentation of qualitative data. Students will learn to apply these skills and concepts through an assigned set of exercises in concert with a semester-long project based on intensive fieldwork at a research site of their choosing. In addition, we will examine exemplars of published fieldwork in both classical and contemporary sociology. Students outside of the Department of Sociology need permission of the instructor to enroll.
Taught by: Bosk, Grazian, Lareau
One-term course offered either term
Activity: Seminar
1 Course Unit

SOCI 555 Pro-Seminar in Sociological Research
In the non-credit seminar students will be introduce to key areas in sociological research, and a set of professional skills necessary to navigate graduate school and a successful academic career. Students will also be introduced to faculty and resources available at Penn. This course is required for all first-year graduate students in Sociology
Taught by: Hannum, Jacob, Kao, Leidner, Smith
Course usually offered in fall term
Activity: Seminar
0 Course Units

SOCI 556 Pro-Seminar in Sociological Research II
This graduate seminar for first-year graduate students will be a two-semester course covering the major subfields of sociology -- their classical and contemporary theories, current methods and substance.
Taught by: Collins, Grazian, Hannum, Park, Schnittker, Smith, Wilde
One-term course offered either term
Activity: Seminar
1 Course Unit

SOCI 561 Class Cultures and Historical Change
Culture as lifestyle, therefore as the immediately visible aspect of social class, as well as the status groups that may cut across class. Examines micro-sociological evidence (including photos and other images; and literary and other textual sources) of how class and status are performed in everyday life. Goffmanian and subsequent theory of interaction rituals applied across long-term historical changes, and their causes. Topics include Norbert Elias's theory of civilizing process; stratification in patrimonial/ aristocratic societies; the modern shift to bureaucracy plus private households; the effects of democratization, social movements, wars, revolutions, and status leveling; informalization and antimimic counter-cultures; youth cultures and cults of mass entertainment. Concluding with what electronic communications are doing to the future of class cultures and self-presentation.
Taught by: Collins
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 562 Soci Movements & Poli Sc
Activity: Lecture
1 Course Unit

SOCI 570 VISUALIZING W. E. B. DUBOIS
This seminar will focus on a project that views history as a result of our contemporary society in witch biographical truths are constantly shifting. So the historical biographers write about the way they remembered and visualize the past, and not about the way that it happened. We will take Du Bois's biography in his own words and interrogate his narrative with the visual narratives of his life and influence produced by others. "Visualizing W.E.B Du Bois" focuses on photographic, film, and video representations intended to present some aspect of Du Bois's reality, primarily for the purposes of instruction or maintaining a historical record. Such projects include photos, materials originally shot on film stock, and digital images that can be either displayed in a book or magazine, and moving images made into a film or video for a TV show or released for screening in cinemas, or other broadcast mediums like YouTube and Vimeo.
Taught by: Zuberi
Course not offered every year
Also Offered As: AFRC 571
Activity: Seminar
1 Course Unit

SOCI 572 Health Care and Social Policy
This course is an area study or survey of social policy issues in contemporary health care. Topics include social contexts of health care and health policy; the organization and financing of health services; the health professions; health and illness over the life cycle; achieving equitable access to health services; the interface between health and social services. Health problems of national significance will be addressed including infant mortality, teenage pregnancy, AIDS, the chronically mentally ill and homeless, and health impaired elderly.
Taught by: Aiken
Course not offered every year
Activity: Lecture
1 Course Unit
SOCI 595 Media, Culture, and Society
This course will begin by surveying approaches to culture that are characteristic of general theory in sociology. We will then deal in depth with theories of recorded culture that have developed within the sociology of culture and related disciplines, including the role of the media in constructing social reality, the interpretation and reception of texts, recorded culture and the creation of symbolic boundaries, the social construction of art, the organization of cultural industries, sacred symbols and political integration, and the relationship between culture and the state.
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 596 Sociology of Education
This graduate seminar will introduce students to some of the key theoretical and empirical work in the sociology of education. We will examine how schools work to maintain or alleviate inequality, and focus on differences in educational achievement and attainment by race, ethnicity, immigrant status, class, and gender. We will review work on the educational experiences of youth from early childhood to young adulthood.
Course not offered every year
Also Offered As: ASAM 590, SOCI 496
Activity: Seminar
1 Course Unit

SOCI 597 MLA Proseminar
Activity: Seminar
1 Course Unit

SOCI 601 Contemporary Social Theory
This is a graduate-level seminar structured around the main theoretical debates of contemporary sociology, including the interplay of rationality and emotion, the relationship between structure and agency, the nature of power, and the role of chance and contingency. In considering alternative positions on these debates, we will encounter the major theorists of the past fifty years, including Parsons, Merton, Goffman, Homans, Schutz, Coleman, Bourdieu, Luhmann, Habermas, Collins, and Giddens.
Requirements include intensive primary source reading, writing, and participation. The course assumes, and does not provide, prior familiarity with the main theoretical perspectives, and thus does not substitute for the undergraduate theory course (SOCI 126)
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 602 Proseminar in Classical Sociology
This course is designed to introduce graduate students to the classical foundations of sociology by drawing on canonical readings by Marx, Engels, Durkheim, Weber, Du Bois, Addams, Simmel, Park, and Goffman, among others. We will read these texts in the context of three major sociological themes: work and social inequality, culture and social structure, and urban interaction and culture in the city. Final papers will require students to draw on classical sociological works in their analyses of contemporary empirical research in sociology.
Taught by: Grazian
One-term course offered either term
Activity: Seminar
1 Course Unit

SOCI 603 Master's Research in Sociology
This graduate course is intended to be helpful to students as they produce an MA thesis. The course is structured to provide social support and feedback as students move through the stages in the development of a project (i.e. data analysis, review of the literature, development of a thesis, and revision). Students should begin the semester with a data set in hand; additional data analysis will occur during the term. (In some cases, students may be finishing their data collection.) In addition, the course is intended to provided professional development opportunities for students by providing "insider" information about the publication process. Students will be given examples of journal review (including reviews that reject a paper), copies of papers as they move through the revision process, and guidelines for producing a publishable piece of work
The goal is for students to produce a manuscript that can be submitted for publication in the near future. This is a required course for second year graduate students in Sociology.
Taught by: Bosk, Grazian, Jacobs, Kao, Lareau, Leidner, Park, Schnittker
One-term course offered either term
Also Offered As: DEMG 707
Activity: Seminar
1 Course Unit

SOCI 604 Methodology of Social Research
This course will give students familiarity with the common research methods social scientists use to conduct research. Ethnographic, interview, survey, experimental and historical/comparative research methods will be covered. Four themes will be explored: 1) the basics of solid research design, 2) the various advantages and disadvantages of each method, 3) when the use of a method is appropriate or inappropriate for the research question, and 4) how to evaluate researchers’ claims on the basis of the evidence they present. These themes will be explored by reading examples of and conducting exercises designed to give students hands-on experience in each of the methods. Students will conduct the exercises on a topic of their choice, which together will culminate in their final paper. The course is required and restricted to second year students in sociology and demography.
Taught by: Smith, Wilde, Zuberi
One-term course offered either term
Also Offered As: DEMG 604
Activity: Lecture
1 Course Unit

SOCI 607 Introduction to Demography
A nontechnical introduction to fertility, mortality and migration and the interrelations of population with other social and economic factors.
Course not offered every year
Also Offered As: DEMG 607
Activity: Lecture
1 Course Unit

SOCI 609 Basic Methods of Demography
The course is designed to introduce students to basic concepts of demographic measurement and modeling used to study changes in population size and composition. The course covers basic measures of mortality, fertility and migration; life table construction; multiple decrement life tables; stable populations; population projections; and age patterns of vital events. Students will learn to apply demographic methods through a series of weekly problem sets.
Taught by: Elo, Guillot, Smith
One-term course offered either term
Also Offered As: DEMG 609
Activity: Lecture
1 Course Unit
SOCI 611 Structural Equation Models
Statistical modeling with multiple equations and latent variables. The first part of the course will focus on linear models that could be estimated with any of the well-known SEM programs (e.g., LISREL, EQS, or Amos). Both Mplus and SAS will be used exclusively in this part of the course. The second part will focus on Mplus models for variables that are categorical, count, or censored. Maximum likelihood methods for missing data will also be covered.
Taught by: Allison
Course not offered every year
Also Offered As: DEMG 611
Activity: Lecture
1 Course Unit

SOCI 612 Categorical Data Analysis
This course deals with techniques for analyzing multivariate data which the dependent variable is a set of categories (a dichotomy or polytomous). Topics will include linear probability models, logit (logistic) regression models, probit models, logit analysis of contingency tables, cumulative logit and probit (for ordinal data), multinomial logit, conditional logit (discrete choice), unobserved heterogeneity, log-linear models, square tables, response-based sampling, and repeated measures. Methods will be illustrated using the Stata System. There will be several assignments using Stata to analyze data provided by the instructor.
Taught by: Allison, Smith
Course not offered every year
Also Offered As: DEMG 612
Activity: Lecture
1 Course Unit

SOCI 613 Event History
An applications-oriented course on statistical methods for the analysis of longitudinal data on the occurrence of events, also known as survival analysis, failure-time analysis, hazard analysis or duration analysis. Emphasis on regression-like models in which the risk of event occurrence is a function of a set of explanatory variables. Topics include accelerated failure-time models, hazard models, censoring. Cox regression models, time-dependent covariates, competing risks, repeated events, unobserved heterogeneity, discrete-time methods.
Taught by: Allison
Course not offered every year
Also Offered As: DEMG 613
Prerequisite: SOCI 536 or equivalent
Activity: Lecture
1 Course Unit

SOCI 617 Theories of Racial and Ethnic Differentiation
This course provides an overview of prominent theories and theorists of race and ethnicity, and is concerned with: 1) Understanding the nature and persistence of race and ethnicity as meaningful social groupings in contemporary American society, and 2) Explaining the social significance of these group identities— that is, how these groupings are related to social stratification, to socio-cultural relations, and to the political and economic dynamics in our society.
Taught by: Charles
Course not offered every year
Also Offered As: AFRC 617
Activity: Seminar
1 Course Unit

SOCI 620 Doctoral Seminar in Sociological Research II
This course is intended to aid in the selection, framing, writing and revising of sociological dissertation proposals. It is also intended to provide a forum for the presentation of dissertation research in progress. The goal is to provide a forum for the acquisition of professional socialization in sociology. We will discuss the framing of research questions, the design of research strategies, and the writing of dissertation proposals. We will discuss the process of submitting manuscripts for conferences and journals, preparing a curriculum vitae, job search strategies, and preparing for effective colloquium presentations. We will also review articles currently under review at the American Sociological Review. It is expected that third year graduate students in Sociology will enroll in this class.
Taught by: Grazian, Hannum, Jacobs, Schnittker, Wilde
One-term course offered either term
Prerequisite: Third year graduate students
Activity: Seminar
1 Course Unit

SOCI 621 Mortality
The course focuses on the description and explanation of health and mortality in human populations and their variability across several dimensions such as age, time, place, social class, race, etc. The course includes general theories of health, mortality and morbidity, investigations of mortality and related processes in developing and developed countries, and discussions of future mortality trends and their implications for individual lives and the society at large.
Taught by: Elo, Kohler
Course not offered every year
Also Offered As: DEMG 621
Activity: Lecture
1 Course Unit

SOCI 622 Fertility
The biological, social and demographic factors explaining the levels, trends and differentials in human fertility. Data, measures, and methods used in the context of the more and the less developed countries, with an emphasis on the historical and current course of the fertility transition.
Taught by: Kohler, Smith
Course not offered every year
Also Offered As: DEMG 622
Activity: Seminar
1 Course Unit

SOCI 623 Workshop in Urban Ethnography
The ethnographic and sociological interpretation of urban life. Conceptual and methodological issues will be thoroughly discussed. Ongoing projects of participants will be presented in a "workshop" format, thus providing participants the opportunity of learning from and contributing ethnographic work in progress. Selected ethnographic works will be read and assessed.
Course not offered every year
Also Offered As: AFRC 623, URBS 623
Activity: Seminar
1 Course Unit
SOCI 630 Advanced Special Topics: Demography of Race
This course will examine demographic and statistical methods used to capture the impact of racial stratification in society. This course covers the skills and insights used by demographers and social statisticians in the study of racial data. A key challenge facing researchers is the interpretation of the vast amount of racial data generated by society. As these data do not directly answer important social questions, data analysis and statistics must be used to interpret them. The course will examine the logic used to communicate statistical results from racial data in various societies. We will question the scientific claims of social science methodology by extending the critical perspective to biases that may underlie research methods. We will discuss good and bad practices within the context of the historical developments of the methods. This advanced special topics course and course description is for Fall 2017 only.
Taught by: Zuberi
One-term course offered either term
Also Offered As: AFRC 431, AFRC 630, DEMG 630, SOCI 430
Activity: Seminar
1 Course Unit

SOCI 633 Population Processes I
This is one of two courses that serve as an introduction to core areas of demography and important developments in the field. Population Processes I introduces students to broad set of issues in health, mortality, and aging. Readings cover overviews of major topics as well as recent approaches to the subject. Attention is focused on description and explanation of variation in health across time, space and social groups. One consequence of mortality decline is population aging. We will cover some of its implications for individuals, families and societies.
Taught by: Elo, Guillot, Parrado, Schnittker
Course usually offered in fall term
Also Offered As: DEMG 633
Activity: Seminar
1 Course Unit

SOCI 634 Population Processes II
Population Processes II is part of a two-course sequence designed to introduce students to the core areas of demography (fertility, mortality, and migration) and recent developments in the field. PP II is divided into two parts. The first focuses on family demography and the biological, social and demographic factors explaining levels, trends, and differentials in human fertility transition with an emphasis on the historical and current course of fertility transition in developed and developing countries. The second part of the course provides a comprehensive review of theories and research on international migration. Readings examine patterns and processes of global migration during the classic age from 1800-1914 as well as during the postwar period from 1945 to the present. The course also covers a history and evaluation of immigration policies around the world, and devotes significant attention to theoretical and empirical perspectives on immigrant adaptation, including the relationship between gender and migration.
Taught by: Flippen, Kohler, Parrado, Smith
Course usually offered in spring term
Also Offered As: DEMG 634
Activity: Seminar
1 Course Unit

SOCI 640 Global Health and Health Policy
This participatory interdisciplinary seminar course examines contemporary issues in public health policy and global health. The organizing framework is social determinants of health. We consider evidence that inequalities in education, income, and occupation influence health status, and the policy dilemma that broad interventions to improve population health may increase health disparities. We critically examine whether prevention is always better than cure, and what modern medicine has to offer in terms of health. We explore the public policy process in health using the "tobacco wars" as a case example, of how politics, policy, law, commercial interests, and research intersect to affect the public's health. We examine whether global health is in a state of decline, and the extent to which failures in public health, public policy, and foreign policy have contributed to increasing threats to world health. Likewise we will examine the potential for greater integration of health into foreign policy to create global infrastructure upon which to advance health. We will examine the global health workforce and the impact of widespread global migration of health professionals on receiving and sending countries. There are no prerequisites. The course is designed for graduate students in the social and behavioral sciences, health professions, public health, business and law. Advanced undergraduate students will be admitted with permission.
Taught by: Aiken
Course not offered every year
Also Offered As: NURS 640
Activity: Lecture
1 Course Unit

SOCI 643 Social Stratification
This is an advanced level graduate seminar where we will review contemporary research on social stratification and mobility. We will examine empirical and theoretical studies not only in the US but also in other countries to address how the pattern of social stratification varies across societies and over time. The main topics to be discussed are social mobility, occupational attainment, educational inequality, gender and race, and family processes and stratification. We will also examine studies that address how national contexts mediate social stratification. Advanced undergraduate students will be admitted with permission.
Taught by: Jacobs, Park
Course not offered every year
Also Offered As: DEMG 643
Activity: Lecture
1 Course Unit

SOCI 644 Empirical Methods in Bioethics
This course provides an introduction to social science research design and methods for students interested in conducting research on issues in bioethics. The course is appropriate for students who, rather than conducting research themselves, will use research findings to make or challenge arguments in policy statements or other writings. Emphasis is placed on the logic of research design as the way to relate topic of inquiry with methods so that evidence produced is pertinent and useful. Students will design research projects and explore a variety of methods available to conduct research. Students will also integrate research ethics into the formulation and design of their inquiries.
Taught by: Bosk
Course not offered every year
Also Offered As: BIOE 604
Activity: Lecture
1 Course Unit
### SOCI 649 A Course on Elites
Most of the studies of inequality look at poverty and the impact of poverty. This course will be a study of those at the top of the social stratification system. We will take a broad vision of elites of to include the upper-middle-class as well as those in the top 1%. The course will examine the concentration of wealth in American society. It will examine elite families. It will also look at elite education. There will be a unit on the financial industry, the 2008 debacle, and the failure of the government to regulate this important industry. We will also study the influence of race by comparing the black upper-middle-class with white upper-middle-class families. Thus, we will also look at the power of elites in a number of spheres. Finally, we will also read theoretical perspectives including the work of C. Wright Mills, Marx, and Bourdieu. Thus, in addition to the focus on social stratification, this course cuts across sociology of the family, economic sociology, cultural sociology, and race and ethnic relations.

Taught by: Lareau
Activity: Seminar
1 Course Unit

### SOCI 650 Social Inequality
This course will study social inequality primarily in contemporary societies. We will examine both the distribution of social rewards as well as processes for the allocation of these rewards. Stratification theory and research on social mobility will be considered. Topics include the influence of education, race and gender, and structural and organizational factors on individual success. We will also discuss how societies’ stratification systems vary across time and place. Acquaintance with stratification theory and quantitative methods would be helpful but not required.

Taught by: Jacobs
Course not offered every year
Activity: Seminar
1 Course Unit

### SOCI 660 Advanced Topics in Africana Studies
Advanced Topics in Africana Studies: The Sociology of W E B Du Bois; GIS for Social Science Research
One-term course offered either term
Also Offered As: AFRC 420, AFRC 620, SOCI 460
Activity: Seminar
1 Course Unit

### SOCI 662 Panel Data Analysis
Also Offered As: DEMG 662
Activity: Lecture
1 Course Unit

### SOCI 664 Digital Media & Soc Theo
This seminar explores critical issues in contemporary society through the lens of digital media studies and social theory. Special attention will be given to how social theory may inform the theorizing and empirical analysis of digital culture, digital politics, and digital practices. We will read recent monographs on the meanings and uses of digital media in international development, international migration, state power and popular protest, symbolic violence, and the formation and contestation of identities, communities, and publics. These works will be examined alongside the social theories of Jeffrey Alexander, Ulrich Beck, Bourdieu, Judith Butler, Foucault, Giddens, Goffman, Habermas, Melucci, Victor Turner, and others. A term paper required

One-term course offered either term
Also Offered As: COMM 665
Activity: Seminar
1 Course Unit

### SOCI 667 Social Interaction
The dynamics of interpersonal interaction, especially in face-to-face encounters during limited short periods of time. Topics include: the theory of interaction rituals deriving from Durkheim, Goffman and their contemporary followers; conversation analysis; micro-ethnographic studies of non-verbal behavior and embodied interaction; sociology of emotions; symbolic interactionist theory and the social nature of mind, self, and inner dialogue; electronically mediated interaction and its effects on social ties; and the relationship between micro and macro sociology.

Course not offered every year
Activity: Seminar
1 Course Unit

### SOCI 670 Family Data
This two semester course will engage each graduate student in an analysis project with qualitative and quantitative components, using a linked qualitative longitudinal data set. Students will use survey data from the baseline and 12 month wave of the Fragile Families study (described at http://crcw.princeton.edu/fragilefamilies/), a national survey of unwed and married parents who have just had a child (with unmarried parents over sampled) They will also use transcripts and coded data from the TLC3 study, which involved qualitative couple and individual interviews conducted with a subset of 75 of the couples in the FF survey in 3 waves: about 3 months after the birth and then again 12 and 24 months after the birth. Most of these are low-income, unmarried, cohabiting parents. The goal of the course is for each student to use these two data sets, and the analytic techniques and literature covered in the course, to write a paper that can be submitted for publication. The spring will also include lots of tips on how to construct a publishable paper. Students should only enroll in this course if they plan to take the spring sequel course as well.

One-term course offered either term
Also Offered As: DEMG 670
Activity: Seminar
1 Course Unit

### SOCI 677 International Migration
A comprehensive review of theories and research on international migration. The course introduces the basic precepts of neoclassical economics, the new economics of labor migration, segmented labor market theory, world systems theory, social capital theory and the theory of cumulative causation. Readings examine patterns and processes of global migration during the classic age from 1800?1914 as well as during the postwar period from 1945 to the present. The course also covers a history and evaluation of immigration policies around the world, and devotes signification attention to theoretical and empirical perspectives on immigrant adaptation. Within this larger topic, we will also discuss internal migration and urbanization; the relationship between gender and migration; the spatial distribution of immigrants within the United States, immigrant communities, and ethnic enclaves; and the undocumented population in the United States.

Taught by: Flippin
Course not offered every year
Also Offered As: DEMG 677
Activity: Seminar
1 Course Unit
SOCI 680 Pro-seminar in Criminology
This course explores the basic scope, mission and methods of the science of criminology. The course proceeds to cover the current state of theory, research, and accomplishments in both knowledge and policy about criminality and criminal events. Students will read widely and report to the seminar on their readings, as well as assessing key readings and central ideas for their potential guidance of future research. The course focuses primarily on criminology of criminal events, including law-making and law-breaking. The criminology of reactions to crime is covered in the second semester pro-seminar in criminal justice, CRIM 601/SOCI 681.
One-term course offered either term
Also Offered As: CRIM 600
Activity: Seminar
1 Course Unit

SOCI 681 Pro-seminar in Criminal Justice
A wide-ranging introduction to theory and research on responses to crime under the rubric of criminal law. Theories of deterrence, procedural justice, reintegrative shaming, defiance and other interactions between legal sanctions and legal conduct will be examined in light of the most recent research. Issues of discrimination, disparity, and fairness in the operation of criminal law will be considered with evidence from around the world. Patterns, causes, and consequences of legal sanctioning patterns will be systematically documented, and major gaps in knowledge will be identified.
Taught by: MacDonald
One-term course offered either term
Also Offered As: CRIM 601
Activity: Seminar
1 Course Unit

SOCI 685 Sociology of Violence
General theory of social conflict, with an emphasis on violent conflict. Specific applications include fights, riots, combat, and gang violence; tribal and modern war; abuse of the weak; domestic conflict; sexual conflict and rape; homicide; social movements and moral crusades; conflict management and social control; state breakdowns and revolutions; ethnic conflict and genocide.
One-term course offered either term
Activity: Seminar
1 Course Unit

SOCI 690 Sociology Writing Workshop I
Taught by: Jacobs, Lareau
Also Offered As: DEMG 707, DEMG 708, SOCI 691
Activity: Seminar
1 Course Unit

SOCI 691 Sociology Writing Workshop II
Taught by: Jacobs, Lareau
Also Offered As: DEMG 707, DEMG 708, SOCI 690, SOCI 707, SOCI 708
Activity: Seminar
1 Course Unit

SOCI 702 Political Economy Social History of Africa/African Diaspora
The topic of this course will be Africa and the African Diaspora. The emphasis will be on readings, class discussions, and seminars to reflect the ongoing discussions in the field. We will provide a series of readings for background to each section.
Taught by: Zuberi
Course not offered every year
Also Offered As: AFRC 702, AFRC 710, AFST 702, LALS 702
Activity: Seminar
1 Course Unit

SOCI 707 Second-Year Research Seminar I
This course is intended to hone the skills and judgment in order to conduct independent research in sociology and demography. We will discuss the selection of intellectually strategic research questions and practical research designs. Students will get experience with proposal writing, the process of editing successive drafts of manuscripts, and the oral presentation of work in progress as well as finished research projects. The course is designed to be the context in which master's papers and second year research papers are written. This is a required course for second year graduate students in Demography. Others interested in enrolling in only one of the courses may do so with the permission of the Chair of the Graduate Group in Demography.
One-term course offered either term
Also Offered As: DEMG 707
Activity: Seminar
1 Course Unit

SOCI 731 Advanced Demographic Methods
This course considers a variety of procedures for measuring and modeling demographic processes. We will consider both deterministic (drawn from classic demographic methods, stable population theory, and the like) and stochastic (drawn from statistics) perspectives and methods, including their integration. Pre-requisites: DEMG 609 and SOCI 536 (or its equivalent).
Taught by: Smith
Course not offered every year
Also Offered As: DEMG 731
Prerequisites: DEMG 609 and SOCI 536 (or its equivalent)
Activity: Seminar
1 Course Unit

SOCI 777 Special Topics in Demography
Topics vary from semester to semester.
Course not offered every year
Also Offered As: AFRC 777, DEMG 777
Activity: Seminar
1 Course Unit

SOCI 796 Demographic, Economic, and Social Interrelations
The course investigates economic and social determinants of fertility, mortality, and migration, and it discusses the effects of population variables on economic and social conditions, including economic and social development. Topics discussed in the course include: How do economic changes affect marriage, divorce, and child bearing decisions? How do households make decisions about transfers and requests? How can economic and sociological approaches be combined in explanatory models of demography change? How does immigration to the US affect the ethnic composition of the population, the earnings of native workers, taxes on natives, and the macro-economy? What causes the aging of populations, and how will population aging affect the economies of industrial nations, and in particular, pension programs like Social Security? What accounts for the rise in women's participation in the wage labor force over the past century? How are family composition and poverty interrelated? Does rapid population growth slow economic development with low income countries? In addition to these topics, the course also covers selected methods not included in Dem/Soc 535/536 and 609.
Taught by: Madden, Kohler
Course not offered every year
Also Offered As: DEMG 796, ECON 791
Activity: Lecture
1 Course Unit
SOCI 821 Proseminar in Health Outcomes Research
This course is designed for doctoral students interested in conducting health outcomes research. The course focuses on conceptual, methodological, statistical, feasibility and data issues central to the conduct of health outcomes research. Penn faculty researchers will use their ongoing studies to illustrate how study design, sampling, measurement, and advanced statistical techniques can be employed to address the various challenges inherent in health outcomes research.
Taught by: Aiken, Lake
Course not offered every year
Also Offered As: NURS 821
Prerequisites: Prior coursework at undergraduate or masters level in statistics and quantitative methods.
Activity: Seminar
1 Course Unit

SOCI 822 Applications of Health Outcome Research
This the second of a two-course sequence designed for doctoral students interested in conducting health outcomes research. The first course (821) focuses on conceptual, methodological, statistical, feasibility and data issues central to the conduct of health outcomes research; the second course (822) focuses on applying health outcomes research through the development and implementation of a research project. In the first course Penn faculty researchers will use their ongoing studies to illustrate how sampling, study design, measurement, and advanced statistical techniques can be employed to address the various challenges inherent in health outcomes research. In the second course, students will design and implement a health outcomes research project.
Taught by: Aiken
One-term course offered either term
Also Offered As: NURS 822
Prerequisites: Prior coursework at undergraduate or masters level in statistics and quantitative methods, Nursing 821/Sociology 821 is preferred
Activity: Lecture
1 Course Unit

SOCI 860 Global Media Activism
Also Offered As: COMM 860
Activity: Seminar
1 Course Unit

SOCI 867 Media & Social Movements
Examines the meanings and roles of media and communication in social movements; analyzes media reform activism; studies both historical movements and contemporary protests around the world (Arab Spring, Indignados, Occupy, etc.); covers a broad range of theoretical perspectives, especially network and diffusion theories, political economy, narrative theory, and theories of performance. Students are required to submit a final research paper.
Taught by: Yang
Course not offered every year
Also Offered As: COMM 867
Activity: Seminar
1 Course Unit

SOCI 888 Special Topics
Also Offered As: COMM 888
Activity: Seminar
1 Course Unit

SOCI 998 Independent readings and research
For advanced students who work with individual instructors upon permission. Intended to go beyond existing graduate courses in the study of specific problems or theories or to provide work opportunities in areas not covered by existing courses.
One-term course offered either term
Activity: Independent Study
1 Course Unit

SOCI 999 Directed Readings and Research
Primarily for advanced students who work with individual instructors upon permission. Intended to go beyond existing graduate courses in the study of specific problems or theories or to provide work opportunities in areas not covered by existing courses.
One-term course offered either term
Activity: Independent Study
1 Course Unit

South Asia Studies (SAST)

SAST 001 Introduction to Modern India
This introductory course will provide an outline of major events and themes in Indian history, from the Mughal Empire in the 16th century to the re-emergence of India as a global player in the 21st century. The course will discuss the following themes: society and economy in Mughal India; global trade between India and the West in the 17th century; the rise of the English East India Company's control over Indian subcontinent in the 18th century; its emergence and transformation of India into a colonial economy; social and religious reform movements in the 19th century; the emergence of elite and popular anti-colonial nationalisms; independence and the partition of the subcontinent; the emergence of the world's largest democracy; the making of an Indian middle class; and the nuclearization of South Asia.
For BA Students: History and Tradition Sector
Taught by: Ali
One-term course offered either term
Also Offered As: HIST 089
Activity: Lecture
1 Course Unit
SAST 002 The City in South Asia
This interdisciplinary social science course examines key topics, themes, and analytic methods in the study of South Asia by focusing on significant South Asian cities. With one-fifth of the world's population, South Asia and its urban centers are playing an increasingly important role in recent global economic transformations, resulting in fundamental changes within both the subcontinent and the larger world. Drawing primarily on ethnographic studies of South Asia in the context of rapid historical change, the course also incorporates research drawn from urban studies, architecture, political science, and history, as well as fiction and film. Topics include globalization and new economic dynamics in South Asia, the formation of a new urban middle class; consumption and consumer culture; urban political formations, democratic institutions, and practices; criminality and the underworld; population growth, changes in the built environment, and demographic shifts; everyday life in South Asia and ethnic, cultural, and linguistic identities, differences, and violence in South Asia's urban environments. This is an introductory level course appropriate for students with no background in South Asia or for those seeking to better understand South Asia’s urban environments in the context of recent globalization and rapid historical changes. No prerequisites. Fulfills College sector requirement in Society and foundational approach in Cross-Cultural Analysis.
For BA Students: Society Sector
Taught by: Mitchell
One-term course offered either term
Also Offered As: ANTH 107, URBS 122
Activity: Lecture
1 Course Unit

SAST 003 History, Culture, and Religion in Early India
This course surveys the culture, religion and history of India from 2500 BCE to 1200 CE. The course examines the major cultural, religious and social factors that shaped the course of early Indian history. The following themes will be covered: the rise and fall of Harappan civilization, the "Aryan Invasion" and Vedic India, the rise of cities, states and the religions of Buddhism and Jainism, the historical context of the growth of classical Hinduism, including the Mahabharata, Ramayana and the development of the theistic temple cults of Saivism and Vaisnavism, processes of medieval agrarian expansion and cultic incorporation as well as the spread of early Indian cultural ideas in Southeast Asia. In addition to assigned secondary readings students will read select primary sources on the history of religion and culture of early India, including Vedic and Buddhist texts, Puranas and medieval temple inscriptions. Major objectives of the course will be to draw attention to India’s early cultural and religious past and to assess contemporary concerns and ideologies in influencing our understanding and representation of that past.
For BA Students: History and Tradition Sector
Taught by: Ali
One-term course offered either term
Also Offered As: HIST 086, RELS 164
Activity: Lecture
1 Course Unit

SAST 004 India’s Literature: Love, War, Wisdom and Humor
This course introduces students to the extraordinary quality of literary production during the past four millennia of South Asian civilization. We will read texts in translation from all parts of South Asia up to the sixteenth century. We will read selections from hymns, lyric poems, epics, wisdom literature, plays, political works, and religious texts.
For BA Students: Arts and Letters Sector
Taught by: Patel
One-term course offered either term
Also Offered As: COML 012
Activity: Lecture
1 Course Unit

SAST 005 Performing Arts in South Asia
This course is a survey of selected traditions of theater, music, and dance in India and surrounding regions. Topics include ritual practices, theater, classical dance, classical music, devotional music, regional genres, and contemporary popular musics. Readings and lectures are supplemented by audio and visual materials and live performances. The aim of the course is to expose students to a variety of performance practices from this part of the world and to situate the performing arts in their social and cultural contexts. The course has no prerequisites.
For BA Students: Arts and Letters Sector
Taught by: Miner

SAST 006 Hindu Mythology
Premodern India produced some of the world's greatest myths and stories: tales of gods, goddesses, heroes, princesses, kings and lovers that continue to capture the imaginations of millions of readers and hearers. In this course, we will look closely at some of these stories especially as found in Purana-s, great compendia composed in Sanskrit, including the chief stories of the central gods of Hinduism: Visnu, Siva, and the Goddess. We will also consider the relationship between these texts and the earlier myths of the Vedas and the Indian Epics, the diversity of the narrative and mythic materials within and across different texts, and the re-imagining of these stories in the modern world.

SAST 007 Introduction to Modern South Asian Literatures
This course provides an introduction to the literatures of South Asia - chiefly India, Pakistan, and Bangladesh- between 1500 and the present. We will read translated excerpts from literary texts in several languages - Braj, Persian, Hindi, Urdu, Bengali, Marathi, Malayalam, and Tamil - and explore the relationship between these literary texts and their historical contexts. No prior knowledge of South Asia is required.

SAST 008 India: Culture and Society
What makes India INDIA? Religion and Philosophy? Architectural splendor? Kingdoms? Caste? The position of women? This course will introduce students to India by studying a range of social and cultural institutions that have historically assumed to be definitive India. Through primary texts, novels and historical sociological analysis, we will ask how these institutions have been reproduced and transformed, and assess their significance for contemporary Indian society.

SAST 009 Introduction to Hinduism
This course introduces students to the history, texts, philosophies and rituals of South Asia's oldest living religious traditions, represented today by the term "Hinduism." At the same time, it problematizes the idea of a monolithic "Hindu Tradition", in favor of an approach that recognizes several distinct, dynamic, yet symbiotic Hindu religious cultures. The course also places emphasis on the vitality of today's Hinduism(s), and the various historical, ritual, cultural, and social contexts that they represent and constitute. The course is organized around six modules: (1) Issues in the Academic Study of Hinduism; (2) Sanskrit (textual) tradition; (3) Philosophy; (4) Theology; (5) Ritual; and (6) Modernity and Contemporary Politics.

SAST 012 Spices, Gunpowder, and Pagodas: A History of Southeast Asia
This undergraduate course introduces students to the history of Southeast Asia from the earliest centuries of the Common Era to c.1950. It introduces students to Southeast Asia as religion, constituent historical societies of the region, and to the major academic literature and debates pertaining to the historical development of Southeast Asian societies and the region. Key themes explored include the origins and character of early civilizations, ideas and ideology about power and prowess, material culture, the transformation of ethnic, class, and gender relations, the impact of the arrival of world religions and early European expansion, and the nature of indigenous responses to the diffusion of new beliefs and ideas and intercultural contact.

SAST 050 Introduction to Indian Philosophy
This course will take the student through the major topics of Indian philosophy by first introducing the fundamental concepts and terms that are necessary for a deeper understanding of themes that pervade the philosophical literature of India -- arguments for and against the existence of God, for example, the ontological status of external objects, the means of valid knowledge, standards of proof, the discourse on the aims of life. The readings will emphasize classical Hindu, Buddhist, and Jain philosophical articulations (from 700 B.C.E to 16th century CE) but we will also supplement our study of these materials with contemporary or relatively recent philosophical writings in modern India.

SAST 057 Planning to be Off-shore?
Freshman Seminar. In this course we will trace the economic development of India from 1947 to the present. Independent India started out as a centrally planned economy in 1949 but in 1991 decided to reduce its public sector and allow, indeed encourage, foreign investors to come in. The Planning Commission of India still exists but has lost much of its power. Many in the U.S. complain of American jobs draining off to India, call centers in India taking care of American customer complaints, American patient histories being documented in India, etc. At the same time, the U.S. government encourages highly trained Indians to be in the U.S. Students are expected to write four one-page response papers and one final paper. Twenty percent of the final grade will be based on class participation, 20 percent on the four response papers and 60 percent on the final paper.

1 Course Unit
Sugar and Spices. Tea and Coffee. Opium and Cocaine. Hop aboard the Indian Ocean dhows, Chinese junks, Dutch schooners, and British and American clipper ships that made possible the rise of global capitalism, new colonial relationships, and the intensified forms of cultural change. How have the desires to possess and consume particular commodities shaped cultures and the course of modern history? This class introduces students to the cultural history of the modern world through an interdisciplinary analysis of connections between East and West, South and North. Following the circulation of commodities and the development of modern capitalism, the course examines the impact of global exchange on interactions and relationships between regions, nations, cultures, and peoples and the influences on cultural practices and meanings. The role of slavery and labor migrations, colonial and imperial relations, and struggles for economic and political independence are also considered. From the role of spices in the formation of European joint stock companies circa 1600 to the contemporary cocaine trade, the course's use of both original primary sources and secondary readings written by historians and anthropologists will enable particular attention to the ways that global trade has impacted social, cultural, and political formations and practices throughout the world.

1 Course Unit

SAST 106 Beginning Sitar I
This course is an introduction to the repertoire and performance practices of the North Indian sitar. Fundamentals of sitar technique, composition, and improvisation are presented and practiced in class. Class lectures and discussions, audio and video material, and reading and listening assignments on selected topics supplement practice, to provide an overview of the social and historical context and the formal structures of North Indian music in general. There are no prerequisites for the course, but some experience with instrumental or vocal music is suggested. Each student is expected to put in two hours of individual practice per week, and complete reading, audio, and written assignments. The class gives a group performance at the end of the semester. Taught by: Miner
Two terms. student may enter either term.
Also Offered As: MUSC 061
Activity: Lecture
1 Course Unit

SAST 107 Beginning Sitar II
This is the second semester of a performance course in the North Indian sitar. Students who have not taken the first semester but play any musical instrument are permitted to join. Principles of composition and improvisation will be explored in practice and supplemented by readings and listening. The class gives a group performance at the end of the semester. Taught by: Miner
One-term course offered in spring term
Also Offered As: MUSC 063
Activity: Lecture
1 Course Unit

SAST 108 Intermediate Sitar I
This is a performance course open to students who have completed both semesters of Beginning Sitar, or to others by permission from the instructor. Students will work with right and left-hand techniques, study three ragas in depth, learn the contours of several other ragas, and work with concepts of tala, composition, and improvisation. Assigned readings and listenings will complement the performed material. A group performance will be given at the end of the semester. Taught by: Miner

SAST 112 Religion and Cinema in India
This seminar examines key themes in the study of religion and Indian cinema. The aim of the seminar is to foreground discussions of performativity, visual culture, representation, and politics in the study of modern South Asian religions. Themes include mythological cinema, gender and sexuality, censorship and the state, and communalism and secularism. The films we will be deploying as case studies will be limited to those produced in Hindi, Telugu and Tamil (the three largest cinema cultures of India). No knowledge of any South Asian language is needed for this course however. Taught by: Soneji
Course not offered every year
Also Offered As: CIMS 113, RELS 118
Activity: Lecture
1 Course Unit
SAST 116 Music Cultures of North India and Pakistan
A great variety of song and instrumental genres have thrived in the Hindu and Muslim milieus of North India and Pakistan. In this course we examine a selection of urban and rural musics, such as instrumental music in Baluchistan, qawwals in Delhi, the garba of Gujarat, ballad singing of Rajasthan and the urban music of Calcutta. We will explore the sounds, poetry, historical, and social contexts of chosen genres and trace aspects of continuity and adaptation in the changing environment of contemporary South Asia. Readings are supplemented by audio-visual material and live performances.

SAST 124 Narrative Across Cultures
The purpose of this course is to present a variety of narrative genres and to discuss and illustrate the modes whereby they can be analyzed. We will be looking at shorter types of narrative: short stories, novellas, and fables, and also some extracts from longer works such as autobiographies. While some works will come from the Anglo-American tradition, a larger number will be selected from European and non-Western cultural traditions and from earlier time-periods. The course will thus offer ample opportunity for the exploration of the translation of cultural values in a comparative perspective.

SAST 139 Introduction to Islam
This course is an introduction to Islam as a religion as it exists in societies of the past as well as the present. It explores the many ways in which Muslims have interpreted and put into practice the prophetic message of Muhammad through historical and social analyses of varying theological, philosophical, legal, political, mystical and literary writings, as well as through visual art and music. The aim of the course is to develop a framework for explaining the sources and symbols through which specific experiences and understandings have been signified as Islamic, both by Muslims and by other peoples with whom they have come into contact, with particular emphasis given to issues of gender, religious violence and changes in beliefs and behaviors which have special relevance for contemporary society.

SAST 141 Islam in South Asian Culture
Islam reached South Asia in the eighth century and Muslim rulers held sway over large parts of the Subcontinent for much of the period from the late 12th century until the colonial period. However, the majority of the population never converted to Islam, and since independence in 1947 Islam—its interpretation, realization, and influence—has been a major factor underlying many difficult political issues. This has been true not only in the largest country, India, where Muslims form 12% (unevenly distributed) of the population, but in Bangladesh and Pakistan where non-Muslims are relatively insignificant minorities. This course explores the realities and the perceptions related to Muslim identities and the Islamic heritage in the Subcontinent, and sets it in global context by comparison with other parts of the world which share various aspects of the South Asian experience. The course will conclude with an assessment of the larger significance—social, economic and political, as well as cultural—of Islam in South Asia today.

1 Course Unit

SAST 142 Introduction to Buddhism
This course seeks to introduce students to the diversity of doctrines held and practices performed by Buddhists in Asia. By focusing on how specific beliefs and practices are tied to particular locations and particular times, we will be able to explore in detail the religious institutions, artistic, architectural, and musical traditions, textual production and legal and doctrinal developments of Buddhism over time and within its socio-historical context. Religion is never divorced from its place and its time. Furthermore, by geographically and historically grounding the study of these religions we will be able to examine how their individual ethic, cosmological and soteriological systems effect local history, economics, politics, and material culture. We will concentrate first on the person of the Buddha, his many biographies and how he has been followed and worshipped in a variety of ways from Lhasa, Tibet to Phrae, Thailand. From there we touch on the foundational teachings of the Buddha with an eye to how they have evolved and transformed over time. Finally, we focus on the practice of Buddhist ritual, magic and ethics in monasteries and among aly communities in Asia and even in the West. This section will confront the way Buddhists have thought of issues such as “Just-War” Women’s Rights and Abortion. While no one quarter course could provide a detailed presentation of the beliefs and practices of Buddhism, my hope is that we will be able to look closely at certain aspects of these religions by focusing on how they are practiced in places like Nara, Japan or Vietnam, Laos.

Activity: Seminar
1 Course Unit

SAST 146 Islam in the Modern World
This course key issues facing Muslims in the modern world with an emphasis on gaining an understanding of how Muslims view themselves and the world in which they live. Beginning with a discussion of the impact of colonialism, we will examine Islamic ideas and trends from the late colonial period until the present. Readings include religious, political and literary writings by important Muslim figures and focus on pressing issues in the Islamic world an beyond: the place of religion in modern national politics; the changing status of women; constructions of sexuality (including masculinity); pressing issues in bioethics; Islam, race and immigration in America; the role of violence; and the manifestations of religion in popular culture.

Activity: Lecture
1 Course Unit

SAST 147 Love, Sex & Power
This course explores the ways in which some of the biggest issues in human life are dealt with across religious traditions. Beginning with important questions of sexual identity, politics, religion and the individual in contemporary life, we will examine questions of eroticism, sex and love as they are reflected in religious literature, art and history. The concept of divine love and religious devotion will be explored in relation to acts of violence, including human sacrifice and self-sacrifice in the form of martyrdom seen in pre-modern concepts of saintly martyrdom and religious chivalry as well as the religious legitimacy of modern self-sacrifice of soldiers in war and terrorist suicides. The course focuses in particular on examples drawn from Christianity, Hinduism, Islam and Mesoamerican Religion, although discussions of contemporary issues will be conducted with a broader sweep. Important questions considered in this course include: how does the body function as the locus in which religion is enacted? What is the conflict between our agency over our bodies and socio-religious claims over the individual? Is violence an integral part of religion? What are religious understandings of the relationship between love and sex? How can a human being love gods eroticly?

SAST 166 HISTORY OF INDIAN BUSINESS
With annual growth rates between 5-10 percent for much of the last fifteen years, it may seem that the turn of the millennium has marked a fundamental shift in the state of Indian business. Yet at the same time stories continue to abound about the dark side of India’s recent “shining” where matters such as distributional justice and the fate of social strata like the subaltern poor and agrarian are concerned. Moreover, broader intra-regional forces continue to affect the state of business in a way that constantly reminds us that traditionally lacked any absolutely clear cut geographical correlate. How then should we think of the history of Indian business? In what ways is such a history different from or the same as the economic history of the South Asian subcontinent, its borderlands, and the broader Indian Ocean world it was long connected to? Can isolating something to be thought of as business in the past illuminate the structure or challenges of what we all so intuitively think of as the financial, commercial, and industrial aspects of business in the present? In this course we will consider these and other questions by tracing the interactions between the three-fold forces of entrepreneurship, labor, and kinship/sovereignty—considered as the underlying conditions of business activity’s possibility—from ancient to modern times in South Asia. By looking at topics ranging from merchants and their bills of exchange in South Asia’s antiquity to the impacts of colonial rule to the current fervor over liberalizing independent India’s retail sector, the course will thus be both a history of the past as well as a history of the present.

SAST 169 Merchants, Saints, Slaves and Sojourners: the Worlds of the Indian Ocean
Do oceans serve to divide and demarcate distinct cultures and regions? Or do they facilitate exchange, connection and cosmopolitanism? This course will explore the manner in which the Indian Ocean has played both roles throughout history, and how the nature of those divisions and connections has changed over time from the ancient to the modern world. We will reconstruct the intertwined mercantile, religious and kinship networks that spanned the Indian Ocean world, across the Middle East, East Africa, South Asia, Southeast Asia and China, illuminating the histories of Hinduism, Buddhism and Islam, while also considering the role of successive imperial political formations, from Rome to Britain. Throughout the semester we will seek to understand the Indian Ocean through the people who lived and worked in its milieu - from consuls and military commanders, to traders, brokers, sailors, prisoners and slaves. Course materials will draw on a variety of disciplines (anthropology, archaeology, material culture, religious studies) to construct the cultural, economic, and environmental history of the Indian Ocean.

SAST 170 Asian American Psychology
Using a cultural perspective, this course is intended to provide knowledge of Asian American personality, identity, and its relationship to mental well-being; analyze psycho-social research pertinent to Asian Americans; and develop critical thinking skills on Asian American issues through experiential learning/discussions.
Taught by: Kumar
Also Offered As: ASAM 170
Activity: Seminar
1 Course Unit

SAST 189 Islam in Modern South Asia
This course will examine Islam in modern South Asia, particularly in Pakistan, from multiple disciplinary perspectives. In popular discourse and media, Pakistan is usually presented as a volatile Muslim country primarily of interest as a "security problem". Most Western discussions and commentaries about Pakistan abound with stereotypical depictions of religious fundamentalism and/or the threat of the country's nuclear weapons to global security. This course will complicate and bring into question such stereotypes and alarming narratives. It will do so by examining the complexity of Pakistan's religious and political past and present. The focus of this course is on the intellectual history and traditions, as well as the lived practice of Islam in Pakistan. By drawing on a range of primary and secondary sources including film, literature, and anthropological texts, we will explore the diversity of Islam and Muslims in Pakistan. We will begin with the context of colonial India, and interrogate transformations in South Asian Islam during the 19th and early 20th century, before moving to Pakistan in the contemporary period. Among the major themes discussed in this course include modern South Asian Muslim reform movements, intra-Muslim polemics on questions of normative practice and ethics, contestations of religious authority, sectarianism, minorities, Madrases (Islamic seminaries) and Muslim traditions of education, religion and the state, Cyber Islam, and religion and the media. While focusing on modern South Asia and Pakistan, this course will also engage Islam in Afghanistan in both historical and contemporary contexts.

SAST 200 Introduction to Art in South Asia
This course is a survey of sculpture, painting and architecture in the Indian sub-continent from 2300 B.C., touching on the present. It attempts to explore the role of tradition in the broader history of art in India, but not to see India as 'traditional' or unchanging. The Indian sub-continent is the source for multi-cultural civilizations that have lasted and evolved for several thousand years. Its art is as rich and complex as that of Europe, and as diverse. This course attempts to introduce the full range of artistic production in India in relation to the multiple strands that have made the cultural fabric of the sub-continent so rich and long lasting.

SAST 208 Doing Research: Qualitative Methods and Research Design
This interdisciplinary course introduces students to qualitative research methods and frameworks in the social sciences and humanities. Students will learn how to frame an effective research question, situate it in relation to existing research, select the most appropriate methods for addressing the question, and develop an effective research plan. Each week students will be introduced to a new set of frameworks for analysis, see specific examples of their application drawn from anthropological, historical, and related scholarship and have opportunities to practice applying and evaluating the strengths and weaknesses of specific methodological tools. The goals of the semester will be for each student to develop their own research proposal for a specific project. Students will be introduced to a range of textual, archival and media collections and databases available at Penn, with particular attention to South Asia and other specific regions of interest to course participants. Students will also have the opportunity to identify sources of funding for summer and/or thesis research projects, and submit applications for these opportunities as part of the course. The course is ideal for students considering summer research, an undergraduate thesis, or an application to the Fulbright or other research program. It may be taken by itself as a freestanding course, or may be sequenced with SAST 209, Writing Research, the following fall semester.

SAST 247 Gender and Sexuality in Hinduism
Issues related to gender and sexuality occupy a complex, often contradictory place in Hinduism. Sexual desire, sexual activity, and the body are simultaneously celebrated, manipulated, controlled, and restricted. This fundamental ambiguity is at the core of this course, which concerns itself with religious perspectives on the body, gender and sexual activity in Hinduism. Topics include: dharma, morality, and sexual practice; menstruation; pregnancy and childbirth; Bhakti and Tantra; same-sex relations; masculinities; hijras and the notion of the "third sex"; eroticism in the literary, visual, and performing arts; colonialism; and somatic nationalism.

SAST 249 Re-enchanting Modernity: A Guide to Sufism in South Asia
This undergraduate level course introduces students to Sufism in modern South Asia, with a particular focus on how Muslim 'mystics' and their 'mystical' methods interacted with modernity, colonialism, technological developments and globalization. This course is divided into three parts. In the first part of this course, students are provided with an overview of the theological and historical background of the dominant expression of Islam that came to be identified as 'Sufism' or 'Islamic mysticism', the historical development of Sufi institutions and spaces in South Asia, and the historical emergence of South Asia as a prominent global center of Sufism. The second and main part of this course introduces students to a range of anthropological and historical works that are revelatory about how Sufi in modern South Asia were and remain intimately connected to modern political and technological developments. Providing students with an overview of Sufi re-enchantments of modernity from the 19th to 21st century, this section of the course focuses upon Sufi movements and masters who perpetuated or defended customary Islam through sophisticated appropriations of technologies and print networks, and negotiations with non-Muslim rulers and societies. Moreover, students will be introduced to anthropological and historical scholarship on religious worlds in modern South Asia that were and remain steeped in 'customary Islam' and Sufi performances and interpretations of Islam. These sources reveal how 'mystical' methods of performing Islam through ecstasy and spiritual restoration, and interpretations of dreams and visions, have regularly interacted with contemporaneous technologies. The third part of this course introduces students to the globalization of South Asian Sufism in North America, Europe and Southeast Asia. Herein, students will be encouraged to engage with anthropological and literary works pertaining to itinerant South Asian Sufi masters and their devotional cults, and introduced to active South Asian Sufi centers in Philadelphia.

Activity: Seminar
1 Course Unit

SAST 250 History of Hinduism
This course will explore the history of the religion(s) designated by the term 'Hinduism' from their earliest articulations down to the rise of modern reforms in the nineteenth century. The study of Hinduism is perhaps unique among the scholarly traditions on world religions in that it has to date had no serious connected account of its historical development, as scholars have preferred to take structural, sociological, phenomenological, and doctrinal approaches to the religion. The course, after a brief review of scholarly approaches to Hinduism and their interpretive legacies, will seek to develop a historical sense of the religion through attention to shifts in liturgy, ritual, theology, doctrine, sacral kingship, and soteriology. The course will include the reading of primary sources relevant to understanding these changes as well as highlight both modern and premodern traditions of their interpretation. It will also consider and assess some of the key interpretive ideas in the study of Hinduism, including, Sanskrilization, Great and Little Traditions, cult formation, regional and popular religious movements, and canon formation. There will also be sustained consideration of the question of religion and socio-political power as well as relations between Hinduism and other religions like Buddhism and Islam.

Activity: Lecture
1 Course Unit

SAST 251 Muslim Sainthood Practices
This course aims at introducing various classical, popular and modern Muslim saints in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will learn about the major concepts initiated and circulated by these saints and their distinctive ways of dealing with spiritual aspects. While focusing on their sainthood practices, we also study the nature of the dialogue which addresses the questions such as pluralism, localism, and a new paradigm of spirituality that continually interacts with diverse modes of everyday life in South Asia. In order to understand their impact on visual and media cultures, we also watch two documentaries and compare these visual sources with sainthood literature and practices.

1 Course Unit

SAST 252 Music of South and Southeast Asia
What role does music play in articulating religious identities and spaces? What is the importance of ritual musics as they persist and change in the modern world? How does music reflect and articulate religious ways of thinking and acting? In this course, we explore these and other questions about the interrelations between music, religion, and ritual in South and Southeast Asia. Focusing on India, Sri Lanka, Malaysia, and Indonesia, the course emphasizes musics from Hindu, Buddhist, Muslim and Christian traditions; nevertheless, it draws widely to touch upon sacred musics in Pakistan, Nepal, Burma, Thailand, Vietnam, and among some indigenous peoples in the region. Throughout, we explore ontologies of sound; sonic occurrences in religious structures, public processions, and pilgrimage sites; the construction of religion and ritual as ideas forged through colonial encounter and modern scholarship on religion; the politics of sacred sounds in today's public spaces and contemporary media, such as television and online; and the surprising fluidity between popular and sacred musical genres.
Taught by: Sykes
Also Offered As: ANTH 242, MUSC 252
Activity: Lecture
1 Course Unit
SAST 262 The Making of Medieval India
This course will provide an in-depth understanding of South Asia in what is often called its 'medieval' period—from the rise of the great temple kingdoms until the end of the Delhi Sultanate in the sixteenth century (c. 500 CE - c. 1500 CE). This millennium is arguably one of the most transformative in South Asia’s history, a period when many of its most distinctive social and cultural features evolved. The course will provide both an overview of the period as well as an introduction to major interpretations and types of sources (textual, visual, and archaeological). The focus throughout the course will be on the heterogeneous development of states, societies and cultures with special attention to long-term processes of transformation. One set of themes explored will be largely social and economic, focusing on the development of agrarian and peasant societies, aristocracies and intellectuals, as well as the role of mercantile, pastoralist, nomadic and forest-living groups. Another set of themes will explore cultural transformation, including the development, transformation and interaction of religious practices, the emergence of cosmopolitan and regional literary cultures, and the rise of distinctive urban, courtly, and rural world views. Special themes of discussion may include violence and manners, material cultures, religious conflict, devotional religion and gender relations.

SAST 269 Migration and the Middle East
This reading and discussion-intensive seminar examines the phenomenon of migration into, out of, within, and across the Middle East and North Africa. We will focus on the period from the late nineteenth century to the present, and will emphasize the cultural (rather than economic) consequences of migration. Along the way we will trace connections between the Middle East and other regions— notably the Americas, sub-Saharan Africa, South Asia, the Caucasus, and Western Europe. Readings are interdisciplinary and include works of history, anthropology, sociology, medical research, literature, political science, geography, and human rights advocacy. As students develop final projects on topics of their choice, we will spend time throughout the semester discussing tactics for research and writing.

One-term course offered either term
Also Offered As: GSWS 282, INTR 290, SAST 582
Activity: Seminar
1 Course Unit

SAST 290 South Asians in the United States
This course investigates the everyday practices and customs of South Asians in America. Every immigrant group has its own history, customs, beliefs and values, making each unique while simultaneously a part of the "melting pot" or salad bowl" of American society. Yet how do people define themselves and their ethnicities living in a diasporic context? By taking into account the burgeoning South Asian American population as our model, this course will explore the basic themes surrounding the lives that immigrants are living in America, and more specifically the identity which the second generation, born and/or raised in American, is developing. South Asians in the U.S. will be divided thematically covering the topics of ethnicity, marriage, gender, religion, and pop culture. Reading and assignments will discuss a variety of issues and viewpoints that are a part of the fabric of South Asia, but will focus on the interpretation of such expressive culture in the United States.

Taught by: Khan
Course usually offered in fall term
Also Offered As: ASAM 160, SAST 590
Activity: Lecture
1 Course Unit

SAST 293 Caste & Class in South Asia
This course will explore the reality of caste and class in South Asian society, and the theories, classical and modern, that attempt to explain it. We shall survey a wide sweep of sources, from the earliest evidence for a division into caste-classes in the Rig-Veda to reports in modern media of caste-related social problems; from orthodox Hindu normative texts justifying and upholding a rigid hierarchical division of society to voices, in Sanskrit and in vernaculars, criticizing the caste system. Our goal is to gain a nuanced and many-sided insight into a deeply pervasive phenomenon that has shaped South Asian society, culture, and religion in general (Muslim, Sikh, and Christian castes) from ancient time up to the twentieth century.

Taught by: Sreenivasan
One-term course offered either term
Also Offered As: SAST 593
Activity: Seminar
1 Course Unit

SAST 300 Directed Study
This course is required for all senior honors majors, and open to senior majors. Honors majors must, in addition, prepare a research paper.
One-term course offered either term
Activity: Independent Study
1 Course Unit

SAST 312 20th Century South Asian Art
Topic varies. Spring 2015: Using resources of the Philadelphia Museum of Art's exceptional collection, this workshop will explore India's remarkable traditions of sculpture produced for singular narrative and iconic ends.

Taught by: Meister
Also Offered As: ARTH 311, ARTH 312
Activity: Seminar
1 Course Unit
SAST 324 Sanskrit Literature and Poetry
This course will focus solely on the specific genres, themes, and aesthetics of Sanskrit literature (the hymn, the epic, the lyric, prose, drama, story literature, the sutra, etc.) and a study of the history and specific topics of Sanskrit poetics and dramaturgy. All readings will be in translation.
Taught by: Patel
Also Offered As: COML 324, COML 624, SAST 624
Activity: Seminar
1 Course Unit

SAST 334 A Survey of Sanskrit, Pakrit, and Classical Tamil Literature in Translation
This course will cover most of the genres of literature in South Asia's classical languages through close readings of selections of primary texts in English translation. Special focus will be given to epics, drama, lyric poetry, satirical works, and religious literature.
Taught by: Patel
Also Offered As: COML 334, SAST 534
Activity: Seminar
1 Course Unit

SAST 400 Beginning Hindi-Urdu Online (Startalk)
This introductory, proficiency-based course covers the core content of first-year Hindi-Urdu. It is designed for students with little or no prior exposure to Hindi or Urdu. The course covers all four language skills (speaking, listening, reading, and writing), but there is a special focus on developing speaking and listening skills. Students will also develop literacy skills in one script of their choice (Hindi or Urdu script). All written materials will be provided in both scripts. All classes are interactive and students acquire the language by using it in realistic contexts. Culture is introduced through various authentic materials including Bollywood songs. This program has a special application process. Please visit our website (https://www.southasiacenter.upenn.edu/startalk) for more information on the program and how to apply.
Taught by: Pien, J.
Two terms. student must enter first term.
Activity: Lecture
1 Course Unit
Notes: This is a summer online course known also as Startalk.

SAST 403 Beginning Bengali
This course introduces students to colloquial Bengali. It gives equal emphasis to each of the four skills, reading, writing, listening, and speaking. Language will be studied in the context of socio-cultural aspects of West Bengal and Bangladesh. Besides lessons from the text, a major portion of the syllabus will be based on topics drawn from films, cultural events, festivals, food, and religion.
Taught by: Banerjee
Two terms. student must enter first term.
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center. This is a two-semester course.

SAST 405 Beginning Pashtu I
For BA Students: Language Course
Course usually offered in spring term
Also Offered As: PERS 112, PERS 511
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 406 Beginning Pashtu Part II
For BA Students: Language Course
Course usually offered in spring term
Also Offered As: PERS 112, PERS 512
Prerequisites: Beginning Pashtu Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center.

SAST 407 Beginning Kannada Part I
This is a systematic introduction to the Kannada language and culture for beginners. The course aims at developing listening and comprehension and a real life interactive speaking ability in a variety of everyday topics. The Kannada script is introduced from the beginning and the language is presented in its socio-cultural context for achieving a meaningful and operational control of the language. Students acquire basic rules for structural and socio-cultural appropriateness. Students learn vocabulary related to a variety of topics during the semester. Class activities include watching videos, role-playing, language games and group work. Evaluation is based on class participation, performance in quizzes and tests and completed assignments.
For BA Students: Language Course
Taught by: Swaminathan
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 408 Beginning Kannada Part II
This is a systematic introduction to the Kannada language and culture for beginners. The course aims at developing listening and comprehension and a real life interactive speaking ability in a variety of everyday topics. The Kannada script is introduced from the beginning and the language is presented in its socio-cultural context for achieving a meaningful and operational control of the language. Students acquire basic rules for structural and socio-cultural appropriateness. Students learn vocabulary related to a variety of topics during the semester. Class activities include watching videos, role-playing, language games and group work. Evaluation is based on class participation, performance in quizzes and tests and completed assignments.
For BA Students: Language Course
Taught by: Swaminathan
Two terms. student must enter first term.
Prerequisites: Beginning Kannada Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center.

SAST 410 Beginning Marathi Part I
The first year course in Marathi begins with learning the Devnagari script which is common for other important languages like Hindi and Nepali. With proper emphasis on grammar, vocabulary, and phonetics, the syllabus will see the student becoming able to speak conversational Marathi, read Marathi data from the Internet, and compose simple short essays on selected topics.
For BA Students: Language Course
Taught by: Ranade
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 411 Beginning Marathi Part II
The first year course in Marathi begins with learning the Devnagari script which is common for other important languages like Hindi and Nepali. With proper emphasis on grammar, vocabulary, and phonetics, the syllabus will see the student becoming able to speak conversational Marathi, read Marathi data from the Internet, and compose simple short essays on selected topics.
For BA Students: Language Course
Taught by: Ranade
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center
SAST 411 Beginning Marathi Part II
For BA Students: Language Course
Taught by: Ranade
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 412 Intermediate Marathi Part I
For BA Students: Language Course
Taught by: Ranade
Course usually offered in fall term
Prerequisite: Beginning Marathi Part II or equivalent ascertained through placement test or permission of instructor
Activity: Seminar
1 Course Unit

SAST 413 Intermediate Marathi Part II
For BA Students: Last Language Course
Taught by: Renade
Course usually offered in spring term
Prerequisites: Intermediate Marathi Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

SAST 421 Intermediate Urdu
In Intermediate Urdu, the curriculum focuses on the development of reading, listening and speaking skills. Although there are short assignments for writing in Urdu, the emphasis on developing writing as a skill is not part of the course objectives. Authentic texts in the three skills include conversations, short stories, current events, articles, films and plays. There is a continuous emphasis on vocabulary development and students are expected to add about five hundred new words to their active vocabulary per semester. The rules of grammar for structural accuracy and social-cultural propriety are parts of the regular curriculum. Class activities include students' short presentations, role-plays, singing and conversations. There are weekly assignments and quizzes, a mid-term and a final examination. The final evaluation will rest on class participation, performance in quizzes and tests, and completed assignments. This is a two-semester course.
Taught by: Menai
Two terms. student must enter first term.
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center.

SAST 425 Intermediate Pashtu Part I
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: PERS 113, PERS 513
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 426 Intermediate Pashtu Part II
Two terms. student must enter first term.
Also Offered As: PERS 114, PERS 514
Prerequisites: Intermediate Pashtu Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center.

SAST 427 Intermediate Kannada Part II
For BA Students: Language Course
Taught by: Sundaram
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 428 Intermediate Kannada Part II
For BA Students: Last Language Course
Taught by: Sundaram
Course usually offered in spring term
Prerequisites: Intermediate Kannada Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center.

SAST 445 Advanced Pashtu Prose Literature
One-term course offered either term
Also Offered As: PERS 116, PERS 516
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center.

SAST 447 Advanced Kannada: Selected Topics
Taught by: Rajagopalan
One-term course offered either term
Activity: Lecture

Also Offered As: COML 507
Activity: Seminar
1 Course Unit

SAST 494 Early Marathi
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 500 Introduction to Art in South Asia
This course is a survey of sculpture, painting and architecture in the Indian sub-continent from 2300 B.C., touching on the present. It attempts to explore the role of tradition in the broader history of art in India, but not to see India as 'traditional' or unchanging. The Indian sub-continent is the source for multi-cultural civilizations that have lasted and evolved for several thousand years. Its art is as rich and complex as that of Europe, as diverse. This course attempts to introduce the full range of artistic production in India in relation to the multiple strands that have made the cultural fabric of the sub-continent so rich and long lasting.
Taught by: Meister/Staff
Course not offered every year
Also Offered As: ARTH 104, SAST 200
Activity: Lecture
1 Course Unit
SAST 502 The Mullah & The Englishman - Islam in Modern South Asia
This course introduces students to Islam in modern South Asia, with a particular focus on the development of 'new' Muslim religious idioms, orientations, pedagogies and movements in 19th and 20th century South Asia. This course is divided into three parts. In the first part of this course, students are provided with an overview of: Muslim institutions and spaces in pre-colonial South Asia, the historical emergence of South Asia as a prominent global center of Islam, and the development of Urdu as an Islamic idiom. The second and main part of this course introduces students to academic literature concerning sophisticated encounters between the Muslim elite in north India and modern political and technological developments. The intimate interactions of the 'Mullah' and the 'Englishman' from the 19th to 20th century will thus be revealed to students. This part focuses upon, on the one hand, the role of Islam and pious Muslims in the colonial army, and on the other hand, Muslim initiatives to educate an Islamic 'modernism', 'traditionalism', 'fundamentalism' and 'Sufism', and appropriate print technologies for the creation of public spheres. Students will be introduced to historical scholarship revelatory of how these Muslim pedagogies and print initiatives were based upon sophisticated transcultural networks and exchange. In the third part of this course, students will be encouraged to engage with contemporary literature on South Asian Muslim political philosophy and nationalism, and the transcultural intellectual exchanges that produced key Muslim political ideologies.
Taught by: Sevea
One-term course offered either term
Also Offered As: RELS 149, RELS 549
Activity: Seminar
1 Course Unit

SAST 503 Historical Transitions In Early India
This course will focus on major historical transitions in the South Asian subcontinent until approximately AD 1200. It will focus on particularly on political, social and liturgical philosophical change. It will also introduce students to the major narratives and interpretations of the ancient and early medieval periods as they bear on these questions and will also familiarize students with the sources upon which this history has been based. It will review debates, critical perspectives and recent trends in this historiography with a view toward developing a sensitivity to the theoretical problems that attend the study of pre-modern India. Its persistent themes will be historical continuity and disjuncture in the history of religious practices and ideas, the emergence of political forms and the nature of the 'state' in precolonial India, transformations of society and economy, and the relationship between discursive production and relations of power. It will be of interest to students of history, literature, religion and archaeology.
Taught by: Ali
One-term course offered either term
Activity: Seminar
1 Course Unit

SAST 505 Topics in Indian Art
Aspects of sculpture, painting, iconography, or architecture in the Indian sub-continent. Topic varies. Fall 2016: Important as texts have been to South Asia's history, perceptions of the physical world dominate experience within South Asian cultures. Seeing and being seen, vocalizing and hearing, contribute to the construction of meaning. This pro-seminar will approach South Asia's perceptual world as expressed and tested by art, and methods to frame art as a source of knowledge.
Taught by: Meister
One-term course offered either term
Also Offered As: ARTH 511
Activity: Seminar
1 Course Unit

SAST 507 Introduction to Modern South Asian Literature
Taught by: Sreenivasan, R.
Also Offered As: SAST 007
Prerequisites: This course provides an introduction to the literatures of South Asia - chiefly India, Pakistan, and Bangladesh- between 1500 and the present. We will read translated excerpts from literary texts in several languages - Braj, Persian, Hindi, Urdu, Bengali, Marathi, Malayalam, and Tamil - and explore the relationship between these literary texts and their historical contexts. No prior knowledge of South Asia is required.
Activity: Seminar
1 Course Unit

SAST 508 Doing Research: Qualitative Methods and Research Design
This interdisciplinary course introduces students to qualitative research methods and frameworks in the social sciences and humanities. Students will learn how to frame an effective research question, situate it in relation to existing research, select the most appropriate methods for addressing the question, and develop an effective research plan. Each week students will be introduced to a new set of frameworks for analysis, see specific examples of their application drawn from anthropological, historical, and related scholarship and have opportunities to practice applying and evaluating the strengths and weaknesses of specific methodological tools. The goals of the semester will be for each student to develop their own research proposal for a specific project.
Students will be introduced to a range of textual, archival and and media collections and databases available at Penn, with particular attention to South Asia and other specific regions of interest to course participants. Students will also have the opportunity to identify sources of funding for summer and/or thesis research projects, and submit applications for these opportunities as part of the course. The course is ideal for students considering summer research, an undergraduate thesis, or an application to the Fulbright or other research program. It may be taken by itself as a freestanding course, or may be sequenced with SAST 209, Writing Research, the following fall semester.
Taught by: Mitchell
Also Offered As: SAST 208
Activity: Seminar
1 Course Unit
SAST 524 Growing up Funny: Nation and Identity in South Asian Writing
It is a curious fact that some of the most compelling fiction about and by South Asians features the coming of age of a child protagonist. This body of writing appropriates and reshapes the classic European Bildungsroman, but it also uses narrative traditions from South Asia in order to tell the story of the postcolonial nation, and to chart the contours of contemporary South Asian identity and sexuality. In this course, we will read novels, short stories and plays—some well known and others less so, some now considered 'classics' and others very recent, produced from within the Indian subcontinent as well as from the West. All of these speak of the excitement and trauma of growing up 'Indian'. Through them, we will discuss key features of the political and social upheavals of the Indian subcontinent, as well as the dynamics of the family, gender relations, sexual identities and cultural belonging. The course will include writings by Rudyard Kipling, Salman Rushdie, Bapsi Sidhwa, Amitav Ghosh, Mahasweta Devi, Hanif Kureishi, Anjana Appachana, Arundhati Roy, Meera Sanyal, Sara Suleri, Shyam Selvadurai, and Mahesh Dattani.

Activity: Lecture
1 Course Unit

SAST 529 An Introduction to Religion in South Asia
This undergraduate-level course introduces students to the multi-religious complexion of South Asia as a region, with a particular focus upon key religious traditions and the resemblances and interactions between them. This course is divided into two parts. In the first part of this course, students are introduced to key religious traditions of South Asia, Hinduism, Buddhism, Jainism, Islam and Sikhism. Students will be encouraged to survey academic works pertaining to, on the one hand, the literature, doctrines, cosmologies, rituals and histories of, and prominent places of worship in, the Hindu, Buddhist, Jain, Muslim and Sikh religious traditions. On the other hand, the development of South Asia into a distinctive space and spiritual ‘homeland’ for multi-religious communities. Whilst the first part of the course focuses upon religious traditions autonomously, the subsequent section of the course is thematic and encourages students to make comparisons, and discover sophisticated relationships and dynamic interactions between religious traditions in South Asia. Students are introduced to scholarly writings that are revelatory of the materiality of religious traditions in pre-modern and modern South Asia; everyday forms of piety in South Asia; gender positions in religious traditions; encounters of religious traditions with European colonialism; and, perceptions of the ‘other’ in pre-modern religious traditions. Herein, students will find multiple sites of resemblances or differences, and cultural negotiations, engagements and contests, within religious traditions in South Asia.
Taught by: Sevea
Also Offered As: RELS 119, RELS 519
Activity: Lecture
1 Course Unit

SAST 534 A Survey of Sanskrit, Pakrit, and Classical Tamil Literature in Translation
This course will cover most of the genres of literature in South Asia’s classical languages through close readings of selections of primary texts in English translation. Special focus will be given to epics, drama, lyric poetry, satirical works, and religious literature.
Taught by: Patel
Also Offered As: SAST 334

1 Course Unit

SAST 540 Religions of India in Practice
This course uses ethnography and documentary film to examine religious practice in India, looking at daily rituals and habits associated with religion and special moments in collective religious life, such as festivals, pilgrimage and “rites of passage.” We’ll also investigate ways that religious life intersects with secular life, the state, the nation, and media.
Taught by: Novetzke
One-term course offered either term
Also Offered As: SAST 241
Activity: Lecture
1 Course Unit

SAST 541 Religion and the Visual Image: Seeing is Believing
Seeing is Believing engages in a historical, theoretical, and cross-cultural analysis of the place of visuality in religion and of religion in visual culture. We will examine images, buildings, places, objects, performances and events. The geographical, cultural and historical scope of the material is broad, including subjects from Europe, the Islamic World, non-Muslim South Asia, the US and Latin America from the medieval period until the present. Theoretical works will be read in conjunction with representative examples to invite intellectual engagement in a socially and historically grounded way. Important issues to be covered include the relationship of visual to material culture; visual theories versus theories of vision; locating religion in human sensory experience; perception at individual and collective levels; authentics, fakes and simulacra; iconoclasm and image veneration; aesthetics, use and utility; and things.
Taught by: Elias
Course not offered every year
Also Offered As: NELC 589, RELS 541
Activity: Seminar
1 Course Unit

SAST 548 Hindu-Muslim Relations in South Asia
This seminar examines engagements between Hindu and Muslim traditions in South Asia from medieval to modern times. We explore historical case studies of Hindu-Muslim relations and the formation of religious identities, together with the ways in which these identities have been contested and constructed in modern discourses on religion and politics. Through the course of the seminar, we interrogate the analytical categories of conquest, iconoclasm, conversion, and syncretism, around which several current debates on Hindu-Muslim relations have been framed. Topics discussed include: the interactions of Sufi, Bhakti and Yogic traditions, Mughal religious cultures; the impact of colonialism on religious identities and sectarian relations; the partition of India and creation of Pakistan, and nationalist historiographies.
Also Offered As: RELS 250, SAST 248
Activity: Lecture
1 Course Unit
SAST 550 History of Hinduism
This course will explore the history of the religion(s) designated by the term 'Hinduism' from their earliest articulations down to the rise of modern reforms in the nineteenth century. The study of Hinduism is perhaps unique among the scholarly traditions on world religions in that it has to date had no serious connected account of its historical development, as scholars have preferred to take structural, sociological, phenomenological, and doctrinal approaches to the religion. The course, after a brief review of scholarly approaches to Hinduism and their interpretive legacies, will seek to develop a historical sense of the religion through attention to shifts in liturgy, ritual, theology, doctrine, sacral kingship, and soteriology. The course will include the reading of primary sources relevant to understanding these changes as well as highlight both modern and premodern traditions of their interpretation. It will also consider and assess some of the key interpretive ideas in the study of Hinduism, including, Sanskritization, Great and Little Traditions, cult formation, regional and popular religious movements, and canon formation. There will also be sustained consideration of the question of religion and socio-political power as well as relations between Hinduism and other religions like Buddhism and Islam.
Taught by: Ali
Also Offered As: RELS 551
Activity: Seminar
1 Course Unit

SAST 551 Muslim Sainthood Practices
This course aims at introducing various classical, popular and modern Muslim saints in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will learn about the major concepts initiated and circulated by these saints and their distinctive ways of dealing with spiritual aspects. While focusing on the sainthood practices, we also study the nature of the dialogue which addresses the questions such as pluralism, localism, and a new paradigm of spirituality that continually interacts with diverse modes of everyday life in South Asia. In order to understand their impact on visual and media cultures, we also watch two documentaries and compare these visual sources with sainthood literature and practices.
Taught by: Mohammad, M.A.
Also Offered As: RELS 242, SAST 251
Activity: Seminar
1 Course Unit

SAST 560 Modern History of Pakistan
This course is designed as an introduction to the contemporary history of Afghanistan and Pakistan, with an emphasis on the intertwined history of both countries; their other regional neighbors; and global politics. The course focuses on global trends such as empire, nationalism, the Cold War, superpower competition, and transnational Islamism. At the same time, participants will explore how local people viewed their lives amidst these trends, and how local dynamics on this northwestern fringe of the Subcontinent changed the face of global politics. The readings supplement political and economic history with primary sources drawn from popular poetry, oral narrative, and memoir. Finally, we'll be following current events in the region, and placing them in their sociohistorical context. Therefore, there are two main goals for this course: (1) to introduce the specific history of Afghanistan and Pakistan up to present, and (2) to introduce typologies of social institutions and events, assisting class participants to develop their own frameworks for interpreting current events in the region after the end of the course.

Also Offered As: HIST 384
Activity: Seminar
1 Course Unit

SAST 562 The Making of Medieval India
This course will provide an in-depth understanding of South Asia in what is often called its 'medieval' period—from the rise of the great temple kingdoms until the end of the Delhi Sultanate in the sixteenth century (c. 500 CE - c. 1500 CE). This millennium is arguably one of the most transformative in South Asia's history, a period when many of its most distinctive social and cultural features evolved. The course will provide both an overview of the period as well as an introduction to major interpretations and types of sources (textual, visual, and archaeological). The focus throughout the course will be on the heterogeneous development of states, societies and cultures with special attention to long-term processes of transformation. One set of themes explored will be largely social and economic, focusing on the development of agrarian and peasant societies, aristocracies and intellectuals, as well as the role of mercantile, pastoralist, nomadic and forest-living groups. Another set of themes will explore cultural transformation, including the development, transformation and interaction of religious practices, the emergence of cosmopolitan and regional literary cultures, and the rise of distinctive urban, courtly, and rural worldviews. Special themes of discussion may include violence and manners, material cultures, religious conflict, devotional religion and gender relations.

**SAST 604 Neoliberalism and the City**
Over fifty percent of the world's population now lives in cities. Neoliberalism—the ideology and accompanying policies and practices that champion the shifting of political decision making from the public sector to the private sector—has been widely recognized as having shown dramatic growth worldwide since the 1970s. It has also been widely regarded as a product of globalization. This course traces the history of neo-liberalism in global context with particular attention to neoliberalism's relationship to cities, and exam the role that urban growth has played in spurring neoliberal policies and practices. It asks how policy makers, voters, and private interest worldwide have responded to the growth of urban poverty and slums, challenges withing urban public education, unequal resource distribution, environmental pressures experienced within urban sanitation and waste disposal systems, and increased demands for municipal services like water, electricity, and transport infrastructures, and examined the rise of public-private partnerships, gated communities, initiatives to privatized education and municipal services, and efforts to relocate slum-dwellers and beautify cities as explicit strategies for attracting "global capital". The course also asks how the recent rise of neoliberal policies and practices differs from earlier market-driven and private sector led forms of political governance. The British and Dutch East India Companies are two famous examples of joint stock companies that assumed administrative and political roles over their colonies. How did the rise of these colonial relationships differ from current neoliberal shifts. Readings will draw heavily from ethnographic and urban studies, scholarship on South Asia, as well as Latin America, South Africa, the Middle East, Europe, and North America, exploring what each of these specific contexts has to teach us more generally about the relationship between urbanization, global capitalism, public and private sectors, and political processes and decision making.

**SAST 610 Topics in South Asian Cinema**
In this course we will focus on post colonial global modernity as they are imaged through cinema. Foregrounding the concept of affect, we will consider topics such as: the role of mass affect and mass culture; nationalism, community, sentimentalty and nostalgia; film technology and film industry development as productive of a history of the senses; affect and the (gendered and racialized) subject and body, film genres and development of post colonial modernism; style; cinephilia and production of publics; representat ions of popular religiosity; and the relationship between feeling and ideology. We will examine films that suggest particular affective states. Our study will be interdisciplinary and readings will draw on fields of cinema, area studies as well as anthropology, philosophy and history.

SAST 617 Readings in Modern Indian History

This course will introduce students to the major themes and debates of modern Indian historiography. Though the course will not provide a survey outline of events, it will be organized around themes that have a broad chronological sequence. It will touch on key topical themes like the transition to colonialism, the development of the colonial economy, the evolution and significance of colonial knowledge systems, the impact and shape of religious and social reform, the rise of nationalism and communalism, and peasant, labour and subaltern history. The goal of the course will be to provide students with an understanding of the significance of debates around key themes in modern Indian history and a familiarity with the different 'schools' or 'traditions' of historical interpretation, including Nationalist, Marxist, the so-called 'Chicago', and 'Cambridge' schools, as well as the Subaltern collective and post-Subaltern historiography.

SAST 623 Literary History and Aesthetics in South Asia

This seminar surveys the multiple components of literary culture in South Asia. Students will engage critically with selected studies of literary history and aesthetics from the past two millennia. In order to introduce students to specific literary cultures (classical, regional, contemporary) and to the scholarly practices that situate literature in broader contexts of culture and society, the course will focus both on the literary theories - especially from the nineteenth and twentieth centuries - that position South Asia’s literary cultures within broader disciplinary frameworks that use literary documents to inform social, historical and cultural research projects. The aim is to open up contexts whereby students can develop their own research projects using literary sources.

SAST 627 South Asia Literature as Comparative Literature

This course takes up the question of reading South Asian Literature both as a collection of diverse literary cultures, as well as the basis for a methodology of reading that takes language, region, and history into account. It takes as a starting point recent work that foregrounds the importance of South Asian language literatures, and their complex interactions, to an understanding of South Asian literary history, as well as critiques of the concept of world literature that question its underlying assumptions and frequent reliance on cosmopolitan languages such as English. In what ways can we describe the many complex interactions between literary cultures in South Asia, rooted in specific historical contexts, reading practices, and cultural expectations, while maintaining attention to language and literary form? How, in turn, can we begin to think of these literatures in interaction with larger conversations in the world? With these considerations in mind, we will examine works of criticism dealing with both modern and pre-modern literatures, primarily but not exclusively focused on South Asia. Topics will include the concept of the cosmopolis in literary and cultural history, the role of translation, the transformations of literature under colonialism, and twentieth century literary movements such as realism and Dalit literature.

Readings may include works by Erich Auerbach, Frederic Jameson, Aijaz Ahmad, Gayatri Spivak, Aamir Mufti, Sheldon Pollack, David Shulman, Yigal Bronner, Shamshur Rahman Faruqi, Francesca Orsini, Subramanian Shankar, Sharan Kumar Kimbale, and Torlai Jatin Gajarawala. We will also examine selected works, in English and in translation, as case studies for discussion. This course is intended both for students who intend to specialize in the study of South Asia, as well as for those who focus on questions of comparative literature more broadly.

SAST 632 Hinduism and Colonial Modernity

This seminar deals with the question of modernity in South Asia, with a specific focus on the construction, dissemination, and politicization of Hinduism in nineteenth and twentieth century India. It focuses on three central heuristic lenses—namely those of European imperialism, Orientalism, and nationalism—to study modernity and its discontents. What was at stake in the encounter between colonial modernity and India’s religions in nineteenth and early twentieth centuries? How did colonial and native discourses on “reform” and “revival” shape Indian religions as we understand them today? How is modern “Hinduism” inextricably hinged to early forms of cultural transnationalism, Orientalism, and incipient forms of nationalism? This seminar approaches questions such as these and others, with an eye to understanding how nineteenth and early twentieth century discourses continue to shape contemporary understandings of Hinduism in deep and highly politicized ways.

SAST 633 THE PERSIAN INTELLECTUAL TRADITION
What makes Persian culture distinctive within broader Islamic intellectual history, and what constitutes the historical and geographical boundary of the Persianate intellectual and cultural zone? These questions lie at the center of inquiry in this seminar in which participants will read and discuss a broad range of works from the 11th to the 20th centuries. Readings will include works on philosophy and language, Sufi epic poems, religious and cultural geographies, accounts of natural and manufactured wonders, urban and political histories, as well as other kinds of texts. All readings will be in English for the regular meeting of the seminar; students with a reading knowledge of Persian and an interest in participating in an additional meeting to read the assignments in their original language should register for the higher of the two numbers listed for this course.

SAST 640 Religious Bodies and Sex in South Asia
This graduate-level course introduces students to the writings of key religious scholars in modern South Asia who associated the regeneration of Hinduism, Islam, and Sikhism with the cultivation of bodies and sexual practices. Particular attention will be paid towards religious texts produced in modern India, Pakistan and Bangladesh pertaining to sexual bodies, exercises and health; celibacy; body-building; the transmission of sexual knowledge; and the political roles of the 'Hindu', 'Muslim' and 'Sikh' body. In this course, students will be encouraged to engage a range of sources including religio-sexual manuals, autobiographies, novels, speeches, pamphlets, official records, recipes and films. Moreover, students will be introduced to the academic literature on South Asian religious scholars and 'sex gurus' in South and Southeast Asia; religious sexuality in South Asia, Southeast Asia, the Middle East and Europe; and, the transcultural literary networks that led to the production of religio-sexual texts in modern South Asia.

SAST 704 State, Society and Culture in South Asia
This interdisciplinary course introduces graduate students to both classic and more recent theoretical frameworks used in understanding and analyzing society, culture, and the state, with particular reference to South Asia. Topics include bureaucracy and the state; economic liberalization and political transformations; land, law, and eminent domain; capital, banking, and credit; kinship, community, and approaches to the concept of identity (including caste, nation, language, and religion); and the environment, politics, and urban and rural ecologies. Particular emphasis will be placed on the ways in which recent ethnographic and historical monographs have positioned their interventions in relation to broader debates and scholarship, both within South Asia scholarship and more generally. Particular attention will be devoted to the different material forms through which publics have been imagined, addressed, and brought into being within specific historical moments and contexts (including each student's own areas of research interest). Although the course will pay particular attention to the unpacking and application of these concepts, debates, and issues as they pertain to South Asia, readings will be drawn from a range of authors and would be of use to students studying similar issues in other parts of the world.

SAST 760 Seminar in Modern South Asian History
Centered on major recent work and on writing by class participants, this seminar is primarily for Ph.D candidates doing research on South Asia. Each week we read the equivalent of one book and meet to discuss its contribution to South Asian historiography. Each participant will submit a major piece of writing for discussion and will assign auxiliary readings to be read with their own work for one class meeting.
One-term course offered either term
Activity: Seminar
1 Course Unit
SAST 769 Feminist Theory
Specific topic varies. Dissent is a key word in our world today–from the Arab Spring to the American Fall, we have seen expressions of political disobedience and protest around the world. It is more urgent than ever to consider what dissent might mean, what shapes it has taken historically, what connection might exist between it and literature, and what futures are possible. We will read key critical and theoretical work alongside some powerful, tender and controversial writings and films (largely but not exclusively produced in the postcolonial world), to inquire into the politics and poetics of governance and dissent. Students are invited to make connections with other historical and geographical contexts, and explore the different forms of dissent individual, collective, urban, rural, nationalist, pan-nationalist, religious, marxist, or feminist, to name but a few. We will pay special attention to different performances of dissent at a popular, mass or individual level. We will think about the social and cultural channels attention to different performances of dissent at a popular, mass or See the English Department’s website at www.english.upenn.edu for a complete description of the current offerings.

Spanish Language (SPAN)

SPAN 110 Elementary Spanish I
Spanish 110 is a first-semester elementary language course designed for students who have not previously studied Spanish or who have had very little exposure to the language. This course emphasizes the development of foundational reading, writing, listening, and speaking skills while exploring the rich cultural mosaic of the Spanish-speaking world. Students will participate in pair, small-group and whole-class activities that focus on meaningful and accurate communication skills in the target language. Students who have previously studied Spanish but have not taken the SAT II exam must take the online placement examination.
For BA Students: Language Course
Course usually offered in fall term
Prerequisite: A score below 380 on the SAT II or below 285 on the online placement examination
Activity: Seminar
1 Course Unit

SPAN 112 Elementary Spanish I and II: Accelerated
Spanish 112 is an intensive course designed for students who have already satisfied the language requirement in another language and have not previously studied Spanish. By combining the curriculum of Spanish 110 and 120, Spanish 112 seeks to develop students’ reading, writing, listening and speaking abilities while exploring the rich cultural mosaic of the Spanish-speaking world. Students will participate in pair, small-group and whole-class activities that focus on meaningful and accurate communication skills in the target language.
For BA Students: Language Course
Course usually offered in fall term
Prerequisite: Permit required from the course coordinator
Activity: Seminar
2 Course Units

SPAN 115 Spanish for the Medical Professions, Elementary I
Spanish 115 is a first-semester elementary medical Spanish language course and the first in the Spanish for the Medical Professions sequence. It is designed for students with no prior coursework in Spanish. This course teaches beginning students the fundamentals of practical Spanish with an emphasis on medical situations and basic medical terminology. In this course, particular attention will be given to developing speaking and listening skills, as well as cultural awareness. It incorporates activities, vocabulary, and readings of particular interest to healthcare practitioners, while adhering to the goals and scope of Spanish 110, the first-semester Spanish language course. Students who have previously studied Spanish but have not taken the SAT II exam must take the online placement examination.
For BA Students: Language Course
Course usually offered in fall term
Prerequisites: A score below 380 on the SAT II or below 285 on the online placement examination.
Activity: Seminar
1 Course Unit
Notes: Offered through the Penn Language Center.

SPAN 120 Elementary Spanish II
The continuation of Spanish 110, Spanish 120 is a second-semester elementary language course. See the description of Spanish 110.
For BA Students: Language Course
Course usually offered in spring term
Prerequisites: Successful completion of Spanish 110 or 115 or permission of the course coordinator.
Activity: Seminar
1 Course Unit

SPAN 121 Elementary Spanish I and II: Advanced Beginners
Spanish 121 is designed for students who have some prior experience in Spanish. This course provides a quick-paced review of material normally covered in a first-semester Spanish course and then proceeds to introduce new material so students will be prepared to take Spanish 130 during the subsequent semester. As other Spanish courses, Spanish 121 emphasizes the development of foundational reading, writing, listening, and speaking skills while exploring the rich cultural mosaic of the Spanish-speaking world. Students will participate in pair, small-group and whole-class activities that focus on meaningful and accurate communication skills in the target language.
For BA Students: Language Course
One-term course offered either term
Prerequisite: A score of 380-440 on the SAT II or 285-383 on the online placement examination
Activity: Seminar
1 Course Unit

SPAN 125 Spanish for the Medical Professions, Elementary II
The continuation of Spanish 115, Spanish 125 is a second-semester elementary medical Spanish language course. See the description of Spanish 115.
For BA Students: Language Course
Course usually offered in spring term
Prerequisites: Successful completion of Spanish 110 or 115 or a score of 380-440 on the SAT II or 285-383 on the online placement examination.
Activity: Seminar
1 Course Unit
Notes: Offered through the Penn Language Center.
SPAN 130 Intermediate Spanish I
Spanish 130 is a first-semester intermediate-level language course that emphasizes the development of the four basic skills (reading, writing, listening and speaking) within a culturally based context. Class time will focus on communicative activities that combine grammatical concepts, relevant vocabulary, and cultural themes. Students will participate in pair, small-group and whole-class activities to practice linguistics skills in meaningful contexts. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the past tense, and the development of writing skills at a paragraph level with transitions.
For BA Students: Language Course
One-term course offered either term
Prerequisites: Successful completion of Spanish 112, 120, 121 or 125 or a score of 450-540 on the SAT II or 384-453 on the online placement examination.
Activity: Seminar
1 Course Unit

SPAN 134 Intermediate Spanish I and II: Accelerated
Spanish 134 is an intensive intermediate-level language course that covers the material presented in Spanish 130 and Spanish 140. The course emphasizes the development of the four canonical skills (reading, writing, listening and speaking) within a culturally based context. Class time will focus on communicative activities that combine grammatical concepts, relevant vocabulary, and cultural themes. Students will participate in pair, small-group and whole-class activities to practice linguistics skills in a meaningful context. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the past tense and major uses of the subjunctive, and the development of writing skills. During the spring semester, Spanish 134 is limited to those students who have satisfied the language requirement in another language. During the summer, the course is open to all students who meet placement requirements.
For BA Students: Last Language Course
Course usually offered in spring term
Prerequisites: Spring semester prerequisites: Permit required from the course coordinator. Summer prerequisites: Successful completion of Spanish 112, 120, 121 or 125 or a score of 450-540 on the SAT II or 384-453 on the online placement examination.
Activity: Seminar
2 Course Units

SPAN 135 Spanish for the Medical Professions, Intermediate I
Spanish 135 is a first-semester intermediate-level medical Spanish language course that emphasizes the development of the four basic skills (reading, writing, listening, and speaking), and the acquisition of medical terminology. Students will be expected to participate in classroom activities such as role-plays based on typical office and emergency procedures in order to develop meaningful and accurate communication skills in the target language. Students will also review and acquire forms and structures useful both inside and outside the medical field.
For BA Students: Language Course
Course usually offered in fall term
Prerequisites: Successful completion of Spanish 112, 120, 121 or 125 or a score of 450-540 on the SAT II or 384-453 on the online placement examination.
Activity: Seminar
1 Course Unit
Notes: Offered through the Penn Language Center.

SPAN 140 Intermediate Spanish II
Spanish 140, the continuation of Spanish 130, is a fourth-semester language course that offers students the opportunity to acquire communicative skills (reading, writing, listening and speaking) while developing their awareness and appreciation of the Spanish-speaking world. Topics studied may include the environment, the arts, social relations, and conflict and violence. This course satisfies the language requirement in Spanish.
For BA Students: Last Language Course
One-term course offered either term
Prerequisites: Successful completion of Spanish 130 or 135 or a score of 550-640 on the SAT II or 454-546 on the online placement examination.
Activity: Seminar
1 Course Unit

SPAN 145 Spanish for the Medical Professions, Intermediate II
The continuation of Spanish 135, Spanish 145 is a second-semester intermediate-level medical Spanish language course. See the description of Spanish 135. This course satisfies the language requirement in Spanish.
For BA Students: Last Language Course
One-term course offered either term
Prerequisites: Successful completion of Spanish 130 or 135 or a score of 550-640 on the SAT II or 454-546 on the online placement examination.
Activity: Seminar
1 Course Unit
Notes: Offered through the Penn Language Center.

SPAN 180 Spanish Conversation
Must be a resident of the Modern Language College House.
Two terms. student must enter first term.
Prerequisite: Residence in Modern Language House
Activity: Seminar
0.5 Course Units

SPAN 201 Study Abroad
Activity: Seminar
1 Course Unit

SPAN 202 Advanced Spanish
The purpose of this course is twofold: (a) to develop students’ communicative abilities in Spanish, that is, speaking, listening, reading and writing, and (b) to increase their awareness and understanding of Hispanic cultures and societies. Homework and classroom activities are designed to help students build their oral proficiency, expand and perfect their knowledge of vocabulary and grammatical structures, improve their reading and writing skills, and develop their critical thinking abilities. The material for this class includes short stories, newspaper articles, poems, songs, cartoons, video clips and a novel, such as Sergio Bizio’s Rabia. At the completion of this course, students will feel confident discussing and debating a variety of contemporary issues (cultural and religious practices, family relationships, gender stereotypes, political events, immigration to the USA, etc.).
For BA Students: Advanced Language Course
One-term course offered either term
Prerequisite: Successful completion of Spanish 140 or equivalent
Activity: Seminar
1 Course Unit
SPAN 208 Business Spanish I
Spanish for Business I provides advanced-level language students with technical vocabulary and communicative skills covering business concepts as they apply to the corporate dynamics of the Spanish-speaking world, with a special emphasis on Latin America. Through readings, presentations, discussions, and video materials, we shall analyze those cultural aspects that characterize the business environment in the region as well as focus on economies and markets in light of their history, politics, resources and pressing international concerns.
For BA Students: Advanced Language Course
One-term course offered either term
Prerequisite: Successful completion of Spanish 140 or equivalent
Activity: Seminar
1 Course Unit

SPAN 209 Business Spanish II
Business Spanish II, Advanced Spanish for Business, is specifically designed for advanced speakers of Spanish (e.g., native speakers, heritage speakers, students who have studied in a Spanish-speaking country for at least one semester, and those who have attained an equivalent level of linguistic competency). Students will take an in-depth look at the corporate dynamics of a number of countries in Latin America, focusing on their economies and markets, as well as on the cultural and business protocols of each region. Through the creation of an entrepreneurial project and the writing of a business plan, students will enhance their business and language skills.
For BA Students: Advanced Language Course
Course usually offered in fall term
Prerequisite: Permission from the instructor
Activity: Seminar
1 Course Unit

SPAN 212 Advanced Spanish II: Grammar and Composition
Spanish 212 is an advanced-level language course that emphasizes the acquisition of the tools necessary for successful written expression in Spanish. These tools include a solid knowledge of the major points of Spanish grammar, an ample vocabulary, control of the mechanics of the language (spelling, punctuation, etc.), and a thorough understanding of the writing process. Throughout the semester, students will use these tools to analyze authentic texts and to produce a variety of written assignments. By the end of the course, students will have developed their awareness of the norms of standard Spanish and learned to incorporate these features into their own writing. The class will be conducted in Spanish and students are expected to speak in Spanish at all times.
One-term course offered either term
Prerequisite: Spanish 202 or equivalent
Activity: Seminar
1 Course Unit

SPAN 215 Spanish for the Professions I
Spanish for the Professions is designed to provide advanced-level language students with a wide-ranging technical vocabulary and the enhancement of solid communicative skills within the cultural context of several developing Latin American countries. Focusing on topics such as politics, economy, society, health, environment, education, science and technology, the class will explore the realities and underlying challenges facing Latin America. Through essays, papers, articles, research, discussions, case studies, and videotapes, we shall take an in-depth look at the dynamics of Latin American societies. The course will focus on--but not be restricted to--Mexico, Cuba and Argentina.
For BA Students: Advanced Language Course
Course usually offered in spring term
Prerequisite: Spanish 202 or equivalent
Activity: Seminar
1 Course Unit

SPAN 219 Hispanic Texts and Contexts
The primary aim of this course is to develop students’ knowledge of the geographical, historical and cultural contexts of the Spanish-speaking world. At the same time that they are introduced to research techniques and materials available in Spanish, students strengthen their language skills through reading, oral presentations, video viewing, and regular writing assignments. The course is designed to give students a broad understanding of Hispanic culture that will prepare them for upper-level course work and study abroad.
For BA Students: Humanities and Social Science Sector
One-term course offered either term
Prerequisites: Spanish 202 or Spanish 212.
Activity: Seminar
1 Course Unit

SPAN 223 Introduction to Literary Analysis
By helping students develop skills to carefully read and analyze Spanish literary works, Spanish 223 prepares them for upper-level courses and study abroad. After reviewing the main elements and conventions of the most popular genres (narrative, poetry, theater and essay), students become familiarized with current theoretical approaches to the study of literature with the purpose of applying them to their own analytical writing. The last weeks of the semester are devoted to the reading of a well-crafted detective novel and the examination of both its formal features and its ideological underpinnings. Throughout the course students will have ample opportunities to hone their skills through the close reading and class discussion of varied and stimulating literary works produced by canonical and non-canonical Hispanic authors.
For BA Students: Arts and Letters Sector
One-term course offered either term
Prerequisites: Spanish 202 or Spanish 212.
Activity: Seminar
1 Course Unit

SPAN 250 Major Works of Spanish and Latin American Literature
Topics vary. Please see the Spanish Department’s website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc
For BA Students: Arts and Letters Sector
One-term course offered either term
Also Offered As: COML 252, LALS 252
Activity: Seminar
1 Course Unit
SPAN 317 Spanish Phonetics and Morphology
An introduction to articulatory phonetics designed to give the student a practical knowledge of the Spanish sound system as compared with English. Also some work in acoustic phonetics. Students learn to use the phonetic alphabet. Basic work is followed by an introduction to the linguistic analysis of sound systems, with concentration on Spanish and English phonology. Some introductory work on regional and social variations of pronunciation in the Spanish-speaking world. Lastly, an introduction to morphological analysis of language, with particular attention to the structure of the Spanish verb and word formation. Lectures and discussion of readings.
Course not offered every year
Prerequisites: Spanish 219 or Spanish 223.
Activity: Seminar
1 Course Unit

SPAN 319 History of the Spanish Language
A survey treatment of the development of Latin to modern Spanish, with emphasis on relations between external history and the development of grammatical structure and vocabulary, and major sound shifts. Lectures and discussions of reading.
Course not offered every year
Prerequisites: Spanish 219 or Spanish 223.
Activity: Seminar
1 Course Unit

Topics vary. Please see the Spanish Department’s website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc  
Course not offered every year  
Activity: Seminar  
1 Course Unit

SPAN 682 Seminar on Literary Theory  
Topics vary. See the Spanish Department’s website for the current offerings. https://www.sas.upenn.edu/hispanic-portuguese-studies/pc  
Course usually offered in fall term  
Also Offered As: COML 682  
Activity: Seminar  
1 Course Unit
SPAN 684 La Novela Realista
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc
Course not offered every year
Activity: Seminar
1 Course Unit

SPAN 686 Studies in Spanish Culture
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc
Course not offered every year
Activity: Seminar
1 Course Unit

SPAN 687 The Spanish Avant-Garde
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc
Course not offered every year
Also Offered As: COML 687
Activity: Seminar
1 Course Unit

SPAN 690 Studies in 19th- and 20th-Century Spanish American Literature
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc
Course not offered every year
Activity: Seminar
1 Course Unit

SPAN 692 Colonial Literature of Spanish America
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc
Course not offered every year
Also Offered As: COML 692, LALS 692
Activity: Seminar
1 Course Unit

SPAN 693 Vanguardias culturales hispanoamericanas
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc
Course not offered every year
Activity: Seminar
1 Course Unit

SPAN 694 Modern Spanish American Narrative
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc
Course not offered every year
Also Offered As: CIMS 694, COML 694, LALS 694
Activity: Seminar
1 Course Unit

SPAN 697 Studies in Latin American Culture
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc
Course not offered every year
Also Offered As: COML 697
Activity: Seminar
1 Course Unit

SPAN 698 Workshop on Scholarly Writing
This course aims to develop awareness about what constitutes effective scholarly prose in Spanish. It proposes to hone the student's handling of writing as a vehicle for the expression of intellectual thought, but also to develop a consciousness of the rhetorical strategies that can be used to advance a critical argument effectively. Extensive writing exercises will be assigned; these will be followed by intense and multiple redactions of the work originally produced. The ultimate goal is to make students develop precision, correctness, and elegance in written Spanish. Students will also work on a class paper written previously, with a view to learning the process of transforming a short, limited expression of an argument into a publishable article.
Course not offered every year
Activity: Seminar
1 Course Unit

SPAN 999 Independent Study
One-term course offered either term
Activity: Independent Study
1 Course Unit

Statistics (STAT)

STAT 101 Introductory Business Statistics
Data summaries and descriptive statistics; introduction to a statistical computer package; Probability: distributions, expectation, variance, covariance, portfolios, central limit theorem; Statistical inference of univariate data; Statistical inference for bivariate data: inference for intrinsically linear simple regression models. This course will have a business focus, but is not inappropriate for students in the college.
One-term course offered either term
Prerequisite: MATH 104 or MATH 110 or equivalent; successful completion of STAT 101 is prerequisite to STAT 102
Activity: Lecture
1 Course Unit

STAT 102 Introductory Business Statistics
One-term course offered either term
Prerequisite: STAT 101
Activity: Lecture
1 Course Unit

STAT 111 Introductory Statistics
Introduction to concepts in probability. Basic statistical inference procedures of estimation, confidence intervals and hypothesis testing directed towards applications in science and medicine. The use of the JMP statistical package.
One-term course offered either term
Prerequisites: High school algebra.
Activity: Recitation
1 Course Unit
STAT 112 Introductory Statistics
Further development of the material in STAT 111, in particular the analysis of variance, multiple regression, non-parametric procedures and the analysis of categorical data. Data analysis via statistical packages. One-term course offered either term
Prerequisite: STAT 111
Activity: Lecture
1 Course Unit

STAT 405 Statistical Computing with R
The goal of this course is to introduce students to the R programming language and related eco-system. This course will provide a skill-set that is in demand in both the research and business environments. In addition, R is a platform that is used and required in other advanced classes taught at Wharton, so that this class will prepare students for these higher level classes and electives.
Taught by: Stine, Waterman, Zhang
One-term course offered either term
Also Offered As: STAT 705
Prerequisite: STAT 102 or STAT 112 or STAT 430
Activity: Lecture
0.5 Course Units

STAT 422 Predictive Analytics for Business
This course follows from the introductory regression classes, STAT 102, STAT 112, and STAT 431 for undergraduates and STAT 613 for MBAs. It extends the ideas from regression modeling, focusing on the core business task of predictive analytics as applied to realistic business related data sets. In particular it introduces automated model selection tools, such as stepwise regression and various current model selection criteria such as AIC and BIC. It delves into classification methodologies such as logistic regression. It also introduces classification and regression trees (CART) and the popular predictive methodology known as the random forest.
One-term course offered either term
Also Offered As: STAT 722
Prerequisite: STAT 102 or STAT 112 or STAT 431
Activity: Lecture
0.5 Course Units

STAT 424 Text Analytics
This course introduces methods for the analysis of unstructured data, focusing on statistical models for text. Techniques include those for sentiment analysis, topic models, and predictive analytics. Course includes topics from natural language processing (NLP), such as identifying parts of speech, parsing sentences (e.g., subject and predicate), and named entity recognition (people and places). Unsupervised techniques suited to feature creation provide variables suited to traditional statistical models (regression) and more recent approaches (regression trees). Examples that span the course illustrate the success of text analytics. Hierarchical generating models often associated with nonparametric Bayesian analysis supply theoretical foundations.
Taught by: Stine
One-term course offered either term
Also Offered As: STAT 724
Prerequisites: Students should be familiar with regression models at the level of STAT 102 and the R statistics language at the level of STAT 405. Familiarity with the R-Studio development environment is presumed, as well as common R packages such as stringr, dplyr and ggplot. Those with more knowledge of Statistics, such as from STAT 422, or computing skills will benefit. The predominant software used in the course is R, with bits of JMP when helpful for interactive illustration. Familiarity with basic probability models is helpful but not presumed.
Activity: Lecture
0.5 Course Units

STAT 430 Probability
Discrete and continuous sample spaces and probability; random variables, distributions, independence; expectation and generating functions; Markov chains and recurrence theory.
One-term course offered either term
Also Offered As: STAT 510
Prerequisite: MATH 114 or MATH 115 or equivalent
Activity: Lecture
1 Course Unit

STAT 431 Statistical Inference
Graphical displays; one- and two-sample confidence intervals; one- and two-sample hypothesis tests; one- and two-way ANOVA; simple and multiple linear least-squares regression; nonlinear regression; variable selection; logistic regression; categorical data analysis; goodness-of-fit tests. A methodology course. This course does not have business applications but has significant overlap with STAT 101 and 102.
One-term course offered either term
Also Offered As: STAT 511
Prerequisite: STAT 430
Activity: Lecture
1 Course Unit

STAT 432 Mathematical Statistics
An introduction to the mathematical theory of statistics. Estimation, with a focus on properties of sufficient statistics and maximum likelihood estimators. Hypothesis testing, with a focus on likelihood ratio tests and the consequent development of "t" tests and hypothesis tests in regression and ANOVA. Nonparametric procedures.
Course usually offered in spring term
Also Offered As: STAT 512
Prerequisite: STAT 430 or 510 or equivalent
Activity: Lecture
1 Course Unit
STAT 433 Stochastic Processes
An introduction to Stochastic Processes. The primary focus is on Markov Chains, Martingales and Gaussian Processes. We will discuss many interesting applications from physics to economics. Topics may include: simulations of path functions, game theory and linear programming, stochastic optimization, Brownian Motion and Black-Scholes.
Taught by: Steele, Mossel
One-term course offered either term
Also Offered As: STAT 533
Prerequisites: STAT 430, or permission of instructor
Activity: Lecture
1 Course Unit

STAT 434 Financial and Economic Time Series
This course will introduce students to the time series methods and practices which are most relevant to the analysis of financial and economic data. After an introduction to the statistical programming language R the course develops an autoregressive models, moving average models, and their generalizations. The course then develops models that are closely focused on particular features of financial series such as the challenges of time dependent volatility.
Course usually offered in fall term
Prerequisites: STAT 101 and STAT 102 or STAT 431. Familiarity with linear algebra
Activity: Lecture
1 Course Unit

STAT 435 Forecasting Methods for Management
This course provides an introduction to the wide range of techniques available for statistical forecasting. Qualitative techniques, smoothing and decomposition of time series, regression, adaptive methods, autoregressive-moving average modeling, and ARCH and GARCH formulations will be surveyed. The emphasis will be on applications, rather than technical foundations and derivations. The techniques will be studied critically, with examination of their usefulness and limitations.
Taught by: Shaman
One-term course offered either term
Also Offered As: STAT 711
Prerequisite: STAT 102 or 112 or 431
Activity: Lecture
1 Course Unit

STAT 436 Introduction to Large-Scale Data Science
The course will focus on computational approaches to large-scale data analysis. The lectures will introduce the relevant concepts, and students will be asked to work on projects, implementing the methods and experimenting with large-scale datasets. The course will cover various techniques for updating models in an online fashion, as well as subsampling and dimensionality-reduction techniques. The students will experiment with neural network architectures and learn to build predictive models for modern machine learning tasks.
Taught by: Rakhl
One-term course offered either term
Prerequisites: Linear Algebra and basic R programming
Activity: Lecture
1 Course Unit

STAT 451 Fundamentals of Actuarial Science I
This course is the usual entry point in the actuarial science program. It is required for students who plan to concentrate or minor in actuarial science. It can also be taken by others interested in the mathematics of personal finance and the use of mortality tables. For future actuaries, it provides the necessary knowledge of compound interest and its applications, and basic life contingencies definition to be used throughout their studies. Non-actuaries will be introduced to practical applications of finance mathematics, such as loan amortization and bond pricing, and premium calculation of typical life insurance contracts. Main topics include annuities, loans and bonds; basic principles of life contingencies and determination of annuity and insurance benefits and premiums.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 451, BEPP 851, STAT 851
Prerequisites: MATH 104, STAT 430. STAT 430 can be taken concurrently with BEPP 451 or STAT 451
Activity: Lecture
1 Course Unit

STAT 452 Fundamentals of Actuarial Science II
This specialized course is usually only taken by Wharton students who plan to concentrate in actuarial science and Penn students who plan to minor in actuarial mathematics. It provides a comprehensive analysis of advanced life contingencies problems such as reserving, multiple life functions, multiple decrement theory with application to the valuation of pension plans.
Taught by: Lemaire
Course usually offered in spring term
Also Offered As: BEPP 452, BEPP 852, STAT 852
Prerequisite: BEPP 451 or STAT 451
Activity: Lecture
1 Course Unit

STAT 453 Actuarial Statistics
This course covers models for insurer's losses, and applications of Markov chains. Poisson processes, including extensions such as non-homogeneous, compound, and mixed Poisson processes are studied in detail. The compound model is then used to establish the distribution of losses. An extensive section on Markov chains provides the theory to forecast future states of the process, as well as numerous applications of Markov chains to insurance, finance, and genetics. The course is abundantly illustrated by examples from the insurance and finance literature. While most of the students taking the course are future actuaries, other students interested in applications of statistics may discover in class many fascinating applications of stochastic processes and Markov chains.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 453, BEPP 853, STAT 853
Prerequisite: STAT 430
Activity: Lecture
1 Course Unit
STAT 454 Applied Statistical Methods for Actuaries
One half of the course is devoted to the study of time series, including ARIMA modeling and forecasting. The other half studies modifications in random variables due to deductibles, co-payments, policy limits, and elements of simulation. This course is a possible entry point into the actuarial science program. The Society of Actuaries has approved STAT 854 for VEE credit on the topic of time series.
Taught by: Lemaire
Course usually offered in spring term
Also Offered As: BEPP 454, BEPP 854, STAT 854
Prerequisites: STAT 430, STAT 431
Activity: Lecture
1 Course Unit

STAT 470 Data Analytics and Statistical Computing
This course will introduce a high-level programming language, called R, that is widely used for statistical data analysis. Using R, we will study and practice the following methodologies: data cleaning, feature extraction; web scrubbing, text analysis; data visualization; fitting statistical models; simulation of probability distributions and statistical models; statistical inference methods that use simulations (bootstrap, permutation tests).
Taught by: Buja
One-term course offered either term
Also Offered As: STAT 503, STAT 770
Prerequisites: STAT 101 and 102 or STAT 111 and 112 or STAT 431
Activity: Lecture
1 Course Unit

STAT 471 Modern Data Mining
Modern Data Mining: Statistics or Data Science has been evolving rapidly to keep up with the modern world. While classical multiple regression and logistic regression technique continue to be the major tools we go beyond to include methods built on top of linear models such as LASSO and Ridge regression. Contemporary methods such as KNN (K nearest neighbor), Random Forest, Support Vector Machines, Principal Component Analyses (PCA), the bootstrap and others are also covered. Text mining especially through PCA is another topic of the course. While learning all the techniques, we keep in mind that our goal is to tackle real problems. Not only do we go through a large collection of interesting, challenging real-life data sets but we also learn how to use the free, powerful software "R" in connection with each of the methods exposed in the class.
Taught by: Zhao
One-term course offered either term
Also Offered As: STAT 571, STAT 701
Prerequisite: STAT 102 or 112 or 431
Activity: Lecture
1 Course Unit

STAT 472 Decision Making under Uncertainty
Fundamentals of modern decision analysis with emphasis on managerial decision making under uncertainty and risk. The basic topics of decision analysis are examined. These include payoffs and losses, utility and subjective probability, the value of information, Bayesian analysis, inference and decision making. Examples are presented to illustrate the ideas and methods. Some of these involve: choices among investment alternatives; marketing a new product; health care decisions; and costs, benefits, and sample size in surveys.
Taught by: Stine
Course not offered every year
Also Offered As: STAT 712
Prerequisite: STAT 102 or 112 or 431
Activity: Lecture
1 Course Unit

STAT 473 Bioinformatics
An introduction to the use of statistical methods in the increasingly important scientific areas of genomics and bioinformatics. The topics to be covered will be decided in detail after the initial class meeting, but will be taken from the following: - background probability theory of one and many random variables and of events; background statistical inference theory, classical and Bayesian, Poisson processes and Markov chain; the analysis of one and many DNA sequences, in particular shotgun sequencing, pattern analysis and motifs; substitution matrices, general random walk theory; advanced statistical inference, the theory of BLAST, hidden Markov models, microarray analysis, evolutionary models.
Taught by: Ewens
Course usually offered in spring term
Also Offered As: STAT 953
Prerequisites: Good background in probability and statistics at the approximate level of STAT 430 and STAT 431
Activity: Lecture
1 Course Unit
Notes: The material will follow the class textbook, Ewens and Grant "Statistical Models in Bioinformatics", Springer, second edition, 2005.

STAT 474 Modern Regression for the Social, Behavioral and Biological Sciences
Function estimation and data exploration using extensions of regression analysis: smoothers, semiparametric and nonparametric regression, and supervised machine learning. Conceptual foundations are addressed as well as hands-on use for data analysis.
Taught by: Berk
Course usually offered in spring term
Also Offered As: CRIM 474, STAT 974
Prerequisite: STAT 102 or 112 or equivalent
Activity: Lecture
1 Course Unit

STAT 475 Sample Survey Design
This course will cover the design and analysis of sample surveys. Topics include simple sampling, stratified sampling, cluster sampling, graphics, regression analysis using complex surveys and methods for handling nonresponse bias.
Course not offered every year
Also Offered As: BSTA 775, STAT 920
Prerequisite: STAT 102 or 112 or 431
Activity: Lecture
1 Course Unit
STAT 476 Applied Probability Models in Marketing
This course will expose students to the theoretical and empirical “building blocks” that will allow them to construct, estimate, and interpret powerful models of customer behavior. Over the years, researchers and practitioners have used these models for a wide variety of applications, such as new product sales, forecasting, analyses of media usage, and targeted marketing programs. Other disciplines have seen equally broad utilization of these techniques. The course will be entirely lecture-based with a strong emphasis on real-time problem solving. Most sessions will feature sophisticated numerical investigations using Microsoft Excel. Much of the material is highly technical.
Taught by: Fader
Course usually offered in spring term
Also Offered As: MKTG 476, MKTG 676, MKTG 776, STAT 776
Prerequisites: A high comfort level with basic integral calculus and recent exposure to a formal course in probability and statistics such as STAT 430 is strongly recommended.
Activity: Lecture
1 Course Unit

STAT 500 Applied Regression and Analysis of Variance
An applied graduate level course in multiple regression and analysis of variance for students who have completed an undergraduate course in basic statistical methods. Emphasis is on practical methods of data analysis and their interpretation. Covers model building, general linear hypothesis, residual analysis, leverage and influence, one-way anova, two-way anova, factorial anova. Primarily for doctoral students in the managerial, behavioral, social and health sciences.
Taught by: Rosenbaum
Course usually offered in fall term
Also Offered As: BSTA 550, PSYC 611
Prerequisite: STAT 102 or 112 or equivalent
Activity: Lecture
1 Course Unit

STAT 501 Introduction to Nonparametric Methods and Log-linear Models
An applied graduate level course for students who have completed an undergraduate course in basic statistical methods. Covers two unrelated topics: loglinear and logit models for discrete data and nonparametric methods for nonnormal data. Emphasis is on practical methods of data analysis and their interpretation. Primarily for doctoral students in the managerial, behavioral, social and health sciences. May be taken before STAT 500 with permission of instructor.
Taught by: Rosenbaum
Course usually offered in spring term
Also Offered As: PSYC 612
Prerequisite: STAT 102 or 112 or equivalent
Activity: Lecture
1 Course Unit

STAT 502 Survey Methods and Design
Methods and design of field surveys in education, the social sciences, criminal justice research, and other areas. It treats methods of eliciting information through household, mail, telephone surveys, methods of assuring privacy, enhancing cooperation rates and related matters. Fundamentals of statistical sampling and sample design are covered. Much of the course is based on contemporary surveys sponsored by the National Center for Education Statistics and other federal, state, and local agencies.
Taught by: Boruch
Course usually offered in spring term
Also Offered As: EDUC 683
Prerequisite: STAT 520 or equivalent
Activity: Lecture
1 Course Unit

STAT 503 Data Analytics and Statistical Computing
This course will introduce a high-level programming language, called R, that is widely used for statistical data analysis. Using R, we will study and practice the following methodologies: data cleaning, feature extraction; web scrubbing, text analysis; data visualization; fitting statistical models; simulation of probability distributions and statistical models; statistical inference methods that use simulations (bootstrap, permutation tests).
Taught by: Buja
One-term course offered either term
Also Offered As: STAT 470, STAT 770
Prerequisites: Two courses at the statistics 400 or 500 level.
Activity: Lecture
1 Course Unit

STAT 510 Probability
Taught by: Brown
One-term course offered either term
Also Offered As: STAT 430
Prerequisite: A one year course in calculus
Activity: Lecture
1 Course Unit

STAT 511 Statistical Inference
Graphical displays; one- and two-sample confidence intervals; one- and two-sample hypothesis tests; one- and two-way ANOVA; simple and multiple linear least-squares regression; nonlinear regression; variable selection; logistic regression; categorical data analysis; goodness-of-fit tests. A methodology course.
One-term course offered either term
Also Offered As: STAT 431
Prerequisite: STAT 510 or equivalent
Activity: Lecture
1 Course Unit
STAT 512 Mathematical Statistics
An introduction to the mathematical theory of statistics. Estimation, with a focus on properties of sufficient statistics and maximum likelihood estimators. Hypothesis testing, with a focus on likelihood ratio tests and the consequent development of "t" tests and hypothesis tests in regression and ANOVA. Nonparametric procedures.
Course usually offered in spring term
Also Offered As: STAT 432
Prerequisite: STAT 430 or 510 or equivalent
Activity: Lecture
1 Course Unit

STAT 520 Applied Econometrics I
This is a course in econometrics for graduate students. The goal is to prepare students for empirical research by studying econometric methodology and its theoretical foundations. Students taking the course should be familiar with elementary statistical methodology and basic linear algebra, and should have some programming experience.
Topics include conditional expectation and linear projection, asymptotic statistical theory, ordinary least squares estimation, the bootstrap and jackknife, instrumental variables and two-stage least squares, specification tests, systems of equations, generalized least squares, and introduction to use of linear panel data models.
Taught by: Shaman
Course usually offered in fall term
Prerequisites: MATH 114 and MATH 312 or equivalents, and an undergraduate introduction to probability and statistics
Activity: Lecture
1 Course Unit

STAT 521 Applied Econometrics II
Topics include system estimation with instrumental variables, fixed effects and random effects estimation, M-estimation, nonlinear regression, quantile regression, maximum likelihood estimation, generalized method of moments estimation, minimum distance estimation, and binary and multinomial response models. Both theory and applications will be stressed.
Taught by: Shaman
Course usually offered in spring term
Prerequisites: STAT 520. This is a continuation of STAT 520
Activity: Lecture
1 Course Unit

STAT 533 Stochastic Processes
An introduction to Stochastic Processes. The primary focus is on Markov Chains, Martingales and Gaussian Processes. We will discuss many interesting applications from physics to economics. Topics may include: simulations of path functions, game theory and linear programming, stochastic optimization, Brownian Motion and Black-Scholes.
Taught by: Steele, Mossel
One-term course offered either term
Also Offered As: STAT 433
Prerequisite: STAT 510 or equivalent
Activity: Lecture
1 Course Unit

STAT 542 Bayesian Methods and Computation
Sophisticated tools for probability modeling and data analysis from the Bayesian perspective. Hierarchical models, mixture models and Monte Carlo simulation techniques.
Taught by: Jensen
Course usually offered in spring term
Prerequisite: STAT 430 or 510 or equivalent or permission of instructor
Activity: Lecture
1 Course Unit

STAT 553 Machine Learning
This course gives a broad overview of the machine learning and statistical pattern recognition. Some topics will be rather glanced over while others will be considered in-depth. Topics include supervised learning (generative/discriminative models, parametric/nonparametric, neural networks, support vector machines, boosting, bagging, random forests), online learning (prediction with expert advice), learning theory (VC dimension, generalization bounds, bias/variance trade-off), unsupervised learning (clustering, k-means, PCA, ICA). Most of the course concentrates on the supervised and online learning.
Course usually offered in spring term
Prerequisites: STAT 510 and 512 or equivalent
Activity: Lecture
1 Course Unit

STAT 571 Modern Data Mining
Modern Data Mining: Statistics or Data Science has been evolving rapidly to keep up with the modern world. While classical multiple regression and logistic regression technique continue to be the major tools we go beyond to include methods built on top of linear models such as LASSO and Ridge regression. Contemporary methods such as KNN (K nearest neighbor), Random Forest, Support Vector Machines, Principal Component Analyses (PCA), the bootstrap and others are also covered.
Text mining especially through PCA is another topic of the course. While learning all the techniques, we keep in mind that our goal is to tackle real problems. Not only do we go through a large collection of interesting, challenging real-life data sets but we also learn how to use the free, powerful software "R" in connection with each of the methods exposed in the class.
Taught by: Zhao
One-term course offered either term
Also Offered As: STAT 471, STAT 701
Prerequisite: Two courses at the statistics 400 or 500 level or permission from instructor
Activity: Lecture
1 Course Unit
STAT 613 Regression Analysis for Business
This course provides the fundamental methods of statistical analysis, the art and science if extracting information from data. The course will begin with a focus on the basic elements of exploratory data analysis, probability theory and statistical inference. With this as a foundation, it will proceed to explore the use of the key statistical methodology known as regression analysis for solving business problems, such as the prediction of future sales and the response of the market to price changes. The use of regression diagnostics and various graphical displays supplement the basic numerical summaries and provides insight into the validity of the models. Specific important topics covered include least squares estimation, residuals and outliers, tests and confidence intervals, correlation and autocorrelation, collinearity, and randomization. The presentation relies upon computer software for most of the needed calculations, and the resulting style focuses on construction of models, interpretation of results, and critical evaluation of assumptions.
Course usually offered in fall term
Prerequisites: The basic mathematical skills covered in STAT 611, Mathematics for Business Analysis
Activity: Lecture
1 Course Unit
Notes: Lecture and discussion, assigned exercises, data analysis project, quizzes, and a final exam.

STAT 621 Accelerated Regression Analysis for Business
STAT 621 is intended for students with recent, practical knowledge of the use of regression analysis in the context of business applications. This course covers the material of STAT 613, but omits the foundations to focus on regression modeling. The course reviews statistical hypothesis testing and confidence intervals for the sake of standardizing terminology and introducing software, and then moves into regression modeling. The pace presumes recent exposure to both the theory and practice of regression and will not be accommodating to students who have not seen or used these methods previously. The interpretation of regression models within the context of applications will be stressed, presuming knowledge of the underlying assumptions and derivations. The scope of regression modeling that is covered includes multiple regression analysis with categorical effects, regression diagnostic procedures, interactions, and time series structure. The presentation of the course relies on computer software that will be introduced in the initial lectures.
Taught by: George
Course usually offered in fall term
Prerequisites: Recent exposure to the theory and practice of regression modeling.
Activity: Lecture
0.5 Course Units
Notes: Lecture and discussion, assigned exercises, data analysis, quizzes, and a final exam.

STAT 701 Modern Data Mining
Modern Data Mining: Statistics or Data Science has been evolving rapidly to keep up with the modern world. While classical multiple regression and logistic regression technique continue to be the major tools we go beyond to include methods built on top of linear models such as LASSO and Ridge regression. Contemporary methods such as KNN (K nearest neighbor), Random Forest, Support Vector Machines, Principal Component Analyses (PCA), the bootstrap and others are also covered. Text mining especially through PCA is another topic of the course. While learning all the techniques, we keep in mind that our goal is to tackle real problems. Not only do we go through a large collection of interesting, challenging real-life data sets but we also learn how to use the free, powerful software "R" in connection with each of the methods exposed in the class.
Taught by: Zhao
One-term course offered either term
Also Offered As: STAT 471, STAT 571
Prerequisite: STAT 613 or equivalent
Activity: Lecture
1 Course Unit

STAT 705 Statistical Computing with R
The goal of this course is to introduce students to the R programming language and related eco-system. This course will provide a skill-set that is in demand in both the research and business environments. In addition, R is a platform that is used and required in other advanced classes taught at Wharton, so that this class will prepare students for these higher level classes and electives.
Taught by: Stine, Waterman, Zhang
One-term course offered either term
Also Offered As: STAT 405
Prerequisites: STAT 613 or STAT 621 or waiving the Statistics Core completely.
Activity: Lecture
0.5 Course Units

STAT 711 Forecasting Methods for Management
This course provides an introduction to the wide range of techniques available for statistical forecasting. Qualitative techniques, smoothing and decomposition of time series, regression, adaptive methods, autoregressive-moving average modeling, and ARCH and GARCH formulations will be surveyed. The emphasis will be on applications, rather than technical foundations and derivations. The techniques will be studied critically, with examination of their usefulness and limitations.
Taught by: Shaman
One-term course offered either term
Also Offered As: STAT 435
Prerequisite: STAT 613 or equivalent
Activity: Lecture
1 Course Unit
STAT 722 Decision Making Under Uncertainty
Fundamentals of modern decision analysis with emphasis on managerial decision making under uncertainty and risk. The basic topics of decision analysis are examined. These include payoffs and losses, utility and subjective probability, the value of information, Bayesian analysis, inference and decision making. Examples are presented to illustrate the ideas and methods. Some of these involve: choices among investment alternatives; marketing a new product; health care decisions; and costs, benefits, and sample size in surveys.
Taught by: Stine
Course not offered every year
Also Offered As: STAT 472
Prerequisite: STAT 520 or STAT 613 or equivalent
Activity: Lecture
1 Course Unit

STAT 724 Text Analytics
This course follows from the introductory regression classes, STAT 102, STAT 112, and STAT 431 for undergraduates and STAT 613 for MBAs. It extends the ideas from regression modeling, focusing on the core business task of predictive analytics as applied to realistic business related data sets. In particular it introduces automated model selection tools, such as stepwise regression and various current model selection criteria such as AIC and BIC. It delves into classification methodologies such as logistic regression. It also introduces classification and regression trees (CART) and the popular predictive methodology known as the random forest.
One-term course offered either term
Also Offered As: STAT 422
Prerequisite: STAT 613 or STAT 621 or having waived the statistics core completely
Activity: Lecture
0.5 Course Units

STAT 770 Data Analytics and Statistical Computing
This course will introduce a high-level programming language, called R, that is widely used for statistical data analysis. Using R, we will study and practice the following methodologies: data cleaning, feature extraction; web scrubbing, text analysis; data visualization; fitting statistical models; simulation of probability distributions and statistical models; statistical inference methods that use simulations (bootstrap, permutation tests).
Taught by: Buja
One-term course offered either term
Also Offered As: STAT 470, STAT 503
Prerequisites: STAT 613 or STAT 621 or waiving the Statistics Core completely.
Activity: Lecture
1 Course Unit

STAT 776 Applied Probability Models in Marketing
This course will expose students to the theoretical and empirical "building blocks" that will allow them to develop and implement powerful models of customer behavior. Over the years, researchers and practitioners have used these methods for a wide variety of applications, such as new product sales forecasting, analyses of media usage, customer valuation, and targeted marketing programs. These same techniques are also very useful for other types of business (and non-business) problems. The course will be entirely lecture-based with a strong emphasis on real-time problem solving. Most sessions will feature sophisticated numerical investigations using Microsoft Excel. Much of the material is highly technical.
Taught by: Fader
Course usually offered in spring term
Also Offered As: MKTG 476, MKTG 776, STAT 476
Prerequisites: Students must have a high comfort level with basic integral calculus, and recent exposure to a formal course in probability and statistics is strongly recommended.
Activity: Lecture
1 Course Unit
Notes: Format: Lecture, real-time problem solving

STAT 851 Fundamentals of Actuarial Science I
This course is the usual entry point in the actuarial science program. It is required for students who plan to concentrate or minor in actuarial science. It can also be taken by others interested in the mathematics of personal finance and the use of mortality tables. For future actuaries, it provides the necessary knowledge of compound interest and its applications, and basic life contingencies definition to be used throughout their studies. Non-actuaries will be introduced to practical applications of finance mathematics, such as loan amortization and bond pricing, and premium calculation of typical life insurance contracts. Main topics include annuities, loans and bonds; basic principles of life contingencies and determination of annuity and insurance benefits and premiums.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 451, BEPP 851, STAT 451
Prerequisite: One semester of calculus
Activity: Lecture
1 Course Unit
STAT 852 Fundamentals of Actuarial Science II
This specialized course is usually only taken by Wharton students who plan to concentrate in actuarial science and Penn students who plan to minor in actuarial mathematics. It provides a comprehensive analysis of advanced life contingencies problems such as reserving, multiple life functions, multiple decrement theory with application to the valuation of pension plans.
Taught by: Lemaire
Course usually offered in spring term
Also Offered As: BEPP 452, BEPP 852, STAT 452
Prerequisite: STAT 851 or BEPP 851
Activity: Lecture
1 Course Unit

STAT 853 Actuarial Statistics
This course covers models for insurer’s losses, and applications of Markov chains. Poisson processes, including extensions such as non-homogeneous, compound, and mixed Poisson processes are studied in detail. The compound model is then used to establish the distribution of losses. An extensive section on Markov chains provides the theory to forecast future states of the process, as well as numerous applications of Markov chains to insurance, finance, and genetics. The course is abundantly illustrated by examples from the insurance and finance literature. While most of the students taking the course are future actuaries, other students interested in applications of statistics may discover in class many fascinating applications of stochastic processes and Markov chains.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 453, BEPP 853, STAT 453
Prerequisite: Two semesters of Statistics
Activity: Lecture
1 Course Unit

STAT 854 Applied Statistical Methods for Actuaries
One half of the course is devoted to the study of time series, including ARIMA modeling and forecasting. The other half studies modifications in random variables due to deductibles, co-payments, policy limits, and elements of simulation. This course is a possible entry point into the actuarial science program. The Society of Actuaries has approved STAT 854 for VEE credit on the topic of time series.
Taught by: Lemaire
Course usually offered in spring term
Also Offered As: BEPP 454, BEPP 854, STAT 454
Prerequisite: One semester of probability
Activity: Lecture
1 Course Unit

STAT 900 Advanced Probability
The topics covered will change from year to year. Typical topics include the theory of large deviations, percolation theory, particle systems, and probabilistic learning theory.
Course not offered every year
Prerequisite: STAT 931 or equivalent
Activity: Lecture
1 Course Unit

STAT 901 Stochastic Processes II
Martingales, optimal stopping, Wald’s lemma, age-dependent branching processes, stochastic integration, Ito’s lemma.
Course not offered every year
Also Offered As: OIDD 931
Prerequisite: OIDD 930 or equivalent
Activity: Lecture
1 Course Unit

STAT 910 Forecasting and Time Series Analysis
Fourier analysis of data, stationary time series, properties of autoregressive moving average models and estimation of their parameters, spectral analysis, forecasting. Discussion of applications to problems in economics, engineering, physical science, and life science.
Taught by: Stine
Course offered spring; odd-numbered years
Also Offered As: BSTA 852
Prerequisite: STAT 520 or 961 or equivalent
Activity: Lecture
1 Course Unit

STAT 915 Nonparametric Inference
Statistical inference when the functional form of the distribution is not specified. Nonparametric function estimation, density estimation, survival analysis, contingency tables, association, and efficiency.
Course not offered every year
Prerequisite: STAT 520 or equivalent
Activity: Lecture
1 Course Unit

STAT 920 Sample Survey Methods
This course will cover the design and analysis of sample surveys. Topics include simple random sampling, stratified sampling, cluster sampling, graphics, regression analysis using complex surveys and methods for handling nonresponse bias.
Taught by: Small
Course not offered every year
Also Offered As: BSTA 775, STAT 475
Prerequisites: STAT 520, 961 or 970 or permission of instructor
Activity: Lecture
1 Course Unit

STAT 921 Observational Studies
This course will cover statistical methods for the design and analysis of observational studies. Topics will include the potential outcomes framework for causal inference; randomized experiments; matching and propensity score methods for controlling confounding in observational studies; tests of hidden bias; sensitivity analysis; and instrumental variables.
Taught by: Small
Course usually offered in fall term
Prerequisites: STAT 520, 961 or 970 or permission of instructor
Activity: Lecture
1 Course Unit

STAT 924 Advanced Experimental Design
Factorial designs, confounding, incomplete blocks, fractional factorials, random and mixed models, response surfaces.
Course not offered every year
Prerequisite: STAT 972
Activity: Lecture
1 Course Unit
STAT 925 Multivariate Analysis: Theory
This is a course that prepares PhD students in statistics for research in multivariate statistics and high dimensional statistical inference. Topics from classical multivariate statistics include the multivariate normal distribution and the Wishart distribution; estimation and hypothesis testing of mean vectors and covariance matrices; principal component analysis, canonical correlation analysis and discriminant analysis; etc. Topics from modern multivariate statistics include the Marcenko-Pastur law, the Tracy-Widom law, nonparametric estimation and hypothesis testing of high-dimensional covariance matrices, high-dimensional principal component analysis, etc.
Taught by: Ma
Course not offered every year
Prerequisites: STAT 930, 970 and 972 or permission of instructor
Activity: Lecture
1 Course Unit

STAT 926 Multivariate Analysis: Methodology
This is a course that prepares PhD students in statistics for research in multivariate statistics and data visualization. The emphasis will be on a deep conceptual understanding of multivariate methods to the point where students will propose variations and extensions to existing methods or whole new approaches to problems previously solved by classical methods. Topics include: principal component analysis, canonical correlation analysis, generalized canonical analysis; nonlinear extensions of multivariate methods based on optimal transformations of quantitative variables and optimal scaling of categorical variables; shrinkage- and sparsity-based extensions to classical methods; clustering methods of the k-means and hierarchical varieties; multidimensional scaling, graph drawing, and manifold estimation.
Taught by: Buja
Course not offered every year
Prerequisite: STAT 961 or permission of instructor
Activity: Lecture
1 Course Unit

STAT 927 Bayesian Statistical Theory and Methods
A course in Bayesian statistical theory and methods. Axiomatic developments of utility theory and subjective probability, and elements of Bayesian theory.
Taught by: Zhao
Course not offered every year
Also Offered As: BSTA 854
Prerequisite: STAT 971
Activity: Lecture
1 Course Unit

STAT 928 Statistical Learning Theory
Statistical learning theory studies the statistical aspects of machine learning and automated reasoning, through the use of (sampled) data. In particular, the focus is on characterizing the generalization ability of learning algorithms in terms of how well they perform on "new" data when trained on some given data set. The focus of the course is on: providing the fundamental tools used in this analysis; understanding the performance of widely used learning algorithms; understanding the "art" of designing good algorithms, both in terms of statistical and computational properties. Potential topics include: empirical process theory; online learning; stochastic optimization; margin based algorithms; feature selection; concentration of measure.
Taught by: Rakhlin
Course usually offered in spring term
Prerequisites: Probability and linear algebra.
Activity: Lecture
1 Course Unit

STAT 930 Probability
Taught by: Steele
Course usually offered in fall term
Also Offered As: MATH 546
Prerequisite: STAT 430 or 510 or equivalent
Activity: Lecture
1 Course Unit

STAT 931 Stochastic Processes
Taught by: Steele
Course usually offered in spring term
Also Offered As: MATH 547
Prerequisite: STAT 930
Activity: Lecture
1 Course Unit

STAT 932 Survival Models and Analysis Methods for Medical and Biological Data
Parametric models, nonparametric methods for one-and two-sample problems, proportional hazards model, inference based on ranks. Problems will be considered from clinical trials, toxicology and tumorigenicity studies, and epidemiological studies.
Taught by: Zhao
Course not offered every year
Also Offered As: BSTA 854
Prerequisite: STAT 971
Activity: Lecture
1 Course Unit
STAT 933 Analysis of Categorical Data
Likelihood equations for log-linear models, properties of maximum likelihood estimates, exact and approximate conditional inference, computing algorithms, weighted least squares methods, and conditional independence and log-linear models. Applied topics, including interpretation of log-linear and logit model parameters, smoothing of tables, goodness-of-fit, and incomplete contingency tables.
Taught by: Rosenbaum
Course not offered every year
Prerequisites: STAT 961 and 971
Activity: Lecture
1 Course Unit

STAT 940 Advanced Inference I
The topics covered will change from year to year. Typical topics include sequential analysis, nonparametric function estimation, robustness, bootstrapping and applications decision theory, likelihood methods, and mixture models.
Course not offered every year
Prerequisite: STAT 971
Activity: Lecture
1 Course Unit

STAT 941 Advanced Inference II
A continuation of STAT 940.
Course not offered every year
Prerequisite: STAT 940
Activity: Lecture
1 Course Unit

STAT 950 Quantitative Consulting Seminar
The seminar offers the opportunity for small teams of MBAs to work on "real life" quantitative consulting projects. These projects are drawn from both business and University sources. The emphasis is on providing a relevant and comprehensible solution to the client's problem. In-class brainstorming sessions, client presentations and written reports give students the opportunity to test for the existence of an intersection between their quantitative and communication skills.
Taught by: Waterman
Course usually offered in spring term
Prerequisites: No prerequisites, but please talk to the instructor to determine your fit with the course.
Activity: Seminar
1 Course Unit

STAT 953 Bioinformatics
An introduction to the use of statistical methods in the increasingly important scientific areas of genomics and bioinformatics. The topics to be covered will be decided in detail after the initial class meeting, but will be taken from the following: background probability theory of one and many random variables and events; background statistical inference theory, classical and Bayesian, Poisson processes and Markov chain; the analysis of one and many DNA sequences, in particular shotgun sequencing, pattern analysis and motifs; substitution matrices, general random walk theory, advanced statistical inference, the theory of BLAST, hidden Markov models, microarray analysis, evolutionary models.
Taught by: Ewens
Course usually offered in spring term
Also Offered As: STAT 473
Prerequisites: Good background in probability and statistics at the approximate level of STAT 430 and STAT 431
Activity: Lecture
1 Course Unit
Notes: The material will follow the class textbook, Ewens and Grant "Statistical Models in Bioinformatics", Springer, second edition, 2005.

STAT 955 Stochastic Calculus and Financial Applications
Selected topics in the theory of probability and stochastic processes.
Taught by: Steele
Course usually offered in fall term
Prerequisite: STAT 930 or equivalent
Activity: Lecture
1 Course Unit

STAT 956 Financial and Economic Time Series
This graduate course introduces students to the time series methods and practices which are most relevant to the analysis of financial and economic data. The course will address both theoretical and empirical issues. Extensive use will be made of the S-Plus Statistical Language, but no previous experience of S-Plus will be required. The course begins with a quick review of ARIMA models. Most of the course is devoted to ARCH, GARCH, threshold, switching Markov, state space, and nonlinear models.
Taught by: Steele
Course usually offered in spring term
Prerequisites: A graduate course in statistics or econometrics. Familiarity with linear algebra.
Activity: Lecture
1 Course Unit

STAT 957 Seminar in Data Analysis
Survey of methods for the analysis of large unstructured data sets: detection of outliers, Winsorizing, graphical techniques, robust estimators, multivariate problems.
Course not offered every year
Prerequisites: STAT 961, 971, 972, 925, or equivalents; permission of instructor
Activity: Seminar
1 Course Unit
STAT 961 Statistical Methodology
This is a course that prepares 1st year PhD students in statistics for a research career. This is not an applied statistics course. Topics covered include: linear models and their high-dimensional geometry, statistical inference illustrated with linear models, diagnostics for linear models, bootstrap and permutation inference, principal component analysis, smoothing and cross-validation.
Taught by: Buja
Course usually offered in fall term
Prerequisites: STAT 431 or 520 or equivalent; a solid course in linear algebra and a programming language
Activity: Lecture
1 Course Unit

STAT 962 Advanced Methods for Applied Statistics
This course is designed for Ph.D. students in statistics and will cover various advanced methods and models that are useful in applied statistics. Topics for the course will include missing data, measurement error, nonlinear and generalized linear regression models, survival analysis, experimental design, longitudinal studies, building R packages and reproducible research.
Taught by: Small
Course usually offered in spring term
Prerequisite: STAT 961
Activity: Lecture
1 Course Unit

STAT 970 Mathematical Statistics
Decision theory and statistical optimality criteria, sufficiency, point estimation and hypothesis testing methods and theory.
Taught by: Small
Course usually offered in fall term
Prerequisites: STAT 431 or 520 or equivalent; comfort with mathematical proofs (e.g., MATH 360)
Activity: Lecture
1 Course Unit

STAT 971 Introduction to Linear Statistical Models
Taught by: Brown
Course usually offered in spring term
Prerequisite: STAT 970
Activity: Lecture
1 Course Unit

STAT 972 Advanced Topics in Mathematical Statistics
A continuation of STAT 970.
Taught by: Cai
One-term course offered either term
Also Offered As: BSTA 820
Prerequisites: STAT 970 and 971
Activity: Lecture
1 Course Unit

STAT 974 Modern Regression for the Social, Behavioral and Biological Sciences
Function estimation and data exploration using extensions of regression analysis: smoothers, semiparametric and nonparametric regression, and supervised machine learning. Conceptual foundations are addressed as well as hands-on use for data analysis.
Taught by: Berk
Course usually offered in spring term
Also Offered As: CRIM 474, STAT 474
Prerequisites: Two statistics courses at the graduate school level including a solid foundation in the generalized linear model.
Activity: Lecture
1 Course Unit

STAT 991 Seminar in Advanced Application of Statistics
This seminar will be taken by doctoral candidates after the completion of most of their coursework. Topics vary from year to year and are chosen from advance probability, statistical inference, robust methods, and decision theory with principal emphasis on applications.
One-term course offered either term
Activity: Seminar
1 Course Unit

Tamil (TAML)

TAML 406 Beginning Tamil Part I
This course introduces students to colloquial Tamil and formal written Tamil. A balance between production skills, viz. writing and speaking, and comprehension skills, viz. reading and listening, will be maintained throughout the course. Reading materials will introduce students to customs and habits of the Tamil speakers in Tamil Nadu, Sri Lanka, Malaysia, and Singapore. Lessons in the class will be based on a set of Tamil learning software made available at the MMETS Server. This software will be customized to the needs of students.
For BA Students: Language Course
Taught by: Renganathan
Course usually offered in fall term
Activity: Lecture
1 Course Unit

TAML 407 Beginning Tamil Part II
This course introduces students to colloquial Tamil and formal written Tamil. A balance between production skills, viz. writing and speaking, and comprehension skills, viz. reading and listening, will be maintained throughout the course. Reading materials will introduce students to customs and habits of the Tamil speakers in Tamil Nadu, Sri Lanka, Malaysia, and Singapore. Lessons in the class will be based on a set of Tamil learning software made available at the MMETS Server. This software will be customized to the needs of students.
For BA Students: Language Course
Taught by: Renganathan
Course usually offered in spring term
Activity: Seminar
1 Course Unit
TAML 426 Intermediate Tamil Part I
This course develops the skills obtained either from the Beginning Tamil course or from students’ prior exposure to Tamil. The emphasis will be on using the language in actual environments both in spoken medium and in written medium. Multimedia materials such as audio and video facilities will be used extensively to provide students an exposure to the Tamil culture and customs. Besides improving their speech and writing, students will also be introduced gradually to Tamil literature, which has two thousand years of literary history. The learning process in this course will be facilitated by appropriate software equipped with multimedia facilities.
For BA Students: Language Course
Taught by: Renganathan
Two terms. student must enter first term.
Activity: Lecture
1 Course Unit

TAML 427 Intermediate Tamil Part II
This course develops the skills obtained either from the Beginning Tamil course or from students’ prior exposure to Tamil. The emphasis will be on using the language in actual environments both in spoken medium and in written medium. Multimedia materials such as audio and video facilities will be used extensively to provide students an exposure to the Tamil culture and customs. Besides improving their speech and writing, students will also be introduced gradually to Tamil literature, which has two thousand years of literary history. The learning process in this course will be facilitated by appropriate software equipped with multimedia facilities.
For BA Students: Last Language Course
Taught by: Renganathan
Course usually offered in spring term
Prerequisites: Intermediate Tamil Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

Telecommunications & Networking (TCOM)

TCOM 601 Advanced Networking Modeling and Analysis
Course not offered every year
Prerequisite: TCOM 501
Activity: Lecture
1 Course Unit

TCOM 770 TCOM Seminar
Course not offered every year
Activity: Seminar
1 Course Unit

Telugu (TELU)

TELU 409 Beginning Telugu Part I
This course introduces students to the basic Telugu language skills, with an emphasis on practice for listening comprehension, and speaking Telugu. Combined with exposure to Andhra culture, the classroom and online work in this course will enable interested students to pursue further language study in Telugu at the intermediate level, to carry out field research in Andhra Pradesh, or to prepare them to advanced work in Telugu Studies. An introduction to Telugu like this will also be useful for students who just want to acquire basic Telugu language skills for learning a new language or being able to communicate with Telugu speaking family and friends or to enjoy Telugu music and films.
For BA Students: Language Course
Taught by: Magier
Course usually offered in fall term
Activity: Lecture
1 Course Unit

TELU 410 Beginning Telugu Part II
For BA Students: Language Course
Taught by: Magier
Course usually offered in spring term
Prerequisites: Beginning Telugu Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Lecture
1 Course Unit

TELU 429 Intermediate Telugu Part I
This course is designed to expand the students’ basic language skills in Telugu in order to allow them to function adequately in a Telugu-speaking environment, to immerse themselves in the rich Andhra culture, and to accomplish a more advanced competency in an interesting foreign language. This course is also aimed at students planning to conduct scholarly research in Telugu history, literature or society, or humanities or social science fieldwork in Telugu speaking areas.
For BA Students: Language Course
Taught by: Magier
Two terms. student must enter first term.
Prerequisites: Beginning Telugu Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Lecture
1 Course Unit

TELU 430 Intermediate Telugu Part II
This course is designed to expand the students’ basic language skills in Telugu in order to allow them to function adequately in a Telugu-speaking environment, to immerse themselves in the rich Andhra culture, and to accomplish a more advanced competency in an interesting foreign language. This course is also aimed at students planning to conduct scholarly research in Telugu history, literature or society, or humanities or social science fieldwork in Telugu speaking areas.
For BA Students: Last Language Course
Taught by: Sundaram
Prerequisites: Intermediate Telugu Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit
THAR 073 Lit and Visual Art
Also Offered As: CIMS 073, ENGL 073
Activity: Lecture
1 Course Unit

THAR 076 Theatre in Philadelphia
This course will investigate the state of the contemporary, non-profit theatre culture of Philadelphia by examining the history, artistic mission, and current production work of selected city theatre companies. This course will also explore the creative process of theatre-making as undertaken by these theatres through the reading of plays being produced by them this fall, through an analysis of the collaborative contribution of the playwright, director, actors, and designers to the creation of a production, and, finally, through attendance at those productions mounted by the theatre companies under investigation. The members of the class will write individual essays responding to these productions, do research and give group presentations on other Philadelphia theatre companies, and participate daily in a spirited dialogue about the vitality, level of artistic accomplishment, and cultural/social value of contemporary theatre in Philadelphia
Taught by: Malague and Schlatter
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Frequently offered as a Freshmen Seminar

THAR 100 Introduction to Theatre Arts
An introduction to different approaches to understanding and analyzing performance, representational theatre, and non-representational theatre, using as test cases both dramatic scripts and live performance. Different aspects of theatre art and theatrical process (acting, design, audience, musical theatre) will be taught by guest lecturers drawn from the Theatre Arts faculty and local professionals.
For BA Students: Arts and Letters Sector
Taught by: Malague
One-term course offered either term
Activity: Lecture
1 Course Unit

THAR 101 Theatre, History, Culture 1: Classical to Middle Class
This course investigates the history of theatre practice in Europe and Asia from Fifth-Century Athens to roughly the end of the Eighteenth Century. In addition to analyzing major dramatic works, this course examines the evolution of production methods - scenography, acting, costuming, theatre architecture - across cultures and key socio-historical moments. Readings will be drawn from historical research, theoretical writings, plays and contemporary social documents. A particular focus will be on the integral role that the theatre plays as a cultural institution in the ongoing civic life of major cities. The course approaches theatre as broadly interdisciplinary and examines its intersection with religious practice, political developments, national identity, geography, the visual arts and the urban landscape.
For BA Students: Arts and Letters Sector
Also Offered As: ENGL 087
Activity: Lecture
1 Course Unit

THAR 102 Theatre, History, Culture 2 : Romantics, Realists and Revolutionaries
This course investigates the history of theatre practice from the end of the Eighteenth-Century to the present, with an emphasis on the interplay of mainstream practices with the newly emerging aesthetics of acting, scenography, and theatrical theory, and the interplay of popular entertainment and audiences with the self-defined aesthetic elitism of the Avant Garde. Among the aesthetics and phenomena we will examine are romanticism and melodrama; bourgeois realism and revolutionary naturalism; emotional-realist acting; the reaction against realism; political theatre; physical theatre; theatre and media; non-dramatic theatre; and theatre that challenges long-standing categories of national identity, empire, gender, and sexuality.
For BA Students: Arts and Letters Sector
Also Offered As: COML 111, ENGL 097
Activity: Lecture
1 Course Unit

THAR 114 Playwriting Workshop
This course is designed as a hands-on workshop in the art and craft of dramatic writing. It involves the study of existing plays, the systematic exploration of such elements as storymaking, plot, structure, theme, character, dialogue, setting, etc.; and most importantly, the development of students' own plays through a series of written assignments and in-class exercises. Since a great deal of this work takes place in class -- through lectures, discussions, spontaneous writing exercises, and the reading of student work -- weekly attendance and active participation is crucial.
Course usually offered in spring term
Also Offered As: ENGL 114
Activity: Seminar
1 Course Unit

THAR 120 Introduction to Acting
Rooted in the system devised by Constantine Stanislavsky, but incorporating a wide variety of approaches, including improvisation, this course strongly stresses a commitment to actor work and responsibility to one's fellow actors. Practical work is supplemented by readings from Stanislavsky and a variety of other acting theorists that may include Uta Hagen, Robert Cohen, Stella Adler, among others. Students are required to submit short essays over the course of the semester in response to the readings and in preparation for their final scene project.
Taught by: Ferguson, Malague, Schlatter, and Staff
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Required of all Theatre Arts Majors
THAR 121 Introduction to Directing
This class will introduce the basic principals of stage directing, beginning with the fundamentals of three-dimensional storytelling in script and character analysis. The aim of this course is to provide students with a basic knowledge of directing through an introduction to the functional tools of the craft. Classes provide lectures and practical work in dealing with topics such as the function of the director, analyzing a script, visual composition, blocking, stage business, and working with actors. This course is a prerequisite for Advanced Directing.
Taught by: Ferguson, Malague, Mazer, Schlatter
One-term course offered either term
Prerequisite: Thar 120
Activity: Seminar
1 Course Unit
Notes: Required of all Theatre Arts Majors

THAR 125 The Play: Structure, Style, Meaning
How does one read a play? Theatre, as a discipline, focuses on the traditions of live performance. In those traditions, a play text must be read not only as a piece of literature, but as a kind of "blueprint" from which productions are built. This course will introduce students to a variety of approaches to reading plays and performance pieces. Drawing on a wide range of dramatic texts from different periods and places, we will examine how plays are made, considering issues such as structure, genre, style, character, and language, as well as the use of time, space, and theatrical effects. Although the course is devoted to the reading and analysis of plays, we will also view selected live and/or filmed versions of several of the scripts we study, assessing their translation from page to stage.
Taught by: Malague
One-term course offered either term
Also Offered As: ENGL 056
Activity: Lecture
1 Course Unit

THAR 130 Introduction to Light, Set, and Costume Design
Design for theatre (and all of the performing arts) is a dynamic, collaborative process that engages both intellect and emotion in staging the dramatic moment. The personal vision of the designer must navigate the often-uncharted waters of the production process, from the earliest, personal moments of design inspiration to the opening night performance. Design flows from creativity, is structured by research and theory, and is realized in living form by collaboration in the dynamic process of theatre-making. This class will integrate history, theory and practice of stage design in the interactive setting of the Collaborative Classroom in Van Pelt Library in this special interdisciplinary, active-learning course offering open to all Penn students. Group and individual projects, field visits, practical projects and guest speakers will be featured in this newly-revised course.
Taught by: Baratta and Johnson
One-term course offered either term
Also Offered As: CIMS 131
Activity: Seminar
1 Course Unit
Notes: Required of all Theatre Arts Majors

THAR 131 Concepts of Lighting
In this course we will cover the basic concepts of the art and craft of Stage Lighting Design. As a craft we will examine mechanics and technology of lighting design including light sources, power distribution, optics, and control. As an art we will explore how lighting ties together all the visual elements of a production and helps create an appropriate atmosphere that heightens the audience's understanding and enjoyment of the play. Topics include: what light is, what it does, and how light influences our perception and understanding of what we see. Exercises will help the student learn how to see and to understand how light shapes and affects the appearance people and objects on stage and in everyday life. Projects work will emphasize design theory and practice (design methods, script analysis, and drafting skills). Lighting design has it roots in the theatre. The theatre continues to be a prime training ground for lighting designers, no matter what their field.
Taught by: Whinnery
One-term course offered either term
Activity: Seminar
1 Course Unit

THAR 132 Costume
Costume history and design provides a framework for organized study and practice in this particular facet of theatre production. It is a one-semester course, scheduled to meet once a week for a three hour session.
Course usually offered in spring term
Activity: Seminar
1 Course Unit

THAR 133 Concepts of Stage Design
In this course we will cover the basic concepts of Scenic Design for the stage. Scene Design is about the look or physical appearance of the stage for a play. It reflects the way that the stage is composed artistically in regard to props, actors, shapes and color. We will explore Scene Design and the Theatre (story telling, place and local, time and period, society and culture), Scene Design as a Visual Art (principals of design and composition, style, use of space, expression of concept) and examine how it ties together all the visual elements of a production to create an appropriate atmosphere that heightens the audience's understanding and enjoyment of the play. Topics will include: Script Analysis, Technical Production, Period Decor and Ornament; Drawing, Drafting, Model Making, and Scene Painting.
Taught by: Whinnery
Course usually offered in fall term
Activity: Seminar
1 Course Unit
THAR 170 Voice for the Actor
This introductory course is designed to help the actor find new freedom and range of expression with their voice and to connect their voice to their impulse. Our focus on relaxation, sensitivity and awareness, using Fitzmaurice Voicework techniques inspired by yoga and meditation, help the student access and develop their own authentic sound. They will learn how to support their voice in a healthy way, with a view to longevity, spontaneity and flexibility of use. In this course, these kinds of vocal exercises will be applied to short, character monologues, in order to foster sensitivity to our voices and breath and to the habits and tensions we have formed around speaking in public. For an actor, reconnecting with their authentic voice is essential for an honest, connected and compelling performance. This training is also useful for anyone who wants to speak in public with confidence, sincerity and ease.
Taught by: Doherty
Course usually offered in fall term
Prerequisites: THAR 120 or equivalent.
Activity: Seminar
1 Course Unit

THAR 171 Movement for the Actor
The study of the art of bodily expression throughout history in theory and practice, from Classical and Oriental, African and Latin forms of dance and movement theater to the contemporary dance and theater, including mime, modern dance, post modern dance, physical theater, film, and performance art.
Taught by: Fishbeck
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: Primarily for majors. Non-majors need permission of the instructor

THAR 214 Advanced Playwriting
This course is intended to reinforce and build upon the areas covered in Level 1 Playwriting (THAR-114) so that students can refine the skills they've acquired and take them to the next level. Topics covered will include techniques for approaching the first draft, in-depth characterization, dramatic structure, conflict, shaping the action, language/dialogue (incl. subtext, rhythm, imagery, exposition etc.), how to analyze your own work as a playwright, dealing with feedback, the drafting process, techniques for rewriting, collaboration (with directors, actors etc) and the 'business of the art' - working with theatres, agents, dramaturgs etc. Students will undertake to write their own one-act plays over the course. The classes will be a mixture of lecture, discussion, study of dramatic texts, writing exercises and in-class analysis of students' work.
Taught by: Bryan Delaney
Prerequisite: Thar 114 - Playwriting Workshop or Permit of the instructor
Activity: Lecture
1 Course Unit

THAR 220 Advanced Acting
This course continues the work begun in the Introduction to Acting class. The specific focus of the course will be on helping students to connect more deeply and truthfully with each other on stage, freeing up the body of the actor to fulfill the physical demands of characterization, and analyzing the dramatic text to clarify objectives and focus action through unit breakdown. Attention will also be given to helping students work through specific problems and personal, creative obstacles. The basis of the course will be scene work taken from the twentieth-century repertoire (realist and non-realist plays), a classical monologue, and exercises taken from a variety of performance traditions. The course also includes readings from modern theorists and practitioners.
Taught by: Ferguson, Malague, Schlatter
Course not offered every year
Prerequisites: THAR 120 or by special permission of the instructor.
Activity: Seminar
1 Course Unit

THAR 221 Advanced Directing
The primary goal of this course is to develop students' practical skills and methods as stage directors. The course continues the work of Introduction to Directing, focusing on effective text analysis, communicating with actors, and use of theatrical space and movement to tell the story of the play. The course is structured as a workshop, with students presenting and discussing each other's scene work in class. Students are responsible for three large projects, and each project is presented and discussed twice, first in its workshop and then in its final stage of development. The final project involves minimally staging a one-act play for an audience. Course work is supplemented by readings on the work of major modern directors, and by viewing and writing critiques of selected theatre performances.
Taught by: Schlatter
Course not offered every year
Prerequisite: THAR 121
Activity: Seminar
1 Course Unit

THAR 236 Topics in Renaissance Drama: Acting Shakespeare
This is a hands-on studio course designed to empower actors (and directors, designers and dramaturgs) to use the structure of Shakespeare's language and the conventions of Shakespeare's stage to build performance, using the skills and method of the contemporary actor. After the class works collectively on sonnets and speeches, all of the speech- and scene-work will be drawn from a single Shakespeare play (to be determined), with two reciprocal goals: to use the script to build the performance, and to use what we discover through performance to build an interpretation of the script. NOTE: the normal prerequisite for this course is THAR 120 or THAR 121 or their equivalents; but exceptions will be made by permission of the instructor.
Taught by: Mazzer
Course not offered every year
Also Offered As: ENGL 236
Prerequisite: THAR 120 or 121 or their equivalent
Activity: Seminar
1 Course Unit
Notes: This course is not open to freshmen. Instructor permission is required.
THAR 240 Advanced Topics in Theatre History
The purpose of this course is to introduce students to the basic materials and methods of theatre history and historiography, as applied to a particular topic, organized around a specific period, national group, or aesthetic issue. This course is concerned with methodological questions: how the history of theatre can be documented; how primary documents, secondary accounts, and historical and critical analyses can be synthesized; how the various components of the theatrical event—acting, scenography, playhouse architecture, audience composition, the financial and structural organization of the theatre industry, etc.—relate to one another; and how the theatre is socially and culturally constructed as an art form in relation to the politics and culture of a society in a particular time and place.
Taught by: Mazer
One-term course offered either term
Also Offered As: ENGL 226, ENGL 276
Activity: Seminar
1 Course Unit
Notes: This class is the next level up from Thar 140 - Topics in Theatre History.

THAR 241 Actors and Acting: Page, Stage and Screen
We are all dazzled by the performances of certain actors, famous and not; nearly everyone has a favorite actor, or a favorite film or stage performance. This course will pursue the question: How do actors do what they do? We will explore acting theory and practice, examining major treatises on the acting process, the work of specific actors, and their relationship to iconic texts. Examples might include: Method acting traditions and the performances of actors such as Marlon Brando and Geraldine Page in the plays (and films) of Tennessee Williams; and Shakespearean acting as performed by legends like Laurence Olivier and John Gielgud. We will compare British and American acting traditions, and will consider the different acting styles associated with particular historical periods and theatrical genres. Readings will include actor interviews, reviews, biographies, and selected scripts; viewing will include representative moments of brilliant acting on film, as well as live performances on the London stage. We will also plan to converse with actors we see, through class visits or attendance at talk-backs.
Course usually offered summer term only
Also Offered As: ENGL 276
Activity: Seminar
1 Course Unit

THAR 250 Theatre Workshop
This course will examine a specific aspect of theatrical practice, taught by a visiting professional theatre artist. The course, with different topics, may be repeated for credit. Recent topics have included performance art, Jacques LeCoq technique, Suzuki, and Viewpoints.
Taught by: Various Theatre Professionals
Course not offered every year
Also Offered As: ENGL 276
Activity: Seminar
1 Course Unit
Notes: Cross-listings are contingent upon topics offered. For the current topics contact the Theatre Arts office.

THAR 270 Acting American Drama: Players and Playwrights
This course will investigate the interrelationship between American drama and American acting techniques. Connections to be considered include: The Group Theatre and Clifford Odets; The Actors Studio and Tennessee Williams; The Meisner Technique and David Mamet. We will also view the work of individual actors in filmed and live versions of the plays we study, examining the many ways in which actors collaborate with playwrights by creating roles and reinterpreting them. Readings will include the acting texts of American master teachers such as Lee Strasberg, Stella Adler, Sanford Meisner, and Uta Hagen, as well as a number of American plays. This course will include acting exercises and scene work.
Taught by: Malague
Course not offered every year
Also Offered As: ENGL 256
Activity: Seminar
1 Course Unit

THAR 271 American Musical Theatre
The American musical is an unapologetically popular art form, but many of the works that come from this tradition have advanced and contributed to the canon of theatre as a whole. In this course we will focus on both music and texts to explore ways in which the musical builds on existing theatrical traditions, as well as alters and reshapes them. Finally, it is precisely because the musical is a popular theatrical form that we can discuss changing public tastes, and the financial pressures inherent in mounting a production. Beginning with early roots in operetta, we will survey the works of prominent writers in the American musical theatre, including Kern, Berlin, Gershwijn, Porter, Rodgers, Hart, Hammerstein, Bernstein, Sondheim and others. Class lecture/discussions will be illustrated with recorded examples.
Taught by: Fox
Course not offered every year
Also Offered As: CIMS 271, ENGL 274
Activity: Seminar
1 Course Unit

THAR 272 Twentieth Century American Theatre and Drama
This course examines the development of the modern American theatre from the turn of the century to the present day. Progressing decade by decade the course investigates the work of playwrights such as Eugene O’Neil, Arthur Miller, Tennessee Williams, Edward Albee, David Mamet, August Wilson and Tony Kushner, theatre companies such as the Provincetown Players and the Group Theatre, directors, actors, and designers. Some focus will also be given to major theatrical movements such as the Federal Theatre Project, Off-Broadway, regional theatre, experimental theatre of the Sixties, and feminist theatre.
Taught by: Schlatter
Course not offered every year
Activity: Lecture
1 Course Unit
THAR 273 Dark Comedy
From Plautus to Ionesco, dark comedies explore concepts and ideas seemingly at odds with comic traditions and structures they employ. This class uses the study of theory, history, plays and theatrical technique to explore the significance and effect of tragicomedies. Students will acquire an understanding of the genre’s unique characteristics through textual and practical work and through viewing pertinent films. In addition to reading and discussing plays and criticism, students will be required to perform a scene from a tragicomic play, experimenting with and creating tragicomic effect through performance. This course will be roughly organized into three sections: historic precedents (Plautus, Shakespeare, Moliere), 19th century transitional dramas (Chekhov, Ibsen) and 20th century tragicomedies, in which the bulk of the course readings will be done (Beckett, Ionesco, Pinter, Stoppard, Henley, etc.).
Taught by: Ferguson
Course not offered every year
Also Offered As: ENGL 292
Activity: Seminar
1 Course Unit

THAR 274 Dramaturgy
This course will examine the functions and methods of the dramaturg—the person in the theatrical process who advises the artistic collaborators on (among other things) new play development, the structure of the script, the playwright’s biography and other writings, the play’s first production and its subsequent production history, and the historical and regional details of the period depicted in the plays action. We will study the history of the dramaturg in the American theatre and discuss contemporary issues relating to the dramaturg’s contribution to the theatrical production (including the legal debates about the dramaturg’s contribution to the creation of RENT). And, in creative teams, the class will create dramaturgical portfolios for a season of imaginary (and, potentially, a few actual) theatrical productions.
Taught by: Mazer
Course not offered every year
Also Offered As: ENGL 256
Activity: Seminar
1 Course Unit

THAR 275 Advanced Topics in Theatre
This course will combine an intensive practical and intellectual investigation of some area of the making of theatre: performance techniques, theatrical styles, a particular period of theatre history. Please visit the Theatre Arts Program website for accurate information on all available Spring 2017 THAR275 special topics courses: https://theatre.sas.upenn.edu/news/spring-2017-special-course-offerings
Please visit the Theatre Arts Program website for accurate information on all available Spring 2017 THAR275 special topics courses: https://theatre.sas.upenn.edu/news/spring-2017-special-course-offerings
Taught by: Fox, Ferguson, Malague, Mazer, Schlatter
Course not offered every year
Also Offered As: CIMS 225, ENGL 276, ENGL 356, HIST 247, URBS 274
Activity: Seminar
1 Course Unit
Notes: This course, which may with different topics, be repeated for credit, will examine a specific aspect of theatrical practice. Recent topics have included performance art, Jacques Lecoq technique, improvisation, and puppetry.

THAR 276 Theatre Criticism
This course is both a practical writing course, and an examination of the role of the various kinds of theatre criticism and their relation to contemporary theatrical art and the theatre industry. Students (and faculty) will write (and rewrite) one theatre review a week, based on a theatre event everyone will see. Additional readings will be drawn from theatre critics and reviewers through history (Hazlitt, Shaw, Beerbohm, Agate, Clurman, Brustein, Rich, Wardle, Nightingale, Billington, and others).
Taught by: Mazer
Course not offered every year
Activity: Seminar
1 Course Unit

THAR 277 20th Century Acting Theory and Practice
This course examines the making of theatre from the actor’s perspective, focusing on major twentieth century forms and the acting techniques constructed to produce them. Through an investigation of theories of such practitioners as Stanislavsky, Brecht, and Grotowski, the class will consider contrasting models for their actor’s work, and such issues as the actor’s relationship to the audience, director, playwright, and text. The course will include practical performance exercises and an exploration of representative play scripts.
Taught by: Malague
Course not offered every year
Activity: Seminar
1 Course Unit

THAR 278 Variety Arts
This course examines a series of “variety arts” movements – theatre in which striking visual and auditory elements are even more important than the traditional story and script. Topics generally include: Grand Guignol, the French “theatre of fear and terror”, where shocking images are used to stimulate and frighten the audience; tableaux vivant, in which actors create stage pictures based on famous paintings and other visual icons; concert song and ballad, where performers interpret character and story through vocal means; American musical theatre, in which music and dance become the highest form of expression; German cabarets, where artists use a combination of song and text to create politically and culturally controversial theatre; contemporary performance art, a genre that mixes comedy, the visual arts, dance, music and text; and more. The course also explores how these visual and auditory elements might be used by actors, directors, and designers to enhance and enrich our more traditional, text-based theatre.
Taught by: Fox
Course not offered every year
Activity: Seminar
1 Course Unit
THAR 279 Women in Theatre and Performance
Theatre began as a form that excluded women entirely. The plays of ancient Greece and Elizabethan England were written and performed only by men, beginning a long tradition of theatre that represented women only from male perspectives. Has that tradition been so dominant for so long that women’s voices on stage are still a novelty? This course focuses on a wide range of plays and performances by and about women; the work we read (and view) will evidence artistic attempts to represent women’s lives, experiences and perspectives on the stage. Among the issues encountered and examined in these works are the roles of love, sexuality, friendship, career, community, marriage, motherhood, family, and feminism in women’s lives - as well as the economic and political position(s) of women in society. The course will also offer contextual background on feminist theatre history, theory, and literature, as well as the diverse (and divergent) creative efforts of female artists to use use live performance as a means of creating social and political change.
Taught by: Malague
Course not offered every year
Also Offered As: ENGL 356, GSWS 279
Activity: Seminar
1 Course Unit
Notes: This is a topics class which include: Dangerous Women and Provocative Performance.

THAR 320 Scene Study
Scene Study is an advanced acting class that combines intensive script analysis with performance of scenes; material to be explored will be chosen specifically for the members enrolled in class. Open to students who have successfully completed Introduction to Acting, this course continues with greater emphasis on the actor’s work with the text. We will study several plays together as a group, conducting Stanislavskian table work. We will then workshop and perform scenes from these plays in subsequent class sessions. In consultation with the instructor, students will identify individual goals, building on discoveries made in other Theatre Arts courses and/or prior stage work, exploring roles and plays that present actors with new challenges and expand their range. Depending on the number of students enrolled in the class, we are likely to perform at least three scenes and a monologue. Plays will be read alongside key theoretical texts, and class work will be complemented by attendance at selected live productions on campus and in Philadelphia.
Taught by: Malague
Course usually offered in fall term
Prerequisite: THAR 220
Activity: Seminar
1 Course Unit

THAR 350 Rehearsal and Performance
Theatre Rehearsal and Performance provides students with deep intellectual and artistic immersion in the theatrical process through intensive research, rehearsal, and performance of a full-length stage piece. Students may enroll in this course as actors (by audition only) or as assistant directors, stage managers, dramaturgs, or designers (by permission of the instructor). Each semester, the play will be featured in the Theatre Arts Program production season; the class meeting times will vary, but will typically consist of 16-20 hours per week in the evening hours.
Taught by: Ferguson, Fox, Malague, Mazer and Schlatter
One-term course offered either term
Also Offered As: ENGL 256
Activity: Studio
1 Course Unit

THAR 375 Feminist Theatre
Taught by: Malague
Course not offered every year
Also Offered As: ENGL 270, ENGL 371
Activity: Seminar
1 Course Unit

THAR 385 Presenting the Arts Grad
Graduate Level - This class meets in conjuntion with Thar 285. This graduate level class will also include additional assignments above the 285 requirements as discussed with the instructor for that semester. A study of the creation and presentation of art (e.g., theater, film, sculpture), the cultural context of creativity and the management of individual and institutional performance and exhibition. A combination of lectures by instructors and practitioners, case studies and consulting projects with local institutions will illustrate the relationship between creativity and presentation. Students will be required to write papers, proposals, and complete a term project.
Activity: Lecture
1 Course Unit

THAR 485 Japanese Theatre
Japan has an enormously rich and varied theatrical tradition. In this course, we will examine Japanese theatre in historical and comparative contexts.
Taught by: Kano

Turkish Language (TURK)

TURK 021 Elementary Turkish I
This is a course for beginners who have no previous knowledge of Turkish. Using a communicative approach, Elementary Turkish introduces basic vocabulary and grammar rules and focuses on building language competencies in listening, reading, speaking and writing. By the end of the course, students will be able to participate in simple conversations, to know daily expressions, and will understand simple dialogues in day-to-day context and will be able to count and tell time. Will be able to speak about events that happened in the past and express plans for the future. Students will also develop writing strategies that will allow them to write simple letters and fill in commonly-used forms.
For BA Students: Language Course
Taught by: Hatiboglu
Course usually offered in fall term
Also Offered As: TURK 621
Activity: Lecture
1 Course Unit
TURK 022 Elementary Turkish II
This course is a continuation of TURK 021 and is designed to strengthen and extend students' listening, speaking, reading and writing competence and to deepen an understanding of Turkish people in Turkey. By the end of this course, students will be able to handle a variety of day to day needs in Turkish-speaking settings and engage in simple conversations. Students can expect to be able to order food and drinks, purchase things, and to be able to be familiar with current social topics. Students will be able to talk about all tenses, present, future, past, past continuous, make comparisons, describe people and things in detail, make travel plans, make reservations in hotels and holiday resorts, write complaint letters. By the end of the course, students will be able to talk about their studies and their plans for the future. Also, students will develop reading strategies that should allow them to understand the general meaning of articles, and short literary texts. Students will learn practical life in Turkey and will explore Turkish culture on the internet.
For BA Students: Language Course
Taught by: Hatiboglu
Course usually offered in spring term
Also Offered As: TURK 622
Prerequisites: TURK 021, Elementary Turkish I, or equivalent.
Activity: Lecture
1 Course Unit

TURK 023 Intermediate Turkish I
A continuation of elementary Turkish, with emphasis on grammar and reading. This course is for students who have previous knowledge of Turkish or students who have completed Elementary Turkish I and II. This course is designed to improve students' writing and speaking competence, to increase vocabulary, to deepen grammar usage and to help develop effective reading and listening strategies in Turkish, and in order give them cultural knowledge, students are exposed to authentic materials.
For BA Students: Language Course
Taught by: Hatiboglu
Course usually offered in fall term
Also Offered As: TURK 623
Prerequisites: TURK 022 or equivalent.
Activity: Lecture
1 Course Unit

TURK 024 Intermediate Turkish II
Expands students writing and speaking competence in Turkish, increases vocabulary, and helps students' practice effective reading and listening strategies. Our in-class discussions are based on role-plays and weekly readings and news reports from TV and newspapers. We create discussion groups and let them communicate through, threaded discussions, chat rooms and skype. The review of grammar will not be the primary focus of the course. Students will, expand and deepen their knowledge of grammar through specific grammar exercises. They will have opportunity to practice and read about the cultural and historical issues and get prepared for an advanced level Turkish.
For BA Students: Last Language Course
Taught by: Hatiboglu
Course usually offered in spring term
Also Offered As: TURK 624
Activity: Lecture
1 Course Unit

TURK 025 Advanced Modern Turkish I
The study of modern Turkish at the advanced level; emphasis on grammar and reading, focusing on Business Turkish. Interviews with professionals from different business groups will take place, such as, education, medicine, business law and political science.
For BA Students: Advanced Language Course
Taught by: Hatiboglu
Course usually offered in fall term
Also Offered As: TURK 625
Prerequisites: TURK 024, Intermediate Turkish II
Activity: Lecture
1 Course Unit

TURK 026 Advanced Modern Turkish II
This course is designed to improve students writing and speaking levels through role plays, case studies, essays, interviews, reading articles from newspapers, analyzing books of contemporary Turkish authors such as Orhan Pamuk, Elif Safak, Ayse Kulin, Yasar Kemal and introduce students to Turkish poets such as Nazim Hikmet, Orhan Veli, Ozdemir Asaf, Murathan Mungan, Can Yucel. During each lesson, students will be asked to interview each other on given news articles about different subjects including economy, politics, sports, art, music and daily news. These conversations will take place on student’s level of Turkish knowledge.
Taught by: Hatiboglu
Course usually offered in spring term
Also Offered As: TURK 626
Prerequisites: TURK 025, Advanced Modern Turkish I, or equivalent
Activity: Lecture
1 Course Unit

TURK 027 Advanced Spoken Turkish and Cinema I
In this course, we will look at differing degrees of interaction between literature and the films it inspires. Discussions of each novel will be followed by screening the related film, allowing us to explore themes such as the different forms of banditry (old school vs. organized), honor killings, the use of books in films, the problems of artistic representation. This course will give students the opportunity to improve significantly written and spoken discourse strategies and raise language competence to an academic register. Students work across Turkish Language, literary genres and media as they interpret and analyze cultural, political and historical moments in Turkish movies. Students will attempt to understand how political shifts over the past 20 years have impacted the current situation and cultural conception, religious and cultural norms and traditions. Contemporary Turkish authors' books will be analyzed and discussed in this course. We'll have sessions in Penn Museum related to exhibitions from Turkey and the region.
For BA Students: Advanced Language Course

TURK 121 Advanced Turkish Culture & Media I
This course is for students who are from all different levels of Turkish knowledge. They are expected to write and talk about Turkish movies, culture, politics according to their own level and pace. They will talk to Turkish visitors and interview them. Turkish movies will be the part of the course and once a month, students will watch a Turkish movie and analyze it. Discussions will take place and students will write essays about the movie. This course is designed with a technology-rich, project-based approach. The materials will go beyond instruction in grammar and vocabulary to support the acquisition of socio-cultural pragmatics, and intercultural learning.
For BA Students: Advanced Language Course
Taught by: Hatiboglu
Course usually offered in fall term
Also Offered As: TURK 521
Activity: Seminar
1 Course Unit

TURK 122 Advanced Turkish Culture & Media II
Similar to TURK 212, Advanced Turkish Culture & Media I, in this course students also will have exposure to social Turkish clubs and to establish their own. They will arrange their Turkish tea parties and learn about Turkish cuisine. Expose Turkish daily news and interview Turkish business people in Turkish. Team spirit or ethics with those of the United States. Students will present and prepare a drama. Mainly students will create and decide their activities and discussions and the instructor will just monitor them most of time. They will continue watching Turkish movies and expose to Turkish culture through these films. After each movie discussions and essay writings will be expected.

Prerequisites: Two semesters of Turkish and two semesters of Arabic or Persian OR four semesters of Turkish or equivalent
Activity: Seminar
1 Course Unit

TURK 631 ELEMENTARY UZBEK I
Designed to cover beginning college levels of language instruction. Uzbek: An Elementary Textbook provides learners and instructors with a wide selection of materials and task-oriented activities to facilitate the development of language learning. It offers a thematically organized and integrative approach to the Uzbek language and its culture, including a functional approach to grammar, an emphasis on integrated skills development, and the use of authentic materials such as videos filmed in various regions of Uzbekistan.Uzbek: An Elementary Textbook contains one CD-ROM that includes authentic audio and video materials to accompany the text and integrated, interactive exercises and games, all in Flash format and all of which are keyed to the textbook. It includes a supplementary Cyrillic reader, an extensive glossary, and four-color illustrations and photographs throughout.
Course usually offered in fall term
Also Offered As: TURK 031
Activity: Lecture

Urban Studies (URBS)

URBS 010 Homelessness & Urban Inequality
This freshman seminar examines the homelessness problem from a variety of scientific and policy perspectives. Contemporary homelessness differs significantly from related conditions of destitute poverty during other eras of our nation's history. Advocates, researchers and policymakers have all played key roles in defining the current problem, measuring its prevalence, and designing interventions to reduce it. The first section of this course examines the definitional and measurement issues, and how they affect our understanding of the scale and composition of the problem. Explanations for homelessness have also been varied, and the second part of the course focuses on examining the merits of some of those explanations, and in particular, the role of the affordable housing crisis. The third section of the course focuses on the dynamics of homelessness, combining evidence from ethnographic studies of how people become homeless and experience homelessness, with quantitative research on the patterns of entry and exit from the condition. The final section of the course turns to the approaches taken by policymakers and advocates to address the problem, and considers the efficacy and quandaries associated with various policy strategies. The course concludes by contemplating the future of homelessness research and public policy.
Taught by: Culhane
Course usually offered in fall term
Also Offered As: AFRC 041, SOCI 041
Activity: Seminar
1 Course Unit

URBS 011 Crime and Punishment
How have definitions of crime and forms of punishment changed over time? What have been the uses and legacy of extra-legal violence? How have the forms of crime and punishment reflected the structure of American society? Using both historical and contemporary texts, this freshman seminar will explore these and other questions and in the process analyze the development of juvenile justice, the organization of corrections, the application of the death penalty, and the rise of the drug economy.
Taught by: Schneider
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Previously URBS 110
URBS 018 Freshman seminar
The primary goal of the freshman seminar program is to provide every freshman the opportunity for a direct personal encounter with a faculty member in a small sitting devoted to a significant intellectual endeavor. Specific topics be posted at the beginning of each academic year. Please see the College Freshman seminar website for information on course offerings: http://www.college.upenn.edu/requirements-courses.
Course usually offered in fall term
Also Offered As: MUSC 018
Activity: Seminar
1 Course Unit

URBS 046 Urban Sound Studies
Sound is all around us and shapes almost every aspect of our everyday days, and yet, in comparison to our rich descriptions of visual culture, we often lack the explanatory power to analyze and assess the overwhelming influence of the sonic. This introduction to sound studies course will combine a rigorous conceptual and a creative, hands-on approach. We will explore how sound and auditory cultures have been theorized, how soundscapes shape built environments and transform social relations, and how technologies have affected our relationships to sound. The course will focus on urban spaces. Cutting across disciplinary, historical and geographical boundaries, we will cover themes including sound-reproduction and modern technologies, sonic consumption, noise regulation, protest, the politics of listening under Trumpism. We will encounter a wide variety of materials from literary texts to mobile apps and video games, not to mention a vast range of sounds drawn from fieldwork around the world from Las Vegas to Shanghai, Paris to Johannesburg. Alongside written work, you will make fieldwork recordings on the streets of Philadelphia and develop creative projects using media of your choice to reflect upon urban sound.
Taught by: Waltham Smith
Course usually offered in fall term
Also Offered As: MUSC 046
Activity: Lecture
1 Course Unit

URBS 050 Womanism and Identity Politics in the Realm of Hip-Hop
This course centers on the intersections of womanism, woman of color identity development, and agency within hip-hop culture. We will touch on several topics that uncover the condition of minoritized women in hip-hop media, including creating/owning space, lyrical assault, defining womanhood, sexuality, and fetishes. In exploring music, literature, advertisements, film, and television, we will discuss the ways women of color construct understandings of self, while navigating and reimagining reality within hip-hop contexts.
Taught by: Patterson
Also Offered As: GSWS 040
Activity: Seminar
1 Course Unit

URBS 104 Transformation of Urban America
The course traces the economic, social, and political history of American cities after World War II. It focuses on how the economic problems of the industrial city were compounded by the racial conflicts of the 1950s and 1960s and the fiscal crises of the 1970s. The last part of the course examines the forces that have led to the revitalization of cities in recent years.
For BA Students: History and Tradition Sector
Taught by: Vitiello
Course usually offered in spring term
Also Offered As: HIST 153
Activity: Lecture
1 Course Unit

URBS 106 Freshman Seminar
Topic varies. Fall 2017: This course will examine the fascination with ecology in artistic thinking from late Modernism to the present, with a particular attention to the developing interest in social and environmental systems in the late 1960s and early 1970s. From Robert Smithson's Spiral Jetty to Rachel Carson's Silent Spring, artists, scholars and activists of this generation were deeply invested in the interconnectedness of life in all its forms. This new sensitivity to the affinities that bind individuals, and our vulnerability to social, political and economic environments, enabled new aesthetic approaches that have continued relevance today. As part of the course, we will meet with a range of artists, curators and institutions in Philadelphia who are continuing these investigations, including the Colored Girls Museum in Germantown and the Health Ecologies Lab here at Penn. No familiarity with contemporary art is required.
Also Offered As: ARTH 100, CIMS 016, ENGL 016
Activity: Seminar
1 Course Unit
Notes: For Freshmen Only
URBS 112 Urban Sociology
This course is a comprehensive introduction to the sociological study of urban areas. This includes more general topics as the rise of cities and theories urbanism, as well as more specific areas of inquiry, including American urbanism, segregation, urban poverty, suburbanization and sprawl, neighborhoods and crime, and immigrant ghettos. The course will also devote significant attention to globalization and the process of urbanization in less developed counties.
Taught by: Mitchell
Course not offered every year
Also Offered As: ANTH 107, SAST 002
Activity: Lecture
1 Course Unit

URBS 121 Origin and Culture of Cities
The UN estimates that 2.9 of the world's 6.1 billion people live in cities and that this percentage is rapidly increasing in many parts of the world. This course examines urban life and urban problems by providing anthropological perspectives on this distinctive form of human association and land use. First we will examine the "origin" of cities, focusing on several of the places where cities first developed, including Mesopotamia and the Valley of Mexico. We will then investigate the internal structure of non-industrial cities by looking at case studies from around the world and from connections between the cities of the past and the city in which we live and work today.
For BA Students: History and Tradition Sector
Taught by: Zettler
Course usually offered in fall term
Also Offered As: ANTH 121, NELC 103
Activity: Lecture
1 Course Unit

URBS 122 The City in South Asia
This interdisciplinary social science course examines key topics, themes, and analytic methods in the study of South Asia by focusing on significant South Asian cities. With one-fifth of the world's population, South Asia and its urban centers are playing an increasingly important role in recent global economic transformations, resulting in fundamental changes within both the subcontinent and the larger world. Drawing primarily on ethnographic studies of South Asia in the context of rapid historical change, the course also incorporates research drawn from urban studies, architecture, political science, and history, as well as fiction and film. Topics include globalization and new economic dynamics in South Asia; the formation of a new urban middle class; consumption and consumer culture; urban political formations, democratic institutions, and practices; criminality & the underworld, population growth, changes in the built environment, and demographic shifts; everyday life in South Asia and ethnic, and ethnic, cultural, and linguistic identities, differences, and violence in South Asia's urban environments. This is an introductory level course appropriate for students with no background in South Asia or for those seeking to better understand South Asia's urban environments in the context of recent globalization and rapid historical changes.
No prerequisites. Fulfills College sector requirement in Society and foundational approach in Cross-Cultural Analysis.
For BA Students: History and Tradition Sector
Taught by: Mitchell
One-term course offered either term
Also Offered As: ANTH 107, SAST 002
Activity: Lecture
1 Course Unit

URBS 136 Urban Politics in the United States
This course focuses on political responses to urbanization in the United States. Topics include local government, national urban politics, and the changing nature of cities.
For BA Students: Society Sector
Taught by: Reed
Course usually offered in spring term
Also Offered As: AFRC 136, PSCI 136
Activity: Lecture
1 Course Unit

URBS 139 Ancient Civilizations of the World
The archaeology of the complex societies of the Old and New Worlds from the end of the paleolithic up to and including the earliest civilizations.
For BA Students: History and Tradition Sector
Taught by: Zettler
Course not offered every year
Also Offered As: ANTH 139, NELC 182
Activity: Lecture
1 Course Unit

URBS 160 Race and Ethnic Relations
The course will focus on race and ethnicity in the United States. We begin with a brief history of racial categorization and immigration to the U.S. The course continues by examining a number of topics including racial and ethnic identity, interracial and interethnic friendships and marriage, racial attitudes, mass media images, residential segregation, educational stratification, and labor market outcomes. The course will include discussions of African Americans, Whites, Hispanics, Asian Americans and multiracials.
For BA Students: History and Tradition Sector
Taught by: Charles, Kao, Zuberi
One-term course offered either term
Also Offered As: AFRC 006, ASAM 006, SOCI 006
Activity: Lecture
1 Course Unit
Notes: Previously URBS 214

This seminar will examine the experiences of recent African immigrants and refugees in Philadelphia in an historical framework. We will employ a variety of sources-newspapers, census data, legal briefs, literature and film, and diaspora internet sites-to explore the lives, aspirations, and perceptions of Philadelphia's African residents. There will be opportunities for dialogue with high school students, teachers, and parents; with representatives of African community and business organizations; and with local government and service agencies. Students will be required to do a final project which involves volunteering with an African immigrant non-profit or business and/or conducting focused research on specific African communities in Philadelphia.
Taught by: Cassanelli
Course not offered every year
Also Offered As: AFRC 167, AFST 167, HIST 167
Activity: Seminar
1 Course Unit
URBS 178 Faculty-Student Collaborative Action Seminar in Urban University-Community Relations
One of the goals of this seminar is to help students develop their capacity to solve strategic, real-world problems by working collaboratively in the classroom, on campus, and in the West Philadelphia community. Research teams help contribute to the improvement of education on campus and in the community, as well as the improvement of university-community relations. Among other responsibilities, students focus their community service on college and career readiness at West Philadelphia High School and Sayre High School. Students are typically engaged in academically based community service learning at the schools for two hours each week.
Taught by: Harkavy
One-term course offered either term
Also Offered As: AFRC 078, HIST 173
Activity: Seminar
1 Course Unit
Notes: previously URBS 078; Benjamin Franklin Seminar

URBS 181 Comparative Cultures of Sustainability
Sustainability is more than science, engineering, policy, and design. Surveying the world, we see that the politics and practice of sustainability play out in different ways depending on cultural factors. Some cultures are more prone to pursue ecological goals than others. Why? Do the environmental history and experience of a nation affect policy? Do nature and the environment play a crucial role in the cultural memory of a nation? Can cultural components be effectively leveraged in order to win approval for a politics of sustainability? And what can we, as residents of a country where climate change and global warming are flashpoints in an enduring culture war, learn from other cultures? This course is designed to equip undergraduate students with the historical and cultural tools necessary to understand the cultural aspects of sustainability in two countries noted for their ecological leadership and cultural innovation, Germany and the Netherlands. This hybrid course combines online instruction with a short-term study abroad experience in Berlin and Rotterdam. During the pre-tip online portion of the course, students will become acquainted with the cultural histories of German and Dutch attitudes toward sustainability and the environment through a combination of recorded lectures by the instructor, reading assignments, viewing assignments (documentary and feature films), threaded discussions, and short written assignments. The goal of the pre-tip instruction are to help students develop tools for analyzing and interpreting cultural difference, construct working models of German and Dutch concepts of sustainability, and formulate hypotheses about the relation between culture and policy in Germany and the Netherlands.
Taught by: Richter
Course usually offered summer term only
Also Offered As: ENVS 181, GRMN 181
Prerequisites: There are no prerequisites or language requirements.
Activity: Lecture
1 Course Unit
Notes: Summer abroad course.

URBS 200 Urban Research Methods
This course will examine different ways of undertaking urban research. The goal will be to link substantive research questions to appropriate data and research methods. Computer-based quantitative methods, demographic techniques, mapping / GIS and qualitative approaches will be covered in this course. There will be a set of assignments including one in which students have an opportunity to undertake their own field research in a Philadelphia neighborhood involving multiple methods of scientific inquiry. All instructional materials will be based on data related to contemporary public policy issues.
Taught by: Stern, Mark or Goldstein, Ira
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Fulfills Quantitative Data Analysis Requirement

URBS 202 Urban Education
This seminar focuses on two main questions: 1) How have US schools and urban ones in particular continued to reproduce inequalities rather than ameliorating them? 2) In the informational age, how do the systems affecting education need to change to create more successful and equitable outcomes? The course is designed to bridge the divide between theory and practice. Each class session looks at issues of equity in relation to an area of practice (e.g. lesson design, curriculum planning, fostering positive student identities, classroom management, school funding, policy planning...), while bringing theoretical frames to bear from the fields of education, sociology, anthropology and psychology. Among the theoretical frames students will learn will be the tools of systems thinking (Bertalanffy, 1968). While most of us have internalized the key lesson of the industrial revolution—that to understand something we must break it into its parts; systems thinking, in contrast, is about understanding the parts in relation to whole. The power of systems thinking is that each point of connection also serves as a point of intervention. By showing the importance of decisions of those within classrooms and those outside of them, this course is well-suited to students of education, but also any who seek a role in creating a more just society.
Taught by: Paul Skilton Sylvester
One-term course offered either term
Also Offered As: EDUC 202
Activity: Seminar
1 Course Unit

URBS 203 Introduction to City Planning: Planning Urban Spaces
This course will provide a general introduction to the concepts and practice of city planning. Topics to be discussed include: the process and nature of planning - theories, methods and roles as manifested in practice; history and trends in city planning; functional planning practice; planning within constraints—a field project; planning in the international arena; present crisis in planning.
Taught by: Gorostiza
Course usually offered summer term only
Activity: Seminar
1 Course Unit
URBS 204 Urban Law
This course will focus on selected aspects of urban law that are particularly relevant to areas of high population density. After an introduction to the American judicial system, it will examine the legal issues that arise in the management of land development and use, with special attention to constitutional questions involving equal protection, due process, and the “taking” clause, and routine run-of-the-mill zoning challenges. This course meets the Cultural Diversity requirement.
Taught by: Keene
Course usually offered in fall term
Activity: Lecture
1 Course Unit

URBS 205 People and Design
The built environment of a city is more than a mere backdrop; the design can actually affect people's experiences. Environmental design primarily focuses on the relationship between people and the built environment. It also looks at how the built environment interacts with the natural one (and the potential for greater sustainability). This course will allow students to gain a deeper understanding of how people create, perceive, and use the designed environment. We'll approach these concepts by analyzing design at a variety of scales, from products to interior design to architecture. Finally, using that knowledge, we'll conclude by analyzing urban spaces of the city.
Taught by: Berman
Course usually offered in spring term
Activity: Seminar
1 Course Unit

URBS 206 Public Environment of Cities: An Introduction to the Urban Landscape
This course will explore the role of public spaces - streets, boulevards, parks and squares - in cities and their social uses. With the University of Pennsylvania campus and the City of Philadelphia serving as our laboratory, we will critically examine the evolution of the movement of corridors, open space and buildings of the urban landscape and their changing uses. Case studies of social spaces on campus and public open spaces in Center City will help inform our understanding of how public environment serves, well or poorly, the varying needs of diverse users. While graphic skills are not required, graphic means as well as writing will be employed to communicate critical thought, ideas, and conclusions.
Taught by: Nairn
Course usually offered in spring term
Also Offered As: URBS 506
Activity: Seminar
1 Course Unit

URBS 207 Asian American Communities
Who is Asian American and how and where do we recognize Asian America? This interdisciplinary course explores the multiple factors that define Asian American identity and community. In order to provide a sketch of the multifaceted experience of this growing minority group, we will discuss a wide variety of texts from scholarly, artistic, and popular (film, cinematic) sources that mark key moments in the cultural history of Asia America. The course will address major themes of community life including migration history, Asian American as model minority, race, class, and transnational scope of Asian America. In combination with the readings, this class will foster and promote independent research based on site visits to various Asian American communities in Philadelphia and will host community leaders as guest lecturers.
Taught by: Khan
One-term course offered either term
Also Offered As: ASAM 205
Activity: Seminar
1 Course Unit

URBS 210 The City
Urbs/Hist 210 will focus on Baltimore and use The Wire as one of its core texts. The course will explore the history and development of the city and its institutions, with a thematic focus on issues such as industrialization and deindustrialization; urban renewal and the role of universities; public education and youth; policing and the criminal justice system; drugs and underground markets; public housing and suburbanization; and Baltimore's so-called renaissance amidst persistent poverty. The seminar will include field trips both in Philadelphia and a concluding all-day trip to Baltimore.
For BA Students: Humanities and Social Science S
Taught by: Nairn
Course usually offered in spring term
Also Offered As: HIST 210
Activity: Seminar
1 Course Unit
Notes: Also fulfills General Requirement in Society for Class of 2009 and prior

URBS 213 Urban Ethnography: Capturing the Cultures of Cities
With its multi-ethnic neighborhoods and rich cultural life, Philadelphia is an ideal site for learning how to carry out urban ethnography. In the course, students will understand the ethnographic approach and learn skills to conduct their own ethnography as they explore urban life and culture in the nation's sixth largest city. The course is structured as a seminar in which students will read ethnographic studies of Philadelphia and other urban settings. With our focus on the urban landscape, we will gain an appreciation for the macro processes, such as globalization, that shape the city. Ethnography attends to such processes as well as how humans experience them. The class will explore various themes, including the ethnic city, the gendered city, the contested city, the sacred city, the global city, and the aesthetic and expressive city. In addition to reading assignments, we will look at images, videos, and online material. Students will design and execute their own ethnographic fieldwork project on an urban topic that interests them. Through step-by-step instruction throughout the semester, students will learn qualitative research techniques such as field notes, participant-observation, interviewing, and how to interpret their own data, so that they will be able to complete their semester project.
Taught by: Saverino
Course not offered every year
Also Offered As: FOLK 513, URBS 513
Activity: Seminar
1 Course Unit
URBS 216 Social Entrepreneurship
Amidst perceptions that public sector and philanthropic support for local communities is increasingly scarce, many community development practitioners are turning to social enterprise as a means to improve social and economic conditions in their neighborhoods. This course will examine and evaluate a number of recognized social enterprises tackling housing, workforce development, and job creation challenges, including several planned field visits. Building on their understanding of these fields, students will then divide into groups and develop business plans for their own social enterprises.
Taught by: Mandujano
Course not offered every year
Activity: Seminar
1 Course Unit

URBS 218 Introduction to African American Politics
This course provides an introduction to the political experience of African Americans. While the course will explore historical themes, it will be contemporary in its temporal focus. Topics will include African American political thought, leadership and political economy, voting and participation, urban politics, race and electoral politics. Additional topics will also include crime, the judiciary, and punishment; and issues of gender, class, age, and sexual identity at the intersections of black politics.
Taught by: Harris
Also Offered As: AFRC 217
Activity: Seminar
1 Course Unit

URBS 219 The Heart of Social Change
The Heart of Social Change: Experiments in Urban Development, Activism, and Social Entrepreneurship will seek to challenge those who desire to work for social change to consider how they may not only employ their heads and their hands, but also their hearts as they work to improve the aspects of contemporary society that mean the most to them. This seminar-based class will examine past and contemporary examples of heart-based activism, urban development and social entrepreneurship yet it will also be a space where students will be asked to experiment with ways that they too may be change agents.
Taught by: Charles Howard
Course not offered every year
Activity: Seminar
1 Course Unit

URBS 233 World History: East Asia or Latin America
Topics Vary
Also Offered As: ARTH 369, HIST 233
Activity: Seminar
1 Course Unit

URBS 234 Topics in Transnational
One-term course offered either term
Also Offered As: HIST 234
Activity: Seminar
1 Course Unit

URBS 236 Iraq: Ancient Cities and Empires
This course surveys the cultural traditions of ancient Mesopotamia, the land between the Tigris and Euphrates Rivers, a region commonly dubbed “cradle of civilization” or “heartland of cities,” from an archaeological perspective. It will investigate the emergence of sedentism and agriculture; early villages and increasingly complex Neolithic and Chalcolithic cultures; the evolution of urban, literate societies in the late 4th millennium; the city-states and incipient supra-regional polities of the third and second millennium; the gradual emergence of the Assyrian and Babylonian “world empires,” well-known from historical books of the Bible, in the first millennium; and the cultural mix of Mesopotamia under the successive domination of Greeks, Persians and Arabs. The course seeks to foster an appreciation of the rich cultural heritage of ancient Mesopotamia, an understanding of cultural continuities in the Middle East and a sense of the ancient Near Eastern underpinnings of western civilization. No Prerequisite.
Taught by: Al Kuntar
Course not offered every year
Also Offered As: ANTH 236, NELC 241
Activity: Lecture
1 Course Unit

URBS 237 Berlin: History, Politics, Culture
What do you know about Berlin’s history, architecture, culture, and political life? The present course will offer a survey of the history of Prussia, beginning with the seventeenth century, and the unification of the small towns of Berlin and koellin to establish a new capital for this country. It will tell the story of Berlin’s rising political prominence in the eighteenth century, its transformation into an industrial city in the late nineteenth century, its rise to metropolis in the early twentieth century, its history during the Third Reich, and the post-war cold war period. The course will conclude its historical survey with a consideration of Berlin’s position as a capital in reunified Germany. The historical survey will be supplemented by a study of Berlin’s urban structure, its significant architecture from the eighteenth century (i.e. Schinkel) to the nineteenth (new worker’s housing, garden suburbs) and twentieth centuries (Bauhaus, Speer designs, postwar rebuilding, GDR housing projects, post-unification building boom). In addition, we will read literary texts about the city, and consider the visual art and music created in and about Berlin. Indeed, Berlin will be a specific example to explore German history and cultural life of the last 300 years. The course will be interdisciplinary with the fields of German Studies, history, history of art, and urban studies. It is also designed as a preparation for undergraduate students who are considering spending a junior semester with the Penn Abroad Program in Berlin.
For BA Students: Humanities and Social Science S

Also Offered As: ANTH 252
Activity: Seminar
1 Course Unit
URBS 244 Metropolis: Culture of the City
An exploration of modern discourses on and of the city. Topics include: the city as site of avant-garde experimentation; technology and culture; the city as embodiment of social order and disorder; traffic and speed; ways of seeing the city; the crowd; city figures such as the detective, the criminal, the flaneur, the dandy; film as the new medium of the city. Special emphasis on Berlin. Readings by, among others, Dickens, Poe, Baudelaire, Rilke, Doeblin, Marx, Engels, Benjamin, Kracauer. Films include Fritz Lang's Metropolis and Tom Tykwer's Run Lola Run.
For BA Students: Arts and Letters Sector
Taught by: Black
Course not offered every year
Also Offered As: SOCI 254
Activity: Seminar
Notes: All lectures and readings in English

URBS 250 Urban Public Policy: Philadelphia -- A Case Study
An introduction to a broad range of substantive policy areas affecting the city, and an exploration into the complexities of policy formulation and implementation in a large and pluralistic metropolitan setting. The course subtitle, "Philadelphia -- A Case Study," describes our approach. Donna Cooper currently leads the region's foremost child advocacy organization focused on poverty, child welfare and education issues, she formerly served as the Deputy Mayor for Policy for the City of Philadelphia, and Secretary of Policy of the Commonwealth of Pennsylvania.
Taught by: Donna Cooper
Course usually offered in spring term
Activity: Seminar
1 Course Unit

URBS 252 Urban Journalism
This course will examine the state of urban journalism today with special emphasis on how large newspapers are redefining themselves, and the news, in an era of dwindling readership and growing financial pressures. The course will look at online journalism, ethics, and alternative sources of news, and will explore the techniques journalists use in reporting the news. Students will report and write four pieces of their own about Philadelphia and its environs. The course is taught by Dan Rubin, Enterprise Editor of The Philadelphia Inquirer, The Daily News and philly.com.
Taught by: Rubin
Course usually offered in spring term
Activity: Seminar
1 Course Unit

URBS 253 Cities, Suburbs, Regions
This course will examine the political, economic, social, and demographic forces impacting development patterns in metropolitan areas, with a particular focus on Philadelphia. We will examine the government policies, economic forces, and social attitudes that affect the way a region grows, and the impact of these forces on poverty, equity and segregation. Specific topics to be discussed include the factors that make a region competitive, the city's changing role in the region, the impact place has on opportunity, and approaches to revitalizing and improving communities.
Taught by: Black
Course offered spring; even-numbered years
Also Offered As: SOCI 254
Activity: Seminar
1 Course Unit

URBS 264 Poverty, Race and Health
This course is designed to introduce students to current literature on race/ethnic difference in health and mortality in the United States, covering such topics as explanations for why some race/ethnic groups fare better than others, how inner city poverty and residential segregation may contribute to racial/ethnic differences in health outcomes, and health of immigrants versus native-born populations. Current policy debated and recent policy developments related to health are also briefly discussed. The course is organized as a seminar with a combination of lectures and class discussions.
Taught by: Jaeger
Course not offered every year
Also Offered As: SOCI 264
Activity: Seminar
1 Course Unit

URBS 270 The Immigrant City
Immigration is among the most important yet controversial forces shaping cities, regions, and neighborhoods. The diversity of immigrant and receiving communities means that the dynamics and impacts of migration are varied and complex. This course examines the development of immigrant and receiving communities in the urban and suburban United States. It surveys public policy and community and economic development practices related to migration at the local, regional, national, and trans-national scale. Class readings, discussions, and visits to Philadelphia's immigrant neighborhoods explore themes including labor markets, housing experiences, political mobilization, civil society, cultural preservation, and the built environment.
For BA Students: Society Sector
Taught by: Vitiello, Domenic
Course usually offered in spring term
Also Offered As: CPLN 676, SOCI 270
Activity: Seminar
1 Course Unit

URBS 273 Advanced Non-Fiction Writing
Writing with a view to publication in the freelance sections of newspapers such as THE PHILADELPHIA INQUIRER and THE NEW YORK TIMES, in magazines such as THE ATLANTIC and THE NEW YORKER, and in the literary quarters and the journals of opinion. Among the areas likely to be considered are writing as a public act, issues of taste and of privacy, questions of ethics and of policy, methods of research and of checking, excerpting, marketing, and the realistic understanding of assignments and of the publishing world. Student papers will be the basis of weekly editorial sessions, with concentration on the language: how to render material literate, how to recognize and dispose of padding and self-indulgence, how to tighten structure and amplify substance. See the English Department's website at www.english.upenn.edu for a description of the current offerings.
Course not offered every year
Also Offered As: AFRC 145, ENGL 145
Activity: Seminar
1 Course Unit
Notes: This course is not open to freshmen. May be repeated for credit with a different instructor.
URBS 274 Advanced Topics in Theatre
This course will combine an intensive practical and intellectual investigation of some area of the making of theatre: performance techniques, theatrical styles, a particular period of theatre history. For the current topics contact the Theatre Arts office or visit the website. One section of 274 every other Spring will consist of a small number of Theatre Arts majors selected by the faculty to become members of "the Edinburgh Project." This ensemble will mount a production that will be performed at the Edinburgh Festival Fringe in August. Many of the readings and exercises in this course will be geared to prepare for production; rehearsals for the project will continue after the exam period at the end of the semester.
Taught by: Fox, Ferguson, Malague, Mazer, Schlatter
Course not offered every year
Also Offered As: THAR 275
Activity: Seminar
1 Course Unit
Notes: This course, with different topics, may be repeated for credit. Please look at the program website for the current semester's topic(s).

URBS 280 Neighborhood Dynamics of Crime
Crime varies in time, space and populations as it reflects ecological structures and the routine social interactions that occur in daily life. Concentrations of crime can be found among locations, with antisocial activities like assaults and theft occurring at higher rates because of the demographic make-up of people (e.g. adolescents) or conflicts (e.g. competing gangs), for reasons examined by ecological criminology. Variation in socio-demographic structures (age, education ratios, and the concentration of poverty) and the physical environment (housing segregation, density of bars, street lighting) predicts variations between neighborhoods in the level of crime and disorder. Both ethnographic and quantitative research methods are used to explore the connections between the social and physical environment of areas and antisocial behavior.
Taught by: Loeffler
Course usually offered in spring term
Also Offered As: CRIM 280, SOCI 380
Activity: Seminar
1 Course Unit

URBS 290 Metropolitan Nature
In order to understand the complex and often skewed relationship between the built and natural systems, we must think in processes and examine different scales simultaneously. The course explores urban sustainability and resilience. At its core, sustainability is a radical concept that integrates the economy, equity (social justice), and the environment. Co-opted by marketing slogans, stripped of meaning and context, it has become vague and pliable. Sustainability and resilience demand a holistic systems view of the world. The course focuses on communities such as New Orleans and Eastwick where urban development has focused on economic concerns at the expense of the environment and equity resulting in unintended, and sometimes, catastrophic consequences. Students will have the opportunity to interact with community residents who have organized to develop strategies to address these ongoing issues.
Taught by: Nairn
Course usually offered in fall term
Activity: Seminar
1 Course Unit

URBS 294 Cities of the Future: Urbanization in the Global South
This course examines the futures of urbanization in most of the world. With cities in "developing" countries set to absorb 95% of urban population growth in the next generation, the course explores the plans, spaces and social experiences of this dramatic urban century. How do proliferating urban populations sustain themselves in the cities of Latin America, Africa and Asia? What kinds of social and political claims do these populations make more just and sustainable cities? The course investigates the ongoing experiences in urban planning, infrastructure development and environmental governance in cities of the Global South. In so doing, it imagines new forms of citizenship, development and sustainability that are currently unfolding in these cities of the future.
Taught by: Anand
Course not offered every year
Also Offered As: ANTH 294
Activity: Seminar
1 Course Unit

URBS 312 Health in Urban Communities
This course will introduce students to anthropological approaches to health and to theories of participatory action research. This combined theoretical perspective will then be put into practice using West Philadelphia community schools as a case study. Students will become involved in design and implementation of health-related projects at an urban elementary or middle school. As one of the course requirements, students will be expected to produce a detailed research proposal for future implementation.
Taught by: Johnston
Course usually offered in fall term
Also Offered As: ANTH 312, HSOC 321
Activity: Seminar
1 Course Unit

URBS 320 Who Gets Elected and Why? The Science of Politics
What does it take to get elected to office? What are the key elements of a successful political campaign? What are the crucial issues guiding campaigns and elections in the U.S. at the beginning of the 21st century? This class will address the process and results of electoral politics at the local, state, and federal levels. Course participants will study the stages and strategies of running for public office and will discuss the various influences on getting elected, including: Campaign finance and fundraising, demographics, polling, the media, staffing, economics, and party organization. Each week we will be joined by guest speakers who are nationally recognized professionals, with expertise in different areas of the campaign and election process. Students will also analyze campaign case studies and the career of the instructor himself. Edward G. Rendell is the former Mayor of Philadelphia, former Chair of the Democratic National Committee, and former Governor of Pennsylvania.
Taught by: Rendell
Course usually offered in fall term
Also Offered As: GAFL 509, PSCI 320
Activity: Lecture
1 Course Unit
URBS 321 Urban Ethnography: Documenting The City of Brotherly Love
How do qualitative social scientists study urban communities? What kinds of powerful tales can be told about urban lifestyles and social issues/conflicts in places like Philadelphia? This course will allow students to study various ethnographic treatments of urban communities in the United States, using films, articles, TV serials, and books as guides for the framing of their own independent research on the streets of Philadelphia. Students will also form production teams of two or three people, and these production teams will be responsible for (i) identifying and researching an important urban issue in contemporary Philadelphia and (ii) turning that research into a 15-30 minute radio documentary that will be broadcast on a local Philadelphia radio station, WURD 900AM. Mixing radio/audio journalism with ethnographic methods, will enhance their skills at archival and social research, participant-observation, interviewing techniques, sound editing, and production. This course is intended to be a rigorous and exciting opportunity for students to tell empirically grounded stories using the voices of their subjects and the sounds of the city. Potential texts include: Sidewalk (a book and documentary film by Mitchell and Mitchell Duneier), Righteous Dopefiend (a book and museum exhibit by Philippe Bourgois), and excerpts from other ethnographic work by Ana Ramos-Zayas, Elijah Anderson, Todd Wolfson, David Grazian, Setha Low, Leith Mullings, John Gwaltney, Dana-ain Davis, Carol Stack, Melissa Checker, Katherine S. Newman, and others. By Permission Only.

Taught by: Jackson
Also Offered As: ANTH 320, COMM 320
Prerequisite: COMM 220 or permission of instructor
Activity: Seminar
1 Course Unit

URBS 322 The Big Picture: Mural Arts in Philadelphia
The history and practice of the contemporary mural movement couples step-by-step analysis of the process of designing with painting a mural. In addition, students will learn to see mural art as a tool for social change. This course combines theory with practice. Students will design and paint a large outdoor mural in West Philadelphia in collaboration with Philadelphia high school students and community groups. The instructor, Jane Golden, is the founder and Director of the Philadelphia Mural Arts Program.

Taught by: Golden/Walinsky
One-term course offered either term
Also Offered As: FNAR 222, FNAR 622
Activity: Seminar
1 Course Unit
Notes: Previously URBS 222. The Undergraduate Fine Arts Department will now include a $75 fee for this course.

URBS 323 Tutoring School: Theory and Practice
This course represents an opportunity for students to participate in academically-based community service involving tutoring in a West Phila. public school. This course will serve a need for those students who are already tutoring through the West Phila. Tutoring Project or other campus tutoring. It will also be available to individuals who are interested in tutoring for the first time.

Taught by: Parker, Cheryl
Course usually offered in fall term
Also Offered As: EDUC 323
Activity: Seminar
1 Course Unit

URBS 326 Tutoring in Urban Public Elementary Schools: A Child Development Perspective
The course provides an opportunity for undergraduate students to participate in academically based community service learning. Student will be studying early childhood development and learning while providing direct, one-to-one tutoring services to young students in Philadelphia public elementary schools. The course will cover foundational dimensions of the cognitive and social development of preschool and elementary school students from a multicultural perspective. The course will place a special emphasis on the multiple contexts that influence children's development and learning and how aspects of classroom environment (i.e., curriculum and classroom management strategies) can impact children's achievement. Also, students will consider a range of larger issues impacting urban education embedded in American society. The course structure has three major components: (1) lecture related directly to readings on early childhood development and key observation and listening skills necessary for effective tutoring, (2) weekly contact with a preschool or elementary school student as a volunteer tutor and active consideration of how to enhance the student learning, and (3) discussion and reflection of personal and societal issues related to being a volunteer tutor in a large urban public school.

Taught by: Fantuzzo
Course usually offered in spring term
Also Offered As: EDUC 326
Activity: Seminar
1 Course Unit

URBS 330 GIS Applications in Social Science
This course will introduce students to the principles behind Geographic Information Science and applications of (GIS) in the social sciences. Examples of GIS applications in social services, public health, criminology, real estate, environmental justice, education, history, and urban studies will be used to illustrate how GIS integrates, displays, and facilitates analysis of spatial data through maps and descriptive statistics. Students will learn to create data sets through primary and secondary data collection, map their own data, and create maps to answer research questions. The course will consist of a combination of lecture and lab.

Taught by: tba
Course usually offered in fall term
Also Offered As: URBS 530
Activity: Seminar
1 Course Unit
Notes: Fulfills the Qualitative Data Analysis Requirement
URBS 332 Digital City: Approaches to Urban Memory & Cartography
Cities have existed through time with layered histories. Such histories are intelligible to dwellers of urban space in the present who seek them out and others who by default interact with the effects of memory through art and culture. Through the expansion of digital mapping tools, location-enabled devices, online sharing sites, and social media memes, those layers of urban memory are newly accessible and thus enhance experiences and explorations in a city. How do websites and apps devoted to mapping cities across space and time help us access and redefine the cultures of cities? What approaches, programs, and philosophies do the newfangled mapmakers and their co-creators use, and how do they differ from analog approaches to research and placemaking? What are the possibilities and responsibilities of such digital cartographies and locales? Where and for whom do the digital divides still exist? In "Digital City: Approaches to Urban Memory and Cartography," we will seek solutions to these prompts by conducting case studies of digital map projects from transnational and local perspectives, including a particular focus on Philadelphia-based sites. Students will gain skills in cultural analysis and the digital humanities, and will produce a final research project that will result in a website, mobile app, or critical assignment of their own direction mapping a city’s past onto its present or future spaces.
Taught by: Farber
Course not offered every year
Activity: Seminar
1 Course Unit

URBS 352 Food Habits in Philadelphia Communities: Exploring Eating and Changing Food Habits in Philadelphia Middle Schools
In this course, Penn undergraduates will explore and examine food habits, the intersection of culture, family, history, and the various meanings of food and eating, by working with a middle-school class in the Philadelphia public schools. The goal of the course will be to learn about the food habits of a diverse local community, to explore that community's history of food and eating, and to consider ways and means for understanding and changing food habits. Middle school students will learn about the food environment and about why culture matters when we talk about food. Topics include traditional and modern foodways, ethnic cuisine in America, food preferences, and ‘American cuisine’. The course integrates classroom work about food culture and anthropological practice with frequent trips to middle school where undergraduates will collaborate with students, their teachers, and a teacher partner from the Agatson Urban Nutrition Initiative (UNI). Students will be required to attend one of two time blocks each week to fulfill the service learning requirement-times TBA. Undergraduates will be responsible for weekly writing assignments responding to learning experience in the course, for preparing materials to use middle school children, being participant-learners with the middle school children, and for a final research project. The material for the course will address the ideas underlying university-community engagement, the relationships that exist between food/eating and culture, and research methods.
Taught by: Kauer
One-term course offered either term
Also Offered As: ANTH 252
Activity: Seminar
1 Course Unit

URBS 359 Nutritional Anthropology
This course will explore the significance as it relates to food behaviors and nutritional status in contemporary human populations. The topics covered will be examined from a biocultural perspective and include 1) definition and functions of nutrients and how different cultures perceive nutrients, 2) basic principles of human growth and development, 3) methods to assess dietary intake, 4) food taboos, 5) feeding practices of infants and children, 6) food marketing, 7) causes and consequences of under- and over-nutrition, and 8) food insecurity and hunger.
Course not offered every year
Also Offered As: ANTH 359
Activity: Seminar
1 Course Unit

URBS 367 Philadelphia, 1700-2000
Using Philadelphia as a lens, this course will examine the transformation of American cities from the colonial period to the present. Through readings, lectures, and tours, we will consider urbanization and suburbanization, race, class, and ethnicity, economic development, poverty and inequality, housing and neighborhood change, urban institutions, and politics and public policy.
Taught by: Sugrue
Course not offered every year
Also Offered As: HIST 367
Activity: Lecture
1 Course Unit

URBS 390 Urban Agriculture
Urban Agriculture is a growing global trend. This course examines urban agriculture as an issue of sustainability, social justice, public health, and vacant land. It explores the potential of urban agriculture in both the Global North and South to provide a safe and secure source of food to city residents. Major topics include sustainable agricultural practices, operational and spatial requirements, distribution systems, and access to fresh food. Using Philadelphia as a laboratory, the course explores its robust agricultural scene of community gardens, guerilla gardens, and entrepreneurial farms, as well as its distribution system including programs such as City harvest, the emerging Common Market, and established farmers’ markets. The course will integrate lectures about sustainable agricultural practices with field trips to and hands-on work at community gardens and farms.
Taught by: Nairn
Course usually offered summer term only
Activity: Seminar
1 Course Unit

URBS 400 Senior Seminar
Urban Studies senior research project
Taught by: Grossman/McClone/Simon
Course usually offered in fall term
Prerequisite: URBS 200; URBS 300
Activity: Seminar
1 Course Unit
URBS 401 Urban Studies Honors
Students in the fall Urban Studies Senior Seminar (URBS400) whose papers are exceptional and show promise for publication will be invited to participate in the spring honors seminar. If they choose to participate, honors seminar participants will revise and refine their research/papers with the goal of their work for publication in an academic journal relevant to the topic. The seminar meets periodically during the semester, structured around a set of assignments geared to facilitate the process of revision. Students will be assigned to read each other’s work and meetings take the form of a workshop with students reporting on progress and providing feedback to improve and develop each other's papers. In addition to completing the revised paper for a grade, participants in the honors seminar are required to present their work to a wider Urban Studies audience in a special session at the end of the semester and to provide documentation that they have submitted their papers for publication. Students who successfully complete the honors seminar will graduate with distinction in the major, noted on their transcripts and in the graduation materials.
Taught by: Simon
Course usually offered in spring term
Prerequisite: URBS 400
Activity: Seminar
1 Course Unit

URBS 404 Philanthropy & The City
This course will focus on how urban communities are shaped by the nonprofit sector and the billions of philanthropic dollars that fuel their work. By bridging theory and practice, the class explores what dynamics are at play to deliver vital services or programs in healthcare, education, the arts, community development, and other issues. The course will also focus on these important questions: (1) Whose responsibility is the public good? How is that responsibility shared by the public, private, and nonprofit sectors? and (2) Given that responsibility for the public good, which individuals and groups make the decisions about how to serve the public good? How are these decisions made, and who benefits from these decisions? Students will consider these questions in an interdisciplinary context that will bring a historical and philosophical perspective to the examination of the values and institutions that characterize the contemporary philanthropy and the nonprofit sector.
Taught by: Bauer/Goldman
Course usually offered in fall term
Also Offered As: NPLD 797
Activity: Seminar
1 Course Unit

URBS 405 Religion, Social Justice & Urban Development
Urban development has been influenced by religious conceptions of social and economic justice. Progressive traditions within Judaism, Christianity, Islam, Buddhism, Hinduism, Jainism, Baha’i, Humanism and other religions and systems of moral thought have yielded powerful critiques of oppression and hierarchy as well as alternative economic frameworks for ownership, governance, production, labor, and community. Historical and contemporary case studies from the Americas, Europe, Africa, Asia, and the Middle East will be considered, as we examine the ways in which religious responses to poverty, inequality, and ecological destruction have generated new forms of resistance and development.
Taught by: Lamas
Course usually offered in spring term
Also Offered As: AFRC 405, RELS 439
Activity: Seminar
1 Course Unit

URBS 412 Building Non-Profits: The Business of a Mission-Driven Organization
This course will cover the basic elements of building and growing a non-profit organization, including the development of the mission and the board; needs assessment, program design, development, and management; financial management, contract compliance and understanding an audit; fundraising, public, foundation, corporate, and individual; communication and marketing; organizational administration (including staff and volunteer selection, management and development); public policy, research and advocacy. Students will make site visits and engage role play, in addition to research and writing.
Taught by: Goldman, Greg
Course usually offered summer term only
Activity: Lecture
1 Course Unit

URBS 417 Cities and Sustainability
A good idea is not enough - developing innovative and sustainable projects in cities requires understanding "how to get things done." Developing projects to promote sustainability in major US cities requires sensitivity to the political and operational context within which cities implement innovative initiatives. Cities and Sustainability uses Philadelphia as a case study to explore the issues confronting modern American metropolises as they look to manage their resources and promote environmentally friendly policies. URBS 417 will introduce students to leading Philadelphia practitioners of sustainability and municipal projects. Students will be given the tools to politically, economically and critically analyze various sustainable policy initiatives across the United States.
Taught by: Ben-Amos
Course usually offered in spring term
Activity: Seminar
1 Course Unit

URBS 419 Transportation & American Society
Transportation affects every aspect of American society; from how we get to work or school, to how we shop and play. Transportation policy at all levels of American government has serious implications for social justice and economic development. Moreover, some of today's most intense political battles center on transportation policy across America and within its cities, be it funding High Speed Rail in California or placing bike lanes in the heart of Manhattan. Transportation and American Society will expose students to the role transportation has played the development of America and its cities as well as its impact on politics and society.
Taught by: Ben-Amos
Course usually offered in fall term
Activity: Lecture
1 Course Unit
URBS 420 Perspectives on Urban Poverty
This course provides an interdisciplinary introduction to 20th century urban poverty, and 20th century urban poverty knowledge. In addition to providing a historical overview of American poverty, the course is primarily concerned with the ways in which historical, cultural, political, racial, social, spatial/geographical, and economic forces have either shaped or been left out of contemporary debates on urban poverty. Of great importance, the course will evaluate competing analytic trends in the social sciences and their respective implications in terms of the question of what can be known about urban poverty in the contexts of social policy and practice, academic research, and the broader social imaginary. We will critically analyze a wide body of literature that theorizes and explains urban poverty. Course readings span the disciplines of sociology, anthropology, urban studies, history, and social welfare. Primacy will be granted to critical analysis and deconstruction of course texts, particularly with regard to the ways in which poverty knowledge creates, sustains, and constrains meaningful channels of action in urban poverty policy and practice interventions.
Taught by: Fairbanks
Course usually offered in fall term
Also Offered As: HIST 440, SOCI 420
Activity: Seminar
1 Course Unit

URBS 428 Research Seminar in 21st Century Urbanism
A seminar run in conjunction with the Institute for Urban Research at Penn, students will learn about the range of cutting-edge topics in urbanism that Penn faculty are working on and work closely with a faculty member on current research. Students will learn about new topics and methods in interdisciplinary urban research, and get first hand experience collecting urban data under the close supervision of an experienced researcher. Students and faculty jointly will present their findings for discussion. This course is a good introduction for how to frame and conduct an urban research project.
Taught by: Ehlenz
Course usually offered in spring term
Also Offered As: CPLN 528
Activity: Seminar
1 Course Unit

URBS 423 Fantastic Cities: Urban Landscapes Seen Through Memory, Imagination and Dreams
This seminar introduces the notion of the city, or polis, as a powerful current in our cultural imagination. In contemporary discourse, cities have an edge of glamour: they elicit both fear and desire. Historically, however, cities have been understood as microcosmic models of the organization of human society; a walled city was a place of safety and order, not a site of danger or chaos. This course explores different moments in the cultural fantasies surrounding cities, paying special attention to topics such as the role of the imagination in experiencing cities, historical urban strata, subways and other subterranean spaces below the modern city, urban peripheries, and the modern aesthetic of transparency. The course focuses on representations of some actual cities – Rome, Berlin, New York, London, Lagos – as well as a series of utopian and dystopian imagined cities.
Taught by: Svendsen
Course usually offered summer term only
Activity: Seminar
1 Course Unit

URBS 421 Mapping Philadelphia
Philadelphia is a city that was mapped before it was built. Founder William Penn’s original concept for the gridded city continues to inform the historical evolution of Philadelphia, even as city planners, architects, artists, and social justice activists work to transform the layers of our built environment. This class will study the city through a variety of archival maps, historical mapping practices, and emergent digital approaches to representing space and time. We will explore public history projects that seek approaches to place-making and place-keeping at neighborhood intersections, share dialogue with social practice artists who produce site-specific works, and visualize civic data through platforms such as OpenDataPhilly. Each student will pursue a final research project resulting in a close study of a particular street or intersection in the city.
Taught by: Paul Farber
Course not offered every year
Activity: Seminar
1 Course Unit

URBS 435 The Political Economy of Urban Development
This course provides an introduction to the economic and political theories that have come to shape, for better or for worse, the spatial characteristics of late 20th century urbanism. It is intended to offer a range of analytical approaches to understanding the urban structures and processes that strategies of community-based organizers and urban policy planners seek to influence. The course focuses on postwar U.S. cities (Chicago and other Midwestern/ Northeast rust belt cities in particular), though a number of readings explore these issues in broader contexts. As a way to further understand postwar US urbanism, we will expand our focus briefly to the geopolitical/international scale during the weeks on neoliberalism and microfinance. Urban political economy refers to different theoretical traditions within the social sciences that explain urban development in terms of the relationship between markets, states, and community actors (or, civil society).
Part I of the course covers four different theories of modern political economy. Neoclassical, Keynesian, Marxian, and Neoliberal. Our purpose is to provide a framework for political economic analysis and an historical foundation for understanding postwar transformation. Part II of the course grounds the foundational material of Part I by tracing the economic and political forces that have shaped post-war urban development trends in Northeastern and Midwestern cities (especially Chicago, Detroit, Philadelphia and NY). Particular attention will be given to issues such as race, suburbanization, deindustrialization, welfare state retrenchment, gentrification, and public housing transformation. Part III examines a range of contemporary (post 1970) approaches to urban development, focusing on processes of neoliberalization, neo-clientalism, urban informality, sub prime mortgage lending, and microfinance.
Taught by: Fairbanks
Course not offered every year
Activity: Lecture
1 Course Unit

URBS 440 Introduction to City Planning: Past, Present and Future
Orientation to the profession, tracing the evolution of city and regional planning from its late nineteenth century roots to its twentieth century expression. Field trips included.
Taught by: Vitiello or Ammon
Course usually offered in fall term
Also Offered As: CPLN 500
Activity: Lecture
1 Course Unit
URBS 448 Neighborhood Displacement & Community Power
This course uses the history of black displacement to examine community power and advocacy. It examines the methods of advocacy (e.g., case, class, and legislative) and political action through which community activists can influence social policy development and community and institutional change. The course also analyzes selected strategies and tactics of change and seeks to develop alternative roles in the group advocacy, lobbying, public education and public relations, electoral politics, coalition building, and legal and ethical dilemmas in political action. Case studies of neighborhood displacement serve as central means of examining course topics.
Taught by: Palmer
Course usually offered in spring term
Also Offered As: AFRC 448
Activity: Seminar
1 Course Unit

URBS 450 Urban Redevelopment
This course will consider urban redevelopment from the early 20th century to the present day, looking at ways the economic, political, and social underpinnings of redevelopment practice have changed over that time. From the City Beautiful movement to Transit Oriented Development, the course will look at why and how the public, private, and non-profit sectors have intervened in urban neighborhoods, and will contemplate consequences - positive and negative - of those interventions. Students will be introduced to some of the technical aspects of redevelopment, including architecture/design, planning, and financing. The class will be in seminar format, mixing lecture, discussion, and guest speakers. The course requirements include a mid-term paper, an in-class charrette, and a final development project.
Taught by: Rachlin, Andrew
Course usually offered in spring term
Activity: Seminar
1 Course Unit

URBS 451 The Politics of Housing and Urban Development
This course offers an exploration of how legislative action, government policymaking, and citizen advocacy influence plans for the investment of public capital in distressed urban neighborhoods. Course topics this semester will include an evaluation of the results of City of Philadelphia development policies under the administration of former Mayor Michael A. Nutter, as well as consideration of plans being undertaken by the administration of Mayor James F. Kenney, who took office in January. The course will also include an assessment of a large-scale property acquisition and development strategy being implemented by the Philadelphia Housing Authority in North Philadelphia and a review of recent and current reinvestment proposals for Camden’s waterfront and downtown-area neighborhoods.
Taught by: Kromer
Course usually offered in fall term
Also Offered As: CPLN 625, GAFL 569
Activity: Lecture
1 Course Unit

URBS 452 Community Economic Development
Community economic development concerns the revitalization of impoverished communities. As with all things economic, poor and working people may be the subjects or the objects of development. We will utilize case studies from Philadelphia and around the world in an exploration of various models of economic justice and sustainable development.
Taught by: Lamas
Course usually offered in fall term
Activity: Seminar
1 Course Unit

URBS 453 Metropolitan Growth and Poverty
This course analyzes the role of metropolitan regions in the U.S. and global economies, including the sources of metropolitan productivity, the ways that metropolitan structures affect residents, and analyses of public policy in metropolitan areas. The economic, political, and social forces that have shaped World War II urban and regional development are explored, including technology, demography, and government. Special attention is paid to how metropolitan change affects residents by income and race. Topics include: gentrification, schools, suburbanization, sprawl, metropolitan fragmentation, concentration of poverty, race, and various economic revitalization initiatives.
Taught by: Madden
Course not offered every year
Also Offered As: SOCI 453
Activity: Seminar
1 Course Unit

URBS 454 City Limits: The Impact of Urban Policy
This course assesses the changing role of public policy in American cities. In the past, government often believed that it could direct urban development. New realities - the rise of an informal labor market, global capital and labor flows, the flight of businesses and the middle class to the suburbs - have demonstrated that government must see itself as one - but only one - 'player' in a more complete, transactional process of policy making that crosses political boundaries and involves business, organized interest groups, and citizens. This seminar uses a case-study method to study how public policy can make a difference in the revitalization of distressed American cities. The seminar is designed for advanced undergraduates and graduate students. Seminar readings and projects will be organized around three themes: 1) history and vision, 2) data and analysis, and 3) policy and implementation. Students will be divided into project teams assigned to work on current development issues that will be reviewed by both public and private-sector experts. Extensive use will be made of real estate, economic development, and social indicator data to understand the complex forces at work in both large and small cities. Students will learn to access, analyze, and map information; to frame and interpret these data within a regional perspective; and to construct profiles of cities and neighborhoods. Students will study recent urban redevelopment initiatives in the Philadelphia region, including Philadelphia’s Neighborhood Transformations Initiative and New Jersey’s Camden Revitalization plans.
Taught by: Goldstein, Stern
Course usually offered in spring term
Also Offered As: SWRK 712, URBS 554
Prerequisite: Student must have taken an introduction to research methods course
Activity: Seminar
1 Course Unit
URBS 457 Globalization & The City
Over the past two decades, the public imagination has been gripped by the concept of globalization. Scholars, corporations, advertisers and government officials have latched onto this idea as a defining feature of our current era. These various constituencies use globalization not only to account for epochal shifts in our economy and society, but also to justify new types of business strategy and public policy. This course will examine three interlinked dimensions of globalization: Global economic processes (e.g. the transnational operations of multinational firms that have given rise to a new international division of labor); cultural globalization (e.g. the spread of American brands like Coca Cola, Nike and Hollywood films), and political globalization (e.g. the rise of supranational organizations like the IMF, World Bank and WTO that promote the idea of free markets). Moreover, we will study globalization in the context of cities because, given their centrality to globalization processes, it is in cities that we can best understand how globalization takes place. In cities, we can study the global economic processes that restructure urban space, giving rise to new financial districts, international art exhibits and post-modern architecture and entrepreneurial strategies that seek to elevate cities to world city status. The course will examine these processes in a comparative light, contrasting urban globalization processes in Europe and North America with those in Latin America, Asia and Africa.

Course not offered every year
Also Offered As: SOCI 435
Activity: Seminar
1 Course Unit

URBS 473 History & Theory of Community Organizing
Power is the ability to create change. This course will integrate the history and theories of community organizing so that each student will be able to develop a transformational praxis. We will examine social inequality and intersectionality, and explore effective strategies in organizing for social change. This course is inter-disciplinary, involving political economy, sociology, history, social work and leadership theory. Inquiry-based and problem-posing methods will serve as the primary means of formative assessment.
Taught by: Becker
Course not offered every year
Also Offered As: SOCI 473
Activity: Seminar
1 Course Unit

URBS 475 Public Performance Art in the Global Age
Variously termed relational aesthetics, socially engaged art, or new genre public art, the exploding global expansion and wildly proliferating forms of what this course will term public performance art is one of the most exciting and consequential artistic, cultural, and political movements of the start of the 21st Century. This course will chart the history of this phenomenon from its radical origins in Futurism, Constructivism, and Dada cabaret, through Happenings, the inter-disciplinary collaborations of Merce Cunningham, Robert Rauschenberg, and Jasper Johns, site-specific and installation art, to current practitioners around the world, such as Ai Weiwei, Thomas Hirschhorn, Marina Abramovic, and Christo and Jeanne-Claude, among others. The course will outline the theoretical and philosophical foundations of this work and the political controversies it has ignited. Special focus will be on the engagement of this work with public space and contemporary urban life. Course requirements include wide reading and class discussion, and oral presentations on artists, collectives, and movements that have significantly shaped the current landscape. The course includes a laboratory component in which students will have the opportunity to construct a performance art or installation piece in campus public space. This public art piece will serve as site research for a final paper. All students welcome. No previous experience or special expertise in the field required. Just genuine interest or curiosity.
Taught by: Public Performance Art in the Global Age
Course not offered every year

Activity: Lecture
1 Course Unit
Notes: Master of Liberal Arts open to undergraduates.

URBS 476 Urban Housing & Community Development Policy in America
This course examines how public policy influences housing markets and how markets influence public policy. The course reviews the development of housing policy since World War II and how shifts in policy have influenced people's ability to find suitable shelter. Topics include: poverty and affordability, residential segregation / civil rights in housing, the financial crisis of 2008, mortgage foreclosure, affordable housing, and homelessness. The course focuses on the changing roles of different levels of government in housing policy and how the financial sector, the construction industry, and non-governmental organizations influence Americans housing options.
Taught by: Stern, Goldstein
Course not offered every year
Activity: Seminar
1 Course Unit
URBS 478 Elements of a Sustainable Development Policy
This course has several objectives. The central focus will be on developing a comprehensive understanding of the principles of sustainable development, a broad, deep, and in fact, revolutionary new way of shaping the operations of society. It was first defined in the 1987 Report of the United Nations’ World Commission in Environment and Development (the Brundtland Report) as: "... development that meets the needs to the present without compromising the ability of future generations to meet their own needs." The course will combine lectures on general concepts and ways of viewing sustainable development with individuals and team presentations on a wide variety of sustainable development programs. Students will examine the efforts of universities, companies, local governments, state governments, and national governments to being to moderate man's impact of the natural environment and to make societies more economically viable and just - and therefore, more sustainable - in the long run. Students will learn how sustainable development strategies involve the full range of human activities, such as energy production and use, creation of urban communities, transportation, food systems, building construction and operation, waste disposal, control of environmental pollution, water use and treatment, and social inclusion, migration, and global poverty.

URBS 480 Liberation and Ownership
Who is going to own what we all have a part of creating? The history of the Americas, and of all peoples everywhere, is an evolving answer to the question of ownership. Ownership is about: the ties that bind and those that separate; production, participation, and control; the creation of community and the imposition of hierarchies—racial, sexual, and others; dreams of possessing and the burdens of debt and ecological despoliation; dependency and the slave yearning to breathe free. Of all the issues relevant to democracy, oppression, injustice, and inequality, ownership is arguably the most important and least understood. Utilizing a variety of disciplinary perspectives—with a particular emphasis on radical and critical theories of liberation, and by focusing on particular global sites and processes of capitalism, students will assess and refine their views regarding ownership and liberation in light of their own social, political, religious, aesthetic, and ethical commitments.
Taught by: Lamas
Course usually offered in fall term
Also Offered As: AFRC 480
Activity: Seminar
1 Course Unit

URBS 501 Community Partnerships in Visual Arts & Education
This course will connect students with artists from the 40th Street Artist-in-Residence (AIR) program, which provides free studio space and in exchange asks residents to share their talents with the local community. This course is designated as an Academic-based Service Learning (ABCS) class, meaning that students will be evaluated partly on their work in the community outreach situation. Course registration is open to advanced undergraduates.
Taught by: Epstein
Also Offered As: EDUC 501
Activity: Seminar
1 Course Unit

URBS 506 Public Environment of Cities: An Introduction to the Urban Landscape
This course will explore the role of public spaces - streets, boulevards, parks and squares - in cities and their social uses. With the University of Pennsylvania campus and the City of Philadelphia serving as our laboratory, we will critically examine the evolution of the movement of corridors, open space and buildings of the urban landscape and their changing uses. Case studies of social spaces on campus and public open spaces in Center City will help inform our understanding of how public environment serves, well or poorly, the varying needs of diverse users. While graphic skills are not required, graphic means as well as writing will be employed to communicate critical thought, ideas, and conclusions.
Taught by: Nairn
Course not offered every year
Also Offered As: URBS 206
Activity: Seminar
1 Course Unit

URBS 513 Urban Ethnography
Using Philadelphia as the site of students' praxis, this course explores the symbolic meanings and social production of urban life and culture in the nation's fifth largest city. This course is structured as a seminar with ethnographic background readings from Philadelphia and other urban settings to introduce students to the study of the city as a site of everyday practice, as well as training in conducting an ethnographic fieldwork project. The urban landscape provides an intensification of macro processes such as globalization. Such processes and how humans experience them are more easily studied and understood in an urban setting. The class will explore social relational and cultural themes such as the ethnic city, the gendered city, the contested city, the sacred city, the global city, and the aesthetic and expressive city. A diverse range of reading assignments, images, and videos will augment our understandings of urban life. Students will design and execute their own ethnographic fieldwork projects on an urban topic that interests them. Through step-by-step instruction throughout the semester, students will learn qualitative research techniques such as field notes, participant-observation, interviewing, and how to interpret their own data, so that they will be able to complete their semester project.
Taught by: Saverino
Course not offered every year
Also Offered As: FOLK 513, URBS 213
Activity: Seminar
1 Course Unit
URBS 516 Public Interest Workshop
This is a Public Interest Ethnography workshop (originally created by Peggy Reeves Sanday - Department of Anthropology) that incorporates an interdisciplinary approach to exploring social issues. Open to graduate and advanced undergraduate students, the workshop is a response to Amy Gutmann's call for interdisciplinary cooperation across the University and to the Department of Anthropology's commitment to developing public interest research and practice as a disciplinary theme. Rooted in the rubric of public interest social science, the course focuses on: 1) merging problem solving with theory and analysis in the interest of change motivated by a commitment to social justice, racial harmony, equality, and human rights; and 2) engaging in public debate on human issues to make the research results accessible to a broad audience. The workshop brings in guest speakers and will incorporate original ethnographic research to merge theory with action. Students are encouraged to apply the framing model to a public interest research and action topic of their choice. This is an academically-based-community-service (ABCS) course that partners directly with Penn's Netter Center Community Partnerships.

URBS 519 Cities in Global Econ
Also Offered As: PSCI 519
Activity: Seminar
1 Course Unit

URBS 524 Metro Labor Markets
This course examines contemporary labor markets through two thematic lenses. One is the growing discussion of knowledge industries and "knowledge workers" and their importance to regional innovative capacity and competitive advantage in a global economy. The other is the persistent challenge of unemployment, underemployment and working poverty within metropolitan regions. In exploring these themes, readings for the class synthesize perspectives on work, labor markets and economic growth from economics, sociology, history and political science. Class lecture and discussion, supplemented by the occasional guest practitioner, will focus on translating academic research into knowledge that can be used in local economic and community development practice.
Taught by: Wolf-Powers
Course usually offered in spring term
Also Offered As: CPLN 624
Activity: Seminar
1 Course Unit

URBS 530 GIS Applications in Social Science
This course will introduce students to the principles behind Geographic Information Science and applications of (GIS) in the social sciences. Examples of GIS applications in social services, public health, criminology, real estate, environmental justice, education, history, and urban studies will be used to illustrate how GIS integrates, displays, and facilitates analysis of spatial data through maps and descriptive statistics. Students will learn to create data sets through primary and secondary data collection, map their own data, and create maps to answer research questions. The course will consist of a combination of lecture and lab.
Taught by: Hillier

Also Offered As: URBS 330
Activity: Seminar
1 Course Unit

URBS 547 Anthropology and Education
An introduction to the intent, approach, and contribution of anthropology to the study of socialization and schooling in cross-cultural perspective. Education is examined in traditional, colonial, and complex industrial societies.
Taught by: Hall or Posecznick
One-term course offered either term
Also Offered As: ANTH 547, EDUC 547
Activity: Lecture
1 Course Unit

URBS 554 City Limits: The Impact of Urban Policy
This course assesses the changing role of public policy in American cities. In the past, government often believed that it could direct urban development. New realities - the rise of an informal labor market, global capital and labor flows, the flight of businesses and the middle class to the suburbs - have demonstrated that government must see itself as one - but only one - 'player' in a more complete, transactional process of policy making that crosses political boundaries and involves business, organized interest groups, and citizens. This seminar uses a case study method to study how public policy can make a difference in the revitalization of distressed American cities. The seminar is designed for advanced undergraduates and graduate students. Seminar readings and projects will be organized around three themes: 1) history and vision, 2) data and analysis, and 3) policy and implementation. Students will be divided into project teams assigned to work on current development issues that will be reviewed by both public and private-sector experts. Extensive use will be made of real estate, economic development, and social indicator data to understand the complex forces at work in both large and small cities. Students will learn to access, analyze, and map information; to frame and interpret these data within a regional perspective; and to construct profiles of cities and neighborhoods. Students will study recent urban redevelopment initiatives in the Philadelphia region - including Philadelphia's Neighborhood Transformations Initiative and New Jersey's Camden Revitalization plans.
Taught by: Goldstein, Stern
Course usually offered in spring term
Also Offered As: URBS 454
Prerequisite: Student must have taken a research methods course
Activity: Seminar
1 Course Unit
**URBS 608 Proseminar in Urban Studies**

Open to PhD students, this scholar-oriented seminar explores how academic researchers from different disciplines define researchable questions, craft research designs, and contribute to knowledge through an examination of important and/or recently published books and monographs with an urban focus. Required of all doctoral students enrolled in the Urban Studies Graduate Certificate Program. Enrollment is limited to 15 students. Other doctoral students may enroll on a space available basis. Course requirements include completion of a major research paper on a topic selected in consultation with the instructor.

Course usually offered in spring term
Also Offered As: CPLN 800, HIST 608, SOCI 608
Activity: Seminar
1 Course Unit

**URBS 614 Weimar Landscapes**

This new course is designed for students of literature, landscape architecture and urban planning, and cultural history in general. It will explore the ideas of, and attitudes towards, landscape in selected works by Wolfgang Goethe, and consider his own considerable practical involvement in reshaping the town and gardens of Weimar. The course will provide the larger context of German literature, aesthetics and landscape taste, and politics of the later 18th and early 19th centuries. We will consider the development of new gardens and parks in a "new" style (e.g. Worlitz); they were regarded to be less formal and more "natural" than their French predecessors. We will study the English models for this movement, and offer particular attention to the major German theorist, C.C.L. Hirschfeld, who would soon become famous outside Germany as well.

Taught by: Weissberg/Hunt
Course not offered every year
Also Offered As: ARTH 782, COML 615, ENGL 584, GRMN 614, LARP 770
Activity: Seminar
1 Course Unit

**URBS 619 Critical Perspectives in Contemporary Urban Education**

The focus of this course is the conditions for teaching and learning in urban public schools, current theories of pedagogy in urban education, and perspectives on urban reform efforts.

Taught by: Schultz
One-term course offered either term
Activity: Lecture
1 Course Unit

**URBS 623 Workshop in Urban Ethnography**

The ethnographic and sociological interpretation of urban life. Conceptual and methodological issues will be thoroughly discussed. Ongoing projects of participants will be presented in a "workshop" format, thus providing participants the opportunity of learning from and contributing to ethnographic work in progress. Selected ethnographic works will be read and assessed.

Course not offered every year
Also Offered As: AFRC 623, SOCI 623
Activity: Seminar
1 Course Unit

**URBS 624 Race Relations in American Cities**

The ethnographic study of race relations in the United States. The social life and culture of urban race relations in the United States will be emphasized, stressing conceptual and methodological issues. Selected ethnographic literature will be read and discussed. Students will be expected to carry out an ethnographic site study.

Course not offered every year
Also Offered As: SOCI 624
Activity: Seminar
1 Course Unit

**URBS 670 Ethnicity: The Immigrant City**

Immigration is among the most important yet controversial forces shaping cities, regions, and neighborhoods. The diversity of immigrant and receiving communities means that the dynamics and impacts of migration are varied and complex. This course examines the development of immigrant and receiving communities in the United States. It surveys public policy and community and economic development practices related to migration at the local, regional, national, and trans-national scale. Class readings, discussions, and visits to Philadelphia's immigrant neighborhoods explore themes including labor markets, housing experiences, political mobilization, civil society, cultural preservation, and the built environment. The first half of the course surveys migration and community formation among a broad range of ethnic groups in different parts of the city and suburbs, mainly through history, sociology, and geography; the second half focuses on specific policy and community and economic development initiatives. The major class project will be a study of gentrification in Philadelphia's Chinatown with the community organization Asian Americans United, part of a multi-city Chinatown study in collaboration with the Asian American Legal Defense and Education Fund and colleagues in Boston and New York.

Course usually offered in spring term
Activity: Seminar
1 Course Unit

**URBS 672 Introduction to Ethnographic and Qualitative Research in Education**

A first course in ethnographic participant observational research, its substantive orientation, literature, and methods. Emphasis is on the interpretive study of social organization and culture in educational settings, formal and informal. Methods of data collection and analysis, critical review of examples of ethnographic research reports, and research design and proposal preparation are among the topics and activities included in this course.

Taught by: Hall, Wortham
One-term course offered either term

URBS 714 Policy Analysis & Program Evaluation for Planning
Exploration of the intended and unintended consequences of public policy pertaining to land use, transportation, housing, education, growth management and economic development.
Taught by: Wong
Course usually offered in fall term
Also Offered As: CPLN 714
Activity: Lecture
1 Course Unit

Urdhu (URDU)

URDU 401 Beginning Urdu-Hindi, Part I
This introductory course core proficiency in Hindi-Urdu up to the intermediate level. It is designed for students with little or no prior exposure to Hindi or Urdu. The course covers all four language skills (speaking, lisitening, reading, and writing) and all three models of communication (interpersonal, presentational, interpretive). Students will develop literacy skills in the primary script of their choice (Hindi or Urdu script). All written materials will be provided in both scripts. All meetings are interactive and students acquire the language by using it in realistic contexts. Culture is embedded in the activities and is also introduced through various authentic materials.
For BA Students: Language Course
Taught by: Pien
Two terms. student must enter first term.
Also Offered As: HIND 400, NELC 401
Activity: Lecture
1 Course Unit

URDU 421 Intermediate Urdu Part I
This course allows students to continue improving their Urdu proficiency while also gaining a broad foundational understanding of Urdu society and culture throughout South Asia. The course provides students the tools needed to handle a variety of authentic written and spoken Urdu sources including film, music, media reports, folk tales, and simple literature. Students will also continue to increase their speaking and writing proficiency to be able to discuss a broad range of concrete, real-world topics. The course is designed for students with one year previous Urdu or Hindi study or the equivalent proficiency. Students with speaking ability in Urdu or Hindi but without reading/writing skills are encouraged to contact the instructor for placement.
For BA Students: Language Course
Taught by: Menai
Two terms. student must enter first term.
Also Offered As: NELC 421
Activity: Lecture
1 Course Unit

URDU 422 Intermediate Urdu Part II
This continuing second-year course allows students to continue improving their Urdu proficiency while also gaining a broad foundational understanding of Urdu society and culture throughout South Asia. The course provides students the tools needed to handle a variety of authentic written and spoken Urdu sources including film, music, media reports, folk tales, and simple literature. Students will also continue to increase their speaking and writing proficiency to be able to discuss a broad range of concrete, real-world topics. The course is designed for students with one year previous Urdu or Hindi study or the equivalent proficiency.
For BA Students: Last Language Course
Taught by: Menai
Also Offered As: NELC 422
Activity: Seminar
1 Course Unit

URDU 431 Advanced Urdu: Language and Literature
This course is designed to give in-depth exposure to some of the finest works of classical and modern Urdu prose and poetry along with the historical and socio-political trends they represent. Figures covered range from Ghalib (b.1797) to Faiz, Fehmida Riaz, and post 9/11 Urdu prose and poetry. The course is open to both undergraduates and graduate students, subject to having intermediate level proficiency. The course is repeatable, and hte content changes every semester. Multi-media content such as music, videos, blogs etc. will be actively incorporated. Every effort will be made to accommodate individual interests. Students are encouraged to contact the instructor with any questions, or if they are unsure about eligibility.
For BA Students: Advanced Language Course
Taught by: Menai
Course usually offered in fall term
Also Offered As: NELC 431

1 Course Unit

URDU 431 Advanced Urdu: Language and Literature
Notes: Intermediate reading, writing and speaking skills in Urdu are recommended but please contact the instructor if you are unsure of your eligibility and want to discuss further. Topic changes each semester

URDU 462 Urdu Topics Course
Taught by: Menai
Activity: Lecture
1 Course Unit
**Viper (VIPR)**

VIPR 120 Vagelos Integrated Program in Energy Research (VIPER) Seminar, Part I
This is the first part of the two-semester seminar designed to introduce students to the VIPER program and help them prepare for energy-related research. Research articles on various energy-related topics will be discussed, and students will be guided toward their research topic selection. Library research, presentation of data, basic research methods, research ethics, data analysis, advisor identification, and funding options will also be discussed. Sample energy topics discussed will include:
- Applications of nanostructured materials in solar cells
- Solid oxide fuel cells
- Global climate modeling: radiant heat transfer
- Nanocrystal-based technologies for energy storage
- Photo-bioreactor systems for mass production of micro-algae
- Advanced rare earths separations chemistry
- Modeling of oxides for solar energy applications
- Electronic transport in carbon nanomaterials.
Taught by: John M. Vohs, Andrew M. Rappe and Kristen L. Hughes
Course usually offered in spring term
Prerequisite: Admission to VIPER program.
Activity: Seminar
0.5 Course Units

VIPR 121 Vagelos Integrated Program in Energy Research (VIPER) Seminar, Part II
This is the second part of the two-semester seminar designed to introduce students to the VIPER program and help them prepare for energy-related research. In this semester we will continue to discuss research articles on various energy-related topics, best practices for library research, presentation of data, basic research methods, research ethics, data analysis, and funding options. A large focus of the course will also be on presenting (in both written and oral form) the work from the students' summer research internships.
Taught by: Andrew M. Rappe, John M. Vohs and Kristen L. Hughes
Course usually offered in fall term
Prerequisite: VIPR120
Activity: Seminar
0.5 Course Units

**Visual Studies (VLST)**

VLST 101 Eye, Mind, and Image
Visual Studies 101 provides an introduction to the collaboration of eye, mind, and image that produces our experience of a visual world. How and what do we see? How do we perceive color, space, and motion? What is an image? Does seeing vary across cultures and time? What can art tell us about vision? Is there a 21st-century form of seeing? This course combines different approaches to the study of vision, drawing from psychology, cognitive science, philosophy, history of art, and fine art. Professors representing two or three disciplines present lectures that demonstrate the methods of their disciplines and draw connections across fields. This course examines different approaches to the study of vision, drawing from psychology, cognitive science, philosophy, history of art, and fine art. Professors representing two or three disciplines present lectures that demonstrate the methods of their disciplines and draw connections across fields.
For BA Students: Hum/Soc Sci or Nat Sci/Math Sector
Taught by: Hatfield/Leja
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Fulfills General Education in Sectors IV (Humanities and Social Sciences) and VII (Natural Science and Mathematics). This course is required of all Visual Studies Majors (stage 1).

VLST 102 Form and Meaning
This course will introduce students to the theory and practice of image making, focusing on the development of observational skills and analytical thinking. We will look at conventions of artistic representation across time and cultures; discuss types of visual information and modes of formal language; explore visual narrative techniques; and seek to expand our understanding of the role images play in our culture. We will look at conventions of pictorial representation across time and cultures; discuss types of visual information and modes of formal language; explore visual narrative techniques; and seek to expand our understanding of the role images play in our culture.
Taught by: Bendtsen/Hyland
One-term course offered either term
Activity: Studio
1 Course Unit
Notes: This course is required of all Visual Studies Majors (stage 1 or 2).
VLST 103 3 Dimensions: Time and Space
Through studio projects, readings and class discussion, this class will begin to address, both conceptually and physically, basic 3D structures and translations between 3D and 2D, as well as materiality, experiential phenomena, light and time-based processes. The interconnection between mediums in our cultural climate employs a wide range of tools, processes, and ideas. It is imperative that visual studies students recognize and think through these connections. The work produced and ideas confronted in this class will facilitate discussions and constructive criticism on the fundamentals of space and time via the experiential, conceptual, and the formal as essential elements of meaning. The interconnection between mediums in our cultural climate employs a wide range of tools, processes, and ideas. It is imperative that visual studies students recognize and think through these connections. Taught by: Freedman/Neighbor

One-term course offered either term

Activity: Studio

1 Course Unit

Notes: This course is required of all Visual Studies Majors (stage 1 or 2).

VLST 212 Research Experience in Perception
In this research course, students will begin by first replicating earlier experiments to measure human visual memory capacity. After several class discussions to discuss ideas, each student will design and conduct their own experiment to further investigate visual and/or familiarity memory.

Taught by: Rust

One-term course offered either term

Also Offered As: PSYC 311

Prerequisites: One semester of statistics, and one of the following:
PSYC 111, 149, 151, 217, or permission of instructor.

Activity: Seminar

1 Course Unit

Notes: Dept permission required. Undergraduates only. This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 217 Visual Neuroscience
An introduction to the scientific study of vision, with an emphasis on the biological substrate and its relation to behavior. Topics will typically include physiological optics, transduction of light, visual thresholds, color vision, anatomy and physiology of the visual pathways, and the cognitive neuroscience of vision.

Taught by: Rust

Course usually offered in spring term

Also Offered As: BIBB 217, PSYC 217

Prerequisites: PSYC 001, COGS 001, or VLST 101

Activity: Lecture

1 Course Unit

Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 221 Introduction to Philosophy of Mind
In this course, we will explore philosophical questions concerning the nature of minds. In seeking to understand the nature of minds, philosophers and psychologists have often used metaphors drawn from the forms of technology available to them. Leibniz once described the mind as a mill, while Freud compared the mind to a hydrolytic and electromagnetic system. In our own time, many have followed Alan Turing's proposal and have viewed the mind as a special kind of computer; indeed, this "Computational Theory of Mind" forms the foundation for much work in contemporary cognitive science. In this class, we will explore the extent to which the computational theory of mind can adequately characterize the distinctive capacities involved in representing an external environment and having conscious experiences that is displayed by minds in general and human minds in particular. Although an introductory class in philosophy or logic will aid students' understanding, no prior familiarity with the philosophy of mind or cognitive science will be presumed.

Taught by: Domotor, Miracchi

Also Offered As: PHIL 244

Activity: Lecture

1 Course Unit

Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 222 Philosophy of Perception
Taking our perceptual experience as a given, what causes it? In a realistic mood, we accept that objects in the environment, or in the "external world," cause us to have the perceptual experiences that we do (as of a table with food, or as of a garden with flowers in it). Yet on this realistic view, our perception is the result of a causal chain that leads from object to eye to brain to experiences, and we are only given the last element: the experience. So how do we really know how our experiences are caused, and where do we get the idea that they are casued by an external world of physical objects? The seminar will focus on the problem of the external world as examined by David Hume, Thomas Reid, G. E. Moore, and Bertrand Russell, along with recent authors.

Taught by: Hatfield

Course not offered every year

Also Offered As: PHIL 330

Activity: Seminar

1 Course Unit

Notes: Department Majors Only. This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 223 Philosophy and Visual Perception
In this course, we'll use the biology, psychology and phenomenology of vision to explore philosophical questions about color, such as these: Color vision helps us get around in our environments, but in what sense is it a window onto reality, if it is? Are colors properties of objects, or are they inherently private, subjective properties of minds? What can non-human forms of color vision teach us about the nature of color, and how should we empirically study color vision? Do we need to see in color to understand it? How do our ordinary ways of talking and thinking about colors relate to the experiences we have in color? How does color vision figure in aesthetic judgment? And to what degree can it be influenced by learning, or by social biases like sexist or racist prejudices?

Taught by: Hatfield, Connolly

One-term course offered either term

Also Offered As: PHIL 223, PHIL 423

Activity: Seminar

1 Course Unit

Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.
VLST 232 Renaissance to Contemporary: Introduction to Western Art, 1400 to the Present
This course is an introduction to the visual arts including painting, sculpture, print culture, and new media such as photography, film, performance and installation art-in Europe and the United States from 1400 to the present. It offers a broad historical overview of the key movements and the artists of the period, as well as an investigation into the crucial themes and contexts that mark visual art production after the middle ages. Such themes include the secularization of art; the (gendered) role of the artist in society; the sites of art production and consumption such as the artist’s studio, the royal courts and the art exhibition; the materials of art; the import of technology and science to art’s making, content and distribution; the rise of art criticism; and the socio-political contexts of patronage and audience; among others.
For BA Students: Arts and Letters Sector
Taught by: Dombrowski, Kim, Shaw
Course usually offered in spring term
Also Offered As: ARTH 102
Activity: Lecture
1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 233 Art and Civilization in East Asia
Introduction to major artistic traditions of China and Japan and to the methodological practices of art history. Attention given to key cultural concepts and ways of looking, in such topics as: concepts of the afterlife and its representation; Buddhist arts and iconography; painting styles and subjects; and more broadly at the transmission of styles and cultural practices across East Asia. Serves as an introduction to upper level lecture courses in East Asian art history cultures. If size of class permits, certain sessions will be held in the University Museum or the Philadelphia Museum of Art.
For BA Students: Arts and Letters Sector
Taught by: Davis/Steinhardt
Course not offered every year
Also Offered As: ARTH 103, EALC 013
Activity: Lecture
1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 234 Introduction to Art in South Asia
This course is a survey of sculpture, painting and architecture in the Indian sub-continent from 2300 B.C., touching on the present. It attempts to explore the role of tradition in the broader history of art in India, but not to see India as ‘traditional’ or unchanging. The Indian sub-continent is the source for multi-cultural civilizations that have lasted and evolved for several thousand years. Its art is as rich and complex as that of Europe and diverse. This course introduces the full range of artistic production in India in relation to the multiple strands that have made the cultural fabric of the sub-continent so rich and long lasting.
For BA Students: Arts and Letters Sector
Taught by: Meister

1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 236 Art Now
One of the most striking features of today's art world is the conspicuous place occupied in it by the photographic image. Large-scale color photographs and time-based installations in projections are everywhere. Looking back, we can see that much of the art making of the past 60 years has also been defined by this medium, regardless of the form it takes. Photographic images have inspired countless paintings, appeared in combines and installations, morphed into sculptures, drawings and performances, and served both as the object and the vehicle of institutional critique. They are also an increasingly important exhibition site: where most of us go to see earthworks, happenings and body-art. This course is a three-part exploration of our photographic present.
Taught by: Silverman
Course not offered every year
Also Offered As: ARTH 294, ARTH 694, ENGL 059, GSWS 294
Activity: Lecture
1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 250 Introduction to Printmaking
The course offers an introduction to several forms of printmaking including: intaglio, screen printing, relief, and monoprinting. Through in-class demonstrations students are introduced to various approaches to making and printing in each medium. The course enhances a student's capacity for developing images through two-dimensional design and conceptual processes. Technical and conceptual skills are developed through discussions and critiques.
Course usually offered in spring term
Also Offered As: FNAR 250, FNAR 550
Activity: Studio
1 Course Unit
VLST 251 Introduction to Photography
This course is an introduction to the basic processes and techniques of black & white photography. Students will learn how to expose and process 35mm film, SLR camera operation, darkroom procedures & printing, basic lighting and controlled procedures to understand the aesthetic issues and photographic history. Assignments, ideas and important examples of contemporary art will be presented via a series of slide lectures, critiques and discussion. No previous experience necessary. 35mm SLR cameras will be available throughout the semester for reservation and checkout from the photography equipment room.
One-term course offered either term
Also Offered As: FNAR 271, FNAR 571
Activity: Studio
1 Course Unit

VLST 252 Sculpture Practices
As an introduction to traditional and contemporary three-dimensional practice, this course is concerned with the concepts and methodologies surrounding three-dimensional art making in our time. Students experiment with a variety of modes of production, and develop some of the fundamental techniques used in sculpture. In addition to these investigations, assignments relative to the history and social impact of these practices are reinforced through readings and group discussion. Processes covered include use of the Fab Lab, wood construction, clay, paper, mixed media, and more.
One-term course offered either term
Also Offered As: FNAR 145, FNAR 545
Activity: Studio
1 Course Unit

VLST 253 Drawing I
This course is designed to develop visual awareness and perceptual acuity through the process of drawing. Students will learn to sharpen perceptual skills through observational drawing, and to explore the expressive potential of drawing. A variety of problems and media will be presented in order to familiarize students with various methods of working and ways of communicating ideas visually. Subject matter will include object study, still life, interior and exterior space, self-portrait and the figure. Different techniques and materials (charcoal, graphite, ink, collage) are explored in order to understand the relationship between means, material and concept. Critical thinking skills are developed through frequent class critiques and through the presentation of and research into historical and contemporary precedent in drawing.
Two terms. student may enter either term.
Also Offered As: FNAR 123, FNAR 523
Activity: Studio
1 Course Unit

VLST 260 Photography Practices
This course is an introduction to the basic principles, strategies and processes of photographic practice. It is designed to broaden the student’s aesthetic explorations and to help the student develop a visual language based on cross-disciplinary artistic practice. Through a series of projects and exercises students will be exposed to a range of camera formats, techniques and encouraged to experiment with the multiple modes and roles of photography - both analogue and digital. Attention will also be given to developing an understanding of critical aesthetic and historical issues in photography. Students will examine a range of historical and contemporary photowork as an essential part of understanding the possibilities of image making.
One-term course offered either term
Also Offered As: FNAR 150
Activity: Studio
1 Course Unit

VLST 261 Video I
This course provides students with the introductory skills and concepts related to producing short works that explore the language of the moving image. Students will learn the basics of cinematography and editing through a series of assignments designed to facilitate the use of the medium for artistic inquiry, cultural expression and narrative storytelling, through both individual and group projects.
One-term course offered either term
Also Offered As: CIMS 061, FNAR 061, FNAR 661
Activity: Seminar
1 Course Unit

VLST 264 Art, Design and Digital Culture
This course is an introduction to the fundamental perception, representation, aesthetics, and design that shape today’s visual culture. It addresses the way artists and designers create images; design with analog and digital tools; communicate, exchange, and express meaning over broad range of media; and find their voices within the fabric of contemporary art, design, and visual culture. Emphasis is placed on building an extended form of visual literacy by studying and making images using a variety of representation techniques; learning to organize and structure two-dimensional and three-dimensional space, and designing with time-based and procedural media. Students learn to develop an individual style of idea-generation, experimentation, iteration, and critique as part of their creative and critical responses to visual
One-term course offered either term
Also Offered As: FNAR 264, FNAR 636
Activity: Studio
1 Course Unit
VLST 265 Digital Photography
This class offers an in-depth technical and conceptual foundation in digital imagery and the opportunity to explore the creative, expressive possibilities of photography. Students will become proficient with the basic use of the camera, techniques of digital capture, color management and color correction. They will also develop competency in scanning, retouching, printing and a variety of manipulation techniques in Photoshop. Through weekly lectures and critiques, students will become familiar with some of the most critical issues of representation, consider examples from photo history, analyze the impact of new technologies and social media. With an emphasis on structured shooting assignments, students are encouraged to experiment, expand their visual vocabulary while refining their technical skills. No previous experience is necessary. Although it is beneficial for students to have their own Digital SLR camera, registered students may reserve and checkout Digital SLR cameras and other high-end equipment from the department.

One-term course offered either term
Also Offered As: FNAR 340, FNAR 640
Activity: Studio
1 Course Unit

VLST 301 What is Visual Studies?
Visual Studies 301 is a seminar-format course that challenges students to develop independent ideas about how the eye, the mind and the image that is created therein, all work together to inform our conception of the world at large. Rather than present a unified viewpoint, the course asks the question, "What is visual studies?" by examining parallel and sometimes antagonistic approaches to the ways that human beings understand sight and the concept of visuality. Over the course of the semester, students will discuss and write about various approaches to vision, examining this contested field through the lenses of several disciplines -- including psychology, philosophy, and art history. By parsing and assimilating diverse ideas, students will decide for themselves what are the most pertinent and relevant approaches to the various avenues of research that present themselves in the emerging interdisciplinary field of Visual Studies.

One-term course offered either term
Also Offered As: ARTH 301, VLST 501
Prerequisite: VLST 101 or Instructor Permission
Activity: Seminar
1 Course Unit
Notes: This course is required of all Visual Studies Majors (Stage 2).

VLST 303 The Rise of Image Culture: History and Theories
Images are ubiquitous in the cultural life of the 21st century, yet only two centuries ago they were rare. When and how did pictures come to permeate daily life? How has ordinary experience--psychological, social, cultural, intellectual--changed as a result? This seminar addresses these questions through close reading of influential historical and theoretical writings about the rise of image culture and its effects, including Benjamin, Debord, McLuhan, Mitchell.

Taught by: Leja
Also Offered As: VLST 503
Activity: Seminar
1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 305 What is an Image?
The course explores various concepts of images. It considers natural images (as in optics), images as artifacts, virtual images, images as representations, and works of art as images. Themes to include: the image controversy in cognitive science, which asks whether some cognitive representations are irreducibly imagistic; the question of whether some images resemble what they represent; the development of the concept of the virtual image and of three-dimensional images; the notions of pictorial representation and non-representational images in art. Readings from C. S. Peirce, Nelson Goodman, Robert Hopkins, Dominic Lopes, W. J. T. Mitchell, John Kulvicki, and Mark Rollins, among others.

Taught by: Verstegen
Also Offered As: VLST 505
Activity: Seminar
1 Course Unit
Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 395 Senior Project
Permission of Instructor Required.
Two terms. student must enter first term.
Activity: Seminar
0.5 Course Units
Notes: This course is required of all Visual Studies Majors. (Stage 4)
Seniors only.

VLST 399 Independent Study
Activity: Independent Study
1 Course Unit

Wharton Undergraduate (WH)

WH 101 Business and You
WH 101 is the first step of the Leadership Journey at Wharton. The course is designed to fuel students' unique interests in academic, research, and professional pursuits; to raise awareness of the complexity of business; and to increase understanding of the interrelatedness of business disciplines. Students will also acquire greater awareness of their strengths and leadership potential as members of the Wharton community and as future professionals. Students will come to appreciate that leadership is an act and best developed through study, feedback from trusted colleagues and peers, and stretch experiences that stimulate growth and development. Students will also begin to hone skills essential to the pursuit of personal, academic, and professional goals: thinking creatively, analyzing problems, applying what you have learned, and reflecting on learnings. A case-analysis project will engage students with the community through helping local agencies examine business challenges that they face.
Taught by: Rosenkopf; Greenhalgh; Romeika
Course usually offered in fall term
Activity: Recitation
0.5 Course Units

WH 150 Evaluating Evidence
WH 150 provides an introduction to all stages of the research process for business topics. In the first third of the course, we discuss theory building, hypothesis development, and research design choices particularly in casual research. In the second third, we discuss data collection methods (e.g., surveys, experiments, case studies and fieldwork) and the use of archival databases. This part of the course emphasizes the interplay between research design and sampling/data collection methods. In the final third of the course, we introduce data analysis and interpretation, including methods for converting raw data into measurable constructs suited to statistical analysis.
One-term course offered either term
Activity: Seminar
1 Course Unit

WH 201 Management Communication: Persuasive Speaking and Writing for Business
WH 201 is the second step the Leadership Journey at Wharton. The objective of the course is to ensure that students become more confident and effective speakers and writers. Students will learn the fundamentals of persuasion and apply those concepts to increasingly challenging business contexts. Students will present in-class speeches and submit writing assignments that are evaluated by instructors. The speaking component of the course will begin with the fundamentals of public speaking and persuasion, and then move to settings in which managers face higher stakes with less time to respond. For the writing component, students will write on various topics for the first few weeks of the course. For the last half of the course, speaking and writing assignments will be integrated, allowing students to offer in-depth analysis through their written recommendations. All assignments will reinforce the overarching theme of clear, concise, persuasive communications.
One-term course offered either term
Activity: Lecture
0.5 Course Units

WH 299 Whug Research Scholars
This seminar takes place over two semesters and provides students with the skills to perform their own research under the guidance of a Wharton faculty member. At the conclusion of the fall semester, students will produce a thesis proposal including literature review, significance of the research, methodology, and exploratory data if relevant. Throughout the fall semester faculty guests from a range of disciplines will present on their research in class, highlighting aspects that are relevant to the work students are engaging in at that point. During the second semester, students will collect and analyze data and write up the results in close collaboration with their faculty mentor. At the end of the spring semester, each student will present their research in a video presentation. Throughout the course, students will work individually, in small groups, and under the mentorship of a Wharton faculty member. The goal is to become capable independent researchers who incorporate feedback and critical (self-) analysis to take their research to the next level.
Two terms. student must enter first term.
Activity: Seminar

WH 301 Teamwork and Interpersonal Dynamics
One-term course offered either term
Activity: Lecture
0.5 Course Units

WH 398 Senior Capstone
Wharton 398 is a for-credit, interactive business simulation that provides Wharton seniors with the opportunity to draw on their business knowledge - finance, management, marketing, leadership, and social responsibility - while formulating and executing business strategy in a competitive, team-based environment. Utilizing real-time problem solving within a dynamic simulation environment, teams design and implement strategic plans, integrate feedback from the consequences of those decisions, and interact with other teams to create shareholder and social value.
Course usually offered in spring term
Activity: Independent Study

Yiddish Language (YDSH)

**YDSH 101 Beginning Yiddish I**
The goal of this course is to help beginning students develop skills in Yiddish conversation, reading and writing. Yiddish is the medium of a millennium of Jewish life. We will frequently have reason to refer to the history and culture of Ashkenazie Jewry in studying the language.

For BA Students: Language Course
Course usually offered in fall term
Also Offered As: JWST 031, YDSH 501
Activity: Lecture
1 Course Unit

**YDSH 102 Beginning Yiddish II**
In this course, you can continue to develop basic reading, writing and speaking skills. Discover treasures of Yiddish culture: songs, literature, folklore, and films.

For BA Students: Language Course
Course usually offered in spring term
Also Offered As: JWST 032, YDSH 502
Prerequisite: YDSH 101 or permission of the instructor
Activity: Lecture
1 Course Unit

**YDSH 103 Intermediate Yiddish I**
The course will continue the first year’s survey of Yiddish grammar with an additional emphasis on reading Yiddish texts. The course will also develop conversational skills in Yiddish.

For BA Students: Language Course
Course not offered every year
Also Offered As: JWST 033, YDSH 503
Prerequisite: YDSH 102 or permission of the instructor
Activity: Lecture
1 Course Unit

**YDSH 104 Intermediate Yiddish II**
Continuation of GRMN 403. Emphasis on reading texts and conversation.

For BA Students: Last Language Course
Course not offered every year
Also Offered As: JWST 034, YDSH 504
Prerequisite: YDSH 103 or permission of the instructor
Activity: Lecture
1 Course Unit

**YDSH 108 Readings in Modern Yiddish Literature**
This course will survey modern Yiddish literature through readings of Yiddish prose and poetry from the end of the 19th century through the late 20th century. The class will be conducted in both Yiddish and English. Reading knowledge of Yiddish is required, although some texts will be available in English translation.

Taught by: Botwinik
Course not offered every year
Also Offered As: JWST 438, YDSH 508
Prerequisite: Reading knowledge of Yiddish
Activity: Lecture
1 Course Unit

**YDSH 501 Beginning Yiddish I**
The goal of this course is to help beginning students develop skills in Yiddish conversation, reading and writing. Yiddish is the medium of a millennium of Jewish life. We will frequently have reason to refer to the history and culture of Ashkenazie Jewry in studying the language.
