Welcome to the University of Pennsylvania Undergraduate Catalog

This new Catalog provides information for current and prospective students about courses at Penn at all levels of study. It also provides detailed information about traditional undergraduate programs, as well as important academic policies and resources for undergraduate students. Future Catalogs will provide information for graduate and professional students as well as non-traditional undergraduates.

In the meantime, prospective students can visit this searchable list of graduate and professional students programs (http://www.upenn.edu/programs/graduate) and current graduate and professional students can visit the Graduate Student Center (http://www.gsc.upenn.edu/resources) for helpful information. Undergraduates in the College of Liberal and Professional Studies (http://www.sas.upenn.edu/lps) and in the Bachelor of Science in Nursing Second Degree program (https://www.nursing.upenn.edu/academics/accelerated-options/bsn-second-degree) should visit the websites of their programs for academic information. Students interested in non-credit and continuing professional education may visit this webpage (http://www.upenn.edu/programs/lifelong).

This Catalog is intended to provide general information about the University of Pennsylvania and is accurate as of May 2017. The University reserves the right to change, modify, or correct any information contained herein without prior notice, at any time.

The College is committed to offering a broad education that will lay a durable foundation for critical and creative thinking. The College's goal is to help students to become knowledgeable about the world and the complexities of today's society, aware of moral, ethical and social issues, prepared to exercise intellectual leadership, and enlivened by the use of their minds. We believe that students should explore fundamental approaches to the acquisition and interpretation of knowledge through introduction to substantive bodies of current thought in the natural sciences, social sciences and humanities. Equally important, they should learn to understand and evaluate the sources and methods from which this knowledge derives. In this way they can be led to appreciate the contingency of all knowledge and to participate in the on-going excitement of intellectual discovery that is at the heart of the College.

We challenge our students to develop the skills of analysis and communication that will enable them to perceive pattern in complexity, render reasoned judgments, make wise choices under conditions of uncertainty, and join with others in the pursuit of common endeavors. They should, for example, be able to write and speak effectively as well as to analyze quantitative data and to use another people's language as one means of access to the diversity of contemporary and historical culture.

A student's emerging interests and talents find expression through an organized program of study in a major field. In the specialized context of the major, students investigate the traditions and contemporary status of an established branch of knowledge. The structured study of a discipline complements the general exploration of our intellectual heritage to provide the balance of educational breadth and depth to which the College is committed. Study of the arts and sciences provides a solid basis for advanced scientific and scholarly research, for subsequent training in the professions, and for the informed exercise of the rights and responsibilities of citizenship.

There is no single or easy path to the benefits of liberal education. A program of study must be shaped as a student grows. But the special strengths of the University of Pennsylvania—its combination of academic and professional excellence, its diverse and interdisciplinary tradition, its active community of scholars at all levels of experience—provide a setting in which the College can dedicate itself to nurturing honest, eager, and critical minds. In the tradition of its eighteenth-century founders, the College of Arts and Sciences regards the enduring purpose of education as the liberation of the mind from ignorance, superstition, and prejudice. Therefore, the College welcomes those who seek to understand, appreciate and contribute to the achievements of the human intellect.

The College of Arts and Sciences is the full-time undergraduate division of the School of Arts and Sciences (SAS), which offers the Bachelor of Arts (B.A.) degree. Other divisions include:

- The Graduate School of Arts and Sciences which offers the advanced degrees of Master of Arts (M.A.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.);
- The College of Liberal and Professional Studies (LPS) is the home of lifelong learning at the University of Pennsylvania. It offers high school, undergraduate, post-baccalaureate, graduate, summer and online studies as well as customizable professional training with courses that span across disciplines. LPS also administers the Summer Sessions.

The twenty-seven departments in SAS represent the core disciplines of the liberal arts. They individually offer thirty-two major programs. In addition, through interdepartmental collaborations, the SAS faculty offer a number of interdisciplinary majors. Around SAS are grouped the various specialized professional schools, all of them drawing extensively on the intellectual resources provided by SAS. Two of these schools, the Annenberg School for Communication and the School of Design, offer undergraduate majors for College students through special collaborative relationships with SAS.

The College aims to provide its undergraduates with a broad general education that will lay the groundwork for critical and creative thinking in all fields. Ideally the graduate of the College will be well informed about the world and confident in today's complex technological society. He or she will be willing and able to make critical judgments and to exercise intellectual leadership. The B.A. degree thus provides a solid basis for specialized scientific and scholarly research, for education for the professions, and for the informed exercise of the rights and responsibilities of citizenship.

The University of Pennsylvania is particularly well placed to provide its students with an education that links the theoretical and the practical. Within the College and the other schools is an extraordinary range of programs. The College alone offers over fifty different major programs. The College does its best to make all of the University's resources accessible to its students, giving them wide latitude in planning their programs of study and in deciding on their areas of specialization.

Learn more about our history: https://www.college.upenn.edu/college-history.

Learn more about our school leadership: https://www.college.upenn.edu/college-office-directory.

The fundamental purpose of the University as an academic community is the pursuit of knowledge. Essential to the success of this educational mission is a commitment to the principles of academic integrity. Academic work represents not only what we have learned about a subject but also how we have learned it. Values and beliefs about academic integrity have been adopted by scholars so that others may trace our honorable footsteps, verify what we have learned, and build upon our work. Every member of the University community is responsible for upholding the highest standards of honesty at all times.

As members of the University community, students are also responsible for adhering to the principles and spirit of the Code of Academic Integrity (p. 282). Penn believes strongly in the importance of academic integrity. Students who violate its precepts are subject to punishment through the judicial system. Ignorance of the rules is no excuse. If a student is unsure whether his or her action(s) constitute a violation of the Code of Academic Integrity, it is that student's responsibility to consult with the instructor to clarify any ambiguity.
Curriculum

The Purpose of the Curriculum

A curriculum is often identified with a set of degree requirements: “What do I have to do to receive my degree?” But degree requirements are not themselves sufficient to define appropriate educational goals. One might fulfill all of the College’s degree requirements and yet fail to get a good education. It would also be possible to acquire a good education but neglect to fulfill the degree requirements. Now, we certainly do want you to fulfill all of the degree requirements, and we will work with you to see that this happens. But you are not here fundamentally for the purpose of completing degree requirements. If you think of your education solely in those terms, the result will be dull and unsatisfying.

"Curriculum" comes from the Latin for "course," in the sense in which one might speak of the course of a journey. The term denotes a means rather than an end, but it suggests better than "degree requirements" what it is to become educated. It denotes a movement from a starting point to a destination, a movement that proceeds along some path. You are not left to your own devices to figure out how to get from here to there. But neither is the path straight and narrow. You will have many choices to make as you negotiate the course of your education, but they will be informed by the experience of the faculty, who in the curriculum offer their considered advice for your educational journey.

The College’s curriculum draws you toward two distinctive goals: toward general education across the wide range of the arts and sciences and toward specialized education in a major. A commitment to holding these two—general and specialized education—together has been the genius of American higher education since the early part of the last century. We continue to believe that these two elements constitute an education best suited to enabling intelligent individuals to live humane, productive and fulfilling lives in the 21st century.

For more information, visit: https://www.college.upenn.edu/curriculum-purpose.

General Education Curriculum

The College’s General Education Curriculum for its part has two broad objectives. It seeks to develop in you some general skills or approaches to knowledge and to engage you in the intellectual work of the disciplines in a variety of fields across the arts and sciences.

In following this curriculum, you will be guided by two kinds of degree requirements corresponding to these two objectives. One deals with foundational approaches, the other with specific disciplines and fields of knowledge. Within any given course, these two—an approach and a field of study—are integral to one another. An approach is learned by practice in relation to a field of knowledge: your ability to use a foreign language is developed through learning about the culture in which the language is rooted; understanding a work of art is acquired by learning how to write about it—that is, by learning how to use words to describe, compare, question and argue about works of art and the contexts in which they were created and are appreciated; you learn how to analyze quantitative data by thinking about what data mean for our knowledge of natural or social phenomena we observe. Some courses, however, give priority to developing skills and approaches, while others give priority to the field under investigation.

Foundational Approaches (p. 17)

- Communication
- Analysis
- Perspectives

Sectors (p. 18)

I. Society
II. History & Tradition
III. Arts & Letters
IV. Humanities & Social Science
V. Living World
VI. Physical World
VII. Natural Sciences & Mathematics
Foundational Approaches

The Foundational Approaches are key intellectual capabilities demanded in a variety of disciplines.

Communication (p. 17)
- Writing
- Foreign Language

Analysis (p. 17)
- Quantitative Data Analysis
- Formal Reasoning and Analysis

Perspectives (p. 17)
- Cross-Cultural Analysis
- Cultural Diversity in the U.S.

Writing Requirement

Writing is the primary medium through which the quality of a student’s intellectual work will be judged. The ability to express oneself clearly and persuasively in writing is fundamental for success across all academic disciplines, and throughout one’s personal and professional life.

For these reasons, writing plays a central role within the College curriculum. Students must take a writing seminar to fulfill the College’s Writing Requirement. It is recommended that students take this course during their first year of study. Students are also encouraged to continue development of their writing skills by participating in Penn’s writing programs.

For more information, visit: https://www.college.upenn.edu/writing-requirement.

Foreign Language Requirement

Competence in a foreign language is essential for an educated person. Participation in the global community is predicated on the ability to understand and appreciate cultural difference, and nothing brings this more sharply into focus than the experience of learning a foreign language. The foreign language not only affords unique access to a different culture and its ways of life and thought; it also increases awareness of one’s own language and culture. For this reason, College students are required to attain a certain degree of competency.

While students often opt to satisfy the Language Requirement by continuing to study the language that they have already begun in high school or earlier, the wealth of languages that the University offers is such that many students decide to explore a new culture and area of our globe by beginning a foreign language that they have never studied before. French, Spanish, and a few other languages are taught at the pre-collegiate level, but students are less likely to have been exposed to Arabic, Hindi or Japanese—let alone Uzbek or Hausa—and each of these languages is a mode of access to a fascinating culture and history.

For more information, visit: https://www.college.upenn.edu/language-requirement.

Formal Reasoning and Analysis Requirement

In contrast to Quantitative Data Analysis courses, which deal with inductive reasoning, courses designated for this requirement focus on deductive reasoning and the formal structure of human thought, including its linguistic, logical and mathematical constituents. These courses emphasize mathematical and logical thinking and reasoning about formal structures and their application to the investigation of real-world phenomena. In addition to courses in mathematics, this requirement includes courses in computer science, formal linguistics, symbolic logic and decision theory.

For more information, visit: https://www.college.upenn.edu/formal-reasoning-requirement.

Quantitative Data Analysis Requirement

In contemporary society, citizenship, work and personal decision-making all require sophisticated thinking about quantitative evidence.

Students in the College must complete a course that uses mathematical or statistical analysis of quantitative data as an important method for understanding another subject. Through such study, students learn to think critically about quantitative data and the inferences that can be drawn from these data. They also gain experience with the use of quantitative analysis to interpret empirical data and to test hypotheses.

Courses in calculus and computer science do not fulfill the requirement because these courses do not require students to analyze actual data sets with the goal of evaluating hypotheses or interpreting results. To count toward the Quantitative Data Analysis Requirement, a course must include such data analysis.

For more information, visit: https://www.college.upenn.edu/quantitative-data-requirement.

Cross-Cultural Analysis Requirement

In our increasingly interconnected world, the Cross-Cultural Analysis Requirement aims to increase students’ knowledge and understanding of socio-cultural systems outside the United States.

College students are required to take at least one course to develop their ability to understand and interpret the cultures of peoples with histories different from their own. The focus may be on the past or the present and it should expose students to distinctive sets of values, attitudes and methods of organizing experience that may not be obtained from American cultures. This exposure to the internal dynamic of another society should lead students to understand the values and practices that define their own cultural framework.

For more information, visit: https://www.college.upenn.edu/cross-cultural-requirement.

Cultural Diversity in the U.S. Requirement

The Cultural Diversity in the U.S. Requirement complements the Cross-Cultural Analysis Requirement and aims to develop students’ knowledge of the history, dynamic cultural systems and heterogeneous populations that make up the national culture of the United States.
College students are required to take at least one course to develop the skills necessary for understanding the population and culture of the United States as it becomes increasingly diverse. Through historical inquiry, the study of cultural expressions and the analysis of social data, students will develop their ability to examine issues of diversity with a focus on race, ethnicity, gender, sexuality, class and religion. The goal is to equip graduates with the ability to become perceptive and engaged members of society.

For more information, visit: https://www.college.upenn.edu/cultural-diversity-requirement.

**Sectors**

The sectors are intended to ensure breadth of education across the sectors or fields of knowledge, along with interdisciplinary explorations that link several fields of knowledge.

For policies regarding Sectors, visit: https://www.college.upenn.edu/node/2432.

**I. Society**

This sector focuses on the structure and norms of contemporary human society, including their psychological and cultural dimensions.

Courses in this sector use many analytical techniques that have been developed to study contemporary society, with its complex relations between individuals and larger forms of mass participation. Some Society courses are largely devoted to the analysis of aggregate forms of human behavior (encounters, markets, civil society, nations, supranational organizations, and so on), while others may focus on the relations between individuals and their various societies. While historical materials may be studied, the primary objective of Society courses is to enable students to develop concepts and principles, test theories, and perfect tools that can be used to interpret, explain and evaluate the behavior of human beings in contemporary societies. This objective will be realized through the specific content of the various courses, but the emphasis in each course should be on developing in students a general capacity for social analysis and understanding.

For more information, visit: https://www.college.upenn.edu/sectors-society.

**II. History and Tradition**

This sector focuses on studies of continuity and change in human thought, belief and action. Understanding both ancient and modern civilizations provides students with an essential perspective on contemporary life. Courses in this sector examine the histories of diverse civilizations, their cultures and forms of expression, their formal and informal belief systems and ideologies, and the record of their human actors. Students should learn to interpret primary sources, identify and discuss their core intellectual issues, understand the social contexts in which these sources were created, pose questions about their validity and ability to represent broader perspectives and utilize them when writing persuasive essays.

For more information, visit: https://www.college.upenn.edu/sectors-history-tradition.

**III. Arts & Letters**

This sector encompasses the means and meaning of visual arts, literature and music, together with the criticism surrounding them.

Most courses in this sector are concerned with works of creativity—paintings, films, poetry, fiction, theatre, dance and music. They generally address a considerable breadth of material rather than an individual work or artist. The objective of Arts and Letters courses is to confront students with works of creativity; cultivate their powers of perception (visual, textual, auditory); and equip them with tools for analysis, interpretation and criticism. This objective will be realized through the specific content of the various courses, but the emphasis in each course should be on developing and strengthening in students a general capacity for understanding meaning and the ways in which it is achieved in its distinctive environment of culture and moment.

For more information, visit: https://www.college.upenn.edu/sectors-arts-letters.

**IV. Humanities & Social Science**

This sector comprises courses that combine methods and approaches at work in at least two of the first three sectors.

Students will engage with diverse approaches to society, history, tradition and the arts more deeply than a single course from each domain can allow. Greater depth of experience is gained by bringing to bear several humanistic and social scientific perspectives upon a single issue or topic or by engaging directly in academically-based service or performance informed by these perspectives.

In this sector, students seek to broaden their perspective by taking a course in the humanities or social sciences that has been approved as a general education course but that cuts across two or more of sectors I, II, and III. Some courses approved for this sector will seek a more integrative approach by addressing a problem or topic from a variety of disciplinary perspectives. Others will combine disciplinary study with community service or activism, and constructively and reflectively connect the theoretical with the actual. Finally, some courses in the arts that combine creative or performance experience with reflection and grounding within a discipline may be found in this sector.

For more information, visit: https://www.college.upenn.edu/sectors-humanities-social-sciences.

**V. The Living World**

This sector deals substantively with the evolution, development, structure and/or function of living systems.

Courses in this sector study the variety of approaches that are useful in understanding the diversity of living organisms, their interrelatedness, and their interactions with their environment. Analytical approaches employed range from analyses at the molecular and cellular level, to analyses of the cognitive and neural bases of behavior, to analyses of evolutionary processes and ecological systems. Students learn the methods used by contemporary natural science to study these topics, including ways in which hypotheses are developed, tested, and reformulated in light of new research findings. A full understanding of living organisms incorporates insights from approaches at many different levels.
For more information, visit: https://www.college.upenn.edu/sectors-living-world.

VI. The Physical World
This sector focuses on the methodology and concepts of physical science.

Courses in this sector aim to provide insight into the content and workings of modern physical science. Some courses in this sector are part of a major, while others are designed primarily to provide an introduction to the field for non-science majors. Courses for non-science majors may include some discussion of the historical development of the subject as well as the most important conceptual notions and their mathematical expressions. All courses in this sector seek to demonstrate the generally accepted paradigm of modern science: experiment and observation suggest mathematically formulated theories, which are then tested by comparison with new experiments and observations.

All courses in this sector use a significant mathematical prerequisite (advanced high school algebra through introductory calculus) - that is, students will actually be expected to use mathematical methods and concepts to achieve an understanding of subjects in physical science.

For more information, visit: https://www.college.upenn.edu/sectors-physical-world.

VII. Natural Sciences & Mathematics
Students should engage with the diverse approaches to the natural sciences and mathematics more deeply than a single course from the physical and life sciences would allow. Greater depth of experience can be accomplished by either greater focus on one area, study in a related area, bringing various scientific perspectives to bear upon a single issue or topic, or engaging directly in academically-based activities informed by these perspectives.

In this sector, students broaden their perspective by taking a course in the natural sciences or mathematics that has been approved as a General Education course and that cuts across the two sectors. Other courses approved for this sector will seek a more integrative approach by addressing a problem or topic from a variety of disciplinary perspectives. Still others will combine disciplinary study with community service or activism, constructively and reflectively connecting the theoretical with the actual.

For more information, visit: https://www.college.upenn.edu/sectors-science-math.

The Major
The Major provides an opportunity to know a segment of human knowledge deeply, with a sufficient grasp of its modes of thinking and analysis to make your own contribution.

Click here for a list of majors offered by the College (p. 20).

For policies governing the Major requirement, visit: https://www.college.upenn.edu/node/2436.

Free Electives
In addition to these structural elements, the curriculum provides space in your studies for a number of Free Electives. These give you the freedom to pursue interests that may lie outside your major and that extend beyond those addressed in the General Education Curriculum. Take a course in a field that you have not otherwise encountered. Use one or more Free Electives to explore further a subject introduced in a sector course or learn about a subject that sheds light on your major.

For policies regarding Free Electives, visit: https://www.college.upenn.edu/node/2437.

Academic Opportunities
Learning happens inside and outside of the traditional classroom. The value of a rich liberal arts tradition extends beyond the curriculum itself to the far reaches of cutting edge research and real-world internships, community partnerships and study abroad.

• Penn is a world-class research institution where undergraduates have the opportunity to participate in the creation of knowledge.
• Students in the College integrate knowledge from a variety of specializations or dig deeply into a particular area of study.
• Through their work with local schools and organizations, students in Academically Based Community Service Courses combine classroom and community work to solve critical issues.
• Students in study abroad programs and internship experience diverse communities and real world challenges in and outside of Philadelphia.

Click here (https://www.college.upenn.edu/academic-opportunities) for a comprehensive view of academic opportunities for College students.

Advising
College students need to choose courses, declare a major and define career goals. They will need to examine their performance in different courses, identify their skills and those they wish to develop, and decide what really matters to them. Much of this assessment they will do themselves, but faculty members, academic advisors, career counselors and peers can help.

Students in the College have a strong network of academic advisors available to assist them throughout their undergraduate careers.

• Pre-major advisors help first- and second-year students navigate their entrance into academic and intellectual life in the College beginning with the issues of incoming freshmen and continuing through the student's exploration of a potential major.
• Peer advisors work with the pre-major advisor and are one of the first points of contact for incoming College students. They provide the perspective of an upperclass student in the College and assist first-year students in making the transition from high school to Penn by sharing their strategies for academic success and knowledge of campus resources.
• After declaring a major, students are assigned an academic advisor affiliated with the major department or program.
• All students are welcome and encouraged to speak with assistant deans for advising in the College Office. These advisors can help students explore the many options and opportunities available to College students, and are available by appointment or on a walk-in basis throughout the year.
Policies and Procedures

For more information, visit: https://www.college.upenn.edu/academic-advising.

Policies and Procedures

The majority of policies can be found in the Policies and Procedures (p. 265) section of the Catalog.

The College of Arts and Sciences Policies and Procedures are intended to provide guidelines for academic conduct and planning.

Students are encouraged to read the policies pertinent to their specific class or academic interests to make informed decisions throughout their undergraduate career. Academic advisors and staff in the College Office are available to provide further information, clarification, and to confirm the most current policies.

Important Note: Students are subject to the policies and procedures in place for the class into which they matriculated and are encouraged to use the Archive of Policies by Class (http://www.college.upenn.edu/node/3636) as a reference. Policies and procedures are subject to change throughout the year at the discretion of the University of Pennsylvania and the College of Arts and Sciences.

For College policies specific to the Class of 2021 (entering in Fall 2017), visit: https://www.college.upenn.edu/sites/www.college.upenn.edu/files/C%2721.pdf.

For more information about College policies, visit: http://www.college.upenn.edu/policies/.

Africana Studies: African American Studies, BA

Africana Studies is an interdisciplinary field of study devoted to the critical and systematic examination of the cultural, political, social, economic, and historical experiences of African Americans, Africans, and peoples of African descent around the world. Our course of study is designed to provide students with an integrated understanding and appreciation for a new global black studies. An undergraduate degree in Africana Studies prepares students for graduate work in the humanities, social sciences, and professional schools, as well as a range of careers in teaching, business, public service, and the arts, among others.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

African Language courses do not count toward the Major Requirements.

For more information: https://africana.sas.upenn.edu/department/undergraduate

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

**Anthropology: Archaeology, BA**

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or Medical Anthropology.

Archaeology is the study of past societies through the excavation of material culture, from the Paleolithic into the early Historical periods. Students study excavation methods and techniques of analysis, and have opportunities to work with collections in the Penn Museum and its Center for the Analysis of Archaeological Materials (CAAM). Archaeology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Archaeology.

For more information: https://www.sas.upenn.edu/anthropology/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

1 Must include one history course.

2 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

3 The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Select 1 course unit of Biological course 1
Select 1 course unit of Cultural and Linguistic Course 1

Block III
Select 8 course units of Archaeological courses 2 8
Capstone Seminar

ANTH 300 Capstone Seminar 1

Total Course Units 34

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 For up to three of these, non-ANTH courses with anthropological content may be requested. All non-ANTH courses must be approved by the Undergraduate Program Coordinator.

Honors
Applicants must have a minimum GPA of 3.5 in the Major and write a senior thesis.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Anthropology: Human Biology, BA
Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or Medical Anthropology.

Biological Anthropology is the study of human evolution and the biology of modern populations. Areas of study include genetics, osteology, and forensics. Students have the opportunity to work in laboratory settings, as well as in the Penn Museum's Physical Anthropology section or its Center for the Analysis of Archaeological Materials (CAAM). Biological Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Biological Anthropology.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/anthropology/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

Anthropology: Cultural and Linguistic Anthropology, BA
Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or Medical Anthropology.

Cultural and Linguistic Anthropology is the study of cultural, social, and semiotic variation in the modern world since the development of the ethnographic method in the late 19th century. Areas of study include comparisons of different cultural communities and their relationship to social and demographic factors, as well as communication and media.

Cultural and Linguistic Anthropology majors take introductory courses...
in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Cultural and Linguistic Anthropology.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Honors

Applicants must have a minimum GPA of 3.5 in the Major and write a senior thesis.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Anthropology: General Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere, its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or Medical Anthropology.

General Anthropology majors study all four anthropology sub-fields, acquiring an introduction to the full range of anthropological research. Students are required to take courses in Biological Anthropology, Archaeology, and Cultural and Linguistic Anthropology (including Medical Anthropology).

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Anthropology: Medical Anthropology & Global Health, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or Medical Anthropology.

Medical Anthropology applies anthropological methods to the study of global health, well-being, and disease. The concentration provides students with a theoretical and methodological foundation to address problems of global health inequality. Medical Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Medical Anthropology.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Architecture: Design (Intensive), BA

A select number of seniors in the Architecture Major enroll in the Intensive Major, which includes first-year technology courses in the graduate professional degree program. Students who have successfully completed the Intensive Major are qualified to be admitted with advanced placement into the second year of the graduate program. The Intensive Major in Architecture is for students in the Design Concentration who intend to pursue a graduate professional degree in architecture. Students in the Intensive Major enroll in their senior year in the technology courses offered in the first year of the Master of Architecture Professional Degree Program. Students in the Intensive Major who are accepted into the School of Design's Master of Architecture Professional Degree Program are qualified to be admitted with advanced placement into the second year of the graduate program, reducing the length of study from three to two years.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

Application requirements: At least Sophomore Standing. Please consult with the Undergraduate Chair for other important criteria.

For more information: www.architecture.sas.upenn.edu

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

Art History Requirements
Architecture: Design, BA

The Major in Architecture is for students who intend to pursue a career in architecture or a related design discipline (e.g., landscape architecture, urban design, product design, etc.). The Major is a studio-based liberal arts program offering two concentrations. The Design Concentration includes a six-semester sequence of design studios and courses in the history and theory of art, architecture, and landscape architecture.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

For more information: www.architecture.sas.upenn.edu

Biochemistry, BA

Contemporary biological sciences are based on principles of chemistry and physics. The importance of this relationship is the basis of the Penn biochemistry major, which prepares students for advanced study in areas as diverse as biophysics, biotechnology, cell biology, genetic engineering, genomics, molecular biology, molecular genetics, nanotechnology, neurobiology, structural biology, systems biology, and biochemistry. It provides the basic science background for graduate and health professional schools and for prospective science teachers.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/biochem/biochem.html

² Take concurrently with or after CHEM 241 Principles of Organic Chemistry but BEFORE CHEM 451 Biological Chemistry I.

Honors

Requirements: GPA of 3.2 in courses required for for the major, taken at Penn, and not including BCHE 404 Biochemistry Laboratory.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biological Basis of Behavior, BA

Biological Basis of Behavior is an interdisciplinary program in which students explore the relationship between behavior (both human and animal) and its organic bases. The Program offers courses in virtually all areas of neuroscience ranging from cellular neurobiology to cognitive neuropsychology and integrates these basic interdisciplinary courses with basic science requirements in biology, chemistry and psychology. Students also engaged in supervised research in areas as diverse as molecular neurobiology, chemical neuroanatomy, visual sciences and behavioral ecology.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/bbb/

## Major Requirements

### Core Requirements

**Introductory Chemistry:**
- CHEM 101 General Chemistry I 1
- CHEM 102 General Chemistry II 1

**Introductory Biology:**
Select one of the following Options: 3

**Option 1:**
- BIOL 101 Introduction to Biology A
- BIOL 102 Introduction to Biology B

**Option 2:**
- BIOL 121 Introduction to Biology - The Molecular Biology of Life
- BIOL 123 Introductory Molecular Biology Laboratory
- BIOL 124 Introductory Organismal Biology Lab

**200-Level BIOL Course**

**Introduction to Brain & Behavior:**
Select one of the following: 1
- BIBB 109 Introduction to Brain and Behavior
- BIOL 109 Introduction to Brain and Behavior
- PSYC 109 Introduction to Brain and Behavior

**Behavioral Neuroscience:**
Select one of the following 200-level BIBB courses: 1
- BIBB 227 Physiology of Motivated Behaviors
- BIBB 233 Neuroethology
- BIBB 269 Autonomic Physiology

**Cognitive Neuroscience:**
Select one of the following 200-level BIBB courses: 1
- BIBB 249 Cognitive Neuroscience
- BIBB 270 Drugs, Brain and Mind

**Neurobiology:**
- BIBB 251 Molecular and Cellular Neurobiology 1.5
  or BIOL 251 Molecular and Cellular Neurobiology 1.5

**Statistics:**
Select one of the following: 1
- BIOL 446 Statistics for Biologists
- STAT 101 Introductory Business Statistics
- STAT 111 Introductory Statistics

**Additional BBB Major Elective Courses**
Students may pick any 8 courses from the approved electives for the BBB major: 8

**Total Course Units**
36

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2. See the BBB web site for approved courses in areas of specialized study. Students are encouraged to take a research course or do sponsored research in their junior or senior year.
3. BIBB 399 Independent Research, BIBB 499 Senior Honors Thesis or a 400-level BIBB course are three of the options.

## Honors Option

**BIBB Honors Complete**

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

## Biology: Computational Biology, BA

Computational and Mathematical Biology are important new areas in the biological sciences. Many areas in genetics, ecology, and evolution depend on sophisticated quantitative analyses. For example, the advent of data from the human genome project (and similar data from other species) has shown the need for computer, statistical and mathematical methods to store, retrieve and analyze massive data sets. Recognizing the growing importance of these quantitative techniques and skills, we have developed undergraduate concentrations in both Computational and Mathematical Biology. These Concentrations are designed to prepare students for the world of data-driven science.

The minimum total course units (http://wwwcollege.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

With permission of the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

Research Requirement
BIOL 399 Independent Study  1
Thesis
SURB 2

Total Course Units  36

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2 Symposium on Undergraduate Research in Biology

Honors
Applicants must have a minimum GPA of 3.25 in the Major and the Thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: General Biology, BA

Studies in biology can serve as preparation for graduate study in the biological sciences, graduate training in health-related professions, teaching, or employment in a laboratory or conservation-related job. The Biology Department offers courses in many areas of biology, ranging from the workings of cells and cellular components to species interactions and ecosystem function. Penn’s curriculum keeps pace with recent developments in molecular biology and the study of evolutionary processes, including proteomics, computational genomics, molecular evolution, and epigenetics. The General Biology Major allows students to explore the wide range of topics in Biology, while also providing a strong foundation in core subject areas such as cell and molecular biology, genetics, physiology, and ecology and evolution.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For more information: http://www.bio.upenn.edu/undergraduate/current-students/major-requirements

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

Honors

Applicants must have a minimum GPA of 3.25 in the Major and the Thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: Mechanisms of Disease, BA

Among the most important and interesting areas of scientific investigation are the mechanisms that underlie disease. The study of this topic can be of great interest to those pursuing fundamental research, as well as to those drawn to medicine, biotechnology, law, and public health. The introductory and intermediate level course offerings of the Biology Department provide a foundation in understanding the fundamental principles underlying the mechanisms of disease. Advanced electives are selected from the fields of Microbes and Infectious Disease, Genetic Disease, Molecular Genetics and Genomics, and Biochemistry.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

2 Students are required to present their research at the annual Symposium on Undergraduate Research in Biology (SURB) poster session, held at the end of the Spring Term.

**Honors**

Applicants must have a minimum GPA of 3.25 in the Major and the Thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Biology: Molecular & Cell Biology, BA**

The concentration in Molecular and Cell Biology explores how the techniques of molecular biology and genetics are used to understand cell function. As with the previous Molecular Biology Concentration (https://www.bio.upenn.edu/undergraduate/concentrations/molecular-biology), this concentration allows Biology majors to focus on a molecular approach to biological problems by combining lecture and seminar coursework with training in laboratory research. The list of course electives is organized into two categories: **Molecular and Cell Biology** and **Genetics and Genomics**. Advanced Experimental Research is required for the concentration.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

With permission of the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For more information: http://www.bio.upenn.edu/undergraduate/concentrations/molecular-and-cell-biology

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

Select one of the following tracks: 1.5-3

Track 1:

BIOL 121 Introduction to Biology - The Molecular Biology of Life

BIOL 123 Introductory Molecular Biology Laboratory

Track 2:

BIOL 101 Introduction to Biology A

BIOL 102 Introduction to Biology B

**Chemistry Requirement**

Take 4 Chemistry courses 4

**Calculus/Statistics Requirement**

Take 2 Calculus/Statistics courses 2

**Intermediate Biology**

BIOL 204 Biochemistry 1

or CHEM 251 Principles of Biological Chemistry

BIOL 205 Cell Biology 1

BIOL 221 Molecular Biology and Genetics 1

**Intermediate and Advanced Biology Electives** 4-5

Two Molecular/Cell electives

Two Genetics/Genomics electives

One additional elective

**Research Requirement**

BIOL 399 Independent Study

BIOL 499 Advanced Independent Study

BIOL 376 Microbial Diversity and Pathogenesis Lab

BIOL 425 Biochemistry and Molecular Genetics Superlab
**Symposium on Undergraduate Research in Biology (SURB)**

Total Course Units 36

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 Students in Track 2 need only 4 electives

**Honors**

Applicants must have a minimum GPA of 3.25 in the Major and have taken BIOL 399 Independent Study. Thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Biology: Neurobiology, BA**

Neurobiology is one of the most exciting fields within biology today. The basis of neurological disease, molecular mechanisms of brain function, and behavior are major foci of research in medicine, biotechnology, and academia. The Neurobiology Concentration provides fundamental training in brain physiology, coupled with a background in molecular genetics that is essential for understanding the molecular mechanisms of brain function at the gene and protein levels.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For more information: http://www.bio.upenn.edu/undergraduate/concentrations/neurobiology

---

**Biophysics, BA**

Bridging the biological sciences and the physical sciences, Biophysics is concerned with physical and chemical explanations of living processes, especially at the cellular and molecular levels. Detailed molecular descriptions are emerging for genetic elements and the mechanisms that control their propagation and expression. Biophysical studies include the investigation of protein structure, nucleic acid structure, enzyme mechanisms, the phenomena underlying cellular behavior, excitable
Chemistry, BA

Phenomena in nerve, muscle, and visual cells, and integrative neural phenomena.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

**Note:** Though not a requirement of the major, participation in an independent research project is strongly encouraged.

**For more information:** http://www.sas.upenn.edu/biophysics/

\(^1\) You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

**Honors**

Applicant must have a minimum GPA of 3.3 in the Major. Thesis Required

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Chemistry, BA**

The different disciplines of modern physical and biological sciences have much to offer each other through advances in technology. Aside from basic research, society continually generates fundamental scientific and technological challenges such as the need for new sources of energy, new synthetic and biotechnologies; new materials exhibiting unusual catalytic, metallic, or electrolytic properties; and developments in laser, computer, and communications technology. We consider these within the province of a unified field of molecular sciences, in which chemistry plays the central role.

Chemistry is concerned with the study of matter and the changes matter can undergo. The chemistry program provides a basic foundation for career opportunities in chemical research and teaching, in scientific communication and information transfer, and in the health professions. Students who want to prepare for advanced study in chemistry or allied fields where research experience is advantageous should complete the chemistry honors program.
The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

Those considering the Chemistry major should consult with the undergraduate chairman as soon as possible, preferably in the freshman year, especially if you have AP credit in Science and Mathematics from high school.

### College General Education Requirements and Free Electives

| Foundational Approaches + Sectors 1 | 19 |

### Major Requirements

#### Introductory Sequences 2

General Chemistry:
- CHEM 101 General Chemistry I
- CHEM 102 General Chemistry II
- CHEM 053 General Chemistry Laboratory I
- CHEM 054 General Chemistry Laboratory II

Organic Chemistry and Laboratories:
- CHEM 241 Principles of Organic Chemistry
- CHEM 242 Principles of Organic Chemistry II
- CHEM 245 Experimental Organic Chemistry
- MATH 104 Calculus, Part I
- MATH 114 Calculus, Part II
- PHYS 150 Principles of Physics I: Mechanics and Wave Motion
- PHYS 151 Principles of Physics II: Electromagnetism and Radiation

#### Additional Chemistry Requirements

Physical Chemistry and Laboratories:
- CHEM 221 Physical Chemistry I 3
- CHEM 222 Physical Chemistry II 4
- CHEM 223 Experimental Physical Chemistry I 4

Biological Chemistry:
- CHEM 251 Principles of Biological Chemistry 5

Inorganic Chemistry:
- CHEM 261 Inorganic Chemistry I 3

One Advanced Laboratory:
- CHEM 246 Advanced Synthesis and Spectroscopy Laboratory 6

### Cinema and Media Studies, BA

The Penn Cinema and Media Studies major and minor are traditional humanities programs involving the critical study of film and media history, theory, and aesthetics. Reflecting the hybrid nature of the field of Cinema and Media Studies, our faculty members are housed in departments across SAS and the university, and we cross-list courses with various departments and schools, including Africana Studies, Anthropology, Communications, East Asian Language and Civilizations, English, Fine Arts, German, History, History of Art, Near Eastern Languages and Civilizations, Romance Languages, Slavic Languages and Literatures, and Women's Studies. This truly interdisciplinary program will introduce students to the wide range of methodologies used to study film and media, and this intersection with other disciplines makes Cinema and Media Studies an ideal component of a double major.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 33. Double majors may entail more course units.

For more information: http://cinemastudies.sas.upenn.edu/undergraduate/major

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.
Classical Studies: Classical Civilizations, BA

Classical Studies encompasses the civilization of the ancient Greeks and Romans from prehistory to the Middle Ages, with emphasis on the literature, philosophy, and history of the classical Greek and Roman periods. It includes economic, political, social, and intellectual history as well as philosophy, archaeology, religion, and myth. Students may choose a track that emphasizes the study of texts in Greek and/or Latin or opt for a program of courses that do not require any knowledge of the ancient languages. The Classical Studies Department provides extensive training at the Undergraduate level and graduate training in both Classical Studies and Ancient History. We also offer a special Post-Baccalaureate Program for students who wish to continue the study of Greek and Latin but who do not yet meet the requirements of a conventional graduate program.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://www.classics.upenn.edu/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

### Cognitive Science: Cognitive Neuroscience, BA

Cognitive science is the empirical study of intelligent systems, including the human mind. An interdisciplinary science, it combines results from biology, computer science, linguistics, mathematics, neuroscience, philosophy and psychology to the study of language processing, perception, action, learning, concept formation, inference and other activities of the mind, with applications for information technology and the study of artificial intelligence.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

For more information: https://web.sas.upenn.edu/cogsci/program/major/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.
Core Requirement

COGS 001 Introduction to Cognitive Science 2 1

Breadth Requirement

Psychology:

PSYC 001 Introduction to Experimental Psychology 1
or PSYC 151 Language and Thought

Computation:

Select one of the following:

- CIS 110 Introduction to Computer Programming
- CIS 120 Programming Languages and Techniques I
- PHIL 005 Formal Logic I

Language:

LING 001 Introduction to Linguistics 1
or LING 106 Introduction to Formal Linguistics

Philosophy:

Select one of the following:

- PHIL 004 History of Modern Philosophy
- PHIL 244 Introduction to Philosophy of Mind
- PHIL 405 Philosophy of Language
- PHIL 426 Philosophy of Psychology

Neuroscience:

BIBB 249/PSYC 149 Cognitive Neuroscience 1

Mathematics:

Select one of the following:

- STAT 111 Introductory Statistics
- MATH 104 Calculus, Part I
- MATH 114 Calculus, Part II
- MATH 115 Calculus, Part II with Probability and Matrices

Concentration Requirement

Select 9 course units of Concentration Electives 3,4 9

Total Course Units 36

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

3 See COGS website for lists of approved courses.

4 NOTE: You must take BIBB 109 Introduction to Brain and Behavior/PSYC 109 Introduction to Brain and Behavior either in Breadth or as a Concentration Elective.

Honors

Required: A Minimum Overall GPA of 3.0 and 3.5 in Major Related Courses

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Communication: Communication & Public Service, BA

A Communication major with a concentration in Communication and Public Service (ComPS) offers students a special program that combines individual research opportunities with hands-on experience in the public arena. Classes, seminars, internships, field experiences, and individual research projects provide students with opportunities to meet and learn from current and former officeholders, journalists, and public servants who have been leaders in government and civil society. The program is closely matched to the undergraduate Communication major, and like the Communication major, ComPS students must complete 14 courses.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum requirements as a condition of application to the major. Meeting these prerequisites is NOT a guarantee of admission to the major:

1. Completion of two of the following COMM 125 Introduction to Communication Behavior or COMM 130 Media Industries and Society or COMM 123 Critical Approaches to Popular Culture

2. Completion of at least 1 additional COMM courses.

3. Cumulative GPA at time of application should be at least 2.0.

For more information: https://www.asc.upenn.edu/communication-and-public-service
For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2 Course not used for the Core may count toward the Intermediate requirement.
3 See listing of COMPS course options here (https://www.asc.upenn.edu/communication-and-public-service).
4 Methods course from approved list may be found here (https://www.asc.upenn.edu/academics/undergraduate-program/curriculum-and-major-requirements/course-requirements).
5 Intermediate Level Courses are those courses numbered between 100 and 299.
6 Upper level courses are those numbered 300 through 499.
7 Must be approved by the Director of Student Services.

**Honors**

A capstone thesis project is completed over two semesters during the senior year. Students choose the topic of the capstone thesis from a range of public policy or public service issues. During the year they work with a thesis advisor and are enrolled in a thesis seminar to complete their project. A credit is earned in both semesters. **Students who achieve a cumulative grade point average of 3.5 or higher and earn an A- or higher on their project will graduate with honors.**

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Communication: General Communication, BA**

The Communication Program, housed at Penn’s Annenberg School for Communication, offers a dynamic environment where students and faculty explore a wide range of communication-centered questions using a variety of methods and theories from the humanities and social sciences. Undergraduates (who major in Communication through the School of Arts and Sciences) explore how messages are created and adapted to audiences and examine the implications of those messages for individuals and society.

Areas of concentration include critical, cultural, and historical media studies; research on children, family, and media; health communication; the media business; and political communication. The curriculum also offers opportunities for independent study, internship experience, study abroad, and putting communication to work in the service of community (through the Communication and Public Service Program).

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum requirements prior to acceptance into the major.

1. Completion of at least two of the following introductory courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Course Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 125</td>
<td>Introduction to Communication Behavior</td>

<tr>
<td>COMM 130</td>
<td>Media Industries and Society</td>
<td>1</td>
</tr>
<tr>
<td>COMM 123</td>
<td>Critical Approaches to Popular Culture</td>
<td>1</td>
</tr>
</tbody>
</table>

2. Completion of a third Communication course.
3. Cumulative GPA of 2.0 or higher in all University of Pennsylvania courses.

6. Only 1 course unit may be an introductory class. Must be approved by the Director of Student Services.

Honors

A thesis project is completed over two semesters during the senior year. A credit is earned in both semesters. Students who achieve a cumulative grade point average of 3.5 or higher and earn an A- or higher on their project will graduate with honors.

Optional Concentrations

Concentrations give our majors an opportunity to pursue their personal interests within the diverse field of Communication. In some cases, these concentrations can also help students market themselves for employment or graduate school in a related field. The concentration utilizes five of the fourteen courses listed below (three of which are COMM courses, two of which are cognate courses). No course can be used more than once toward concentration requirements. A list of approved concentration courses can be found here (https://www.asc.upenn.edu/academics/undergraduate-program/curriculum-and-major-requirements/concentrations) Cognate courses are to be approved by Annenberg's Director of Student Services.

Students may only complete one concentration.

Comparative Literature: Globalization, BA

The undergraduate program in Comparative Literature welcomes students interested in the study of literature from theoretical, interdisciplinary, cross-cultural, and global perspectives. The core courses train students to appreciate the variety of meanings that texts acquire in different institutional and philosophical contexts and different socio-political frameworks. There are three concentrations within the major: National and Transnational Literatures (four courses in each of two languages), Theory, and Globalization.

Comparative Literature is a flexible program, allowing students to take courses in a variety of departments in the College. Students with interests in more than one national literature and in fields such as philosophy and political theory, art and aesthetics, and film and music will find the requirements congenial. The program provides students with a cosmopolitan intellectual background that is increasingly in demand today.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.
For more information: http://ccat.sas.upenn.edu/Complit/undergraduate.htm

Earth Science: Environmental Science, BA

The Earth Science major provides graduates with a broad understanding of the physical and chemical processes that operate in and on the planet and how direct and indirect methods are used to examine and understand the structure, composition, and dynamics of the Earth. Graduates appreciate how humans and ecosystems interact with the dynamic Earth, and they have an in-depth knowledge of the atmosphere and climate change, the rock cycle, natural hazards, and the hydrologic and biogeochemical cycles. Additionally, they understand how to measure and use the structure, sequence, and properties of rocks, sediments, and fossils to reconstruct events in Earth’s history and identify potential natural hazards or earth resources.

The Environmental Science concentration within the Earth Science major integrates geology, biology, chemistry, and physics in an effort to have students undertake a scientific study of the environment and the effects of humans on Earth systems.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 35. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/earth/earth-science/environmental-science-concentration

Math, Physics & Chemistry Requirement

Select 3 course units of Math, Physics and Chemistry courses with at least one course from two different disciplines. Mathematics:

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2. Students completing a minor elective track are exempt from the 2 course units of Criminology electives.

Honors

Applicants must have a minimum GPA of 3.4 in the Major.
Earth Science: Geology, BA

The Earth Science major provides graduates with a broad understanding of the physical and chemical processes that operate in and on the planet and how direct and indirect methods are used to examine and understand the structure, composition, and dynamics of the Earth. Graduates appreciate how humans and ecosystems interact with the dynamic Earth, and they have an in-depth knowledge of the atmosphere and climate change, the rock cycle, natural hazards, and the hydrologic and biogeochemical cycles. Additionally, they understand how to measure and use the structure, sequence, and properties of rocks, sediments, and fossils to reconstruct events in Earth’s history and identify potential natural hazards or earth resources.

Students in the Geology concentration learn the various processes at work within the planet and on its surface. Students gain hands-on experience with fossils, rocks, minerals, maps, aerial photographs, and satellite images in the laboratory and on field trips.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 35. Double majors may entail more course units.

Honors Applicants must have a 3.25 GPA in the Major and complete a Senior Thesis with a B+ or above.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Earth Science: Paleobiology, BA

The Earth Science major provides graduates with a broad understanding of the physical and chemical processes that operate in and on the planet and how direct and indirect methods are used to examine and understand the structure, composition, and dynamics of the Earth. Graduates appreciate how humans and ecosystems interact with the dynamic Earth, and they have an in-depth knowledge of the atmosphere and climate change, the rock cycle, natural hazards, and the hydrologic and biogeochemical cycles. Additionally, they understand how to measure and use the structure, sequence, and properties of rocks, sediments, and fossils to reconstruct events in Earth’s history and identify potential natural hazards or earth resources.

Students in the Paleobiology concentration learn how the biological and physical conditions in deep time shaped the current conditions on Earth. Paleobiologists use image analysis and evolutionary theory to deduce the patterns of change in the biosphere.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/earth/earth-science/paleobiology-concentration

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2. Two semester course, 2 course units granted only upon completion of second semester.

### Honors

Applicants must have a minimum GPA of 3.25 overall and a GPA of 3.25 in the major.
East Asian Area Studies, BA

East Asian Studies focuses on East Asia as a region of the world and human experience, and provides an integrated curriculum drawing on the approaches of the social sciences and the humanities. The program requires relevant courses in areas including history, international relations, political science, sociology, legal studies, and East Asian arts and cultures, while maintaining high standards in language study.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

For more information: https://ceas.sas.upenn.edu/academics/east-asia-area-studies-major

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

East Asian Languages and Civilizations: Chinese and Japanese, BA

The undergraduate program in EALC offers language training and courses in the culture, history, literature, and archaeology of East Asia. The graduate program in EALC deals with two major areas, China and Japan (a graduate program in Korean is planned for the future), and all of its programs focus mainly upon language, philology, and the study of civilization and culture. Each provides training for the Ph.D. and A.M. degrees.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

### East Asian Languages and Civilizations: Korean, BA

The undergraduate program in EALC offers language training and courses in the culture, history, literature, and archaeology of East Asia. The graduate program in EALC deals with two major areas, China and Japan (a graduate program in Korean is planned for the future), and all of its programs focus mainly upon language, philology, and the study of civilization and culture. Each provides training for the Ph.D. and A.M. degrees.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Economics, BA

Economics is a social science and, as such, an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; and international trade and international finance (e.g., exchange rates). The Economics Major provides training in economic principles and provides a useful background for students preparing for a career in public policy, business, or finance.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

10 course units Economics - 6 course units must be taken in the Economics Department at the University of Pennsylvania.

The Calculus Requirement is: MATH 104 Calculus, Part I and MATH 114 Calculus, Part II or MATH 115 Calculus, Part II with Probability and Matrices.

Economics Core Requirement (Micro, Macro, and Statistics)

Note: LPS academic year courses ECON 001 Introduction to Micro Economics, ECON 002 Introductory Economics: Macro, ECON 101 Intermediate Microeconomics, ECON 102 Intermediate Macroeconomics, or ECON 103 Statistics for Economists ONLY may be used for the Major.

For more information: http://economics.sas.upenn.edu/undergraduate-program/economics-major

English: 18th/19th Centuries, BA

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical "core," majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

- Sem 1: Literature Before 1900 (may be double-counted in the core)
- Sem 2: ENGL (may be double-counted in the core)

Select one seminar in each area from ENGL 110-ENGL 599:  4
- Sem 1: Literature Before 1700
- Sem 2: Literature Before 1900
- Sem 3: ENGL (may be double-counted in the core)
- Sem 4: ENGL or Related (may be double-counted in the core)

Electives
Select 1-3 course units from ENGL 015-ENGL 599  3

Total Course Units  33

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2 For up to two sectors, a literature seminar may be double-counted in the core.
3 Take additional 2 course units if Seminars 1 and 2 are double-counted in core.

Honors
Applicants must have a 3.6 GPA in the Major. Thesis required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

English: Drama, BA

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical "core," majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 33. Double majors may entail more course units.

---

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2. For up to three sectors, a seminar may be double-counted in the core.
3. Take additional 3 course units if Seminars 1, 2 and 3 are double-counted in core.
4. Concentration may be comprised from the 13 course units of the major, or other courses.

---

### Honors

Applicants must have a 3.6 GPA in the Major. Thesis required.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**English: Medieval/Renaissance, BA**

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical "core," majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 33. Double majors may entail more course units.

**For more information:** http://www.english.upenn.edu/Undergrad/

**Environmental Studies:**

Environmental History and Regional Studies, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.
Students in the Environmental History and Regional Studies concentration learn a temporal and spatial perspective to the study of the Environment.

The minimum total course units for graduation in this major is 35. Double majors may entail more course units.

For students with a background in the Arts or Social Sciences.

### Environmental Studies: Environmental Policy and Application, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

Students in the Environmental Policy and Application acquire a background in the social and management aspects of environmental problems.

The minimum total course units for graduation in this major is 35. Double majors may entail more course units.

For students who have a second major in a Natural Science.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Environmental Studies: General Environmental Studies, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

This is an individualized, specialized concentration designed for students who want to concentrate in an area not represented by the other concentrations. Formal proposals for this concentration must be developed and submitted for review and approved by both the EES program director and undergraduate chair before admittance into this concentration.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 35. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/earth/environmental-studies/individualized-concentration

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Environmental Studies: Sustainability and Environmental Management, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

The Sustainability and Environmental Management concentration is designed to help students understand the nature of environmental constraints which face organizations and individuals in the modern world, and to understand how these constraints can be effectively considered as part of the decision-making process in for-profit and non-profit organizations.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 35. Double majors may entail more course units.

For students who have a background in either the Natural or the Social Sciences.

### Fine Arts, BA

The Undergraduate Fine Arts Program combines studio practices, seminar courses, and interactions with visiting artists and professionals to provide an open intellectual framework in order to foster critical awareness and independent methods of artistic research and learning. The Fine Arts Department offers a diverse range of studio courses in the areas of animation and 3D modeling, ceramics, design, drawing and painting, photography, printmaking, sculpture, and video. The dynamic curriculum also provides students with the opportunity to thoroughly examine contemporary art, creative research, interactive design, and public art through seminar-based instruction.

A goal of the Undergraduate Fine Arts program is to facilitate an environment where the potentialities of art are considered in relation to the real life conditions of our students. Encouraged to test themselves against the rigors of divergent artistic approaches and their histories, our students develop a more complex set of skills to creatively and critically negotiate the turbulent shifts taking place globally in terms of human experiences.

The Fine Arts major is available for students in the College of Arts and Sciences and the School of Engineering, and the minor is available for undergraduate students across the university. The Fine Arts program works in conjunction with three interdisciplinary degree programs in Cinema Studies, Digital Media Design, and Visual Studies.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.design.upenn.edu/fine-arts/undergraduate/program

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

### Honors

Applicants must have a 3.25 GPA in the major

French and Francophone Studies, BA

French and Francophone Studies introduces students to the full span of historical and cultural traditions from France and the French-speaking world. Languages courses - from introductory to advanced - promote linguistic fluency, building on the skills students have acquired in high school or at Penn. Upper-level seminars explore a range of topics pertaining to literature, history, visual arts, and/or the media, and they offer majors and minors the opportunity to engage in research on French and global Francophone cultures across periods into contemporary times.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

At least half of all courses for the major must be taken in the Department at Penn. ALL courses must be taken in French, with the possible exception of Major-related courses.

For more information: http://www.sas.upenn.edu/french/undergraduate/requirements-majors-and-minors/major-french-francophone-studies

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

### Gender, Sexuality, & Women's Studies, BA

The Gender, Sexuality, and Women's Studies Program (GSWS) is an interdisciplinary program that provides exciting intellectual opportunities to explore the role of gender in human affairs. The program offers over 50 courses each year, many cross-listed with other departments, as well as a major, a minor, and a graduate certificate.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 33. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/gsws/
For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

**Honors**

Students with an overall GPA of 3.4 and 3.6 or better in the major are eligible for honors.

**Concentrations**

Students may select one of five concentrations (https://www.sas.upenn.edu/gsws/content/concentrations):

- Feminist Studies
- Global Gender and Sexuality Studies
- Health and Disability
- LGBTQ Studies
- Self-designed

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**German, BA**

The major and minor programs in the Department of Germanic Languages and Literatures provide deep understandings of language and cultures. Building from basic language competency to synthesizing significant literary works, historical context and current media and politics, the program offers a comprehensive education through engaged, active learning in a combination of core courses with a wide range of electives. Your learning experiences can be broadened and applied in study abroad as well as internship programs.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32.5. Double majors may entail more course units.

**For more information:** https://www.sas.upenn.edu/germanic/

**Honors**

Applicants are required to have a minimum overall GPA of 3.0 in The College and in the Major.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Health and Societies: Bioethics & Society, BA**

The Health and Societies (HSOC) major examines health and medicine in social context, equipping students with the critical faculties and multidisciplinary skills that will prepare them for careers in public health, health services, and a variety of other arenas. The program is built on the foundation of three core disciplines: anthropology, history, and sociology.
Methods and courses from other disciplines and fields—including epidemiology, political science, business/economics, law, environmental studies, and bioethics—supplement the core disciplines and provide majors with the variety of skills necessary to grasp the forces that have shaped our contemporary health landscapes. The Health and Societies graduate is a “multilingual” scholar and citizen, fluent in the methods and perspectives of several social science disciplines— theoretically informed but practically minded, with a global outlook and local experience.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Health and Societies: History of Medicine, BA

The Health and Societies (HSOC) major examines health and medicine in social context, equipping students with the critical faculties and multidisciplinary skills that will prepare them for careers in public health, health services, and a variety of other arenas. The program is built on the foundation of three core disciplines: anthropology, history, and sociology. Methods and courses from other disciplines and fields—including epidemiology, political science, business/economics, law, environmental studies, and bioethics—supplement the core disciplines and provide majors with the variety of skills necessary to grasp the forces that have shaped our contemporary health landscapes. The Health and Societies graduate is a “multilingual” scholar and citizen, fluent in the methods and perspectives of several social science disciplines— theoretically informed but practically minded, with a global outlook and local experience.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Hispanic Studies, BA

The demographic, economic and political realities of the United States, the articulation of a mainstream English culture with an ever-increasing diversity of Hispanic and Latino cultures, and the ongoing forging of strong cultural and economic ties throughout the Americas, have moved Spanish out of the bounds of the category of "foreign" language and culture in the United States. Culture is the controlling category in this field; the program is orientated to the knowledge generated by new disciplines such as cultural studies, new historicism, ethics and postcolonial studies. The major in Hispanic Studies orients itself to the types of knowledge generated by new disciplines such as cultural studies, new historicism, ethics, and postcolonial studies. In order to reflect these changing realities, the Department of Romance Languages has changed the name of its Spanish concentration from "Spanish" to "Hispanic Studies."

Hence, the knowledge of Spanish culture gives students much more than the ability to communicate in the third-most-spoken language of the world. It prepares them to account for an entirely different national, continental and global reality in all its complexity. Since culture is the controlling category in this field of studies, the major in Hispanic Studies orients itself to the types of knowledge generated by new disciplines such as cultural studies, new historicism, ethics, and postcolonial studies. In order to reflect these changing realities, the Department of Romance Languages has changed the name of its Spanish concentration from "Spanish" to "Hispanic Studies."

Majors in Hispanic Studies are overwhelmingly double majors. This means that they bring to their classes a dialogic perspective that engages in the study of Hispanic cultures informed by interest in other fields such as history, government, sociology, economics, medicine, and law. The richness and depth of these interests make for lively and intellectually rewarding classroom discussions.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

All courses must be at or above the 200 level.

1 Must be completed in the Department at Penn.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

History of Art, BA

The Major in the History of Art seeks to deepen students’ knowledge of artistic production and practice over the scope of human history, as well as to broaden awareness of the critical and interpretive aims of the discipline itself. Students develop skills in the analysis of works of art, sharpen their understanding of the social, cultural, and personal values embodied by works, and explore the relation of art history to other disciplines. The Department particularly encourages a broad geographic understanding of art production and encourages students to consider the relations and distinctions among different visual cultures.

Students are strongly advised to make an appointment each semester to discuss their progress through the major with the undergraduate chair. Majors are also encouraged to achieve an advanced level of French, German, or other languages as relevant to their subject interests. During their senior year majors may pursue independent research by writing
an honors thesis and are invited to become regular participants in the department colloquium series.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 33. Double majors may entail more course units.

### History: American History, BA

The Department of History offers a variety of courses dealing with the political, social, diplomatic, intellectual, economic, and cultural history of the Americas, Europe, Asia, and Africa, from the early medieval period to the present. The department seeks to give undergraduates both specific mastery of particular times, places, and aspects of the human condition and the critical skills to think historically about both long-term and modern phenomena, emphasizing the dynamics of change and continuity over time. The History Department at the University of Pennsylvania has a long tradition of distinction. Beginning as one of the first programs in the United States to offer doctoral study in history, the department continues to pioneer new areas of scholarship. In the last twenty years, faculty members of the departments in American, European, and World history have assumed a leading role in introducing and promoting new varieties of historical research and writing. Today, no other institution surpasses the Penn history department’s coverage of social history or equals the distinction of its faculty in that field.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

8 courses must be taken in History at the University of Pennsylvania.

History: Gender History, BA

The Department of History offers a variety of courses dealing with the political, social, diplomatic, intellectual, economic, and cultural history of the Americas, Europe, Asia, and Africa, from the early medieval period to the present. The department seeks to give undergraduates both specific mastery of particular times, places, and aspects of the human condition and the critical skills to think historically about both long-term and modern phenomena, emphasizing the dynamics of change and continuity over time. The History Department at the University of Pennsylvania has a long tradition of distinction. Beginning as one of the first programs in the United States to offer doctoral study in history, the department continues to pioneer new areas of scholarship. In the last twenty years, faculty members of the departments in American, European, and World history have assumed a leading role in introducing and promoting new varieties of historical research and writing. Today, no other institution surpasses the Penn history department’s coverage of social history or equals the distinction of its faculty in that field.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

8 courses must be taken in History at the University of Pennsylvania.

Individualized Major, BA

The College recognizes that there are students who find that the standard majors do not satisfy their academic goals and interests. Thus, the individualized major offers an opportunity for exceptional, creative, self motivated students to explore innovative and multidisciplinary fields of knowledge.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Applicants must earn a minimum GPA of 3.5.

For more information: http://www.college.upenn.edu/node/2410
International Relations, BA

International Relations addresses the ways in which governments, private groups, and individuals relate to each other in the global political and economic systems. The program provides a solid grounding in the methodologies of political science, history, and economics. The curriculum draws on the best courses relevant to world politics, offers a well-rounded liberal arts education, and helps prepare students for law or business school, Ph.D. programs, and international careers.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Honors

Candidates must have a minimum overall GPA of 3.5 and a GPA of 3.6 in the Major. An honors thesis and completion of an upper level language course are required.

Italian Studies: Italian Culture, BA

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/italians/undergraduate/requirements

Jewish Studies, BA
The Jewish Studies Program provides an opportunity for students to study the Jewish experience from several perspectives including: language (Hebrew, Yiddish, and Ladino), literature in the original languages and in translation, the history and culture of the Jewish people from Biblical Israel to 21st-century America and modern Israel, the exploration of Jewish law, and the roles of gender and sex in Judaism. Students may specialize in Jewish Studies through a major or a minor, or through one of the following concentrations: Jewish History within the History Department, Hebraica/Judaica within the Department of Near Eastern Languages & Civilizations, and Judaism within the Department of Religious Studies.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

For more information: http://ccat.sas.upenn.edu/jwst/undergraduate

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

**Latin American & Latino Studies, BA**

The Latin American and Latino Studies (LALS) Program offers an interdisciplinary major and minor to study the history, arts, languages, cultures, societies, politics, and/or regional organizations of Latin American and Caribbean countries as well as Latino communities and individuals in the United States. With courses offered across many departments in the School of Arts and Sciences, in study abroad programs taught throughout Latin American cities, and with academically based community service courses with Latino organizations in the Greater Philadelphia area, the LALS major and minor afford our students a very comprehensive approach to Latin American and Latino Studies as well as the possibility of a flexible curriculum, where students can pursue and combine their academic interests.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

Students must satisfy the Language Requirement in Spanish or Portuguese. Language courses under 219 may not be counted.

**For more information:** https://www.sas.upenn.edu/lals/content/major-requirements

Linguistics, BA

The Linguistics Program is intended to acquaint students with the methods and findings of the scientific study of human language and its relationships to cognition, society, and history. It serves as a preparation for graduate training in linguistics or related areas, and as part of a rigorous general education. Linguistic training is relevant to work in anthropology, philosophy, psychology, and language and literature, as well as to careers in such fields as education, computer science, and law. Founded by Zellig Harris in 1947, the Penn Linguistics Department is the oldest modern linguistics department in the United States. We have outstanding programs in the core disciplines of syntax and phonology, as well as in sociolinguistics, semantics, discourse, historical linguistics, phonetics, and psycholinguistics. Penn is also the home of the Linguistic Data Consortium (LDC), a compiler and distributor of linguistic materials for language engineering research. The graduate group in Linguistics at the University of Pennsylvania is an interdisciplinary team of faculty from the Department of Linguistics and related departments. Our program has strong concentrations in several areas and a tradition of collaboration among its faculty.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Logic, Information, & Computation, BA

Modern mathematical logic began with work by Cantor, Frege, and other mathematicians during the last three decades of the nineteenth century who were concerned with providing a sound basis for the development of mathematical analysis. In the wake of "the crisis in the foundations of mathematics" precipitated by the discovery of various logical paradoxes at the turn of the twentieth century, mathematicians and philosophers such as Hilbert and Russell intensively pursued investigations into the logical foundations of mathematics. Connections between logic and the foundations of mathematics remained an important source for scientific developments in logic through the epochal results of Gödel in 1930 and 1931, which indicated both the scope and limits of the mechanization of mathematical reasoning. The great burst of scientific activity occasioned by Gödel's results led directly to Turing's mathematical characterization of mechanical computation in terms of simple devices, now known as Turing machines. The work of Gödel, Turing, and other logicians during the 1930s laid the scientific foundations for the revolution in computer and information technology that began in the last half of the twentieth century and continues today.

The Logic, Information, and Computation Program offers students the opportunity to engage in a systematic, integrative program of study within the School of Arts and Sciences. Logic remains one of the core disciplines in investigations of information and computation. Indeed, logic is playing a major role in advances in computer security, database technology, networking, and software engineering. Moreover, logic has expanded its role within mathematics beyond foundational studies and now enjoys rich connections with areas as diverse as algebra, analysis, and combinatorics. In light of the current importance of the investigation of computation and information from both a scientific and technological point of view, the Major and Minor in Logic, Information, and Computation will provide students with a strong background to pursue computational aspects of the natural, biological, and social sciences and prepare them for careers in information technology.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

### Mathematics Requirement

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Mathematical Economics, BA

Economics is a social science and, as such, an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are the following:

- The determination of prices and quantities in various types of markets, from perfectly competitive commodity markets to highly regulated utility markets and internet auctions.
- The effects of taxes, subsidies, and regulations.
- The determination of aggregate economic activity (e.g., GDP, unemployment).
- Inflation, monetary policy, and financial intermediation.
- Economic growth and income distribution.
- International trade and international finance (e.g., exchange rates).

The Mathematical Economics Major is intended for students with a strong intellectual interest in both mathematics and economics and, in particular, for students who may pursue a graduate degree in economics. Advanced economics makes extensive use of formal mathematical models. The major introduces undergraduate students to rigorous theoretical-quantitative and empirical-quantitative approaches to the analysis of economic problems. In comparison to the Economics Major, the Mathematical Economics Major emphasizes a more formal mathematical analysis, preparing students for academic-style research in economics.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

Mathematics: Biological Mathematics, BA
At the core of modern theoretical science, mathematics has historically provided an expressive language as well and theoretical framework for advances in the physical sciences. It has since become central in the life and social sciences and in computer science. Mathematics at Penn embraces traditional core areas of mathematics and developing areas (Penn is one of the world’s leading centers in the application of logic to theoretical computer science). The goals of the major program are to assist students in acquiring both an understanding of mathematics and the ability to use it. The mathematics major provides a solid foundation for graduate study in mathematics and a background for study in economics, the biological sciences, the physical sciences, and engineering, as well as many non-traditional areas.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

Majors and prospective majors. Please email majoradvisor@math.upenn.edu. You will be assigned to one of the Math Major Advisors who will discuss your current and future plans with you. It is important that you see this advisor at least once per semester thereafter.

Below is a planning tool that is meant to help you but does not replace the web and advisor visit requirements.

Total Course Units 32

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

Honors

Candidates must have a minimum overall GPA of 3.3 and a GPA of 3.7 in the Major.

Music, BA

The music major is founded on a balance in the core training between the fields of music history, ethnomusicology, theory, and composition. Through a series of requirements, you will acquire a foundation that introduces you to the sheer range of musical traditions available for study and to a series of specialist skills and tools that facilitate and deepen that study.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 35.5. Double majors may entail more course units.

---

**Near Eastern Languages & Civilizations: Ancient Near East, BA**

The major in Ancient Near East examines the languages, history, cultures, and archaeology of the Ancient Near East: from Prehistory through the early complex of civilizations in Mesopotamia, Egypt, and Levant. Because of the interdependence of language and culture an emphasis of the major is gaining facility of one or more ancient languages, alongside courses in history, religion, and archaeology.
Near Eastern Languages & Civilizations: Arabic & Hebrew Studies, BA

The major in Arabic and Hebrew Studies explores the interrelationships between Arab and Hebrew cultures in the context of the modern and medieval Middle East. Emphasis includes facility in Arabic and/or Hebrew language, alongside courses in history, literature, and cultures of the medieval and modern Middle East.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Near Eastern Languages & Civilizations: Arabic & Islamic Studies, BA

Arabic and Islamic Studies focuses on languages and cultures of the wider Middle East in the context of Islamic Civilization. Because of the interdependence of language and culture, a primary emphasis is on gaining mastery of Middle Eastern languages such as Arabic, Persian, and Turkish, alongside coursework in history, religion, and culture.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

¹ You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
² This requirement may be fulfilled in Arabic, Persian or Turkish.
³ May focus on either Medieval or Modern Periods, to be chosen in consultation with the major adviser. Minimum of one course each in History, Literature (original language or in translation) and Religion.

Honors

Required: A minimum overall GPA of 3.0 and a GPA of 3.5 in major related courses.
Near Eastern Languages & Civilizations: Hebrew & Judaica, BA

The major concentration in Hebrew and Judaica explores the development of Hebrew culture from the Biblical through Rabbinic and Medieval Periods through modern times. Because of the interrelationship between language and culture an emphasis is placed on gaining facility in the use of Hebrew language alongside courses in history, culture, literature, and religion of Judaism.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/nelc/undergrad_programs/nelc_major.html

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

Nutrition, BA

Jointly sponsored by the College of Arts and Sciences and the School of Nursing, the second major in Nutrition Science builds on a student’s basic science skills with a deep dive into the science of nutrition. Linkages of nutritional compounds and dietary approaches with health and disease, novel approaches to the study of nutritional impact on health, and future avenues of exploration in the field are examined. Elective courses in anthropology, biology, economics, physiology, psychology, health care, and public policy provide a rounded context for the study of nutrition science.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Philosophy: General Philosophy, BA

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The four concentrations available within the major allow students to emphasize different sets of questions.

The General Philosophy Concentration requires a balanced selection of coursework from within both practical and theoretical philosophy as well as the history of these enterprises.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://philosophy.sas.upenn.edu/undergraduate/philosophy-majors-and-minor/philosophy-majors-major-general-philosophy

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

Philosophy: Humanistic Philosophy, BA

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The four concentrations available within the major allow students to emphasize different sets of questions.

The Humanistic Philosophy Concentration emphasizes practical philosophy and its history; it pairs philosophy courses with courses in one or more humanistic disciplines.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

Required: 8 course units in PHIL and 8 course units in Humanities and/or PSCI (Non-PHIL courses need permission of the Undergraduate Chair).
For more information: http://philosophy.sas.upenn.edu/undergraduate/philosophy-majors-and-minor/philosophy-majors/major-humanistic-philosophy

Philosophy: Political and Moral Philosophy, BA

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The four concentrations available within the major allow students to emphasize different sets of questions.

The new Political and Moral Philosophy Concentration emphasizes the philosophical treatment of normative questions. Its coursework focuses on questions about ethics, morality, politics, and law.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://philosophy.sas.upenn.edu/undergraduate

Physics: Astrophysics, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged. This concentration is particularly appropriate for students planning to attend graduate school in Astrophysics. In addition to core Physics courses, students choose from a selection of courses in Astronomy and Astrophysics.
The minimum total course units for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.physics.upenn.edu/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

---

### Physics: Biological Science, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged. This concentration reflects increasing contributions of physicists (including members of our Faculty) to implications of Physics to Biological Sciences. Undergraduate students choosing this concentration will prepare themselves for careers in scientific research or professional Medical Physics programs that have been instituted at Penn and other Universities, among other possibilities.

The proposed concentration is distinct from the existing Biophysics Major, although the two share several required courses. The Biophysics Major requires much more chemistry, making it appropriate for students interested in protein science and other topics within the well-established field of Biophysics. The Physics major with a Concentration in Biological Science targets students with interests in the emerging field of Biological Physics, where researchers directly apply physical concepts and techniques to investigate biological systems; the emphasis is on developing new insights regarding biological systems from a perspective strongly rooted in Physics.

The minimum total course units for graduation in this major is 36. Double majors may entail more course units.

### Physics: Business & Technology, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration is particularly appropriate for students whose ultimate goal is a career in modern industry involving both technical and managerial components. A student choosing this concentration will have a solid background in Physics, be comfortable with electronics and computers, and have some appreciation of modern business methods and economics.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

### Political Science: American Politics, BA

Political Science explores systematic approaches to understanding politics. Students may choose to take a general approach to the subject or pursue a concentration in the sub-fields of American politics, comparative politics, international relations or political theory. In addition, students may select a world region for an area studies concentration.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

Minimum 9 course units in Political Science. 6 course units must be taken in the Political Science Department at the University of Pennsylvania (includes Washington, DC Semester). (See Major Program Booklet for Transfer and AP credit restrictions.)

For more information: http://www.sas.upenn.edu/polisci/content/undergraduate-program

2. A maximum of three non-PSCI allowed.

Psychology, BA

Studies in psychology introduce students to contemporary understandings of how organisms perceive, learn, think and interact with one another, how they develop, how they are motivated and how, individually and as members of species, they may be compared with one another. Psychology at Penn is a diverse discipline, with topics ranging from neuroscience to psychopathology.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 33. Double majors may entail more course units.
Minimum GPA of 2.0 Required.

6 course units of Psychology courses must be taken at the University of Pennsylvania.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Religious Studies, BA**

Religion is a complex network of ideas and actions (ethical and ritual) that express a group's sense of ultimate meaning of life. The academic study of religion examines how the beliefs and values of contemporary and historical cultures shape and are shaped by societal factors, long-standing traditions, and distinctive forms of literary and artistic expression.

Because of the multi-faceted nature of the subject matter, the University of Pennsylvania's Religious Studies major program of study is open to students looking to tailor their educational experience to fit with their own personal and academic areas of interest. Each undergraduate who wishes to major in Religious Studies will meet with the Chair of the Department prior to claiming the major to discuss their desired coursework and create a individualized plan of execution.

As our core faculty shares research foci and skills in the study of material culture (art, manuscripts, archaeology, inscriptions, and other primary historical sources), we are well-suited to lead serious students in intensive research to better prepare them for graduate study which requires research and evaluation skills.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.
For more information: https://www.sas.upenn.edu/religious_studies/undergraduate/major

**Romance Languages: French and Italian, BA**

The Dual Romance Languages Major allows students to pursue advanced course work across two Romance Languages: French, Spanish, and/or Italian. It is an 18-credit major, with nine advanced courses in each language. Interested students should contact the Undergraduate Coordinator or the appropriate undergraduate chairs for more information and guidance.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

A combination of two languages; 9 course units in each.

Students are required to meet with the appropriate undergraduate chairs prior to beginning course work. Study Abroad courses must be pre-approved by the Undergraduate Chair to count for the major.

For more information: http://ccat.sas.upenn.edu/roml/

### Russian: Culture and History, BA

The major in Russian and East European Studies (12 c.u.) provides a program of study that enables a broad multi-disciplinary and multi-cultural understanding of the languages, literatures, cultures, histories, and societies of Russia, Central and Eastern European, and the Balkan and Baltic regions. For the language requirement, students can choose any regional language offered at Penn (i.e., Bosnian/Croatian/Serbian, Hungarian, Polish, Russian, Ukrainian) or in which they can demonstrate an equivalent proficiency. In addition to linguistic flexibility, this major allows students to pursue their specific disciplinary interests through three concentrations: Language, Literature, and Culture; History, Politics, and Society; and Cinema, Arts, and Letters. Majors are encouraged to complete a summer or semester abroad to gain first-hand understanding of the communities they study and to advance their language competency. The major also offers an honors option.

Knowledge of Russian and East European languages and cultures is a marketable and impressive skill, whether you are in academia, arts, law, medicine, governmental service, public interest, business, or politics. Russian and East European majors and minors land jobs in a variety of settings. They go on to work in business as financial and policy analysts for American and foreign companies. They work for NGOs, publishing houses, or the media. They teach abroad and consult in marketing, advertising, aerospace, or computer engineering. And, of course, some work as educators in universities and schools and as employees of the US government.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

Science, Technology and Society: Biotechnology & Biomedicine, BA

Science, Technology & Society (STSC) examines the social contexts in which science and technology occur, the organizations of people and things that make up science and technology systems, and the social and cultural consequences of scientific and technological change over time. In a wide array of courses, STSC majors explore the relationship between scientific knowledge, technological innovations, technological systems, and society past and present.

This program equips students with sophisticated critical faculties, multidisciplinary skills and wide knowledge that enables our graduates to go into business, law, government, journalism, research, and education. STSC provides a foundation for citizenship in a globalizing, diversifying world with rapid technological and scientific change.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://hss.sas.upenn.edu/undergraduate/stsc-major/science-technology-society-requirements

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

Honors
Applicants must have a minimum GPA of 3.5 in the Major and 3.0 Overall.

Science, Technology and Society: Information and Organizations, BA
Science, Technology & Society (STSC) examines the social contexts in which science and technology occur, the organizations of people and things that make up science and technology systems, and the social and cultural consequences of scientific and technological change over time. In a wide array of courses, STSC majors explore the relationship between scientific knowledge, technological innovations, technological systems, and society past and present.

This program equips students with sophisticated critical faculties, multidisciplinary skills and wide knowledge that enables our graduates to...
go into business, law, government, journalism, research, and education. STSC provides a foundation for citizenship in a globalizing, diversifying world with rapid technological and scientific change.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Sociology: Global and International Studies, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

In this concentration, students examine a variety of global and international issues such as immigration, urbanism, demographic change, world health, and the persistence of social inequality.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Minimum 11 course units must be in Sociology.

For more information: https://sociology.sas.upenn.edu/global_international_studies

Sociology: Law and Society, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Sociologists study institutions, and among the most important is the law. This concentration examines issues such as: What is deviance and how do we define it? What is the relationship between the law and other
social institutions? The concentration is suitable for students with a variety of interests, but may be especially well-suited to those interested in careers in law and criminal justice.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Minimum 11 course units must be in Sociology.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sociology: Quantitative Methods, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Sociologists pursue knowledge in many ways, one of which is through the examination of society through surveys, demographic data, and statistical models. In this concentration, students will become familiar with quantitative methods in sociology, both with respect to how to use them in general (e.g., Introduction to Demographic Methods) and how they are used for specific topics (e.g., Health of Populations).

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Minimum 11 course units must be in Sociology.

The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

The sociology of culture investigates an aspect of human life that is central to its definition: the origins and development of meaning - religious, moral, normative, aesthetic, cognitive - and how they are expressed in and serve to shape human conduct. Processes of cultural innovation and cultural stability are examined in various social institutions and settings of American, Middle Eastern, European, and Asian societies.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Minimum 11 course units must be taken in Sociology.

Sociology: Sociology of Families and Populations, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

The family is one of the most important institutions in any society, and it is critical to the socialization of each generation and the stability and functioning of the larger society. Family systems vary across cultures and have changed dramatically in the United States in recent decades. Understanding the causes and consequences of such variation is a central focus of social research. Family change is reflected in demographic patterns through its impact on fertility, marriage, divorce, migration, and mortality. Population processes also respond to technological factors, economic change and social policy. The study of population patterns provides an opportunity to investigate quantitatively the interactions between large social aggregates and the behavior of individuals.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Minimum 11 course units must be in Sociology.

Sociology: Sociology of Health and Medicine, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Conceptions of health and illness, although not uniform the world over or even in any one society, are of fundamental importance in every society. In this concentration, students focus on the following topics: How health is defined in various societies; how the ill are viewed by the well; how illness is treated; who the healers are, how they are trained, and what their position is in society; the relationships among the religion, class,
gender, and age of the ill and their healers; and when and how public health policies are inaugurated.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Minimum 11 course units must be in Sociology.

Sociology: Urban Sociology, BA
The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Neighborhoods, cities, and metropolitan areas are communities defined by geographic, economic, legal, political, cultural, and social boundaries. The characteristics distinguishing urban areas that affect social interactions include density of concentration of residents and firms-relative homogeneity in ethnicity, class, education, language, and income of neighbors; shared representations, such as sports teams; common meeting places and facilities, such as churches, schools, clubs, restaurants, and businesses; and facilities of communication and transportation. How does the configuration of urban areas affect opportunities for employment, education, health, and safety? What shapes the interactions within and across neighborhoods? Why are jobs suburbanizing? Why are neighborhoods and schools segregated by race, ethnicity, and income?

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Minimum 11 course units must be in Sociology.

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 Students are encouraged to take some courses outside of their concentration.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**South Asia Studies, BA**

South Asia Studies is an interdisciplinary field focusing on the history, languages, society, literature, and art from India, Pakistan, Bangladesh, Nepal, Sri Lanka, Afghanistan, and Bhutan. We are America’s oldest and arguably most distinguished South Asia regional studies program dealing with the past and contemporary life of one-fifth of the world’s population and teaching more languages than any other South Asian studies program in the US. Having a deep knowledge of the country set to outpace the US as the second largest economy in the world in an increasingly competitive global job market gives graduates a competitive edge over others with more generic skills. Make your home in a department where you get to know your Faculty and they know you as an individual, whether as a major or double major. You don’t have to know anything about India or be South Asian to find a home with us; just be curious!

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://www.southasia.upenn.edu/undergraduate

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.

**Theatre Arts, BA**

The Theatre Arts program focuses on all intellectual and creative aspects of theatre and performance studies. Our courses link academic approaches to the theatre such as the study of dramatic literature, theory, history, and criticism, to practical aspects of performance such as acting, directing, designing, devising, and playwriting. Special features of our program include faculty-directed productions, which are taught as courses for credit, and extracurricular programs such as workshops and talks with visiting artists, staged readings, and theatre outings. One special highlight of our program is the Edinburgh Project. On alternating years, majors are selected to enroll in a course that develops a performance piece that travels to the Edinburgh Festival Fringe in Scotland. The honors thesis is another special opportunity in which majors who are accomplished in both academic and production work are invited to work on honors thesis projects, which may be based on practice such as acting, directing, and design or on scholarly research.

Penn Theatre Arts graduates proceed to a wide array of successful careers, both in and out of the theatre. Our majors are well-prepared to enter professional MFA programs in acting, directing, or design, as well as doctoral programs. We also count among our alumni not only those who are successful in theatre and film as artists, producers, and business people, but also those who flourish in unrelated fields, such as medicine and law.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 33. Double majors may entail more course units.

For more information: http://theatre.sas.upenn.edu

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum-structure) page.
The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 34. Double majors may entail more course units.

Urban Studies is a flexible major and requires confering with an advisor to tailor a set of courses that fit your interests. This online worksheet is meant as a planning tool; before you will be accepted to the major, you are required to meet with an urban studies advisor to go over your plans and address your questions.

Visual Studies: Architecture Practice and Technology, BA

Visual Studies at the University of Pennsylvania prepares students to forge innovative connections across the disciplines that study vision and images. Students acquire a critical awareness of seeing and the problems and possibilities for investigating, thinking, and writing about seeing in the 21st century. Fundamentally interdisciplinary, the Visual Studies Program partners with the Departments of Philosophy, Psychology, History of Art, Fine Arts, and Architecture. Students may also find interest in Penn Programs such as Cinema Studies and Gender, Sexuality, and Women’s Studies or outside of the School of Arts and Sciences in the Annenberg School of Communications, and the School of Engineering and Applied Sciences.

Sector C enables students to develop skills in the making of art ranging from the two- and three-dimensional to the digital and time-based media, and includes both fine arts and architecture tracks.

The minimum total course units (http://www.college.upenn.edu/credits-needed) for graduation in this major is 36. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/visual-studies

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 Important - Check for Pre-Requisites on PSYC and some FNAR courses.

3 Four courses (4 course units) in your concentration and one course (1 course unit) from another Sector. (Note: No Stage 2 courses may be double-counted in Stage 3).

### Honors
Applicants must have a minimum GPA of 3.70 in the Major.

- Senior Project Completed (Grade of A)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Minors

- Actuarial Mathematics, Minor (p. 134)
- Africana Studies, Minor (p. 135)
- American Public Policy, Minor (p. 135)
- American Sign Language and Deaf Studies, Minor (p. 135)
Actuarial Mathematics, Minor

Actuarial Science stands at the intersection of risk and money. Actuaries use their knowledge of mathematics and probability theory to define, analyze and solve complex business, financial and social problems. Actuaries evaluate individual and corporate risks, and design financially sound insurance and pension plans. Graduates from the University of Pennsylvania with an Actuarial Mathematics Minor are expected to be in great demand by the insurance and banking industry.

---

**Africana Studies, Minor**

Africana Studies is an interdisciplinary field of study devoted to the critical and systematic examination of the cultural, political, social, economic, and historical experiences of African Americans, Africans, and peoples of African descent around the world. Our course of study is designed to provide students with an integrated understanding and appreciation for a new global black studies. An undergraduate degree in Africana Studies prepares students for graduate work in the humanities, social sciences, and professional schools, as well as a range of careers in teaching, business, public service, and the arts, among others.

For more information: https://africana.sas.upenn.edu/department/undergraduate

African Language courses do not count toward the Minor Requirements.

**American Public Policy, Minor**

The minor in American Public Policy enables undergraduates interested in American Public Policy to construct an integrated program across the University. The minor — for students who do not major or concentrate in PSCI or BEPP — requires six courses, three from each department, in addition to the course work required for their major or concentration.

**American Sign Language and Deaf Studies, Minor**

The ASL/Deaf Studies Program at Penn offers ASL instruction grounded in Deaf cultural experiences and perspectives for the purpose of attaining ASL proficiency for real-world applications in both coursework and future professional endeavors. The course of study for the minor in ASL and Deaf Studies is interdisciplinary, with foundations in language, content, and theory-based courses. Furthermore, as our program has long-standing and steadfast commitment to working in and with local Deaf community organizations for meaningful, mutually beneficial outcomes, we partner with local Deaf community organizations to integrate academic rigor and Deaf cultural values into our coursework. We do so with two organizations primarily, the Deaf-Hearing Communication Centre in Swarthmore, PA and Pennsylvania School for the Deaf in the Germantown section of Philadelphia. Ultimately, these collaborative relationships manifest in a research-based capstone course, Academically Based Community Service in ASL and Deaf Studies, providing opportunities for merging research with practice in a Deaf community setting.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Anthropology, Minor**

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. The Anthropology minor is a 6 credit minor, in which students are encouraged to draw from all sub-fields of the discipline.

**Total Course Units**

6

1. No more than 4 courses from any one field (Cultural/Linguistic, Archaeology, Human Biology) can be applied to the minor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Archaeological Science, Minor**

The Minor in Archaeological Science consists of six course units. Of these six, four will be CAAM classes from introductory, intermediate and advanced levels; one must be an advanced class with an archaeological science research component (the capstone class); and one must be a class in the archaeology or culture of a relevant area.

**To Declare:**

Students interested in declaring a Minor in Archaeological Science should contact Dr. Marie-Claude Boileau at mboileau@upenn.edu.

**For more information:** [https://www.penn.museum/teachers-and-students/for-penn-students/caam/minor-in-archaeological-science](https://www.penn.museum/teachers-and-students/for-penn-students/caam/minor-in-archaeological-science)

Architectural History, Minor

The Architectural History Minor aims to deepen students’ knowledge of artistic production and practice over the scope of human history. A Minor program in architectural history may complement the student’s Major in a cognate field, or it may be unrelated to the student’s primary field instruction.

Asian American Studies, Minor

Asian American Studies explores the historical and contemporary experiences of Asian immigrants and of persons of Asian ancestry in North America, and the relevance of those experiences for understanding race and ethnicity in national and global contexts. The program introduces students to the methods and concerns of a wide spectrum of disciplines: anthropology and ethnography, economics, history, law, literature, sociology and demography, political science, and urban studies, as well as creative and expository writing.

Biological Basis of Behavior, Minor

Biological Basis of Behavior is an interdisciplinary program in which students explore the relationship between behavior (both human and animal) and its organic bases. The Program offers courses in virtually all areas of neuroscience ranging from cellular neurobiology to cognitive neuropsychology and integrates these basic interdisciplinary courses with basic science requirements in biology, chemistry and psychology. Students also engaged in supervised research in areas as diverse as molecular neurobiology, chemical neuroanatomy, visual sciences and behavioral ecology.

Biology, Minor

The Biology minor introduces students to fundamental topics in the areas of cell and molecular biology, genetics, physiology, and ecology and evolution. This broad range of coursework is designed to provide students with a sufficient background to understand the basics underlying many of the current advances in the field.

Biophysics, Minor

Bridging the biological sciences and the physical sciences, Biophysics is concerned with physical and chemical explanations of living processes, especially at the cellular and molecular levels. Detailed molecular descriptions are emerging for genetic elements and for the mechanisms that control their propagation and expression. Biophysical studies include the investigation of protein structure, nucleic acid structure, enzyme
mechanisms, the phenomena underlying cellular behavior, excitable phenomena in nerve, muscle and visual cells, and integrative neural phenomena.

For more information: http://www.physics.upenn.edu/biophysics/biophpages/Minor.html

### Chemistry, Minor

Chemistry is concerned with the study of matter and the changes matter can undergo. The chemistry program provides a basic foundation for career opportunities in chemical research and teaching, in scientific communication and information transfer, and in the health professions. The chemistry minor provides an introduction to several areas of chemistry, providing exposure to both lecture and laboratory courses.

For more information: http://www.chem.upenn.edu/node/9

Note: Other departments’ courses may not be substituted.

### Cinema and Media Studies, Minor

The Penn Cinema and Media Studies major and minor are traditional humanities programs involving the critical study of film and media history, theory, and aesthetics. Reflecting the hybrid nature of the field of Cinema and Media Studies, our faculty members are housed in departments across SAS and the university, and we cross-list courses with various departments and schools, including Africana Studies, Anthropology, Communications, East Asian Language and Civilizations, English, Fine Arts, German, History, History of Art, Near Eastern Languages and Civilizations, Romance Languages, Slavic Languages and Literatures, and Women’s Studies. This truly interdisciplinary program will introduce students to the wide range of methodologies used to study film
and media, and this intersection with other disciplines makes Cinema and Media Studies an ideal component of a double major.

---

**Cognitive Science, Minor**

Cognitive science is the empirical study of intelligent systems, including the human mind. An interdisciplinary science, it combines results from biology, computer science, linguistics, mathematics, neuroscience, philosophy and psychology to the study of language processing, perception, action, learning, concept formation, inference and other activities of the mind, with applications for information technology and the study of artificial intelligence.

1 Consult with Undergraduate Chair.
Comparative Literature, Minor

The undergraduate program in Comparative Literature welcomes students interested in the study of literature from theoretical, interdisciplinary, cross-cultural, and global perspectives. The core courses train students to appreciate the variety of meanings that texts acquire in different institutional and philosophical contexts and different socio-political frameworks. There are three concentrations within the major: National and Transnational Literatures (four courses in each of two languages), Theory, and Globalization.

Comparative Literature is a flexible program, allowing students to take courses in a variety of departments in the College. Students with interests in more than one national literature and in fields such as philosophy and political theory, art and aesthetics, and film and music will find the requirements congenial. The program provides students with a cosmopolitan intellectual background that is increasingly in demand in an era of globalization.

The minor in Comparative Literature requires students to take an introductory course and a course in theory, along with an open selection of four literature and film courses.

**Creative Writing, Minor**

Creative Writing is the study of writing and literature with an emphasis on cultivating students' own approach to craft. Students can choose from a range of workshops in fiction, creative nonfiction, poetry, screenwriting, playwriting, or journalism, all of which expose them to a range of writing in the field and give them opportunities to craft their own original work. Students can minor in Creative Writing by completing four workshop courses and two courses in the study of literature.

Journalistic Writing is the study of nonfiction writing and literature with an emphasis on cultivating students' own skills in reporting, editing, interviewing, investigative journalism, media scholarship, and writing for a range of platforms. Students can minor in Journalistic Writing by completing six workshop courses in journalism and creative nonfiction, including one required course in long-form journalism.

For more information: http://writing.upenn.edu/cw/

**Design, Minor**

Minor in Design, established in 2010, is for those students with another major who seek to gain a basic knowledge of the creative process of design and to acquire the basic skills necessary to link design with other disciplines in the arts and sciences.

**Digital Humanities, Minor**

The Undergraduate Minor in Digital Humanities is offered by the School of Arts and Sciences at the University of Pennsylvania. It has been designed for students who want to augment their disciplinary studies in the humanities or humanistic social sciences with advanced digital research techniques and in-depth engagement with theoretical and
practical questions raised by digital humanities. Students who are not majoring in humanities fields are also welcome to complete the minor.

Dutch (Netherlandic), Minor

The Dutch-speaking Low Countries (the Netherlands and part of Belgium) are a unique cultural community of about 22 million speakers in Northwestern Europe. The names of famous Dutch artists readily come to mind: Rembrandt, Rubens, Breughel, Van Eyck, Mondriaan, as do some of the cities where they lived: Amsterdam, Brussels, Leyden, Maastricht. But artists do not flourish in a vacuum. Each of these artists assumes a cultural, political, economic, and historical context that is worthy of study in its own right. The resources in Dutch Studies at Penn offer students and faculty the ability to learn more about:

- The Dutch Economy
- The Dutch Language
- The Netherlands and Belgium During the Nazi Occupation
- The Literature and Culture of the Dutch Colonial Period

For more information: https://www.sas.upenn.edu/germanic/languages/dutch

Intensive Summer study in Zeist or Gent can also count toward Minor requirements.

East Asian Area Studies, Minor

East Asian Area Studies focuses on East Asia as a region of the world and human experience, and provides an integrated curriculum drawing on the approaches of the social sciences and the humanities. The program requires relevant courses in areas including history, international relations, political science, sociology, legal studies, and East Asian arts and cultures, while maintaining high standards in language study.

For more information: https://ceas.sas.upenn.edu/undergraduate/secondary-undergraduate-page

With intensive language courses (4 course units) the Minor will require 8 course units.

---

**East Central European Studies, Minor**

The Minor program in East Central European Studies offers students the opportunity for the interdisciplinary study of the language, history, politics, literature, and culture of Eastern and Central Europe. The minor requires a total of six courses (6 c.u.) beyond the language requirement (two semesters), which students can satisfy by choosing any regional language currently offered at Penn (i.e., Bosnian/Croatian/Serbian, Hungarian, Polish, Ukrainian, Yiddish), by completing language coursework through a study abroad program, or by demonstrating equivalent proficiency.

For more information: [http://ccat.sas.upenn.edu.slavic/](http://ccat.sas.upenn.edu.slavic/)

Total Course Units 6

1. It is highly recommended that students take ECON 030 Public Policy Analysis as one of the electives.
2. Students may substitute a 0-level for a 200-level in the same subject area provided they fulfill the prerequisites.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Economic Policy, Minor**

Economics is a social science and as such an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are: the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; international trade and international finance (e.g., exchange rates).

Economic policy questions stand at the center of public policy debates in the U.S. and countries all around the world. The goal of the Economic Policy Minor is to provide students who are not majoring in economics with the analytical tools that are necessary to participate in and shape public policy debates. The foundation for the minor is provided by the microeconomics and macroeconomics principles courses. After having completed the principles courses, the student can choose a minimum of four elective courses, which apply the basic tools of economic analysis to specific policy questions. The completion of the Economic Policy Minor does not require university-level calculus courses.

For more information: [http://economics.sas.upenn.edu/undergraduate-program/economic-policy-minor](http://economics.sas.upenn.edu/undergraduate-program/economic-policy-minor)

**Economics, Minor**

Economics is a social science and as such an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are: the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; international trade and international finance (e.g., exchange rates).

The Economics Minor is intended for students with a strong interest in rigorous economics who are majoring in related fields. For instance, this minor should be attractive for students who are majoring in political science or sociology, who are interested in quantitative data analysis, or students looking for an applied field that accompanies a major in mathematics.

English, Minor

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical “core,” majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

European Studies, Minor

European Studies at Penn is an interdisciplinary minor and an ideal addition to the study of many disciplines in the humanities and social sciences. It supplements majors in history, political science, sociology and art history as well as in French, German, English, Spanish, Italian and Slavic languages. It is designed to give students access to:

- An understanding of Europe as a historical and cultural entity and its world leadership in business, politics and culture.
- A great variety of countries, cultures and languages whose interaction with each other and with the United States is an essential part of transatlantic culture.
- The institutions of a new Europe—European Union, Council of Europe, European Court of Human Rights—reflecting the largest experiment in building a global system of governance in human history.

### Fine Arts, Minor

The Undergraduate Fine Arts Program combines studio practices, seminar courses, and interactions with visiting artists and professionals in order to provide an open intellectual framework to foster critical awareness and independent methods of artistic research and learning. The Fine Arts Department offers a diverse range of studio courses in the areas of animation and 3D modeling, ceramics, design, drawing and painting, photography, printmaking, sculpture and video. The dynamic curriculum also provides students with the opportunity to thoroughly examine contemporary art, creative research, interactive design and public art through seminar-based instruction.

The Undergraduate Fine Arts Program offers a Fine Arts Major for students in the College of Arts and Sciences and School of Engineering, and a Fine Arts Minor for undergraduate students across the university. The Fine Arts program works in conjunction with three interdisciplinary degree programs in Cinema Studies, Digital Media Design and Visual Studies. Fine Arts courses are available to all students at the university to take as electives in order to enhance multidisciplinary learning.

A goal of the Undergraduate Fine Arts program is to facilitate an environment where the potentialities of art are considered in relation to the real life conditions of our students. Encouraged to test themselves against the rigors of divergent artistic approaches and their histories, our students develop a more complex set of skills to creatively and critically negotiate the turbulent shifts taking place globally in terms of human experiences.

### French and Francophone Studies, Minor

French andFrancophone Studies introduces students to the full span of historical and cultural traditions from France and the French-speaking world. Languages courses - from introductory to advanced - promote linguistic fluency, building on the skills students have acquired in high school or at Penn. Upper-level seminars explore a range of topics pertaining to literature, history, visual arts, and/or the media, and they offer majors and minors the opportunity to engage in research on French and global Francophone cultures across periods into contemporary times.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Core Requirements ²

FREN 212 Advanced French Grammar and Composition 1
or FREN 214 Advanced French Composition and Conversation

Select one of the following: 1

FREN 226 French History and Culture until 1789
FREN 227 French History and Culture 1789-1945
FREN 228 Contemporary France
FREN 229 French in the World
FREN 231 Perspectives in French Literature
FREN 232 Perspectives in French Literature: The Individual and Society

Electives

Select 4 course units of Electives at 200 and 300 level courses ³ 4

Total Course Units 6

¹ At least 3 courses must be taken in the department at Penn. ALL courses must be taken in French.
² Must be taken in the Department at Penn.
³ At least one must be taken in the Department at Penn.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Geology, Minor

The Geology minor is designed to provide the graduates with skills to determine the environmental and/or geologic events that have led to the structures and features of a location and to analyze a field site or geologic region. Areas of interest include mineralogy, petrology, volcanology, stratigraphy, economic geology and paleontology. Geology also includes subjects as varied as environmental geology, evolutionary biology, solid-state chemistry, oceanography, mineral economics and geochronology.

German, Minor

The major and minor programs in the Department of Germanic Languages and Literatures provide deep understandings of language and cultures. Building from basic language competency to synthesizing significant literary works, historical context and current media and politics, the program offers a comprehensive education through engaged, active learning in a combination of core courses with a wide range of electives. Your learning experiences can be broadened and applied in study abroad as well as internship programs.

Gender, Sexuality, and Women's Studies, Minor

The Gender, Sexuality and Women’s Studies Program is an interdisciplinary program that provides exciting intellectual opportunities to explore the role of gender in human affairs. The Gender, Sexuality and Women's Studies Program offers over 50 courses each year, many cross-listed with other departments. GSWS offers a major, a minor, and a graduate certificate.

Global Medieval Studies, Minor

Eleven Penn departments contribute to the interdisciplinary program in Global Medieval Studies, which allows students to discover the pre-modern world together, as the root and necessary precondition to the modern. The program is broad geographically and temporally; it includes Europe, the Middle East, Asia, and Africa, and in the latter part of our period even the New World, from Late Antiquity to 1700. This was a formative historical and cultural period in a variety of civilizations, from the north-western corner of Europe, across the Mediterranean and the Middle East, and on to southern and eastern Asia, south to Africa and over the Atlantic Ocean to the New World. The program encourages students to view the world through the lens of various disciplinary and geographic perspectives and discover the interaction of diverse civilizations and religions. As the era that gave birth to contemporary nations and a time before the formation of modern geopolitical concepts, this period provides a critical space for thinking about the composite nature of contemporary identities.

The minor program in Global Medieval Studies can easily be combined with a major in a language and literature tradition, philosophy, science, international relations, or even natural sciences, to name a few. As broadly educated historians and humanists, students of Global Medieval Studies can go on to a variety of occupations or continue their education in a range of graduate programs or professional schools.

in Europe, Spain is assuming an ever-more significant role in the affairs of the European Union. The Spanish transition to democracy in the 1970s fostered an environment of cultural, linguistic and political diversity that for half a century has served as a fascinating model for the rest of Europe, both east and west.

Hence, the knowledge of Spanish culture gives students much more than the ability to communicate in the third-most-spoken language of the world. It prepares them to account for an entirely different national, continental and global reality in all its complexity. Since culture is the controlling category in this field of studies, the major in Hispanic Studies orients itself to the types of knowledge generated by new disciplines such as cultural studies, new historicism, ethics, and postcolonial studies.

Majors in Hispanic Studies are overwhelmingly double majors. This means that they bring to their classes a dialogic perspective that engages in the study of Hispanic cultures informed by interest in other fields such as history, government, sociology, economics, medicine, and law. The richness and depth of these interests make for lively and intellectually rewarding classroom discussions.

---

History and Legal Studies, Minor

The University of Pennsylvania’s Wharton School and the College of Arts and Sciences are pleased to offer a unique program of study for undergraduate students that enables them to explore multiple perspectives on law as an inter-school supplement to their major field of study.

For more information: https://lgst.wharton.upenn.edu/minor-in-legal-studies-and-history/
History, Minor

A Minor in History consists of six courses, four of which must be taken in the Penn Department of History. Students may count a maximum of two courses from either study abroad, credit away or transfer credit. History Minors may not count any major-related courses - these are courses from other Penn departments that are not cross-listed with History. Courses for a Minor may not be taken pass/fail.

International Relations, Minor

International Relations addresses the ways in which governments, private groups and individuals relate to each other in the global political and economic systems. The program provides a solid grounding in the methodologies of political science, history and economics. The curriculum draws on the best courses relevant to world politics, offers a well-rounded liberal arts education and helps prepare students for law or business school, Ph.D. programs and international careers.

International Development, Minor

The International Development minor is intended for students who wish to complement their primary area of study with an interdisciplinary focus on complex social problems associated with international development. The minor is intended to expand a student's chosen major by focusing on critical development issues from several different academic perspectives. Approved courses emphasize problems of development in poor countries and poorer regions of wealthier countries. The interdisciplinary nature of the minor allows students to embrace a global perspective on the processes of change and development, critically assess internal and external influences on the development process, and gain a deeper perspective on the interconnectedness of complex problems.

Jewish Studies, Minor

The Jewish Studies Program provides an opportunity for students to study the Jewish experience from several perspectives including: language (Hebrew, Yiddish, and Ladino), literature in the original languages and in translation, the history and culture of the Jewish people from Biblical Israel to 21st-century America and modern Israel, the exploration of Jewish law, and the roles of gender and sex in Judaism. Students may specialize in Jewish Studies through a major or a minor, or though one of the following concentrations: Jewish History within the History Department, Hebraica/Judaica within the Department of Near Eastern Languages & Civilizations, and Judaism within the Department of Religious Studies.

Italian Studies: Italian Literature, Minor

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

For more information: http://www.sas.upenn.edu/italians/

1 At least 2 of the 4 electives must be taught in Italian. At least 1 of these 2 must be at the 300-level. No more that 2 extra-departmental Italian Studies courses taught in English may be counted towards the minor. No more than 3 courses may be taken abroad.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Journalistic Writing, Minor

Creative Writing is the study of writing and literature with an emphasis on cultivating students’ own approach to craft. Students can choose from a range of workshops in fiction, creative nonfiction, poetry, screenwriting, playwriting, or journalism, all of which expose them to a range of writing in the field and give them opportunities to craft their own original work. Students can minor in Creative Writing by completing four workshop courses and two courses in the study of literature.

Journalistic Writing is the study of nonfiction writing and literature with an emphasis on cultivating students’ own skills in reporting, editing, interviewing, investigative journalism, media scholarship, and writing for a range of platforms. Students can minor in Journalistic Writing by completing six workshop courses in journalism and creative nonfiction, including one required course in long-form journalism.

For more information: http://writing.upenn.edu/cw/
Landscape Studies, Minor

The Landscape Studies Minor focuses on the role of the landscape in the cultural imagination, on its legibility as a representation of political, social, artistic, and environmental values; and on its potential to reflect and change our ideas about relationships between the natural world and society.

For more information: http://www.design.upenn.edu/landscape-architecture/undergraduate-minor

Law and Society, Minor

The Law and Society Minor program gives students the opportunity to study and understand the law within a sociological framework, by examining both the factors that affect variations in the law, as well as how those variations affect individuals and populations differently. In addition to a theoretical foundation in Sociology, students in the minor will study issues involving the state, its relationship to other institutions such as religions, corporations, civil liberties, the organization of courts, punishment and detention, legislatures, international bodies and trade agreements (such as NAFTA and the EU), race, class and gender and discrimination, reproductive rights, LGBT rights and the legal profession in general. Although the focus of this minor will be on U.S. laws and the U.S. society, laws and societies of other countries as well as international law and the international society will be used for comparative analysis.

The minor prepares students interested in the broad aspects of legal regulations and social organization. It is for students who are interested in graduate studies in law, applied community organizations, or business.

For more information: https://sociology.sas.upenn.edu/lawandsociety

Latin American and Latino Studies, Minor

The Latin American and Latino Studies (LALS) Program offers an interdisciplinary major and minor to study the history, arts, languages, cultures, societies, politics, and/or regional organizations of Latin American and Caribbean countries as well as Latino communities and individuals in the United States. With courses offered across many departments in the School of Arts and Sciences, in study abroad programs taught throughout Latin American cities, and with academically based community service courses with Latino organizations in the Greater Philadelphia area, the LALS major and minor afford our students a very comprehensive approach to Latin American and Latino Studies as well as the possibility of a flexible curriculum, where students can pursue and combine their academic interests.

For more information: https://www.sas.upenn.edu/lals/content/major-minor

Requirements: Language competence equal to two semesters of college study in Spanish or Portuguese.

Latin American and Latino Studies, Minor

Requirements:
- Language competence equal to two semesters of college study in Spanish or Portuguese.
- Select 6 course units of courses with Latin American content

Total Course Units: 6

1 Only two courses counted toward a major may be double-counted toward the LALS Minor. Study Abroad courses may count. Consult with your Minor Advisor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Law and Society, Minor

---

**Linguistics, Minor**

The Linguistics Program is intended to acquaint students with the methods and findings of the scientific study of human language and its relationships to cognition, society, and history. It serves as a preparation for graduate training in linguistics or related areas, and as part of a rigorous general education. Linguistic training is relevant to work in anthropology, philosophy, psychology, and language and literature, as well as to careers in such fields as education, computer science and law. Founded by Zellig Harris in 1947, the Penn Linguistics Department is the oldest modern linguistics department in the United States. We have outstanding programs in the core disciplines of syntax and phonology, as well as in sociolinguistics, semantics, discourse, historical linguistics, phonetics, and psycholinguistics. Penn is also the home of the Linguistic Data Consortium (LDC), a compiler and distributor of linguistic materials for language engineering research. The graduate group in Linguistics at the University of Pennsylvania is an interdisciplinary team of faculty from the Department of Linguistics and related departments. Our program has strong concentrations in several areas and a tradition of collaboration among its faculty.

For more information: http://www.ling.upenn.edu/undergraduate/minor-linguistics

---

**Logic, Information, and Computation, Minor**

Modern mathematical logic began with work by Cantor, Frege, and other mathematicians during the last three decades of the nineteenth century who were concerned with providing a sound basis for the development of mathematical analysis. In the wake of "the crisis in the foundations of mathematics" precipitated by the discovery of various logical paradoxes at the turn of the twentieth century, mathematicians and philosophers such as Hilbert and Russell intensively pursued investigations into the logical foundations of mathematics. Connections between logic and the foundations of mathematics remained an important source for scientific developments in logic through the epochal results of Gödel in 1930 and 1931, which indicated both the scope and limits of the mechanization of mathematical reasoning. The great burst of scientific activity occasioned by Gödel’s results led directly to Turing’s mathematical characterization of mechanical computation in terms of simple devices, now known as Turing machines. The work of Gödel, Turing, and other logicians during the 1930s laid the scientific foundations for the revolution in computer and information technology that began in the last half of the twentieth century and continues today.

The Logic, Information, and Computation Program offers students the opportunity to engage in a systematic, integrative program of study within the School of Arts and Sciences. Logic remains one of the core disciplines in investigations of information and computation. Indeed, logic is playing a major role in advances in computer security, database technology, networking, and software engineering. Moreover, logic has expanded its role within mathematics beyond foundational studies and now enjoys rich connections with areas as diverse as algebra, analysis, and combinatorics. In light of the current importance of the investigation of computation and information from both a scientific and technological point of view, the Major and Minor in Logic, Information, and Computation will provide students with a strong background to pursue computational aspects of the natural, biological, and social sciences and prepare them for careers in information technology.

### Minor Requirements

**Mathematics Requirement**

- MATH 104 Calculus, Part I
- MATH 115 Calculus, Part II with Probability and Matrices
- or MATH 114 Calculus, Part II

**Logic, Info, & Computation Requirement**

- LGIC 010 Ideas in Logic and Computation
- or PHIL 005 Formal Logic I
- LGIC 210 Applied Mathematics of Information and Computation I
- or MATH 340 Discrete Mathematics I

Select one of the following:

- LGIC 310 Logic I
- PHIL 006 Formal Logic II
- MATH 570 Introduction to Logic and Computability

**Electives**

- Select 3 course units of Electives \(^1\)  

Total Course Units: 8

---

\(^1\) Check: http://logic.sas.upenn.edu for pre-approved courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Mathematics, Minor

At the core of modern theoretical science, mathematics has historically provided an expressive language as well and theoretical framework for advances in the physical sciences. It has since become central in the life and social sciences and computer science. Mathematics at Penn embraces traditional core areas of mathematics as well as developing areas (Penn is one of the world’s leading centers in the application of logic to theoretical computer science). The goals of the major program are to assist students in acquiring both an understanding of mathematics and an ability to use it. The mathematics major provides a solid foundation for graduate study in mathematics as well as background for study in economics, the biological sciences, the physical sciences and engineering, as well as many non-traditional areas.

For more information: https://www.math.upenn.edu/undergraduate/math-majors-and-minors/mathematics-minor

Review the math minor first by visiting, http://www.math.upenn.edu/ugrad/minor.html. Below is a planning tool that is meant to help you but does not replace the web and adviser visit requirements.

Medical Sociology, Minor

The Medical Sociology minor gives students the opportunity to engage in the sociological study of medicine and the health of populations. A sociological perspective on medicine allows students to critically engage with the social and cultural framing of what is defined as “illness”; the structural factors that may contribute to those illnesses; and the interactive dynamics between healthcare providers and patients.

Students will be able to critically connect the organization of social groups with the profession of medicine, the practice of medical care, and the social factors that contribute to sickness and well-being. Students who complete this minor will have a theoretical foundation in Sociology, and a dynamic perspective on health and healthcare in the world today.

For more information: https://sociology.sas.upenn.edu/medicalsociologyminor

• Bioethics and Medical Sociology minors cannot double count more than 1 course unit.
• HSOC majors and Medical Sociology minors cannot double count more than 1 course unit.

Modern Middle Eastern Studies, Minor

The interdisciplinary Modern Middle Eastern Studies degree is designed to allow students to specialize in the Middle East as a region of the world and human experience by combining course work using both social scientific and humanistic approaches, underpinned by relevant language skills. Students will work with faculty committed to supporting interdisciplinary, applied, research-oriented advanced study. The minor gives students opportunities to work on problems of politics, policy, history, ideology, social thought, economic development, and international relations.

Music: Music, Minor

There are two paths of study for the Music minor. One flexible path allows students to draw together five courses on a wide array of topics in History, Theory, and Ethnomusicology. The other path is the Interdisciplinary minor in Jazz and Popular Music studies, which is intended for students who wish to integrate their interest in music in the contemporary world and in academically-based community service as a form of learning. This minor is also for music majors who wish to include knowledge of jazz and popular music performance into their degrees.

Native American and Indigenous Studies, Minor

The Native American and Indigenous Studies (NAIS) Initiative at Penn features an inter-disciplinary Minor that focuses on the cultures and histories of Native Americans, First Nations, and other Indigenous peoples. Students can explore a diverse range of topics, including cross-cultural historical encounters, heritage landscapes, language recovery, cultural performance, law and sovereignty, museum anthropology, archaeology, decolonizing methods, and more. Many NAIS courses are cross-listed in more than one department (e.g., Anthropology, History, Religion). NAIS Faculty often use comparative case studies of Indigenous
Near Eastern Languages & Civilizations: Ancient Near East, Minor

This minor explores the cultures of the ancient Near East, including Mesopotamian, Egyptian, Israelite, Hittite and Persian civilizations. Along with gaining familiarity with an ancient Near Eastern language, coursework includes history, religion and archaeology of the ancient Near East.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Philosophy, Minor**

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The Philosophy Minor requires a Philosophy balanced selection of courses in the various fields of philosophy and its history.

**Physics, Minor**

The aim of physicists is to discover the most fundamental principles of nature. Their tools are mathematics and experiment. The physical world as we perceive it is very complex, yet the principles of physics are inherently simple. A physicist’s forte is the ability to analyze a problem, reduce its complexity, and arrive at an understanding of the underlying patterns of nature in terms of simple relationships among constituent elements. Learning to do this gives Physics minors an intellectual versatility that can serve them well in a variety of future activities ranging from research and teaching in Physics or related sciences to careers in law, the health professions, and high-technology companies.

For more information: http://www.physics.upenn.edu/undergraduate/physics-astronomy-major#minor

**Political Science, Minor**

The Political Science Department’s course offerings span the discipline of political science, from American political institutions, to the politics of world regions, the emergence of a new international order, and
recent and ancient political ideas. The Department’s curriculum is
divided into the four standard fields of American politics, comparative
politics, international relations, and political theories. There are also
other opportunities for study in political processes of elections and
communications and public policy. A minor involves one introductory
political science course and five political science electives.

Total Course Units | 6 |

1 4 course units must be taken in PSCI Dept at U of P.

The degree and major requirements displayed are intended as a guide
for students entering in the Fall of 2017 and later. Students should
consult with their academic program regarding final certifications and
requirements for graduation.

Psychoanalytic Studies, Minor

Psychoanalytic ideas provide a coherent basis for understanding how
people feel and think, and how they function as individuals and in groups.
These ideas, centered on unconscious emotional processes and human
relationships, continue to evolve and develop. They form a bridge across
many disciplines throughout the humanities, social sciences, and some
of the natural sciences. Penn is now one of very few schools in the
country (and the world) to offer the exciting opportunity of a minor in
Psychoanalytic Studies.

As it provides a unifying body of ideas, Psychoanalytic Studies comprises
courses in many departments. The minor is designed in partnership
with the Psychoanalytic Center of Philadelphia, and students who sign
up for the minor also have the opportunity to meet monthly with a
practicing psychoanalyst to learn about contemporary psychoanalytic
theories and therapies. Students who complete six courses that count
toward the minor as well as a series of meetings with a psychoanalytic
mentor will receive both the minor on their transcript and a Certificate of
Accomplishment from the Psychoanalytic Center of Philadelphia.

for students entering in the Fall of 2017 and later. Students should
consult with their academic program regarding final certifications and
requirements for graduation.

Psychology, Minor

Studies in psychology introduce students to contemporary
understandings of how organisms perceive, learn, think and interact
with one another, how they develop, how they are motivated and how,
individually and as members of species, they may be compared with one
another. Psychology at Penn is a diverse discipline, with topics ranging
from neuroscience to psychopathology.

The Minor in Psychology consists of six courses. It is intended to give
the student a broad base in Psychology without the commitment to the
full course load of the major. The requirements are therefore comparable
to those of the major in type but reduced in number. At least three of the
six required course units must be taken at Penn. In addition, students
minoring in psychology must have a minimum of 3 PSYC courses that
they count only towards the minor and not towards any other major or
minor.

Russian Culture and History, Minor

The Department of Slavic Languages and Literatures offers programs in Russian and, with the support of the Penn Language Center, courses in the Czech and Polish languages. The department also offers a series of courses for students who have spoken Russian at home and wish to gain literacy and/or improve their language skills or to pursue the study of Russian literature and culture in Russian. Students of Russian at Penn are invited to reside in the Russian House (which brings together students interested in daily use of the language) and encouraged to spend a semester of study abroad.

Religious Studies, Minor

The Religious Studies minor is a great way to gain background in the scholarly study of religion in order to supplement or enhance major studies in other fields like Jewish Studies, History, Anthropology, Art History, Psychology, Political Science, or even Nursing, Engineering, Pre-Med, Pre-Law, and Business. Students in Wharton or the College of Nursing have taken a Religious Studies minor to gain some fluency in matters of business ethics, bio-ethics, cross-cultural analysis, inter-religious affairs, and the like.

Every minor program must include six courses in at least two different religious traditions. At least two of the six courses must be taken with core Department faculty. Students wishing to focus on an individualized topic may work out a program with the Undergraduate Chair. RELS also offers many course options which can count towards College Sector requirements, which makes it easier to incorporate the RELS minor into a typical undergraduate course-load.

For more information: https://www.sas.upenn.edu/religious_studies/undergraduate/minor

Science, Technology and Society, Minor

Science, Technology & Society (STSC) examines the social contexts in which science and technology occur, the organizations of people and things that make up science and technology systems, and the social and cultural consequences of scientific and technological change over time. In a wide array of courses, STSC majors explore the relationship between
scientific knowledge, technological innovations, technological systems, and society past and present.

---

**Statistics, Minor**

The Statistics Minor consists of 3 prerequisites, 1 core course, and 3 electives. Students interested in the minor must have the prior approval of the Statistics Undergraduate Program Director in order to develop a curriculum for the minor that is appropriate for their interests. Wharton students are not eligible for the minor.

For more information: https://statistics.wharton.upenn.edu/programs/undergraduate/statistics-minor/

For College Students ONLY. Dual and Joint degree (COL/WH) students are ineligible for this minor.

Sustainability and Environmental Management, Minor

The Sustainability and Environmental Management minor is focused on sustainability and it is designed to help students understand the nature of environmental constraints which face organizations and individuals in the modern world, and to understand how these constraints can be effectively considered as part of the decision-making process in for-profit and non-profit organizations.

For more information: https://www.sas.upenn.edu/earth/minors/sustainability-and-environmental-management-minor

Theatre Arts, Minor

The Theatre Arts Program offers a six-course minor, with three courses that focus on academic approaches to the theatre, such as the study of dramatic literature, theory, history and criticism, and three that focus practical aspects of performance, such as acting, directing, designing, devising, and playwriting. English majors concentrating on drama will find courses that cross-list; a diverse group of students with a wide array of major fields of study find it possible to pursue their interest in Theatre Arts with a minor.

Urban Education: Secondary Education, Minor

The minor is open to undergraduates in all disciplines. Students choose from among three concentrations depending on interest in pursuing teaching certification or deepening one's background in urban education policy: Elementary Education; Secondary Education; Urban Education Policy, Research, and Practice. Students in all three concentrations take three core courses. The additional four requirements vary depending on the concentration.

Urban Studies, Minor

The Urban Studies minor offers students an opportunity to think and learn about cities in an informed, disciplined and integrated way. The program introduces a variety of perspectives on the origins, development, and nature of cities, stressing the application of theory to practice. Students take four Urban Studies courses, and complete an internship for an additional two CUs in this six CU minor. The internship component allows students the opportunity to work closely with a community group, public agency, non-profit or private organization in the city.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**History of Art, Minor**

The Minor in the History of Art, like the Major, aims to deepen students’ knowledge of artistic production and practice over the scope of human history. A Minor program in art history may complement the student’s Major in a cognate field, or it may be unrelated to the student’s primary field instruction.

¹ Normally fulfilled by 2nd-year level of Hebrew. If already proficient in Hebrew, you must choose the other language.

² Must include courses on Hebrew and Jewish cultures: modern and/or medieval in history, literature and religion. NOTE: No more than one PSCI course may be taken as an elective.
With proficiency in Hebrew before entering Penn, the minor may be fulfilled with 6 course units.

At least 2 course units must be in the study of Hebrew texts from any two areas: Biblical, Rabbinic or Medieval, and Modern Hebrew literature.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Italian Studies: Italian Culture, Minor

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

Electives

Select 4 course units of Electives 1

Total Course Units 6

1 No more than 3 courses may be taken in English. No more than 3 courses may be taken abroad. At least 1 of the 4 electives must be taught in Italian at the 300-level. The remaining 3 courses should be chosen in related fields sponsored through Comparative Literature, Cinema Studies, departments affiliated with the Center for Italian Studies, or other offerings in humanities and social sciences as appropriate.

East Asian Languages and Civilizations: Chinese, Minor

All students minoring in the Department of East Asian Languages and Civilizations must fulfill a set of Basic Requirements. These requirements are to be met within one of three linguistic and cultural concentrations:

- Chinese Studies
- Japanese Studies
- Korean Studies

In addition to the Basic Requirements, there are further requirements specific to each concentration.

For more information: http://www.sas.upenn.edu/ealc/undergraduate/minor

SCHOOL OF ENGINEERING AND APPLIED SCIENCE

Penn School of Engineering is unlike any other. Traditionally untraditional. Pioneers in interdisciplinary education and research. Theory linked with real-world practice. The path for students who want to shape the future.

With the pace of innovation and technological advancement accelerating ever faster, engineers hold the keys to the next generation's routine wonders.

As an Ivy League institution — and the first university in the nation — Penn delivers a transformative experience in the classroom and laboratory, while ensuring its engineering and applied science students receive a fully rounded liberal arts education.

Penn Engineering is a pioneer in interdisciplinary education, allowing students the flexibility to craft a program that suits their individual interests, career, or graduate education plans. Both Bachelor of Science in Engineering (BSE) and Bachelor of Applied Science (BAS) degrees are offered, along with specialized dual-degree programs, an array of majors and minors, special programs, and study-abroad opportunities.

Penn Engineering students get valuable and extensive hands-on experience, conducting research and pursuing creative designs and new products alongside faculty renowned in their fields. The working relationship with faculty pervades Penn Engineering, where full-time faculty teach all core undergraduate courses, and each student has a faculty advisor.

As the global marketplace for technology grows, graduates go on to leadership roles in business, medicine, law, and academia. They leave armed with the technical knowledge, imagination, communication skills, and understanding of the social and human context of their work, all engendered with a fervor for the future nurtured at Penn Engineering.

Learn more about our history: http://www.seas.upenn.edu/about-seas/history.php.

Learn more about our school leadership: http://www.seas.upenn.edu/about-seas/dean-staff.php.

Two key elements distinguish the Penn Engineering experience from that provided by many other institutions: Exceptional academic programs, and practical design and research experience.

Our undergraduate programs emphasize both theory and practice while forming intellectual linkages across a breadth of disciplines. The opportunity for hands-on research, over the four years, allows undergraduates the chance to learn about the creation of knowledge, further explore their chosen field, and thereby become collaborators in the search for knowledge. The design experience over the four years, culminating in the senior design project, challenges students to utilize their academic training and problem-solving skills in practical ways, and provides them with direct experience with real-world problems that they will encounter as practicing engineers.

Technology is transforming our times and our lives, no longer on a scale of decades but of years and even months. A successful career through such changing times requires engineering graduates endowed with skills that are applicable to widely different technologies, skills that transcend the details of any one job. Such is the result of an education that pays much more attention to the fundamental than to the trendy, to the creative more than to the routine. Engineers must also be firmly educated as responsible citizens, concerned with the impact of their work on society.

Penn Engineering is an integral partner in Penn's initiatives to prepare students for leadership in a high-tech world. Our goal is to prepare students for leadership roles in engineering and applied science as well as in other fields, such as medicine, business, and law, for which creativity, critical quantitative thinking, effective communication skills, and a strong commitment to humane values are essential.

Mission of the School

1. The creation and dissemination of scholarly research in both basic and applied arenas to be an international center of engineering excellence and the regional catalyst for technological innovation;
2. The design and delivery of engineering education known for its rigor, breadth and relevance to prepare its students to become global leaders in technology-based fields.

Mission Statements of Bachelor of Science in Engineering Programs (ABET-accredited)

- Bioengineering (http://www.be.seas.upenn.edu/about-academics)
- Chemical and Biomolecular Engineering (http://www.cbe.seas.upenn.edu/about-ugrad)
- Computer Science (http://www.cis.upenn.edu/ugrad/abet.shtml)
- Computer Engineering (http://www.seas.upenn.edu/cmpe/accreditation.php)
- Electrical Engineering (http://www.ese.upenn.edu/about-ugrad)

- Mechanical Engineering and Applied Mechanics (http://www.me.upenn.edu/about-ug-ed/accreditation.php)
- Systems Science and Engineering (http://www.ese.upenn.edu/about-ugrad)

Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below are examples of student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, visit: http://www.seas.upenn.edu/undergraduate/research/index.php.

Finding a Research Mentor and Research Experiences

Students are encouraged to explore the Penn Engineering Faculty Expertise Directory (http://www.seas.upenn.edu/directory/departments.php), featuring the School's standing faculty and is searchable by department, research center affiliation, and research expertise keyword. Users can identify which faculty are conducting research in a specific area and contact faculty members whose research interests them.

The Engineering Dean's Advisory Board (EDAB) puts together a guide for fellow students that gives step-by-step instructions and tips on how to secure research positions as an undergraduate.
Summer Undergraduate Research in Engineering (SURE)
Penn Engineering’s world-acclaimed faculty, along with state-of-the-art research laboratories and highly interdisciplinary curricula, offers summer research opportunities for talented undergraduates who seek hands-on research experience. From robotics and computer animation, nanotechnology, genomics and biotechnology, Penn’s centers and institutes are at the forefront of research on multiple scientific and technological frontiers.

International Summer Undergraduate Research in Engineering (iSURE)
Opportunities for undergraduates are available during the summer to spend eight to 12 weeks on a research internship in one of Penn Engineering’s partner institutions abroad.

Littlejohn Undergraduate Research Program
Thanks to a generous gift by Angus Littlejohn, the School of Engineering is able to offer Summer Research Opportunities to Penn Engineering Students. The program is open to rising, sophomores, juniors and seniors.

The program intends to provide students the opportunity to get involved in hands-on engineering research under the supervision of a faculty member. Topics of research include all areas covered by the departments in the School of Engineering and Applied Science. Students will receive a stipend of $4,500 for a 10 week period.

Rachleff Scholars Program
This program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

The following BSE programs are accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

• Bioengineering (http://www.be.seas.upenn.edu/about-academics)
• Chemical and Biomolecular Engineering (http://www.cbe.seas.upenn.edu/about-ugrad)

• Systems Science and Engineering (http://www.ee.upenn.edu/about-ugrad)

The BSE program in Computer Science is accredited by the Computing Accreditation Commission of ABET (http://www.abet.org).

For more information, visit: http://www.seas.upenn.edu/undergraduate/handbook/programs/abet-accreditation.php.

Each student is assigned a faculty advisor with whom they are required to meet at least twice per year. No student is permitted to register for classes in any semester without first meeting with an advisor and a review of their Permission to Register form (https://www.seas.upenn.edu/undergraduate/pdf/ug-advisor-signoff.pdf). Students who take the time to prepare for these meetings generally find them beneficial and informative. Faculty advisors are the best source of information about electives within the major, research opportunities, and options for graduate study.

For more information, visit: https://www.seas.upenn.edu/undergraduate/advising/.

Curriculum
Each major (p. 169) within the School of Engineering and Applied Science has its own curriculum. Specific curricular requirements for each major are listed by program.

However, all Engineering students must complete requirements in four specific tracks:

• math (http://www.seas.upenn.edu/undergraduate/handbook/courses/math-courses.php) and natural science (http://www.seas.upenn.edu/undergraduate/handbook/courses/nat-science-courses.php)
• core engineering courses within the chosen major
• professional electives
• social science/humanities (http://www.seas.upenn.edu/undergraduate/handbook/courses/ssh-requirements.php) and free electives (http://www.seas.upenn.edu/undergraduate/handbook/courses/free-elective.php)

A course planning guide exists for each major to assist with planning and keeping track of the requirements toward graduation.

In addition, all Engineering students must complete the following requirements.

Writing Requirement
Beginning with the Class of 2001, Penn Engineering has implemented a Writing Requirement. The Writing Requirement will not necessitate the completion of additional course units. Students can easily satisfy the requirement without altering the existing constraints of BAS or the BSE degrees.

Students are strongly encouraged to fulfill the Writing Requirement during the first two years of study because it becomes increasingly difficult to schedule first-year courses as one moves through the curriculum.

For more information, visit: http://www.seas.upenn.edu/undergraduate/handbook/courses/writing-requirement.php.

Engineering Ethics Requirement
Beginning with the Class of 2017, Penn Engineering students must fulfill the Engineering Ethics requirement. The Ethics Requirement will not necessitate the completion of any additional course units in the existing BAS or the BSE degrees, as the requirement may be double-counted from the student’s SSH course requirements.

The Engineering Ethics requirement can be satisfied by taking EAS 203 Engineering Ethics. This course may be used (double-counted) for the Social Science requirement as well. Students are strongly encouraged to take the Ethics Requirement course during the sophomore year.
For more information, visit: http://www.seas.upenn.edu/undergraduate/handbook/courses/ethics-requirement.php.

**Bioengineering, BSE**

Bioengineering is a multidisciplinary area where the engineering sciences interface biology, biomedical sciences, and medicine, to advance human health. Bioengineering brings together the creation of new knowledge and understanding of biological systems through engineering analysis and experimentation, with the application of engineering design and practice principles for the development of devices, processes, methods and biotechnologies to improve medical practice and health care delivery.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/bioengineering/

**Bioengineering (BE) Major Requirements**

40.5 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook).

**Free Elective**

Select 3 course units of free electives

| Total Course Units | 40.5 |

---

1. **ENM 375** Biological Data Science I - Fundamentals of Biostatistics is recommended.
2. If PHYS 150 Principles of Physics I: Mechanics and Wave Motion or PHYS 170 Honors Physics I: Mechanics and Wave Motion & PHYS 151 Principles of Physics II: Electromagnetism and Radiation or PHYS 171 Honors Physics II: Electromagnetism and Radiation taken then only 1 course unit technical elective required.
3. The Social Science & Humanities Depth, Writing & Ethics Requirements can be satisfied with the 7 total course units.

**Concentrations**

Students may select one of eight concentrations (http://www.be.seas.upenn.edu/current-students/undergraduates/concentrations.php):

- Biomedical Data Science and Computational Medicine
- Biomedical Devices
- Cellular/Tissue Engineering and Biomaterials
- Biomedical Imaging and Radiation Physics
- Systems and Synthetic Biology
- Neuroengineering
- Multiscale Biomechanics
- Therapeutics, Drug Delivery & Nanomedicine

**Biomedical Science, BAS**

Interface the engineering sciences, biology, biomedical sciences, and medicine to advance human health and solve problems in medicine and the biological sciences. The Bachelor of Applied Science degree offers students breadth and flexibility and allows them to combine a technology-based degree with considerable course work in the liberal arts, communications, business or fine arts. It is designed primarily for students whose interests are not oriented toward a professional engineering career. It is a popular degree option for those preparing for careers in medicine, business, and law. Many students who are pursuing dual degree programs opt for this degree.

For more information: http://www.be.seas.upenn.edu/prospective-students/undergraduates/program-bse-bas.php

**Biomedical Science (ASBS) Major Requirements**

40.5 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook).

Chemical and Biomolecular Engineering, BSE

Chemical Engineers apply concepts from the physical sciences (chemistry and physics) and life sciences (biochemistry and microbiology) to the design and optimization of processes for the efficient production of products ranging from fuels and chemicals to pharmaceuticals to advanced materials. Penn’s chemical engineering department provides students with both a strong foundation in engineering fundamentals and exposure to modern chemical engineering technologies. The program’s versatility allows our students to excel in diverse careers in the chemical industries, research, medicine, law, government, and education.

1 Must be upper level CBE course, 300 or higher, or ENM 510 Foundations of Engineering Mathematics - I, ENM 511 Foundations of Engineering Mathematics - II.
2 One less Technical Elective required if PHYS 150 Principles of Physics I: Mechanics and Wave Motion/PHYS 151 Principles of Physics II: Electromagnetism and Radiation taken.
3 CBE 150 Introduction to Biotechnology recommended.
4 The Social Science & Humanities Depth and Writing requirements can be satisfied with the 7 total course units.

Concentrations

Students may select one of four concentrations (http://www.cbe.seas.upenn.edu/current-students/undergraduates/concentrations.php):

- Pharmaceutics and Biotechnology
- Polymer Science and Engineering
- Nanotechnology
- Environmental Engineering

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Computational Biology, BAS

The BAS in Computational Biology is an interdisciplinary area that crosses between the biological sciences, math, and computer science. More specifically, it requires that students augment a basic computer science curriculum with courses in biology, chemistry, genetics and statistics. The program is intended to train students in key areas of Computational Biology and is also designed so that a student may focus on those areas of biology in which he or she wishes to specialize. A broad background in computer science, from programming to algorithms to database systems, is also required. This program has a year-long capstone course in computational biology that is co-taught by faculty in computer science, biology and genetics. The development of Computational Biology has been influenced by various factors. One main influence derives from the need to solve problems associated with the assimilation, storage, retrieval and analysis of data arising from the Human Genome Project and similar projects that involve massive data sets containing bibliographic information, DNA sequence information and testing methods and results. The analysis of such data involves
the development and use of complex information modeling techniques, languages, visualization techniques, and computational methods. The second broad area of biology in which computational methods have for some time been used is in evolution and ecology. Many evolutionary processes when viewed from the genetic point of view involve equations of such complexity that ordinary algebraic and calculus methods are simply insufficient to solve them, and numerical methods entailing the use of a computer are necessary. The construction of phylogenetic trees of evolution has for a long time been carried out by computational as opposed to mathematical methods. Many ecological processes similarly involve such complexities that computer methods offer the only way forward. Computational Biology is a field of current interest and is essential to train computer scientists with enough knowledge of biology to be able to understand the problems and computational opportunities in this domain. Employment opportunities are excellent at major pharmaceutical companies, biotech companies and research labs.

Total Course Units 40

---

1. A CIS elective is a CIS or NETS engineering course. The SEAS handbook defines all CIS and NETS classes numbered 1XX-5XX as engineering courses, with the following exceptions that cannot be used: CIS 100 Information Technology and Its Impact on Society, CIS 101 Introduction to Computer Science: Principles of information and Computation, CIS 106 Visualizing the Past, CIS 125 Technology and Policy, CIS 160 Mathematical Foundations of Computer Science, CIS 261 Discrete Probability, Stochastic Processes, and Statistical Inference, CIS 262 Automata, Computability, and Complexity. ESE 350 Embedded Systems/Microcontroller Laboratory may be used to satisfy the CIS elective requirement. Please note: Students may count at most 1 course unit of 1XX credit as a CIS elective.

3. The Social Science & Humanities Depth, Writing & Ethics Requirement can be satisfied with the 7 total course units.

**Concentration**

Department approval is required.

Any CIS course
Any 200 level Biology course
BIOL 410 Advanced Evolution
BIOL 411 Evolutionary Ecology
BIOL 414 Advanced Ecology
BIOL 421 Molecular Genetics
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Computer and Cognitive Science, BAS

The BAS in Computer and Cognitive Science through the School of Engineering and Applied Science combines the application of theoretical insights from Computer Science, Linguistics, Neuroscience, Philosophy, and Psychology to the formal study of intelligence, perception, reasoning, and other properties of mind, and their application in the service of Information Technology. The degree combines a form grounding in relevant aspects of Computer Science, from programming to algorithms to artificial intelligence, with a concentration in specific courses from the contingent disciplines. The non-computer science courses have been selected for formal rigor and scientific relevance. The degree prepares students for a wide variety of careers in a number of distinct academic, industrial, and professional arenas relating to psychology, philosophy and linguistics. In particular, these careers pertain to the impact of knowledge and information technology on the professions, including those in Media and Communications, Software Development, and Education (among many others), in which a broad background in computer science must be combined with a deep understanding of the human mind. The BAS in Computer and Cognitive Science is intended to address the need for properly trained computer scientists who have sufficient understanding of these other disciplines to be able to solve the many open problems in applications, research, and development that must be addressed if we are to realize the full potential of information processing technologies in these domains. Employment opportunities for students going through such a program are excellent at major information technology companies, software houses, and research labs, as well as in the standard career structures in the areas identified above.

1 A CIS elective is a CIS or NETS engineering course. The SEAS handbook defines all CIS and NETS classes numbered 1xx-5xx as engineering courses, with the following exceptions that cannot be used: CIS 100 Information Technology and its Impact on Society, CIS 101 Introduction to Computer Science: Principles of information and Computation, CIS 106 Visualizing the Past., CIS 125 Technology and Policy, CIS 160 Mathematical Foundations of Computer Science, CIS 261 Discrete Probability, Stochastic Processes, and Statistical Inference, CIS 262 Automata, Computability, and Complexity. ESE 350 Embedded Systems/Microcontroller Laboratory can also be used to satisfy the CIS elective requirement. Please note: Students may count at most 1 course unit of 1xx credit as a CIS Elective.
Science labs are not required. Labs taken can be used as Natural Science credit.

The Social Science & Humanities Depth, Writing & Ethics Requirement can be satisfied with the 7 total course units.

Concentration

Department approval is required.

- Option 1: Any approved minor, or sequence of approved courses. Remaining must be Math, Natural Science or Engineering. (Minors are strongly encouraged.)

- Option 2: Any 8 course units from Math, Natural Science, Engineering, or from the following specified tech electives:

For ASCC Majors, Nat Sci may also include the following Cog Sci Courses:

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Computer Engineering, BSE

Computer Engineering is the discipline that designs and engineers computer systems from digital circuits, through compilers and runtime systems, to networking and world-wide distributed systems. As an engineering discipline, the computer engineer must appreciate the physical aspects of computations (energy, delay, area, reliability, costs) and be able to expertly navigate the multidimensional tradeoff space associated with implementing computations. Since today's high performance programmable computing devices mean enormous computational tasks can be performed entirely in software, the computer engineer must manage computational capabilities and functionalities which migrate between hardware and software driven by advancing technology and these engineering tradeoffs. Recent advances in manufacturing make it economical to construct systems containing billions of components and millions of lines of code, and these systems are increasingly invaluable in life-critical and real-time systems; computer engineering is the discipline that seeks to understand how to design and manage systems of this complexity while providing adequate guarantees of safety and trustworthiness for such systems.

Computer Science, BSE

Computer scientists and engineers have revolutionized society and created the computer and telecommunications industries that are so important to human life and the world’s economy. As a result of this revolution, expertise in computer science is essential in many new areas, including computer and network service and consulting companies, financial institutions, health industries, natural science labs and medical research labs, and other contexts where intensive manipulation of information is important. As a result, opportunities for computer scientists and engineers have expanded greatly, both in specialized fields as well as in numerous dual-career opportunities in which computer expertise is combined with advanced degrees in business, communication, engineering, law, medicine, and science.

Computer Science (CSCI) Major Requirements

40 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook).

Select 1 Social Science, Humanities, or Technology in Business & Society courses

Ethics Requirement: Select one of the following:

- EAS 203 Engineering Ethics
- EAS 303 Ethics, Social, and Professional Responsibility for Engineers
- CIS 125 Technology and Policy

Free Elective

Select 3 course units of free electives

Total Course Units

1 One approved Natural Science Lab (.5 cu) is required.
2 A limit of two freshman-level Engineering courses may be used as a Technical Elective.
3 The Social Science & Humanities Depth, Writing & Ethics Requirements can be satisfied with the 7 total course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Select one of the following CIS Project elective courses:

- CIS 330 Design Principles of Information Systems
- CIS 341 Compilers and Interpreters
- CIS 455 Internet and Web Systems
- CIS 460 Interactive Computer Graphics
- CIS 553 Networked Systems
- ESE 350 Embedded Systems/Microcontroller Laboratory
- CIS 371 Computer Organization and Design
- CIS 380 Computer Operating Systems
- CIS 400 Senior Project
- CIS 401 Senior Project
- CIS Elective

Math

- MATH 104 Calculus, Part I
- MATH 114 Calculus, Part II
- CIS 160 Mathematical Foundations of Computer Science

Select one of the following:

- CIS 261 Discrete Probability, Stochastic Processes, and Statistical Inference
- ESE 301 Engineering Probability
- ENM 321 Engineering Statistics
- STAT 430 Probability

MATH Elective

Natural Science

- PHYS 140 Principles of Physics I (without laboratory)
- PHYS 150 Principles of Physics I: Mechanics and Wave Motion
- PHYS 141 Principles of Physics II (without laboratory)
- PHYS 151 Principles of Physics II: Electromagnetism and Radiation

Natural Science/Lab Requirement

Technical Electives

Engineering Courses (required)

Select Option A or B:

Option A: Select any 4 approved minor or minor equivalent courses; or a sequence of 4 approved courses

Option B: Select any Math, Natural Science, or Engineering course or from the following list:

- LING 106 Introduction to Formal Linguistics
- PHIL 231 Epistemology
- PHIL 244 Introduction to Philosophy of Mind
- PHIL 444 Wittgenstein
- OIDD 220 Introduction to Operations Management
- OIDD 321 Introduction to Management Science
- OIDD 325 Computer Simulation Models

Social Sciences and Humanities

Select 2 Social Science courses

Select 2 Humanities courses

Select 1 Social Science or Humanities course

Ethics Requirement

EAS 203 Engineering Ethics

Free Elective

Select 3 course units of free electives

Total Course Units

1 A CIS elective is a CIS or NETS engineering course. The SEAS handbook defines all CIS and NETS classes numbered 1xx5xx as engineering courses, with the following exceptions that cannot be used: CIS 100, 101, 106, 125, 160, 261. ESE 350 Embedded Systems/Microcontroller Laboratory can also be used to satisfy the CIS elective requirement. Please note: Students may count at most 1 cu of 1xx credit as a CIS elective.

2 For CSCI Majors, Natural Science may also include the following Cognitive Science Courses: LING 250 Introduction to Syntax, PSYC 111 Perception, (these courses cannot be used by CSCI majors in the SSH category).

3 One year of laboratory course work is required which can be used as one of the 4 course units. One way to satisfy this requirement is by taking PHYS 150 Principles of Physics I: Mechanics and Wave Motion and PHYS 151 Principles of Physics II: Electromagnetism and Radiation.

4 Two of the six must be Engineering courses.

5 The Social Science & Humanities Depth, Writing and Ethics requirements can be satisfied with the 7 total course units.

Technical Electives

(Department Approval Required)

Two Engineering courses required. Remaining course can be from:

- Option 1: Any approved minor or minor equiv; or a sequence of approved courses.
- Option 2: Any Math, Natural Science, or Engineering, or the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Course Units</th>

The Digital Media Design (DMD) program is an interdisciplinary major in the School of Engineering and Applied Science at Penn. As a full-fledged Bachelors in Engineering and Science (BSE) degree, it combines major coursework in computer graphics within the Computer & Information Science Department, Communication theory courses from the Annenberg School and Fine Arts courses from Penn’s School of Design. The program was designed for students who have an interest in computer graphics, animation, games, and the design of virtual reality environments and interactive technologies. The Digital Media Design Program was established in response to what we perceived as a growing rift within the computer graphics and animation industry.

Electrical Engineering, BSE

Electrical engineering connects the physical world with the information world. Electrical engineers apply physics and chemistry in modern nanotechnology devices, encode and manipulate information in circuits and networks, and mathematically understand and reason with large amounts of data in real time. This makes electrical engineering one of the broadest forms of engineering, resulting in a multitude of possible careers. The societal impact of electrical engineering can be found in numerous domains, from smartphones, 5G wireless, and medical imaging to electric/driverless cars and the Internet of Things. Electrical engineering includes the engineering of electrons, magnets, photons, electromagnetic waves, quantum states, and electro-mechanical structures. Electrically engineering systems provide communication, sensing, actuation, display, storage, conversion, control, and computation. The electrical engineering discipline includes both the design and implementation of physical realizations (devices, circuits, antennas) and the mathematical tools for optimizing the exploitation of these systems (control theory, information theory, digital logic, signal processing).

---

1. If not taken freshman year, must be replaced by another department approved engineering course.
2. Dual Degree, Dual Major or Second Major candidates in Math or Natural Science, may use up to three Professional Electives to satisfy requirements for their second major. One freshman-level Engineering course may be used as a Professional Elective.
3. The Social Science & Humanities Depth and Writing Requirement can be satisfied with the 7 total course units.

---

**Individualized Program, BAS**

The individualized major offers an opportunity for exceptional, creative, self-motivated students to explore innovative and multi-disciplinary fields of knowledge. The individualized major is intended to foster a closer relationship between the student and the faculty advisors.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/individualized/

**Individualized Program Major Requirements**

40 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook).

Materials Science and Engineering, BSE

The Materials Science and Engineering (MSE) program reflects the explosive growth of interest in the nano and bio sectors of engineering science and technology. MSE prepares students to use fundamental scientific principles to synthesize, manipulate, design and characterize the structural and functional properties of advanced engineering materials. The program offers students advantages seldom found in other MSE programs: the opportunity to tailor the curriculum to their own interests, guaranteed research experience and an excellent student-faculty ratio.

4. The Social Science & Humanities Depth and Writing Requirement can be satisfied with the 7 total course units.
Concentrations

- Nanoscale Materials Science (http://www.mse.seas.upenn.edu/about-ugrad/ug-concentrations.php)

Note: MSE students automatically receive this concentration as the courses above are part of the MSE core curriculum.

Areas of Specialization

To develop a specialization, the faculty recommends completing 3 courses. Students are welcome to have multiple areas of specialization. At present specializations are not designated on official transcripts.

For more information, visit: http://www.mse.seas.upenn.edu/about-ugrad/ug-concentrations.php.

- Biomaterials and Biomimetics
- Electronic and Optical Materials
- Energy Conversion and Storage
- Materials Modelling and Simulation
- Product Design, Manufacturing, and Materials

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Mechanical Engineering and Applied Mechanics, BSE

Mechanical Engineering & Applied Mechanics (MEAM) is the study of forces, deformations and motions of solid bodies and fluids, heat generation and transport, and applications to analysis, design, and manufacture of components, machines, and systems. Students in mechanical engineering follow a program which contains basic groundwork in all aspects of mechanical engineering, but flexibility in the curriculum allows students to pursue elective programs in fields such as aeronautics, robotics, computers, electronics, automatic controls, and materials.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/mechanical-engineering-and-applied-mechanics/

Mechanical Engineering and Applied Mechanics (MEAM) Major Requirements

Total Course Units                                      40

1 MEAM 147 Introduction to Mechanics Lab lab is required if MEAM 110 Introduction to Mechanics is taken.
A max of (3) 100 level courses permitted.
Other Programming Courses such as CIS 110 Introduction to Computer Programming, CIS 120 Programming Languages and Techniques I, or ESE 112 Engineering Electromagnetics may be substituted for ENGR 105 Introduction to Scientific Computing. MEAM Upper Level courses include: MEAM 404 Materials in Mechanical Design, MEAM 405 Mechanical Properties of Macro/ Nanoscale Materials, MEAM 410 Design of Mechatronic Systems, MEAM 454 Mechanics of Materials, MEAM 455 Continuum Biomechanics, and all MEAM 500 Engineering Mathematics I level courses.
Professional Electives include courses from the Math, Science and Engineering categories. Up to two Professional Electives may be satisfied with advanced dual degree requirements (with approval).

The Social Science & Humanities Depth and Writing Requirement can be satisfied with the 7 total course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Networked and Social Systems Engineering, BSE

The Rajendra and Neera Singh Program in Networked and Social Systems Engineering (NETS), formerly called Market and Social Systems Engineering (MKSE), is the world’s first course of study to fully integrate the disciplines needed to design and analyze the complex networks that are reshaping our society. This program prepares students to shape the technologies that underpin Internet-based search and electronic commerce, financial networks, social networks, and even such exchanges as the power grid. Graduates of this program will be prepared to engineer networks that work for both end-users and investors. Other graduates may become the policy-makers who are urgently needed to regulate these networks for the protection of commercial property and societal good.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/networked-social-systems-engineering/

Networked and Social Systems Engineering (NETS) Major Requirements

40 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook).

consult with their academic program regarding final certifications and requirements for graduation.

**Systems Science and Engineering, BSE**

Systems Engineers provide technical management for societal-scale problems that often encompass the connections between the physical and the information world. Examples of the many cutting-edge applications include autonomous robotics, smart buildings, national power grid management, global networks, service optimization, and biological systems. Systems engineering is the set of reusable mathematics, intellectual tools, and methodology for attacking large-scale engineering problems. These common tools are adaptable for problems in different engineering domains (e.g., electrical, mechanical, biological, chemical, and computing) and help us understand, design, and manage systems that contain elements from multiple domains. Systems engineering deals with how we extract useful, abstract models from lower level systems, use these models to analyze and predict behavior, and use the analysis to control behavior and optimize/synthesize solutions.

System engineering helps us understand what happens when we compose many elements, each with their own behavior, and how to design and constrain the individual elements to engineer desired behavior for the composed system.

## Minors

- Chemical and Biomolecular Engineering, Minor (p. 192)  
- Computer Science, Minor (p. 186)  
- Data Science, Minor (p. 186)  
- Digital Media Design, Minor (p. 191)  
- Electrical Engineering, Minor (p. 190)  
- Energy & Sustainability, Minor (p. 187)  
- Engineering Entrepreneurship, Minor (p. 188)  
- Material Science & Engineering, Minor (p. 189)  
- Mechanical Engineering and Applied Mechanics, Minor (p. 189)  
- Nanotechnology, Minor (p. 191)  
- Systems Science and Engineering, Minor (p. 190)  

## Computer Science, Minor

Computer scientists and engineers have revolutionized society and created the computer and telecommunications industries that are so important to human life and the world's economy. As a result of this revolution, expertise in computer science is essential in many new areas, including computer and network service and consulting companies, financial institutions, health industries, natural science labs and medical research labs, and other contexts where intensive manipulation of information is important. As a result, opportunities for computer scientists and engineers have expanded greatly, both in specialized fields as well as in numerous dual-career opportunities in which computer expertise is combined with advanced degrees in business, communication, engineering, law, medicine, and science.

### SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: [http://www.cis.upenn.edu/current-students/undergraduate/minor.php](http://www.cis.upenn.edu/current-students/undergraduate/minor.php)

---  

1. One CIS Elective must be 200 level or above.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

## Data Science, Minor

Data Science applies core concepts in computer science, statistics and mathematics to problems in a wide variety of fields, from physical, social, biomedical, and behavioral sciences to arts and humanities. The minor targets students with strong analytical abilities and some existing programming experience, and requires courses in statistics, data-centric programming, data management, and data analysis. It also points to courses across the University that deal with data in areas of importance to Data Science.
SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

Select two Data Science electives from two of the following required categories:

1. **Data-Centric Programming**
   - CIS 110: Introduction to Computer Programming
   - CIS 120: Programming Languages and Techniques I
   - EAS 105: Introduction to Scientific Computing
   - OIDD 311: Business Computer Languages
   - STAT 405: Statistical Computing with R
   - STAT 470: Data Analytics and Statistical Computing

2. **Statistics**
   - MATH 430: Introduction to Probability
   - ESE 301: Engineering Probability
   - ESE 302: Engineering Applications of Statistics
   - ENM 321: Engineering Statistics
   - STAT 430: Probability
   - STAT 431: Statistical Inference
   - STAT 471: Modern Data Mining
   - STAT 476: Applied Probability Models in Marketing

3. **Data Collection, Representation, Management and Retrieval**
   - CIS 450: Database and Information Systems
   - CIS 550: Database and Information Systems
   - CIS 455: Internet and Web Systems
   - NETS 212: Scalable and Cloud Computing
   - NETS 213: Crowdsourcing and Human Computation
   - OIDD 105: Developing Tools for Data Access and Analysis (VBA and SQL Programming)
   - STAT 434: Financial and Economic Time Series
   - STAT 475: Sample Survey Design

4. **Data Analysis**
   - CIS 419: Introduction to Machine Learning
   - or CIS 519: Introduction to Machine Learning
   - or CIS 520: Machine Learning

5. **Modeling**
   - NETS 312: Theory of Networks
   - MKTG 271: Models for Marketing Strategy
   - OIDD 325: Computer Simulation Models
   - OIDD 353: Mathematical Modeling and its Application in Finance
   - STAT 433: Stochastic Processes
   - STAT 436: Introduction to Large-Scale Data Science

6. **Other Electives**
   - CIS 106: Visualizing the Past.
   - CIS 125: Technology and Policy

Total Course Units: 6

Approval required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

### Energy & Sustainability, Minor

The minor in Energy and Sustainability provides students with broad coverage of technical and societal issues in energy and sustainability. It is designed to help students become leaders in developing technologies for a more sustainable energy future.

---

### SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.seas.upenn.edu/undergraduate/degrees/minor-energy.php

### Energy and Sustainability Minor (ENSU)

Students participating in the minor are expected to have taken at least one semester of intro chemistry, mathematics and physics.

¹ Completion of 6 course units with a grade of "C" or better. No pass/fail permitted. All MEAM courses (except MEAM 445 Mechanical Engineering Design Projects and MEAM 446 Mechanical Engineering Design Projects) can be used. Only (2) 100 level courses are permitted. Up to (2) approved Cognate courses can be substituted with department approval from the following list: BE 200 Introduction to Biomechanics, BE 330 Soft Materials, BE 445 Engineering and Biological Principles in Cancer, BE 510 Biomechanics and Biotransport, CBE 430 Polymers and Biomaterials, CBE 535 Interfacial Phenomena., MSE 330 Self-Assembly of Soft Materials, MSE 393 Materials Selection, MSE 405 Mechanical Behavior of Macro/Nanoscale Materials, MSE 530 Thermodynamics and Phase Equilibria.

Material Science & Engineering, Minor

The Materials Science and Engineering (MSE) program reflects the explosive growth of interest in the nano and bio sectors of engineering science and technology. MSE prepares students to use fundamental scientific principles to synthesize, manipulate, design and characterize the structural and functional properties of advanced engineering materials. The program offers students advantages seldom found in other MSE programs: the opportunity to tailor the curriculum to their own interests, guaranteed research experience and an excellent student-faculty ratio.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

Approved elective lists can be found on the most recent SSE worksheet.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Total Course Units**: 6

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Electrical Engineering Minor**

Electrical engineering (EE) connects the physical world with the information world. Electrical engineers can apply physics and chemistry in modern nanotechnology devices, can encode and manipulate information in circuits and networks, and can mathematically understand and reason with large amounts of data in real time. Students can pursue an EE minor by completing six courses that includes the conception, design, analysis, and implementation of devices, circuits, and signal processing.

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.ese.upenn.edu/current-students/undergraduates/minors.php

**Electives**

Select 2 ESE Electives $^2$  

**Total Course Units**: 7.5

$^1$ Approved elective lists can be found on the most recent SSE worksheet.

$^2$ An intermediate or Advanced ESE elective can be taken with department approval.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Digital Media Design, Minor

The DMD minor is a programming-intensive exploration into interactive computer graphics. The interested student is encouraged but not required to take courses in Fine Arts (in the SEAS SSH category, for example) to gain the artistic knowledge and skills that would augment the DMD technology emphasis. Suggested relevant Fine Arts courses include Digital Design Foundations and 3D Modeling. The DMD minor also encourages exploration of the connections of computer graphics programming with human cognition and interactive experiences. A capstone EAS499 Integrative Project is required to link the DMD minor with the student’s major.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

Nanotechnology, Minor

Nanotechnology is an interdisciplinary field that underpins next generation energy, communications, and health care solutions. The Nanotechnology minor provides the foundation to contribute to these advances. The program is accessible to engineering and physical science students.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

1  Program approval required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Chemical and Biomolecular Engineering, Minor

Chemical Engineers apply concepts from the physical sciences (chemistry and physics) and life sciences (biochemistry and microbiology) to the design and optimization of processes for the efficient production of products ranging from fuels and chemicals to pharmaceuticals to advanced materials. Penn’s chemical engineering department provides students with both a strong foundation in engineering fundamentals and exposure to modern chemical engineering technologies. The program’s versatility allows our students to excel in diverse careers in the chemical industries, research, medicine, law, government, and education.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

1  The Minor in Chemical and Biomolecular Engineering consists of six engineering courses in CBE selected with the approval of the Undergraduate Curriculum chair.

Academic Opportunities

Penn Engineering offers a number of academic opportunities for undergraduate students.

Global Opportunities

Experience in an international setting is an opportunity that Penn Engineering strongly encourages students to obtain. Spending time in another country allows students to develop their intercultural abilities, and increase their independence and confidence as they immerse themselves in a new environment – all while fulfilling their major requirements. Students can study abroad for a semester or a year, take part in a Global Service Learning project, enroll in a Global Immersion Course, or complete a summer internship.

Opportunities include:

- Study Abroad
- Global Service Learning
- Global Immersion

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/study-abroad.php.

Research Opportunities

Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below you can see examples of outstanding student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, including summer and additional research programs available, visit the Penn Engineering Research section (p. 167).

Submatriculation

Penn undergraduates may begin an engineering master's program while still completing their undergraduate program via the submatriculation application procedure.

For more information, visit the Submatriculation section (p. 262).

Dual Degrees

You may combine your BAS or BSE degree with a second degree in one of Penn's other undergraduate schools. A Dual Degree is not to be confused with a Dual Major (http://www.seas.upenn.edu/undergraduate/handbook/programs/dual-majors.php), where a student earns two majors within Penn Engineering, or with a Second Major (http://www.seas.upenn.edu/undergraduate/degrees/two-majors.php) where an engineering student also earns a major within the College.

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/dual-degrees.php.
SCHOOL OF NURSING

Penn Nursing offers a number of resources and experiences not found at most other schools, including a state-of-the-art simulation lab with mannequins that respond as patients would, classrooms with the latest hospital-based electronic medical records (EMR) technology, and clinical experiences in The Children's Hospital of Philadelphia and the Hospital of the University of Pennsylvania, two of the nation's best hospitals. Penn Nursing is a premier academic and research institution renowned for advancing the frontiers of nursing science and patient care. Our students learn from the thought leaders in nursing research, education, and practice who ensure Penn Nursing remain one of the top schools of nursing in the world. At Penn Nursing, students become part of the next generation of healthcare leaders, prepared to care for patients, to conduct landmark research, and to make new strides in healthcare management and health policy.

Learn more about our history: http://www.nursing.upenn.edu/about/history/

Learn more about our school leadership: http://www.nursing.upenn.edu/about/our-leadership/

Mission

The mission of the University of Pennsylvania School of Nursing is to make a significant impact on health by advancing science, promoting equity, demonstrating practice excellence, and preparing leaders in the discipline of nursing.

Philosophy

The mission of the School of Nursing is aimed at meeting the health needs of society in a global and multicultural world. To this end, scholarship, research, education, and practice are integrated to create a culture of inquiry that values intellectual curiosity and diversity, and where faculty, clinicians, staff, and students thrive and learn from one another.

Scholarship and Research

We believe that integrating the arts and sciences is the basis for nursing knowledge and the framework for nursing practice and scholarship. Nursing knowledge encompasses empirical, philosophical, historical, ethical, and personal ways of knowing and is fundamental to the advancement of professional practice. Scholarship encompasses more than research, but also the integration of research into practice and health policy formation and the advancement and dissemination of nursing knowledge. Research is integral in every educational program and strengthened by participating in and contributing to the rich scholarly environment of the University and across national and international health policy organizations.

Nursing is scientifically based and carried out autonomously, as well as interdependently. The focus is development, dissemination, and utilization of knowledge about nursing actions that promote positive changes in patients, systems of care, and the larger society. Nurses collaborate with individuals, families, groups, communities, and other professions to achieve health and well-being for all people.

The School of Nursing is responsive to numerous influences that shape health care, including evolving models of care, consumer advocacy, demographic changes, and advances in science and technology. The faculty are committed to a scholarly agenda that pushes the boundaries of nursing science, in turn influencing education and shaping policy and practice.

Education

Education at the University of Pennsylvania facilitates the intellectual, personal and social development of students as they identify and attain academic and professional goals. Our educational environment fosters independence, ethical behavior, creative and critical thinking, increased breadth of knowledge, and sensitive interactions concerning cultures and viewpoints.

Programs, from baccalaureate to post-doctoral and lifelong learning, are enriched by the varied needs and perspectives of a culturally diverse population, as well as pressing needs for nursing leaders in a rapidly changing world. These leaders will be the clinical experts, health policy shapers, and nursing scholars of the future.

The baccalaureate program, including traditional and second degree students, focuses on professional nursing practice across the continuum of health care, with particular emphasis on vulnerable populations. The curriculum is dynamic and includes leadership skills, interdisciplinary collaboration, and content and clinical experiences that emphasize evidence-based practice. The curriculum also reflects changes in science and technology.

The Master’s programs focus on advanced practice nursing and administration, with an emphasis on specialty and subspecialty practice in concert with changing societal needs. Graduate nurses are prepared for advanced practice that creatively combines knowledge and skills in critical thinking and expert interventions across the lifespan. Special attention is given to clinical decision-making and management skills, as well as methods of evaluation of quality and cost of care.

Pre- and post-doctoral education is dedicated to advancing the discipline of nursing through research. The goal is to equip students with a foundation in nursing and a field of concentration to make substantive contributions to scholarship. Strong faculty mentorship is integral to the development of a critical cadre of future researchers, academicians, and leaders, nationally and internationally.

Practice

The primary goal of nursing practice is to optimize care and outcomes for patients and their family members. The practice of nursing is the foundation for informing educational pedagogies and for the generation of discipline-specific research. Practice is defined as the diverse and varied construction, application, and evaluation of knowledge and the action within the discipline of nursing, particularly for the recipients of nursing care. We believe it is the responsibility of academic nursing to serve as the fulcrum of modeling the intentional integration of education, research, and clinical care to improve the delivery of quality health services.

Nursing is an evidence-based, caring profession that improves the health and quality of life for individuals, families, and communities throughout the world. Nursing possesses a unique body of knowledge that guides its practice in both autonomous and collaborative health care settings. Penn Nursing serves as the model for nurses who care for society’s needs in a global and multicultural context. Thus at Penn, we seek to promote health and alleviate suffering in every part of the world by preparing nurses to be responsive to the health-related issues and preferences, values, and needs of all societies. Our goals are to improve and maintain optimal health, prevent disease, enhance the quality of recovery from illness,
and support patients and families to cope with acute and chronic health problems. Penn Nursing serves as a model to direct the advancement of the translation of evidence-based knowledge toward culturally competent models of care.

Revised Mission and Philosophy approved by the School of Nursing Faculty Senate 2/3/03.

Revised Mission and Philosophy approved by the School of Nursing Faculty Senate 5/7/12.

Revised Practice statement approved by the School of Nursing Faculty Senate 4/8/13.

Revised Mission approved by the School of Nursing Faculty Senate 10/5/15.

The Office of Nursing Research (http://nursing.livewhale.net/research/), along with our four research centers (http://nursing.livewhale.net/research/research-centers) and partnerships across Penn, provide students with resources and support that are virtually unparalleled in our field. Students, from undergraduates to doctoral students, have numerous opportunities to engage in research and work alongside some of the most recognized researchers in their fields.

For more information, visit: https://www.nursing.upenn.edu/research/.

Accreditation is a hallmark of educational quality, and we are proud to share our credentials on our website: http://www.nursing.upenn.edu/about/accreditation/.

Penn Nursing students benefit from a dual advising structure. All students are assigned a faculty advisor and have access to the professional staff advisors in the Office of Student Affairs.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/.

Curriculum

Baccalaureate Program Objectives Leveled by Year

The faculty has defined behaviors that each student must achieve before progressing to the next level. The objectives are leveled by year: level 1 references freshman year; level 2 references sophomore year, and so on. Students are encouraged to refer to these objectives at the mid-point of the semester and again at the end of the semester to actively participate in the learning and self-evaluation processes.

End of Program. Synthesize knowledge from the humanities and the natural and social sciences as the basis for continuing personal, intellectual, social, and professional development.

**Level 3.** Apply knowledge from the humanities and the natural and social sciences in the development of the role of nurse in patient care situations in acute care settings.

**Level 2.** Articulate the relevance of knowledge from the humanities and the natural and social sciences to the evolving role of the nurse.

**Level 1.** Demonstrate knowledge of the interrelationship of the humanities and the natural and social sciences as a basis for the development of nursing practice and as a source of personal development.

End of Program. As a generalist, use theoretical and scientific bases for nursing to deliver nursing care to clients as individuals, families, communities, and organizations in a variety of settings at any level of wellness, illness, and risk.

**Level 3.** Apply theoretical and scientific bases for nursing practice related to individuals and families with potential or actual health-related problems in acute care settings.

**Level 2.** Demonstrate the use of theoretical and scientific bases for nursing practice related to risk assessment and health promotion activities to individuals within selected communities and healthcare agencies.

**Level 1.** Identify theoretical and scientific bases for nursing practice.

End of Program. Apply research findings to evaluate and improve nursing care and the healthcare system.

**Level 3.** Appraise the relevance, quality, and applicability of research in decision making related to patient care.

**Level 2.** Discuss the research implications for various nursing practice environments.

**Level 1.** Recognize the relationship between research and nursing practice.

End of Program. Assume responsibility for providing nursing care in a collaborative relationship with individuals and groups in a variety of settings.

**Level 3.** Participate in providing nursing care in a collaborative relationship with individuals and families in complex healthcare settings.

**Level 2.** Participate in providing nursing care in a collaborative relationship with individuals, selected communities, and healthcare agencies.

**Level 1.** Observe the process of how nurses collaborate with individuals.

End of Program. Participate in collaborative relationships with colleagues through referral, consultation, planning, and evaluation.

**Level 3.** Initiate a collaborative relationship with colleagues to facilitate consultation, referrals, planning, and evaluation in a complex healthcare setting.

**Level 2.** Participate in a collaborative relationship with colleagues by consultation, planning, and evaluating selected communities and healthcare agencies.

**Level 1.** Identify various interdisciplinary roles in healthcare.

End of Program. Demonstrate leadership and management skills through direction and support of clients and colleagues as individuals, families, communities, and organizations.
Level 3. Integrate an understanding of leadership and management skills through the direction and support of colleagues, individuals, and families in acute care settings.

Level 2. Provide peer support and management of individual clients in selected communities and healthcare agencies.

Level 1. Define leadership and management skills using professional organizations as a model.

End of Program. Participate as an agent of change in scientific, social, and political action for the advancement of research, healthcare, and policy at any level from local to international.

Level 3. Initiate change for the advancement of research and healthcare in an acute care setting.

Level 2. Participate as an agent of change to effect modification in health promotion behavior and level of wellness in selected local communities and healthcare agencies.

Level 1. Recognize the need for change related to healthcare reform and policymaking at the national level.

End of Program. Communicate coherently, comprehensively, and systematically in written and oral forms as they pertain to nursing care, collaboration, research, and policy.

Level 3. Analyze written and oral communication patterns and recommend modification if necessary as they pertain to nursing care, collaboration, and research.

Level 2. Demonstrate therapeutic and professional oral communication with individuals, groups, and peers in selected local communities and healthcare agencies.

Level 1. Demonstrate effective written communication skills.

End of Program. Perform clinical skills appropriate to generalist nursing practice, with competence and judgment within specific settings.

Level 3. Demonstrate advanced nursing skills with competence and judgment in acute care settings.

Level 2. Demonstrate and expected level of judgment in basic nursing skills in selected communities and healthcare agencies.

Level 1. Identify components of professional nursing practice.

BSN Undergraduate Curriculum Organizing Framework and Vision

Class of 2015 and Beyond
(Accelerated BSN Class of December 2014 and Beyond)

Our Mission

Penn Nursing is committed to teach the art and science of nursing and to create opportunities for service, practice, leadership, and research. This is achieved through talented faculty, internationally recognized scholarship, respect for the diversity of our own community (of faculty, staff, and students), and a commitment to individualizing the pedagogical and material resources necessary for success.

Our Vision

Penn baccalaureate nursing graduates are broadly educated and socially engaged. They demonstrate the capacity for clinical expertise, leadership at the bedside and around the globe, and translating the science of the profession into practice. Our graduates have matured in the intellectual and social environment of both the University and the School of Nursing. This environment is built upon the values of civic engagement, critical inquiry, interdisciplinary knowledge, and the integration of research and practice. It has prepared our graduates to create and realize their own vision and ambition for themselves and their profession.

Our Values

- Respect for the diversity of individuals and their ideas
- Dedication to rigorous clinical inquiry as the basis of clinical judgment
- Commitment to collaboration with individuals, families, communities, and colleagues
- Responsible and engaged advocacy
- Recognition of the intersections of history, social context, culture, and economics in shaping a global society that seeks equity and access for all
- Respect for nursing science and its substantive contribution to health care
- Organizing Framework - One University, One School, One Curriculum

Penn's baccalaureate curriculum brings structure to the School's mission, vision, and values by centering on the primacy of nursing practice situated in caring relationships that facilitate health and healing. The baccalaureate curriculum builds on this conceptualization of nursing as it moves students toward increasingly contextualized understandings of individuals, families, communities, and populations living with health and illness. It also moves students into increasingly complex situations and care environments as they experience the dynamic nature of nursing's embeddedness in health care systems, social structures, and society.

The baccalaureate curriculum concentrates on four intersecting core themes that characterize the complex and contextual nature of nursing practice: engagement, inquiry, judgment, and voice. The competencies derived from this framework are not intended to be achieved in a sequential manner. Rather, this framework explicates competencies that are fluid, adapt to various learning experiences when presented in the curriculum, and essential to the formation of a graduate nurse's professional identity. The application of these themes is demonstrated in the following examples:

Engagement: The student understands the relationships among:

- Caring relationships with individuals, families, and patient populations
- Collegial intra-disciplinary, interdisciplinary, and multidisciplinary collaborative relationships
- Observer and participant in policies and politics
- Situational advocacy and civic commitment to social and political change

Inquiry: The student understands the relationships among:

- Knowledge use, acquisition, and development
• Scientific ways of knowing patients and families and multidimensional and contextual ways of knowing
• Knowledge and implementation of humanistic understandings in practice and research
• Evidence-based practices and the social and political processes of practice with less clear scientific rationales
• Knowledge of how to use and manipulate technological information systems to acquire meaningful data
• Knowledge use and ongoing clinical knowledge development
• Measures of quality in clinical care environments

Judgment: The student understands the relationships among:

• Acquisition of knowledge and skill and the integration of both within relational practices with individuals, families, communities, populations, and healthcare systems
• Knowledge of individuals and families and collective knowledge about communities, populations, and systems
• Core nursing knowledge and integrated knowledge
• Situated judgment and clinical know-how

Voice: The student understands the relationships among:

• Observer, advocate, and moral agent
• Facilitation of patient and family learning and advocacy affecting social and political practices
• Informal methods of dialogue, discourse, and debate and those necessary for formal writing and publication and for joining a community of scholars
• Vision for self and the profession

More information including individual course requirements can be found in the BSN Handbook (http://www.nursing.upenn.edu/live/files/172-bsn-handbook.pdf).

Students who are receiving their second bachelor’s degree in nursing (known as “second degree students” or “BSN/MSN students”) are not required to complete the liberal arts component while at Penn. All plans of study include an 11 c.u. waiver for liberal arts requirements because students who have already completed one undergraduate degree are exempt from all sector requirements, the language requirement, the writing requirement, and free electives. If you have questions regarding your plan of study or the requirements specific to your program, please reach out to the Office of Academic Affairs: http://www.nursing.upenn.edu/student-services/advising/.

Majors

• Nursing, BSN (p. 196)
• Nutrition, BSN (p. 199)

Nursing, BSN

Penn Nursing combines the resources and opportunities of a large university with the intimacy and personal attention of a small college. Our traditional four-year BSN is a direct-entry program for graduating high school seniors.

At Penn Nursing, you will learn from a passionate faculty (http://www.nursing.upenn.edu/about/our-faculty) whose accomplishments are recognized worldwide. You will benefit from the academic opportunities (http://www.nursing.upenn.edu/academics/bachelor-of-science-in-nursing-bsn) of an Ivy League university while enjoying a fun and fulfilling campus life (http://www.nursing.upenn.edu/about/our-students/student-life). You will gain clinical experience (http://www.nursing.upenn.edu/practice/practice-partners) in some of the nation’s top hospitals, located just steps from your classrooms. And you will have the chance to participate in faculty-driven research (http://www.nursing.upenn.edu/research), supported by state-of-the-art technology (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/learning-through-simulation). Penn Nursing graduates are the leaders shaping the future of health care practice, policy, research, and education.

The nursing program begins in your freshman year with a combination of science, nursing, and liberal arts courses, and students are encouraged to take advantage of our flexible curriculum and take courses offered within Penn’s four undergraduate schools. Clinicals begin in the spring of your sophomore year, and students will have experiences in primary care, acute care, women’s health, and mental health settings working with patients from newborns to older adults.

Course Units 5.5

Spring
NURS 245 & NURS 255 Nursing of Young and Middle Aged Adults and Nursing of Older Adults 3

The Nursing Case Study can be taken during the junior or senior year (following completion of NURS 164 Integrated Human Anatomy, Physiology & Physical Assessment II). Only one course is required from the case study group. The Nursing Elective can be taken earlier in the plan of study depending upon the course selected.

Students must consult with an academic advisor prior to making revisions to the plan of study to ensure that the necessary curricular requirements are being met and to prevent delays in academic progression.

The following sample Plan of Study is just one possibility for second-degree students, and individual plans depend on what prerequisites students have fulfilled prior to matriculating at Penn. This plan may not be compatible with several academic options you might choose (e.g., submatriculation, study abroad, minors, etc.). If you are interested in pursuing any of the special academic options available to you during the course of your undergraduate experience and want to know how this will alter your plan of study, please contact your faculty advisor and/or the Office of Student Services at 215-898-6687 or advisor@nursing.upenn.edu. Please note that all plans of study are subject to curricular change.
Select one of the following Health Care Ethics courses:

| NURS 389 Research/Inquiry-Based Service Residency | 0.5 |
| NURS 390 Leadership in the Complex Healthcare System | 3 |
| Nursing Case Study 1, 2 | 1 |
| Choose one Nursing elective 1, 2 | 1 |

| Summer |  
| --- | --- |
| NURS 380 Nursing in the Community | 2 |

Total Course Units 40.5

1 There is some flexibility as to when these courses can be taken (fall vs. spring). Please consult with an advisor about your options and course offerings.

2 See the BSN Handbook (https://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf) for an approved list of courses.

Notes

1. All plans of study are subject to curricular change. Students must consult with an academic advisor prior to making revisions to the plan of study to ensure that the necessary curricular requirements are being met and to prevent delays in academic progression.

2. Clinical experiences may include evenings, weekends, and 12 hour shifts. Most clinical rotations are accessible by public transportation; however a car may be necessary for transportation to some clinical sites.

3. Course work outside the School of Nursing is not permitted, with the exception of approved non-nursing courses for the Health Care Ethics and Health Policy requirements.

4. 5.5 course units is the maximum course load for undergraduate nursing students. Students who wish to exceed this limit must seek approval from the Office of Student Services prior to the advance registration period for the semester in question. If approved, the Office of Student Services will increase the maximum course load accordingly in Penn in Touch.

### Nutrition, BSN

Our Bachelor of Science in Nutrition major is an interdisciplinary collaboration with Penn’s School of Arts & Sciences. You will study concepts like dietary behaviors and metabolism, as well as scientific approaches to the physiological roles of nutrients in the diet, from the cellular to human level. You will explore the role of nutrition in cancer, cardiovascular diseases, diabetes, and obesity, which together account for nearly seventy percent of global mortality. We believe that the next generation of nurse researchers and clinicians need a well-rounded background in nutrition science, social sciences, and public health, and we built this innovative program with these goals in mind.

The major consists of 14 course units: six basic science courses (such as cellular biology, anatomy and physiology, and chemistry), four fundamental nutrition science courses, and four electives. Penn Nursing BSN undergrads can add this as a second major.

For more information: https://www.nursing.upenn.edu/nutrition-major/

Minors

- Global Health, Minor (p. 200)
- Health Communications, Minor (p. 200)
- History, Health and the Humanities, Minor (p. 201)
- Nursing and Health Services Management, Minor (p. 201)
- Nutrition, Minor (p. 201)

BSN students are also eligible to complete no more than half of an MSN minor while enrolled as an undergraduate student. For more information, visit: https://www.nursing.upenn.edu/academics/master-of-science-in-nursing-msn/minors/.

Global Health, Minor

This minor offers students the option to focus their studies on the domestic or international level. Opportunities are provided via clinical experiences, and students gain advanced multicultural knowledge and skills. It is our goal that graduates will rise to professional leadership roles, serving as catalysts to disseminate new research and clinical skills as they work among diverse social and cultural groups.

For more information: https://www.nursing.upenn.edu/global-health-minor/

The Global Health Minor requires a total of 6 course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Health Communications, Minor

The Health Communication minor is a collaboration between the School of Nursing and the Annenberg School for Communication. This program expands students’ knowledge of the communication process, theory, and behavior, and it prepares them for roles as professionals who develop cutting edge models for health behavior intervention or implement patient education and health communications programs locally, nationally, and globally.

History, Health and the Humanities, Minor

A number of universities have forged bridges between the humanities and sciences to nourish students intellectually, build self-awareness, consider social justice-related phenomena through a new lens, and help them develop empathy. The School of Nursing has launched a new minor in History, Health and the Humanities for undergraduate students. This innovative initiative provides students with the tools and perspectives to study clinical issues in ways different than the lens provided by natural or social sciences. It amplifies the humanities component of the Judgement, Inquiry, Voice, and Engagement pillars that define the “Penn Advantage.” It offers formalized opportunities for writing, both reflective and analytical, beyond that available in the required nursing curriculum.

Student enrolled in this minor will be considered Bates’ Center associates and will be invited to lunches, dinners, and other events with visiting scholars and faculty.

For more information: https://www.nursing.upenn.edu/academics/bachelor-of-science-in-nursing-bsn/minors/

The History, Health and the Humanities Minor requires a total of 6 course units.

For more information contact the director of the History, Health and the Humanities minor, Cynthia Connolly PhD RN FAAN at cac1@nursing.upenn.edu.

Total Course Units 6

1 At least 1 elective course must be in the School of Nursing.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Nursing and Health Services Management, Minor

The delivery of health care increasingly involves decisions that entail considerations beyond clinical or medical issues. With the rise of managed care in the United States, it is critical for health professionals to understand not only the clinical factors that affect patients but also the business environment in which healthcare institutions function. This program, a partnership between the School of Nursing and The Wharton School, helps students understand both the nature of the economic and managerial constraints that healthcare organizations face, and how to effectively manage these constraints to provide the best possible health care for patients.

For more information: http://www.nursing.upenn.edu/nursing-and-health-services-management-minor/

The Nursing and Health Services Management Minor requires a total of 8 course units.

---

**Academic Opportunities**

Penn Nursing offers a wide variety of supplemental academic opportunities designed to enhance your academic experience and professional development.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/opportunities/.

**Benjamin Franklin Scholars Program - Nursing** (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program)

The Benjamin Franklin Scholars (BFS) Program for Nursing (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program) seeks to foster the development of the next generation of nurse achievers - scholars, leaders, and researchers - through intellectual rigor, academic excellence, and outstanding achievements. Scholars are required to complete four Benjamin Franklin Seminars - small, intensive classes in a wide range of disciplines across the liberal arts and sciences - and a Capstone Honors course in the Nursing school.

**Dual Degrees** (http://www.nursing.upenn.edu/academics/dual-degrees)

We recognize the value of interdisciplinary learning, which is why student at all levels - undergraduate, masters, and doctoral - can pursue a dual degree with other schools across campus. Our Dual Degree (http://www.nursing.upenn.edu/academics/dual-degrees) page provides a complete listing of our approved programs.

**Global Opportunities** (http://www.nursing.upenn.edu/global-health/student-opportunities)

Penn Nursing offers a variety of international experiences for students in the BSN and MSN programs, which range from short-term opportunities that focus on comparative healthcare in international contexts, to full-semester clinical experiences.

**Hillman Scholars Program in Nursing Innovation** (http://www.nursing.upenn.edu/academics/accelerated-options/bsn-phd-hillman-scholars)

The Hillman Scholars Program in Nursing Innovation (http://www.nursing.upenn.edu/academics/accelerated-options/bsn-phd-hillman-scholars) is an integrated BSN-to-PhD program designed to educate a new cadre of nurse scientists and leaders to develop innovative solutions in healthcare. The program is available for current Penn Nursing undergraduate students, as well as students applying to the Accelerated Second Degree BSN program.

**Minors** (p. 200)

Penn Nursing offers a variety of minors in such in-demand areas as global health, palliative care, health services management, and oncology. Adding a minor allows students to complement their major by diving more deeply into a specific area of inquiry.

**Nutrition Major** (p. 199)

Our Nutrition major (http://www.nursing.upenn.edu/nutrition-major) is an interdisciplinary collaboration with Penn’s School of Arts & Sciences. You will study concepts like dietary behaviors and metabolism, as well as scientific approaches to the physiological roles of nutrients in the diet, from the cellular to human level.
Research Opportunities (http://www.nursing.upenn.edu/research/student-research)

Students have numerous opportunities to engage with research at Penn Nursing, whether that means participating in one of the school-supported research centers, applying for a prestigious fellowship through the Center for Undergraduate Research and Fellowships (http://www.upenn.edu/curf) (CURF), or working one-on-one with a faculty mentor on a student-driven research project.

Submatriculation (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/submatriculation)

One of the most popular options at Penn Nursing, submatriculation allows undergraduate students the opportunity to apply to a graduate program and begin coursework while completing the BSN degree. Students can apply to any of the MSN / DNP majors (http://www.nursing.upenn.edu/academics) here at Penn Nursing, or to Penn Law.

School Policies

The majority of Penn Nursing policies can be found in the Policies and Procedures (p. 265) section of the Catalog.

The following additional policies apply specifically to School of Nursing students:

• Statement of Personal Attributes and Capabilities (https://www.nursing.upenn.edu/live/files/218-statement-personal-attributes-and-capabilities)

The curricula leading to degrees in nursing require students to engage in diverse and complex experiences directed to the practice, refinement and full acquisition of essential nursing competencies and functions. Unique combinations of cognitive, behavioral, sensory, communication, psychomotor, and communication abilities are required to perform these functions in a satisfactory manner and to consistently demonstrate these competencies. In addition to being essential to the successful completion of the requirements for the respective nursing degree, these competencies and functions are necessary to ensure the health and safety of patients, fellow students, faculty and other health care providers. This statement describes the minimum competencies and functions necessary for entrance to, continuation in, and graduation from the nursing degree programs of the School of Nursing at the University of Pennsylvania. Candidates for nursing degrees must be able to meet these minimum standards with or without reasonable accommodation.

• Student Social Media Policy (https://www.nursing.upenn.edu/live/files/217-student-social-media-policy)

This document serves as the official policy for student use of social media at the SON. These guidelines apply to all students creating or contributing to any kind of social media affiliated with the SON. Please check back periodically to make sure you're up to date. We trust that you will adhere to these policies. If, for any reason an incident occurs that violates the policy, we expect you to bring it to our attention immediately so we can work together toward a resolution.

• Student Substance Abuse Policy (https://www.nursing.upenn.edu/live/files/219-student-substance-abuse-policy)

The School of Nursing recognizes the importance of educating its students about the problems of substance abuse because this significant health risk, and in many cases, criminal matter, is unfortunately prevalent among healthcare providers. Aside from impacting upon the personal and psychological integrity of the abusers, substance abuse may significantly impact the ability of healthcare providers to administer safe, competent patient care. Recognizing that substance abuse is both a disease and a professional hazard, the School of Nursing has incorporated substance abuse topical content areas into its curriculum. The School of Nursing has likewise established this substance abuse policy.

This policy impacts upon and augments the student’s ability to maintain personal and professional integrity, and facilitates the student’s success both clinically and didactically. It promotes a healthy learning environment for the student. In the clinical setting, this policy enhances patient safety. It also fosters the development of professional nurses who are well educated about the prevalence and adverse outcomes of substance abuse.
THE WHARTON SCHOOL

In 1881, American entrepreneur and industrialist Joseph Wharton established the world’s first collegiate school of business at the University of Pennsylvania.

Wharton’s pioneering vision was to produce graduates who would become “pillars of the state, whether in private or in public life.” The Wharton School maintains a long tradition of educating visionary business leaders in academia, business, government, and not-for-profit organizations.

Today, Wharton has expanded the scope of this vision to become the most comprehensive source of business knowledge in the world — with over 225 faculty members, 95,000 alumni, 5,000 students across 10 academic departments, 20 research centers, and more than 9,000 executive education participants annually.

Learn more about our history: https://www.wharton.upenn.edu/about-wharton/

Learn more about our school leadership: https://www.wharton.upenn.edu/senior-leadership/

Founded in 1881 as the first collegiate business school, the Wharton School (https://www.wharton.upenn.edu) of the University of Pennsylvania is recognized globally for intellectual leadership and ongoing innovation across every major discipline of business education. With a broad global community and one of the most published business school faculties, Wharton creates economic and social value around the world. The School has 5,000 undergraduate (https://undergrad.wharton.upenn.edu), MBA (https://mba.wharton.upenn.edu), executive MBA (https://executivemba.wharton.upenn.edu), and doctoral (https://doctoral.wharton.upenn.edu) students; more than 9,000 participants in executive education (http://executiveeducation.wharton.upenn.edu) programs annually and a powerful alumni network (https://alumni.wharton.upenn.edu) of 95,000 graduates.

Research provides an individualized method of learning and an in-depth treatment of a topic of personal interest with input from a faculty expert. Research experience is helpful if applying for distinguished international fellowships and is important if going on to graduate studies in an analytical discipline. Research skills are useful for decision-making in the private and public sectors and are required in academic positions. Below you can find a variety of research opportunities and scholarship programs.

• Courses (https://undergrad-inside.wharton.upenn.edu/research/courses)—Create “tools” in a research-methods course.
• Research assistantships (https://undergrad-inside.wharton.upenn.edu/research/assistantships)—Learn by executing research-related tasks while working on a project for a faculty member.
• Summer programs (https://undergrad-inside.wharton.upenn.edu/research/summer-programs)—Gain hands-on experience from proposal to presentation through a project commensurate with program duration.
• Scholars programs (https://undergrad-inside.wharton.upenn.edu/scholars-programs)—Gain hands-on, in-depth experience from proposal to presentation via a senior thesis and other activities.

• Wharton PhD Submatriculation Program (http://doctoral-inside.wharton.upenn.edu/submatriculation)—Submatriculate into a PhD program in Accounting, Finance, Health Care Systems, Insurance and Risk Management, Management, Marketing, Operations and Information Management, Business and Public Policy, or Statistics.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/research/.

The University of Pennsylvania Wharton School is accredited by AACSB – the International Association for Management Education.

1916: AACSB founded initially as the Association of Collegiate Schools of Business (ACSB); constitution is adopted June 17, 1916. Founding members include the following: Columbia University • Cornell University • Dartmouth College • Harvard University • New York University • Northwestern University • Ohio State University • Tulane University • University of California, Berkeley • University of Chicago • University of Illinois • University of Nebraska • University of Pennsylvania • University of Pittsburgh • University of Texas • University of Wisconsin—Madison • Yale University

For more information, visit: http://www.aacsb.edu/.

The goal of the Wharton Undergraduate Division academic advising team is to help students make informed decisions about their educational plans and professional/life goals that are consistent with their interests, abilities, and values.

Advising by appointment, walk-in advising, and specialized advising (https://undergrad-inside.wharton.upenn.edu/advising-services/#specialized_advising) are services available in G95 Huntsman Hall to current Wharton undergraduate students.

Professional advisors (https://undergrad-inside.wharton.upenn.edu/advising-services), concentration advisors (https://undergrad-inside.wharton.upenn.edu/concentration-advisors), and peer advising fellows (https://undergrad-inside.wharton.upenn.edu/peer-advising) are available to assist students.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/advising-services/.

Curriculum

All Wharton single-degree undergraduate students must complete a minimum of 37 course units and meet the curricular requirements described below. Students enrolled in a coordinated dual-degree (https://undergrad-inside.wharton.upenn.edu/coordinate-dual-degree) program should check with their program advisor to learn about their unique requirements. For a Wharton single-degree undergraduate student, the standard course load is 4 to 5 CUs per semester (see a sample course sequence (https://undergrad-inside.wharton.upenn.edu/sample-curriculum-2017)).

The requirements of the Wharton single-degree curriculum are delineated on the academic planning worksheet (https://undergrad-inside.wharton.upenn.edu/download/academic-planning-worksheet-2017/?wpdmdl=3785). Details about these requirements are available via the links below.

Students are encouraged to see an academic advisor (https://undergrad-inside.wharton.upenn.edu/advising-services) for any questions about the requirements of their academic program.
First-Year Foundations

Economics
- Select 1 of the following: MATH 104 or MATH 110

Math

Business Leadership Journey
- 3 required courses: WH 101, WH 201, WH 301
- 1 senior capstone course or project

Business Fundamentals
- 11 required courses: ACCT 101, ACCT 102, BEPP 250, STAT 101, STAT 102, FNCE 100, FNCE 101, LGST 100 or LGST 101, MGMT 101, MKTG 101, OIDD 101

Business Breadth

Concentration (Business Depth)
- 4 required course units

Global Economy, Business, and Society
- 1 required course unit

Technology, Innovation, and Analytics
- 1 required course unit

Liberal Arts & Sciences

Cross-Cultural Perspectives
- 3 required course units

Foreign Language Requirement

General Education Distribution
- 6 required course units with at least 1 course unit in each of the following categories:
  - Humanities
  - Natural Science, Math, and Engineering
  - Social Science

Writing
- 1 required course: Critical Writing Seminar

Unrestricted Electives
- 5 required course units

Concentrations

All students graduate from Wharton with a Bachelor of Science in Economics; however, each student is required to choose a concentration, which consists of four upper-level courses that explore a particular area of business in depth.

- Accounting, BS (p. 206)
- Actuarial Science, BS (p. 206)
- Behavioral Economics, BS (p. 207)
- Business Analytics, BS (p. 208)
- Business Economics and Public Policy, BS (p. 209)
- Environmental Policy & Management, BS (p. 210)
- Finance, BS (p. 211)
- Global Analysis, BS (p. 212)
- Health Care Management and Policy, BS (p. 213)
- Individualized, BS (p. 214)
- Legal Studies & Business Ethics, BS (p. 215)
- Management
  - Entrepreneurship and Innovation Track, BS (p. 217)
  - General Track, BS (p. 218)
  - Multinational Management Track, BS (p. 219)
  - Organizational Effectiveness Track, BS (p. 220)
  - Strategic Management Track, BS (p. 221)
- Managing E-Commerce, BS (p. 222)
- Marketing & Communication, BS (p. 223)
- Marketing & Operations Management, BS (p. 224)
- Marketing, BS (p. 225)
- Operations, Information & Decisions
  - Decision Processes Track, BS (p. 226)
  - General Track, BS (p. 227)
  - Information Systems Track, BS (p. 228)
• Operations Management/Management Science Track, BS (p. 229)
• Real Estate, BS (p. 230)
• Retailing, BS (p. 231)
• Social Impact & Responsibility, BS (p. 232)
• Statistics, BS (p. 233)

**Accounting, BS**

Although strong quantitative skills and attention to detail are important qualities for an accounting concentration, students need to acquire other skills as well. Many students find the accounting concentration to be useful preparation for careers in consulting, investment banking, general management, public accounting, and securities analysis.

For more information: https://accounting.wharton.upenn.edu/

</table>

**Total Course Units**

1 For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2 Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Actuarial Science, BS**

Actuarial science stands at the intersection of risk and money. Actuaries are experts in evaluating the likelihood and financial consequences of future events, designing creative ways to reduce the cost of undesirable events, and decreasing the impact of tragic events that do occur. They are in great demand by insurance companies, consulting firms, and financial institutions.
This concentration provides an intriguing blend of mathematics and business management for students with a strong mathematics aptitude. Ideally, students graduating from Wharton with an actuarial science concentration will be prepared to pass or will have passed many of the professional examinations given by the Society of Actuaries or the Casualty Actuarial Society.

For more information: https://statistics.wharton.upenn.edu/programs/actuarialprogram/

### Actuarial Science Concentration

2 Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Behavioral Economics, BS

This new collaborative field, behavioral economics, has provided an understanding of how people’s decisions deviate from “optimal” choices and the consequences of such deviations for consumers, managers, firms, and policy. This joint concentration between the Operations, Information, and Decisions Department and the Business Economics and Public Policy Department explores the behavioral aspects of economics and decision making.

This concentration provides students with the opportunity to develop an understanding of (a) the rational actor model, (b) modifications to that model that reflect the psychology of human behavior, and (c) implications of those modifications for decision-makers, markets, and public policy.

For more information: https://bepp.wharton.upenn.edu/programs/undergraduate/program-information1/behavioral-economics/

# Business Analytics, BS

The Business Analytics joint concentration between the OID and STAT departments is designed to build deep competency in the skills needed to implement and oversee data-driven business decisions, including (i) collecting, managing, and describing datasets, (ii) forming inferences and predictions from data, and (iii) making optimal and robust decisions. Business analytics makes extensive use of statistical analysis, and the applications of business analytics span all functional areas.

Students choosing the Business Analytics concentration are ideally suited for the growing set of careers broadly defined under the header of “data science” with responsibilities for managing and analyzing data. In addition, the concentration provides an excellent complement to students who choose to focus on one of the functional areas of business (e.g., accounting, finance, marketing, operations).

For more information: [https://oid.wharton.upenn.edu/programs/undergraduate/business-analytics-joint-concentration/](https://oid.wharton.upenn.edu/programs/undergraduate/business-analytics-joint-concentration/)

### Business Economics and Public Policy, BS

The Business Economics and Public Policy concentration offers a wide range of courses for students interested in the role of economics in business, competition and public policy. Our courses specialize in market structure and competition, insurance and risk management, behavioral economics, energy, public finance, business & international politics, and business and development. A concentration in Business Economics and Public Policy is vital for students planning a career in consulting, the public sector, industries with a high social impact factor, and anyone with a general interest in how economics interacts with law, policy, and politics.

1 For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2 Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Environmental Policy & Management, BS

The concentration in environmental policy and management examines the relationship between business and the natural environment, including human health and safety as well as addressing a range of policy issues. This concentration provides an in-depth foundation for those interested in pursuing careers in the growing environmental sector of the economy, whether in private business, government, or environmental consulting. It takes an interdisciplinary approach, drawing on faculty and courses from several Wharton departments.
Students are encouraged to pursue additional coursework on environmental and technological risks in parallel with the Wharton program through the School of Arts and Sciences and the School of Engineering and Applied Science.

### Finance, BS

The finance concentration develops the skills necessary to work at a high level of expertise in all areas of finance, including:

- Asset management
- Commercial and investment banking in an international context
- The financial management ("treasury function") of commercial and industrial enterprises and of financial institutions
- The financial aspects of venture capital, mergers, and acquisitions
- Most aspects of management consulting in both domestic and international sectors

Concentrating in finance also equips students well for careers in law and government in addition to the private sector.

Global Analysis, BS

The global analysis (GLAN) secondary concentration permits Wharton students to extend their understanding of the global economy as it applies to firms. One may think of it as a broad concentration in international business.

For more information: https://undergrad-inside.wharton.upenn.edu/concentrations/glan/

Health Care Management and Policy, BS

The concentration in health care management and policy focuses on the management, financing, and economics of the health care sector. Students learn about health care markets and factors that significantly influence decision making both at the policy level and at the level of the firm or organization. The health care sector includes government agencies, non-profit institutions, major private corporations, medical practices and partnerships, and many small and early-stage health care service and product firms.

This concentration prepares students for careers as managers in health care companies or health care service firms such as consulting, banking or health care IT companies, or government agencies. Students planning careers in the health professions such as medicine, nursing, or dentistry have found the concentration very useful in understanding the context in which they will be working.

### Additional Requirements

- **Second semester-level Foreign Language**
- **PennSTART**

### Business Breadth (non-concentration courses)

Total Course Units: 33

1. For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2. Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Individualized, BS

Students have the option to design an individualized concentration if they cannot find a standard concentration that aligns with their interests. An individualized concentration consists of four CUs that are united by a common theme. An established concentration may also be tailored, with approval from the concentration advisor, to specific student interests by replacing a required course with one not on the list of courses that traditionally defines the concentration.

Students should note that (1) at least three of the courses must be business courses, and (2) a faculty member from the Wharton academic department most closely associated with the individualized concentration must sign off on the proposal.

Students who wish to pursue an individualized concentration should complete the following steps:

1. Consult with an academic adviser in the Undergraduate Division to discuss your proposal prior to submission.
2. Fill out the Individualized Concentration Proposal form.
3. Submit the completed form to the front desk in the Wharton Undergraduate Division (G95 Huntsman Hall).

For more information: http://undergrad.wharton.upenn.edu/academics/

¹ For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

² Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Legal Studies & Business Ethics, BS

The Legal Studies and Business Ethics Concentration focuses on the social values, moral concerns, and legal considerations that are essential aspects of business decision making in our global market system. The courses students take in this program help them explore how responsible business leaders can engage ethically and effectively with diverse cultures, corporate stakeholders, government regulators, and legal systems. Of special value to students seeking to broaden their business education, this concentration will help them acquire essential, non-quantitative reasoning skills that are required when leaders face difficult choices under conditions of empirical uncertainty and/or moral ambiguity – a frequent occurrence in fast-moving market economies.

Students pursuing this concentration will gain a number of analytic skills, including:

- Identifying moral and legal issues hidden within complex, culturally rich fact patterns
- Reasoning from moral principles to specific ethical and legal conclusions
- Reasoning by analogy between like cases and situations
- Arguing from authoritative rules and precedents to specific, logically consistent recommendations for action

1 MGMT 235 Technological Innovation and Entrepreneurship is open to M&T students only.

2 Students may petition to substitute other courses toward the requirements of the major. Such requests will be expected to demonstrate that the student is pursuing a coherent plan of entrepreneurship and innovation studies at Wharton. Petitions should be sent in writing to the Entrepreneurship and Innovation academic advisor, Nellie Gaynor at nelliebk@wharton.upenn.edu. Other courses cannot exceed 1.0 cu equivalent of Wharton coursework. Only 1 cu of Independent Study Project or Advanced Student Project including Global Modular Courses or MKTG890, Global Consulting Practicum, can be counted toward the major and must have approval by the department.

Management: Multinational Management Track, BS

The specialization in Multinational Management provides students with the toolkit to understand how global economic, political, and social forces influence the competitive environment of the firm. Topics include international trade, foreign investment and acquisitions, stakeholder engagement, political risk, foreign market entry, global teams, and global strategy. Students will learn how to evaluate the international environment and to operate in an increasingly complex global business landscape that shapes a variety of industries (e.g., consulting, financial services, real estate, social enterprise) and functions (e.g. strategic, technological, general or project management, business development, communications or marketing) at companies both large and small.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Management: Organizational Effectiveness Track, BS

A concentration in management prepares students to take on major managerial challenges and responsibilities in private, public, and nonprofit organizations. Students can pursue a general management concentration or choose from specialized tracks in strategic management, multinational management, organizational effectiveness, and entrepreneurship and innovation.

For more information: https://mgmt.wharton.upenn.edu/programs/undergraduate/management-specializations/organizational-effectiveness/

Managing E-Commerce, BS

The secondary concentration in electronic commerce is intended to complement primary concentrations by providing students with an additional capability to understand, analyze, and participate in electronic commerce and electronic business activities in new and established firms. To pursue the concentration in electronic commerce, students must have also declared a primary concentration.

---

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

### Marketing & Communication, BS

Marketing professionals must understand the communication process and the most effective methods of conveying information, regardless of whether they intend to focus on advertising, the development of web-based initiatives, or the conduct of market research. Students in this dual concentration will augment their understanding of the core concepts taught in their marketing courses and be better prepared for employment or graduate study. The dual concentration in marketing and communication allows Wharton students concentrating in marketing to take four courses in the Annenberg School of Communication and have this cluster of courses recognized on their transcript as a second concentration.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Marketing & Operations Management, BS

The Marketing and Operations Management joint concentration emphasizes the importance of partnership between marketing and operations for new product development (NPD) in light of the fact that NPD is a critical company effort highly dependent on internal innovation processes. Given the complexity of these processes, the insights provided by cross-disciplinary collaboration can be particularly beneficial in many efforts, including:

- Creativity-based new product development
- Innovation in service manufacturing and new service development
- Customer response to next-generation products
- The use of conjoint analysis in engineering designs
- Platform-owner market entry
- Design-intensive innovation

Marketing, BS

Students pursuing a concentration in marketing acquire a solid grounding in applying the basic disciplines (e.g., psychology, economics, statistics) essential for understanding consumer and organizational buying patterns and developing successful marketing strategies. They also gain practical experience applying these concepts and methods via half-semester mini-courses (e.g., new product development, advertising, retailing). Many students with a marketing concentration have gone on to work in brand management, advertising, sales, marketing research, consulting, and entrepreneurial ventures.

### Operations, Information & Decisions: Decision Processes Track, BS

The Decision Processes (DP) track establishes rigorous scientific foundations for describing, predicting, and improving the processes through which individuals and groups collect data and information, form decisions, and make choices that result in outcomes of interest. Students build the mathematical and statistical skills needed to analyze data and make decisions, and they learn about the technology and data management systems used in the workplace. Students also learn how to work in teams and in interdisciplinary ways to make decisions that are of value to both the business community and society.

judgments, and make decisions. This program examines descriptive theories and empirical research on human behavior that identify systematic biases in judgment and heuristics, or rules of thumb, that individuals and groups use to cope with complex decision-making and negotiations environments. It also examines the ways in which individuals and groups can make better decisions given their biases and information-processing limitations.

1 For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2 Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Operations, Information & Decisions: General Track, BS

Computer-based management systems and analytic approaches to decision making are increasingly vital to effective management in a range of industries across public and private sectors. As organizations develop and implement sophisticated decision-support systems, they increase the demand for managers who have the expertise to understand, create, and profitably exploit rapidly developing management technology. There is also a growing demand for skilled professionals who can effectively manage the operations encompassing the manufacturing and distribution of products and services.

The Operations and Information Management curriculum prepares students to meet these challenges by providing a rigorous foundation of coursework across different but complementary disciplines, including decision processes, information systems, and operations management/management science.

### Operations, Information & Decisions: Information Systems Track, BS

The Information Systems track is designed to provide the necessary understanding of both technical and business issues relating to information systems. The program is ideal for students interested in managing information technology, either as a technologist, a general manager, or a consultant in technology-intensive industries. The program also provides a good supplement to engineering or other technologically-sophisticated students who wish to obtain greater exposure to managerial issues or students in finance or management who wish to better understand the role of technology in their core disciplines.

### Operations, Information & Decisions: Operations Management/Management Science Track, BS

The Operations Management / Management Science track addresses central issues necessary to understand production and service operations in today's global economy. This program provides a rigorous foundation for immediate careers in consulting and analytic strategy support for companies, as well as future graduate studies in economics and business. The courses allow students to build a fundamental understanding of the tradeoffs to consider when managing the development of products and services, as well as the operations used to produce them and fulfill customer requirements.

The need to effectively manage the production of goods and services has also sparked the development of a number of useful mathematical tools. Besides their direct application to operational problems, these management science techniques have been broadly applied to a wide variety of other economic activities, from the pricing of financial instruments to decisions concerning markdown policies in retailing. For more information: https://oid.wharton.upenn.edu/programs/undergraduate/operations-management-management-science-track/

Real Estate, BS

The real estate concentration consists of one required course (REAL 209: Real Estate Investment: Analysis and Financing) and three electives. While the required course focuses on real estate finance, the electives allow students to explore a variety of issues related to real estate. These include real estate development, the legal aspects of real estate investment and financing, and the relationship between government policy and real estate development.

For more information: https://real-estate.wharton.upenn.edu/programs/undergraduate/undergraduate-concentration/

Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Retailing, BS

The secondary concentration in retailing provides an interdisciplinary overview of the retailing industry, combining courses in core retailing skills with industry-relevant electives from Wharton and the College of Arts & Sciences.

For more information: https://marketing.wharton.upenn.edu/programs/undergraduate/retailing-secondary-concentration/

### Social Impact & Responsibility, BS

The social impact & responsibility (SIR) concentration seeks to examine the question: “How should business enterprises and business thinking be engaged to improve society in areas not always associated with business?” SIR is an interdisciplinary field that encourages students to approach their core courses and primary concentration courses from a socially oriented perspective.

**For more information:** lgst.wharton.upenn.edu

#### Social Impact & Responsibility Concentration

1. For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2. Two can double-count as General Education Distribution courses.
Statistics, BS

A key challenge facing managers is the interpretation of the vast amount of data generated by computing systems. As these data do not directly answer important business questions, managers must use data analysis and statistics to interpret them. Statistics courses develop the skills and insights required to make effective use of quantitative methods, select and apply techniques, and communicate statistical results. All courses provide skills that augment substantive managerial abilities, along with exposure to computer software that implements key techniques.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2017 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Minors

For Wharton Students

Students who wish to study a subject of interest in greater depth may choose to pursue a minor. Minors generally require six to eight courses in a particular field of study. A carefully planned program of study allows a Wharton student to complete a minor within the Wharton curriculum, capitalizing on potential overlap with General Education, Non-Business Elective, and Unrestricted Elective requirements. Students are encouraged to begin planning as early as possible to ensure the minor can be completed in a timely manner and without taking extra courses.

Wharton students have the option of pursuing either a departmental minor or a University Minor (https://undergrad-inside.wharton.upenn.edu/university-minors).

For Non-Wharton Students

- Statistics for Non-Wharton Students, Minor (p. 234)

Statistics for Non-Wharton Students, Minor

The aim of statistical modeling is to empower effective decision making, and the field's unique contribution is its ability to incorporate multiple levels of uncertainty in the framing of wise decisions. Over the last few years, the development of new computational tools and the unprecedented evolution of "big data" have propelled statistical modeling to new levels. Today, statistical modeling and machine learning have reached a level of impact that no large organization can afford to ignore. The information landscape is changing as it has never changed before.

Students interested in this minor must have the prior approval of the Statistics Undergraduate Program Director, Professor Abraham Wyner (ajw@wharton.upenn.edu), to develop a curriculum for the minor that is appropriate for their interests. Wharton students are not eligible for this minor.

For more information: https://statistics.wharton.upenn.edu/programs/university-minors/

Statistics for Non-Wharton Students, Minor

This minor is for students outside of Wharton. Single-degree and Dual Degree students with Wharton may pursue a statistics concentration instead.

consult with their academic program regarding final certifications and requirements for graduation.

---

**Academic Opportunities**

Students at Wharton have many on-campus curricular opportunities to enrich their academic experience. As a Wharton student, you can pursue specialized interdisciplinary studies through four different coordinated dual-degree programs (p. 237). If the coordinated dual-degree programs do not meet your needs, you can pursue a dual degree (p. 236) with the College of Arts and Sciences, the School of Engineering and Applied Science or the School of Nursing. In addition to undergraduate degree options, submatriculation programs (p. 262) offer Wharton students the chance to accelerate their graduate pursuits while satisfying their undergraduate curriculum.

Academic opportunities are also available for single-degree Wharton students. Minors (p. 234) allow students to explore a topic of interest in-depth, while independent study (p. 266) options encourage students to tailor their academic experience to their intellectual interests. Additional opportunities like the Wharton Field Challenge (https://undergrad-inside.wharton.upenn.edu/field-challenge) and the Quaker Consortium (https://undergrad-inside.wharton.upenn.edu/quaker-consortium) only further enrich the academic experience at Wharton. Take time to learn more about all the academic opportunities available to you!

For more information, visit: https://undergrad-inside.wharton.upenn.edu/academic-opportunities/.

---

**Wharton Industry Exploration Program** (https://undergrad-inside.wharton.upenn.edu/wiep)

These short-term, half-credit courses focus on various industries and cities and take place during school breaks.

**Wharton International Programs** (https://undergrad-inside.wharton.upenn.edu/wip)

WIP (WH 298) is a short-term international business course that is fully escorted by the Wharton Undergraduate Division. The program gives undergraduate students an amazing global opportunity featuring business site visits, lectures at our partner schools, cultural excursions, and networking opportunities with undergraduate students and business contacts from the destination countries.

In addition to learning about another country’s business environment and culture, students earn 0.5 course units that can be used towards business-breadth or elective credits. Three WIP courses are offered each year.

**Senior Capstone** (https://undergrad-inside.wharton.upenn.edu/senior-capstone)

The Wharton Senior Capstone (WH 398) is a for-credit, interactive business simulation that provides Wharton seniors with the opportunity to draw on their business knowledge—finance, management, marketing, leadership, and social responsibility—while formulating and executing business strategy in a competitive, team-based environment.

Utilizing real-time problem solving within a dynamic simulation environment, teams design and implement strategic plans, integrate feedback from the consequences of those decisions, and interact with other teams to create shareholder and social value.

**Wharton Research Scholars** (https://undergrad-inside.wharton.upenn.edu/wrs)

Wharton Research Scholars is an intensive one-year research program for a select group of students who are interested in conducting research under the supervision of some of Wharton’s preeminent faculty members. As part of the program, participants complete an honors thesis.

Students apply to work on a specific project they propose in consultation with a Wharton faculty member who agrees to act as their faculty mentor. Students are allowed to have more than one faculty mentor provided at least one is a member of the Wharton faculty.

Throughout the year, students convene to discuss progress, strategies, and challenges within their projects. This interaction fosters a strong scholarly community where students can learn from each other’s experience. The research scholars also meet regularly with their faculty mentors who advise the students throughout the year. The program culminates with final presentations and publication of research papers on the University of Pennsylvania Libraries’ ScholarlyCommons (http://repository.upenn.edu/wharton_research_scholars).
INTERDISCIPLINARY STUDIES

Interdisciplinary opportunities at Penn allow students to explore their academic interests and discover new ways of integrating knowledge.

Dual Degree

Undergraduates can receive two Bachelor's Degrees by completing the requirements for any two of the four undergraduate schools at the same time. A dual degree program has no prescribed course of study, and the student does not have to choose to participate prior to matriculation.

The application process for a dual degree varies among the undergraduate schools. Contact the advising office (p. 245) for the school to which you are applying for details on how to submit an application.

Coordinated Dual Degree Programs (p. 237)

Penn's specialized dual degree programs offer students the opportunity to pursue an integrated curriculum jointly offered by two schools within the University. Program participants graduate from Penn with two degrees.

University Minors (p. 239)

In addition to minors completed within one school, several interdisciplinary minors combine coursework from the four undergraduate schools.

Coordinated Submatriculation Programs (p. 238)

Penn offers students many opportunities to begin a graduate program while completing an undergraduate degree. Students may apply for admission as submatriculants to a variety of the University's graduate and professional areas of study. Submatriculation programs exist in the four undergraduate schools and in several of Penn's graduate schools.

Featured Interdisciplinary Programs

Penn offers a number of opportunities for students to pursue an integrated curriculum jointly offered by two or more schools within the University, and graduate with a single degree. Examples of such programs include:

Digital Media Design

The Digital Media Design (DMD) program is an interdisciplinary major in the School of Engineering and Applied Science at Penn. As a full-fledged Bachelors in Engineering and Science (BSE) degree, it combines major coursework in computer graphics within the Computer & Information Science Department with Fine Arts courses from Penn's School of Design. The program is designed for students who have an interest in the computer programming, mathematics, and design behind computer graphics, animation, games, virtual reality environments, and interactive technologies.

View Program Requirements (p. 179)

For more information, visit: http://cg.cis.upenn.edu/dmd_program.html.

Integrated Studies Program

The Integrated Studies Program (ISP) (https://www.college.upenn.edu/integrated-studies) is the freshman curriculum for Benjamin Franklin Scholars pursuing degrees in the College of Arts and Sciences.

Deeply rooted in the liberal arts tradition of acquiring and applying expansive knowledge, this residential academic program invites highly-motivated students to examine complex themes through the integration of multiple academic disciplines and methodologies. Students are guided through the semester by some of Penn's leading faculty. By investigating the same ideas under three distinct lenses, drawing simultaneously from the humanities, social sciences, and sciences, students sharpen their focus on the similarities—and differences—between the disciplines' habits of mind.

For more information, visit: https://www.college.upenn.edu/integrated-studies/.

Moelis Advance Access Program

The Moelis Advance Access Program is a deferred admission program that gives Penn undergraduates a guaranteed pathway to the Wharton MBA while they pursue work experience. Moelis Fellows access Wharton resources and network during their deferment period and can be considered for a $10,000 fellowship per year during the 2-year full-time MBA program. Beginning in 2018, the program will accept a highly selective cohort of Penn seniors whose academic and career interests expand traditional notions of business education. The program was established with a $10 million gift from Ken Moelis, W'80, WG'81, and Julie Taffet Moelis, W'81. The program is open to all Penn undergraduates, beginning with the Class of 2018, who aspire to set the stage early for their advanced education and highly successful careers. Seniors in the College of Arts and Sciences, School of Engineering and Applied Science, School of Nursing, the Wharton School, and all coordinated dual degrees may apply.

For more information, visit: https://mba.wharton.upenn.edu/moelis-advance-access-program/.

Networked & Social Systems Engineering

The Rajendra and Neera Singh Program in Networked and Social Systems Engineering (NETS), formerly called Market and Social Systems Engineering (MKSE), is the world's first course of study to fully integrate the disciplines needed to design and analyze the complex networks reshaping our society. This program prepares students to shape the technologies that underpin internet-based search and electronic commerce, financial networks, social networks, and even such exchanges as the power grid. Graduates of this program will be prepared to engineer networks that work for both end-users and investors. Other graduates may become the policy-makers urgently needed to regulate these networks for the protection of commercial property and societal good.

View Program Requirements (p. 184)

For more information, visit: http://www.nets.upenn.edu/.

Nutrition

The Nutrition major is an interdisciplinary collaboration between the School of Nursing and the School of Arts & Sciences, and it builds on a student's basic science skills with a deep dive into the science of nutrition. Linkages of nutritional compounds and dietary approaches with health and disease, novel approaches to the study of nutritional impact on health, and future avenues of exploration in the field are examined.

View Program Requirements (p. 186)

For more information, visit: http://www.nuts.upenn.edu/.
Elective courses in anthropology, biology, economics, physiology, psychology, health care, and public policy provide a rounded context for the study of nutrition science.

For more information, visit: https://www.nursing.upenn.edu/nutrition-major/.

Penn offers many opportunities for interdisciplinary study in global contexts. Here are some of the opportunities available to undergraduates.

Penn offers the opportunity to study more than 40 languages at the Penn Language Center. (p. 250) For more information, visit Foreign Language Study Opportunities (p. 250).

Coordinated Dual Degree Programs
Penn's specialized dual degree programs offer students the opportunity to pursue an integrated curriculum jointly offered by two schools within the University. Program participants graduate from Penn with two degrees.

Computer and Cognitive Science
School of Arts & Sciences/School of Engineering & Applied Science
Bachelor of Science in Engineering (BSE)/BAS and Bachelor of Arts (BA)

This program combines studies in computer science and engineering with linguistics, mathematics, philosophy, or psychology, and students receive a BSE or BAS degree from Penn Engineering and Bachelor of Arts from the College of Arts and Sciences. Requirements for the program are guided by the degree sought (BAS or BSE) and include 12-16 course units in Linguistics, Mathematics, Philosophy, or Psychology and 4 course units in a Foreign Language.

For more information, visit: http://www.cis.upenn.edu/current-students/undergraduate/dual.php.

Huntsman Program in International Studies and Business
School of Arts & Sciences/The Wharton School
BA in International Studies/BS in Economics

This innovative four-year joint degree program between the School of Arts and Sciences and the Wharton School combines a business education, liberal arts, and advanced language training in one of eleven languages of focus. It prepares students for global leadership in career paths around the world in diverse areas such as consulting, finance, medicine, politics, diplomacy, the non-profit sector, and entrepreneurship. Students must apply to the program when they apply to Penn; they cannot transfer into the program. Admission is highly competitive.

For more information, visit: http://huntsman.upenn.edu/.

Jerome Fisher Program in Management & Technology
School of Engineering & Applied Science/The Wharton School
BAS/BSE and BS in Economics

The Jerome Fisher Program in Management & Technology (M&T) is sponsored jointly by the School of Engineering and the Wharton School. The impetus for this joint-degree program came from the Board of Overseers of the School of Engineering and Applied Science. The Board of Overseers, a distinguished group of corporate executives and academicians, emphasized that an understanding the engineering and technology fundamentals is as essential to the background of future leaders in business and industry as a sound knowledge of management principles. They pointed to the growing need for people who can bridge the management and technical disciplines.

Undergraduate students enrolled in the M&T Program pursue degrees from both schools concurrently, creating a truly interdisciplinary learning experience. This combination enables students not only to understand
engineering and business concepts but also the integration of the two and how this intersection distinctively shapes our world. M&T students pursue a Bachelor of Science in Economics from the Wharton School and either a Bachelor of Science in Engineering (BSE) or a Bachelor of Applied Science in Engineering (BAS) from Penn Engineering. The curriculum includes two special M&T linking courses that allow for added interdisciplinary learning opportunities. The common goal for all M&T students is the mastery of the technical and managerial skills necessary to define and solve problems in today’s complex technological society. The structure of the joint-degree program gives each student considerable flexibility in meeting this goal. Particular attention is directed to the importance and processes of innovation in our technology-based industries.

For more information, visit: http://www.upenn.edu/fisher/.

**Nursing and Health Care Management Program (NHCM)**

**School of Nursing/The Wharton School**

Bachelor of Science in Economics/Bachelor of Science in Nursing (BSN)

Nurses with excellent clinical and administrative skills are in higher demand than ever. Our Nursing and Health Care Management Program (NHCM) gives you the chance to combine two of Penn’s greatest assets: Penn Nursing and The Wharton School. In the NHCM program, you’ll study simultaneously in both schools and graduate with a Bachelor of Science in Nursing and a Bachelor of Science in Economics. Your work will include science and clinical courses along with general education courses in the Arts and Sciences. We designed the curriculum to boost expertise in patient care and deepen your knowledge of how to manage the way that care is delivered. We also use a multidisciplinary approach that integrates nursing, business, and liberal arts. Students enrolled in the program have advisors at both Nursing and Wharton and complete this integrated academic and clinical program in five years.

For more information, visit: http://www.nursing.upenn.edu/nhcm/.

**Roy and Diana Vagelos Program in Life Sciences and Management (LSM)**

**School of Arts & Sciences/The Wharton School**

Bachelor of Arts (BA)/Bachelor of Science in Economics

On the surface, bioscience and business may seem like unrelated fields. But if the full benefits of science are to be realized, discoveries made at the laboratory bench must be taken to market and made accessible to society at large—a process that demands great skill both scientifically and managerially. Given the pace of recent advances in bioscience and biotechnology, never before has the need been so great for decision makers who can understand and advance scientific innovations as well as manage and promote them. It is with this in mind that the University of Pennsylvania launched the Vagelos Life Sciences & Management (LSM) program.

LSM is an undergraduate dual-degree program administered jointly between Penn’s College of Arts & Sciences and the Wharton School. Each year, the program enrolls approximately 25 exceptional students and offers them the opportunity to pursue an interdisciplinary curriculum combining bioscience and business, leading to the completion of two degrees: a Bachelor of Arts in a life science major and a Bachelor of Science in Economics. To ensure that every student learns how to apply their knowledge, the program provides the means for them to find two required, paid internships, one centered in scientific research and the other in business or public policy. Completion of the LSM program is an ideal starting point for students intent on careers in the life sciences sector by preparing them for advanced training, and we anticipate they will then go on to pursue through MD, PhD, MBA, JD, and/or other graduate programs. LSM is suited to students with interests in health care; biomedical, agricultural, and environmental research and development; public policy; and the financial and strategic management of life science organizations.

For more information, visit: https://lsm.upenn.edu/.

**Vagelos Integrated Program in Energy Research (VIPER)**

**School of Arts & Sciences/School of Engineering & Applied Science**

BA/BSE

The Vagelos Integrated Program in Energy Research (VIPER) enrolls talented, prepared, and motivated students interested in energy science and engineering. VIPER students receive instruction and state-of-the-art research experiences, enabling them to pursue advanced degrees in these fields and establish high-caliber research careers as innovators in the discovery and development of sustainable ways to harness, convert, and use energy. Candidates for the program apply as they seek admission to the University. A joint program of Penn’s School of Arts and Sciences (SAS) and the School of Engineering and Applied Science (SEAS), VIPER leads to dual Bachelor of Arts (BA) and Bachelor of Science in Engineering (BSE) degrees by combining majors from each school. Possible combinations include: Physics and Astronomy, Chemistry, Biology, or Mathematics from SAS and Chemical and Biomolecular Engineering, Electrical Engineering, Materials Science and Engineering, or Mechanical Engineering and Applied Mechanics from SEAS. Some students may also apply for a master’s degree through a fifth year of study.

For more information, visit: https://www.viper.upenn.edu.

**Coordinated Submatriculation Programs**

The University offers a number of coordinated, interdisciplinary submatriculation programs to undergraduate students.

For more information about submatriculation, click here (p. 261).

**BA/JD Program in Arts & Sciences and Law**

This rigorous program offers an opportunity for highly qualified and motivated students to apply to Penn Law School during what is generally the first semester of a student’s junior year (between 16 and 23.99 c.u.). If accepted, the student will submatriculate into the J.D. program in their senior year. Applicants must be committed to the study of law in its theoretical and practical aspects.

For more information, visit: https://www.college.upenn.edu/node/2398.
Bio-Dental Program

Bio-Dental submatriculation is a seven-year joint program of the College and Penn’s School of Dental Medicine for students who will major in Biology and wish to enroll in the Dental School during their senior year in the College. Students must apply to the program when they apply to Penn, and applicants will be notified of their conditional acceptance into the program when they are notified of their admission to Penn. Full acceptance into the program is made after the student’s junior year and is based on academic performance during those three years and meeting the admissions standards of the Dental School.

For more information, visit: http://www.bio.upenn.edu/https%3A/%252Fwww.bio.upenn.edu/accelerated-dental-program.

BSN/JD Program

Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in the JD program (https://www.law.upenn.edu/academics/degrees.php) at Penn Law School while still undergraduates. The current climate of healthcare litigation and malpractice suits is well suited for professionals who combine nursing education and experience with legal expertise. A background in both nursing and law gives students a powerful and marketable skillset and prepares them to make an impact on the medical and legal professions. To submatriculate into Penn Law, students should take the LSAT and apply (https://www.law.upenn.edu/admissions/jd) during their junior year. If a student is admitted, they will begin taking courses at the law school during their fourth year, completing both the BSN and JD degrees in six years instead of the usual seven.

For more information, visit https://www.nursing.upenn.edu/live/files/56-submatriculation-law2015.

Penn Engineering/Penn Law Program

Penn’s Law School offers an opportunity for qualified juniors in Penn Engineering to apply early to the Law School and submatriculate into the JD program beginning their fourth year. The program is designed as a 3-year + 3-year accelerated program for highly qualified Engineering undergraduates either in the Bachelor of Applied Science (BAS) or Bachelor of Science in Engineering (BSE) degree programs.

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/submatriculation-law.php.

Roy and Diana Vagelos Program in Molecular Life Sciences

Ambitious and highly motivated students interested in the molecular view of life should consider the Vagelos Scholars Program in Molecular Life Sciences. Students begin as freshmen and major in two sciences or submatriculate for a Master of Science degree in the standard four years. Students in this program plan to pursue scientific research careers. Scholars are invited from the admitted pool of high school seniors at the beginning of April at the discretion of the faculty director and the admissions committee.

For more information, visit: http://www.sas.upenn.edu/biochem/vspmls.html.

Wharton Law School Submatriculation Program

During the junior year, qualified Wharton undergraduate students may apply for admission to the Penn Law School and submatriculate into the Juris Doctor (JD) program. In this 3-year + 3-year accelerated program, the student’s fourth year of study is spent entirely at the Law School completing the first-year law curriculum. The remaining undergraduate and/or graduate degree requirements are then completed in the student’s fifth and sixth years of study.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

University Minors

In addition to minors completed within one school, several interdisciplinary minors combine coursework from the four undergraduate schools.

Actuarial Mathematics
School of Arts & Sciences/The Wharton School

Actuarial Science stands at the intersection of risk and money. Actuaries use their knowledge of mathematics and probability theory to define, analyze, and solve complex business, financial, and social problems. Actuaries evaluate individual and corporate risks and design financially sound insurance and pension plans. Graduates from the University of Pennsylvania with an Actuarial Mathematics Minor are expected to be in great demand by the insurance and banking industry.

For more information, visit: https://www.math.upenn.edu/undergraduate/math-majors-and-minors/minor-actuarial-mathematics.

American Public Policy
School of Arts & Sciences/The Wharton School

This program enables undergraduates interested in American public policy to construct an integrated program between the School of Arts and Sciences and the Wharton School.

For more information, visit: https://bepp.wharton.upenn.edu/programs/undergraduate/program-information1/american-public-policy-minor/.

Biological Basis of Behavior and Health Services Management
School of Arts & Sciences/The Wharton School

The Biological Basis of Behavior Program and the Health Care Management Department of the Wharton School have jointly sponsored this effort. The objective is to provide students with exposure to two related areas: study in neuroscience and behavioral biology as a leading example of the bioscience enterprise, and health services management as the environment in which science innovation must be developed and managed. The minor consists of eight courses, four from the Biological Basis of Behavior Program and four from Wharton. Students must earn a minimum grade of C- in courses taken to fulfill the minor requirements.
Students must have a minimum of 3 courses that they count towards the minor and not towards any other major of minor.

View Program Requirements (p. 148)

For more information, visit: https://www.sas.upenn.edu/bbb/requirements/bbbhsmminor.

**Consumer Psychology**  
**School of Arts & Sciences/The Wharton School**

The goal of the interschool Consumer Psychology Minor is to create a program that fosters the natural link between Psychology in the College and Marketing in Wharton. To fulfill the minor, students must complete four courses from the Psychology Department in the College, four courses from the Marketing Department in Wharton, and the stats requirement. Both College and Wharton requirements will consist of core courses along with a set of elective courses. College students who wish to minor in Consumer Psychology must count two of the four required psychology (PSYC) courses towards only the Consumer Psychology minor (and towards no other major or minor).

View Program Requirements (p. 141)

For more information, visit: https://psychology.sas.upenn.edu/more-information-minors.

**Nursing and Health Services Management**  
**School of Nursing/The Wharton School**

Increasingly, the delivery of health care involves decisions that entail considerations beyond clinical or medical issues. With the rise of managed care in the United States, it is critical for health professionals to understand not only the clinical factors that affect patients but also the business environment in which healthcare institutions function. This program, a partnership between the School of Nursing and The Wharton School, helps students understand both the nature of the economic and managerial constraints that healthcare organizations face, as well as how these constraints can be effectively managed to provide the best possible health care for patients.

View Program Requirements (p. 201)

For more information, visit: http://www.nursing.upenn.edu/nursing-and-health-services-management-minor/.

**Nutrition**  
**School of Arts & Sciences/School of Nursing**

Jointly sponsored by the Schools of Nursing and Arts and Sciences, the Nutrition Minor presents a broad view of the field, and illustrates the pervasiveness of nutrition-related issues in such diverse fields as anthropology, economics, folklore, history, physiology, psychology, health care, and public policy.

View Program Requirements (p. 201)

For more information, visit: http://www.nursing.upenn.edu/nutrition-minor/.

**Sustainability and Environmental Management**  
**School of Arts & Sciences/School of Engineering & Applied Science/The Wharton School**

The Sustainability and Environmental Management Minor is focused on sustainability and designed to help students understand the nature of environmental constraints that face organizations and individuals in the modern world, and to understand how these constraints can be effectively considered as part of the decision-making process in for-profit and non-profit organizations.

View Program Requirements (p. 161)

For more information, visit: https://www.sas.upenn.edu/earth/minors/sustainability-and-environmental-management-minor.

**Urban Education**  
**School of Arts & Sciences/Graduate School of Education**

The crisis in American education continues to confound major sectors of American life. National attention has engaged various constituencies - non-profit business organizations; local, state and federal governments; teachers' unions; and universities - in trying to understand and improve public education. At Penn, students and faculty have become deeply involved in local schools through community service, research, teaching, and coursework. In response to student interest in community and education issues, the College of Arts and Sciences and the Graduate School of Education sponsor an interdisciplinary minor in Urban Education. This seven-course undergraduate minor offers students a unique opportunity to bridge learning between the classroom and community, and it features:

- Academically-based community service in local schools
- Deeper understanding of the complex factors affecting urban education
- Field-based research in an area of interest
- Hands-on opportunity to investigate a career in education
- Credit toward Pennsylvania teacher certification requirements

This minor is open to undergraduates in all disciplines. Students choose from among three concentrations depending on interest in pursuing urban teaching certification immediately or developing a strong foundation the issues of urban schools: Policy, Research, and Practice (p. 165); Elementary /Middle Years Education (p. 165); or Secondary Education (p. 162).

View Program Requirements:

- Elementary Education (p. 165)
- Secondary Education (p. 162)
- Policy, Research, and Practice (p. 165)

For more information, visit: http://www.sas.upenn.edu/urban/students/urban-education-minor.

**Urban Real Estate and Development**  
**School of Arts & Sciences/The Wharton School**

This minor, co-sponsored by Real Estate (Wharton) and Urban Studies (Arts and Sciences), is designed to enable students to combine an interest in Urban Studies and Real Estate Development. Students take
a total of seven Urban Studies and Real Estate courses, in consultation with the minor advisor.

View Program Requirements (p. 162)

For more information, visit: http://www.sas.upenn.edu/urban/students/real-estate-development-minor.
ACADEMIC RESOURCES

Penn offers a wide variety of resources, offices, and programs for undergraduate students to support them in all aspects of their Penn experience. The following list highlights some of the most commonly used resources and areas of interest relating to academics and educational opportunities. For more information about campus resources available to students, visit the Division of the Vice Provost for University Life (http://www.vpul.upenn.edu).

This list of academic resources is under construction. Please submit suggestions for additional resources or improvements to existing resources to catalog@lists.upenn.edu.

### 2019 Summer Term

**11-Week Session**

- Classes begin: Tuesday, May 28
- Session I Classes begin: Tuesday, May 28
- Memorial Day Observed: Monday, May 27 (no classes)
- Session I Classes end: Wednesday, July 3
- Session II Classes begin: Friday, July 5
- Independence Day: Thursday, July 4 (no classes)
- Session II & 11-Week Session Classes end: Friday, August 9

### 2019 Fall Term

- Move-in for First Year Students (http://www.business-services.upenn.edu/housing/assignments/move/arriving.html): Wednesday, August 21
- New Student Orientation (http://www.upenn.edu/nso): Wednesday-Monday, August 21-August 26
- Freshman Convocation: Monday, August 26
- First day of classes: Tuesday, August 27
- Labor Day (no classes): Monday, September 2
- Course Selection Period ends: Monday, September 16
- Drop Period ends: Monday, October 7
- Fall term break: Thursday-Sunday, October 10-13
- Classes resume: Monday, October 14
- Advance Registration for Spring Term (http://www.upenn.edu/registrar): Monday-Sunday, October 28-November 10

### Family Weekend (http://www.vpul.upenn.edu/osa/fw)

- Friday-Sunday, November 1-3 (Brown)

### Last Day to withdraw from a course

- Friday, November 8

### Homecoming

- Saturday, November 9 (Cornell)

### Thursday/Friday class schedule on Tuesday/ Wednesday

- Tuesday/Wednesday, November 26-27 (Thursday/Friday classes)

### Thanksgiving break

- Thursday-Sunday, November 28-December 1

### Classes resume

- Monday, December 2

### Fall term classes end

- Friday, December 13

### Advance Registration for Spring Term

- Monday-Sunday, March 23-April 5

### Martin Luther King, Jr. Day Observed (no classes) (http://www.upenn.edu/aarc/mlk)

- Monday, January 20

### Course Selection Period ends

- Monday, February 3

### Drop Period ends

- Friday, February 21

### Spring term classes end

- Saturday-Sunday, March 1

### Classes resume

- Monday, March 16

### Advance Registration for Fall Term and Summer Sessions (http://www.upenn.edu/registrar)

- Monday-Sunday, March 23-April 5

### Last Day to withdraw from a course

- Friday, April 3

### Spring term classes end

- Wednesday, April 29

### Reading days

- Thursday-Friday, April 30-May 1

### Final examinations (http://www.upenn.edu/registrar)

- Monday-Tuesday, May 4-12

### Spring semester ends

- Tuesday, May 12

### 2020 Spring Term

- First day of classes (Monday class schedule on Wednesday) (http://provost.upenn.edu/education/calendar)

- Wednesday (Monday classes), January 15

### Martin Luther King, Jr. Day Observed (no classes) (http://www.upenn.edu/aarc/mlk)

- Monday, January 20

### Course Selection Period ends

- Monday, February 3

### Drop Period ends

- Friday, February 21

### Spring term classes end

- Saturday-Sunday, March 7-15

### Classes resume

- Monday, March 16

### Advance Registration for Fall Term and Summer Sessions (http://www.upenn.edu/registrar)

- Monday-Sunday, March 23-April 5

### Last Day to withdraw from a course

- Friday, April 3

### Spring term classes end

- Wednesday, April 29

### Reading days

- Thursday-Friday, April 30-May 1

### Final examinations (http://www.upenn.edu/registrar)

- Monday-Tuesday, May 4-12

### Spring semester ends

- Tuesday, May 12
Alumni Day (http://www.alumni.upenn.edu)  Saturday  May 16
Baccalaureate (http://www.upenn.edu/commencement)  Sunday  May 17
Commencement (http://www.upenn.edu/commencement)  Monday  May 18

*Updated May 9, 2017*

**Notes:**

Graduate and professional programs follow their own calendars with different registration/drop deadlines, which are typically available on the website of the school or program.

The College of Liberal and Professional Studies may have different registration/drop deadlines. Please visit the LPS website, www.sas.upenn.edu/lps/, for more information.

Rosh Hashanah, Yom Kippur, the first two days of Passover and Good Friday are religious holidays that affect large numbers of University community members and that fall during the academic year. View the University's policy regarding these and other holidays (p. 295).

The University’s Three-Year Academic Calendar is subject to change.

**Advising**

Each school has its own advising office with a network of academic advisors available to assist students. The structure of the advising varies by school; you can find the links to your school’s advising office below.

**School of Arts and Sciences**

College students need to choose courses, declare a major and define career goals. They will need to examine their performance in different courses, identify their skills and those they wish to develop, and decide what really matters to them. Much of this assessment they will do themselves, but faculty members, academic advisors, career counselors and peers can help.

Students in the College have a strong network of academic advisors available to assist them throughout their undergraduate careers.

- Pre-major advisors help first- and second-year students navigate their entrance into academic and intellectual life in the College beginning with the issues of incoming freshmen and continuing through the student’s exploration of a potential major.
- Peer advisors work with the pre-major advisor and are one of the first points of contact for incoming College students. They provide the perspective of an upperclass student in the College and assist first-year students in making the transition from high school to Penn by sharing their strategies for academic success and knowledge of campus resources.
- After declaring a major, students are assigned an academic advisor affiliated with the major department or program.
- All students are welcome and encouraged to speak with assistant deans for advising in the College Office. These advisors can help students explore the many options and opportunities available to College students, and are available by appointment or on a walk-in basis throughout the year.

For more information, visit: https://www.college.upenn.edu/academic-advising.

**School of Engineering and Applied Science**

Each student is assigned a faculty advisor with whom they are required to meet at least twice per year. No student is permitted to register for classes in any semester without first meeting with an advisor and a review of their Permission to Register form (https://www.seas.upenn.edu/undergraduate/pdf/ug-advisor-signoff.pdf). Students who take the time to prepare for these meetings generally find them beneficial and informative. Faculty advisors are the best source of information about electives within the major, research opportunities, and options for graduate study.

For more information, visit: https://www.seas.upenn.edu/undergraduate/advising/.

**School of Nursing**

Penn Nursing students benefit from a dual advising structure. All students are assigned a faculty advisor and have access to the professional staff advisors in the Office of Student Affairs.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/.

**The Wharton School**

The goal of the Wharton Undergraduate Division academic advising team is to help students make informed decisions about their educational plans and professional/life goals that are consistent with their interests, abilities, and values.

Advising by appointment, walk-in advising, and specialized advising (https://undergrad-inside.wharton.upenn.edu/advising-services/#specialized_advising) are services available in G95 Huntsman Hall to current Wharton undergraduate students.

Professional advisors (https://undergrad-inside.wharton.upenn.edu/advising-services), concentration advisors (https://undergrad-inside.wharton.upenn.edu/concentration-advisors), and peer advising fellows (https://undergrad-inside.wharton.upenn.edu/peer-advising) are available to assist students.
Career Services

Career Services helps students define their career goals and learn how to achieve them. The office helps students and alumni obtain permanent and short-term career-related employment and graduate and professional school admission through counseling sessions, workshops, alumni networks, a large career resource library and on-line information. Career Services also establishes and promotes contact between employers, graduate/professional schools, and the University; and hosts employer interviews through the on-campus recruiting program.

- Career Services Contacts for Undergraduates (http://www.vpul.upenn.edu/careerservices/undergrad/connectwithus.php)
- Undergraduate Career Workshops and Events (http://www.vpul.upenn.edu/careerservices/undergrad/events.php)
- Information about Graduate School Study (http://www.vpul.upenn.edu/careerservices/gradprof)

For more information, visit: http://www.vpul.upenn.edu/careerservices/.

Community Engagement

The Barbara and Edward Netter Center for Community Partnerships (https://www.nettercenter.upenn.edu) is Penn's central administrative office for community partnership programs, including academically based community service, direct traditional service, and community development.

Penn's hub for civic engagement, Civic House (http://www.admissions.upenn.edu/academics/civic-house) supports student service and advocacy groups while providing resources, information, and meeting space for service-oriented efforts throughout campus and beyond.

The Robert A. Fox Leadership Program (http://www.admissions.upenn.edu/academics/fox-leadership-program) prepares students for present and future leadership through hands-on experience, service, course work, and mentorship from successful leaders.

Enrollment & Degree Verification

The University Registrar's office provides verification of dates a student attended Penn and degrees awarded by the Schools of the University. Details concerning Academic Certification may be found on the University Registrar web page (http://www.upenn.edu/registrar/student-services/academic-certification.html).

Fellowships and Prizes

The Center for Undergraduate Research and Fellowships (CURF) (https://www.curf.upenn.edu) serves as the University of Pennsylvania's information clearinghouse and primary support office for Penn students and alumni considering applying for major grants and fellowships.

CURF's Fellowships Team educates Penn students and alumni about fellowships and assists potential applicants in creating their strongest possible application through information sessions, conversations with fellowship recipients, and individual advising. CURF also supports and manages selection committees consisting of leading Penn faculty that evaluate applications and select applicants to endorse.

Fellowships provide funding for a wide range of activities:
- full tuition, fees, and a living stipend to earn a graduate degree abroad
- undergraduate or graduate study in the US
- conducting a research project abroad
- teaching English abroad
- internships abroad
- social engagement projects in the US or abroad

CURF aims to demystify these opportunities to help students determine the most appropriate awards for which to apply.

School-based Awards

In addition to departmental awards, there are a variety of awards available to undergraduate students within a particular school.

College of Arts and Sciences
- Abraham D. Cohn Prize
- Charles W. Burr Book Prize
- College Alumni Society 250th Commemoration Award
- Phi Beta Kappa Awards (https://www.college.upenn.edu/pbk_awards)
- Vagelos Challenge Award (https://www.college.upenn.edu/vagelos-challenge)

For more information, visit: https://www.college.upenn.edu/senior-awards.

School of Engineering and Applied Science

Undergraduate Awards
- C. N. Weygandt Award (Student Choice Award)

Departmental Awards
- Bioengineering
• Chemical and Biomolecular Engineering
• Computer and Information Science
• Electrical and Systems Engineering
• Materials Science and Engineering
• Mechanical Engineering and Applied Mechanics

Awards From Additional Sources
• From the Moore School
  • John Grist Brainerd Award
  • Stuart Eichert, Jr. Memorial Prize
  • Atwater Kent Prize in Electrical Engineering
  • Walter Korn Award
  • Moore School Council Cwikla Award

• From Advancing Women in Engineering
  • Jaros Baum and Bolles Award

• From the Undergraduate Affairs Committee
  • Penn Engineering Exceptional Service Award
  • Manfred Altman Memorial Award
  • Ben and Bertha Gomberg Kirsch Prize (Applied Science Prize)
  • Engineering Alumni Society E. Stuart Eichert, Jr. Award
  • Engineers’ Club of Philadelphia Young Engineer Award
  • Albert P. Godsho Engineering Prize
  • Wolf-Hallac Award
  • Hugo Otto Wolf Memorial Prize

• Management and Technology Awards
  • Management and Technology Scholarship Award
  • Michele Huber and Brian D. Giles Memorial Award
  • Naren Udayagiri Scholarship Award

For more information, visit: http://www.seas.upenn.edu/undergraduate/student-life/awards.php.

School of Nursing
• Claire M. Fagin Award
• Dean’s Award
• Dorothy Mereness Award
• Ellen D. Baer Award
• Jeanne Frances Hopkins Award
• Mary D. Naylor Undergraduate Research Award
• Norma Lang Award
• Penn Nursing Alumni Student Award
• Sigma Theta Tau Award
• Theresa I. Lynch Award

For more information, visit: https://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf.

The Wharton School
• Beverly Virany Memorial Prize
• Class of 1975 Management Award
• Dean’s Awards (https://undergrad-inside.wharton.upenn.edu/deans-awards)
  • The Dean’s Award for Excellence
  • The Dean’s Award for Innovation
  • The Dean’s Award for Service to the Wharton School
  • The Dean’s Award for Service to the University of Pennsylvania and the Philadelphia Community

• Delta Sigma Pi Scholarship Key
• Financial Executives Institute Award
• Herbert S. Steuer Memorial Prize
• John J. Holahan Memorial Prize
• Louis Rudolph Accounting Award
• William D. Gordon Award
• Vice Dean’s Award for Service

University Prizes
The following academic prizes are awarded at the University level:

President’s Engagement Prizes (https://www.curf.upenn.edu/presidents-engagement-prizes)
Competitively awarded on an annual basis, the President’s Engagement Prizes empower Penn seniors to design and undertake local, national or global engagement projects during the first year after they graduate.

President’s Innovation Prize (https://www.curf.upenn.edu/presidents-innovation-prize)
Unique at both Penn and across higher education, the President’s Innovation Prize underscores the University’s considerable commitment to encouraging students to put their knowledge to work for the betterment of humankind.

Senior Awards
The University of Pennsylvania grants numerous undergraduate awards to outstanding graduating seniors, in addition to some sophomores and juniors. Eligibility and criteria vary by award.

The Senior Honor Awards (Spoon, Bowl, Cane and Spade for those who identify as men; Hottel, Harnew, Goddard and Brownlee Awards for those who identify as women) (http://www.vpul.upenn.edu/osa/seniors.php)
Nominees must be members in good academic standing who have actively contributed to campus life through activities and leadership. All nominees are placed on a ballot (one for men, one for women) which is distributed to a committee of staff members and the Senior Class Board. This committee votes and narrows the candidate pool to 15 men and 15 women, who are then voted upon by the entire Senior Class. The top 4 men and 4 women receive the awards on Ivy Day.

Granted to graduating students of color who demonstrate leadership, advance diversity at Penn through student activities or community service, and exemplify excellence.

The James Howard Weiss Memorial Award and The Penn Student Agencies Award (http://www.vpul.upenn.edu/osa/seniors.php)
Both awards recognize distinguished academic achievement (minimum G.P.A. of 3.7) and significant leadership in undergraduate activities by members of the senior class. A committee of students, faculty and staff makes the final selection from the list of candidates. Ideally, nominees should be the most outstanding members of group (1) above.
The Sol Feinstone Undergraduate Awards (http://www.dolphin.upenn.edu/oslaf/feinstone.html)

These awards may be presented to a sophomore, junior or senior who has contributed to "orderly and constructive social and educational change within or outside the University community." Past recipients have included the undergraduate who established the first mental health student group in the nation; the creators of a Saturday African-centered enrichment program for local children; the organizers of a pre-orientation leadership program for first-year students; and the founder of the first and the only youth-led LGBT statewide organization in the nation. Finalists are chosen by the same committee as in (2) above. (Keep in mind the fact that there must be a specific contribution, not just a list of activities).

Student Award of Merit (http://www.dolphin.upenn.edu/oslaf/alumni.html)

This award, sponsored by Penn Alumni, is presented to members of the Senior Class on the May graduation roster in recognition of their service to the University of Pennsylvania, which, in combination with other activities/endeavors, strengthens and enhances the University. The selection committee recognizes that University service takes many different forms, including but not limited to academic, co-curricular, athletic, and community service. Alumni relations and/or advancement experience is not required. Applicants are asked to use the brief essay portion of this application to describe the nature of their contributions to the Penn community and provide meaningful examples of the same. This award will be given to no fewer than one and no more than five members of the senior class. A committee comprised of alumni makes the final selection from the list of candidates. There is no minimum G.P.A. requirement.

For more information, visit: http://www.vpul.upenn.edu/osa/seniors.php.

Financial Aid

The Office of Student Registration and Financial Services (SRFS) provides solutions to students' concerns and encompasses the offices of the University Registrar and Student Financial Services.

Tuition and fees are fixed costs. These mandatory fees include the general fee, the educational technology fee, and the student health clinical fee.

The housing allowance is based on the median room rate in the University College Houses. To stay within the allowance, be conscious of your room selection and choose it by the Penn Housing deadline. Residential freshmen are required to live on-campus housing during their first year of enrollment.

The meal allowance represents the cost of one of the first year dining plans through Penn Dining. If you live at home with your family, an allowance for meals away from home is included. Freshmen are required to participate in a meal plan during their first year of enrollment.

The book and supplies allowance provides for the expected annual cost for textbooks and supplies.

The transportation allowance provides for standard commuting. The approximate cost of two round-trips home may be added on a case-by-case basis.

Personal expenses include allowances for clothing, laundry, recreation, etc.

Married Students and Students with Dependents

Your basic cost of attendance includes tuition, fees, books and supplies. It is expected that living and personal expenses are covered by your spouse's income. If you are not married, or if your spouse is a student, a supplement may be added to the basic budget to assist you with living expenses. Penn has limited funds to support the individual non-educational financial needs of married students and students with dependents. Students in need of such funding may be eligible for additional Direct Loan.

College of Liberal and Professional Studies Students

Because your financial aid eligibility is based on the number of courses in which you are enrolled, your budget will vary. SFS will determine your budget based on the number of credits you will be taking for a particular term. Most importantly, this will be based on LPS tuition rates. If you change your registration plans, e-mail our office, or submit a revised Registration Form so we can adjust your budget and aid.

For more information, visit: http://www.sfs.upenn.edu/paying/cost-of-attendance.htm.

Financial Policies

Payment of Tuition, Fees, and Other Charges

All amounts billed to students are due on the due date indicated on the bill. You will receive an email notification each month when a new billing statement is available on Penn.Pay (Penn's electronic billing service). Students whose parents or other payers are making payments are reminded that you (the student) must invite them to be an 'other payer' on Penn.Pay so that they can both view and pay your bill. Payments must be made on or before the due date. Payments can be made online, by check, wire transfer or in person. Please refer to the Student Financial Services web site at http://www.sfs.upenn.edu/paymybill/index.htm. Balances remaining beyond the due date are subject to a late payment penalty of 1.5% per month, which will appear on the next statement. A student could be placed on Financial Hold if bills remain unpaid which will jeopardize continuing enrollment and future registration.
Failure to Pay
The University reserves the right to withhold registration, transcripts, diplomas and all other information regarding the record of any student who is in arrears in the payment of tuition, fees, or any other charges, including student loans. The enforcement of this policy shall not relieve the student of the obligation to pay any outstanding fees and charges.

Withdrawal/Leave of Absence: Reduction of Tuition and Fees
A student who withdraws from the University (or who is requested to withdraw for failure to maintain a satisfactory scholastic standing) or who is granted a leave of absence from a full-time division of the University during either term of the academic year will be eligible for a reduction in tuition and fees in accordance with the conditions set forth below.

The effective date of separation from the University is the date the student files a written request for withdrawal or leave of absence.

A student who is required to withdraw because of a violation of University regulations shall receive no tuition refund.

For all other students, term charges will be adjusted as follows:

- **First two weeks of class**: 100%
- **Third and fourth weeks of class**: 50%
- **Thereafter**: 0%

In the case of students receiving financial aid, eligibility for the term will be determined based on actual charges and prorated allowances for living expenses.

For rules regarding reductions in residence and meal contract charges, see the current year’s Residential Handbook (http://www.business-services.upenn.edu/housing/assets/pdf/handbook0910.pdf) and the terms and conditions of meal plans (http://www.business-services.upenn.edu/dining).

**Note:** Please contact your home school representative regarding rules for Graduate, Professional, LPS and other Special Programs.

Policy on Military Leave
If a student who has not received full academic credit for the term is called to service through enrollment in a military reserve unit, or through enlistment in the military service, the student’s tuition and mandatory fees for the term shall be cancelled, provided a request, substantiated by the proper evidence, is filed with the dean of the school in which he or she is registered.

The Higher Education Opportunity Act of 2008 requires the University to provide a list of student-related disclosures and policies, as well as information about how to obtain the required information. This information is provided below in a list format with links to the appropriate information.

I. NON-LOAN RELATED DISCLOSURE REQUIREMENTS

A. Availability of Institutional Financial Aid Information
2. Contact information for assistance in obtaining institutional or financial aid information: http://www.sfs.upenn.edu/contacts/index.htm

B. Student Financial Assistance
1. Student financial aid information: http://www.sfs.upenn.edu/paying/index.htm

C. General Institutional Information
1. Consumer information on College Navigator website: http://nces.ed.gov/collegenavigator/?q=university+of+pennsylvania&s=all&pg=2&id=215062
2. Price of attendance
   - Undergraduate: http://www.sfs.upenn.edu/paying/cost-of-attendance.htm
   - Graduate*: Each graduate/professional school has its own cost of attendance structure. See listing below for links directly to their sites.
3. Net Price Calculator:
   b. http://netpricecalculator.collegeboard.org/participating-schools
4. Refund policy, requirements for withdrawal and for the return of Title IV, HEA financial aid: https://provost.upenn.edu/policies/pennbook/2013/02/13/financial-policies
5. Banking Relationship Disclosures
Penn complies with the U.S. Department of Education’s guidelines in making information on its marketing relationships with financial institutions publically available. Here are the contracts outlining the banking relationships with PNC Bank (https://provost.upenn.edu/uploads/media_items/pnc-and-penn-2015-and-2016-amendment-original.original.pdf) and the Student Federal Credit Union at the University of Pennsylvania (https://provost.upenn.edu/uploads/media_items/sfcu-university-contract.original.pdf).
For more information on banking options visit: http://www.srfs.upenn.edu/banking/index.htm

Graduate/Professional Schools Cost of Attendance (COA):

Foreign Language Study Opportunities

The Penn Language Center offers over 40 world languages per semester to both undergraduate and graduate students and is a leader in the field of language education and pedagogy training language instructors in language methodology in accordance with the National Standards.

Penn Language Center: plc.sas.upenn.edu

Some schools have foreign language requirements. Information about requirements and options for foreign language study varies by school:

- College of Arts and Sciences (https://www.college.upenn.edu/language-study)
- School of Nursing (https://www.nursing.upenn.edu/live/files/247-language-requirement2016pdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/requirements-2017-foreign-language-requirement)

The Penn Language Center maintains a list of languages (http://plc.sas.upenn.edu/languages) offered at Penn:

- Afrikaans (http://plc.sas.upenn.edu/node/2538)
- American Sign Language (http://plc.sas.upenn.edu/asl)
- Amharic (http://plc.sas.upenn.edu/amharic)
- Bengali (http://plc.sas.upenn.edu/bengali)
- Cantonese (http://plc.sas.upenn.edu/cantonese)
- Chichewa (http://plc.sas.upenn.edu/chichewa)
- Chinese (http://plc.sas.upenn.edu/chinese)
- Czech (http://plc.sas.upenn.edu/czech)
- Judeo-Spanish (http://plc.sas.upenn.edu/judeospanish)
- Kannada (http://plc.sas.upenn.edu/kannada)
- Korean (http://plc.sas.upenn.edu/korean)
- Malayalam (http://plc.sas.upenn.edu/malayalam)
- Marathi (http://plc.sas.upenn.edu/marathi)
- Modern Greek (http://plc.sas.upenn.edu/modernGreek)
- Panjabi (http://plc.sas.upenn.edu/panjabi)
- Pashtu (http://plc.sas.upenn.edu/pashtu)
Global Programs

Each year Penn Abroad sends approximately 600 students abroad to earn academic credit in nearly 50 countries. Semester and academic year study abroad opportunities for undergraduate students are available in the College of Arts & Sciences, the Wharton School, the School of Engineering & Applied Science, and the School of Nursing.

Penn Abroad (https://global.upenn.edu/pennabroad), a division of Penn Global (https://global.upenn.edu), provides information about how to plan for semester and academic year study abroad, what programs are approved for academic credit, how to apply for admission, how to finance the cost, and what Penn expects of you as a participant.

Click here (https://global.upenn.edu/pennabroad/students/getting-started) for information on how to get started with Semester and Academic Year study abroad (https://global.upenn.edu/pennabroad/students/getting-started), and a searchable list of all programs.

In addition, Penn Abroad also runs:

- International Internship Program (IIP) (https://global.upenn.edu/iip) – 8-12 week summer internships with stipend for outstanding students.
- Independent International Internships (I3) (https://global.upenn.edu/iip/i3) – Stipends for outstanding students for international internships secured independently.

Other global opportunities for Penn undergraduate students exist across campus, including:

- Penn Summer Abroad (http://www.sas.upenn.edu/summer/programs/abroad) – offers faculty-led undergraduate courses offered in the summer through the School of Arts and Sciences to a range of international destinations each year.
- Wharton International Program (https://undergrad-inside.wharton.upenn.edu/wip) – provides short term international business courses at three global locations each year.
- Penn Nursing Short Term & Independent Programs (https://www.nursing.upenn.edu/global-health/student-opportunities/short-term) – provides students with a number of elective courses that can be taken abroad, including some clinical elective opportunities.
- Penn Engineering (http://www.seas.upenn.edu/community/international-opps.php) – provides a range of programs for undergraduate Engineering students including Summer Study Abroad, International Summer Research and Service Learning Opportunities.

Students are encouraged to speak to their department and home school about additional study abroad opportunities that may exist.

Information for Athletes

Penn Athletics (http://www.pennathletics.com) offers a number of programs to support student-athletes academically.

Student Athlete Development Center (http://www.pennathletics.com/page/student-athlete-development-center)

Academic Resources (http://www.pennathletics.com/page/academic-resources)

Student-Athlete Academic Achievement Program

The Student-Athlete Academic Achievement Program is designed to provide student-athletes with supplemental study and tutoring opportunities, as well as to foster academic interaction with fellow student-athletes. During the academic year, students have access to reserved rooms for scheduled study time, and individualized and group tutoring sessions. In addition, workshops are conducted to offer strategies for succeeding at Penn.

For more information, visit http://www.pennathletics.com/page/student-athlete-academic-achievement-program.

To be certified academically eligible to participate (practice and/or compete) in intercollegiate athletics at the University of Pennsylvania, a student:

- Shall not have been awarded a baccalaureate degree, and
- Shall be in a specific baccalaureate degree program by beginning of the fifth term of full-time enrollment (at Penn or anywhere), and
- Shall be enrolled for a full-time course load of academic study for the current semester, and
- Shall have been awarded a minimum of 1.5 course units for each semester of full-time enrollment (beginning with the first semester of participation in intercollegiate athletics [anywhere]), and
- Shall satisfy requirements in the following areas:
  a. NCAA Initial Eligibility (Freshman Only)
  b. Completion of academic course work (course units awarded)
  c. Grade-point-average
  d. NCAA percentage of degree requirement

Note: The calculation of the percentage of degree, which is be based upon the information found in a student-athlete’s official academic worksheet has been automated effective with the 2005-06 academic year. A percentage cannot be calculated when a worksheet does not exist or is not official. It is
the responsibility of the student-athlete to ensure that academic worksheet is official and current as to the student-athlete’s major and/or concentration and that all courses have been correctly slotted under the applicable requirement field. Student-athletes are to have academic worksheets made official by end of the fourth semester.

Transfer student-athletes and student-athletes participating in study abroad programs are not exempted from the percentage of degree requirement.

Provisional eligibility may be granted onetime only to a student-athlete who does not satisfy the prescribed norms for progress — being awarded an average of four (4) course units of academic credit per full-time semester or the good standing — a cumulative GPA of 2.00 provided all other applicable requirements are satisfied. Provisional eligibility, when granted, shall terminate at the conclusion of the academic year in which it is granted or at the start of the spring semester should the student-athlete's academic performance for the fall semester not meet the NCAA term progress and/or GPA requirement.

In observance of NCAA legislation, certification of satisfaction of academic requirements is required prior to competition in each semester. Additionally, senior student-athletes or student-athletes who are exhausting their athletic eligibility must be recertified prior to participation in postseason competition occurring between semesters — fall to spring as well as spring to fall.

Information for:
- Incoming Freshman (p. 252)
- Rising Sophomores (p. 252)
- Rising Juniors (p. 253)
- Rising Seniors (p. 253)
- Fifth Year Students (p. 254)

I. Incoming Freshmen (or students who are enrolling as full-time college students for first time):

All students who are in their first or second semester of full-time college enrollment (anywhere) must be registered in a full-time course load of study. Additionally, a student participating in a NCAA sponsored sport is required to be certified by the NCAA initial Eligibility Clearinghouse as having satisfied the applicable academic requirements for participation in intercollegiate athletics during a student’s first-year of college matriculation.

This means if you are a freshman, to be academically eligible you must:
- A full-time student, and
- Certified eligible by the NCAA Clearinghouse (except freshmen participating in non-NCAA sponsored sports)

II. Rising Sophomores (or students who have completed two full-time semesters (or equivalent) of college enrollment (including transfer student-athletes):

By the beginning of the third semester of enrollment (start of sophomore year for most student-athletes) a student must have achieved a minimum cumulative grade-point-average of 2.00, earned a minimum of one and one half (1.5) course units for the prior academic semester (not summer term) and the student’s transcript must display a minimum of eight (8) course units as having been awarded for the period commencing with the student’s first full-time semester and ending with the second full-time semester (including applicable summers). A minimum of four and one half (4.5) of the eight (8) course units awarded must be from academic course work completed in the first two full-time semesters (at Penn or elsewhere). Additional course units may be awarded from the first two full-time semesters and/or from any of the following: advanced placement credit, Penn’s Pre-Frosh Program credit, summer and/or transfer credit, all of which must be displayed on the student’s transcript at the time of eligibility evaluation.

This means if you are a sophomore, to be academically eligible you must:
- Be a full-time student, and
- Have a minimum cumulative GPA of 2.00, and
- Have 8 course units (on transcript at time of eligibility evaluation),
  - A minimum of 4.5 of the 8 course units must be for academic work completed in the first two full-time semesters (excluding summer), and
  - A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer),

New transfer students (matriculating at Penn for first time), to be academically eligible you must:
- Be a full-time student, and
- Have been awarded 24 course units of course work (equivalent of 6 Penn course units) at your former school.
  - A minimum of 18 of the 24 course units must be for academic work completed in the first two full-time semesters (excluding summer), and/or
  - Have 3 course units of transfer credit that is Penn degree applicable per term of full-time enrollment from the two-year college previously attended. Transfer credits must be displayed on transcript at time of eligibility evaluation.

Provisional Eligibility — After two full-time semesters.

If by the beginning of the third full-time semester a student-athlete satisfies all of the above requirements except for the cumulative GPA of at least 2.00 and/or eight (8) awarded course units on the transcript, the student-athlete may be considered for provisional eligibility.

- Minimum cumulative GPA for provisional eligibility consideration is 1.85.
- Minimum total number of awarded course unit credit is 6 CUs.
  - A minimum of 4.5 of the 6 course units must be for academic work completed in the first two full-time semesters (excluding summer).

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school. The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.
III. Rising Juniors (including transfer student-athletes):

By the beginning of the junior year (fifth and sixth semesters), a student must be in a degree program, have satisfied forty (40) percent of degree requirements, achieved a minimum cumulative grade-point-average of 2.00, earned a minimum of one and one half (1.5) course units for the prior full-time semester (not summer term) and the student's transcript must display an average of four (4) course units as having been awarded for each full-time semester of Penn enrollment. A rising junior (unless a transfer student-athlete) must have a minimum of sixteen (16) awarded course units on his or her transcript with a minimum of six (6) awarded course units being for work completed in the two most recently completed full-time semesters (including summer sessions). A minimum of four and one half (4.5) of these six course units must be from academic course work completed in the prior two full-time semesters (not including summer) with the additional one and one half (1.5) course units coming from academic work completed in the prior two full-time semesters and/or summer (including course units awarded for transfer credit), all of which must be displayed on the student's transcript at the time of the eligibility evaluation.

This means if you are a junior, to be academically eligible you must:

- Be a full-time student, and
- Be in a degree program (have an approved major, if applicable), and
- Have an official academic worksheet, and
- Have completed 40% of the requirements for your specific Penn degree, and
- Have a minimum cumulative GPA of 2.00, and
- Have a minimum of 16 course units (on transcript at time of eligibility evaluation),
  - A minimum of 6 course units awarded must be for academic work completed in the prior two full-time semesters and/or previous summer sessions,
  - A minimum of 4.5 course units awarded must be for academic work completed in the prior two full-time semesters (excluding summer sessions),
  - A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer sessions),

New transfer students (matriculating at Penn for first time), to be academically eligible you must:

- Be a full-time student, and
- Be in a degree program (have an approved major, if applicable), and
- Have an official academic worksheet, and
- Have completed 40% of the requirements for your specific Penn degree
- Thus, you will be required to have a sufficient number of awarded Penn and/or transfer credit on your transcript at the time of the eligibility review to satisfy the 40% percentage of degree requirement.

Provisional Eligibility – After four full-time semesters.

If by the beginning of the fifth full-time semester a student-athlete satisfies all of the above requirements except for the cumulative GPA of at least 2.00 and/or sixteen (16) awarded course units on transcript, the student-athlete may be considered for provisional eligibility.

- Minimum cumulative GPA for provisional eligibility consideration is 1.90.
- Minimum total number of awarded course unit credit is 14 CUs.

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school. The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport's head coach and DRIA compliance coordinator.

IV. Rising Seniors (including transfer student-athletes):

By the beginning of the senior year (seventh and eighth semesters), a student must be in a degree program, have satisfied sixty (60) percent of degree requirements, achieved a minimum cumulative grade-point-average of 2.00, earned a minimum of one and one half (1.5) course units for the prior Penn academic semester (not summer term) and the student's transcript must display an average of four (4) course units as having been awarded for each full-time semester of Penn enrollment. A rising senior (unless a transfer student-athlete) must have a minimum of twenty-four (24) awarded course units on the transcript with a minimum of six (6) awarded course units being for work completed in the most recently completed two full-time semesters (including summer sessions). A minimum of four and one half (4.5) of these six course units must be from academic course work completed in the prior two full-time semesters (not including summer) with the additional one and one half (1.5) course units coming from academic work completed either in the prior two full-time semesters and/or summer (including course units awarded for transfer credit), all of which must be displayed on the student's transcript at the time of the eligibility evaluation.

This means if you are a senior, to be academically eligible you must:

- Be a full-time student (unless you satisfy the criterion for a NCAA exception), and
- Be in a degree program (have an approved major, if applicable), and
- Have an official academic worksheet, and
- Have completed 60% of the requirements for your specific Penn degree, and
- Have a minimum GPA of 2.00, and
- Have a minimum of 24 course units (on transcript at time of eligibility evaluation),
  - A minimum of 6 course units awarded must be for academic work completed in the prior two full-time semesters and/or previous summer sessions,
  - A minimum of 4.5 course units awarded must be for academic work completed in the prior two full-time semesters (excluding summer sessions),
  - A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer sessions),

New transfer students (matriculating at Penn for first time), to be academically eligible you must:

- Be a full-time student, and
must: This means if you are a 5th year student, to be academically eligible you must:

- Be a full-time student (unless you satisfy the criterion for a NCAA exception), and
- Be in a degree program (have an approved major, if applicable), and
- Have an official academic worksheet, and
- Have completed 60% of the requirements for your Penn degree
  - Thus, you will be required to have a sufficient number of awarded Penn and/or transfer course units on your transcript at the time of the eligibility review to satisfy the 60% percentage of degree requirement.

**Provisional Eligibility – After six full-time semesters.**

If by the beginning of the seventh full-time semester a student-athlete satisfies all of the above requirements except for having the twenty-four (24) course units awarded, the student-athlete may be considered for provisional eligibility provided a graduation audit has been completed.

- Minimum cumulative GPA for provisional eligibility consideration is 2.00.
- Minimum total number of awarded course unit credit is 22 CUs.

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school. The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

**V. Fifth Year Students (including transfer student-athletes):**

By the beginning of fifth year (ninth and tenth semesters), a student must be in a degree program, have satisfied eighty (80) percent of degree requirements, achieved a minimum cumulative grade-point-average of 2.00, earned a minimum of one and one half (1.5) course units for the prior Penn academic semester (not summer term) and the student’s transcript must display an average of four (4) course units as having been awarded for each full-time semester of Penn enrollment. A rising senior (unless a transfer student-athlete) must have a minimum of thirty-two (32) awarded course units on transcript with a minimum of six (6) awarded course units being for work completed in the most recently completed two full-time semesters (including summer sessions). A minimum of four and one half (4.5) of these six course units must be from academic course work completed in the prior two full-time semesters (not including summer) with the additional one and one half (1.5) course units coming from academic work completed in the prior two full-time semesters and/or summer sessions (including course units awarded for transfer credit), all of which must be displayed on the student’s transcript at the time of the eligibility evaluation.

This means if you are a 5th year student, to be academically eligible you must:

- Have a minimum of 32 course units (on transcript at time of eligibility review),
  - A minimum of 6 course units awarded must be for academic work completed in the prior two full-time semesters and/or previous summer), and
  - A minimum of 4.5 course units awarded, must be for academic work completed in the prior two full-time semesters (excluding summer), and
  - A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer),

New transfer students (matriculating at Penn for first time), to be academically eligible you must:

- Be a full-time student, and
- Be in a degree program (have an approved major, if applicable), and
- Have an official academic worksheet, and
- Have completed 80% of the requirements for your Penn degree
  - Thus, you will be required to have a sufficient number of awarded Penn and/or transfer course units on your transcript at the time of the eligibility review to satisfy the 80% percentage of degree requirement.

**Provisional Eligibility – After eight full-time semesters.**

If by the beginning of the ninth full-time semester a student-athlete satisfies all of the above requirements except for having thirty-two (32) course units awarded, the student-athlete may be considered for provisional eligibility provided a graduation audit has been completed.

- Minimum cumulative GPA for provisional eligibility consideration is 2.00.
- Minimum total number of awarded course unit credit is 30 CUs.

Provisional eligibility, if approved shall be for one semester only but may be extended for a second semester upon recommendation from the school eligibility officer.

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school. The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

**Information for First-Generation, Low Income Students**

Penn offers a generous program of need-based financial aid (http://www.sfs.upenn.edu/paying) and a strong commitment to increase access for qualified students from all economic backgrounds (http://www.sfs.upenn.edu/finaid/penn-finaid-initiative.html). There are a number of resources to support First Generation Low Income Students.
Penn’s First-Generation, Low-Income (FGLI) Program (http://www.vpul.upenn.edu/gic/FGLIProgram.php) is housed at the Greenfield Intercultural Center (http://www.vpul.upenn.edu/gic) (GIC), part of the Division of the Vice Provost for University Life (http://www.vpul.upenn.edu).

This program provides a supportive and inclusive learning environment for scholars from low-income backgrounds who are the first in their families to attend college. The FGLI program also welcomes all students who identify as first-generation for any of the multitude of ways this identity can be defined contextually. The staff address students’ academic, personal, and social transition needs while facilitating community-building and a sense of belonging at Penn. In collaboration with departments across campus, the FGLI program provides advising and coaching along with leadership development opportunities and experiences. The FGLI program welcomes all students who can benefit from this highly-personal engagement, and staff members are eager to celebrate these scholars and work with them to build on their talents as they navigate Penn.

The program works in collaboration with Penn First, a student organization that strives to be a community and support network for students who identify as first-generation college students and/or come from low-socioeconomic backgrounds. For more information about Penn First, visit: http://www.vpul.upenn.edu/gic/pennfirst.php.

In addition to the FGLI program, Penn offers additional resources and supports that may be helpful for low-income or first-generation students. For more information, visit: http://www.vpul.upenn.edu/Low-IncomeFirst-GenerationStudents.

Information for International Students

Penn’s International Student and Scholar Services (ISSS) (https://global.upenn.edu/iss) provides immigration benefits assistance and integration initiatives for the international community at Penn. ISSS works with international students through all stages of their journey at Penn, providing guidance every step of the way.

ISSS provides support to students in many different areas. Some examples include:

- Preparing students for arrival to the U.S.
- Helping get adjusted to life in Philadelphia
- Advising on full and part-time status, travel, and immigration guidelines
- Providing integration opportunities such as social events, cultural trips and leadership roles
- Assisting with employment authorization before internships or jobs
- Assigned advisors and a central online portal for requests and forms via the iPenn system (https://www.ipenn.oip.upenn.edu)

Find out more information for:

- New Students (https://global.upenn.edu/iss/new)
- Current Students (https://global.upenn.edu/iss/students)
- Beyond Immigration (https://global.upenn.edu/iss/beyond-immigration)

Click the iPenn logo to see your assigned advisor and make requests with eforms.

Learning Resources

Center for Programs in Contemporary Writing (http://www.writing.upenn.edu)

The Center for Programs in Contemporary Writing (http://www.writing.upenn.edu) (CPCW) brings together all of Penn’s writing programs, entities, and projects to form a collaborative whole. The Center presents writing courses, workshops and a reading circle. In addition, it offers students an opportunity to perform their writing or to become involved as a tutor, mentor or editorial apprentice.

College Houses and Academic Services (http://www.collegehouses.upenn.edu)

The eleven College Houses bring together undergraduates, faculty, staff, and graduate students to form vibrant residential communities within the larger context of our renowned urban campus, right in the heart of historic Philadelphia.

Each House has a Faculty Director, one or more Fellows, a House Dean, a House Coordinator, a plentiful staff of student Residential Advisors (RAs) and Graduate Associates (GAs), student Information Technology Advisors (ITAs), and many student managers in key positions.

Open to all Penn students, House tutoring sessions in math, chemistry, and economics are free and require no advance sign-up. For more information on tutoring within the Houses, visit: http://www.collegehouses.upenn.edu/life/tutoring.

Communication within the Curriculum (CWiC) (http://www.sas.upenn.edu/cwic)

Communication Within the Curriculum (CWiC)’s (http://www.sas.upenn.edu/cwic) undergraduate speaking advisors help students develop their public speaking skills through workshops and one-on-one advising sessions during walk-in hours. CWiC also offers two critical speaking seminars and a number of affiliate courses.

Grad-Undergrad Mentoring Program (http://www.gsc.upenn.edu/mentoring)

The Grad-Undergrad Mentoring Program (http://www.gsc.upenn.edu/mentoring) matches undergraduates with Penn graduate and professional students to learn more about preparing for, applying to, and succeeding in graduate school.

Penn College Achievement Program (PENNCAP) (http://www.vpul.upenn.edu/eap/penncap)

The Penn College Achievement Program (http://www.vpul.upenn.edu/eap/penncap) works closely with a diverse group of students, many from low-income and/or first-generation (http://www.vpul.upenn.edu/Low-IncomeFirst-GenerationStudents) backgrounds, to support their success at Penn. Among the many services offered are laptop and textbook loans, summer tuition grants, tutoring and advising.
SCUE Preceptorials ([http://preceptorials.org/newsite](http://preceptorials.org/newsite))

Preceptorials are short, small, non-credit seminars generated by students and led by distinguished faculty, outstanding graduate students, lauded external educators and exceptional undergraduate students. The program is designed to foster an interactive and educative environment that values learning for learning’s sake. To that end, there are no grades or tests. Preceptorials are not graded, so that students are given the opportunity to have a guided learning experience outside the traditional setting of a classroom. Most Preceptorials emphasize a hands on approach to learning, and meet once over the course of the semester.

Tutoring Center ([http://www.vpul.upenn.edu/tutoring](http://www.vpul.upenn.edu/tutoring))

The Tutoring Center ([http://www.vpul.upenn.edu/tutoring](http://www.vpul.upenn.edu/tutoring)) offers Penn undergraduates a wide variety of free, accessible, and convenient options to supplement their academic experience.

Weingarten Learning Resources Center ([http://www.vpul.upenn.edu/lrc](http://www.vpul.upenn.edu/lrc))

The Weingarten Center provides academic support services and programs for undergraduate, graduate, and professional students at the University of Pennsylvania through its two offices. The services and programs of both offices are free and confidential.

Office of Learning Resources ([http://www.vpul.upenn.edu/lrc/lr](http://www.vpul.upenn.edu/lrc/lr))

The Office of Learning Resources ([http://www.vpul.upenn.edu/lrc/lr](http://www.vpul.upenn.edu/lrc/lr)) staff provide a wide range of programming and professional consultation services in university-relevant skills such as reading, writing, study strategies, and time management.

Student Disabilities Services ([http://www.vpul.upenn.edu/lrc/sds](http://www.vpul.upenn.edu/lrc/sds))

Student Disabilities Services ([http://www.vpul.upenn.edu/lrc/sds](http://www.vpul.upenn.edu/lrc/sds)) staff work closely with students who self-identify with disabilities in order to ensure equal access to all University programs, activities and services.

Libraries

Penn has a large and service-oriented library system. The combined 15 libraries on campus contain over 4,500,000 volumes, subscribe to more than 33,000 serials, and offer a rapidly growing set of electronic services which can be accessed from home or office, as well as in the libraries.

- Locations and hours ([http://www.library.upenn.edu/locations](http://www.library.upenn.edu/locations))

Research

- For Research Guides by subject, visit: [https://guides.library.upenn.edu/hometabs](https://guides.library.upenn.edu/hometabs).
- To get help with research, students can submit questions online ([http://faq.library.upenn.edu/ask](http://faq.library.upenn.edu/ask)) or make an appointment for in-person assistance ([http://faq.library.upenn.edu/widget_standalone.php?la_widget_id=3206](http://faq.library.upenn.edu/widget_standalone.php?la_widget_id=3206)).

Canvas

Canvas is the online learning management system used at Penn. A valid PennKey is required to login to the system.

- To login to Canvas, visit: [https://canvas.upenn.edu](https://canvas.upenn.edu).
- For help with Canvas, visit: [http://guides.library.upenn.edu/canvas_students](http://guides.library.upenn.edu/canvas_students).

Quaker Consortium

University of Pennsylvania students have a unique opportunity to study at Bryn Mawr, Haverford, or Swarthmore Colleges during the fall and spring terms of the academic year.

School specific policies:

- College of Arts and Sciences ([https://www.college.upenn.edu/quaker-consortium](https://www.college.upenn.edu/quaker-consortium))
- The Wharton School ([https://undergrad-inside.wharton.upenn.edu/quaker-consortium](https://undergrad-inside.wharton.upenn.edu/quaker-consortium))

Registrar's Office

The Office of the University Registrar ([http://www.upenn.edu/registrar](http://www.upenn.edu/registrar)) supports teaching and learning at the University of Pennsylvania by maintaining the integrity of academic policies and the student information system. We are the stewards of Penn’s student records from application to degree conferral in perpetuity.

We provide the following services to Students, Faculty, Alumni, Parents, Staff and many other constituents across our campus:

- Support Students and Departments during Registration
- Reserve Classrooms for Courses and Academic Events
- Schedule Final Exams
- Record and Report Enrollment and Final Grades
- Certify Attendance
- Manage Veterans Affairs Educational Benefits
- Issue Transcripts
- Verify Graduation and Degrees

A transcript is a representation of a student’s academic record while at the University of Pennsylvania.

Official transcripts are ordered through the Office of the University Registrar website ([http://www.upenn.edu/registrar/student-services/transcripts.html](http://www.upenn.edu/registrar/student-services/transcripts.html)). Unofficial transcripts are available at anytime, online for students and alumni class of 1988 or later via the Penn in Touch portal ([https://weblogin.penkey.upenn.edu/login?factors=UPENN.EDU,UPENN.EDU-PORTAL&cosign-isc-seo-portal_prodng-0&https://pennintouch.apps.upenn.edu/pennInTouch/jsp/fast2.do](https://weblogin.penkey.upenn.edu/login?factors=UPENN.EDU,UPENN.EDU-PORTAL&cosign-isc-seo-portal_prodng-0&https://pennintouch.apps.upenn.edu/pennInTouch/jsp/fast2.do)).

The University Registrar’s office provides verification of dates a student attended Penn and degrees awarded by the Schools of the University. Details concerning Academic Certification may be found on the University
Registrar web page (http://www.upenn.edu/registrar/student-services/academic-certification.html).

Research
As one of the world’s leading research universities, Penn has a broad array of faculty conducting cutting-edge research in all disciplines. There are many routes into research involvement for undergraduates, including research-intensive courses, independent study with a faculty member, and summer programs of varying types and foci.

The Center for Undergraduate Research and Fellowships (https://www.curf.upenn.edu/research) is a resource for undergraduates in all traditional programs who are interested in getting involved in research opportunities around campus and around the world. CURF helps Penn undergraduates become involved in research by helping you identify resources, narrow your search, and shape your initial inquiries so you can find appropriate faculty mentors and research funding.

- Penn Undergraduate Research Mentoring Program (https://www.curf.upenn.edu/content/penn-undergraduate-research-mentoring-program)
- Research Opportunity Directory (https://www.curf.upenn.edu/research-opportunity-directory)
- Research Grants (https://www.curf.upenn.edu/research-grants)
- Summer Humanities Research Internships (https://www.curf.upenn.edu/summer-humanities-internships)

College of Arts and Sciences
Research reinforces and instills mastery of academic skills: how to formulate a question or hypothesis, how to gather evidence, and how to answer that question or test that hypothesis.

One of the major advantages of being an undergraduate at a research university is the wide variety of opportunities available for scholarship. Research in the College encompasses a range of activities. In some disciplines, such as English, philosophy and history, students read original works, or the primary literature, and look for new connections and interpretations of these writings. In areas such as anthropology or history of art, students study artifacts, works of art or ancient languages, gaining insights on earlier civilizations and the lives of those who contributed to them. Some students do research in biology, chemistry or psychology, seeking insights on genetic coding, molecular structure or animal behaviors.

Sometimes, students may receive College credit for research activities and scholarship, or receive work-study funds or stipends from faculty grants.

For more information, visit: https://www.college.upenn.edu/research/.

School of Engineering and Applied Science
Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below are examples of student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, visit: http://www.seas.upenn.edu/undergraduate/research/index.php.

Finding a Research Mentor and Research Experiences
Students are encouraged to explore the Penn Engineering Faculty Expertise Directory (http://www.seas.upenn.edu/directory/departments.php), featuring the School’s standing faculty and is searchable by department, research center affiliation, and research expertise keyword. Users can identify which faculty are conducting research in a specific area and contact faculty members whose research interests them.

The Engineering Dean’s Advisory Board (EDAB) puts together a guide for fellow students that gives step-by-step instructions and tips on how to secure research positions as an undergraduate.

For Bioengineering majors, the Penn student chapter of the Biomedical Engineering Society (BMES) has assembled its own student guide on starting up research.

Summer Undergraduate Research in Engineering (SURE)
Penn Engineering’s world-acclaimed faculty, along with state-of-the-art research laboratories and highly interdisciplinary curricula, offers summer research opportunities for talented undergraduates who seek hands-on research experience. From robotics and computer animation, nanotechnology, genomics and biotechnology, Penn’s centers and institutes are at the forefront of research on multiple scientific and technological frontiers.

International Summer Undergraduate Research in Engineering (iSURE)
Opportunities for undergraduates are available during the summer to spend eight to 12 weeks on a research internship in one of Penn Engineering’s partner institutions abroad.

Littlejohn Undergraduate Research Program
Thanks to a generous gift by Angus Littlejohn, the School of Engineering is able to offer Summer Research Opportunities to Penn Engineering Students. The program is open to rising, sophomores, juniors and seniors.

The program intends to provide students the opportunity to get involved in hands-on engineering research under the supervision of a faculty member. Topics of research include all areas covered by the departments in the School of Engineering and Applied Science. Students will receive a stipend of $4,500 for a 10 week period.

Rachleff Scholars Program
This program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

School of Nursing
The Office of Nursing Research (http://nursing.livewhale.net/research/onr), along with our four research centers (http://nursing.livewhale.net/research/research-centers) and partnerships across Penn, provide students with resources and support that are virtually unparalleled in our field. Students, from undergraduates to doctoral students, have numerous opportunities to engage in research and work alongside some of the most recognized researchers in their fields.

For more information, visit: https://www.nursing.upenn.edu/research/.
The Wharton School

Research provides an individualized method of learning and an in-depth treatment of a topic of personal interest with input from a faculty expert. Research experience is helpful if applying for distinguished international fellowships and is important if going on to graduate studies in an analytical discipline. Research skills are useful for decision-making in the private and public sectors and are required in academic positions. Below you can find a variety of research opportunities and scholarship programs.

- Courses (https://undergrad-inside.wharton.upenn.edu/research/courses)—Create "tools" in a research-methods course.
- Research assistantships (https://undergrad-inside.wharton.upenn.edu/research/assistantships)—Learn by executing research-related tasks while working on a project for a faculty member.
- Summer programs (https://undergrad-inside.wharton.upenn.edu/research/summer-programs)—Gain hands-on experience from proposal to presentation through a project commensurate with program duration.
- Scholars programs (https://undergrad-inside.wharton.upenn.edu/scholars-programs)—Gain hands-on, in-depth experience from proposal to presentation via a senior thesis and other activities.
- Wharton PhD Submatriculation Program (http://doctoral-inside.wharton.upenn.edu/submatriculation)—Submatriculate into a PhD program in Accounting, Finance, Health Care Systems, Insurance and Risk Management, Management, Marketing, Operations and Information Management, Business and Public Policy, or Statistics.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/research/.

Guidelines for Research in the Community

A significant number of Penn faculty and students are engaged in research that involves the study of the Philadelphia community, and, in particular, West Philadelphia, or that involves community members as research subjects. As in all research conducted under the auspices of the University, such research should adhere to the appropriate protocols for the protection of human subjects and must be approved by the University’s Institutional Review Board.

Although the Institutional Review Board does an excellent job of protecting individual subjects, community-based research raises additional questions about research protocols and approaches. The populations studied are often Penn’s neighbors, and as such, the approaches undertaken should reflect the importance of that relationship to Penn, and the values of mutual respect and trust that should guide all of our collaborative activities with the community. The University also recognizes that mutual respect and trust are necessary preconditions for the honest and open exchange of ideas that is essential to genuine learning and the advancement of academic inquiry.

The University views its relationship with the Philadelphia community as a partnership. Accordingly, and to the extent possible, Penn faculty and students should engage the community in helping to plan research projects. Also, the findings should be shared with the community so that all parties can benefit.

1. As in all research involving human subjects, undertaken under University auspices, research in the community must be approved by the Institutional review Board, and meet all of the required protections of human subjects.
2. Whenever possible, researchers investigating community issues should work with community-based organizations to discuss all aspects of the research process, including problem definition, hypothesis generation, study design, data analysis, and dissemination.
3. Whenever possible, researchers should have a dissemination plan that includes distribution or presentation of results to community members and organizations, particularly those who participated in the research.
4. Researchers should determine if other projects are underway in a community, and whenever possible, coordinate efforts with other research projects to minimize disruption and maximize positive impacts on community members and organizations.
5. In the spirit of mutual learning and benefit, researchers should consider how study results could be used to the benefit of the community whenever possible, and should make extra efforts to communicate those recommendations to appropriate community members.

(Source: Almanac, May 19/26, 1998, Volume 44, No. 34 (http://www.upenn.edu/almanac/v44/n34/orresguide.html))

Guidelines for Student Protection in Sponsored Research Projects

Participation in sponsored research may be an important part of a student's undergraduate or graduate education, as well as an important source of his or her financial support. The University recognizes that the student must be protected in cases where the terms of the research project conflict with the student's academic progress, and affirms that the student has the right to reject such funding if he or she chooses to do so. The University recognizes the sensitivity of these issues, since they pertain directly to the relationship of personal trust which exists between a student and his or her faculty sponsor; they are also fundamental to the development of the student's intellectual and moral integrity. Therefore, the University adopts the following policy:

1. The University recognizes the central role of sponsored research in fostering educational opportunities for students at all levels and in every discipline and encourages the involvement of students in research projects. On rare occasions, the terms of a research agreement may contain limitations which may inhibit the participation of students, such as delays in publication of results which might conflict with a student's academic schedule. In such cases, the University requires that careful consideration be given to the appropriateness of student participation and that the Faculty Sponsor or Principal Investigator assures in advance that students are fully aware of any such restrictions.
2. The University affirms the student's right to know the source(s) of financial support for his or her educational and living expenses, individual research projects, or the research activities of a faculty sponsor in which the student is involved and from which the student obtains financial support. It is the responsibility of the faculty sponsor to make this information known to the student.
3. Should a student choose to reject financial assistance, the University affirms and upholds the student's right to do so.
Policy on Undergraduate Students, High School Students and Non-affiliates Participating in Research in Penn Research Facilities

For the purpose of this policy, non-affiliates are individuals who are not University of Pennsylvania faculty, staff, graduate students or post-doctoral trainees. The Principal Investigator is responsible for assuring that all students and non-affiliates working in his/her laboratory are appropriately trained, supervised and comply with the requirements of this policy. At a minimum this training must include Profiler and all training determined by Profiler such as EHRS, HIPAA, IACUC, etc.

- Students who are not yet in High School are not permitted to participate in laboratory activities.
- Non-affiliates may not serve in laboratories as unpaid volunteers or trainees without University approval.

This policy applies to the three categories listed below.

A. High School Students (HSS): HSS are permitted to participate in laboratories at Penn provided that all of the following conditions are met and none of the prohibitions set forth in item (7) are violated.

1. All programs for HSS must comply with the requirements described in the Vice Provost for University Life current year’s “Special Summer Programs Protocols.”
2. Each HSS must have a Principal Investigator or Sponsor who agrees to supervise and be responsible for the HSS while the student is present in the laboratory. The HSS must be appropriately supervised at all times when in the laboratory.
3. HSS may not be employed in laboratories nor perform the duties and responsibilities of an employee. (HSS participating as trainees in officially sanctioned and approved programs may receive a stipend in connection with the program.)
4. A Consent/Signature sheet must be submitted to the Principal Investigator/Sponsor with signatures from the HSS and his/her parents.
5. The Principal Investigator/Sponsor must provide the HSS with hazard specific information and appropriate personal protective equipment and instruct the student in its use and disposal.
6. Each HSS must attend Laboratory Safety training provided by EHRS before the laboratory activity begins. If a student is working in a lab where radioactive materials are used, Radiation Safety Training is also required.
7. HSS are not permitted to participate in the following activities in laboratories:
   i. Any laboratory or facility designated as BSL-3
   ii. Any laboratory or facility in which Select Agents or Explosives (as defined in OSHA Hazard Communication Standard Appendix B) are used or stored.
   iii. Work with acutely toxic substances or reproductive hazards (as defined in OSHA Hazard Communication Standard Appendix A).
   iv. Operate farm machinery
   v. Work in machine shops

8. HSS are permitted to participate in the following activities only after completing specialized training:
   i. Work with recombinant or synthetic DNA (EHRS r-s-DNA online training)
   ii. Limited work with radioactive materials is permitted. Work must be performed under the supervision and in the physical presence of a trained radiation worker. Only H-3, C-13, P-32 and S-35 in amounts less than 100 uCi may be used.
   iii. HSS who will work with live animals must be associated with a specific ARIES animal research protocol, have their qualifications or training described and the specific procedures that they will be performing/assisting identified. Prior to working with animals, HSS must complete all necessary IACUC-related training associated with the HSS’ role on the protocol.
   iv. HSS who will work with non-human primates or tissue/body fluids from non-human primate must complete specialized IACUC-related training in addition to standard training for other species.

B. Undergraduates (UG): UG from Penn or from other institutions are permitted to participate in laboratories at Penn provided that all of the following conditions are met and none of the prohibitions set forth in item (4) are violated.

1. Each UG must have a Principal Investigator/Sponsor who agrees to supervise and be responsible for the UG while the student is present in the laboratory.
2. The Principal Investigator/Sponsor must provide the UG with hazard specific information and appropriate personal protective equipment and instruct the student in its use and disposal.
3. Each UG must attend Laboratory Safety training provided by EHRS before the laboratory activity begins. If a student is working in a lab where radioactive materials are used, Radiation Safety Training is also required.
4. UGs are not permitted to participate in the following activities in laboratories:
   i. Any laboratory or facility designated as BSL-3
   ii. Any laboratory or facility in which Select Agents or Explosives (as defined in OSHA Hazard Communication Standard Appendix B) are used or stored.
5. UGs are permitted to participate in the following activities in laboratories after completing specialized training:
   i. Work with recombinant DNA
   ii. Operate farm machinery
   iii. Work in machine shops
   iv. Work with radioactive material if over age 18. Undergraduate students under the age of 18 must follow the same restrictions as High School Students for this component.
6. UGs who will work with live animals must be associated with a specific ARIES animal research protocol, have their qualifications or training described and the specific procedures that they will be performing/assisting identified. Prior to working with animals, UGs must complete all necessary IACUC-related training associated with the UGs’ role on the protocol.
7. UGs who will work with non-human primates or tissue/body fluids from non-human primate must complete specialized IACUC-related training in addition to standard training for other species.

C. Non-Affiliates (NA) with undergraduate degrees: Post graduates including visiting scholars and trainees (not Penn faculty, staff or students)
1. NA must have a Principal Investigator/Sponsor who agrees to supervise the NA while he/she is present in the laboratory.

2. The Principal Investigator/Sponsor must provide the NA with hazard specific information and appropriate personal protective equipment and instruct the NA in its use and disposal.

3. Each NA must affirm that he/she completed a Laboratory Safety course at his/her home institution or complete relevant Laboratory Safety training offered by EHRS before the laboratory activity begins.

4. A NA is permitted to participate in the following activities after completing specialized training:
   i. A laboratory or facility designated as BSL-3 or ABSL-3
   ii. A laboratory or facility in which Select Agents (DHHS Security Risk Assessment Approval required) or Explosives are used or stored.
   iii. Work with recombinant DNA
   iv. Work with radioactive materials
   v. Operate farm machinery
   vi. Work in machine shops.

5. NAs who will work with live animals must be associated with a specific ARIES animal research protocol, have their qualifications or training described and the specific procedures that they will be performing/assisting identified. Prior to working with animals, NAs must complete all necessary IACUC-related training associated with the NAs’ role on the protocol.

6. Work with non-human primates or tissues/body fluids from non-human primates requires specialized IACUC-related training in addition to standard training for other species.

Scholars Programs

The following programs are available to all undergraduate students.

Benjamin Franklin Scholars

The Benjamin Franklin Scholars (https://www.curf.upenn.edu/bfs) are one of Penn’s most distinctive undergraduate communities.

Each year we welcome a group of extraordinary incoming students, committed to the transformative power of ideas. Benjamin Franklin Scholars are selected based on their interest in, and demonstrated capacity for, a deep engagement in the liberal arts and sciences, both as ends in themselves and as engines of change in the world. With unique course offerings, and under the guidance of extraordinary faculty and advisors, we encourage our students to pursue, in the spirit of Franklin himself, our guiding principles of breadth, curiosity, and a tinkering habit of mind.

We are a home for students who seek the advantages of wide-ranging knowledge, whatever particular educational path they choose. We look for spirited, independent people who find their own passions and are predisposed to explore their own ideas, wherever they might lead. We welcome restless minds who are not content just to appreciate great ideas as abstractions up on a shelf, but who see them as transformative; changing minds and so changing the world. We are a community of students and faculty who find value in the saying of the great classical writer Plutarch, from whom Franklin himself claims to have “read abundantly” and see a truly great education as a kind of playing with fire.

BFS welcomes students in all the undergraduate schools: The College, Engineering, Wharton, and Nursing. Parts of the program, including admissions, work a bit differently in the different schools. For all our scholars, the BFS experience includes opportunities for overseas internships, a presentation of research to the BFS community, and our Seminars – a set of enriching opportunities to work on challenging topics, without requiring extensive prerequisites, both inside and outside of their major fields of study.

University Scholars

The University Scholars program (https://www.curf.upenn.edu/university-scholars) provides an exceptional academic environment for intellectually dynamic students who have already demonstrated their commitment and dedication to research.

Through mentoring, research funding and scholarly events the program encourages and supports students to make the most of their undergraduate years, not only with in-depth research, but also by making an early start in graduate and professional courses, ranging widely or in some cases focusing narrowly on their curricular choices.

The focus of the University Scholars program is undergraduate research. In order to aid students in doing creative and in-depth research, the University Scholars has a fund with which to help students defray research expenses. Funding is meant to cover the expense of the research itself; this most often pertains to room and board costs over the summer months. Occasionally, students’ research will take them away from Penn. In those instances, the University Scholars program may be able to fund travel expenses as well.

Civic Scholars

Penn Civic Scholars (http://www.vpul.upenn.edu/civichouse/civicscholars) is a unique program providing undergraduates with a sustained four-year experience in civic engagement and scholarship. The program culminates in certification upon graduation and designation as a Civic Scholar on the student’s transcript.

The Civic Scholars program is based on a few basic principles:

- Civic engagement and academic work are mutually reinforcing.
- Meaningful and sustained involvement in community affairs while at Penn is the base for life-long civic commitments and contributions.
- Undergraduates can conduct significant applied social and public policy research through a multi-year preparatory process.
- Forming a community of dedicated students and faculty will encourage distinctive civic service and scholarship.

The following programs are available to students in a particular school.

College of Arts and Sciences

Integrated Studies Program

The Integrated Studies Program (ISP) (https://www.college.upenn.edu/integrated-studies) is the freshman curriculum for Benjamin Franklin Scholars pursuing degrees in the College of Arts and Sciences.

Deeply rooted in the liberal arts tradition of acquiring and applying expansive knowledge, this residential academic program invites highly-motivated students to examine complex themes through the integration of multiple academic disciplines and methodologies.

Students are guided through the semester by some of Penn’s leading faculty. By investigating the same ideas under three distinct lenses, drawing simultaneously from the humanities, social sciences and
School of Engineering and Applied Science

Rachleff Scholars
The School Of Engineering and Applied Science is pleased to announce the Rachleff Scholars Program (https://www.seas.upenn.edu/undergraduate/research/rachleff-scholars.php). The Program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

The Rachleff Scholars Program is open to rising sophomores with at least a 3.4 Cumulative GPA and strong interests in engineering research. Each student accepted into the Rachleff Program is required to complete work in three separate areas: summer research experience, honors coursework, and scholarly community activities.

School of Nursing

Benjamin Franklin Scholar- Nursing
As a Benjamin Franklin Scholar - Nursing (https://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program), you will engage in an intensive academic experience, along with peers in the College of Arts and Sciences, the Wharton School and in the School of Engineering and Applied Science, to complete the undergraduate Nursing major with an intensive liberal arts component. In addition to a variety of campus-wide programs as part of BFS, you will be able to enroll in the justly famed BFS Seminars - course taught by expert faculty from across campus in a variety of topics.

The Wharton School

Joseph Wharton Scholars
Founded in 1988, the Joseph Wharton Scholars (https://undergrad-inside.wharton.upenn.edu/jws) program is designed to emphasize the importance of scholarly research and the liberal arts and sciences within the framework of a business education. Students in the program are required to take scholars courses both in Wharton and outside of Wharton (in the College of Arts & Sciences, Nursing, and/or Engineering), engage in a significant research project, and participate in a variety of academic, career-oriented, and social activities.

The JWS program is the Wharton component of the Penn-wide Benjamin Franklin Scholars (https://undergrad-inside.wharton.upenn.edu/bfs) program, through which students gain access to BFS Seminars. In addition to the course requirements, students must maintain a minimum 3.4 GPA.

Joseph Wharton Scholar students must take three non-Wharton BFS Seminars as well as four Wharton honors courses (which may include Wharton BFS Seminars). The Wharton courses include honors sections of BEPP 250, FNCE 100, FNCE 101, MKTG 101, MGMT 101, MKTG/STAT 476, STAT 430, STAT 431, WH 399; and the Wharton BFS Seminars: LGST 101, LGST 210, and LGST 215. All JWS students must take Wh150x—Evaluating Evidence as one of their four honors classes in Wharton.

Public Policy Research Scholars
The Public Policy Research Scholars (PPRS) (https://publicpolicy.wharton.upenn.edu/for-students/public-policy-research-scholars) offers a unique opportunity for students to study and explore public policy.

PPRS is an interdisciplinary certificate program intended for undergraduates with a background in economics, who want to explore the impact of U.S. public policy on the domestic economy.

The PPRS program is not a major. Instead, it offers a supplemental course of study, focusing on the quantitative analysis of public policy at the federal level, that can be pursued alongside any major, in any of Penn's undergraduate schools. Beyond the curriculum, students also are required to do at least one public policy summer internship, for which they will receive funding from the Penn Wharton Public Policy Initiative. They also will have opportunities to assist with faculty-led policy research on campus. Through PPRS, we aim to create a tight-knit cohort of undergraduates from across the University who are committed to gaining the skills and experience necessary to critically assess U.S. public policy, as well as to prepare for graduate study and career opportunities in the field.

The core skills at the heart of PPRS include:

- Economic and political analysis of public policy, for assessing why, how, and with what degree of success the government designs and implements policy.
- Statistical thinking and quantitative analysis of economic data.
- Knowledge of the policymaking process.
- The application of theoretical and quantitative tools to practical, real-life policy questions.

Students that complete the program will have the designation “Public Policy Research Scholar” noted as an honor on their transcripts and will receive a certificate upon graduation.

Wharton Research Scholars
Wharton Research Scholars (https://undergrad-inside.wharton.upenn.edu/wrs) is an intensive one-year research program for a select group of students who are interested in conducting research under the supervision of some of Wharton's preeminent faculty members. As part of the program, participants complete an honors thesis.

Students apply to work on a specific project they propose in consultation with a Wharton faculty member who agrees to act as their faculty mentor. Students are allowed to have more than one faculty mentor provided at least one is a member of the Wharton faculty.

Throughout the year, students convene to discuss progress, strategies, and challenges within their projects. This interaction fosters a strong scholarly community where students can learn from each other's experience. The research scholars also meet regularly with their faculty mentors who advise the students throughout the year. The program culminates with final presentations and publication of research papers on the University of Pennsylvania Libraries' ScholarlyCommons (http://repository.upenn.edu/wharton_research_scholars).

Submatriculation
Penn offers students many opportunities to begin a graduate program while completing an undergraduate degree. Students may apply for
admission as submatriculants to a variety of the University's graduate and professional areas of study. Submatriculation programs exist in the four undergraduate schools and in several of Penn's graduate schools.

Application for admission as a submatriculant is made within the regular deadlines and processes for application to the graduate program of interest, usually during the student's junior year. Prior to applying for admission as a submatriculant, a student should meet with an academic advisor in both the undergraduate school and in the intended graduate program.

Policies, options, and procedures for submatriculation vary depending on a student's undergraduate school:

- College of Arts and Sciences (https://www.college.upenn.edu/submatriculation)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/degrees/submatriculation.php)
- School of Nursing (https://www.nursing.upenn.edu/academics/a-penn-nursing-education/submatriculation)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/submatriculation)

For more information about interdisciplinary submatriculation opportunities, click here (p. 238).

School of Arts and Sciences

For a list of School of Arts and Sciences departments that consider submatriculation applications, visit: https://www.college.upenn.edu/submatriculation/.

In addition to submatriculating within a department, College undergraduate students are also eligible for the following specialized submatriculation programs:

**BA/JD Program in Arts & Sciences and Law**

This rigorous program offers an opportunity for highly qualified and motivated College students to apply to Penn Law School during what is generally the first semester of a student's junior year (between 16 and 23.99 c.u.). If accepted, the student will submatriculate into the J.D. program in their senior year. Applicants must be committed to the study of law in its theoretical and practical aspects.

For more information, visit: https://www.college.upenn.edu/node/2398.

Bio-Dental Program

Bio-Dental submatriculation is a seven-year joint program of the College and Penn's School of Dental Medicine for students who will major in Biology and who wish to enroll in the Dental School during their senior year in the College. Application to the program must be made at the time of application to Penn. Applicants will be notified of their conditional acceptance into the program when they are notified of their admission to Penn. Full acceptance into the program is made after the student's junior year and is based on academic performance during those three years and meeting the admissions standards of the Dental School.

For more information, visit: http://www.bio.upenn.edu/https%3A/%252Fwww.bio.upenn.edu/accelerated-dental-program.

Roy and Diana Vagelos Program in Molecular Life Sciences

Ambitious and highly motivated students interested in the molecular view of life should consider the Vagelos Scholars Program in Molecular Life Sciences. Students begin as freshmen and major in two sciences or submatriculate for a Master of Science degree in the standard four years. Students in this program plan to pursue scientific research careers. Scholars are invited from the admitted pool of high school seniors at the beginning of April at the discretion of the faculty director and the admissions committee.

For more information, visit: http://www.sas.upenn.edu/biochem/vspmls.html.

School of Engineering and Applied Sciences

- Both BSE and BAS degree students in Penn Engineering may apply for submatriculation into engineering master's programs. (Note that Engineering students are not permitted to submatriculate into the Master of Computer and Information Technology (MCIT) program.)
- Qualified undergraduates in Penn's other schools may apply to submatriculate into any of the Penn Engineering master's degree programs, subject to their home school's rules and regulations.

In addition to submatriculating within a department, Engineering undergraduate students are also eligible for the following specialized submatriculation program:

**Penn Engineering/Penn Law Program**

Penn's Law School offers an opportunity for qualified juniors in Penn Engineering to apply early to the Law School and submatriculate into the JD program beginning their fourth year. The program is designed as a 3-year + 3-year accelerated program for highly qualified Engineering undergraduates either in the Bachelor of Applied Science (BAS) or Bachelor of Science in Engineering (BSE) degree programs.

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/submatriculation-law.php.

School of Nursing

Nursing undergraduate students are eligible for the following specialized submatriculation programs:

**BSN/JD Program**

Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in the JD program (https://www.law.upenn.edu/admissions/jd) during their junior year. If a student is admitted, they will begin taking courses at the law school during their fourth year, completing both the BSN and JD degrees in six years, instead of the usual seven.
For more information, visit https://www.nursing.upenn.edu/live/files/56-submatriculation-msn2016.

BSN/MSN Program
The demand for nurses with MSN degrees is higher than ever. Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in one of Penn Nursing’s MSN Programs (https://www.nursing.upenn.edu/academics/master-of-science-in-nursing-msn) while still undergraduates. Students are encouraged to apply (https://www.applyweb.com/upenn) as early as their junior year. If accepted, students will begin to take master's level coursework, earning credit toward both degrees.

For more information, visit: https://www.nursing.upenn.edu/live/files/56-submatriculation-law2015.

The Wharton School
Wharton undergraduate students are eligible for the following specialized submatriculation programs:

Wharton Law School Submatriculation Program
During the junior year, qualified Wharton undergraduate students may apply for admission to the Penn Law School and submatriculate into the Juris Doctor (JD) program. In this 3-year + 3-year accelerated program, the student’s fourth year of study is spent entirely at the Law School completing the first-year law curriculum. The remaining undergraduate and/or graduate degree requirements are then completed in the student’s fifth and sixth years of study.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

Wharton MBA Submatriculation Program
Qualified juniors in the Wharton Undergraduate Program may apply for early entry (submatriculation) into the Wharton Master of Business Administration (MBA) Program. In this 3-year + 2-year accelerated program, students’ fourth and fifth years of study are spent entirely as part of the MBA Program. The program is designed to attract academically talented undergraduates with well-defined career goals and significant work experience. Students apply in the junior year.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

Wharton PhD Submatriculation Program
The goal of the program is to allow selected Wharton undergraduates the opportunity to submatriculate into one of Wharton’s Ph.D. programs directly from the undergraduate program.

For more information, visit https://doctoral-inside.wharton.upenn.edu/submatriculation/.

Summer Sessions
Penn Summer (http://www.sas.upenn.edu/summer) offers a wide variety of summer programs to current Penn students, with more than 300 classes available during the day or evening.

Current Penn students are encouraged to take advantage of advising resources during the summer term in the same manner as during the fall and spring. Before enrolling in summer courses, students should consult with their academic advisor (p. 245) regarding their intended coursework to ensure adequate degree progress.

Penn Summer On-Campus
There are three academic sessions during Penn Summer On-Campus (http://www.sas.upenn.edu/summer/programs/on-campus), and more than 300 courses are offered from academic departments across the university. Flexible day and evening classes are offered to fit students’ schedule and needs.

For more information, visit: http://www.sas.upenn.edu/summer/programs/on-campus.

Penn Summer Online
Not going to be in Philadelphia this summer? Consider taking one of Penn's Summer Online (http://www.sas.upenn.edu/summer/programs/online) courses. Online courses allow students to earn credit as they participate in real-time with their Penn instructor and peers while having 24/7 access to their virtual learning materials.

For more information, visit: http://www.sas.upenn.edu/summer/programs/online.

Penn Summer Abroad
Students can earn Penn credit as they experience culture in another country with Penn Summer Abroad (http://www.sas.upenn.edu/summer/programs/abroad). Students travel with Penn faculty and other undergraduates with accommodations and excursions planned for them, enjoying the flexibility of a short-term commitment and make the most of their summer break.

For more information, visit: http://www.sas.upenn.edu/summer/programs/abroad.

Transcripts
A transcript is a representation of a student’s academic record while at the University of Pennsylvania.

Wellness
There are a wide variety of resources available to support students at Penn. Some of the most commonly used resources are listed below.

View the Penn Peer Community Wellness Guide (http://pennua.org/media/cms_page_media/67/NEW-Wellness%20Guide-Aug11.pdf), developed by Penn Wellness, the Penn Undergraduate Health Coalition, the Vice Provost for University Life, and the Undergraduate Assembly.
Counseling and Psychological Services (CAPS) (http://www.vpul.upenn.edu/caps)
215-898-7021 (Nights and weekends, ask for CAPS counselor on call.)

Counseling and Psychological Services (CAPS) provides professional psychological and psychiatric services to undergraduate, graduate, and professional students who need support in fulfilling their academic, social, and personal objectives. Along with health and wellness partners throughout the Penn community, CAPS directly supports student mental health through counseling, crisis management, consultation, education and outreach, and training.

Division of Public Safety (https://www.publicsafety.upenn.edu)

A central source for information about police, fire, and emergency services, security services, including walking escorts, and special victim services. Public safety also manages the University’s extensive electronic security infrastructure.

Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds)
(215) 573-9235; TDD: (215) 746-6320

The Office of Student Disabilities Services (SDS), part of the Weingarten Learning Resources Center (http://www.vpul.upenn.edu/lrc), provides comprehensive, professional services and programs for students who self-identify with disabilities to ensure equal academic opportunities and participation in University-sponsored programs. Professional staff evaluate current documentation, determine individual students’ eligibility according to program guidelines, and determine reasonable accommodations for all qualified students with documented disabilities on a case-by-case basis, including academic adjustments, e-text, accessible campus housing, and transportation and parking. SDS also coordinates auxiliary aids and services such as sign language interpreters and Computer Aided Realtime Translation (CART) reporters, as well as the loan of equipment and assistive technologies.

Student Health Service (http://www.vpul.upenn.edu/shs)
215-746-3535

Student Health Service is a state-of-the-art primary care center dedicated to the health and well-being of Penn students. Student Health provides accessible, cost-effective, culturally-sensitive, and student-focused healthcare, including care for acute and chronic health problems, preventive health services, and health and wellness education. The Health Service works in close collaboration with our partners in the University Life Division, and with our colleagues in the University of Pennsylvania Health System (http://www.pennmedicine.org) to help ensure the health and wellness of the campus community.

Student Intervention Services (http://www.vpul.upenn.edu/intervention.php)
215-898-6081

Penn Student Intervention Services (SIS) assists the University community in handling emergencies or critical incidents involving the welfare and safety of students.

Office of the Chaplain (http://www.upenn.edu/chaplain)
215-898-8456

The staff of the Office of the Chaplain (http://www.upenn.edu/chaplain/about-us/staff) is available to students, faculty and staff for pastoral support, guidance, or informal advising and counseling. The Chaplain, an ordained clergy person, participates in campus ceremonies such as Convocation, Baccalaureate and Commencement and also officiates at weddings (http://www.upenn.edu/chaplain/about-us/weddings-blessings) and campus memorial services. The office serves and supports a wide range of student organizations (http://www.upenn.edu/chaplain/student-organizations), fellowships and religious communities on our campus. They also develop programming designed to improve interfaith understanding and build meaningful, collaborative relationships across religious difference. The Office of the Chaplain also maintains a range of service programming (http://www.upenn.edu/chaplain/community-service) in partnership with faith and community based organizations across the city of Philadelphia.

Campus Health (http://www.vpul.upenn.edu/shs/campushealth)

Part of Student Health Service, Campus Health (http://www.vpul.upenn.edu/shs/campushealth) seeks to empower the Penn community to Live Well through advocacy, education, and action. Campus Health staff focus on a wide variety of healthy living topics including sleep, hygiene, stress reduction, nutrition, exercise, tobacco-free lifestyles and bike safety. Key initiatives include annual flu immunization clinics, which vaccinate more than 2,000 people, and yearlong sexual wellness education through events such as "Sex Camp" and "Sex Jeopardy."

Alcohol and Other Drug Program Initiatives (http://www.vpul.upenn.edu/alcohol)

The Office of Alcohol and Other Drug Program Initiatives oversees critical areas of health and wellness that can challenge the academic success of Penn students. The office comprises alcohol policy initiatives, violence prevention, data collection, strategic project management, and (in a collaboration with Student Intervention Services (http://www.vpul.upenn.edu/intervention.php)) proactive crisis management.
POLICIES AND PROCEDURES

The following policies and procedures relate to undergraduate academics at Penn, and are organized by topic.

Most academic policies and procedures at Penn are school-based. University policies (p. 272) are also often administered through the schools. Students should consult with their school or program academic advisors (p. 245) with questions or for help in understanding academic policies and procedures.

- Course and Exam-Related Policies (p. 265)
- Grade and GPA-Related Policies (p. 268)
- Graduation Policies (p. 269)
- Leaves, Transfers, and Withdrawals (p. 270)
- Residency Requirement (p. 272)
- University Policies (p. 272)

Course and Exam-Related Policies

Students should consult with their academic advisors (p. 245) about course and course-related policies and procedures.

- Add/Drop Period (p. 265)
- Auditing (p. 265)
- Class Attendance (p. 265)
- Course Load (p. 265)
- Course Numbering & Academic Credit (p. 265)
- External Exam Credit (p. 266)
- Independent Study (p. 266)
- Liberal and Professional Studies Course Credit (p. 266)
- Part Time Status (p. 267)
- Petitions (p. 267)
- Policy on Common Midterm Examinations (p. 267)
- Retaking Courses (p. 267)
- Rules Governing Final Examinations (p. 267)
- Withdrawing From a Course (p. 268)

Add/Drop Period

Courses may be added only during the first two weeks of each semester; course may be dropped through the fifth week of the semester. Students should consult with their advisors before dropping below a defined number of course units (generally 4), which may have adverse consequences.

Some courses may have different add/drop policies; students should consult with their school’s advising office for further details.

Add/drop deadlines for each semester can be found in the Academic Calendar (p. 242).

School specific policies:

- College of Arts and Sciences (http://www.college.upenn.edu/class-attendance)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/attendance)

Course Load

Policies regarding minimum and maximum course loads vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/courseload)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/course-load)

Course Numbering & Academic Credit

Course Numbering

Courses are designated with a subject code and course number. The number assigned to a course generally denotes its level and may also indicate a course type.

- 1-399 Undergraduate courses
- 400-499 Mixed courses primarily for Undergraduate students
- 500-599 Mixed courses primarily for Graduate students
- 600-989 Graduate courses
- 990-999 Graduate individual study (thesis/dissertation) courses

Academic Credit at Penn

Auditing

Undergraduate students cannot officially audit courses; however, subject to the approval of the instructor, students may be permitted to sit in on some courses without registering. These courses will not appear on students’ records. Not all departments or schools allow this type of informal audit.

Class Attendance

Policies regarding class attendance vary by school and instructor.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/class-attendance)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/attendance)
All of Penn's undergraduate programs and many of its graduate and professional programs use course units (CUs) as a general measure of academic work and progress toward a degree. Penn's use of CUs conforms to the practices of peer institutions that use a similar system of academic credit including Brown, Duke, Harvard, Princeton, and Yale. A CU is a general measure of academic work over a period of time, typically a term (semester or summer).

The Schools of Law, Dental Medicine, and Veterinary Medicine do not use CUs. The Law School uses credit hours in a way that is consistent with law schools in the United States. The Schools of Dental Medicine and Veterinary Medicine use credit hours in ways that are consistent with professional education in those fields of study.

**Definition of a Course Unit**

A course unit (CU) is a general measure of academic work over a period of time, typically a term (semester or summer). A CU (or a fraction of a CU) represents different types of academic work across different types of academic programs and is the basic unit of progress toward a degree. One CU is usually converted to a four-semester-hour course. A degree from one of Penn's undergraduate programs requires the completion of 32 to 40 (or more) course units. Graduate and professional degrees vary in the number of years of study and the number of CUs required.

**Assignment of Academic Credit**

The course unit (CU) value of a course determined by the faculty reflects their judgment regarding the expected work of a student completing that course. Factors that may be considered when assigning academic credit for a course include scheduled class time, expected time outside of class, the difficulty and range of materials covered, and the mastery of specific knowledge through written reports, exams, and other evaluations.

The assignment of academic credit for a course is formally approved by the curriculum committee (or similar body) of the school when a course is first proposed. It is reviewed formally by the faculty of a program, department, or school through periodic program reviews or curriculum revisions. Additionally, it is reviewed by the faculty of a program, department, or school informally as part of ongoing assessments of curriculum and teaching effectiveness.

**Transfer Credit**

At the University of Pennsylvania, faculty in individual departments and schools make decisions about awarding credit for external courses (courses taken at a college or university other than Penn). Each school has policies and procedures for evaluating and awarding external credit. Judging both course content and student work, faculty determine whether external courses are equivalent to courses offered through their own departments and thus what credit, if any, to award. In awarding credit at Penn for external courses, faculty also determine how those credits may be used (e.g., whether they satisfy general education requirements or requirements in a major).

Undergraduate schools use a web-based, password protected application called the External Course Approval Tool, or (http://www.college.upenn.edu/xcat) XCAT (http://www.college.upenn.edu/xcat). When academic credit is awarded for courses taken at other institutions, typically courses worth 3, 4, or 5 semester hours or worth 5 quarter hours are awarded one course unit (CU) at Penn.

**External Exam Credit**

The University of Pennsylvania may award credit or advanced course standing to students who have taken Advanced Placement (AP), International Baccalaureate (IB), or other internationally-recognized examinations. Scores warranting University credit vary by department.

Penn Admissions External Exam Credit Policy (http://www.admissions.upenn.edu/apply/freshman-admission/externalexamcredit) (for prospective students)

**School specific policies:**

- College of Arts and Sciences (https://www.college.upenn.edu/placement)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/apib-credit)

**Independent Study**

Independent study allows students to pursue academic interests not available in regularly offered courses.

Students should approach their academic or departmental advisor to explore the possibility of pursuing independent study.

Further information about independent study procedures is available by school.

- College of Arts and Sciences (https://www.college.upenn.edu/research)
- School of Nursing (http://www.nursing.upenn.edu/live/files/157-independent-study-form-ipdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/independent-study)

**Liberal and Professional Studies Course Credit**

The College of Liberal and Professional Studies (LPS) (http://www.sas.upenn.edu/lps) is a division of the School of Arts and Sciences. LPS administers programs for adult, professional, and part-time students and offers late-afternoon, evening, and Saturday courses at the undergraduate, post-baccalaureate, and graduate levels. Traditional undergraduate students are eligible to take LPS courses. A certain number of spaces may be reserved for LPS students until the first week of classes, and some classes have restricted enrollments for LPS students only. Students should direct questions about enrollment policies and permits for specific LPS classes to LPS (http://www.sas.upenn.edu/lps).
Part Time Status

Traditional undergraduate students are generally expected to maintain full-time status. Students should consult with their school advising office for further details.

Please note that dropping to part-time status may affect other considerations, such as visa status, athletic eligibility, financial aid, and/or insurance coverage.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/part-time-policy)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/part-time-status)

Petitions

Students who believe a special circumstance might warrant an exemption from a school policy and/or requirement may submit a petition. Petitions are subject to review by a school-based committee. Students should first consult with their academic advisor.

Policies and procedures regarding petitions vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/petitions-policy)

- The Wharton School (https://undergrad-inside.wharton.upenn.edu/petitions)

Policy on Common Midterm Examinations

Instructors teaching a course with multiple sections who plan to schedule a common midterm examination outside the class’s regular meeting time must notify students of this event during the first week of the semester and be prepared to offer one or more make-up examinations to accommodate any student who is enrolled in a course that meets at the time of the common examination.

Students enrolled in a course that conflicts with the time of a common midterm examination must notify the instructor administering the common midterm examination of the conflict by the end of the course selection (add) period. Students may not be required to miss their regularly scheduled class.

(Source: Almanac – April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html))

Retaking Courses

Policies governing retaking a course vary by school.

School specific policies:

- College of Arts and Sciences (http://www.college.upenn.edu/node/2456)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/retaking-courses)

Rules Governing Final Examinations

1. No instructor may hold a final examination nor require the submission of a take-home final exam except during the period in which final examinations are scheduled. When necessary, exceptions to this policy may be granted for postponed examinations (see 3 and 4 below). No final examinations may be scheduled during the last week of classes or on reading days.

2. No student may be required to take more than two final examinations on any calendar day during the period in which final examinations are scheduled. If more than two are scheduled, the student may postpone the middle exam. If a take-home final exam is due on a day when two final examinations are scheduled, the take-home exam shall be postponed by one day.

3. Examinations that are postponed because of conflicts with other examinations or because more than two examinations are scheduled in the same day may be taken at another time during the final examinations period if the faculty member and student can agree on that time. Otherwise, they must be taken during the official period for postponed examinations.

4. Examinations that are postponed because of illness, a death in the family, for religious observance, or some other unusual event may be taken only during the official periods: the first week of the spring and fall semesters. Students must obtain permission from their Dean's office to take a postponed exam. Instructors in all courses must be willing to offer a make-up examination to all students who are excused from the final examination.

5. No instructor may change the time or date of a final exam without permission from the appropriate Dean.

6. No instructor may increase the time allowed for a final exam beyond the scheduled two hours without permission from the appropriate Dean.

7. No classes or required class activities may be held during the reading period.

8. The first examination of the day begins at 9 a.m. and the last examination concludes by 8 p.m. There will be one hour between exam time blocks.

9. All students must be allowed to see their final examination. Exams should be available as soon as possible after being graded with access ensured for a period of at least one regular semester after the exam has been given. To help protect student privacy, a student should have access only to his or her own exam and not the exams of other students. Therefore, for example, it is not permissible to leave student exams (or grades or papers) in publicly accessible areas.
10. Students may not be asked for their Social Security Numbers. Instructors may not publicly display a student’s Penn ID or any portion of the Social Security Number, nor use names, initials, or any personally identifiable information to post grades. Even when an identifier is masked or absent, grades may not be posted in alphabetical order, to protect student privacy.

11. Final exams for College of Liberal and Professional Studies (LPS) courses must be given on the regular class meeting night during the week of final examinations. No change in scheduling is permitted without unanimous consent of all students in the class and the director of LPS. LPS final exams may not be administered during the last week of class or on a reading day.

In all matters relating to final exams, students with questions should first consult with their Dean's offices. Faculty wishing to seek exceptions to the rules also should consult with their Dean's offices. Finally, the Council of Undergraduate Deans and SCUE urge instructors to see that all examinations are actively proctored.

(Source: Almanac – April 12, 2016, Volume 62, No. 30 (http://www.upenn.edu/almanac/volumes/v62/n30/rules-final-exams.html))

**Withdrawning From a Course**

Students may withdraw from a course through the end of the tenth full week of the semester, with the permission of the instructor, and should consult the Academic Calendar (p. 242) for the official withdrawal deadline for each semester.

Summer courses and part-of-term courses have different deadlines. Consult with an academic advisor for more information.

Withdrawal procedures vary by school:

- College of Arts and Sciences (http://www.college.upenn.edu/node/2438)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/ withdrawing)

**Grade and GPA-Related Policies**

Students should consult with their academic advisors (p. 245) about grading and GPA-related policies and procedures.

- Academic Standing (p. 268)
- Dean's List (p. 268)
- Grade Grievance Process (p. 268)
- Grades (p. 269)
- Incomplete Grades (p. 269)
- Pass/Fail (p. 269)

**Academic Standing**

The University of Pennsylvania expects students to maintain a minimum level of academic performance or risk being placed on Academic Probation. The requirements for good academic standing vary by school; students enrolled in more than one undergraduate school are subject to the academic standing policies of both schools.

The requirements for good academic standing are:

- College of Arts and Sciences (https://www.college.upenn.edu/academic-standing)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/academic-standing)

**Dean's List**

The Dean's List citation appears on the transcript and is awarded annually to any student who achieves a combined GPA of 3.7 for the fall and spring semesters, provided that during those two semesters, he or she has:

- Completed 6 or more credit units for letter grades
- Received no grades lower than C
- Completed all courses on time with no Incompletes, NRs, or GRs

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Dean's List in the academic year in which the violation occurred. The Dean's List citation will be removed from the transcript if the finding occurs after this honor has been posted or if the violation occurs during the summer term following the academic year in which this honor was awarded.

(Source: Almanac – April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html), updated May 3, 2016, Volume 62, No. 33 (http://www.upenn.edu/almanac/volumes/v62/n33/changes-to-policies.html))

**Grade Grievance Process**

Students who wish to have a course grade reviewed must first attempt to resolve the issue with the course instructor. For detailed policies and procedures, students should refer to the policies of the school in which the course was taken.

**School specific policies:**

- College of Arts and Sciences (http://www.college.upenn.edu/node/2413)
- School of Engineering and Applied Science
  - Students are advised to discuss the grading discrepancy/grievance directly with the course director/instructor. If the student is not satisfied with the conclusion of that meeting, the student can proceed to speak with the department chairperson about the grievance.
  - School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
  - The Wharton School (https://undergrad-inside.wharton.upenn.edu/grade-grievance)
Grades

The grade point average (GPA) is calculated at the end of every term based on the following grading scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
</tbody>
</table>

*There is no D-. Policies regarding grades vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/grade-policy)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/handbook/policy/grades.php)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/grades)

Incomplete Grades

The decision to grant an Incomplete is solely that of the instructor teaching the course. Students should request Incompletes rarely if at all; it is far better to plan ahead and use advising and academic support resources to ensure that coursework is finished on time. There are a number of consequences of requesting an Incomplete, and unfinished coursework may result in an F grade or delay of graduation. Generally, students with one Incomplete must finish the work by the fifth week of the next semester.

Specific procedures and policies regarding incomplete grades vary by school.

School specific policies:

- College of Arts and Sciences (http://www.college.upenn.edu/node/2415)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/incomplete)

Pass/Fail

Students may be eligible to take certain courses pass/fail. Policies regarding pass/fail options vary by school and course.

School specific policies:

- College of Arts and Sciences (http://www.college.upenn.edu/node/2417)
- School of Nursing (http://www.nursing.upenn.edu/live/files/172-bsn-handbookpdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/pass-fail)

Graduation Policies

Students should consult with their academic advisors (p. 245) about graduation requirements, Latin honors, and the procedures for applying for graduation and participating in graduation ceremonies.

- Graduation Honors (p. 269)
- Graduation Requirements (p. 269)
- Maximum Time to Complete a Degree (p. 270)

Graduation Honors

In recognition of distinguished academic achievement and high standards of academic integrity, the University of Pennsylvania awards Latin honors to undergraduate students based on the cumulative GPA on their transcripts at the time of graduation:

- **Summa Cum Laude:** 3.80 or higher
- **Magna Cum Laude:** 3.60 or higher, but less than 3.80
- **Cum Laude:** 3.40 or higher, but less than 3.60

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Latin honors. Notation of Graduation Honors will be removed from the transcript if the finding occurs after this honor has been posted.

(Source: Almanac, April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html), updated May 3, 2016, Volume 62, No. 33 (http://www.upenn.edu/almanac/volumes/v62/n33/changes-to-policies.html))

Graduation Requirements

Students are responsible for fulfilling all the requirements of their curriculum as determined by their school in order to graduate.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/policies)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/handbook/policy/course-requirements.php)
Leaves of Absence

Students take time away from their studies for a wide variety of reasons, including:

- Work on a political campaign
- Manage a medical concern
- Fulfill a family obligation
- Pursue career-related opportunities
- Complete military service
- Take a break

Students typically take a leave for a full academic year. Individual circumstances may require more or less time; the length of the leave is determined by the school. Students on leave should remain in contact with their advisor and update them about plan changes. The return from leave process supports students in a successful re-entry to academic life at Penn. When preparing to return, students must consult their school advising office to develop a plan that includes connection with appropriate resources.

While interrupting one’s studies to take time away may seem intimidating, a leave is a means to the successful completion of a degree, not a barrier to graduating. Students considering a leave should take time to think carefully about their goals for the time away and for when they return. Speaking with an academic advisor is an important first step. Students should also consult others important to their decision-making process, such as family members or, if the student intends to address health concerns during the time away, their healthcare provider(s). Your school advising office will help you connect with other campus resources as you prepare to take a leave of absence, such as Student Financial Services, Housing, and International Student and Scholar Services.

Procedures for requesting a leave vary by school.

School specific policies

- School of Arts and Sciences (https://www.college.upenn.edu/leave-of-absence)
- School of Nursing (https://www.nursing.upenn.edu/live/files/216-leave-of-absence-policy)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/leave)

Involuntary Leave of Absence Policy

I. Introduction

The University of Pennsylvania provides a wide range of services to support and address the mental and physical health needs of students. Our first concern is for the health and welfare of each individual in our community. Our goal is to enable all of our students to participate fully as members of Penn's academic community. However, students whose psychiatric, psychological, or other medical condition causes them to pose a threat to themselves or others, or causes them to significantly disrupt the educational and other activities of the University community, may be required to take a leave of absence from the University. Under these circumstances, students will be given the opportunity to take a voluntary leave through the process in place in their school. Should a student decline to take a voluntary leave, the University may determine...
that the student’s health and welfare, and/or the needs of the community, require a period of involuntary leave of absence. The following policy establishes the protocol under which an involuntary leave of absence may occur and the process for return from leave.

II. Guidelines

The University may place a student on an involuntary leave of absence or require conditions for continued attendance under the following circumstances when the student exhibits behavior resulting from a psychological, psychiatric, or other medical condition that:

• threatens, harms, or has the potential to harm the health or safety of the student or others;
• causes or threatens to cause significant property damage; or
• significantly disrupts the educational and other activities of the University community.

The process for withdrawal and return from leave is set forth below.

III. Withdrawal Process

When a student exhibits any of the behaviors described above, the matter should be brought to the attention of the Office of the Vice Provost for University Life who will be responsible for informing the Vice Provost for Education (or such person who holds those responsibilities at the time) that an involuntary leave may be warranted. The Office of the Vice Provost for University Life will manage the process, convene case conferences, and work with University and School offices to coordinate the delivery of services. In most cases, the student will be required to undergo an immediate assessment of his or her psychological, psychiatric or other medical condition. This assessment will be performed by Counseling and Psychological Services (CAPS), the Student Health Service, or other appropriate professionals.

The student will be notified that the Provost’s Office is seeking to determine whether he or she should be required to take a leave of absence. When reasonably possible, the student will be given the opportunity to confer with the Vice Provost for Education or his/her designee to provide additional information for consideration.

In consultation with the School Dean and the Office of the Vice Provost for University Life, the Vice Provost for Education will review the available information and make a decision that may include the following:

• that the student remain enrolled with no conditions;
• that the student remain enrolled subject to conditions (including a description of those conditions); or
• that the student be placed on an involuntary leave of absence.

If the University’s decision is to allow the student to remain enrolled subject to conditions, then the student’s failure to comply with the conditions may, after appropriate consideration, result in the imposition of an involuntary leave.

If the University’s decision is to require an involuntary leave of absence, the decision will also indicate the length of the leave and, in consultation with the student’s school, describe the conditions (if any) under which the student may seek to return from leave.

The student shall be informed in writing by the Vice Provost for Education of the leave decision and the basis for the decision, the effective date of the leave, and conditions for return (if applicable). If a student is permitted to remain enrolled subject to conditions, the student shall be informed in writing of the effective date and the duration of the modified attendance.

IV. Appeal

A student subject to this policy may appeal any decision of the Vice Provost for Education to the Provost. A student who wishes to appeal must submit a written letter of appeal to the Provost within three (3) days of receipt of the Vice Provost for Education’s decision. The letter of appeal must state why the student believes that the Vice Provost’s decision was unwarranted under the circumstances. After reviewing the appeal letter the Provost may meet with the student, as the Provost determines appropriate. In addition, the Provost may review relevant documents and confer with University officials before reaching a decision on the appeal. The Provost will render a decision upholding, rejecting, or modifying the determination of the Vice Provost for Education.

In addition to the appeal process described above, a student subject to this policy may also seek a resolution of concerns through the grievance procedures described in the Penn Book.

V. Temporary Removal

If the Vice Provost for Education has reason to believe, based on the information available, and in consultation with professionals with appropriate expertise, that the student’s continued presence on campus poses an imminent threat of significant harm to him or herself or to others in the community, the Vice Provost for Education may take immediate action to remove the student from campus pending receipt and review of relevant information and a determination. At the Vice Provost for Education’s discretion, this temporary removal may remain in place pending completion of any appeal process.

VI. Process for Return from Leave

A student seeking a return from leave must apply in writing to the Office of the Vice Provost for University Life. Such a request must be submitted no less than 30 days before the beginning of the semester in which the student seeks to reenroll. The student must demonstrate that he/she has met any conditions for return specified by the University.

The University may require any documentation or evaluation it deems appropriate. (Reports from health professionals should be directed to the director of CAPS or Student Health Services.) In addition, the University may require a release from the student to enable CAPS or SHS to discuss the student’s condition with his/her treating health professional.

In consultation with the School Dean and the Office of the Vice Provost for University Life, the Vice Provost for Education will review the request and other relevant information, including the student’s compliance with specified conditions for return from leave and the assessments of CAPS or Student Health Services and other health professionals, and make a determination of whether it is appropriate for the student to return.

If the Vice Provost for Education denies the request to return from leave, the student may challenge that decision by submitting a written appeal to the Provost within 5 days of receipt of the Vice Provost’s decision.

VII. Confidentiality

All records concerning involuntary leaves of absence will be kept in accordance with the University confidentiality policy and other applicable policies. The student’s transcript will indicate only the notation of “leave of absence.”
Transfer Credit/Credit Away

When students receive credit for courses or other types of academic work done elsewhere, it is referred to as equivalent credit. Some of these credits will be the result of coursework taken before matriculation at Penn, but it is also possible to do a limited number of courses “away” after matriculation.

Credit earned before the student matriculates at Penn is referred to as Transfer Credit (p. 272). Credit earned at another institution while the student is enrolled at Penn (post-matriculation) is referred to as Credit Away (p. 272).

Policies regarding the types and amount of equivalent credit allowed vary by school.

These policies govern the transfer of credits taken before a student is officially enrolled at the University of Pennsylvania.

Penn Admissions Policy: http://www.admissions.upenn.edu/apply/transfer-admission/transfer-of-credits

School specific policies:
- College of Arts and Sciences (https://www.college.upenn.edu/courses-outside-the-college)
- School of Nursing (https://www.nursing.upenn.edu/student-services/registration/transfer-credit)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/transfer-residency)

Residency Requirement

Residency requirement policies vary by school.

Charter of the University of Pennsylvania Student Disciplinary System

Preamble

In response to increasing concern about sexual assault and its consequences, the U.S. Department of Education, Office for Civil Rights (OCR) issued a new “guidance” document concerning compliance with Title IX of the Education Amendments of 1972. Title IX prohibits discrimination on the basis of sex in educational programs, including sexual misconduct. In this context, the Office of Student Conduct and the Office of the General Counsel, working closely with other University student affairs professionals, prepared amendments to the Charter of the Student Disciplinary System. As required by the Charter, the amendments have been approved by the Council of Deans, the Faculty Senate and the Provost and are in effect as of April 10, 2012.
Changes

The significant points of OCR's guidance include the following:

- Once a school knows or reasonably should know of possible sexual misconduct, it must take immediate and appropriate action to investigate or otherwise determine what occurred.
- If sexual misconduct has occurred, a school must take prompt and effective steps to end the sexual violence, prevent its recurrence, and address its effects, whether or not the sexual violence is the subject of criminal investigation.
- A school must take steps to protect the complainant as necessary, including interim steps taken prior to the final outcome of the investigation.
- A school must provide a procedure for students to file complaints of sex discrimination, including complaints of sexual misconduct. These procedures must include an equal opportunity for both parties to present witnesses and other evidence and the same appeal rights.
- A school's procedures must use the preponderance of the evidence standard to resolve complaints of sexual misconduct.¹

With the guidance in mind, we developed some special procedures for handling sexual misconduct cases and added a section in the Charter describing these. For the full text of these amendments, please refer to Section II.J. (p. ) of the amended Charter. The amendments also include other minor clean-up revisions, such as correction of scrivener's errors.

¹ U.S. Department of Education, Office for Civil Rights, Dear Colleague Letter: Sexual Violence, Background, Summary and Fast Facts, April 4, 2011

The University disciplinary process at Penn may involve the following stages:

- Bringing a Complaint to the Office of Student Conduct
- Resolving a Complaint by Mediation
- Investigating a Complaint
- Filing Charges by the University against a Student
- Resolving Charges by Voluntary Agreement to Sanctions
- Resolving Charges by Disciplinary Hearing
- Appealing the Decision of a Hearing Panel
- Imposing Sanctions on a Student
- Fulfilling Sanctions Imposed by the University

Under the University's Student Disciplinary System, charges are brought on behalf of the University, not on behalf of the complainant(s) who brought the matter to the Office of Student Conduct (OSC) or the party(ies) who may have been directly or indirectly harmed by the alleged violation of University regulations. Therefore, complainants who wish to maintain greater control over their complaints, such as is sometimes appropriate in cases involving serious cultural or communicative differences, or those who wish merely to create a record of their complaint without necessarily beginning a formal disciplinary process, may wish to bring their complaint to other University resource offices, particularly the Office of the Ombudsman, which are equipped to handle cases in this manner. Such offices may, when appropriate and helpful in an individual case, consult with relevant campus communities or other resource offices in the process of resolving a complaint and are able to work closely with both complainants and respondents in resolving such matters. If such efforts fail to arrive at a satisfactory resolution, the complainant still has the option of bringing a complaint to the OSC.

Through the University Honor Council, students play a major role in the Student Disciplinary System by advising the Director of the Office of Student Conduct and the Provost on matters of policy and the operation of the System and by sitting as members of disciplinary hearing panels. Students also serve as advisors and mediators within the System.

The System places great emphasis on the mediation of disputes, as is appropriate in a University Community.

The Student Disciplinary System

A. Statement of Purpose

The purpose of the Student Disciplinary System is to further the educational mission of the University of Pennsylvania by providing a fair and effective mechanism for investigating and resolving disputes involving students and alleged violations by students of the University's rules, regulations, and policies.

B. Jurisdiction of the Student Disciplinary System

1. Through the Office of Student Conduct (OSC), the Student Disciplinary System handles complaints from members of the University community—trustees, faculty, staff or registered students—about alleged violations of the Code of Student Conduct, the Code of Academic Integrity, or other University policies. Persons outside the University community may also bring complaints of alleged violations of the Code of Student Conduct and other University policies to OSC. The Director of OSC will make a case-by-case determination of whether it is appropriate to handle such complaints under the Student Disciplinary System. Among other factors, the Director will consider whether the alleged conduct affects a substantial University interest or whether the conduct may present a
threat or danger to the community. When OSC undertakes to handle such complaints, the procedures described in this Charter will apply.

2. Except as provided below, the Student Disciplinary System has jurisdiction in all disciplinary matters arising under the regulations of the University against registered students, whether they be undergraduate, graduate or professional students, or others, including students who are on unexpired leaves of absence. Approved or unapproved absence from the University is not a bar to the conduct or completion of disciplinary proceedings under this Charter.

3. In general, a student is any individual who has been admitted, matriculated, enrolled, or registered in any academic program or other educational activity provided by the Trustees of the University of Pennsylvania.

4. The Student Disciplinary System does not handle complaints against graduate and professional students when such cases lie within the jurisdiction of a hearing board or other disciplinary body established by the School of the University in which the student is enrolled. When such a School-based disciplinary procedure exists, it should be the recourse of first resort for the resolution of an alleged violation of University or School regulations, unless the OSC decides, in consultation with the Provost, that it is appropriate in light of the circumstances for the Student Disciplinary System to handle the matter. Schools with such procedures are encouraged to refer disciplinary matters (excluding academic integrity matters) to the University Mediation Program whenever appropriate. When an alleged violation of University regulations by a graduate or professional student is not within the jurisdiction of a disciplinary system established by the student’s School, the Student Disciplinary System will have jurisdiction over the matter.

5. The Student Disciplinary System does not handle alleged violations of the University’s parking regulations.

6. Alleged violations of the University’s Residential Living policies and contracts are ordinarily handled under the procedures of the Department of Residential Living but, if serious enough to warrant sanctions beyond those which the Department of Residential Living is authorized to impose, may be referred by the Director of Residential Living to the OSC. The fact that proceedings have been held and sanctions imposed under Residential Living policies does not preclude proceedings under this Charter.

7. The Director of the Office of Student Conduct decides all questions of jurisdiction of the Student Disciplinary System arising under this Charter, consulting with the Provost (or designee) and with the University’s General Counsel when necessary. When appropriate, the OSC may refer a complaint to another University office or disciplinary process.

C. General Principles of the Disciplinary System

1. The University’s Student Disciplinary System is not a legal system, and University disciplinary proceedings are not civil or criminal litigation. Thus, they operate under different rules, standards, and procedures, and seek to achieve ends different from criminal or civil proceedings.

2. Any member of the University community may bring a complaint about student conduct or academic integrity to the attention of the Office of Student Conduct. Doing so in no way limits a complainant’s rights or obligations to bring such matters to the attention of other University offices, officers, or resources, including the Office of the Ombudsman and appropriate Deans, or to seek recourse outside the University through civil or criminal legal proceedings.

3. In all cases, the University reserves the right to determine how to process a disciplinary complaint. Once a complaint is brought to the attention of the Office of Student Conduct, the OSC, on behalf of the University, will decide how the complaint will be handled, including whether disciplinary charges should be brought against a student.

4. Complainants in sexual misconduct cases have rights and responsibilities similar to respondents under this Charter. In addition, certain special procedures apply in sexual misconduct cases (see section II.J. (p. )).

5. Except as otherwise specified in this Charter, when appropriate and if all parties agree, a matter brought to the OSC may be resolved through mediation and will not result in charges or disciplinary hearings. Because of their seriousness within an academic community, alleged violations of the Code of Academic Integrity will not be referred for mediation. Thus, except in academic integrity matters and matters that warrant treatment as serious violations of the Code of Student Conduct or other University policies, the initial response by the OSC may be to refer the complainant and respondent to the University’s Mediation Program. If mediation fails or is inappropriate, the OSC will begin the more formal disciplinary processes outlined in this Charter.

6. All members of the University community are required to cooperate with the Student Disciplinary System. Those individuals who may be interviewed or called as witnesses in a disciplinary matter (including respondents and complainants) are obligated to provide honest and complete statements to the OSC and to the Hearing Panel. While in some circumstances a respondent may choose not to answer questions or provide information because of pending civil claims or criminal charges arising out of the same or other events, the respondent’s decision not to answer questions or provide information will not be a reason to delay or defer an investigation or proceedings under this Charter. A student who fails, without good cause, to appear for a hearing after receiving notice, or to cooperate with the investigation conducted by the OSC, may be charged with a violation of the Code of Student Conduct. Repeated disruption of disciplinary hearings or the disciplinary process by a student or the student’s advisor may result in charges against the student of non-cooperation with the Student Disciplinary System or exclusion of the student or advisor from disciplinary proceedings, including disciplinary hearings. Such exclusion is not a bar to the completion of disciplinary proceedings involving that student.

D. Organization of the Disciplinary System

1. Office of Student Conduct

The Office of Student Conduct is the central office responsible for resolving alleged violations of University policies by students. The duties of the OSC include determining whether complaints warrant action by the OSC, referring complaints for mediation or resolution by other University offices, investigating complaints, determining whether to charge a student with violations of University policies, resolving complaints by voluntary agreements to
sanctions, bringing charges of violations to a disciplinary hearing, presenting evidence at hearings, monitoring and enforcing the fulfillment of sanctions imposed pursuant to voluntary agreements or after disciplinary hearings, maintaining records of all disciplinary matters, providing administrative support for all aspects of the disciplinary process (including hearings), and preparing reports and compiling statistics.

2. **University Mediation Program**
   The University Mediation Program (UMP) may use the volunteer services of faculty, students, and staff members who have been trained in mediation and dispute resolution and may also use resources available in the University's Law School, in University resource offices such as the Office of the Ombudsman, or outside the University.

3. **University Honor Council**
   a. The University Honor Council (UHC) provides independent advice to the Provost and the OSC regarding the operation of the Student Disciplinary System in the area of academic integrity and student conduct, the general handling of academic integrity and conduct violations, appropriate sanctions for various types of academic integrity and conduct violations, and the effectiveness and implementation of the University's Code of Student Conduct and Code of Academic Integrity. Members of the UHC also sit on Disciplinary Hearing Panels. The UHC meets regularly with the Director of the Office of Student Conduct and may also discuss academic integrity and conduct issues with appropriate administrators and student, faculty, or administrative groups or committees. In addition, the UHC initiates and participates in educational programs about academic integrity and student conduct and works to help students understand and respect the academic and behavioral standards of the University community.

   b. The UHC consists of a minimum of 13 undergraduate students, chosen by current members of the UHC. The UHC is encouraged to ensure that nominees represent a broad cross-section of the undergraduate student body. The UHC selects a chair from among its members by a majority vote of the current members. Faculty members and graduate students designated by the Faculty Senate or Graduate and Professional Students Assembly (GAPSA) to sit on Disciplinary Hearing Panels may participate in the work of the UHC if the UHC so desires.

4. **Disciplinary Hearing Officer**
   Every two years, the Provost, after consultation with the UHC, and the chairs of the Faculty Senate, will appoint a tenured member of the Standing Faculty of the University of Pennsylvania as Disciplinary Hearing Officer (DHO), preferably from among those faculty who have experience with the Student Disciplinary System. The DHO presides over all disciplinary hearings held under this Charter. The DHO is responsible for overseeing the procedural integrity of disciplinary hearings. The DHO will, for example: consider and resolve pre-hearing challenges to the authority or procedures of a Disciplinary Hearing Panel; rule on all disqualification requests and objections to individual panel members; assist parties to adhere to the basic principles of fairness prior to, during, and subsequent to disciplinary proceedings; and may consult at any time with students, faculty members, the University's General Counsel or others about procedural issues. The DHO also participates in the training of prospective faculty and student members of Disciplinary Hearing Panels. The DHO serves and may be reappointed at the discretion of the Provost, but his or her removal or reappointment may not occur without prior consultation with the UHC and the chairs of the Faculty Senate.

5. **Disciplinary Appellate Officer**
   Every two years, the Provost, after consultation with the UHC, and the chairs of the Faculty Senate, will appoint a tenured member of the Standing Faculty of the University of Pennsylvania as a Disciplinary Appellate Officer (DAO), preferably from among faculty who have experience with the Student Disciplinary System. The DAO decides appeals of findings and recommended sanctions made by Disciplinary Hearing Panels based on the record of such proceedings and written submissions from the relevant parties. The DAO serves and may be reappointed at the discretion of the Provost, but his or her removal or reappointment may not occur without prior consultation with the UHC, and the chairs of the Faculty Senate.

6. **Disciplinary Hearing Panels**
   a. Disciplinary matters are heard by Disciplinary Hearing Panels of five members each. The Disciplinary Hearing Officer (or designee) randomly selects the undergraduate members of Disciplinary Hearing Panels from the membership of the University Honor Council for hearings involving undergraduate respondents. For hearings involving graduate students, the Disciplinary Hearing Officer (or designee) randomly selects the graduate and professional student members of Hearing Panels from lists of 13 or more graduate and professional students provided annually to the DAO by GAPSA. The Disciplinary Hearing Officer (or designee) randomly selects the faculty members of Hearing Panels from lists of 13 or more faculty provided annually to the DAO by the Faculty Senate Executive Committee. GAPSA and the Faculty Senate Executive Committee are encouraged to ensure that nominees represent a broad cross-section of graduate and professional students and faculty, respectively.

   b. In all disciplinary matters, except those involving alleged violations of the Code of Academic Integrity, the Disciplinary Hearing Panel is composed of two faculty members and three students of the same category (undergraduate or graduate) as the respondent. If a disciplinary matter involves both undergraduate and graduate respondents, the panel will include at least one undergraduate and at least one graduate student and two faculty members; the fifth panel member will be an undergraduate or graduate student selected by the DHO.

   c. In disciplinary matters involving alleged violations of the Code of Academic Integrity, the Disciplinary Hearing Panel is composed of three faculty members and two students of the same category (undergraduate or graduate) as the respondent. If a disciplinary matter involves both
undergraduate and graduate respondents, the panel will consist of one undergraduate student, one graduate student, and three faculty members.

d. Except for participation on the University Honor Council, no one designated to serve on Disciplinary Hearing Panels may serve simultaneously in any other capacity within the Student Disciplinary System.

e. If any nominating body chooses fewer than 13 members to serve on Disciplinary Hearing Panels or cannot make additional members available when needed, the Provost will make the necessary appointments to fill the complement of the appropriate group. If any member is unable to serve for any reason, a replacement is selected in the same manner that the original member was chosen.

f. Student members of Disciplinary Hearing Panels must be in good academic and disciplinary standing, as defined by their Schools. The UHC, as appropriate, by a vote of two-thirds of its members, may remove a member who fails to perform his or her duties. When a member ceases to be in good standing or is removed by the UHC, a replacement from the same category will be chosen in the same manner that the original member was chosen.

7. Advisors
a. Advisors help students involved in disciplinary proceedings to understand the disciplinary process, respect and comply with the provisions of this Charter, and deal with all aspects of the process. Any University faculty member, staff member, or student in good academic and disciplinary standing may serve as an advisor. The OSC maintains lists of individuals who are willing to serve as advisors and who have received training in the operation of the Student Disciplinary System.

b. Upon receiving notice of a complaint and the accompanying list of trained advisors, a respondent may select an advisor from this list or choose any other University faculty member, staff member, or student in good academic and disciplinary standing to advise the respondent during the disciplinary process. If criminal charges are pending against a respondent or, in the judgment of the Office of the University’s General Counsel, are reasonably in prospect, the respondent’s advisor may be an attorney who is not a member of the University community. In such instances, the attorney will be expected to observe the procedures of this Charter and comply fully and promptly with decisions of the DHO or other University officials or bodies charged with the administration of this Charter in the same manner expected of members of the University community.

c. An advisor may accompany any complainant, witness, or respondent to, and may participate in, any meeting regarding a disciplinary complaint. Advisors also may accompany complainants, respondents, and witnesses to hearings, but generally may not participate directly in such hearings (except as provided in section II.F.4.f and g. below). Advisors may, however, quietly provide advice during the hearing and may also make a brief statement at the conclusion of the hearing, before the panel begins its deliberations.

d. Any advisor who fails to observe the procedures of this Charter or comply fully and promptly with decisions of the DHO may, after appropriate warning, be disqualified by the DHO from continuing to serve. In the event of such disqualification, the hearing may proceed whether or not a replacement advisor is available or it may be rescheduled at the sole discretion of the DHO. Any person disqualified from serving as an advisor will be ineligible to serve as an advisor for a period of two years. Repeated disruption of disciplinary hearings or the disciplinary process by an advisor may result in charges against the advisee of non-cooperation with the Student Disciplinary System. If the advisor is a member of the student body, faculty, or staff or the University, disciplinary charges may be brought against the advisor in the appropriate forum.

II. The Disciplinary Process
A. Bringing a Complaint to the Office of Student Conduct
1. Any member of the University community, who believes that a student has violated University rules, regulations or policies may file a complaint, which must be in writing, with the OSC. Students, faculty, staff members and trustees also may consult informally with the OSC staff to determine whether they wish to file a complaint. Others should consult with the Director about whether they may file a complaint under the Student Disciplinary System. Complaints made to other University offices or personnel also may be referred to the OSC. A complaint asks the OSC to consider the matter for possible referral or investigation.

2. The OSC promptly evaluates each complaint it receives to determine whether the University’s Code of Student Conduct, Code of Academic Integrity, or other applicable rules, regulations or policies may have been violated. When the OSC determines that no such violation may have occurred, it may dismiss the matter without further investigation, or it may refer the parties to the University Mediation Program or elsewhere to resolve their dispute. When the OSC determines that a violation may have occurred, it may refer the matter for mediation or undertake an investigation that may lead to the filing of formal charges against a student or students.

3. A complaint is not a charge that a student has violated University regulations. Charges against a student are only made by the University (not by complainants) following an investigation. Until there is a determination to the contrary by voluntary agreement to sanctions or by a Disciplinary Hearing Panel, there is a presumption that an accused student has not violated University rules, regulations, or policies.

4. When a complaint is filed, the OSC promptly gives written notice of the complaint and its allegations to the student(s) alleged to have violated University rules. A copy of the Charter will be included with the notice, as well as a list of potential advisors who have received training from the OSC.

B. Resolving a Complaint by Mediation
1. The University encourages informal mediation whenever practical and appropriate. If the parties agree, at any time the OSC may refer any disciplinary matter other than an alleged violation of the Code of Academic Integrity to the University Mediation Program (UMP) or other resources for mediation.
Members of the University community may also contact the University Mediation Program directly.

2. It is within the sole discretion of the OSC to determine whether a disciplinary complaint is suitable for mediation. If mediation fails or new information comes to light about an unresolved matter then in mediation, the OSC may proceed with an investigation and the filing of disciplinary charges. The OSC may also set a date after which it will begin to investigate the original complaint or file charges if a matter has not been successfully mediated.

3. If the OSC refers a complaint for mediation and both parties to the dispute agree to participate, the UMP will assign a trained mediator and advise the complainant(s) and respondent(s) in advance of the date, time and place set for mediation. In order to resolve a disciplinary matter by mediation, both the complainant and the respondent must agree, first, to participate in the mediation and, second, to the proposed resolution.

4. If a student fails to comply with the terms of a mediation agreement, the OSC may take steps to enforce the agreement (including use of a Disciplinary Hold or the filing of new charges under the Code of Student Conduct) or may investigate the original complaint and bring disciplinary charges under this Charter.

C. Investigating a Complaint

1. If, after a preliminary evaluation of a complaint, the OSC determines that a violation of the Code of Student Conduct may have occurred and if the complaint is inappropriate for mediation or mediation fails, the OSC then will investigate the complaint and determine whether to bring charges of a violation.

2. In the course of its investigation, the OSC may interview any witnesses, including the respondent(s) or potential respondent(s). The OSC will inform each witness that anything they say in such interviews may be introduced as evidence at a hearing.

3. Except in extraordinary circumstances, or if the complainant makes a request of the OSC to delay the investigation based on good cause, the OSC will make every effort to complete its investigation within 60 days of the filing of the complaint.

D. Filing Charges by the University Against a Student

In light of its investigation of a complaint, the OSC may file charges against a student(s) of a violation(s) of the University’s Code of Student Conduct, Code of Academic Integrity, or other University rules, regulations, or policies. The OSC also may add charges beyond the scope of the original complaint, may add additional students as respondents, or may dismiss the original complaint as unfounded. If the OSC decides to charge a student with a violation of University regulations, the OSC must inform the respondent(s) of the charges in writing, identifying the University rules, regulations, or policies alleged to have been violated. The OSC will inform both respondent(s) and complainant(s) whether charges have been filed.

E. Resolving Charges by Voluntary Agreement to Sanctions

1. Following the notice that charges have been filed against a student, the OSC may discuss with the respondent and the respondent’s advisor what disciplinary sanction(s) would be appropriate to resolve the matter by voluntary agreement to sanctions. The respondent may accept, reject, or propose an alternative to the proposed sanction(s) and may be accompanied and assisted by an advisor, who may participate in these discussions. Statements made during discussions about whether a respondent will enter into a voluntary agreement to sanctions may not be introduced as evidence at any subsequent hearing, but may provide a basis for further investigation by the OSC.

2. A resolution by voluntary agreement to sanctions may be entered into by written agreement at any time after a complaint has been filed and prior to a disciplinary hearing. All sanctions allowed under this Charter are available to the OSC as part of a resolution by voluntary agreement to sanctions. By agreeing to such a resolution, a respondent waives further proceedings under this Charter.

3. Complainants and complainants’ advisors are not parties to voluntary agreements to sanctions.

4. If, in the judgment of the OSC, a voluntary agreement to sanctions is not reasonably in prospect, or if the respondent(s) reject(s) a proposed sanction, the OSC may bring the disciplinary matter to a hearing.

F. Resolving Charges by Disciplinary Hearing

1. Scheduling Disciplinary Hearings

   a. If disciplinary charges are not resolved by a voluntary agreement to sanctions, the Disciplinary Hearing Officer (or designee) promptly begins the process of scheduling the Disciplinary Hearing, with due regard for the time required for all parties to prepare for the hearing. The DHO will provide reasonable advance notice in writing to the complainant(s), respondent(s), and witnesses of the date, time, and place of the hearing and of the names of the panel members assigned to hear the disciplinary matter.

   b. Hearings normally take place as soon as possible after the filing of charges, ordinarily within 30 days of the respondent’s request for a hearing or OSC’s decision to bring the matter to a hearing. Upon a showing of good cause by a party, the DHO may grant a reasonable extension of any time limit relating to a disciplinary hearing set forth in the Charter.

   c. The DHO may expedite a Disciplinary Hearing in appropriate circumstances, including disciplinary matters involving students who have been placed on mandatory temporary leave of absence or conditional attendance, graduating students, or students who are about to take a leave of absence or to leave campus to study elsewhere.

2. Disqualification of Hearing Panel Members

   a. Members of the Hearing Panel selected by the DHO (or designee) should disqualify themselves from hearing a disciplinary matter if they believe in good faith that their capacity for making an objective judgment in the disciplinary matter is, or may reasonably appear to be, impaired. Members should not disqualify themselves for any other reason.

   b. The respondent(s) or the OSC may object for specific cause to any panel member selected by the DHO. The objection must be in writing and must be received by the DHO at least 48 hours in advance of the date and time set for the hearing.

   c. The DHO will rule upon all disqualification requests and objections to panel members. If the DHO decides that a
3. Pre-Hearing Exchanges and Testimony
   a. Within a reasonable time before the hearing or any
      other time frame specified by the DHO, the OSC and the
      respondent(s) will exchange among themselves and with
      the DHO copies of all exhibits to be presented, the names
      of witnesses to be called, and a brief summary of the
      substance of testimony expected to be presented to the
      Hearing Panel.
   b. When the DHO believes that it will contribute to the
      expedition and fairness of a Disciplinary Hearing, he or
      she may (but need not) ask the OSC to prepare a written
      statement of its case against the respondent(s) and give
      the respondent(s) a reasonable opportunity to prepare
      a written response. The OSC and the respondent(s)
      may also submit statements at their own initiative. The
      statements and any accompanying exhibits may be
      considered by the Hearing Panel, in addition to testimony,
      arguments, or evidence presented at the actual hearing.
   c. In exceptional circumstances, when a witness or exhibit
      does not become known or available until immediately
      before the hearing, the DHO may, at her or his discretion,
      permit the evidence to be presented or may reschedule
      the hearing to a later time.
   d. If a respondent or the OSC anticipates that a key witness
      will be unavailable for a hearing, they may ask the DHO
      to preserve the testimony of the witness on tape and
      present it as evidence at the hearing. The OSC and the
      respondent(s) must be notified in advance of the date,
      time and place of the taping. All parties who would be
      permitted to question such a witness at a hearing may
      question the witness at the taping.

4. Conduct of Hearings
   a. Disciplinary hearings are not trials, and they are not
      constrained by technical rules of procedure, evidence,
      or judicial formality. They are designed to encourage
      open discussion among the participants that promotes
      the Hearing Panel's understanding of the facts, the
      individuals involved, the circumstances under which
      the incident occurred, the nature of the conduct, and
      the attitudes and experience of those involved. The
      rules of evidence applicable to legal proceedings do not
      apply to disciplinary hearings. Information, including
      hearsay evidence, may be considered if it is relevant,
      not unduly repetitious, and the sort of information on
      which responsible persons are accustomed to rely in the
      conduct of serious affairs.
   b. The DHO presides over all hearings and decides all
      questions about the admissibility of evidence and the
      conduct of hearings. While the DHO may be present for
      the Hearing Panel’s discussions to answer procedural
      questions, the DHO does not deliberate or vote with the
      Panel regarding its findings or its recommendation of
      sanctions.
   c. Disciplinary hearings are held in private unless the
      respondent(s) and the complainant(s) agree in writing
      to an open hearing. The DHO may limit attendance at
      a hearing to ensure fair and orderly proceedings. If a
      hearing is opened in accord with this procedure, the DHO
      may, when necessary to maintain order or to protect the
      rights of participants, declare the hearing closed to the
      public. In a case involving important privacy interests,
      the DHO may close a hearing or part of a hearing that
      has been opened upon determining that the privacy rights of a
      participant may be jeopardized.
   d. Upon a showing that the required notice was provided, the
      hearing against a respondent(s) may proceed in her or his
      absence.
   e. At the hearing, the OSC presents the results of the
      OSC’s investigation of the complaint, calls witnesses to
      testify and presents the University's evidence against
      the student(s). Members of the Hearing Panel may also
      call witnesses to testify and may question any witness
      appearing before it. Respondents may also call witnesses
      to testify and ask questions of all witnesses.
   f. A respondent is responsible for presenting his or her own
      case before the Hearing Panel. However, at the discretion
      of the DHO, the respondent’s advisor may be permitted
      to question witnesses on behalf of a respondent or
      to address the Hearing Panel. The DHO’s exercise of
discretion in this matter will be guided by the principles
that govern disciplinary hearings, specifically fairness, the
need for orderly procedures, and the Hearing Panel's duty
to understand the facts and parties in the disciplinary
matter.
   g. Complainants may attend the hearing, testify if they
      wish to do so, and may be accompanied by an advisor.
      Except as described in section II.J. of this
      Charter, neither complainants nor their advisors may call
      witnesses or present evidence or arguments.
   h. At the conclusion of the hearing, the OSC and the
      respondent(s) or their advisor(s) may make brief
      statements. At the discretion of the Disciplinary Hearing
      Officer, the complainant(s) or their advisor(s) may be
      permitted to make a brief statement. The time allowed
      for such statements will be set by the DHO.
   i. The OSC will arrange for a verbatim transcript or
      recording to be made of all disciplinary hearings. The
      transcript or recording is the property of the University
      of Pennsylvania and becomes part of the record of the
      disciplinary proceedings.

5. Findings and Recommendations of the Hearing Panel
   a. Only evidence presented at the hearing will be considered
      by the Hearing Panel. The Hearing Panel will presume
      a respondent innocent unless proven responsible for a
      violation by clear and convincing evidence. All decisions
      of the Hearing Panel require a majority vote.
   b. Following the hearing, the members of the Hearing Panel
      meet to discuss in private their findings, which consist of
      two parts:
      1. a determination of whether the respondent is
         responsible for any violation; and
      2. if so, a recommendation of sanction(s).
   c. The OSC may recommend to the Hearing Panel a
      sanction to be imposed if the Hearing Panel finds
the respondent(s) responsible for a violation. The respondent(s) may respond to the OSC’s proposed sanction(s). Before the Hearing Panel makes its recommendation on sanctions, it will review any previous disciplinary offenses by and sanctions against the respondent(s) and sanctions imposed in other similar cases.

d. If the Hearing Panel determines that the respondent(s) is not responsible for a violation, no sanction may be recommended against the respondent(s) and the respondent may not be subject to further proceedings under this Charter on the same charge(s).

e. If the Hearing Panel finds that a student is responsible for a violation of University rules or regulations, it will recommend to the Provost appropriate sanctions.

Only the Provost (or designee), acting on behalf of the University, may actually impose a sanction on a student. The Provost (or designee) will not impose a sanction until after any appeal of the Hearing Panel’s decision has been decided by the DAO.

6. Notice of Hearing Panel Decision
The Hearing Panel will promptly transmit its decision, including its findings and recommendation regarding sanctions, in writing to the DHO, the OSC, the respondent(s) and the Provost as soon as possible after the end of the hearing.

G. Appealing a Hearing Panel’s Decision
1. The Disciplinary Appellate Officer (DAO) has exclusive jurisdiction to decide appeals. Appeals are based solely on the record of the disciplinary hearing and the written submissions and responses of the respondent(s) and the OSC.

2. Only respondent(s) may appeal the Hearing Panel’s findings of responsibility except where applicable laws or regulations may extend this right to complainants. Both the respondent(s) and the OSC may appeal the Hearing Panel’s recommendation of sanction(s). An appellant must submit any appeal to the DAO in writing within 10 days after the Hearing Panel has rendered its opinion. The appeal must state in detail the specific grounds upon which it is based and must be sent to the OSC and respondent(s), as appropriate.

3. When the appeal is received, the OSC provides the DAO with a copy of the respondent’s charge letter, a copy of the Hearing Panel’s findings, a verbatim transcript or tape recording of the Disciplinary Hearing, and any exhibits considered by the panel in reaching its recommendations. A response to an appeal must be in writing and must be submitted to the DAO within 10 days from the date the appeal is filed.

4. Appellate review is limited to allegations of material and prejudicial procedural error in the conduct of hearings, error in the interpretation or application of relevant University regulations, consideration of new evidence sufficient to alter the Hearing Panel’s findings or severity of the recommended sanctions. If the DAO finds sufficient basis, he or she may reverse or modify the Hearing Panel’s findings or proposed sanctions, or may remand the disciplinary matter for further investigation by the OSC or a new hearing before a new Hearing Panel. However, the DAO may not recommend a more severe sanction(s) unless the OSC has appealed the sanction(s) recommended by the Hearing Panel.

5. After considering an appeal, the Disciplinary Appellate Officer will promptly issue his or her decision in writing and will provide copies to the OSC, the DHO, the Provost, the respondent(s) and other appropriate parties.

H. Imposing Sanctions on a Student
1. Sanctions recommended against a respondent by a Hearing Panel or the DAO are imposed by the Provost (or designee) and may include any reasonable sanction, including, but not limited to, the following:

- **Warning:** A Warning is a written admonition given by the OSC on behalf of the University in instances of minor misconduct.

- **Reprimand:** A Reprimand is written censure for violation of the University’s rules, regulations, or policies, given by the OSC on behalf of the University, which includes notice to the student that continued or repeated conduct violations will result in the imposition of more serious sanctions.

- **Fine:** A monetary Fine may be levied as a disciplinary sanction and is payable to the Trustees of the University of Pennsylvania. (Not appropriate in cases of academic integrity violations.)

- **Restitution:** Restitution is reimbursement for the damage, loss, or misappropriation of University, private or public property or compensation for injury to individuals. Restitution may take the form of monetary payment, property, or appropriate service. (Not appropriate in cases of academic integrity violations.)

- **Disciplinary Probation:** Disciplinary Probation may be imposed for a specified period or indefinitely (i.e., for as long as and whenever a student is a full- or part-time student at the University of Pennsylvania). Probation may be imposed for a single instance of misconduct or for repeated minor misconduct. Any future conduct or academic integrity violation by a student on Disciplinary Probation, found to have occurred during the probationary period, may be grounds for suspension or, in especially serious instances, expulsion from the University.

- **Withdrawal of Privileges:** Withdrawal of Privileges is the denial of specified privileges or the ability to participate in specified activities for a designated period of time.

- **Suspension:** Suspension is the termination of student status and separation from the University until a specified date. Suspension means the loss of all rights and privileges normally accompanying student status. While on disciplinary suspension, students may not obtain academic credit at the University or elsewhere toward completion of a University of Pennsylvania degree. Students are eligible to return to the University after the specified suspension term has elapsed. Suspension is imposed in instances of serious misconduct; it is generally the minimum sanction imposed for a violation of the Code of Academic Integrity.

- **Indefinite Suspension:** An Indefinite Suspension is termination of student status and separation from the University for an unspecified period, without an automatic right of return to the University as a student (though specific conditions for return as a student
may be specified). When the conditions of an Indefinite Suspension have been fulfilled, the student must make a formal request, as specified in the conditions, to return to student status. Indefinite suspension is imposed in instances of extremely serious misconduct or in instances of continued serious misconduct following the imposition of probation or suspension for a specified period.

- **Expulsion**: Expulsion is a permanent termination of student status and permanent separation from the University of Pennsylvania. Expulsion is imposed in instances of the most serious misconduct or in instances of continued serious misconduct following the imposition of probation or suspension.

2. In addition to the sanctions defined above, students may be required to perform a designated number of hours of University or other community service or to utilize University or other educational or counseling services related to the nature of the misconduct.

3. Sanctions may be imposed alone or in combination with other sanctions. The Disciplinary Hearing Panel or the DAO may recommend whether the sanctions should appear on the transcript of a respondent and if so, for how long.

4. After the imposition of sanctions, a faculty member involved in an academic integrity matter will be informed of the outcome of the disciplinary proceedings. If the student has been found not to be responsible for an academic integrity violation, the instructor should assign a grade (which may differ from the grade originally assigned) based on the student's academic performance in the course. If the student has been found responsible for an academic integrity violation, the instructor may assign any grade the instructor deems appropriate. In the event that the student believes the final grade is unfair or fails to take account of the outcome of the disciplinary proceeding, the student may appeal the grade through the existing academic grievance procedure for the evaluation of academic work established by each School and academic department.

### I. Fulfilling Sanctions Imposed by the University

1. Under the Code of Student Conduct, students are required to comply with all disciplinary sanctions. Failure to do so constitutes a violation of the Code and is itself subject to disciplinary proceedings by the OSC.

2. The OSC monitors the implementation and fulfillment of sanctions. In performing this duty, the OSC will have the cooperation of the Division of University Life, the respondent’s Dean, and other appropriate University offices. No sanction will be enforced while an appeal is pending.

### J. Special Procedures for Sexual Misconduct Cases

In sexual misconduct and other sex discrimination cases, the OSC will follow applicable federal law, including Title IX of the Higher Education Amendments of 1972, as amended. The complainants in sexual misconduct cases have rights and responsibilities similar to the respondents under this Charter. The time frames set for respondents also apply to complainants and when notice is required to be provided to the respondent, similar notice will be provided to the complainant.

1. **Specified Rights of Complainants in Sexual Misconduct Cases**

The complainant will have an opportunity to participate in the entire disciplinary process, including the opportunity to provide information and witnesses during the investigation to participate in the preliminary exchange of information, to attend the disciplinary hearing, and to present evidence and witnesses at the hearing.

The complainant will have an opportunity equal to the respondent to have others present during meetings and at the disciplinary hearing.

The complainant will be informed of the outcome of his or her complaint and any appeal.

2. **Investigation and Pre-Hearing Stages**

   a. An OSC staff member will ordinarily meet with the complainant to hear or clarify his or her account of the incident and to review the disciplinary process. To initiate a formal complaint, the complainant must submit a written complaint.

   b. OSC will make every effort to complete its investigation within 60 days from the filing of a formal complaint. In extraordinary cases, such as when the gathering of information is completely under the control of law enforcement, OSC’s investigation may be delayed. In the event of such delay, OSC will advise the complainant of the reason for the delay. An investigation may also be delayed upon the complainant’s request based on good cause.

   c. During the investigation, and until resolution of the matter, interim restrictions, including restrictions on contact between the complainant and the respondent, may be imposed by OSC. Nothing in this Charter precludes other University officials from taking appropriate interim measures before a disciplinary matter is resolved.

   d. The complainant will be notified of the outcome of the investigation. Further, if there is a voluntary agreement to sanctions, the complainant will be informed of the provisions of the agreement that directly relate to the complainant.

   e. Subject to any Family Educational Rights and Privacy Act (FERPA) limitations, the complainant will have a similar opportunity as the respondent to review evidence to be presented at the hearing.

3. **Disciplinary Hearings**

   a. The complainant will have a similar opportunity as the respondent to object to panel members for cause. In addition, the complainant will have an equal opportunity to prepare a written statement in advance of the hearing and to respond to any written statement prepared by the respondent or OSC before the hearing.

   b. The complainant’s advisor (who must be a member of the University community) may participate in a hearing to the same extent as the respondent’s advisor. At the discretion of the DHO, a complainant’s advisor may be permitted to question witnesses.

   c. Alternative testimony options will be offered to complainants, such as placing a privacy screen in the hearing room or allowing the complainant to testify from another room via closed circuit television. Generally, questions between the complainant and the respondent will be relayed through the DHO, but if both agree, they can address each other directly. The DHO reserves the
right to exclude questions he/she deems irrelevant or duplicative.

d. The complainant may call witnesses (including character witnesses) at the hearing, ask questions of all witnesses, and present evidence.

e. The hearing panel will presume the respondent not responsible unless proven responsible by a preponderance of the evidence.

f. The complainant may respond to the proposed sanctions OSC submits to the hearing panel.

4. Appeal of a Hearing Panel Decision

a. The complainant may appeal the hearing panel’s findings and/or recommended sanctions. In addition, the complainant may respond to an appeal by the respondent or OSC.

b. The complainant will be provided with written notice of the outcome of the appeal at the same time as the respondent.

III Additional Matters

A. Administration of the Disciplinary System

1. The Provost is responsible for implementation of this Charter, administrative oversight of the Student Disciplinary System, including the OSC, and ensuring that the Student Disciplinary System functions fairly and in furtherance of the educational mission of the University. The Provost may instruct the OSC regarding the handling of specific cases, but he or she may not so instruct the DHO, the DAO, or the members of Disciplinary Hearing Panels.

2. When circumstances warrant, the OSC may take such administrative steps as may be necessary and feasible to effect the prompt resolution of a disciplinary matter, including, but not limited to, tape recording the testimony of witnesses who may be unavailable at the time of hearing, making special arrangements to ensure the attendance of complainants, respondents, witnesses, or other participants at a hearing and scheduling hearings outside of the normal academic year.

3. In any disciplinary matter in which a member of the Student Disciplinary System cannot perform her or his duties under this Charter, an alternate may be designated by the Provost using the procedures appropriate to that individual’s position in the system. In addition, when the Provost determines that circumstances warrant, such as (but not limited to) when a conflict of interest or a particularly complex or controversial disciplinary matter arises, the Provost may appoint a special OSC staff member, a special Disciplinary Hearing Officer, or a special Disciplinary Appellate Officer using the procedures appropriate to the position.

B. Reports to the University Community

1. Subject to the limitations imposed by law and the University’s policies on the confidentiality of student records and information, the OSC and the University Honor Council, in consultation with the Provost, will make periodic reports to inform the University community about the character and extent of the work of the Disciplinary System, including the nature of violations of University rules and regulations and the sanctions imposed. The reports of the OSC will deal both with disciplinary matters that go to hearing and with disciplinary matters that are resolved before hearing, and will include such information as the total number of disciplinary matters handled during the preceding year broken down by type of resolution (e.g., mediation, voluntary agreement to sanctions, hearing, etc.), by type of violation, by type of sanction(s) imposed, by whether or not the respondent(s) were found responsible for a violation, and so forth.

2. With the approval of the Provost, the OSC may also make extraordinary reports to the University community concerning the outcome of certain exceptional disciplinary matters, subject to the limitations imposed by law and the University’s policies on the confidentiality of student records and information.

C. Disciplinary Holds

At any time after the filing of a complaint, the OSC, after consulting with the student’s academic dean, may place a “Disciplinary Hold” on the academic and/or financial records of any student for the purpose of preserving the status quo pending the outcome of proceedings, enforcing a disciplinary sanction, or ensuring cooperation with the Student Disciplinary System. A Disciplinary Hold may prevent, among other things, registration, the release of transcripts, and the awarding of a degree.

D. Mandatory Leave of Absence and Conditional Attendance

In extraordinary circumstances, when a student’s presence on campus is deemed by the University to be a threat to order, health, safety, or the conduct of the University’s educational mission, the Provost (or designee), in consultation with the student’s Dean or Associate Dean, may place the student on a mandatory temporary leave of absence or impose conditions upon the student’s continued attendance, pending a hearing of disciplinary charges. When reasonably possible, the student will be provided with an opportunity to be heard before a decision is made by the Provost (or designee) to impose a mandatory temporary leave of absence or conditions on the student’s attendance. At the respondent’s request, and where feasible, the OSC may expedite the investigation of a complaint and the disciplinary hearing against a student placed on a mandatory temporary leave of absence or conditional attendance.

E. Civil or Criminal Proceedings

The University may proceed with disciplinary proceedings against a student under this Charter regardless of possible or pending civil claims or criminal charges arising out of the same or other events. The OSC, with the concurrence of the Provost and after consultation with the University’s General Counsel, will determine whether to proceed with charges against a student who also faces related charges in a civil or criminal tribunal. If the University defers proceeding with disciplinary charges against a student in light of related charges in a civil or criminal tribunal, the University may at any subsequent time proceed with disciplinary proceedings against that student under this Charter irrespective of the time provisions set forth in this Charter.

F. Disciplinary Records

1. Maintenance of Records

Except as may be otherwise provided by applicable law, records of all complaints, disciplinary proceedings, mediations, and voluntary agreements to sanctions are maintained by the OSC in accordance with the University’s Protocols for the University Archives and Records Center and
University policies on the confidentiality and maintenance of student records.

2. Confidentiality
Except as may be otherwise provided by applicable law, all disciplinary proceedings, the identity of individuals involved in particular disciplinary matters, and all disciplinary files, testimony, and findings are confidential, in accordance with University policies and federal law concerning the confidentiality of student records. However, no provision of this Charter or the University's policies on confidentiality shall be interpreted as preventing a student from seeking legal advice.

3. Policy Violation of Confidentiality
Failure to observe the requirement of confidentiality of a disciplinary hearing by any member of the University community, other than the respondent, constitutes a violation of University rules and may subject the individual to the appropriate procedures for dealing with such violations. The respondent may disclose confidential information pertaining to him- or herself but may not violate the confidentiality of others. If the respondent discloses, causes to be disclosed, or participates in the disclosure of information that is confidential, any person whose character or integrity might reasonably be questioned as a result of such disclosure shall have the right to respond in an appropriate forum, limited to the subject matter of the initial disclosure.

G. Release of Information on Disciplinary Proceedings
1. To provide students involved in disciplinary matters with appropriate liaison with their School offices in regard to their academic work, the Dean or appropriate Associate Dean of the School(s) of the respondent(s) will be confidentially informed when a complaint is filed, when a sanction is imposed, or when a disciplinary complaint is otherwise resolved by the Student Disciplinary System. When a sanction is imposed, the Director of Career Planning and Placement may be informed by the OSC if the sanction(s) is reportable outside the University. When a transcript notation is required as part of a sanction, the University Registrar is also informed and required to implement the sanction as directed by the OSC on behalf of the Provost.
2. As required by law, in disciplinary matters involving allegations of sexual offenses, the complainant(s) will be informed of the outcome of the proceeding, including voluntary agreement to sanctions.

H. Reportability of Sanctions
1. Subject to applicable law and the University’s policies on the confidentiality of student records and information, any disciplinary sanction may be reportable outside the University of Pennsylvania, subject to specific policies governing the reporting of sanctions adopted by the Council of Undergraduate Deans for undergraduate students and the Council of Graduate Deans for graduate and professional students.
2. Resolution of disciplinary charges by voluntary agreement to sanctions is treated like a finding of responsibility and is reportable in the same manner as sanctions imposed following a Disciplinary Hearing.

I. Amendment of the Charter

Amendments to this Charter may be recommended by the UHC, OSC, University Council, Faculty Senate Executive Committee, or other appropriate members of the University community and proposed by the Provost. Amendments take effect upon the approval of the Council of Deans, except that the Council of Deans may at its discretion refer proposed amendments to the Deans and faculties of the individual Schools for approval.

(Source: Almanac, April 10, 2012, Volume 58, No. 12 (http://www.upenn.edu/almanac/volumes/v58/n29/discipline.html))

Code of Academic Integrity

Since the University is an academic community, its fundamental purpose is the pursuit of knowledge. Essential to the success of this educational mission is a commitment to the principles of academic integrity. Every member of the University community is responsible for upholding the highest standards of honesty at all times. Students, as members of the community, are also responsible for adhering to the principles and spirit of the following Code of Academic Integrity.

Academic Dishonesty Definitions
Activities that have the effect or intention of interfering with education, pursuit of knowledge, or fair evaluation of a student’s performance are prohibited. Examples of such activities include but are not limited to the following definitions:

A. Cheating: using or attempting to use unauthorized assistance, material, or study aids in examinations or other academic work or preventing, or attempting to prevent, another from using authorized assistance, material, or study aids. Example: using a cheat sheet in a quiz or exam, altering a graded exam and resubmitting it for a better grade, etc.

B. Plagiarism: using the ideas, data, or language of another without specific or proper acknowledgment. Example: copying another person’s paper, article, or computer work and submitting it for an assignment, cloning someone else’s ideas without attribution, failing to use quotation marks where appropriate, etc.

C. Fabrication: submitting contrived or altered information in any academic exercise. Example: making up data for an experiment, fudging data, citing nonexistent articles, contriving sources, etc.

D. Multiple submission: submitting, without prior permission, any work submitted to fulfill another academic requirement.

E. Misrepresentation of academic records: misrepresenting or tampering with or attempting to tamper with any portion of a student’s transcripts or academic record, either before or after coming to the University of Pennsylvania. Example: forging a change of grade slip, tampering with computer records, falsifying academic information on one’s resume, etc.

F. Facilitating academic dishonesty: knowingly helping or attempting to help another violate any provision of the Code. Example: working together on a take-home exam, etc.

G. Unfair advantage: attempting to gain unauthorized advantage over fellow students in an academic exercise. Example: gaining or providing unauthorized access to examination materials, obstructing or interfering with another student’s efforts in an academic exercise, lying about a need for an extension for an exam or paper, continuing to write even when time is up during an exam, destroying or keeping library materials for one’s own use, etc.
If a student is unsure whether his action(s) constitute a violation of the Code of Academic Integrity, then it is that student’s responsibility to consult with the instructor to clarify any ambiguities.

(Source: Almanac, September 10, 1996, Volume 43, No. 3) (http://www.upenn.edu/almanac/v43/n03/codechar.html)

**Code of Student Conduct**

I. Preamble

When Benjamin Franklin founded the Pennsylvania Academy, he defined its mission as “education for citizenship.” In pursuit of this mission, the University of Pennsylvania is committed to achieving academic excellence, to creating an environment for inquiry and learning, and to cultivating responsible citizenship in the larger society.

The University of Pennsylvania is a community in which intellectual growth, learning from others, mutual tolerance, and respect for freedom of thought and expression are principles of paramount importance. In an environment that promotes the free interchange of ideas, cultural and intellectual diversity, and a wealth of social opportunities, Penn students take advantage of the academic and non-academic opportunities available to them, deepening their intellectual insights through formal instruction, and expanding their educational experience beyond their academic programs. Members of the Penn community participate actively in the greater Philadelphia, state, national, and international communities in which they reside. “Citizens” of the University community include students, faculty, staff and those otherwise affiliated with the University.

Accepting membership into the University of Pennsylvania community as a student entails an obligation to promote its welfare by assuming the rights and responsibilities listed below. Each individual member of this community is responsible for his or her own actions and is expected to respect the rights of others.

II. Rights of Student Citizenship

Membership in the University of Pennsylvania community affords every student certain rights that are essential to the University’s educational mission and its character as a community.

a. The right to have access to and participate in the academic and non-academic opportunities afforded by the University, subject to applicable standards or requirements.

b. The right to freedom of thought and expression.

c. The right to be free from discrimination on the basis of race, color, gender, sexual orientation, religion, national or ethnic origin, age, disability, or status as a disabled or Vietnam Era veteran.

d. The right to fair University judicial process in the determination of accountability for conduct.

II. Responsibilities of Student Citizenship

Students are expected to exhibit responsible behavior regardless of time or place. Failure to do so may result in disciplinary action by the University. Responsible behavior is a standard of conduct which reflects higher expectations than may be prevalent outside the University community. Responsible behavior includes but is not limited to the following obligations:

a. To comply with all provisions of the University’s Code of Academic Integrity and academic integrity codes adopted by the faculties of individual schools.

b. To respect the health and safety of others. This precludes acts or threats of physical violence against another person (including sexual violence) and disorderly conduct. This also precludes the possession of dangerous articles (such as firearms, explosive materials, etc.) on University property or at University events without University authorization.

c. To respect the right of fellow students to participate in University organizations and in relationships with other students without fear, threat, or act of hazing.

d. To refrain from conduct towards other students that infringes upon the Rights of Student Citizenship. The University condemns hate speech, epithets, and racial, ethnic, sexual and religious slurs. However, the content of student speech or expression is not by itself a basis for disciplinary action. Student speech may be subject to discipline when it violates applicable laws or University regulations or policies.

e. To refrain from stealing, damaging, defacing, or misusing the property or facilities of the University or of others. This also precludes the disruption of University computing services or interference with the rights of others to use computer resources.

f. To be honest and truthful in dealings with the University, about one’s own identity (e.g., name or Social Security number), and in the use of University and other identification.

g. To cooperate fully and honestly in the Student Judicial System of the University, including the obligation to comply with all judicial sanctions.

h. To comply with all contracts made with the University, such as Residential Living Occupancy Agreements and Dining Services contracts.

i. To comply with policies and regulations of the University and its departments (e.g., the University’s Guidelines on Open Expression, Anti-Hazing Regulations, Drug and Alcohol Policies, Sexual Harassment Policy, etc.).

j. To comply with federal, state and local laws.

**Confidentiality of Student Records**

I Statement of Purpose

The purpose of this policy is to describe the rights and responsibilities of students, faculty and staff regarding the confidentiality of student records, including as specified under the Family Educational Rights and Privacy Act (“FERPA”).

II Scope

A. Information

This policy pertains to personally identifiable information contained in education records. The term “education records” generally includes records that are directly related to a student and maintained by the University or a party acting for the University.

Exceptions:

1. Sole possession of the maker. This policy does not apply to records kept in the sole possession of the maker and used only as a personal memory aid and not accessible to any
other individual except a temporary substitute of the maker of the record.

2. Peer graded papers. This policy does not apply to grades on peer-graded papers/assignments before they are collected and recorded by a teacher.

3. Law enforcement records. This policy does not apply to records created and maintained by a law enforcement unit, including the Penn Police, for law enforcement purposes.

4. Employment records. This policy does not apply to records relating exclusively to an individual in his or her capacity as an employee except that records regarding an individual in attendance who is employed as a result of his or her status as a student.

5. Treatment-related records. This policy does not apply to records made or maintained by a healthcare professional that are used only in connection with treatment of the student and disclosed only to individuals providing treatment.

6. Other FERPA exceptions. This policy does not apply to any records or information specifically excepted from the term “education records” under FERPA and its implementing regulations, as they may be amended.

B. Individuals

1. Individuals in attendance. This policy applies to students who are or have been in attendance at the University.

2. Alumni. In general, this policy does not apply to records that contain only information about an individual after he or she is no longer a student at the University. However, if the record relates back to the student’s attendance at the University, it is still an “education record.” A separate policy protecting the privacy of alumni records may be found at http://www.upenn.edu/privacy.

3. Deceased individuals. Neither FERPA nor this policy applies to records of deceased persons. The person responsible for such records, however, should exercise informed discretion in responding to requests for disclosures and should ensure that the person making the request has a legitimate interest in the information and that the privacy interests of the deceased and third parties are considered.

4. Applicants. This policy does not apply to applicants for admission. However, the admission-related records of applicants who become students at the University are subject to the policy.

III Notice

Penn will annually inform individuals in attendance of their rights under FERPA, including the right to consent to disclosure of personally identifiable information contained in their education records, the right to opt out of the disclosure of “directory information,” the right to review and seek correction of education records, and the right to file a complaint with the Department of Education concerning the University’s alleged failure to comply with FERPA.

IV Disclosure of Education Records

A. Consent Required

As a general rule, personally identifiable information from education records may not be disclosed to other parties without the student’s prior written or electronic consent. Such consent shall be signed (on paper or using an appropriate electronic signature method) and dated and specify records or information to be disclosed, the purpose(s) of the disclosure, and the party or class of parties to whom disclosure may be made.

B. Consent Not Required

In certain cases (some of which are described below) personally identifiable information from education records may, and in some cases must, be disclosed from the records of a student without that individual’s prior written consent. If such disclosure is made, it should be limited to that information necessary for the purpose of the disclosure. Note also that specific requirements and qualifications may apply to these exceptions.

1. To “school officials” with “legitimate educational interests.”
   a. “School officials” means employees of the University, including faculty and staff, as well as certain individuals such as vendors or contractors, performing work for the University under proper authorization.
   b. A school official has “legitimate educational interests” in personally identifiable information in the records of a student if the information in question is required or would be helpful to the official in the performance of his or her duties.
   c. A contractor, consultant, volunteer, or other party to whom the University has outsourced services may be considered a school official provided that the outside party
      1. performs a service for which the University would otherwise use its employees
      2. is under the direct control of the University with respect to the use and maintenance of education records and
      3. is subject to FERPA requirement governing the use and redisclosure of personally identifiable information from education records.

2. To another school where the student seeks or intends to enroll or where the student is already enrolled so long as the disclosure is for purposes related to the student’s enrollment or transfer and the University has provided notice of the disclosure or annual notice of its policy to make such disclosures.

3. In connection with financial aid for which a student has applied, or which he or she has received, but only for such purposes as determining eligibility for financial aid, the amount of financial aid, and the conditions that will be imposed, or for enforcing the terms or conditions of financial aid.

4. To comply with a judicial order or lawfully issued subpoena provided that the University makes a reasonable effort to notify the student whose records are involved in advance of disclosing the information. Prior notification may be prohibited in certain situations. All subpoenas and court orders should be directed to the Office of General Counsel
and disclosure in response to them must be approved by that
office.
5. In connection with an emergency, to appropriate persons
if knowledge of the information is necessary to protect the
health or safety of the student or other individuals.
6. To parents as described in Section IV.(c) (p. 285) below.
7. Regarding directory information as described in Section IV.(d)
(p. 285) below.
8. Other circumstances as authorized by FERPA and its
implementing regulations, as they may be amended
or as otherwise required by law. Questions about legal
requirements should be directed to the Office of General
Counsel.

C. Parental Notification — Consent Not Required
The University’s policy regarding disclosure of student
information to parents is based both upon legal requirements
and the University’s philosophy that students should be treated
as adults. The University generally will not share personally
identifiable information (other than directory information) from
a student’s education records with third parties, including
parents or guardians, without student consent, except in limited
circumstances where such disclosure is permitted under FERPA
(described below) and where the University determines in its
discretion that disclosure is appropriate.
1. In connection with an emergency if knowledge of the
information is necessary to protect the health or safety of the
student or other individuals.
2. To the parent or legal guardian of a student under the age
of 21, information regarding the student’s violation of a
University policy governing the use or possession of alcohol
or drugs.
3. To a person who submits a written affirmation that he or
she is the parent or legal guardian of a student and that the
student is a dependent within the meaning of Section 152 of
the Internal Revenue Code of 1954.
4. In other limited circumstances as allowed under FERPA and
its implementing regulations, as they may be amended.

In cases involving a health or safety emergency or a violation
of a University policy regarding the use or possession of
alcohol or drugs, a decision to notify parents or guardians
about information contained in an education record – and
the actual communications to the parents or guardians –
will be made by the Office of the Vice Provost for University
Life or another senior student affairs officer, in each case
after consultation with the student’s school office and other
appropriate offices. Whenever practicable, a student whose
parents or guardians are to be notified will be informed before
such notification occurs and given an opportunity to initiate
contact with his or her parents or guardians.

D. Consent Not Required — Directory Information
“Directory Information” is generally regarded to be less sensitive
than other types of information in a student’s education record. The
University designates as “directory information,” which may
be disclosed from records relating to a student without his or
her consent if the student has not “opted out” of allowing such
disclosure, the following categories of information: a student’s
name, address (local, home or electronic mail), telephone number,
date and place of birth, Penn ID number, major field of study.

 participation in officially recognized activities (including social
and honorary fraternities) and sports, weight and height if a
member of an athletic team, dates of attendance, degrees and
awards received, and previous educational institutions attended.

Each year, a notice will be given to students concerning these
categories and their right to refuse to permit the University
to make any or all of them available (i.e., “opt out”). Failure to
respond to the annual notice in certain cases may result in the
routine disclosure of one or more of the designated categories of
personally identifiable information. The University will continue
to exercise informed discretion in responding to requests for
directory information.

E. Limitation on Redisclosure
As required by FERPA, the University will inform a party to whom
a disclosure of personally identifiable information from the
records of a student is made; that disclosure is made only on
the condition that the party will not disclose the information
to any other party without the student’s prior written consent.
Exceptions to this requirement include disclosure of directory
information, disclosures to the student, to parents under
appropriate circumstances, to victims of certain disciplinary
matters, and disclosures pursuant to court orders and valid
subpoenas.

F. Verification of Identity and Authority
Before disclosing personally identifiable information from
education records, University employees must take reasonable
steps to verify the identity of the requesting party as well as their
authority to have access to the information.

V. Maintaining a Record of Disclosures
As required by FERPA, the University will maintain a record of
requests for and/or disclosures of personally identifiable information
from a student’s education records. The record must include the
identities of the requesters and recipients and the legitimate interests
they had in the information. This record should be maintained with
records for as long as the records themselves are maintained and
may be inspected by the student.

These recordkeeping requirements do not apply to requests from or
disclosures to:
1. the student;
2. a school official with a legitimate educational interest;
3. a person with written consent from the student;
4. a person seeking directory information; or
5. a federal grand jury or law enforcement agency in connection
with an order or subpoena requiring nondisclosure of its
existence or contents.

VI. Right to Review Education Records & Seek Correction
A. Individuals who are or have been in attendance at the University
are entitled to inspect and review their education records upon
a written request. The request to inspect or review records must
be honored within 45 days after the University has received
the request. The request should be directed to the office that
maintains the record and such office may charge a reasonable fee
for copies.
B. A student does not have a right to inspect or review the following:
1. Financial records and statements of the student’s parent(s),
except with the written permission of the parent(s).
2. Confidential letters and statements of recommendation
related to admission to an educational institution, application
for employment, or the receipt of an honor or honorary recognition that were placed in a student’s records after January 1, 1975, and as to which the student has executed a written waiver of his or her right to inspect and review; provided that the University uses the letters and statements only for the purpose for which they were originally intended and notifies the student upon request of the names of all individuals providing such letters and statements.

3. Other records as to which the student has executed a written waiver of his or her right to inspect and review. The University may not require a student to waive his or her rights under FERPA or this policy.

4. Those portions of records that contain information on other students.

5. Other exceptions as prescribed by FERPA and its implementing regulations, as they may be amended.

C. Opportunity to Seek Correction

1. A student who believes that information contained in his or her education records is inaccurate or misleading or violates his or her privacy rights may request that the University amend them, and the University will decide whether to do so within a reasonable period of time.

2. If the University decides that the information is inaccurate or misleading or otherwise in violation of the privacy rights of a student, the University will amend the record and inform the student of the amendment in writing.

3. If the University declines to amend the student’s records, it will so inform the student and inform him or her of the right to request a hearing to challenge the information believed to be inaccurate, misleading or in violation of his or her privacy rights. A hearing, however, may not be requested by a student to contest the appropriateness of a grade.

4. The hearing will be conducted by an individual who does not have a direct interest in the outcome of the hearing and will provide the student an opportunity to present evidence, relevant to the request to amend the student’s records. The University will provide a written decision within a reasonable period of time after the hearing based on the evidence presented at the hearing. The decision will include a summary of the evidence and the reasons for the decision. Additionally, information regarding hearing procedures will be provided when the student receives notice of his or her rights.

5. If, after a hearing, the University determines that a student’s challenge is without merit it will notify the student of the right to place in his or her records a statement commenting on the challenged information and/or setting forth reasons for disagreeing with the University’s decision. The University will maintain such statement with the student’s record and disclose the statement whenever it discloses the portion of the record to which the statement relates.

VII Right to File Complaint

Students have a right to file a complaint concerning any alleged failure by the University to comply with the requirements of FERPA and its implementing regulations. A complaint may be filed with the federal office that administers FERPA.

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW

Washington, DC 20202-5901

A complaint may be filed internally via the University’s Compliance and Reporting Line by phone at 215-726-6759, or online at www.upenn.edu/215pcomply.

VIII Waiver of Rights

A student may waive any of his or her rights under FERPA and this policy, provided that the waiver is made in writing and signed by the student. The University may not require a student to waive his or her rights under FERPA or this policy.

1 The term “personally identifiable information” includes, but is not limited to, the name of the student or family member, the address of the student or family member, identification number, biometric record, indirect identifier (such as date of birth or mother’s maiden name) or other information that, alone or in combination, is linked to the student and would allow a reasonable person in the school community, without personal knowledge of relevant circumstances, to identify the student with reasonable certainty.

(Source: Almanac, March 16, 2010, Volume 56, No. 25 (http://www.upenn.edu/almanac/volumes/v56/n25/confidentiality.html))

Faculty Authority to Assign Grades and Academic Integrity

The Student Disciplinary Charter is based on the assumption that it is the obligation and right of faculty members to assign grades for academic work submitted to them by students under their supervision and that faculty members should grade student work, using their best judgment about the quality and propriety of that work, independently of disciplinary procedures. The present statement makes clear the relationship between grading and disciplinary action in cases in which a faculty member believes that a student did not fulfill an assignment in accord with the Code of Academic Integrity.

The Disciplinary Charter rests on the principle that faculty members have wide authority to judge the academic work of students and have a general responsibility for the academic progress of students, so much as lies within the power of faculty. Furthermore, the charter assumes that violations of the norms of academic integrity fall along a continuum from minor to major and that not all violations need to be treated as disciplinary cases. The authority and responsibility of faculty members require them to judge the relative severity of a violation. Good individual judgment and institutional practice will help faculty members make the judgment about when to treat a case as requiring disciplinary action.

The distinction between academic evaluation and disciplinary action is also important. Faculty members have the authority to make academic judgments in relation to their students and to make decisions in the interests of furthering their students’ education. Only the institution, acting through its formal processes, may discipline a student. Grades are not sanctions, even if they arise from a judgment that a student has violated a norm of academic integrity. In such cases, the grade may reflect the faculty member’s view that a piece of work was done inappropriately, but it represents a judgment of the quality of the work, not a record of discipline for the behavior. There are many ways to do work inappropriately or badly, resulting in low or failing grades. The policy of the charter is to preserve the faculty member’s right to grade work on the basis of all of its qualities and to make the decision to pursue disciplinary action a separate matter.
Students who believe that they have been graded unfairly have recourse of appeal through the grade appeal procedures established by each school. The charter explicitly recognizes the right of students to appeal grades. The appeal of a grade given because a faculty member believed that the student violated the norms of academic integrity is, for the purposes of the charter, no different from other grade appeals.

(Source: Almanac, September 10, 1996, Volume 43, No. 3) (http://www.upenn.edu/almanac/v43/n03/codechar.html#faculty)

**Guidelines for Addressing Academic Issues of Students with Disabilities**

The University of Pennsylvania is committed to providing access and equal educational opportunities to all students, including students with disabilities. Penn does not discriminate against students with disabilities. The University provides reasonable accommodation to a student’s known disability in order to afford that student an equal opportunity to participate in University-sponsored academic and extracurricular programs, activities and services.

**Reason for Policy Guidance**

This guidance, known as the Provost’s Memorandum, serves two purposes:

- To provide guidance to faculty and staff so that they may reasonably accommodate and support students with disabilities without compromising academic standards and requirements;
- To assure students with disabilities that the University will provide access to all University-sponsored programs, benefits and activities through reasonable accommodation and program accessibility as required under the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, as amended (“ADA”).

**Protection from Discrimination**

The Rehabilitation Act and the ADA prohibit discrimination against people with disabilities by institutions like Penn that receive or benefit from federal financial assistance. These and other laws require that reasonable accommodations be provided to otherwise qualified individuals with a disability.

**Some Key Definitions**

**Disability** — A person with a disability is defined as an individual who

1. has a physical or mental impairment that substantially limits one or more major life activities,
2. has a record of such an impairment, or
3. is regarded as having such an impairment.

Examples of recognized disabilities include, but are not limited to, blindness, deafness, paralysis, diabetes, epilepsy, lupus, bipolar disorder, generalized anxiety disorder, HIV/AIDS, specific learning disabilities, autism spectrum disorder and Attention Deficit Hyperactivity Disorder (ADHD).

**Reasonable Accommodation** — A reasonable accommodation is a modification or adjustment that enables an otherwise qualified individual with a disability full access to participation in University-sponsored programs. These modifications should not fundamentally alter the purpose or requirements of the course or program. Reasonable accommodations are determined on an individual basis and take into account the functional limitations of the impairment. Accommodations may vary from class to class depending upon course content and format. They are intended to be effective and reasonable; they may not be exactly what the student wishes or requests.

**Appropriate Documentation** — Appropriate documentation is a written evaluation or report provided by a clinician in a specific profession or area of expertise who is considered qualified to make the diagnosis. The documentation must be current and comprehensive and may include clinical and social histories from parents, counselors and specialists. A diagnosis must be included. Documentation must identify the student’s specific functional limitations within the academic setting and must show substantial limitation compared to most people. The documentation should conform to well-established practices in specific area(s)/field(s). For more information, see Documentation Guidelines on the Student Disabilities Services website at the following link: http://www.vpul.upenn.edu/lrc/sds/ps_documentation_guidelines.php.

**Responsible University Office**

Students with disabilities and temporary conditions are served by the Office of Student Disabilities Services (SDS). The office is located in the Weingarten Learning Resources Center (WLRC), a department under the Vice Provost of University Life. SDS is responsible for assessing all student requests for accommodations and determining reasonable accommodations for students with disabilities.

The Office of Student Disabilities Services is available to assist faculty and professional staff with the provision of academic accommodations and for consultation regarding students with disabilities.

**Accommodation Procedures**

**Responsibilities of Students**

Students with disabilities who seek accommodation at Penn are responsible for self-identifying with SDS. Identification may take place upon admission or at any time during the student’s course of study.

Students requesting accommodations are responsible for providing documentation, at their own expense, according to the guidelines published on the SDS website: http://www.vpul.upenn.edu/lrc/sds/ps_documentation_guidelines.php. SDS may request additional information if the documentation provided does not support the existence of a disability or the need for the accommodations requested.

The SDS Documentation Review Committee thoroughly reviews the documentation and accommodations are determined through an interactive process with input from the student. Consultation with faculty may be important in determining how to best accommodate a student in a specific course. A determination from the Committee may take four to six weeks, or longer if additional information is needed. For examples of reasonable accommodations, please see the SDS website: http://www.vpul.upenn.edu/lrc/sds/academic_accommodations.

Students who are approved for accommodations must authorize SDS to inform professors about their approved accommodations. They must also make online requests to SDS for individual exam accommodations.
each semester. Students are encouraged to introduce themselves to professors to initiate a dialogue about their particular needs.

**Responsibilities of Faculty and Staff**

Faculty and staff are responsible for ensuring equity and access in their programs and classrooms. The SDS approved accommodations should not fundamentally alter the academic requirements essential to a course or program of study or to licensing prerequisites. It is also important to recognize that students with disabilities must reach the same performance standards to fulfill degree requirements as their non-disabled peers. Accommodations provide students with disabilities equal access, not an unfair advantage.

Instructors are required to accommodate students only after receiving an email from SDS indicating the accommodations that have been approved. A statement about services for students with disabilities should be included in the syllabus for each course. Below is a sample syllabus statement:

**Sample Syllabus Statement**

The University of Pennsylvania provides reasonable accommodations to students with disabilities who have self-identified and received approval from the Office of Student Disabilities Services (SDS). If SDS has approved your request for accommodations, please make an appointment to meet with me as soon as possible in order to discuss the arrangements for your accommodations.

If you have not yet contacted Student Disabilities Services, and would like to request accommodations or have questions, you can make an appointment by calling (215) 573-9235. The office is located in the Weingarten Learning Resources Center at Stouffer Commons, 3702 Spruce Street, Suite 300. Please visit the SDS website at http://www.vpul.upenn.edu/lrc/sds/index.php.

SDS services are free and confidential.

**Accommodated Exams**

In order to effectively manage the logistics of exam accommodations, instructors are expected to respond promptly to SDS emails requesting information about exam accommodations. Although the exam may not be written until shortly before the exam date, other details are needed by the SDS accommodations staff as early as possible in order to arrange for exam administration and inform students of the arrangements. Professors are encouraged to provide SDS with exams as early as possible prior to the exam to allow SDS time to prepare exam materials. Exams are locked in a secure location until the exams are being administered.

In the event that questions arise during the administration of the exam at SDS, it is important that SDS has contact information for the instructor or TA (phone, text and/or email).

The Standards for Accommodating Exams for Students with Disabilities is available on the SDS website: http://www.vpul.upenn.edu/lrc/sds/StandardsforAccommodatingExams.php. This document provides guidelines for accommodated exams that are administered by faculty or their designees.

**Note-taking Announcements**

Faculty may be asked to assist SDS by identifying note-takers through an announcement or email to the class and referring interested note-takers to SDS. A template for the email will be included when SDS contacts faculty regarding note-taker accommodations.

**Accessibility of Information and Course Materials**

Faculty should collaborate with their department offices and SDS to ensure that their course materials, presentations, audio-visual materials and exams are available in an accessible format for students with sensory and print disabilities.

**Confidentiality**

All disability documentation provided by the student is confidential and remains in the Office of Student Disabilities Services for the purpose of determining reasonable accommodations. Students may not request accommodations from faculty that have not been approved by SDS. If documentation is provided to the instructor, it should be returned to the student and the student should be referred to SDS.

Faculty should refrain from discussing a student’s disabilities and accommodations in front of the class, in the presence of other students or to faculty or staff not directly involved in the accommodation process.

**Reconsideration Process**

Students may request reconsideration of the SDS accommodation determination through the SDS Reconsideration Process found on the website at: http://www.vpul.upenn.edu/lrc/sds/reconsiderationprocess.php.

**Concerns and Complaints**

The Office of Affirmative Action and Equal Opportunity Programs is responsible for overseeing the University’s implementation of its equal opportunity and nondiscrimination obligations arising under Federal, Commonwealth, and local laws. Any concerns or complaints should be addressed to:

Office of Affirmative Action and Equal Opportunity Programs
Sansom Place East
3600 Chestnut Street, Suite 228
Philadelphia, PA 19104-6106
(215) 898-6993 (voice) or (215) 746-7088 (fax)

**Additional Information**

Related policies and procedures are available on the SDS website (http://www.vpul.upenn.edu/lrc/sds/) in the section for Faculty and Staff.

This Memorandum is available in alternate format upon request.

Guidelines on Open Expression

View Rules Interpreting the University's Guidelines on Open Expression (https://provost.upenn.edu/policies/pennbook/2016/12/05/rules-interpreting-the-university-s-guidelines-on-open-expression).

I Principles

A. The University of Pennsylvania, as a community of scholars, affirms, supports and cherishes the concepts of freedom of thought, inquiry, speech, and lawful assembly. The freedom to experiment, to present and examine alternative data and theories; the freedom to hear, express, and debate various views; and the freedom to voice criticism of existing practices and values are fundamental rights that must be upheld and practiced by the University in a free society.

B. Recognizing that the educational processes can include meetings, demonstrations, and other forms of collective expression, the University affirms the right of members of the University community to assemble and demonstrate peaceably in University locations within the limits of these Guidelines and undertakes to ensure that such rights shall not be infringed. In keeping with the rights outlined in I.A. (p. 289) above, the University affirms that the substance or the nature of the views expressed is not an appropriate basis for any restriction upon or encouragement of an assembly or a demonstration. The University also affirms the right of others to pursue their normal activities within the University and to be protected from physical injury or property damage. The University shall attempt to ensure that, at any meeting, event or demonstration likely to be attended by non-University law enforcement authorities, the rights provided by these Guidelines are not infringed.

C. The University shall be vigilant to ensure the continuing openness and effectiveness of channels of communication among members of the University community on questions of common interest. To further this purpose, a Committee on Open Expression has been established as a standing Committee of the University Council. The Committee on Open Expression has as its major tasks: participating in the resolution of conflicts that may arise from incidents or disturbances implicating these Guidelines; mediating among the parties to prevent conflicts and violations of these Guidelines; interpreting these Guidelines; advising administrative officers when appropriate; and recommending policies and procedures for the improvement of all levels of communication.

D. In case of conflict between the principles of the Guidelines on Open Expression and other University policies, the principles of the Guidelines shall take precedence.

II Definitions

A. For the purposes of these guidelines, the “University community” shall mean the following individuals:

1. Persons who are registered as students or who are on an unexpired official leave of absence.
2. All persons who are employed by the University.
3. Trustees and associate trustees of the University and members of Boards of Overseers or other bodies advisory to the University.

B. For the purposes of these Guidelines, “meeting” and “event” designate a gathering of persons in a University location previously reserved for that purpose. Unless designated as public, meetings are considered to be private. Events are considered to be public. “Demonstration” designates the presence of one or more persons in a University location with the intent to express a particular point of view in a manner that attracts attention, as in protest, rallies, sit-ins, vigils, or similar forms of expression. “University location” designates:

1. The campus of the University;
2. Any location owned, leased or used by the University, when used by members of the University community; and
3. Areas immediately adjacent thereto.

III Standards

A. The University, through the President, the Provost, and the Vice Provost for University Life, shall act to encourage and facilitate free and open expression within these Guidelines.

1. The University shall publish these Guidelines at least once each academic year in a manner that brings them to the attention of members of the University community. The University shall publish the rules adopted pursuant to IV.B.1 (p. 290) by the Committee on Open Expression at least once each academic year in a manner that brings them to the attention of members of the University community.

2. The University shall establish standards for the scheduling of meetings and events. This shall involve:
   a. Publishing policies and procedures whereby members of the University community, upon suitable request, can reserve and use designated spaces within University buildings for public or private meetings or events;
   b. Publishing policies and procedures whereby members of the University community, upon suitable request, can reserve and use designated outdoor spaces on the University campus for public meetings or events;
   c. Publishing policies and procedures that specifically address requests involving groups composed entirely or predominantly of persons who are not members of the University community (see Section VI (p. 292));
   d. Consulting with the Committee on Open Expression with regard to the substance of the policies and procedures and the manner of their publication; and, if practicable, consulting with the Committee on Open Expression before denying a request for use of a room, facility, or space by an organization recognized by the University for a reason other than prior assignment of the room, facility, or space. In any event, any such denial must be reported promptly to the Committee.

B. Each member of the University community is expected to know and follow the Guidelines on Open Expression. A person whose conduct violates the following Standards may be held accountable for that conduct, whether or not the Vice Provost or delegate has given an instruction regarding the conduct in question. Any member of the University community who is in doubt as to the propriety of planned conduct may obtain an advisory opinion from the Committee on Open Expression in advance of the event.

1. Individuals or groups violate these Guidelines if:
   a. They interfere unreasonably with the activities of other persons. The time of day, size, noise level, and general tenor of a meeting, event or demonstration are factors
that may be considered in determining whether conduct is reasonable;

b. They cause injury to persons or property or threaten to cause such injury;

c. They hold meetings, events or demonstrations under circumstances where health or safety is endangered; or
d. They knowingly interfere with unimpeded movement in a University location.

2. Individuals or groups violate these Guidelines if they hold a demonstration in the following locations:

a. Private offices, research laboratories and associated facilities, and computer centers; or

b. Offices, museums, libraries, and other facilities that normally contain valuable or sensitive materials, collections, equipment, records protected by law or by existing University policy such as educational records, student-related or personnel-related records, or financial records; or

c. Classrooms, seminar rooms, auditoriums or meeting rooms in which classes or private meetings are being held or are immediately scheduled; or

d. Hospitals, emergency facilities, communication systems, utilities, or other facilities or services vital to the continued functioning of the University.

3. a. Individuals or groups violate these Guidelines if they continue to engage in conduct after the Vice Provost for University Life or delegate has declared that the conduct is in violation of the Guidelines and has instructed the participants to modify or terminate their behavior. Prompt compliance with the instructions shall be a mitigating factor in any disciplinary proceedings based upon the immediate conduct to which the instructions refer, unless the violators are found to have caused or intended to cause injury to person or property or to have demonstrated willfully in an impermissible location.

b. If the individuals or groups refuse to comply with the Vice Provost’s or delegate’s order, they may challenge the appropriateness of the order to the judicial system. If the judiciary finds that the conduct was protected by the Guidelines, all charges shall be dismissed.

c. Individuals or groups complying with the Vice Provost’s or delegate’s order may request that the Committee on Open Expression determine if the Guidelines were properly interpreted and applied to their conduct.

2. Members of the Committee are appointed for the following terms:

a. The faculty and representatives of the Penn Professional Staff Assembly are appointed to two-year terms, staggered so that in each year either two or three faculty members are appointed and one representative of the Penn Professional Staff Assembly is appointed.

b. The representative of the Weekly-Paid Professional Staff Assembly is appointed for a two-year term.

c. The undergraduate and graduate/professional student members are appointed to one-year terms.

d. Vacancies shall be filled for the unexpired term by the appropriate nominating body or persons.

3. The Chair of the Committee shall be selected by the Committee on Committees from among the members of the Committee on Open Expression.

B. Jurisdiction

The Committee has competence to act in issues and controversies involving open expression in accordance with these Guidelines. The Committee’s responsibilities are the following:

1. Issuing rules to interpret or give more specific meaning to the Guidelines. Before adopting a rule, the Committee must hold an open hearing on the proposed rule and receive the views of individuals or groups. An affirmative vote of eight members is required for adoption, modification or rescission of a rule to be effective.

2. Recommending to the University Council proposals to amend or repeal the Guidelines. An affirmative vote of seven members is required to make such recommendations.

3. Giving advisory opinions interpreting the Guidelines at the request of a member of the University community for the purpose of advising that person or the University community. Such advice is provided to guide future action. If the Committee does not give a requested opinion, it must indicate its reasons for not doing so. The Committee must respond to such requests as soon as feasible but in any event not later than within one month of the receipt by the Chair of the Committee.

4. Giving advisory opinions interpreting the Guidelines at the request of administrative officials with responsibilities affecting freedom of expression and communication. Such advice is provided for the purpose of guiding future action.

5. Mediating in situations that involve possible violations of the Guidelines. Those Committee members available at the time may act on behalf of the Committee. In carrying out the mediation function, the Committee or those members present may advise the responsible administrative officials and any other person with respect to the implementation of the Guidelines. Those Committee members who have acted on behalf of the Committee must report on their activities to the full Committee.

6. Reviewing the following administrative decisions for the purpose of providing advice on future actions.

a. At the discretion of the Committee, administrative decisions involving these Guidelines made without consultation with the full Committee.
b. All instructions by the Vice Provost or delegate to modify or terminate behavior under Section III.B.3 (p. 290) of these Guidelines.

7. Investigating incidents involving the application of these Guidelines to aid the Committee in its functions of rule making, recommending changes in the Guidelines or issuing advisory opinions. Such functions provide guidance to the University community for future action. The results of Committee investigations for these purposes shall not be a part of the initiation, consideration or disposition of disciplinary proceedings, if any, arising from the incidents.

8. Adopting procedures for the functions of the Committee, varied to suit its several functions, consistent with these Guidelines. Procedures that are not wholly matters of internal Committee practice must be made public in advance of implementation. Except as otherwise provided, the Committee may determine its own voting procedures.

9. Submitting an annual report to the Council and the University on the status of the Committee's work in the University journal of record.

C. Procedures

1. Except as provided with respect to the mediation function in Section IV.B.5 (p. 290), seven members of the Committee constitute a quorum.

2. The Committee can authorize subcommittees, selected from its own members, to act for the Committee in any matter except the issuance of rules interpreting or implementing the Guidelines or the making of recommendations to amend or repeal the Guidelines.

3. The Committee shall respect the privacy of individuals as its general policy and shall maintain the right to declare the confidentiality of its proceedings.
   a. If a person appearing before the Committee requests that his or her testimony or information be kept confidential, the Committee shall consider such a request. The Committee then shall determine whether to honor that request and shall inform that person of its decision before testimony is given.
   b. Minutes of particular Committee meetings may be declared confidential by the Committee or be so declared at the discretion of the chair subject to review by the Committee.
   c. All Committee documents containing confidential material, as determined by the chair, shall be clearly marked "confidential" and shall carry a warning against unauthorized disclosure.

V Responsibilities for Enforcement

A. It is the responsibility of the Vice Provost for University Life (hereafter referred to simply as the "Vice Provost") to protect and maintain the right of open expression under these Guidelines.

B. Observation of meetings, events or demonstrations, when deemed necessary by the Vice Provost to protect and maintain open expression, shall be the responsibility of the Vice Provost, who may delegate such responsibility. This delegate shall have full authority to act in the name of the Vice Provost under these Guidelines.

1. The observer (Vice Provost or delegate) shall identify himself or herself to those responsible for the meeting or event or to the leaders of the demonstration.

2. The Vice Provost shall attempt to inform the chair of the Committee on Open Expression of meetings, events or demonstrations to which an observer will be sent. The chair may designate a member or members of the Committee to accompany and advise the observer. Such a Committee representative shall also be identified to those responsible for the meeting or event or to the leaders of the demonstration.

3. Except in emergencies, the Vice Provost's authority under these Guidelines shall not be delegated to employees of the University's Department of Public Safety. The role of public safety personnel at a meeting, event or demonstration is defined below, in Section V.C.3 (p. 292).

4. Any observer or Committee representative who attends a meeting, event or demonstration shall respect the privacy of those involved. If there has been no violation of these Guidelines, other University regulations, or applicable laws, an observer, committee representative, or public safety employee who attends a meeting, event or demonstration shall not report on the presence of any person at such meeting, event or demonstration.

C. The Vice Provost or delegate is responsible for enforcing Section III.B (p. 289). and may instruct anyone whose behavior is violating or threatens to violate these Guidelines to modify or terminate such behavior. The instruction shall include notice that failure or refusal to comply is a further violation according to Section III.B (p. 289). of these Guidelines. However, an instruction or warning by the Vice Provost or delegate is not a prerequisite for a finding that a violation has occurred.

1. When the Vice Provost or delegate declares that an individual or a group has violated the Guidelines, he or she may request to examine their University identification.
   a. Failure to comply with this request is in violation of the Guidelines.
   b. In the event that any person(s) are deemed by the Vice Provost or delegate, in consultation with available members of the Committee on Open Expression, to have violated the Guidelines and such person(s) refuse to show University or other identification, the Vice Provost or delegate shall if practicable inquire of other individuals present as to the identity of the claimed violator(s). Identification by two other individuals shall suffice to establish identity. Should it not be possible to establish identity in this way, the Vice Provost or delegate may direct that photographs be taken of the participant(s) in the claimed violation. The Vice Provost or delegate must warn the individual(s) that their photographs will be taken unless identification is presented. Photographs and videotapes obtained without such warning may not be used as evidence in disciplinary proceedings. It is preferred that a member of the Committee on Open Expression take any such photographs; however, if no such person is able or willing to do so, another member of the University community may be requested to do so. As soon as safely practicable, all such photographs shall be turned over to the Vice Provost or delegate. Any photographs taken (including videotapes and negatives) shall be used solely by the Office of Student Conduct...
Involuntary Leave of Absence Policy

1. Cases involving undergraduate students are referred to the Office of Student Conduct who investigates the event and decides what disciplinary proceedings, if any, to pursue.

2. Cases involving graduate or professional students are referred to the Office of Student Conduct or to the established disciplinary body of the school in which the student is enrolled.

3. Cases involving faculty are referred to the appropriate Dean or to the Provost.

4. Cases involving University staff or administrators are referred to that individual's supervisor or any other person with supervisory responsibility over that individual.

5. Cases involving trustees and associate trustees of the University and members of the Boards of Overseers or other bodies advisory to the University are referred to the Executive Committee of the Trustees.

VI Non-University Persons

These Guidelines address themselves explicitly to forms of individual and collective expression in a University location by members of the University community. The extent to which the privileges and obligations of these Guidelines may be made applicable in particular circumstances to individuals who are not members of the University community shall be determined by the Vice Provost or delegate. Participants in meetings, events and demonstrations in a University location are required to comply with the instructions of the Vice Provost or delegate. (See III.A.2.c (p. 289).)

1 An "unreasonable noise level" is defined as sound above 85 decibels measured by a calibrated sound-level meter at an "A" weighting on "slow" response ten feet away from and directly in front of the source, amplifier or loudspeaker when the latter is within 50 feet of a building.

2 Videotaped or closed circuit television information collected by posted, fixed location cameras is excluded, as long as it is in conformance with the rules of the CCTV policy as of January 13, 1999.

Involuntary Leave of Absence Policy

I. Introduction

The University of Pennsylvania provides a wide range of services to support and address the mental and physical health needs of students. Our first concern is for the health and welfare of each individual in our community. Our goal is to enable all of our students to participate fully as members of Penn’s academic community. However, students whose psychiatric, psychological, or other medical condition causes them to pose a threat to themselves or others, or causes them to significantly
disrupt the educational and other activities of the University community, may be required to take a leave of absence from the University. Under these circumstances, students will be given the opportunity to take a voluntary leave through the process in place in their school. Should a student decline to take a voluntary leave, the University may determine that the student’s health and welfare, and/or the needs of the community, require a period of involuntary leave of absence. The following policy establishes the protocol under which an involuntary leave of absence may occur and the process for return from leave.

II. Guidelines
The University may place a student on an involuntary leave of absence or require conditions for continued attendance under the following circumstances when the student exhibits behavior resulting from a psychological, psychiatric, or other medical condition that:

- threatens, harms, or has the potential to harm the health or safety of the student or others;
- causes or threatens to cause significant property damage; or
- significantly disrupts the educational and other activities of the University community.

The process for withdrawal and return from leave is set forth below.

III. Withdrawal Process
When a student exhibits any of the behaviors described above, the matter should be brought to the attention of the Office of the Vice Provost for University Life who will be responsible for informing the Vice Provost for Education (or such person who holds those responsibilities at the time) that an involuntary leave may be warranted. The Office of the Vice Provost for University Life will manage the process, convene case conferences, and work with University and School offices to coordinate the delivery of services. In most cases, the student will be required to undergo an immediate assessment of his or her psychological, psychiatric or other medical condition. This assessment will be performed by Counseling and Psychological Services (CAPS), the Student Health Service, or other appropriate professionals.

The student will be notified that the Provost’s Office is seeking to determine whether he or she should be required to take a leave of absence. When reasonably possible, the student will be given the opportunity to confer with the Vice Provost for Education or his/her designee to provide additional information for consideration.

In consultation with the School Dean and the Office of the Vice Provost for University Life, the Vice Provost for Education will review the available information and make a decision that may include the following:

- that the student remain enrolled with no conditions;
- that the student remain enrolled subject to conditions (including a description of those conditions); or
- that the student be placed on an involuntary leave of absence.

If the University’s decision is to allow the student to remain enrolled subject to conditions, then the student’s failure to comply with the conditions may, after appropriate consideration, result in the imposition of an involuntary leave.

If the University’s decision is to require an involuntary leave of absence, the decision will also indicate the length of the leave and, in consultation with the student’s school, describe the conditions (if any) under which the student may seek to return from leave.

The student shall be informed in writing by the Vice Provost for Education of the leave decision and the basis for the decision, the effective date of the leave, and conditions for return (if applicable). If a student is permitted to remain enrolled subject to conditions, the student shall be informed in writing of the effective date and the duration of the modified attendance.

IV. Appeal
A student subject to this policy may appeal any decision of the Vice Provost for Education to the Provost. A student who wishes to appeal must submit a written letter of appeal to the Provost within three (3) days of receipt of the Vice Provost for Education’s decision. The letter of appeal must state why the student believes that the Vice Provost’s decision was unwarranted under the circumstances. After reviewing the appeal letter the Provost may meet with the student, as the Provost determines appropriate. In addition, the Provost may review relevant documents and confer with University officials before reaching a decision on the appeal. The Provost will render a decision upholding, rejecting, or modifying the determination of the Vice Provost for Education.

In addition to the appeal process described above, a student subject to this policy may also seek a resolution of concerns through the grievance procedures described in the Penn Book.

V. Temporary Removal
If the Vice Provost for Education has reason to believe, based on the information available, and in consultation with professionals with appropriate expertise, that the student’s continued presence on campus poses an imminent threat of significant harm to him or herself or to others in the community, the Vice Provost for Education may take immediate action to remove the student from campus pending receipt and review of relevant information and a determination. At the Vice Provost for Education’s discretion, this temporary removal may remain in place pending completion of any appeal process.

VI. Process for Return from Leave
A student seeking a return from leave must apply in writing to the Office of the Vice Provost for University Life. Such a request must be submitted no less than 30 days before the beginning of the semester in which the student seeks to reenroll. The student must demonstrate that he/she has met any conditions for return specified by the University.

The University may require any documentation or evaluation it deems appropriate. (Reports from health professionals should be directed to the director of CAPS or Student Health Services.) In addition, the University may require a release from the student to enable CAPS or SHS to discuss the student’s condition with his/her treating health professional.

In consultation with the School Dean and the Office of the Vice Provost for University Life, the Vice Provost for Education will review the request and other relevant information, including the student’s compliance with specified conditions for return from leave and the assessments of CAPS or Student Health Services and other health professionals, and make a determination of whether it is appropriate for the student to return.

If the Vice Provost for Education denies the request to return from leave, the student may challenge that decision by submitting a written appeal to the Provost within 5 days of receipt of the Vice Provost’s decision.

VII. Confidentiality
All records concerning involuntary leaves of absence will be kept in accordance with the University confidentiality policy and other applicable
policies. The student’s transcript will indicate only the notation of “leave of absence.”

Note: A student on leave may not participate or hold a leadership position in a registered University organization.

VIII. Administration of the Process

Administrative duties with respect to convening this leave process and maintaining its records will be the responsibility of the Office of the Vice Provost for University Life.

Pennbook

The Pennbook (https://provost.upenn.edu/policies/pennbook) is a collection of policies that relate to student life at the University of Pennsylvania. These policies govern academic activities such as grading and exams, provide guidance on the use of campus resources, and explain expectations for membership in the university community.

Policy on Secular and Religious Holidays

1. The University recognizes/observes the following secular holidays:
   - Martin Luther King, Jr. Day, Memorial Day, July 4, Thanksgiving and the day after, Labor Day, and New Year’s Day.

2. The University also recognizes that there are several religious holidays that affect large numbers of University community members, including Christmas, Rosh Hashanah, Yom Kippur, the first two days of Passover, and Good Friday. In consideration of their significance for many students, no examinations may be given and no assigned work may be required on these days. Students who observe these holidays will be given an opportunity to make up missed work in both laboratories and lecture courses. If an examination is given on the first class day after one of these holidays, it must not cover material introduced in class on that holiday.

   Faculty should realize that Jewish holidays begin at sundown on the evening before the published date of the holiday. Late afternoon exams should be avoided on these days. Also, no examinations may be held on Saturdays or Sundays in the undergraduate schools unless they are also available on other days. Nor should seminars or other regular classes be scheduled on Saturdays or Sundays unless they are also available at other times.

3. The University recognizes that there are other holidays, both religious and secular, which are of importance to some individuals and groups on campus. Such occasions include, but are not limited to, Sukkot, the last two days of Passover, Shavuot, Shemini Atzerat and Simchat Torah, as well as Chinese New Year, the Muslim New Year, Diwali, and the Islamic holidays Eid Al-Fitr and Eid Al-Adha. Students who wish to observe such holidays must inform their instructors within the first two weeks of each semester of their intent to observe the holiday even when the exact date of the holiday will not be known until later so that alternative arrangements convenient to both students and faculty can be made at the earliest opportunity. Students who make such arrangements will not be required to attend classes or take examinations on the designated days, and faculty must provide reasonable opportunities for such students to make up missed work and examinations. For this reason it is desirable that faculty inform students of all examination dates at the start of each semester. Exceptions to the requirement of a make-up examination must be approved in advance by the undergraduate dean of the school in which the course is offered.

   (Source: Almanac, August 30, 2016, Volume 63, No. 03)

Policy on University Recognition of Undergraduate Honor Societies

The University through its faculty in schools and academic departments alone reserves the right to bestow academic honors on its undergraduate students and to report such honors on students’ transcripts. Academic honors of various types are established and awarded by the relevant faculty body. The relevant body depends on the nature of the honor.

- In the case of honors for which students in a particular major are uniquely eligible, the authorizing body is the academic department or interdisciplinary program committee responsible for that major.
- In the case of honors for which students in a particular school are uniquely eligible, the authorizing body is the faculty of that school.
- In the case of honors for which all undergraduates are eligible, the authorizing body is the Council of Undergraduate Deans acting with the consent of the faculties of the separate undergraduate schools.
Release of Student Academic Status Information for Honor Society Selection

Student academic status information (e.g., GPA, term standing, class rank/percent) may be released only in accordance with the University’s Policy On Confidentiality Of Student Records, particularly regarding designated directory information.

Student academic status information is not to be released to honor societies for recruiting purposes. This includes cohort information such as “names of students with a 3.2 or higher GPA.” Student academic status information may be utilized internally for selection purposes by Schools, Centers, or other University departments under the auspices of an officially designated selection committee and following the University’s Policy On Confidentiality Of Student Records.

Sexual Harassment Policy

I. Purposes

The University of Pennsylvania’s commitment to freedom of thought, discourse and speech is founded on trust and respect among members of the University community. It is the responsibility of each member of the Penn community to respect the personal dignity and worth of others.

The University has established policies on behaviors that interfere with its mission. The University’s Equal Opportunity and Affirmative Action Policy prohibits discrimination on the basis of race, color, sex, sexual orientation, gender identity, religion, creed, national or ethnic origin, citizenship status, age, disability, veteran status or any other legally protected class or status. Policies and regulations implementing this commitment also include the Statement on Academic Freedom and Responsibility, the Guidelines on Open Expression and the Code of Academic Integrity.

The University has also adopted the following policy concerning sexual harassment. Sexual harassment in any context is unacceptable and is a matter of particular concern to an academic community in which students, faculty and staff must rely on strong bonds of intellectual trust and dependence. Sexual harassment is not tolerated at Penn.

II. Definitions

For the purposes of University policy, the term “sexual harassment” refers to any unwanted conduct that is based on an individual’s sex, sexual orientation, gender identity and/or gender expression and that:

1. Involves a stated or implicit threat to the individual’s academic or employment status;
2. Has the purpose or effect of interfering with the individual’s academic or work performance; and/or
3. Creates an intimidating or offensive academic, living or work environment.

The University regards such behavior as a violation of the standards of conduct required of all persons associated with the institution. Accordingly, as noted in the Handbook for Faculty and Academic Administrators, the Human Resources Policy Manual, the Pennbook and other University publications, persons engaged in such harassment within the University setting are subject to the full range of internal disciplinary actions, including separation from the institution. The same range of disciplinary actions will be applied in the event of retaliation against an individual who in good faith makes an allegation of sexual harassment, who cooperates in an investigation into such allegations or who opposes any act of sexual harassment as defined in this Policy.

Not every act that might be offensive to an individual or a group necessarily will be considered as harassment and/or a violation of the University’s standard of conduct. In determining whether an act constitutes harassment, the totality of the circumstances surrounding the conduct must be carefully reviewed. Due consideration must be given to the protection of individual rights, freedom of speech, academic freedom and open expression.

III. Resources

Schools and Centers should make known to all of their members the available resources for information, counseling and support, as well as the informal and formal procedures for resolving complaints of sexual harassment within the appropriate School or Center or at the University level. These resources include the following:

A. Confidential Resources for Information, Counseling and Support

The following University resources are available to members of the University community who seek information and counseling about University policies on sexual harassment, standards of behavior, informal and formal mechanisms for resolving complaints and resources for complainants and respondents. These resource offices are also available to assist members of the University community with making an informal or formal complaint.

The resources listed below are considered confidential, which means that the information shared with these resources generally will be held in confidence, consistent with the University's obligation to address complaints of sexual harassment, unless the person sharing the information gives his or her consent to the disclosure of that information. The commitment to confidentiality does not preclude the sharing of information among responsible University administrators as needed, including to keep members of the University community safe.

- African-American Resource Center (http://www.upenn.edu/aarc) (resource for students, staff or faculty)
- Counseling and Psychological Services (http://www.vpul.upenn.edu/caps) (resource for students)
- Employee Assistance Program (https://www.hr.upenn.edu/myhr/worklife/healthy/eap) (resource for staff or faculty)
- Lesbian Gay Bisexual Transgender Center (http://www.vpul.upenn.edu/lgbtc) (resource for students, staff or faculty)
- Office of the Chaplain (http://www.upenn.edu/chaplain) (resource for students, staff, faculty or visitors)
- Office of the Ombudsman (http://www.upenn.edu/ombudsman) (resource for students, staff or faculty)
- Office of Sexual Violence Prevention and Education (https://secure.www.upenn.edu/vpul/pvp) (resource for students)
- Penn Women's Center (http://www.vpul.upenn.edu/pwc) (resource for students, staff or faculty)
- Special Services Department, Division of Public Safety (https://www.publicsafety.upenn.edu/about/special-services) (resource for students, staff, faculty or visitors)
- Student Health Service (http://www.vpul.upenn.edu/shs) (resource for students)

B. Additional Resources and Informal Mechanisms for Resolution
There are other resources available to the University community for information, counseling and support. These resources are also available to assist in the informal resolution of complaints, as are the confidential resources listed above.

- College Houses and Academic Services (https://www.collegehouses.upenn.edu) (complaints regarding College House residents)
- Dean's Offices and Department Chairs (complaints regarding faculty and staff in their respective Schools or Departments)
- Division of Human Resources (https://www.hr.upenn.edu/myhr), Office of Staff and Labor Relations (complaints regarding staff)
- Office of Affirmative Action and Equal Opportunity Programs (http://www.upenn.edu/affirm-action) (complaints regarding faculty, staff, students or visitors)
- Office of Student Conduct (https://www.osc.upenn.edu) (complaints regarding students)
- Office of the Vice Provost for Faculty (https://provost.upenn.edu/faculty) (resource for faculty)
- Student Intervention Services (http://www.vpul.upenn.edu/intervention.php) (resource for students)

C. Formal Mechanisms for Complaint Resolution
When informal resolution is not chosen, is unsatisfactory or is not appropriate, the formal mechanisms described below should be used. Please note that these mechanisms are intended for sexual harassment complaints that do not involve allegations of sexual violence, domestic violence, relationship violence or stalking. Refer to the Sexual Violence, Relationship Violence and Stalking Policy for information about making formal complaints involving incidents of sexual violence, domestic violence, relationship violence and/or stalking.

Members of the University community who would like assistance with making a formal complaint may contact any of the confidential resources identified above.

1. A complaint of sexual harassment (excluding complaints involving sexual violence, domestic violence, relationship violence and/or stalking) against a faculty member, instructor or teaching assistant may be brought by a student, staff member, faculty member or visitor to the department chair or Dean of the faculty member. If the complaint is made to a department chair, the department chair is responsible for informing the Dean. If the Dean is the subject of the complaint, then the complaint should be made to the Provost (or his/her designee). The Dean or the Provost (or his/her designee) is then charged with taking appropriate action. If the matter is not resolved informally, the Dean or the Provost (or his/her designee) conducts an investigation. If based on the results of the investigation the Dean or Provost (or his/her designee) determines that action should be taken in response to the complaint, the Dean or Provost (or his/her designee) will determine what that action should be and the appropriate process for taking that action. For standing faculty, the procedures described in the Procedure Governing Sanctions Taken Against Members of the Faculty, Handbook for Faculty and Academic Administrators, part II.E.16 will be followed, if applicable. A member of the standing faculty, associated faculty or academic support faculty who believes she or he has been subjected to sexual harassment may file a grievance under the Faculty Grievance Procedure, Handbook for Faculty and Academic Administrators, part II.E.12, provided the complaint constitutes a grievance as defined in Section I of the Procedure. This procedure is administered by the Faculty Grievance Commission. The panel makes its recommendations to the Provost. In cases that involve reappointment, promotion or tenure, and in which the Provost has declined or failed to implement the recommendations of the panel to the satisfaction of the grievant, the grievant may seek to obtain a hearing before the Senate Committee on Academic Freedom and Responsibility on the actions of the Provost.

2. A complaint of sexual harassment (excluding complaints involving sexual violence, domestic violence, relationship violence and/or stalking) against a staff member may be brought by a student, staff member, faculty member or visitor to the supervisor of the person complained against, to the next level supervisor, to Human Resources (either to the Office of Staff and Labor Relations or to the Human Resources Director for the school or center) or to the Office of Affirmative Action and Equal Opportunity Programs (OAA/EOP). If the complaint is made to a supervisor, that individual is responsible for notifying either Human Resources (either the Office of Staff and Labor Relations or the Human Resources Director for the School or Center) or the Office of Affirmative Action and Equal Opportunity Programs. Either Human Resources or the Office of Affirmative Action and Equal Opportunity Programs will conduct an investigation. If based on the results of that investigation it is determined that the policy was violated, then appropriate action will be taken.

3. A complaint of sexual harassment (excluding complaints involving sexual violence, domestic violence, relationship violence and/or stalking) may be brought against a student by a student, staff member, faculty member or visitor by filing a complaint with the Office of Student Conduct, which will handle the complaint pursuant to the Charter of the Student Disciplinary System. If the complaint relates to a graduate or professional student enrolled in a School which has established a hearing board or other decision-making body, a complaint should be filed with that body. Refer to the Office of Student Conduct website for a list of these graduate schools and programs.

4. A complaint of sexual harassment (excluding complaints involving sexual violence, domestic violence, relationship violence and/or stalking) may be brought by a visitor or guest of the University against an enrolled student, staff member or faculty member by contacting the Office of Affirmative Action and Equal Opportunity Programs which will handle the matter or make the appropriate referral.

D. Central Reporting of Sexual Harassment
The University’s decentralized system of resources is designed to encourage the reporting and resolution of complaints of sexual harassment. However, in order to enable the administration to identify any patterns or trends of sexual harassment, the Executive Director of the Office of Affirmative Action and Equal Opportunity Programs shall, on a semi-annual basis, convene a meeting of representatives from the offices and Centers listed in Section A to review and report on sexual harassment across the University based upon the reports or complaints of sexual harassment that they have handled formally or informally within their areas. Confidentiality regarding the identity of the parties involved in each complaint will be maintained to the extent possible.

E. Education and Prevention
The prevention of sexual harassment and the establishment of effective procedures with due concern for all parties require a thoughtful educational program.

1. University resource offices will provide to the community information on available informal and formal resolution resources and resources for support and information for complainants and respondents.
2. Deans and heads of centers and departments are encouraged to discuss this policy and issues of sexual harassment at meetings of faculty and staff.
3. Training programs for faculty, staff and students who work in the College Houses and others who assist students in crisis situations and serve in an advisory capacity to students will include training about referrals, resources and methods for handling complaints of sexual harassment.
4. Students will be provided with information about sexual harassment and available resources during new student orientations and throughout the academic year.
5. The University will publish this policy statement annually, including information about the resources available to advise, counsel and assist in the informal and formal resolution of sexual harassment complaints. Information will explain how and where to contact University-wide and school- and division-specific resources and will be posted on appropriate University websites. All members of the University community have a responsibility to aid in the prevention of sexual harassment and are encouraged to report concerns to appropriate University resources promptly.

F. Policy Against Retaliation
University policy expressly prohibits retaliation against faculty, staff or students who in good faith make reports of violations of this policy. In addition, knowingly and intentionally making a false report of a violation of this policy is prohibited. Members of the Penn community who take adverse action against someone who reports a violation of this policy, intimidate, threaten or otherwise engage in retaliation are subject to disciplinary action, up to and including termination of their employment. In addition, such acts may violate federal, state and local laws and perpetrators of such acts may be subject to criminal prosecution.

The terms “harassment” and “sexual harassment” as used throughout are defined as a matter of University policy, and not necessarily identical or limited to the uses of that term in external sources, including governmental guidelines, laws, regulations or legal decisions.

Where sexual harassment involves sexual violence, relationship violence, domestic violence and/or stalking, refer also to the University’s Sexual Violence, Relationship Violence and Stalking Policy.

### Sexual Violence, Relationship Violence, and Stalking Policy

Thank you to those who submitted comments and suggestions regarding the proposed revision of the University’s Sexual Harassment and Sexual Violence, Relationship Violence and Stalking Policies. After careful consideration of the comments received, the policies that appear in this supplement have been adopted, effective on July 1, 2016. In addition to the resource information contained in the policies, the Penn Violence Prevention (https://provost.upenn.edu/uploads/media_items/pvp-resource-guide.original.pdf), Title IX and Sexual Misconduct Violence Prevention (http://www.upenn.edu/violence-prevention.html) and the Title IX at Penn (http://www.upenn.edu/affirm-action/titleix.html) websites provide information and guidance regarding our collective responsibilities for the prevention of sexual harassment and sexual violence. Information regarding making informal and formal complaints is contained in the policies and on the websites referenced above among others. The new policies will be widely publicized at the beginning of the fall semester. The Offices of Affirmative Action and Equal Opportunity Programs, Staff and Labor Relations in the Division of Human Resources and the Vice Provost for Faculty are among those available to respond to questions or provide additional information.

—Amy Gutmann, President
—Vincent Price, Provost
—Craig R. Carnaroli, Executive Vice President
—J. Larry Jameson, Executive Vice President for the Health System and Dean, Perelman School of Medicine

### I. Introduction

This policy, which prohibits behaviors that are more generally addressed by the University’s Sexual Harassment Policy, applies to faculty, students, staff and visitors to the University campus and facilities. All forms of sexual violence, relationship violence and stalking and attempts to commit such acts are considered to be serious misconduct and may result in disciplinary action up to and including expulsion or termination of employment. In addition, such acts may violate federal, state and local laws and perpetrators of such acts may be subject to criminal prosecution.

### II. Definitions

Sexual violence, relationship violence and stalking in any form, including sexual assault and rape, are prohibited by University policy. Important definitions appear below.

**Sexual violence** includes a range of behaviors in which an act of a sexual nature is taken against another individual without that person’s consent or when the individual is unable to consent. There are various types of sexual violence, including but not limited to sexual assault and rape (defined below).

**Sexual assault** (including but not limited to rape) is defined as having committed any of the following acts:

- Any physical sexual contact that involves the use or threat of force or violence or any other form of coercion or intimidation;
- Any physical sexual contact with a person who is unable to consent due to incapacity or mental or physical impairment. "Incapacity" or "impairment" include but are not limited to being under the influence of alcohol or drugs or being too young to consent.

**Rape** is defined as sexual assault involving an act of penetration and includes acquaintance rape (assailant and victim know each other).

**Non-forcible sex acts** include unlawful sex acts where consent is not relevant, such as sexual contact with an individual under the statutory age of consent as defined by Pennsylvania law.

**Consent** is an affirmative decision to engage in mutually agreed upon sexual activity and is given by clear words or actions. Consent may not be inferred from silence, passivity or lack of resistance alone. Furthermore,
consent to one form of sexual activity does not imply consent to other forms of sexual activity and the existence of a current or previous dating, marital or sexual relationship is not sufficient to constitute consent to additional sexual activity. Assent shall not constitute consent if it is given by a person who, because of youth, disability, intoxication or other condition, is unable to lawfully give his or her consent.

**Relationship Violence**, also commonly known as dating violence, is defined as an act or a pattern of abuse committed by a person involved in a social, sexual or romantic relationship, past or present, with the victim. Relationship violence can encompass a broad range of behaviors that may include physical violence, sexual violence, emotional violence and economic violence.

**Domestic Violence** is defined as abuse committed against an adult who is a spouse or former spouse, cohabitant or someone with whom the abuser has a child, has an existing dating or engagement relationship or has had a former dating or engagement relationship.

**Stalking** means engaging in a course of conduct directed at specific person(s) that would cause a reasonable person to fear for his or her safety or the safety of others, or to suffer substantial emotional distress.

In determining whether the alleged conduct violates this policy, consideration will be given to the totality of the circumstances, including the nature of the conduct and the context in which the alleged incident occurred.

### III. Resources

#### A. Confidential Resources for Information, Counseling and Support

Resource offices are available to assist members of the Penn community and visitors to the campus who have been, or know someone who has been, the victim of sexual violence, relationship violence or stalking. The staff of these offices are available to provide counseling and support, as well as information about and assistance with making a complaint.

The information shared with the resources listed below generally will be held in confidence, consistent with the University's obligation to address complaints of sexual violence, unless the person sharing the information gives his or her consent to the disclosure of that information. Confidential resources are not obligated to share identifying information with the Title IX Coordinator when an incident of sexual violence is shared with them. The University can take appropriate action. (For a full discussion of reporting obligations, see the Reporting and Monitoring section below.)

- **African-American Resource Center** (http://www.upenn.edu/aarc/staff.html) (resource for students, staff or faculty)
- **Counseling and Psychological Services** (http://www.vpul.upenn.edu/caps) (resource for students)
- **Employee Assistance Program** (https://www.hr.upenn.edu/myhr/worklife/healthy/eap) (resource for staff or faculty)
- **Lesbian Gay Bisexual Transgender Center** (http://www.vpul.upenn.edu/lgbtc) (resource for students, staff or faculty)
- **Office of the Chaplain** (http://www.upenn.edu/chaplain) (resource for students, staff, faculty or visitors)
- **Office of the Ombudsman** (http://www.upenn.edu/ombudsman) (resource for students, staff or faculty)
- **Office of Sexual Violence Prevention and Education** (https://secure.www.upenn.edu/vpul/pvp) (resource for students)
- **Penn Women’s Center** (http://www.vpul.upenn.edu/pwc) (resource for students, staff or faculty)
- **Special Services Department** (https://www.publicsafety.upenn.edu/about/special-services), Division of Public Safety (resource for students, staff, faculty or visitors)
- **Student Health Service** (http://www.vpul.upenn.edu/shs) (resource for students)

#### B. Additional Resources for Information, Counseling and Support and Informal Complaint Resolution

There are other resources available to the University community for information, counseling and support. These resources are also available to assist in the resolution of complaints, as are the confidential resources listed above. Please note that these resources are not confidential. Unlike the confidential resources, these resources are obligated to notify the Title IX Coordinator when an incident of sexual violence is shared with the resource person and to provide sufficient information so that the University can take appropriate action. (For a full discussion of reporting obligations, see the Reporting and Monitoring section below.)

- **College Houses and Academic Services** (https://www.collegehouses.upenn.edu) (resource for College House residents)
- **Dean's Offices and Department Chairs** (resource for students, faculty or staff in their respective Schools and Departments)
- **Division of Human Resources** (https://www.hr.upenn.edu/myhr), Office of Staff and Labor Relations (resource for staff)
- **Office of Affirmative Action and Equal Opportunity Programs** (http://www.upenn.edu/affirm-action) (resource for faculty, students, staff or visitors)
- **Office of the Vice Provost for Faculty** (https://provost.upenn.edu/faculty) (resource for faculty)
- **Student Intervention Services** (http://www.vpul.upenn.edu/intervention.php) (resource for students)

#### C. Formal Complaint Resolution Resources

A formal complaint against a member of the University’s faculty or instructional staff should be initiated by contacting the Office of the Sexual Violence Investigative Officer. The complaint will be handled consistent with the Procedures for Resolving Complaints Against Faculty of Sexual Assault, Sexual Violence, Relationship Violence and Stalking.

A formal complaint against an enrolled University student should be initiated by contacting the Office of the Sexual Violence Investigative Officer. The complaint will be handled consistent with the Student Disciplinary Procedures for Resolving Complaints of Sexual Assault, Sexual Violence, Relationship Violence and Stalking.

A formal complaint against a University staff member should be initiated by contacting the Office of Affirmative Action and Equal Opportunity Programs (OAA/EOP). The complaint will be handled consistent with that office's complaint resolution procedures.
IV. Reporting and Monitoring

The University is committed to ensuring that members of the University community who share information regarding incidents of sexual violence get the information, counseling and support that they need and are aware of the process for making a formal complaint. The University is also committed to reporting incidents of sexual violence so that any patterns or systemic problems revealed by such reports and complaints can be addressed.

Consistent with these commitments, the University has determined that the Title IX Coordinator must be advised when incidents of sexual violence are reported to the Office of the Sexual Violence Investigative Officer, to any of the offices listed above (except those identified as confidential resources), to any member of the faculty or to any University staff member in a leadership or supervisory position or who has significant responsibility for the welfare, guidance or advising of students or staff, including the President, Provost, Vice Presidents, Vice Provosts, Deans, Associate Deans, Assistant Deans and Academic Advisors, as well as appropriate staff in the following offices: College Houses and Academic Services (CHAS), Division of Public Safety (DPS), Division of the Vice Provost for University Life (VPUL) except those identified as confidential resources, Division of Human Resources (as well as Human Resources staff in the Schools/Centers), Office of Affirmative Action and Equal Opportunity Programs (OAA/EOP), Graduate Student Center (GSC), Division of Recreation and Intercollegiate Athletics (DRIA) and student life and academic services units in the University’s Schools and Centers.

When an incident of sexual violence is reported to the Title IX Coordinator, the Title IX Coordinator will take appropriate steps to ensure that the individual who reported the incident has been advised of the resources available to him or her and the process for making a formal complaint. The Title IX Coordinator should be provided with sufficient information to enable the University to identify patterns. Such information includes the name of the person reporting the incident, the date, time and location of the incident, the identities of those involved in the incident and a brief description of the behavior alleged to have occurred, to the extent this information is known to the individual making the report. If there has been a request for confidentiality, this should also be shared with the Title IX Coordinator, who will consider the request. Even if confidentiality cannot be granted, information will be disclosed only to those who, in the judgment of the Title IX Coordinator, have a need to know. Decisions regarding how to proceed following a report of sexual violence to the Title IX Coordinator will be made on a case-by-case basis. A report to the Title IX Coordinator will not necessarily result in a formal complaint to the Sexual Violence Investigative Officer (for complaints against enrolled students or faculty) or to the Office of Affirmative Action and Equal Opportunity Programs (for complaints against staff).

For those members of the University community who have crime statistics reporting obligations under the Clery Act, notifying the Title IX Coordinator regarding an incident of sexual violence does not replace the obligation to report the matter to the Division of Public Safety. For additional information about Clery Act reporting or to make a report, refer to the Clery Act & Crime Reporting page on the Division of Public Safety website at https://www.publicsafety.upenn.edu/clery/

V. Rights of Complainants and Respondents

Persons who make a complaint and those who are responding to complaints have the following rights:

- The option to notify law enforcement;
- The option to have another member of the University community present during interviews that are part of a University-initiated investigation;
- To be notified of counseling and support services available; and
- To be notified of options to change academic, living or work arrangements.

VI. Policy Against Retaliation

University policy expressly prohibits retaliation against faculty, staff or students who in good faith make reports of violations of this policy. In addition, knowingly and intentionally making a false report of a violation of this policy is prohibited. Members of the Penn community who take adverse action against someone who reports a violation of this policy, intimidate, threaten or otherwise engage in retaliation are subject to disciplinary action up to and including termination of their employment or expulsion from the University.

(Source: Almanac, July 1, 2016, Supplement (http://www.upenn.edu/almanac/between/2016/070116-of-record.html#violence))

Student Disciplinary Procedures for Resolving Complaints of Sexual Assault, Sexual Violence, Relationship Violence and Stalking

Introduction

The University of Pennsylvania is committed to providing a safe and healthy environment, free of gender-based misconduct, to all members of our community and visitors to our community. As such, sexual assault, sexual violence, relationship violence, and stalking will not be tolerated. In order to ensure the creation of a climate where students are able to thrive and achieve their full potential, the University has developed a wide range of policies, educational programs, broad-based resources, support, and reporting systems. This amendment to the Student Disciplinary Charter supplements these other policies and initiatives, addressing the process by which complaints against an enrolled University student for a violation of the Sexual Violence, Relationship Violence and Stalking Policy (“Sexual Violence Policy”) will be adjudicated and resolved.

Confidentiality

Confidentiality is of critical importance in ensuring that these sensitive matters are handled appropriately. The University has an obligation to address complaints with respect to the violation of the Sexual Violence Policy as fairly and expeditiously as possible as soon as it becomes aware of an allegation that the Policy has been violated. To that end, if any University official is informed of an allegation that the Policy has been violated, the University is required to respond, unless the informed official is serving in a privileged capacity (designated confidential resource, therapists, clergy, or medical providers).
The response to the complaint, however, including seeking a resolution under this procedure, should be treated as confidential, to the extent consistent with the requirements of law. University staff and faculty may share information with others who have a legitimate need to know in order to fairly and effectively address complaints, but the information should be considered confidential and should be protected to the extent possible consistent with legal obligations. Such administrators may include, for example, the Office of the Vice Provost for University Life, the Office of the Sexual Violence Investigator, the Title IX Officer, Public Safety, the Office of General Counsel, Counseling and Psychological Services, Student Health, and academic advising offices.

I. Reporting Complaints of Violation of the Sexual Violence Policy

A. Office of the Sexual Violence Investigative Officer

The Office of the Sexual Violence Investigative Officer (IO) will be responsible for managing all complaints made against an enrolled University student alleging a violation of the Sexual Violence Policy.

Complaints must either be presented in writing, or based upon information provided by the complainant to the IO who will then memorialize the allegations in writing and have the allegations confirmed by the complainant. Complainants may include University students or others both within and outside the community alleging a violation against a University enrolled student.

B. Office of the District Attorney and Office of Civil Rights

Complainants may also choose to file a report with the District Attorney or with the Office of Civil Rights of the U.S. Department of Education. The University system and the legal system work independently from one another, but will coordinate efforts to the extent possible. The University will not unilaterally defer its proceeding pending the outcome of any criminal process, nor will the outcome of any legal process be determinative of the University result. Rather, the University has its own interest in, and responsibility for, ensuring the enforcement of its Sexual Violence Policy.\(^2\) The University will, however, comply with reasonable requests by law enforcement for cooperation, and will upon reasonable request temporarily suspend its fact-finding process in a sexual assault investigation so as not to impede the law enforcement process.

C. Support, Counseling and Advice

In making a decision about how to proceed with a complaint, complainants may seek support, counseling, and advice from other offices on campus, including the Special Services Unit in the Division of Public Safety, the Sexual Violence Educator, the Office of the Chaplain, the Penn Women’s Center, Counseling and Psychological Services, Student Intervention Services, and the Lesbian Gay Bisexual and Transgender Center. A list of these offices is provided in Section III below. Should the complainant determine to proceed with an on campus disciplinary process against an enrolled University student, the Office of the Sexual Violence Investigative Officer will be the single place to initiate the process.\(^3\)

D. Timeframe for Submitting a Complaint

The University does not limit the timeframe for filing a report of a violation of the Sexual Violence Policy. Reports may be filed at any time, although the University’s ability to investigate or take any action may be limited by the passage of time or the matriculation status of the alleged respondent.

E. Complainant Request for Confidentiality

The University is required by Title IX to weigh the complainant’s request for confidentiality/privacy with the University’s commitment to provide a reasonably safe and nondiscriminatory environment. In situations where a complainant requests privacy, the University’s ability to investigate and respond to the allegations may be limited.

The IO will notify the complainant if the University cannot, in unusual cases, maintain the complainant’s confidentiality/privacy. The complainant’s and respondent’s identities will only be revealed to those individuals who need to know their names in order to investigate or adjudicate the complaint or provide interim measures.

In situations where the University becomes aware of a pattern of behavior by one or more respondents, the University will take appropriate action in an attempt to protect the University community.

II. Investigation and Resolution of Complaints

A. Timely Resolution

The process of resolving complaints, exclusive of any appeal, should be completed, unless there are special circumstances, within 60 business days of the filing of the written complaint. The appeal should be completed, absent special circumstances, within 30 business days of the filing of the appeal.

In the event that a Hearing Panel is convened, the complainant and the respondent will both be provided with a copy of the decision of the Panel and given 10 business days to file an appeal.

B. Rights and Protections for Complainant and Respondent

1. The complainant and respondent have the right to a process that is fundamentally fair, and free of bias or prejudice.
2. The complainant and respondent have the right to be treated with respect, dignity, sensitivity, and fairness throughout the entire process. They are both entitled to seek support from the University and to be informed about the process both before the process is initiated and throughout the process as it unfolds.
3. Both parties have the right to participate in the process, or to refrain from participation. The failure to participate will not be used as evidence against either party, but also will not prevent the process from proceeding unless the complainant determines to withdraw the complaint and the University determines to abide by that request.
4. Both parties may have a lawyer or other advisor present when being interviewed by the Investigative Team and the Hearing Panel, but the lawyer or other advisor will not be permitted to present statements, seek the production of evidence, or question any witnesses.
5. Evidence of prior sexual conduct by the complainant or respondent with other partners will not be considered in the process, and any evidence of a prior sexual relationship between the parties will not be determinative of the issue of consent. If there is credible evidence of a pattern of violations of the Sexual Violence Policy, that evidence may be considered by the Hearing Panel.
6. While the process is underway, the Vice Provost for University Life (VPUL) will work with the complainant and respondent, ensuring support is provided to both parties. VPUL will also be
E. Investigative Report

At the conclusion of the investigation, the Investigative Team will prepare a draft factual investigative report, including assessments of credibility, a recommended finding as to responsibility, and recommended sanctions, if appropriate. In making the responsibility determination, the Investigative team will use a “preponderance of the evidence” standard. In other words, to find a student responsible for violating the Sexual Violence Policy, the Investigative Team must be convinced that it is more likely than not that a violation of the Sexual Violence Policy has occurred.

D. Investigation

If the IO makes the determination that there is a sufficient basis to proceed, the Officer will issue a Statement of Charge Letter, based on the complaint and any preliminary investigation conducted. The Charge Letter will be provided to the complainant and the respondent. The respondent will be provided the opportunity to respond in writing to the Charge, and any response will be shared with the complainant.

The IO will lead a thorough and fair investigation, assisted by one or more co-investigators who may come from the school of the complainant or respondent or from elsewhere in the University (the “Investigative Team”). The co-investigator(s) will be University administrators or faculty members appropriately trained as investigators in handling sexual violence cases, and will be selected for individual cases by the IO. The investigation will include interviews of the complainant and respondent, interviews of witnesses, and review of documentation, physical evidence, and any other relevant evidence.

Prior to interviews, the complainant, the respondent, and any relevant witnesses will be informed by the IO that statements they make during the process may be admissible in concurrent or subsequent civil or criminal court proceedings, and will accordingly also be informed of their rights as outlined in Section B above. They will also be reminded of the consequences of making false statements to the IO under the Code of Student Conduct and the Charter of the University of Pennsylvania Student Disciplinary System. The complainant and respondent may have their advisors and/or outside counsel present for their interviews, but the advisors or outside counsel will not be permitted to participate in the interview other than to provide advice to the student, and they may be excluded from the interview for disruptive behavior.

In conducting the investigation, the Investigative Team may, as appropriate, also consult with other campus officials including but not limited to administrators in the relevant School, Public Safety, the Title IX Officer, or the Vice Provost for University Life. The Investigative Team may also consult with the Office of General Counsel, who may determine in particular cases to engage outside counsel to assist the University throughout this process. The Investigative Team may engage forensic and other experts, as needed.

C. Preliminary Determination

Upon receiving a complaint, the IO will make a preliminary determination as to whether the complaint falls within the purview of the Sexual Violence Policy and whether, on its face, there appears to be a sufficient basis to conduct a full investigation. In making this determination, the IO may interview the complainant and the respondent and conduct whatever preliminary investigation the Officer deems necessary to determine if the actions alleged in the complaint would, if true, constitute a violation of the University’s Sexual Violence Policy and there is a reasonable basis for investigating the charges. If the IO concludes there is insufficient basis to proceed, the matter will be concluded and the parties so advised.

1. Opportunity for Review and Comment

The draft investigative report will be provided to both the complainant and respondent for review and comment, under strict instructions that the draft report is confidential, and not to be shared with anyone other than their families and advisors, who must be members of the University community and/or outside counsel, as described above. Sharing of the report by either party, their families, advisors or outside counsel with any addition persons will be strictly prohibited. The complainant and respondent will also be provided the opportunity to review the underlying evidence and witness statements with their advisors, but they will not be provided copies.

2. Final Report

As a result of the response and comments received, the Investigative Team may conduct a further investigation and/or amend the draft report, if the Team determines either action to be warranted. A final investigative report will be prepared, incorporating any changes, and shared with the complainant and the respondent. The complainant and respondent may submit formal objections or comments to the final report, which will become part of the final report of the matter.

G. Hearing Panel

If the matter is not resolved at this stage in a mutually acceptable manner, the IO will present the final report, together with any comments provided by the complainant and/or respondent, to a Hearing Panel (“Panel”).

1. Panel Membership

The Panel will be comprised of three (3) faculty members and the Disciplinary Hearing Officer (DHO), who will be a non-voting member. The DHO will make all decisions about the organization of the Panel, including decisions regarding the admissibility of evidence, witnesses to appear before the panel, or any additional decisions regarding the administration of the hearing process. Membership of the Panel, including the DHO, will observe the following guidelines:

i. Members will be selected from a pool of faculty who have agreed to serve for a term of one or more years.

ii. Only mixed-gender panels that have training and experience in handling complaints involving sexual misconduct will hear sexual misconduct cases.

iii. Faculty comprising the Panel should be from academic departments in which neither of the parties is enrolled in a course of study, and no faculty member should serve on the Panel who has a mentoring relationship or other personal relationship with either of the parties.

iv. Faculty asked to serve should recuse themselves or be dismissed if they have any personal ties to either of the parties or to individuals responsible for implementing interim measures to protect the parties, or any of the witnesses, consistent with principles of fairness, including implementing measures regarding housing, academic accommodations and scheduling changes, no contact orders, and any other appropriate actions to protect the parties or any of the witnesses.

1. Opportunity for Review and Comment

A draft factual investigative report, including assessments of credibility, a
with whom the parties are closely associated. Nor may they have prior personal knowledge of the alleged incident of sexual misconduct.

v The University will train members of the pool to fulfill their responsibilities as adjudicators according to the procedures and policies outlined here and to ensure compliance with Title IX and other applicable state and federal guidelines. In addition, the Panel will be provided with "just in time" training on adjudicating sexual violence cases.

vi The IO may not serve on the Panel, however the IO may testify before the Panel regarding his or her investigation and may assist the DHO as needed in organizational and administrative matters related to the Panel.

vii The complainant and respondent will be notified of the membership of the Panel in advance of the Hearing. Any challenges for cause against individual Panel members must be made promptly so as not to delay the conduct of the Hearing, and will be given serious consideration by the DHO to ensure impartiality of the proceedings.

viii All proceedings must be kept strictly confidential among the parties, witnesses and members of the panel. All individuals involved in such hearings must agree to such conditions of confidentiality.

2. Hearing Procedures

Hearings must be prompt, fair, and impartial, affording the complainant’s allegations and the respondent’s defenses all due consideration and protecting the rights of both parties. The Panel will review the Investigative Team’s final report, including any response, objections, or comments provided by the complainant or respondent. The Panel will also carefully review the evidentiary record, including witness statements, documents, and physical evidence.

i. Hearing Panel Interviews

The Panel will interview separately the IO (and co-investigator(s) if the Panel so chooses), the complainant, and the respondent. The Panel will, whenever possible, provide the complainant and respondent with at least five days advance notice of the Hearing. If reasonably possible, interviews will be conducted on one day, but if such scheduling would require an unreasonably long day, or if such scheduling would unreasonably delay the proceeding, the hearing may be scheduled over multiple days.

The Panel may seek additional evidence from the IO and interview key witnesses on whom the IO relied in drawing his or her conclusions, as well as request additional evidence from the IO to clarify the evidentiary record, provided that it can do so without unreasonably delaying the process. In the event that a new witness comes forward during the Hearing who was not originally interviewed by the IO, or new evidence discovered after the IO has issued his or her report, the DHO may allow that witness to testify or admit the evidence to the hearing, but only if the DHO judges the new witness or evidence to be highly relevant to an accurate and fair determination of the outcome.

a. The Hearing will be held in private, and only the Panel may conduct interviews. Only the person interviewed (and that person's advisor or outside counsel, as applicable) will be present at the Hearing during interviews. The complainant or respondent (and their advisor or outside counsel, as applicable) will be able to view testimony from separate rooms, upon request, via closed-circuit television or similar video transmission.

b. Subject to the Protections set forth in Section B above, the Panel has wide latitude when questioning the complainant, the respondent and any witnesses in order to determine the accuracy of the report.

c. The complainant and respondent may propose witnesses and provide specific questions in advance that they believe important to ask of other parties or witnesses. The DHO, in consultation with the Panel, will determine the relevance as well as the appropriateness of witnesses and questions, and may accordingly place restrictions on, include, or exclude witnesses or other information.

d. When the panel is conducting the interview of the complainant and respondent, each student may bring an advisor or outside counsel with them to provide advice and support, but the advisor or outside counsel will not be permitted to participate in the interview other than to provide advice to the student and may be excluded from the interview by the DHO for disruptive behavior.

e. The interviews by the Panel will be recorded (audio only). No observers will be permitted to make any audio or video recordings.

3. Hearing Panel Decision

After the Hearing concludes, the Panel will immediately deliberate in private to decide whether a preponderance of the evidence shows that the respondent is responsible for a violation of the University’s Sexual Violence Policy. Preponderance of the evidence means that the Panel must be convinced based on the evidence that it is more likely than not that a violation has occurred in order to find a student is responsible for violation the policy. A finding of responsibility requires a majority vote of the members of the Panel.

i. If the respondent is found responsible, the Panel will also determine the appropriate sanction, by majority vote, based upon the facts of the case and University precedent, with a presumption in favor of the sanction recommended by the IO.

ii. The Panel will arrive at its conclusion as expeditiously as possible, and will promptly advise both the complainant and the respondent in writing of its decision with respect to responsibility and, if applicable, sanctions. In keeping with guidelines for timely resolution as provided in Section A above, the written decision will be provided as soon after the conclusion of the proceeding as is possible.

iii. Decisions made by the Panel are considered final, subject only to appeal as outlined below.

H. Appeal of Hearing Panel Decision

The Panel decision is subject to appeal by either party in writing to a Disciplinary Appellate Officer (DAO), a faculty member with exclusive jurisdiction to decide appeals. In keeping with guidelines for timely resolution as provided in Section A above, appeals should be submitted within 10 business days after the decision of the Panel. Letters of appeal should specifically state whether the objection is to the judgment of responsibility, the sanction, or both, and explain in detail the grounds for appeal.

1. The DAO will review the report of the Investigative Team and supporting evidence, the audio record from the Panel Hearing in the discretion of the Appellate Officer, and any other material the DAO deems relevant, in addition to the decision of the Panel in order to ensure that the process was consistent with University policy and that the result was not arbitrary or capricious.

2. After considering the appeal, the DAO will promptly issue his or her decision in writing and will provide copies to the DHO, the Provost, the Vice President for Institutional Affairs, the respondent(s) and other appropriate parties.
III. Resource Offices

A. Confidential Resources

The following can be contacted for support, counseling, and advice:

**Special Services Unit, Division of Public Safety**
24-hour Helpline: 215.898.6600
4040 Chestnut Street

**Counseling & Psychological Services (CAPS)**
Main Number: 215.898.7021
After hours emergency number: 215.349.5490
133 South 36th Street, 2nd Floor

**Penn Women's Center (PWC)**
Main Numbers: 215.898.8611 and 215.898.6500
3643 Locust Walk

**Student Health Service (SHS)**
Main Number: 215.746.3535
3535 Market Street, Suite 100

**Lesbian Gay Bisexual Transgender Center**
Main number: 215.898.5044
3901 Spruce Street

**Office of the Chaplain**
Main Number: 215.898.8456
240 Houston Hall, 3412 Spruce Street

**Director, Sexual Violence Prevention & Educator**
VPUL, 3611 Locust Walk
215.898.6081
215.768.6527 Nights/Weekends

B. Official Reporting Offices

The following are official reporting offices for violations of the Sexual Violence Policy:

**Office of the Sexual Violence Investigator**
227 Sansom Place East
3600 Chestnut St.
Philadelphia, PA 19104-6106
215.898.2887

**Title IX Officer and Office of Affirmative Action and Equal Opportunity Programs (OAA/EOP)**
3600 Chestnut Street, Sansom Place East, Suite 228
215.898.6993

**Student Intervention Services, VPUL**
3611 Locust Walk
215.898.6081
215.768.6527 Nights/Weekends

**Office of Student Conduct**
207 Duhring Wing
215.898.5651

**Division of Human Resources**
3401 Walnut Suite 527A
215.898.7281

1 This procedure amends and supersedes the Charter of the University of Pennsylvania Student Disciplinary System with respect to violations of the University policy on Sexual Violence, Relationship Violence, and Stalking as those terms are defined in that policy ("Sexual Violence Policy"). It applies to each of the 12 schools, notwithstanding the existence of separate procedures that individual schools may have adopted for violations of laws or policies other than the University Sexual Violence Policy. If a complaint involves allegations of violations of the Sexual Violence Policy as well as other University policies, the matter can either be fully resolved using this process, or divided into two separate proceedings, as appropriate in any particular case.

2 The University recognizes that should it be proceeding in cases where criminal charges are pending, the respondents may choose not to participate in the disciplinary process in order to protect their Fifth Amendment rights. Such decision will not be used as evidence against any respondent and the Hearing Panel will be instructed not to draw any adverse inference from the failure to participate.

3 While the Investigative Officer will be responsible for managing the complaint investigation and resolution process, as described below, the IO will work with other appropriate University offices, including the Vice Provost for University Life, to determine if interim measures are appropriate before a final resolution is reached.

4 The University will provide a list of advisors from the Penn community to complainants and respondents. Advisors will be trained by the University to support both complainants and respondents in this process. The parties need not select an advisor from this list, but may select any faculty or administrative member of the community to advise them. The parties may also retain outside counsel in addition to, or instead of, using an advisor. The role of the outside counsel, however, will be limited to an advisory role and will not be permitted to have an active role in the proceedings.

5 In carrying out these responsibilities, the DHO may consult with the IO, the Office of General Counsel and other appropriate offices such as the Office of Student Conduct and the Vice President for Institutional Affairs. University officers thus consulted will respect the confidentiality conditions of the proceedings.

Student Grievance Procedures

Federal law requires the University to designate an employee to coordinate its compliance, including the investigation of complaints with Title VI of the Civil Rights Act of 1964, Title IX of the Education amendments of 1972, and the Rehabilitation Act of 1973. In addition, the University is required to have procedures for the resolution of student and employee grievances alleging violations of these laws.

Any student in the University who feels that he or she has been discriminated against by an individual or office acting for the University or that the University is not complying with the requirements of Title VI, Title IX, or the Rehabilitation Act, has a right to register a complaint and seek redress of his or her grievance. The student may take his/her complaint to the following University offices:
Office of Affirmative Action & Equal Opportunity Programs

The Office of Affirmative Action & Equal Opportunity Programs monitors the University’s equal opportunity/affirmative action policies and programs. The Office also is responsible for coordinating complaints with non-discrimination laws (including investigating complaints and coordinating programs for the disabled). The OAA staff is available to consult with faculty, staff, students, and members of the community who have questions or concerns regarding the application or possible violation of these policies, Title VI or Title IX. The Office is located at

3600 Chestnut Street
Sansom Place East
Suite 228
Philadelphia, PA 19104
215-898-6993

In addition to the description of duties given earlier, the Office of Affirmative Action is also responsible for coordinating complaints with non-discrimination laws, including investigating complaints and coordinating programs for the disabled. The OAA staff is available to consult with faculty, staff, students, and members of the community who have questions or concerns regarding the application or possible violation of these policies, Title VI or Title IX.

Other Grievance Procedures

Academic Grievances

Schools and academic departments within the University have established procedures for the resolution of student grievances concerning academic matters. Students should contact the Dean’s Office of the particular school for a copy of the appropriate procedures and for guidance regarding the grievance process. A student who wishes to register a grievance regarding the evaluation of his/her academic work should follow the academic grievance procedure applicable in the school or department in which the academic work was performed.

- School of Social Policy and Practice (http://www.sp2.upenn.edu/resources/masters-student-handbook/student-rights-and-responsibilities)

Administrative and Employment Grievances

Students with administrative grievances should contact the Office of the Vice Provost for University Life, 3611 Locust Walk, 215-898-6081. Students with grievances related to their appointment as a teaching assistant, research assistant, or graduate assistant should contact their Dean’s Office or the Vice Provost for Education, 215-898-7225.

University of Pennsylvania Nondiscrimination Statement

The University of Pennsylvania values diversity and seeks talented students, faculty and staff from diverse backgrounds. The University of Pennsylvania does not discriminate on the basis of race, color, sex, sexual orientation, gender identity, religion, creed, national or ethnic origin, citizenship status, age, disability, veteran status or any other legally protected class status in the administration of its admissions, financial aid, educational or athletic programs, or other University-administered programs or in its employment practices. Questions or complaints regarding this policy should be directed to:

Executive Director of the Office of Affirmative Action and Equal Opportunity Programs
Sansom Place East
3600 Chestnut Street, Suite 228
Philadelphia, PA 19104-6106
(215) 898-6993 (Voice) or (215) 898-7803 (TDD)

Accounting (ACCT)

ACCT 101 Principles of Accounting I
This course is an introduction to the basic concepts and standards underlying financial accounting systems. Several important concepts will be studied in detail, including: revenue recognition, inventory, long-lived assets, present value, and long term liabilities. The course emphasizes the construction of the basic financial accounting statements - the income statement, balance sheet, and cash flow statement - as well as their interpretation.
One-term course offered either term
Activity: Lecture
1 Course Unit

ACCT 102 Managerial Accounting
The first part of the course presents alternative methods of preparing managerial accounting information, and the remainder of the course examines how these methods are used by companies. Managerial accounting is a company's internal language, and is used for decision-making, production management, product design and pricing and for motivating and evaluating employees. Unless you understand managerial accounting, you cannot have a thorough understanding of a company's internal operations. What you learn in this course will help you understand the operations of your future employer (and enable you to be more successful at your job), and help you understand other companies you encounter in your role as competitor, consultant, or investor.
One-term course offered either term
Activity: Lecture
1 Course Unit

ACCT 201 Financial Accounting I
This course revisits topics covered in Introductory Financial Accounting (Accounting 101), with a focus on the asset side of the balance sheet: Cash, accounts and notes receivable, inventory, marketable securities, equity investments, PPE, and intangibles. The course also covers revenue and expense recognition issues, and generally accepted accounting principles that affect the format and presentation of the financial statements.
Course usually offered in fall term
Prerequisites: ACCT 101,102
Activity: Lecture
1 Course Unit

ACCT 202 Financial Accounting II
Covers liabilities and equities, especially long-term debt, convertible securities, equity issuance, dividends, share repurchases, employee stock options, pensions, leases, deferred tax, and derivative securities. Related topics covered include computation of diluted earnings per share, disclosure issues, earnings management, and basic financial statement analysis of cash flows.
Course usually offered in spring term
Prerequisites: ACCT 101,102
Activity: Lecture
1 Course Unit

ACCT 208 Auditing
This course includes a consideration of the historical role of the auditor and the changing role in today's environment, the organization of the accounting profession, and the new influences of the Public Company Accounting Oversight Board. It introduces the students to generally accepted auditing standards, professional ethics, and legal liability. A conceptual theory of auditing is discussed and practical examples of auditing techniques and work programs are used to illustrate the application of the theory. The course also covers the auditor's reporting standards and uses case studies and professional journal articles as bases for discussion and analysis.
One-term course offered either term
Also Offered As: ACCT 718
Prerequisites: ACCT 201, 202 or equivalent
Activity: Lecture
1 Course Unit

ACCT 242 Financial Statements: Analysis & Reporting Incentives
In the course, students learn how to analyze firms' financial statements and disclosures to determine how a firm's particular accounting choices reflect the underlying economics of the firm. As a result, the course strengthens students' ability to use financial statements as part of an overall assessment of the firm's strategy and valuation. The course is especially useful for anyone interested in working on the buy or sell side. The course provides both a framework for and the tools necessary to analyze financial statements. At the conceptual level, it emphasizes that preparers and users of financial statements have different objectives and incentives. At the same time, the course is applied and stresses the use of actual financial statements. For example, students learn how to detect when firms are managing earnings and/or balance sheets. It draws heavily on real business problems and uses cases to illustrate the application of the techniques and tools.
One-term course offered either term
Also Offered As: ACCT 742
Prerequisite: ACCT 101
Activity: Lecture
1 Course Unit

ACCT 243 Accounting for Mergers, Acquisitions, and Complex Financial Structures
The objective of this course is to discuss and understand the accounting that underlies merger, acquisition, and investment activities among firms that result in complex financial structures. Key topics include the purchase accounting method for acquisitions, the equity method for investments, the preparation and interpretation of consolidated financial statements, tax implications of mergers and acquisitions, earnings-per-share considerations, the accounting implications of intercompany transactions and non-domestic investments, etc.
Course usually offered in fall term
Also Offered As: ACCT 743
Prerequisites: Prerequisites: ACCT 101, 102, 201, 202
Activity: Lecture
1 Course Unit
ACCT 297 Taxes and Business Strategy
The objective of this course is to develop a framework for understanding how taxes affect business decisions. The key themes of the framework - all parties, all taxes and all costs - are applied to decision contexts such as investments, compensation, organizational form, and mergers and acquisitions. The ultimate goal is to provide a new approach to thinking about taxes that will be valuable even as laws and governments change.
One-term course offered either term
Also Offered As: ACCT 897
Prerequisites: ACCT 101 and FNCE 101
Activity: Lecture
1 Course Unit

ACCT 399 Supervised Study
Intensive reading and study with some research under the direction of a faculty member. Approval from one of the departmental advisers must be obtained before registration.
One-term course offered either term
Prerequisites: Senior standing and 3.4 average in major related subjects
Activity: Independent Study
1 Course Unit

ACCT 611 Fundamentals of Financial Accounting
The objective of this course is to provide an understanding of financial accounting fundamentals for prospective consumers of corporate financial information, such as managers, stockholders, financial analysts, and creditors. The course focuses on understanding how economic events like corporate investments, financing transactions and operating activities are recorded in the three main financial statements (i.e., the income statement, balance sheet, and statement of cash flows). Along the way, students will develop the technical skills needed to analyze corporate financial statements and disclosures for use in financial analysis, and to interpret how accounting standards and managerial incentives affect the financial reporting process. This course is recommended for students who want a more in-depth overview of the financial accounting required for understanding firm performance and potential future risks through analysis of reported financial information, such as students intending to go into security analysis and investment banking.
One-term course offered either term
Activity: Lecture
1 Course Unit

ACCT 612 Accelerated Financial Accounting
The intended audience for this course is students with prior knowledge of financial accounting who understand: (1) the recording of economic transactions in the accounting records; (2) the basic financial statements that summarize a firm’s economic transactions (the balance sheet, the income statement and the statement of cash flows) and (3) the fundamental concepts needed to prepare or understand published financial statements (e.g. use of accrual accounting). Exploiting prior knowledge, the course aims in six weeks to help students become effective users of financial statements.
Course usually offered in fall term
Activity: Lecture
0.5 Course Units

ACCT 613 Fundamentals of Financial and Managerial Accounting
This course provides an introduction to both financial and managerial accounting, and emphasizes the analysis and evaluation of accounting information as part of the managerial processes of planning, decision-making, and control. A large aspect of the course covers the fundamentals of financial accounting. The objective is to provide a basic overview of financial accounting, including basic accounting concepts and principles, as well as the structure of the income statement, balance sheet, and statement of cash flows. The course also introduces elements of managerial accounting and emphasizes the development and use of accounting information for internal decisions. Topics include cost behavior and analysis, product and service costing, and relevant costs for internal decision-making. This course is recommended for students who will be using accounting information for managing manufacturing and service operations, controlling costs, and making strategic decisions, as well as those going into general consulting or thinking of starting their own businesses.
One-term course offered either term
Activity: Lecture
1 Course Unit

ACCT 706 Cost Management
This course covers managerial accounting and cost management practices that can be strategically applied across the various functions of a business organization to improve organizational performance. The course emphasizes the methods available to measure and evaluate costs for decision-making and performance evaluation purposes. It reviews a number of cost management issues relating to the design and implementation of strategic, marketing, value analysis, and other management models in modern firms; and identifies major contemporary issues in managerial accounting and financial decision-making. A variety of case studies in different industries and decision contexts are used to examine the application of these concepts.
One-term course offered either term
Prerequisites: ACCT 611,612,613 or waiver.
Activity: Lecture
0.5 Course Units
Notes: Lecture, case studies, class participation, written group cases, and exams.

ACCT 718 Auditing
This course includes a consideration of the role of the auditor, the organization of the accounting profession, and the current audit environment. It introduces the student to generally accepted auditing standards, professional ethics, and legal liability. A conceptual theory of auditing is discussed and practical examples of auditing techniques and work programs are used to illustrate the application of the theory. The course also covers the auditor's reporting standards and uses case studies and professional journal articles as bases for discussion and analysis.
One-term course offered either term
Also Offered As: ACCT 208
Prerequisites: ACCT 611,612,613 or waiver.
Activity: Lecture
1 Course Unit
ACCT 742 Problems in Financial Reporting
This intensive one-semester course focuses on how to extract and interpret information in financial statements. The course adopts a user perspective of accounting by illustrating several specific accounting issues in a decision context.
One-term course offered either term
Also Offered As: ACCT 242
Prerequisites: ACCT 611, 612, 613 completed or waiver. ACCT 742 cannot be taken concurrently with ACCT 611, 612, 613.
Activity: Lecture
1 Course Unit
Notes: Format: Discussions, lectures on advanced topics, problems and cases. Daily preparation of cases and reading assignments. Comprehensive final exam. Some instructors may choose to grade homework, class participation, and case write-ups.

ACCT 743 Accounting for Mergers, Acquisitions and Complex Financial Structures
This class studies how complex financial structures account for their activities. Primary emphasis is on the application of purchase accounting for mergers and acquisitions, the equity method for investments, and preparing and interpreting consolidated financial statements. Other topics covered include translations and remeasurements for nondomestic investments, and earnings per share calculations for complex financial structures. Tax considerations and acquisition strategies are of only peripheral interest in this class, and students who are concerned primarily with those topics are advised to seek a different elective.
Course usually offered in fall term
Also Offered As: ACCT 243
Prerequisites: ACCT 611, 612, 613 or waiver.
Activity: Lecture
1 Course Unit
Notes: Lectures and quizzes, class participation, and satisfactory performance on quizzes.

ACCT 747 Financial Statement and Disclosure Analysis
This course focuses on the analysis of financial communications between corporate managers and outsiders, including the required financial statements, voluntary disclosures, and interactions with investors, analysts, and the media. The course draws on the findings of recent academic research to discuss a number of techniques that outsiders can use to detect potential bias or aggressiveness in financial reporting. FORMAT: Case discussions and lectures. Comprehensive final exam, group project, case write-ups, and class participation.
One-term course offered either term
Prerequisites: ACCT 611, 612, 613 completed or waiver.
Activity: Lecture
1 Course Unit

ACCT 897 Taxes and Business Strategy
The objective of this course is to develop a framework for understanding how taxes affect business decisions. Traditional finance and strategy courses do not consider the role of taxes. Similarly, traditional tax courses often ignore the richness of the decision context in which tax factors operate. The key themes of the framework - all parties, all taxes and all costs - are applied to decision contexts such as investments, compensation, organizational form, regulated industries, financial instruments, tax-sheltered investments, mergers and acquisitions, multinational, and multistate. The ultimate goal is to provide a new approach to thinking about taxes (and all forms of government intervention) that will be valuable even as laws and governments change.
One-term course offered either term
Also Offered As: ACCT 297
Prerequisites: ACCT 611, 612, 613 or waiver and FNCE 611, 612.
Activity: Lecture
1 Course Unit
Notes: Lecture and case discussions.

ACCT 910 Accounting Theory Research
The course includes an introduction to various analytical models and modeling/mathematical techniques that are commonly used in accounting research as well as related empirical applications.
Course usually offered in fall term
Activity: Seminar
1 Course Unit
Notes: Lecture and case discussions.

ACCT 921 Empirical Research in Accounting I
The course covers empirical research design and provides students with a perspective on historically important accounting research. Topics covered such as research on the time-series and cross-sectional properties of financial accounting measures, capital markets behavior, financial intermediaries, and international accounting research.
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ACCT 922 Empirical Research in Accounting II
The course covers empirical research design and provides students perspective on historically important accounting research. Topics covered such as research on the time-series and cross-sectional properties of financial accounting measures, capital markets behavior, financial intermediaries, and international accounting research. Topics covered may include corporate governance, executive compensation, debt contracting, accounting regulation, tax, and management accounting.
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ACCT 930 Empirical Design in Accounting Research
Course on empirical methods and their application to accounting research topics.
Prerequisites: At least one graduate level course in econometrics.
Activity: Seminar
1 Course Unit
African Studies (AFST)

AFST 050 World Musics and Cultures
Draws on repertories of various societies from Asia, Africa, Europe,
and the Americas to examine relations between aesthetic productions
and social processes. We investigate musical sounds, cultural logics
informing those sounds, and social strategies of performance. Topics
may include indigenous music theories, music and social organization,
symbolic expressions and musical meaning, gender, religion, and social
change.
For BA Students: Arts and Letters Sector
Taught by: Muller
One-term course offered either term
Also Offered As: AFRC 050, ANTH 022, FOLK 022, MUSC 050
Activity: Lecture
1 Course Unit

AFST 062 Land of the Pharaohs
This course provides an introduction to the society, culture and history of
ancient Egypt. The objective of the course is to provide an understanding
of how ancient Egypt emerged as one of the most successful and long-
lived civilizations in world history.
For BA Students: History and Tradition Sector
Taught by: Silverman, Wegner
Course not offered every year
Also Offered As: NELC 062
Activity: Lecture
1 Course Unit

AFST 071 Literatures of Africa and the African Diaspora
This course will serve as an introduction to a particularly rich arena of
literature in English. It will also help students to begin to understand
many of the racial subtexts underlying the culture wars in America, where
too often in the full glare of cameras, an anguish voice informs the
audience that "as an African, I cannot expect justice in this America."
One of the things at work here is the assumption of a common Africa
diasporic identity -- understood as an excluded, marginalized subtext
of identity in the new world. But why is Africa being involed here? What
does "Africa" mean in this new world context? What is the larger global
context of these assumptions about "Africa" and what is its history? Does
the term "Africa" itself have a history? What is "African literature?" This
course, therefore, will also help students not only to ask fundamental
questions about identity but also to understand identity as a moving
and dynamic construct. How, for example, does "Africa" travel to South
America, to the Caribbean Archipelago, and to Europe? See the English
Department's website at www.english.upenn.edu for a description of the
current offerings.
Course not offered every year
Also Offered As: AFRC 071, ENGL 071
Activity: Lecture
1 Course Unit

AFST 075 Africa Before 1800
Survey of major themes and issues in African history before 1800. Topics
include: early civilizations, African kingdoms and empires, population
movements, the spread of Islam, the slave trade era. Also, emphasis
on how historians use archaeology, linguistics, and oral traditions to
reconstruct Africa's early history.
For BA Students: History and Tradition Sector
Taught by: Babou, Cassanelli
Course usually offered in spring term
Also Offered As: AFRC 075, HIST 075
Activity: Recitation
1 Course Unit

AFST 076 Africa Since 1800
Survey of major themes, events, and personalities in African history from
the early nineteenth century through the 1960s. Topics include abolition
of the slave trade, European imperialism, impact of colonial rule, African
resistance, religious and cultural movements, rise of naturalism and pan-
Africanism, issues of ethnicity and "tribalism" in modern Africa.
For BA Students: History and Tradition Sector
Taught by: Cassanelli
Course usually offered in fall term
Also Offered As: AFRC 076, HIST 076
Activity: Recitation
1 Course Unit

AFST 102 Study of a Theme
This is an introduction to literary study through the works of a compelling
literary theme. (For offerings in a given semester, please see the online
course descriptions on the English Department website). The theme's
function within specific historical contexts, within literary history
generally, and within contemporary culture, are likely to be emphasized.
Some versions of this course will also serve as an introduction to other
members of the English faculty, who will visit the class as guest lecturers.
This course is designed for the General Requirement, and is ideal for the
students wishing to take an English course but not necessarily intending
to major.
For BA Students: Arts and Letters Sector
One-term course offered either term
Also Offered As: CIMS 112, COML 245, ENGL 102
Activity: Lecture
1 Course Unit
AFST 140 Elementary Zulu I in Residence
This elementary course is for beginners and it requires no prior knowledge of Zulu. The course will expose students to the Zulu language and culture and will be based in the National Standards for Foreign Language Learning. Students will be engaged in communicative language learning through interpersonal, interpretive and presentational modes of language learning techniques. They will gain knowledge and understanding of the Zulu culture. They will use their Zulu language and culture learning experience to connect with other disciplines and further their knowledge of these disciplines through perspectives acquired from their Zulu class. They will also develop insight into the nature of language and culture through comparisons of the Zulu language and culture and their own. Through movies, songs, and other cultural activities online students will acquire the natural use of the language which will enable them to acquire linguistic and cultural skill to become life-long learners who can participate in Zulu communities in the U.S. and overseas.
Taught by: Mbeje
One-term course offered either term
Also Offered As: AFRC 140
Activity: Lecture
0.5 Course Units
Notes: OBJECTIVE: Attainment of Level 1 (ceiling) in speaking, listening, reading, and writing skills on the Interagency Language Roundtable (ILR) scale.

AFST 147 Holy Wars & Jihads
One-term course offered either term
Also Offered As: HIST 147, NELC 187
Activity: Lecture
1 Course Unit

AFST 169 The Conflicts in Darfur and South Sudan
Sudan is marred by several military conflicts between the state and its citizens not only during colonial times but even after its independence in 1956. The current conflict in Darfur is only one of many wars that ravaged Sudan prior to the ending of Africa's longest civil war (1956-1971, 1983-2005) in the southern part of the country. This course will provide an in-depth analysis of the two main conflicts in the Sudan which ends up with the division of the country into two. (1) The first conflict we will study is the Darfur conflict based upon historical and cultural factors, as well as analyzing the ideology of the successive Sudanese states specifically the current government. The course will explore the role of regional and international politics with interest in the ongoing conflict, the “Genocide” and ICC controversies, as well as the local militia, the politics of aid in war-torn areas, and the role of Sudan’s neighbors in the Darfur conflict and how this could be related to other conflicts in Sudan. (2) The second conflict that we'll cover is the conflict in southern Sudan, which ends up by its secession as an independent country in 2011. This course aims towards the study of the reasons behind these military conflicts and ethnic conflicts that characterize the modern history of Sudan.
Taught by: Dinar
Activity: Lecture
1 Course Unit

AFST 170 Elementary Yoruba I
The Elementary Yoruba I course can be taken to fulfill a language requirement, or for linguistic preparation to do research on Nigeria and the diaspora/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Yoruba. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content. Students will acquire the speaking, listening, reading, and writing skills at the mid-high novice level, based on the ACTFL scale. The mid-high level proficiency skills that the students will acquire constitute threshold capabilities of the second semester range of proficiency to prepare students for Elementary Yoruba II course materials.
For BA Students: Language Course
Taught by: Awoyale
Course usually offered in fall term
Also Offered As: AFRC 170, AFST 517
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 171 Elementary Yoruba II
The main objective of this course is to further sharpen the Yoruba linguistic knowledge that the student acquired in level I. By the end of the course, the student should be able to (1) read, write, and understand simple to moderately complex sentences in Yoruba; and, (2) advance in the knowledge of the Yoruba culture.
For BA Students: Language Course
Taught by: Awoyale
Course usually offered in spring term
Also Offered As: AFRC 171, AFRC 517, AFST 518
Prerequisites: Completion of Elementary Yoruba I, or permission of instructor
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 180 Elementary Swahili I
The Elementary Swahili I course can be taken to fulfill a language requirement, or for linguistic preparation to do research on East Africa/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Swahili. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content. Students will acquire the speaking, listening, reading, and writing skills at the mid-high novice level, based on the ACTFL scale. The mid-high level proficiency skills that the students will acquire constitute threshold capabilities of the second semester range of proficiency to prepare students for Elementary Swahili II course materials.
For BA Students: Language Course
Taught by: Mshomba
Course usually offered in fall term
Also Offered As: AFRC 180, AFST 580
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center
AFST 181 Elementary Swahili II
This course continues to introduce basic grammar, vocabulary, and the reading and writing of Swahili to new speakers. During this term, folktales, other texts, and film selections are used to help introduce important aspects of Swahili culture and the use of the language in wide areas of Africa.
For BA Students: Language Course
Taught by: Mshomba
Course usually offered in spring term
Also Offered As: AFRC 181, AFST 581
Prerequisites: Completion of Elementary Swahili I, or permission of instructor
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 190 Introduction to Africa
This course provides an introduction to the study of Africa in all its diversity and complexity. Our focus is cultural, geographical, and historical: we will seek to understand Africa's current place in the world political and economic order and learn about the various social and physical factors that have influenced the historical trajectory of the continent. We study the cultural formations and empires that emerged in Africa before European colonial invasion and then how colonialism reshaped those sociocultural forms. We'll learn about the unique kinds of kinship and religion in precolonial Africa and the changes brought about by the spread of Islam and Christianity. Finally, we'll take a close look at contemporary issues such as ethnic violence, migration, popular culture and poverty, and we'll debate the various approaches to understanding those issues.
For BA Students: Society Sector
Taught by: Hasty
Course usually offered in fall term
Also Offered As: AFRC 190, ANTH 190
Activity: Lecture
1 Course Unit

AFST 210 African Religions
Religion permeates all aspects of African life and thought. There is no dichotomy between religion and society in Africa. In this course, we will survey some of the indigenous religions of Africa and examine their nature and their philosophical foundations. We will examine African systems of beliefs, myths, symbols, and rituals, as developed by African societies to express their distinctive worldviews. We will also raise some questions about the interrelationship of religion and culture as well as religion and social change in Africa, and the challenges of modern technologies to African beliefs. We will examine the future of African religions and analyze the extent to which African peoples can hold on to their beliefs in this age of rapid technological and scientific development. Emphasis will be on themes rather than on individual national or tribal religions. Case studies, however, will be limited to West Africa among the Akan of Ghana, the Yoruba of Nigeria, and the Mende of Sierra Leone. Questions are provided (a) to guide and direct reading (b) to form the basis for discussions (c) as exercises and (d) for examinations.
Taught by: Ofosu-Donkoh
Course not offered every year
Also Offered As: AFRC 210, RELS 210
Activity: Lecture
1 Course Unit

AFST 221 African Women's Lives: Past and Present
Restoring women to African history is a worthy goal, but easier said than done. The course examines scholarship over the past forty years that brings to light previously overlooked contributions African women have made to political struggle, religious change, culture preservation, and economic development from pre-colonial times to present. The course addresses basic questions about changing women's roles and human rights controversies associated with African women within the wider cultural and historical contexts in which their lives are lived. It also raises fundamental questions about sources, methodology, and representation, including the value of African women's oral and written narrative and cinema production as avenues to insider perspectives on African women's lives.
Taught by: Blakely
Course not offered every year
Also Offered As: AFRC 222, GSWS 222
Activity: Lecture
1 Course Unit

AFST 225 African Languages and Culture
The aim of the course is to provide a general perspective on African languages and African linguistics. No background in linguistics is necessary. Students will be introduced to theoretical linguistics—its concepts, theories, ways of argumentation, data collection, data analysis, and data interpretation. The focus will be on the languages and linguistics of Africa to provide you with the knowledge and skills required to handle the language and language-related issues typical of African conditions. We will cover topics related to formal linguistics (phonology/phonetics, morphology, syntax, and semantics), aspects of pragmatics as well as the general socio-linguistic character of African countries. We will also cover language in context, language and culture, borrowing, multilingualism, and cross-cultural communication in Africa.
Taught by: Mbeje
One-term course offered either term
Also Offered As: AFRC 225
Activity: Lecture
1 Course Unit

AFST 227 Media in Africa
This course examines the recent explosion of media culture in Africa, including radio, TV, film, internet, newspapers, and magazines. We look at the media forms themselves, studying the elements of African culture that shape the language, themes, and imagery of African media. We also study the producers of the media: the African journalists, film directors, disc jockeys, actors, and entertainers who construct the African public sphere through talent and ingenuity, drawing on cultural knowledge and social relationships. Finally, we'll turn to African audiences, learning how Africans actively engage with media forms, using media to participate in national conversations on such topics as gender, environmentalism, corruption, and development. Throughout the course, we study how African media give expression to ethnic, political, and religious identities, playing a crucial role in the construction and interaction of communities within the larger context of nation-states.
Course usually offered in spring term
Also Offered As: AFST 503, ANTH 227, ANTH 504
Activity: Seminar
1 Course Unit
AFST 228 African Epic: Performance & Power
Homer’s Iliad and Odyssey from ancient Greece and Song of Roland from medieval France are familiar landmarks in world literature. In contrast, Sunjata Epic of Mali, Mwindo Epic of Congo and more than twenty-five other heroic narrative poems throughout Africa are less known but equally valuable for accessing ancient wisdom, exploits of heroes and heroines, cultural values, knowledge systems, and supernatural realms. An additional benefit of studying African epic is that they are performed today or in living memory, so the cultural, performative, and social contexts are not obscured by centuries. These living traditions give us opportunities to more fully understand bards’ roles, interaction of bard and audience, transformation from oral to written representation, and the extension of epic themes into other aspects of social life.
Taught by: Blakely
Also Offered As: COML 224
Activity: Lecture
1 Course Unit

AFST 231 Francophone African Cinema
This course will introduce students to recent films by major directors from Francophone Africa. While attention will be given to aesthetic aspects and individual creativity, the viewing and discussions will be mostly organized around a variety of (overlapping) themes: History; Tradition/modernity; Urban Life; Gender and sexuality; Politics. Class conducted in French.
Taught by: Moudileno
Course not offered every year
Also Offered As: AFRC 231, CIMS 210, FREN 231
Activity: Seminar
1 Course Unit

AFST 232 Topics in World History
One-term course offered either term
Also Offered As: CIMS 233, HIST 232
Activity: Seminar
1 Course Unit

AFST 233 African Folklore, Popular Culture, and the Diaspora
This course explores African expressive culture in both West and Central Africa and the Americas, considering continuities in visual and verbal art, religion, and ritual, and material culture from Africa to the New World. The topic is interdisciplinary, drawing on research by folklorists, cultural anthropologists, archaeologists, and art historians. This study informs our understanding of both particular historical connections related to specific peoples and genres and fundamental aesthetic values that have shaped and continue to influence the entire Afro-Atlantic region.
Taught by: Blakely
Course not offered every year
Also Offered As: FOLK 233
Activity: Seminar
1 Course Unit

AFST 235 Africans Abroad: Emigrants, Refugees, and Citizens in the New African Diaspora
This seminar will examine the experiences of recent emigrants and refugees from Africa, including many now living in the city of Philadelphia and the surrounding region. In addition to reading some of the historical and comparative literature on migration, ethnic diasporas, and transnationalism, students will have the opportunity to conduct research on specific African communities in Philadelphia or elsewhere in North America, Europe, or the Middle East. African emigres’ relations with both their home and host societies will be explored and compared with the experience of other immigrant groups over the past century. Topics include reasons for leaving Africa, patterns of economic and educational adaptation abroad, changes in gender and generational roles, issues of cultural and political identity, and the impact of national immigration policies.
Taught by: Cassanelli
Course not offered every year
Activity: Lecture
1 Course Unit

AFST 240 Elementary Amharic I
The Elementary Amharic I course can be taken to fulfill a language requirement, or for linguistic preparation to do research on Ethiopia/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Amharic. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content. Students will acquire the speaking, listening, reading, and writing skills at the mid-high novice level, based on the ACTFL scale. The mid-high novice level proficiency skills that the students will acquire constitute threshold capabilities of the second semester range of proficiency to prepare students for Elementary Amharic II course materials.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: AFRC 240, AFRC 540, AFST 540, NELC 481
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 241 Elementary Amharic II
Continuation of Elementary Amharic I.
For BA Students: Language Course
Taught by: Hailu
Course usually offered in spring term
Also Offered As: AFRC 241, AFRC 541, AFST 541, NELC 482
Prerequisites: Completion of Elementary Amharic I, or permission of the instructor
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 242 Intermediate Amharic I
For BA Students: Language Course
Taught by: Hailu
Course usually offered in fall term
Also Offered As: AFRC 242, AFRC 543, AFST 543, NELC 483
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center
AFST 243 Intermediate Amharic II  
For BA Students: Last Language Course  
Taught by: Hailu  
Course usually offered in spring term  
Also Offered As: AFRC 243, AFRC 544, AFST 544, NELC 484  
Activity: Lecture  
1 Course Unit  
Notes: Offered through Penn Language Center

AFST 247 Advanced Amharic  
An advanced Amharic course that will further sharpen the students’ knowledge of the Amharic language and the culture of the Amharas. The learners communicative skills will be further developed through listening, speaking, reading and writing. There will also be discussions on cultural and political issues.  
For BA Students: Advanced Language Course  
Taught by: Zemichael  
One-term course offered either term  
Also Offered As: AFRC 247, AFRC 548, AFST 547  
Activity: Lecture  
1 Course Unit  
Notes: Offered through Penn Language Center

AFST 249 Amharic Language & Culture  
For BA Students: Advanced Language Course  
Taught by: Hailu  
One-term course offered either term  
Prerequisites: Completion of Advanced Amharic I & II.  
Activity: Lecture  
1 Course Unit

AFST 253 Music and Performance of Africa  
This course provides an overview of the most popular musical styles and discussion of the cultural and political contexts in which they emerged in contemporary Africa. Learning to perform a limited range of African music/dance will be part of this course. No prior performance experience required. (Formerly Music 253).  
Taught by: Muller  
Course not offered every year  
Also Offered As: AFRC 253, ANTH 263, FOLK 253, MUSC 256  
Prerequisites: Completion of MUSC 050 is recommended.  
Activity: Lecture  
1 Course Unit

AFST 257 Contemporary African Politics  
A survey of politics in Africa focusing on the complex relationships between state, society, the economy, and external actors. It will cover colonial rule, the independence struggle, authoritarian and democratic statecraft, international debt, economic development, military rule, ethnicity, and class.  
One-term course offered either term  
Also Offered As: AFRC 257, PSCI 210  
Activity: Lecture  
1 Course Unit

AFST 268 CONTEMPORARY ISSUES IN AFRICAN SOCIETY  
This course will deal with law and society in Africa. After surveying the various legal systems in Africa, the focus will be on how and to what extent the countries of Africa “re-Africanized” their legal systems by reconciling their indigenous law with western law and other legal traditions to create unified legal systems that are used as instruments of social change and development. Toward this end, the experiences of various African countries covering the various legal traditions will be included. Specific focus will be on laws covering both economic and social relations. This emphasis includes laws of contracts and civil wrongs, land law, law of succession, marriage and divorce and Africa’s laws of International Relations, among other laws. Throughout this course a comparative analysis with non-African countries will be stressed.  
Taught by: Imoagene  
Also Offered As: AFRC 268, SOCI 268  
Activity: Lecture  
1 Course Unit

AFST 270 Intermediate Yoruba I  
For BA Students: Language Course  
Taught by: Awoyale  
Course usually offered in fall term  
Also Offered As: AFRC 270, AFST 529  
Activity: Lecture  
1 Course Unit  
Notes: Offered through Penn Language Center

AFST 271 Intermediate Yoruba II  
For BA Students: Last Language Course  
Taught by: Awoyale  
Course usually offered in spring term  
Also Offered As: AFRC 271, AFRC 534, AFST 532  
Activity: Lecture  
1 Course Unit  
Notes: Offered through Penn Language Center

AFST 272 Topics: Africa and African Diaspora  
This course explores an aspect of the literature of Africa and the African Diaspora intensively; specific course topics will vary from year to year.  
Taught by: Jaji  
Course not offered every year  
Also Offered As: AFRC 276, COML 273, ENGL 271  
Activity: Seminar  
1 Course Unit

AFST 280 Intermediate Swahili I  
For BA Students: Language Course  
Taught by: Mshomba  
Course usually offered in fall term  
Also Offered As: AFRC 280, AFST 582  
Activity: Lecture  
1 Course Unit  
Notes: Offered through Penn Language Center

AFST 281 Intermediate Swahili II  
For BA Students: Last Language Course  
Taught by: Mshomba  
Course usually offered in spring term  
Also Offered As: AFRC 282, AFST 583  
Prerequisites: Intermediate Swahili I, or permission of instructor  
Activity: Lecture  
1 Course Unit  
Notes: Offered through the Penn Language Center
AFST 284 Advanced Swahili I
This is an advanced Kiswahili course which will engage learners in extended spoken and written discourse. Advanced learners of Kiswahili will listen to, read about, write and speak on authentic video materials, contemporary novels, and newspapers. They will also participate in various discussions on cultural and political issues.
For BA Students: Advanced Language Course
Taught by: Mshomba
Course usually offered in fall term
Also Offered As: AFRC 284, AFST 584
Prerequisites: AFST 280, LING 280, AFRC 280 or permission of instructor
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 285 Advanced Swahili II
For BA Students: Advanced Language Course
Taught by: Mshomba
Course usually offered in spring term
Also Offered As: AFRC 285, AFST 586
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 370 Advanced Yoruba I
For BA Students: Advanced Language Course
Taught by: Awoyale
Course usually offered in fall term
Also Offered As: AFST 587
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 371 Advanced Yoruba II
For BA Students: Advanced Language Course
Taught by: Awoyale
Course usually offered in spring term
Also Offered As: AFST 588
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 390 Survey Francophone Lit
This class will explore the African city as a site of colonial and postcolonial exchanges by way of twentieth-century European and African representations. We will examine, on the one hand, the status of the urban located in Africa in European works from the colonial period (fiction and non-fiction including Gide, Leiris, Londres). On the other hand, we will study Africans, focusing on the dreams and transformations involved in the passage from the village to the city to the metropole. Essays from history, sociology, urban studies and postcolonial theory will supplement the study of the primary texts. All readings, class discussions and written assignments in French.
Taught by: Moudileno
Course not offered every year
Also Offered As: AFRC 391, FREN 390
Activity: Seminar
1 Course Unit

AFST 399 Independent Study: Language
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: Offered through Penn Language Center

AFST 460 Middle Egyptian
Introduction to the grammar of Middle Egyptian.
Taught by: Silverman
Two terms. student must enter first term.
Also Offered As: ANEL 460
Activity: Lecture
1 Course Unit

AFST 467 Introduction to Egyptian Culture and Archaeology
Covers principal aspects of ancient Egyptian culture (environment, urbanism, religion, technology, etc.) with special focus on archaeological data; includes study of University Museum artifacts. Follows AMES 266/466 - History of Egypt taught in the Fall semester.
Taught by: Wegner
Course usually offered in spring term
Also Offered As: NELC 467
Activity: Lecture
1 Course Unit

AFST 470 Twi Language & Culture I
Activity: Lecture
1 Course Unit

AFST 471 Twi Lang & Culture II
Activity: Lecture
1 Course Unit

AFST 484 Swahili Lang/Culture I
This course taught in Swahili will focus on reading/writing skills and speaking/listening skills as well as structural and cultural information. The course will be structured around three thematic units: History, Politics, and Education. The course will provide background on the Swahili-speaking world: Who were the first Swahili speakers and what varieties of the language did they speak? How did Swahili spread from the coast to other Swahili-speaking areas as far inland as Uganda, Rwanda, and Congo? Swahili is a lingua franca and has importance in the spread of religion and trade movements. Influences of other languages on Swahili and influences of Swahili on local languages will be discussed. Political and educational systems will be discussed as well.
For BA Students: Advanced Language Course
Taught by: Mshomba
Course not offered every year
Also Offered As: AFST 590
Prerequisite: Completion of Advanced Swahili I & II
Activity: Lecture
1 Course Unit

AFST 486 Yoruba Language & Culture I
Taught by: Awoyale
Course not offered every year
Prerequisites: Completion of Advanced Yoruba I & II.
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 487 Yoruba Language & Culture II
Taught by: Awoyale
One-term course offered either term
Prerequisites: Completion of Advanced Yoruba I & II.
Activity: Lecture
1 Course Unit
AFST 490 African Language Tutorial - Elementary I
The main objective of this course is to allow students to study an African language of their choice, depending on the availability of the instructor. The course will provide students with linguistic tools which will facilitate their research work in the target country. Cultural aspects of the speakers of the language will be introduced and reinforced.
For BA Students: Language Course
One-term course offered either term
Also Offered As: AFST 594
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 491 African Language Tutorial - Elementary II
Continuation of AFST 490.
For BA Students: Language Course
One-term course offered either term
Also Offered As: AFRC 491, AFST 595
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 492 African Language Tutorial - Intermediate I
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: AFRC 492, AFST 596
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 493 African Language Tutorial - Intermediate II
Continuation of AFST 492.
For BA Students: Last Language Course
Course usually offered in spring term
Also Offered As: AFRC 493, AFST 597
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 494 African Language Tutorial - Advanced I
For BA Students: Advanced Language Course
Course usually offered in fall term
Also Offered As: AFST 598
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 495 African Language Tutorial: Adv II Languages will be specified in each section.
Continuation of AFST 494.
Course usually offered in spring term
Also Offered As: AFRC 495, AFST 599
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit

AFST 496 Language & Culture I
Aspects of the targeted language's history, language, and culture.
For BA Students: Language Course
Course usually offered in fall term
Prerequisites: Permission of Penn Language Center.
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 509 Arabic: Reading Historical Manuscripts
Arabic language is used by many societies not only in communication but also in correspondence and in documenting the affairs of their daily lives. Arabic script is adopted by many groups who native languages are not Arabic, in writing their language before some moved to the roman alphabet. In many historical documents specific style of writing and handwriting are dominant. This specificity is influenced by the dialectical variations, the historical development of each region and the level of Arabic literacy and use.
Course not offered every year
Also Offered As: ARAB 534
Activity: Lecture
1 Course Unit

| AFST 560    | Introduction to Francophone Studies             | SPRING 2016: This seminar will introduce key authors and issues in Francophone studies through texts that specifically focus on various experiences of war in colonial and postcolonial contexts. Significantly, the first piece of fiction by an African author may well be Bakary Diallo's Force Bonte, (1926), the autobiographical story of a WWI Senegalese Tirailleur, physically deformed by his war experience and trying to through his writing. While Force Bonte is unique as an early piece, similar narratives have not ceased to proliferate in French and Francophone fiction. Indeed, writers from all over the former French Empire have repeatedly offered fictional accounts of colonial subjects' involvement in European wars, and especially WWII, with various degrees of ambivalence. As conflicts and genocides continue, the experience of war fuels a new wave of Francophone accounts at the turn of the twenty-first century. We will use an extensive diachronically and synchronically developed reading (and viewing ) list of texts and films from Senegal, Congo, Rwanda, Guinea, Algeria, Martinique, Mauritius, and (Metropolitan) France from the 1920s to 2014. Using this material as the basis for our exploration we will address several questions: What are some of the important tropes deployed in these narratives and how do they relate to broader issues concerning colonial and postcolonial violence? How do the wars of others (e.g. WWI and WWII) complicate the experience of war and questions of engagement and solidarity? How do such experiences lay the groundwork for other wars, of liberation, for example? Finally how does war impact the articulation of memory, survival and writing in colonial contexts, in the postcolony, and in the European Metropole?  
Primary texts in French. Class discussion in French or English.

AFST 563 Old Egyptian
This course is an introduction to the language of the Egyptian Old Kingdom. The grammar of the period will be introduced during the early part of the semester, using Ededl’s ALTAGYPTISCHE GRAMMATIK as the basic reference. Other grammatical studies to be utilized will include works by Allen, Baier, Polotsky, Satzinger, Gilula, Doret, and Silverman. The majority of the time in the course will be devoted to reading varied textual material: the unpublished inscriptions in the tomb of the Old Kingdom official Kapure—on view in the collection of the University Museum; several autobiographical inscriptions as recorded by Sethe in URKUNDEN I; and a letter in hieratic (Baer, ZAS 03. 1077. 1-9).

AFST 628 Africa in the Wider World: Connections, Contexts, Comparisons
This seminar is aimed at students of history, culture, literature, and the arts in the Americas, Europe, or Asia, who need to know something about African history and culture for their own research or studies. It is intended to help students identify, analyze, and incorporate selected scholarship on Africa into their particular area or disciplinary specializations. Topics covered include slavery and slave societies; diasporas and migrations, linguistic, religious and cultural transfers and survivals; and issues of identity, assimilation, nationalism, and pan-Africanism. We want to ask: how much African history, culture, language, and social structure do Americanists or other non-specialists need to know to do sound scholarship? What comparative questions should we be asking about Africa, and how can we find and utilize data that is reliable and relevant to our own work.
Taught by: Cassanelli
Course usually offered in fall term
Activity: Seminar
1 Course Unit

AFST 630 African History: Core Issues of Social Process
This graduate seminar explores the literature of African history while trying to find ways to understand history which happens on unfamiliar social and cultural terrain. The terrain is unfamiliar because the words professional historians use, and the underlying assumptions about social process, show the marks of many generations of writing about Europe. The standard histories, then, are torn between describing events in terms of European social process, in which case they do violence to the history, or finding a historical language which is closer to being locally grounded but unfamiliar to a western audience. In this course we study a number of core issues of social process. Each one is meant to direct attention to a complex of local social forms, and each is at the heart of a major body of writings of African history. A tentative list of topics includes the following: Oral tradition; knowledge and identity; ecology and ethnicity; forms of local authority and state power; ritual, conquest, and the transformation of political authority; political economy; gender and personal dependency; the ecological history of disease; popular associations and the state; the local bases of nationalism.
Taught by: Feierman

AFST 775 South African Literature
An advanced seminar in anglophone African literature, possibly including a few works in translation.
Taught by: Barnard
Course not offered every year
Also Offered As: ENGL 775
Activity: Seminar
1 Course Unit
AFRC 001 Introduction to Africana Studies
The aim of this course is to provide an interdisciplinary examination of the complex array of African American and other African Diaspora social practices and experiences. This class will focus on both classic texts and modern works that provide an introduction to the dynamics of African American and African Diaspora thought and practice. Topics include: What is Africana Studies?; The History Before 1492; Creating the African Diaspora After 1500; The Challenge of Freedom; Race, Gender and Class in the 20th Century; From Black Studies to Africana Studies: The Future of Africana Studies.
For BA Students: Humanities and Social Science Sector
Taught by: Beavers, Butler, Charles, Johnson, Savage, Tillet, Zuberi
One-term course offered either term
Also Offered As: ENGL 071, RELS 007, SOCI 027
Activity: Lecture
1 Course Unit

AFRC 002 Introduction to Sociology
We live in a country which places a premium on individual accomplishments. Hence, all of you worked extremely hard to get into Penn. Yet, social factors also have an impact on life chance. This class provides an overview of how membership in social groups shapes the outcomes of individuals. We will look at a range of topics from the organizational factors which promoted racial inequality in Ferguson, Mo to the refusal of (mostly elite) parents to vaccinate their children. The experience of women and men in the labor market -- and the social factors that lead women to earn less than men -- is another interesting topic taken up in the course. Who gets ahead in America? Course requirements include a midterm, research paper (five to six pages), final and recitation activities. Students are not expected to have any previous knowledge of the topic. Welcome to the course!
For BA Students: Society Sector
Taught by: Imoagene, Zuberi
One-term course offered either term
Also Offered As: SOCI 001
Activity: Recitation
0 Course Units

AFRC 006 Race and Ethnic Relations
The course will focus on race and ethnicity in the United States. We begin with a brief history of racial categorization and immigration to the U.S. The course continues by examining a number of topics including racial and ethnic identity, interracial and interethnic friendships and marriage, racial attitudes, mass media images, residential segregation, educational stratification, and labor market outcomes. The course will include discussions of African Americans, Whites, Hispanics, and Asian Americans and Multiracials.
Taught by: Charles, Kao, Zuberi
One-term course offered either term
Also Offered As: ASAM 006, SOCI 006, URBS 160
Activity: Lecture
1 Course Unit
AFRC 017 Topics in Literature
Freshmen Seminars under the title "Topics in Literature" will afford entering students who are considering literary study, the opportunity to explore a particular and limited subject with a professor whose current work lies in that area. Topics may range from the lyric poems of Shakespeare’s period to the ethnic fiction of contemporary America. Small class-size will insure all students the opportunity to participate in lively discussions. Students may expect frequent and extensive writing assignments, but these seminars are not writing courses; rather they are intensive introductions to the serious study of literature. See the Africana Studies Department’s website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Beavers, Jaji, Tillet
One-term course offered either term
Also Offered As: ENGL 016
Activity: Seminar
1 Course Unit
Notes: Freshmen Seminar, Arts Scholars Program

AFRC 019 AFAM Freshman Seminar
This course will introduce students to a more hemispheric understanding of the American experience, through the writings of many authors from the New World, including the United States, on what it means to be an American. Students will read texts from many genres including but not limited to poetry, film, prose, political speeches and autobiography, to come to terms with histories of native Americans, African-Americans, Latinos, and whites in the United States, as well as peoples of South America and the Caribbean. In the process students will become familiar with scholarship across the social sciences and humanities that consider issues of race, culture, nation, freedom and inequality in the Americas, and how racial slavery and the Afro-American hemispheric experience has informed multiple American visions.
Taught by: Hanchard
Course usually offered in fall term
Activity: Seminar
1 Course Unit

AFRC 041 Homelessness & Urban Inequality
This freshman seminar examines the homelessness problem from a variety of scientific and policy perspectives. Contemporary homelessness differs significantly from related conditions of destitute poverty during other eras of our nation’s history. Advocates, researchers and policymakers have all played key roles in defining the current problem, measuring its prevalence, and designing interventions to reduce it. The first section of this course examines the definitional and measurement issues, and how they affect our understanding of the scale and composition of the problem. Explanations for homelessness have also been varied, and the second part of the course focuses on examining the merits of some of those explanations, and in particular, the role of the affordable housing crisis. The third section of the course focuses on the dynamics of homelessness, combining evidence from ethnographic studies of how people become homeless and experience homelessness, with quantitative research on the patterns of entry and exit from the condition. The final section of the course turns to the approaches taken by policymakers and advocates to address the problem, and considers the efficacy and quandaries associated with various policy strategies.
The course concludes by contemplating the future of homelessness research and public policy.
Taught by: Culhane
One-term course offered either term
Also Offered As: SOCI 041, URBS 010
Activity: Seminar
1 Course Unit
Notes: This freshmen seminar is cross-listed with URBS 010 when the subject matter is related to African, African American, or other Diaspora issues. A recent topic is "Homelessness and Urban Inequality." See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.

AFRC 050 World Musics and Cultures
This course examines how we as consumers in the "Western" world engage with musical difference largely through the products of the global entertainment industry. We examine music cultures in contact in a variety of ways—particularly as traditions in transformation. Students gain an understanding of traditional music as live, meaningful person-to-person music making, by examining the music in its original site of production, and then considering its transformation once it is removed, and recontextualized in a variety of ways. The purpose of the course is to enable students to become informed and critical consumers of "World Music" by telling a series of stories about particular recordings made with, or using the music of, peoples culturally and geographically distant from the US. Students come to understand that not all music downloads containing music from unfamiliar places are the same, and that particular recordings may be embedded in intriguing and controversial narratives of production and consumption. At the very least, students should emerge from the class with a clear understanding that the production, distribution, and consumption of world music is rarely a neutral process.
For BA Students: Arts and Letters Sector
Taught by: Muller, Rommen
One-term course offered either term
Also Offered As: AFST 050, ANTH 022, FOLK 022, MUSC 050
Activity: Lecture
1 Course Unit
AFRC 056 South Africa: Contemporary Performance
The course begins with four two-hour online classes that provide an overview of South African music, dance, and theater beginning two weeks before the festival. Students will be expected to post to blogs and discussion forums about course materials, audio, video, and readings—provided online prior to leaving for South Africa. These blogs and discussion materials will be fully integrated into the online lectures. The Grahamstown Festival includes a wide range of events: we will focus on South African jazz, gospel, and art music, with some discussion of dance and theater. All students will be required to post daily to blogs and discussion forums while at the Festival. The class will conclude with two days of discussion, synthesis, and a final essay.
Taught by: Muller
Course usually offered summer term only
Also Offered As: AFST 056, COML 056, MUSC 056
Activity: Seminar
1 Course Unit

AFRC 070 Colonial Latin America
This course provides an introduction to the broad literature on Latin America’s rich colonial history. We will begin by tracing some of the early origins of - and points of contact between - the Indian, Iberian, and African men and women who formed the basis of colonial society. As the course progresses, we will explore the variety of ways in which colonial subjects lived, worked, ate, worshipped and socialized. Lectures and reading assignments will draw upon a variety of sources, including court cases, artistic renderings, city maps and street plans, travel accounts of visits to the region, and the material, cultural, and intellectual products made possible by the wealth and dynamism of the seventeenth and eighteenth centuries. The course will conclude with an analysis of the Age of Revolutions, a period of dramatic upheaval that remains at the center of lively scholarly debates. By the end of the semester, students will be able to engage the key questions driving these debates, the most important of which, perhaps, is: what is Latin America’s colonial legacy?
For BA Students: History and Tradition Sector
Taught by: Farnsworth-Alvear, Walker
Course usually offered in fall term
Also Offered As: HIST 070, LALS 070
Activity: Lecture

Activity: Recitation
1 Course Unit

AFRC 077 Jazz Style and History
This course is an exploration of the family of musical idioms called jazz. Attention will be given to issues of style development, selective musicians, and to the social and cultural conditions and the scholarly discourses that have informed the creation, dissemination and reception of this dynamic set of styles from the beginning of the 20th century to the present.
Taught by: Ramsey
Course not offered every year
Also Offered As: MUSC 035
Activity: Lecture
1 Course Unit

AFRC 078 Faculty-Student Collaborative Action Seminar in Urban University-Community Relations
A primary goal of the seminar is to help students develop proposals as to how a Penn undergraduate education might better empower students to produce, not simply “consume,” societally-useful knowledge, as well as function as caring, contributing citizens of a democratic society. Please note new location of the class: The Netter Conference Room is on 111 South 38th Street, on the 2nd floor. Among other responsibilities, students focus their community service on college and career readiness at West Philadelphia High School and Sayre High School. Students are typically engaged in academically based community service learning at the schools for two hours each week.
Taught by: Harkavy
One-term course offered either term
Also Offered As: HIST 173, URBS 178
Activity: Seminar
1 Course Unit
AFRC 079 Literatures of Jazz
That modernism is steeped as much in the rituals of race as of innovation is most evident in the emergence of the music we have come to know as jazz, which results from collaborations and confrontations taking place both across and within the color line. In this course we will look at jazz and the literary representations it engendered in order to understand modern American culture. We will explore a dizzying variety of forms, including autobiography and album liner notes, biography, poetry, fiction, and cinema. We'll examine how race, gender, and class influenced the development of jazz music, and then will use jazz music to develop critical approaches to literary form. Students are not required to have a critical understanding of music. Class will involve visits from musicians and critics, as well as field trips to some of Philadelphia's most vibrant jazz venues. Topics vary. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Beavers
Course not offered every year
Also Offered As: ENGL 080
Activity: Lecture
1 Course Unit

AFRC 080 Introduction to American Literature
A consideration of outstanding literary treatments of American culture from its beginnings until the dawn of the 20th century. Works read generally include autobiographies and travel accounts as well as fiction and poetry.
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: This course is cross-listed with ENGL 080 (Introduction to American Literature) when the course content is related to Afro-American issues. Topics vary. Consult the Center for Africana Studies for a detailed course description.

AFRC 081 African-American Literature
This introduction to African-American literature will begin with contemporary, groundbreaking texts such as Claudia Rankines Citizen: An American Lyric and Toni Morrisons A Mercy. These twenty-first century texts will lead us to the questions about freedom, beauty, struggle, pleasure, and resistance that shape the origins of African American literature. The course will be shaped around circles of influence (not a linear mapping of a literary tradition). These circles of the changing same become the art of flow, layering, and rupture. We will dive into the multidirectional flow of slave narratives/neo-slave narratives/black modernism/black postmodernism/black respectability politics/black radicalism, and mastery of form/deformation of mastery. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Beavers, Davis, Tillet
Course not offered every year
Also Offered As: ENGL 081, GSWS 081, MUSC 082

Also Offered As: ARTH 100
Activity: Seminar
1 Course Unit
Notes: For Freshmen only

AFRC 101 Study of an Author
This is an introduction to literary study through the works of a single author—often Shakespeare, but some versions of this course will feature other writers. We will read several works and approach them—both in discussion and in writing—from a range of critical perspectives. The author’s relation to his or her time, to literary history generally, and to the problems of performance, the likely to be emphasized. Some versions of this course will also serve as an introduction to other members of the English faculty, who will visit the class as guest lecturers. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.
For BA Students: Arts and Letters Sector
Taught by: Davis
One-term course offered either term
Also Offered As: ENGL 101, GSWS 101
Activity: Lecture
1 Course Unit

AFRC 106 Study of a Literary Period
This is an introduction to literary study through a survey of works from a specific historical period. Some versions will begin with traditional stories or poems, including a sampling of works in translation. Others will focus exclusively on modern and contemporary American short fiction or poetry. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Davis
One-term course offered either term
Also Offered As: COML 104, ENGL 104
Activity: Lecture
1 Course Unit

AFRC 112 Discrimination: Sexual and Racial Conflict
This course is concerned with the structure, the causes and correlates, and the government policies to alleviate discrimination by race and gender in the United States. The central focus of the course is on employment differences by race and gender and the extent to which they arise from labor market discrimination versus other causes, although racial discrimination in housing is also considered. After a comprehensive overview of the structures of labor and housing markets and of nondiscriminatory reasons (that is, the cumulative effects of past discrimination and/or experiences) for the existence of group differentials in employment, wages and residential locations, various theories of the sources of current discrimination are reviewed and evaluated. Actual government policies and alternatives policies are evaluated in light of both the empirical evidence on group differences and the alternative theories of discrimination.
For BA Students: Society Sector
Taught by: Madden
Course usually offered in spring term
Also Offered As: GSWS 114, SOCI 112
Activity: Lecture
1 Course Unit
AFRC 114 Poetry Writing Workshop
This workshop is intended to help students with prior experience writing poetry develop techniques to generate poems along with the critical tools necessary to revise and complete them. Through in-class exercises, weekly writing assignments, readings of established poets, and class critique, students will acquire an assortment of resources that will help them develop a more concrete sense of voice, rhythm, metaphor, and the image as well as a deeper understanding of how these things come together to make a successful poem. In addition to weekly writings, students will be asked to keep a journal, and to produce a final portfolio of poems.
Taught by: Beavers
Course usually offered in fall term
Also Offered As: ENGL 113
Activity: Seminar
1 Course Unit
Notes: This course is not open to freshmen. Students wishing to take this course must submit a writing sample as part of the selection process.

AFRC 115 Religious Ethics and Modern Society
Religious beliefs of Malcolm X and MLK formed their social action during the Civil Rights for African Americans. This seminar will explore the religious biographies of each leader, how religion shaped their public and private personas, and the transformative and transgressive role that religion played in the history of the Civil Rights movement in the United States and abroad. Students in this course will leave with a clearer understanding of religious beliefs of Christianity, The Nation of Islam, and Islam, as well as religiously based social activism. Other course emphases include the public and private roles of religion within the context of the shaping of ideas of freedom, democracy, and equality in the United States, the role of the "Black church" in depicting messages of democracy and freedom, and religious oratory as exemplified through MLK and Malcolm X. See Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Butler
One-term course offered either term
Also Offered As: RELS 112
Activity: Lecture
1 Course Unit

AFRC 117 African American Religion
The unique history and experiences of African Americans can be traced through religion and belief. Through the mediums of literature, politics, music, and film, students will pore the religious experiences of people of the African Diaspora within the context of the complex history of race in American history. The course will cover a broad spectrum of African American religious experience including Black Nationalism, urban religions, the "black church" and African religious traditions such as Santeria and Rastafarianism. Special attention will be paid to the role of race, gender, sexuality, and popular culture in the African American religious experience.
Taught by: Butler
One-term course offered either term
Also Offered As: ENGL 016, RELS 117
Activity: Lecture
1 Course Unit

AFRC 120 Social Statistics
This course offers a basic introduction to the application/interpretation of statistical analysis in sociology. Upon completion, you should be familiar with a variety of basic statistical techniques that allow examination of interesting social questions. We begin by learning to describe the characteristics of groups, followed by a discussion of how to examine and generalize about relationships between the characteristics of groups. Emphasis is placed on the understanding/interpretation of statistics used to describe and make generalizations about group characteristics. In addition to hand calculations, you will also become familiar with using PCs to run statistical tests.
Taught by: Charles
One-term course offered either term
Also Offered As: SOCI 120
Activity: Recitation
0 Course Units

AFRC 121 Writing for Children
We will read our favorite kids' books, determine the kinds of books we love to read and write, and then write them, aiming at a clear voice appropriate to the story, and as much order or misrule as each writer's kid-muse demands. For inspiration, we'll visit the Maurice Sendak Collection at the Rosenbach Museum and Library and have a nostalgia wallow in the kids' section at the library. Then students write, fast-fast, drafts of stories to workshop, mull and revise. Yes, fun is required. For sure we'll critique, but first we'll try to outrun our interior grown-up! Workshopping happens first with student writer colleagues, and then with the real kids in schools, through our partner West Philadelphia Alliance for Children. Reading to children will give student writers a chance to hear where children laugh, see where they look scared, or notice when they begin to fidget. Returning with revisions will be a promise fulfilled, and an important marker in the literary life of everyone involved. Our class will act as a team of editors, then, to submit stories-and illustrations by authors and/or kids-on the upcoming website, SafeKidsStories.org.
Taught by: Cary
One-term course offered either term
Also Offered As: ENGL 121
Activity: Seminar
1 Course Unit
Notes: This course is not open to freshmen. Students wishing to take this course must submit a writing sample as part of the selection process. May be repeated for credit with a different instructor.
AFRC 134 Creative Non-Fiction Writing
This class is designed to advance students' writing practice, discipline, and workshop and critiquing skills. Student writers will create non-fiction narrative in several forms: blogs, memoir, interviews, Q&As, essays. We will play with promotion, video, and social marketing, even grant proposals, advertisements, public service announcements, queries, and photo captions—all the forms that writers actually use throughout careers of deep reflection followed by hustle-and-pitch. The class will act as an editorial group for SafeKidsStories.org, a site to be launched in the fall of 2015. The idea is to depict safety with the specificity and drama that we usually reserve for conflict. Your writing will explore Big Questions about the social, emotional, relational and physical structures that affect our children and youth; your research, interviews, reporting, and experience will discover and share solutions. If we do the job right, we will shine a light on people in our midst creating structures of safety for kids in an era of fear. If we make it fun to read, look at, and listen to, too, then, like a few historic college courses that participate substantively in their communities, we'll be on our way to stealth culture change.
Taught by: Fetni
One-term course offered either term
Also Offered As: ENGL 135
Activity: Seminar
1 Course Unit

AFRC 135 Law and Society
After introducing students to the major theoretical concepts concerning law and society, significant controversial societal issues that deal with law and the legal systems both domestically and internationally will be examined. Class discussions will focus on issues involving civil liberties, the organization of courts, legislatures, the legal profession and administrative agencies. Although the focus will be on law in the United States, law and society in other countries of Africa, Asia, Europe and Latin America will be covered in a comparative context. Readings include research, reports, statutes and cases.
Taught by: Fetni
One-term course offered either term
Also Offered As: SOCI 135
Activity: Lecture
1 Course Unit

AFRC 137 Latin America: Law and Society in Comparative Context
This course will focus on Latin America, a region that is of great interest for those who seek to understand the law and society of today’s world. Latin America is an important region not only because of its large population and geographic significance, but also because of its rich cultural diversity and political and economic challenges.

Course usually offered in fall term
Also Offered As: HIST 137
Activity: Seminar
1 Course Unit

AFRC 140 Elementary Zulu I in Residence
This elementary course is for beginners and requires no prior knowledge of Zulu. The course will expose students to the Zulu language and culture and will be based in the National Standards for Foreign Language Learning. Students will be engaged in communicative language learning through interpersonal, interpretive and presentational modes of language learning techniques. They will gain knowledge and understanding of the Zulu culture. They will make Zulu language and culture learning experience to connect with other disciplines and further their knowledge of these disciplines through perspectives acquired from their Zulu class. They will also develop insight into the nature of language and culture through comparisons of the Zulu language and culture and their own. Through movies, songs, and other cultural activities online students will acquire the natural use of the language which will enable them to acquire linguistic and cultural skills to become lifelong learners who can participate in Zulu communities in the U.S. and overseas.
Taught by: Mbeje
Course usually offered in fall term
Also Offered As: AFST 140
Activity: Lecture
0.05 Course Units
Notes: OBJECTIVE: Attainment of Level 1 (ceiling) in speaking, listening, reading, and writing skills on the Interagency Language Roundtable (ILR) scale.

AFRC 147 Studies in African American Music
This course explores aspects of the origins, style development, aesthetic philosophies, historiography, and contemporary conventions of African-American musical traditions. Topics covered include: the music of West and Central Africa, the music of colonial America, 19th century church and dance music, minstrelsy, music of the Harlem Renaissance, jazz, blues, gospel, hip-hop, and film music. Special attention is given to the ways that black music produces "meaning" and to how the social energy circulating within black music articulates myriad issues about American identity at specific historical moments. The course will also engage other expressive art forms from visual and literary sources in order to better position music making into the larger framework of African American aesthetics.
Taught by: Ramsey
Course usually offered every year

0.05 Course Units
Notes: OBJECTIVE: Attainment of Level 1 (ceiling) in speaking, listening, reading, and writing skills on the Interagency Language Roundtable (ILR) scale.

This seminar will examine the experiences of recent African immigrants and refugees in Philadelphia in an historical framework. We will employ a variety of sources—newspapers, census data, legal briefs, literature and film, and diaspora internet sites—to explore the lives, aspirations, and perceptions of Philadelphia’s African residents. There will be opportunities for dialogue with high school students, teachers, and parents; with representatives of African community and business organizations; and with local government and service agencies. Students will be required to do a final project which involves volunteering with an African immigrant non-profit or business and/or conducting focused research on specific African communities in Philadelphia.
Taught by: Cassanelli
Also Offered As: AFST 167, HIST 167, URBS 167
Activity: Seminar
1 Course Unit
AFRC 168 History of American Law to 1877
This course surveys the development of law in the U.S. to 1877, including such subjects as: the evolution of the legal profession, the transformation of English law during the American Revolution, the making and implementation of the Constitution, and issues concerning business and economic development, the law of slavery, the status of women, and civil rights.
Taught by: Berry
Course usually offered in fall term
Also Offered As: HIST 168
Activity: Lecture
1 Course Unit

AFRC 169 History of American Law Since 1877
This course covers the development of legal rules and principles concerning individual and group conduct in the United States since 1877. Such subjects as regulation and deregulation, legal education and the legal profession, and the legal status of women and minorities will be discussed.
Taught by: Berry
Course usually offered in spring term
Also Offered As: HIST 169
Activity: Lecture
1 Course Unit

AFRC 170 Elementary Yoruba I
This Elementary Yoruba I course can be taken to fulfill a language requirement, or for linguistic preparation to do research on Nigeria and the diaspora/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Yoruba. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content. Students will acquire the speaking, listening, reading, and writing skills at the mid-high novice level, based on the ACTFL scale. The mid-high novice level proficiency skills that the students will acquire constitute threshold capabilities of the second semester range of proficiency to prepare students for Elementary Yoruba II course materials.
For BA Students: Language Course
Taught by: Awoyale
Course usually offered in fall term
Also Offered As: AFST 170, AFST 517
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 171 Elementary Yoruba II
The main objective of this course is to further sharpen the Yoruba linguistic knowledge that the student acquired in level I. By the end of the course, the student should be able to (1) read, write, and understand simple to moderately complex sentences in Yoruba; and, (2) advance in the knowledge of the Yoruba culture.
For BA Students: Language Course
Taught by: Awoyale
Course usually offered in spring term
Also Offered As: AFRC 517, AFST 171, AFST 518
Prerequisites: Completion of Elementary Yoruba I, or permission of instructor.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 172 The American South
This course will cover southern culture and history from 1607-1860, from Jamestown to secession. It traces the rise of slavery and plantation society, the growth of Southern sectionalism and its explosion into Civil War.
For BA Students: History and Tradition Sector
Taught by: Hahn
One-term course offered either term
Also Offered As: HIST 170
Activity: Recitation
1 Course Unit

AFRC 175 Society and Culture of Brazil
With its booming economy, the recent inauguration of its first female president, and its selection as host to the 2012 World Cup and Olympic games, Brazil is growing in global prestige. But amid all these exciting developments are devastating socioeconomic inequalities. Access to safe living conditions, livable wages, higher education, and overall social mobility remain painfully out of reach for many Brazilians, the majority of whom are the descendants of slaves. Why do these problems persist in a country that has had such an enduring and widespread reputation as a "racial democracy"? What are the possibilities of closing the equality gap in Brazil?
Taught by: Walker
Two terms. student may enter either term.
Also Offered As: HIST 175, LALS 175
Activity: Lecture
1 Course Unit

AFRC 176 Afro-American History 1550-1876
This course will study the history of African-Americans from their first encounter with Europeans in the 16th century to their emancipation during the Civil War. This course will concentrate on the variety of black responses to capture, enslavement, and forced acculturation in the New World, the difference in the slave experience of various New World countries, and the methods of black resistance and rebellion to varied slave systems will be investigated. The nature and role of the free black communities in antebellum American will also be studied.
For BA Students: History and Tradition Sector
Taught by: Akins, Williams
Two terms. student may enter either term.
Also Offered As: HIST 176
Activity: Lecture
1 Course Unit

AFRC 177 Afro-American History 1876 to Present
A study of the major events, issues, and personalities in Afro-American history from Reconstruction to the present. The course will also examine the different slave experiences and the methods of black resistance and rebellion in the various slave systems.
For BA Students: History and Tradition Sector
Taught by: Harris, Savage
One-term course offered either term
Also Offered As: HIST 177
Activity: Lecture
1 Course Unit
AFRC 180 Elementary Swahili I
The elementary Swahili course can be taken to fulfill a language requirement, or for linguistic preparation to do research on East Africa/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Swahili. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content. Students will acquire the speaking, listening, reading, and writing skills at the mid-high novice level, based on the ACTFL scale. The mid-high level proficiency skills that the students acquire constitute threshold capabilities of the second semester range of proficiency to prepare students for Elementary Swahili II course materials.
For BA Students: Language Course
Taught by: Mshomba
Course usually offered in fall term
Also Offered As: AFST 180, AFST 580
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 181 Elementary Swahili II
This course continues to introduce basic grammar, vocabulary, and the reading and writing of Swahili to new speakers. During this term, folktales, other texts, and film selections are used to help introduce important aspects of Swahili culture and the use of the language in wide areas of Africa.
For BA Students: Language Course
Taught by: Bolger
Course usually offered in spring term
Also Offered As: AFST 181, AFST 581
Prerequisites: Completion of Elementary Swahili I, or permission of instructor.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 190 Introduction to Africa
This course provides an introduction to the study of Africa in all its diversity and complexity. Our focus is cultural, geographical, and historical: we will seek to understand Africa's current place in the world political and economic order and learn about the various social and physical factors that have influenced the historical trajectory of the continent. We study the cultural formations and empires that emerged in Africa before European colonial invasion and then how colonialism reshaped those sociocultural forms. We'll learn about the unique kinds of kinship and religion in precolonial Africa and the changes brought about by the spread of Islam and Christianity. Finally, we'll take a close look at contemporary issues such as ethnic violence, migration, popular culture and poverty, and we'll debate the various approaches to understanding those issues.
For BA Students: Society Sector
Taught by: Hasty
Course usually offered in fall term
Also Offered As: AFST 190, ANTH 190
Activity: Lecture
1 Course Unit

AFRC 209 African Art
This selective survey will examine a variety of the circumstances of sub-Saharan African art, ranging from imperial to nomadic cultures and from ancient times to contemporary participation in the international market. Iconography, themes and style will be considered, as well as questions of modernity, religious impact, tradition and colonialism.
Course not offered every year
Also Offered As: AFST 209, ARTH 209
Activity: Lecture
1 Course Unit

AFRC 218 Race, Racism and American Law
The goal of this course is to study the role the law has played, and continues to play, in addressing the problems of racial discrimination in the United States. Contemporary issues such as racial profiling, affirmative action, and diversity will all be covered in their social and legal context. The basis for discussion will be assigned texts, articles, editorials and cases. In addition, interactive videos will also be used to aid class discussion. Course requirements will include a term paper and class presentations.
Taught by: Anderson
One-term course offered either term
Also Offered As: LGST 218
Activity: Lecture
1 Course Unit

AFRC 222 African Women's Lives: Past and Present
Restoring women to African history is a worthy goal, but easier said than done. The course examines scholarship over the past forty years that brings to light previously overlooked contributions African women have made to political struggle, religious change, culture preservation, and economic development from pre-colonial times to present. The course addresses basic questions about changing women's roles and human rights controversies associated with African women within the wider cultural and historical contexts in which their lives are lived. It also raises fundamental questions about sources, methodology, and representation, including the value of African women's oral and written narrative and cinema production as avenues to insider perspectives on African women's lives.
Taught by: Blakley
Course not offered every year
Also Offered As: AFST 222, GSWS 222
Activity: Lecture
1 Course Unit

AFRC 225 African Languages and Culture
The aim of the course is to provide an overall perspective on African languages and linguistics. No background in linguistics is necessary. Students will be introduced to theoretical linguistics—its concepts, theories, ways of argumentation, data collection, data analysis, and data interpretation. The focus will be on the languages and linguistics of Africa to provide you with the knowledge and skills required to handle the language and language-related issues typical of African conditions. We will cover topics related to formal linguistics (phonology/phonetics, morphology, syntax, and semantics), aspects of pragmatics as well as the general socio-linguistic character of African countries. We will also cover language in context, language and culture, borrowing, multilingualism, and cross-cultural communication in Africa.
Taught by: Mbeje
One-term course offered either term
Also Offered As: AFST 225
Activity: Lecture
1 Course Unit
**AFRC 230 Special Topics in Sociology**  
Topics vary. Recent courses offered include "Africana Urbanization," Race Relations in American Cities," and "Sociology of the Black Community."  
SPRING 2015: Race, Science and Society - What is the role of the life sciences in shaping our understanding of race? How has racial stratification influenced scientists and how have scientists constructed racial difference and helped to maintain or contest racial inequities in society? This seminar draws on an interdisciplinary body of biological and social scientific literature to explore the connections between race, science, and society in the United States from the eighteenth century to the current genmic age. After laying a historical foundation, we will focus on the recent expansion of genomic research and technologies that treat race as a biological category that can be identified at the molecular level, including race-specific pharmaceuticals, commercial ancestry testing, and racial profiling with DNA forensics. We will discuss the significance of this increase in race consciousness in genomic research and technology at a time when colorblindness and post-racialism are gaining popularity. Students will investigate further specific topics related to race, genetics, and biotechnologies in their research papers.  
Taught by: Charles, Zuberi, Roberts  
One-term course offered either term  
Also Offered As: AFRC 533, SOCI 230, SOCI 530  
Activity: Seminar  
1 Course Unit  
Notes: This course is cross-listed with SOCI 430 (Special Topics in Sociology) when the subject matter is related to African, African American, or other African Diaspora issues.

**AFRC 231 Cinema Francophone**  
This course will introduce students to recent films by major directors from Francophone Africa. While attention will be given to aesthetic aspects and individual creativity, the viewing and discussions will be mostly organized around a variety of (overlapping) themes: History; Tradition/Modernity; Urban Life; Gender and Sexuality; Politics. Class conducted in French.  
Taught by: Moudileno  
Course not offered every year  
Also Offered As: AFST 231, CIMS 210, FREN 231  
Activity: Seminar  
1 Course Unit

**AFRC 232 Race and Ethnic Politics**  
This course examines the role of race and ethnicity in the political discourse through a comparative survey of recent literature on the historical and contemporary political experiences of the four major minority groups (Blacks or African Americans, American Indians, Latinos or Hispanic Americans, and Asian Americans). A few of the key topics will include assimilation and acculturcation seen in the Asian American community, understanding the political direction of Black America in a pre and post Civil Rights era, and assessing the emergence of Hispanics as the largest minority group and the political impact of this demographic change. Throughout the semester, the course will introduce students to significant minority legislation, political behavior, social movements, litigation/court ruling, media and various forms of public opinion that have shaped the history of racial and ethnic minority relations in this country. Readings are drawn from books and articles written by contemporary political scientists.  
Taught by: Gillion  
Course not offered every year  
Also Offered As: PSCI 231  
Activity: Lecture  
0 Course Units  

**AFRC 235 Law and Social Change**  
Beginning with discussion of various perspectives on social change and law, this course then examines in detail the interdependent relationship between changes in legal and societal institutions. Emphasis will be placed on (1) how and when law can be an instrument for social change, and (2) how and when social change can cause legal change. In the assessment of this relationship, emphasis will be on the laws of the United States. However, laws of other countries and international law relevant to civil liberties, economic, social and political progress will be studied. Throughout the course, discussions will include legal controversies relevant to social change such as issues of race, gender and the law. Other issues relevant to State-Building and development will be discussed. A comparative framework will be used in the analysis of this interdependent relationship between law and social change.  
Taught by: Fetni  
One-term course offered either term  
Also Offered As: SOCI 235  
Activity: Lecture  
1 Course Unit

**AFRC 237 Undergrad Research Sem**  
Course usually offered in spring term  
Activity: Seminar  
1 Course Unit

**AFRC 240 Elementary Amharic I**  
The Elementary Amharic I course can be taken to fulfill a language requirement, or for linguistic preparation to do research on Ethiopia/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Amharic. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content. Students will acquire the speaking, listening, reading, and writing skills at the mid-high novice level, based on the ACTFL scale. The mid-high novice level proficiency skills that the students will acquire constitute threshold capabilities of the second semester range of proficiency to prepare students for Elementary Amharic II course materials.  
For BA Students: Language Course  
Taught by: Hailu  
Course usually offered in fall term  
Also Offered As: AFRC 540, AFST 240, AFST 540, NELC 481  
Activity: Lecture  
1 Course Unit  
Notes: Offered through the Penn Language Center

**AFRC 241 Elementary Amharic II**  
Continuation of Elementary Amharic I.  
For BA Students: Language Course  
Taught by: Hailu  
Course usually offered in spring term  
Also Offered As: AFRC 541, AFST 241, AFST 541, NELC 482  
Prerequisites: Completion of Elementary Amharic I, or permission of the instructor.  
Activity: Lecture  
1 Course Unit  
Notes: Offered through the Penn Language Center
AFRC 242 Intermediate Amharic I
For BA Students: Language Course
Taught by: Hailu
Course usually offered in fall term
Also Offered As: AFRC 543, AFST 242, AFST 543, NELC 483
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 243 Intermediate Amharic II
For BA Students: Last Language Course
Taught by: Zemichael
Course usually offered in spring term
Also Offered As: AFRC 544, AFST 243, AFST 544, NELC 484
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 247 Advanced Amharic
An advanced Amharic course that will further sharpen the student's knowledge of the Amharic language and the culture of the Amharas. The learner's communicative skills will be further developed through listening, speaking, reading, and writing. There will also be discussions on cultural and political issues.
For BA Students: Advanced Language Course
Taught by: Zemichael
One-term course offered either term
Also Offered As: AFRC 548, AFST 247, AFST 547
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 252 Human Rights
Sociology provides a unique way to look at human behavior and the world. We live in a world of diverse and conflicting values in which human rights and respect for human dignity have provided a platform for convergence. One important instance of such convergence has been the development of international norms prohibiting genocide, crimes against humanity, war crimes and ethnic cleansing. While there is agreement on fundamental principles as reflected in the Universal Declaration of Human Rights, differences in interpretation remain. A platform for convergence requires the engagement of a number of constituencies, in particular, state and inter-state entities, corporations, civil society and individuals, as well as the mutual reinforcement of their rights and duties. This course will critically cover the history, practice and social significance of human rights.
Taught by: Zuberi
Course not offered every year
Also Offered As: SOCI 252
Activity: Lecture
1 Course Unit

AFRC 258 Caribbean Music and Diaspora
This course considers Caribbean musics within a broad and historical framework. Caribbean musical practices are explored by illustrating the many ways that aesthetics, ritual, communication, religion, and social structure are embodied in and contested through performance. These initial inquiries open onto an investigation of a range of theoretical concepts that become particularly pertinent in Caribbean contexts – concepts such as post-colonialism, migration, ethnicity, hybridity, syncretism, and globalization. Each of these concepts, moreover, will be explored with a view toward understanding its connections to the central analytical paradigm of the course – diaspora. Throughout the course, we will listen to many different styles and repertoires of music ranging from calypso to junkanoo, from rumba to merengue, and from dance hall to zouk. We will then work to understand them not only in relation to the readings that frame our discussions but also in relation to our own North-American contexts of music consumption and production.
Taught by: Rommen
Course not offered every year
Also Offered As: ANTH 256, LALS 258, MUSC 257, MUSC 258
Activity: Lecture
1 Course Unit

AFRC 268 Contemporary Issues in the African Society
This course will deal with law and society in Africa. After surveying the various legal systems in Africa, the focus will be on how and to what extent the countries of Africa “re-Africanized” their legal systems by reconciling their indigenous law with western law and other legal traditions to create unified legal systems that are used as instruments of social change and development. Toward this end, the experiences of various African countries covering the various legal traditions will be included. Specific focus will be on laws covering both economic and social relations. This emphasis includes laws of contracts and civil wrongs, land law, law of succession, marriage and divorce and Africa’s laws of International Relations, among other laws. Throughout this course a comparative analysis with non-African countries will be stressed.
Taught by: Imoagene, Zuberi
Also Offered As: AFST 268, SOCI 268
Activity: Lecture
1 Course Unit

AFRC 269 Constitutional Law: Public Power & Civil Rights to 1912
This course explores the creation and transformations of the American constitutional system’s structures and goals from the nation’s founding through the period of Progressive reforms, the rise of the Jim Crow system, and the Spanish American War. Issues include the division of powers between state and national governments, and the branches of the federal government; economic powers of private actors and government regulators; the authority of governments to enforce or transform racial and gender hierarchies; and the extent of religious and expressive freedoms and rights of persons accused of crimes. We will pay special attention to the changing role of the Supreme Court and its decisions in interpreting and shaping American constitutionalism, and we will also read legislative and executive constitutional arguments, party platforms, and other influential statements of American constitutional thought.
Taught by: Smith
One-term course offered either term

Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 276 African American Life and Culture in Slavery
This course will examine the lives of enslaved African Americans in the United States, both in the North and the South. We will engage historiographical debates, and tackle questions that have long concerned historians. For example, if slaves were wrenched from families and traded, could they sustain family relationships? If slaves worked from sun-up until sun-down, how could they create music? We will engage with primary and secondary sources to expand our understandings of values, cultural practices, and daily life among enslaved people. Topics will include: literacy, family, labor, food, music and dance, hair and clothing, religion, material culture, resistance, and memories of slavery. Several disciplines including History, Archaeology, Literature, and Music, will help us in our explorations. Written, oral, and artistic texts for the course will provide us with rich sources for exploring the nuances of slave life, and students will have opportunities to delve deeply into topics that are of particular interest to them.
Taught by: Williams
Course not offered every year
Also Offered As: HIST 274
Activity: Lecture
1 Course Unit
Notes: This course will also count as the AFRC 176 requirement for the AFRC major.

AFRC 280 Intermediate Swahili I
For BA Students: Language Course
Taught by: Mshomba
Course usually offered in fall term
Also Offered As: AFST 280, AFST 582
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 281 Topics in African American Literature
In this advanced seminar, students will be introduced to a variety of approaches to African American literatures, and to a wide spectrum of methodologies and ideological postures (for example, The Black Arts Movement). The course will present an assortment of emphases, some of them focused on geography (for example, the Harlem Renaissance), others focused on genre (autobiography, poetry or drama), the politics of gender and class, or a particular grouping of authors. Previous versions of this course have included "African American Autobiography," "Backgrounds of African American Literature," "The Black Narrative" (beginning with eighteenth century slave narratives and working toward contemporary literature), as well as seminars on urban spaces, jazz, migration, oral narratives, black Christianity, and African-American music. See Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Beavers, Davis, Jackson, Tillet
Course not offered every year
Also Offered As: ENGL 281
Activity: Seminar
1 Course Unit
Notes: Spaces will be reserved for English Majors.

AFRC 282 Intermediate Swahili II
For BA Students: Last Language Course
Taught by: Mshomba
Course usually offered in spring term
Also Offered As: AFST 281, AFST 583
Prerequisites: Intermediate Swahili 1, or permission of Instructor.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 284 Advanced Swahili I
This is an advanced Kiswahili course which will engage learners in extended spoken and written discourse. Advanced learners of Kiswahili will listen to, read about, write, and speak on authentic video materials, contemporary novels, and newspapers. They will also participate in various discussions on cultural and political issues.
For BA Students: Advanced Language Course
Taught by: Mshomba
One-term course offered either term
Also Offered As: AFST 284, AFST 584
Prerequisites: AFST 280, LING 280, AFRC280 or permission of Instructor.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 285 Advanced Swahili II
For BA Students: Advanced Language Course
Taught by: Mshomba
Course usually offered in spring term
Also Offered As: AFST 285, AFST 586
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center
AFRC 294 Facing America
This course explores the visual history of race in the United States as both self-fashioning and cultural mythology by examining the ways that conceptions of Native American, Latino, and Asian identity, alongside ideas of Blackness and Whiteness, have combined to create the various cultural ideologies of class, gender, and sexuality that remain evident in historical visual and material culture. We will also investigate the ways that these creations have subsequently helped to launch new visual entertainments, including museum spectacles, blackface minstrelsy, and early film, from the colonial period through the 1940s.
Taught by: Shaw
Course not offered every year
Also Offered As: ARTH 274, ARTH 674, ASAM 294, CIMS 293
Activity: Lecture
1 Course Unit

AFRC 303 Undergraduate Seminar
Topic varies. This course is cross-listed with ARTH 301 (Undergraduate Seminar) when the subject matter is related to African, African American, or other African Diaspora issues. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Shaw
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: This course is cross-listed with RELS 310 (Religious Diversity in America) when the subject matter is related to African, African American, or other African Diaspora issues. A recent topic is Religious Diversity and Social Change in West Philadelphia.

AFRC 307 Race, Science and Justice
This course draws on an interdisciplinary body of biological and social scientific literature to explore critically the connections between race, science, and justice in the United States, including scientific theories of racial inequality, from the eighteenth century to the genomic age. After investigating varying concepts of race, as well as their uses in eugenics, criminology, anthropology, sociology, neuroscience, and medicine, we will focus on the recent expansion of genomic research and technologies that treat race as a biological category that can be identified at the molecular level, including race-specific pharmaceuticals, commercial ancestry testing, and racial profiling with DNA forensics. We will discuss the significance of scientific investigations of racial difference for advancing racial justice in the United States.
Taught by: Roberts
One-term course offered either term
Also Offered As: SOCI 307
Activity: Lecture
1 Course Unit

AFRC 308 Religious Diversity in America
SPRING 2017 TOPIC: American Jesus - Images and beliefs about Jesus have always been a compelling part of American life. This course seeks to examine the social, political, religious and artistic ways that Jesus has been appropriated and used in American life, making him a unique figure for exploring American religious life. Special attention will be given to how Jesus is used to shape social and political concerns, including race, gender, sexuality, and culture. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Butler
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: This course is cross-listed with RELS 310 (Religious Diversity in America) when the subject matter is related to African, African American, or other African Diaspora issues. A recent topic is Religious Diversity and Social Change in West Philadelphia.

AFRC 310 Sustainable Development in Ghana
This course is mandatory for students participating in the International Development Summer Institute (IDSI). IDSI is a service learning and training program for undergraduates that provides students with the opportunity to have an applied learning and cultural experience in Ghana. The program consists of 5 weeks of pre-program preparation at Penn and a 4-week long training program on the campus of Kwame Nkrumah University of Science and Technology (KNUST) in Kumasi, Ghana. More Info: http://www.seas.upenn.edu/undergraduate/service-learn/idsi/index.php
Course usually offered in fall term
Prerequisite: Participation in the International Development Summer Institute (IDSI)
Activity: Seminar
1 Course Unit

AFRC 315 Africa, Decolonization, and Internationalism
In 1955, delegates from the Gold Coast, which would soon become the independent nation of Ghana, attended the first large-scale Afro-Asian conference alongside representatives from Indonesia, India, China, and other nations. The Bandung Conference is just one example of the importance of international linkages in the era of decolonization. This course will address decolonization in Africa within an international context and examine how African nationalism was forged in an interconnected world. Students will learn how African political thinkers engaged with, contributed to, and were shaped by intercontinental currents of thought, including Pan-Africanism, Pan-Arabism, communism, socialism, and the Non-Aligned Movement.
Taught by: Weitzberg
Course usually offered in spring term
Activity: Lecture
1 Course Unit
AFRC 320 Transoceanic Encounters: East Africa and the Indian Ocean
East Africa has been linked culturally, economically, and politically to the wider Indian Ocean world for centuries. In historical scholarship, the Indian Ocean is often portrayed in overly romanticized terms as a hybrid, cosmopolitan space. This course, which brings together some of the best work on East Africa and the Indian Ocean, will provide a more nuanced view of the region. By critically examining a variety of primary and secondary sources (including novels, photography exhibits, music, and historical texts), students will learn about the legacies of slavery, conquest, and inequality as well as the ways in which the region became a space of multicultural exchange and intercontinental interaction. We will explore the idea of African diasporas in their plurality and examine whether the theoretical tools used to study the Atlantic World can be applied to the Indian Ocean.

Taught by: Weitzberg
Course usually offered in spring term
Also Offered As: HIST 374
Activity: Lecture
1 Course Unit

AFRC 321 Understanding African Conflict
The end of colonial rule was the spring board for the start of cold wars in various regions of Africa. Where peace could not be maintained violence erupted. Even where secession has been attained, as in the new country of South Sudan, the threat of civil war lingers. While domestic politics have led to the rise of armed conflicts and civil wars in many African countries, the external factors should also not be ignored. Important in all current conflicts is the concern to international peace and security. Overall this course will: (1) investigate the general nature of armed conflicts in Africa (2) provide in-depth analysis of the underlining factors (3) and discuss the regional and the international responses to these conflicts and their implications. Special emphasis will be placed upon African conflicts and civil wars in: great Lakes area, Mali, Nigeria, Senegal, Sudan, Somalia, South Sudan, and Uganda.

Taught by: Ali-Dinar
Course usually offered in fall term
Activity: Seminar
1 Course Unit

AFRC 322 AMERICAN SLAVERY AND THE LAW
In this course, we will work both chronologically and thematically to examine laws, constitutional provisions, and local and federal court decisions that established, regulated, and perpetuated slavery in the American colonies and states. We will concern ourselves both with change over time in the construction and application of the law, and the persistence of the desire to control and subjugate enslaved people. Our work will include engagement with secondary sources as well as immersion in the actual legal documents. Students will spend some time working with Mississippi murder cases from the 19th century. They will decipher and transcribe handwritten trial transcripts, and will historicize and analyze the cases with attention to procedural due process as well as what the testimony can tell us about the social history of the counties in which the murders occurred. The course will end with an examination of Black Codes that southern states enacted when slavery ended.

Taught by: WILLIAMS
Course usually offered in spring term
Also Offered As: HIST 322
Activity: Seminar
1 Course Unit

AFRC 324 Dress and Fashion in Africa
Throughout Africa, social and cultural identities of ethnicity, gender, generation, rank and status were conveyed in a range of personal ornamentation that reflects the variation of African cultures. The meaning of one particular item of clothing can transform completely when moved across time and space. As one of many forms of expressive culture, dress shape and give forms to social bodies. In the study of dress and fashion, we could note two distinct broad approaches, the historical and the anthropological. While the former focuses on fashion as a western system that shifted across time and space, and linked with capitalism and western modernity; the latter approach defines dress as an assemblage of modification the body. The Africanist proponents of this anthropological approach insisted that fashion is not a dress system specific to the west and not tied with the rise of capitalism. This course will focus on studying the history of African dress by discussing the forces that have impacted and influenced it overtime, such as socio-economic, colonialism, religion, aesthetics, politics, globalization, and popular culture. The course will also discuss the significance of the different contexts that impacted the choices of what constitute an appropriate attire for distinct situations. African dress in this context is not a fixed relic from the past, but a live cultural item that is influenced by the surrounding forces.

Taught by: Ali-Dinar
Course usually offered in spring term
Also Offered As: ANTH 342, ARTH 324
Activity: Lecture
1 Course Unit

AFRC 325 Performance in the African Diaspora
The purpose of this course is to engage students in the rigorous process of mining experiences for material that can be transformed into a public performance piece. In-class writing, group discussions, and field work in the Philadelphia area. AUGUST WILSON AND BEYOND. The people need to know the story. See how they fit into it. See what part they play. - August Wilson, King Hedley II. In this seminar, students will read groundbreaking playwright August Wilson's 20th Century Cycle: ten plays that form an iconic picture of African American traumas, triumphs, and traditions through the decades, told through the lens of Pittsburgh's Hill District neighborhood. Other readings include supporting material on Wilson's work and African American theatre, the works of contemporary playwrights whom Wilson has influenced (such as Suzan-Lori Parks and Tarell Alvin McCraney), and context on Penn's relationship with West Philadelphia. As an Academically Based Community Service (ABCS) course, this seminar gives students the opportunity to enhance their understanding of the plays, and history and culture that shaped them, by forming meaningful relationships with West Philadelphia residents. Wilson's plays provide the bridge between the two groups. The course culminates with students writing an original theatre piece inspired by the readings and relationships, which they will share at an end-of-semester performance.

AFRC 326 Theories in Gender and Sexuality Studies  
FALL 2015: QUEER VALUES - What are queer cultural experiences and values? Many academics and social movements have noted that the radical aspirations of queer theory and activism not only disrupt but also shore up neoliberal ideologies. In this course students will explore the historical co-emergence of queer cultures and neoliberalism by examining the promises and pitfalls of queer politics over the past quarter century. The coining of queer theory by Theresa de Lauretis in 1990 was intended as a disruptive joke. Its provocation resided in joining queer, an appropriation of street slang bandied about among New York City activists and artists in the 1980s, to theory, the passport of privilege in academic life. The irreverence of her joke exemplifies a central ethic of queer experience that renders palpable the tensions between margins and centers. The course will traverse scholarship from economic and queer anthropology, history, sociology & science studies, philosophy, political theory and literary studies. This wide survey of literature will allow students to develop an understanding of the political and economic processes that have conditioned the emergence of queerness as a diverse range of ethical commitments in particular sociocultural contexts globally. Students will investigate the affective dimensions of the emergence of queer theory, studies and activism within the United States and elsewhere in the context of global neoliberal social reforms. The course is split into four units: 1) In the Place of Queer Origins; 2) Queer Values; 3) Queer Circulations and Subjectivities; and 4) Queer Temporalities. 
Taught by: Keirbeck  
Course usually offered in fall term

AFRC 335 "Where My Girls At?": African American Women Performers in The 20th Century  
African American women performers from blues woman Bessie Smith to Paris revue star Josephine Baker, from jazz darling Billie Holiday to rock legend Tina Turner, and from hip hop giant Lauryn Hill to millennial star Beyoncé, have constantly redefined and expanded American popular music. Using the long 20th century as our historical marker, this course will explore how African American women performers, across genres and time, have consciously and sometimes contradictorily navigated the racial and sexual limits of American popular culture in order to assert their own particular narratives of artistic and political freedom.

AFRC 345 Race and Sex in Early America  
This course explores the lost worlds of sinners, witches, sexual offenders, rebellious slaves, and Native American prophets from the seventeenth to nineteenth centuries. Using the life stories of unusual individuals from the past, we try to make sense of their contentious relationships with their societies. By following the careers of the trouble-makers, the criminals, and the rebels, we also learn about the foundations of social order and the impulse to reform that rocked American society during the nineteenth century.

Activity: Lecture  
0 Course Units

AFRC 346 Gender in Modern American History  
This course explores how immigration, industrialization, racial segregation, and the growing authority of science transformed the fundamental conditions of women's lives in the late nineteenth and early twentieth centuries. Building on previous efforts by female reformers to perfect society, women at the turn of the century organized large social movements dedicated to improving the lives of women and children and gaining public access to political power. We will examine the fruits of this activism as well as the consequences of subsequent events for the rise of several important social movements in the latter half of the century -- including civil rights, women's liberation, and gay rights -- in which women played a vital role. The course concludes with an assessment of feminism in the present day, with special emphasis on the responses of younger women to its legacy.

AFRC 372 Africa & the Mid-East  
This seminar will explore the historical relationship between these two regions from the early modern age to the present. We will examine the history of trade, particularly the slave trade, and its cultural and political legacy. We will compare the experiences of European imperialism--how the scramble for Africa dovetailed with the last decades of the Ottoman Empire--with an eye to how this shaped nationalist movements in both regions. The course will also explore the decades of independence with a special eye towards pan-Africanism and pan-Arabism. We will also study the ramifications of the Arab-Israeli conflict on the relationship between African and Middle-Eastern countries, from Uganda to Ethiopia, from OPEC to Darfur. This course will pay close attention to migrations through the regions, whether forced or economic or religious. Whenever possible we will explore, through film and literature, how people in Africa and the Middle East see their connections, and their differences. 
Taught by: Eve Troutt Powell, Young  
One-term course offered either term  
Also Offered As: AFST 373, HIST 371, HIST 412  
Activity: Seminar  
1 Course Unit
AFRC 381 Topics in African American Literature
In this advanced seminar, students will be introduced to a variety of approaches to African American literatures, and to a wide spectrum of methodologies and ideological postures (for example, The Black Arts Movement). The course will present an assortment of emphases, some of them focused on geography (for example, The Harlem Renaissance), others focused on genre (autobiography, poetry or drama), the politics of gender and class, or a particular grouping of authors. Previous versions of this course have included "African American Autobiography," "Backgrounds of African American Literatures," "The Black Narrative" (beginning with eighteenth century slave narratives and working toward contemporary literature), as well as seminars on urban spaces, jazz, migration, oral narratives, black Christianity, and African-American music. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.

Notes: Benjamin Franklin Seminar

AFRC 387 Topics in Africana Studies
Topics vary: Black Feminist Approaches to History & Memory - The term black feminism emerged in public discourse amid the social, political, and cultural turbulence of the 1960s. The roots of black feminism, however, are much older, easily reaching back to the work of black women abolitionists and social critics of the nineteenth century. The concept continued to grow and evolve in the work of twentieth century black women writers, journalists, activists, and educators as they sought to document black women's lives. Collectively, their work established black feminism as a political practice dedicated to the equality of all people. More recently, black feminism has been deployed as a tool for theoretical and scholarly analysis that is characterized by an understanding that race, class, gender, and sexuality are inextricably interconnected. Using materials such as slave narratives, social criticism, and archival sources, this course will explore the theoretical and practical applications of black feminist thought in nineteenth and twentieth century North American culture and politics. In particular, we will consider the symbols and practices (storytelling, myth-making, art, archival research) that black women use to document lives. We will ask: how do these methods of documentation inform our understanding of the past and the production of historical knowledge? How can we understand black feminism as both theory and practice? And what are the implications of black feminist approaches for current research and scholarship? We will give particular attention to concepts such as gender, race, memory, the archive, and embodied knowledge to complicate our understanding of historical documentation, epistemology, and authenticity. The course material will include scholarship by Harriet Jacobs, Audre Lorde, Saidiya Hartman, Hazel Carby, Hershey Young, Evelyn Brooks Higginbotham, Toni Morrison, and others. AFRC 400 Seminar in Africana Studies
This course is an examination and analysis of the changing images and achievements of African Americans in motion pictures and television. The first half of the course focuses on African-American film images from the early years of D.W. Griffith's "renegade bucks" in The Birth of a Nation (1915); to the comic servants played by Steppin Fetchit, Hattie McDaniel, and others during the Depression era; to the post-World War II New Negro heroes and heroines of Pinky (1949) and The Defiant Ones (1958); to the rise of the new movement of African American directors such as Spike Lee (Do the Right Thing), Julie Dash (Daughters of the Dust), Charles Burnett, (To Sleep With Anger) and John Singleton (Boyz N the Hood). The second half explores television images from the early sitcoms "Amos 'n Andy" and "Beulah" to the "Cosby Show," "Fresh Prince of Bel Air" and "Martin." Foremost this course will examine Black stereotypes in American films and television—and the manner in which those stereotypes have reflected national attitudes and outlooks during various historical periods. The in-class screenings and discussions will include such films as Show Boat (1936), the independently produced "race movies" of the 1930s and 1940s, Cabin in the Sky (1943), The Defiant Ones (1958), Imitation of Life (the 1959 remake) & Super Fly (1972).

1 Course Unit
AFRC 433 Social Movement
Social movements and political protest have become some of the most effective tools for citizens and non-citizens to influence the political system. This course is designed to introduce students to the theoretical and methodological approaches taken in understanding these behaviors. Analyzing social movements that range from civil discontent to contentious political protest, the course will address a variety of questions: What is the origin of movement behavior and why do individuals turn to these actions in lieu of simply engaging in institutional modes of political action such as voting? What were the strategies of these movements? What are the political conditions that allow social movements to resonate with the American public? In addition to addressing these topics, this course surveys the policy successes of major social and political movements. From the Civil Rights and Women’s Right Movement to the recent 2010 Tea Party movement, this course explores the various public policies that have resulted from citizens’ protest actions. While state-level and local-level government responsiveness will be addressed, special attention will be given to how political protest influences public policy in all three branches of the federal government.

AFRC 437 Race & Criminal Justice
This seminar analyzes the connection between race, crime, punishment, and politics in the United States. The primary focus is on the role of race in explaining why the country's prison population exploded since the early 1970s and why the United States today has the highest incarceration rate in the world. Topics to be covered include: the early history of race in the development of the criminal justice system, including an examination of lynchings and the convict-leasing system; the relationship between the crime rate, patterns of offending and arrests, and the incarceration rate; public opinion and "law-and-order" politics; U.S. penal policies compared with other industrialized countries; capital punishment; the growth of the prison-industrial complex; the "war on drugs"; the courts, prisoners' rights, and political prisoners; felon disenfranchisement, elections, and democracy; and the future of penal reform. The class will take field trips to a maximum-security jail in Philadelphia and to a state prison in the Philadelphia suburbs. This seminar is intended for both advanced undergraduates and graduate students.

AFRC 450 Black France: History and Representations
This class will focus on the rich history of the African, African-American and Caribbean presence in France. The seminar will enable students to gain a better understanding of the multifarious connections that have historically not only shaped national identities, but also served to establish the Black Atlantic as a site of cultural exchange and subject formation, particularly as pertains to the period extending from the end of the nineteenth-century to the present time. In particular, we will look at individual and collective migrations including World War soldiers, African-American expatriate writers and performers, Pan-African intellectuals, and workers from the former Empire. This will allow us to both document the historical significance of the various and complex contributions made by these select groups and people, and to examine the modalities of their representation within the evolving French society. Ultimately, the course is designed to investigate the idea of "blackness" from a European perspective, while relating it to wider debates about race and multiculturalism in a global context.

AFRC 480 Liberation and Ownership
Who is going to own what we all have a part of creating? The history of the Americas, and of all peoples everywhere, is an evolving answer to the question of ownership. Ownership is about: the ties that bind and those that separate; the creation of community and the imposition of hierarchies; the dream of home ownership and ecological despoliation; dependency and the slave yearning to breathe free. Of all the issues relevant to democracy, oppression, and economic injustice, ownership is arguably the most important and least understood. Utilizing a variety of disciplinary perspectives, and by focusing on particular global sites, students will assess and refine their views regarding ownership in light of their own social, political, religious, and/or ethical commitments.

AFRC 527 Advanced Seminars in Africana Studies
SPRING 2017: Market Women, Madames, Mistresses & Mother Superior studies gender, labor, sexuality, and race in the Caribbean. In our historical examination of primary source documents alongside literature, and popular media, we will question some of the iconic representations of Caribbean and Latin American women in order to understand the meaning, purpose and usages of these women s bodies as objects of praise, possession, obsession and/or ridicule by communities, governments and religions within and outside of the region. Beginning in the late-18th century and ending with contemporary migration narratives, this course considers the relationship between slave society and colonial pasts on gender performance in the modern Caribbean, Latin America, and their diasporas.

AFRC 533 Advanced Selected Topics
This course is cross-listed when the subject matter is related to African, African American, or other African Diaspora issues. Courses recently offered are, "Political Culture and American Cities, Social Movements and Social Change, Critical Race Theory. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings. This course brings together the vantage points of urban political economy, history and urban anthropology. Readings and discussions will cross those literatures, folding in considerations of race, ethnicity and gender in the American city life, with a focus on the relation between culture and political economy. We will reconstruct the history of the different tracks of urban studies in the U.S., beginning with its roots in sociology and anthropology in the Chicago School and in political science in reform-oriented studies of public administration. We will revisit the community power debate of the 1950s-1970s, which shook out significantly along disciplinary lines, and will examine the development of the urban political economy perspective in the 1980s and 1990s, as well as developments within U.S. urban anthropology since the 1960s. We will employ local case study materials, and at every point we will try to understand the intellectual trajectories of the urbanist discourses in relation to dynamics contemporaneously shaping urban politics and policy. Course requirements are seminar preparation which includes each student's leading discussion around specified reading assignments – and a research paper, the topic of which must be approved by week 5.

Activity: Seminar
1 Course Unit
AFRC 570 Topics in Afro-American Literature

"To be a Negro in this country and to be relatively conscious" wrote James Baldwin "is to be in a state of rage almost all the time." While more attention has been paid to how other feelings like forgiveness or love have been the moral underpinnings to African American social movements, this class makes an effort to look at the history of and value this more difficult but equally important African American cultural expression of black rage, one that is often maligned as a destructive and subject to hyper-surveillance and suppression. We will take an interdisciplinary approach to understanding this phenomenon by looking at the discourse surrounding events, like Nat Turner's rebellions, Stonewall, the Attica Uprising, and Black Lives Matter, historicize the construction of "black rage" as a medical disorder and legal defense, study its offshoots, like "protest psychosis" and the "Angry Black Woman," and examine how artists as vast as Richard Wright, Nina Simone, Alice Walker, Glen Ligon, Public Enemy, Kara Walker, and Solange have explored it as a site of black resistance. Focusing on one of the most misunderstood African American political emotions -- black rage -- this course will examine how artists have steadily moved it from the margins of black life into the mainstream in American culture.

Activity: Seminar
1 Course Unit

AFRC 587 Race, Nation, Empire

This graduate seminar examines the dynamic relationships among empires, nations and states; colonial and post-colonial policies; and anti-colonial strategies within a changing global context. Using the rubrics of anthropology, history, cultural studies, and social theory, we will explore the intimacies of subject formation within imperial contexts- past and present- especially in relation to ideas about race and belonging. We will focus on how belonging and participation have been defined in particular locales, as well as how these notions have been socialized through a variety of institutional contexts. Finally, we will consider the relationships between popular culture and state formation, examining these as dialectical struggles for hegemony.

AFRC 591 Francophone Postcolonial Studies

SPRING 2016: This seminar will introduce key authors and issues in Francophone studies through texts that specifically focus on various experiences of war in colonial and postcolonial contexts. Significantly, the first piece of fiction by an African author may well be Bakary Diallo's Force Bonte, (1926), the autobiographical story of a WWI Senegalese Tirailleur, physically deformed by his war experience and trying to through his writing. While Force Bonte is unique as an early piece, similar narratives have not ceased to proliferate in French and Francophone fiction. Indeed, writers from all over the former French Empire have repeatedly offered fictional accounts of colonial subjects' involvement in European wars, and especially WWII, with various degrees of ambivalence. As conflicts and genocides continue, the experience of war fuels a new wave of Francophone accounts at the turn of the twenty-first century. We will use an extensive diachronically and synchronically developed reading (and viewing) list of texts and films from Senegal, Congo, Rwanda, Guinea, Algeria, Martinique, Mauritius, and (Metropolitan) France from the 1920s to 2014. Using this material as the basis for our exploration we will address several questions: What are some of the important tropes deployed in these narratives and how do they relate to broader issues concerning colonial and postcolonial violence? How do the wars of others (e.g. WWI and WWII) complicate the experience of war and questions of engagement and solidarity? How do such experiences lay the groundwork for other wars, of liberation, for example? Finally how does war impact the articulation of memory, survival and writing in colonial contexts, in the postcolony, and in the European Metropole? Primary texts in French. Class discussion in French or English.

Activity: Seminar
1 Course Unit
Notes: An introduction to major literary movements and authors from five areas of Francophonie: the Maghreb, West Africa, Central Africa, the Caribbean and Quebec.
AFRC 594 POST-COLONIALISM LITERATURE
Writing in 2001, literary critic Jahan Ramazani introduced his study The Hybrid Muse by noting that unlike authors of fiction, the achievements of postcolonial poets have been strangely neglected. In this course we will consider whether and why that may be changing, focusing on Africana poets from the Caribbean and Africa. We will begin by considering Isidore Okpewho s influential study of oral poetry and myth in Africa, and then move chronologically through a set of weekly readings likely to include Nicolas Guillen (Cuba), Aime Cesaire (Martinique), Leopold Senghor (Senegal), Okpot Bitek (Uganda), Chris Okigbo (Nigeria), Kofi Awoonor (Ghana), Kamau Braithwaite (Trinidad), Derek Walcott (St. Lucia), David Dabydeen (Guyana/UK), Dionne Brand (Trinidad/Canada), Julia de Burgos (Puerto Rico), M. NourbeSe Philip (Tobago/Canada) and Chris Abani (Nigeria/US). Among the broad questions we will consider are why women s voices appear to be underrepresented, how oral poetic traditions and translation inflect this body of work, the grounds of comparison across African and Caribbean spaces, and the particular contributions of poets who are also critics. The reading list may be adjusted to address interests of seminar members, and prospective students are welcome to send suggestions for particular authors, readings, or units to Tsitsi Jaji. This is an introductory-level graduate class, open to advanced undergraduate majors by permission. No particular background knowledge is expected. Assignments will consist of weekly response papers, an in-class presentation, and a choice of a final conference-style paper (10-12pp) or syllabus.

1 Course Unit

AFRC 610 Topics in American History
This course is cross-listed with HIST 610 (Colloquium in American History) when the subject matter is related to African American, African, or other African Diaspora issues. See the Africana Studies Department's website at https://africana.sas.upenn.edu/ for a description of the current offerings.
Taught by: Savage
Course usually offered in fall term
Also Offered As: HIST 610
Activity: Seminar
1 Course Unit

AFRC 617 Theories of Racial and Ethnic Differentiation
This course provides an overview of prominent theories of race and ethnicity, and is concerned with 1) Understanding the nature and persistence of race and ethnicity as meaningful social groupings in contemporary American society, and 2) Explaining the social significance of these group identities—that is, how these groupings are related to social stratification, to socio-cultural relations, and to the political and economic dynamics in American society. Special attention will also be given to such topics as immigration and the intersection of gender, race, and class.
Taught by: Charles
Course not offered every year
Also Offered As: SOCI 617
Activity: Seminar
1 Course Unit

AFRC 630 Advanced Special Topics in Sociology
DEMOGRAPHY OF RACE: This course examine demographic and statistical methods used to capture of impact of racial stratification in society. This course covers the skills and insights used by demographers and social statisticians in the study of racial data. A key challenge facing researchers is the interpretation of the vast amount of racial data generated by society. As these data do not directly answer important social questions, data analysis and statistics must be used to interpret them. The course will examine the logic used to communicate statistical results from racial data in various societies. We will question the scientific claims of social science methodology by extending the critical perspective to biases that may underlie research methods. We will discuss good practices within the context of the historical development of the methods.
Taught by: Zuberi
One-term course offered either term
Also Offered As: AFRC 431, DEMG 630, SOCI 430, SOCI 630
Activity: Seminar
1 Course Unit
Notes: This course is cross-listed with SOCI 630 (Advanced Topics in Sociology) when the subject matter is related to African American or other African Diaspora issues. A frequent topic of this course is "Race, Colonialism and Methods"

AFRC 638 Race and Criminal Justice
This advanced seminar analyzes the connection between race, crime, punishment, and politics in the United States. The primary focus is on the role of race in explaining why the country's prison population increased six-fold since the early 1970s and why the United States today has the highest incarceration rate in the world. Topics to be covered include: the early history of race in the development of the criminal justice system, including an examination of lynchings and the convict-leasing system; the relationship between the crime rate, patterns of offending and arrests, and the incarceration rate; public opinion and law-and-order politics; U.S. penal policies compared with other industrialized countries; capital punishment; the growth of the prison-industrial complex; the "war on drugs"; the courts, prisoners’ rights, and political prisoners; felon disenfranchisement, elections, and democracy; and the future of penal reform. This seminar is designed for advanced undergraduates, as well as graduate students. The readings and assignments will be adjusted accordingly for graduate students. The class will likely take field trips to a maximum-security jail in Philadelphia and to a state prison in the Philadelphia suburbs.
Taught by: Gottschalk
Course not offered every year
Also Offered As: AFRC 437, PSCI 437, PSCI 638
Activity: Seminar
1 Course Unit

AFRC 640 Proseminar in Africana Studies
This course focuses on the historical and cultural relationship between Africans and their descendants abroad.
Taught by: Beavers, Butler, Charles, Rommen, Savage, Thomas, Williams, Zuberi
Two terms. student must enter first term.
Also Offered As: ANTH 640, COMM 740, MUSC 705, RELS 617
Activity: Seminar
1 Course Unit
AFRC 641 Topics in African American History
Topics vary. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.

Course usually offered in spring term
Also Offered As: HIST 641
Activity: Seminar
1 Course Unit

AFRC 645 Graduate Research Seminar
SPRING 2017: This seminar is suitable for graduate students in any discipline in which historical research may be relevant. We will work with both secondary and primary sources, and students will have the opportunity to visit and undertake research in an archive.
Taught by: Williams
One-term course offered either term
Also Offered As: HIST 645
Activity: Seminar
1 Course Unit

AFRC 650 Topics in African History
Reading and discussion course on selected topics in African history.
Taught by: Babou, Cassanelli
Also Offered As: AFST 650, HIST 650
Activity: Seminar
1 Course Unit

AFRC 650 Topics in Trans Regional History
Reading and discussion course on selected topics in Transregional History. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.
Comparative Slavery and Emancipation: What do historians gain by approaching the past with an awareness of the body as a material and historically contingent entity? In this course we consider several different ways of imagining historical bodies and the body in history. Our readings will explore how events and new social, racial, economic and political formations influence how contemporaries imagined and described bodies and their capacities. We will also explore whether the body itself might be a dynamic source of historical change. Among the topics we will discuss are: medical theories about bodies, epidemics and their impact; sensory capacities; capacities for physical labor; cultures of violence; reproductive capacities and politics; coerced migration; fashion, beauty, and grace; and the state's interest in mobilizing bodies to serve imperial, economic, and military agendas. This course complements but does not duplicate "Race and Gender in Comparative Perspective" offered in Spring 2012. It is an intensive readings course with written assignments: short papers throughout the semester and a synthetic final paper.
Taught by: Brown
One-term course offered either term
Also Offered As: ARTH 501, GSWS 670, HIST 670
Activity: Seminar
1 Course Unit

AFRC 705 Seminar in Ethnomusicology
This course is cross-listed with MUSC 705 (Seminar in Ethnomusicology) when the subject matter is related to African, African American, or other African Diaspora issues. Recent courses offered include "Reading Women in Jazz," "Popular Music and the Ethics of Style in the Caribbean," "Music and Tourism in the Caribbean," and "Imagining Africa Musically." See the Africana Studies Department's course list at https://africana.sas.upenn.edu for a description of the current offering.
Taught by: Muller, Rommen
Course usually offered in fall term
Also Offered As: AFST 705, ANTH 705, FOLK 715, MUSC 705

AFRC 706 Introduction to Africa and African Diaspora Thought
This course examines the processes by which African peoples have established epistemological, cosmological, and religious systems both prior to and after the institution of Western slavery.
One-term course offered either term
Activity: Seminar
1 Course Unit

AFRC 708 Cultural and Literary Theory of Africa and the African Diaspora
This course introduces students to the theoretical strategies underlying the construction of coherent communities and systems of representation and how those strategies influence the uses of expressive culture over time. Topics vary. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.
One-term course offered either term
Also Offered As: COML 708, ENGL 775, FREN 700
Activity: Seminar
1 Course Unit

AFRC 710 Political Economy and Social History of Africa and the African Diaspora
This course provides the opportunity for students to investigate the relationship between the emergence of African peoples as historical subjects and their location within specific geopolitical and economic circumstances. Topics vary. FALL 2017: FASCISM AND RACISM: A LOVE STORY- What is the relationship between fascism and racism in modern politics, and how have black political thinkers and organizations understood this relationship? This graduate level course is designed to familiarize students with the historical and contemporary literature on fascism as a phenomena of modern politics, and the importance of racial politics and ideologies to its constitution. Students will become familiar with the contributions of Black political actors, organizations and thinkers in Europe, Africa, Asia and the New World to fascism's defeat in the 1920's and 1930's, as well as more contemporary efforts to curb more contemporary fascist movements, regimes and aesthetics in late modernity. Antonio Gramsci, Robert Paxton, Michael Mann, C.L.R. James, George Padmore, Aime Cesaire, Suzanne Cesaire and Hannah Arendt are among the thinkers, theorists and activists students will encounter in this course. The overarching aim of his course is to identify fascism in both historical and contemporary contexts as a very specific form of political organization and rule, and its interrelationship with racism, nationalism and xenophobia.
Taught by: Hanchard, Zuberi
Two terms. student must enter first term.
Also Offered As: COML 710, HIST 710, LALS 710, PSCI 711, SOCI 702
Activity: Seminar
1 Course Unit
AFRC 712 Comprehensive School Reform as Applied Public Policy
This course examines how K-12 education policy is designed and implemented in the United States. It uses a systems analysis as the framework for looking at who makes what kinds of demands on the education policy system, how these demands are placed on the policy agenda, the decision making process, and resulting education policies and policy outcomes. The course pays particular attention to the roles of federal, state and local governments in education policy, and the impact of our intergovernmental system on the design and implementation of policy. Students will also examine major education policies and debate key education policy issues that arise at each level of government.
Taught by: Hershberg

Ancient History (ANCH)

ANCH 025 Ancient Middle Eastern History and Civilization
A cultural history of Middle Eastern civilization from the invention of writing to the rise of Islam.
For BA Students: History and Tradition Sector
Course usually offered in fall term
Also Offered As: HIST 024, NELC 101
Activity: Lecture
2 Course Units
ANCH 026 Ancient Greece
The Greeks enjoy a special place in the construction of western culture and identity, and yet many of us have only the vaguest notion of what their culture was like. A few Greek myths at bedtime when we are kids, maybe a Greek tragedy like Sophokles’ Oidipous when we are at school: these are often the only contact we have with the world of the ancient Mediterranean. The story of the Greeks, however, deserves a wider audience, because so much of what we esteem in our own culture derives from them: democracy, epic poetry, lyric poetry, tragedy, history writing, philosophy, aesthetic taste, all of these and many other features of cultural life enter the West from Greece. The oracle of Apollo at Delphi had inscribed over the temple, “Know Thyself.” For us, that also means knowing the Greeks. We will cover the period from the Late Bronze Age, c. 1500 BC, down to the time of Alexander the Great, concentrating on the two hundred year interval from 600-400 BC.
For BA Students: History and Tradition Sector
Taught by: McInerney
Course usually offered in fall term
Also Offered As: CLST 026, HIST 026
Activity: Lecture
1 Course Unit

ANCH 027 Ancient Rome
The Roman Empire was one of the few great world states—one that unified a large area around the Mediterranean Sea—an area never subsequently united as part of a single state. Whereas the great achievements of the Greeks were in the realm of ideas and concepts (democracy, philosophy, art, literature, drama) those of the Romans tended to be in the pragmatic spheres of ruling and controlling subject peoples and integrating them under the aegis of an imperial state. Conquest, warfare, administration, and law making were the great successes of the Roman state. We will look at this process from its inception and trace the formation of Rome’s Mediterranean empire over the last three centuries BC; we shall then consider the social, economic and political consequences of this great achievement, especially the great political transition from the Republic (rule by the Senate) to the Principate (rule by emperors). We shall also consider limitations to Roman power and various types of challenges, military, cultural, and religious, to the hegemony of the Roman state. Finally, we shall try to understand the process of the development of a distinctive Roman culture from the emergence new forms of literature, like satire, to the gladiatorial arena as typical elements that contributed to a Roman social order.
For BA Students: History and Tradition Sector
Taught by: Cam Grey
Course usually offered in spring term
Also Offered As: CLST 027, HIST 027
Activity: Lecture
1 Course Unit

ANCH 046 Myths and Religions of the Ancient World
This course will survey the religions of the ancient Middle East, situating each in its historical and socio-cultural context and focusing on the key issues of concern to humanity: creation, birth, the place of humans in the order of the universe, death, and destruction. The course will cover not only the better-known cultures from the area, such as Egypt and Mesopotamia, but also some lesser-known traditions, such as those of the Hurrians, or of the ancient Mediterranean town of Ugarit. Religion will not be viewed merely as a separate, sealed-off element of the ancient societies, but rather as an element in various cultural contexts, for example, the relationship between religion and magic and the role of religion in politics will be recurring topics in the survey. Background readings for the lectures will be drawn not only from the modern scholarly literature, but also from the words of the ancients themselves in the form of their myths, rituals, and liturgies.
For BA Students: History and Tradition Sector
Taught by: Frame
Course usually offered in spring term
Also Offered As: RELS 014
Activity: Lecture
1 Course Unit

ANCH 133 The History of God
This course introduces the history of God as understood by modern scholars of religion. Why do people believe in gods in the first place? How is the God of the Old Testament different from earlier Near Eastern deities, or different from God as represented in the New Testament and the Quran? When and why did people come to question the existence of God, and how has the idea of God changed in the last century in light of experiences like the Holocaust, social movements like feminism, and the rise of new technologies like the Internet? The course will address these questions as it surveys the approaches scholars have developed to comprehend the history of a being who would seem beyond human comprehension.
Taught by: Steve Weitzman
Also Offered As: JWST 132, RELS 132
Activity: Seminar
1 Course Unit

ANCH 146 Ancient Mediterranean Empires
What constituted an empire in antiquity and how was imperialism legitimized? Which measures were used to maintain and organize imperial power? How did foreign rule affect the daily life of people all over the Mediterranean? In this course we will discuss and compare ancient empires from Achaemenid Persia to Alexander the Great and the Hellenistic kingdoms of his successors to the emergence of Rome as one of the most successful and influential empires in world history. Topics that will be discussed include ancient ideas and concepts of imperial rule, patterns of political, economic and cultural power and their interrelations as well as imperial crises and local resistance. All texts will be discussed in translation. There are no prerequisites, although it would be useful to have some background in ancient history.
Taught by: Wilker
Course usually offered in fall term
Also Offered As: CLST 146
Activity: Lecture
1 Course Unit
ANCH 202 Cleopatra
Cleopatra VII (70/69 30 BCE) is one of the most famous women in world history. She has been remembered, admired, and reproached as a power-hungry Hellenistic queen, as the last pharaoh of Egypt, as a self-confident female ruler, and as the vicious seductress of Julius Caesar and Mark Antony. Her supposedly extravagant lifestyle, her political schemes, but also her integrity in choosing suicide over submission have inspired poets, artists, and historians from her own time to our modern world. In this seminar, we will take a closer look at some of the common perceptions and stereotypes that have shaped the image of Cleopatra for more than 2000 years. The main focus, however, will be on the historical queen, her biography, and the political and cultural contexts of her life. We will use ancient literary texts, papyri, inscriptions, coins, and archaeological evidence to analyze Cleopatra's rise to power, how she presented herself to her subjects and how she was perceived by others, as well as her role in the tumultuous events that led to the end of the Hellenistic period and the rise of imperial Rome under the rule of Augustus.

Taught by: Julia Wilker
Also Offered As: CLST 202
Activity: Lecture
1 Course Unit

ANCH 217 Periclean Athens
This class is devoted to the culture and history of Athens in the 5th century BC, the golden age of Greek culture. We will examine such topics as the growth of democracy, Athenian religion and the architectural embellishment of the Acropolis and the Agora. We will look at the development of Athenian drama and explore the relationship between Athenian democracy and naval power.

Taught by: James Ker
Course usually offered in spring term
Also Offered As: CLST 217
Activity: Seminar
1 Course Unit

ANCH 218 Augustan Cultural Revolution
The principate of Augustus is one of history's most decisive turning points, in that it brought about the transformation of the Roman Republic into an Empire. This political revolution depended on a cultural one, and Augustus used literary and artistic production not just as media of communication for the dissemination of favorable propaganda, but as a means of refashioning Roman culture. The result was that fundamental changes were made to seem natural and inevitable even as almost every aspect of political, social, and cultural life were decisively transformed. This course examines the phenomenon by considering closely the history and the literary and artistic production of the period.

Taught by: Farrell, Rose
Course not offered every year
Also Offered As: CLST 218
Activity: Lecture
1 Course Unit

ANCH 220 Near East in Hellenistic and Roman Times
In this course, we will study the history of the Hellenistic and Roman period from a Near Eastern perspective. From the conquests of Alexander the Great to the end of Roman rule in late antiquity, this region was the scene of conflicts, but also of peaceful and fruitful interactions between Greeks, Romans, Egyptians, Jews, Syrians, Arabs and many other societies. What was the impact of Greek and Roman rule and how did the inhabitants of the region react to these fundamental changes? On the other hand, how did they influence the culture and worldview of their conquerors? We will use historical texts, documents and archaeological evidence to discuss the political, cultural and religious encounters that made the Near East a key region of Greco-Roman history. All texts will be discussed in translation. No prerequisites, although it would be useful to have taken ANCH 026 and/or ANCH 027.

Taught by: Wilker
Course not offered every year
Also Offered As: NELC 284
Activity: Seminar

Notes: This course is taught exclusively in English

ANCH 275 The Roman Underbelly

Taught by: Cam Grey
Course not offered every year
Activity: Seminar
1 Course Unit

ANCH 301 Lies My Ancient History Teacher Told Me
The neat, comforting narratives that we construct of the histories of ancient Greece and Rome cover up a collection of controversies and debates that continue to rage in contemporary scholarship. Can we use the Homeric epics as sources of early Greek history? Who was responsible for the Peloponnesian War? How can we best explain Rome’s acquisition of empire? How new was the political revolution of Augustus? What were the main reasons for the rise of Christianity? In this course, we explore these and other controversies, focusing on both modern scholarship and the ancient sources. All texts will be discussed in translation. No prior knowledge of Ancient History is required, although it would be useful to have taken ANCH 026 and/or ANCH 027.

Taught by: Grey
Course not offered every year
Also Offered As: CLST 300
Activity: Seminar
1 Course Unit
ANCH 303 Power and Peril: The Paradox of Monarchy among Ancient Greeks, Romans, and Jews
We imagine Ancient Greece and Rome as the cradles of democracy and republicanism, the early Judea as pious theocracy, but the evidence tells us that monarchy was the most common and prevalent form of government in antiquity (and the premodern world in general). Despite their ubiquity, the King was a polarizing figure in reality and in conception. On the one hand, some idealized the monarchy as the ideal leader, and monarchy provided the language with which to describe and even imagine the very gods but on the other, monarchs were widely reviled in both theory and practice, from the Greek tyrant to biblical Saul. The Emperor Augustus loudly denied his own affinity to the office of king, even as he ruled alone and was revered as a god. In other words, kings stood both for the ideal ruler and the worst form of government. This class confronts the paradox of the King. This class will take a special look at the idea and institution of kingship in the Near East, among the Jews, Greeks, and Romans to assess and discuss similarities, differences, and mutual influences among these cultures. Through the lens of the king we will explore the idea of god, government, human frailty, and utopianism. Why did the rule of one prevail, why was it so attractive to so many? How was royal rule legitimized? What role did religious beliefs play for keeping a monarchical system stable? What did people expect from their rulers and what happened if the ruler failed to fulfill these expectations? How was the concept of monarchical rule adopted and transferred into other spheres, such as religious belief systems or hopes for messianic kingship? While kingship is a rich field of scholarly inquiry, the question of its ubiquity, and the entanglement and divergences of these three cultures is rarely studied in context and in comparison.
Taught by: Julia Wilker, Natalie Dohrmann
Also Offered As: CLST 323
Activity: Seminar
1 Course Unit

ANCH 305 Jewish Diaspora in the Roman Empire
Under the Roman Empire, Jewish communities developed and flourished especially in the cities of the Eastern Mediterranean, in Egypt, Syria, Asia Minor, Greece, Northern Africa, and Italy proper. In many of these cities, the Jews formed a considerable part of the population; they influenced the cultural, social, and political communal life and developed an identity that was distinctively different from that in Judea. In this seminar, we will trace Jewish life in the Diaspora under Roman rule. How did Jews and non-Jews interact? What was the legal status of Jewish communities under the Roman Empire? What caused conflicts and how were they solved? What can the history of Jewish Diaspora communities tell us about minorities in the Roman Empire in general? We will use literary texts, inscriptions, papyri, and archaeological material to answer these questions and many more.
Taught by: Julia Wilker
Also Offered As: JWST 305
Activity: Seminar
1 Course Unit

ANCH 311 Disasters in the Ancient World
Natural disasters occupy a powerful place in our imagination. Stories of floods, plagues, earthquakes and storms excite and horrify us, and communities mobilize their resources quickly in response to these events. In the ancient Mediterranean world, natural disasters could take on potent meaning, indicating the anger or disfavor of the gods, acting as warnings against certain courses of action, or confirmations of individuals’ fears or suspicions about the world in which they lived. In this course, we explore the evidence for some disasters in the ancient Mediterranean world, the ways in which contemporaries reacted to those disasters and interpreted their causes. This project is, of necessity, multidisciplinary, involving textual, archaeological, geological, and comparative materials and drawing on methodologies from history, political and archaeological science, and the emerging field of disaster studies. In the process, we will gain an appreciation of the social structures of communities in the period, the thought-world in which they operated, and the challenges and opportunities that attend a project of this sort. No prior knowledge of Ancient History is required, although it would be useful to have taken an introductory survey course. Texts will be discussed in translation.
Taught by: Grey&Ristvet
Course not offered every year
Also Offered As: ANTH 311, CLST 311
Activity: Seminar
1 Course Unit

ANCH 323 Greek World After Alexander the Great
This class is designed as a detailed investigation of the world created by Alexander the Great. We will cover the three hundred year period known as the Hellenistic Age from the career of Alexander the Great (354-323 BC) until the defeat of Antony and Cleopatra at the Battle of Actium (31 BC). This was a period during which the world of the Greeks underwent extraordinary and far-reaching changes, as Greek culture was established as far afield as northwestern India, central Asia and Egypt. In the same period kingdoms controlled by Alexander’s Successors used Greek culture to define their rule, establishing a Greek culture of the elite in regions which previously had been dominated by the Persians. As Greek and non-Greek worlds collided, a new interpretation of Greek culture emerged, giving rise, among other things, to universities and professional schools, state subsidized health care, triumphalist architecture, the heroization of the noble savage, and coinage with royal portraits, the deification of men and a multitude of other social, artistic and political forms familiar to us. It was an age of radical change, dislocation, as Greek populations colonized regions previously unknown to them.
Taught by: McInerney
Course not offered every year
Also Offered As: CLST 323
Activity: Lecture
1 Course Unit
ANCH 330 History of Macedonia
In this course, we will study the rise and development of Macedonia from a tiny kingdom on the northern fringes of the Greek world to one of the major powers of the region and beyond. Regarded by the Greeks as an at least semi-barbarian culture on the periphery, Macedonia became the dominant power in the Greek world during the fourth century BC and its king Alexander the Great set out to conquer the world. After his death, Macedonia was one of the Hellenistic kingdoms competing for power and influence in the Mediterranean until it finally came under Roman control. Topics that will be discussed include questions of ethnicity and identity, Macedonian kingship, culture and society (including the role of women) and the role of Macedonian traditions in the Hellenistic era in general. Special emphasis will be laid on the discussion of ancient texts and documents as well as archaeological evidence.

1 Course Unit

ANCH 545 Spatial Analysis of the Past
Humans continuously move through, interact with, and modify their spaces, leaving a palimpsest of human activity all around us. The ability for digital methods to deal with larger datasets, at higher accuracies, and at multiple scales, lends itself particularly well to the study of diachronic human-space interaction. In this class, we will examine space at a range of scales from landscapes, to urban settings, to archaeological contexts and architecture. We digitally represent space using a variety of 3d and 2d data types, from models of land surfaces and buildings, to multispectral satellite imagery and urban plans. We will first gain experience creating, gathering, and manipulating spatial datasets in preparation for analysis. We will next practice a variety of analytical techniques on these data and examine case studies that have used spatial methods to draw important archaeological and historical conclusions. Tools covered in this class will include geographical information systems (GIS), global navigation satellite systems (GNSS), raster image processing, photogrammetry, and 3d spatial modeling softwares. Finally, we will gain experience with the visualization of our data and results, and the presentation of those results through open online publication.

ANC 616 Ancient Economies
Scholars have long debated the nature of the ancient economy, the terms in which it can best be approached, and the decision-making processes that underpinned economic behavior in antiquity. In particular, controversy has surrounded the extent to which the economies of Greco-Roman antiquity can be modeled using contemporary tools of analysis. In recent scholarship, many of the tenets laid down by Moses Finley in his The Ancient Economy have been re-evaluated, with the result that the field is currently in a state of intellectual ferment. It is the purpose of this course to explore the terms in which contemporary debates over ancient economic systems are formulated, with reference to a variety of societies and periods, from the palace economies of the Mycenaean period to the system of taxation introduced in the early fourth century by the emperor Diocletian and his colleagues in the Tetrarchy.

ANCH 702 Greek Sanctuaries
Sanctuaries remain an important focal point for the study of Greek religion. Both as sites for worship, dedication, oracular activity and other cult activity and as sites for the mediation of elite and state competition sanctuaries are, along with the polis, the most essential structuring institutions of Greek life. This seminar takes a selection of larger and smaller extra-urban sanctuaries and examines their growth, articulation and function.

Ancient Near East Languages (ANEL)

ANEL 440 First Year Akkadian I
Introduction to the grammar of the Akkadian language with emphasis on developing skills in the cuneiform writing system and reading of selected texts.
Course usually offered in fall term
Also Offered As: ANEL 640
Activity: Lecture
1 Course Unit

ANEL 441 1st Year Akkadian II
Introduction to the grammar of the Akkadian language with emphasis on developing skills in the cuneiform writing system and reading of selected texts.
Course usually offered in spring term
Also Offered As: ANEL 641
Prerequisites: ANEL 440, ANEL 640 or permission of the instructor.
Activity: Lecture
1 Course Unit

ANEL 460 Middle Egyptian
Introduction to the grammar of Middle Egyptian.
Taught by: Silverman
Two terms. student must enter first term.
Also Offered As: AFST 460
Activity: Lecture
1 Course Unit

ANEL 461 Middle Egyptian Texts: Literary
This course will deal with those texts of the Middle Kingdom that are written in the classical form of the language. It will include both monumental inscriptions, such as autobiographical stela inscriptions (P. Newberry, BENI HASSAN) and stelae (Seth, LESESTUCKE) as well as narratives in prose (DeBuck, READING BOOK). Religious texts (ibid. and COFFIN TEXTS) will also be studied and analyzed. Distinctions between the grammar of the literary and non-literary genres will be discussed.
Taught by: Silverman
One-term course offered either term
Prerequisite: ANEL 460
Activity: Lecture
1 Course Unit

ANEL 540 Akkadian Literary Texts
Readings in Akkadian literary texts from ancient Mesopotamia.
Taught by: Frame
One-term course offered either term

ANEL 646 The Land of Sumer: Writing, Language, and Culture
This self-contained course sets the Sumerian language, writing system and use of writing in their social and historical context. The aim is to provide students of ancient history and culture from diverse disciplines with a good grounding in Sumerian culture, familiarity with the Sumerian language and cuneiform writing system and the requisite knowledge for critical assessment of published translations and of the secondary literature. The course is organized as two threads, culture on the one hand and language on the other. The two threads are united by taking examples in the language exercises, vocabulary assignments, etc., as far as possible from the domain of the week’s cultural topics. The net effect is to examine the culture both through contemporary secondary literature and through direct contact with elementary primary texts of relevance to the various topics of discussion. The language component of the course will be carried out in a combination of transliteration and cuneiform, with an expectation that all students will gain familiarity with at least the core 80 syllabic signs, and about 100 additional logographic signs.
Taught by: Tinney
Course not offered every year
Activity: Lecture
1 Course Unit

ANEL 647 Sumerian Daily Texts
Taught by: Tinney
Course not offered every year
Activity: Seminar
1 Course Unit

ANEL 660 Old Egyptian Texts: Religious
This course will examine the texts and grammar of religious and wisdom literature. The religious texts utilized will come from the spells of the Pyramid Texts (K. Sethe, DIE ALTAGYPTISCHEN PYRAMIDENTEXTS), and the offering formulae carved on stelae and tomb walls. Sources for the latter will include published and unpublished material from Dendera, Giza, and other sites in the collections of the University Museum (H. Fischer, DENDERA IN THE THIRD MILLENNIUM, B.C., C. Fisher, THE MINOR CEMETERIES AT GIZA and W. Barta, AUFBAU UND BEDEUTUNG DER ALTAGYPTISCHEN OPFERFORMEL). For the wisdom literature, the texts of Kagemni (Jequier, LE PAPYRUS PRISSE ET SES VARIANTES) and Prince Hordjedef (Brunner-Traut, ZAS 76 (1940), 3-9 will be read.
Taught by: Silverman
One-term course offered either term
Prerequisite: ANEL 563
Activity: Lecture
1 Course Unit

ANEL 661 Old Egyptian Texts: Secular
This is the beginner course in Modern Standard Arabic (MSA). It will introduce you to the speaking, listening, reading and writing skills in the standard means of communication in the Arab World. The course is proficiency-based, implying that all activities within the course are aimed at placing you, the learner, in the context of the native-speaking environment from the very beginning. Evaluation is done by the more traditional testing methods (vocabulary tests, dictations, grammar and translation exercises). We anticipate that by the end of this course (ARAB 031) students will range in proficiency from Novice High to Intermediate Low on the ACTFL scale; in other words (using the terminology of the government’s Foreign Service Institute), from ‘incipient survival’ to ‘full survival’ in the native-speaking environment.
Taught by: Silverman
One-term course offered either term
Prerequisite: ANEL 563
Activity: Lecture
1 Course Unit

ANEL 664 Coptic
The course will be an introduction to the writing, grammar, and literature of Coptic.
Taught by: Silverman
Course not offered every year
Also Offered As: RELS 616
Activity: Lecture
1 Course Unit

ANEL 665 Demotic
The course will be an introduction to the writing, grammar, and literature of Demotic, the phase of the language in use during the latter periods of Egyptian history.
Taught by: Houser Wegner
Course not offered every year
Activity: Lecture
1 Course Unit

ANEL 667 Readings in Demotic
Course not offered every year
Activity: Lecture
1 Course Unit

ANEL 740 Akkadian Religious and Scientific Texts
Readings in Akkadian of religious and scientific texts from ancient Mesopotamia.
Taught by: Frame
One-term course offered either term
Prerequisite: ANEL 441/641
Activity: Lecture
1 Course Unit

ANEL 741 Akkadian Legal Texts
Readings in Akkadian legal texts and law corpora from ancient Mesopotamia.
Taught by: Frame
One-term course offered either term
Prerequisite: ANEL 441/641
Activity: Lecture
1 Course Unit
**ANEL 742 Akkadian Economic Texts**
Readings in Akkadian economic texts from ancient Mesopotamia. 
Taught by: Frame 
Course not offered every year 
Prerequisite: ANEL 441/641 
Activity: Seminar 
1 Course Unit

**ANEL 743 Peripheral Akkadian**
Readings in selected texts in Akkadian from the periphery of Mesopotamia, including Alalah, Ugarit, Nuzi, Suza and El-Amarna. 
One-term course offered either term 
Prerequisite: ANEL 441/641 
Activity: Lecture 
1 Course Unit

**ANEL 744 Readings Akkadian Texts III**
Readings in Akkadian texts on selected topics. 
Taught by: Frame 
Course not offered every year 
Activity: Seminar

1 Course Unit

---

**Anthropology (ANTH)**

**ANTH 001 Archaeology: Window to the Human Past**
This course will introduce students to the methods and theory of archaeology by exploring how we turn archaeological data into statements about cultural behavior. We will discuss the place of archaeology in the broader field of anthropology and debate issues facing the discipline today. The course will rely on case studies from around the world and from many different time periods to introduce students to the research process, field and lab methods, and essential questions of archaeological anthropology. Students will have the opportunity to work hands-on with archaeological materials through visiting the galleries and working with Penn Museum collections.

For BA Students: History and Tradition Sector
Course usually offered in fall term 
Activity: Recitation 
1 Course Unit

**ANTH 002 Introduction to Cultural Anthropology**
An introduction to the anthropological study of human social and cultural diversity throughout the world, with special emphasis on the development of the idea of culture as an analytical concept. The course includes sections on the ethnographic research method and on the library of ethnographic material relating to cultural change in different parts of the world that anthropology has produced since the 19th century.

For BA Students: Society Sector
Course usually offered in fall term 
Activity: Recitation 
1 Course Unit

**ANTH 003 Introduction to Human Evolution**
How did humans evolve? When did humans start to walk on two legs? 
How are humans related to non-human primates? This course focuses on the scientific study of human evolution describing the emergence, development, and diversification of our species, Homo sapiens. First we cover the fundamental principles of evolutionary theory and some of the basics of genetics and heredity as they relate to human morphological, physiological, and genetic variation. We then examine what studies of nonhuman primates (monkeys and apes) can reveal about our own evolutionary past, reviewing the behavioral and ecological diversity seen among living primates. We conclude the course examining the "hard" evidence of human evolution - the fossil and material culture record of human history from our earliest primate ancestors to the emergence of modern Homo sapiens. You will also have the opportunity, during recitations, to conduct hands-on exercises collecting and analyzing behavioral, morphological, and genetic data on both humans and nonhuman primates and working with the Department of Anthropology's extensive collection of fossil casts.

For BA Students: Living World Sector
Course usually offered in fall term 
Activity: Recitation 
1 Course Unit
ANTH 004 The Modern World and Its Cultural Background
An introduction to the diversity of cultures in the world. This course is divided into two parts. The first briefly examines different models of understanding human diversity: ethnicities, religions, languages, political forms, economic structures, cultures, and “civilizations”. Students will learn to think about the world as an interconnected whole, and know the significance of culture on a global scale. The second part is an introduction to area studies, in which we undertake a survey of the different regions of the world. We conduct the survey paying attention to the different aspects of human diversities, which we examine in the first part of this course. Students will acquire a greater appreciation and understanding of cultural differences in the more comprehensive social context.
For BA Students: Humanities and Social Science S
Course usually offered in spring term
Activity: Recitation
1 Course Unit

ANTH 005 Great Transformations
This course explores the history and archaeology of the last 20,000 years from the development of agriculture to the industrial revolution. Why did people across the world abandon foraging for farming? How and why did cities and states develop? Why did societies succeed or fail? How have humans transformed themselves and the natural world, including the landscape and the climate? We will explore the methods that archaeologists use to consider these questions and analyze evidence for social and economic change from the Middle East, the Americas, Asia, Africa, Australia and Europe. In addition, students will have a chance to conduct hands-on exercises with artifacts from the Penn Museum and an opportunity to do some experimental archaeology during recitations.
For BA Students: History and Tradition Sector
Course usually offered in spring term
Activity: Recitation
1 Course Unit

ANTH 012 Globalization And Its Historical Significance
This course describes and analyses the current state of globalization and sets it in historical perspective. It applies the concepts and methods of anthropology, history, political economy and sociology to the analysis and interpretation of what is actually happening in the course of the semester that relates to the progress of globalization. We focus on a series of questions not only about what is happening but about the growing awareness of it and the consequences of the increasing awareness. In answering these questions we distinguish between active campaigns to cover the world (e.g. Christian and Muslim proselytism, free-trade agreements, democratization) and the unplanned diffusion of new ways of organizing trade, capital flows, tourism and remote interaction via the Internet. The body of the course deals with particular dimensions of globalization, reviewing both the early and recent history of each. The overall approach is historical and comparative, setting globalization on the larger stage of the economic, political and cultural development of various parts of the modern world. The course is taught collaboratively by an anthropologist, an historian, and a sociologist, offering the opportunity to compare and contrast distinct disciplinary approaches. It seeks to develop a general social-science-based theoretical understanding of the various historical dimensions of globalization: economic, political, social and cultural.

Taught by: Spooner
Course usually offered in fall term
Also Offered As: HIST 012, SOCI 012
Activity: Lecture
1 Course Unit

ANTH 022 World Music and Cultures
This course examines how we as consumers in the "Western" world engage with musical difference largely through the products of the global entertainment industry. We examine music cultures in contact in a variety of ways – particularly as traditions in transition. Students gain an understanding of traditional music as live, meaningful person-to-person music making, by examining the music in its original site of production, and then considering its transformation once it is removed, and recontextualized in a variety of ways. The purpose of the course is to enable students to become informed and critical consumers of "World Music" by telling a series of stories about particular recordings made with, or using the music of, peoples culturally and geographically distant from the US. Students come to understand that not all music downloads containing music from unfamiliar places are the same, and that particular recordings may be embedded in intriguing and controversial narratives of production and consumption. At the very least, students should emerge from the class with a clear understanding that the production, distribution, and consumption of world music is rarely a neutral process.
For BA Students: Arts and Letters Sector
Taught by: Muller, Rommen, Sykes
Course usually offered in fall term

ANTH 055 Cultural Heritage, Politics and War in the Middle East
Political upheaval in the Middle East has brought cultural heritage studies to the forefront. From playing a role in the making of national identity and economy of Middle Eastern countries to falling prey to armed conflicts, cultural heritage remains an important element of the political and social scene. This seminar will examine the relatedness of cultural heritage to questions of identity and politics in the Middle East, and the impact of recent wars on such heritage. The seminar will start by outlining the ancient and modern history of the Middle East, and reviewing the production of cultural heritage and its contemporary management in several Middle Eastern countries. It will then proceed to discuss the following major topics: 1) Cultural diversity of modern Middle Eastern societies, the perception of cultural heritage in these societies, and the survival of long-living historical places, old traditions, and material culture of all kinds. 2) The influence of ancient cultures on common fixation and beliefs of modern identity in Middle Eastern societies (e.g. particular ethnic and religious group see themselves as direct descendants of one or a number of ancient groups such as Phoenicians, Israelites, Assyrians). 3) The use of archeological and historical data to create narratives of the past that promote specific political ideologies in the modern Middle East and, in some cases fabricate novel cultural and political realities. 4) The damage done to Cultural Heritage by recent wars in Iraq, Syria, and Lebanon, and (i) how these wars are/were the makers of a new time that disrupted the living past through the destruction of cultural landscapes; and (ii) the involvement of cultural heritage institutions and archaeologists in rescuing cultural heritage in the event of war.
Course not offered every year
Also Offered As: NELC 033
Activity: Seminar
1 Course Unit
ANTH 086 Desire and Demand: Culture and Consumption in the Global Marketplace
Does consumption shape culture or does culture shape consumption? As even the most mundane purchase becomes socially symbolic and culturally meaningful we can persuasively argue that the concept of "need" has been transformed. Analyzing a variety of physical and virtual consumer venues, the goal of this seminar is to understand and analyze historical and contemporary issues related to a culture of consumption. We investigate social and political-economic factors that impact when and how people purchase goods and argue that behavior attached to consumption includes a nexus of influences that may change periodically in response to external factors. Readings and research assignments are interdisciplinary and require a critical analysis of global/local linkages. The city of Philadelphia becomes the seminar's laboratory as we ask: how have issues of culture, consumption, and global capitalism become intertwined around the world?
Taught by: Diggs-Thompson
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Freshman Seminar

ANTH 100 Topics In Anthropology and the Modern World: Afghanistan, Iran, Pakistan
This course relates anthropological models and methods to current problems in the Modern World. The overall objective is to show how the research findings and analytical concepts of anthropology may be used to illuminate and explain events as they have unfolded in the recent news and in the course of the semester. Each edition of the course will focus on a particular country or region that has been in the news.
Taught by: Spooner
Course usually offered in spring term
Also Offered As: ANTH 654, NELC 281, NELC 681, SAST 161
Activity: Lecture
1 Course Unit

ANTH 103 Empires: From Akkad to America
Empires have been an enduring phenomenon for more than 4,000 years, from the rise of Akkad in Mesopotamia to the American invasion in Iraq. How and why do empires emerge? How do empires work? Why do empires endure (or collapse)? This class will study the origins, structures and consequences of imperialism by comparing ancient and modern empires from all over the world. In addition to a study of the political aspects of imperialism, we will analyze the cultural and economic facets of imperialism, particularly acculturation, cultural hybridity and issues of identity. We will analyze a wide-range of data, including art and artifacts from the Penn Museum, administrative and historical records, novels and films. Empires covered may include Egypt, Assyria, Achaemenid Persia, Rome, Han China, Sassanian Persia, the Abbasid Caliphate, the Mongols, Mughal India, Mali, Inka, Aztec, Spain, Ottoman, France and America.
Taught by: Ristvet
Course not offered every year
Also Offered As: ANTH 630
Activity: Seminar
1 Course Unit

ANTH 104 Sex and Human Nature
This course is an introduction to the scientific study of sex in humans. Within an evolutionary framework, the course examines genetic, physiological, ecological, social and behavioral aspects of sex in humans. After providing the basic principles of evolutionary biology, the course delves into the development of sexual anatomy and physiology. Among the subjects to be explored are sex determination, the nature of orgasms, and the sexual development of females and males from birth to adulthood. The role of ecology and social life in shaping human mating patterns is also evaluated using ethnographic and cross-cultural materials from a variety of human cultures. In particular, the course examines why humans marry or pair bond, whether there is a biological basis of love, which biological and psychological factors produce jealousy. Finally, the course explores topics relevant to human sexuality today, such as the "hook-up culture", contraception and abortion, sex work, sexual transmitted diseases, and the ethical and legal dimensions of human sexuality.
For BA Students: Living World Sector
Taught by: Schurr
Course not offered every year
Also Offered As: BIBB 150, GSWS 103
Activity: Lecture
1 Course Unit

ANTH 105 Human Adaptation
ANTH 105 explores the evolutionary process using humans (Homo sapiens) as a case study. This complex biological and cultural species is best understood within the framework of evolution as it has operated for over a billion years. Learn why humans are imperfect, not an end product of evolutionary change, and are still evolving with unpredictable consequences. Using 3 complexes that have come to characterize humans (bipedalism, rotary chewers, and big brains) we will trace the evolutionary history from the first life forms on earth to the human lineage that emerged in just the last 5 million years. The consequences for humans of this evolutionary history are profound and we witness this everyday in our own bodies. Touch fossil casts representing the whole of human evolution using the Penn Museum's prodigious casting program.
Taught by: Monge
Course not offered every year
Activity: Lecture
1 Course Unit

ANTH 106 Anthropological Genetics
This course explores the use of genetics to understand human biological variation and evolution. Among the areas of genetics to be explored are dermatoglyphics (fingerprints), craniometrics (skulls and teeth), anthropometrics (body dimensions), simple Mendelian traits, molecular genetics, genetics of complex traits (skin color, height, obesity), population genetics, and disease adaptations.
Taught by: Schurr
Course not offered every year
Prerequisite: ANTH 003
Activity: Lecture
1 Course Unit
ANTH 116 Caribbean Culture and Politics
This course offers anthropological perspectives on the Caribbean as a geo-political and socio-cultural region, and on contemporary Caribbean diaspora cultures. We will examine how the region's long and diverse colonial history has structured relationships between race, ethnicity, class, gender and power, as well as how people have challenged these structures. As a region in which there have been massive transplantations of peoples and their cultures from Africa, Asia, and Europe, and upon which the United States has exerted considerable influence, we will question the processes by which the meeting and mixing of peoples and cultures has occurred. Course readings include material on the political economy of slavery and the plantation system, family and community life, religious beliefs and practices, gender roles and ideologies, popular culture, and the differing ways national, ethnic, and racial identities are expressed on the islands and throughout the Caribbean diaspora.
Taught by: Thomas
Course not offered every year
Also Offered As: AFRC 116, LALS 116
Activity: Lecture
1 Course Unit

ANTH 121 Origin and Cultures of Cities
The UN estimates that 2.9 of the world's 6.1 billion people live in cities and that this percentage is rapidly increasing in many parts of the world. This course examines urban life and urban problems by providing anthropological perspectives on this distinctive form of human association and land use. First we will examine the "origin" of cities, focusing on several of the places where cities first developed, including Mesopotamia and the Valley of Mexico. We will then investigate the internal structure of non-industrial cities by looking at case studies from around the world and from connections between the cities of the past and the city in which we live and work today. For BA Students: History and Tradition Sector
Taught by: Zettler
Course usually offered in fall term
Also Offered As: NELC 103, URBS 121
Activity: Lecture
1 Course Unit

ANTH 122 Becoming Human
Human evolutionary studies is a composite product of the fieldwork of both Paleolithic archaeology and human paleontology (or what we refer to as "stones and bones"). This marriage of two subdisciplines of anthropology produces a unique set of data that is intellectually managed and driven by theories within anthropology as a whole and even beyond -- to fields such as biology, psychology, and primate ethology, as we try to understand the origins of language, culture, and our unique physical characteristics. In this course, we will jointly discuss and debate the actual evidence of human evolution, describing what the actual evidence is and exploring how far can we take these interpretations.
For BA Students: Natural Science and Math Sector
One-term course offered either term
Activity: Lecture
1 Course Unit

ANTH 123 Communication & Culture
The course looks at varieties of human expression -- such as art, film, language and song -- as communicative practices that connect persons together to form a common culture. Discussion is centered around particular case studies and ethnographic examples. Examination of communicative practices in terms of the types of expressive signs they employ, their capacity to formulate and transmit cultural beliefs and ideals (such as conceptions of politics, nature, and self), and to define the size and characteristics of groups and communities sharing such ideals. Discussion of the role of media, social institutions, and technologies of communication (print, electronic). Emphasis on contemporary communicative practices and the forms of culture that emerge in the modern world.
For BA Students: Society Sector
Taught by: Agha
One-term course offered either term
Activity: Recitation
1 Course Unit

ANTH 133 Native Peoples and the Environment
The relationship between the activities of native peoples and the environment is a complex and contentious issue. One perspective argues that native peoples had little impact on the environment because of their low population densities, limited technology, and conservation ethic and worldview. At the other extreme, biodiversity, nature itself, is considered the product of a long history of human activities. This seminar will examine the myth of the ecologically noble savage, the myth of the pristine environment, the alliance between native peoples and green politics, and the contribution of native peoples to appropriate technology, sustainable development and conservation of biodiversity.
Taught by: Erickson
Course not offered every year
Also Offered As: LALS 133
Activity: Seminar
1 Course Unit
Notes: Freshman Seminar

ANTH 139 Ancient Civilizations of the World
The archaeology of the complex societies of the Old and New Worlds from the end of the Paleolithic up to and including the earliest civilizations.
For BA Students: History and Tradition Sector
Taught by: Zettler
Course not offered every year
Also Offered As: NELC 182, URBS 139
Activity: Lecture
1 Course Unit

ANTH 141 Public Policy, Museums, and the Ethics of Cultural Heritage
This course will focus upon and examine the ethics of international heritage and the role that Museums play in the preservation of identity and cultural heritage. The mission of this course will be to inform and educate students about the role of Museums within the 21st century. What is the role and position of antiquities and important cultural objects in Museums? How should Museums acquire these objects and when should they be returned to countries and cultural groups? Examples from current issues will be included in the reading and discussions along with objects and issues within the Penn Museum.
Taught by: Leventhal
Course usually offered in fall term
Also Offered As: ARTH 141
Activity: Lecture
1 Course Unit
ANTH 143 Being Human: Biology, Culture & Human Diversity
This course will investigate human biology from evolutionary and biocultural perspectives. Using this approach, the class will explore what it means to be human. We will examine humans as mammals, as primates, and as hominins (our own lineage). We will also study the basics of human genetics, growth and development, immune function, nutrition, life history, and adaptations to diet and disease. In addition, we will review biological variation in contemporary and past societies and the evolutionary processes that helped to shape them.
Taught by: Schurr
One-term course offered either term
Activity: Lecture
1 Course Unit

ANTH 148 Food and Fire: Archaeology in the Laboratory
This course will let students explore the essential heritage of human technology through archaeology. People have been transforming their environment from the first use of fire for cooking. Since then, humans have adapted to the world they created using the resources around them. We use artifacts to understand how the archaeological record can be used to trace breakthroughs such as breaking stone and bone, baking bread, weaving cloth and firing pottery and metals. The seminar will meet in the Penn Museum's Center for the Analysis of Archaeological Materials. Students will become familiar with the Museum's collections and the scientific methods used to study different materials. Class sessions will include discussions, guest presentations, museum field trips, and hands-on experience in the laboratory.
For BA Students: Humanities and Social Science S

Activity: Lecture
1 Course Unit

ANTH 149 Intro to Native American and Indigenous Studies
This course offers a broad introduction to the linked fields of Native American Studies and Indigenous Studies. Students will gain foundational understandings of the ways that Indigenous peoples and academic researchers engage with Indigenous knowledges in diverse worldwide settings, while also exploring the impacts of settler colonialism and the influence of recent decolonizing methodologies. Students will examine topics from a variety of disciplinary traditions, using historical texts, anthropological studies, oral literature, and modern media. Special case studies will focus on: links between oral traditions and archaeological research; relations among archives, museum representation, and Indigenous heritage; legal interventions and protections for Indigenous sovereignty; and language restoration and cultural recovery.
Taught by: M. Bruchac
Activity: Seminar
1 Course Unit

ANTH 151 Archaeology of American History- The Colonial Period
Over the last fifty years archaeologists have been exploring historic sites in the United States dating from both the Colonial Period and the 19th/20th centuries. What can archaeology now tell us about the origins of American society, the invasion of North America by various European peoples (Spanish, English, Dutch), the impact on native peoples, the rise of African American and Asian American cultures, major crisis (e.g. the revolution, Civil War, and the Great Depression), the settlement of the Far American West, and the final emergence of a truly national culture in the 20th century? A basic question will be how an American history based on both archaeology and archival sources is different and more complete than an image of the past drawn only from written sources.

ANTH 158 The Neolithic Revolution
The advent of food production/agriculture in prehistory, sometimes referred to as the "Neolithic Revolution," represents key economic, social, and biological transitions for human groups. Food production was characterized by the possibility for the accumulation of food surpluses, which could be used as a form of wealth. It also resulted in the reorganization of social and ritual life as people settled more permanently in villages or were involved in pastoral lifeways. Additionally, densely packed living conditions and a close association with domesticated animals led to the spread of diseases, and new forms of labor related to farming tasks, as well as diets focused on a narrower range of foods, created biological stresses in these populations. This course examines several examples of the "Neolithic Revolution" throughout the world, including the Middle East, China, Europe, Mesoamerica, South America, and the North American Southwest.
Taught by: Olszewski
Course not offered every year
Activity: Lecture
1 Course Unit

ANTH 190 Introduction to Africa
During the semester we will focus on people and communities of sub-Saharan Africa and on the ways people represent, reflect on, and react to various aspects and issues in their lives and the institutions which dominate their communities. We will focus particularly on the history, contemporary expression, and inter-relationships among politics, religion, and aesthetic practice. Members of Penn's African Studies community will share their expertise with the class and introduce the University's Africa resources. Texts consist of weekly readings, films, and recordings; and class members will be expected to attend several lectures outside of class.
For BA Students: Society Sector
Taught by: Hasty
Course usually offered in fall term
Also Offered As: AFRC 190, AFST 190
Activity: Lecture
1 Course Unit
ANTH 199 Independent Study in Anthropology
A study under faculty supervision of a problem area or topic not included in the formal curriculum.
One-term course offered either term
Prerequisites: Junior or senior standing and written permission of instructor and undergraduate chair
Activity: Independent Study
1 Course Unit
Notes: See Department for Advisor

ANTH 204 Theoretical Foundations
Ever wonder what the point was of reading the "founding fathers" of the discipline (and yes, they were most often fathers)? Ever feel like the "old stuff" and the "old questions" have no relevance to your contemporary interests? This course, designed primarily for cultural anthropology majors, will provide clues. This is NOT a comprehensive history of the discipline. Instead, we will examine some of the main issues that have been foundational to anthropology, and will explore how approaches to these issues have changed over time. To do so, we will contextualize our analysis of transformations in anthropological knowledge production within historical and contemporary political economies. By exploring core issues that continue to inspire and inform anthropological theory and ethnographic practice, we will solidify our commitment to a holistic and relational understanding of social processes.
Course not offered every year
Prerequisite: Students should have completed at least one anthropology course before registering for ANTH 204
Activity: Seminar
1 Course Unit

ANTH 210 Death: Anthropological Perspectives
This course will cover the topic of DEATH from a bio/cultural perspective including the evolution of life history (aging and demography - mortality) as well as from an archaeological perspective (prehistoric) and early history of mortuary practices. Nothing in the lifespan of humans is so revealing on the interface of culture and biology as is death and the experience of death. This course is not concerned specifically with how an individual experiences death, but in the ways that culture and biology have come to define and deal with physical death and the death experience.
Taught by: Monge
Course not offered every year
Activity: Lecture
1 Course Unit

ANTH 219 Archaeology Field Project
First-hand participation in research project in historical archaeology in Southern New Jersey. Transportation provided by the university. Students will assist in excavations and archival research on local archaeological sites. Class is open to all undergraduates, no previous archaeological experience is required. Attendance will involve Fridays or Saturdays, all day from 8:00 to 5:00 including travel time to the excavations and back to the University Museum. Students enroll for only one day (F or S). Enrollment is limited so specific permission of the instructor is required (Robert L. Schuyler: schuyler@sas.upenn.edu; (215)898-6965; U Museum 412). A follow up laboratory course (Anth 220 in the spring semester) will also be available during which the artifacts and documentary sources collected in the fall will be analyzed at the University Museum. Course may be repeated for credit.
For BA Students: Humanities and Social Science S
Taught by: Schuyler
Course usually offered in fall term
Also Offered As: ANTH 719
Activity: Seminar
1 Course Unit
Notes: Permission of instructor required

ANTH 220 Archaeology Laboratory Field Project
Follow-up for ANTH 219. Students may enroll in either or both courses, and in any sequence; however, preference will be given to those previously enrolled in ANTH 219 that Fall. Class will meet in three hour sections on Fridays or Saturdays and will involve the analysis of artifacts, documentary records, oral historic sources and period illustrations collected on Southern New Jersey historic sites that Fall. No previous archaeological or lab experience is required. (Robert L. Schuyler: schuyler@sas.upenn.edu; (215) 898-6965; U Museum 412). Course may be repeated for credit.
For BA Students: Humanities and Social Science S
Taught by: Schuyler
Course usually offered in spring term
Also Offered As: ANTH 720
Activity: Laboratory
1 Course Unit

ANTH 221 Material World in Archaeological Science
By focusing on the scientific analysis of inorganic archaeological materials, this course will explore processes of creation in the past. ANTH 221 will take place in the Center for the Analysis of Archaeological Materials (CAAM) and will be team taught in three modules: analysis of lithics, analysis of ceramics and analysis of metals. Each module will combine laboratory and classroom exercises to give students hands-on experience with archaeological materials. We will examine how the transformation of materials into objects provides key information about past human behaviors and the socio-economic contexts of production, distribution, exchange and use. Discussion topics will include invention and adoption of new technologies, change and innovation, use of fire, and craft specialization.
Taught by: Boileau/Dibble/Jansen
Course not offered every year
Also Offered As: ANTH 521, ARTH 230, CLST 244, NELC 284, NELC 584
Activity: Lecture
1 Course Unit
ANTH 223 Indigenous Archaeology
This seminar is an introduction to Indigenous archaeologies. These approaches have been defined as archaeology "with, for and by Indigenous peoples." However, they are in fact more than this. Not only do they seek to make archaeology more representative of and responsible to Indigenous communities; they also seek to contribute to a more accurate understanding of the archaeological record through the incorporation of Native epistemologies. This course covers such topics as the history of American archaeology, indigenous knowledge and cultural values, NAGPRA, museumification, decolonizing methodologies, and current debates.
Taught by: Bruchac
Course not offered every year
Also Offered As: ANTH 523
Activity: Lecture
1 Course Unit

ANTH 230 Forensic Anthropology
This course will investigate and discuss the various techniques of analysis that biological anthropologists can apply to forensic cases. Topics include human osteology, the recovery of bodies, the analysis of life history, the reconstruction of causes of death, and various case studies where anthropologists have contributed significantly to solving forensic cases. Discussions will include the limitations of forensic anthropology and the application of DNA recovery to skeletal/mummified materials.
Taught by: Monge
Course not offered every year
Also Offered As: ANTH 633, CRIM 230
Activity: Lecture
1 Course Unit

ANTH 236 Iraq: Ancient Cities & Empires
This course surveys the cultural traditions of ancient Mesopotamia, the land between the Tigris and Euphrates Rivers, a region commonly dubbed "cradle of civilization" or "heartland of cities," from an archaeological perspective. It will investigate the emergence of sedentism and agriculture; early villages and increasingly complex Neolithic and Chalcolithic cultures; the evolution of urban, literate societies in the late 4th millennium; the city-states and incipient supra-regional polities of the third and second millennium; the gradual emergence of the Assyrian and Babylonian "world empires," well-known from historical books of the Bible, in the first millennium; and the cultural mix of Mesopotamia under the successive domination of Greeks, Persians and Arabs. The course seeks to foster an appreciation of the rich cultural heritage of ancient Mesopotamia, an understanding of cultural continuities in the Middle East and a sense of the ancient Near Eastern underpinnings of western civilization. No Prerequisite.
Taught by: Zettler
Course not offered every year
Also Offered As: ANTH 636, NELC 241, NELC 641, URBS 236
Activity: Lecture
1 Course Unit

ANTH 238 Introduction to Medical Anthropology
Introduction to Medical Anthropology takes central concepts in anthropology -- culture, adaptation, human variation, belief, political economy, the body -- and applies them to human health and illness. Students explore key elements of healing systems including healing technologies and healer-patient relationships. Modern day applications for medical anthropology are stressed.
For BA Students: Humanities and Social Science S
Taught by: Barg
Course usually offered in fall term
Also Offered As: HSOC 238
Activity: Lecture
1 Course Unit

ANTH 244 Disease and Human Evolution
This course will explore the role played by disease in human evolution, from the emergence of the human lineage to the present day. We will evaluate both infectious and non-infectious diseases, and examine the way in which populations and disease organisms have co-evolved. Related issues to be explored include the nature of the virulence and pathogenicity of infectious agents, and the impact of vaccination on pathogen evolution. In addition, we will discuss the epidemiological transition and the rise of complex diseases of modernization (e.g., diabetes, cancer) that has occurred in the past several centuries. Overall, the course will provide a broader understanding of the influence of disease processes on the evolution of the human species.
Taught by: Schurr
Course not offered every year
Activity: Lecture
1 Course Unit

ANTH 246 Molecular Anthropology
In this course, we will explore the molecular revolution in biological anthropology. In particular, we will examine how molecular data can be used to illuminate anthropological question concerning human origins, evolution and biological variation. Some of the specific topics to be covered in this course are the phylogenetic relationships among primates, kinship in apes and monkeys, the hominoid trichotomy, modern human origins and migrations, Neanderthal and Denisovan admixture with modern humans, biogenetics of skin color, and physiological, phenotypic and disease adaptations.
Taught by: Schurr
Course not offered every year
Also Offered As: ANTH 649
Prerequisites: ANTH 003, Intro to Human Evolution; some background in biology and genetics will also be useful.
Activity: Seminar
1 Course Unit

ANTH 247 Archaeology Laboratory Field Project-Summer
This course is a summer version of ANTH 220 (see that course for full description). In summer more emphasis will be placed on field visitations. Course open to all students; no instructor permission needed. Course may be repeated for credit and students may take both ANTH 247 and ANTH 220. Questions: Contact Robert L. Schuyler; schuyler@sas.upenn.edu; (215) 898-76965; University Museum 412/6398.
Taught by: Schuyler
Course usually offered summer term only
Also Offered As: ANTH 747
Activity: Laboratory
1 Course Unit
ANTH 248 Food and Feasting: Archaeology of the Table
Food satisfies human needs on many levels. ANTH 248 explores the importance of food in human experience, starting with the nutritional and ecological aspects of food choice and going on to focus on the social and ritual significance of foods and feasts. Particular attention will be paid to the way that archaeologists and biological anthropologists find out about food use in the past. Contemporary observations about the central significance of eating as a social activity will be linked to the development of cuisines, economies, and civilizations in ancient times. The course will use lectures, discussions, films, food tastings, and fieldwork to explore the course themes.
Taught by: Moore
Course not offered every year
Activity: Lecture
1 Course Unit

ANTH 249 Evolutionary Medicine
Evolutionary medicine is the application of modern evolutionary theory to studies of health and disease in humans. In taking this approach, the course will explore the role that disease played in human evolution. We will examine both infectious and non-infectious diseases, and assess the way in which populations and disease organisms have co-evolved. Related issues to be examined are the nature of the virulence and pathogenicity of infectious agents, and their efforts to subvert the immune system's responses to infection. We will also explore the evolved responses that enable individuals to protect, heal and recuperate themselves from infections and injuries, such as fever and sickness behavior, and the fitness enhancing aspects of these processes. Finally, we will study how past adaptations of early humans to their environments now affects modern humans, who have very different diets, life expectancy, activity patterns, and hygiene than their ancestors.
Taught by: Schurr
Course not offered every year
Prerequisites: ANTH 003 and ANTH 143 (or permission for undergraduates)
Activity: Seminar
1 Course Unit

ANTH 254 Archaeology of the Inca
The Inca created a vast and powerful South American empire in the high Andes Mountains that was finally conquered by Spain. Using Penn’s impressive museum collections and other archaeological, linguistic, and historical sources, this course will examine Inca religion and worldview, architecture, sacred temples, the capital of Cuzco, ritual calendar, ceque system, textiles, metalworking, economic policies and expansionist politics from the dual perspectives of Inca rulers and their subjects. Our task is to explain the rise, dominance, and fall of the Incas as a major South American civilization.
For BA Students: History and Tradition Sector
Taught by: Erickson
Course not offered every year
Also Offered As: LALS 254
Activity: Seminar
1 Course Unit

ANTH 258 Visualizing the Past/Peopling the Past
This highly interdisciplinary course approaches fundamental issues in Anthropology and Computer Science. Using an anthropological perspective, this course focuses on the history, theory, and methods of how archaeology and visualizations of the past are created, presented and used in scholarly media (e.g., traditional publications, conference papers, and project databases), and popular culture (e.g., artists reconstructions, movies, TV documentaries, museum exhibits, games, the internet, and art), and contemporary computer technology (e.g., 3D modeling, Animation, virtual reality, and simulation). From the computer science perspective, the challenge becomes how we can transform known and often incomplete information into engaging and plausible digital models of a past culture and its people. Students gain acquisition of fundamental computer programming, data analysis, and 3D modeling and animation tools. The course material is broad and requires conceptual integration by the student. The instructors use the SEAS Open Learning Classroom for programing and the Penn Museum to explore artifact collections through Object-Based Learning and evaluate public exhibits and complete an original Final Project to people and visualize the past.
Taught by: Badler/Erickson
Course not offered every year
Also Offered As: CIS 106, LALS 268
Activity: Lecture
1 Course Unit

ANTH 260 Cultures of Science and Technology
Science and technology figure centrally in the economic, political, and socio-cultural changes that impact our worlds. Happenings in the life sciences, including the discovery of new genes, pathways, and processes, are drawing conceptual frameworks and how they 1) affect individuals, self-identities, subjectivity, kinship, and social relationships; 2) have interacted with or reinforced political programs, racial classifications, unequal access to knowledge, and patterns of social injustice; 3) inform contemporary institutional structures, strategies of governance, and practices of citizenship. The seminar starts from the premise that scientific facts are made, not things existing a priori in the world and that are merely picked up by researchers and consumed by lay audiences. Likewise, technologies are created through a process of intense negotiation between producers and their sophisticated users. Focusing on the biosciences, we explore the production of science and technology and how they 1) affect individuals, self-identities, subjectivity, kinship, and social relationships; 2) have interacted with or reinforced political programs, racial classifications, unequal access to knowledge, and patterns of social injustice; 3) inform contemporary institutional structures, strategies of governance, and practices of citizenship. We will combine methods and perspectives from social and cultural anthropology, and the social studies of science and technology, and will draw from historical case studies, contemporary ethnographies of science, scientific and medical journals, documentary films and media reports.
Taught by: Petryna
Course not offered every year
Also Offered As: STSC 268
Activity: Seminar
1 Course Unit
ANTH 267 Living World in Archaeological Science
By focusing on the scientific analysis of archaeological remains, this course will explore life and death in the past. It takes place in the Center for the Analysis of Archaeological Materials (CAAM) and is team taught in three modules: human skeletal analysis, analysis of animal remains, and analysis of plant remains. Each module will combine laboratory and classroom exercises to give students hands-on experience with archaeological materials. We will examine how organic materials provide key information about past environments, human behavior, and cultural change through discussions of topics such as health and disease, inequality, and food.
Taught by: White, Monge, Moore
Course not offered every year
Also Offered As: ANTH 567, CLST 268, CLST 568, NELC 286, NELC 586
Activity: Lecture
1 Course Unit

ANTH 268 Anthropology of Museums
This course examines museums as sites where issues of Indigenous identity, memory, place and power intersect. Museums have long been engaged in the selective preservation, representation, and contextualization of Indigenous objects, cultures, and histories. We will examine antiquarian impulses that inspired the collecting of curiosities, scientific studies that drove the collection of biological specimens, and nationalist ideals that shaped monuments to house imperialist memories. Museums are now sites for complex, often contentious discourse around Indigenous collections. Students will review histories of local and national collecting processes, with a particular focus on Native American collections and concerns. We will also consider how Indigenous curators and new kinds of museums have developed innovative displays and interpretations.
Taught by: Bruchac
Activity: Seminar
1 Course Unit

ANTH 273 Global Health: Anthropological Perspectives
In some parts of the world spending on pharmaceuticals is astronomical. In others, people struggle for survival amid new and reemerging epidemics and have little or no access to basic or life-saving therapies. Treatments for infectious diseases that disproportionately affect the world’s poor remain under-researched and global health disparities are increasing. This interdisciplinary seminar integrates perspectives from the social sciences and the biomedical sciences to explore 1) the development and global flows of medical technologies; 2) how the health of individuals and groups is affected by medical technologies, public policy, and the forces of globalization as each of these impacts local worlds. This course is a Benjamin Franklin Seminar. The seminar is structured to allow us to examine specific case material from around the world (Haiti, South Africa, Brazil, Russia, China, India, for example), and to address the ways in which social, political-economic, and technological factors — which are increasingly global in nature — influence basic biological mechanisms and disease outcomes and distribution. As we analyze each case and gain familiarity with ethnographic methods, we will ask how more effective interventions can be formulated. The course draws from historical and ethnographic accounts, medical journals, ethical analyses, and films, and familiarizes students with critical debates on globalization and with local responses to globalization processes.
Taught by: Petryna
One-term course offered either term
Also Offered As: HSOC 239
Activity: Seminar
1 Course Unit

ANTH 294 Cities of the Future: Urbanization in the Global South
This course examines the futures of urbanization in most of the world. With cities in “developing” countries set to absorb 95% of urban population growth in the next generation, the course explores the plans, spaces and social experiences of this dramatic urban century. How do proliferating urban populations sustain themselves in the cities of Latin America, Africa and Asia? What kinds of social and political claims do these populations make more just and sustainable cities? The course investigates the ongoing experiences in urban planning, infrastructure development and environmental governance in cities of the Global South. In so doing, it imagines new forms of citizenship, development and sustainability that are currently unfolding in these cities of the future.
Taught by: Anand
Course not offered every year
Also Offered As: URBS 294
Activity: Seminar
1 Course Unit

ANTH 301 Senior Thesis
Individual research under faculty supervision culminating in a thesis.
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: Permit required

ANTH 305 Anthropology & Policy: History, Theory, Practice
From the inception of the discipline, anthropologists have applied their ethnographic and theoretical knowledge to policy issues concerning the alleviation of practical human problems. This approach has not only benefitted peoples in need but it has also enriched the discipline, providing anthropologists with the opportunity to develop new theories and methodologies from a problem-centered approach. The class will examine the connection between anthropology and policy, theory and practice (or ‘praxis’), research and application. We will study these connections by reading about historical and current projects. As an ABCS course, students will also volunteer in a volunteer organization of their choice in the Philadelphia area, conduct anthropological research on the organization, and suggest ways that the anthropological approach might support the efforts of the organization.
Course not offered every year
Also Offered As: ANTH 609
Activity: Seminar
1 Course Unit

ANTH 307 Contemporary Native Americans
This course examines the social and political lives of contemporary Native American Indians in the United States and Canada. Topics include: Indigenous identity; homelands and natural resources; popular culture and media; Indigenous arts and cultural expression; museum representations; athletics; gender relations; tribal recognition and sovereignty; and resistance movements. We will consider the origins of federal programs and legislation that have become essential to the protection of Native American freedoms. Students can expect to gain an appreciation of the complexity and cultural diversity of Native communities and tribal nations and insights into their interactions with other cultures over time.
Taught by: Bruchac
Course not offered every year
Also Offered As: ANTH 607
Activity: Lecture
1 Course Unit
ANTH 308 Ethnohistory of the Native Northeast
Ethnohistory is a multi-disciplinary form of ethnographic study and documentary research that employs both anthropological and historical approaches. This course examines the foundations of the ethnohistorical method as a means to interpret cross-cultural colonial interactions and conflicts, and to better understand the complex histories of Native American Indian peoples from Pennsylvania and northward and eastward. Students will develop skills and strategies for interpreting and contextualizing primary and secondary source materials, oral traditions, colonial records, historical maps, and material culture. Hands-on study will include visits to local archives and historical sites to view relevant documents and landscapes.
Taught by: Bruchac
One-term course offered either term
Activity: Seminar
1 Course Unit

ANTH 309 Psychoanalysis and Anthropology
This course will introduce students to the rich literature that has grown up around the encounter between psychoanalysis and anthropology, from totem and taboo, to studies of the Oedipus complex, child-rearing practices, ritual symbolism, mythology, and dreams. The class will also look to the future, endeavoring to examine as well such issues as the role of computers (are they self objects?) and the internet (including such online games as “Second Life”), dreams in space alien abduction narratives, sexuality in advertising, political psychology, and other contemporary issues.
Taught by: Urban/Blum
Course not offered every year
Also Offered As: ANTH 519, PSYS 309
Activity: Seminar
1 Course Unit

ANTH 319 Pottery & Archaeology
Pottery is the most ubiquitous material recovered from most archaeological sites of the last 10,000 years; all archaeologists must be capable of working with it. This course presents the basics on the recovery, documentation, and analysis of archaeological pottery. Instruction includes treatment of pottery in the field, museum, and laboratory. Students will develop critical awareness of the potentials and problems of interpreting pottery within the wider social contexts of production, exchange and consumption. This course will foster an appreciation of the range and complexity of pottery studies and encourage students to understand the materials and technological processes used in the manufacture of pottery.
Taught by: Boileau
Course not offered every year
Also Offered As: CLST 309
Activity: Seminar
1 Course Unit

ANTH 328 Performing Culture, Native American Arts
This course analyzes cultural performances as sites for the formation, expression, and transmission of social identity. Students will read ethnographies, critiques, and reports of performance genres including ritual, theater, music, dance, art, and spoken word, with a particular focus on Native American and Indigenous arts and expressions. Topics include: expressive culture as survivalism; debates around authenticity and invented traditions; public identity and sexuality; political resistance; the effects of globalization; transnationalism and hybridity; cultural appropriation; and the transformation of folk performances in the wake of modern media.
Taught by: Bruchac
One-term course offered either term
Activity: Lecture
1 Course Unit

ANTH 329 Psychoanalytic and Anthropological Perspectives on Childhood
This course will consider the interaction between culture and individual psychology, and between nature and nurture from birth to adulthood. Through an examination of phases of human development described by psychoanalysis, and evidence concerning psychoanalytic ideas from around the world, we will consider questions such as: How do people become who they are, both similar to others and uniquely individual? How do we develop emotionally? What features are and are not universal for our species? What is and is not known about these questions. The instructors are both psychoanalysts, one a psychiatrist, one a pediatrician.
Taught by: Blum/Shapiro
Course not offered every year
Also Offered As: ANTH 529, PSYS 329
Activity: Seminar
1 Course Unit

ANTH 334 Feminist Ethnography
This course will investigate the relationships among women, gender, sexuality, and anthropological research. We will begin by exploring the trajectory of research interest in women and gender, drawing first from the early work on gender and sex by anthropologists like Margaret Mead and Ruth Benedict; moving through the 1970s and 1980s arguments about gender, culture, and political economy; arriving at more current concerns with gender, race, sexuality, and empire. For the rest of the semester, we will critically read contemporary ethnographies addressing pressing issues such as nationalism, militarism, neoliberalism and fundamentalism. Throughout, we will investigate what it means not only to “write women’s worlds”, but also to analyze broader socio-cultural, political, and economic processes through a gendered lens. We will, finally, address the various ways feminist anthropology fundamentally challenged the discipline’s epistemological certainties, as well as how it continues to transform our understanding of the foundations of the modern world.
Taught by: Thomas
Course not offered every year
Also Offered As: AFRC 334, AFRC 634, ANTH 634, GSWS 334, GSWS 634
Prerequisites: Should have some fundamental knowledge of Cultural Anthropology.
Activity: Seminar
1 Course Unit
ANTH 337 CROSS CULTURAL METHODS IN HEALTH AND PUBLIC POLICY
This course will introduce students to applied anthropology methods for doing research that can change policy and practices. Examples of policy and practice change include clinical practices in health care settings, social welfare policy, and legal advocacy. Students will be trained in multiple anthropology research methods, including brief participant-observation, qualitative interviewing, life story interviewing, and ethnographic content analysis of textual material. Students will also learn how to use NVivo software for analyzing qualitative and some quantitative data from their field notes, interviews, and analysis of popular articles/websites. Finally, students will practice writing products for non-academic audiences, such as policymakers, the media, and the general public. The course will emphasize using anthropology research methods to address real-world problems in policy and practice.
Taught by: SAHOTA
Activity: Seminar
1 Course Unit

ANTH 347 Anthropology of Corporations
Modern business corporations can be characterized as having their own internal cultures, more or less distinct from one another. They also exist within encompassing cultures and cultural flows. At the same time, corporations are producers and disseminators, and thus have effects on their surrounding environments, effects that extend from the local to the global. This course examines modern corporations from these three perspectives through theoretical and ethnographic readings, guest speakers from the corporate world, and independent research conducted by the students. Course requirements include student presentations of their research and readings; one or more take-home exams; and a final research paper.
One-term course offered either term
Activity: Seminar
1 Course Unit

ANTH 359 Nutritional Anthropology
This course will explore the significance as it relates to food behaviors and nutritional status in contemporary human populations. The topics covered will be examined from a biocultural perspective and include 1) definition and functions of nutrients and how different cultures perceive nutrients, 2) basic principles of human growth and development, 3) methods to assess dietary intake, 4) food taboos, 5) feeding practices of infants and children, 6) food marketing, 7) causes and consequences of under- and over-nutrition, and 8) food insecurity and hunger.
Course not offered every year
Also Offered As: HSOC 359, URBS 359
Activity: Seminar
1 Course Unit

ANTH 362 Intro to Digital Archaeology
Digital methods allow archaeologists to approach research questions about the human past with increasing accuracies on larger datasets and at multiple scales. This class introduces students to the three main steps of digital archaeology: data management, analysis, and sharing. Data management involves the design, creation, and curation of digital objects that capture the archaeological process and evidence. Students will gain deep familiarity in working with the main types of digital archaeological data: structured data (relational databases), 3D models/spatial data, and raster images. The class will provide abundant hands-on experience with the latest equipment and software for working with many different kinds of data. We will learn about data analysis techniques through a close examination of a variety of case studies in the literature that demonstrate how other archaeologists have applied digital methods to their archaeological questions. Finally, we will discuss the importance of sharing data through open access data publication and we will apply our skills with structured data to existing online archaeological datasets. The goal of this class is to prepare students to make methodological decisions during future research endeavors, both in the field and in the archaeological lab.
Taught by: PETER COBB
Also Offered As: AAMW 562, CLST 362, CLST 562
Prerequisite: Prior archaeological classwork and/or experience preferred
Activity: Lecture
1 Course Unit

ANTH 402 APPLIED RESEARCH SKILLS IN GLOBAL COMMUNITY HEALTH
While political borders remain, social and human borders fall with the increasing movement of people, ideas, and resources across geographies. What is global becomes local. While biomedical and counting science advance, the human experience and influence remain core to understanding behavior, beliefs, and awareness. What is human remains paramount. The Maya Western Highlands of Guatemala are undergoing health changes (trauma, maternal-infant health, diabetes, mental health) through economic development and continued human migration to and from the US. In this context, Applied Skills in Global Community Health will provide academic and professional skills development in understanding the role of culture, history and politics in the health of a population in transition (demographic, nutritional, epidemiologic, economic). Classroom work will occur in the spring of each year combined with a short (1 or 2 wk) or long term (10 wk) field experiences in the Western Highlands of Guatemala.
Taught by: BARG, BREAM
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: PARTICIPATION IN FIELD WORK REQUIRED, SPANISH LANGUAGE PROFICIENCY REQUIRED FOR 10 WEEK FIELD SCHOOL OPTION

ANTH 404 Introduction to the Human Skeleton
An introduction to the anatomy and biology of the human skeleton. Laboratory work will be supplemented by lectures and demonstrations on the development structure, function, and evolution of the human skeleton.
Taught by: Monge
Course not offered every year
Activity: Lecture
1 Course Unit
ANTH 407 Human Evolution
An examination of fossils and other evidence documenting human evolution. Lectures and readings are supplemented with slide and fossil reproduction materials.
Taught by: Monge
Course not offered every year
Prerequisite: ANTH 003
Activity: Lecture
1 Course Unit

ANTH 415 Archaeology of Animals
This course introduces the study of animal bones from archaeological sites. Faunal analysis is an interdisciplinary science which draws methods from archaeology, biology, and paleontology. Bones, shells, and other remains yield evidence for the use of animals by humans, and evidence for the biology of animals and for past environments. The course will focus on research approaches to important transitions in human-animal relationships: the development of human hunting and fishing, animal domestication, early pastoralism, and the emergence of market economies in animal products. Class presentations will include lectures and discussion concerning research design and archaeological case material, with additional videos, slidework with field and laboratory equipment, and supervised work identifying and describing archaeological materials from the University Museum’s collections. This class is taught in the Zooarchaeology Laboratory of the Center for the Analysis of Archaeological Materials.
Taught by: Moore
Course not offered every year
Prerequisites: ANTH 001 or permission from instructor.
Activity: Lecture
1 Course Unit

ANTH 419 Mining Archaeology
In ancient times, materials such as stone and metals were used to produce artifacts including pigments, jewelry, tools, and weapons. This course is designed to introduce students to research on the early exploitation of mineral resources. Which techniques were used to access and process raw materials in antiquity? Which archaeological methods can be used to investigate these features and artifacts? The course will provide worldwide examples through time, ranging from Stone Age flint mining, Iron Age rock salt mining to Medieval silver mining. Ethnographic studies and hands-on activities will contribute to our understanding of mining in archaeology, and artifacts from the Museum’s collections will undergo scientific analysis in the Center for the Analysis of Archaeological Materials.
Taught by: Jansen
One-term course offered either term
Also Offered As: CLST 419, NELC 419
Activity: Lecture
1 Course Unit

ANTH 424 Political Ecologies of the City
Cities have been centres of aspiration for much of human history. They have provided a limited yet critical locus for social mobility, both in political and economic terms. As large agglomerations of political and economic power, urban residents have also consumed growing proportions of the earth’s mineral, food and water resources from the national (and international) body. The contradictory aspects of urban aspiration frame this course. Drawing on the frameworks of political ecology, in this course we think through the cities of the global south to understand how cities are made. To do this, we will first focus on the construction on the liberal city and how it has been occupied, both formally and informally, by urban subjects in most of the world. Next, we will learn about projects through which natural resources have been directed to and through the city. Finally we will conclude with a particular attention to how urban resources are claimed by marginalized migrants, and the particular sorts of governance institutions these practices engender.
Taught by: Anand
Course not offered every year
Also Offered As: URBS 424
Activity: Seminar
1 Course Unit

ANTH 429 Anthropology of the Environment
This seminar draws from social scientific and scientific literatures to explore current themes in the anthropology of the environment. We will investigate the links between climate change science and social science, and the ways in which anthropologists can contribute via in-depth fieldwork methodology and long engagement in issues of society-environment interactions. We will also explore how potential environmental, social, and biological impacts of global warming on the future are being assessed through conceptual paradigms linked to risk, probability, scenario forecasting, tipping points, planetary boundaries, and extinction.
Taught by: Petryna
Activity: Seminar
1 Course Unit

ANTH 433 Andean Archaeology
Consideration of the culture history of the native peoples of the Andean area, with emphasis on the pre-conquest archaeology of the Central-Andean region.
Taught by: Erickson
Course not offered every year
Also Offered As: LALS 433
Activity: Lecture
1 Course Unit
**ANTH 440 Plants and Society**

Interactions between humans and the living landscape around us have played - and continue to play - a fundamental role in shaping our worldview. This course is designed to introduce students to the diverse ways in which humans interact with plants. We will focus on the integration of ethnographic information and archaeological case studies in order to understand the range of interactions between humans and plants, as well as how plants and people have profoundly changed one another. Topics will include the origins of agriculture; cooking and plant processing; human health and the world of ethnomedicine; and poisonous and psychoactive plants. We will examine ancient plant material firsthand at the Center for the Analysis of Archaeological Materials (CAAM) and will handle botanical ecofacts from the Penn Museum’s collections. Students will also carry out a substantial research project focused on an archaeological culture and plant species of their own interest.

Taught by: WHITE

Course not offered every year

Also Offered As: CLST 441

Activity: Seminar

1 Course Unit

**ANTH 441 Cross Cultural Approaches to Health and Illness**

This course will explore the ways that health and illness-related beliefs and behaviors develop within communities. We will identify the forces that shape these beliefs and behaviors and ultimately affect who gets sick, who gets well, and the very nature of the illness experience. Emphasis will be given to the relationships among sociocultural, political and biological factors and the ways that these factors interact to produce the variation that we see in health and illness related attitudes, behaviors and outcomes across cultures.

Course not offered every year

Also Offered As: HSOC 441

Activity: Seminar

1 Course Unit

**ANTH 451 Historical Archaeology**

Archaeology of the Modern World from the Columbian voyage (1492) to the 20th century. Topics such as the rise of early modern Europe, European exploration and colonization, African American Archaeology, Asian American Archaeology, the rise of colonial society, contact with native peoples, the Industrial Revolution, and the archaeology of the 20th century will be covered.

Taught by: Schuyler

Course not offered every year

Also Offered As: ANTH 751

Activity: Seminar

1 Course Unit

**ANTH 454 Quantitative Analysis of Anthropological Data**

Problem-oriented approach to application of quantitative methods in anthropological research. Emphasis on formulation of specific problems using real data sets by each student in his or her area of interest. The logic of problem solving using quantitative arguments, the investigation of data reliability and representativeness, and the use of statistical arguments in the presentation of results covered in detail. Use of computers as research tools will be an integral part of the presentation.

Taught by: Dibble

One-term course offered either term

Activity: Lecture

1 Course Unit

**ANTH 511 Ethics, Archaeology Cultural Heritage**

This seminar will explore some of the most important issues that are now a central part of archaeological, anthropological and historical research throughout the world. The identification and control of cultural heritage is a central part of the framework for research within other communities. Issues for this course will also include cultural identity, human rights, repatriation, colonialism, working with communities and many other topics. Field research today must be based upon a new series of ethical standards that will be discussed and examined within this class. Major topics include: cultural heritage - definitions and constructs, cosmopolitanism and collecting, archaeology and looting, cultural heritage preservation, museums - universal and national, museum acquisition policies, cultural identity, international conventions (including underwater issues), national laws of ownership, community based development, cultural tourism, development models, and human rights.

Taught by: Leventhal

Course not offered every year

Also Offered As: HIST 512

Activity: Seminar

1 Course Unit

**ANTH 512 Experimental Lithic Technology**

Stone tools are the most significant source of information about past human behavior and evolution over the past 2.5 million years. But because stone technology has been largely abandoned, archaeologists often rely on experiments to help them determine how such tools were made and used. This course will review the kinds of experiments most often used (both actualistic and replicative), but will focus on understanding the mechanics of stone flaking through controlled experiments. As part of their study, students will take part in both designing and implementing a series of experiments involving mechanical flaking of molded glass cores, and will apply the results of this research to archaeological specimens.

Taught by: Dibble

Course not offered every year

Activity: Seminar

1 Course Unit

**ANTH 514 Petrography of Cultural Materials**

Introduction to thin-section petrography of stone and ceramic archaeological materials. Using polarized light microscopy, the first half of this course will cover the basics of mineralogy and the petrography of igneous, metamorphic and sedimentary rocks. The second half will focus on the petrographic description of ceramic materials, mainly pottery, with emphasis on the interpretation of provenance and technology. As part of this course, students will characterize and analyze archaeological samples from various collections. Prior knowledge of geology is not required.

Taught by: Boileau

Course not offered every year

Also Offered As: AAMW 512, CLST 512

Activity: Seminar

1 Course Unit
**ANTH 516 Public Interest Workshop**
This is a Public Interest Ethnography workshop (originally created by Peggy Reeves Sanday - Department of Anthropology) that incorporates an interdisciplinary approach to exploring social issues. Open to graduate and advanced undergraduate students, the workshop is a response to Amy Gutmann's call for interdisciplinary cooperation across the University and to the Department of Anthropology's commitment to developing public interest research and practice as a disciplinary theme. Rooted in the rubric of public interest social science, the course focuses on: 1) merging problem solving with theory and analysis in the interest of change motivated by a commitment to social justice, racial harmony, equality, and human rights; and 2) engaging in public debate on human issues to make research results accessible to a broader audience. The workshop brings in guest speakers and will incorporate original ethnographic research to merge theory with action. Students are encouraged to apply the framing model to a public interest research and action topic of their choice. This is an academically-based-community-service (ABCS) course that partners directly with Penn's Netter Center for Community Partnerships.
Taught by: Suess
Course not offered every year

Also Offered As: ANTH 309, PSYS 309
Activity: Seminar
1 Course Unit

**ANTH 519 Psychoanalysis & Anthropology**
This course will introduce students to the rich literature that has grown up around the encounter between psychoanalysis and anthropology, from totem and taboo, to studies of the Oedipus complex, child-rearing practices, ritual symbolism, mythology, and dreams. The class will also look to the future, endeavoring to examine as well such issues as the role of computers (are they self objects?) and the internet (including such online games as "Second Life"), dreams in space alien abduction narratives, sexuality in advertising, political psychology, and other contemporary issues.
Taught by: Urban
Course not offered every year

Also Offered As: ANTH 309, PSYS 309
Activity: Seminar
1 Course Unit

**ANTH 521 Material World in Archaeological Science**
By focusing on the scientific analysis of inorganic archaeological materials, this course will explore processes of creation in the past. ANTH 521 will take place in the new Center for the Analysis of Archaeological Materials (CAAM) and will be team taught in three modules: analysis of lithics, analysis of ceramics and analysis of metals. Each module will combine laboratory and classroom exercises to give students hands-on experience with archaeological materials. We will examine how the transformation of materials into objects provides key information about past human behaviors and the socio-economic contexts of production, distribution, exchange and use. Discussion topics will include invention and adoption of new technologies, change and innovation, use of fire, and craft specialization.
Taught by: Boileau/Dibble/Jansen
Course not offered every year

Also Offered As: ANTH 221, ARTH 230, CLST 244, NELC 284, NELC 584
Prerequisite: ANTH 002 for undergraduates
Activity: Lecture
1 Course Unit

**ANTH 529 Psychoanalytic and Anthropological Perspectives on Childhood**
This course will consider the interaction between culture and individual psychology, and between nature and nurture from birth to adulthood. Through an examination of phases of human development described by psychoanalysis, and evidence concerning psychoanalytic ideas from around the world, we will consider questions such as: How do people become who they are, both similar to others and uniquely individual? How do we develop emotionally? What features are and are not universal for our species? What is and is not known about these questions. The instructors are both psychoanalysts, one a psychiatrist, one a pediatrician.
Taught by: Lawrence Blum
Course not offered every year

Also Offered As: ANTH 329, PSYS 329
Activity: Seminar
1 Course Unit

**ANTH 533 Archaeobotany Seminar**
In this course we will approach the relationship between plants and people from archaeological and anthropological perspectives in order to investigate diverse plant consumption, use, and management strategies. Topics will include: plants as foods and intoxicating beverages; medicines, poisons, and psychoactive plants; plants as building supplies and textiles; wild plant collection, and the origins of plant domestication. Students will learn both field procedures and laboratory methods of archaeobotany through a series of hands-on activities and lab-based experiments. The final research project will involve an original in-depth analysis and interpretation of archaeobotanical specimens. By the end of the course, students will feel comfortable reading and evaluating archaeobotanical literature and will have a solid understanding of how archaeobotanists interpret human activities of the past.
Taught by: Chantel White
Course not offered every year

Also Offered As: AAMW 539, CLST 543, NELC 585
Activity: Seminar
1 Course Unit

**ANTH 547 Anthropology & Education**
An introduction to the intent, approach, and contribution of anthropology to the study of socialization and schooling in cross-cultural perspective. Education is examined in traditional, colonial, and complex industrial societies.
Taught by: Hall
One-term course offered either term

Also Offered As: EDUC 547, URBS 547
Activity: Lecture
1 Course Unit
ANTH 552 Archaeometallurgy Seminar
This course is designed to provide an in-depth analysis of archaeological metals. Topics to be discussed include: exploitation of ore and its transformation to metal in ancient times, distribution of metal as a raw materials, provenance studies, development and organization of early metallurgy, and interdisciplinary investigations of metals and related artifacts like slag and crucibles. Students will become familiar with the full spectrum of analytical procedures, ranging from microscopy for materials characterization to mass spectrometry for geochemical fingerprinting, and will work on individual research projects analyzing archaeological objects following the analytical methodology of archaeometallurgy.
Taught by: Moritz Jansen
Also Offered As: AAMW 552, CLST 552, NELC 587
Activity: Seminar
1 Course Unit

ANTH 554 Truth, Politics, Ethics: An Anthropological Seminar
This is a reading-intensive seminar geared primarily toward anthropology graduate students who have had some field research experience or are uncovering surprising findings that come from deep ethnographic engagement, and who are now grappling with the implications, production, and narration of evidence for themselves and for larger publics. Drawing from readings in anthropology, philosophy, psychoanalysis, and the history and sociology of science, we will develop our craft as an intimate practice and work of careful translation in the context of a demanding set of readings on the political economy of truth, hypocrisy, ethics, and bias.
Taught by: Petryna
One-term course offered either term
Activity: Seminar
1 Course Unit

ANTH 556 Becoming a Professional Archaeologist
This course (cross-listed as AAMW556) is designed to prepare graduate students for a career in academic archaeology. Topics to be covered include project research design (including logistical planning), acquiring funding (proposal writing), managing grants (including budget planning and reconciliation), publishing, and preparing for entering the job market (writing cover letters and CVs). Students are also encouraged to suggest further topics of interest as the semester goes on. The final project will be the development of a NSF grant proposal, which will be presented and critiqued in stages throughout the semester, and which can serve as the basis for later submission. While much of the focus is on archaeology, students in other disciplines, especially those involving field research, will also benefit.
Taught by: Dibble
Course not offered every year
Also Offered As: AAMW 556
Prerequisites: ANTH 600 and one archaeology area course or permission of instructor
Activity: Seminar
1 Course Unit

ANTH 557 Seminar in Archaeological Theory and Method: Archaeology of Landscapes
Advanced seminar for potential professional archaeologists. Course will examine critically main past and present theoretical issues in archaeological research and interpretation, and consider various methodologies utilized towards these interpretive ends.
Taught by: Erickson
Course not offered every year
Also Offered As: AAMW 557, LALS 557
Prerequisites: ANTH 241 or ANTH 600 and one archaeology area course or permission from instructor
Activity: Seminar
1 Course Unit

ANTH 561 Global Food Security
This is an interdisciplinary course on the problems of food demand and consumption, production and supply in our increasingly globalized and urbanizing world. Special attention will be given to the intersections of current technologies of food production, current nutritional problems, environmental change and resource degradation, and the changing quality of human social life under globalization. Where and how will sufficient nutritious food be produced sustainably and how can the politics and economics of equitable distribution in such large urban populations be achieved?
Taught by: Spooner
One-term course offered either term
Also Offered As: VCSN 657
Activity: Lecture
1 Course Unit

ANTH 567 Living World in Archaeological Science
By focusing on the scientific analysis of archaeological remains, this course will explore life and death in the past. It takes place in the Center for the Analysis of Archaeological Materials (CAAM) and is team taught in three modules: human skeletal analysis, analysis of animal remains, and analysis of plant remains. Each module will combine laboratory and classroom exercises to give students hands-on experience with archaeological materials. We will examine how organic materials provide key information about past environments, human behavior, and cultural change through discussions of topics such as health and disease, inequality, and food.
Taught by: White, Monge, Moore
Course not offered every year
Also Offered As: ANTH 267, CLST 268, CLST 568, NELC 286, NELC 586
Activity: Lecture
1 Course Unit
ANTH 587 Race, Nation, Empire
This graduate seminar examines the dynamic relationships among empires, nations and states; colonial and post-colonial policies; and anti-colonial strategies within a changing global context. Using the rubrics of anthropology, history, cultural studies, and social theory, we will explore the intimacies of subject formation within imperial contexts- past and present- especially in relation to ideas about race and belonging. We will focus on how belonging and participation have been defined in particular locales, as well as how these notions have been socialized through a variety of institutional contexts. Finally, we will consider the relationships between popular culture and state formation, examining these as dialectical struggles for hegemony.
Taught by: Thomas
Course not offered every year
Also Offered As: AFRC 587, LALS 588
Activity: Seminar
1 Course Unit

ANTH 600 Contemporary Archaeology in Theory
This graduate seminar addresses contemporary anthropological archaeology and considers the varied ways inferences are made about past and present human behavior from the archaeological record. It reviews such fundamental topics as the use of analogy, Middle Range theory, symbolism and meaning, social and cultural evolution, ideology and power, feminism and gender, and indigenous (non-Western) perspectives. It also foregrounds basic issues regarding heritage, looting, and ethics.
Course usually offered in fall term
Activity: Seminar
1 Course Unit
Notes: First-year anthropology graduate students.

ANTH 602 Evolutionary Anthropology
This course will explore various subfields of biological anthropology to better understand what it means to be human. Special attention will be paid to current issues and problems in these subfields, and the different ways in which researchers are attempting to understand and uncover the details of human evolution. Among the areas that are explored in this course are paleoanthropology, primatology, human biology, molecular anthropology, evolutionary medicine, epigenetics, and human life history. Specific issues to be explored include the primate roots of human behavior, brain and language evolution, new fossil hominins, the origins of anatomically modern humans, and modern human migration history.
Taught by: Schurr
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: First-year anthropology graduate students.

ANTH 603 Language in Culture and Society
First-year anthropology graduate students or Instructor Permission. Examination of properties of human language which enable social persons to interpret the cultural world and to act within it. Topics include: principles of lexical and grammatical organization; the role of language structure (grammar) and linguistic context (indexicality) in discursive activity; referential uses of language; social interaction; markers of social role, identity, and group-belonging; criteria by which models of linguistic form and function are formulated; the empirical limits within which different models have explanatory value.
Taught by: Agha
Course usually offered in fall term
Activity: Seminar
1 Course Unit
Notes: First-year anthropology graduate students.

ANTH 605 Anthropology of Music
Theories and methods of the ethnomusicological approach to the study of music in culture, applied to selected western and non-western performance contexts.
One-term course offered either term
Also Offered As: COML 605, FOLK 605, MUSC 605
Activity: Seminar
1 Course Unit

ANTH 607 Contemporary Native Americans
This course examines the social and political lives of contemporary Native American Indians in the United States and Canada. Topics include: Indigenous identity; homelands and natural resources; popular culture and media; Indigenous arts and cultural expression; museum representations; athletics; gender relations; tribal recognition and sovereignty; and resistance movements. We will consider the origins of federal programs and legislation that have become essential to the protection of Native American freedoms. Students can expect to gain an appreciation of the complexity and cultural diversity of Native communities and tribal nations and insights into their interactions with other cultures over time.
Taught by: Bruchac
Course not offered every year
Also Offered As: ANTH 307
Activity: Lecture
1 Course Unit

ANTH 617 Contemporary Approaches to the Study of Culture and Society
A critical examination of recent history and theory in cultural and social anthropology. Topics include structural-functionalism; symbolic anthropology; post-modern theory. Emphasis is on major schools and trends in America, Britain, and France.
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: First-year anthropology graduate students.
ANTH 618 Mediated Culture in Contemporary Society
The course examines the role of mass media in organizing and disseminating cultural norms and values in contemporary society. Particular attention is given to two domains of organized social life, namely consumer behavior and public opinion. The course explores the ways in which mass media organize aspects of individual preference and taste, matters of identity and lifestyle, and the sense of belonging to a common culture. Issues of how individuals come to acquire common tastes and opinions, and attempt to vary upon them in defining their positional identities and stakes are central areas of concern. Material from a variety of present-day societies is discussed in comparative terms.
Taught by: Agha
Course not offered every year
Prerequisite: ANTH 603 or Instructor Permission
Activity: Seminar
1 Course Unit

ANTH 620 Directed Reading and Research
To be arranged only by consultation with academic adviser and faculty member(s) to be involved; a proposed syllabus must be presented for approval, and written papers will be required without exception. On approval of these papers one copy must be presented to the Department of Anthropology office for filing.
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: May be repeated for credit

ANTH 621 Directed Field Training and Research
To be arranged only by consultation with academic adviser and the faculty member(s) to be involved; a proposed syllabus must be presented for approval and written papers will be required without exception. On approval of these papers, one copy must be presented to the Department of Anthropology office for filing.
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: May be repeated for credit

ANTH 622 Topics in Physical Anthropology
Humans are characterized by several distinctive life history features, e.g., large babies, late age at puberty and first reproduction, cessation of menstruation long before death, and a long life span. In addition, our reproductive decisions are heavily influenced by society and culture. This seminar will explore human life history from an evolutionary ecology and biocultural perspective, and will analyze the possible contributions of this approach to other disciplines such as demography, sociology, medicine, and public health. We will read and discuss seminal papers and recent developments on the topic.
Course not offered every year
Activity: Seminar
1 Course Unit

ANTH 626 Medical Anthropology: Case Studies and Methods
Intensive analysis of the application of anthropological theory and methodology to problems of human health and health care. Offered for students in the Medical Anthropology Program. Other qualified students may enroll with the permission of instructor.
Taught by: Petryna
Course not offered every year
Prerequisites: Permission of instructor.
Activity: Seminar
1 Course Unit

ANTH 628 Language in Culture and Society: Special Topics
The course is devoted to a single research topic of contemporary interest in linguistic anthropology. Topics vary from year to year. Readings locate current debates in relation to longstanding assumptions in the literature and new directions in contemporary research.
Taught by: Agha
Course not offered every year
Prerequisite: ANTH 603 or Instructor Permission
Activity: Seminar
1 Course Unit

ANTH 630 Ceramics and Ceramic Analysis
Introduction to ceramics, ceramic typology and analysis. Course will utilize largely work done on ancient Near Eastern ceramics, though it is not intended as an introduction to ancient Near Eastern ceramic sequences. Course is intended as a practical introduction for archaeologists to ceramics, the ways ceramics are collected and dealt with in the field, ceramic typology and "laboratory analyses". To provide depth, the course will cover both the ways ceramics have been dealt with in the past and current trends in the study of ceramics.
Taught by: Zettler
Course not offered every year
Also Offered As: ANTH 103
Activity: Seminar
1 Course Unit

ANTH 631 Grammatical Categories
The course is an introduction to grammatical organization in human language for students in linguistic anthropology and associated fields. Primary foci: methods for the analysis of grammatical categories; constituency and propositional content; grammatical typology and universals. Other topics: relationship of grammatical categories to other principles organizing communication, conceptualization and interpersonal conduct; analysis of interlocking category systems; relationship of categories to actual human behavior. Students are encouraged to apply the techniques developed in lectures and assigned readings to the analysis of a non-Indo-European language over the course of the semester.
Taught by: Agha
Course not offered every year
Prerequisite: ANTH 603 or Instructor Permission
Activity: Seminar
1 Course Unit

ANTH 633 Forensic Anthropology
This course will investigate and discuss the various techniques of analysis that biological anthropologists can apply to forensic cases. Topics include human osteology, the recovery of bodies, the analysis of life history, the reconstruction of causes of death, and various case studies where anthropologists have contributed significantly to solving forensic cases. Discussions will include the limitations of forensic anthropology and the application of DNA recovery to skeletal/mummified materials.
Taught by: Monge
Course not offered every year
Also Offered As: ANTH 230, CRIM 230
Activity: Lecture
1 Course Unit
ANTH 634 Feminist Ethnography
This course will investigate the relationships among women, gender, sexuality, and anthropological research. We will begin by exploring the trajectory of research interest in women and gender, drawing first from the early work on gender and sex by anthropologists like Margaret Mead and Ruth Benedict; moving through the 1970s and 1980s arguments about gender, culture, and political economy; arriving at more current concerns with gender, race, sexuality, and empire. For the rest of the semester, we will critically read contemporary ethnographies addressing pressing issues such as nationalism, militarism, neoliberalism and fundamentalism. Throughout, we will investigate what it means not only to "write women's worlds", but also to analyze broader socio-cultural, political, and economic processes through a gendered lens. We will, finally, address the various ways feminist anthropology fundamentally challenged the discipline's epistemological certainties, as well as how it continues to transform our understanding of the foundations of the modern world.
Taught by: Thomas
Course not offered every year
Also Offered As: ANTH 334, GSWS 334, GSWS 634
Activity: Seminar
1 Course Unit

ANTH 636 Mesopotamia: Heartland of Cities and Empires
This course surveys the cultural traditions of ancient Mesopotamia, the land between the Tigris and Euphrates Rivers, a region commonly dubbed "cradle of civilization" or "heartland of cities," from an archaeological perspective. It will investigate the emergence of sedentism and agriculture; early villages and increasingly complex Neolithic and Chalcolithic cultures; the evolution of urban, literate societies in the late 4th millennium; the city-states and incipient supra-regional polities of the third and second millennium; the gradual emergence of the Assyrian and Babylonian "world empires," well-known from historical books of the Bible, in the first millennium; and the cultural mix of Mesopotamia under the successive domination of Greeks, Persians and Arabs. The course seeks to foster an appreciation of the rich cultural heritage of ancient Mesopotamia, an understanding of cultural continuities in the Middle East and a sense of the ancient Near Eastern underpinnings of western civilization.
Taught by: Zettler
Course not offered every year
Also Offered As: ANTH 236, NELC 241
Activity: Lecture
1 Course Unit

ANTH 640 Race, Diaspora & Critique
This course will attempt to engage students in an interdisciplinary conversation about the epistemological, methodological, and political interventions framing/grounding/informing Africana Studies as a scholarly endeavor. Students will be asked to consider the context and content of this evolving field/discipline, examining the ideological and intellectual issues that drive debates within (and critiques of) African-American/Africana Studies (indeed, the very difference in such designations bespeaks important demographic and ideological shifts within the academy and beyond). Students will be introduced to some of the major historical and contemporary literatures in Africana Studies across the humanities and social sciences, emphasizing "diaspora" as a guiding construct and organizing principle. Class discussions will be aimed at expanding students’ knowledge of the sources available for research in Africana Studies - with an eye toward guiding their preparation for future scholarly research informed by the questions and critical conceptualizations emerging from Africana Studies.
Taught by: Thomas
Course not offered every year
Also Offered As: AFRC 640, COMM 740
Activity: Seminar
1 Course Unit

ANTH 643 Globalization And Its Historical Significance
Globalization is one of the most comprehensive topics of our time, and also one of the most controversial. This course assesses the current state of globalization, considering it in terms of economic, political, and cultural change, and follows its progress through the semester. The class will be led through the main topics and debates, introduced to conceptual and empirical tools for framing academic discussion and research about its dynamics, how and when it began, and (most particularly) how it differs from earlier episodes of historical change.
Taught by: Spooner
Course not offered every year
Activity: Seminar
1 Course Unit

ANTH 649 Molecular Anthropology
This course explores the molecular revolution in biological anthropology, and in particular, examines the nature and theory of collecting molecular data to address anthropological questions concerning human origins, evolution and biological variation. Students will review the methods used to analyze molecular genetic data, and learn to draw evolutionary and phylogenetic conclusions from this information.
Taught by: Schurr
Course not offered every year
Also Offered As: ANTH 246
Activity: Seminar
1 Course Unit

ANTH 654 Topics In Anthropology and the Modern World
This course relates anthropological models and methods to current problems in the Modern World. The overall objective is to show how the research findings and analytical concepts of anthropology may be used to illuminate and explain events as they have unfolded in the recent news and in the course of the semester. Each edition of the course will focus on a particular country or region that has been in the news.
Taught by: Spooner
Course usually offered in fall term
Also Offered As: ANTH 100, NELC 281, NELC 681, SAST 161
Activity: Lecture
1 Course Unit
ANTH 655 Methods and Grantwriting for Anthropological Research
This course is designed for third- and fourth-year graduate students in anthropology who are working on their dissertation research proposals and submitting grants. Graduate students from other departments who will be submitting grant proposals that include an ethnographic component are also welcome. Students will develop their proposals throughout the course of the semester, and will meet important fall submission deadlines. They will begin by working with various databases to search funding sources relevant to the research they plan to conduct. In class sessions, they will also work with the professor and their peers to refine their research questions, their methods, the relationship of any previous research to their dissertation fieldwork, and the broader theoretical and "real-world" significance of their proposed projects. Finally, students will also have the opportunity to have live "chats" with representatives from funding agencies, thereby gaining a better sense of what particular foundations are looking for in a proposal.
Taught by: Thomas
Activity: Seminar
Course usually offered in fall term
1 Course Unit

ANTH 658 Discourse-Centered Research Seminar
This seminar explores the interface between discourse, culture, and social processes. It is designed for graduate students in anthropology and related disciplines who (1) wish to study the current literature in linguistic anthropology concerned with discourse-centered approaches to culture; and (2) themselves have or will acquire during the semester discourse materials (texts, recordings, ethnographic data, etc.) that they wish to analyze from an anthropological point view. The instructor will spend time discussing his own past and current research. Class sessions will also include discussion of the writings of contemporary anthropologists investigating culture through discourse. The seminar is designed for maximum flexibility in accommodating students' research interests and needs.
Taught by: Urban
Activity: Seminar
1 Course Unit

ANTH 667 Topics In Psychology & Culture
Our task in this course is to examine some of the ways in which people develop and deploy their identities under the conditions of a rapidly changing world. This task is part of a life-long process, or journey, which begins in one's family of origin and is shaped by the cultural life plan while growing up. Features of the life plan involve creative reflection, taking risks, learning from errors and failures, assessing one's feelings, revising one's operating knowledge, altering one's goals and taking the next steps forward. Life stories then become the repository of one's steps along the way, sometimes challenged by experiences in extreme situations and at other times facilitated by the rituals of our lives. Fulfillment becomes a product of the process of appraisal and of the means of coping with the exigencies of life, including its culmination and ending.
Taught by: Urban
Activity: Lecture
Course not offered every year
1 Course Unit

ANTH 695 Current Topics in Molecular Anthropology
An examination of the nature and theory of collecting molecular data to address biological anthropological questions concerning human origins, evolution and biological variation. Students will review the methods used to analyze molecular genetic data, and learn to draw evolutionary and phylogenetic conclusions from information.
Taught by: Schurr
Activity: Seminar
Course not offered every year
1 Course Unit

ANTH 709 Current Research in Paleoanthropology
An intensive review of the major topics relating to Pleistocene human evolution, focusing on the integration of data from both biology and archeology.
Taught by: Dibble
Activity: Seminar
1 Course Unit

ANTH 717 Cultural Motion Seminar
This is a graduate seminar/workshop for students pursuing research in anthropology at any phase - from preliminary readings, to proposal writing, to dissertation write-up - that deals in some way with cultural motion. Students will be expected to present their own work, and to discuss the work of others, throughout the course of the seminar. The course is appropriate for first or second year graduate students in Anthropology seeking to define a research area or already pursuing research. It is also appropriate for third and fourth year students in the proposal-writing phase. And, finally, the seminar will provide a forum for dissertation-writing students interested in receiving preliminary feedback on their work from peers.
Taught by: Urban
Activity: Seminar
Course not offered every year
1 Course Unit

ANTH 719 Archaeology Field Project
This is a parallel course to ANTH 219, but on the graduate level. It will only be open to select graduate students (i.e. historical archaeology and related disciplines who (1) wish to study the current literature in linguistic anthropology concerned with discourse-centered approaches to culture; and (2) themselves have or will acquire during the semester discourse materials (texts, recordings, ethnographic data, etc.) that they wish to analyze from an anthropological point view. The instructor will spend time discussing his own past and current research. Class sessions will also include discussion of the writings of contemporary anthropologists investigating culture through discourse. The seminar is designed for maximum flexibility in accommodating students' research interests and needs.
Taught by: Urban
Activity: Seminar
Also Offered As: ANTH 219
1 Course Unit

ANTH 720 Archaeology Laboratory Field Project
Follow-up for ANTH 719 and parallel course to ANTH 220. Class will meet in three hour sections on Fridays and Saturdays and will involve the analysis of artifacts, documentary records, oral historic sources and period illustrations collected on Southern New Jersey historic sites that Fall. No previous archaeological or lab experience is required. (Robert L. Schuyler: schuyler@sas.upenn.edu; (215) 898-6965; U Museum 412). Course may be repeated for credit.
Taught by: Schuyler
Activity: Laboratory
1 Course Unit

Notes: Permission of instructor required.
ANTH 730 Readings & Research In Linguistic Anthropology
The course is designed for students and faculty interested in discussing current research and/or research topics in any area of linguistic or semiotic anthropology. The primary intent of the course is to familiarize students with the literature on selected research topics and to develop their own research agendas in the light of the literature. Students may enroll on an S/U basis for 0.5 CU per semester. The course may be repeated for credit up to 4 times.
Taught by: Agha
Two terms. student may enter either term.
Prerequisite: ANTH 603 OR INSTRUCTOR PERMISSION
Activity: Seminar
1 Course Unit

ANTH 747 Archaeology Laboratory Field Project-Summer
This course is a summer version of ANTH 720 (see that course for full description). In summer more emphasis will be placed on field visitations. Course open to all graduate students; no instructor permission needed. Course may be repeated for credit and students may take both ANTH 747 and ANTH 720. Questions: contact Robert L Schuyler; schuyler@sas.upen.edu; (215) 898-6965; Univ Museum 412/6398.
Taught by: Schuyler
Course usually offered summer term only
Also Offered As: ANTH 247
Activity: Laboratory
1 Course Unit

ANTH 750 African American Archaeology
This course will cover the new and productive field of the archaeology of African Americans from the 17th to the 20th centuries. The focus will be on continental North America but some attention will also be given to West Africa (AD 1500 - present) and the West Indies. No background (or previous courses) in archaeology or anthropology is required.
Taught by: Schuyler
Course not offered every year
Activity: Seminar
1 Course Unit

ANTH 751 Historical Archaeology
General background reading and tutorial preparation in the archaeology of the modern world (A.D. 1400- 20th Century).
Taught by: Schuyler
Course not offered every year
Also Offered As: ANTH 451
Activity: Seminar
1 Course Unit
Notes: May be repeated for credit.

ANTH 752 Archaeology of American History- The Colonial Period
Taught by: Schuyler
Course not offered every year
Also Offered As: ANTH 151
Activity: Seminar
1 Course Unit

ANTH 757 Themes In Historical Archaeology
Course will examine research by historical archaeologists on the basic attributes of humanity. Elements that are more biologically grounded (age, gender, race) and elements more purely cultural (ethnicity, class, occupation, nationality, religion) will both be surveyed. Recent field findings and theoretical debates will be covered.
Taught by: Schuyler
Course usually offered in fall term
Activity: Seminar
1 Course Unit

Applied Mathematics & Computational Science (AMCS)

AMCS 510 Complex Analysis
Also Offered As: MATH 410
Activity: Lecture
1 Course Unit

AMCS 514 Advanced Linear Algebra
Also Offered As: MATH 314, MATH 514
Activity: Lecture
1 Course Unit

AMCS 520 Ordinary Differential Equations
Also Offered As: MATH 420
Activity: Lecture
1 Course Unit

AMCS 525 Partial Dif Equations
Also Offered As: MATH 425
Activity: Lecture
1 Course Unit

AMCS 530 Intro to Probability
Also Offered As: MATH 430
Activity: Lecture
1 Course Unit

AMCS 532 Game Theory
Also Offered As: MATH 432
Activity: Lecture
1 Course Unit

AMCS 567 Mathematical and Computational Modeling of Biological Systems.
This is an introductory course in mathematical biology. The emphasis will be on the use of mathematical and computational tools for modeling physical phenomena which arise in the study biological systems. Possible topics include random walk models of polymers, membrane elasticity, electrodiffusion and excitable systems, single-molecule kinetics, and stochastic models of biochemical networks.
Course not offered every year
Also Offered As: BE 567
Prerequisites: BE 324 and BE 350
Activity: Lecture
1 Course Unit

AMCS 599 Independent Study
Activity: Independent Study
1 Course Unit
AMCS 602 Algebraic Techniques for Applied Mathematics and Computational Science, I.
We turn to linear algebra and the structural properties of linear systems of equations relevant to their numerical solution. In this context we introduce eigenvalues and the spectral theory of matrices. Methods appropriate to the numerical solution of very large systems are discussed. We discuss modern techniques using randomized algorithms for fast matrix-vector multiplication, and fast direct solvers. Topics covered include the classical Fast Multipole Method, the interpolative decomposition, structured matrix algebra, randomized methods for low-rank approximation, and fast direct solvers for sparse matrices. These techniques are of central importance in applications of linear algebra to the numerical solution of PDE, and in Machine Learning. The theoretical content of this course is illustrated and supplemented throughout the year with substantial computational examples and assignments.
Course not offered every year
Activity: Lecture
1 Course Unit

AMCS 603 Algebraic Techniques II
We begin with an introduction to group theory. The emphasis is on groups as symmetries and transformations of space. After an introduction to abstract groups, we turn our attention to compact Lie groups, in particular SO(3), and their representations. We explore the connections between orthogonal polynomials, classical transcendental functions and group representations. This unit is completed with a discussion of finite groups and their applications in coding theory.
Course not offered every year
Activity: Lecture
1 Course Unit

AMCS 608 Analysis
Course not offered every year
Also Offered As: MATH 608
Prerequisite: Math 508-509
Activity: Lecture
1 Course Unit

AMCS 609 Analysis
Real analysis continued: general measure theory, outer measures and Cartheodory construction, Hausdorff measures, Radon-Nikodym theorem, the general Fubini theorem. Functional Analysis: Hilbert space and L2-theory of the Fourier transform, normed linear spaces, convexity, the Hahn-Banach theorem, duality for Banach spaces, weak convergence, bounded linear operators, Baire category theorem, uniform boundedness principle, open mapping theorem, closed graph theorem, compact operators, Fredholm theory, interpolation theorems, Lp-theory for the Fourier transform, functional calculus and spectral theory.
Course not offered every year
Also Offered As: MATH 609
Prerequisite: Math 608 or permission of the instructor.
Activity: Lecture
1 Course Unit

AMCS 637 Mesoscale Model and Sim
Also Offered As: MEAM 637, MSE 637
Activity: Lecture
1 Course Unit

AMCS 701 Topics in Applied Math
Also Offered As: MATH 582
Activity: Lecture
1 Course Unit

AMCS 990 Masters Reg Tuition
Activity: Masters Thesis
1 Course Unit

AMCS 999 Independent Study & Research
Activity: Independent Study
1 Course Unit

Arabic (ARAB)

ARAB 031 Elementary Arabic I
This is the beginners course in Modern Standard Arabic (MSA). It will introduce you to the speaking, listening, reading and writing skills in the standard means of communication in the Arab World. The course is proficiency-based, implying that all activities within the course are aimed at placing you, the learner, in the context of the native-speaking environment from the very beginning. Evaluation is done by the more traditional testing methods (vocabulary tests, dictations, grammar and translation exercises). We anticipate that by the end of this course (ARAB 031) students will range in proficiency from Novice High to Intermediate Low on the ACTFL scale; in other words (using the terminology of the government's Foreign Service Institute), from 'incipient survival' to 'full' survival' in the native-speaking environment.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: ARAB 631
Activity: Lecture
1 Course Unit

ARAB 032 Elementary Arabic II
This course is a continuation of ARAB 031/631.
For BA Students: Language Course
Course usually offered in spring term
Also Offered As: ARAB 632
Prerequisite: ARAB 031
Activity: Lecture
1 Course Unit

ARAB 031 Elementary Arabic I
This is the beginners course in Modern Standard Arabic (MSA). It will introduce you to the speaking, listening, reading and writing skills in the standard means of communication in the Arab World. The course is proficiency-based, implying that all activities within the course are aimed at placing you, the learner, in the context of the native-speaking environment from the very beginning. Evaluation is done by the more traditional testing methods (vocabulary tests, dictations, grammar and translation exercises). We anticipate that by the end of this course (ARAB 031) students will range in proficiency from Novice High to Intermediate Low on the ACTFL scale; in other words (using the terminology of the government's Foreign Service Institute), from 'incipient survival' to 'full' survival' in the native-speaking environment.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: ARAB 631
Activity: Lecture
1 Course Unit

ARAB 032 Elementary Arabic II
This course is a continuation of ARAB 031/631.
For BA Students: Language Course
Course usually offered in spring term
Also Offered As: ARAB 632
Prerequisite: ARAB 031
Activity: Lecture
1 Course Unit
ARAB 033 Intermediate Arabic III
This is the continuation of the Elementary course in Modern Standard Arabic (MSA). This course is also proficiency-based, implying that all activities within the course are aimed at placing you, the learner, in the context of the native-speaking environment from the very beginning. As in ARAB 031-032, evaluation is done by the more traditional testing methods (vocabulary tests, dictations, grammar and translation exercises). We anticipate that students range from Intermediate Low to Intermediate High according to the ACTFL scale.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: ARAB 633
Prerequisites: ARAB 032 or equivalent.
Activity: Lecture
1 Course Unit

ARAB 034 Intermediate Arabic IV
This course is a continuation of ARAB 033/633.
For BA Students: Last Language Course
Course usually offered in spring term
Also Offered As: ARAB 634
Prerequisite: ARAB 033
Activity: Lecture
1 Course Unit

ARAB 035 Advanced Intermediate Arabic I
This is a proficiency-based course which continues from the first intermediate course, ARAB 033/034. Emphasis continues to be on all four language skills: Speaking, Listening, Reading, & Writing. The readings for the class are chosen from actual texts from both medieval and modern Arabic in a variety of fields and subjects. Students will be expected to give classroom presentations and to write short essays in Arabic. Evaluation will be both Achievement- and proficiency-based.
For BA Students: Advanced Language Course
Course usually offered in fall term
Also Offered As: ARAB 635
Prerequisite: ARAB 034
Activity: Lecture
1 Course Unit

ARAB 036 Advanced Intermediate Arabic II
This course is a continuation of ARAB 035/635.
For BA Students: Advanced Language Course
Course usually offered in spring term
Also Offered As: ARAB 636
Prerequisite: ARAB 035
Activity: Lecture
1 Course Unit

ARAB 037 Advanced Arabic and Syntax I
Advanced syntax through the reading of Arab grammarians. Development of reading in bulk. Emphasis on classical Arabic read in works by medieval and modern writers. This course is designed to give the student experience in reading whole works in Arabic and giving reports on them.
For BA Students: Advanced Language Course
Course usually offered in fall term
Also Offered As: ARAB 637
Prerequisites: ARAB 036/636 or permission of the instructor.
Activity: Lecture
1 Course Unit

ARAB 039 Colloquial Arabic
A one-semester, introductory course to the spoken Arabic of one of the regions of the Arab world, chosen according to the dialect of instructor.
One-term course offered either term
Also Offered As: ARAB 639
Activity: Lecture
1 Course Unit

ARAB 041 Beginning Arabic I
This is a beginner course in Modern Standard Arabic (MSA). It will introduce you to the speaking, listening, reading, and writing skills in the standard means of communication in the Arab world. The course is proficiency-based, implying that all activities within the course are aimed at placing you, the learner, in the context of the native-speaking environment from the very beginning. Evaluation is done by the more traditional testing methods (vocabulary tests, dictations, grammar and translation exercises). We anticipate that by the end of this course (ARAB 041) students will range in proficiency from Novice High to Intermediate Low on the ACTFL scale; in other words (using the terminology of the government's Foreign Service Institute), from 'incipient survival' to 'full survival' in the native-speaking environment.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: See the LPS Course Guide. **This course does not fulfill the College/Wharton language requirement.

ARAB 042 Beginning Arabic II
Course usually offered in spring term
Prerequisites: ARAB 041 or permission of the instructor. See the LPS Course Guide. **This course does not fulfill the College language requirement.
Activity: Lecture
1 Course Unit

ARAB 043 Continuing Arabic III
This is the continuation of ARAB041 and ARAB 042, the elementary course in Modern Standard Arabic (MSA). This course is also proficiency-based, implying that all activities within the course are aimed at placing you, the learner, in the context of the native-speaking environment from the very beginning. As in ARAB 041-042, evaluation is done by the more traditional testing methods (vocabulary tests, dictations, grammar and translation exercises). Completion of this course fulfills the College of Liberal and Professional Studies language requirement in Arabic but not for the School of Arts and Sciences. However, it should be emphasized that you will need a longer period of study to achieve proficiency in Arabic. We anticipate that students range from Intermediate Low to Intermediate High according to the ACTFL scale.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: See the CLPS Course Guide. **This course does not fulfill the College language requirement.

ARAB 044 Continuing Arabic IV
Course usually offered in spring term
Prerequisites: ARAB 043 or permission of the instructor See the LPS Course Guide. **This course does not fulfill the College language requirement.
Activity: Lecture
1 Course Unit
Notes: See the LPS Course Guide. **This course does not fulfill the College language requirement.
ARAB 131 Intensive Elementary Arabic I&II
This is a six-week intensive beginners' course in Modern Standard Arabic (MSA). It will introduce the student to speaking, listening, reading, and writing skills in the standard means of communication in the Arabic world. The course is proficiency-based, implying that all activities are aimed at placing the student in the context of the native-speaking environment from the very beginning. Evaluation is done by the more traditional testing methods (vocabulary tests, dictations, grammar and translation exercises). We anticipate that by the end of this course (ARAB 041) students will range in proficiency from Novice High to Intermediate Low on the ACTFL scale; in other terms, the government’s Foreign Service Institute “survival” to “full survival” in the native-speaking environment.
For BA Students: Language Course
Course usually offered summer term only
Also Offered As: ARAB 431
Activity: Lecture
2 Course Units
Notes: Offered through the College of Liberal and Professional Studies
Summer Session I.

ARAB 133 Intensive Intermediate Arabic I&II
This is a six-week intensive course offered in the summer through LPS; see the Penn Summer Course Guide. This is the continuation of ARAB 031-032 or ARAB 131, the elementary course in Modern Standard Arabic (MSA). This course is also proficiency-based, implying that all activities within the course are aimed at placing the student in the context of the native-speaking environment from the very beginning. As in ARAB 031-032 or ARAB 131, evaluation is done by the more traditional testing methods (vocabulary tests, grammar and translation exercises).
Completion of this course fulfills the College of Arts and Sciences language requirement in Arabic. However, it should be emphasized that the student will need a longer period of study to achieve proficiency in Arabic. We anticipate that students range from Intermediate Low to Intermediate High according to the ACTFL scale.
For BA Students: Last Language Course
Course usually offered summer term only
Also Offered As: ARAB 530
Activity: Lecture
2 Course Units
Notes: Offered through the College of Liberal and Professional Studies
Summer Session I.

ARAB 135 Intensive Advanced Intermediate Arabic I&II
This is a six-week intensive course offered in the summer through LPS; see Penn Summer Course Guide. It continues from the first intermediate course, ARAB 033/034 or ARAB 133. Emphasis continues to be on all four language skills: speaking, listening, reading, and writing. Students will be expected to give classroom presentations and to write short essays in Arabic. Evaluation will be both achievement-based and proficiency-based. There is no Oral Proficiency Interview at the end of this session, but we anticipate that by the end of this, third year students will range in proficiency from Intermediate High to Advanced Mid on the ACTFL scale.
For BA Students: Advanced Language Course
Course usually offered summer term only
Also Offered As: ARAB 630
Activity: Lecture
2 Course Units
Notes: Offered through the College of Liberal and Professional Studies
Summer Session I.

ARAB 180 Arabic in Residence
The Arabic House is dedicated to practicing Modern Standard Arabic outside of the classroom setting. The group meets two evenings per week for an hour of conversation practice, snacks, and mint tea. Conversations are both casual and group-led. Members are encouraged to bring any questions about their homework from class or about the Arabic language in general. Most activities are held in the Greenhouse of the Class of 1925 building located at 3941 Irving Street. Additional cultural activities may take place in Gregory, elsewhere at Penn or throughout Philadelphia. All students and Arabic enthusiasts, whether graduate or undergraduate, first-semester beginners or native speakers, are welcome to attend. Dedicated undergraduate students may choose to enroll for credit (Arabic 180).
Two terms. student must enter first term.
Activity: Seminar
0.5 Course Units

ARAB 331 Advanced Spoken Standard Arabic
The course will concentrate on the reading and speaking skills at the advanced level. Students will be assigned reading and audio-visual materials on which to prepare oral classroom presentations. Final examination in the course will be based on performance in the oral proficiency interview.
For BA Students: Advanced Language Course
One-term course offered either term
Also Offered As: ARAB 531
Prerequisite: ARAB 036/636
Activity: Lecture
1 Course Unit

ARAB 332 Advanced Arabic Composition
Development of writing skills within a variety of subjects. Extensive readings in various prose techniques and a thorough review of Arabic grammar.
Course not offered every year
Also Offered As: ARAB 532
Prerequisite: ARAB 036/636
Activity: Lecture
1 Course Unit

ARAB 333 Readings in the Qur’an and Tafsir
This course has two goals: to introduce undergraduate students to reading the Qur’an in Arabic, and to enhance the speaking, listening, and writing skills in MSA. Through the reading and study of selected major Qur’anic narratives and commentary (tafsir), students will become familiar with Qur’anic vocabulary, style, recitation practices, and other intricacies of the Qur’anic text. All students will also memorize a short sura of their choice and practice reciting it in an aesthetically appropriate manner (typically suras 1, 112, 113, or 114). Taught in MSA with writing assignments in MSA.
Taught by: Lowry
Course not offered every year
Prerequisites: ARAB 35 or permission of the instructor.
Activity: Seminar
1 Course Unit
ARAB 432 Arabic Readings in Belles-Lettres
This course aims to improve reading skills and vocabulary by introducing students to extensive passages taken from a variety of Arabic literary genres from all periods. Taught in MSA with writing assignments in MSA. For BA Students: Arts and Letters Sector
Course usually offered in fall term
Also Offered As: COLL 226, COML 432
Prerequisite: Proficiency in ARAB 036/636
Activity: Seminar
1 Course Unit

ARAB 433 Arabic Readings in the Social Sciences and the Media
This course trains students to be proficient with written materials and media in MSA. This class will explore the Middle East through timely analysis of Arabic media as well as original analysis of the ideological, intellectual, social, cultural, and religious background to current events, including the Arab Spring and its aftermath. It is intended that, upon completion of this course, students will be able to work independently with a variety of media texts at different levels. Taught in MSA with writing assignments in MSA.
Course offered spring; odd-numbered years
Prerequisites: Completion of ARAB 036/636 or permission of the instructor.
Activity: Lecture
1 Course Unit

ARAB 434 Readings in Arabic Literature
Course not offered every year
Prerequisite: Reading knowledge of Arabic
Activity: Seminar
1 Course Unit

ARAB 435 Readings in Islamics
This course provides practice in reading pre-modern classical Arabic texts drawn from a variety of intellectual disciplines, especially (but not exclusively) the religious sciences. Although the texts in this course are pre-modern, the course reinforces MSA reading skills.
Taught by: Lowry
Course not offered every year
Prerequisites: Completion of ARAB 036/636 Advanced Intermediate Arabic; or permission of the instructor.
Activity: Seminar
1 Course Unit

ARAB 436 Introduction to Pre-Modern Arabic Texts
This course aims to provide incoming graduate students and advanced undergraduate students with an introduction to issues in Arabic grammar and syntax that commonly arise in pre-modern Arabic texts. Students will also be introduced to, and expected to consult, the standard reference works used as aids in reading such texts. Students will be expected to prepare a text or set of texts assigned by the instructor for each session. It is intended that, upon completion of this course, students will be able to work independently with a wide variety of pre-modern Arabic texts. Although the texts in this course are pre-modern, the course reinforces MSA reading skills.
Taught by: Lowry
One-term course offered either term
Prerequisites: Completion of ARAB 036/636 Advanced Intermediate Arabic; or permission of the instructor.
Activity: Seminar
1 Course Unit
Notes: May be taken twice for credit with instructors permission.

ARAB 437 History & Fiction in Ara
Activity: Seminar
1 Course Unit

ARAB 531 Advanced Spoken Standard Arabic
The course will concentrate on the reading and speaking skills at the advanced level. Students will be assigned reading and audio-visual materials on which to prepare oral classroom presentations. Final examination in the course will be based on performance in the oral proficiency interview. Taught in MSA with writing assignments in MSA.
For BA Students: Advanced Language Course
Course usually offered in fall term
Also Offered As: ARAB 331
Prerequisite: ARAB 036/636
Activity: Lecture
1 Course Unit

ARAB 532 Advanced Arabic Composition
Development of writing skills within a variety of subjects. Extensive readings in various prose techniques and a thorough review of Arabic grammar. Taught in MSA with writing assignments in MSA.
Course not offered every year
Also Offered As: ARAB 332
Prerequisite: ARAB 036/636
Activity: Lecture
1 Course Unit

ARAB 533 Readings in Islamic Law
Taught by: Lowry
Course not offered every year
Prerequisites: Completion of ARAB036/636 or permission of the instructor.
Activity: Seminar
1 Course Unit

ARAB 631 Elementary Arabic I
This is the beginner course in Modern Standard Arabic (MSA). It will introduce you to the speaking, listening, reading and writing skills in the standard means of communication in the Arab World. The course is proficiency-based, implying that all activities within the course are aimed at placing you, the learner, in the context of the native-speaking environment from the very beginning. Evaluation is done by the more traditional testing methods (vocabulary tests, dictations, grammar and translation exercises). We anticipate that by the end of this course (ARAB 002) students will range in proficiency from Novice High to Intermediate Low on the ACTFL scale; in other words (using the terminology of the government's Foreign Service Institute), from 'incipient survival' to 'full' survival' in the native-speaking environment.
For BA Students: Language Course
Two terms. student must enter first term.
Also Offered As: ARAB 031
Prerequisites: For the second semester: completion of the first semester or permission of the instructor.
Activity: Lecture
1 Course Unit

ARAB 632 Elementary Arabic II
This course is a continuation of ARAB 031/631.
For BA Students: Language Course
Two terms. student must enter first term.
Also Offered As: ARAB 032
Activity: Lecture
1 Course Unit
ARAB 633 Intermediate Arabic III
This is the continuation of the Elementary course in Modern Standard Arabic (MSA). This course is also proficiency-based, implying that all activities within the course are aimed at placing you, the learner, in the context of the native-speaking environment from the very beginning. This is the continuation of ARAB 031 and ARAB 032, the elementary course in Modern Standard Arabic (MSA). This course is also proficiency-based, implying that all activities within the course are aimed at placing you, the learner, in the context of the native-speaking environment from the very beginning. As in ARAB 031-032, evaluation is done by the more traditional testing methods (vocabulary tests, grammar and translation exercises). We anticipate that students range from Intermediate Low to Intermediate High according to the ACTFL scale.

ARAB 639 Colloquial Arabic
A one-semester, introductory course to the spoken Arabic of one of the regions of the Arab world, chosen according to the dialect of instructor.
Course not offered every year
Also Offered As: ARAB 039
Activity: Lecture
1 Course Unit

ARAB 730 Topics in Islamics
The topic may vary from year to year.
One-term course offered either term
Activity: Seminar
1 Course Unit

ARAB 731 Topics in Islamic Studies
Topics vary from year to year in accordance with the interests and needs of students. Although this course typically focuses on premodern Arabic texts, the readings reinforce MSA reading skills.
Taught by: Lowry
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: ARAB 436 or equivalent

ARAB 733 Arabic Texts in Islamic History
This is a graduate seminar course in which different genres of premodern Arabic texts are covered at the advanced graduate level. Students in this course are expected to be able to read and prepare (vowel, parse, and translate) passages from Arabic texts on a weekly basis and to be able to discuss them critically during the class itself. Topics are chosen to reflect student interest. Recent and potential topics include: Geographers and travel accounts; biographical dictionaries; chronicles; heresiography; poetry; memoir and sira. Although this course typically focuses on premodern Arabic texts, the readings reinforce MSA reading skills.
Taught by: Cobb
Course not offered every year
Prerequisites: ARAB 036 or permission of the instructor.
Activity: Seminar
1 Course Unit

ARCH 102 Introduction to Design
An exploration of the design process utilizing drawing and model-making techniques. Skills of representation and fabrication are introduced in the context of the development of each student's capacity to observe, interpret, and translate design concepts into physical form. The course includes a weekly lecture and a biweekly studio component.
Taught by: Faculty
Course usually offered in spring term
Activity: Lecture
1 Course Unit
ARCH 111 Architecture in the Anthropocene
This course will use architecture and the built environmental as a lens to investigate the emerging field of the environmental humanities. Our goal will be to analyze and understand these new intellectual frameworks in order to consider the relationship between global environmental challenges and the process of constructing the built environment. As such, we will oscillate between social and political theory, environmental history, and architectural history and theory. Issues of importance will include: theories of risk, the role of nature in political conflicts; images, design and environmental communication; and the relationship between speculative design and other narratives of the future. These conceptual frameworks will be read alongside examples of related creative projects in art, literature, and architecture, and will be amplified through presentations and discussions with studio faculty and other visitors to the course.
Taught by: Barber
Course usually offered in fall term
Activity: Seminar
1 Course Unit

ARCH 112 Villa Gardens and Villa Life
This seminar will study the idea of villeggiature (villa life) and the ideology associated with countryside gardens and plantations. In an examination of the circularity of villa ideology across the centuries, other themes will emerge that address the relationship between urban and rural life, between architecture and natural environment and between social, cultural, economic, and political forces and landscape design. These themes will be explored through the study of selected villas and through the reading of sources drawn from villa literature, including architectural and agricultural treatises, epistolary exchanges, and drawings.
Taught by: Giannetto
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ARCH 201 Design Fundamentals I
This studio course develops drawing and model-making skills with emphasis on digital representation and digital fabrication. The capacity of nature-inspired design is explored as a foundation for the creative production of new forms of expression.
Taught by: Faculty
Course usually offered in fall term
Prerequisite: ARCH 102
Activity: Studio
1.5 Course Unit

ARCH 202 Design Fundamentals II
A studio course exploring the relationship between two-dimensional images and three-dimensional digital and physical models. This studio course develops advanced techniques in digital representation and fabrication through an investigation of the theme of inhabitation in architecture.
Taught by: Faculty
Course usually offered in spring term
Prerequisite: ARCH 201
Activity: Studio
1.5 Course Unit

ARCH 301 Design I
An introduction to the design of architecture in the city. Students explore the relationships between two-dimensional patterns and their corresponding three-dimensional interpretations through the orthographic drawings of plan, section, and elevation and three-dimensional digital and physical models.
Taught by: Faculty
Course usually offered in fall term
Prerequisite: ARCH 202
Activity: Studio
2 Course Units

ARCH 302 Design II
An introduction to the design of architecture in the landscape. Issues of mapping, placement, scale, and construction are explored through studio design projects, site visits, and discussions. Course work focuses on the preparation and presentation of design projects emphasizing analytical skills along with the development of imaginative invention and judgment.
Taught by: Faculty
Course usually offered in spring term
Prerequisite: ARCH 301
Corequisite: ARCH 312
Activity: Studio
2 Course Units

ARCH 303 Integrated Product Design Fundamentals
The creation of a successful product requires the integration of design, engineering, and marketing. The purpose of this intensive studio course is to introduce basic concepts in the design of three-dimensional products. For purposes of the course, design is understood as a creative act of synthesis expressed through various modes of 2-dimensional and 3-dimensional representation. The course develops basic design skills ranging from hand sketching to the use of digital modeling software and rapid prototyping. Fulfills the requirement for a design background course in the interdisciplinary graduate program in Integrated Product Design (IPD).
Taught by Wesley
Course usually offered summer term only
Also Offered As: IPD 503
Activity: Studio
1 Course Unit

ARCH 311 Venice: Self-Representation, Performance, and Reception
This course focuses on the city of Venice and its elusive identity as represented in written, visual and built form. Structured as a series of topics and case studies (including primary visual and written sources; buildings and gardens) the course aims to introduce students to the material and cultural landscape of Venice and develop their ability to "read" the urban fabric and its unique physical context by identifying its various features and explaining the political, social, economic and cultural agendas that brought them into existence. The course includes visits to Venice, Van Pelt Library Library and the Philadelphia Museum of Art.
Taught by: Finotti and Fabiani Giannetto
Activity: Seminar
1 Course Unit
ARCH 312 Topics in Theory I
This course examines the development of modern architecture in the early-twentieth century. Case studies and selected texts are used to explore how modern architecture responded to the challenges of the Industrial Revolution and social modernization.
Taught by: Faculty
Course usually offered in spring term
Corequisite: ARCH 302
Activity: Lecture
1 Course Unit

ARCH 316 Systems and Environments: Interdisciplinary History of Architectural Ideas
This seminar will discuss the emergence of 20th century environmentalist thought and practice through the lens of architectural, landscape, and urban practices and ideas. The course does not presuppose advanced knowledge in the histories of architecture, of science, or of environmentalism; rather, it will introduce students to a set of historical and intellectual frameworks broadly aware of and engaged in environmental challenges. The material covered will be relevant to those interested in architecture, art, and urban studies, and students in economics, engineering, political science, and the environmental sciences, as well as in the history of science, will find much to engage. In this sense, the course will also offer an interdisciplinary forum for inquiry and discussion around environmental issues as they are reflected in contemporary scholarly and professional practices.
Taught by: Barber
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ARCH 401 Advanced Design
Content and technique are explored in this studio course through the vehicle of a design project focused on the development of a critical understanding of geometries and mathematics in the representation and fabrication of contemporary architecture.
Taught by: Faculty
Course usually offered in fall term
Prerequisite: ARCH 302
Corequisite: ARCH 411
Activity: Studio
2 Course Units

ARCH 411 Theory II
This course examines the development of geometries in modern architecture. Primary and secondary texts are used to explore the origin and evolution of geometrical thinking in architecture.
Taught by: Faculty
Course usually offered in fall term
Prerequisite: ARCH 312
Corequisite: ARCH 401
Activity: Lecture
1 Course Unit

ARCH 431 Construction I
Course explores basic principles and concepts of architectural technology and describes the interrelated nature of structure, construction and environmental systems. Open to Intensive Majors only.
Taught by: Faculty
Course usually offered in fall term
Also Offered As: ARCH 531
Activity: Lecture
0.5 Course Units

ARCH 432 Construction II
A continuation of Construction I, focusing on light and heavy steel frame construction, concrete construction, light and heavywood and cladding systems and systems building. Open to Intensive Majors only.
Taught by: Faculty
Course usually offered in spring term
Also Offered As: ARCH 532
Prerequisite: ARCH 431
Activity: Lecture
0.5 Course Units

ARCH 433 Building Systems Integration
What makes buildings livable and buildable. After the initial concept design and massing studies are complete the next step is detailing. This seminar will examine the detail, how they can inform and enhance a building's design. The primary goals of a building is that it stands up to external forces, protects inhabitants from the elements and provides a healthy environment. This course will look at the individual components of structure, skin and systems. More importantly though, it will examine the connections between them. The class will begin with lectures examining the different systems and then progress into applying these ideas as a whole to individual studio projects. The final results of this course will be a 3D wall section with accompanying details. These details will be developed in a variety of software as chosen by the student.
Recommended options are Revit, Rhino, AutoCAD.
Taught by: Faculty
Course usually offered in fall term
Also Offered As: ARCH 633
Activity: Seminar
0.5 Course Units

ARCH 434 Environmental Systems II
This course examines the environmental technologies of larger buildings, including heating, ventilating, air conditioning, lighting, and acoustics. Modern buildings are characterized by the use of such complex systems that not only have their own characteristics, but interact dynamically with one another and with the building skin and occupants. Questions about building size, shape, and construction become much more complex with the introduction of sophisticated feedback and control systems that radically alter their environmental behavior and resource consumption. Class meetings are divided between slide lectures, demonstrations, and site visits. Course work includes in-class exercises, homework assignments, and a comprehensive environmental assessment of a room in a building on campus. Open to Intensive Majors only.
Taught by: Faculty
Course usually offered in fall term
Also Offered As: ARCH 534
Prerequisite: ARCH 433
Activity: Lecture
0.5 Course Units

ARCH 435 Structures I
Theory applied toward structural form. A review of one-dimensional structural elements; a study of arches, slabs and plates, curved surface structures, lateral and dynamic loads; survey of current and future structural technology. The course comprises both lectures and a weekly laboratory in which various structural elements, systems, materials and technical principles are explored. Open to Intensive Majors only.
Taught by: Faculty
Course usually offered in fall term
Also Offered As: ARCH 535
Activity: Lecture
0.5 Course Units
ARCH 436 Structures II
A continuation of the equilibrium analysis of structures covered in Structures I. The study of static and hyperstatic systems and design of their elements. Flexural theory, elastic and plastic. Design for combined stresses; prestressing. The study of graphic statics and the design of trusses. The course comprises both lectures and a weekly laboratory in which various structural elements, systems, materials and technical principles are explored. Open to Intensive Design majors only.
Taught by: Faculty
Course usually offered in spring term
Also Offered As: ARCH 536
Prerequisite: ARCH 435
Activity: Lecture
0.5 Course Units

ARCH 437 Parametric Modeling and Construction I
An introduction to the principles of construction using Building Information Modeling (BIM), a process involving the generation and manipulation of digital representations of building components defined as parameters in relation to other components. The course will explore the performance of building materials and methods of on-site and off-site assembly in load-bearing masonry structures and heavy and light wood frame construction. Topics include sustainable construction, emerging and engineered materials, and integrated building practices.
Taught by: Morgan
Course usually offered in fall term
Activity: Seminar
0.5 Course Units

ARCH 438 Parametric Modeling and Construction II
Building materials and the architectural practice have evolved over time but the fundamental processes of construction have remained grounded in the original principles. This course will advance the methods studies in ARCH 437 by examining typical materials and constructionon of "integration" or "high performance" concepts are developed through highly interactive relations between architects and engineers. The integration is influenced primarily by the "process" of collaboration. This process has been imbued by advancements in computational technology that narrowed the gap between the design actors, including architects and engineers. The process of construction is not limited to the skills of the architect but involve the collaboration of multiple fields and the transfer of information between them. To facilitate this, architects produce construction documents and project manuals to describe to a contractor the ways in which the materials listed above should be used and detailed, allowing the vision of the architect to become realized. Over time the production of these drawings has evolved, from a room full of drafters drawing by hand to computer aided design (CAD) to today with Building Information Modeling (BIM). This course will examine this newest form of parametric documentation and demonstrate how the integration of information in modeling and design results in smarter construction practices.
Taught by: Morgan
Course usually offered in spring term
Prerequisite: ARCH 437
Activity: Seminar
0.5 Course Units

ARCH 490 Independent Study
Taught by: Faculty
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: Permission of the Undergraduate Chair.

ARCH 492 Senior Thesis

Course usually offered in spring term
Prerequisite: ARCH 401
Activity: Independent Study
1 Course Unit
Notes: Permission of the Undergraduate Chair

ARCH 500 Summer Preparatory Design Studio
The Summer Preparatory Studio offers an intensive drawing and design experience to candidates for admission to the Graduate Program in Architecture who have not completed the necessary design studio prerequisites or who are required to have additional design experience to qualify for matriculation into the Master of Architecture Professional Degree Program in September. Enrollment in this program does not count towards the Master of Architecture degree. The intent of the drawing component of the course is to familiarize the student with primarily black and white mediums (pencil, charcoal, ink, etc). Exercises are designed to sharpen the student's ability to see selectively and to transform image to paper through both line and tonal renditions in freehand sketch form. Exercises will also familiarize the student with basic drafting skills necessary for architectural communication and provide an introduction to computer-aided design through applications of the intensive Rhino and Illustrator tutorials given in the Digital Navigation course. The design part of the course presents a rhythm of basic three-dimensional design studies and simple architectural studio investigations. These are intended to build fundamental skills and acquaint the student with the architectural issues of form/space, conceptualization, transformation of scale, simple functional and constructional problems and a sensitivity to context. Course enrollment is by permit only. Please contact Sarah Lam (ARCH Dept.) at sarahlam@design.upenn.edu.
Taught by: Mitnick
Course usually offered summer term only
Activity: Studio
2 Course Units

ARCH 501 Design Studio I
An introductory architectural design studio through which students develop critical, analytical and speculative design abilities in architecture. Students develop representational techniques for the analysis of social and cultural constructs, and formulate propositions for situating built form in the arena of the urban and suburban environment. The studio initiates innovation through a sequence of projects, spatial models and rule sets that introduce each student to rule-based design processes—in which a reversal of expectations leads to the creation of novel spaces and structures. It introduces computation, geometric techniques, and digital fabrication. Projects explore the formation of space in relation to the body, and the developments of small scale public programs.
Taught by: Saunders and Faculty
Course usually offered in fall term
Corequisite: ARCH 521
Activity: Studio
2 Course Units
ARCH 502 Design Studio II
This studio explores urban architecture as an embodiment of cultural values. Siting, enclosure of space and tectonic definition are stressed in order to challenge students to project relevant and inventive architectural situations.
Taught by: Fierro and Faculty
Course usually offered in spring term
Corequisite: ARCH 522
Activity: Studio
2 Course Units

ARCH 511 History and Theory I
The first of three required courses in the history and theory of architecture, this is a lecture course with discussion groups that meet weekly with teaching assistants. The course explores fundamental ideas and models of architecture that have emerged over the past three hundred years.
Taught by: Faculty
Course usually offered in fall term
Activity: Lecture
1 Course Unit

ARCH 512 History and Theory II
This course traces the emergence of contemporary issues in the field by exploring the architecture of the twentieth century. Buildings, projects, and texts are situated within the historical constellations of ideas, values, and technologies that inform them through a series of close readings. Rather than presenting a parade of movements or individuals, the class introduces topics as overlaying strata, with each new issue adding greater complexity even as previous layers retain their significance. Of particular interest for the course is the relationship between architecture and the organizational regimes of modernity.
Taught by: Barber
Course usually offered in spring term
Activity: Lecture
1 Course Unit

ARCH 521 Visual Studies I
The study of analysis and projection through drawing and computer visualization
Taught by: Willems
Course usually offered in fall term
Corequisite: Arch 501
Activity: Laboratory
0.5 Course Units

ARCH 522 Visual Studies II
A continuation of the study of analysis and projection through drawing and computer visualization.
Taught by: Willems
Course usually offered in spring term
Corequisite: ARCH 502
Activity: Laboratory
0.5 Course Units

ARCH 531 Construction I
Lecture course exploring the basic principles of architectural technology and building construction. The course is focused on building material, methods of on-site and off-site preparation, material assemblies, and the performance of materials. Topics discussed include load bearing masonry structures of small to medium size (typical row house construction), heavy and light wood frame construction, sustainable construction practices, emerging + engineered materials, and integrated building practices. The course also introduces students to Building Information Modeling (BIM) via the production of construction documents.
Taught by: Trubiano
Course usually offered in fall term
Also Offered As: ARCH 431
Activity: Lecture
0.5 Course Units

ARCH 532 Construction II
A continuation of Construction I, focusing on light and heavy steel frame construction, concrete construction, light and heavyweight cladding systems and systems building.
Taught by: Ryan
Course usually offered in spring term
Also Offered As: ARCH 432
Activity: Lecture
0.5 Course Units

ARCH 534 Environmental Systems II
This course examines the environmental technologies of larger buildings, including heating, ventilating, air conditioning, lighting, and acoustics. Modern buildings are characterized by the use of such complex systems that not only have their own characteristics, but interact dynamically with one another and with the building skin and occupants. Questions about building size, shape, and construction become much more complex with the introduction of sophisticated feedback and control systems that radically alter their environmental behavior and resource consumption. Class meetings are divided between slide lectures, demonstrations, and site visits. Course work includes in-class exercises, homework assignments, and a comprehensive environmental assessment of a room in a building on campus.
Taught by: Braham
Course usually offered in spring term
Also Offered As: ARCH 434
Activity: Lecture
0.5 Course Units

ARCH 535 Structures I
Theory applied toward structural form. A review of one-dimensional structural elements; a study of arches, slabs and plates, curved surface structures, lateral and dynamic loads; survey of current and future structural technology. The course comprises both lectures and a weekly laboratory in which various structural elements, systems, materials and technical principles are explored.
Taught by: Farley
Course usually offered in fall term
Also Offered As: ARCH 435
Corequisite: Arch 535
Activity: Lecture
0.5 Course Units
ARCH 536 Structures II
A continuation of the equilibrium analysis of structures covered in Structures I. The study of static and hyperstatic systems and design of their elements. Flexural theory, elastic and plastic. Design for combined stresses; prestressing. The study of graphic statics and the design of trusses. The course comprises both lectures and a weekly laboratory in which various structural elements, systems, materials and technical principles are explored.
Taught by: Farley
Course usually offered in spring term
Also Offered As: ARCH 436
Corequisite: Arch 536
Activity: Lecture
0.5 Course Units

ARCH 601 Design Studio III
In this studio, students engage architecture in its role as a cultural agent and examine the way buildings establish and organize dynamic relationships between site, program and material. The design of a complex building of approximately 50,000 SF provides the pedagogical focus for this research. Students extend skills in geometrical organization, site analysis and building massing/orientation to relate to program organization, circulation and egress, building systems and materials. The conceptual focus centered on the program of dwelling and how this program can be employed to develop and promote dynamic relationships and conditions through time, both within the building and between the building and the context. Through research and experimentation students integrate ecological processes into their design methodology to support design innovations in the building's structure, its construction assemblies, environmental systems, and materials. Students work towards a high level of design resolution and visual representation, including the articulation of the building structure and its material assembly/enclosure.
Taught by: Jamelle and Faculty
Course usually offered in fall term
Corequisite: ARCH 621
Activity: Studio
2 Course Units

ARCH 602 Design Studio IV
This studio enables students to develop and resolve the design of a building in terms of program, organization, construction and the integration of structures, enclosure and environmental systems as well as life safety issues. Students select from a range of individually-directed studios within this overall framework. Each instructor develops a different approach and project for their section of this studio. Studios incorporate the expertise of external consultants in advanced areas of technology, engineering and manufacturing.
Taught by: Kolatan and Faculty
Course usually offered in spring term
Activity: Studio
2 Course Units

ARCH 611 History and Theory III
This is the third and final required course in the history and theory of architecture. It is a lecture course that examines selected topics, figures, projects, and theories from the history of architecture and related design fields during the 20th century. The course also draws on related and parallel historical material from other disciplines and arts, placing architecture into a broader socio-cultural-political-technological context. Seminars with teaching assistants complement the lectures.
Taught by: Barber
Course usually offered in fall term
Activity: Lecture
1 Course Unit

ARCH 621 Visual Studies III
The final of the Visual Studies half-credit courses. Drawings are explored as visual repositories of data from which information can be gleaned, geometries tested, designs refined and transmitted. Salient strengths of various digital media programs are identified and developed through assignments that address the specific intentions and challenges of the design studio project.
Taught by: Hume
Course usually offered in fall term
Corequisite: Arch 601
Activity: Laboratory
0.5 Course Units

ARCH 631 Technology Case Studies I
A study of the active integration of various building systems in exemplary architectural projects. To deepen students' understanding of the process of building, the course compares the process of design and construction in buildings of similar type. The course brings forward the nature of the relationship between architectural design and engineering systems, and highlights the crucial communication skills required by both the architect and the engineer.
Taught by: Ryan
Course usually offered in fall term
Activity: Lecture
0.5 Course Units

ARCH 638 Technology Special Topics
Several sections are offered from which students make a selection such as: Building Acoustics; Building Envelopes; Building Systems; Lighting and Component Design.
Taught by: Faculty
Course usually offered in spring term
Activity: Seminar
0.5 Course Units
ARCH 671 Professional Practice I
The course consists of a series of workshops that introduce students to a diverse range of practices. The course goal is to gain an understanding of the profession by using the project process as a framework. The course comprises a survey of the architectural profession - its licensing and legal requirements; its evolving types of practice, fees and compensation; its adherence to the constraints of codes and regulatory agencies, client desires and budgets; and its placement among competing and allied professions and financial interests. The workshops are a critical forum for discussion to understand the forces which at times both impede and encourage innovation and leadership. Students learn how architects develop the skills necessary to effectively communicate to clients, colleagues, and user groups. Trends such as globalization, ethics, entrepreneurship, sustainability issues and technology shifts are analyzed in their capacity to affect the practice of an architect.
Taught by: Ryan
Course usually offered in fall term
Activity: Lecture
0.5 Course Units

ARCH 672 Professional Practice II
A continuation of ARCH 671. Further study of the organizational structures of architectural practices today, especially those beyond the architect’s office. The course is designed as a series of lectures, workshops and discussions that allows students and future practitioners the opportunity to consider and develop the analytical skills required to create buildings in the world of practice.
Taught by: Capaldi
Course usually offered in spring term
Activity: Lecture
0.5 Course Units

ARCH 698 Architectural Association (AA), London
An advanced Architectural Design Studio taught by Homa Farjadi in London at the Architectural Association's School of Architecture. Topics engage aspects of urban life and urban form in London, and vary from year to year. During the fifth term of the Master of Architecture program, up to fifteen students a year may enroll for the semester abroad program in London, England. This is coordinated by Prof. Homa Farjadi and is housed at the Architectural Association (AA), located on Bedford Square in the heart of Bloomsbury. Students enroll in a special design studio, ARCH 702, taught by Prof. Farjadi, and in two elective courses offered by the faculty at the AA.
Taught by: Farjadi
Course usually offered in fall term
Activity: Lecture
1 Course Unit

ARCH 701 Design Studio V
A set of Advanced Architectural Design studios are offered from which students select through a lottery. Topics and sites vary by instructor.
Taught by: Rahim and Faculty
One-term course offered either term
Also Offered As: LARP 701
Activity: Studio
2 Course Units

ARCH 702 Design Studio VI
In the final semester of the program, students select from three options: ARCH 702, an advanced design studio, ARCH 704, a research studio, the exploration of a topic or theme established by an individual faculty member or group of faculty members; or ARCH 706, an independent design thesis, the exploration of a topic or theme under the supervision of a thesis advisor.
Taught by: Rahim and Faculty
Course usually offered in spring term
Activity: Studio
2 Course Units

ARCH 703 Advanced Architectural Design Studio
An Advanced Architectural Design Studio specifically tailored to post-professional students. Through this studio, students engage in the challenges and opportunities presented by changes in society, technology, and urban experience. Through design projects, they explore alternative modes and markets for practice, along with new directions and new tools for design.
Taught by: Rahim and Faculty
Course usually offered in fall term
Activity: Studio
2 Course Units

ARCH 704 Advanced Design:Research Studio
In the final semester of the program, students select from three options: 1) An elective design studio, selected from among the advanced architectural design studios offered by the Department of Architecture; 2) a research studio, the exploration of a topic or theme established by an individual faculty member or group of faculty members; or 3) an independent thesis, the exploration of a topic or theme under the supervision of a thesis advisor.
Taught by: Faculty
Course usually offered in spring term
Activity: Studio
2 Course Units

ARCH 706 Independent Thesis
In the final semester of the program, students select from three options: 1) An elective design studio; selected from among the advanced architectural design studios offered by the Department of Architecture; 2) a research studio, the exploration of a topic or theme established by an individual faculty member or group of faculty members; or 3) an independent thesis, the exploration of a topic or theme under the supervision of a thesis advisor.
Taught by: Faculty
Course usually offered in spring term
Activity: Independent Study
2 Course Units

ARCH 708 Environmental Design Studio
An advanced design studio for the MEBD program that synthesizes the concepts and techniques of environmental building design. Topics and materials for the studio are developed in Arch 752: MEBD Research Seminar, and summarized in a research report at the end of studio.
Taught by: Faculty
Course usually offered summer term only
Prerequisites: ARCH-751, ARCH-752, ARCH-753, and ARCH-754
Activity: Studio
2 Course Units
ARCH 714 Museum as Site: Critique, Intervention and Production
In this course, we will take the museum as a site for critique, invention, and production. As architecture, cultural institution, and site of performance, the museum offers many relevant opportunities. Students will visit, analyze, and discuss a number of local exhibitions and produce their own intervention in individual or group projects. Exhibition design, design of museum, the process of curating, producing artworks ranging from paintings to installation and performance, as well as attention to conservation, installation, museum education, and the logistics and economics of exhibitions will be discussed on site and in seminar. These topics and others will be open for students to engage as part of their own creative work produced for the class and an online exhibition.
Taught by: Hornick, Andrea
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ARCH 717 Philosophy of Urban History
Cities are among the most complex entities that arise out of human activity. For some of these cities (Versailles, Washington DC) the process through

ARCH 721 Designing Smart Objects for Play and Learning
Today's children enjoy a wide array of play experiences, with stories, learning, characters and games that exist as physical stand-alone objects or toys enhanced with electronics or software. In this course, students will explore the domain of play and learning in order to develop original proposals for new product experiences that are at once tangible, immersive and dynamic. They will conduct research into education and psychology while also gaining hands-on exposure to new product manifestations in a variety of forms, both physical and digital. Students will be challenged to work in teams to explore concepts, share research and build prototypes of their experiences in the form of static objects that may have accompanying electronic devices or software. Final design proposals will consider future distribution models for product experiences such as 3D printing, virtual reality and software- hardware integration. Instruction will be part seminar and part workshop, providing research guidance and encouraging connections will subject matter experts throughout the Penn campus.
Taught by: Diana
Course usually offered in fall term
Also Offered As: IPD 521
Activity: Seminar
1 Course Unit

ARCH 724 Technology in Design
The aim of this course is to understand the new medium of architecture within the format of a research seminar. The subject matter of new media is to be examined and placed in a disciplinary trajectory of building designed and construction technology that adapts to material and digital discoveries. We will also build prototype with the new media, and establish a disciplinary knowledge for ourselves. The seminar is interested in testing the architecture-machine relationship, moving away from architecture that looks like machines into architecture that behaves like machines: An intelligence (based on the conceptual premise of a project and in the design of a system), as part of a process (related to the generative real of architecture) and as the object itself and its embedded intelligence.
Taught by: Kim, Simon
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ARCH 725 Design Thinking
In this course, students will discover design thinking and learn how to apply it to their work and life. Through lectures and workshops, the course will provide an overview of design and an introduction to the basic elements of design thinking, including immersion, ideation, and iteration. Students will be exposed to methods for conducting human-centered design research, concept generation, prototyping, and idea refinement. These methodologies are taught through a series of projects and exercises, culminating in a single rapid design project in which students will combine all of the tools to develop their designs.
Course usually offered in fall term
Activity: Seminar
1 Course Unit

ARCH 726 Contemporary Furniture Design
This course provides a platform, in the form of furniture, to execute and deploy architectural & engineering principles. It will be conducted as a seminar and workshop, and will introduce students to a variety of design methodologies that are unique to product design. The course will engage in many of the considerations that are affiliated with CAD/CAM production, the appropriate and innovative use of materials, and human factors. Students conduct case studies and research into industrial design processes, and will adapt these processes into techniques for designing a chair. Throughout the semester, students will experience first hand structural and material behavior, and understand ergonomic constraints by testing their design at different scales. The process will include: the production of a final design, its detailing, prototype development, Color/Material/Finishes (CMF), design for Computer Aided Manufacturing (CAM), the possibility of mass customization, research of materials and fabrication methods, optimization studies, Computer Aided Design (CAD), model making, furniture case studies, and a site visit to a major furniture manufacturer.
Taught by: Mueller-Russo
Course usually offered in spring term
Also Offered As: IPD 526
Activity: Seminar
1 Course Unit
**ARCH 727 Industrial Design**

Industrial design (ID) is the professional service of creating and developing concepts and specifications that optimize the function, value and appearance of products and systems for the mutual benefit of both user and manufacturer. Industrial designers develop these concepts and specifications through collection, analysis and synthesis of user needs data guided by the special requirements of the client or manufacturer. They are trained to prepare clear and concise recommendations through drawings, models and verbal descriptions. The profession has evolved to take its appropriate place alongside Engineering and Marketing as one of the cornerstones of Integrated Product Design teams. The core of Industrial Design's knowledge base is a mixture of fine arts, commercial arts and applied sciences utilized with a set of priorities that are firstly on the needs of the end user and functionality, then the market and manufacturing criteria. This course will provide an overview and understanding of the theories, thought processes and methodologies employed in the daily practice of Industrial Design. This includes understanding of ethnographic research and methodologies, product problem solving, creative visual communication, human factors / ergonomics application and formal and surface development in product scale. This course will not enable one to become an industrial designer but will enable one to understand and appreciate what industrial design does, what it can contribute to society and why it is so much fun.

Taught by: Bressler

One-term course offered either term

Also Offered As: IPD 527

Activity: Lecture

1 Course Unit

**ARCH 728 Design of Contemporary Products**

Smart objects are information-based products that are in ongoing dialogs with people, the cloud and each other. By crafting rich interactions, designers can create expressive behaviors for these objects based on sophisticated programmed responses. At the same time, sensor technologies have enabled us to introduce natural gestures as a means of interacting with a product. (Not only can we push, pull and twist a data value, but we can wave at, caress, tilt and shake it as well.) With an explosion of new possibilities for object interaction and human control, it is the designer's role to envision new solutions that are both meaningful and responsible. This course will explore product design solutions through a combination of physical and digital design methods. Beginning with an examination of case studies, students will gain a sense of the breadth of product and interaction design practice as it applies to smart objects. Through a series of lectures and hands-on studio exercises, students will explore all aspects of smart object design including expressive behaviors (light, sound and movement), interaction systems, ergonomics, data networks and contexts of use. The course will culminate in a final project that considers all aspects of smart object design within the context of a larger theme.

Taught by: Diana

Course usually offered in spring term

Also Offered As: IPD 528

Activity: Seminar

1 Course Unit

**ARCH 730 Techniques, Morphology, and Detailing of a Pavilion**

The course will focus on the design, morphology detailing, and the construction of “PennDesign Pavilion inspired by Russel Write Designs” which is set to be constructed in Spring 2016 on a site located at the University of Pennsylvania Campus. The course will develop through hands-on workshops and will focus on acquiring knowledge through making (Techne), understanding the morphological transformation of a given geometric packing, and building using readily available materials. The process consists of building and testing physical models that simulates the actual pavilion. In addition to digital simulation sessions to realize the desired design, which answers to the program developed by PennDesign faculty. The second half of the semester will focus on using lightweight construction materials to fabricate the pavilion’s actual components, including structural elements, molded components, and joints, which are required for pavilion’s final assembly. Additionally students will learn to organize design and fabrication teams, control design and production schedules, and work with set budget, which requires keeping track of construction cost and forecast for required procurements, including material quantities takeoff, ordering and schedule deliveries and receiving.

1 Course Unit

**ARCH 731 Experiments in Structures**

This year's selections include: Deployable Structures, Performance and compressive). In addition to the experiments, we will examine Le Ricolais' systems of both textiles (woven or braided fabrics where both warp and column) with "Modernist" space. We seek the spatial correlates to tensile steel or reinforced concrete structures in flexure (e.g., frame, slab and compression (e.g., vault and dome) correlate with "Classical" space, and structural systems that amplify tension. Experiments using the hand making (Techne), understanding the morphological transformation of a hands-on workshops and will focus on acquiring knowledge through team reports will serve as interim and final examinations. In typology, masonry structures in given geometic packing, and building using readily available materials. In addition to the experiments, we will examine Le Ricolais’ structural models held by the Architectural Archives.

Taught by: Al Khayer

Course usually offered in fall term

Activity: Seminar

1 Course Unit

**ARCH 732 Technology Designated Elective**

Several sections are offered from which students make a selection. This year's selections include: Deployable Structures, Performance and Design, Detailed Design Studies, Daylighting, Principles of Digi/Fab, Matter and Energy, Material and Structural Intelligence.

Taught by: Faculty

Course usually offered in spring term

Activity: Seminar

1 Course Unit

Notes: Please note: MSD-AAD students in their first semester are not permitted to enroll in any ARCH-732 courses.
ARCH 733 Building Product Design
As Craig Vogel notes in The Design of Things to Come, "we are in a new economic age that is in need of a new renaissance in product development, one that leverages multiple minds working in concert." With this mindset, this interdisciplinary workshop guides students through the product design process from design brief to concept generation and prototype development in one semester, working firsthand with Transwall, a leading manufacturer of demountable wall systems, to focus on a specific product need. The design opportunity looks for the next generation of pre-manufactured wall systems; getting away from field construction walls and looking at critical issues of mass-produced wall systems: flexibility, mobility, structural stability, acoustics, transparency/opacity and operability. During the workshop, students will explore the context that creates the unique need for a new product and have an opportunity to conceptualize their ideas through sketches, digital modeling and prototype development.
Taught by: Faculty
Course usually offered in fall term
Also Offered As: IPD 530
Prerequisite: ARCH 403/IPD 503 or ARCH major
Activity: Lecture
1 Course Unit

ARCH 734 Ecological Architecture - Contemporary Practices
Architecture is an inherently exploitive act - we take resources from the earth and produce waste and pollution when we construct and operate buildings. As global citizens, we have an ethical responsibility to minimize these negative impacts. As creative professionals, however, we have a unique ability to go farther than simply being "less bad." We are learning to design in ways that can help heal the damage and regenerate our environment. This course explores these evolving approaches to design - from neo-indigenous to eco-tech to LEED to biomimicry to living buildings. Taught by a practicing architect with many years of experience designing green buildings, the course also features guest lecturers from complementary fields - landscape architects, hydrologists, recycling contractors and materials specialists. Coursework includes in-class discussion, short essays and longer research projects.
Taught by: Woodward
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ARCH 735 Innovation in Design and Health
Health care is taking on a new role in our society - with a refocusing from episodic care for those who are ill or symptomatic to providing life-long care geared towards maintaining wellness. These changes are evident across numerous areas of design, from wearable technologies that track and analyze, to WELL building initiatives that aim to create healthier environments and improve lives through large scale planning initiatives. A concrete, physical representation of this paradigm shift can be found within the hospital building and in the new manner in which hospitals are looking to serve their patients and care for their clinicians. Simultaneously both public and private spaces, hospitals are complex systems in which sickness, health, hospitality, technology, emergency, and community share space and compete for resources. In the development of the new hospital pavilion complex, Penn Medicine, in partnership with HDR, Foster+Partners, and others, has created an integrated project deliver (IPD) system, named PennFIRST. Over the semester, students will work with PennFIRST as their client and focus on the design for key spaces within the new pavilion complex. Through didactic content, active design projects, and a systems level approach, this course will provide students with a strong foundation for further work in the area of design for health and wellness.
Course usually offered in fall term
Activity: Seminar
1 Course Unit

ARCH 737 Semi-Fictious Realms
The pursuit of immersive digital experiences has long been a goal of the computing industry. Early wearable displays designed in the 1960s depicted simple three dimensional graphics in ways that had never been seen before. Through trial and error, digital pioneers reframed the relationship between user and machine, and over the last five decades, have made strides that advanced both the input and output mechanisms we are so comfortable with today. As a field, architecture has been reliant on these advancements to design and document buildings, but these tools still leave the architect removed from the physicality of the design, with their work depicted as 2D lines or 3D planes alone. This course will study the evolutionary advancements made that now allow us to fully inhabit digital worlds through Virtual Reality. Using the HTC Vive and Unreal Engine, students will generate immersive, photorealistic models of unbuilt architectural works and explore digital/physical interactivity. From the terraces of Paul Rudolph’s Lower Manhattan Expressway to Boule’s Cenotaph for Newton, the goal of this course is to breathe new life into places and spaces that have, until this time, never been built or occupied.
Taught by: McAdams, Christopher
Course usually offered in fall term
Activity: Seminar
1 Course Unit
ARCH 738 The Modern House: Technology Then and Now
In the current age of new fabrication methodologies, methods are emerging for the conception and design of the contemporary house which have radical potential for enclosure, habitation and practices of daily life. This course begins by examining the canonical houses of the original avant-garde—Adolf Loos, Frank Lloyd Wright, Le Corbusier, Mies van der Rohe and Alvar Aalto—on the premise that their houses were working manifestos for rethinking space, form and indeed ideas of life itself—all of which were prompted by new concepts of construction. From this spectrum of issues, contemporary houses and contemporary methods and materials will be studied extensively to develop equally new ideas between matter and quotidian life. As the primary task of the course, students will work in teams to develop highly detailed constructive proposals for a portion of a speculative home.

Taught by: Rahim
Course usually offered in fall term
Activity: Seminar
1 Course Unit

ARCH 741 Architecture Design Innovation
The mastery of techniques, whether in design, production or both, does not necessarily yield great architecture. As we all know, the most advanced techniques can still yield average designs. Architects are becoming increasingly adept producing complexity & integrating digital design and fabrication techniques into their design process - yet there are few truly elegant projects. Only certain projects that are sophisticated at the level of technique achieve elegance. This seminar explores some of the instances in which designers are able to move beyond technique, by commanding them to such a degree so as to achieve elegant aesthetics within the formal development of projects.

Taught by: Rahim
Course usually offered in fall term
Activity: Seminar
1 Course Unit

ARCH 743 Form and Algorithm
The critical parameter will be to develop the potential beyond finite forms of explicit and parametric modeling towards non-linear algorithmic processes. We will seek novel patterns of organization, structure, and articulation as architectural expressions within the emergent properties of feedback loops and rule based systems. This seminar will accommodate both introductory and advanced levels. No previous scripting experience is necessary. It will consist of a series of introductory sessions, obligatory intensive workshops, lectures followed by suggested readings, and will gradually focus on individual projects. Students will be encouraged to investigate the limits of algorithmic design both theoretically and in practice through a scripting environment.

Taught by: Balmond/Blasetti
Course usually offered in fall term
Activity: Seminar
1 Course Unit

ARCH 744 Postdigital Craft
As we have entered a postdigital era, the dominance of a purely technological approach as a vehicle for design innovation has waned. Questions of substance and disciplinary autonomy have found their way back into the contemporary cultural discourse, enriching the way we examine and deploy advanced technologies towards novel expressions in architecture. This seminar will investigate, through the production of estranged objects, opportunities for design that are being generated at the intersection of machinic and human minds, and speculate on possible futures in which concepts of nature and technology have been inseparably intertwined.

Taught by: Kolatan
Course usually offered in spring term
Also Offered As: IPD 544
Activity: Seminar
1 Course Unit

ARCH 750 Parafictional Objects
This representation/design seminar explores the aesthetics of estrangement in realism through various mediums. The reality of the discipline is that architecture is a post-medium effort. Drawings, Renderings, Models, Prototypes, Computations, Simulations, Texts, and Buildings are all put forward by architects as a speculative proposal for the reality of the future. Students will explore the reconfiguration of a "found object" in multiple mediums and represent parafictional scenarios in various techniques of realism. At a time when rendering engines enable the production of hyper-realistic images within the discipline without any critical representational agenda, it has become ever more imperative to rigorously speculate on realism.

Taught by: Ayata, Ahmet Kutan
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ARCH 751 Ecology, Technology, and Design
This course will examine the ecological nature of design at a range of scales, from the most intimate aspects of product design to the largest infrastructures, from the use of water in bathroom to the flow of traffic on the highway. It is a first principle of ecological design that everything is connected, and that activities at one scale can have quite different effects at other scales, so the immediate goal of the course will be to identify useful and characteristic modes of analyzing the systematic, ecological nature of design work, from the concept of the ecological footprint to market share. The course will also draw on the history and philosophy of technology to understand the particular intensity of contemporary society, which is now characterized by the powerful concept of the complex, self-regulating system. The system has become both the dominant mode of explanation and the first principle of design and organization.

Taught by: Braham
Course usually offered in fall term
Activity: Lecture
1 Course Unit
ARCH 752 MEBD Research Seminar
Directed student research of selected topics in environmental building design. These topics will be further explored in ARCH 708: MEBD Studio and will provide the basis for the research documents developed with each student’s design project. Course work will include lectures, discussions, weekly readings, and in-class exercises. Each student will be required to make a presentation and submit a research report.
Taught by: Braham
Course usually offered in fall term
Activity: Seminar
1 Course Unit

ARCH 753 Building Performance Simulation
The course provides students with an understanding of building design simulation methods, hands-on experience in using computer simulation models, and exploration of the technologies, underlying principles, and potential applications of simulation tools in architecture. Classroom lectures are given each week, with a series of analysis projects to provide students with hands-on experience using computer models. This course is required and reserved for MEBD students.
Taught by: Yi
Course usually offered in fall term
Activity: Lecture
1 Course Unit

ARCH 754 Performance Design Workshop
The workshop applies simulation and diagramming techniques to a series of discrete design projects at different scales. The emphasis is on refinement and optimization of performance based building design. Performance analysis techniques can provide enormous amounts of information to support the design process, acting as feedback mechanisms for improved performance, but careful interpretation and implementation are required to achieve better buildings. Energy, lighting, and air flow are the three main domains covered in the workshop. Students will learn how to utilize domain tools at an advanced level, and utilize them as applications to examine the environmental performance of existing buildings. Using the results of analytical techniques, the students will develop high-performance design strategies in all three domains.
Taught by: Yi
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ARCH 752 Design and Development
This course provides an introduction to the relationship between architectural design and real estate development. Following a discussion of fundamentals, examples focus on commercial building types, and illustrate how architectural design can contribute to real estate development. Topics include housing design, commercial buildings, adaptive reuse, downtown development, mixed-use projects, and planned communities. The course consists of lectures, reading assignments, short essays, a group project, and an midterm test. Invited lecturers include architects and real estate developers. Readings consist of a Bullpack available from Wharton Reprographics. There is one course text: Witold Rybczynski, “Last Harvest.”
Taught by: Sehnert
Course usually offered in spring term
Also Offered As: CPLN 643
Activity: Lecture
1 Course Unit

ARCH 756 Project Management
This course is an introduction to techniques and tools of managing the design and construction of large, and small, construction projects. Topics include project delivery systems, management tools, cost-control and budgeting systems, professional roles. Case studies serve to illustrate applications. Cost and schedule control systems are described. Case studies illustrate the application of techniques in the field.
Taught by: Capaldi
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ARCH 782 Architecture Study Abroad Program
A four to six week program of study in locations that vary, such as Paris, Greece and Colombia. Summer 2017: ARCH-782-901 Paris, France: May 29 to July 1 2017. ARCH-782-902 Greece: May 17 to June 14, 2017 ARCH-782-903 Colombia: May 16 to June 12, 2017. For additional information please contact the Architecture Department directly: arch@design.upenn.edu.
Taught by: Fierro and Faculty
Course usually offered summer term only
Activity: Studio
1 Course Unit

ARCH 791 ARCH Summer Institute: Digiblast I: Fundamentals of 3D Modeling
This is a non-credit course for entering Master of Architecture students. The course will cover digital modeling and workflow and will prepare students for techniques used in PennDesign's 500 and 600 level design studios. Course fee: $650.00. Note: course fees apply only to students who are NOT enrolled in ARCH-500, in addition to ARCH-791. Course enrollment is by permit only. Please contact Sarah Lam (ARCH Dept.) at sarahlam@design.upenn.edu.
Taught by: Blasetti and Willems
Course usually offered summer term only
Activity: Studio
0 Course Units

ARCH 792 ARCH Summer Institute: Digiblast II: 3d Modeling and Fabrication
This is a non-credit course for entering Master of Architecture students. The course will cover digital modeling and workflow. The course will prepare students for techniques used in PennDesign's 500 and 600 level design studios. Course fee: $750.00. Course enrollment is by permit only. Please contact Sarah Lam (ARCH Dept.) at sarahlam@design.upenn.edu.
Taught by: Blasetti and Willems
Course usually offered summer term only
Activity: Studio
0 Course Units

ARCH 793 ARCH Summer Institute: History of Architecture
This is a non-credit course for entering Master of Architecture students. The course will cover western architecture from ancient Egypt to the modern age and will satisfy the history pre-requisite condition for matriculation in the fall. Course fee: $750.00. Course enrollment is by permit only. Please contact Sarah Lam (ARCH Dept.) at sarahlam@design.upenn.edu.
Taught by: Faculty
Course usually offered summer term only
Activity: Lecture
0 Course Units
ARCH 794 ARCH Summer Institute: Physics for Architects
This is a non-credit course for entering Master of Architecture students. The course will cover the following: mechanics, heat, light, sound and electricity. The course will satisfy the physics pre-requisite condition for matriculation in the fall. Course fee: $750.00 Course enrollment is by permit only. Please contact Sarah Lam (ARCH Dept.) at sarahlam@design.upenn.edu.
Taught by: Farley
Course usually offered summer term only
Activity: Lecture
0 Course Units

ARCH 795 ARCH Summer Institute: Advanced Architectural Design Digital Workshop
This is a non-credit course for entering Master of Science in Design: Advanced Architectural Design students. The Digital Methods workshop provides a comprehensive introduction to four elements critical to the workflow of the graduate studios at PennDesign: 3D modeling, scripting, visualization and fabrication. Short daily lectures situating digital technologies in contemporary design practice are followed by hands-on tutorials in Maya and Rhinoceros. The first half of the workshop provides an operative knowledge of the many geometry types, modeling techniques, scripting languages and simulation tools available for studio work. Visualization techniques are also introduced, and students will learn to efficiently produce presentation-quality renderings, animations and technical line drawings from digital models. Students also learn protocols transferring data between various design software packages and how to for create data compatible with PennDesign's digital fabrication equipment. Course fee: $575.00 Course enrollment is by permit only. Please contact Sarah Lam (ARCH Dept.) at sarahlam@design.upenn.edu.
Taught by: Blasetti and Willems
Course usually offered summer term only
Activity: Studio
0 Course Units

ARCH 811 Architectural Research
This course has three parts. All incoming students in the M.S. and Ph.D. programs should attend the first, and register for either the second or the third sections. The first part consists of a series of presentations by members of the Graduate Group in Architecture. The several presentations will address the topics the faculty are currently examining and will demonstrate different methods or styles of research. The other two sections of this course address basic concepts, texts, and methods in 1) history and theory, and 2) technology and simulation.
Taught by: Leatherbarrow and Faculty
Course usually offered in fall term
Also Offered As: ARCH 711
Activity: Seminar
1 Course Unit

ARCH 812 Field Research
First year Ph.D. and M.S. students will use this course to register for a research elective in their field of study. Courses to be taken will be selected from a list of electives offered by members of the Graduate Group of Architecture, typically the seminars offered by those faculty at the Masters level. At the outset of the course Ph.D. and M.S. students will discuss and decide with the professor the readings, research, and writings that will be appropriate for the course, given the student's field of study.
Taught by: Faculty
Course usually offered in spring term
Activity: Independent Study
1 Course Unit

ARCH 813 Qualifying Research
This is an independent study course for first year Ph.D. and M.S. students, supervised by a member of the Graduate Group in Architecture. A course of readings and advisors sessions throughout the semester will result in an independent study paper, which will also be used as the student's qualifying paper for the Qualifying Examination. This research paper will be prepared as if for scholarly publication.
Taught by: Faculty
Course usually offered in spring term
Activity: Independent Study
1 Course Unit

ARCH 815 Research Report
The candidate for the M.S. in Architecture degree shall prepare a research report in his or her subject of study. The topic of this report must be approved by an advisor. This report will be developed in the independent study courses, undertaken after the eight units of course work has been completed, normally in the summer semester. The purpose of these courses is to give the student an opportunity to synthesize their previous coursework at Penn. Course enrollment is by permit only. Please contact Leigh Anne Scarborough (ARCH Dept.) at lascarbo@sas.upenn.edu.
Taught by: Faculty
Course usually offered in fall term
Activity: Independent Study
2 Course Units
ARCH 816 Advanced Topics in Architecture Culture from World War II through 2001
This seminar will be taught as an advanced section of ARCH 512. It is primarily for students who are in their first year of the PhD program in Architecture but it is open to other upper-level students with instructor permission. In addition to the weekly discussion-format seminar on Tuesday afternoons (1.5 hours), students are also expected to attend the lectures associated with ARCH 512 on Tuesday mornings (10:30-12). Assigned readings will go beyond those on the 512 syllabus to include more complex and sophisticated source material. The subject of both ARCH 512 and 812 is the evolution of the culture of architecture from World War II to the turn of the twenty-first century. Starting with the period of wartime planning and postwar reconstruction in the 1940s, we will move decade by decade up to the present century, considering the transformations of modernist culture under the impact of social, political, technological, and urban changes. We will address the challenges posed to architecture from inside as well as outside the discipline and from around the world, attending to material and ideological developments and to relations between individual protagonists and larger historical and institutional forces. Among the wide range of issues at stake are the impact of research and technology coming out of the world war; the intensifying critique of interwar functionalism and debates over monumental humanism, regionalism, history, aesthetics; the effects of suburbanization, expanded mobility, changing demographics, and environmental factors; the phenomena of consumer culture and mass media; the impact of the Cold War and decolonization; the emergence of a "global village" and its intensifying cultural exchanges; the rise of a new architectural avant-garde in the 1960s and the advent of postmodernism; plus more recent ramifications. At the level of theory and methodology, the seminar will be especially concerned with issues of periodization and documentation. We will discuss and debate the question of how "architecture culture" is produced and reproduced at particular moments in history. Seminar discussions will be focused around specific case studies, some to be determined by the instructor, the rest based on in-depth individual research products to be carried out by the members of the class. Each student will work on his or her case-study project over the course of the semester, leading to an in-class presentation and a term paper of 25 pages.
Taught by: Ockman
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ARCH 851 Dissertation Bibliography
This course is essentially an independent study, undertaken by doctoral students in preparation for the Candidacy Examination. This course should be taken in conjunction with ARCH 852 after all other courses have been completed. Normally a member of the student's Dissertation Committee supervises this course.
Taught by: Faculty
Two terms. student may enter either term.
Activity: Independent Study
1 Course Unit

ARCH 852 Dissertation Proposal
This course is essentially an independent study, undertaken by doctoral students in order to write the Proposal for the Dissertation. The Proposal is prepared before and defended during the Candidacy Examination. This course should be taken in conjunction with ARCH 852 after all other courses have been completed. Normally a member of the student's Dissertation Committee supervises this course.
Taught by: Faculty
Two terms. student may enter either term.
Activity: Independent Study
1 Course Unit

ARCH 999 Independent Study
This course enables student to undertake a self-directed study on a topic in Architecture, under the supervision of a faculty member. Students are required to make a proposal for the study to the Department Chair, outlining the subject and method of investigation, and confirming the course supervisor at least two weeks prior to the beginning of the semester.
Taught by: Faculty
One-term course offered either term
Activity: Independent Study
1 Course Unit

Art & Archaeology of the Mediterranean World (AAMW)

AAMW 401 Introduction to Greek Archaeology
An introduction to the art and archaeology of ancient Greece from the Archaic through Hellenistic periods. Topics to be considered include the formation of the Greek polis, the rising and falling fortunes of Athens and the other Greek city-states in the Classical period, and the world of Alexander the Great. Emphasis is placed on the consideration of the archaeological evidence, e.g., sculpture, painting, pottery, architecture, and other material culture. This course is part of a sequence of introductory courses (with Ages of Homer and Introduction to Roman Archaeology) on the archaeology of the Greco-Roman world. There are no prerequisites, and these courses need not be taken in a particular order. Course not offered every year
Also Offered As: CLST 275
Activity: Lecture
1 Course Unit

AAMW 413 Ancient Athletics
The art, archaeology and history of athletics in ancient Greece. Among the topics to be included are: famous Greek athletes, female athletes, the ancient Olympic Games and other athletic festivals, ancient athletic facilities and equipment, the excavation of ancient athletic sites and practical athletics.
Taught by: Romano
Course not offered every year
Activity: Lecture
1 Course Unit

AAMW 424 Art of Mesopotamia
A survey of the art of Mesopotamia from 4000 B.C. through the conquest of Alexander the Great.
Taught by: Pittman
One-term course offered either term
Also Offered As: ARTH 224, ARTH 624
Activity: Lecture
1 Course Unit
AAMW 427 Roman Sculpture
Survey of the Republican origins and Imperial development of Roman sculpture - free-standing, relief, and architectural - from ca. 150 BC to 350 AD. We concentrate on sculpture in the capital city and on court and state arts, emphasizing commemorative public sculpture and Roman habits of decorative display; genres examined include relief, portraits, sarcophagi, luxury and minor arts(gems, metalwork, coinage). We evaluate the choice and evolution of styles with reference to the functions of sculptural representation in Roman culture and society.
Taught by: Kuttner, Rose
Course not offered every year
Also Offered As: ARTH 427, CLST 427
Activity: Lecture
1 Course Unit

AAMW 428 Hellenistic Art and Spectacle
Hellenistic usually names art in the age of Mediterranean culture from the 4th century BCE and the rise of Alexander the Great's Macedon, and the Greco-Macedonian conquest of the Persian Empire, to Cleopatra of Egypt's defeat by Rome at the end of the Republic. Our course looks also at the age of Augustus and his successors, 1st century CE. While Greek and Macedonian practice in city-states and kingdoms is our launching point, this course also looks at international culture and cultural interaction among peoples from North Africa and Etrusco-Roman Italy, Egypt, (Etrusco) Anatolia, the Mideast and Central Asia. We probe art, artifacts, and visual display from a range of settings, from sanctuary to house, palace and parade, and in all media, from marble monuments to pottery and jewelry. Our archaeology of Hellenistic visual culture also looks at the rich body of Hellenistic and Roman texts of art history, art criticism, and the description of objects and image, to better understand the Hellenistic maker, patron, and viewer. No prerequisites. It is desirable for undergraduates to have experience of research. Of interest to students in AAMW, ARTH, ANCH, CLST, VLST, NELC, RELS and ANTH.
Taught by: Kuttner
One-term course offered either term
Also Offered As: ARTH 428
Activity: Lecture
1 Course Unit

AAMW 432 Early Christian and Byzantine Architecture
Architecture and its decoration from Early Christian times in East and West until the sixth century A.D., and in the Byzantine lands until the Turkish Conquest.
Taught by: Ousterhout
Also Offered As: ARTH 432
Activity: Lecture
1 Course Unit

AAMW 435 Medieval Islamic Art & Architecture
An introduction to the major architectural monuments and trends, as well as to the best-known objects of the medieval (seventh-to fourteenth-century) Islamic world. Attention is paid to such themes as the continuity of late antique themes, architecture as symbol of community and power, the importance of textiles and primacy of writing. Suitable for students of literature, history, anthropology as well as art history.
Taught by: Holod
Course not offered every year
Also Offered As: ARTH 435, COML 415, NELC 489
Activity: Lecture
1 Course Unit

AAMW 477 Archaeological Chemistry
Taught by: McGovern
Course not offered every year
Also Offered As: HSPV 577
Activity: Seminar
1 Course Unit

AAMW 509 Curatorial Seminar
Spring 2015: Practiced in almost all ancient cultures, magic offered ways of managing or understanding the present, controlling supernatural agencies, and seeing the future. The objects and images associated with magical practices are rich and varied and are well represented in the University of Pennsylvania Museum. The aim of the seminar is to prepare an exhibit on magic and divination, working with the archaeological collections of the UPM, specifically the Ancient Near Eastern, Egyptian, and Mediterranean sections. It will include objects such as amulets, curse tablets, incantation bowls, and magical papyri, as well as images representing magical practices. Participating students will select and research objects and prepare wall texts for the exhibit.
Course not offered every year
Also Offered As: ARTH 501, NELC 501
Activity: Seminar
1 Course Unit

AAMW 512 Petrography of Cultural Materials
Introduction to thin-section petrography of stone and ceramic archaeological materials. Using polarized light microscopy, the first half of this course will cover the basics of mineralogy and the petrography of igneous, metamorphic and sedimentary rocks. The second half will focus on the petrographic description of ceramic materials, mainly pottery, with emphasis on the interpretation of provenance and technology. As part of this course, students will characterize and analyze archaeological samples from various collections. Prior knowledge of geology is not required.
Course not offered every year
Also Offered As: ANTH 514, CLST 512
Activity: Seminar
1 Course Unit

AAMW 520 Topics in Aegean Bronze Age
Topic varies. Spring 2015: Double axes, horns of consecration, and images of a prominent female goddess were powerful cult symbols for both the Minoans and the Mycenaeans. And indeed, it was originally thought that these two cultures practiced the same religion. But closer examination of textual and archaeological evidence reveals that despite the similarities in their respective iconographies, the religions had significant differences, differences that must have arisen from their different cultural backgrounds. In this course we will look at many different types of evidence Linear A and B texts, archaeological sites and mortuary remains, cult objects such as rhyta and figurines, and artistic renderings of religious scenes found on gold rings and frescoes so that together we can attempt to reconstruct the ritual practices of these religions. We will also use these physical manifestations to consider more broadly the nature not only of the Minoan and Mycenaean religions, but also of the Minoan and Mycenaean cultures.
Course not offered every year

Taught by: Pittman
Course not offered every year
Also Offered As: ARTH 523
Activity: Seminar
1 Course Unit

AAMW 525 Topics in Greek and Roman Art
Topic varies. Spring 2016: Rome and its world became dense with monuments, artifacts, images, structures, spaces which addressed individual and collective concerns that we can call political. In private and public displays, these concerns included citizenship and class standing, public achievement and power, the construction of social memory, and the very nature of being Roman in a city, republic, empire. Of interest here also are the roles of women and of the empire's indigenous peoples. Such displays often engaged, too, with religion, in a providential understanding of historical event. Cases range from displays of high design, 'art', to seemingly crude graphic communications; all shed light on Roman visual language, and its makers, patrons and spectators. Of especial interest to students in ArtH, AAMW, AncH, ClSt, RelSt, Anthro. No prior background in ancient Roman studies or art history/archaeology required. Open to advanced undergraduates with permission of the instructor.
Taught by: Kuttner, Brownlee, A.
Course not offered every year
Also Offered As: ARTH 525, CLST 521

AAMW 546 Museum Internship
The Museum Internship in the spring consists of a research project with Penn Museum collections based on a proposal designed and approved during the fall AAMW Proseminar (AAMW 526). It is offered to, and is a requirement for, first-year AAMW graduate students only.
Course usually offered in spring term
Activity: Independent Study
1 Course Unit
AAMW 556 Becoming a Professional Archaeologist
This course (cross-listed as ANTH556) is designed to prepare graduate students for a career in academic archaeology. Topics to be covered include project research design (including logistical planning), acquiring funding (proposal writing), managing grants (including budget planning and reconciliation), publishing, and preparing for entering the job market (writing cover letters and CVs). Students are also encouraged to suggest further topics of interest as the semester goes on. The final project will be the development of a NSF grant proposal, which will be presented and critiqued in stages throughout the semester, and which can serve as the basis for later submission. While much of the focus is on archaeology, students in other disciplines, especially those involving field research, will also benefit.
Taught by: Cobb
One-term course offered either term
Also Offered As: ANTH 600 and one archaeology area course or permission of instructor
Activity: Seminar
1 Course Unit

AAMW 557 Seminar in Archaeological Theory and Method: Archaeology of Landscapes
Topic varies.
Course not offered every year
Also Offered As: ANTH 557, LALS 557
Activity: Seminar
1 Course Unit

AAMW 562 Introduction to Digital Archaeology
Digital methods allow archaeologists to approach research questions about the human past with increasing accuracies on larger datasets and at multiple scales. This class introduces students to the three main steps of digital archaeology: data management, analysis, and sharing. Data management involves the design, creation, and curation of digital objects that capture the archaeological process and evidence. Students will gain deep familiarity in working with the main types of digital archaeological data: structured data (relational databases), 3D models/spatial data, and raster images. The class will provide abundant hands-on experience with the latest equipment and software for working with many different kinds of data. We will learn about data analysis techniques through a close examination of a variety of case studies in the literature that demonstrate how other archaeologists have applied digital methods to their archaeological questions. Finally, we will discuss the importance of sharing data through open access data publication and we will apply our skills with structured data to existing online archaeological datasets. The goal of this class is to prepare students to make methodological decisions during future research endeavors, both in the field and in the archaeological lab.
Taught by: Cobb
Also Offered As: ANTH 362, CLST 362, CLST 562
Prerequisite: Prior archaeological classwork and/or experience preferred
Activity: Lecture
1 Course Unit
Notes: Please note that this is a lecture course with an undergraduate and graduate section.

AAMW 601 Archaeology and Greek History
An examination of archaeological evidence relevant to selected problems in Greek history.
Course not offered every year
Also Offered As: ANCH 601, CLST 601
Activity: Seminar
1 Course Unit

AAMW 603 Archaeology & The Greek Theater
This course will examine the written and especially the archaeological evidence for the production of Greek drama. Topics will include the theater buildings themselves, stage machinery, scene painting, and costumes. The main chronological focus will be on the fifth and fourth centuries B.C., but some attention will be paid to later developments.
Course not offered every year
Activity: Seminar
1 Course Unit

AAMW 611 Greek Epigraphy
An introduction to the principles and practices of Greek Epigraphy. Study of selected Greek inscriptions.
Taught by: McInerney
One-term course offered either term
Also Offered As: ANCH 611, CLST 611, GREK 611
Activity: Seminar
1 Course Unit

AAMW 620 Minoan, Cycladic and Mycenaean Art
This course is designed to give an overview of the cultures of the Aegean Bronze Age. The art and architecture of Crete, the Cyclades and the Mainland of Greece are examined in chronological order, with an emphasis on materials and techniques. In addition, larger issues such as the development of social complexity and stratification, and the changing balance of power during the Aegean Bronze Age are examined.
Taught by: Shank
Course not offered every year
Also Offered As: ARTH 220, ARTH 620
Activity: Lecture
1 Course Unit

AAMW 621 Greek Vase Painting
Spring 2015: Painted vases constitute the most important and comprehensive collection of visual evidence that survives from ancient Greece. In this course, we will examine the development of Greek vase-painting from the 10th to the 5th century BC, with particular emphasis on the pottery of the Archaic and Classical periods that was produced in the cities of Athens and Corinth. An object-based learning course, this class will focus on the close study of Greek vases in the collection of the University of Pennsylvania Museum, and a number of class sessions will meet in the Museum. Several guest lecturers will discuss the conservation and ancient repair of Greek vases and the ceramic analysis of Greek pottery. We will also learn about the making of ceramics in a session in the Addams Hall pottery studio. Some background in art history or classical studies is helpful but not required.
Taught by: Brownlee A.
Course not offered every year
Also Offered As: ARTH 221, ARTH 621
Activity: Lecture
1 Course Unit
AAMW 622 Art of Ancient Iran
This course offers a survey of ancient Iranian art and culture from the painted pottery cultures of the Neolithic era to the monuments of the Persian Empire. Particular emphasis is placed on the Early Bronze Age. Taught by: Pittman
Course not offered every year
Also Offered As: ARTH 222, ARTH 622
Activity: Lecture
1 Course Unit

AAMW 624 Domestic Life in Ancient Civilizations
In this seminar course, students will learn what household archaeology is and how daily life of the commoners in ancient civilizations is studied, based primarily on household material culture excavated from different parts of the world. Through such archaeological data, we will examine and compare case-studies from three distinct regions - East Asia, the Near East, and Mesoamerica. Strong emphasis is given to selected cultural aspects such as construction and maintenance of houses, household utensils and installations, daily food and body ornaments, and domestic burials. The course aims to provide students with a strong foundation for further anthropology, archaeology- and history-related courses.
Taught by: Nishimura
Course not offered every year
Activity: Seminar
1 Course Unit

AAMW 625 Greek Art and Artifact
This course surveys Greek art and artifacts from Sicily to the Black Sea from the 10th century BCE to the 2nd century BCE, including the age of Alexander and the Hellenistic Kingdoms. Public sculpture and painting on and around grand buildings and gardens, domestic luxury arts of jewelry, cups and vases, mosaic floors, and cult artefacts are discussed. Also considered are the ways in which heroic epic, religious and political themes are used to engage viewer’s emotions and served both domestic and the public aims. We discuss how art and space was considered, along with ideas of invention and progress, the role of monuments, makers and patrons in Greek society.
Taught by: Kuttner
Course not offered every year
Also Offered As: ARTH 225, ARTH 625, CLST 220
Activity: Lecture
1 Course Unit

AAMW 626 Hellenistic and Roman Art and Artifacts
This course surveys the political, religious and domestic arts, patronage and display in Rome’s Mediterranean, from the 2nd c. BCE to Constantine's 4th-c. Christianized empire. Our subjects are images and decorated objects in their cultural, political and socio-economic contexts (painting, mosaic, sculpture, luxury and mass-produced arts in many media). We start with the Hellenistic cosmopolitan culture of the Greek kingdoms and their neighbors, and late Etruscan and Republican Italy; next we map Imperial Roman art as developed around the capital city Rome, as well as in the provinces of the vast empire.
Taught by: Kuttner
Course not offered every year
Also Offered As: ARTH 226, ARTH 626
Activity: Lecture
1 Course Unit

AAMW 628 Greek Architecture and Urbanism
Introduction to the art of building and city planning in the ancient Greek world, 7th-1st c. BC. Emphasis on concepts of organizing space, on issues of structure, materials, decoration, proportion, and the Mycenean and eastern heritage as well as on theory and practice of urbanism as reflected in ancient cities (Athens, Pergamon, Alexandria) and writings (Plato, Aristotle, and others). Excursions to the Penn Museum and Philadelphia. No prerequisites.
For BA Students: General Requirement in Science
Taught by: Haselberger
Course not offered every year
Also Offered As: ARTH 228, ARTH 628
Activity: Lecture
1 Course Unit

AAMW 629 Roman Architecture and Urbanism
Introduction to the art of building and city planning in the Roman world, 6th c. BC - 2nd c. AD. Emphasis on concepts of organizing space, on issues of structure, materials, decoration, proportion, and the Etruscan and Greek heritage as well as on theory and practice of urbanism as reflected in ancient cities (Rome, Ostia, Roman Alexandria, Timgad) and writings (Vitruvius, and others). Excursions to the Penn Museum and Philadelphia. No prerequisites.
Taught by: Haselberger
Course not offered every year
Also Offered As: ARTH 229, ARTH 629
Activity: Lecture
1 Course Unit

AAMW 632 Byzantine Art and Architecture
This course offers a wide-ranging introduction to the art, architecture, and material culture of Byzantium a Christian, predominantly Greek-speaking civilization that flourished in the Eastern Mediterranean for over a thousand years. Positioned between the Muslim East and the Latin West, Antiquity and the Early Modern era, Byzantium nurtured a vibrant and highly sophisticated artistic culture. With emphasis placed upon paradigmatic objects and monuments, we will examine an array of artistic media, from mosaic and panel painting to metalwork, ivory carving, book illumination, and embroidery. We will consider the making, consumption, and reception of Byzantine art in a variety of contexts: political, devotional, ritual, and domestic. Topics include the idea of empire and its visual articulation; court culture; the veneration of images and relics; piety, piety, and self-representation; authorship and artistic agency; materiality and the sensory experience of art; the reception of the pagan Greco-Roman past; and the changing nature of Byzantium's interactions with neighboring cultures.
Taught by: Drpic
One-term course offered either term
Also Offered As: ARTH 232, ARTH 632
Activity: Lecture
1 Course Unit
AAMW 633 Eastern Medieval Architecture
This lecture course examines major architectural developments in the eastern Mediterranean between the 4th and 14th centuries CE. The focus is on the Byzantine Empire, with its capital at Constantinople. Lectures also devoted to related developments in the Caucasus (Armenia and Georgia), early Russia, the Balkans (Bulgaria and Serbia), Sicily and under the Normans, the Crusader states. Parallel developments in early Islamic architecture are used for comparative purposes. The course examines evidence for religious and secular buildings, as well as urbanism and settlement patterns.
Taught by: Ousterhout
Course not offered every year
Also Offered As: ARTH 233, ARTH 633
Activity: Lecture
1 Course Unit

AAMW 635 Introduction to Visual Culture of the Islamic World
A one-semester survey of Islamic art and architecture which examines visual culture as it functions within the larger sphere of Islamic culture in general. Particular attention will be given to relationships between visual culture and literature, using specific case studies, sites or objects which may be related to various branches of Islamic literature, including historical, didactic, philosophical writings, poetry and religious texts. All primary sources are available in English translation. For BA Students: Humanities and Social Science S
Taught by: Holod
One-term course offered either term
Also Offered As: ARTH 235, ARTH 635, NELC 285, NELC 685, VLST 235
Activity: Lecture
1 Course Unit

AAMW 640 Medieval Art
An introductory survey, this course investigates painting, sculpture, and the "minor arts" of the Middle Ages. Students will become familiar with selected major monuments of the Late Antique, Byzantine, Carolingian, Romanesque, and Gothic periods, as well as primary textual sources. Analysis of works emphasizes the cultural context, the thematic content, and the function of objects. Discussions focus especially on several key themes: the aesthetic status of art and the theological role of images; the revival of classical models and visual modes; social rituals such as pilgrimage and crusading; the cult of the Virgin and the status of women in art; and, more generally, the ideology of visual culture across the political and urban landscapes.
Course usually offered in fall term
Also Offered As: ARTH 240, ARTH 640
Activity: Lecture
1 Course Unit

AAMW 641 Introduction to Medieval Architecture
This course provides an introduction to the built environment of the Middle Ages. From the fall of Rome to the dawn of the Renaissance, a range of architectural styles shaped medieval daily life, religious experience and civic spectacle. We will become familiar with the architectural traditions of the great cathedrals, revered pilgrimage churches, and reclusive monasteries of western Europe, as well as castles, houses, and other civic structures. We integrate the study of the architecture with the study of medieval culture, exploring the role of pilgrimage, courts and civil authority, religious reform and radicalism, crusading and social violence, and rising urbanism. In this way, we will explore the ways in which the built environment profoundly affected contemporary audiences and shaped medieval life.
Course not offered every year
Also Offered As: ARTH 241, ARTH 641
Activity: Lecture
1 Course Unit

AAMW 645 Economy of Ancient Trade
This course will examine theoretical and empirical frameworks for pre-modern forms of exchange. We will focus on substantivist and formalist economic theories and will consider the archaeological evidence for such phenomena as barter, gift exchange, administered economies, markets, local exchange, and long distance overland and maritime trade. Our goal is to develop mid-range models for reconstructing ancient economies. The course will emphasize but not be limited to complex societies of the New and Old World.
Course not offered every year
Also Offered As: ANTH 645
Activity: Lecture
1 Course Unit

AAMW 702 Greek Sanctuaries
The formation and development of key religious sites, including Olympia, Delphi, Cyrene, Selinus, Cos and Lindos.
Course not offered every year
Also Offered As: ANCH 702, CLST 702
Activity: Seminar
1 Course Unit

AAMW 703 The Ancient House
Course usually offered in fall term
Also Offered As: CLST 703
Activity: Seminar
1 Course Unit

AAMW 705 ETHNOARCHAEOLOGY: GREECE
Ethnoarchaeology involves distinctive theoretical and methodological approaches to the study of living societies for the explicit purpose of shedding light on archaeological questions. In this seminar, we will review the intellectual history of ethnoarchaeology in North America and Europe, and explore case studies from Greece, the wider Mediterranean, and beyond. Among the topics will be analogy, cross-cultural comparison, experimental archaeology, oral history research, and archaeologically oriented ethnographic fieldwork. Students will create a proposal for ethnoarchaeological fieldwork in their area of interest in NSF or Wenner-Gren format, to be critiqued by the instructor and their peers.
Course not offered every year
Also Offered As: CLST 705
Activity: Seminar
1 Course Unit
AAMW 710 Curatorial Seminar: Gordion, Royal City of Midas
The course will focus on the planning for and design of an exhibit on Gordion and the Phrygians that will take place at the Penn Museum in 2016. The exhibit will feature substantial loans from museums in Turkey, including the "Midas Mound" at Gordion and the "Lydian Treasure" from the area around Sardis.
Taught by: Rose
Course not offered every year
Also Offered As: ANTH 708, CLST 710
Activity: Seminar
1 Course Unit

AAMW 715 Archaeology of Troy
An introduction to the archaeology of Troy, in northwestern Turkey. The course will focus on the results of excavations at the site in 1988, although the earlier excavations of Schliemann, Dorpfeld, and Blegen will also be considered. The course will cover a broad chronological span—from the early Bronze age through the late Roman period, and will include Greek, Roman, and Medieval attitudes toward Troy and the Trojan legend.
Taught by: Rose
Course not offered every year
Also Offered As: CLST 715
Activity: Seminar
1 Course Unit

AAMW 720 Topics in Aegean Art
Topic varies. Fall 2017: Depictions of men and women in Aegean Bronze Age art, dating to circa 3,000-1,100 BCE, are extremely evocative. In this class we will examine what fresco art can tell us about the roles of men and women in this prehistoric culture. We will keep several questions in mind: 1) How do images of men and women evolve? 2) Does the artwork available to us allow us to safely draw conclusions about Minoan and Mycenaean society? 3) What are the similarities and differences between the depictions of Minoan and Mycenaean men and women? 4) Can we make a case that certain people were viewed as different (elevated in society, perhaps on a religious or secular level) based on the artistic examples that have been uncovered? We will also study theories that have been proposed about the roles of men and women of the Aegean Bronze Age, a people known for their artistic excellence and ambiguous images. Class discussions will be based on assigned readings, and you will write 3 short papers reviewing assigned articles. Students will also write and present two research papers to the class.
Taught by: Shank
Course not offered every year
Also Offered As: ARTH 720, CLST 614
Activity: Seminar
1 Course Unit

AAMW 721 Topics in Archaeological Science
Topic varies.

AAMW 722 Topography of Rome
The topographical development of ancient Rome from its prehistoric beginnings to the late Imperial times with emphasis on the city’s key historical and architectural monuments.
One-term course offered either term
Also Offered As: CLST 730
Activity: Seminar
1 Course Unit

AAMW 723 Topics in the Art of the Ancient Near East
Topic varies. Spring 2015: This team taught class will extend from the lead up to the Neo Sumerian Empire through the Empire and its collapse and reorganization of the political landscape of greater Mesopotamia. It will consider the imperial period internally and from the perspective of the northern and eastern neighbors. This class is an upper level graduate research seminar that will include art historical, anthropological and historical approaches. Class participation and a major research paper are required.
Taught by: Pittman
Course not offered every year
Also Offered As: ARTH 723, NELC 740
Activity: Seminar

AAMW 725 Topics in Greek and Roman Art
Topic varies.
Taught by: Kuttner
Course not offered every year
Also Offered As: ARTH 725
Activity: Seminar
1 Course Unit

AAMW 729 Topics in Roman Architecture and Topography
Topic varies. Fall 2015: This seminar will investigate two ancient architectural masterpieces, the 2nd c. AD Pantheon in Rome and the 6th c. AD Hagia Sophia in Istanbul. The two monuments stand at the forefront of the architectural trends under Hadrian and Justinian respectively, and are best known for their unique designs and domes of unprecedented scale. The seminar will analyze issues of design, structure, aesthetics, and symbolism. No prerequisites; skills in digital visualization are welcome.
Taught by: Haselberger, Ousterhout
Course not offered every year
Also Offered As: ARTH 729
Activity: Seminar
1 Course Unit

AAMW 732 Topics in Byzantine Art and Architecture
Topic varies. Spring 2016: The graduate seminar will investigate the dynamics of artistic exchange between Constantinople and its Byzantine provinces, as well as areas under its cultural influence. Both architecture and monumental art will be considered, focusing on the period of 6th-12th centuries. Students will produce two research papers: one addressing a Constantinopolitan monument; the second assessing artistic production in a region outside the Byzantine capital.
Taught by: Ousterhout
Course not offered every year
Also Offered As: ARTH 732
Activity: Seminar
1 Course Unit

AAMW 736 The Archaeology of Coastal Northeast Africa: Cyrenaeca and Marmarica
Prerequisite(s). Exposure to introductory courses. An examination of selected aspects of the Bronze Age to Late Roman period archaeology of the northeastern African coast between Alexandria and Syrtic gulf.
Course not offered every year
Activity: Seminar
1 Course Unit
AAMW 738 Topics in Islamic Archaeology
Topic varies. Spring 2017: This seminar will trace the development of the field from one that was centered largely on the recovery of major monuments to one in which issues of daily life, demography, chronology and the study of settlement patterns have come to play a major role. The seminar will review work in the major zones of the Islamic world: Central Asia, Iran, Iraq, Anatolia, Syria, Palestine, Egypt, North Africa I (Libya-Tunisia), North Africa II (Algeria-Morocco), Spain. Of special interest this semester will be the study of landscape archaeology and settlement patterns. The seminar will discuss changes in patterns of settlement, trade and material culture 650 - 1300 CE in different areas of the Islamic world, concentrating on sites in Iran, Syria and North Africa.
Taught by: Holod
Course not offered every year
Also Offered As: ARTH 738, NELC 731
Activity: Seminar
1 Course Unit

AAMW 740 Topics in Medieval Art
Topic varies. Spring 2015: Among the functional genres shaping religious imagery in the Middle Ages and Renaissance, the altarpiece is arguably the most important, and many of the most famous panel paintings that hang today in museums originated as components of altarpieces. The altarpiece in the Latin church bridged the divide between clergy and laypeople, between cult and devotion, between public acclaim and private interests. Such altarpieces developed into extraordinarily dynamic vehicles for staging the religious image, akin to mural painting (in its potential for narrative elaboration), and manuscript illumination (in its potential for interchanging and juxtaposing imagery). As an umbrella for diverse research projects in both medieval and Renaissance art, this seminar affords an overview of the origins, development and articulation of the altarpiece as a functional and pictorial genre in European art, on both sides of the Alps. It also seeks to provide students with the materials and practical training—technical, scholarly, interpretative—required to study altarpieces as visual, narrative, and material totalities.
Course not offered every year
Activity: Seminar

Art History (ARTH)

ARTH 100 Freshman Seminar
Topic varies. Fall 2017: This course will examine the fascination with ecology in artistic thinking from late Modernism to the present, with a particular attention to the developing interest in social and environmental systems in the late 1960's and early 1970's. From Robert Smithson's Spiral Jetty to Rachel Carson's Silent Spring, artists, scholars and activists of this generation were deeply invested in the interconnectedness of life in all its forms. This new sensitivity to the affinities that bind individuals, and our vulnerability to social, political and economic environments, enabled new aesthetic approaches that have continued relevance today. As part of the course, we will meet with a range of artists, curators and institutions in Philadelphia who are continuing these investigations, including the Colored Girls Museum in Germantown and the Health Ecologies Lab here at Penn. No familiarity with contemporary art is required.
One-term course offered either term
Also Offered As: AFRC 100, CIMS 016, ENGL 016, URBS 106
Activity: Seminar
1 Course Unit
Notes: For Freshmen Only

ARTH 101 Prehistory to Renaissance: Introduction to Western Art from its Beginning to 1400
This is a double introduction: to looking at the visual arts; and, to the ancient and medieval cities and empires of three continents - ancient Egypt, the Middle East and Iran, the Minoan and Mycenaean Bronze Age, the Greek and Roman Mediterranean, and the early Islamic, early Byzantine and western Medieval world. Using images, contemporary texts, and art in our city, we examine the changing forms of art, architecture and landscape architecture, and the roles of visual culture for political, social and religious activity.
For BA Students: Arts and Letters Sector
Taught by: Ousterhout
Course usually offered in fall term
Activity: Lecture
1 Course Unit
**ARTH 102 Renaissance to Contemporary: Introduction to Western Art, 1400 to the Present**
This course is an introduction to the visual arts including painting, sculpture, print culture, and new media such as photography, film, performance and installation art in Europe and the United States from 1400 to the present. It offers a broad historical overview of the key movements and artists of the period, as well as an investigation into the crucial themes and contexts that mark visual art production after the middle ages. Such themes include the secularization of art; the (gendered) role of the artist in society; the sites of art production and consumption such as the artist's studio, the royal courts and the art exhibition; the materials of art; the import of technology and science to art's making, content and distribution; the rise of art criticism; and the socio-political contexts of patronage and audience; among others.
For BA Students: Arts and Letters Sector
Taught by: Dombrowski, Kim, Shaw
Course usually offered in spring term
Also Offered As: VLST 232
Activity: Lecture
1 Course Unit

**ARTH 103 Arts and Civilizations of East Asia**
Introduction to major artistic traditions of China and Japan and to the methodological practices of art history. Attention given to key cultural concepts and ways of looking, in such topics as: concepts of the afterlife and its representation; Buddhist arts and iconography; painting styles and subjects; and more broadly at the transmission of styles and cultural practices across East Asia. Serves as an introduction to upper level lecture courses in East Asian art history cultures. If size of class permits, certain sessions will be held in the Penn Museum or the Philadelphia Museum of Art.
For BA Students: Arts and Letters Sector
Taught by: Davis, Steinhardt
Course not offered every year
Also Offered As: EALC 013, VLST 233
Activity: Lecture
1 Course Unit

**ARTH 104 Introduction to Art in South Asia**
This course is a survey of sculpture, painting and architecture in the Indian sub-continent from 2300 B.C., touching on the present. It attempts to explore the role of tradition in the broader history of art in India, but not to see India as 'traditional' or unchanging. The Indian sub-continent is the source for multi-cultural civilizations that have lasted and evolved for several thousand years. Its art is as rich and complex as that of Europe and diverse. This course introduces the full range of artistic production in India in relation to the multiple strands that have made the cultural fabric of the sub-continent so rich and long lasting.
For BA Students: Arts and Letters Sector
Taught by: Meister
Course not offered every year
Also Offered As: SAST 200, SAST 500, VLST 234
Activity: Lecture
1 Course Unit

**ARTH 105 Wonders of the Ancient World**
This course presents a comparative overview of the ancient civilizations around the world. It is designed as a gateway course for the many specialized courses available at Penn. Its focus is two fold: first, the various forms that ancient cultures have developed are explored and compared and second, the types of disciplines that study these courses are examined. The course has a number of guest lecturers, as well as visits to museums and libraries to examine original documents. This course meets the requirement for the Ancient Studies Minor.
Taught by: Pittman
Course not offered every year
Activity: Lecture
1 Course Unit

**ARTH 106 Architect and History**
Human experience is shaped by the built environment. This course introduces students to the interrelated fields of architecture, art history, and engineering and explores great architectural monuments from the ancient to the modern period, from India across the Mediterranean and Europe to the US. The focus will be on understanding these works in their structure and function, both as products of individual ingenuity and reflections of Zeitgeist. Questioning these monuments from a present-day perspective across the cultures will be an important ingredient, as well be podium discussions, guest lectures, excursions, and all kinds of visualizations, from digital walk-throughs to practical design exercises. Regularly taught in fall term, this course fulfills Sector IV, Humanities and Social Science, and it satisfies History of Art 100-level course requirements. This course cannot be taken on a pass/fail level. There is only ONE recitation in this course, attached directly to Friday's class at 2:3 p.m., in order to provide sufficient time for practica and field trips.
For BA Students: Humanities and Social Science Sector
Taught by: Haselberger
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: This course cannot be taken pass/fail and must be taken for a normal grade.

**ARTH 209 African Art**
This selective survey examines a variety of the circumstances of sub-Saharan African art, ranging from imperial to nomadic cultures and from ancient times to contemporary participation in the international market. Iconography, themes and style will be considered, as will questions of modernity, religious impact, tradition and colonialism.
Course not offered every year
Also Offered As: AFRC 209, AFST 209, AFST 218, ARTH 609
Activity: Lecture
1 Course Unit

**ARTH 211 Art in India**
A survey of sculpture, painting and architecture in the Indian sub-continent from 2300 B.C. to the nineteenth century. An attempt to explore the role of tradition in the broader history of art in India.
Taught by: Meister
Course not offered every year
Also Offered As: ARTH 611
Activity: Lecture
1 Course Unit
ARTH 212 Cities and Temples in Ancient India
The wooden architecture of ancient India’s cities is represented in relief carvings from Buddhist religious monuments of the early centuries A.D. and replicated in remarkable excavated cave cathedrals. This course will trace that architectural tradition, its transformation into a symbolic vocabulary for a new structure, the Hindu temple, and the development of the temple in India from ca. 500-1500 A.D.
Taught by: Meister
Course not offered every year
Also Offered As: ARTH 612, SAST 201, SAST 501
Activity: Lecture
1 Course Unit

ARTH 213 Arts of Japan
This course introduces the major artistic traditions of Japan, from the Neolithic period to the present, and teaches the fundamental methods of the discipline of art history. Special attention will be given to the places of Shinto, the impact of Buddhism, and their related architectures and sculptures; the principles of narrative illustration; the changing roles of aristocratic, monastic, shogunal and merchant patronage; the formation of the concept of the artist over time; and the transformation of tradition in the modern age.
Taught by: Davis
Course not offered every year
Also Offered As: ARTH 613, EALC 157, EALC 557
Activity: Lecture
1 Course Unit

ARTH 214 Arts of China
The goals of this course are to introduce the major artistic traditions of China, from the Neolithic period to the present and to teach the fundamental methods of the discipline of art history. Our approaches will be chronological, considering how the arts developed in and through history, and thematic, discussing how art and architecture were used for philosophical, religious and material ends. Topics of study will include; Shang bronzes: Han concepts of the afterlife; the impact of Buddhism; patronage and painting; the landscape tradition; the concept of the literatus; architecture and garden design; the "modern" and 20th-century artistic practices; among others.
Taught by: Steinhardt, Davis
Course not offered every year
Also Offered As: ARTH 614, EALC 127, EALC 527
Activity: Lecture
1 Course Unit

ARTH 217 Chinese Painting
Study of Chinese painting and practice from the earliest pictorial representation through the late twentieth century. Painting style forms the basis of analysis, and themes such as landscape and narrative are considered with regard to larger social and cultural issues. The class pays particular attention to the construction of the "artist" and "art criticism" and their impact on the field into the present. Visits to look at paintings at the University of Pennsylvania Museum, PMA and/or local collections.
Taught by: Steinhardt
Course not offered every year
Also Offered As: ARTH 617, EALC 227, EALC 627
Activity: Lecture
1 Course Unit

ARTH 220 Minoan, Cycladic and Mycenaean Art
This course is designed to give an overview of the cultures of the Aegean Bronze Age. The art and architecture of Crete, the Cyclades and the Mainland of Greece are examined in chronological order, with an emphasis on materials and techniques. In addition, larger issues such as the development of social complexity and stratification, and the changing balance of power during the Aegean Bronze Age are examined.

Activity: Lecture
1 Course Unit

ARTH 221 Greek Vase Painting
Spring 2015: Painted vases constitute the most important and comprehensive collection of visual evidence that survives from ancient Greece. In this course, we will examine the development of Greek vase-painting from the 10th to the 5th century BC, with particular emphasis on the pottery of the Archaic and Classical periods that was produced in the cities of Athens and Corinth. An object-based learning course, this class will focus on the close study of Greek vases in the collection of the University of Pennsylvania Museum, and a number of class sessions will meet in the Museum. Several guest lecturers will discuss the conservation and ancient repair of Greek vases and the ceramic analysis of Greek pottery. We will also learn about the making of ceramics in a session in the Addams Hall pottery studio. Some background in art history or classical studies is helpful but not required.
Taught by: Brownlee, A.
Course not offered every year
Also Offered As: AAMW 621, ARTH 621
Activity: Lecture
1 Course Unit

ARTH 222 Art of Ancient Iran
This course offers a survey of ancient Iranian art and culture from the painted pottery cultures of the Neolithic era to the monuments of the Persian Empire. Particular emphasis is placed on the Early Bronze Age.
Taught by: Pittman
Course not offered every year
Also Offered As: AAMW 622, ARTH 622
Activity: Lecture
1 Course Unit

ARTH 224 Art of Mesopotamia
A survey of the art of Mesopotamia from 4000 B.C. through the conquest of Alexander the Great.
Taught by: Pittman
Course not offered every year
Also Offered As: AAMW 424, ARTH 624
Activity: Lecture
1 Course Unit
ARTH 225 Greek Art and Artifact
This course surveys Greek art and artifacts from Sicily to the Black Sea from the 10th century BCE to the 2nd century BCE, including the age of Alexander and the Hellenistic Kingdoms. Public sculpture and painting on and around grand buildings and gardens, domestic luxury arts of jewelry, cups and vases, mosaic floors, and cult artefacts are discussed. Also considered are the ways in which heroic epic, religious and political themes are used to engaged viewer's emotions and served both domestic and the public aims. We discuss how art and space was considered, along with ideas of invention and progress, the role of monuments, makers and patrons in Greek society.
Taught by: Haselberger
Course not offered every year
Also Offered As: AAMW 625, ARTH 625, CLST 220
Activity: Lecture
1 Course Unit

ARTH 226 Hellenistic and Roman Art and Artifacts
This course surveys the political, religious and domestic arts, patronage and display in Rome's Mediterranean, from the 2nd c. BCE to Constantine's 4th-c. Christianized empire. Our subjects are images and decorated objects in their cultural, political and socio-economic contexts (painting, mosaic, sculpture, luxury and mass-produced arts in many media). We start with the Hellenistic cosmopolitan culture of the Greek kingdoms and their neighbors, and late Etruscan and Republican Italy; next we map Imperial Roman art as developed around the capital city Rome, as well as in the provinces of the vast empire.
Taught by: Kuttner
Course not offered every year
Also Offered As: AAMW 626, ARTH 626, CLST 221
Activity: Lecture
1 Course Unit

ARTH 228 Greek Architecture and Urbanism
Introduction to the art of building and city planning in the ancient Greek world, 7th-1st c. BC. Emphasis on concepts of organizing space, on issues of structure, materials, decoration, proportion, and the Mycenean and eastern heritage as well as on theory and practice of urbanism as reflected in ancient cities (Athens, Pergamon, Alexandria) and writings (Plato, Aristotle, and others). Excursions to the Penn Museum and Philadelphia. No prerequisites.
Taught by: Haselberger
Course not offered every year

Also Offered As: AAMW 629, ARTH 629
Activity: Lecture
1 Course Unit

ARTH 232 Byzantine Art and Architecture
This course offers a wide-ranging introduction to the art, architecture, and material culture of Byzantium-a Christian, predominantly Greek-speaking civilization that flourished in the Eastern Mediterranean for over a thousand years. Positioned between the Muslim East and the Latin West, Antiquity and the Early Modern era, Byzantium nurtured a vibrant and highly sophisticated artistic culture. With emphasis placed upon paradigmatic objects and monuments, we will examine an array of artistic media, from mosaic and panel painting to metalwork, ivory carving, book illumination, and embroidery. We will consider the making, consumption, and reception of Byzantine art in a variety of contexts political, devotional, ritual, and domestic. Topics include the idea of empire and its visual articulation; court culture; the veneration of images and relics; patronage, piety, and self-representation; authorship and artistic agency; materiality and the sensory experience of art; the reception of the pagan Greco-Roman past; and the changing nature of Byzantium’s interactions with neighboring cultures.
Taught by: Drpic
One-term course offered either term
Also Offered As: AAMW 632, ARTH 632
Activity: Lecture
1 Course Unit

ARTH 233 Eastern Medieval Architecture
This lecture course examines major architectural developments in the eastern Mediterranean between the 4th and 14th centuries CE. The focus is on the Byzantine Empire, with its capital at Constantinople. Lectures also devoted to related developments in the Caucasus (Armenia and Georgia), early Russia, the Balkans (Bulgaria and Serbia), Sicily and under the Normans, the Crusader states. Parallel developments in early Islamic architecture are used for comparative purposes. The course examines evidence for religious and secular buildings, as well as urbanism and settlement patterns.
Taught by: Ousterhout
Course not offered every year
Also Offered As: AAMW 633, ARTH 633
Activity: Lecture
1 Course Unit

ARTH 235 Introduction to Visual Culture of the Islamic World
A one-semester survey of Islamic art and architecture which examines visual culture as it functions within the larger sphere of Islamic culture in general. Particular attention will be given to relationships between visual culture and literature, using specific case studies, sites or objects which may be related to various branches of Islamic literature, including historical, didactic, philosophical writings, poetry and religious texts. All primary sources are available in English translation.

ARTH 240 Medieval Art
An introductory survey, this course investigates architecture, painting, sculpture, and the "minor arts" of the Middle Ages. Students become familiar with selected major monuments of the Romanesque and Gothic periods, primarily in Western Europe as well as relevant sites around the Mediterranean. Analysis of works emphasizes the cultural context, the thematic content, and the function of objects and monuments. Discussions focus especially on several key themes: the role of luxury in the medieval west; the theological role of images; the revival of classical models and visual modes; social rituals such as pilgrimage and crusading; the cult of the Virgin and the status of women in art; and, more generally, the ideology of visual culture across the political and urban landscapes.
Taught by: Guerin
Course usually offered in fall term
Also Offered As: AAMW 640, ARTH 640
Activity: Lecture
1 Course Unit

ARTH 241 Introduction to Medieval Architecture
This course provides an introduction to the built environment of the Middle Ages. From the fall of Rome to the dawn of the Renaissance, a range of architectural styles shaped medieval daily life, religious experience and civic spectacle. We examine the architectural traditions of the great cathedrals, revered pilgrimage churches, and reclusive monasteries of Western Europe, as well as castles, houses, and other civic structures. We integrate the study of the architecture with the study of medieval culture, exploring the architectural traditions of medieval culture, exploring the role of pilgrimage, courts and civil authority, religious reform and radicalism, crusading and social violence, and rising urbanism. In this way, we explore the ways in which the built environment profoundly affected contemporary audiences and shaped medieval life.
Course not offered every year
Also Offered As: AAMW 641, ARTH 641
Activity: Lecture
1 Course Unit

ARTH 250 Michelangelo and the Art of the Italian Renaissance
An introduction to the work of the Renaissance artist Michelangelo (1475-1564) - his sculptures, paintings, architecture, poetry, and artistic theory - in relation to his patrons, predecessors, and contemporaries, above all Leonardo and Raphael. Topics include artistic creativity and license, religious devotion, the revival of antiquity, observation of nature, art as problem-solving, the public reception and function of artworks, debates about style, artistic rivalry, and traveling artists. Rather than taking the form of a survey, this course selects works as paradigmatic case studies, and will analyze contemporary attitudes toward art of this period through study of primary sources.
Taught by: Kim
Course usually offered in fall term
Also Offered As: ARTH 650
Activity: Lecture
1 Course Unit

ARTH 252 Venice and the Mediterranean
This course explores the art and architecture of Venice and her mainland and overseas colonies, with emphasis upon the Dalmatian coast and Aegean islands. Topics include cartography and empire, diffusion of Byzantine icons, and the ship as a mediator of cultural exchange. Taught by: Kim
One-term course offered either term
Also Offered As: ARTH 652
Activity: Lecture
1 Course Unit

ARTH 254 Global Renaissance and Baroque
An introduction to transcultural encounters within and beyond early modern Europe, 1450-1600. Topics include: the theory and historiography of global art; artistic relations between Venice, the Byzantine and Ottoman Empires, and islands in the Eastern Mediterranean; Portugal's overseas mercantile network in Africa and Asia; and the Baroque in Latin America, with emphasis upon Brazil. Our discussions focus on these paradigmatic case studies so as to question the language and terms we use to characterize confrontations between native and foreign, the self and the other.
Taught by: Kim
One-term course offered either term
Also Offered As: ARTH 654
Activity: Lecture
1 Course Unit

ARTH 258 Early Modern Japanese Art and the City of Edo
Study of the major art forms and architecture of Tokugawa (or Edo) period (1603-1868). In this course, we will consider how the arts of this era occur within an increasingly urban and modern culture, particularly with regard to the city of Edo. Issues of the articulation of authority in the built environment, the reinvention of classical styles, and patronage will be raised. May include some visits to PMA, Penn Museum, or other local collections.
Taught by: Davis
Course not offered every year
Also Offered As: ARTH 658, EALC 150, EALC 550
Activity: Lecture
1 Course Unit

ARTH 259 Early Prints
History of prints in the period from about 1400 to Albrecht Durer (d 1528). Relation of early Northern and Italian woodcuts, engravings, and etchings to contemporary art forms - sculpture, painting.
Taught by: Silver
Course not offered every year
Also Offered As: ARTH 659
Activity: Lecture
1 Course Unit
ARTH 261 Northern Renaissance Art
Survey of the principal developments in Northern Europe during the "early modern" period, i.e. the transition from medieval to modern art-making during the fifteenth and sixteenth centuries. Principal attention to painting and graphics with additional consideration of developments in sculpture, particularly in the regions of the Netherlands and German-speaking Europe. Attention focused on the works of the following artists: Van Eyck, Bosch, Durer, Holbein, Bruegel, and on topics such as the rise of pictorial genres, urban art markets, Reformation art and art for the dynastic courts of emerging nation-states.
Taught by: Silver
Course not offered every year
Also Offered As: ARTH 661
Activity: Lecture
1 Course Unit

ARTH 262 Netherlandish Art
Dutch and Flemish painting in the 15th and 16th centuries with special emphasis on the contributions of Robert Campin, Jan van Eyck and Roger van der Weyden, Bosch, and Bruegel. Also included are topics on the development of prints as well as the dialogue with Italian art.
Taught by: Silver
Course not offered every year
Also Offered As: ARTH 662, DTCH 261
Activity: Lecture
1 Course Unit

ARTH 263 German Art
This course will focus on paintings, prints, and sculptures produced in Germany around 1600. Principal attention will focus on the changing role of visual culture and altarpieces but evolves into an era of "art," and collecting of pictures. German politics and religion will be examined in relation to the images. Cultural exchange with neighboring regions of Italy and the Low Countries is considered.
Taught by: Silver
Course not offered every year
Also Offered As: ARTH 663, DTCH 230
Activity: Lecture
1 Course Unit

ARTH 264 Bruegel to Vermeer
Historical overview of the principal developments in Dutch painting and visual culture across the period of the Dutch Revolt (1568-1648) and beyond. Principal pictorial types, including landscape, portraits and group portraits, genre painting, still-life. Principal artists, including: Bruegel, Goltzius, Hals, Rembrandt, and Vermeer, as well as leading practitioners of each pictorial category. Consideration of cultural values inherent in such imagery, particularly against the background of Dutch society and religious diversity, along with the court culture and Catholic religiosity rejected by the national independence movement.
Taught by: Silver
Course not offered every year
Also Offered As: ARTH 664
Activity: Lecture
1 Course Unit

ARTH 265 Northern Baroque Art
Northern Baroque art comprises seventeenth-century paintings and prints from Flanders and Holland. Featured artists include: Pieter Bruegel, Hendrick Goltzius, Peter Paul Rubens, Anthony van Dyck, Frans Hals, Rembrandt, and Vermeer. Topics considered include innovations of various kinds--starting with portraits and society, landscapes, still-life, and scenes of daily life (genre pictures).
Taught by: Silver
Course not offered every year
Also Offered As: ARTH 665
Activity: Lecture
1 Course Unit

ARTH 270 The Modern City
A study of the European and American city in the eighteenth, nineteenth, and twentieth centuries. Emphasis is placed on the history of architecture and urban design; political, sociological, and economic factors also receive attention. The class considers the development of London, St. Petersburg, Washington, Boston, Paris, Vienna and Philadelphia.
Taught by: Brownlee, D.
One-term course offered either term
Also Offered As: ARTH 670
Activity: Lecture
1 Course Unit

ARTH 271 Modern Architecture, 1700-1900
The history of western architecture, ca. 1700-1900, when architecture was transformed to serve a world that had been reshaped by political and industrial revolutions. Topics to be considered include the Rococo, the English Garden, Palladianism, Romanticism, neo-classicism, the picturesque, the Greek and Gothic Revivals, and the search for a new style.
Taught by: Brownlee, D.
One-term course offered either term
Also Offered As: ARTH 671
Activity: Lecture
1 Course Unit

ARTH 273 History of Photography
A history of world photography from 1839 to the present and its relation to cultural contexts as well as to various theories of the functions of images. Topics discussed in considering the nineteenth century will be the relationship between photography and painting, the effect of photography on portraiture, photography in the service of exploration, and photography as practiced by anthropologists; and in considering the twentieth century, photography and abstraction, photography as "fine art", photography and the critique of art history, and photography and censorship.
Course not offered every year
Also Offered As: ARTH 673
Activity: Lecture
1 Course Unit
ARTh 274 Facing America
This course explores the visual history of race in the United States as both self-fashioning and cultural mythology by examining the ways that conceptions of Native American, Latino, and Asian identity, alongside ideas of Blackness and Whiteness, have combined to create the various cultural ideologies of class, gender, and sexuality that remain evident in historical visual and material culture. We also investigate the ways that these creations have subsequently helped to launch new visual entertainments, including museum spectacles, blackface minstrelsy, and early film, from the colonial period through the 1940s.
Taught by: Shaw
Course not offered every year
Also Offered As: AFRC 294, ARTH 674, ASAM 294, CIMS 293
Activity: Lecture
1 Course Unit
Notes: Satisfies Cultural Diversity in the U.S. requirement.

ARTh 275 Revolution to Realism: European Art, 1770-1870
This course surveys the major trends in European art of the tumultuous decades stretching from French Revolution of 1789 to the rise of realism in the mid-nineteenth century. Starting with Jacques-Louis David's revolutionary history paintings, we study Napoleonic representations of empire, Goya's imagery of violence, romantic representations of madness and desire, Friedrich's nationalist landscapes, as well as the politicized realism of Courbet. Some of the themes that are addressed include: the revolutionary hero, the birth of the public museum, the anxious masculinity of romanticism, the rise of industry and bourgeois culture, the beginnings of photography, the quest for national identity and, not least, the origins of the modernist painting. Throughout, we recover the original radicalism of art's formal and conceptual innovations at times of political and social crisis. We focus on the history of French painting, but include sculpture, photography, visual culture and the development of the modern city, in England, Germany and Spain.
Taught by: Dombrowski
One-term course offered either term
Also Offered As: ARTH 675
Activity: Lecture
1 Course Unit

ARTh 276 Impressionism
Impressionism opened the pictorial field to light, perception, science, modernity, bourgeoisie leisure and famously the material qualities of paint itself. This course will survey the movement's major contexts and proponents--Manet, Monet, Morisot, Cezanne, Gauguin, Van Gogh, Rodin--from its origins in the 1860's to its demise in the 1890's, as well as its subsequent adaptions throughout the world until World War I. Particular attention is paid to the artists' critical reception and the historical conditions which allowed one nation, France, to claim the emergence of early Modernism so firmly for itself. The course also analyzes the effects of the rapidly changing social and cultural fabric of Paris, and its affects on artistic developments. We also look outside of France's borders to Germany and Britain.
Taught by: Dombrowski
One-term course offered either term
Also Offered As: ARTH 676
Activity: Lecture
1 Course Unit

ARTh 277 The Rise of Modernity: Arts of the 19th Century
The nineteenth century is often considered as fast-paced, politically volatile and new-media obsessed as our own age. This course explores the nineteenth century's claim to have produced the first truly modern culture, focusing on the visual arts and metropolitan spaces of Europe and North America in their intellectual and social contexts. Stretching from the American and French Revolutions to the eve of World War I, topics to be covered include: the rise of capitalist and industrialist culture, art and revolutionary upheaval, global travel and empire, the origins of modernist art and architecture, and new media such as stereoscopes, iron and glass construction, and photography. Major artistic personalities of the age, from Jacques-Louis David and Gustave Courbet to Claude Monet and Vincent Van Gogh, and from Friedrich Schinkel and, Baron Haussmann to Frank Furness and Frank Lloyd Wright, are discussed. Each lecture will be followed by a brief period of discussion, and regular field trips take students to examine art and architecture first hand, in the museums and on the streets of Philadelphia.
Taught by: Brownlee, Dombrowski
Course not offered every year
Also Offered As: ARTH 677
Activity: Lecture
1 Course Unit

ARTh 278 American Art
This course surveys the most important and interesting art produced in the United States (or by American artists living abroad) up through the 1950s. This period encompasses the history of both early and modern art in the U.S., from its first appearances to its rise to prominence and institutionalization. While tracking this history, the course examines art's relation to historical processes of modernization (industrialization, the development of transportation and communications, the spread of corporate organization in business, urbanization, technological development, the rise of mass media and mass markets, etc.) and to the economic polarization, social fragmentation, political conflict, and the cultural changes these developments entailed. In these circumstances, art is drawn simultaneously toward truth and fraud, realism and artifice, science and spirituality, commodification and ephemerality, nationalism and cosmopolitanism, individualism and collectivity, the past and the future, professionalization and popularity, celebrating modern life and criticizing it.
Taught by: Leja, Shaw
Course not offered every year
Also Offered As: ARTH 678
Activity: Lecture
1 Course Unit
Notes: Satisfies Cultural Diversity in the U.S. requirement.
ARTH 280 20th Century East Asian Art
This course reconsiders modern and contemporary art in China, Japan and Korea over the course of the twentieth century. The confrontations between modernity and tradition, state and self, the colonizer and the colonized, and collecting and the market are among its themes. The course begins with a study of the way modern art was defined at the turn of the 20th century, the promotion of oil painting and the call to preserve national styles, and the use of art at world’s fairs. The avant-garde pursuit of individuality, state-sponsored modernism, the use of art as propaganda in WWII and Communist Revolution, and the place of Chinese, Korean and Japanese art in the contemporary market are also topics covered in this course.
Taught by: Davis
Course not offered every year
Also Offered As: ARTH 680
Activity: Lecture
1 Course Unit

ARTH 281 Modern Architecture, 1900-Present
The architecture of Europe and America from the late nineteenth century until the present is the central subject of this course, but some time is also devoted to Latin American and Asian architecture and to the important issues of modern city planning. Topics discussed include the Arts and Crafts movement, Art Nouveau, Expressionism, Art Deco, the International Style, and Post-modernism. The debate over the role of technology in modern life and art, the search for a universal language of architectural communication, and the insistent demand that architecture serve human society are themes that are traced throughout the course. Among the important figures to be considered are Frank Lloyd Wright, Walter Gropius, Le Corbusier, Louis Kahn, Robert Venturi, and Denise Scott Brown. The course includes weekly discussion sessions and several excursions to view architecture in Philadelphia.
Taught by: Brownlee
One-term course offered either term
Also Offered As: ARTH 681
Activity: Lecture
1 Course Unit

ARTH 286 Modern Art: Picasso to Pollock
Early twentieth-century art in Europe is marked by a number of exciting transformations. This period witnessed the rise of abstraction in painting and sculpture, as well as the inventions of collage, photomontage, constructed sculpture, the ready made and found object, and performance art. Encounters with the arts of Africa, Oceania and other traditions unfamiliar in the West spurred innovations in media, technique, and subject matter. Artists began to respond to the challenge of photography, to organize themselves into movements, and in some cases, to challenge the norms of art through “anti-art.” A new gallery system replaced traditional forms of exhibiting and selling art, and artists took on new roles as publicists, manifesto writers, and exhibition organizers. This course examines these developments, with attention to formal innovations as well as cultural and political contexts.
Taught by: Poggi
One-term course offered either term
Also Offered As: ARTH 686
Activity: Lecture
1 Course Unit

ARTH 288 Modern Design
Modern Design surveys the development of useful and decorative objects from the rise of modernism at the beginning of the nineteenth century to its rejection in postmodernism toward the end of the century, from the early stages of industrial technology to recent advances in digital technology, from Tiffany glass and tubular-metal furniture to the iPhone and other products of today. Its overall approach focuses on the aesthetics of designed objects and on their designers, as well as on how we talk about and critique them, but the course also investigates the relationship of design and industrialization, technology, sustainability, individual needs, and the expression of societal values.
Taught by: Marcus
Course not offered every year
Also Offered As: ARTH 688
Activity: Lecture
1 Course Unit

ARTH 290 Post War Japanese Cinema
Mizoguchi Kenji, Ozu Yasujiro, and Kurosawa Akira are recognized today as three of the most important and influential directors in Japanese cinema. In their films of the late 1940s and 1950s, these directors focused upon issues surrounding the human condition and the perception of truth, history, beauty, death, and other issues of the postwar period. This course places their films in period context, and pays particular attention to the connections to other visual media, and to how “art” and “history” are being defined in the cinematic context. How other directors also took up these issues, and referred to the “big three” is also be discussed.
Taught by: Davis
Course not offered every year
Also Offered As: ARTH 690, CIMS 223
Activity: Lecture
1 Course Unit

ARTH 292 Topics in Digital/New Media
Topic varies. Spring 2015: Documents are written texts, evidence, inscriptions, and much more. Documentary films have been used to tell stories, share experiences, spread propaganda, resist exploitation, invoke memories, and much more. How can we think of information and meaning in relation to the shared histories of document and documentary? Database management systems based on digital technologies have technically transformed ways of classifying, storing, and aggregating data, but have they really changed our experiences of mediating with our past, present, and future? Issues of agency, memory, representation, performativity, interactivity, and posthumanism are entangled in discussions of databases and archives and our engagement with them. In this course we will relate and juxtapose readings connecting documents, documentaries, and archives. We will read media and cultural theorists such as Lisa Gitelman, Akira Lippit, and Wendy Chun alongside novelists like Franz Kafka and Ismail Kadare. Assignments include one assigned/selected report from field visits to libraries and museums, one reading presentation and blogging assignment, and a final paper or practice-based art project.

Course not offered every year
Also Offered As: AFRC 296, CIMS 295, COML 295, ENGL 295
Activity: Seminar
1 Course Unit

**ARTH 294 Art Now**
One of the most striking features of today’s art world is the conspicuous place occupied in it by the photographic image. Large-scale color photographs and time-based installations in projections are everywhere.

Looking back, we can see that much of the art making of the past 60 years has also been defined by this medium, regardless of the form it takes. Photographic images have inspired countless paintings, appeared in combines and installations, morphed into sculptures, drawings and performances, and served both as the object and the vehicle of institutional critique. They are also an increasingly important exhibition site: where most of us go to see earthworks, happenings and body-art.

This course is a three-part exploration of our photographic present.

Taught by: Silverman
Course usually offered in spring term
Also Offered As: ARTH 694, ENGL 059, GWS 494, VLST 236
Activity: Lecture
1 Course Unit

**ARTH 296 Contemporary Art**
Many people experience the art of our time as bewildering, shocking, too ordinary (my kid could do that), too intellectual (elitist), or simply not as art. Yet what makes this art engaging is that it raises the question of what art is or can be, employs a range of new materials and technologies, and addresses previously excluded audiences. It invades non-art spaces, blurs the boundaries between text and image, document and performance, asks questions about institutional frames (the museum, gallery, and art journal), and generates new forms of criticism. Much of the "canon" of what counts as important is still in flux, especially for the last twenty years. And the stage is no longer centered only on the United States and Europe, but is becoming increasingly global.

The course will introduce students to the major movements and artists of the post-war period, with emphasis on social and historical context, critical debates, new media, and the changing role of the spectator/participant.

Taught by: Poggi
Course usually offered in spring term
Also Offered As: ARTH 696
Activity: Lecture
1 Course Unit

**ARTH 300 Undergraduate Methods Seminar**
Topic varies.
Activity: Seminar
1 Course Unit

**ARTH 301 Undergraduate Seminar**
Topic varies. Spring 2017: Architecture, wrote Walter Gropius in 1935, grows "from the house to...the street; from the street to the town; and finally to the still vaster implications of regional and national planning."

An unusual claim for today, but think of a modernist architect and the image of Le Corbusier’s hand mid-flight over a model of his radical plans for Paris comes easily to mind. This seminar will excavate and critically examine modern architecture’s quest for control over the urban fabric. While we will review some key urban proposals, advanced primarily between the 1920s and the 1950s in Europe and America (among these will be projects by Le Corbusier, Walter Gropius, Frank Lloyd Wright, Louis Kahn, and the Smithsons), our main concern will be to trace how architects attempted to redefine and expand their professional role so as to encompass planning at all scales. We will set the theories of modern "masters" against the daily work of average practitioners, and pay close attention to turf wars among architecture, planning, and engineering as specialized disciplines. We will also consider how conceptual links between urban design and social engineering were invented and challenged in the context of broader developments in social, political, and economic history.

**ARTH 303 Introduction to Museums**
This course introduces students to the history, theory and modern practice of museums. Using the resources of the Penn Museum, the course discusses curatorial practice, education, exhibition design and conservation, while exploring the theoretical and ethical issues confronted by museums. Particularly relevant for those interested in archaeology, anthropology, art history, cultural heritage and public education.

One-term course offered either term
Also Offered As: CLST 303
Activity: Seminar
1 Course Unit

**ARTH 304 Rise of Image Culture**
Images are ubiquitous in the cultural life of the 21st century, yet only two centuries ago they were rare. When and how did pictures come to permeate daily life? How has ordinary experience—psychological, social, cultural, intellectual—changed as a result? This seminar addresses these questions through close reading of influential historical and theoretical writings about the rise of image culture and its effects, including Benjamin, Debord, McLuhan, Mitchell.

Also Offered As: VLST 303
Activity: Seminar
1 Course Unit

**ARTH 311 Topics in Indian Art**
Topic Varies. Spring 2015: Using resources of the Philadelphia Museum of Art’s exceptional collection, this workshop will explore India’s remarkable traditions of sculpture produced for singular narrative and iconic ends.

1 Course Unit

ARTH 325 Topics in Greco-Roman Art
Topic varies. Fall 2017: The dwelling place - house, apartment, villa, palace - was central to Roman understanding of self and society. The domus was a major site of artifice - architecture, landscape architecture, fine objects, statuary and paintings. The very structure was often decorated with wall-paintings, stuccowork, or mosaics, like those which survive from sites like Pompeii and Antioch. Even modest establishments might aim to impress with a mythological painting or two: opening house to visitors was fundamental to social structures, business and politics. This course looks at Roman dwellings in city and country, and explores their arts in cultural and socio-political contexts. Besides evidence of archaeology, we can use the wealth of Roman texts about the arts of living. Since the Renaissance, graphic media have responded to interest in Roman house sites and their art; we consider how new tools of virtual reconstruction affect understanding of the Roman domus and villa, and the roles museums (like our own), exhibitions and curated sites still play in that understanding.

ARTH 329 Topics in Roman Art and Architecture
Topic varies. Fall 2016: In this seminar we will examine key episodes in the development of architecture and urban design in ancient Rome. We will proceed chronologically so that changes to the city and its physical remains can be seen in the broader political, economic, and social context. We will also examine the effect that the landscape and geology had on building materials and architectural expression and how this changed as trade networks focused on Rome expanded during the imperial period. Whenever possible we will take advantage of materials in collection of the University of Pennsylvania Museum.
One-term course offered either term
Also Offered As: CLST 325
Activity: Seminar
1 Course Unit

ARTH 332 Topics in Byzantine Art
Topic varies. Fall 2017: This undergraduate seminar explores the Byzantine icon and its legacy. Spanning nearly two millennia, from the emergence of Christian sacred portraiture to the reception of icon painting by the early twentieth-century avant-garde, the seminar will introduce you to the history, historiography, and theories of the icon. While our focus will be on Byzantium and the wider world of Orthodox Christianity, the seminar will also engage with fundamental questions concerning the nature, status, and agency of images across cultures. Topics to be addressed include iconoclasm and the problem of idolatry; the social and ritual lives of icons; authorship, originality, and replication; viewer response and the cultural construction of vision; the frontier between art and the sacred image; and the afterlife of the icon in modernity.

ARTH 351 Topics in Early Modern Art Theory
Topic varies. Spring 2016: What does it mean to write about art? What are the historical origins of this undertaking? How does language mediate the intellectual, somatic, and cultural rapport between the viewing self and the physical object? As an initial response to these questions we will examine the writings of the Tuscan artist and critic Giorgio Vasari (1511-1574), the biographer of such renowned artists as Leonardo, Raphael, Donatello, and Michelangelo. In addition to considering works of art described in Vasari’s accounts, we will pay close attention to his language and its relationship with other types of writing: saints lives, chronicles, legends, guidebooks, anecdotes, jokes, gossip, and sermons. Issues to be explored include: the process of craft and hardwork, notions of genius and inspiration, and the relationship between the visual arts and natural environment.

1 Course Unit

ARTH 375 Topics in 19th Century Art
Topic varies. Spring 2016: This seminar will place Edouard Manet’s influential paintings within the context of modern Paris, the French Empire and the city’s increasingly global reputation in the late 19th century. We will study the most prominent Parisian sites associated with the rise of modernity as well as the global reach of the “myth” of modern Paris throughout the world, in Japan, the U.S., Latin America, the Middle East, among other destinations. The Eiffel Tower, shopping arcades, department stores (like the Bon Marche), boulevards, sewers, catacombs and world’s fair grounds (including their artistic and popular representations) will be analyzed, as well as their global reception. We will study paintings by Manet, Monet and others, in order to get a better understanding of why the city of Paris is often named the birthplace of modernist art. Students are expected to have at least some background in art history, visual studies and French.

ARTH 427 Roman Sculpture
Survey of the Republican origins and Imperial development of Roman sculpture - free-standing, relief, and architectural - from ca. 150 BC to 350 AD. We concentrate on sculpture in the capital city and on court and state arts, emphasizing commemorative public sculpture and Roman habits of decorative display; genres examined include relief, portraits, sarcophagi, luxury and minor arts(gems, metalwork, coinage). We evaluate the choice and evolution of styles with reference to the functions of sculptural representation in Roman culture and society.

Activity: Lecture
1 Course Unit

ARTH 428 Hellenistic Art and Spectacle
Hellenistic usually names art in the age of Mediterranean culture from the 4th century BCE and the rise of Alexander the Great’s Macedon, and the Greco-Macedonian conquest of the Persian Empire, to Cleopatra of Egypt’s defeat by Rome at the end of the Republic. Our course looks also at the age of Augustus and his successors, 1st century CE. While Greek and Macedonian practice in city-states and kingdoms is our launching point, this course also looks at international culture and cultural interaction among peoples from North Africa and Etrusco-Roman Italy, Egypt, Anatolia, the Mideast and Central Asia. We probe art, artifacts, and visual display from a range of settings, from sanctuary to house, palace and parade, and in all media, from marble monuments to pottery and jewelry. Our archaeology of Hellenistic visual culture also looks at the rich body of Hellenistic and Roman texts of art history, art criticism, and the description of objects and image, to better understand the Hellenistic maker, patron, and viewer. No prerequisites.

ARTH 501 Curatorial Seminar
Curatorial seminars expose students to the complexity of studying and working with objects in the context of public display. With the guidance of faculty and museum professionals, students learn what it means to curate an exhibition, create catalogues and gallery text, and/or develop programming for exhibitions of art and visual/material culture. Fall 2017: This curatorial seminar, culminating in an exhibition at the Arthur Ross Gallery in spring/summer 2018, will present novelties and curiosities first displayed at the 19th and early 20th century’s world fairs. Such events chronicled the period’s innovations in art, technology, and science. Many of the most crucial inventions were first shown to the public at world fairs: electricity, the telephone, and the bicycle, among other innovative artistic techniques and everyday objects like the ice cream cone. While analyzing the appeal of such objects and their place within practices of modern consumption and display, students will study the period definitions of innovation in industrial production promoted by these large-scale spectacles. The global ambitions of universal expositions, and the image of the world they helped construct, will come under scrutiny for its frequent imperial overreach. During the semester students will collectively design the exhibition and thereby get hands-on knowledge of curation; we will produce a catalog as well.

ARTH 516 Topics in Aegean Bronze Age
Topic varies. Fall 2016: Minoan and Cycladic Wall Paintings are considered a hallmark of the Aegean Bronze Age Civilization. Often, these paintings are discussed in terms of their iconography but in isolation of their archaeological contexts. In this class, we will examine both with the goal of determining what types of paintings are used in houses, palaces, defensive structures, and buildings of undetermined function, as well as examining their pictorial programs and iconographic interpretations. With the recent study of Minoan-style wall paintings in Egypt and the Ancient Near East, the question of the spread of Minoan and Cycladic techniques and motifs must also be considered, along with the archaeological contexts at these non-Aegean sites. We will have class discussions of assigned readings.

ARTh 525 Topics in Greek and Roman Art
Topics Varies. Summer 2017: The Greek and Roman world was fascinated by representing humans and beasts enduring physical and psychological pain, and images of violence inflicted by mortal and supernatural beings alike. These often highly striking images occur in art of all kinds, consumed both privately and publicly, emerging in the domestic, religious, military and political sphere. They had a range of aims, from affording emotional catharsis, building political cohesion or enforcing social norms, to generating religious awe or confidence in empire -- and giving entertainment. (The Roman world staged spectacles of real violence in the arena, which we can look to for comparison.) As we explore this corpus, we can ask: what might be the roots of such preoccupation with the art of violence and pain, in the "Classical Tradition" and its post-antique legacy? Many modern cultures exhibit similar fascination: How far can modern reactions to and theories about such images be guides to reconstructing ancient viewership? How can ancient texts and history help us in this interdisciplinary project?

ARTh 575 Topics in 19th Century Art
Topic varies. Spring 2016: This seminar considers the concepts of time crucial to the rise of modern painting in the 19th century, from historical time, leisure time and perceptual time to labor and mechanical time. Too rarely has the history of time and time-keeping, from the industrialization of time to the advent of universal time been used as a tool in the study of modernist painting (as opposed to say the moving image) except perhaps in terms of chronology. To that end, we will think through, as aesthetic categories, the concept of the moment, the instant, the impression, the now, the shock, and also seriality and narrative sequence, and consider painting's oft-cited competition with the camera's evolving shutter speeds. Beside the key art historical literature, we will read extensively in both the cultural history of time and perception (Kern, Galison, Koselleck, Crary) and the aesthetic philosophy of time from Lessing to Deleuze (including Nietzsche, Blanqui, Bergson, Durkheim, Benjamin, Kubler, among others).
Taught by: Dombrowski
Activity: Seminar
1 Course Unit
ARTH 578 Topics in 19th Century American Art
Topic varies. Fall 2015: This course will provide a survey of media traditionally grouped under the category of decorative arts furniture, silver, ceramics, glass made in the United States from the beginnings of European settlement to the end of the nineteenth century. The class format will be part lecture and part discussion, the latter centered on close examination of objects from the collection of the Philadelphia Museum of Art. When possible, the discussion will focus on objects made in Pennsylvania and especially Philadelphia, emphasizing the city and region’s central role over three centuries of American art history. Different methodologies of approaching object study will also be explored. No prior knowledge of the subject is expected.

ARTH 593 Topics in Cinema & Media
Spring 2016: Taking its title from a recent special issue in the journal Framework, this seminar will engage the where of film and media theory. At a moment when this discourse, often presumed to have roots in Anglo and Western European traditions, is purportedly undergoing a global turn, we will consider how some of film and media theory’s key terms and preoccupations including realism, documentary, genre, identity, sound, spectatorship, nation, auteur, and screens are being inflected by expanded geographic, linguistic, aesthetic and cultural frames. We will grapple with some of the logistical challenges, motivations, resistances, and questions that scholars encounter as they attempt to shift film and media theory’s borders; compare contemporary efforts to broaden the discourse’s geographic horizon with earlier efforts to do the same; and consider what happens to the viewer’s sense of space and place in different media environments. Course requirements: full participation in readings, screenings, discussion, and class presentations; 20-25 page research paper + annotated bibliography. Permission of instructor required for advanced undergraduates.

ARTH 596 Topics in Contemporary Art
Topic varies. Spring 2017: Our lives depend on our receptivity: from the very beginning, to the air we breathe, to the food we ingest, to the sleep we submit to. We will consider modes of receptivity to both external and internal stimuli. - Sexual receptivity: sex and love; sex and exchange; pleasure in suffering pain and inflicting pain. - Receiving our identity from networks of power. Agreeing to being psychically and socially named. Resistance. - How might receptivity function outside the subject-object model of relations with the world? - Receiving death. What do we gain by continuing to live? - Plato, Freud, Bourdieu, Sloterdijk; Proust, H.James, Duras, Melville; films: Bergman (Persona), Dumont (Humanite), von Trier (Breaking the Waves and Meloncholia); Pasolini (Salo).

ARTh 602 Mycenae, Pylos, and Troy
The Iliad of Homer recounts the tale of a great war fought by Greek and Trojan armies before the walls of Troy's lofty citadel. This foundation epic of Western literature tells of gods, heroes, and magical places already part of deep past when Homer's work was set to writing, ca. 700 B.C. Does the Homeric story of the Trojan War have a basis in real events? Scholars have long pointed to the Mycenaean civilization, which flourished on the mainland of Greece in the Late Bronze Age (ca. 1600-1200 B.C.), as the inspiration for the Homeric stories. In this course, we examine the archaeology of the great centers of the Late Bronze Age in Greece and Anatolia, particularly Mycenae, Pylos, and Troy. Our main aim is to better understand the social, political, and economic context of this Late Bronze Age world, which may shed light on the possibility that a "Trojan War" of some kind actually occurred. The primary focus on archaeology is supplemented by readings from Homer's Iliad and Odyssey.

ARTh 609 African Art
This selective survey examines a variety of the circumstances of sub-Saharan African art, ranging from imperial to nomadic cultures and from ancient times to contemporary participation in the international market. Iconography, themes and style will be considered, as will questions of modernity, religious impact, tradition and colonialism.
Course not offered every year
Also Offered As: AFST 218, ARTH 209
Activity: Lecture
1 Course Unit

ARTh 611 Art in India
A survey of sculpture, painting and architecture in the Indian subcontinent from 2300 B.C. to the nineteenth century. An attempt to explore the role of tradition in the broader history of art in India.
Taught by: Meister
Course not offered every year
Also Offered As: ARTH 217, EALC 227, EALC 627
Activity: Lecture
1 Course Unit

ARTh 612 Cities and Temples in Ancient India
The wooden architecture of ancient India's cities is represented in relief carvings from Buddhist religious monuments of the early centuries A.D. and replicated in remarkable excavated cave cathedrals. This course will trace that architectural tradition, its transformation into a symbolic vocabulary for a new structure, the Hindu temple, and the development of the temple in India from ca. 500-1500 A.D.
Taught by: Meister
Course not offered every year
Also Offered As: ARTH 212, SAST 201, SAST 501
Activity: Lecture
1 Course Unit

ARTh 613 Arts of Japan
This course introduces the major artistic traditions of Japan, from the Neolithic period to the present, and teaches the fundamental methods of the discipline of art history. Special attention will be given to the places of Shinto, the impact of Buddhism, and their related architectures and sculptures; the principles of narrative illustration; the changing roles of aristocratic, monastic, shogunal and merchant patronage; the formation of the concept of the artist over time; and the transformation of tradition in the modern age.
Taught by: Davis
Course not offered every year
Also Offered As: ARTH 213, EALC 157, EALC 557
Activity: Lecture
1 Course Unit

ARTh 614 Arts of China
The goals of this course are to introduce the major artistic traditions of China, from the Neolithic period to the present and to teach the fundamental methods of the discipline of art history. Our approaches will be chronological, considering how the arts developed in and through history, and thematic, discussing how art and architecture were used for philosophical, religious and material ends. Topics of study will include: Shang bronzes: Han concepts of the afterlife; the impact of Buddhism; patronage and painting; the landscape tradition; the concept of the literatus; architecture and garden design; the "modern" and 20th-century artistic practices; among others.
Taught by: Steinhardt, Davis
Course not offered every year
Also Offered As: ARTH 214, EALC 127, EALC 527
Activity: Lecture
1 Course Unit

ARTh 615 Japanese Painting
An investigation of Japanese painting and practice from the earliest pictorial representations through the late twentieth century. Painting style and connoisseurship form the basis of analysis and themes such as landscape, narrative, and the expression of cultural identities in painting are considered in the context of larger social and cultural issues. Topics include: tomb painting, Heian development of "yamato-e," ink painting, and the adaptation of Chinese styles, the expansion of patronage in the 18th century, and the turn toward internationalism in the late 19th and 20th centuries. May include visits to the PMA or other local collections, as available.
Taught by: Davis
Course not offered every year
Activity: Lecture
1 Course Unit

ARTh 616 Chinese Painting
Study of Chinese painting and practice from the earliest pictorial representation through the late twentieth century. Painting style forms the basis of analysis, and themes such as landscape and narrative are considered with regard to larger social and cultural issues. The class pays particular attention to the construction of the concepts of the "artist" and "art criticism" and their impact on the field into the present. Visits to look at paintings at the University of Pennsylvania Museum, PMA and/or local collections.
Taught by: Steinhardt

Activity: Lecture
1 Course Unit

ARTH 621 Greek Vase Painting
Spring 2015: Painted vases constitute the most important and comprehensive collection of visual evidence that survives from ancient Greece. In this course, we will examine the development of Greek vase-painting from the 10th to the 5th century BC, with particular emphasis on the pottery of the Archaic and Classical periods that was produced in the cities of Athens and Corinth. An object-based learning course, this class will focus on the close study of Greek vases in the collection of the University Museum, and a number of class sessions will meet in the Museum. Several guest lecturers will discuss the conservation and ancient repair of Greek vases and the ceramic analysis of Greek pottery. We will also learn about the making of ceramics in a session in the Addams Hall pottery studio. Some background in art history or classical studies is helpful but not required.
Taught by: Brownlee, A.
Course not offered every year
Also Offered As: AAMW 621, ARTH 221
Activity: Lecture
1 Course Unit

ARTH 622 Art of Ancient Iran
This course offers a survey of ancient Iranian art and culture from the painted pottery cultures of the Neolithic era to the monuments of the Persian Empire. Particular emphasis is placed on the Early Bronze Age.
Taught by: Pittman
Course not offered every year
Also Offered As: AAMW 622, ARTH 222
Activity: Lecture
1 Course Unit

ARTH 624 Art of Mesopotamia
A survey of the art of Mesopotamia from 4000 B.C. through the conquest of Alexander the Great.
Taught by: Pittman
Course not offered every year
Also Offered As: AAMW 424, ARTH 224
Activity: Lecture
1 Course Unit

ARTH 625 Greek Art and Artifact
This course surveys Greek art and artifacts from Sicily to the Black Sea from the 10th century BCE to the 2nd century BCE, including the age of Alexander and the Hellenistic Kingdoms. Public sculpture and painting on and around grand buildings and gardens, domestic luxury arts of jewelry, cups and vases, mosaic floors, and cult artefacts are discussed. Also considered are the ways in which heroic epic, religious and political themes are used to engaged viewer's emotions and served both domestic and the public aims. We discuss how art and space was considered, along with ideas of invention and progress, the role of monuments, makers and patrons in Greek society.
Taught by: Kutner
Course not offered every year
Also Offered As: AAMW 625, ARTH 225, CLST 220
Activity: Lecture
1 Course Unit

ARTH 626 Hellenistic and Roman Art and Artifacts
This course surveys the political, religious and domestic arts, patronage and display in Rome's Mediterranean, from the 2nd c. BCE to Constantine's 4th-c. Christianized empire. Our subjects are images and decorated objects in their cultural, political and socio-economic contexts (painting, mosaic, sculpture, luxury and mass-produced arts in many media). We start with the Hellenistic cosmopolitan culture of the Greek kingdoms and their neighbors, and late Etruscan and Republican Italy; next we map Imperial Roman art as developed around the capital city Rome, as well as in the provinces of the vast empire.
Taught by: Kutner
Course not offered every year
Also Offered As: AAMW 626, ARTH 226, CLST 221
Activity: Lecture
1 Course Unit

ARTH 628 Greek Architecture and Urbanism
Introduction to the art of building and city planning in the ancient Greek world, 7th-1st c. BC. Emphasis on concepts of organizing space, on issues of structure, materials, decoration, proportion, and the Mycenean and eastern heritage as well as on theory and practice of urbanism as reflected in ancient cities (Athens, Pergamon, Alexandria) and writings (Plato, Aristotle, and others). Excursions to the Penn Museum and Philadelphia. No prerequisites.
Taught by: Haselberger

**ARTH 632 Byzantine Art and Architecture**

This course offers a wide-ranging introduction to the art, architecture, and material culture of Byzantium, a Christian, predominantly Greek-speaking civilization that flourished in the Eastern Mediterranean for over a thousand years. Positioned between the Muslim East and the Latin West, Antiquity and the Early Modern era, Byzantium nurtured a vibrant and highly sophisticated artistic culture. With emphasis placed upon paradigmatic objects and monuments, we will examine an array of artistic media, from mosaic and panel painting to metalwork, ivory carving, book illumination, and embroidery. We will consider the making, consumption, and reception of Byzantine art in a variety of contexts: political, devotional, rural, and domestic. Topics include the idea of empire and its visual articulation; court culture; the veneration of images and relics; patronage, piety, and self-representation; authorship and artistic agency; materiality and the sensory experience of art; the reception of the pagan Greco-Roman past; and the changing nature of Byzantium’s interactions with neighboring cultures.

1 Course Unit

**ARTH 633 Eastern Medieval Architecture**

This lecture course examines major architectural developments in the eastern Mediterranean between the 4th and 14th centuries CE. The focus is on the Byzantine Empire, with its capital at Constantinople. Lectures also devoted to related developments in the Caucasus (Armenia and Georgia), early Russia, the Balkans (Bulgaria and Serbia), Sicily and under the Normans, the Crusader states. Parallel developments in early Islamic architecture are used for comparative purposes. The course examines evidence for religious and secular buildings, as well as urbanism and settlement patterns.

Activity: Lecture

1 Course Unit

**ARTH 640 Medieval Art**

An introductory survey, this course investigates painting, sculpture, and the "minor arts" of the Middle Ages. Students become familiar with selected major monuments of the Late Antique, Byzantine, Carolingian, Romanesque, and Gothic periods, as well as primary textual sources. Analysis of works emphasizes the cultural context, the thematic content, and the function of objects. Discussions focus especially on several key themes: the aesthetic status of art and the theological role of images; the revival of classical models and visual modes; social rituals such as pilgrimage and crusading; the cult of the Virgin and the status of women in art; and, more generally, the ideology of visual culture across the political and urban landscapes.

Taught by: Guerin

Course usually offered in fall term

Activity: Lecture

1 Course Unit

**ARTH 641 Introduction to Medieval Architecture**

This course provides an introduction to the built environment of the Middle Ages. From the fall of Rome to the dawn of the Renaissance, a range of architectural styles shaped medieval daily life, religious experience and civic spectacle. We examine the architectural traditions of the great cathedrals, revered pilgrimage churches, and reclusive monasteries of western Europe, as well as castles, houses, and other civic structures. We integrate the study of the architecture with the study of medieval culture, exploring the role of pilgrimage, courts and civil authority, religious reform and radicalism, crusading and social violence, and rising urbanism. In this way, we explore the ways in which the built environment profoundly affected contemporary audiences and shaped medieval life.

Course not offered every year

Also Offered As: AAMW 641, ARTH 241

Activity: Lecture

1 Course Unit

**ARTH 650 Visual Arts of the Italian Renaissance**

This course explores the painting, sculpture, architecture, and other media (textiles, prints, and even armor) from the historical eras conventionally known as the Early and High Renaissance, Mannerism, and Counter Reformation. We consider the work of such artists as Cimabue, Duccio, Giotto, and Mantegna as well as the careers, personalities and reception of Leonardo, Raphael, Michelangelo, and Titian. With emphasis placed upon artists cultivation of particular styles, we look closely at works originating from various contexts: political (city-states, princely courts, and the Papal States); spatial / topographic (inner chambers of private palaces, family chapels, church facades, and public squares); and geographic (Florence, Siena, Rome, Naples, Venice, and Milan). Topics include artistic creativity and license, religious devotion, the revival of antiquity, observation of nature, art as problem-solving, the public reception and function of artworks, debates about style, artistic rivalry, and traveling artists. Rather than taking the form of a survey, this course selects works as paradigmatic case studies, and analyze contemporary attitudes toward art of this period through study of primary sources.

ARTH 654 Global Renaissance and Baroque
An introduction to transcultural encounters within and beyond early modern Europe, 1450-1600. Topics include: the theory and historiography of global art; artistic relations between Venice, the Byzantine and Ottoman Empires, and islands in the Eastern Mediterranean; Portugal's overseas mercantile network in Africa and Asia; and the Baroque in Latin America, with emphasis upon Brazil. Our discussions focus on these paradigmatic case studies so as to question the language and terms we use to characterize confrontations between native and foreign, the self and the other.

Course not offered every year
Also Offered As: ARTH 259
Activity: Seminar
1 Course Unit

ARTH 658 Jewish Art
Jewish Art provides a survey of art made by and for Jews from antiquity to the present. It will begin with ancient synagogues and their decoration, followed by medieval manuscripts. After a discussion of early modern representation of Jews in Germany and Holland (esp. Rembrandt), it focuses most intently on the past two centuries in Europe, American, and finally Israel and on painting and sculpture as Jewish artists began to pursue artistic careers in the wider culture. No prerequisites or Jewish background assumed.

Course not offered every year
Also Offered As: ARTH 260
Activity: Lecture
1 Course Unit

ARTH 659 Northern Renaissance Art
Survey of the principal developments in Northern Europe during the "early modern" period, i.e. the transition from medieval to modern art-making during the fifteenth and sixteenth centuries. Principal attention to painting and graphics with additional consideration of developments in sculpture, particularly in the regions of the Netherlands and German-speaking Europe. Attention focused on the works of the following artists: Van Eyck, Bosch, Durer, Holbein, Bruegel, and on topics such as the rise of pictorial genres, urban art markets, Reformation art and art for the dynastic courts of emerging nation-states.
Tu: Silver
Course not offered every year
Also Offered As: ARTH 261
Activity: Lecture
1 Course Unit

ARTH 660 German Art
This course focuses on paintings, prints, and sculptures produced in Germany around 1600. Principal attention will focus on the changing role of visual cult and altar pieces which evolve into an era of "art," and collecting of pictures. German politics and religion will be examined in relation to the images. Cultural exchange with neighboring regions of Italy and the low countries is considered.
Tu: Silver
Course not offered every year
Also Offered As: ARTH 263
Activity: Lecture
1 Course Unit
ARTh 664 Bruegel to Vermeer
Historical overview of the principal developments in Dutch painting and visual culture across the period of the Dutch Revolt (1568-1648) and beyond. Principal pictorial types, including landscape, portraits and group portraits, genre painting, still-life. Principal artists, including: Bruegel, Goltzius, Hals, Rembrandt, and Vermeer, as well as leading practitioners of each pictorial category. Consideration of cultural values inherent in such imagery, particularly against the background of Dutch society and religious diversity, along with the court culture and Catholic religiosity rejected by the national independence movement.
Taught by: Silver
Course not offered every year
Also Offered As: ARTH 264
Activity: Lecture
1 Course Unit

ARTh 665 Northern Baroque Art
Northern Baroque art comprises seventeenth-century paintings and prints from Flanders and Holland. Featured artists include: Pieter Bruegel, Hendrick Goltzius, Peter Paul Rubens, Anthony van Dyck, Frans Hals, Rembrandt, and Vermeer. Topics considered include innovations of various kinds—starting with portraits and society, landscapes, still-life, and scenes of daily life (genre pictures).
Taught by: Silver
Course not offered every year

Activity: Lecture
1 Course Unit

ARTh 670 The Modern City
A study of the European and American city in the eighteenth, nineteenth, and twentieth centuries. Emphasis is placed on the history of architecture and urban design; political, sociological, and economic factors also receive attention. The class considers the development of London, St. Petersburg, Washington, Boston, Paris, Vienna and Philadelphia.
Taught by: Brownlee, D.
One-term course offered either term
Also Offered As: ARTH 270
Activity: Lecture
1 Course Unit

ARTh 671 Modern Architecture, 1700-1900
The history of western architecture, ca. 1700-1900, when architecture was transformed to serve a world that had been reshaped by political and industrial revolutions. Topics to be considered include the Rococo, the English Garden, Palladianism, Romanticism, neo-classicism, the picturesque, the Greek and Gothic Revivals, and the search for a new style.
Taught by: Brownlee
One-term course offered either term
Also Offered As: ARTH 271
Activity: Lecture
1 Course Unit

ARTh 673 History of Photography
A history of world photography from 1839 to the present and its relation to cultural contexts as well as to various theories of the functions of images. Topics discussed in considering the nineteenth century will be the relationship between photography and painting, the effect of photography on portraiture, photography in the service of exploration, and photography as practiced by anthropologists; and in considering the twentieth century, photography and abstraction, photography as "fine art", photography and the critique of art history, and photography and censorship.
Course not offered every year
Also Offered As: ARTH 273
Activity: Lecture
1 Course Unit

ARTh 674 Facing America
This course explores the visual history of race in the United States as both self-fashioning and cultural mythology by examining the ways that conceptions of Native American, Latino, and Asian identity, alongside ideas of Blackness and Whiteness, have combined to create the various cultural ideologies of class, gender, and sexuality that remain evident in historical visual and material culture. We also investigate the ways that these creations have subsequently helped to launch new visual entertainments, including museum spectacles, blackface minstrelsy, and early film, from the colonial period through the 1940s.

Course not offered every year
Also Offered As: AFRC 294, ARTH 274, ASAM 294, CIMS 293
Activity: Lecture
1 Course Unit

ARTh 675 Revolution to Realism: European Art, 1770-1870
This course surveys the major trends in European art of the tumultuous decades stretching from French Revolution of 1789 to the rise of realism in the mid-nineteenth century. Starting with Jacques-Louis David’s revolutionary history paintings, we study Napoleonic representations of empire, Goya’s imagery of violence, romantic representations of madness and desire, Friedrich’s nationalist landscapes, as well as the politicized realism of Courbet. Some of the themes that are addressed include: the revolutionary hero, the birth of the public museum, the anxious masculinity of romanticism, the rise of industry and bourgeois culture, the beginnings of photography, the quest for national identity and, not least, the origins of the modernist painting. Throughout, we recover the original radicalism of art’s formal and conceptual innovations at times of political and social crisis. We focus on the history of French painting, but include sculpture, photography, visual culture and the development of the modern city, in England, Germany and Spain.
Taught by: Dombrowski
One-term course offered every term
Also Offered As: ARTH 275
Activity: Lecture
1 Course Unit
**ARTH 676 Impressionism**

Impressionism opened the pictorial field to light, perception, science, modernity, bourgeoisie leisure and famously the material qualities of paint itself. This course will survey the movement’s major contexts and proponents—Manet, Monet, Morisot, Cezanne, Gauguin, Van Gogh, Rodin—from its origins in the 1860’s to its demise in the 1890’s, as well as its subsequent adaptations throughout the world until World War I. Particular attention is paid to the artists’ critical reception and the historical conditions which allowed one nation, France, to claim the emergence of early Modernism so firmly for itself. The course also analyzes the effects of the rapidly changing social and cultural fabric of Paris, and its affects on artistic developments. We also look outside of France’s borders to Germany and Britain.

Taught by: Dombrowski

One-term course offered either term

Also Offered As: ARTH 276

Activity: Lecture

**ARTH 677 The Rise of Modernity: Arts of the 19th Century**

The nineteenth century is often considered as fast-paced, politically volatile and new-media obsessed as our own age. This course explores the nineteenth century’s claim to have produced the first truly modern culture, focusing on the visual arts and metropolitan spaces of Europe and North America in their intellectual and social contexts. Stretching from the American and French Revolutions to the eve of World War I, topics to be covered include: the rise of capitalist and industrialist culture, art and revolutionary upheaval, global travel and empire, the origins of modernist art and architecture, and new media such as stereoscopes, iron and glass construction, and photography. Major artistic personalities of the age, from Jacques-Louis David and Gustave Courbet to Claude Monet and Vincent Van Gogh, and from Friedrich Schinkel and, Baron Haussmann to Frank Furness and Frank Lloyd Wright, are discussed. Each lecture will be followed by a brief period of discussion, and regular field trips take students to examine art and architecture first hand, in the museums and on the streets of Philadelphia.

---

**ARTH 678 American Art**

This course surveys the most important and interesting art produced in the United States (or by American artists living abroad) up through the 1950s. This period encompasses the history of both early and modern art in the U.S., from its first appearances to its rise to prominence and institutionalization. While tracking this history, the course examines art’s relation to historical processes of modernization (industrialization, the development of transportation and communications, the spread of corporate organization in business, urbanization, technological development, the rise of mass media and mass markets, etc.) and to the economic polarization, social fragmentation, political conflict, and the cultural changes these developments entailed. In these circumstances, art is drawn simultaneously toward truth and fraud, realism and artifice, science and spirituality, commodification and ephemerality, nationalism and cosmopolitanism, individualism and collectivity, the past and the future, professionalization and popularity, celebrating modern life and criticizing it.

Taught by: Leja, Shaw

Also Offered As: ARTH 278

Activity: Lecture

1 Course Unit

---

**ARTH 680 20th Century East Asian Art**

This course reconsiders modern and contemporary art in China, Japan and Korea over the course of the twentieth century. The confrontations between modernity and tradition, state and self, the colonizer and the colonized, and collecting and the market are among its themes. The course begins with a study of the way modern art was defined at the turn of the 20th century, the promotion of oil painting and the call to preserve national styles, and the use of art at world’s fairs. The avant-garde pursuit of individuality, state-sponsored modernism, the use of art as propaganda in WWII and Communist Revolution, and the place of Chinese, Korean and Japanese art in the contemporary market are also topics covered in this course.
