How do campaign advertisements influence voters' perceptions and behavior? What roles do emotions play in politics? Do we all harbor some measure of racism, sexism, or homophobia, and what role do these stereotypes play in political behavior? How and why do ideologies form, and how does partisanship influence the way that voters understand the political world? How do people perceive threat, and what are the psychological consequences of terrorism? These questions, and many others, are the province of political psychology, an interdisciplinary field that uses experimental methods and theoretical ideas from psychology as tools to examine the world of politics. In this course, we will explore the role of human thought, emotion, and behavior in politics and examine the psychological origins of citizens' political beliefs and actions from a variety of perspectives. Most of the readings emphasize politics in the United States, though the field itself speaks to every aspect of political science.
Taught by: Margolis

Activity: Seminar
1.0 Course Unit

PSCI 437 Race & Criminal Justice
Why are African Americans and some other minority groups disproportionately incarcerated and subjected to penal sanctions? What are the political, social and economic consequences for individuals, communities, and the wider society of mass incarceration in the United States? What types of reforms of the criminal justice system are desirable and possible? This advanced seminar analyzes the connection between race, crime, punishment, and politics in the United States. The primary focus is on the role of race in explaining why the country's prison population increased six-fold since the early 1970s and why the United States today has the highest incarceration rate in the world. The class will likely take field trips to a maximum-security jail in Philadelphia and to a state prison in the Philadelphia suburbs.
Taught by: Gottschalk
Course not offered every year
Also Offered As: AFRC 437, AFRC 638, PSCI 638
Activity: Seminar
1.0 Course Unit

PSCI 439 Experimental Methods of Inquiry
The main goal of this course is to familiarize students with experiments, quasi-experiments, population-based survey experiments and field experiments as they are widely used in the social sciences. By the end of the course, students will be expected to understand what it is about a study that allows for a strong causal inference. Whether one is reading about studies in a newspaper or reading academic journal articles, it is important to know how to distinguish convincing versus unconvincing evidence of any given claim. As a final project, students will be expected either to develop their own original experimental design or to analyze the evidence pertaining to a causal claim of their own choosing based on what they have learned in class. Throughout the course of the semester, we will also consider how to deal with the issue of causality as it occurs in observational studies, and draw parallels between experimental and observational research.
Taught by: Mutz
Course not offered every year
Also Offered As: COMM 498, COMM 615, PSCI 635
Activity: Seminar
1.0 Course Unit

PSCI 484 Meaning of Democracy
This course provides a broad, humanistic survey to some of the most important ideas, debates, and problems connected to the study of democracy. The course is divided into three segments: the democratic citizen (in which we explore ethical issues pertaining to the experience of democracy as a way of life), the democratic People (in which we investigate some of the best and most recent attempts to come to grips with the difficult, yet fundamental, notion of the People); and the democratic world (in which we examine issues pertaining to democratization and development, including the tension between democracy and individual liberty and the relationship between democracy and global capitalism).

PSCI 496 Andrea Mitchell Center Undergraduate Research Seminar
The course is intended for Andrea Mitchell Centre Undergraduate Fellows to present their research ideas, share with the class progress on their ongoing projects, and receive constructive feedback from fellow students and the course instructor.
Taught by: Green
Course not offered every year
Prerequisites: Class is limited to undergraduates who have been accepted as Andrea Mitchell Center research fellows. Undergraduates apply in the spring for seminar in the following fall.
Corequisites: Students who take the seminar are obligated to present their research in a conference in the following spring, as well as attend monthly meetings in the spring semester in preparation for that conference.
Activity: Seminar
0.5 Course Units

PSCI 497 Political Science Honors
This is a mandatory seminar for all students planning to submit an honors thesis for the purpose of possibly earning distinction in Political Science upon graduation. The course is aimed at helping students identify a useful and feasible research question, become familiar with the relevant literatures and debates pertaining to that question, develop a basic understanding of what might constitute "good" and "original" research in different subfields, and set up a plan for conducting and presenting the research. The course is also aimed at building a community of like-minded student researchers, which can complement and enrich the honor student's individual experience of working one-on-one with a dedicated faculty thesis advisor. Students apply in the spring of their junior year for admissions to the honors program and enrollment in PSCI497.
Taught by: Doherty-Sil
One-term course offered either term

PSCI 511 Society and Politics in India
This course examines the experience of representative democracy in India and the country's development record in a historical framework. It will ask questions such as: How did representative democracy emerge in India, and what explains its persistence? What are the sources of its vulnerability? What kind of a sense of nationhood does this democratic experience rest upon? What are the exclusions built into this conception of nationhood? What is the relationship between India's development experience and its democratic experiment? How have India's "traditional" institutions adapted or failed to adapt to modern circumstances? Why has India performed well in certain economic sectors even while its record in providing basic social services has been dismal? How have the Indian State and its public institutions managed and coped with these changes? And how has India's self-perception about its place in the world changed in recent years, and what are its implicatons?
Taught by: Kapur, Frankel

1.0 Course Unit

PSCI 513 Latin American Politics
This graduate level course will be embedded in course PSCI/LALS 213, the same way that PSCI 517 (Russian Politics) is embedded in PSCI 217. In other words, graduate students taking this course will have to attend lectures twice a week, but instead of discussing materials in recitations will meet with Professor Falleti, either weekly (one hour) or biweekly (two hours), to discuss the main topics of the course and research questions and proposals related to the course.
Taught by: Falleti
Course usually offered in fall term
Also Offered As: LALS 513
Activity: Lecture
1.0 Course Unit

PSCI 517 Russian Politics
This course will present an in-depth examination of political, economic and social change in post-Soviet Russia within a historical context. After a brief discussion of contemporary problems in Russia, the first half of the course will delve into the rise of communism in 1917, the evolution of the Soviet regime, and the tensions between ideology and practice over the seventy years of communist rule up until 1985. The second part of the course will begin with an examination of the Gorbachev period and the competing interpretations of how the events between 1985 and 1991 may have contributed to the collapse of the Soviet Union.
We will then proceed to make sense of the continuities and changes in politics, economics and society in contemporary Russia. Important topics will include the confrontations accompanying the adoption of a new constitution, the emergence of competing ideologies and parties, the struggle over economic privatization, the question of federalism and nationalism, social and political implicatons of economic reform, and prospects for Russia's future in the post-Yeltsin era. This course may also be taken as a graduate seminar (PSCI 517) with the permission of the instructor and the completion of additional requirements.
Taught by: Sil
Course usually offered in spring term
Also Offered As: PSCI 217, REES 217
Activity: Recitation
1.0 Course Unit
PSCI 530 The Political Economy of Gender
Over the past two hundred years, with the rise industrial production, growing educational attainment, and availability of contraception, women have entered the formal labor market in vast numbers. Yet despite advances, there are still important disparities between the sexes, often exacerbated by class and racial politics. This course unpacks the elements of the transition in the political economy of gender and examines its limits. We set out to understand women’s labor in emerging industrial and post-industrial economies; the causes and consequences of women’s political inclusion; gendered opportunities in the labor force including the persistence of pay gaps; and the formation of economic and political preferences across the genders. Theoretically, we will engage with Marxian political economy, and new institutionalist approaches to understand how political and economic institutions reproduce or remedy contemporary problems including the gender gap in wages, in political representation, and in women’s economic opportunities. Throughout the course we will pay special attention to challenges faced by minority groups and by women in developing countries.
Taught by: Teele
Course usually offered in fall term
Also Offered As: GSWS 598
Activity: Seminar
1.0 Course Unit

PSCI 531 Public Opinion & Elections
This course is designed to give advanced undergraduates and graduate students exposure to the literature on political behavior in American politics (the course is part of the departments 3-course graduate sequence in American politics). The course will cover both the classics of public opinion and political behavior from the Columbia, Michigan, and Rochester schools, as well as more current topics and debates in the literature. Topics include (but are not limited to) the early voting studies, the role of partisanship, the nature and origins of ideology, mass-elite interactions, heuristics and low information rationality, the nature of the survey response, campaign and media effects, framing effects, and the role of institutions in structuring behavior. Undergraduates are welcome in the class, but they should know that the class assumes familiarity with quantitative approaches to studying politics.

PSCI 552 Game Theory
This course provides an introduction to non-cooperative game theory and its applications to political science. The goal of the course is to provide students with the background and understanding necessary to read published game-theoretic work in political science journals. To that end, the course covers the basic concepts of game theory, including Nash equilibrium and its main refinements, simultaneous and sequential games, repeated games, evolutionary game theory, and games of incomplete and private information. In addition, we will cover some of the central models used in political science, notably models of public choice (such as the median voter theorem) and models of bargaining.
Taught by: Weisiger
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 558 Human Rights
This course will examine the theoretical, historical and political foundations of contemporary human rights debates. The course will cover not only broad conceptual issues, but also specific issue areas (e.g., civil rights, economic rights, women’s rights, business and human rights), as well as the question of how new rights norms emerge and diffuse in the international arena. The course is open to students in the Master of Liberal Arts Program, as well as students who are actively pursuing the Graduate Certificate in Interdisciplinary Studies in Global Human Rights.
Taught by: Doherty-Sil
Also Offered As: PSCI 258
Activity: Recitation
1.0 Course Unit

PSCI 582 Gender, Power & Feminist Theory
This seminar will examine the theme of power as it engages questions of sex and gender. Subsidiary themes that will be developed over the course of the semester include: the modernism/postmodernism debate as it particularly relates to feminism; the intersectionality of race, gender, sexuality and class and how feminists can and do talk about “women”; the relevance of feminist theory to policy issues, and which theoretical approaches are the most appropriate or have the most potential power.

The readings will start with “foundational” texts in feminist theory—texts that anyone who wants to work in or teach feminist theory needs to have in their repertoire, they set out the background and history of contemporary feminist theory, and they operate from a variety of disciplinary frameworks. We then will move onto some newer scholarship and some more specific political issues and topics, depending on what students in the course are interested in studying. This course is open to undergraduates who have had some prior course work in feminist theory, gender and sexuality studies, and/or political theory, in consultation with the professor.
Taught by: Hirschmann

Also Offered As: GSWS 582
Activity: Seminar
1.0 Course Unit
PSCI 584 Political Philosophy
An examination of basic theoretical problems of political science divided into three parts. First, specific features of social sciences will be examined and three most important general orientations of social sciences (analytical, interpretative and critical) will be compared and analyzed. Second, basic concepts of social and political sciences will be studied: social determination, rationality, social change, politics, power, state, democracy. Third, the problem of value judgments will be considered: Is there a rational, objective method for the resolution of conflicts in value judgments? Is morality compatible with politics? Course not offered every year
Also Offered As: GSWS 584

PSCI 598 Selected Topics
Consult department for detailed descriptions. More than one course may be taken in a given semester. Recent titles have included: Race Development and American International Relations, Hegel and Marx, and Logic of the West.
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSCI 600 International Relations Theory
This purpose of this course is two-fold. First, the survey course is designed to introduce students to a wide range of theories of international politics. During the course of the semester we will examine neo-realism, power transition theory, hegemonic stability theory, the modern world system, international regimes and interdependence, the democratic peace, bureaucratic politics, organizational theory, constructivism, and decision making theory. Second, the course will sharpen students’ research design skills. The written assignments require students to take the often abstract theories presented in the readings and develop practical research designs for testing hypotheses derived from the theories. The papers will not include data collection or the execution of actual tests. Rather, they will focus on the conceptual problems of designing tests which eliminate competing hypotheses, operationalizing variables, and identifying potential sources of data. Student’s grades will be based on five short research designs and discussion leadership.

PSCI 610 Comparative Political Analysis
This seminar is aimed primarily at graduate students planning to take doctoral exams in comparative politics. It provides a critical survey of the field of comparative politics, tracing the intellectual history of the field, examining shifts in conceptual frameworks and research traditions, and comparing alternative methodological approaches. The first half of the course generally examines how processes of political, economic, and social change have been theorized in the social sciences from the mid-19th century to the present. In this process, particular attention is paid to the bifurcation between theories that emphasize the “universal” (e.g. the homogenizing effects of specific processes or variables) and the “particular” (e.g. the persistence of distinctive historical legacies and trajectories). Since this bifurcation is reinforced by distinct styles and methods of research, the seminar also probes the recent battles between rational-choice, cultural, and structuralist scholars, while considering the trade-offs between varieties of formal, quantitative, and qualitative methods. In the second half, the focus shifts to the range of substantive problems investigated by scholars in the field of comparative politics. These topics cover the complex relations among nations, states and societies; the origins, consolidation, and patterns of democratic governance; political economy in relation to development processes and social policies; the intersection of international/global economy and domestic politics; the dynamics of revolutions and social movements; and alternative problematiques constructed from the point of view of real actors such as workers, women, and local communities. In all cases, As a whole, the course is designed to provide an introduction to important issues and debates that comparativists have regularly engaged in; to help you understand the assumptions behind, and differences between, particular approaches, methods, and styles of research; to examine whether current debates are spurring new or better research in a given field in light of past approaches; and to gauge whether there has been progress, fragmentation, or stagnation in the field of comparative politics as a whole.

Course not offered every year
Activity: Seminar
1.0 Course Unit

PSCI 615 Political Economy of Development
This course examines the debate in development studies arising from recognition that economic models, theories, methods, and strategies abstracted from the specific experience of western societies and cultures do not have general applicability. A broader social science approach is adopted, one which emphasizes the need to understand the social structures and cultures of the developing countries, the capabilities of weak versus strong states, and the links with the international system that influence transformative processes to which industrializing economies are subjected. The readings offer an overview of the most influential theories of development and underdevelopment that structured debate from the 1960’s through the 1990’s, and focus on the elements of these approaches that advance understanding of development and stagnation in several key countries, including Brazil, Mexico, India and selected countries in East and Southeast Asia.

1.0 Course Unit

PSCI 633 Hegemonic Analysis: Theories and Applications
An important strain within contemporary political science has been the attempt to explain how power is exercised through the manipulation or exploitation of consciousness, habits, and cultural predispositions. One of the key concepts in the study of these issues is that of “hegemony” – the establishment of particular beliefs as commonsensical presumptions of political life. In this course that notion will be systematically explored. Of particular interest will be how authors who conduct hegemonic analysis cope with the problem of analyzing the effect of what the objects of their analysis, by definition, do not and, in some sense, cannot, think about. Illustrations of hegemonic phenomena and attempts to analyze them will be drawn from a variety of fields, such as political theory, historiography, comparative politics, American politics, rational choice theory, agent based modeling, and epistemology.

Portuguese (PRTG)

PRTG 110 Elementary Portuguese I
Portuguese 110 is a first-semester introductory language course for students who have not studied Portuguese before, or who have had little exposure to the language. The course will emphasize the development of foundational reading, writing, listening and speaking abilities within a cultural context. Students will participate in paired and group activities designed to elicit meaningful and accurate exchanges of information. The course will introduce students to Portuguese and Lusophone culture through a variety of authentic materials, including texts, films and other audio and video material. Classes will be conducted in Portuguese.
For BA Students: Language Course
Activity: Seminar
1.0 Course Unit

PRTG 114 Portuguese for Spanish Speakers I
Portuguese 114 is designed for students who have studied Spanish. The course begins with exposure to basic vocabulary and structures, advancing at an accelerated pace. Classroom activities will emphasize pronunciation, spoken production as well as language structures and vocabulary. Students will participate in pairs, small-groups and whole-class activities that focus on the meaningful and accurate exchange of information. The class will be conducted in Portuguese.
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PRTG 120 Elementary Portuguese II
This class continues the development of a basic proficiency that will help reinforce the student’s abilities and confidence. A broad range of lively, high-interest readings such as newspaper and magazine articles in current events on Brazilian culture will allow the student to gain a genuine sense of current usage. A Brazilian movie is presented and discussed in groups. Daily homework assignments involve writing exercises, short compositions and group projects.
For BA Students: Language Course
Course usually offered in spring term
Prerequisite: PRTG 110 or instructor’s permission
Activity: Seminar
1.0 Course Unit

PRTG 130 Intermediate Portuguese I
This is a third-semester intermediate course, in a four-course strand, designed for students who have taken at least two semesters of Portuguese. Classroom activities will emphasize pronunciation, spoken production, language structures and vocabulary, as students explore movies, music and other authentic media to further develop their ability to communicate in Portuguese. The course will be conducted in Portuguese.
For BA Students: Language Course
Course usually offered in fall term
Prerequisite: PRTG 120 or instructor’s permission
Activity: Seminar
1.0 Course Unit

PRTG 134 Portuguese for Spanish Speakers II
Portuguese 134 is an accelerated intermediate course designed for students who have taken Portuguese for Spanish Speakers I, or its equivalent. Classroom activities will emphasize the development of pronunciation and spoken production, the use of language structures and vocabulary at the intermediate level. In addition, students will explore movies, music, short stories, and other media as they further develop reading, speaking and interpretive skills in Portuguese. The course will be conducted in Portuguese.
One-term course offered either term
Prerequisite: PRTG 114
Activity: Seminar
1.0 Course Unit

PRTG 140 Intermediate Portuguese II
This is a fourth-semester intermediate course, in a four-course strand, designed for students who have taken at least three semesters of Portuguese. Classroom activities will emphasize pronunciation, spoken production, grammar and language structures, and vocabulary at the advanced intermediate level. Students will explore movies, readings, news, music and other media as they further develop speaking, writing, reading and interpretive skills in Portuguese. The course will be conducted in Portuguese.
For BA Students: Last Language Course
Course usually offered in spring term
Prerequisite: PRTG 130 or instructor’s permission
Activity: Seminar
1.0 Course Unit

PRTG 202 Advanced Portuguese
This course is designed for students who have already taken basic and intermediate levels of Portuguese. It complements students’ knowledge of Portuguese by emphasizing the use of advanced grammatical structures and vocabulary. Classes will focus on practicing such advanced language structures by reading a diverse range of texts, including short stories by different authors of the Lusophone countries, and one novel; speaking and writing about a variety of contemporary texts; watching movies and documentaries; and listening to news, songs and other authentic audio material. The emphasis will be on language usage and culture. This course will be conducted in Portuguese.
For BA Students: Advanced Language Course
One-term course offered either term
Prerequisites: PRTG 134, PRTG 140 or instructor’s permission
Activity: Seminar
1.0 Course Unit

PRTG 215 Portuguese for the Professions
Portuguese for the Professions is designed for advanced-level students to develop their ability to use a wide technical vocabulary. The course will cover an array of topics in the areas of Economy, Politics, Science, Technology, Law and others as they pertain to the societies and cultures of the Lusophone countries, with particular emphasis placed on Brazil. Through readings, movies, discussions, essays and presentations, students will enhance their ability to write about and discuss these topics while employing the appropriate technical vocabulary.
One-term course offered either term
Prerequisite: Portuguese 202
Activity: Seminar
1.0 Course Unit
PRGT 217 Portuguese for the Professions II
Portuguese for the Professions II is a second-semester course designed to provide advanced-level students with exposure to, and practice in, a wide variety of technical vocabulary, and to develop their communicative skills on topics related to Brazil's economic, social and historical context. Classroom activities will be based on the readings and discussions of articles, papers, the viewing of documentaries and other visual media, covering an array of topics within the proposed themes. The course will be conducted in Portuguese.
For BA Students: Advanced Language Course
Course usually offered in fall term
Prerequisite: Portuguese 202
Activity: Seminar

Professional Writing (PROW)
The courses listed on this page are exclusive to the LPS BAAS degree (https://lpsonline.sas.upenn.edu/features/what-bachelor-applied-arts-and-sciences-degree) and LPS Online certificates (https://lpsonline.sas.upenn.edu/academics/certificates).

PROW 100 Fundamentals of Professional Writing
Using an immersive, case-based teaching style, this course introduces the basic concepts and vocabulary students build upon throughout the remainder of the certificate and draw upon in all future writing tasks. Students become equipped with a deep understanding of how to analyze any writing situation and make their writing a purposeful act of communication. Students engage with a series of authentic writing scenarios and a range of activities that provide hands-on practice and instructor coaching and feedback, as well as targeted exercises for improving grammar, mechanics, clarity, precision and persuasiveness. This collaborative, problem-based learning approach provides students with the strategies and flexibility they need to adapt to an ever-changing multimedia communication environment. *There is a $175 program fee for the On-Campus Learning Experience HYBRID sections; registration for those sections is limited to BAAS degree candidates.
Activity: Online Course
1.0 Course Unit
Notes: Program fee of $175 for On Campus Learning Experience for those enrolled in the HYBRID sections of the course. The HYBRID sections of PROW 100 are open to admitted BAAS students only. Those sections which are NOT HYBRID are open to PENN LPS Online certificate students, BAAS students, Gateway students, and other course-takers. Please check with your advisor if you have questions.

PROW 101 Writing for Specialized Audiences: Private Sector
Using case studies and other real-world examples, this course provides an introduction to writing for audiences in the private sector, including business, technical and professional organizations. Students learn to identify the different purposes, genres and specialized audiences one encounters when writing in the private sector, as well as methods for effectively reaching and persuading these audiences. The course also provides practical simulations to aid students as they adapt their processes and styles to specialized situations, expanding their writer's repertoire while deepening their understanding of writing for a specific context. Genres to be studied include e-mail, letters (for example sales, job applications, rejection letters, responses to complaints), mission/ vision/goal statements, biographical notes, organization descriptions and reports. PROW 100 is a prerequisite for students who are enrolled in the PROW certificate.
Activity: Online Course
1.0 Course Unit

PROW 102 The Elements of Style
This course is for anyone who has been charmed by a novel, article, or tweet and wanted to have similar power as a writer. What makes a sentence pop? What makes a piece of writing seem effortless? Effective writers use words purposefully and grab their readers attention by fulfilling and sometimes disrupting expectations. Grammar is not a set of rules so much as it is a set of tools that enable us to make meaning; it allows us to appeal to the senses by creating rhythm and helping readers to feel and see our ideas. We will fill our collective toolbox through sentence-level choices such as arrangement of words, concrete versus abstract language, and sentence length. We will provide customized exercises for those who wish to work on their grammar and mechanics alongside developing other strategies for powerful, effective writing.

PROW 301 The Power of Storytelling
From business and science to medicine and nonprofit organizations, storytelling is increasingly recognized as one of the strongest tools of communication and persuasion. This course introduces students to the use and art of storytelling, also known as narrative studies. Students review storytelling in academic and professional communities as both a research tool for gathering information about particular communities or types of individuals, and as an effective rhetorical strategy for generating emotional appeal and action, and brand identity. They also explore storytelling as a compelling means of conveying complex and memorable information. This course explores how storytelling may be variously used for inquiry, evidence gathering and persuasion. Lessons are reinforced through the examination of business anecdotes, case studies, narrative medicine, biographical notes, personal statements, and cover letters.
Activity: Online Course
1.0 Course Unit
PROW 400 Writing for Social Media
This course explores the use of social media campaigns for building a positive identity with customers or other audiences. We look at how to use social media to create coherent messaging, build a reputation and cultivate reader loyalty. We also explore how readers and designers approach multimedia texts as complex entities that bring together language, image, sound, and gesture to to produce a coherent message. With its multiple modalitiesvisual, aural, and somaticsocial media makes different types of demands of its creators and its audiences than those imposed by conventional top-down, left-to-right texts that one encounters in books, essays or letters, requiring an expanded understanding of rhetorical strategies and contexts.

Psychology (PSYC)

PSYC 001 Introduction to Experimental Psychology
This course provides an introduction to the basic topics of psychology including our three major areas of distribution: the biological basis of behavior, the cognitive basis of behavior, and individual and group bases of behavior. Topics include, but are not limited to, neuropsychology, learning, cognition, development, disorder, personality, and social psychology.
For BA Students: Living World Sector
One-term course offered either term
Activity: Lecture
1.0 Course Unit

PSYC 006 The Pursuit of Happiness
What is happiness? Can it be successfully pursued? If so, what are the best ways of doing so? This interactive course will consider various ways of answering these questions by exploring theoretical, scientific, and practical perspectives on flourishing, thriving, and wellness. We will discuss approaches to happiness from the humanities and the sciences and then try them out to see how they might help us increase our own well-being and that of the communities in which we live.
Taught by: Pawelski
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Course does not count for Psychology major, minor, or consumer psychology minor.

PSYC 097 Psych Abroad
One-term course offered either term
Activity: Lecture
1.0 Course Unit

PSYC 109 Introduction to Brain and Behavior
Introduction to the structure and function of the vertebrate nervous system, including the physiological bases of sensory activity, perception, drive, motor control and higher mental processes. The course is intended for students interested in the neurobiology of behavior. Familiarity with elementary physics and chemistry will be helpful.
For BA Students: Living World Sector
One-term course offered either term
Also Offered As: BIBB 109, BIOL 109
Activity: Lecture
1.0 Course Unit

PSYC 111 Perception
How the individual acquires and is guided by knowledge about objects and events in their environment.
One-term course offered either term
Also Offered As: VLST 211
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1.0 Course Unit

PSYC 127 Physiology of Motivated Behaviors
This course focuses on evaluating the experiments that have sought to establish links between brain structure (the activity of specific brain circuits) and behavioral function (the control of particular motivated and emotional behaviors). Students are exposed to concepts from regulatory physiology, systems neuroscience, pharmacology, and endocrinology and read textbook as well as original source materials. The course focuses on the following behaviors: feeding, sex, fear, anxiety, the appetite for salt, and food aversion. The course also considers the neurochemical control of responses with an eye towards evaluating the development of drug treatments for: obesity, anorexia/cachexia, vomiting, sexual dysfunction, anxiety disorders, and depression.
Taught by: Grill
One-term course offered either term
Also Offered As: BIBB 227
Prerequisite: PSYC 001
Activity: Lecture
1.0 Course Unit

PSYC 149 Cognitive Neuroscience
The study of the neural systems that underlie human perception, memory and language; and of the pathological syndromes that result from damage to these systems.
Taught by: Epstein or Mackey
One-term course offered either term
Also Offered As: BIBB 249
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1.0 Course Unit

PSYC 151 Language and Thought
This course describes current theorizing on how the human mind achieves high-level cognitive processes such as using language, thinking, and reasoning. The course discusses issues such as whether the language ability is unique to humans, whether there is a critical period to the acquisition of a language, the nature of conceptual knowledge, how people perform deductive reasoning and induction, and how linguistic and conceptual knowledge interact.
Taught by: Trueswell
One-term course offered either term
Also Offered As: LING 151
Prerequisites: PSYC 001, COGS 001, LING 105, or PSYC 207
Activity: Lecture
1.0 Course Unit
PSYC 160 Personality and Individual Differences
This course provides an introduction to the psychology of personality and individual differences. Many psychology courses focus on the mind or brain; in contrast to those approaches of studying people in general, the focus in this course is on the question “How are people different from each other?” It will highlight research that take a multidimensional approach to individual differences and attempts to integrate across the biological, cognitive-experimental, and social-cultural influences on personality.
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1.0 Course Unit

PSYC 162 Abnormal Psychology
The concepts of normality, abnormality, and psychopathology; symptom syndromes; theory and research in psychopathology and psychotherapy.
Taught by: Ruscio
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1.0 Course Unit

PSYC 170 Social Psychology
An overview of theories and research across the range of social behavior from intra-individual to the group level including the effects of culture, social environment, and groups on social interaction.
For BA Students: Society Sector
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1.0 Course Unit

PSYC 181 Intro to Developmental Psychology
The goal of this course is to introduce both Psychology majors and non-majors majors to the field of Developmental Psychology. Developmental Psychology is a diverse field that studies the changes that occur with age and experience and how we can explain these changes. The field encompasses changes in physical growth, perceptual systems, cognitive systems, social interactions and and much more. We will study the development of perception, cognition, language, academic achievement, emotion regulation, personality, moral reasoning, and attachment. We will review theories of development and ask how these theories explain experimental findings. While the focus is on human development, when relevant, research with animals will be used as a basis for comparison.
Taught by: Brannon
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1.0 Course Unit

PSYC 207 Introduction to Cognitive Science
Cognitive Science is founded on the realization that many problems in the analysis of human and artificial intelligence require an interdisciplinary approach. The course is intended to introduce undergraduates from many areas to the problems and characteristic concepts of Cognitive Science, drawing on formal and empirical approaches from the parent disciplines of computer science, linguistics, neuroscience, philosophy and psychology. The topics covered include Perception, Action, Learning, Language, Knowledge Representation, and Inference, and the relations and interactions between such modules. The course shows how the different views from the parent disciplines interact, and identifies some common themes among the theories that have been proposed. The course pays particular attention to the distinctive role of computation in such theories, and provides an introduction to some of the main directions of current research in the field. It is a requirement for the BA in Cognitive Science, the BAS in Computer and Cognitive Science, and the minor in Cognitive Science, and it is recommended for students taking the dual degree in Computer and Cognitive Science.
Taught by: Brainard/Ungar
One-term course offered either term
Also Offered As: CIS 140, COGS 001, LING 105, PHIL 044
Prerequisites: An Introductory Course in Computer Science, Linguistics, Neuroscience, Philosophy, or PSYC 001
Activity: Lecture
1.0 Course Unit

PSYC 217 Visual Neuroscience
An introduction to the scientific study of vision, with an emphasis on the biological substrate and its relation to behavior. Topics will typically include physiological optics, transduction of light, visual thresholds, color vision, anatomy and physiology of the visual pathways, and the cognitive neuroscience of vision.
Taught by: Stocker
Course usually offered in spring term
Also Offered As: BIBB 217, VLST 217
Prerequisite: PSYC 109
Activity: Lecture
1.0 Course Unit

PSYC 225 Drugs, Brain, and Mind
The course will begin with a review of basic concepts in pharmacology: routes of drug administration, drug metabolism, the dose response curve, tolerance, and sensitization. Following a brief overview of cellular foundations of neuropsychopharmacology (cell biology, synaptic and receptor function), the course will focus on various classes of drugs used to treat neuropsychiatric disorders including, among others, depression, schizophrenia, and anxiety. We will additionally consider mechanisms mediating the mind-altering, addictive and neurotoxic effects of abused drugs.
Taught by: Kane
Course usually offered in spring term
Also Offered As: BIBB 270
Prerequisite: PSYC 109 or BIBB 109
Activity: Lecture
1.0 Course Unit
PSYC 231 Evolution of Behavior: Animal Behavior
The evolution of social behavior in animals, with special emphasis on group formation, cooperation among kin, mating systems, territoriality and communication.
One-term course offered either term
Also Offered As: BIBB 231, BIOL 231
Prerequisite: PSYC 001 or BIOL 102 or COGS 001
Activity: Lecture
1.0 Course Unit

PSYC 235 Psychology of Language
This course describes the nature of human language, how it is used to speak and comprehend, and how it is learned. The course raises and discusses issues such as whether language ability is innate and unique to humans, whether there is a critical period for the acquisition of a language, and how linguistic and conceptual knowledge interact.
Taught by: Dahan
One-term course offered either term
Prerequisite: PSYC 151 or LING 001
Activity: Lecture
1.0 Course Unit

PSYC 239 Neuroendocrinology
This course is designed to examine the various roles played by the nervous and endocrine systems in controlling both physiological processes and behavior. First, the course will build a foundation in the concepts of neural and endocrine system function. Then we will discuss how these mechanisms form the biological underpinnings of various behaviors and their relevant physiological correlates.
Taught by: Flanagan-Cato
One-term course offered either term
Prerequisite: PSYC 109
Activity: Lecture
1.0 Course Unit

PSYC 247 Neuroscience and Society
Cognitive, social, and affective neuroscience have made tremendous progress in the last two decades. As this progress continues, neuroscience is becoming increasingly relevant to all of the real-world endeavors that require understanding, predicting and changing human behavior. In this course we will examine the ways in which neuroscience is being applied in law, criminal justice, national defense, education, economics, business, and other sectors of society. For each application area we will briefly review those aspects of neuroscience that are most relevant, and then study the application in more detail.
Taught by: Gerstein
One-term course offered either term
Also Offered As: PSYC 549
Prerequisite: PSYC 109 or PSYC 149
Activity: Lecture
1.0 Course Unit

PSYC 253 Judgment and Decisions
Thinking, judgment, and personal and societal decision making, with emphasis on fallacies and biases.
One-term course offered either term
Also Offered As: PPE 153
Prerequisite: One semester of statistics or microeconomics
Activity: Lecture
1.0 Course Unit

PSYC 265 Behavioral Economics and Psychology
This course will introduce you to the study of choice, and will examine in detail what we know about how people make choices, and how we can influence these choices. It will utilize insights from psychology and economics, and will apply these insights to domains including consumer choice, risky decision making, and prosocial decision making.
Taught by: Bhatia
One-term course offered either term
Also Offered As: PPE 313
Prerequisite: Microeconomics and PSYC 001
Activity: Lecture
1.0 Course Unit

PSYC 266 Introduction to Positive Psychology
An introduction to the study of positive emotions, positive character traits, and positive institutions. The positive emotions consist of emotions about the past (e.g., serenity, satisfaction, pride), about the future (e.g., hope, optimism, faith), and emotions about the present (pleasure and gratification). The distinction among the pleasant life, the good life, and the meaningful life is drawn. The positive traits include wisdom, courage, humanity, justice, temperance, and spirituality, and the classification of these virtues is explored. The positive institutions are exemplified by extended families, free press, humane leadership, and representative government.
Course usually offered in spring term
Prerequisite: PSYC 001
Activity: Lecture
1.0 Course Unit

PSYC 272 Evolutionary Psychology
This course introduces the field of evolutionary psychology, which is an approach to the study of human behavior. We will consider the theoretical underpinnings of the field, including evolutionary theory, development, kinship, and adaptations for social life, and will sample some of the recent empirical contributions to this growing area.
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1.0 Course Unit
PSYC 275 Introduction to Political Psychology
This course will explore psychological approaches to understanding political beliefs, attitudes, and actions at the levels of both individual citizens and national leaders. It will also explore the possibility that psychological science itself is not immune to the political debates swirling around it. Specific topics will include: the workings of belief systems (and their power to shape what we “see”), cognitive biases (and their power to cause miscalculations), sacred values and their role in stabilizing belief systems and social interaction, personality and ideology (the linkages between the personal and the political), and clashing conceptions of morality and distributive and corrective justice (striking variations among people in what they consider to be fair). We shall also explore some topics that have sparked controversy in the psychological research literature and that tend to polarize opinion along political lines, including work on intelligence and unconscious bias.
Taught by: Tetlock
One-term course offered either term
Also Offered As: PPE 275
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1.0 Course Unit
Notes: NOTE: Students who are more interested in business-related issues may want Wharton 276x which is a modified version of this course specifically for Wharton undergraduates.

PSYC 280 Developmental Psychology: Social and Emotional Development
This course will cover theory and research related to the development of attachment, emotional regulation, peer and intimate relationships, personality, moral reasoning, and emotional and behavioral disorders. The course will emphasize the degree to which family, peer, and community contexts influence development from infancy into adulthood. Efforts will be made to integrate biological and environmental accounts of development across the lifespan.
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1.0 Course Unit

PSYC 281 Cognitive Development
What infants and young children come to know about the world, and how they learn it. Topics will include changes in children's thinking, perceptual development, language acquisition, and current theories of cognitive development.
Taught by: Swingley
One-term course offered either term
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1.0 Course Unit

PSYC 311 Research Experience in Perception
In this research course, students will begin by first replicating earlier experiments to measure human visual memory capacity. After several class discussions to discuss ideas, each student will design and conduct their own experiment to further investigate visual and/or familiarity memory.
Taught by: Rust
One-term course offered either term
Also Offered As: VLST 212
Prerequisites: One semester of statistics, and one of the following:
PSYC 111, 119, 151, 217, or permission of instructor.
Activity: Seminar
1.0 Course Unit
Notes: Dept permission required. Undergraduates only.

PSYC 351 Research Experience in Cognitive Psychology
Students will work in small groups to develop, empirically test, and report on a research question in the field of cognitive psychology. Through this process, students will learn how to conduct and report a psychological study, including the appropriate statistical tests. Class discussions will help students craft their projects, and in-class presentations will provide the opportunity to develop and refine presentation skills. Psychology majors only. Class size is limited to 16 students.
Taught by: Weisberg
One-term course offered either term
Prerequisites: One semester of statistics.
Activity: Seminar
1.0 Course Unit
Notes: Dept permission required. Psych majors only.

PSYC 362 Research Experience in Abnormal Psychology
PSYC 362-301 is a two-semester course starting in the Fall. Class size limited to 8 students.
Taught by: Dr. Melissa Hunt
Prerequisites: PSYC 162 and one semester of statistics. Psych majors only. Instructor permission required.
Activity: Seminar
1.0 Course Unit
Notes: PSYC 362-301 is a two-semester course starting in the Fall.

PSYC 370 Research Experience in Social Psychology
In this course students will work in small groups to develop, empirically test, and report on a research question within one of the domains of social psychology. Depending on the nature of the project, students will employ survey, experimental, or observational research methodology, and learn how to conduct and report the appropriate statistical tests with Excel and/or SPSS (typically, correlations, t-tests, ANOVA and ANCOVA, multiple regression, factor analysis, and measures of reliability). Class discussions will help students craft their projects, and in-class presentations will provide the opportunity to develop and refine presentation skills. Psychology majors only. Class size is limited to 12 students.
Taught by: Royzman
Prerequisites: PSYC 170 AND one semester of statistics.
Activity: Seminar
1.0 Course Unit
Notes: Dept permission required. Psychology majors only.

PSYC 380 Research Exp Develop Psy
Activity: Seminar
1.0 Course Unit

PSYC 399 Individual Empirical Research
Individual research involving data collection. Students do independent empirical work under the supervision of a faculty member, leading to a written paper. Normally taken in the junior or senior year.
One-term course offered either term
Activity: Independent Study
1.0 Course Unit
Notes: Dept permission required
PSYC 400 Senior Honors Seminar in Psychology
Open to senior honors candidates in psychology. A two-semester sequence supporting the preparation of an honors thesis in psychology. Students will present their work in progress and develop skills in written and oral communication of scientific ideas.
Taught by: Thompson-Schill
Prerequisite: acceptance into the Honors Program in Psychology
Activity: Seminar
0.5 Course Units
Notes: Dept permission required

PSYC 421 Neurobiology of Learning and Memory
This advanced course focuses on the current state of our knowledge about neurobiological basis of learning and memory. Students will explore the molecular and cellular basis of learning invertebrates and vertebrates from a behavioral and neural perspective.
Taught by: Gerstein
One-term course offered either term
Also Offered As: BIBB 442, BIOL 442, NGG 575
Activity: Seminar
1.0 Course Unit

PSYC 429 Big Data, Memory, and the Human Brain
Advances in brain recording methods over the last decade have generated vastly more brain data than had been collected by neuroscientists during the previous century. To understand the human brain, scientists must now use computational methods that exploit the power of these huge data sets. This course will introduce you to the use of big data analytics in the study of human memory and its neural basis. Through hands-on programming projects, we will analyze multi-terabyte data sets both to replicate existing phenomena and to make new discoveries. Although the course has no formal neuroscience or psychology prerequisites it does require CIS121 and Python experience. Because of the heavy computing resources required to perform the assignments enrollment is limited to 15 students and there is a required course application. https://forms.gle/CfeogYQm5mwUBk3x7
Taught by: Kahana
Also Offered As: BIBB 429
Prerequisite: CIS121 & Python experience
Activity: Seminar
1.0 Course Unit
Notes: Instructor permission required. Application form can be found here: https://forms.gle/CfeogYQm5mwUBk3x7

PSYC 431 Seminar in Animal Cognition
The aim of this course will be to provide advanced undergraduates with a detailed review of a number of research areas in behavioral ecology. One-term course offered either term
Also Offered As: BIBB 432
Prerequisite: PSYC 231/Biol 231/ BIBB 231
Activity: Seminar
1.0 Course Unit

PSYC 434 Computational Neuroscience Lab
This course will focus on computational neuroscience from the combined perspective of data collection, data analysis, and computational modeling. These issues will be explored through lectures as well as Matlab-based tutorials and exercises. The course requires no prior knowledge of computer programming and a limited math background, but familiarity with some basic statistical concepts will be assumed. The course is an ideal preparation for students interested in participating in a more independent research experience in one of the labs on campus.
For the Spring 2019 semester, the course will focus on the topic of visual memory.
Taught by: Nicole Rust
Course usually offered in spring term
Also Offered As: BIBB 334
Prerequisite: BIBB 109
Activity: Laboratory
1.0 Course Unit

PSYC 435 Psycholinguistics
Taught by: Dahan
Prerequisites: PSYC 151, or PSYC 235, or LING 001, or permission of instructor.
Activity: Seminar
1.0 Course Unit

PSYC 439 Neuroendocrinology Seminar
This course is designed to examine the various roles played by the nervous and endocrine systems in controlling both physiological processes and behavior. First, the course will build a foundation in the concepts of neural and endocrine system function. Then, we will discuss how these mechanisms form the biological underpinnings of various behaviors and their relevant physiological correlates. We will focus on sexual and parental behaviors, stress, metabolism, neuroendocrine-immune interactions, and mental health.
Taught by: Flangan-Cato
One-term course offered either term
Also Offered As: BIBB 460
Prerequisite: PSYC 109
Activity: Seminar
1.0 Course Unit

PSYC 447 Neurological Insights into Cognition and Behavior
Our modern understanding of the brain began with very humble foundations. Long before transgenic mice, MRI scans, and neuronal recordings, most knowledge about brain function was based on clinical observations of human patients with neurological lesions. This advanced seminar will focus on the cognitive neuroscience of perception, emotion, language, and behavior -- through the unique perspective of real-life patients -- to illustrate fundamental concepts of brain function. Tuesday classes will explore different cognitive neuroscience topics through student presentations and discussion. Thursday classes will involve observing medical history taking and examination of a patient with cognitive deficits pertinent to the Tuesday topic, with opportunity for students to interact with the patient. Pre-requisites: Instructor permission required and PSYC 109/BIBB 109.
Taught by: Gottfried
One-term course offered either term
Prerequisites: Instructor permission is required. Prerequisite: PSYC 109/BIBB 109.
Activity: Seminar
1.0 Course Unit
Notes: Juniors and Seniors only. Permission of instructor required.
Prerequisite: PSYC 109/BIBB 109.
PSYC 449 Seminar in Cognitive Neuroscience
Topics vary each semester. PSYC 449 (Gerstein) Neuroscience for Policymakers: This seminar will provide an overview of the neuroscience behind some of the most relevant issues in public health policy today. We will examine the primary scientific literature as well as delve into lay articles about the science and policy surrounding each issue. /PSYC 449 (Epstein) Consciousness: Consciousness is our subjective experience of the world, including both perceptions and felt internal states. In this seminar, we will explore the burgeoning scientific literature on the neural basis of consciousness. We will focus in particular on three topics: What are the neural systems underlying visual awareness? What are the mechanisms that control the progression of conscious contents to create our stream of thought? What is the relationship between consciousness and behavior? /PSYC 449 (Jenkins) The Social Brain: This seminar examines the cognitive and neural mechanisms that enable humans to predict and understand people’s behavior. We will be propelled throughout the course by fundamental questions about the human social brain. For example, why are humans so social? Does the human brain have specialized processes for social thought? Consideration of these questions will involve advanced treatment of a range of topics.
Prerequisite: PSYC 149
Activity: Seminar
1.0 Course Unit
Notes: PSYC 449-601 is an LPS course. PSYC 449-301, -302 and -303 are Psych Dept. courses.

PSYC 453 Seminar in Decision Making: Judgment and Decisions
This seminar will be a series of engaging discussions on a variety of topics that are important to the field of behavioral decision theory. We’ll cover issues such as constructed preferences, loss aversion, nudging, emotions, well-being, other-oriented decisions, intuitive predictions, unethical choices, and more. Students will be asked to present papers and generate ideas for potential research projects each week. Grades will be based on class contributions and a paper that is either a literature review or a careful and detailed proposal for a research project.
Taught by: Mellers
One-term course offered either term
Prerequisite: PSYC 253 or PSYC 265
Activity: Seminar
1.0 Course Unit
Notes: Undergraduates only.

PSYC 462 Seminar in Abnormal Psychology
Topics vary each semester.
Prerequisite: PSYC 162
Activity: Seminar
1.0 Course Unit
Notes: Undergraduates only. 462-601 is an LPS course.

PSYC 466 Seminar in Positive Psychology
This intensive, discussion-based seminar focuses on the key research that has shaped Positive Psychology. This seminar will equip students with useful insight and critical analysis about Positive Psychology by emphasizing scientific literacy. The workload for this seminar requires intensive reading. To excel in this seminar, students must be willing to enthusiastically read, dissect, and critique ideas within Positive Psychology. This requires students to articulate various ideas in verbal and written form.
Taught by: Connolly
Course not offered every year
Activity: Seminar
1.0 Course Unit

PSYC 470 Seminar in Social Psychology
Topics vary each semester.
One-term course offered either term
Prerequisite: PSYC 170
Activity: Seminar
1.0 Course Unit
Notes: Undergraduates only.

PSYC 472 Behavioral Biology of Women
A course that explores female behavior focusing on evolutionary, physiological, and biosocial aspects of women’s lives from puberty, through reproductive processes such as pregnancy, birth, lactation to menopause and old age. Examples are drawn from traditional and modern societies and data from nonhuman primates are also considered.
Taught by: Apicella
One-term course offered either term
Prerequisites: PSYC 272, BIOL 102, ANTH 104, or ANTH 143.
Activity: Seminar
1.0 Course Unit

PSYC 473 Neuroeconomics
This course will review recent research that combines psychological, economic and neuroscientific approaches to study human and animal decision-making. A particular focus will be on how evidence about the neural processes associated with choices might be used to constrain economic and psychological theories of decision-making. Topics covered will include decisions involving risk and uncertainty, reinforcement learning, strategic interactions and games, and social preferences.
Taught by: Kable
One-term course offered either term
Also Offered As: BIBB 473, NGG 706
Prerequisites: PSYC 149, 253, or 265
Activity: Seminar
1.0 Course Unit

PSYC 474 PSYC 474-301: Being Human; PSYC 474-601: Cultural Psychology
Taught by: Platt (PSYC 474-301); Abiola (PSYC 474-601)
Prerequisite: PSYC 001
Activity: Seminar
1.0 Course Unit
Notes: Undergraduates only. PSYC 474-601 is an LPS course.

PSYC 478 CAPSTONE: SOCIAL PSYCHOLOGY
Though almost half a century old, Milgram's 1961-1962 studies of "destructive obedience" continue to puzzle, fascinate, and alarm. In this seminar, we will take an in-depth look at these famous studies (along with the more recent replications) and explore their various psychological, historical, and philosophical ramifications. This course has a number of intellectual goals that go beyond simply rarifying one’s understanding of a particular content area (important and generative as it may be). One such a goal is to enable you to think critically (though not disparagingly) about other people’s research and theoretical claims that ensue from it, all with the hope that you can then apply the self-same critical acumen to your own future work. Second, this course will offer a hospitable environment for developing (and exchanging) creative ideas of your own. Your work on your individual reaction papers and on the term paper in particular will be a key element in achieving this goal.
Taught by: Royzman
Also Offered As: PPE 477
Prerequisite: PSYC 170
Activity: Seminar
1.0 Course Unit
PSYC 480 Seminar in Developmental Psychology
PSYC 480-301 (Brannon): The field of educational neuroscience is an emerging field with the goal of joining knowledge gained from the disciplines of neuroscience, cognitive science, developmental psychology, and education. This interdisciplinary course will focus on how scientific exploration of the mind and brain can inform educational practices. PSYC 480-302 (Connolly): This advanced discussion-based seminar will focus on approaches to success in domains of modern life such as social living and academia. The first portion of this seminar will be a psychology book club where we read various books written by psychology researchers. This will contribute to an ongoing discussion about scientific communication, and the presentation of psychological research to various audiences. From there, students will focus on a specific area of interest, and write a literature review based on contemporary empirical research critiquing their given topic. Students must understand the workload for this seminar requires intensive reading culminating in a large written assignment.
Taught by: Weisberg, Brannon, or Connolly
Prerequisite: PSYC 001
Activity: Seminar
1.0 Course Unit
Notes: Undergraduates only.

PSYC 482 Inside the Criminal Mind
This seminar explores the development of antisocial behavior including psychopathy, aggression, and violence. At its core, this course examines what increases the risk that children will develop behavior problems and go onto more chronic and extreme forms of violence and psychopathic personality that results in harm to others. We will examine psychiatric diagnoses associated with these antisocial behaviors in both childhood and adulthood and how they link to other relevant forms of psychopathology (e.g., substance use, ADHD). We will explore research elucidating the neural correlates of these behaviors, potential genetic mechanisms underlying these behaviors, and the environments that increase risk for these behaviors. Thus, there will be a focus on neurobiology and genetics approaches to psychiatric outcomes, as well as a social science approach to understanding these harmful behaviors, all while considering development across time. We will also consider ethical and moral implications of this research.
Taught by: Waller
Prerequisites: PSYC 162 and PSYC 181
Activity: Seminar
1.0 Course Unit
Notes: Undergraduates only.

PSYC 490 The Science of Behavior Change
This advanced seminar will expose students to cutting-edge research from psychology and economics on the most effective strategies for changing behavior for the better (e.g., promoting healthier eating and exercise, encouraging better study habits, and increasing savings rates). The weekly readings cover classic and current research in this area. For each topic we will cover, articles have been carefully chosen, and we will discuss those in detail. The goal is to help students develop the skill of reading and critiquing an academic paper. We will therefore have student led discussions of papers and required summaries. The target audience for this course is advanced undergraduate students interested in behavioral science research and particularly those hoping to learn about using social science to make a positive social impact. We will focus primarily on the applications of behavioral science to improving health, education and financial outcomes. Admission to this course is by application only. Please complete the application form to be considered for admission: https://tinyurl.com/bcfg-class-application
Taught by: Milkman and Duckworth
One-term course offered either term
Also Offered As: OIDD 490
Prerequisites: Permission of instructor required.
Activity: Seminar
1.0 Course Unit
Notes: Undergraduates only. Please complete the application form to be considered for admission: https://tinyurl.com/bcfg-class-application

PSYC 492 Social Cognition
Activity: Seminar
1.0 Course Unit

PSYC 511 Prob Models of Perception
Activity: Lecture
1.0 Course Unit

PSYC 521 Judgment & Decisions
Activity: Seminar
1.0 Course Unit

PSYC 525 Controversies in Psychology and Neuroscience
In this seminar, we will discuss several recent controversies in psychology and neuroscience, for example: "p-hacking," replicability, methodological terrorists, neural activity in dead salmon and failures to control the false positive rate in neuroimaging, "voodoo correlations" and double dipping, whether Tic-Tacs can improve self-control and whether reading "old" makes you walk slower. Our goal is not just to engender ennui and/or schadenfreude, but also to ask what we can learn from these discussions about how to do science in the most rigorous, reproducible manner possible.
Activity: Seminar
1.0 Course Unit

2019-20 Catalog | Generated 10/18/19
PSYC 539 Theoretical and Computational Neuroscience
This course will develop theoretical and computational approaches to structural and functional organization in the brain. The course will cover: (i) the basic biophysics of neural responses, (ii) neural coding and decoding with an emphasis on sensory systems, (iii) approaches to the study of networks of neurons, (iv) models of adaptation, learning and memory, (v) models of decision making, and (vi) ideas that address why the brain is organized the way that it is. The course will be appropriate for advanced undergraduates and beginning graduate students. A knowledge of multi-variable calculus, linear algebra and differential equations is required (except by permission of the instructor). Prior exposure to neuroscience and/or Matlab programming will be helpful.
Taught by: Balasubramanian
Course not offered every year
Also Offered As: BE 530, BIBB 585, NGG 594, PHYS 585
Activity: Lecture
1.0 Course Unit

PSYC 541 Sleep and Memory
Why do we sleep? This question has puzzled scientists for centuries, but one reason emerging from research in the area is that sleep is critical for forming, retaining, and transforming our memories over time. This seminar explores human and animal research in psychology and neuroscience that has shed light on how sleep carries out these functions. Topics will include the different stages of sleep and their roles in memory consolidation, the neural systems involved in representing memory at different timescales, and the role of dreams in processing memories.
Activity: Seminar
1.0 Course Unit

PSYC 547 Foundations of Social, Cognitive, and Affective Neuroscience
Activity: Lecture
1.0 Course Unit

PSYC 549 Neuroscience and Society
Activity: Lecture
1.0 Course Unit

PSYC 557 Neuroscience, Ethics & Law
How does the neuroscience of human decision-making and emotion impact our understanding of ethics and law? What can neuroscience tell us about why people find actions moral or immoral, worthy of praise or punishment? What, if anything, can it tell us normatively about morality, agency and responsibility? And what other insights might neuroscience offer regarding other morally and legally relevant phenomena such as stereotyping and bias, the causes of antisocial behavior and the detection of deception?
Taught by: Farah
Also Offered As: LAW 557
Activity: Seminar
1.0 Course Unit

PSYC 579 Exp Methods Perception
Activity: Lecture
1.0 Course Unit

PSYC 600 Proseminar in General Psychology
Choice of half or full course units each sem. covering a range of subjects and approaches in academic psychology.
One-term course offered either term
Activity: Seminar
1.0 Course Unit
Notes: Dept permission required

PSYC 609 Systems and Integrative Neuroscience
Course usually offered in fall term
Also Offered As: NGG 573
Activity: Lecture
1.0 Course Unit
Notes: Fulfills the Brain requirement

PSYC 611 Applied Regression and Analysis of Variance
An applied graduate level course in multiple regression and analysis of variance for students who have completed an undergraduate course in basic statistical methods. Emphasis is on practical methods of data analysis and their interpretation. Covers model building, general linear hypothesis, residual analysis, leverage and influence, one-way anova, two-way anova, factorial anova. Primarily for doctoral students in the managerial, behavioral, social and health sciences.
Taught by: Rosenbaum
Course usually offered in fall term
Also Offered As: BSTA 550, STAT 500
Prerequisite: STAT 102 or 112 or equivalent
Activity: Lecture
1.0 Course Unit

PSYC 612 Introduction to Nonparametric Methods and Log-linear Models
Course usually offered in spring term
Also Offered As: STAT 501
Activity: Lecture
1.0 Course Unit

PSYC 617 Violence: A Clinical Neuroscience Approach
Developed for both Psychology and Criminology graduate students, this interdisciplinary course outlines a clinical neuroscience approach to understanding violence in which the tools of neuroscience-neuroanatomy, neurophysiology, neurocognition, neuroendocrinology, neuropharmacology, molecular and behavioral genetics- are used to help inform the etiology and treatment of violence. Clinical components include psychopathy, proactive and reactive aggression, homicide domestic violence, conduct disorder, oppositional defiant disorder, antisocial personality disorder, crime, and delinquency as well as their comorbid conditions (schizophrenia, drug abuse, hyperactivity). The interaction between social, psychological, and neurobiological processes in predisposing to violence will be highlighted, together with neurodevelopmental perspectives on violence focusing on prospective longitudinal and brain imaging research. Key implications for the criminal justice system, neuroethics, forensics psychology, and intervention will also be outlined.
Taught by: Raine
Course usually offered in fall term
Also Offered As: CRIM 671
Activity: Lecture
1.0 Course Unit
Notes: Graduate students only.

PSYC 698 Laboratory Rotation.
Lab rotation for psychology grad students.
One-term course offered either term
Activity: Lecture
3.0 Course Units
Notes: Dept permission required. Open only to psychology dept graduate students.

PSYC 699 Individual Research for First-Year Graduate Students
Two terms. student must enter first term.
Activity: Independent Study
3.0 Course Units
PSYC 703 Special Topics in Psychology
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSYC 704 Research Methods and Statistical Procedures for Social and Clinical Sciences
This course has three primary objectives: 1) developing criteria and strategies for strong inference of causal relationships in social and clinical psychology research; 2) examining the array of research designs employed in the social/clinical sciences together with the threats to internal and external validity associated with each; 3) learning and applying statistical analytical methods appropriate for questions in the social/clinical sciences. The course will employ a seminar format and a project-oriented approach to learning. Students will be encouraged to utilize examples from their own research programs in applying the design and analysis concepts covered in the course.
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSYC 705 Neuroethics
Neuroscience is increasingly affecting all aspects of human life, from the relatively familiar medical applications in neurology and psychiatry, to new applications in education, business, law, and the military. Today's neuroscience graduate students will be among the scientists, citizens, and policymakers who will lead society through the maze of decisions regarding the appropriate uses of neuroscience. This course provides a survey of the key ethical, legal, and social issues at the intersection of neuroscience and society. It will include a combination of traditional classroom lectures, discussion and debates, as well as an online component coordinated with a course at Wisconsin's Neuroscience and Public Policy graduate program.
Taught by: Farah
One-term course offered either term
Activity: Seminar
1.0 Course Unit
Notes: Dept permission required.

PSYC 709 Special Topics in Clinical Psychology
A developmental approach to the study of psychopathology focuses on how psychological processes from normal to abnormal developmental trajectories. In this seminar we will cover theory, methods, and key constructs in the study of developmental psychopathology. Readings will include seminal empirical papers and chapters.
One-term course offered either term
Activity: Seminar
1.0 Course Unit
Notes: Graduate students only.

PSYC 711 Basic Problems in Developmental II
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSYC 712 Regression & Anova II
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSYC 744 Brain Development & Society
Activity: Seminar
1.0 Course Unit

PSYC 745 Special Topics in Cognitive Neuroscience
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSYC 747 Contemporary Research Issues in Social, Cognitive and Affective Neuroscience
Activity: Seminar
1.0 Course Unit

PSYC 810 Psychodiagnostic Testing
Course usually offered in fall term
Activity: Seminar
1.0 Course Unit

PSYC 811 Psychodiagnostic Interviewing
Course usually offered in fall term
Activity: Seminar
1.0 Course Unit

PSYC 815 Introductory Practicum
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit

PSYC 820 Advanced Practicum
Intensive studies of single individuals including interviews, tests, and experiments; also clinical experience at appropriate community agencies.
One-term course offered either term
Activity: Seminar
1.0 Course Unit

PSYC 999 Individual Study and Research
One-term course offered either term
Activity: Independent Study
0.5 Course Units

Public Health Studies (PUBH)

PUBH 500 Foundations of Public Health
This course will provide a topical overview of the inter-disciplinary field of public health and provides grounding in the public health paradigm. Through a series of lectures and recitation sessions, students will learn about the history of public health and the core public health sciences including behavioral and social sciences, biostatistics, epidemiology, environmental health, and policy and management. Other topics include ethics in public health, context analyses (specifically sociographic mapping and urban health), community participation in research, public health promotion, and the prevention of chronic and infectious diseases.
Course usually offered in fall term
Also Offered As: NURS 570
Activity: Lecture
1.0 Course Unit
PUBH 501 Introduction to Biostatistics
Introduction to Biostatistics This course is designed to provide a broad overview of biostatistics methods as well as applications commonly used for public health research. Topics covered include measurement and categorizing variables, use and misuse of descriptive statistics, testing hypotheses, and applying commonly used statistical tests. An emphasis will be placed on the practical application of data to address public health issues, rather than theoretical and mathematical development. Students will learn how to choose and apply statistical tools to data sources, when and how statistical tools can be used to analyze data, and how to interpret others’ quantitative studies. Students will gain experience using online datasets and the STATA statistical software package.
One-term course offered either term
Activity: Lecture
1.0 Course Unit

PUBH 502 Introduction to the Principles and Methods of Epidemiology
This course will provide an introduction to the principles and methods of epidemiology as a research science. The course introduces the student designs applied to human populations, including randomized trials and observational studies (cohort, case-control, cross-sectional, ecological). Homework and in-class assignments focus on building skills in locating, assessing, and synthesizing evidence from the epidemiologic literature, with an emphasis on critical thinking, causal inference, and understanding bias and confounding.
One-term course offered either term
Activity: Lecture
1.0 Course Unit

PUBH 503 Environmental and Occupational Health
This course will provide a broad introduction to the scientific basis of occupational and environmental health. Content will address issues in the ambient, occupational, and global environments as well as the tools, concepts, and methods used in environmental health.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

PUBH 504 Public Health Theories & Frameworks
This course provides students with a solid foundation in behavioral and social science theory, research, and interventions as they pertain to public health. Content will provide exposure to a broad range of theories, including the theoretical foundations of social science applications for help-seeking, gender, race, ethnicity and social class. These theories will be discussed using examples of their applications to numerous public health problems including HIV/AIDS, violence, cancer, cardiovascular diseases, obesity, and diabetes.
One-term course offered either term
Activity: Lecture
1.0 Course Unit

PUBH 505 Public Health Policy and Administration
This course is an introduction to health policy and management. It examines both the historical and current state of health policy in America and integrates these concepts within the context of public health practice. We will examine key concepts in understanding US health care organization, financing and delivery, our current political and economic debate on health care reform, examining the role and management issues of public health departments, and case studies in public health policy and management.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

PUBH 506 Methods for Public Health Practice
This is a course designed around modules whose objective is to provide students with greater familiarity in a range of methods essential to public health practice. The course will be framed around an in-depth capacity and needs assessment and community public health planning in Philadelphia. Topics covered will include data collection and evaluation, both quantitative and qualitative, uses of informatics in public health, analysis of vital statistics, working with communities, methods for developing and facilitating solutions to public health problems, including concepts of advocacy and policy formation and development of interventions. The course demonstrates how core public health competency areas in data analysis and communication provide foundations for applications for both practice and practice-based research.
One-term course offered either term
Activity: Lecture
1.0 Course Unit

PUBH 507 Public Health Law & Ethics
What is best - or, at least, seems best -- for the public's health is not always consistent with society's view of what is legal, ethical, or good policy. This course introduces key concepts of legal, ethical, and policy analysis and attempts to demonstrate with current examples how these forces empower, guide, and constrain public health decision-making and actions. The course will combine lecture, Socratic dialogue, and group discussion in an informal setting. The course will feature guest lectures by several distinguished experts from Penn and from other universities.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

PUBH 508 Capstone Seminar I
The Capstone is a culminating experience required for graduation in the Master of Public Health Program. In two Capstone seminars, students will have an opportunity to synthesize the knowledge and public health competencies they have developed through their coursework. Capstone students will apply their knowledge and skills to public health problems in a chosen area of interest. They will engage their peers in scholarly discussion, drawing from relevant scientific literature and public health experience in order to begin to develop a common grounding and identity as public health professionals. The Capstone incorporates two semester-long seminars and a research project. Over the course of the Casstone, students will develop, propose, revise, implement, and present their projects. As their projects successfully come to fruition they will also advise their junior colleagues still in the proposal stage.
Two terms. student may enter either term.
Activity: Lecture
1.0 Course Unit

PUBH 509 Capstone Seminar II
This course is the second of two Capstone courses related to the culminating project required for graduation in the Master of Public Health Program. MPH students apply their knowledge and skills to public health problems in a chosen area of interest under the guidance of a Capstone Mentor.
Two terms. student may enter either term.
Activity: Lecture
1.0 Course Unit
PUBH 514 Environmental and Occupational Health Experiences
This course seeks to develop students’ ability to analyze and understand environmental and occupational health concepts, and identify and synthesize policy and practice solutions to the world’s most pressing environmental and occupational health issues. This course provides an introduction to environmental and occupational health concepts, with a focus on workplace health policy and practice at the local, state, and federal levels. In-class lecture content includes tools, concepts, and research methods to examine categories of environmental and occupational risks and associated health conditions, and identify and develop solutions. Out-of-class experiences provide the opportunity to learn directly from experts in a variety of related fields, and gain first-hand experience in environmental and occupational health practice.
Activity: Lecture
1.0 Course Unit

PUBH 517 Geography and Health
This course will provide an introduction to GIS in public health research and practice. Through a series of lectures and labs students will explore theories linking health and the environment, spatial analysis and spatial epidemiology, and applications of GIS-related data collection and analysis.
Course usually offered in fall term
Also Offered As: EPID 518
Activity: Lecture
1.0 Course Unit

PUBH 519 Issues in Global Health
This course presents an overview of issues in global health from the viewpoint of many different disciplines, with emphasis on economically less developed countries. Subjects include: millennium goals; measures of disease burden; population projections and control; environmental health and safe water; demography of disease and mortality; zoonotic infectious diseases; AIDS and HIV prevention; vaccine utilization and impact; eradication of polio virus; chronic diseases; tobacco-associated disease and its control; nutritional challenges; social determinants of global health; harm reduction and behavioral modifications; women’s reproductive rights; health economics and cost-effective interventions; health manpower and capacity development; bioethical issues in a global context.
Course usually offered in fall term
Prerequisites: Undergraduates must have completed HSOC-010-401.
Activity: Lecture
1.0 Course Unit

PUBH 521 Program Evaluation in Public Health
There are many public health programs developed to promote change. The question most funders have for public health programs is: what outcomes do you expect? This course is designed to review the principles of identifying short term, mid term and long term outcomes and methods of measurement. Students learn about the application of date collection skills to all phases of developing a public health program or service innovation, from needs assessment to analysis of finding to implementation of changes based on results. Students learn to appreciate how these skills can be used as practical tools for identifying public health problems, program development, program implementation including taking a reflective practice approach, ensuring equity and fairness in program delivery (i.e. combating disparities), and generally promoting public health through effective and efficient programmatic efforts.
Course offered spring; odd-numbered years
Activity: Lecture
1.0 Course Unit

PUBH 523 Epidemics: Social causes and consequences of outbreaks, emergencies, threats
Our success as public health researchers, practitioners, and leaders often depends on our ability to think critically and act rapidly to address public health threats. This course will examine the fundamental challenges of public health action. Using a case-based method, the course will probe true public health emergencies, considering the information available to scientists; public access and reaction to that information; and the nature/scope/consequences of interventions levied to address the public health threat. The course will tackle cases from several areas of infectious and social epidemiology, such as the following: outbreak investigation (using a cholera example); lay epidemiology (examining cancer clusters); surveillance and rapid response (based on flu policy); and the difficulty of intervening to address social determinants of health (probably looking at poverty/SES and race/racism). Students in the class will develop key skills in critical epidemiological reasoning. In all cases, the emphasis will be on evaluating the empirical base for public health decision-making, with attention given to public health goals and metrics used to evaluate success in public health interventions.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit

PUBH 525 Health & Human Rights
This course will explore the interplay between health and human rights and enable students to critically apply human rights to public health practice. We will explore the development of health as a human right and how public health research and policy can affect human rights. Students will learn about core human rights principles and mechanisms and the international development agenda. The class will examine topics at the intersection of global health and human rights including HIV/AIDS, harm reduction, migration, sexual and reproductive health, and climate change. Class material will primarily focus on public health challenges in the global south; however, we will also discuss health and human rights issues faced by vulnerable populations in the United States.
Activity: Lecture
1.0 Course Unit

PUBH 529 Public Health Perspectives on Sexual & Reproductive Health
This course will survey a range of key current and historic topics in reproductive and sexual health nationally and internationally with a particular emphasis on implications for public health. Policy, epidemiology, clinical practice, advocacy, and service delivery topics will be covered through presentations and conversations with leaders in the fields of reproductive and sexual health. The course will provide students with a broad general introduction to these topics which is appropriate for those interested in either public health or clinical aspects of the field. For students who wish to pursue a focused career in this area, this course is a necessary introduction. Students who will be working in related areas of public health will have exposure to a broad general understanding of reproductive and sexual health.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
PUBH 530 Environmental Toxicology: Risk Assessment and Health Effects
This course presents general principals of toxicology and the disposition of toxins in the body. Case studies of the effects of environmental and occupational toxins on individuals will be analyzed. This course is designed for students who desire a strong foundation in toxicological concepts and principals and provides an overview of major toxins in our environment and their association with human health.
Course usually offered in fall term
Also Offered As: NURS 677
Activity: Lecture
1.0 Course Unit

PUBH 531 Public Health Nutrition
The course is designed to introduce students to the core concepts, policies and practice of public health nutrition. The course will draw upon real world examples of local, national, and global initiatives to decrease risk of chronic diseases related to the World Health Organization's (WHO) major nutrition-related chronic diseases.
Activity: Lecture
1.0 Course Unit

PUBH 538 Qualitative Methods in Health
The purpose of this course is to expose students to a variety of qualitative approaches/methodologies that may be used in health services/policy research. In didactics we will discuss the pros and cons of various methods, explaining how the method is actually implemented (with multiple experts presenting their approaches), and pair the presentation with a broader discussion in which we compare and contrast health oriented articles in which the method was used.
Course usually offered summer term only
Also Offered As: HPR 503
Activity: Lecture
1.0 Course Unit

PUBH 539 Designing Interventions To Promote Health and Reduce Health Disparities
Advanced analysis, design and evaluation of interventions to promote health and reduce health disparities with a focus on underserved vulnerable minority or ethnic populations, through culturally competent research, education and clinical practice. Areas to be evaluated include: Health disparities as it relates to health promotion and disease prevention behavioral intervention research in vulnerable communities; Concepts of marginalization, race, ethnicity, class, gender and culture as it relates to health disparities; Social-psychological theoretical and research approaches related to developing culturally congruent health promotion interventions to reduce health disparities for vulnerable populations; The use of elicitation, focus groups and ethnographic techniques to tailor health behavior theory to meet the needs of the population; Culturally competent research methodologies, involving education and/or clinical practice, e.g. culturally competent measures, recruitment, retention, and informed consent in hard to reach populations.
Also Offered As: NURS 823
Activity: Seminar
1.0 Course Unit

PUBH 540 GoGlobal
This course is designed to house a country-specific course with time in country to build partnerships and work through public health challenges. The country of focus rotates based on the year and current events.
Activity: Lecture
1.0 Course Unit

PUBH 541 Social Epidemiology
This class is designed to expand student knowledge about social factors that are known or suspected to influence population health. These factors include, among others, race, gender, socioeconomic status, and social support. Understanding how to talk and think about these social factors is essential to effective participation in public health research and practice. The course will focus on conceptual and theoretical basis of these social factors, exploring both their measurement in epidemiologic research, and the mechanisms by which they are thought to affect health. Potential strategies for ameliorating social determinants of disease and disability - and particularly those relying on legal and policy reform - will be discussed along with their associated political impediments. HIV/AIDS and aggressive policing will provide recurring topical examples.
Activity: Lecture
1.0 Course Unit

PUBH 545 Contemporary Issues in Maternal Child Health
This course will survey a range of key current and historic topics in maternal child health regionally, nationally, and internationally. Policy, epidemiology, clinical practice, advocacy, and service delivery topics will be covered through readings, lectures, presentations, and conversations with local leaders in the field of maternal child health.
Activity: Lecture
1.0 Course Unit

PUBH 550 Global Health Policy and Delivery
This participatory interdisciplinary seminar course examines contemporary issues in global health policy and delivery. The overall organizing framework for the class is the social determinants of health. The class will consider evidence that inequalities in education, income, and occupation influence health status. Students will develop skills in policy analysis, policy brief development, and policy impact monitoring. The public policy process will be explored using a variety of contemporary global health case studies which focus on content areas such as maternal health, HIV policy, refugee health and global healthcare delivery. Finally, we will examine the global health workforce and its impact of widespread global migration of health professionals to receiving and sending countries.
Course usually offered in spring term
Also Offered As: NURS 640, SWRK 793
Activity: Lecture
1.0 Course Unit

PUBH 553 Science and Politics of Food
This course provides an introduction to the many forces that shape what we eat. These include psychological, political, biological, legal, economic, and social influences. We will discuss and critically evaluate scientific research on food policies designed to improve the world’s diet. This course will have strong focus on the communication of health information and issues of health disparities as they relate to food environments and food policies. In addition, course assignments, activities, and lectures are designed to develop skills related to critiquing research and communicating evidence-based opinions in a clear and compelling manner.
Activity: Lecture
1.0 Course Unit
PUBH 554 Impact Evaluation of Global Health Programs
This course will provide an introduction to impact evaluation, an important methodology for evidence-based health policies and programs. Impact evaluation comprises a set of approaches to generating robust evidence of program performance against desired objectives. A distinct type of broader monitoring and evaluation approaches, impact evaluation focuses on identifying a credible counterfactual (what would have happened in the absence of the program of interest?) to permit attribution of observed outcomes to interventions. In this course, we will cover the why, when, and how of impact evaluation, including basic econometric methods for study design, data collection, and analysis. Both experimental and quasi-experimental designs will be discussed. Case studies and exercises will draw on classic studies and the contemporary evaluation literature, and will allow students to "get their hands dirty" with data manipulation and analysis.
Activity: Lecture
1.0 Course Unit

PUBH 565 Health Communication in the Digital Age
Health communication spans activities from in-person communication to technology based interventions and mass media campaigns. Health communication interventions are applied across a variety of health promotion and disease prevention activities. In this course we will explore a variety of approaches to using communication strategies to improve individual and population health. The course will provide an introduction to the theory, design, and evaluation of health communication programs. We will review and critique several health communication interventions. The course will also include a special emphasis on new media and technology, as well as developing practical skills for developing health communication programs.
Also Offered As: NURS 353, NURS 565
Activity: Lecture
1.0 Course Unit

PUBH 570 Evidence-Based Strategies to Improve Adolescent and Young Adult Health
This course examines the health and well-being of young people between 10 and 26 years of age in the United States, and the influence of evidence-based practice, programs, and policy on the health of this important age group. The course includes an examination of adolescent and young adult (AYA) health and well-being within a life-course framework; biological, psychological, gender and sexual development between 10 and 26 years of age including issues specific to sexual minority youth; nutritional health and health policy; and reproductive health and health policy. We will examine the influence of systems and policy on key AYA health issues using case studies in injury prevention, obesity prevention, HIV testing and care, and access to routine health care and reproductive health services. The impact of MCH/Title V, Title X, the ACA, and legislation related to child nutrition and school food programs on AYA health will be integrated throughout the course.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit

PUBH 573 Substance Use as a Public Health Issue
Over 70,000 people died from drug overdoses in the US in 2017 alone, exceeding the number of US soldiers who died in the twenty years of the Vietnam War. This course will provide an overview of the contemporary challenges in addressing substance use as a public health problem. Students will learn about the personal and environmental factors that often contribute to substance use, as well as the downstream consequences, including HIV and hepatitis C. Students will also learn public health strategies to address substance use, including primary prevention and harm reduction. Finally, issues around drug policy at the local, state, and federal level will be discussed. While this course will use opioids and the crisis in Philadelphia as the primary case study, other drugs will be touched upon as well. The course combines lecture, interactive class exercise, and group discussion.
Activity: Lecture
1.0 Course Unit

PUBH 575 Intimate Partner Violence
Intimate partner violence (IPV), defined as physical, sexual, or psychological harm imposed by a current or former intimate partner, is a public health problem leading to increased morbidity and mortality worldwide. The purpose of this course is to familiarize students with the definition, theories, dynamics, scope, and consequences of, and interventions to prevent and respond to, violence against intimate partners. The course will provide insight into the phenomenon of intimate violence by examining the ways in which it affects individuals, families, and communities; as well as how violence develops and is addressed within communities and societies. We will apply an ecological framework to examine the individual, relationship, community, and society factors associated with intimate violence risk and intervention and consider primary, secondary, and tertiary levels of prevention. This course is designed to address the educational needs of both public health and social work students.
Also Offered As: SWRK 775
Activity: Lecture
1.0 Course Unit

PUBH 578 Housing Quality, Equity and Public Health
This course examines housing as a social determinant of health through the lens of environmental justice and health equity. The course examines the direct mental and physical impacts of housing quality and access, specifically for urban, low-income children and adults, the policies, social and economic factors that create inequities; and solutions to address these issues. Key concepts include: the public health impact of housing environmental quality and affordability; environmental justice; racial equity in housing policy.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
PUBH 588 Advanced Leadership Skills in Community Health
Grounded in a social justice perspective, this course aims to provide the student with a foundational overview of the field of community health and leadership skills in public health advocacy. The course encourages critical thinking about health outcomes framed by the broad context of the political and social environment. This course analyzes the range of roles and functions carried out by leaders in healthcare advocacy for marginalized communities; integrates knowledge of health policy and the key influence of government and financing on health outcomes; explores community-based participatory research and interventions as tools for change; and discuss ways to develop respectful partnerships with community organizations. An assets-based approach that draws upon the strengths of communities and their leaders provides a foundation for community-engagement skill building. The course emphasizes the development of skills and techniques to lead effective, collaborative, health-focused interventions for disenfranchised groups, including residents of urban neighborhoods.
Course usually offered in spring term
Also Offered As: HPR 588, NURS 587
Prerequisite: Enrollment in a Masters or Doctoral program
Activity: Lecture
1.0 Course Unit
Notes: Undergraduates with permission of the instructor

PUBH 589 The Public Health Challenges of Alzheimer's Disease and Cognitive Aging
This course is an opportunity to understand two relatively new public health problems - Alzheimer’s disease and cognitive aging - and to use this knowledge to identify and address the broad set of challenges created by cognitive impairment in industrialized nations, challenges at the intersections of medicine, ethics, public policy, culture, and health care. Student will learn about the history of Alzheimer’s disease and cognitive aging and their current definitions, the concepts of cognition and function and how they are assessed, the science and practice of measuring the disease’s prevalence and mortality, autonomy, and capacity, risk of preventative factors for cognitive decline, the demography and economics of caregiving, and the public health initiatives and models of care that could enhance cognition and maintain independence. they will apply biostatistical and epidemiological methods to critique papers, close textual analysis to understand concepts and their shifting meanings, and writing to clearly and succinctly frame a problem, its costs, and solutions.
Activity: Lecture
1.0 Course Unit

One-term course offered either term
Corequisites: For BGS Public Health Certificate students only.
Activity: Seminar
1.0 Course Unit

PUBH 599 Independent Study in Public Health
One-term course offered either term
Activity: Independent Study
1.0 Course Unit
Notes: The option to complete an independent study requires approval from academic advisor and Director of the MPH program.

PUBH 604 Qualitative Research in Social Sciences
This research course explores the philosophical issues and critical thinking that underlie qualitative methodology. Research using qualitative methods can be particularly effective for learning the perspectives of vulnerable and oppressed individuals whose voices are overshadowed by dominant discourses. We will discuss questions of epistemology, ethics, power, diversity, and social justice, as well as the use and impact of self in doing qualitative research.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

PUBH 605 Epidemiology and Control of Infectious Diseases
This course will focus on the application of epidemiological methods to the discovery, detection, and evaluation of infectious disease threats together with an evidence based assessment of the value of public health interventions intended to reduce prevalence and severity of disease in people. In-class assignments are intended to build skills in location, interpreting, assessing, and synthesizing evidence from the epidemiologic literature, with an emphasis on critical thinking, causal inference, and understanding bias and confounding.
Activity: Lecture
1.0 Course Unit

PUBH 606 Synthesis and Translation of Epidemiologic Literature
This course is designed for students interested in further exploration of epidemiologic methods and the challenge of establishing a causal relationship between exposure and outcome using an observational science. We will utilize case studies to address the application of epidemiologic data to specific issues of relevance to public health. The nature of observational data will be explored through these case studies and specific methodological challenges will be highlighted and examined.
Also Offered As: NURS 616
Activity: Lecture
1.0 Course Unit

PUBH 607 Adv Local Policymaking
This course is designed to provide the foundational context and practical skills necessary to effectively advocate for evidence-based policy change in furtherance of public health objectives. The class will be interactive in nature and will require participation in public health advocacy exercises in order to hone advocacy skills. There will also be a focus on persuasive communication, both oral and written. We will explore the entire advocacy process from the identification of a problem and evaluation of possible policy solutions to utilizing the full range of advocacy tools to promote policy change. We will be using real-time examples of public health challenges affecting the health, safety and well-being of children and families here in Philadelphia and in communities across the country.
Activity: Lecture
1.0 Course Unit

PUBH 608 Behavioral Econ & Health
This course will explore answers to pressing public health questions through the lens of behavioral economics. Behavioral economics, a field at the intersection of psychology and economics, suggests that humans rarely behave rationally when making health-related decisions. The course will take a very pragmatic, hands-on orientation to behavioral economics and health research and practice. It will also leverage the deep and rich expertise of Penn’s Center for Health Incentives and Behavioral Economics, a leading research organization in the field.
Also Offered As: NURS 613
Activity: Lecture
1.0 Course Unit
PUBH 609 management & leadership in public health
The goal of this course is to build upon management and leadership skills, and learn and apply public health management and leadership tools (mats) to effectively use in practice. This course uses pubh 506 to build a foundation, with increased emphasis on financial, administrative, operational, and human resource management and leadership in public health. Students will have the ability to apply key concepts and further develop their leadership and management skills and apply specific mts tools. The course uses a case-based framework and pulls from real life examples. The course is ideally designed for the student who will use the mph to advance in careers leading and managing public health initiatives across a variety of sectors.
Activity: Lecture
1.0 Course Unit

PUBH 610 Mathematical Models for the Control of Infectious Diseases
As infectious diseases are transmitted from one host to another, the dynamics of transmission in the population of hosts follow certain basic rules. If one knows and understands these rules, one can plan rational strategies to prevent or control infections. One of the principal tools of those interested in public health interventions to control or ameliorate infectious diseases is the mathematical model. A model is just a means of representing and manipulating something that would not otherwise be accessible. This elective course provides students with the opportunity to construct models of the transmission of infectious diseases and to use these models to plan or compare disease control strategies. The course is predicated upon the notion that the act of building a mathematical model of disease transmission is often the very best way to understand what is going on. This understanding will be further refined by the examination of more complicated and sophisticated model structures as they appear in the recent published literature.
Also Offered As: EPID 516
Activity: Lecture
1.0 Course Unit

PUBH 637 advocacy & public health
This course is designed to provide the foundational context and practical skills necessary to effectively advocate for evidence-based policy change in furtherance of public health objectives. The class will be interactive in nature and will require participation in public health advocacy exercises in order to hone advocacy skills. There will also be a focus on persuasive communication, both oral and written. We will explore the entire advocacy process from the identification of a problem and evaluation of possible policy solutions to utilizing the full range of advocacy tools to promote policy change.
Course usually offered in spring term
Also Offered As: HPR 637
Prerequisites: pubh-500, pubh-507
Activity: Lecture
1.0 Course Unit

Punjabi (PUNJ)

PUNJ 404 Beginning Punjabi Part I
This course emphasizes speaking and reading skills in Punjabi. Upon completion of this course, students should be able to interact meaningfully and in a socially acceptable manner in a variety of simple situations involving everyday conversational topics. Further, students should be able to read and understand the main idea and most details of simple connected texts. This course will utilize authentic printed, audio, and video materials and will provide opportunities for natural communication both within and outside the classroom.
For BA Students: Language Course
Taught by: Gahunia
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

PUNJ 405 Beginning Punjabi Part II
This course emphasizes speaking and reading skills in Punjabi. Upon completion of this course, students should be able to interact meaningfully and in a socially acceptable manner in a variety of simple situations involving everyday conversational topics. Further, students should be able to read and understand the main idea and most details of simple connected texts. This course will utilize authentic printed, audio, and video materials and will provide opportunities for natural communication both within and outside the classroom.
For BA Students: Language Course
Taught by: Gahunia
Course usually offered in spring term
Prerequisites: Beginning Punjabi Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit

PUNJ 424 Intermediate Punjabi Part I
This course is designed as a continuation of Beginning Punjabi, but can also be taken by anyone who can demonstrate a similar level in proficiency of the language. The course objectives are to expand the mastery of sentence patterns and augment vocabulary and its usage through intensive grammar review and comprehension exercises. A special emphasis will also be placed on greater cultural awareness. Upon completion of this course students should be able to interact socially with added confidence and greater expressiveness. Students should also experience a great improvement in their comprehension of the spoken and written language.
For BA Students: Language Course
Taught by: Gahunia
Two terms. student must enter first term.
Activity: Lecture
1.0 Course Unit
**PUNJ 425 Intermediate Punjabi Part II**
This course is designed as a continuation of Beginning Punjabi, but can also be taken by anyone who can demonstrate a similar level in proficiency of the language. The course objectives are to expand the mastery of sentence patterns and augment vocabulary and its usage through intensive grammar review and comprehension exercises. A special emphasis will also be placed on greater cultural awareness. Upon completion of this course students should be able to interact socially with added confidence and greater expressiveness. Students should also experience a great improvement in their comprehension of the spoken and written language.

For BA Students: Last Language Course
Taught by: Gahunia
Course usually offered in spring term
Prerequisites: Intermediate Punjabi Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit

**PUNJ 434 Advanced Punjabi**
The objective of the course is to improve proficiency in speaking, listening, reading and writing. Fall semester: Readings in Punjabi Literature - This course addresses the individual needs of learners. This is a one semester course. The focus of the course will be to study the interpretation of written and oral materials on social, political and contemporary cultural topics from modern literature, literary criticism, poetry and drama. Weekly written compositions and oral presentations will be assigned. Grading will be based on this. Spring semester: Punjabi Popular Culture - This course focuses on different aspects of popular Punjabi culture as they are represented in media - television, internet, magazines, newspapers, film, and music. This course aims at making the best use of class participation to improve all four language skills. This is also a one semester course.

For BA Students: Advanced Language Course
Taught by: Gahunia
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

**Real Estate (REAL)**

**REAL 204 Real Estate Law**
This course examines the fundamentals of real estate finance and development from a legal and managerial perspective. The course serves as a foundation course for real estate majors and provides an introduction to real estate for other students. It attempts to develop skills in using legal concepts in a real estate transactional setting. The course will be of interest to students contemplating careers in accounting, real estate development, real estate finance, city planning, or banking. The main topics covered may include the following: land acquisition, finance; choice of entity; tax aspects; management (leasing, environmental); disposition of real property (sale of mortgaged property, foreclosures, wraparound mortgages, sale-leasebacks); and recent legal developments.

One-term course offered either term
Also Offered As: LGST 204, LGST 804, REAL 804
Activity: Lecture
1.0 Course Unit

**Quechua (QUEC)**

**QUEC 110 Elementary Quechua I**
Quechua, the language of the Inca Empire and still spoken by approximately 6 million people throughout the Andes, is the most popular indigenous language of South America. The program focuses on the development of written and oral communicative abilities in Quechua through an interactive activity-based approach. Course includes an introduction to Quechua and Andean culture. Students will participate in pair, small-group and whole-class activities. Assessment is based on both students ability to use the language in written and oral tasks and understanding the language and culture. This beginning level Quechua course is designed for students who have little or no previous knowledge of the language. Lectures will be delivered in English and Quechua.

For BA Students: Language Course
Taught by: Mendoza-Mori, Americo
One-term course offered either term
Activity: Seminar
1.0 Course Unit

Course usually offered in fall term
Activity: Seminar
1.0 Course Unit
REAL 205 Global Real Estate: Risk, Politics and Culture
This is an introductory course to global real estate markets, with a focus on income-producing real estate assets. Globally, estimates suggest the value of investable real estate assets in the world exceeds $60 trillion. We will discuss the basics of valuation and risk management, emphasizing concepts that are salient in the global context, including political risk, currency risk, property rights and culture. The course will cover markets outside the United States, except for one special topic on international investors in the United States. We will focus more on the qualitative aspects of real estate investment analysis and less on quantitative aspects. As firms expand their ventures across borders, there is a growing emphasis on the ability to assess and manage risk in a global business environment. Many of these decisions have implications on real estate assets. In this class, we will discuss the real estate business decisions of global firms, such as Blackstone, Hilton, AirBNB, WeWork, Prologis, Walmart and Amazon. This is a full semester course, open to undergraduates and MBA’s.
Taught by: Maisy Wong
Course usually offered in fall term
Also Offered As: REAL 705
Prerequisites: There is no pre-requisite for the course. No prior real estate experience is needed and no prior financial modelling experience is needed.
Activity: Lecture
1.0 Course Unit
Notes: Lecture with discussion required.
REAL 208 Housing Markets
This course is designed for students interested in the economics and operations of housing markets. It is primarily a U.S. focused course, but does include a limited amount of international material for comparative purposes. The class is divided into four sections: (1) supply and demand for housing, including the operations of homebuilders and rental landlords; (2) house prices, including cycles and price dynamics; (3) international comparisons; and (4) public policy analysis applied to a current housing markets-related issue. This course presumes knowledge of intermediate economics, as we will apply that knowledge throughout the semester. For Wharton students, this means you must have passed BEPP 250 (undergrads) or MGEC 611 and 612 for MBA’s. Non-Wharton students should have taken the equivalent course in the College.
Taught by: GYOURKO
Course usually offered in spring term
Also Offered As: BEPP 208, BEPP 708, REAL 708
Prerequisites: Managerial Economics (BEPP 250) or equivalent.
Activity: Lecture
1.0 Course Unit
Notes: Lecture with discussion required.
REAL 209 Real Estate Investment: Analysis and Financing
This course provides an introduction to real estate with a focus on investment and financing issues. Project evaluation, financing strategies, investment decision making and real estate capital markets are covered. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate markets. Classes are conducted in a standard lecture format with discussion required. The course contains cases that help students evaluate the impact of more complex financing and capital markets tools used in real estate. There are case studies and two midterms, (depending on instructor).
Taught by: Ferreira, Handbury, Harari, Keys, Sinai, Wong
One-term course offered either term
Also Offered As: FNCE 209
Prerequisite: FNCE 100
Activity: Lecture
1.0 Course Unit
REAL 215 Urban Real Estate Economics
Urban Real Estate Economics uses economic concepts to analyze real estate markets, values and trends. The course focuses on market dynamics in the U.S. and internationally, with an emphasis on how urban growth and local and federal government policies impact urban development and real estate pricing. A group development project gives hands on experience, and invited guest speakers bring industry knowledge. Besides the group project and presentation, problem sets are required along with a midterm and an optional second exam.
Taught by: Wachter
One-term course offered either term
Also Offered As: REAL 724, REAL 945
Prerequisite: FNCE 100 & FNCE 101
Activity: Lecture
1.0 Course Unit
REAL 230 Urban Fiscal Policy
This course will examine the provision of services through cities and other local governments. Why cities exist, whether urban public finance matters, investments in infrastructure, realities of local governments such as inequality, poverty, crime, corruption, high cost of living and gentrification, will be covered. We will pay special attention to recent topics, such as partnerships with the private sector, enterprise zones, and other subsidies to businesses, the role of technology, and real estate policies that promote affordability and sustainable city development.
Taught by: Ferreira
Course usually offered in fall term
Also Offered As: BEPP 230, FNCE 230
Activity: Lecture
1.0 Course Unit
REAL 236 International Housing Comparisons
This course analyzes housing finance systems and housing market outcomes across the globe. In the US, the course focuses on the development of securitization markets and addresses the current challenges of housing finance reform, including the future of Fannie Mae and Freddie Mac. Internationally, the course covers issues of access to housing and housing informalities in developing countries, financial crises arising out of the housing sector, and market-oriented and public policy solutions. The course features a wide array of speakers in finance, government, and academia who contribute their perspectives to pressing issues of mortgage market design.
Taught by: Wachter
Course usually offered in spring term
Also Offered As: BEPP 236, BEPP 836, REAL 836
Prerequisites: FNCE 101 MONETARY ECON & GLOBAL ECO, ECON 010 INTRO TO ECON FOR BUS
Activity: Lecture
1.0 Course Unit

REAL 240 Advanced Real Estate Investment and Analysis
This course is designed for majors in Real Estate, but is also open to finance-oriented students who wish a deeper analysis of real estate investment and investment analysis issues than that offered in REAL 209. The class will contain a mixture of lectures, guest speakers and case discussions. Academic research is paired with recent industry analysis of key issues in order to marry sound theory and empirical results with current events and practices. Several classes will include lectures outlining what economics and finance tell us about a number of topics. Generally, these will be followed by guest lectures from industry professionals who will focus on a specific application of the principles introduced in the lectures.
Taught by: Sinai
Course usually offered in spring term
Also Offered As: REAL 840
Prerequisite: REAL 209 or FNCE 209
Activity: Lecture
1.0 Course Unit

REAL 321 Real Estate Development
REAL 821
One-term course offered either term
Also Offered As: ARCH 768, REAL 821
Activity: Lecture
1.0 Course Unit

REAL 375 Real Estate Disruptions
Real Estate is changing dramatically for the first time in perhaps one hundred years. This class will examine how technology is changing in many facets (all) of the industry. This course will address how technology has already changed the demand for real estate, how it will likely change in the future the way real estate is used, designed, developed, constructed, managed, leased, maintained and financed. Among many questions to be considered: Can you crowd fund real estate development? Will the office business become a part of hospitality? Can we build new buildings like we assemble legos? How will autonomous vehicles affect the demand for space and property values? What is the future of new data analytics services? This is a team taught mini, half-credit course that will bring together a recognized industry leader and Wharton faculty. Includes a broad set of guest lectures (Start-up entrepreneurs, incumbents, non RE technology specialists, etc). We believe there is no one single approach to gain insight into disruptions and change under uncertainty so we will propose a mix of approaches including, in-depth case-studies, interactions with guest lecturers who handle those issues daily, learning from economic history and other industries, and drawing from core economic concepts.
Taught by: Duranton/Mack
Course usually offered in fall term
Also Offered As: REAL 875
Prerequisites: Students are responsible for knowing the material covered in Real Estate Investments (REAL/FNCE 209 AND 721). This pre-requisite is STRICTLY enforced unless the class is under-subscribed.
Activity: Lecture
0.5 Course Units

REAL 390 International Real Estate Comparisons
As a truly non-U.S. focused course, we explore the world of cross-border real estate development, with a focus on fast growing emerging market economies. Topics will emphasize the importance of strategy and implementation in cross-border real estate investment and include: the rationale, opportunities and risks of international real estate investing; the macro factors that influence the performance of real estate markets across countries; market specific factors that impact RE investment performance (property rights, taxes, transparency, planning procedures); the qualitative aspects of identifying and achieving successful projects; and the growing market for international RE securities and strategies for portfolio management. Classes will combine a lecture on specific aspects of global cross-border RE in the first half of the class and international case presentations in the second half. Cases will be presented by leading executives in charge of major international RE projects or funds. Cases have been selected to cover different types of RE development-residential, office, retail, hospitality and logistics- important emerging market countries/continents (East/South Asia, Latin America, Sub-Saharan Africa, the Middle East) and different development and investment strategies.
Course usually offered in fall term
Also Offered As: REAL 890
Prerequisite: REAL 209 OR FNCE 209
Activity: Seminar
0.5 Course Units
Notes: This class is offered in the second half of the semester.
REAL 396 Real Estate Entrepreneurship
What makes a successful entrepreneur in the real estate industry? This half semester mini-course exposes undergraduates and MBA students to the broad entrepreneurial aspects of creating and executing real estate investments. The course consists of lectures by the professor, case discussions and guest lectures by leading entrepreneurs. Lectures and discussions will emphasize real estate entrepreneurship, leadership and challenges often encountered in creating successful real estate investments rather than development processes. Cases will be used to illustrate investment decision making and financial evaluations. Short written responses to questions raised in each case will be assigned. Class members are expected to engage the speakers with questions and discussion as well as explain their views on cases. Class participation and writings will each represent 50% of the grade.
One-term course offered either term
Also Offered As: REAL 891
Activity: Lecture
0.5 Course Units
Notes: Offered in the first half of the semester.

REAL 399 Independent Study
All independent studies must be arranged and approved by a Real Estate department faculty member.
One-term course offered either term
Activity: Independent Study
1.0 Course Unit

REAL 705 Global Real Estate: Risk, Politics and Culture
This is an introductory course to global real estate markets, with a focus on income-producing real estate assets. Prerequisite: FNCE 611 or FNCE 612
Activity: Lecture
0.5 Course Units
Notes: Lecture with discussion required.

REAL 723 Introduction to Real Estate
The goal of this class is to help students become informed consumers of real estate advice. The class material breaks down into four major sections: 1) The financial risk and return of property level real estate investments. Be able to interpret, understand and evaluate a real estate investment pro forma. 2) The legal landscape for investing in real estate and using legal structures to manage risk. 3) The economics of commercial real estate markets. Understanding the forces that will determine the value and income-producing potential of a real estate investment. 4) Important real estate issues of the day.
Taught by: Sinai
One-term course offered either term
Activity: Lecture
0.5 Course Units
Notes: WEMBA COURSE
**REAL 724 Urban Real Estate Economics**

Urban Real Estate Economics uses economic concepts to analyze real estate markets, values, and trends. The course focuses on market dynamics in the U.S. and internationally, with an emphasis on how urban growth and local and federal government policies impact urban development and real estate pricing. A group development project gives hands on experience, and invited guest speakers bring industry knowledge. Activity: Lecture

1.0 Course Unit

Notes: Although some of the material is presented by lecture, the instructor expects considerable class participation.

**REAL 821 Real Estate Development**

This course evaluates “ground-up” development as well as re-hab, re-development, and acquisition investments. We examine raw and developed land and the similarities and differences of traditional real estate product types including office, R & D, retail, warehouses, single family and multi-family residential, mixed use, and land as well as “specialty” uses like golf courses, assisted living, and fractional share ownership. Emphasis is on concise analysis and decision making. We discuss the development process with topics including market analysis, site acquisition, due diligence, zoning, entitlements, approvals, site planning, building design, construction, financing, leasing, and ongoing management and disposition. Special topics like workouts and running a development company are also discussed. Course lessons apply to all markets but the class discusses U.S. markets only. Throughout the course, we focus on risk management and leadership issues. Numerous guest lecturers who are leaders in the real estate industry participate in the learning process. Format: predominately case analysis and discussion, some lectures, project visits.

One-term course offered either term

Also Offered As: ARCH 768, REAL 321

Prerequisites: REAL 721 OR FNCE 721. The prerequisite is STRICTLY enforced for this class unless it is undersubscribed.

Activity: Lecture

REAL 945 Urban Real Estate Economics
Urban Real Estate Economics uses economic concepts to analyze real estate markets, values, and trends. The course focuses on market dynamics in the U.S. and internationally, with an emphasis on how urban growth and local and federal government policies impact urban development and real estate pricing. A group development project gives hands on experience, and invited guest speakers bring industry knowledge. Besides the group project and presentation, problem sets are required along with a midterm and optional second exam. All PhD students will be expected to complete a research paper in addition to the successful completion of the course examination requirements.

Taught by: WACHTER
One-term course offered either term
Also Offered As: REAL 215, REAL 724
Prerequisite: MGEC 601
Activity: Lecture
1.0 Course Unit

REAL 946 Advanced Topics in Urban Economics
This course addresses advanced topics in urban and real estate economics. The course will mix theory and empirics and will cover a broad range of topics including the modeling and estimation of agglomeration economies, land use and urban costs, transportation in cities, urban growth, migration between cities etc. The classes will mix formal presentations made by the instructor and student-led discussions of recent academic papers. In addition to presentations, students will be expected to complete a series of assignments including a short original research paper.

Taught by: FERREIRA,DURANTON
One-term course offered either term
Prerequisites: The course assumes that students have familiarity with standard first year econometrics and microeconomics.
Activity: Lecture
1.0 Course Unit

REAL 947 Advanced Real Estate and Urban Economics
This course covers fundamental and cutting-edge topics in urban economics and real estate as well as the most important econometric issues that arise in the estimation of urban economics and real estate models. The first part of the course focuses on the application of modern econometric methods to analyze empirical questions in the broad urban economics field, which includes topics from public economics and local finances, such as household sorting and valuation of public goods. This part of the course is especially concerned about dealing with nonexperimental data, and also provides a guide for tools that are useful for applied research. The second and third parts of the course examine the economic modeling and intuition of a range of topics in urban economics and real estate, such as spacial equilibrium, supply and demand of space, housing prices and cycles. In addition, special emphasis is given to how the understanding of economic theory and institutions can help any empirical analysis. At the end of the course students should have a firm grasp of theory and econometric tools that lead to convincing empirical applications. All Ph.D. students will be expected to complete a research paper in addition to the successful completion of the course examination requirements.

REAL 962 Applied Economics Seminar
The goal of this course is to help doctoral students develop critical thinking skills through both seminar participation and writing of referee reports. To this end students will attend the Wharton Applied Economics each Wednesday at noon seminar when it meets; prepare two written referee reports on WAE papers per semester, due before the seminar is presented. After attending the seminar and the ensuing discussion of the paper, students will prepare follow-up evaluations of their referee report reports, due one week after the seminar.

Taught by: Fernando Ferreira
Two terms. student may enter either term.
Also Offered As: BEPP 962
Prerequisites: None.

Regulation (REG)

REG 510 Introduction to Clinical and Translational Research
This introductory course lays the foundation for understanding practical aspects of conducting clinical research in an academic environment. The course is divided into two modules: Module 1: Research Methods & Protocol Development and Module 2: Regulatory Environment for Clinical Trials. The first module introduces clinical research, clinical protocols, study designs and biostatistics that underlie such studies. The second module covers ethical considerations in clinical research, study execution and oversight, and the regulatory environment for clinical research. Upon completion, students should have a strong foundation in the fundamentals of clinical research and should be able to apply contemporary research tools to clinically relevant areas of investigation.

Taught by: Emma Meagher, MD
Course usually offered in fall term
Also Offered As: MTR 510
Activity: Lecture
1.0 Course Unit

Notes: This course requires permission to register. Please contact Bethany Germany (bgermany@upenn.edu) to register.

REG 602 Proposal Development
Also Offered As: BEPP 962
Activity: Seminar
1.0 Course Unit
REG 610 Fundamentals of FDA Regulation
This introductory course provides an overview of Regulatory Affairs in relation to three key areas of development: Drugs, Biologics, and Medical Devices. The course will look at the rules governing prescription and over-the-counter drugs as well as the changes introduced by the influence of genetic engineering and biological product development. Throughout the course, practical issues facing regulatory specialists as they work with the FDA and other international regulatory bodies to secure and keep product approval will be addressed.
Taught by: Monica Ferrante
Course usually offered summer term only
Prerequisites: Permission needed to register. Contact Bethany Germany (bgermany@upenn.edu) to register.
Activity: Lecture
1.0 Course Unit

REG 611 Clinical Study Management
This course will focus on the practical aspects of conducting clinical research in an academic environment. Upon course completion students will be able to apply scientific principles to research to the implementation and management of both investigator-initiated and industry-sponsored clinical research studies. Students will be guided through the operational aspects and regulatory processes for the three stages of study management: pre study start-up, ongoing study management and study close out. Students will learn strategies for navigating the complex regulatory/operational clinical research environment and for successful protocol development and approval, subject recruitment, data management and IRB clinical practices guiding research in humans is a critical concept that will be integrated throughout each of the lectures.
Taught by: Megan Kasimatis Singleton, JD
Activity: Lecture
1.0 Course Unit
Notes: Permission needed to register. Contact Bethany Germany (bgermany@upenn.edu) to register.

REG 612 Introduction to Drug Development
This introductory course lays the foundation for conducting pharmaceutical research in many ways. It begins with a brief review of the history of drug development and explains the phases of drug development in detail. The decision making process, drug development milestones and compound progression metrics are defined and explained with examples. At the conclusion of this course, students should have a working knowledge of the drug development process, understand the regulatory basis by which new chemical entities are evaluated and ultimately approved, and appreciate the time and expense of drug development.
One-term course offered either term
Prerequisites: Undergraduates and graduate students from other departments are welcome. Please contact Jessica German (jbgerman@upenn.edu) to request permission to register.
Activity: Lecture
1.0 Course Unit

REG 614 Biopharmaceutical Product Development, Manufacturing and Regulatory Affairs
Biopharmaceutical protein products have been successfully used to treat a number of diseases and currently represent a large segment of the product pipeline in most major pharmaceutical companies. More than half of the current top 20 blockbuster drugs are biopharmaceuticals. Drugs like Activase, Humira, and Avastin have revolutionized the drug industry in treating the unmet medical needs of many patients. With innovation at the heart of the biopharmaceutical industry, this course is aimed at developing the student’s understanding of the application of basic research in molecular biology and genetics to the development of novel drugs for treating diseases. The course is designed to provide an overview of biopharmaceutical protein drug development and manufacturing processes with an emphasis on regulatory affairs activities. The class has been developed and is taught by a former VP of biopharmaceutical product development with over 30 years of experience in biotechnology and the biopharmaceutical industry. The course director will provide insights into the unique challenges and opportunities facing the biopharmaceutical industry and how they relate to regulatory affairs. Subject area experts from industry will also participate as guest lecturers.
Taught by: Marcia Federici, PhD
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

REG 615 Post- Approval Maintenance of Drugs, Biologics, and Devices.
The FDA regulates prescription drugs, biologics and medical devices for utilization in the United States. The approval of a marketing application is a major accomplishment; however, it comes with significant responsibilities for a sponsor including numerous reporting requirements and activities to maintain a license as well as a need for lifecycle maintenance activities to stay competitive. The purpose of this course is to provide an overview of post-approval activities required for drugs, biologics and devices.
Taught by: Ajay Parashar, BPharm, MS, MDD, RAC
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Contact Rachel McGarrigle (rmcg@upenn.edu) to receive a permit for registration.

REG 621 Cell and Gene Therapy
This course will provide students with a general overview of translational research in the area of gene and cell therapy. This includes technical considerations, translating preclinical investigation into therapeutics, the execution of gene and cell therapies clinical trials, and key regulatory issues. Entrepreneurial considerations will be discussed as well. By the end of this course, students will understand the basic technologies employed for gene and cell therapy along with approaches and pitfalls to translating these therapies into clinical applications including regulatory and commercial aspects of this emerging area.
Taught by: Michael C. Milone, MD, PhD
Course usually offered in spring term
Also Offered As: CAMB 707, MTR 621
Prerequisites: At least one course in immunology.
Activity: Lecture
1.0 Course Unit
REG 622 New Trends in Medicine and Vaccine Discovery
Modern drug discovery has evolved to include human genetic diagnosis and various biological approaches which has enabled progress in a variety of fields, including rare diseases, immuno-oncology, precision medicine, and biomarkers. The goal of this course is for students to understand newer treatment modalities and approaches beyond one size fits all small molecule drugs, as well as the technologies that empower them. Students will learn regulatory processes that govern medicine discovery and development and also consider business and societal aspects of medical progress. Students will be able to apply concepts directly to work in the healthcare industry. Students will be taught by experts in the field internal and external to Penn. Taught by: Claudine Bruck, PhD
Course usually offered in fall term
Also Offered As: MTR 622
Activity: Lecture

Religious Studies (RELS)

RELS 002 Religions of the West
This course surveys the intertwined histories of Judaism, Christianity, and Islam. We will focus on the shared stories which connect these three traditions, and the ways in which communities distinguished themselves in such shared spaces. We will mostly survey literature, but will also address material culture and ritual practice, to seek answers to the following questions: How do myths emerge? What do stories do? What is the relationship between religion and myth-making? What is scripture, and what is its function in creating religious communities? How do communities remember and forget the past? Through which lenses and with which tools do we define "the West"?
For BA Students: History and Tradition Sector

RELS 004 Art and Religion
What is religious art and what makes art religious? This course will survey a wide variety of artistic expressions from a number of religious traditions which draw on spiritual themes, are inspired by religious experiences or texts, and which serve an important role in religious practice and belief. Some of the themes which this course will explore are: visualization and action within the cosmos, passion and religious ecstasy, the material culture of personal devotion, icons and iconoclasm, depictions of the miraculous, and the relationship between word and image. Objects and images from Christianity, Islam, Judaism, and Buddhism and will be explored along with examples from other traditions.
Taught by: Muravchick
One-term course offered either term
Activity: Lecture
1.0 Course Unit

RELS 005 Gender, Sexuality, & Religion
What does it mean to be a gendered individual in a Muslim, Hindu, Jewish, Christian, Buddhist, or Sikh religious tradition? How important are gender differences in deciding social roles, ritual activities, and spiritual vocations? This course tackles these questions, showing how gender - how it is taught, performed, and regulated - is central to understanding religion. In this course we will learn about gendered rituals, social roles, and mythologies in a range of religious traditions. We will also look at the central significance of gender to the field of religious studies generally. The first part of the course will be focused on building a foundation of knowledge about a range of religious traditions and the role of gender in those traditions. This course emphasizes religious traditions outside the West. Although it is beyond the scope of this class to offer comprehensive discussions of any one religious tradition, the aim is to provide entry points into the study of religious traditions through the lens of gender. This course will emphasize both historical perspectives and contemporary contexts. We will also read religion through feminist and queer lenses - we will explore the key characteristics of diverse feminist and queer studies approaches to religion, as well as limits of those approaches.

RELS 013 Gods, Ghosts, and Monsters
This course seeks to be a broad introduction. It introduces students to the diversity of doctrines held and practices performed, and art produced about "the fantastic" from earliest times to the present. The fantastic (the uncanny or supernatural) is a fundamental category in the scholarly study of religion, art, anthropology, and literature. This course will focus both theoretical approaches to studying supernatural beings from a Religious Studies perspective while drawing examples from Buddhist, Shinto, Christian, Hindu, Jain, Zoroastrian, Egyptian, Central Asian, Native American, and Afro-Caribbean sources from earliest examples to the present including mural, image, manuscript, film, codex, and even comic books. It will also introduce students to related humanistic categories of study: material and visual culture, theology, cosmology, shamanism, transcendentalism, soteriology, eschatology, phantasmas, spirituality, mysticism, theophany, and the historical power of rumor. It will serve as a gateway course into the study of Religion among numerous Asian, and East Asian Studies, as well as Visual Culture and Film Studies. It will include guest lectures from professors from several departments, as well as an extensive hands-on use of the collections of the Penn Museum of Archaeology and Anthropology and the manuscripts held in the Schoenberg Collection of Van Pelt Library. It aims to not only introduce students to major approaches, and terms in the study of religion and the supernatural, but inspire them to take more advanced courses by Ilya Vinitsky, Liliane Weisberg, Projet Mukharji, Talya Fishman, Annette Reed, David Barnes, David Spafford, Frank Chance, Michael Meister, Paul Goldin, Renata Holod, Paul Rozin, among several others.

RELS 014 Myths and Religions of the Ancient World
This course will survey the religions of the ancient Middle East, situating each in its historical and socio-cultural context and focussing on the key issues of concern to humanity: creation, birth, the place of humans in the order of the universe, death and destruction. The course will cover not only the better known cultures from the area, such as Egypt and Mesopotamia, but also some lesser known traditions, such as those of the Hurrians, or of the ancient Mediterranean town of Ugarit. Religion will not be viewed merely as a separate, sealed-off element of the ancient societies, but rather as an element in various cultural contexts, for example the relationship between religion and magic, and the role of religion in politics will be recurring topics in the survey. Background readings for the lectures will be drawn not only from the modern scholarly literature, but also from the words of the ancients themselves in the form of their myths, rituals and liturgies.
For BA Students: History and Tradition Sector

1.0 Course Unit

RELS 027 Great Books of Judaism
The Babylonian Talmud, known simply as the Bavli, is the foundational legal and ethical document of rabbinic Judaism. It is one of the best read works of world literature, and it is the most widely disseminated and revered rabbinic work. It not only contains legal discussions and rulings but rather it also presents the worldview of the rabbis. This course will analyze and contextualize the perspectives of the Talmud towards the important phases of life. We will examine in-depth several Talmudic passages relating to the various stages of the human lifecycle: birth and naming of the child; circumcision, bar/bat mitzva and adulthood; earning a livelihood and choosing a career; marriage and divorce; procreation and raising children; death, burial, mourning and the belief in the resurrection of the dead among others. We will evaluate these teachings in light of other traditions and in their broader late antiquity and contemporary contexts. All texts will be read in their English translation but originals will be provided.
For BA Students: Arts and Letters Sector
Course usually offered in fall term
Also Offered As: COML 057, JWST 151, NELC 156, NELC 456
Activity: Seminar
1.0 Course Unit

RELS 030 Gurus, Prophets & Aliens: Understanding New Religious Movements
This course offers a thematic introduction to the history of New Religious Movements (NRM) from the mid-19th century to the present day. Often labeled as "cults" by the state and established religious institutions, new religions offer modern believers alternative spiritual and ideological solutions to age-old problems. In this class, students will be introduced to the teachings and practices of prominent NRMs in North America, Europe, Asia, and Australia, from wide-spread movements such as Scientology, Mormonism, and the Unification Church to lesser known groups such as the Church of the Almighty God, Neo-Paganism, and Raelism. We will explore the emergence of the anti-cult campaign in the second half of the 20th century, the relationship between apocalyptic sects such as the Peoples Temple and the Branch Davidians and political and social protest, and the role of Asian religions such as the Maharishi Mahesh Yogi’s Transcendental Meditation in the development of New Age religiosity. In addition, we will learn how new religious movements such as Wicca and the Children of God helped reshape gender roles and changed mainstream views about sexuality, and how developments in mass media and popular culture contributed to the creation of new groups such as the Star Wars inspired Temple of the Jedi Order (Jediism), the Church of the Latter-Day Dude (Dudeism), as well as UFO religions such as Heaven’s Gate. Throughout the semester, students will be exposed to a wide variety of primary and secondary sources, from academic articles and scholarly essays to documentaries, feature films, and TV shows. No previous knowledge in Religious Studies is required.
Taught by: Tavor
Activity: Seminar
1.0 Course Unit
RELS 031 Religion and Violence
Perhaps nothing haunts modern politics more than religious violence. Killing sprees done in the name of God reveal the limits of political power. What spaces is left for the rule of law when appeals to dogma and the divine supersede reason? The causes and nature of divinely motivated violence are so mystifying that they are a constant topic of debate among academics, political parties, and news commentators. What really motivates religious violence? Is it just economic of class grievances in disguise? Are all religions prone to violence? Are some religions more violent than others? Or, are religions only violent when they go awry, denying their true messages? And does religion need to be quarantined and privatized, to keep us all safe? In this course, we’ll probe the dividing line separating religion from politics in an effort to better understand the causes and nature of religious violence. How do we know the difference between religious violence and political violence? What makes religion violent, and what makes violence religious?
Activity: Seminar
1.0 Course Unit

RELS 033 Modern Catholic Christianity
At the turn of the twentieth century, Sigmund Freud hypothesized that religion was a dead duck. Many other thinkers of "modernity" have agreed with his thesis; and yet, over a century later, it is clear that religion is still a forceful presence in human culture. One religious tradition that has survived to the surprise (and even consternation) of some critics, is Roman Catholic Christianity. This Freshman Seminar will look closely at the Catholic Church in the twenty-first century, to explore the ways in which Catholicism has (and has not) adapted to modernity. We will begin with an investigation into the history of Roman Catholicism; how it is defined, and how it developed in relation to politics and culture in the Roman Empire, medieval and early modern Europe, and in the Americas; but most of the semester will focus on the Catholic Church of the past 200 years, especially as it appears in the United States. We will consider the relationship of Catholicism to many aspects of modern life, including science and technology, political systems and leaders, aesthetics (visual arts, music, literature and film), and understandings of gender and sexuality. There will be a mid-term examination and a final paper of 6 to 10 pages.
Taught by: Matter
Activity: Seminar
1.0 Course Unit

RELS 066 Hindu Mythology
Premeoan India produced some of the world's greatest myths and stories: tales of gods, goddesses, heroes, princesses, kings and lovers that continue to capture the imaginations of millions of readers and hearers. In this course, we will look closely at some of these stories especially as found in Purana-s, great compendia composed in Sanskrit, including the chief stories of the central gods of Hinduism: Visnu, Siva, and the Goddess. We will also consider the relationship between these texts and the earlier myths of the Vedas and the Indian Epics, the diversity of the narrative and mythic materials within and across different texts, and the re-imagining of these stories in the modern world.

Also Offered As: HIST 085, SAST 008
Activity: Lecture
0.0 Course Units

RELS 069 Love Sex and Death
This course focuses on important constants of human life as they are grappled with across religious traditions. Drawing on data across a range of religious traditions (such as Christianity, Hinduism, Judaism, Islam, Buddhism and Mesoamerican Religion), we will explore topics such as sexual identity, politics, religion and the individual in contemporary life; and eroticism, sex and love as they are reflected in religious literature, art and history. Divine love and religious devotion will be examined in relation to acts of violence, including human sacrifice and self-sacrifice in the past as well as the present. Other important questions considered in this course include: how does the body function as the locus in which religion is enacted? What is the conflict between our agency over our bodies and socioreligious claims over individual autonomy? Is violence an integral part of religion? What are religious understandings of the relationship between our agency over our bodies and socioreligious claims over individual autonomy? Is violence an integral part of religion? What are religious understandings of the relationship between love and sex? What does it mean for human beings to love God?

RELS 079 The Religion of Anime
Be it shrine maidens, gods of death, and bodhisattvas fighting for justice; apocalypse, the afterlife, and apotheosis... the popular Japanese illustrated media of manga and anime are replete with religious characters and religious ideas. This course uses popular illustrated media as a tool for tracing the long history of how media and religion have been deeply intertwined in Japan.
Taught by: Thomas
Course usually offered in fall term
Also Offered As: EALC 079
Activity: Lecture
1.0 Course Unit
RELS 101 Religion and Evolution
This class will explore encounters between religion and evolutionary sciences, from the 19th century to the present. We will consider the history of evolutionary biology's entanglements with faith, from the initial explosion of interest in the wake of Darwin's Origin of the Species in 1859 to contemporary debates about creationism and intelligent design here in Pennsylvania in the 21st century. In the first half of the class, we will look at how writers, philosophers, and theologians from around the world and a range of religious traditions have assessed the evolution-religion relationship — some seeing conflict, others concord. In the second half, we will consider evolutionary approaches to the origins of religion, from late-19th century accounts to modern cognitive science and group selection theories. Topics covered will include scientific racism, sociobiology and the evolutionary origins of morality, primate religion, and the relationship between science, religion, and politics.
Taught by: Schaefer
One-term course offered either term

RELS 102 Sacred Stuff: Religious Bodies, Places, and Objects
Does religion start with what’s in our heads? Or are religious commitments made, shaped and strengthened by the people, places, and things around us? This course will explore how religion happens in the material world. We'll start with classical and contemporary theories on the relationship of religion to stuff. We'll then consider examples of how religion is animated not just by texts, but through interactions with objects, spaces, bodies, monuments, color, design, architecture, and film. We'll ask how these material expressions of religion move beyond private faith and connect religion to politics and identity.

Activity: Seminar
1.0 Course Unit

RELS 103 Introduction to Folklore
The purpose of this course is to introduce you to the subjects of the discipline of Folklore, their occurrence in social life, and the scholarly analysis of their use in culture. As a discipline, folklore explores the manifestations of expressive forms in both traditional & modern societies, in small-scale groups where people interface with each face-to-face, and in large-scale, often industrial societies, in which the themes, symbols, and forms that permeate traditional life, occupy new positions, or occur in different occasions in everyday life. For some of you, the distinction will not be helpful. In traditional societies, and within all groups that define themselves ethnically, professionally, or culturally, within modern heterogenous societies in the Americas, Africa, Asia, Europe and Australia, folklore plays a more prominent role in society than it appears to play in literate cultures on the same continents. Consequently, the study of folklore and the analysis of its forms are appropriate in traditional as well as modern societies, and in any society that is in a transitional phase.
For BA Students: Humanities and Social Science S

RELS 109 Witchcraft and Possession
This course explores world witchcraft and possession from the persecutions of the early seventeenth century through the rise of Wicca in the twentieth century. The mere mention of these terms, or of such close cousins as demonology, sorcery, exorcism, magic, and the witches Sabbath, raises clear ethnographic and historical challenges. How can the analysis of witchcraft— including beliefs, patterns of accusation, the general social position of victims, the intensity and timing of witch hunts, and its relation to religious practice, law, language, gender, social marginalization, and property—lead us to a more humane understanding of belief and action? Films such as The Exorcist, The Blair Witch Project, The Crucible, and Three Sovereigns for Sarah will focus discussion.

RELS 112 Religious Ethics and Modern Society
Religious beliefs of Malcolm X and MLK formed their social action during the Civil Rights for African Americans. This seminar will explore the religious religious biographies of each leader, how religion shaped their public and private personas, and the transformative and transgressive role that religion played in the history of the Civil Rights movement in the United States and abroad. Students in this course will leave with a clearer understanding of religious beliefs of Christianity, The Nation of Islam, and Islam, as well as religiously based social activism. Other course emphases include the public and private roles of religion within the context of the shaping of ideas of freedom, democracy, and equality in the United States, the role of the “Black church” in depicting messages of democracy and freedom, and religious oratory as exemplified through MLK and Malcolm X.
Taught by: Butler
One-term course offered either term

Activity: Lecture
1.0 Course Unit

RELS 118 Religion and Cinema in India
This seminar examines key themes in the study of religion and Indian cinema. The aim of the seminar is to foreground discussions of performativity, visual culture, representation, and politics in the study of modern South Asian religions. Themes include mythological cinema, gender and sexuality, censorship and the state, and communalism and secularism. The films we will be deploying as case studies will be limited to those produced in Hindi, Telugu and Tamil (the three largest cinema cultures of India). No knowledge of South Asian language is needed for this course however.

1.0 Course Unit

RELS 122 Jews in the Modern World
This course offers an intensive survey of the major currents in Jewish culture and society from the late middle ages to the present. Focusing upon the different societies in which Jews have lived, the course explores Jewish responses to the political, socio-economic, and cultural challenges of modernity. Topics to be covered include the political emancipation of Jews, the creation of new religious movements within Judaism, Jewish socialism, Zionism, the Holocaust, and the emergence of new Jewish communities in Israel and the United States. No prior background in Jewish history is expected.
For BA Students: History and Tradition Sector
Taught by: Wenger
Course usually offered in spring term
Also Offered As: HIST 141, JWST 158, NELC 053
Activity: Lecture
1.0 Course Unit

RELS 124 American Jewish Experience
This course offers a comprehensive survey of American Jewish history from the colonial period to the present. It will cover the different waves of Jewish immigration to the United States and examine the construction of Jewish political, cultural, and religious life in America. Topics will include: American Judaism, the Jewish labor movement, Jewish politics and popular culture, and the responses of American Jews to the Holocaust and the State of Israel.
Taught by: Wenger
One-term course offered either term
Also Offered As: HIST 150, JWST 130
Activity: Lecture

Taught by: Fishman
Course not offered every year
Also Offered As: JWST 126, NELC 186
Activity: Lecture
1.0 Course Unit

RELS 129 Themes Jewish Tradition
Course topics will vary; have included The Binding of Isaac, Responses to Catastrophes in Jewish History, Holy Men & Women (Ben-Amos), Rewriting the Bible (Dohrmann), Performing Judaism (Fishman), Jewish Political Thought (Fishman), Jewish Esotericism (Lorberbaum). Democratic culture assumes the democracy of knowledge - the accessibility of knowledge and its transparency. Should this always be the case? What is the cost of knowledge? When are secrets necessary? In traditional Jewish thought, approaching the divine has often assumed an aura of danger. Theological knowledge was thought of as restricted. This seminar will explore the "open" and "closed" in theological knowledge, as presented in central texts of the rabbinic tradition: the Mishnah, Maimonides and the Kabbalah. Primary sources will be available in both Hebrew and English.
For BA Students: History and Tradition Sector
Taught by: Ben-Amos/Stern/Dohrmann/Fishman

RELS 130 How to Read the Bible
The aim of this course is to explore what the Bible means, and why it means different things to different people. Why do people find different kinds of meaning in the Bible. Who is right in the struggle over its meaning, and how does one go about deciphering that meaning in the first place? Focusing on the book of Genesis, this seminar seeks to help students answer these questions by introducing some of the many ways in which the Bible has been read over the ages. exploring its meaning as understood by ancient Jews and Christians, modern secular scholars, contemporary fiction writers, feminist activists, philosophers and other kinds of interpreter.
Taught by: WEITZMAN
Also Offered As: JWST 131, NELC 153
Activity: Seminar
1.0 Course Unit

RELS 132 The History of God
This course introduces the history of God as understood by modern scholars of religion. Why do people believe in gods in the first place? How is the God of the Old Testament different from earlier Near Eastern deities, or different from God as represented in the New Testament and the Quran? When and why did people come to question the existence of God, and how has the idea of God changed in the last century in light of experiences like the Holocaust, social movements like feminism, and the rise of new technologies like the Internet? This course will address these questions as it surveys the approaches scholars have developed to comprehend the history of a being who would seem beyond human comprehension.
Taught by: Wietzman
Also Offered As: ANCH 133, JWST 132
Activity: Seminar
1.0 Course Unit

RELS 135 Introduction to the New Testament
What can be known - from historical perspectives - about the life and teachings of Jesus and his earliest followers? Did Jesus see himself as a teacher and/or a revolutionary and/or the messiah? If Jesus and the apostles were all Jews, how did Christianity emerge as a distinct "religion"? distinct from Judaism? And how is that this small Galilean and Judean movement came to shape world history and Western culture even to this day? This course explores these questions through a focus on the formation of the New Testament - from the letters of Paul in the early first century CE, to the collection and closure of the canon of Christian Scriptures in the fourth century CE. In the process, we will explore the lived worlds of the first followers of Jesus through readings of texts within and outside the New Testament but also through art, artifacts, and manuscripts at Penn and in Philadelphia.

Also Offered As: JWST 141
Activity: Seminar
1.0 Course Unit

RELS 143 Introduction to Islam
This course is an introduction to Islam as a religion as it exists in societies of the past as well as the present. It explores the many ways in which Muslims have interpreted and put into practice the prophetic message of Muhammad through historical and social analyses of varying theological, philosophical, legal, political, mystical and literary writings, as well as through visual art and music. The aim of the course is to develop a framework for explaining the sources and symbols through which specific experiences and understandings have been signified as Islamic, both by Muslims and by other peoples with whom they have come into contact, with particular emphasis given to issues of gender, religious violence and changes in beliefs and behaviors which have special relevance for contemporary society.

Activity: Lecture
1.0 Course Unit

RELS 144 From Jesus to Muhammad: History of Early Christianity
"Jesus and Muhammad walk into a bar..." We can think about multiple ways to complete the joke. They could talk about prophecy and prophetic succession, God's word, women, pagans and Jews, state authority, among others. This course traces the long arc of religious history, from the Jesus movement to the rise of Islam. Through texts, objects, buildings, and artistic representations we will study the time period that connects these two significant developments that majorly changed world history. Lectures and discussions will consist of close reading, analysis, and discussion of primary sources, analysis of non-literary media, and engagement with modern scholarship. We will raise questions about ancient and modern perspectives on religious practice, representation, authority, gender, race/ethnicity, memory, and interreligious encounters.

RELS 163 Introduction to Hinduism
This course introduces students to the history, texts, philosophies and rituals of South Asia's oldest living religious traditions, represented today by the term "Hinduism.” At the same time, it problematizes the idea of a monolithic "Hindu Tradition,” in favor of an approach that recognizes several distinct, dynamic, yet symbiotic Hindu religious cultures. The course also places emphasis on the vitality of today's Hinduism(s), and the various historical, ritual, cultural, and social contexts that they represent and constitute. The course is organized around six modules: (1) Issues in the Academic Study of Hinduism; (2) Sanskrit (textual) tradition; (3) Philosophy; (4) Theology; (5) Ritual; (6) Modernity and Contemporary Politics.

RELS 164 History, Culture, and Religion in Early India
This course surveys the culture, religion and history of India from 2500 BCE to 1200 CE. The course examines the major cultural, religious and social factors that shaped the course of early Indian history. The following themes will be covered: the rise and fall of Harappan civilization, the Aryan invasion and vedic India, the rise of cities, states and the religions of Buddhism and Jainism, the historical context of the growth of classical Hinduism, including the Mahabharata, Ramayana and the development of the theistic temple cults of Saivism and Vaisnavism, processes of medieval agrarian expansion and cultic incorporation as well as the spread of early Indian cultural ideas in Southeast Asia. In addition to assigned secondary readings students will read select primary sources on the history religion and culture of early India, including Vedic and Buddhist texts, Puranas and medieval temple inscriptions. Major objectives of the course will be to draw attention to India’s early cultural and religious past and to assess contemporary concerns and ideologies in influencing our understanding and representation of that past.

RELS 172 East Asian Religions
This course will introduce students to the diverse beliefs, ideas, and practices of East Asia’s major religious traditions: Buddhism, Confucianism, Daoism, Shinto, Popular Religion, as well as Asian forms of Islam and Christianity. As religious identity in East Asia is often fluid and non-sectarian in nature, there religious traditions will not be investigated in isolation. Instead, the course will adopt a chronological and geographical approach, examining the spread of religious ideas and practices across East Asia and the ensuing results of these encounters. The course will be divided into three units. Unit one will cover the religions of China. We will begin by discussing early Chinese religion and its role in shaping the imperial state before turning to the arrival of Buddhism and its impact in the development of organized Daoism, as well as local religion. In the second unit, we will turn eastward into Korea and Japan. After examining the impact of Confucianism and Buddhism on the religious histories of these two regions, we will proceed to learn about the formation of new schools of Buddhism, as well as the rituals and beliefs associated with Japanese Shinto and Korean Shamanism. The third and final unit will focus on the modern and contemporary periods through an analysis of key themes such as religion and modernity, the global reception and interpretation of East Asian religions, and the relationship between religion and popular culture. The class will be conducted mainly in the form of a lecture, but some sessions will be partially devoted to a discussion of primary sources in translation. The course assignments are designed to evaluate the development of both of these areas. No previous knowledge of East Asian languages is necessary, and all readings will be available in English on the Canvas site in PDF form.

Course usually offered in fall term
Also Offered As: EALC 008
Activity: Lecture
1.0 Course Unit

RELS 173 Introduction to Buddhism
This course seeks to introduce students to the diversity of doctrines held and practices performed by Buddhists in Asia. By focusing on how specific beliefs and practices are tied to particular locations and particular times, we will be able to explore in detail the religious institutions, artistic, architectural, and musical traditions, textual production and legal and doctrinal developments of Buddhism over time and within its socio-historical context. Religion is never divorced from its place and its time. Furthermore, by geographically and historically grounding the study of these religions we will be able to examine how their individual ethic, cosmological and soteriological systems effect local history, economics, politics, and material culture. We will concentrate first on the person of the Buddha, his many biographies and how he has been followed and worshipped in a variety of ways from Lhasa, Tibet to Phrae, Thailand. From there we touch on the foundational teachings of the Buddha with an eye to how they have evolved and transformed over time. Finally, we focus on the practice of Buddhist ritual, magic and ethics in monasteries and among any communities in Asia and even in the West. This section will confront the way Buddhists have thought of issues such as “Just-War” Women's Rights and Abortion. While no one quarter course could provide a detailed presentation of the beliefs and practices of Buddhism, my hope is that we will be able to look closely at certain aspects of these religions by focusing on how they are practiced in places like Nara, Japan or Vietnam, Laos.

RELS 184 What is Taoism?
This course introduces a wide variety of ideas and practices that have at one time or another been labeled as Daoist (or "Taoist" in the Wade-Giles Romanization), in order to sort out the different senses of the term, and consider whether these ideas and practices have had any common features. We will begin with the two most famous Daoist works—the Zhuangzi and the Daodejing (or Laozi). We will also survey other bi-spiritual practices, such as the meditational techniques of Inner Alchemy and the self-cultivation regimens known today as Qigong and Tai-chi, as well as the theological and ritual foundations of organized Daoist lineages, many of which are still alive across East Asia. We will conclude with a critical review of the twentieth-century reinvention of "Daoism," the scientization of Inner Alchemy, and the new classification of "religious" versus "philosophical Daoism." While familiarizing ourselves with the key concepts, practices, and organizations developed in the history of Daoism, this course emphasizes the specific socio-political context of each of them. Throughout the course, we will think critically about the label of "Daoist" (as well as "Confucian" and "Buddhist") in Chinese history and in modern scholarship. We will also question modern demarcations between the fields of philosophy, religion, and science.

RELS 189 Islam and the West
How did Muslims and modern South Asia interact with the West? What Islamic idioms, orientations and movements emerged in the nineteenth and twentieth centuries? Was South Asia a prominent global center of Islam? What kinds of Islamic educational institutions developed in modern South Asia? How did Muslims appropriate technologies? What materials were printed by Muslims? Were Muslims part of the British army? What was jihad in modernity? How did Muslim 'modernists' and 'traditionalists' respond to the challenges of colonialism and modernity? What was the nature of Sufism in modern South Asia? How did some Muslims demand a Muslim State? What was the Partition? How has Muslim history been remembered in Bangladesh, India and Pakistan? This is an introductory course, and aims to introduce students to a facet of the long history of Islam, Muslims, and the West.

1.0 Course Unit

RELS 211 Religion and Ecology
This class will introduce the overlaps between religion and ecology. Rather than assuming that there is a necessary positive or negative relationship between religion and ecology, we will look at how these relationships have materialized in complicated ways at different moments in history. We'll consider perspectives and case studies from a range of different moments in history. We'll consider perspectives and case studies from a range of different traditions, with a special attention paid to the genesis of the field of Religion and Ecology in critiques of Christian attitudes toward the environment in the 1960s and 1970s.
Taught by: Covey
Course not offered every year
Also Offered As: ANTH 211, ENVS 211
Activity: Lecture
1.0 Course Unit

RELS 212 Animals & Religion
Religion is full of animals—lions and lambs, monkeys and elephants, buffalo and snakes, even mythical beasts. The identity of the human being is explained, in many traditions, by contrast with the identity of other species. We know who we are because we know who they are, or do we? This course interrogates—through an exploration of sacred texts, art, film, and museum artifacts—the tension present in many traditions between an anthropocentric prioritization of the human being and religious resources that encourage a valuing of other animal species. We'll explore the way animals function both as religious objects and as religious subjects across diverse traditions, asking how human-animal relationships have shaped religion and how religion has shaped the way we think about and interact with other animals. We'll ask how religion has engaged with animals over time and across global cultures, understanding them as symbols, messengers, and manifestations of the divine; as material for ritual and sacrifice; as kin and subordinates; as food and as filth; as helpmeets and as tempters. How have these perspectives shaped animal ethics, influencing the treatment, use, and consumption of animals and their bodies? Finally, we'll ask what it means that we ourselves are evolved animals. How does our own animality factor into the practice of human religion? Is our religious capacity part of what sets us apart from other animals or is religiosity a trait we might expect to find in other species? To what extent is religion a function of the animal?

RELS 218 Saints and Devils in Russian Literature and Tradition
This course is about Russian literature, which is populated with saints and devils, believers and religious rebels, holy men and sinners. In Russia, where peoples frame of mind had been formed by a mix of Eastern Orthodox Christianity and earlier pagan beliefs, the quest for faith, spirituality and the meaning of life has invariably been connected with religious matters. How can one find the right path in life? Is humility the way to salvation? Should one live for God or for the people? Does God even exist? In Saints and Devils, we will examine Russian literature concerning the holy and the demonic as representations of good and evil, and we will learn about the historic trends that have filled Russians national character with religious and supernatural spirit. In the course of this semester we will talk about ancient cultural traditions, remarkable works of art and the great artists who created them. All readings and films are in English. Our primary focus will be on works by Pushkin, Gogol, Lermontov, Dostoevsky, Chekhov, Tolstoy, and Bulgakov.

RELS 235 Eastern Christianities
The history of Christianity is often told from the perspective of its spread westward from Israel to Rome. Yet, in the first millennium, there were more Christians living in the East, in places as far away as Persia, Yemen, India, China, and Mongolia, than in the West. Spread across the Asian continent, these Christians were actively involved in local and imperial politics, composed theological literature, and were deeply embedded in the cultural fabric of their host societies. This course traces the spread of Christianity eastward, paying particular attention to its regional developments, its negotiations with local political powers, and its contact with other religions, including Judaism, Manichaicism, and Islam. Readings will cover a broad range of sources, including selections from classical Syriac literature, Manichaean texts, Mesopotamian magic bowls, the so-called "Jesus Sutras," and the Quran. All readings will be provided in English, and no background is presumed.

RELS 239 Death, Disease & Demons in the Medieval World
How did life end for people in the medieval world? For most, death was not considered an end point because the soul journeyed on after the end of the body. But to where did it journey? And how would it be reunited with the body in the future? Between the classical period and the High Middle Ages, death shifted from a moment of quiet release to a frightening struggle in which angels and demons lay in wait for a soul as soon as it exited the body. This course will examine these changing beliefs about dying, focusing primarily on Christian medieval Europe but drawing comparative examples from Judaism, the Roman world, and Byzantine Christianity. Other topics we'll consider include martyrdom and fears of bodily disembemberment; the emergence of purgatory and depictions of the afterworld; and the development of Christian rites for the dead. We'll also investigate beliefs about the invisible powers of demons and the apocalyptic end of times. The course will also explore not only the process by which people entered the afterlife in the Middle Ages but also the causes of their deaths— what kinds of disease primarily afflicted medieval society, and how did age, class and gender intersect with disease to affect certain populations? We will end the semester by examining that most apocalyptic of Medieval events— the Black Death— in light of recent scientific discoveries, medieval medical explanations, and social changes brought on by this demographic catastrophe. Students will be exposed to a range of primary sources as well as evidence from tombstone inscriptions, architecture and manuscript illuminations, and archaeology. No prior knowledge of Medieval history is necessary.

RELS 244 From Miracles to Mindfulness
In 1902, the most famous philosopher in America, William James, revolutionized the study of religion by analyzing religion as an experience rather than as a set of doctrines or scriptures. In this course, we will pick up the inquiry that James and scholars such as Sigmund Freud began by exploring new approaches to the science and philosophy of religious experience. We will invite a series of experts from a wide range of fields—neuroscience, psychoanalysis, phenomenology, psychology, anthropology, to name only a few—to present their cutting-edge research on the nature of religious experience. How can religious experience be studied? What does the research reveal about religious experience? And what can we learn from such experiences about the workings of the human mind and human society? The course has two components: 1) a discussion-centered mini-seminar from 3:30-5:00 will open consideration of the subject with help from relevant readings 2) a guest lecture series every Tuesday from 5:00-6:30, featuring leading scholars who approach religious experience from different disciplinary angles or in light of different questions.

1.0 Course Unit

RELS 245 Sufism
This course is a survey of the large complex of Islamic intellectual and social perspectives subsumed under the term Sufism: Sufi philosophies, beliefs, practices, and social organizations have been a major part of the Islamic tradition in all historical periods and Sufism has also served as a primary muse behind Islamic aesthetic expression in poetry, music, and the visual arts. In this course, we will attempt to understand the nature and importance of Sufism by addressing both the world of ideas and socio-cultural practices. We will trace the development of Sufism as a form of Muslim piety linked to key notions in the Quran as well as living practices of venerating the Prophet Muhammad. We will then immerse ourselves in Sufi theoretical writings through a select list of primary sources introducing foundational Sufi concepts concerning the annihilation of oneself in God, and the various stages of the Sufi quest for spiritual union. From there, we will shift to a discussion of the interactions between Sufism and philosophy by looking at the writings of two of the most influential Sufi thinkers, Al-Ghazali and Ibn al-'Arabi. We will also study the important role of Sufi poetry through a close reading of a selection of Rumi’s works. In our discussion of the social and political dimensions of Sufism, we will explore the relations between Sufi movements and religious and political authority, focusing on antinomianism and patronage in the Ottoman Empire, and on Sufi responses to colonial rule. The last part of the course will look at the roles of Sufis and Sufism in contemporary societies from South Asia to North America.

RELS 246 Spirituality in the Age of Global Warming: Designing a Digital Mapping Project in Scalar
We are living in the midst of one of the most severe crises in the Earth’s history. Science confirms the glaciers are melting, hurricanes are growing more intense, and the oceans are rising. But there is also a deeply spiritual dimension to global warming that does not factor into the scientific explanations of the Anthropocene. “Spirituality” will be defined not in terms of one particular religion, but in relationship to a passionate study of the environment and nature. Readings will include materials from both the sciences and the humanities such as Donella Meadows’s Thinking in Systems, Elizabeth Kolbert’s The Sixth Extinction, Barbara Kingsolver’s Flight Behavior, and films such as Black Fish and Wale Rider. The theoretical focus of the course will be how “multispecies partnerships” can help us better understand and mitigate the effects of Climate Change. This class will work collaboratively on a digital archive with an interactive mapping interface designed in Scalar. This newly developed platform allows for the creation of multimedia exhibits that will document how Global Warming is affecting coral reefs in the tropics, glaciers in the Arctic and Antarctic, rainforests in the Amazon and rivers of Philadelphia. Students will also work individually to design interactive maps on the Scalar platform documenting their own more personal interactions with the environment.

RELS 248 Introduction to Islamic Law
This course will introduce students to classical Islamic law, the all-embracing sacred law of Islam. Among the world’s various legal systems, Islamic law may be the most widely misunderstood and even misrepresented; certainly, misconceptions about it abound. Islamic law is, however, the amazing product of a rich, fascinating and diverse cultural and intellectual tradition. Most of the readings in this course will be taken from primary sources in translation. Areas covered will include criminal law, family law, law in the Quran, gender and sexuality, the modern application of Islamic law, Islamic government and other selected topics.
Taught by: Lowry
Course usually offered in fall term
Also Offered As: NELC 238
Activity: Lecture
1.0 Course Unit
RELS 249 Re-enchanting Modernity: A Guide to Sufism in South Asia
This undergraduate level course introduces students to Sufism in modern South Asia, with a particular focus on how Muslim 'mystics' and their 'mystical' methods interacted with modernity, colonialism, technological developments and globalization. This course is divided into three parts. In the first part of this course, students are provided with an overview of the theological and historical background of the dominant expression of Islam that came to be identified as 'Sufism' of 'Islamic mysticism', the historical development of Sufi institutions and spaces in South Asia, and the historical emergence of South Asia as a prominent global center of Sufism. The second and main part of this course introduces students to a range of anthropological and historical works that are revelatory about how Sufi in modern South Asia were and remain intimately connected to modern political and technological developments. Providing students with an overview of Sufi re-enchantments of modernity from the 19th to 21st century, this section of the course focuses upon Sufi movements and masters who perpetuated or defended customary Islam through sophisticated appropriations of technologies and print networks, and negotiations with non-Muslim rulers and societies. Moreover, students will be introduced to anthropological and historical scholarship on religious worlds in modern South Asia that were and remain steeped in 'customary Islam' and Sufi performances and interpretations of Islam. These sources reveal how 'mystical' methods of performing Islam through ecstasy and spiritual restoration, and interpretations of dreams and visions, have regularly interacted with contemporaneous technologies. The third part of this course introduces students to the globalization of South Asian Sufism in North America, Europe and Southeast Asia. Herein, students will be encouraged to engage with anthropological and literary works pertaining to itinerant South Asian Sufi masters and their devotional cults, and introduced to active South Asian Sufi centers in Philadelphia.
Taught by: Sevea
One-term course offered either term

RELS 251 History of Hinduism
This course will explore the history of the religion(s) designated by the term 'Hinduism' from their earliest articulations down to the rise of modern reforms in the nineteenth century. The study of Hinduism is perhaps unique among the scholarly traditions on world religions in that it has to date had no serious connected account of its historical development, as scholars have preferred to take structural, sociological, phenomenological, and doctrinal approaches to the religion. The course, after a brief review of scholarly approaches to Hinduism and their interpretive legacies, will seek to develop a historical sense of the religion through attention to shifts in liturgy, ritual, theology, doctrine, sacramental kingship, and soteriology. The course will include the reading of primary sources relevant to understanding these changes a well as highlight both modern and premodern traditions of their interpretation. It will also consider and assess some of the key interpretive ideas in the study of Hinduism, including, Sanskritization, Great and Little Traditions, cult formation, regional and popular religious movements, and canon formation. There will also be sustained consideration of the question of religion and socio-political power as well as relations between Hinduism and other religions like Buddhism and Islam.

Also Offered As: SAST 250
Activity: Lecture
1.0 Course Unit

RELS 254 Violence, Tolerance, Freedom
This seminar examines how the adjective "religious" has been used to modify the nouns "violence," "tolerance," and "freedom." It traces the historical development of liberal ideas of tolerance and human rights, interrogates the common assumption that religion exerts a perverse influence on politics and vice versa, critically examines the concept of terrorism, and connects the neoliberal ideal of unfettered free markets to the idea of being "spiritual but not religious."
Taught by: Jolyon Thomas
Also Offered As: ANTH 253
Activity: Seminar
1.0 Course Unit

RELS 256 Existential Despair
This is an experimental course that seeks to combine creative pedagogical methods and alternative scheduling to encourage intellectual reflection and emotional vulnerability through an in depth study of the way people cope with existential despair. Through a reading of memoirs, novels, poetry, and essays in an atmosphere conducive to close-reading and full-participation students will explore a wide-range of ways of coping with, describing, and comprehending moments of great despair. Lectures will explain the ritual, liturgical, homiletic, meditative, reflective, self-destructive, psycho-somatic, and ascetic ways despair is both conditioned and mitigated by different thinkers from various traditions over time. Format: This course is different from most others in that there is no homework, no class participation, no outside reading, and no research papers. There will be no work given to students or expected of them outside of class. All work is done in class and class is very long (8 hours straight, once a week, from four PM to midnight). Students will eat together in class, there will be three bathroom breaks, but there will be no internet, no phones, no computers, and no auditors. Each student must be fully committed to the class and 75% of the grade will be determined by class participation.
Taught by: McDaniel
Prerequisite: Permission needed from instructor
Activity: Seminar
1.0 Course Unit

RELS 259 Ultimate Meanings
Does life have some ultimate meaning? In their search for an answer to this question, people tell stories-- stories about the creation of the world, about great human beings confronted with the mysteries of existence, about what happens to people after death. To explore the role of stories in finding meaning in life, we will focus on some of the most meaningful stories ever composed: the biblical stories of Adam and Eve, Abraham and his family, the Exodus, Job and his friends, and the life and death of Jesus. One of our goals is to try to retrieve the original meaning of these narratives, what their authors intended, but we will also explore what they have come to mean for readers in our own day for believers and skeptics, scientists and artists, fundamentalists and feminists.

RELS 270 Topics in East Asian Religions
This course examines the relationship between religious institutions and the state in East Asia. Focusing on China and Japan, we will learn about the impact of religious ideas, practices, and organizations on social, political and economic processes and inspect the role of religion in the consolidation of individual, communal, and national identity. Adopting a comparative and transnational approach, we will examine the impact of Asian religious traditions: Confucianism, Daoism, Buddhism, and Shinto, as well as global religions such as Islam and Christianity, on the states and their role in shaping power relations on the international level.

RELS 271 The Politics of Shinto
Shinto-derived images and ideas frequently appear in Japanese anime and film, and journalists and academics frequently mobilize the term Shinto as a way of explaining Japan’s past or envisioning its future. The environmentalist left champions a green Shinto while Shinto-derived ideas serve as red meat for politicians pandering to Japan’s nationalist right. While the influential position Shinto occupies in Japanese sociopolitical life is therefore clear, the term Shinto itself is actually not. Depending on who one asks, Shinto is either the venerable indigenous religion of the Japanese archipelago, the irreducible core of Japanese culture, a tiny subset of Japanese Buddhism, an environmentalist ethic, or some combination of these. This course investigates the multifarious types of Shinto envisioned by these competing interest groups.

RELS 288 African Religious History
In recent decades, many African countries have perennially ranked very high among the most religious. This course serves as an introduction to major forms of religiosity in sub-Saharan Africa. Emphasis will be devoted to the indigenous religious traditions, Christianity and Islam, as they are practiced on the continent. We will examine how these religious traditions intersect with various aspects of life on the continent. The aim of this class is to help students to better understand various aspects of African cultures by dismantling stereotypes and assumptions that have long characterized the study of religions in Africa. The readings and lectures will be drawn from historical and a few anthropological, and literary sources.

Activity: Lecture
1.0 Course Unit

RELS 303 Power and Peril: The Paradox of Monarchy among Ancient Greeks, Romans, and Jews
We imagine ancient Greece and Rome as the cradles of democracy and republicanism, early Judea as a pious theocracy, but monarchy was the most common and prevalent form of government in antiquity (and the premodern world in general). In this class, we will take a special look at kinship among the Jews, Greeks, and Romans to assess and discuss similarities, differences, and mutual influences. In all these cultures, the king was a polarizing figure in reality and in conception. On the one hand, some revered the monarch as ideal leader, and monarchy provided the language with which to describe and even imagine the very gods. On the other, monarchs were widely reviled in both theory and practice, from the Greek tyrants to biblical Saul. The Emperor Augustus loudly denied his own affinity to the office of king, even as he ruled alone and was revered as a god. In other words, kings stood both for the ideal and the worst form of government. This class confronts the paradox of monarchical rule and will, through the lens of the king, explore ideas of god, government, human frailty, and utopianism.

RELS 311 Muslims, Christians, and Jews in the Middle East: Historical Perspectives
A reading-and discussion-intensive seminar that addresses several recurring questions with regard to the Middle East and North Africa. How have Islam, Judaism, and Christianity influenced each other in these regions historically? How have Jews, Christians, and Muslims fared as religious minorities? To what extent have communal relations been characterized by harmony and cooperation, or by strife and discord, and how have these relations changed in different contexts over time? To what extent and under what circumstances have members of these communities converted, intermarried, formed business alliances, and adopted or developed similar customs? How has the emergence of the modern nation-state system affected communal relations as well as the legal or social status of religious minorities in particular countries? How important has religion been as one variable in social identity (along with sect, ethnicity, class, gender, etc.), and to what extent has religious identity figured into regional conflicts and wars? The focus of the class will be on the modern period (c. 1800-present) although we will read about some relevant trends in the early and middle Islamic periods as well. Students will also pursue individually tailored research to produce final papers. Prior background in Islamic studies and Middle Eastern History is required. This class is intended for juniors, seniors, and graduate students.

RELS 356 Living Deliberately: Monks, Saints, and the Contemplative Life
Students who are not Religious Studies Majors and are not honors students must gain permission from instructor to enroll in this course. This is an experimental course in which students will experience monastic and ascetic ways of living. There will be no examinations, no formal papers, and very little required reading. However, each participant will need to be fully committed intellectually and participate in the monastic rules in the course involving restrictions on dress, technology, verbal communication, and food. The course subject matter is about ways in which nuns, monks, shamens, and swamis in various religious traditions (Buddhist, Muslim, Catholic, Jain, Taoist, Hindu, Animist, among others) have used poetry, meditation, mind-altering chemicals, exercise, magic, and self-torture to cope with pain and suffering, as well as struggle with spiritual, ethical, and metaphysical questions concerning the nature of the soul, the afterlife, and reality. Through monastic and spiritual practice, this course hopes to provide students with an opportunity to struggle with these questions themselves.
Taught by: McDaniel
Course not offered every year
Prerequisites: Students must complete an interview with instructor before acquiring a permit.

RELS 401 Sacred Stuff in Medieval & Early Modern Europe
During devotional activities people engage with various objects and believe that they are imbued with religious significance. In this seminar, we will explore the material culture of religion across medieval and early modern Europe. From rosary beads and crucifixes to devotional books, prints, and paintings, a range of “sacred stuff” populated the lives of medieval and early modern Europeans. We will consider objects associated with daily life as well as rites of passage. We will study objects of Christian devotion and will consider how the advent of Protestantism and the Catholic Reformation influenced the types of objects devotees used for their devotion. In this seminar, we will discuss the material culture of Judaism and Islam, religions also practiced in medieval and early modern Europe. We will engage with “sacred stuff” from a variety of disciplinary perspectives, including art history, literature, archaeology, social history, and cultural history. We will then hone these skills with visits to local museums and libraries where we will view medieval and early modern books, objects and images. Course assignments will include an in-depth analysis of a devotional object from medieval or early modern Europe chosen by the student.

RELS 434 Christian Thought From 1000-1800
This course will trace the development of Christian thought (including philosophy, theology, spirituality and mysticism) from the early Scholastic period to early Methodism. Readings will be from both primary and secondary sources. A research paper will be required of each student. Spring 2014: This course will give an overview of the main currents of Western Christian thought from the first age of reform (that is, the Central Middle Ages) through the Reformations of the sixteenth century, to the eve of the Enlightenment. In these centuries, “Christendom” underwent an almost constant process of internal and external self-definition. The most striking results of this process were the definitive separation of eastern and western Christianity and the division of the western church into what became known as Protestant and Catholic Christianity. Our focus will be on the changing definitions of Christian culture, including theological formulations (definitions of orthodoxy and heterodoxy), trends of spirituality and mysticism, forms of worship, and gender roles and definitions. Attention will also be given to institutional questions such as ecclesiastical hierarchy, monasticism, scholasticism and the rise of universities, and the changing relationship between the secular and religious worlds. Readings will be from both original and secondary sources. Additional primary sources will be available online, attached to the course Blackboard page. I will supply copies of other readings. Students will write two papers. The first (due Feb. 8) is a 5-7 pp. analysis of a primary source from the class, for which another text may be substituted by permission of the instructor. The second paper, due at the end of the course, should be a more ambitious research paper (at least 10 pp. for undergraduates, longer for graduate students) that includes some aspect of this history we did not directly study in class. Taught by: Matter
Course not offered every year
Prerequisites: None-some background in European history helpful.

RELS 439 Religion, Social Justice & Urban Development
Urban development has been influenced by religious conceptions of social and economic justice. Progressive traditions within Judaism, Christianity, Islam, Buddhism, Hinduism, Jainism, Baha’i, Humanism and other religions and systems of moral thought have yielded powerful critiques of oppression and hierarchy as well as alternative economic frameworks for ownership, governance, production, labor, and community. Historical and contemporary case studies from the Americas, Europe, Africa, Asia, and the Middle East will be considered, as we examine the ways in which religious responses to poverty, inequality, and ecological destruction have generated new forms of resistance and development. RELS 471 Religion in Eleven Objects
This advanced course for Religious Studies majors and minors approaches the study of religion through material objects. By looking at both sacred and everyday objects like rosaries melted in atomic blasts, magical amulets used in healing rituals, temple murals defaced by invading armies, manuscript stained by hold water, we will explore the many ways people express their spiritual aspirations and existential fears through objects. Not only will a different object from a variety of religious traditions be examined each week (eleven in total), but we will also explore different methodological and theoretical approaches to the study of religion. Psychological, phenomenological, bio-genetic, sociological, art historical, discursive, post-modern, and narrative approaches will be discussed. Taught by: Justin McDaniel

RELS 505 Religion & Cinema
This course looks at religion in film. As we will see, this is not just a question of how religion is represented onscreen, but how cinematic objects make religious subjects. We'll explore the ways films are crafted through technique, performance, and distribution, then consider how these components shape religious bodies and religious traditions in turn. Taught by: Schaefer
Course usually offered in fall term
Also Offered As: CIMS 506
Activity: Seminar
1.0 Course Unit

RELS 509 Teaching Religion
Teaching religion from a non-religious perspective poses challenges but also offers opportunities to help students learn about other perspectives and think through questions important to their intellectual and personal development. The aim of this course is to help graduate students from within and beyond the field of Religious Studies develop their ability to teach about religion in a secular academic setting. The course has a practical dimension as a chance to develop one's teaching skills but it also aims to explore theoretical questions in the study of religion that come into focus when one has to help others learn about it. Taught by: Weitzman
Course usually offered in fall term
Activity: Seminar
1.0 Course Unit

RELS 510 Civil Religion
In the first half of the course, we will examine the theoretical question of whether modern liberal societies need a civil religion - an idea first proposed in the late eighteenth century by writer who feared that without some unifying ideal or principle the centrifugal forces at work in modern societies would lead them to disintegrate. We will examine various authors who have defended the idea of civil religion in these terms (including J.J. Rousseau, J.G. Herder, and G.W.F. Hegel) as well as several who (implicitly or explicitly) have rejected the argument (Max Weber, Michael Oakeshott, Daniel Bell, and Niklas Luhmann). In the second half of the class, we will turn to the American context and explore the way these arguments have played themselves out from the time of the constitutional framers to today. In this part of the class, we will read and discuss excerpts from the Federalist Papers and Tocqueville's Democracy in America, selected presidential speeches, nineteenth- and twentieth-century debates surrounding Manifest Destiny and American Exceptionalism, John Dewey/Richard Rorty's proposal for a religion of democratic "common faith," and the neoconservative case for a civil religion of "national greatness." Along the way we will also have occasion to examine sociological treatments of civil religion by such authors as Emile Durkheim, Robert Bellah, and Seymour Martin Lipset. Taught by: Butler
Course not offered every year
Activity: Seminar
1.0 Course Unit

RELS 515 Syriac Christianity Past and Present
This course surveys the long and diverse history of Syriac-speaking Christianity, from the 4th century CE to the modern era. Syriac Christianity refers to the individuals and groups that identify with the linguistic, liturgical, and cultural traditions of the Syriac language, a dialect of Aramaic that has been spoken in Mesopotamia, Syria and beyond in late antiquity, through the Middle Ages until today. We will study the literature, material culture, ritual practice, theology, and other aspects of the Syriac Church, as well as its encounters with other religious communities. While we will explore the key figures and formative events that are remembered as foundational, we will incorporate the understudied elements of Syriac Christianity, such as gender, non-elite forms of piety and devotion, and music and aesthetics. Through the lens of Syriac Christianity, we will analyze the relationships between religion and language, scripture, myth-making, human body, race, state, geography, and movement. Knowledge of the Syriac language is not required for this course. Taught by: Durmaz

1.0 Course Unit

RELS 517 Topics in American Religion
From Marvin Gaye, to Tammy Faye Baker, to Sarah Palin and James Baldwin, Pentecostalism has influenced many, including politicians, preachers, writers, and the media. One of the fastest growing religious movements in the world, Pentecostalism continues to have a profound effect on the religious landscape. Pentecostalism's unique blend of charismatic worship, religious practices, and flamboyant, media-savvy leadership, has drawn millions into this understudied and often controversial religious movement. This course will chronicle the inception and growth of Pentecostalism in the United States, giving particular attention to beliefs, practices, gender, ethnicity, and Global Pentecostalism. Taught by: Butler
Course not offered every year
Also Offered As: AFRC 518
Activity: Seminar
1.0 Course Unit

RELS 520 Spirit and Law
While accepting "the yoke of the commandments", Jewish thinkers from antiquity onward have perennially sought to make the teachings of revelation more meaningful in their own lives. Additional impetus for this quest has come from overtly polemical challenges to the law, such as those leveled by Paul, medieval Aristotelians, Spinoza and Kant. This course explores both the critiques of Jewish Law, and Jewish reflections on the Law's meaning and purpose, by examining a range of primary sources within their intellectual and historical contexts. Texts (in English translation) include selections from Midrash, Talmud, medieval Jewish philosophy and biblical exegesis, kabbalah, Hasidic homilies, Jewish responses to the Enlightenment, and contemporary attempts to re-value and invent Jewish rituals. Taught by: Fishman
Course not offered every year
Also Offered As: JWST 320, JWST 520, NELC 454
Activity: Seminar
1.0 Course Unit
RELS 523 Studies in Medieval Jewish Culture
Course examines features of 9th-16th century Jewish culture within their broader historical, regional and cross-cultural contexts, whether Christian or Islamic. Emphasis is placed on primary sources in Hebrew. Topics vary and have included "Reconstructing Rabbinic Judaism prior to the First Millenium"; "Custom Medieval Jewish Cultures"; "Jewish Culture in the Islamicate World"; "Nature in Medieval Jewish Culture." Students should be able to read unpointed Hebrew. May be repeated for credit.

RELS 541 Religion and the Visual Image: Seeing is Believing
Seeing is Believing engages in a historical, theoretical, and cross-cultural analysis of the place of visuality in religion and of religion in visual culture. We will examine images, buildings, places, objects, performances and events. The geographical, cultural and historical scope of the material is broad, including subjects from Europe, the Islamic World, non-Muslim South Asia, the US and Latin America from the medieval period until the present. Theoretical works will be read in conjunction with representative examples to invite intellectual engagement in a socially and historically grounded way. Important issues to be covered include the relationship of visual to material culture; visual theories versus theories of vision; locating religion in human sensory experience; perception at individual and collective levels; aesthetics, fakes and simulacra; iconoclasm and image veneration; aesthetics, use and utility; and things.

Course not offered every year
Also Offered As: NELC 589, SAST 541
Activity: Seminar
1.0 Course Unit

RELS 545 Sufi Thought & Literature
This course is an intensive survey of the rich variety of Islamic intellectual, literary and cultural phenomena subsumed under the term Sufism. Sufi philosophies, liturgical practices, and social organizations have been a major part of the Islamic tradition in all historical periods, and Sufism has also served as a primary muse behind Islamic aesthetic expression in poetry, music, and the visual arts. In this course, we will explore the various significations of Sufism by addressing both the world of ideas and socio-cultural practices. The course is divided into three broad sections: central themes and concepts going back to the earliest individuals who identified themselves as Sufis; Sufi metaphysics and epistemology as exemplified in the work of Ibn al-'Arabi and his school, and literary expressions as exemplified in the epic poem Layla and Majnun by Nizami, The Conference of the Birds by Attar, and in the life and poetry of Mawlana Jalaluddin Rumi. In studying this material, we will be concerned equally with establishing common patterns and seeing how being a Sufi has meant different things to various people over the course of history.
Taught by: Elias
Course not offered every year
Activity: Seminar

Activity: Seminar
1.0 Course Unit
RELS 552 Emotion and Power
Is power smart? Conventional models of power—both in everyday, commonsensical understandings and in academic studies—tend to be instrumentalist. They understand power as a thoughtful exercise designed to achieve particular ends. But as we consider the political-cultural landscape, does the assumption that power is rational hold up? This seminar will bring together an in-depth exploration of Michel Foucault’s theory of power with contemporary affect theory to address this question. We will begin by mapping out Foucault’s “analytics of power,” from his early work on power knowledge to his late work on embodiment, desire, and the care of the self. We will then consider a series of interpretations of Foucault within contemporary affect theory, an approach which centralizes the non-rational, emotive force of power. Along the way, we will consider formations of sex, race, religion, material culture, and cinema. No previous knowledge of theory is required. Students will be encouraged to connect the theoretical frames of the class to their own fields and areas of interest.

One-term course offered either term
Activity: Seminar
1.0 Course Unit

RELS 571 Advanced Topics in Buddhism
This is an advanced course for upper level undergraduates and graduate students on various issues in the study of Buddhist texts, art, and history. Each semester the theme of the course changes. In recent years themes have included: Magic and Ritual, Art and Material Culture, Texts and Contexts, Manuscript Studies. Fall 2013 Topic: Buddhist repertoires (idiosyncratic and personal assemblages of beliefs, reflections, wonderings, possessions, and practices) for a large part, material and sensual. Buddhists are often sustained by their collection, production, and trading of stuff amulets, images, posters, protective drawings, CDs, calendars, films, comic books, and even Buddhist-themed pillow cases, umbrellas, and coffee mugs. Aspirations are interconnected with objects. Beliefs are articulated through objects. Objects are not empty signifiers onto which meaning is placed. The followers and the objects, the collectors and their stuff, are overlooked in the study of religion, even in many studies in the growing field of material culture and religion. What is striking is that these objects of everyday religiosity are often overlooked by art historians as well. Art historians often remove (through photography or physical movement to museums or shops) images and ritual implements from their ritual context and are seen as objects d’art. While art historians influenced by Alfred Gell, Arjun Appadurai, and Daniel Miller have brought the study of ritual objects into the forefront of art historical studies, in terms of methodologies of studying Buddhist art, art historians have generally relegated themselves to the study of either the old and valuable or the static and the curated. This course aims to 1) bring a discussion of art into the study of living Buddhism. Art historians have primarily concentrated on the study of images, stupas, manuscripts, and murals produced by the elite, and primarily made before the twentieth century; 2) study art as it exists and operates in dynamic ritual activities and highly complex synchronic and diachronic relationships; 3) focus on the historical and material turn in the study of images, amulets, and murals in Buddhist monasteries and shrines.

RELS 586 History of Islam in Asia
This class is designed to structure reflection on Islam and Islamic culture in South Asia—Indonesia, Pakistan, India, and Bangladesh. Contrary to the popular perception that the Middle East defines Islam, Asian countries not only host the most Muslims in the world but have been the source of some of Islam’s most important social and reform movements in the last three hundred years. This class looks at the history of Muslim societies across Asia not just as a religious community but also as a social and cultural bloc (a distinctive part of what Marshall Hodgson called the 'Islamicate' world, but also an area that challenges some of Hodgson’s assumptions about the Islamicate world). This course allows for the study of the Muslim world between the years 1700 to present. The class will allow students to compare and contrast Muslim societies over the last three centuries, examine points of confluence for geographically- or culturally-distinct Muslim peoples in the last three centuries, and in their writing assignments focus on the history of one society in a wider Islamicate context. In the process students will gain a more nuanced awareness of how Islam has made an impact in Asian countries, and how Asian countries have in turn impacted Islam.

RELS 620 Godliness, Miracles, and 'Madness' in Indian Ocean Port Cities
This graduate-level course introduces students to religious worlds within port cities of the modern Indian Ocean that were centered upon peripatetic Muslim, Saiva, Christian and Sikh miracle-workers, missionaries and ‘gods’. This course will particularly consider how extant, published sources reveal how religion in 19th and 20th century cosmopolitan port cities and islands: was centered upon holy men and women or spiritual beings, and intricately connected to modern economic, political and technological developments in the Indian Ocean. This course is divided into three parts. In the first part of this course, students will be introduced, on the one hand, to the scholarship on the port cities or islands of, and religions or religious networks in, the modern Indian Ocean. On the other hand, to anthropological, historical and literary works on Muslim saints, Christian missionaries and Saiva gods in the Indian Ocean. In the second and main section of this course, students will be introduced to contemporary academic literature pertaining to the inter-linkages between itinerant miracle-workers, missionaries, ‘gods’ and devotional cults, and economic, political and technological developments in the Indian Ocean. As well as works that explore European institutions, barracks, plantations, cells and asylums, and steam travel being steeped in customary religion, carnivals, ecstasy, madness and miracle stories. Here, students will be encouraged to consider ways in which a study of religion and religious economies of modern Indian Ocean port cities can be recovered through extracts from a range of anthropological, literary and historical sources. In the third part of this course, students will be encouraged to engage with the question of whether the religion of devotional cults preoccupied with the powers of Muslim, Saiva, Christian, and Sikh miracle-workers, missionaries and ‘gods’ in cosmopolitan port cities, was a distinct product of circulations within the Indian Ocean.

RELS 630 Gender, Religion, and China
This course examines gender in Chinese religious culture from ancient to contemporary times. We will explore topics including the Buddhist accommodation of Chinese family system, Chinese transformation of the bodhisattva Guanyin, female deities in Daoist and popular religious pantheons, writings about religious women, female ghosts and fox spirits in literary imagination and folk tales, and the significance of yin force in Chinese medicine and Daoist alchemy. Through the case of China, we will look at how gender plays critical and constitutive roles in religious traditions, and how religion can be used both to reinforce and to challenge gender norms.

RELS 632 Hinduism & Colonial Modernity
This seminar deals with the question of modernity in South Asia, with a specific focus on the construction, dissemination, and politicization of Hinduism in nineteenth and twentieth century India. It focuses on three central heuristic lenses—namely those of European imperialism, Orientalism, and nationalism—to study modernity and its discontents. What was at stake in the encounter between colonial modernity and India’s religions in nineteenth and early twentieth centuries? How did colonial and native discourses on “reform” and “revival” shape Indian religions as we understand them today? How is modern “Hinduism” inextricably hinged to early forms of cultural transnationalism, Orientalism, and incipient forms of nationalism? This seminar approaches questions such as these and others, with an eye to understanding how nineteenth and early twentieth century discourses continue to shape contemporary understandings of Hinduism in deep and highly politicized ways.

RELS 634 The Persian Intellectual Tradition
What makes Persian culture distinctive within broader Islamic intellectual history, and what constitutes the historical and geographical boundary of the Persianate intellectual and cultural zone? These questions lie at the center of inquiry in this seminar in which participants will read and discuss a broad range of works from the 11th to the 20th centuries. Readings will include works on philosophy and language, Sufi epic poems, religious and cultural geographies, accounts of natural and manufactured wonders, urban and political histories, as well as other kinds of texts. All readings will be in English for the regular meeting of the seminar; students with a reading knowledge of Persian and an interest in participating in an additional meeting to read the assignments in their original language should register for the higher of the two numbers listed for this course.

RELS 644 Religion in Modern South Asia
This graduate-level course introduces students to the writings of key religious scholars in modern South Asia who associated the regeneration of Hinduism, Islam, and Sikhism with the cultivation of bodies and sexual practices. Particular attention will be paid towards religious texts produced in modern India, Pakistan and Bangladesh pertaining to sexual bodies, exercises and health; celibacy; body-building; the transmission of sexual knowledge; and the political roles of the ‘Hindu’, ‘Muslim’ and ‘Sikh’ body. In this course, students will be encouraged to engage a range of sources including religio-sexual manuals, autobiographies, novels, speeches, pamphlets, official records, recipes and films. Moreover, students will be introduced to the academic literature on South Asian religious scholars and ‘sex gurus’ in South and Southeast Asia; religious sexuality in South Asia, Southeast Asia, the Middle East and Europe; and, the transcultural literary networks that led to the production of religio-sexual texts in modern South Asia.

RELS 702 Topics in Medieval Art
Spring 2017: For the Christians of Medieval Europe, pilgrimages were one of the key embodied experiences of faith. Reliquaries, churches with their welcoming portals, manuscripts and music: all were crafted to augment the corporeal experience of the divine. This seminar will take the material culture surrounding the relic and its veneration as a lens for exploring the Middle Ages, from the Early Christian to the High Gothic. Cross-disciplinary methodologies and cross-cultural examples will be considered to advance our understanding of these phenomena. While proceeding chronologically, each week will focus on a distinct strategy for shaping the interaction between faith and matter.

RELS 742 Qur’anic Studies
This seminar explores the nature and uses of the Qur’an. It focuses on the practice and theory of Qur’an commentary and interpretation (safsir and ta’wil). A major portion of the course will involve a close examination of manuscripts of the Qur’an at the Philadelphia Museum of Art and the Kislak Center at the University of Pennsylvania, concentrating on the relationship between the text and marginalia as well as on the peculiarities of individual manuscripts. The rest of the course will center around reading commentaries on the Qur’an in manuscript as well as print. In addition, we will read and discuss theoretical works on the history and nature of Qur’an commentary, literary criticism and textual analysis, and spend some of the later section of the course discussing issues of translation and editorial processes involved in popularizing Qur’an commentaries on the internet. READING KNOWLEDGE OF ARABIC REQUIRED.

**Russian (RUSS)**

**RUSS 001 Elementary Russian I**
This course develops elementary skills in reading, speaking, understanding and writing the Russian language. We will work with an exciting range of authentic written materials, the Internet, videos and recordings relating to the dynamic scene of Russia today. At the end of the course students will be comfortable with the Russian alphabet and will be able to read simplified literary, commercial, and other types of texts (signs, menus, short news articles, short stories) and participate in elementary conversations about daily life (who you are, what you do every day, where you are from, likes and dislikes).
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: RUSS 501
Activity: Lecture
1.0 Course Unit

**RUSS 002 Elementary Russian II**
Continuation of RUSS 001. Further work developing basic language skills using exciting authentic materials about life in present-day Russia. At the conclusion of the course, students will be prepared to negotiate most basic communication needs in Russia (getting around town, ordering a meal, buying goods and services, polite conversation about topics of interest) and to comprehend most texts and spoken material at a basic level.
For BA Students: Language Course
Taught by: Peeney/Alley
Course usually offered in spring term
Also Offered As: RUSS 502
Prerequisite: RUSS 001 or equivalent
Activity: Lecture
1.0 Course Unit

**RUSS 003 Intermediate Russian I**
This course will develop your ability to use the Russian language in the context of typical everyday situations, including university life, family, shopping, entertainment, etc. Role-playing, skits, short readings from literature and the current press, and video clips will be used to help students improve their language skills and their understanding of Russian culture. At the end of the semester you will be able to read and write short texts about your daily schedule and interests, to understand brief newspaper articles, films and short literary texts, and to express your opinions in Russian. In combination with RUSS 004, this course prepares students to satisfy the language competency requirement.
For BA Students: Language Course
Taught by: Peeney/Alley
Course usually offered in fall term
Also Offered As: RUSS 503
Prerequisites: RUSS 001 and 002 or placement exam.
Activity: Lecture
1.0 Course Unit

**RUSS 004 Intermediate Russian II**
A continuation of RUSS 003. This course will further develop your ability to use the Russian language in the context of everyday situations (including relationships, travel and geography, leisure activities) and also through reading and discussion of elementary facts about Russian history, excerpts from classic literature and the contemporary press and film excerpts. At the end of the course you will be able to negotiate most daily situations, to comprehend most spoken and written Russian, to state and defend your point of view. Successful completion of the course prepares students to satisfy the language competency requirement.
For BA Students: Last Language Course
Taught by: Peeney/Alley
Course usually offered in spring term
Also Offered As: RUSS 504
Prerequisite: RUSS 003 or placement exam
Activity: Lecture
1.0 Course Unit

**RUSS 009 Central and Eastern Europe: Cultures, Histories, Societies**
The reappearance of the concept of Central and Eastern Europe is one of the most fascinating results of the collapse of the Soviet empire. The course will provide an introduction into the study of this region its cultures, histories, and societies from the foundation of the Holy Roman Empire to the enlargement of the European Union. Students are encouraged to delve deeper into particular countries, disciplines, and sub-regions, such as Central Europe, Eastern Europe, and the Balkans, through an individual research paper and class presentations.
Taught by: Steiner/Orenstein/Verkholantsev
Course usually offered in spring term
Also Offered As: COML 010, EEUR 010
Activity: Seminar
1.0 Course Unit
Notes: This course is one of two required core courses for the Russian and East European Studies (REES) Major.

**RUSS 010 Intro to Russia and Eurasia: Histories, Cultures, Societies**
This course is designed as a broad introduction to the study of Russia and Eurasia that will offer students a multi-disciplinary overview of the cultures, histories and societies of this large and diverse region of the world. It is organized in units that illustrate the approaches of various disciplines to the study of the region, including history, literary studies, cinema studies, art history, and social scientific inquiry. At the conclusion of the course, students will be acquainted with these various disciplinary frameworks and the differences between them, with the modes of analysis and writing that pertain to them, and with fundamental knowledge of the region. They will be prepared for further study of the region in a variety of programs of study, including the Russian and East European Studies major, for which the course serves as a foundation.
Taught by: Platt/Staff
Course usually offered in fall term
Also Offered As: EEUR 009

RUSS 026 Behind the Iron Curtain
This first-year seminar provides an introduction to the histories, cultures, and societies of Central and Eastern Europe, including Poland, the Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Albania, and the successor states of Yugoslavia. Through a selection of articles and essays written by anthropologists and sociologists and based on their extended fieldwork in the region, students will explore both the ethnographic method and the experience of everyday life during and after the communist era. Topics will include: popular music under socialism, food and wine, environmental concerns, the status of Muslim minorities, socialist aesthetics, public memory and cultures of commemoration, privatization, advertising, women's rights, gender and sexuality, emergent nationalisms, and the rise of income inequality and homelessness. All readings and assignments in English.

Activity: Seminar
1.0 Course Unit

RUSS 048 The Rise and Fall of the Russian Empire, 1552-1917
How and why did Russia become the center of the world's largest empire, a single state encompassing eleven time zones and over a hundred ethnic groups? To answer this question, we will explore the rise of a distinct political culture beginning in medieval Muscovy, its transformation under the impact of a prolonged encounter with European civilization, and the various attempts to re-form Russia from above and below prior to the Revolution of 1917. Main themes include the facade vs. the reality of central authority, the intersection of foreign and domestic issues, the development of a radical intelligentsia, and the tension between empire and nation.
For BA Students: History and Tradition Sector
Taught by: Nathans/Holquist
One-term course offered either term
Also Offered As: HIST 048
Activity: Lecture
1.0 Course Unit

Out of an obscure, backward empire, the Soviet Union emerged to become the great political laboratory of the twentieth century. This course will trace the roots of the world's first socialist society and its attempts to recast human nature itself. Topics include the origins of the Revolution of 1917, the role of ideology in state policy and everyday life, the Soviet Union as the center of world communism, the challenge of ethnic diversity, and the reasons for the USSR's sudden implosion in 1991. Focusing on politics, society, culture, and their interaction, we will examine the rulers (from Lenin to Gorbachev) as well as the ruled (peasants, workers, and intellectuals; Russians and non-Russians). The course will feature discussions of selected texts, including primary sources in translation.

Taught by: Nathans/Holquist
Course usually offered in spring term
Also Offered As: HIST 049
Activity: Recitation
1.0 Course Unit

RUSS 095 Universal Language: From the Tower of Babel to Artificial Intelligence
This is a course in European intellectual history. It explores the historical trajectory, from antiquity to the present day, of the idea that there once was, and again could be, a universal and perfect language among the human race. If recovered, it can explain the origins and meaning of human experience, and can enable universal understanding and world peace. The tantalizing question of the possibility of a universal language have been vital and thought-provoking throughout the history of humanity. The idea that the language spoken by Adam and Eve was a language which perfectly expressed the nature of all earthly objects and concepts has occupied the minds of intellectuals for almost two millennia. In defiance of the Christian biblical myth of the confusion of languages and nations at the Tower of Babel, they have over and over tried to overcome divine punishment and discover the path back to harmonious existence. By recovering or recreating a universal language, theologians hoped to be able to experience the divine; philosophers believed that it would enable apprehension of the laws of nature, while mystic cabalists saw in it direct access to hidden knowledge. In reconstructing a proto-language, 19th-century Indo-Europeanist philologists saw the means to study the early stages of human development. Even in the 20th century, romantic idealists, such as the inventor of Esperanto Ludwik Zamenhof, strived to construct languages to enable understanding among estranged nations. For writers and poets of all times, from Cyrano de Bergerac to Velimir Khlebnikov, the idea of a universal and perfect language has been an inexhaustible source of inspiration. Today, this idea echoes in theories of universal and generative grammars, in approaching English as a global tongue, and in various attempts to create artificial languages, even a language for cosmic communication. Each week we address a particular period and set of theories to learn about universal language projects, but above all, the course examines fundamental questions of what language is and how it functions in human society.

Also Offered As: CIMS 111, COML 118
Activity: Seminar
1.0 Course Unit

RUSS 113 Portraits of Old Russia: Myth, Icon, Chronicle
This course covers eight centuries of Russian cultural, political, and social history, from its origins through the eighteenth century, a period which laid the foundation for the Russian Empire. Each week-long unit is organized around a set of texts (literary text, historical document, image, film) which examine prominent historical and legendary figures as they represent chapters in Russian history. Historical figures under examination include, among others, the Baptist of Rus, Prince Vladimir; the nation-builder, Prince Alexander Nevsky; the first Russian Tsar, Ivan the Terrible; the first Emperor and Westernizer, Peter the Great; the renowned icon painter Andrei Rublev; the epic hero Ilya Muromets; and the founder of Muscovite monasticism, St. Sergius of Radonezh.
Three modern-day nation-states Russia, Ukraine, and Belarus share and dispute the cultural heritage of Old Rus, and their political relationships even today revolve around interpretations of the past. This constructed past has a continuing influence in modern Russia and is keenly referenced, sometimes manipulatively, in contemporary social and political discourse. (Recently, for example, President Putin has justified the annexation of Crimea to Russia by referring to it as the holy site of Prince Vladimir’s baptism, from which Russian Christianity ostensibly originates.) The study of pre-modern cultural and political history explains many aspects of modern Russian society, as well as certain political aspirations of its leaders.
For BA Students: History and Tradition Sector
Taught by: Verkholantsev
Also Offered As: COML 131, HIST 045, RUSS 613
Activity: Lecture
1.0 Course Unit

RUSS 115 Before Transgender: Hermaphrodites in 19th Century Literature
This course provides a literary and cultural prehistory to contemporary discourses on transgender identity by focusing on the figure of the hermaphrodite in 19th Russia and the West. Far from a marginal subject, the hermaphrodite and intersex characters played central roles in the novels of Balzac, Tolstoy, Dostoevsky, and many others whose work we will read in this course. Interdisciplinary in nature, this course draws on 19th century discourses in medicine, psychology, opera, religious philosophy, and political theory to understand why characters who exist outside of the male/female gender binary feature so prominently in 19th century literature and cultural texts across a wide range of traditions (Anglophone, French, and Russian, and others.)
Taught by: Wilson
Also Offered As: GSWS 115
Activity: Lecture
1.0 Course Unit

RUSS 123 RUSSIA AND EASTERN EUROPE IN INTERNATIONAL AFFAIRS
Russia and the European Union (EU) are engaged in a battle for influence in Eastern Europe. EU foreign policy towards its Eastern neighbors is based on economic integration and the carrot of membership. With the application of this powerful incentive, Central and Southeastern European countries such as Poland, Hungary, the Czech Republic, and Croatia have progressed rapidly towards integration with the EU (and NATO). Yet, given Russia’s opposition to the further enlargement, membership is off the table for the large semi-Western powers such as Russia itself and Turkey and the smaller countries inhabiting an emerging buffer zone between Russia and the EU, such as Georgia, Ukraine, Azerbaijan, Moldova, and Belarus. These in-between countries find themselves subject to intense competition for influence between Eastern and Western powers. In this context, EU countries must balance their energy dependence on Russia and need for new markets and geopolitical stability with concern for human rights, democratic governance, and self-determination. What are the trade-offs implicit in the foreign policies of Russia, EU member states, and Eastern Europe? What are the best policy approaches? What are the main opportunities and obstacles?
For BA Students: Society Sector
Taught by: Orenstein
Course not offered every year
Also Offered As: EEUR 152, PSCI 267
Activity: Lecture
1.0 Course Unit

RUSS 125 Freaks, Creeps & Cheats
The object of this course is to analyze representations of adultery, cheating, and "perverted" or non-normative sexualities in literature and film. We will study how sex and sexual desire is represented, and think critically about the narrative conventions used for describing taboo desires and behaviors, and the social values that inform them. The themes of desire, transgression, suspicion and discovery lie at the heart of many classic narratives in drama, literature and film, from antiquity to the present. Is there anything special, we will ask, about representing sex, especially "wrong" kinds of sex? What might these stories teach us about the way we read in general? Along the way, the course will also provide an introduction to the study of sexuality and queer studies, as well as training in critical reading and cultural analysis. By supplementing classic literary accounts by authors such as Shakespeare, Pushkin, Flaubert, Chekhov, Bataille, de Sade, Proust with films by such figures as Fellini and Pasolini, we will analyze the possibilities and limitations of the different genres and forms under discussion, including novels, films, short stories, and drama. What can these forms show us (or not show us) about desire, gender, family and social obligation? We will apply a range of critical approaches to place these narratives of "bad" or "kinky" or "sinful" sexuality in a social and literary context, including formal analyses of narrative and style, feminist criticism, Marxist and sociological analyses of the family, and psychoanalytic understandings of desire and family life.

RUSS 134 Communism
The rise and fall of Communism dominated the history of the short twentieth century from the Russian revolution of 1917 to the collapse of the Soviet Union in 1991. As a system of government, Communism is more or less dead, but its utopian ideals of liberation from exploitation and want live on. Communism remains the one political-economic system that presented, for a time, an alternative to global capitalism. In this course, students will gain an introduction to socialist and Communist political thought and explore Communist political and economic regimes their successes and failures, critics and dissidents, efforts at reform, and causes of collapse. We will learn about the remnants of Communism in China, North Korea, and Cuba and efforts of contemporary theorists to imagine a future for Communism.

RUSS 135 Cold War: Global History
The Cold War was more than simply a military confrontation between the United States and the Soviet Union; it was the frame within which the entire world developed (for better or worse) for nearly five decades. This course will examine the cold War as a global phenomenon, covering not only the military and diplomatic history of the period, but also examining the social and cultural impact of the superpower confrontation. We will cover the origins of the conflict, the interplay between periods of tension and detente, the relative significance of disagreements within the opposing blocs, and the relationship between the "center" of the conflict in the North Atlantic/European area and the global "periphery".

For BA Students: Humanities and Social Science S
Taught by: Nathans
Also Offered As: EEUR 135, HIST 135
Activity: Recitation
1.0 Course Unit

RUSS 136 Portraits of Russian Society: Art, Fiction, Drama
This course covers 19C Russian cultural and social history. Each week-long unit is organized around a single medium-length text (novella, play, memoir) which opens up a single scene of social historybirth, death, duel, courtship, tsar, and so on. Each of these main texts is accompanied by a set of supplementary materials--paintings, historical readings, cultural-analytical readings, excerpts from other literary works, etc. The object of the course is to understand the social codes and rituals that informed nineteenth-century Russian life, and to apply this knowledge in interpreting literary texts, other cultural objects, and even historical and social documents (letters, memoranda, etc.). We will attempt to understand social history and literary interpretation as separate disciplines yet also as disciplines that can inform one another. In short: we will read the social history through the text, and read the text against the social history.

RUSS 145 Masterpieces of 19th Century Russian Literature
A bronze monument to an all-powerful emperor comes to life and pursues a poor everyman through the streets, driving him to his death. A studious young man kills an old woman as a philosophical experiment. A young woman at the height of aristocratic society abandons her husband and young son to devote herself to her lover. These and other tales from the classics of nineteenth-century Russian literature will touch and delight you, get under your skin, and even attempt to show you how to live.

We will read these tales in order to understand how books can become events in their own right, how Russian literature gained such power and prestige, and what it can still teach us today. Works will include Pushkin’s The Bronze Horseman, Turgenev’s Fathers and Children, Dostoevsky’s Crime and Punishment, Tolstoy’s Anna Karenina, Khvoshchinskaya’s City Folk and Country Folk, Chekhov’s Cherry Orchard, and others.

RUSS 159 Population and Public Health in Eastern Europe
Since the collapse of communism in 1989 in Eastern Europe (and 1991 in the Soviet Union), many of the countries in the region have experienced public health crises and demographic catastrophe. Below replacement fertility rates and massive out migration have decimated the populations of these countries even as populations age and place unsustainable strains on pension systems and medical services. The demographic collapse has also been accompanied by falling male life expectancy and the rise of alcoholism, depression, domestic violence, and suicide. The economic exigencies of the transition from communism to capitalism dismantled welfare states at the exact moment when health services were most needed, leaving charities and nongovernmental organization try to fill in the gaps. Through a combination of readings from the fields of epidemiology, demography, and medical anthropology, this course examines the public health implications of poverty and social dislocation in post-communist states. All readings and assignments are in English.

RUSS 160 Sex and Socialism
This seminar examines classic and current scholarship and literature on gender and sexuality in contemporary Eastern Europe, and examines the dialogue and interchange of ideas between East and West. Although the scholarly and creative works will primarily investigate the changing status of women during the last three decades, the course will also look at changing constructions of masculinity and LGBT movements and communities in the former communist bloc. Topics will include: the woman question before 1989; gender and emerging nationalisms; visual representations in television and film; social movements; work; romance and intimacy; spirituality; and investigations into the constructed concepts of “freedom” and “human rights.”

RUSS 167 The Socialist City
This course will explore the ideology and politics of the socialist city in the Soviet Union, East Europe, and the Second World. We will focus on how design professionals, politicians, and residents realized utopian socialist values in the face of national design traditions, local politics, and limited resources. Beginning with the Soviet case, the course will consider how planners and architects addressed modernization, multi-family housing, and neighborhood units in new city plans. We will consider capitals, like Moscow, as well as less well-known regional centers that had strong local identities, such as Tashkent, Belgrade, and Prague. We will examine the state’s use of public spaces for commemorations and preservationists' reinterpretation of existing historic sites. In addition, we will consider how everyday residents experienced the socialist city, such as multi-family housing, shopping centers, and subway systems. We will address how citizens circumvented official state channels to obtain state housing and illegally build homes for themselves, sometimes in a folk style. The course will center on Soviet and East European cities, but also address socialist cities in Cuba and Africa whose design was influenced by transnational exchanges. Most broadly, this course explores the question, what was the socialist city? How did its planners, architects, and politicians understand it, and what did they intend to construct? And, what resulted? In the past fifteen years, North American scholars have begun to take seriously the study of the socialist city, and this course draws on the emerging scholarship on this exciting, cross-disciplinary topic. How do scholars understand the socialist city today? We will examine the shared legacies that socialist cities across East Europe shared with their Western European counterparts, as well as the particularities of design that have sparked North American scholars’ debates on what distinguished the socialist city from ones that emerged in a capitalist context. In our discussions, we will seek to understand how socialist design professionals understood their work and the emerging cities at the time, as well as how North American scholars view the socialist city today. Disciplinarily, the focus of the call will fall at the intersection of architectural history and politics.

RUSS 187 Portraits of Soviet Society: Literature, Film, Drama
How can art and literature open a window on Russian lives lived over the course of the tumultuous twentieth century? This course adopts a unique approach to questions of cultural and social history. Each week-long unit is organized around a medium-length film, text or set of texts by some of the most important cultural figures of the era (novella, play, memoir, film, short stories) which opens up a single scene of social history: work, village, avant-garde, war, Gulag, and so on. Each cultural work is accompanied by a set of supplementary materials: historical readings, paintings, cultural-analytical readings, excerpts from other literary works, etc. We will read social history through culture and culture through history.

RUSS 189 Soviet and Post-Soviet Economy
The course will cover the development and operation of the Soviet centrally planned economy—one of the grandest social experiments of the 20th century. We will review the mechanisms of plan creation, the push for the collectivization and further development of Soviet agriculture, the role of the Soviet educational system and the performance of labor markets (including forced labor camps—GULags). We will discuss the strengths and weaknesses of the Soviet system and the causes of its collapse. Privatization, called by some “piratization,” will be one of the central issues in our consideration of the transition from central planning to a market economy in the early 1990s. Even though our main focus will be on the Soviet economy and post-Soviet transition, we will occasionally look back in time to the tsarist era and even further back to find evidence to help explain Soviet/Russian economic development.
Taught by: Platt
Activity: Lecture
1.0 Course Unit

RUSS 193 War and Representation
This class will explore complications of representing war in the 20th and 21st centuries. War poses problems of perception, knowledge, and language. The notional “fog of war” describes a disturbing discrepancy between agents and actions of war; the extreme nature of the violence of warfare tests the limits of cognition, emotion, and memory; war’s traditional dependence on declaration is often warped by language games—“police action,” “military intervention,” “nation-building,” or palpably unnamed and unacknowledged state violence. Faced with the radical uncertainty that forms of war bring, modern and contemporary authors have experimented in historically, geographically, experientially and artistically particular ways, forcing us to reconsider even seemingly basic definitions of what a war story can be. Where does a war narrative happen? On the battlefield, in the internment camp, in the suburbs, in the ocean, in the ruins of cities, in the bloodstream? Who narrates war? Soldiers, refugees, gossips, economists, witnesses, bureaucrats, survivors, children, journalists, descendants and inheritors of trauma, historians, those who were never there? How does literature respond to the rise of terrorist or ideology war, the philosophical and material consequences of biological and cyber wars, the role of the nuclear state? How does the problem of war and representation disturb the difference between fiction and non-fiction? How do utilitarian practices of representation—propaganda, nationalist messaging, memorialization, xenophobic depiction—affect the approaches we use to study art? Finally, is it possible to read a narrative barely touched or merely contextualized by war and attend to the question of war’s shaping influence? The class will concentrate on literary objects—short stories, and graphic novels—as well as film and television. Students of every level and major are welcome in and encouraged to join this class, regardless of literary experience.

RUSS 196 Russian Short Story
This course studies the development of 19th and 20th-century Russian literature through one of its most distinct and highly recognized genres—the short story. The readings include great masters of fiction such as Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Solzhenitsyn, and others. The course presents the best works of short fiction situating them in a larger cultural-political context. The students learn about the historical formation, poetic virtue, and thematic characteristics of major narrative modes such as sentimentalism, romanticism, utopia, realism, modernism, and socialist realism. We study literary devices, styles, and trends of storytelling such as irony, absurd, satire, grotesque, anecdote, etc. Main topics include culture of the duel; the role of chance; the riddle of death; anatomy of madness; imprisonment and survival.
Taught by: Todorov
Course not offered every year

RUSS 197 Madness and Madmen in Russian Culture
Is "insanity" today the same thing as "madness" of old? Who gets to define what it means to be "sane," and why? Are the causes of madness biological or social? In this course, we will grapple with these and similar questions while exploring Russia's fascinating history of madness as a means to maintain, critique, or subvert the status quo. We will consider the concept of madness in Russian culture beginning with its earliest folkloric roots and trace its depiction and function in the figure of the Russian "holy fool," in classical literature, and in contemporary film. Readings will include works by many Russian greats, such as Pushkin, Gogol, Dostoevsky, Chekhov, Bulgakov and Nabokov.

RUSS 201 Dostoevsky and His Legacy
This course explores the ways Fyodor Dostoevsky (1821-1881) portrays the "inner world(s)" of his characters. Dostoevsky's psychological method will be considered against the historical, ideological, and literary contexts of middle to late nineteenth-century Russia. The course consists of three parts External World (the contexts of Dostoevsky), "Inside" Dostoevsky's World (the author's technique and ideas) and The World of Text (close reading of Crime and Punishment and The Brothers Karamazov).
Students will write three essays on various aspects of Dostoevsky's "spiritual realism."
Also Offered As: COML 207
Activity: Seminar
1.0 Course Unit

RUSS 202 Tolstoy
Few authors have ever been able to combine their moral and artistic visions as closely as Tolstoy. Over the course of the semester, we will plot how Tolstoy's ethical concerns changed over the course of his life and how this was reflected in works, which include some of the greatest prose ever written. We will begin by surveying the majestic and far-reaching world of his novels and end with some of Tolstoy's short later works that correspond with the ascent of "Tolstoism" as virtually its own religion.

RUSS 213 Saints and Devils in Russian Literature and Tradition
This course is about Russian literary imagination, which is populated with saints and devils, believers and religious rebels, holy men and sinners. In Russia, where people's frame of mind had been formed by a mix of Eastern Orthodox Christianity and earlier pagan beliefs, the quest for faith, spirituality, and the meaning of life has invariably been connected with religious matters. How can one find the right path in life? Is humility the way to salvation? Should one live for God or for the people? Does God even exist? In "Saints and Devils" we read works of great masters of Russian literature and learn about the historic trends that have filled Russia's national character with religious and mystical spirit. We start with old Russian fanciful stories and legends of crafty demons and all-forbearing saints. The master of fantastic writing, Nikolai Gogol, will teach us how to triumph over the devil. Together with Anton Chekhov and Leo Tolstoy, we contemplate an ambivalent cultural image of woman as a victim or a sinful agent of the devil. Immersed in the world of Dostoevsky's The Brothers Karamazov, we follow the characters in their search for truth, faith, and love. In The Master and Margarita, Mikhail Bulgakov will tell us his fantastic and devilish story of Pontius Pilate and we will see for ourselves that "A man will receive his deserts in accordance with his beliefs." In sum, over the course of this semester we will talk about ancient cultural traditions, remarkable works of art, and the great artists who created them. (No previous knowledge of Russian Literature necessary. All readings are in English.)

RUSS 217 Russian Politics
This course will present an in-depth examination of political, economic and social change in post-Soviet Russia within a historical context. After a brief discussion of contemporary problems in Russia, the first half of the course will delve into the rise of communism in 1917, the evolution of the Soviet regime, and the tensions between ideology and practice over the seventy years of communist rule up until 1985. The second part of the course will begin with an examination of the Gorbachev period and the competing interpretations of how the events between 1985 and 1991 may have contributed to the collapse of the Soviet Union. We will then proceed to make sense of the continuities and changes in politics, economics and society in contemporary Russia. Important topics will include the confrontations accompanying the adoption of a new constitution, the emergence of competing ideologies and parties, the struggle over economic privatization, the question of federalism and nationalism, social and political implications of economic reform, and prospects for Russia's future in the Putin and post-Putin era.
Course usually offered in spring term
Also Offered As: PSCI 217, PSCI 517
Activity: Recitation
1.0 Course Unit
RUSS 220 Russia and the West
This course will explore the representations of the West in eighteenth- and nineteenth-century Russian literature and philosophy. We will consider the Russian visions of various events and aspects of Western political and social life: Revolutions, educational system, public executions, resorts, etc. within the context of Russian intellectual history. We will examine how images of the West reflect Russia's own cultural concerns, anticipations, and biases, as well as aesthetic preoccupations and interests of Russian writers. The discussion will include literary works by Karamzin, Pushkin, Gogol, Dostoevsky, Leskov, and Tolstoy, as well as non-fictional documents, such as travelers' letters, diaries, and historiosophical treatises of Russian Freemasons, Romantic and Positivist thinkers, and Russian social philosophers of the late Nineteenth century. A basic knowledge of nineteenth-century European history is desirable. The class will consist of lectures, discussion, short writing assignments, and two in-class tests.
For BA Students: Humanities and Social Science S
Also Offered As: COML 220, HIST 220
Activity: Seminar
1.0 Course Unit

RUSS 222 Imagining Asia: Russia and the East
This course examines the important role of the East in Russian literature and nationalism. Focusing specifically on the Caucasus, Central Asia, Iran, and Turkey, this course will analyze how Russian writers connected the East to Russian identity, and how their approaches implicate different artistic periods (Romanticism, Realism, Socialist Realism, Post-Modemism) and different political atmospheres (Tsarist Russia, Soviet Union, Post-Soviet). Students will also ascertain how Russian literature on the East has affected and influenced literature and political movements produced in the East. In particular, students will analyze how Soviet Central Asian writers, Iranian Socialists, and contemporary Turkish writers were influenced by Russian literature and Soviet ideology. Ultimately, this course examines the impact of Russians cultural and political history in 20th century Central Asia and the Middle East.
Readings will include works by: Pushkin, Lermontov, Tolstoy, Dostoevsky, Platonov, Chingiz Aitmatov, Sadek Hedayat, Orhan Pamuk, and others. All readings in English.
Course not offered every year
Also Offered As: COML 217, NELC 222
Activity: Seminar
1.0 Course Unit

RUSS 240 Napoleonic Era & Tolstoy
In this course we will read what many consider to be the greatest book in world literature. This work, Tolstoy's War and Peace, is devoted to one of the most momentous periods in world history, the Napoleonic Era (1789-1815). We will study both the novel and the era of the Napoleonic Wars: the military campaigns of Napoleon and his opponents, the grand strategies of the age, political intrigues and diplomatic betrayals, the ideologies and human dramas, the relationship between art and history. How does literature help us to understand this era? How does history help us to understand this great novel? Because we will read War and Peace over the course of the entire semester, readings will be manageable (circa 100 pages of the epic and 50 pages of additional reading per week) and very enjoyable.
Taught by: Holquist

RUSS 250 Tarkovsky's Passions
Andrei Tarkovsky is universally acknowledged to be the greatest Soviet filmmaker of the last half of the twentieth century. In Kurosawas assessment following Tarkovskys death in the late 1980s, he had no equal among film directors alive now. In Ingmar Bergmans words, Tarkovskys work was a miracle. His films are beautiful, intellectually challenging, and spiritually profound. They range from Ivans Childhood, an exploration of wartime experience through the eyes of a child; to Solaris, a philosophical essay in the form of a science-fiction thriller; to Andrei Rublev, an investigation of the power of art and spirituality. In this course, we will study Tarkovskys films and life, with attention both to his formal and artistic accomplishments, his thought and writings concerning art and film, and the cultural and political contexts of his work.

RUSS 275 Russian History in Film
This course draws on fictional, dramatic and cinematic representations of Russian history based on Russian as well as non-Russian sources and interpretations. The analysis targets major modes of imagining, such as narrating, showing and reenacting historical events, personae and epochs justified by different, historically mutating ideological postulates and forms of national self-consciousness. Common stereotypes of picturing Russia from "foreign" perspectives draw special attention. The discussion involves the following themes and outstanding figures: the mighty autocrats Ivan the Terrible, Peter the Great, and Catherine the Great; the tragic ruler Boris Godunov; the brazen rebel and royal impostor Pugachev; the notorious Rasputin, his uncanny powers, sex-appeal, and court machinations; Lenin and the October Revolution; images of war; times of construction and times of collapse of the Soviet Colossus.

RUSS 401 Russian Culture Through Art and Architecture: From Fin de Siecle to Perestroika
This course offers a general introduction to the history of Russian visual art and material culture. It surveys styles, traditions, and fashions in Russian visual culture from the Middle Ages to Perestroika, considering them in the context of Russian social and political history. The course examines the very important role played by visual art in the history of Russian culture, and seeks to arrive at a deeper understanding of the relationship between visual media and key aspects and events of Russian civilization, such as Orthodoxy, Westernization and Nationalism, Communist utopia and political protest.
Taught by: Nazyrova
Course not offered every year
Prerequisite: RUSS 312
Activity: Seminar
1.0 Course Unit

RUSS 402 Soviet Childhood
This course examines “Soviet childhood” as a changing historical and political concept, beginning with its incipient notions in the pre-revolutionary period and moving through the Soviet and post-Soviet eras in Russia. We will access the viewpoints of children and adults at various points in time, while engaging with educational theory and practices, legislation, societal norms, and cultural rituals associated with Soviet childhood. This course relies on the close study of literature, songs, films, artifacts of mass production, as well as documentary resources (diaries, recorded interviews, drawings, etc.), in addition to relevant scholarship.
Taught by: Alley
Course not offered every year
Prerequisites: Russian 312 or placement exam.
Activity: Seminar
1.0 Course Unit

RUSS 408 Reading Russian History
The course explores defining episodes, concepts, and figures in Russian history, from the earliest time to the present day, and their reception in today’s scholarship and society. Students learn about Russian historical heritage through the reading of primary sources and analytical essays, as well as examining how this history is used in the present socio-political and ideological discourse. Work on language focuses on matters of style, sentence structure, and vocabulary building.
Taught by: Verkholantsev
Course not offered every year
Prerequisite: RUSS312 or placement exam
Activity: Seminar
1.0 Course Unit

RUSS 410 Russian Folk and Literary Tale
This course examines the very important role played by visual art in the history of Russian culture and seeks to arrive at a deeper understanding of the relationship between visual media and key aspects and events of Russian civilization, such as Orthodoxy, Westernization and Nationalism, Communist utopia and political protest.
Activity: Seminar
1.0 Course Unit
Notes: Conducted in Russian.
RUSS 412 Nineteenth-Century Russian Literature and Culture: Romantics and Realists
This course continues developing students' advanced skills in Russian, and combines advanced study of the Russian language with an examination of the fundamental literary movements and figures of nineteenth-century Russian literature and culture. Course materials include prosaic and poetic texts by Pushkin, Gogol', Lermontov, Dostoevsky, Tolstoy, Chekhov, as well as films and art. Language work will be devoted to writing, syntactical and stylistic analysis, vocabulary, academic speech, and listening comprehension.
Taught by: Bourlatskaya
Course not offered every year
Prerequisites: Russian 312 or placement exam.
Activity: Lecture
1.0 Course Unit
Notes: Conducted in Russian.

RUSS 413 Twentieth-Century Russian Literature, Film and Culture: Utopia, Revolution and Dissent
This course continues developing students' advanced skills in Russian, and introduces students to major movements and figures of twentieth-century Russian literature and culture. We will read the works of modern Russian writers, and watch and discuss feature films. The course will introduce the first Soviet films and works of the poets of the Silver Age and beginning of the Soviet era as well as the works from later periods up to the Perestroika and Glasnost periods (the late 1980s).
Taught by: Bourlatskaya
Course not offered every year
Prerequisites: Russian 312 or placement exam.
Activity: Seminar
1.0 Course Unit
Notes: Conducted in Russian.

RUSS 414 Nineteenth-Century Russian Literature: Romantics, Realists
This course continues developing students’ advanced skills in Russian, and is designed to familiarize students with contemporary Russian society, its historical background and its present political and economic structure, and to develop functional proficiency in speaking, writing, reading and listening. The course will focus on a variety of issues central to Russian society since the fall of the Soviet Union, including changing values, political parties and movements, the business climate and businessmen, various nationalities within Russia, women in the family and at work. Course materials will include interviews, articles, essays by leading Russian journalists and statesmen, and contemporary Russian movies.

Activity: Seminar
1.0 Course Unit
Notes: Conducted in Russian.

RUSS 416 Business and Democracy in the New Russia
This course continues developing students' advanced skills in Russian, and offers intensive study of Russian film, arguably the most powerful medium for reflecting changes in modern society. This course will examine Russia’s transition to democracy and market economy through the eyes of its most creative and controversial cinematographers. The course will focus on the often agonizing process of changing values and attitudes as the country moves from Soviet to Post-Soviet society. Russian films with English subtitles will be supplemented by readings from contemporary Russian media sources. The course provides an excellent visual introduction to the problems of contemporary Russia society.
Taught by: Bourlatskaya
Course not offered every year
Prerequisites: Russian 312 or placement exam.
Activity: Seminar
1.0 Course Unit
Notes: Conducted in Russian.

RUSS 419 Russian Song and Folklore
This course offers a general introduction to the history of Russian folklore, song and musical culture. Students will explore the history of song in Russia and various song genres including folk songs, gangster songs, cabaret, war songs, Soviet ideological songs, and Russian rock and pop music. We will discuss ritual functioning of songs in Russian calendar rites, examine the aesthetic properties of song lyrics and music, and analyze the educational, community-building and ideological roles of song in Russian society.
Taught by: Verkholantsev
Course not offered every year
Prerequisites: Russian 312 or placement exam.
Activity: Seminar
1.0 Course Unit
Notes: Conducted in Russian.

RUSS 420 Contemporary Russia Through Film
This course continues developing students' advanced skills in Russian and offers intensive study of Russian film, arguably the most powerful medium for reflecting changes in modern society. This course will examine Russia’s transition to democracy and market economy through the eyes of its most creative and controversial cinematographers. The course will focus on the often agonizing process of changing values and attitudes as the country moves from Soviet to Post-Soviet society. Russian films with English subtitles will be supplemented by readings from contemporary Russian media sources. The course provides an excellent visual introduction to the problems of contemporary Russia society.

Notes: Conducted in Russian.

RUSS 421 The Life and Art of Anton Chekhov
This course continues to develop students' advanced skills in Russian. Language work will be combined with an examination of the life and creative work of one of Russia's greatest writers, Anton Chekhov. Chekhov's prose and drama will be analyzed using the political, social and literary currents of his time as the background. This course will introduce students to the literary technique, poetics, and deeply humane worldview of Chekhov. Course materials will include short stories and drama, as well as some background readings. The advanced study of Russian language will have an emphasis on improving pronunciation, significantly expanding the vocabulary, mastering complicated grammatical and syntactic structures, and learning the basic conventions of academic discourse. As part of this course, students will be asked to write short response papers and some pieces of creative writing. Students will also produce a short film and stage a scene from a play. All class discussions and primary sources will be in Russian. Some secondary readings will be in English.
Activity: Seminar
1.0 Course Unit
Notes: Conducted in Russian.
RUSS 426 Chekhov: Stage & Screen
What's so funny, Mr. Chekhov? This question is often asked by critics and directors who still are puzzled with Chekhov's definition of his four major plays as comedies. Traditionally, all of them are staged and directed as dramas, melodramas, or tragedies. Should we cry or should we laugh at Chekhovian characters who commit suicide, or are killed, or simply cannot move to a better place of living? Is the laughable synonymous to comedy and the comic? Should any fatal outcome be considered tragic? All these and other questions will be discussed during the course. The course is intended to provide the participants with a concept of dramatic genre that will assist them in approaching Chekhov's plays as comedies. In addition to reading Chekhov's works, Russian and western productions and film adaptations of Chekhov's works will be screened. Among them are, Vanya on 42nd Street with Andre Gregory, and Four Funny Families. Those who are interested will be welcome to perform and/or direct excerpts from Chekhov's works.

RUSS 430 Nationalism and Ethnic Conflict in Film
This course studies the cinematic representation of civil wars, ethnic conflicts, nationalistic doctrines, and genocidal policies. The focus is on the violently violent developments that took place in Russia and on the Balkans after the collapse of the Soviet Bloc and were conditioned by the new geopolitical dynamics that the fall of communism had already created. We study media broadcasts, documentaries, feature films representing the Eastern, as well as the Western perspective. The films include masterpieces such as "Time of the Gypsies", "Underground", "Prisoner of the Mountains", "Before the Rain", "Behind Enemy Lines", and others.

1.0 Course Unit
Notes: Forms a part of the LPS Masters in Liberal Arts Program.

RUSS 432 Fate and Chance in Literature and Culture
In Fate and Chance in Literature and Culture, we will explore these two interrelated concepts in comparative perspective over a broad historical range. As a result, the students will learn how the philosophy of fate and chance has been reflected in works of different Russian authors and in different cultural and political environments. In Russian as well as Western systems of belief fate and chance represent two extreme visions of the universal order, or, perhaps, two diametrically opposed cosmic forces: complete determinism, on the one hand, and complete chaos or unpredictability, on the other. These visions have been greatly reflected by various mythopoetic systems. In this course, we will investigate religious and folkloric sources from a series of Russian traditions compared to other Indo-European traditions (Greek, East-European). Readings will include The Song of Prince Igor's Campaign, The Gambler by Dostoevsky, The Queen of Spades by Pushkin, Vj by Gogol, The Black Monk by Chekhov, The Fatal Eggs by Bulgakov, and more.

RUSS 455 The Living & the Dead: The Great Patriotic War in Russian Cultural Imagination
This course is dedicated to the 70th anniversary of the Great Patriotic War, 1941-45. Students will explore the cultural myth of the war, created in the 1960-80s. The materials will include literary texts, documentaries, photographs, and films. We will focus on three major themes of this myth: 1. moral strength and courage; 2. respect for Russia's military past; and 3. the rise of national consciousness.

Prerequisites: RUSS361 or comparable language experience.
Activity: Seminar
1.0 Course Unit

RUSS 460 Post-Soviet Russia in Film
This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. Film is arguably the most powerful medium for reflecting changes in modern society. This course will examine Russia's transition to democracy and market economy through the eyes of its most creative and controversial cinematographers. The course will focus on the often agonizing process of changing values and attitudes as the country moves from Soviet to Post-Soviet society. Russian films with English subtitles will be supplemented by readings from contemporary Russian media sources. The course provides an excellent visual introduction to the problems of contemporary Russia society.

RUSS 463 Fantasy, Science Fiction and Fantastic Imagination in Russian Culture
Explores masterpieces of Russian fantastic imagination from folklore and 19th century classics to 20th and 21st century dystopia, magic realism and science fiction. Readings include works by Nikolai Gogol, Mikhail Bulgakov, the Strugatsky brothers, and Victor Pelevin. Discussions focus on 1) the philosophical quest of Russian fantastic authors and their ideas about humanity; the meaning of existence, and human relationship with nature; 2) the texture of fantasy, including the absurd and surreal, the grotesque humor, and macabre irony.
Taught by: Najyrova

1.0 Course Unit
Notes: All lectures and readings in Russian.
RUSS 466 Russian Revolution
This course is a content-based course intended for students who speak Russian at home and seek to improve their command of formal and professional registers of the Russian language. Paying tribute to the centennial of the Russian Revolution, the course examines the sociopolitical milestone of the 20th century through the works of literature, art, music, film, and material culture that both refracted the revolutionary situation and responded to the revolutionary change. The course’s primary sources include works of Russian symbolist poets (e.g. Blok) and realist writers (e.g. Korolenko, Chekhov, Gorky, Andrei Platonov), the music of modernist composers, Soviet montage films, and the Soviet architecture of the International Style. The specific attention will be on the relationship between sociopolitical transformation and the raise of avant-garde movements in visual arts and poetry known as the artistic revolution (e.g. Khlebnikov, Maiakovskii, Kandinskii, Goncharova, Malevich, Chagall).
Taught by: Nazyrova

RUSS 467 Classic Russian Literature Today
This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. A study of classic Russian literature in the original. Readings will consist of some of the greatest works of 19th and 20th-century authors, such as Pushkin, Gogol, Tolstoy, Dostoevsky, and Bulgakov. Students will examine various forms and genres of literature, learn basic techniques of literary criticism, and explore the way literature is translated into film and other media. An additional focus of the course will be on examining the uses and interpretations of classic literature and elitist culture in contemporary Russian society. Observing the interplay of the “high” and “low” in Russian cultural tradition, students will develop methodology of cultural analysis.
Course not offered every year
Prerequisites: RUSS361 or comparable language competence.
Activity: Lecture
1.0 Course Unit
Notes: Conducted in Russian.

RUSS 471 Moscow: Cultural History
This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. An extraordinary diverse city, Moscow has acquired a number of names, referring both to its size and role in the national history: The Third Rome, The Whitestone One, The First Throne, The Forty Forties, The Hero City, and even The Big Village. In this course, students will examine the cultural history of the great city from 1147 to the present. The “itinerary” for this imaginary trip will include the Kremlin and the banyas, Saint Basil’s Cathedral and the Bolshoi Theater, the Ostankino Tower and the underground palaces of the Metro, the workers’ canteen and the dining rooms of the posh restaurants, etc. The course discussions will be centered on literary texts, travelers’ accounts, films, and works of art and architecture.
Course not offered every year
Prerequisites: RUSS361 or comparable language competence.
Activity: Seminar
1.0 Course Unit

RUSS 472 Moscow and Moscovites in Russian History and Literary Imagination
This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. Moscow is not only a city with rich history, but also a cultural myth, similarly to Rome, St. Petersburg or Paris. The memories of historical events and literary narratives, real and fictional biographies, existing and lost landmarks imbue the image of the city with multiple layers of meanings and symbolism. This course will examine the key components of Moscow myth: historical events and fictional stories that left their traces on the cultural map of Moscow throughout its history. We will also explore the material culture of the city: historic places, buildings, artifacts and locations that anchor historical memories and urban legends alike. The readings will include excerpts from Moscow chapters of such Russian classics, as Leo Tolstoy’s War and Peace, Mikhail Bulgakov’s Master and Margarita and Boris Pasternak’s Doctor Zhivago, along with the work of contemporary Russian authors Victor Pelevin and Maya Kucherskaya.

RUSS 518 Old Church Slavonic: History, Language, Manuscripts
The language that we know today as Old Church Slavonic (OCS) was invented, along with the Slavic alphabet(s), in the 9th century by two Greek scholars, Sts. Cyril and Methodius. They had been tasked by the Byzantine Emperor with bringing the Christian faith to the Slavic-speaking people of Great Moravia, a powerful medieval state in Central Europe. From there, literacy, along with the Christian faith, spread to other Slavs. OCS is thus the language of the oldest written texts of the Slavic-speaking world, which today is comprised of the following languages: Belarusian, Bosnian, Bulgarian, Croatian, Czech, Macedonian, Montenegrin, Russian, Polish, Slovak, Serbian, Slovene, and Ukrainian. Therefore, knowledge of OCS aids in understanding the cultural, literary, and linguistic history of any modern Slavic language. For learners of Russian and other Slavic languages, OCS provides a layer of elevated stylistic vocabulary and conceptual terminology, similar to, and even greater than, the role of Latin and Greek roots in the English language. For historical linguists, OCS provides valuable material for comparison with other ancient Indo-European languages, such as Latin, Greek, and Sanskrit. This course introduces students to the basics of OCS, as well as to the cultural and historical circumstances of the emergence of Slavic literacy and its material culture - manuscripts. It is suitable for both undergraduate and graduate students.

RUSS 549 Stalinist Culture
In the Soviet Union in the late 1920s the dynamic cultural life of the revolutionary era, characterized by avant-gardism, experimentation, and diversity, gave way to a new organization of Soviet cultural life-one dominated by the newly formulated official style of "Socialist Realism" and bureaucratic institutions such as the Soviet Writers Union. In this course we will study the conditions that gave rise to this new era, its institutional realities, and masterworks in film, photography and literature of official art, including those by Kavelin, Pasternak and Eisenstein. We will also examine the social phenomena of cultural resistance and non-conformism of this period and its works written "for the drawer" or for non-official consumption, such as those of Akhmatova, Mandelstam, Bulgakov, Kharms and Druskin.
Taught by: Platt/Staff
Course not offered every year
Also Offered As: COML 550
Activity: Seminar

RUSS 575 Russian History in Film
The course draws on the cinematic/fictional representation of the Russian/Soviet history based on Russian as well as non-Russian sources. The analysis targets major modes of imagining, staging and reenacting history, construction of images that satisfy dominant political, cultural and ideological stereotypes, and help create national identities. Bias, eye-witness accounts, propaganda uses and abuses of history, forgeries and the production of alt-facts become topics of particular interest. The discussions involve nation builders, iconic heroes and charismatic antiheroes, great commanders and revolutionaries such as Alexander Nevsky, Ivan the Terrible, Rasputin and the Fall of the Romanovs, Lenin and the October Revolution, Stalin and the construction of the Soviet Colossus, the Storming of the Winter Palace, the Civil War, the Great Purge, the Red Scare in the US, etc.

Sanskrit (SKRT)
SKRT 460 Sanskrit 1st Year, Part I
During the first semester of beginning Sanskrit, students will be introduced to the script, phonetics, and grammar of the Sanskrit language. By the end of the semester they will be able to begin to read Sanskrit texts and compose Sanskrit sentences in addition to carrying out simple conversation. They will build the requisite skills to read, by the second semester, simple inscriptions and sections from texts like the Ramayana, the Mahabharata, the Bhagavad Gita, Pancatantra, and Yoga Sutra. Students will also be introduced to many features of Sanskrit culture.

Science, Technology & Society (STSC)

STSC 001 Emergence of Modern Science
During the last 500 years, science has emerged as a central and transformative force that continues to reshape everyday life in countless ways. This introductory course will survey the emergence of the scientific world view from the Renaissance through the end of the 20th century. By focusing on the life, work, and cultural contexts of those who created modern science, we will explore their core ideas and techniques, where they came from, what problems they solved, what made them controversial and exciting and how they relate to contemporary religious beliefs, politics, art, literature, and music. The course is organized chronologically and thematically. In short, this is a "Western Civ" course with a difference, open to students at all levels.
For BA Students: Hum/Soc Sci or Nat Sci/Math Sector
Taught by: Kucuk
Course usually offered in fall term
Also Offered As: HSOC 001
Activity: Lecture
1.0 Course Unit
STSC 002 Medicine in History
This course surveys the history of medical knowledge and practice from antiquity to the present. No prior background in the history of science or medicine is required. The course has two principal goals: (1) to give students a practical introduction to the fundamental questions and methods of the history of medicine, and (2) to foster a nuanced, critical understanding of medicine's complex role in contemporary society. The course takes a broadly chronological approach, blending the perspectives of the patient, the physician, and society as a whole—recognizing that medicine has always aspired to "treat" healthy people as well as the sick and infirm. Rather than history "from the top down" or "from the bottom up," this course sets its sights on history from the inside out. This means, first, that medical knowledge and practice is understood through the personal experiences of patients and caregivers. It also means that lectures and discussions will take the long-discredited knowledge and treatments of the past seriously, on their own terms, rather than judging them by today's standards. Required readings consist largely of primary sources, from elite medical texts to patient diaries. Short research assignments will encourage students to adopt the perspectives of a range of actors in various historical eras.
For BA Students: History and Tradition Sector
Taught by: Barnes
Course usually offered in fall term
Also Offered As: HIST 036, HSOC 002
Activity: Lecture

STSC 003 Technology & Society
Technology plays an increasing role in our understandings of ourselves, our communities, and our societies, in how we think about politics and war, science and religion, work and play. Humans have made and used technologies, though, for thousands if not millions of years. In this course, we will use this history as a resource to understand how technologies affect social relations, and conversely how the culture of a society shapes the technologies it produces. Do different technologies produce or result from different economic systems like feudalism, capitalism, and authoritarianism? Can specific technologies promote democratic or authoritarian politics? Do they suggest or enforce different patterns of race, class, or gender relations? Among the technologies we'll consider will be large objects like cathedrals, bridges, and airplanes; small ones like guns, clocks, and birth control pills; and networks like the electrical grid, the highway system, and the internet.
For BA Students: Society Sector
Taught by: Benson
Course usually offered in spring term

Activity: Lecture
1.0 Course Unit

STSC 026 Philosophy of Space and Time
This course provides an introduction to the philosophy and intellectual history of space-time and cosmological models from ancient to modern times with special emphasis on paradigm shifts, leading to Einstein's theories of special and general relativity and cosmology. Other topics include Big Bang, black holes, stellar structure, the metaphysics of substance, particles, fields, and superstrings, unification and grand unification of modern physical theories. No philosophy of physics background is presupposed.
For BA Students: Natural Science and Math Sector
Taught by: Skillings
One-term course offered either term
Also Offered As: PHIL 026
Activity: Lecture
1.0 Course Unit

STSC 110 Science and Literature
Science fiction has become the mythology of modern technological civilization, providing vivid means for imagining (and proclaiming) the shape of things to come. This interdisciplinary seminar will consider SF in multiple manifestations—literature, film and TV shows, visual art and architecture. We will debate how the genre has shaped ideas about scientific knowledge, the position of humans in the universe, and our possible futures by examining themes including time travel, robots and androids, alien encounters, extraterrestrial journeys, and the nature of intelligent life. This seminar will consider SF from the perspective of the history of science and technology, critically and comparatively, with a primary focus on social and cultural contexts in addition to literary aspects.
For BA Students: Arts and Letters Sector
Taught by: Rider
Course not offered every year

One-term course offered either term
Also Offered As: ENGL 158
Activity: Seminar
1.0 Course Unit

STSC 123 Darwin's Legacy: The Evolution of Evolution
Darwin's conceptions of evolution have become a central organizing principle of modern biology. This lecture course will explore the origins and emergence of his ideas, the scientific work they provoked, and their subsequent re-emergence into modern evolutionary theory. In order to understand the living world, students will have the opportunity to read and engage with various classic primary sources by Darwin, Mendel, and others. The course will conclude with guest lectures on evolutionary biology today, emphasizing current issues, new methods, and recent discoveries. In short, this is a lecture course on the emergence of modern evolutionary biology—its central ideas, their historical development and their implications for the human future.
For BA Students: Living World Sector
Taught by: Gil-Riano

STSC 135 Modern Biology and Social Implications
This course covers the history of biology in the 19th and 20th centuries, giving equal consideration to three dominant themes: evolutionary biology, classical genetics, and molecular biology. The course is intended for students with some background in the history of science as well as in biology, although no specific knowledge of either subject is required. We will have three main goals: first, to delineate the content of the leading biological theories and experimental practices of the past two centuries; second, to situate these theories and practices in their historical context, noting the complex interplay between them and the dominant social, political, and economic trends; and, third, to critically evaluate various methodological approaches to the history of science.

1.0 Course Unit

STSC 145 Comparative Medicine
This course explores the medical consequences of the interaction between Europe and the "non-West." It focuses on three parts of the world Europeans colonized: Africa, South Asia, and Latin America. Today's healing practices in these regions grew out of the interaction between the medical traditions of the colonized and those of the European colonizers. We therefore explore the nature of the interactions. What was the history of therapeutic practices that originated in Africa or South Asia? How did European medical practices change in the colonies? What were the effects of colonial racial and gender hierarchies on medical practice? How did practitioners of "non-Western" medicine carve out places for themselves? How did they redefine ancient traditions? How did patients find their way among multiple therapeutic traditions? How does biomedicine take a different shape when it is practiced under conditions of poverty, or of inequalities in power? How do today's medical problems grow out of this history? This is a fascinating history of race and gender, of pathogens and conquerors, of science and the body. It tells about the historical and regional roots of today's problems in international medicine.

STSC 160 The History of the Information Age
Certain new technologies are greeted with claims that, for good or ill, they must transform our society. The two most recent: the computer and the Internet. But the series of social, economic and technological developments that underlie what is often called the Information Revolution include much more than just the computer. In this course, we explore the history of information technology and its role in contemporary society. We will explore both the technologies themselves—calculating machines, punched card tabulators, telegraph and telephone networks, differential analyzers, digital computers, and many others—and their larger social, economic and political contexts. To understand the roots of these ideas we look at the prehistory of the computer, at the idea of the post-industrial or information society, at parallels with earlier technologies and at broad historical currents in the United States and the world.

STSC 162 Technology and Medicine in Modern America
Medicine as it exists in contemporary America is profoundly technological; we regard it as perfectly normal to be examined with instruments, to expose our bodies to many different machines; and to have knowledge produced by those machines mechanically/electronically processed, interpreted and stored. We are billed technologically, prompted to attend appointments technologically, and often buy technologies to protect, diagnose, or improve our health: consider, for example, HEPA-filtering vacuum cleaners; air-purifiers; fat-reducing grills; bathroom scales; blood pressure cuffs; pregnancy testing kits; blood-sugar monitoring tests; and thermometers. Yet even at the beginning of the twentieth century, medical technologies were scarce and infrequently used by physicians and medical consumers alike. Over the course of this semester, we will examine how technology came to medicine's center-stage, and what impact this change has had on medical practice, medical institutions and medical consumers - on all of us!
Taught by: Johnson
Course usually offered summer term only
Also Offered As: HSOC 152
Activity: Seminar
1.0 Course Unit

STSC 166 Environment and Society
This course examines contemporary environmental issues such as energy, waste, pollution, health, population, biodiversity and climate through a historical and critical lens. All of these issues have important material, natural and technical aspects; they are also inextricably entangled with human history and culture. To understand the nature of this entanglement, the course will introduce key concepts and theoretical frameworks from science and technology studies and the environmental humanities and social sciences.

1.0 Course Unit
STSC 178 Everyday Technologies and the Making of the Modern World

Long before iPhones and Fitbits, personal technologies - smallish, portable, purchasable - had a tremendous impact on the lives of people around the globe. Items such as wristwatches, bicycles, sewing machines, cars and radios could empower their users (or sometimes constrain them), creating economic, educational or recreational opportunities while also being associated with grander ideas and ideologies. This course will explore such everyday technologies across the nineteenth and twentieth centuries, in locations spanning the Americas, Europe, Africa and Asia. We will consider how the use and significance of particular technologies varied according to time and place; how these everyday items contributed to imperial and national identities and “self-fashioning” for individuals; and how, through use and modification, consumers themselves could become part of the story of technological change. In addition to reading a variety of classic and recent scholarship, students will work with a wide array of primary sources (newspapers, photographs, patent records, trade cards) and use digital tools to present their own research projects.

Taught by: Petrie
Course usually offered in fall term
Activity: Seminar
1.0 Course Unit

STSC 179 Environmental History

This course provides an introduction to environmental history—the history of the interrelationship between humans and the rest of nature. In the words of historian J.R. McNeill, “Human history has always and will always unfold within a larger biological and physical context, and that context evolves in its own right. Especially in recent millennia, that context has co-evolved with humankind.” In this course we will study the co-evolution between human actors and non-human actors in global history, analyzing political, social, cultural and economic factors that affect ideas about nature and material effects on nature. We will consider the concept of the Anthropocene and study current environmental changes and challenges.

Course not offered every year
Also Offered As: HSOC 179
Activity: Lecture
1.0 Course Unit

STSC 207 Agriculture & Science in the Pacific World

This course examines how agricultural science has shaped the modern world. It focuses on the lands touching the Pacific Ocean during the industrial era—from the late eighteenth century to the late twentieth century—to highlight how scientific knowledge of the natural world and regimes of agricultural production interacted to change spatial relations of power between distant places. We will explore the history of botany, chemistry, and entomology in the context of European and Euro-American exploration incursions into the Pacific. We will also explore the history of once-exotic but now commonplace things that sustain our existence, from sugar, rice, and palm oil to guano. In short, this course examines how ideas about nature, methods of converting nature into commodities, and nature itself all influence each other. Students will work throughout the semester to gain knowledge about the intersection of agriculture, science, and empire in the Pacific, while also developing and strengthening their ability to conduct historical research and produce original arguments.

STSC 208 Science and Religion: Global Perspectives

This survey course provides a thematic overview of science and religion from antiquity to the present. We will treat well-known historical episodes, such as the emergence of Muslim theology, the Galileo Affair and Darwinism, but also look beyond them. This course is designed to cover all major faith traditions across the globe as well as non-traditional belief systems such as the New Age movement and modern Atheism.

Taught by: Kucuk
Course not offered every year
Activity: Lecture
1.0 Course Unit

STSC 209 Race and Gender in Global Science

This course critically examines the creation of scientific conceptions of ‘race’ and ‘sex’ in the modern era and their global impact. How did ‘race’ and ‘sex’ come to be the primary categories through which human variation has been classified in the modern West? What concepts of “race” and “sex” did colonial scientists, doctors, naturalists, and other experts invent, and how and why did they do this? How have scientific conceptions of ‘race’ and ‘sex’ been adapted to fit the sociopolitical projects of formerly colonized regions? And how have recent developments in genomic science sought to reinvent these categories? With these questions in mind, this course challenges us to think critically about the political contexts in which conceptions of ‘race’ and ‘sex’ have been crafted as well as how they have been contested and re-defined.

**STSC 218 Climate Change: Science, Technology and Society**

Climate change is a sign that humans have become a force with planet-altering power. We need to understand how human societies work if we hope to respond to its dangers effectively. This course will use history to help students see climate change's social and political aspects. We'll examine how previous societies have responded to episodes of non-anthropogenic climate change, exploring market-based policies, power imbalances, and vulnerability. Through the history of science, we will investigate and critique how the growth of scientific knowledge often led climate change to be framed as a techno-scientific problem, best addressed through research and technological innovation. Students will learn how climate politics have been pushed by environmental and social justice activists, as well as by anti-communist scientists and corporate-sponsored cultivation of public doubt. Assignments will help students learn how to translate scholarly insights into engaging media that can reach various publics.

Taught by: Turner
One-term course offered either term
Activity: Seminar
1.0 Course Unit

**STSC 219 Race, Science, and Globalization**

This course examines how the practice of sorting humans into distinct races is connected to the rise of modern science and to the economic globalization sparked by Columbus' arrival in the Americas in 1492. By examining the trajectory of race in science from the Iberian conquest of the Americas until the present, we will examine the ways in which colonial logics and structures persist into the present and the ways they've been disrupted by various revolutionary, anti-colonial, and anti-racist movements. Along the way, we will observe how cultural ideas about race have been woven into the conceptual fabric of modern scientific disciplines such as anthropology, biology, psychology, and sociology and how these disciplines have sought to redeem themselves from their racist pasts.

One-term course offered either term
Also Offered As: HSOC 219

**STSC 252 Data and Death**

Digital tools and data-driven technologies increasingly permeate twenty-first century life. But how have they affected death? Do we conceive of death differently in a digitally mediated world? How do we mourn in the age of Facebook? How is "big data" put to work in the medical world that seeks to diagnose and treat fatal illness? What new forms of death and violence have been imagined or developed with digital technologies in hand? And what of those who believe that they could live forever, defying death, by uploading "themselves" into some new digital form? This course offers a historical exploration of these questions, looking at different intersections between data and death. We will work with a range of different sources ranging from science fiction to medical journals to the often-controversial death counts that follow natural and political disasters. Our goal will be to map the many contours of death in a digital world, but also to recognize the longer histories of counting, mourning, diagnosing, dreaming, and dying that have shaped them.

**STSC 260 Cyberculture**

Computers and the internet have become critical parts of our lives and culture. In this course, we will explore how people use these new technologies to develop new conceptions of identity, build virtual communities and affect political change. Each week we'll see what we can learn by thinking about the internet in a different way, focusing successively on hackers, virtuality, community, sovereignty, interfaces, algorithms and infrastructure. We'll read books, articles, and blogs about historical and contemporary cultures of computing, from Spacewar players and phone phreaks in the 1970s to Google, Facebook, World of Warcraft, WikiLeakse, and Anonymous today. In addition, we'll explore some of these online communities and projects ourselves and develop our own analyses of them.

Activity: Seminar
1.0 Course Unit

**STSC 270 Digital Democracy**

Technological infrastructure shapes what forms of political life are possible within a society. Political campaigns, investigative journalism, public engagement, protest, government - all unfold on different time scales, in different forms, and with different consequences depending on what machines mediate them. This course explores the forms of American political life that have taken shape in and through modern digital computing. We will investigate especially a perceived tension at the heart of computing technologies - from artificial intelligence to social media - as they have been introduced to so many corners of American political life: Are computing technologies agents of liberation, or of control? The internet, for example, was embraced by some as an inherently democratizing and liberating force, giving users equal access to voice and information. On the other hand, many feared the internet as an unprecedented platform for corporate and government surveillance and manipulation. This course will analyze and historicize this tension, looking to unpack the complex and controversial role of computers in American political life from the Cold War to @POTUS.

STSC 278 Prove It: Mathematics and Certainty
Mathematical knowledge is often held up as our most reliable and certain knowledge. The truths of mathematics serve as exemplars of certainty that are not tied to any specific time and place. Yet, throughout history, mathematics has been understood and practiced in quite different ways, for quite different reasons, and by quite different people. Mathematical certainty has been shaped by different beliefs and practices. Mathematicians and their work have been shaped by rich interactions with different dimensions of social life from religion and politics to architecture and war. Mathematics is not simply surrounded by a society external to it, it is an integral and complex part of it. What concerns have motivated mathematical research through history? How has mathematics been put to work in different domains of culture? What does it mean to be a mathematician in different times and places? Does mathematical knowledge bear traces of the conditions in which it was produced? What counts as proof and to whom? How do we reconcile the changing character of mathematical research with the traditional understanding of mathematical knowledge as time and place independent? This course takes up these questions by looking to different worlds in which mathematics and mathematical certainty have taken shape.

STSC 279 Nature's Nation: Americans and Their Environment
The United States is "nature's nation." Blessed with an enormous, resource-rich geographically diverse and sparsely settled territory, Americans have long seen "nature" as central to their identity, prosperity, politics and power, and have transformed their natural environment accordingly. But what does it mean to be "nature's nation? This course describes and explores how American "nature" has changed over time. How and why has American nature changed over the last four centuries? What have Americans believed about the nation's nature, what have they known about the environment, how did they know it and how have they acted on beliefs and knowledge? What didn't or don't they know? How have political institutions, economic arrangements, social groups and cultural values shaped attitudes and policies? How have natural actors (such landscape features, weather events, plants, animals, microorganisms) played roles in national history? In addition to exploring the history of American nature, we will look for the nature in American history. Where is "nature" in some of the key events of American history that may not, on the surface, appear to be "environmental?" How and why has American nature changed over the last four centuries? What have Americans believed about the nation's nature, what have they known about the environment, how did they know it and how have they acted on beliefs and knowledge? What didn't or don't they know? How have political institutions, economic arrangements, social groups and cultural values shaped attitudes and policies? How have natural actors (such landscape features, weather events, plants, animals, microorganisms) played roles in national history? STSC 289 Technologies of Self and Society
As European empires expanded in the late eighteenth century, "social science" began to emerge in the lexicons of Western societies. Since these early beginnings in European imperialism, the social sciences have sought to represent, alter, and govern human existence while struggling to define "society" as something separate from "nature". This class examines how questions concerning the proper management of self and society are central to the ambitions and dilemmas of modern social sciences. We begin by tracing the origins of social science in late-eighteenth century thought and their professionalization in the nineteenth century. Continuing through to the twentieth century, we will observe how core social science disciplines like sociology, anthropology, and psychology attempted - in the name of anti-racism - to carve out distinct niches in opposition to biology and genetics. The course also examines the dramatic growth of the social sciences during the cold war period thanks to military funds. Our examination of cold war social science will focus on how social scientists began carving up the world into different "areas" of study and how they became increasingly oriented towards re-making individual psyches and societies in the "third world" to fit the image of an industrialized "West". The course will conclude by examining calls from indigenous scholars and scholars in the global South to decolonize social science.

STSC 313 The Universe: Historical Inquiries in Physics, Philosophy and Religious Belief
The National Science Foundation's decadal review states that "Today, astronomy expands knowledge and understanding, inspiring new generations to ask, How did the universe form and the stars first come into being? Is there life beyond Earth? What natural forces control our universal destiny? Because of the remarkable scientific progress in recent decades, in particular the explosion over the last decade of interest in and urgency to understand several key areas in astronomy and astrophysics, scientists are now poised to address these and many other equally profound questions in substantive ways. The opportunities for the future fill us with awe, enrich our culture, and frame our view of the human condition." Undergraduates today encounter some of the most profound discoveries about the physical universe -- discoveries of dark energy, quantum theory, exoplanets. These discoveries also prompt some of the most profound philosophical and theological questions. This course interrogates the astrophysical sciences and traditions of philosophy and religious belief in order to explore the universe, its nature, origins and destiny. It serves as an introductory course for undergraduates who are seeking a historical and philosophical context to scientific studies, especially in physics, and/or to develop their interdisciplinary skills of global thinking. This course does not attempt to resolve perennial questions about the universe, but rather to expose historical and scientific ways of reflecting on them.

1.0 Course Unit

STSC 317 Images in Science
Pictures, diagrams, graphs, and (more recently) computer images are ubiquitous in modern science. Visualizations are crucial in the process of research; for communicating evidence, theories, and experiments to other scientists; and for transmitting scientific ideas to the public. But serious questions about the validity of using images to convey knowledge about nature have been raised from the earliest natural philosophers onwards, and understanding precisely what any particular scientific image does can be surprisingly difficult. In this class we will investigate, as historical and cultural artifacts, images related to the generation or transmission of knowledge about nature, knowledge that has claims to a privileged epistemological status. The focus will be on three kinds of visual depictions: images of the macrocosm (the universe as a whole), images of the microcosm (the body and its parts), and the visualization of theories and data. What are the material and technological conditions underlying these images? What can the images we examine tell us about the communities and societies, including our own, in which they were created? What do they reveal about the nature of the scientific enterprise, about the relationship between the sensible world and the mind, and about ideals concerning truth, objectivity, and morality?

STSC 338 Hybrid Science: Nature, health, and society in Latin America
What role did science and medicine play in the creation and growth of the Spanish and Portuguese empires? And why was the creation of science and health institutions crucial to the revolutionary movements for independence in Latin America? This course examines science and medicine in Latin America by attending to the ways that knowledge of nature and health has been central to the political struggles of the countries in this region. A crucial dynamic shaping the history and culture of this region is the interplay between the healing practices and cosmologies of European settlers, indigenous Americans, and the descendants of African slaves. Bearing this interplay in mind, this course explores how Latin America has been a fertile site of scientific creativity. It also examines the ways in which Latin American scientists and medical experts have refashioned concepts and practices from Europe and North America to fit local circumstances.

STSC 367 The Many Lives of Data: Population, Environment, and Planning in the United States
This is a class about the live(s) and afterlives of information from 1850 to the present. Not only can information be reproduced (in a variety of material conditions); it can be repurposed and funneled through a variety of different applications, some of them serving radically different purposes than the first purpose of gathering it. Thoreau's journals of plant flowering, for instance, have become important indicators of climate change. More controversial is the sale of biomedical information by personal genomics services for drug discovery, or the construction of forensic databases consisting of the DNA of suspects arrested as a result of racial profiling. We will study the ways in which data has become a way for us to understand and define change, stability, place, and time, beginning in the mid-nineteenth century, a period of accelerated and increasingly systematic gathering of data, particularly medical, forensic, and environmental data. The class will proceed both chronologically and thematically in three units, from the gathering and use of biomedical data as a way to make patient populations "legible" (to borrow from James Scott), to data as a way to make the environment understandable, and finally to data as a tool for producing and reproducing social relations. As a final project, students will trace a particular data set from its original gathering to its latest usage. Students will also have an opportunity to create their own course content in the final three weeks of class.

STSC 369 Animals in Science Medicine Technology
This course explores human-animal relationships: the wide range of these relationships, why they originated and how they have changed over time. How have humans classified, valued, utilized, consumed, behaved toward and understood animals? Where is the boundary between humans and other animals, and how do we know, since humans are also animals? How is that boundary been maintained and redefined? Are humans part of the animal "natural" world- or apart from it? How are humans similar to and different from other kinds of animals? How do we know about animals and what is it we know? To what extent are questions about animals really questions about humans? How has the meaning of animal changed over time? The course focuses in particular to the roles and relationships of animals within science and medicine, and as biotechnologies.

1.0 Course Unit
STSC 381 Toxicity in Context
We live amidst a constant stream of messages, practices, and regulations about things, behaviors, or relationships deemed “toxic.” Within environmental health in particular, all sorts of actors grapple with complex decisions about what it means to live with materials and anticipate the ways they can interact with human health and the environment - at present through the distant future. What exactly do we mean when we categorize some substances as toxic, and by extension others as safe? Are there other ways of managing uncertainty or conceptualizing harm? How are these concepts built into broader social structures, economics, and regulations? What other work are they used to do? In this course, we will explore major social science approaches to toxicity and apply these theories to our own analysis of examples from the contemporary United States, and in particular, to a robust oral history collection with residents, developers, and government scientists grappling with these questions just outside of Philadelphia. This course grows out of scholarship in the history and anthropology of environmental risk, and health, as well as direct ethnographic, historical, and oral history research at a site outside of Philadelphia grappling with the meaning of materials that remain on site after past industrial manufacturing. In this course, students will gain an introduction to oral history and analysis of in-depth interviews, and introduction to key approaches in theorizing toxicity. By connecting life experiences of residents, government scientists and others, at an actual site, with the literatures we engage in class, students will think critically about the ways the literatures we engage do and do not fully encompass the experiences and concerns that are intertwined with toxicity for actual people grappling with making sense of uncertain harms amidst urban planning.

STSC 400 Undergraduate Seminar in Science Technology and Society
This is a capstone seminar for STSC majors, and a required seminar for any STSC junior who wishes to write a senior thesis for honors in the major. It is designed to provide the tools necessary to undertake original research by guiding students through the research and writing process. Students will produce either a polished proposal for a senior thesis project, or a completed research paper by the end of the term. Although each student will work on a different topic, the class will focus on general aspects of historical, and social scientific research and guide students through a close reading of key texts in science and technology studies. Course usually offered in spring term
Activity: Seminar
1.0 Course Unit

STSC 411 Sports Science Medicine Technology
Why did Lance Armstrong get caught? Why do Kenyans win marathons? Does Gatorade really work? In this course, we won’t answer these questions ourselves but will rely upon the methods of history, sociology, and anthropology to explore the world of the sport scientists who do. Sport scientists produce knowledge about how human bodies work and the intricacies of human performance. They bring elite (world-class) athletes to their laboratories or their labs to the athletes. Through readings, discussions, and original research, we will find out how these scientists determine the boundary between “natural” and “performance-enhanced,” work to conquer the problem of fatigue, and establish the limits and potential of human beings. Course themes include: technology in science and sport, the lab vs. the field, genetics and race, the politics of the body, and doping. Course goals include: 1) reading scientific and medical texts critically, and assessing their social, cultural, and political origins and ramifications; 2) pursuing an in-depth The course fulfills the Capstone requirement for the HSOC/STSC majors. Semester-long research projects will focus on “un-black-boxing” the metrics sport scientists and physicians use to categorize athletes’ bodies as “normal” or “abnormal.” For example, you may investigate the test(s) used to define whether an athlete is male or female, establish whether an athlete’s blood is “too” oxygenated, or assess whether an athlete is “too” fast (false start). Requirements therefore include: weekly readings and participation in online and in-class discussions; sequenced research assignments; peer review; and a final 20+page original research paper and presentation.

STSC 436 Biopiracy: Medicinal Plants and Global Power
Biopiracy has emerged as the name of conflict between multinational pharmaceutical companies attempting to get genetic patents on medicinal plants and indigenous communities in the Global South who have long known and used these plants for medicinal purposes. Today the story of Biopiracy is an unfolding story of plants, patents and power. The extraction and commercial exploitation of plants and knowledge about them from the Global South however is not new. It has been happening at increasing pace for at least the last two centuries. Both the anti-malarial drug quinine and the cancer drug vincristine for instance have their plant-origins in the Global South where local communities used them medicinally long before their discovery by biomedicine. This course will put the current debates around Biopiracy in context and explore how the entanglements of plants and power have changed or not changed.
Taught by: Mukharji
Course not offered every year
Also Offered As: HSOC 436
Activity: Seminar

STSC 482 Invisible Labor in the Human Sciences
This course looks at those disciplines that take people as their subjects of research—including biology and biomedicine as well as anthropology, linguistics, and sociology—to explore the contributions of a wide range of research participants. We will focus on the sciences of human behavior, information, and medicine to analyze the labors of behind-the-scenes actors including tissue donors, survey respondents, student subjects, patients, translators, activists, ethics review boards, data curators, and archivists. Our job will be to analyze the experiences of these technoscientific laborers with a view to systems of knowledge and power in the production and maintenance of Knowledge about humans and their bodies.

SCMP 559 Multiscale Modeling of Chemical Systems
This course provides theoretical, conceptual, and hands-on modeling experience on three different length and time scales - (1) electronic structure (A, ps); (2) molecular mechanics (100A, ns); and (3) deterministic and stochastic approaches for microscale systems (um, sec). Students will gain hands-on experience, i.e., running codes on real applications together with the following theoretical formalisms: molecular dynamics, Monte Carlo, free energy methods, deterministic and stochastic modeling.
Course not offered every year
Also Offered As: BE 559, CBE 559
Prerequisites: Undergraduate courses in numeral analysis and statistical mechanics.
Activity: Lecture
1.0 Course Unit

SCMP 597 Master’s Thesis Research
For students working on advanced research leading to the completion of a master’s thesis.
One-term course offered either term
Activity: Masters Thesis
1.0 Course Unit

SCMP 599 Master’s Independent Study
For Scientific Computing master’s students. Involves coursework and class presentations. The project will invariably include formally gradable work comparable to that of a CIS 500 level course. Students should discuss with the faculty supervisor the scope of the independent study, expectations, work involved, etc.
One-term course offered either term
Activity: Independent Study
1.0 Course Unit

Scientific Processes (SPRO)

SPRO 100 Scientific Reasoning
Whether you are preparing for a degree concentration in the sciences or planning to specialize in creative pursuits, every course of study benefits from knowledge of scientific reasoning and logic. This introductory course provides an overview of the sources, tools, and history of scientific knowledge. Contextualizing products of scientific research such as theories, models, and laws of nature, the course examines the methods of producing scientific knowledge and explores how science is affected by questions of values, religion, objectivity, and public opinion. You also learn and practice the tools used to generate knowledge, including logic and probability.

SLAV 500 History of Literary Theory
Over the last three decades, the fields of literary and cultural studies have been reconfigured by a variety of theoretical and methodological developments. Bracing and often confrontational dialogues between theoretical and political positions as varied as Deconstruction, New Historicism, Cultural Materialism, Feminism, Queer Theory, Minority Discourse Theory, Colonial and Post-colonial Studies and Cultural Studies have, in particular, altered disciplinary agendas and intellectual priorities for students embarking on the professional study of literature. In this course, we will study key texts, statements and debates that define these issues, and will work towards a broad knowledge of the complex rewriting of the project of literary studies in process today. The reading list will keep in mind the Examination List in Comparative Literature we will not work towards complete coverage but will ask how crucial contemporary theorists engage with the longer history and institutional practices of literary criticism. There will be no examinations. Students will make one class presentation, which will then be reworked into a paper (1200-1500 words) to be submitted one week after the presentation. A second paper will be an annotated bibliography on a theoretical issue or issues that a student wishes to explore further. The bibliography will be developed in consultation with the instructor, it will typically include three or four books and six to eight articles or their equivalent. The annotated bibliography will be prefaced by a five or six page introduction; the whole will add up to between 5000 and 6000 words of prose. Students will prepare position notes each week, which will either be posted on a weblog or circulated in class.

SLAV 501 Elementary Polish I
This course is for students who want to acquire the linguistic skills necessary for communication in everyday situations and that would constitute a solid base for further study of the Polish language. In addition students will become acquainted with various aspects of Polish culture (including Polish films), history and contemporary affairs. Students will learn through classroom exercises based on a modern textbook, completion of individual and group assignments and work with various audio and video materials. The textbook Hurra - Po Polsku 1 is written in the spirit of the communicative approach, which makes it possible to communicate from the very beginning of the learning process. The special attention, however, will be paid on systematic development of all language skills: listening, reading, speaking and writing.
For BA Students: Language Course
Taught by: Dziedzic
Two terms. student may enter either term.
Prerequisites: No prerequisite.
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 502 Elementary Polish II
This course is a continuation of the SLAV501. This is for students who want to acquire the linguistic skills necessary for communication in everyday situations and that would constitute a solid base for further study of the Polish language. In addition students will become acquainted with various aspects of Polish culture (including Polish films), history and contemporary affairs. Students will learn through classroom exercises based on a modern textbook, completion of individual and group assignments and work with various audio and video materials. The textbook Hurra - Po Polsku 1 is written in the spirit of the communicative approach, which makes it possible to communicate from the very beginning of the learning process. The special attention, however, will be paid on systematic development of all language skills: listening, reading, speaking and writing.
For BA Students: Language Course
Taught by: Dziedzic
Two terms. student may enter either term.
Prerequisites: SLAV 501 or Instructor's permission.
Activity Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 503 Intermediate Polish I
This is a first-semester intermediate-level language course that emphasizes the development of the four basic skills (reading, writing, listening, and speaking) within a culturally based context. Class time will focus on communicative activities that combine grammatical concepts, relevant vocabulary, and cultural themes. Students will learn through classroom exercises based on a modern textbook: Hurra Po Polsku 2, completion of individual and group assignments and work with various audio and video materials. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the Polish cases; the aspect of the verbs, the development of writing skills.
For BA Students: Language Course
Taught by: Wolski-Moskoff
Two terms. student may enter either term.
Prerequisites: SLAV 502 or placement exam.
Activity Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 504 Intermediate Polish II
This course is a continuation of the SLAV503 680. This is a second-semester intermediate-level language course that emphasizes the development of the four basic skills (reading, writing, listening, and speaking) within a culturally based context. Class time will focus on communicative activities that combine grammatical concepts, relevant vocabulary, and cultural themes. Students will learn through classroom exercises based on a modern textbook: Hurra Po Polsku 2, completion of individual and group assignments and work with various audio and video materials. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the Polish cases; the aspect of the verbs, the development of writing skills.
For BA Students: Last Language Course
Taught by: Wolski-Moskoff
Two terms. student may enter either term.
Prerequisite: SLAV 503 or placement
Activity Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center.
SLAV 505 Polish for heritage speakers I.
The course is addressed to students who have spoken Polish at home and seek to achieve proficiency in the language. The main goal of this course is to provide instruction directed at students continued development of existing competencies in the Polish language. Students will acquire skills that range from learning grammar and spelling, and developing vocabulary, to interpretation and analysis of different literary genres. Students will explore a broad variety of cultural themes. Topics will include: Polish literature - classic and modern, social life, contemporary affairs and films. Upon completion of the Polish for Heritage Speakers course, students are expected to confidently understand, read, write and speak Polish with an increased vocabulary and a better command of Polish grammar. They will increase their reading skills through interpretation and analysis of different Polish literary genres. Students will be able to organize their thoughts and write in a coherent manner. They will increase their writing skills by writing personal essays, compositions and others. Students will further their knowledge of the Polish language and will engage in class discussion on various topics. Students will gain a better understanding of the Polish culture.
For BA Students: Language Course
Taught by: Dziedzic
Course not offered every year
Prerequisite: Instructor permission required
Activity: Lecture
1.0 Course Unit
Notes: STUDENTS WHO COMPLETE TWO SEMESTERS OF THIS COURSE SATISFY THE PENN LANGUAGE REQUIREMENT. Polish is used exclusively in the classroom.

SLAV 506 Polish for Heritage Speakers II
Continuation of SLAV505
For BA Students: Last Language Course
Taught by: Dziedzic
Course not offered every year
Prerequisites: SLAV505 or placement test.
Activity: Lecture
1.0 Course Unit

SLAV 530 Elementary Czech I
An introduction to the fundamentals of the Czech language, acquisition of conversational, reading and writing skills.
For BA Students: Language Course
Two terms. student may enter either term.
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 531 Elementary Czech II
Continuation of SLAV 530
For BA Students: Language Course
Taught by: Stejskal
Two terms. student may enter either term.
Prerequisite: SLAV 530 or Placement
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 532 Intermediate Czech I
Emphasis on vocabulary building, conversation and reading skills. Grammar review.
For BA Students: Language Course
Taught by: Stejskal
Two terms. student may enter either term.
Prerequisite: SLAV 531 or Placement
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 533 Intermediate Czech II
Continuation of SLAV 532
For BA Students: Last Language Course
Taught by: Stejskal
Two terms. student may enter either term.
Prerequisite: SLAV 532 or Placement
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 575 Slavic Literary Theory in Western Context
This course will compare selected theoretical concepts advanced by Russian Formalists, Prague Structuralists, and the Bakhtin group (e.g., defamiliarization, aesthetic sign, dialogue) with similar or analogous notions drawn from Western intellectual tradition.
Taught by: Steiner
Also Offered As: COML 579
Activity: Seminar
1.0 Course Unit

SLAV 590 Elementary Ukrainian I
An introduction to the fundamentals of the Ukrainian language, acquisition of conversational, reading and writing skills. This course is designed for students who have no or little background in studying Ukrainian. Students will be able to develop the base for the further study of the Ukrainian language. This course provides a comprehensive introduction to modern Ukrainian language and culture for those who would like to speak Ukrainian or use the language for reading and research. The course stresses all four major communicative skills (speaking, listening comprehension, reading, writing).
For BA Students: Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center.
SLAV 591 Elementary Ukrainian II
Continuation of SLAV 590. During the second semester, the students will learn and practice each case in the context of the real-life situations. In addition, students will become acquainted with various aspects of Ukrainian culture and traditions with special focus on the festive customs (i.e. Christmas and Easter culture in Ukraine). The course stresses all four major communicative skills (speaking, listening comprehension, reading, writing) and is a solid foundation for learning Ukrainian in future.
For BA Students: Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Prerequisite: SLAV 590 or Placement
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center

SLAV 592 Intermediate Ukrainian I
This is a first-semester intermediate-level Ukrainian language course which is designed to make students practice reading, speaking and writing in Ukrainian. Current issues of Ukrainian newspapers, especially the weekly, will serve as the basic source for the study of the contemporary Ukrainian idiom. Reading, translation and discussion of featured articles on such topics as business, education, politics, science, sports et al. including advertising and horoscope style and terminology will not only be used to hone the language skills and build up vocabulary but also to acquaint the student with the latest linguistic developments in Ukraine, such as the loan-words and loan-translations, abbreviations and acronyms, ancient folk proverbs and sayings as well as contemporary technical terms.
For BA Students: Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Prerequisite: SLAV 591 or placement test.
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center

SLAV 593 Intermediate Ukrainian II
This second-semester intermediate-level Ukrainian language is the continuation of the SLAV 592. Students will be able to practice reading, listening, writing and speaking Ukrainian more in the context of Ukrainian history politics, and culture. Students will be provided with the newspapers in Ukrainian and other authentic materials that will be the basis of both the classroom discussions and homework.
For BA Students: Last Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Prerequisite: SLAV 592 or Placement
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center

SLAV 594 Advanced Ukrainian I
This advanced Ukrainian course is addressed to the students who have taken SLAV592 and SLAV593 or can already speak and read Ukrainian. The course emphasizes on the advanced vocabulary building, conversation and reading skills. It also includes the advanced grammar review with the use of Ukrainian grammar terms. Students will learn more about Ukrainian literature, history, and modern life through the authentic materials, poems and parts literature extracts.
For BA Students: Advanced Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Prerequisite: SLAV 593 or Placement
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center

SLAV 595 Advanced Ukrainian II
Continuation of SLAV 594. The course focuses on all the language skills (reading, writing, speaking, listening) on the level with the use of the authentic materials mostly from Ukrainian literature and newspapers. Students will work on reading one of the modern Ukrainian plays to be able to perform it at the end of the course. This course is a good foundation for doing the research in Ukrainian or working or studying in Ukraine.
For BA Students: Advanced Language Course
Taught by: Rudnytzky
Two terms. student may enter either term.
Prerequisite: SLAV 594 or Placement
Activity: Lecture
1.0 Course Unit
Notes: Offered through the Penn Language Center

SLAV 619 East & West in Medieval Europe: Bohemia as Center in the Age of the Luxemburgs
The seminar will examine a range of topics in Medieval Studies viewing European medieval civilization as encompassing the whole ("global") geographic and cultural space of Europe and ignoring reference to contemporary socio-political division of Europe into "Western" and "Eastern." As a case study, the course focuses on the 14th-century Holy Roman Empire from Henry VII to the Emperor Sigismund, and particularly on the reign of Charles IV, in a context in which Prague becomes the imperial capital and Bohemia a center of Europe. A detailed examination of this monarch's vision of a "Global Europe" will allow us to explore a network of connections, a network that stretches from Prague to the farthest western, eastern and southern corners of the European continent. We will examine correspondences and differences between various linguistic, textual, political, and religious communities, while attempting to show how Latin and Slavic European cultures were interwoven. Some of the titles from the reading list are Charles IV’s The Life of St. Wenceslas and Autobiography, The Golden Bull, Dante’s Letters & Monarchia, Machaut’s Judgement of the King of Bohemia, Petrarch’s Epistolae & Poems, Froissart’s Prison of Love, Johannes von Tepi’s The Plowman of Bohemia, The Life of St. Constantin the Philosopher, fragments from Czech, French, Italian, Polish, Hungarian and Rus medieval chronicles, etc. All reading will be done in English, with original language versions always available.
Taught by: Brownlee and Verkholantsev
Course not offered every year
Also Offered As: COML 619, FREN 619, HIST 619
Activity: Seminar
1.0 Course Unit
SLAV 653 Topics in Russian and Soviet Cultural History
Course is topical. Please see department for most recent description.
Course not offered every year
Activity: Seminar
1.0 Course Unit

Social Work (SWRK)

SWRK 593 Design Thinking for Social Impact
Thinking like a designer can transform the way people and organizations develop products, services, processes, and strategy. This approach, called design thinking, brings together what is desirable from a human point of view with what is technologically feasible and economically viable. It also allows people who aren't trained as designers to use creative tools to address a vast range of challenges. Design thinking is a deeply human process that taps into abilities we all have but get overlooked by more conventional problem-solving practices. It relies on our ability to be intuitive, to recognize patterns, to construct ideas that are emotionally meaningful as well as functional, and to express ourselves through means beyond words or symbols. Design thinking is something you can learn only by doing, so we'll get out into the world and tackle a design challenge of our own together. We'll learn how to research by researching, learn how to prototype by prototyping and learn how to communicate our ideas by pitching to a group of experts. At the end of the class you should feel confident in your abilities to apply design thinking to any challenges you're facing and to come up with new ideas and solutions as a result.
Summer 2018 course meeting times: June 1, 2, 7, 8: 9am-5pm; June 9: 9am-3pm
Course usually offered summer term only
Also Offered As: NPLD 593
Activity: Lecture
1.0 Course Unit

SWRK 595 Effective Communication and Storytelling
Great leaders are storytellers. They are able to engage and entertain their communities, and tell a compelling narrative about how the world works. They use language powerfully and communicate in ways that uplift and inspire others. In this class, we will explore the power of telling great stories, and learn how to do it most effectively when promoting your campaigns to make the world a better place. We will also look at the skills of framing language in ways that will win over an audience. Finally, we will look at other key skills of effective communication, including the best strategies for persuasion, negotiation, and conflict resolution.
Course usually offered summer term only
Also Offered As: NPLD 595
Activity: Lecture
1.0 Course Unit

SWRK 596 Design and Incorporation of High Impact Nonprofits
Design and Incorporation of High Impact Not-For-Profits is designed for those who have a practitioner's interest in the design, governance, leadership, and management of high impact not-for-profit organizations. This course is taught through learning best practice theory, applying this theory to a simulation experience, and providing students the opportunity to apply their new knowledge and experience in an interview with a current not-for-profit leader. Students, through the combination of theory and practice, are provided with the essential competencies and tools to design and incorporate a not-for-profit, conduct in-depth analysis of a not-for-profit's effectiveness including, but not limited to, governance, leadership, social impact, financial sustainability, and systems and policy influence. Through the mock simulation process of designing, incorporating, and governing, students will leave with a "best practice" for not-for-profit manual that includes articles of incorporation, bylaws, governance deliverables, strategic business plan, organizational scorecard, 3-5 year budget, development plan and public policy strategy. The knowledge and tools gained through readings and the mock simulation experience, will be applied, in the form of a thorough analysis, to the governance, leadership, strategic and/or business model, financial sustainability, social impact, marketing and communication, and public policy influence of an existing organization.
Course usually offered summer term only
Also Offered As: NPLD 596
Activity: Lecture
1.0 Course Unit

SWRK 601 History and Philosophy of Social Work and Social Welfare
This course traces the development of social welfare policy in the United States and its relationship to social work. It analyzes the values and assumptions that form the foundation of existing welfare programs and institutions and explores the social, economic, political and cultural contexts in which they have developed. The course examines the development of cash assistance and social services programs in light of the enduring legacy of poverty, racism, and sexism. The view of "outsiders" in U.S. society - low-income persons, people of color, gays and lesbians - allows us to gain perspective on the source of conflict and consensus in American history, which augments material about institutional racism learned in SWRK 603 and content about behavioral responses learned in SWRK 602. The course traces, as well, the roles that social workers have played in the formulation and implementation of social welfare policy and links these historical examples to contemporary policy practice.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.
SWRK 602 Human Behavior in the Social Environment
This course introduces the student to the individual and family components of social interaction in a variety of different milieus. Theories of self and personality are studied, along with theories related to traditional and non-traditional family styles, different social and ethnic groups, and of assimilation and acculturation. Emphasis is given to the impact of different cultures and traditions on individual functioning. Additional attention is given to selected social characteristics of the larger society, such as factors of socio-economic class which influence individual and family behavior and functioning.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 603 American Racism and Social Work Practice
This course explores racism in America as an historical and contemporary phenomenon. It emphasizes the development of evidence-based knowledge about institutional systems of racism, analytical skill in understanding the complexity of institutional racism and other forms of oppression more broadly defined, self-awareness, and the implications of racism for social work services and practices.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 604 Foundations of Social Work Practice I
This is a first of a four-course sequence designed to help students develop a professional stance and evidence-based framework for social work services to individuals, groups, families, and communities. It integrates the student’s theoretical learning with the experience in the field placement agency. The student is introduced to a holistic process-oriented approach to social work practice and to methods for implementation. The course emphasizes the social context for practice with special attention to agency purpose, functions and structure; the client system and its perceptions of need; goals and resources and the social worker as a facilitator of change.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 604 Foundations of Social Work Practice II
This is the second in a four-course sequence and continues to examine varied practice frameworks and methods for service delivery in working with individuals, groups, families and communities. It emphasizes the eradication of institutional racism and other forms of oppression along with the integration of a culturally-sensitive approach to social work practice. Attention is given to understanding client problems in the context of different social work practice approaches and service requirements and to increased use of professional values to guide and inform practice.
Course usually offered in spring term
Prerequisite: SWRK 604
Activity: Lecture
1.0 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 605 Introduction to Social Work Research
This course presents the broad range of research tools that social workers can use to improve the effectiveness and efficiency of their practice. The course emphasizes the process of theory development, conceptualization, and hypothesis formulation across a broad spectrum of social work practice situations. The course includes methodological considerations relating to concept operationalization; research design (experimental, survey, and field), sampling instrumentation, methods of data collection and analysis, and report preparation and dissemination. The course also emphasizes how social work research can help professionals better understand and more effectively impact problems of racism and sexism in contemporary American society.
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 620 Integrative Seminar
All Advanced Standing students are required to take this non-credit Integrative Seminar in the summer upon beginning the program. The seminar meets weekly during the second summer session and supports students as they begin their field placement. In order to enroll in the fall, students must achieve satisfactory performance in the Integrative Practice Seminar and summer field placement.
Course usually offered summer term only
Prerequisite: Advanced Standing MSW students only
Activity: Seminar
0.0 Course Units
SWRK 701 Health and Mental Health Policy
This course provides an overall view of the historical, social and economic dimensions of the health care delivery system: how health policies are developed and implemented, and how such policies influence social work practice, program planning, and research. Key health policy issues such as financing, cost, access, and the allocation of resources are explored in the context of health reform proposals. Students investigate how health policy affects specific population groups such as women and children, persons with chronic mental illnesses, persons with AIDS, older adults, and minorities.
Course not offered every year
Activity: Lecture
1.0 Course Unit
Notes: MSW Policy Option

SWRK 702 Social Work Practice in Health Care
This course focuses on key issues in social work practice in health care settings. Social aspects of health and illness, including cultural variations, health beliefs and behavior, and the impact of illness on the patient and the family, are examined and their relevance for practice is discussed. Appropriate theoretical models for practice are identified and applied to practice in the areas of prevention, primary care, chronic and long-term care. New roles for social work in varied health delivery systems and inter-professional collaboration are explored.
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective

SWRK 703 Impacting Government: Policy Analysis & Coalition Building
This course focuses on developing a theoretical foundation for actionable skills in policy analysis and coalition building across a wide-range of constituencies. The material begins with a structured focus on the ideological underpinnings of social welfare in the United States and the ways in which these perspectives shape our conception of equity, equality, and allocation of resources along the lines of race, class, gender, immigration status, and other identities. We will then utilize this basis for developing analysis frameworks, policy briefs, and media messaging that students will utilize when working with legislative bodies to advocate for and with the populations they serve. Distinct emphasis is placed on becoming conversant across differential systems, ideas, values, and assumptions while remaining grounded in relevant research and empirical approaches.
Course not offered every year
Activity: Lecture
1.0 Course Unit
Notes: Macro Practice Elective

SWRK 704 Advanced Clinical Social Work Practice I
Clinical Social Work Practice I and Field Practice builds on the generalist model of practice established in the foundation social work practice courses. The course work and assignments are closely linked to the students’ learning objectives and experiences in the field. This course has students critically examine and deepen their understanding of advanced theoretical frameworks and specific skills to be applied in clinical practice with children, adolescents, adults, and families. Students begin with classic and modern formulations of psychodynamic work and use this as a foundation for understanding theoretically and empirically drive models of family intervention. In addition, use of self and social work values and ethics and working with diverse clients are addressed at an advanced level.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: Required for Clinical Practice Concentration; This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 706 Policies for Children and Their Families
This course examines policies for children and their families with a specific focus on child welfare policy. The course examines the interrelationship between: the knowledge base on child abuse and neglect; evaluations of interventions; programs and policies designed to protect maltreated children; and child welfare policy at the state and national level. The course also examines federal and state laws that govern the funding and operation of child welfare systems; the history of child welfare policies; the operation of child welfare systems; and the legal, political and social forces that influence the structure and function of child welfare systems in the United States.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Policy Option

SWRK 708 Advanced Macro Social Work Practice I
Advanced Macro Social Work Practice I and Field builds on the foundation social work practice courses and focuses on three areas: (1) context of macro practice; (2) organizational structure with a focus on nonprofits; and (3) program design and development. The course begins with providing theoretical frameworks for macro practice and then moves to focus on delivery of services at the community level. Knowledge and skill development focuses primarily on social work practice within communities and organizations. Students learn how to organize and build relationships with communities and develop, plan, manage, fund and assess/evaluate community-based programs. Specific skill development includes learning how to research, develop, write, and pitch a grant proposal. Course content is integrated with fieldwork and is specific to the service needs of the populations with whom students are working in their field agencies.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: Required for Macro Practice Concentration; This course may schedule sequence-wide lectures for all sections at various points in the semester and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.
**SWRK 710 Supervision Seminar**
Students in the Employed Practitioners Program are required to take this non-credit seminar in the fall and spring terms of their second year of study. The class meets every other week. In a limited number of cases, advanced-year students may be placed in agencies where there is no available MSW field instructor. In such instances, the student is required to attend the Clinical or Macro Supervision Seminar (depending on their concentration), which meets every other week during the academic year. Students who are required to participate in the clinical or macro supervision seminars will be given 1.5 hours of compensatory time off from their field placement every other week.

**Activity:** Seminar
0.0 Course Units
**Notes:** Non-credit course required for students in the Employed Practitioners Program OR Non-credit course required for students without an MSW supervisor at their field placement

**SWRK 711 Contemporary Social Policy**
This course introduces students to the analysis of contemporary social welfare policy. Several social welfare policy areas, including social inequality, poverty, health care, and housing are examined. Each topic area is also used to illustrate a component of the policy analysis process, including the analysis of ideologies and values as they shape policy formulation, the process by which legislation is proposed and enacted, the roles of advocacy and lobbying organizations, and the challenges of policy implementation and evaluation.

**One-term course offered either term**
**Activity:** Lecture
1.0 Course Unit
**Notes:** Policy Option

**SWRK 713 Understanding Social Change: Issues of Race and Gender**
This course builds upon the foundation of historical, psychological, sociological, economic, political, and personal knowledge about institutionalized forms of racism and discrimination developed in SWRK 603, American Racism and Social Work Practice. The course uses understanding elements of oppression to critically examine strategies for addressing racism and sexism in organizations and communities through systematic assessment and planning for social change. The course examines change at three levels: organizations, communities, and social movements.

**Course usually offered in spring term**
**Prerequisite:** SWRK 603
**Activity:** Lecture
1.0 Course Unit
**Notes:** This course may schedule sequence-wide lectures for all sections at various points in the semester and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

**SWRK 714 Advanced Clinical Social Work Practice II**
The focus of learning in this semester is theories and skills related to clinical practice with individuals and groups, differential intervention, and the broadening of the professional role and repertoire. The course content and assignments are closely linked with the students’ learning objectives and experiences in the field. Students extend and refine their practice knowledge and skills and learn to intervene with cognitive, behavioral, and narrative modalities. This semester focuses also on work with complex trauma across systems and populations. Students consolidate their identification as professionals and learn to constructively use the environment to effect systems changes.

**Course usually offered in spring term**
**Prerequisite:** SWRK 704
**Activity:** Lecture
1.0 Course Unit
**Notes:** Required for Clinical Practice Concentration; This course may schedule sequence-wide lectures for all sections at various points in the semester and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

**SWRK 717 Art and Social Work: Art and the Ecology of Justice**
How can the arts help us build a more just society? How can the arts transform social structures and systems? Public health crises involving clean water (Flint), police violence (Baltimore), and a lack of economic and educational opportunity following reentry (Philadelphia) make legible the need for a new visual language that critiques these conditions and challenges entrenched structural inequalities. We will engage the work of creative practitioners who are mapping new relationships between art and social justice and directly impacting individual and communal well-being. In so doing, the course seeks to challenge traditional constructions of public health, which often isolate individual histories from their social life and their relation to families, communities, and geographies. Readings will build upon disciplinary perspectives in the arts, humanities, and social policy. Requirements include weekly readings, class participation, and a collaborative final project. The course will meet in the Health Ecologies Lab at Slought Foundation, an arts organization on campus.

**Course not offered every year**
**Also Offered As:** FNAR 316, FNAR 616
**Activity:** Seminar
1.0 Course Unit
**SWRK 718 Advanced Macro Social Work Practice II**
Advanced Macro Social Work Practice II and Field helps students broaden and deepen the specific knowledge and skills required to become an effective and creative social work practitioner. The course focuses on five areas of macro practice: (1) community assessment and practice; (2) policy advocacy; (3) fiscal management and fundraising; (4) global human rights; and (5) emerging areas of macro practice. Students learn how to conduct a community practice analysis, engage in policy advocacy, develop an idea for a social enterprise, write an agency fundraising plan, and conduct an agency fiscal evaluation. Students learn to utilize administrative skills to promote social change within a variety of systems that influence the lives of client populations. Course content is integrated with fieldwork and is specific to the service needs of the populations with whom students are working in their field agencies.
Course usually offered in spring term
Prerequisite: SWRK 708
Activity: Lecture
1.0 Course Unit
Notes: Required for Macro Practice Concentration; This course may schedule sequence-wide lectures for all sections at various dancepoints in the semester and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; for oth students should not register for other courses on Monday nights that would conflict with this time slot.

**SWRK 721 Social Work Healthcare Proseminar**
Activity: Seminar
0.0 Course Units
Notes: non-credit seminar for SWIHCS students only

**SWRK 722 Practice with Children and Adolescents**
This course provides a foundation for social work practice with children and adolescents. Beginning with an overview of normative child and adolescent development and psychosocial developmental theory, the course covers various methods for helping at-risk children and adolescents and their families. Emphasizing the complex interplay between children and adolescents and their social environments, consideration will be given to biological, temperamental, and developmental status; the familial/cultural context; the school context; and other aspects of the physical and social environment. Particular attention is paid to working with socially, emotionally, financially, and physically challenged and deprived children and adolescents and their families.
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective; Option for Home and School Visitor (HSV) specialization

**SWRK 724 Developmental Disabilities**
This course enhances the students' ability to practice social work with and on behalf of people with developmental disabilities and their families. The course provides a base of knowledge about developmental disabilities and differences, their causes and characteristics. Students learn how disabilities and learning differences impact personal, familial, educational, social, and economic dimensions for the individual, family and society, with attention to the person's special life cycle needs and characteristics. The course also emphasizes legislative, programmatic, political, economic, and theoretical formulations fundamental to service delivery.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective; required for students in the HSV program

**SWRK 726 Brief Treatment and Crisis Intervention**
This course focuses on theory and practice of planned brief treatment in social work practice, primarily with individuals but with attention to couples, families and other groupings. The course covers the history of different approaches to brief treatment. Topics include treatment issues such as criteria for selection of clients, understanding the importance of time in the treatment relationship, the use of history, the importance of focusing, the process of termination and other issues related to brief interventions. Particular attention will be paid to the use of brief treatment approaches in crisis situations. The course presents various methods of assessing an individual's crisis and of helping clients mobilize their strengths to utilize customary methods of coping and learn newer ways of coping.
Course usually offered summer term only
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective

**SWRK 727 Practice with Families**
This course provides students with assessment and intervention skills for social work practice with varied family/partner configurations. The course begins with a grounding in family systems theory and proceeds to explore patterns of interaction in terms of the wide range of problems that families and partners bring to social agencies. Emphasis is given to exploring ways of supporting change in interaction patterns. Readings are augmented by videotapes of family sessions and simulations of clinical situations from students' field practice.
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective
SWRK 729 Social Statistics
This course provides students with a broad range of statistical methods and applications. It introduces social work students to the use of quantitative data for planning and evaluating social programs and social policy. Course topics include conceptualization and measurement of variables and basic techniques for exploring and categorizing data, for generalizing research findings and testing hypotheses, and for statistical data processing. Students will gain experience in using a Windows-based statistical software package on personal computers. Emphasis is placed on the practical application of data to address social policy and social work practice issues. Students have the opportunity to critique the application of data analysis and presentation in technical reports and professional journals.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: Research Option

SWRK 730 Community Mapping
Geographic space is important to family and community well-being, as we know. Community Mapping introduces students to geographic information systems (GIS), computer software for making maps and analyzing spatial data. Students will learn how maps have been used in social welfare history as well as how GIS can be used for needs assessments, asset mapping, program evaluation, and program planning. The course builds on research skills developed in SWRK 615. For the final project, students have an opportunity to create maps related to their field placement. The use of such maps may lead to both program and policy change in neighborhoods and communities.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Macro Practice Elective Open to all students in SP2; Other graduate students email SP2Reg@sp2.upenn.edu to request a permit

SWRK 731 Clinical and Macro Child Welfare Practice
Students enrolled in this course will learn about the various contexts in which child welfare practice and policy services take place and the skills and modalities that are used with children, youth, and families who are the focus of child welfare intervention. Students learn about the social conditions and unmet needs that have typically precipitated child welfare policy and ideological debates informing child welfare policy. How to structure organizations and implement planning in support of strengthening front-line practice is also addressed. Taking stock of these policies and organizational factors, students gain a firm understanding of how they influence, shape, and govern direct clinical practice in child protection and casework. Particular attention will be devoted to developing students’ practice skills in safety assessment and safety planning, risk assessment, and permanency planning. Implementation of evidence-based, trauma-informed interventions to promote positive developmental outcomes among the racially/ethnically diverse pool of children and adolescents placed in out-of-home care will also be a focus of attention. Other topics include separation, loss, and identity development; disproportionality and disparity; and self-care in child welfare practice. In the spirit of bridging connections between macro and clinical practice, course content will delve into how direct casework services influence dependency actions in the juvenile courts. How these direct practices or interventions influence case outcomes as reported by a number of federal data reporting systems will also be discussed. A social justice framework will be applied to understand how child welfare policies and organizational services sustain child and family inequalities, especially for historically oppressed and marginalized populations who are disproportionately represented in the child welfare system.
Course usually offered in fall term
Activity: Seminar
1.0 Course Unit
Notes: Clinical and Macro Practice Elective

SWRK 732 Integrative Seminar in Child Welfare
This capstone course in the Child Well-Being and Child Welfare specialization will integrate direct/micro and macro levels of practice; research in child welfare and related fields, as the research relates to all levels of practice; the relationship of child maltreatment and other social problems; and perspectives from several disciplines, specifically social work, other mental health professions, law, and medicine, as these disciplines address problems of child maltreatment and child welfare. The seminar will highlight issues of social justice, disproportionality - particularly the over-representation of children and families of color in the child welfare system, and disadvantaged populations, including children in general and poor children in particular. Faculty from other disciplines will be features as guest speakers throughout the course.
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit
Notes: Clinical and Macro Practice Elective
SWRK 736 Building Community Capacity
This course provides an introduction to community organization and community capacity building. The course encompasses strategies, models, and techniques for the creation of organizations, the formation of federations of existing organizations, and coalition-building, all designed to address problems requiring institutional or policy changes or reallocation of resources to shift power and responsibility to those most negatively affected by current socio-economic and cultural arrangements. The course emphasizes development of strategies and techniques to organize low-income minority residents of urban neighborhoods, and to organize disenfranchised groups across geographic boundaries as the first required steps in an empowerment process.
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Macro Practice Elective

SWRK 738 Anxiety and Depression
Anxiety and depression are two of the most common mental disorders seen in social work clients, and frequently they occur concurrently. This course describes the medical and "physical" concomitants and psychosocial factors associated with both conditions and introduces diagnostic and assessment procedures and methods of intervention that social workers use in working with clients with these conditions. The course also considers how culture, social class, gender, and other social differences affect the expression of these disorders and their concomitant treatment.
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective

SWRK 739 Illness and Family Caregiving
This course focuses on social work practice in medicine and the relationships between physical health, social environments, and psychosocial functioning. Student learning will be grounded in the biopsychosocial-spiritual model, and will address a number of domains, including the impact of illness on families over the life course, the impact of a diagnosis on family functioning, medical decision making, coping, health beliefs and spirituality, culture and social class. Classroom content will include conceptualization of illness challenges from the presentation/prevention of symptoms to the end of life, in addition to writing case material, building self-awareness and identifying clinical interface issues, and the compilation of a "clinician's toolbox" for direct practice on the front lines. Activities will include the unique opportunity to participate in hands-on, interdisciplinary training at the Simulation Center in the School of Nursing.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective

SWRK 740 Strategic Planning and Resource Development for Public and Nonprofit Organizations
Resilient organizations engage in a continuous process of self-review and refocusing. Referred to as "strategic planning," this process requires the active participation of a broad range of agency "stakeholders" who, in their work together, seek to realign the organization's goals, structures, and programs to make them more responsive to the changing needs of their service populations. Building on the content of foundation practice foundation courses, "Strategic Planning and Resource Development" has been designed to strengthen the student's leadership capacity for engaging in strategic planning and resource development practice across a broad range of governmental (GOs) and civil society organizations (CSOs). The importance of organizational flexibility, innovation, and the creation of cooperative public-private partnerships is emphasized throughout the course.
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Macro Practice Elective

SWRK 741 Gender & Social Policy
Gender and Social Policy develops an advanced understanding of social policies through a focus on social issues and conditions through the lens of gender, economic and critical theory. The specialized focus on gender and social policy provides students with the opportunity to develop more specialized knowledge about how market dynamics and government policies respond to the needs and risks faced by women. Specific emphasis is placed on utilizing theoretical frameworks to evaluate the intersection between social policy, history and social science in relationship to gender issues. Students are also expected to conduct a policy analysis that includes an evaluation of how current and former social movements surrounding gender issues shaped their policy of interest.
Taught by: Baker
Course usually offered in spring term
Also Offered As: MSSP 741
Activity: Lecture
1.0 Course Unit
Notes: Policy Option
SWRK 742 Practice with At-Risk Youth
The discourse on juvenile justice in the United States, once driven by themes of treatment and rehabilitation, has been dominated in recent years by vocabularies of punishment and incapacitation. The juvenile court, an enterprise founded by social reformers and the social work profession at the turn of the century to "save children," is now under severe political and legislative pressure to impose harsher penalties on younger and younger offenders who are increasingly portrayed as violent "super-predators," while its most vulnerable segments, children and youth, stand in greatest need of what a social service system can offer. Not surprisingly, those most likely to wind up under supervision are economically poor, under-educated, disproportionately of color and disproportionately at-risk to become victims of violent crimes. How does the profession situate itself in this discourse and what are individual social workers to do?
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: Clinical and Macro Practice Elective; Option for Home and School Visitor Requirement

SWRK 743 Action Research
Action research is a form of social research that combines research with intervention. It is characterized by a collaborative relationship between the researcher and a client organization that is in an immediate problematic situation. The research process is directed toward addressing the problem situation and producing knowledge that contributes to the goals of social science. Action research is compatible with many of the values and principles of social work. This course also addresses issues of social work ethics and values encountered by the action researcher.
One-term course offered either term
Prerequisite: SWRK 615
Activity: Lecture
1.0 Course Unit
Notes: Research Option

SWRK 744 Direct Practice Research
This course provides graduate social work students with research knowledge and skills aimed at enhancing their direct practice with clients. The course examines methods of assessment, methods for choosing and evaluating techniques of intervention, methods for determining the effectiveness of practice and the use of research in social work decision-making. A successful outcome of the course will be that students perceive a more positive relationship between research and social work practice and possess a set of tools that they will be able to utilize in their future careers as social workers. The course starts from an assumption that students have some familiarity with research and are primarily engaged in direct practice with individuals, families or groups.
Course usually offered in fall term
Prerequisites: SWRK 615, Introduction to Social Work Research
Activity: Lecture
1.0 Course Unit
Notes: Research Option; Course may be offered online or in classroom setting; Online section is designed for clinical direct practice students only and requires an orientation meeting.

SWRK 746 Political Social Work
This course focuses on the role of social workers and the social work profession in advocacy and the political arena. It examines the methods of advocacy (e.g., case, class, and legislative) and political action through which social workers can influence social policy development and community and institutional change. The course also analyzes selected strategies and tactics of change and seeks to develop alternative social work roles in the facilitation of purposive change efforts. Topics include individual and group advocacy, lobbying, public education and public relations, electoral politics, coalition building, and legal and ethical dilemmas in political action.
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Macro Practice Elective

SWRK 748 Microfinance and Women's Empowerment in India
This course examines microfinance and its engagement with marginalized communities such as those in India. It is designed to provide students with an understanding of the phenomena of microfinance and its role in poverty alleviation. By studying the use of self-help groups with NGO facilitation, their impact on women's empowerment will be examined and understood through interaction with women engaged in microfinance activities.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Application required - www.sp2.upenn.edu/global/courses; Program Fee

SWRK 749 Civil Society Addressing Conflict in Israel/Palestine
This course offers a unique opportunity to experience the challenges and complexities of coexistence in Israel, the Holy Land for Christians, Jews and Muslims; a key point of interest and dispute for the international community, and the homeland shared and claimed by both Israelis and Palestinians. The course will focus on activities carried out by nonprofit organizations operating within the Israeli civil society, dealing with issues related to coexistence and to the protection and advancement of the civil and social rights of different populations, with special emphasis on the Arab-Palestinian population in Israel. These activities include educational and social services programs, community work and advocacy activities, aimed at creating dialogues and building coexistence among the different populations in the Israeli society and Palestine.
Course usually offered summer term only
Activity: Seminar
1.0 Course Unit
Notes: Application required - www.sp2.upenn.edu/global/courses; Program Fee
SWRK 755 International Social Policy & Practice: Perspectives from the Global South
This interdisciplinary course will introduce students to social policy and practice perspectives from outside the U.S. and especially from communities in the Global South. The course will familiarize them with global professions and help prepare them for overseas/cross-cultural practice. Through the course students will identify numerous strategies and skills professionals have used to collaboratively build interventions within human rights, social policy, social welfare, education, healthcare and sustainable development arenas.
Taught by: Anastasia Shown
Course usually offered in fall term
Also Offered As: MSSP 755
Activity: Lecture
1.0 Course Unit

SWRK 756 Human Sexuality
The aim of this course is to increase students’ ability to deal more comfortably with the sexual aspect of human functioning. Readings, written assignments, and classroom presentations are directed to realizing the diversity, complexity, and range of human sexual expression. Current information about sexuality from the biological and physiological sciences is reviewed to increase comfort and skill in discussion and handling of sex-related behavior. Personal and societal attitudes will be explored. A variety of sex-related social problems encountered by social workers in family, education, health, and criminal justice settings are discussed. Diagnostic interviewing and treatment methods are presented in role play, group exercises and case studies.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit

SWRK 757 Loss through the Life Cycle
This course considers loss as a central theme throughout the life cycle. Content focuses on the physical, psychosocial, spiritual, and cultural aspects of loss, dying and bereavement processes and the interaction among individuals, families and professionals. Students examine historical trends of family, community, and institutional support for the terminally ill and those experiencing traumatic loss and learn ways to advocate for a system of services that supports full decision-making on the part of the client. Course materials, journals, and special projects identify how self and other factors impact service delivery to individuals, families, and communities experiencing loss, including ethical considerations prompted by cost, technology, and end of life issues.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective

SWRK 759 Substance Use Interventions
This course addresses intervention approaches used in social work practice with individuals, families, and groups who misuse addictive substances themselves or are affected by another’s misuse. Students learn about addictive substances, models of intervention, how to engage and assess clients, and how to intervene and evaluate the effectiveness of their interventions. The course incorporates theory and research findings on various strategies of intervention.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective; Attendance at first class required

SWRK 760 Mental Health Diagnostics
This course familiarizes students with mental health and mental disorders within the context of the life cycle, viewed from a biopsychosocial perspective. Prevalent categories of psychiatric disorders are considered with respect to their differentiating characteristics, explanatory theories, and relevance for social work practice, according to the DSM and other diagnostic tools. The course includes biological information and addresses the impact of race, ethnicity, social class, age, gender, and other sociocultural variables on diagnostic processes.
Course offered summer, fall and spring terms
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective; Required for Clinical Practice Concentration

SWRK 763 Global Human Rights & US Immigration: Implications for Policy & Practice
This course will begin with the history of migration to the US, as well as legal definitions of newcomers, including obtaining documents for lawful permanent residence, refugee status, as well as grounds for exclusion and deportation, and paths to naturalized citizenship. We will then review how a framework of cultural competence, and a strength or asset-based approach can inform service to immigrant clients. The core portion of the course will then focus first on the intersection of immigrants and health, mental health, employment, crimes, public entitlements, and public education. The course will conclude with family issues relevant to immigrant families: women, children, lesbian and gay, and elderly immigrants. Public policy issues will be integrated throughout, and the course will end with specific suggestions on systems change at various levels. By the end of the course students should be able to identify strategies for individual clients (micro); agency and community strategies (mezzo), and government advocacy (macro) to empower immigrant clients to become full community participants.
Taught by: Chany-Muy
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Policy Option; Macro Practice Elective

SWRK 765 Supervision and Leadership in Human Services Organizations
This course builds on social work knowledge, values, and skills gained in foundation practice courses and links them to the roles and functions of social workers as supervisors and managers in human service organizations. Course focus is on providing students with an overview of basic supervisory and human resource development concepts so they may be better prepared as professional social workers to enter agencies and provide direct reports (supervisees) with meaningful and appropriate direction, support, and motivation.
Course not offered every year
Activity: Lecture
1.0 Course Unit
Notes: Clinical and Macro Practice Elective
SWRK 766 Group Dynamics and Organizational Politics
This is one of the courses referred to as "The Power Lab at Penn." This intensely experiential course is designed for those providing group and institutional leadership at any level of a human enterprise, managing work groups, chairing committees, serving on special task forces, conducting support groups, offering legal services, teaching in classrooms, facilitating groups in clinical settings, etc. Participants will focus on two topics: (1) an in-depth understanding of group dynamics while they are in action, and (2) the organizational relationships between groups that are in a powerful position, groups locked in a powerless state and those caught in the middle between the powerful and the powerless.

Course Structure: This course has six components: (1) A pre-course discerning process, which consists of a one evening plus one full day Primer workshop; (2) Module 1 which is focused on group dynamics; (3) reading an assigned book and writing a paper based on Module 1 experiences; (4) Module 2 which addresses power relationships among groups with differential resources; (5) reading two assigned books and writing a paper based on Module 2 experiences; and (6) a post-course debriefing. The Primer provides all potential participants with a common conceptual base for engaging in the essential learning and lays out the intellectual foundations of the course.

Taught by: Kenwyn Smith
One-term course offered either term
Also Offered As: NPLD 785
Prerequisites: NPLD-782 Small Group Processes. Permission required; all potential participants are required to attend a Primer class which consists of one evening session AND an all day session. Permits are granted only after students have completed the primer classes.

Activity: Lecture
1.0 Course Unit
Notes: Students from all graduate programs at Penn are welcome to apply. Contact the NPLD program for more information: https://www.sp2.upenn.edu/academics/ms-in-nonprofit-leadership

SWRK 768 Social Policy Through Literature
Fiction provides a lens to look at social issues and social policy through the rich and understandable lives of human beings, their challenges, and their triumphs in the holistic context of their worlds. Through appreciation of the human condition as portrayed in literature, students learn to frame issues more precisely and present arguments in compelling and convincing ways, thus enhancing the capabilities of social workers, social policymakers, and other agents to influence policy change.

Course not offered every year
Also Offered As: MSSP 768
Activity: Lecture
1.0 Course Unit

SWRK 769 Aging: The Intersection of Policy and Practice
This course examines a variety of social welfare policies that affect the rights and interests of older adults. These include policies related to economic security, health, long term care, and civil rights. In addition, the course reviews the policy-making process with a discussion of the influence of legislative sanctions and case law in establishing aging policy in the U.S. The focus of the course is on critical analysis of the key assumptions driving policy and policy change, e.g. social responsibility vs. individual responsibility. Finally, the course includes a critical examination of the intersection between policy and practice, that is, the influence that policy has on the design of interventions and service delivery practices at the state and local level and the impact of changing policies on communities, providers, and older adults.

Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Macro Practice Elective; required for students in the PAC program

SWRK 772 Postcolonial Social Work Practice: International Social Welfare in India
In this course, students examine the global welfare system and its engagement with marginalized communities. This six-week course in Kolkata, India, centers around a sex workers' collaborative in Sonagachi, one of Asia's largest red light districts. Interviews with the collaborative's workers and study of their grassroots movement are combined with class discussions and research projects in which students engage with texts on HIV, sex work, feminist postcolonial theory and international social work.

Taught by: Ghose
Course usually offered summer term only
Activity: Lecture
1.0 Course Unit
Notes: Application Required; Program Fee
Swrk 773 Mental Health Challenges in Childhood and Adolescence
This course will be an opportunity for the student and the instructor to explore the concept “psychopathology” as it has been and is applied to childhood and adolescence. There are some psychopathological challenges that are unique to childhood and some which can manifest themselves throughout childhood into adolescence and adulthood. The social worker/practitioner will encounter a wide range of symptomatic presentations among his/her clients. At this time in the fields of clinical social work, psychology, psychiatry, and psychotherapy there are numerous frameworks available to the practitioner to aid in an understanding of symptoms in children and adolescents. During the next several weeks three conceptual frameworks will be articulated. These three frameworks will elucidate the possible meaning, origin, and/or function of the symptoms and offer to the student a vocabulary with which to engage the situation. At the turn of the 19th century into the 20th century, psychoanalysis emerged in Europe as a method of understanding symptoms from the point of view of internal conflict within the child or adolescent. After World War II in the U.S.A., a model of understanding symptoms from a systemic/cybernetic point of view revolutionized the diagnostic processes involved in working with children and adolescents. Since the late 1980’s, postmodern ideas, primarily from Europe and Australia, have greatly influenced and informed the understanding of psychopathology in children and adolescents. Narrative, social constructivist, and linguistic usage patterns have become a common vocabulary in the discourse on psychopathology. This course is not intended to be a reading of the history of child psychopathology. It is intended to expose the student to the most influential paradigms in the field of child psychopathology. This MSW elective builds on knowledge of human behavior over the life cycle and the foundation practice courses SWRK 602 and SWRK 614. It continues to sensitize students to populations at risk and those affected by racism, sexism, and other forms of oppression learned across the foundation curriculum. It informs social work practice with children and adolescents in a variety of settings and practice roles.
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: MSW Elective

Swrk 774 Program Evaluation
This course introduces students to theoretical and practical aspects of social service program evaluation. Students learn about the design and implementation of all phases of an evaluation, from needs assessment to analysis of findings. Skills such as survey construction and budgeting are introduced. Intensive analysis of existing studies illustrates how evaluations are designed and how findings affect social programs and policy.
One-term course offered either term
Prerequisites: SWRK 615, Introduction to SW Research
Activity: Lecture
1.0 Course Unit
Notes: Research Option

Swrk 775 Intimate Violence
The purpose of this course is to familiarize students with the definition, theories, causes, processes, consequences, and social interventions in intimate violence. The course will attempt to provide insight on the phenomenon of intimate violence by examining the ways in which it affects survivors, perpetrators, and their children. This will be accomplished by reviewing the current research as well as by exploring how intimate violence is constructed by the participants on the personal, interpersonal, and social structural level.
Course not offered every year
Also Offered As: PUBH 575
Activity: Lecture
1.0 Course Unit

Swrk 777 Cognitive Behavioral Therapy
This Cognitive Behavioral Therapy course will be taught in a one-week intensive class Monday-Friday 9am-5pm. Students are expected to start a pre-course assignment approximately 2 months prior to the first day of the course. Students will receive an information request from the instructor during course registration and must reply in a timely fashion. Cognitive Behavioral Therapy (CBT) is the world’s most effective, empirically-based psychotherapy with strong scientific evidence. CBT is a collaborative and empowering psychotherapy that educates and helps clients to motivate themselves, set goals, develop, and implement treatment plans to reach those goals. This experiential/didactic advanced clinical skills course will present a CBT model to evidence-based practice that can serve as a conceptual framework for clinical applications to a wide variety of presenting problems and populations. The purpose of this course is to introduce graduate students to the theory of CBT and to begin to apply the basic principles through the stages of a self-directed case.
One-term course offered either term
Prerequisite: Completion of MSW Foundation year curriculum or equivalent
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective

Swrk 778 Dialectical Behavioral Therapy
In this course we will examine the underlying theories, empirical foundations, and fundamental skill sets associated with dialectical behavioral therapy (DBT). Students will be expected to participate in role plays, lead mindfulness exercises, and carry out chain analyses.
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective
SWRK 780 Policy and "Difference" in Postmodernity
Social constructions of "difference" permeate the institutions, spaces, and assumptions of our society. These social constructions include but are not limited to the racialized, gendered, sexed, classed, and dis/abled constructions of the body. By leaning on postmodern thinkers such as Iris Marion Young, Pierre Bourdieu, Judith Butler, Jacques Derrida, Ernesto Laclau, and Michel Foucault, this seminar course will begin by engaging the questions of what is "difference" and how is "difference" discursively constructed and reproduced in society. Using a postmodern lens, the remainder of the course will engage various social science texts that deal with the varieites of "difference" (i.e. race, gender, class, sexuality) and the explicit and/or implicit policy implications of these works. Thus, we will critically engage policies such as welfare, affirmative action, economic policies of taxation, and same-gender marriage, among others. The underlying questions throughout the course will be to what extent does social policy enable the possibilities of freedom, justice, and democracy for the "Other", the deviant, the abject, the marginalized, those of assumed "difference"? And, to what extent does policy constrain those possibilities at the same time?

Taught by: Dixon-Roman
One-term course offered either term
Also Offered As: MSSP 780
Activity: Seminar
1.0 Course Unit
Notes: Policy Option

SWRK 781 Qualitative Research
Qualitative research encompasses a variety of methods that enable the researcher to enter into the "lived experience" of research participants. These methods are particularly sensitive to the voices of populations whose perspectives are silenced by dominant societal discourses. The course begins by giving attention to underlying philosophical issues and traditions of qualitative research and proceeds to examine qualitative research design, methods of data collection, strategies to ensure rigor, data analysis, and presentation of findings. Students will learn about research interviewing, focus groups, and participant observation and ways in which qualitative research can be used to inform and evaluate social work practice and programs. Students will have the opportunity to apply qualitative research methods to in-class activities and individual or group projects.

Course usually offered in fall term
Prerequisites: SWRK 615, Introduction to Social Work Research
Activity: Lecture
1.0 Course Unit
Notes: Research Option

SWRK 783 Advanced Mental Health Practice with U.S. Veterans
Although this course is open to all students, it is designed for students in the clinical concentration and required for students in the Cohen Veterans Network Scholars program. The course will focus on clinical knowledge and evidence-based practice skills for common mental health problems in veteran settings. The course will introduce students to the assessment and treatment of Post-Traumatic Stress Disorder (PTSD), Depression and Anxiety Disorders, Substance Abuse, Military Sexual Trauma (MST) and Suicide Assessment and Management among veteran populations. Other topics may include cultural competency, homelessness, and combat stress disorders. Since this is a seminar course, some classes will be taught by social workers/psychologists from the Veterans Hospital in Philadelphia and the Cohen Veterans Outpatient Clinic.

Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective; Required for Cohen Veteran Network students

SWRK 785 Criminal Justice Policies: Implications for Social Work
The United States prison population has risen more than three hundred percent in the last three decades. More people are currently incarcerated than at any other point in the history of the United States, and that of the world. This unprecedented period of incarceration has gone largely invisible although it represents one of the greatest social epidemics in the history of the United States. This course provides a critical analysis of the criminal justice system in the United States from a historical and contemporary perspective. It examines the implications of significant criminal justice policies such as the Rockefeller Drug Laws, 3-Strike Legislations, and Mandatory Minimums on the current state of incarceration, and the phenomenon of "Reentry" and "Recidivism". The intersections of criminal justice and social work practice are unmistakable when examining staples of social work practice such as homelessness, mental health and substance abuse, thus the course is intended to facilitate a more informed/holistic practice for all social work students.

Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Policy Option

SWRK 786 Social Work Practice & Trauma
This course integrates trauma theory and practice and expands practice knowledge to include the treatment and assessment of the survivors of trauma. Emphasis is placed on differentiating PTSD from Complex Trauma in order to identify appropriate, evidence-based intervention strategies. Topics covered in the course include an historical overview of the development of our understanding of trauma and the exploration of various types of trauma including war trauma, domestic violence, childhood sexual and physical abuse, natural disasters, the experiences of political refugees and organizational trauma. Among the interventions covered in this course are CBT, EMDR, group and psychodynamic treatment. Students will consider issues that affect those treating the survivors of trauma, such as vicarious trauma, and will explore approaches to self-care. This is an advanced clinical course. Through assignments and class discussions, students are encouraged to use their experiences in the field to deepen their understanding of the material covered in the course.

One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective
SWRK 787 Social Impact Strategy, Analysis, and Leadership
Around the world, new types of organizations are emerging, advances in technology and access to information continue, and there is a growing recognition that all sectors - business, public, and private nonprofit - have a role to play in creating social impact. While the desire to create social impact is clear, the field is just beginning to grapple with ways to translate these aspirations into real and meaningful change. Since 2006, Penn's Center for High Impact Philanthropy has been a pioneer in developing approaches for identifying, assessing, and growing opportunities for social impact. Team-taught by the center for High Impact Philanthropy, the course will be directed by the Center’s founding executive director, Katherina ‘Kat’ Rosqueta, and will include guest lectures from other leading faculty and social impact innovators working in Philadelphia and around the world. Through hands-on practice, team projects, and highly interactive case-based discussions, students will gain the skills needed to: analyze opportunities for impact and potential for impact, including how to determine the scale and scope of an opportunity and how to use the tools of social impact economics to determine the cost implications of the opportunity; confidently address the strategic issues and key tasks faced by managers/leaders with a social impact mandate; influence others towards social impact by leveraging relevant research and real-world examples of effective communication and stakeholder management; and apply their research and effective storytelling skill to present their impact analysis in projects using different formats (e.g. video short, venture capitalist/donor pitch, policy brief). For last year’s syllabus and information on how to request a course permit, please visit https://www.impact.upenn.edu/campus-policy (PAC) students
Course not offered every year
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective

SWRK 788 Harm Reduction on the Borders: Substance Use and HIV Treatment in Puerto Rico
This course examines the U.S.-based substance use and HIV treatment systems, and its engagement with injection drug users in Fajardo, Puerto Rico. It is designed to provide the students with an understanding of the political economy of harm reduction initiatives, and the manner in which it is shaped by the complicated relationship between Puerto Rico and the U.S. Students are expected to gain an understanding of Puerto Rico’s welfare environment, the role of social welfare and social workers in such a context, and the interweaving of social control and social change embedded in welfare initiatives in "borderlands" such as Fajardo. During the four week course in Fajardo, students will complete a placement in a needle exchange program, and engage with texts on HIV, substance use, postcolonial theory and international social work.
Course usually offered summer term only
Activity: Seminar
1.0 Course Unit
Notes: Clinical Practice Elective and Macro Practice Elective; Application required

SWRK 792 Psychodynamic Theory
The purpose of this course is to review the evolution of psychodynamic theory and consider key concepts in psychoanalysis, ego psychology, object relations theory, self-psychology, attachment theory, relational and intersubjective theories and current findings in cognitive neuroscience. Participants will explore human psychological functioning as explained by these various psychodynamic theories and through the biopsychosocial lens that informs social work practice. Students will examine how external factors such as race, class, gender, culture and biology are interwoven with often unconscious, internal psychological determinants, creating the complexities of human behavior that challenge us in our clinical work. Case presentations by students, the instructor and guest lecturers will demonstrate how concepts from psychodynamic theory can be applied to social work practice with diverse clients in varied settings.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective

SWRK 793 Global Health Policy
This participatory interdisciplinary seminar course examines contemporary issues in public health policy and global health. The organizing framework is social determinants of health. We consider evidence that inequalities in education, income, and occupation influence health status, and the policy dilemma that broad interventions to improve population health may increase health disparities. We critically examine whether prevention is always better than cure, and what modern medicine has to offer in terms of health. We explore the public policy process in health using the "tobacco wars" as a case example, of how politics, policy, law, commercial interests, and research intersect to affect the public’s health. We examine whether global health is in a state of decline, and the extent to which failures in public health, public policy, and foreign policy have contributed to increasing threats to world health. Likewise we will examine the potential for greater integration of health into foreign policy to create global infrastructure upon which to advance health. We will examine the global health workforce and the impact of widespread global migration of health professionals on receiving and sending countries. There are no prerequisites. The course is designed for graduate students in the social and behavioral sciences, health professions, public health, business and law. Advanced undergraduate students will be admitted with permission.
Course not offered every year
Also Offered As: NURS 640, PUBH 551
Activity: Lecture
1.0 Course Unit

SWRK 794 Practice with Older Adults and Families
This course focuses on practice with older adults and families within a life course and resiliency perspective. It examines the nature of the aging process, needs and life issues, the ways in which persons adapt to changes, and the ways in which interventions may assist with these adaptations. Students learn assessment, case management, and intervention skills, including the use of rapid assessment and diagnostic tools, needed to work effectively with older populations and family caregivers in a variety of community-based and institutional settings. The course emphasizes evidence-based practices that enhance quality of life, dignity, respect for differences, and maximum independent functioning.
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: Clinical Practice Elective; Required for Penn Aging Concentration (PAC) students
SWRK 796 Family Economic Mobility: Problems and Policies
The experiences and voices of mothers, fathers, children, employers, children's teachers, human service workers, job training providers, policymakers and others in cities across America graphically show us the "real life" challenges to economic mobility facing today's families and organizations. These voices particularly illustrate how economic, social, and cultural policies, practices, and beliefs intersect to perpetuate economic inequality for low-income and many middle-income working families alike. The labor market, welfare and workforce programs, public schools and government are some of the institutions implicated in this intersection. In the course we deconstruct concepts such as the "work ethic," "family-friendly workplace," and "good jobs" in terms of economic, racial and cultural inequalities and, more broadly, in terms of their meaning, aims and rhetoric. At base, this course examines occupational mobility in America within the broad framework of capitalism, democracy, race, ethnicity and gender. Students from GSE, SAS, City Planning, and Communications often join SP2 students to read and critique classic and contemporary literature from multiple disciplines and explore generative roles for "meso-oriented" social change professionals.
Taught by: Roberta Iversen
One-term course offered either term
Also Offered As: MSSP 796
Activity: Lecture
1.0 Course Unit
Notes: In SP2, SWRK/796/MSSP-796 is an approved MSSP Elective and an approved Clinical and Macro practice elective.

SWRK 798 Advanced Topics
Titles and Topics vary. See department website for descriptions: https://www.sp2.upenn.edu/academics/master-of-social-work/academics/course-descriptions/

1.0 Course Unit

SWRK 799 Independent Study
Independent studies provide a flexible opportunity for standing faculty and students to work together in pursuing a topic of special interest that is not sufficiently covered by other courses in the curriculum. The content of independent studies is highly specialized and, as such, requires a plan of study developed jointly by the student(s) and the supervising standing faculty member. Part-time faculty members are not eligible to offer independent studies.
Activity: Independent Study
1.0 Course Unit

SWRK 803 History and Philosophy of Social Welfare
This seminar traces the evolution of social welfare from ancient to modern times focusing on its implications for the development of contemporary social welfare in the United States. The course examines the development of social welfare systems and the underlying philosophies in the context of the social, economic, political, and cultural environments in which they emerged. Topics include the evolution of modern conceptions of the "welfare state," the role of public, private and voluntary sectors in the social services, trends in social and family history and their relationship to social welfare, the professionalization of social work, and methods of historical and social policy analysis.
Taught by: Stern
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: PhD students only

SWRK 804 Methods of Inquiry: Quantitative Research Methods
The purpose of this course is to teach the basics of practice research, with an emphasis on intervention research. This course will focus on research ethics, building a conceptual framework, source credibility, question and hypothesis formulation, design, sampling, measurement, and scale construction and selection. Special emphasis will be placed on the development of designing feasible and practical research studies to answer questions of importance to social work practice. The course will emphasize the selection and development of outcome measures, intervention manuals, and fidelity measures. It will closely examine the use and development of practice guidelines, evidence-based practice and meta-analytic procedures.
Course usually offered in fall term
Prerequisites: Must be enrolled in D.S.W. program.
Activity: Online Course
1.0 Course Unit

SWRK 805 Methods of Inquiry: Qualitative Research Methods
This course will cover the essentials of qualitative research. Students will learn how to "situate themselves" in the research process so as to best capture the lived experience of the subjects under investigation. The course will explore the appropriate use of intensive interviews, grounded theory and ethnography. Mixed methods that employ both qualitative and quantitative approaches, will also be covered.
Course usually offered in spring term
Prerequisites: SWRK 804. Must be enrolled in D.S.W. program
Activity: Online Course
1.0 Course Unit

SWRK 811 Social Theory
Course reading consists of the original works of theorists who offer classical, contemporary and postmodern perspectives on social thought, social interaction and issues germane to social welfare. Through intensive examination of multiple theoretical frameworks, students are expected to increase their analytical and critical orientation to theory. This more nuanced understanding about epistemology, underlying assumptions, and theory construction can then be used to inform the student’s substantive field of study and methodological orientation to research. This course is conducted in mixed lecture-seminar format. Students have the opportunity to practice pedagogical techniques and exercise class leadership.
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Required for PhD Program
SWRK 812 Clinical Theory I
The purpose of this course is to broaden and deepen participants’ mastery of several theories of development, personality, and behavior that have contributed to social work's knowledge base across the decades and continue to inform clinical social work epistemology today. Drawing primarily from original sources, we will consider key assumptions, constructs, and propositions of each theory in terms of its congruence with social work’s principles, values, and mission and in relation to the profession’s person-in-environment perspective. In this first semester, we will study the evolution of theories central to psychodynamic thought, from Freud's early biological model of the mind, through various relational perspectives, to contemporary work in the fields of attachment and interpersonal neurobiology. This examination will constitute a case study of the manner in which theories are socially constructed and will lay the foundation for critical inquiry into the social and political biases inherent in the Western European intellectual tradition from which most theories of human behavior have emerged.
Course usually offered in fall term
Prerequisites: Must be Enrolled in D.S.W. program
Activity: Online Course
1.0 Course Unit

SWRK 813 Clinical Theory II
The purpose of this course is two-fold. First, the course is aimed at continuing to broaden and deepen students’ mastery of theories of behavior and cognition as related to clinical practice. The course is designed to segue from psychodynamic theories from last semester into behavioral and cognitive theories this semester. The history and fundamentals of behavioral theory, and its iterations will be reviewed to ground you firmly in a tradition that emphasizes empirical research. We will critically analyze and discuss the evidence and its application, and you will have opportunities to deepen or expand your knowledgebase of trending approaches to try in your practice either through the material presented or through your choice of the final assignment. Case conceptualizations are emphasized as critical to informing behavioral and cognitive interventions. The second aim of the course involves using discussion and the research literature to critically examine the effectiveness and feasibility of ascribing to a single theoretical orientation. As an alternative, a more process-oriented approach through psychotherapy will be explored.
Course usually offered in spring term
Prerequisites: SWRK 812. Must be enrolled in D.S.W. program
Activity: Online Course
1.0 Course Unit

SWRK 814 Applied Statistics
This course is designed to provide students with a range of statistical methods and applications used for research in human services and clinical practice settings. Topics covered include types of measurement and variables, and basic concepts and techniques for exploring and categorizing data, for generalizing data from sample to population and tests of significance. An emphasis will be placed on the practical applications of data to address social work practice issues. Students will learn how to choose and apply statistical tools to data sources, when and how statistical tools can be used to analyze data, and how to interpret others’ quantitative studies. Students will gain hands-on experience in using windows-based statistical software to manage and analyze quantitative data.
Course usually offered in spring term
Prerequisites: Must be enrolled in D.S.W. program
Activity: Online Course
0.5 Course Units

SWRK 815 Dissertation Seminar I
This seminar is designed to prepare participants for dissertation proposal writing and defense. Each component of this workshop moves the student closer to the two culminating assignments: a concisely crafted and well-supported 15-25 page written draft of the dissertation proposal and a presentation of the proposal with accompanying Powerpoint.
Activity: Online Course
1.0 Course Unit

SWRK 816 Dissertation Seminar II
This seminar continues the student's dissertation work beyond the proposal. Under the direction of the dissertation chair and committee, the student begins the process of collecting and analyzing data in preparation for the final write-up and defense of the dissertation.
Prerequisites: SWRK 815. Must be enrolled in the DSW program.
Activity: Online Course
1.0 Course Unit

SWRK 852 Social Work Research
This is the foundation course in social work research. It deals with the nature of scientific inquiry; theory and its relation to research design and hypothesis testing; and various models of data collection, sampling, and analysis of research and is supported in following personal interests within the structure of ethical scientific research. Each student prepares an original study which demonstrates integration of the semester's work. Students learn to work on their own. Students completing this class are prepared for more advanced coursework in research. Taught by: Solomon
Course usually offered in fall term
Prerequisites: Completion of concurrent enrollment in a course on introductory Social Statistics.
Activity: Lecture
1.0 Course Unit

SWRK 855 Advanced Research Methods
The methodology of accountability research in human service programs is studied. Emphasis is placed on social program evaluation, idiographic research, and secondary data analysis in policy research as specialized methods of social work research. Students undertake a laboratory experience in an ongoing program evaluation project.
Course usually offered in spring term
Prerequisites: SWRK 852 and Introduction to Statistics
Activity: Lecture
1.0 Course Unit
Notes: PhD course

SWRK 861 Policy Analysis
This course examines alternative models of policy development and applies them to current issues in social welfare. It emphasizes frameworks for policy research and secondary analysis of governmental data. Topics include: race, class, and sex in policy outcomes; major social welfare programs; and the design, implementation, and evaluation of social service systems.
Course usually offered in spring term
Prerequisite: Must have successfully completed a course in multivariate statistics
Corequisite: PhD course
Activity: Lecture
1.0 Course Unit
SWRK 900 Clinical DSW
Topics vary; see department for current course descriptions
Course offered summer, fall and spring terms
Prerequisites: Must be enrolled in D.S.W. program
Activity: Online Course
0.25 Course Units

SWRK 901 Proseminar
This course is a weekly, 90-minute (.5 course unit) proseminar. The course contains two main components: a research seminar (i.e., faculty and student presentations of their in-progress research) and skills training (e.g., how to write an abstract, software demonstrations). The two are interwoven throughout the academic year (e.g., 2 weeks of the month devoted to the research seminar and 2 weeks of the month devoted to skills training). The proseminar is required of all students until they successfully defend their dissertation proposal.
One-term course offered either term
Corequisite: PhD course
Activity: Lecture
0.5 Course Units

SWRK 902 Trauma-informed Social Work Practice
The majority of clients who present to a wide variety of social services have been exposed to adversity and trauma, often beginning in childhood. As a result, the current standard of care requires that human service delivery systems of all kinds need to be "trauma-informed." This course will explore what that actually means, since administering "trauma-specific treatment" alone is not sufficient to encompass the complexity of the multigenerational, widespread problems that confront us in the world around us. Based on an understanding that our organizations are living systems, students will draw parallels between the individual experience of trauma and the organizational aspects of trauma and loss. Using these parallel processes as a basis, students will explore a trauma-informed, parallel process of organizational recovery called the "Sanctuary Model." Course usually offered in spring term
Prerequisites: Must be enrolled in D.S.W. program
Activity: Online Course
0.5 Course Units

SWRK 903 Relational Theory
This course will introduce the relational turn in theories of developments and psychotherapy. Relational theory emerged in the epistemological shift to postmodernism and social constructionism, characterized by concepts of knowledge as perspectival, constructed increased skill in developing a literature search, 3) developing a capacity to create operational hypotheses or questions, 4) developing a research design, and 5) designing a data analysis and interpretation plan. The aim of this course is to identify the shared principles of relational theories and apply these principles to clinical social work practice. Students will critically evaluate and compare and contrast relational psychoanalysis with relational-cultural theory. Students will evaluate the viability of relational theory in the field of clinical social work and consider the application of relational theory beyond the therapy room to the supervisory, agency and teaching contexts. The focus on case studies as examples will be key to understanding the clinical applications of the various medications we will discuss.
Prerequisites: Enrolled in the D.S.W. program
Activity: Online Course
1.0 Course Unit

SWRK 904 Teaching
This class will focus on classroom dynamics, class culture and instructor skills using an organismic model in which the class has a life of its own and is capable of growth and development. In addition, students will learn underlying theories, research, practice wisdom, etc. that we need to communicate to our students. The course should be helpful in thinking about issues that are central to effective teaching regardless of the practice models you present to your students or the content of courses including policy, research, etc. Students will have an opportunity to share their current or past teaching with a particular emphasis on those difficult moments when they had second thought about classroom teaching as a career. Examples will be used to help illustrate the theoretical content and the readings and bring the ideas to life as they address the real day-to-day issues we all face in teaching.
Prerequisites: Enrolled in the D.S.W. program
Activity: Online Course
1.0 Course Unit

SWRK 905 Family-Based Interventions
This advanced-level course focuses on social work interentions with children, couples and families. Theories and research that ground family-based interventions are explored and interrogated. Through case conceptualizations, role plays and other in-vivo exercises, students will practice techniques for assessment and treatment of family systems.
Prerequisites: Must be enrolled in D.S.W. program
Activity: Online Course
1.0 Course Unit

SWRK 906 Culture, Race, and Identity
Course usually offered in spring term
Activity: Online Course
0.25 Course Units

SWRK 910 Advanced Topics in Practice Development
Students will pursue a broad range of topics that advance the theory-base and practice of social work. Historical as well as contemporary social work literature is reviewed vis-a-vis their contribution to the knowledge development needs of the profession.
Course usually offered in spring term
Activity: Online Course
0.25 Course Units

SWRK 911 Soc Constrctn & Sw Pract
Course usually offered in spring term

1.0 Course Unit

SWRK 920 Advanced Topics in Social Work Practice
Topics vary; see department for current titles and descriptions
Course usually offered in spring term
Prerequisites: Must be enrolled in the D.S.W. program
Activity: Online Course
0.25 Course Units

SWRK 968 Social Welfare Economics
This course examines the social welfare aspects of major economic decisions in the United States. Particular attention is paid to exploring the implications of social choices in relation to the goals of the achievement of increased equity and equality in the distribution of income and power; the elimination of unemployment, and the control of inflation. The growth of public welfare programs and the base of funding for social services are examined in terms of the nation's economic and political objectives
Activity: Lecture
1.0 Course Unit
**Sociology (SOCI)**

**SOCI 001 Introduction to Sociology**
Sociology provides a unique way to look at human behavior and social interaction. Sociology is the systematic study of the groups and societies in which people live. In this introductory course, we analyze how social structures and cultures are created, maintained, and changed, and how they affect the lives of individuals. We will consider what theory and research can tell us about our social world.

For BA Students: Society Sector
Taught by: Imoagene, Jacobs, Lareau, Wilde, Zuberi
One-term course offered either term
Also Offered As: AFRC 002
Activity: Lecture
1.0 Course Unit

**SOCI 002 Social Problems and Public Policy**
This course approaches some of today’s important social and political issues from a sociological vantage point. The course begins by asking where social problems come from. The main sociological perspectives of Marx, Weber and Durkheim are developed in connection with the issues of inequality, social conflict and community. We then turn to the social construction of social problems by examining how various issues become defined as social problems. This involves a consideration of the role of the media, social experts and social movements. The last section of the course considers how social problems are addressed. Here we discuss the relative strengths and weaknesses of government programs and regulations versus market-based approaches. We also discuss the role of philanthropy and volunteerism. Finally, we consider the risk of unanticipated consequences of reforms. Along the way, we will consider a variety of social issues and social problems, including poverty, immigration, crime, global warming, and education.

Taught by: Bosk, Jacobs
Course not offered every year
Activity: Seminar
1.0 Course Unit

**SOCI 003 Deviance and Social Control**
A sociological analysis of the origins, development, and reactions surrounding deviance in contemporary society. Topics include labeling theory, stigma, social organization, tradition, social power, crime, sexual deviance, drug use, and racism. Theoretical and methodological issues will be discussed and evaluated.

For BA Students: Society Sector
Taught by: Bosk
One-term course offered either term
Activity: Lecture
1.0 Course Unit

**SOCI 004 The Family**
Most men and women get married during their lifetimes. In addition, most men and women become fathers and mothers at some point. This class presents social science evidence on the family. For example, it shows how "greedy" workplaces, which require long work hours, create work-family conflicts for husbands and wives. The class also illuminates how men and women have different experiences within families. The lectures will also examine how economic inequality shapes family life. Students will have the opportunity to apply key concepts to daily life. All are welcome.

For BA Students: Society Sector
Taught by: Lareau, Gonalons
One-term course offered either term
Also Offered As: GSWS 004
Activity: Lecture
1.0 Course Unit

**SOCI 005 American Society**
What is American Society? The literary critic, Leslie Fielder once wrote, "...to be an American...precisely to imagine a destiny rather than to inherit one; since we have always been, insofar as we are Americans at all, inhabitants of myth rather than history..." In this course we will explore the elements of the myth that form the basis of the civil religion as well as the facts on the ground that contradict our conceptions of American Society. Examples of mythic elements and their contradiction that we will explore are: A nation founded to pursue liberty and freedom yet allowed slavery, equality of opportunity and persistent structural inequality, and a welcoming of the Immigrant coupled with a suspicion of the outsider.

For BA Students: Humanities and Social Science S
Taught by: Bosk
One-term course offered either term
Activity: Lecture
1.0 Course Unit
Notes: Also fulfills General Requirement in Society for Class of 2009 and prior

**SOCI 006 Race and Ethnic Relations**
The course will focus on race and ethnicity in the United States. We begin with a brief history of racial categorization and immigration to the U.S. The course continues by examining a number of topics including racial and ethnic identity, interracial and interethnic friendships and marriage, racial attitudes, mass media images, residential segregation, educational stratification, and labor market outcomes. The course will include discussions of African Americans, Whites, Hispanics, Asian Americans and multiracials.

Taught by: Charles, Zuberi
One-term course offered either term
Also Offered As: AFRC 006, ASAM 006, URBS 160
Activity: Lecture
1.0 Course Unit
SOCI 007 Population and Society
The course serves as an introduction to the study of population and demography, including issues pertaining to fertility, mortality, migration, and family formation and structure. Within these broad areas we consider the social, economic, and political implications of current trends, including: population explosion, baby bust, the impact of international migration on receiving societies, population aging, racial classification, growing diversity in household composition and family structure, population and environmental degradation, and the link between population and development/poverty.
For BA Students: Society Sector
Taught by: Flippen, Kohler, Zuberi
One-term course offered either term
Also Offered As: GSWS 007
Activity: Lecture
1.0 Course Unit

SOCI 010 Social Stratification
In this course we study the current levels and historical trends of inequality in the United States especially in cross-national comparative perspective. We discuss causes and consequences of inequality as well as various policy efforts to deal with inequality. Topics include intergenerational social mobility, income inequality, education, gender, race and ethnicity among others.
For BA Students: Society Sector
Taught by: Jacobs, Staff
Course not offered every year
Activity: Lecture
1.0 Course Unit

SOCI 011 Urban Sociology
This course is a comprehensive introduction to the sociological study of urban areas. This includes more general topics as the rise of cities and theories urbanism, as well as more specific areas of inquiry, including American urbanism, segregation, urban poverty, suburbanization and sprawl, neighborhoods and crime, and immigrant ghettos. The course will also devote significant attention to globalization and the process of urbanization in less developed counties.
Taught by: Flippen
Course not offered every year
Also Offered As: AFRC 011, URBS 112
Activity: Seminar
1.0 Course Unit

SOCI 012 Globalization
This course analyses the current state of globalization and sets it in historical perspective. It applies the concepts and methods of anthropology, history, political economy and sociology to the analysis and interpretation of what is actually happening in the course of the semester that relates to the progress of globalization. We focus on a series of questions not only about what is happening but about the growing awareness of it and the consequences of the increasing awareness. In answering these questions we distinguish between active campaigns to cover the world (e.g. Christian and Muslim proselytism, free-trade agreements, democratization) and the unplanned diffusion of new ways of organizing trade, capital flows, tourism and remote interaction via the Internet. The body of the course deals with particular dimensions of globalization, reviewing both the early and recent history of each. The overall approach is historical and comparative, setting globalization on the larger stage of the economic, political and cultural development of various parts of the modern world. The course is taught collaboratively by an anthropologist, an historian, and a sociologist, offering the opportunity to compare and contrast distinct disciplinary approaches. It seeks to develop a general social-science-based theoretical understanding of the various historical dimensions of globalization: economic, political, social and cultural.

SOCI 030 Outsider Within: Unpacking Intersectionality in Everyday Life
Who belongs within the fabric of American society? Put another way, who is protected by social and political structures and institutions and who is targeted? In what ways do social categories such as race, class, and gender render or reduce equal access to socio-political structures and institutions? Black feminist scholars have uncovered the ways in which social categories such as race and gender augment one’s social standing in American society, including the provision of equality, opportunity, and outcomes. Legal scholar Kimberle Crenshaw coined the term "intersectionality" to describe the interlocking oppressions that black women uniquely faced as occupants of two social identity categories: "black" and "woman", not one or the other. Since then, critical scholars have greatly expanded the concept to include non-black women and other groups. Further, there has been a call to examine marginalized social groups beyond their oppressed status, but as agents of change. In this course, we will develop theoretical and practical knowledge of intersectionality in contemporary American society that goes beyond the original formulation of the theory. This is a critical speaking seminar with a focus on improving and evaluating oral communication skills. We will discuss the theoretical tenets of intersectionality and its uses for analyzing pressing social problems. Each week, we will analyze a contemporary sociological issue, drawing from popular culture, visual mediums, multi-media, and new media to understand and apply intersectionality theory. There will be written and spoken communication assignments due weekly. In addition to in-class assignments, our work will culminate in two major oral communication projects: an individual and group oral communication project, both with a multitude of creative possibilities. Come prepared to engage yourself as an orator, collaborator, and sociological thinker.
Taught by: Moss
Activity: Seminar
1.0 Course Unit
SOCI 033 Technology & Society
Technology plays an increasing role in our understandings of ourselves, our communities, and our societies, in how we think about politics and war, science and religion, work and play. Humans have made and used technologies, though, for thousands if not millions of years. In this course, we will use this history as a resource to understand how technologies affect social relations, and conversely how the culture of a society shapes the technologies it produces. Do different technologies produce or result from different economic systems like feudalism, capitalism and communism? Can specific technologies promote democratic or authoritarian politics? Do they suggest or enforce different patterns of race, class or gender relations? Among the technologies we'll consider will be large objects like cathedrals, bridges, and airplanes; small ones like guns, clocks and birth control pills; and networks like the electrical grid, the highway system and the internet.

Activity: Seminar
1.0 Course Unit
Notes: Freshman Seminars. Topics vary from semester to semester. See Freshman Seminar and Sociology websites for current offerings.

SOCI 100 Introduction to Sociological Research
One of the defining characteristics of all the social sciences, including sociology, is a commitment to empirical research as the basis for knowledge. This course is designed to provide you with a basic understanding of research in the social sciences and to enable you to think like a social scientist. Through this course students will learn both the logic of sociological inquiry and the nuts and bolts of doing empirical research. We will focus on such issues as the relationship between theory and research, the logic of research design, issues of conceptualization and measurement, basic methods of data collection, and what social scientists do with data once they have collected them. By the end of the course, students will have completed sociological research projects utilizing different empirical methods, be able to evaluate the strengths and weaknesses of various research strategies, and read (with understanding) published accounts of social science research.
Taught by: Armenta, Koppel, Park, Smith, Wilde
One-term course offered either term
Also Offered As: HSOC 100
Activity: Lecture
1.0 Course Unit

SOCI 101 Bioethics
This course will take an historical approach to the development of modern bioethics, which is the study of ethical issues in medicine and the life sciences. The first part of the course will be devoted to an introduction to the standard principles of academic bioethics and the way they have structured the field over the last 35 years. We will then consider topics to which the principles have long been applied, such as the care of gravely ill newborns, death and dying, and the ethics of research involving human subjects. The last part of the course will address more recent life sciences policy areas including genetics, cloning, stem cells, biodefense, and neuroscience in relation to national security. Throughout the course I will emphasize the interplay between the development of bioethics and its cultural context.
Taught by: Moreno
Course not offered every year
Also Offered As: HSOC 102
Activity: Lecture
1.0 Course Unit

SOCI 103 Asian Americans In Contemporary Society
This class will introduce you to sociological research of Asian Americans and engage in the "model minority" stereotype. We begin by a brief introduction to U.S. immigration history and sociological theories about assimilation and racial stratification. The class will also cover research on racial and ethnic identity, educational stratification, mass media images, interracial marriage, multiracial, transracial adoption, and the viability of an Asian American panethnic identity. We will also examine the similarities and differences of Asian Americans relative to other minority groups.
For BA Students: Society Sector
Course not offered every year
Also Offered As: ASAM 001
Activity: Lecture
1.0 Course Unit

SOCI 110 The Rich and The Poor
Who is rich? Who is poor? This course examines how wealth and income are distributed in the United States, and how its distribution affects individuals, groups, institutions, and society. We will gain a fuller understanding of what social class is and discuss how it affects all aspects of life, including: quality of schooling, access to employment, child rearing, and even tastes, preferences, and identity.
Taught by: Armenta, Lareau, Staff
Course not offered every year
Activity: Lecture
0.0 Course Units
SOCI 111 Health of Populations
This course is designed to introduce students to the quantitative study of factors that influence the health of populations. Topics to be addressed include methods for characterizing levels of health in populations, comparative and historical perspectives on population health, health disparities, health policy issues and the effectiveness of interventions for enhancing the health of populations. These topics will be addressed both for developed and developing world populations. The course will focus on specific areas of health and some of the major issues and conclusions pertaining to those domains. Areas singled out for attention include chronic diseases and their major risk factors, such as smoking, physical activity, dietary factors and obesity. Throughout the course, the focus will be on determining the quality of evidence for health policy and understanding the manner in which it was generated.
Taught by: Elo, Kohler
One-term course offered either term
Also Offered As: HSOC 111
Activity: Lecture
1.0 Course Unit

SOCI 112 Discrimination: Sexual and Racial Conflict
This course is concerned with the structure, the causes and correlates, and the government policies to alleviate discrimination by race and gender in the United States. The central focus of the course is on employment differences by race and gender and the extent to which they arise from labor market discrimination versus other causes, although racial discrimination in housing is also considered. After a comprehensive overview of the structures of labor and housing markets and of nondiscriminatory reasons (that is, the cumulative effects of past discrimination and/or experiences) for the existence of group differentials in employment, wages and residential locations, various theories of the sources of current discrimination are reviewed and evaluated. Actual government policies and alternatives policies are evaluated in light of both the empirical evidence on group differences and the alternative theories of discrimination.
For BA Students: Society Sector
Taught by: Madden
Course not offered every year
Also Offered As: AFRC 112, GSWS 114
Activity: Lecture
1.0 Course Unit

SOCI 113 Economic Inequality, Advantage and the Rich
This class explores key issues of inequality from the perspective of advantage. While social scientists studying inequality have more traditionally focused on poverty and disadvantage, we will read and discuss issues of capital, riches, and economic advantage, paying attention to intersections of economic advantage and riches with gender, ‘race’ and class. We will address inequalities in the labour as well as capital markets, debate how we can conceptualise and measure those who are ‘rich’, and look at the relationship between riches, whiteness, masculinity and privilege. Students are encouraged to bring their ideas of riches and advantage to class.
Taught by: Hecht
Course not offered every year
Activity: Seminar
1.0 Course Unit

SOCI 117 Sociology of Work
The material world is shaped and maintained through work, but so is the social world. How work is organized, allocated, and rewarded determines the opportunities people have for developing their own capacities, the kinds of ties they will have with others, and how much control they will have over their own lives. We will consider various sociological perspectives on work and compare alternative ways of organizing work, with a focus on the contemporary United States.
Taught by: Jacobs, Leidner
Course not offered every year
Activity: Lecture
1.0 Course Unit

SOCI 120 Social Statistics
This course offers a basic introduction to the application/interpretation of statistical analysis in sociology. Upon completion, you should be familiar with a variety of basic statistical techniques that allow examination of interesting social questions. We begin by learning to describe the characteristics of groups, followed by a discussion of how to examine and generalize about relationships between the characteristics of groups. Emphasis is placed on the understanding/interpretation of statistics used to describe and make generalizations about group characteristics. In addition to hand calculations, you will also become familiar with using PCs to run statistical tests.
Taught by: Allison, Charles, Guillot, Koppel, Park, Parrado
One-term course offered either term
Also Offered As: AFRC 120
Activity: Recitation
0.0 Course Units

SOCI 122 The Sociology of Gender
Gender is an organizing principle of society, shaping social structures, cultural understandings, processes of interaction, and identities in ways that have profound consequences. It affects every aspect of people’s lives, from their intimate relationships to their participation in work, family, government, and other social institutions and their place in the stratification system. Yet gender is such a taken for granted basis for differences among people that it can be hard to see the underlying social structures and cultural forces that reinforce or weaken the social boundaries that define gender. Differences in behavior, power, and experience are often seen as the result of biological imperatives or of individual choice. A sociological view of gender, in contrast, emphasizes how gender is socially constructed and how structural constraints limit choice. This course examines how differences based on gender are created and sustained, with particular attention to how other important bases of personal identity and social inequality–race and class–interact with patterns of gender relations. We will also seek to understand how social change happens and how gender inequality might be reduced.
For BA Students: Society Sector
Taught by: Leidner
One-term course offered either term
Also Offered As: GSWS 122
Activity: Lecture
1.0 Course Unit
SOCI 125 Classical Sociological Theory
This course will cover the founding classics of the sociological tradition including works of Tocqueville, Marx and Engels, Weber, Durkheim, Mauss, Simmel, and G.H. Mead. We will also examine how the major traditions have continued and transformed into theories of conflict, domination, resistance and social change; social solidarity, ritual and symbolism; symbolic interactionist and phenomenological theory of discourse, self and mind. This course satisfies the theory requirement for sociology majors.
One-term course offered either term
Activity: Lecture
1.0 Course Unit

SOCI 126 Contemporary Sociological Theory
This course will explore contemporary social theory with an emphasis on theories and theoretical orientations related to social interaction, identity, culture, and inequality. For example, we will discuss sociological theories from the last half century about race and racism, gender, social class, education, emotion, and violence. Importantly, we will consider theory in the context of its application to empirical social science research and real world concerns. The course fulfills the theory requirement for sociology minors and all sociology majors.
One-term course offered either term
Activity: Lecture
1.0 Course Unit

SOCI 128 Introduction to Demographic Methods
This course provides an introduction to basic demographic concepts, data, indicators, and techniques. The course emphasizes hands-on applications of techniques in the analysis of population dynamics in the U.S. and elsewhere. Students will learn about the main sources of demographic data, including censuses, surveys, and vital statistics, and methods to estimate demographic processes (e.g. mortality, fertility). Students will leave the course with a solid grounding in a) the sources and limitations of demographic data; b) the construction of basic demographic indicators; and c) appropriate use of basic demographic techniques to answer questions about human populations.
Taught by: Elo, Hannum, Smith
One-term course offered either term
Activity: Lecture
1.0 Course Unit

SOCI 134 Health and Social Policy
Health and Social Policy is an interdisciplinary course examining health care and social policy from domestic and international perspectives. The course is designed to engage students in critical thinking about social determinants of health, the organization and outcomes of health care systems and institutions, global health priorities and challenges, and the implications for public policy. Topics include the social inequalities and health; how organizational context of health care impacts outcomes; management of human resources in health nationally and globally; analysis of medical error, its causes, and consequences; review and critique of public policies in U.S. health care; and global health priorities and international health policy. Issues of current public debate in health and health care will provide a context for learning. There are no prerequisites. The course is intended for general lists as well as for those planning careers in health care.
For BA Students: Society Sector
Taught by: Aiken, Lake

Activity: Lecture
1.0 Course Unit

SOCI 135 Law and Society
After introducing students to the major theoretical concepts concerning law and society, significant controversial societal issues that deal with law and the legal systems both domestically and internationally will be examined. Class discussions will focus on issues involving civil liberties, the organization of courts, legislatures, the legal profession and administrative agencies. Although the focus will be on law in the United States, law and society in other countries of Africa, Asia, Europe and Latin America will be covered in a comparative context. Readings included research reports, statutes and cases.
Taught by: Bosk, Fetni
One-term course offered either term
Also Offered As: AFRC 135
Activity: Lecture
1.0 Course Unit

SOCI 137 The Sociology of Media and Popular Culture
This course relies on a variety of sociological perspectives to examine the role of media and popular culture in society, with a particular emphasis on the power of the mass media industry, the relationship between cultural consumption and status, and the social organization of leisure activities from sports to shopping.
For BA Students: Society Sector
Taught by: Grazian
One-term course offered either term

Activity: Lecture
1.0 Course Unit

SOCI 143 Modern Social Movements
Throughout modern times groups of people have come together in an attempt to change their social world. Their successes and failures teach us about society, organizations, and individuals. This course will examine case studies of historical and contemporary social movements. Using these case studies, this course will evaluate different approaches to understanding social movements, and investigate what these different approaches suggest about individuals, the society in which they live, and the potential for social change.
Course not offered every year
Activity: Lecture

SOCI 150 Ethnic Economies and Globalization
Topics vary according to the interests and expertise of instructors.
One-term course offered either term
Also Offered As: ASAM 201, URBS 215
Activity: Lecture
1.0 Course Unit
SOCI 152 American Health Policy
This lecture course will introduce students to a broad range of topics that fall under the heading of American health policy. Its main emphasis will be on the history of health care in America from the U.S. Civil War to Obamacare. The primary objective of the course will be to consider why the U.S., until very recently, remained one of the only industrialized nations to have a private, non-nationalized health care system. Some of the themes addressed include: private health insurance such as Blue Cross/Blue Shield, industrial health and workmen's compensation, the welfare state (in Europe, Canada, and the U.S.), women's health, especially maternal and infant care programs, Medicare/Medicaid, the Clinton Health Plan of 1993, injured soldiers and the Veterans Administration.
Taught by: Linker
Course not offered every year
Also Offered As: HSOC 150
Activity: Lecture
1.0 Course Unit

SOCI 154 Afro-Latinos in the U.S.
This course will explore the arrival, establishment and contributions of free and enslaved Africans in Ibero-America, the region presently known as Latin America, and the Spanish Speaking Caribbean. It will look at how these actors and their descendants known today as Afro-Latinos, shaped and built the foundations of Latin American society and culture throughout the centuries from colonial period to present. The course will seek to understand Afro-Latinos’ agency and negotiations as intellectual contributors to the ideologies that led to independence and the creation of Latin American nations. Likewise, the course will also explore the accomplishments, controversies and tensions in race dynamics and politics, gender relations, socioeconomic issues, among others factors that took and continue to take place as people of African descent negotiate their identity and struggle to uphold their space in Latin America and the U.S.A. today.
Course usually offered in fall term
Also Offered As: AFRC 155, LALS 155
Activity: Lecture
1.0 Course Unit

SOCI 159 Population and Public Health in Eastern Europe
Since the collapse of communism in 1989 in Eastern Europe (and 1991 in the Soviet Union), many of the countries in the region have experienced public health crises and demographic catastrophe. Below replacement fertility rates and massive out migration have decimated the populations of these countries even as populations age and place unsustainable strains on pension systems and medical services. The demographic collapse has also been accompanied by falling male life expectancy and the rise of alcoholism, depression, domestic violence, and suicide. The economic exigencies of the transition from communism to capitalism dismantled welfare states at the exact moment when health services were most needed, leaving charities and nongovernmental organization to try to fill in the gaps. Through a combination of readings from the fields of epidemiology, demography, and medical anthropology, this course examines the public health implications of poverty and social dislocation in post-communist states. All readings and assignments are in English.
Taught by: GHODSEE
Also Offered As: ANTH 159, REES 159
Activity: Lecture
1.0 Course Unit

SOCI 161 The History of the Information Age
Certain new technologies are greeted with claims that, for good or ill, they must transform our society. The two most recent: the computer and the Internet. But the series of social, economic and technological developments that underlie what is often called the Information Revolution include much more than just the computer. In this course, we explore the history of information technology and its role in contemporary society. We will explore both the technologies themselves—calculating machines, punched card tabulators, telegraph and telephone networks, differential analyzers, digital computers, and many others—and their larger social, economic and political contexts. To understand the roots of these ideas we look at the prehistory of the computer, at the idea of the post-industrial or information society, at parallels with earlier technologies and at broad historical currents in the United States and the world.
For BA Students: Humanities and Social Science S
One-term course offered either term
Also Offered As: STSC 160
Activity: Lecture
1.0 Course Unit

SOCI 175 Medical Sociology
This course will give the student an introduction to the sociological study of medicine. Medical sociology is a broad field, covering topics as diverse as the institution and profession of medicine, the practice of medical care, and the social factors that contribute to sickness and well-being. Although we will not explore everything, we will attempt to cover as much of the field as possible through four thematic units: (1) the organization and development of the profession of medicine, (2) the delivery of health-care, especially doctor-patient interaction, (3) the social and cultural factors that affect how illness is defined, and (4) the social causes of illness. The class will emphasize empirical research especially but not only quantitative research.
For BA Students: Society Sector
Taught by: Schnittker
Also Offered As: HSOC 275
Activity: Lecture
1.0 Course Unit

SOCI 200 Criminal Justice
This course examines how the criminal justice system responds to crime in society. The course reviews the historical development of criminal justice agencies in the United States and Europe and the available scientific evidence on the effect these agencies have on controlling crime. The course places an emphasis on the functional creation of criminal justice agencies and the discretionary role decision makers in these agencies have in deciding how to enforce criminal laws and whom to punish. Evidence on how society measures crime and the role that each major criminal justice agency plays in controlling crime is examined from the perspective of crime victims, police, prosecutors, jurors, judges, prison officials, probation officers and parole board members. Using the model of social policy evaluation, the course asks students to consider how the results of criminal justice could be more effectively delivered to reduce the social and economic costs of crime.
For BA Students: Society Sector
Taught by: MacDonald
One-term course offered either term
Also Offered As: CRIM 200
Activity: Lecture
1.0 Course Unit
SOCI 221 Sample Survey Methods
This course provides an introduction to survey data collection. In meeting this objective, we examine the major planning tasks necessary for conducting surveys, including problem formulation, study design, questionnaire and interview design, pretesting, sampling, interviewer training and field management, code development and coding of data, and data cleaning and management. We critically explore the design of surveys and collection of data from epistemological and ethical perspectives. Students will leave the class with a solid understanding of the basic process of survey data collection and a familiarity with its strengths and weaknesses as a method of inquiry into human behavior. Taught by: Hannum, Parrado
Course not offered every year
Activity: Seminar
1.0 Course Unit

SOCI 222 Field Methods of Sociological Research
This course is designed to introduce students to field methods in sociological research, with a focus on participant-observation and interviewing. During this course, students will read original research based on field methods and discuss their strengths, limitations, and ethical dilemmas. Most importantly, students will design their own research projects and become ethnographers and interviewers. Students will be guided through the fieldwork process from data collection to analysis, and will turn in multiple assignments and original research paper.
Taught by: Armenta, Bosk, Koppel, Lareau
Course not offered every year
Activity: Seminar
1.0 Course Unit

SOCI 233 Criminology
This introductory course examines the multi-disciplinary science of law-making, law-breaking, and law-enforcing. It reviews theories explaining where, when, by whom and against whom crimes happen. Police, courts, prisons, and other institutions are also critically examined. This course meets the general distribution requirement.
For BA Students: Society Sector
Taught by: Adler
One-term course offered either term
Also Offered As: CRIM 100
Activity: Lecture
1.0 Course Unit

SOCI 235 Law and Social Change
Beginning with discussion of various perspectives on social change and law, this course then examines in detail the interdependent relationship between changes in legal and societal institutions. Emphasis will be placed on (1) how and when law can be an instrument for social change, and (2) how and when social change can cause legal change. In the assessment of this relationship, emphasis will be on the laws of the United States. However, laws of other countries and international law relevant to civil liberties, economic, social and political progress will be studied. Throughout the course, discussions will include legal controversies relevant to social change such as issues of race, gender and the law. Other issues relevant to State-Building and development will discussed. A comparative framework will be used in the analysis of this interdependent relationship between law and social change.
Taught by: Fetni
One-term course offered either term
Also Offered As: AFRC 235
Activity: Lecture
1.0 Course Unit

SOCI 238 Media Culture & Society in Contemporary China
This course studies contemporary Chinese media, culture, and society in the context of globalization. Major topics include Internet expression and censorship, mass media commercialization, entertainment media, middle class and consumerism, environmental degradation, new forms of inequality, and civil society and popular protest. Taking a sociological approach, this course introduces methods and theories for analyzing media, institutions, inequality, and social change.
Taught by: Yang
One-term course offered either term
Also Offered As: COMM 203
Activity: Lecture
1.0 Course Unit

SOCI 239 Sociology of Religion
How do the many religious institutions in our society differ, and what common qualities do they share? Why do some religious institutions adapt to modernity while others do not? In particular, why are the politics of sex and gender so fundamental to the current organization of the American religious landscape? These questions will be the central motivating questions for the semester. The course will begin with an introduction to current theories in the sociology of religion. We will then apply and critique those theories as we learn more about the histories, members, practices and beliefs of all the major religious groups in the US today, including Mainline, Fundamentalist and Evangelical Protestantism, Roman Catholicism, Judaism, and other groups such as the Seventh Day Adventists, Jehovah’s Witnesses and Mormons. Students will pick two religious groups (one liberal and one conservative) to observe over the course of the semester and will write papers comparing and contrasting the two groups.
Taught by: Wilde
Course not offered every year
Activity: Seminar
1.0 Course Unit

SOCI 250 Minorities And The Media
This course considers the theory and practice of minority representation in the public domain: film, theater, television, music, advertising and museums. How has "minority" been defined - who is included and why? How have notions of "minority" status been constructed in our public languages and what may be the impact of those images on both minority and non-minority populations? Our focus will be on representation and how it may work to marginalize or empower members of minority populations. While we will concentrate primarily on ethnic minorities, we will also consider how these same issues might affect sexual minorities. Our discussions will be supplemented by film and video examples. While the course will be theoretically situated in communication, it will consider how the perspectives of anthropology, feminism, and literary and ethnic studies have affected our understanding of public representations.
Course not offered every year
Also Offered As: AFRC 249
Activity: Lecture
1.0 Course Unit
SOCI 254 Cities, Suburbs, Regions
This course will explore the political, economic, social, and demographic forces impacting development patterns in metropolitan areas, with a particular focus on Philadelphia. We will examine the government policies, economic forces, and social attitudes that affect the way a region grows, and the impact of these forces on poverty, equity and segregation. Specific topics to be discussed include the factors that make a region competitive, the city’s changing role in the region, the impact place has on opportunity, and approaches to revitalizing and improving communities.
Taught by: Black
Course offered spring; even-numbered years
Also Offered As: URBS 253
Activity: Seminar
1.0 Course Unit

SOCI 258 Global Urban Education
This course examines the demographic, social, and economic trends impacting the growth of global cities—providing the context for global urban education. Through the dual lens of globalization and local urban culture, we explore relationships between urban education and economic development, democratic citizenship, social movements, social inclusion, equity, and quality of urban life. We consider key historical legacies (e.g., Colonialism), informal settlements and “slums,” the rise of the “knowledge economy,” and the role of international aid. Additional topics include: early childhood; gender equity; youth culture; impacts of crisis and war; urban refugees; teacher training and identity; accountability & governance; information & computer technology; religion, indigenous cultures, and language identity; & the role of the private sector and school choice. We focus on cities like Sao Paolo, Mexico City, Shanghai, Hong Kong, Ho Chi Minh City, Johannesburg, Lagos, Nairobi, Jakarta, Mumbai, Lahore, Tehran, and Cairo, and draw comparisons to cities like New York, London, Paris and Tokyo.
Taught by: Gershberg
Course not offered every year
Also Offered As: HSOC 260
Activity: Lecture
1.0 Course Unit

SOCI 259 Social Determinants of Health
Over the last century, we have witnessed dramatic historical change in population incidence and mortality, e.g. rising numbers of women diagnosed with breast cancer and dramatic declines in death from stomach cancer. There has also been a highly visible social patterning of health and disease, such as socio-economic disparities in AIDS, substance abuse, and asthma in the U.S. today or the association of breast cancer with affluence globally. This course will explore the way researchers, activists, politicians and others in different eras have made sense of these changes and patterns and have responded to them. The course is historical and sociological. At the same time that we examine evidence and theories about the way poverty, affluence, and other social factors influence individual and population health, we will try to understand how social and historical forces have shaped how health and disease have been understood and categorized. In examining our current obesity “epidemic,” for example, we will not only consider evidence and claims made about the causal role of market forces and changes in the built environment, but ask why (besides the fact that we are heavier) obesity has become such a visible and important medical and public health issue in the U.S. today.
Taught by: Aronowitz
Course not offered every year
Also Offered As: HSOC 260
Activity: Lecture
1.0 Course Unit

SOCI 264 Poverty, Race and Health
This course is designed to introduce students to current literature on race/ethnic difference in health and mortality in the United States, covering such topics as explanations for why some race/ethnic groups fare better than others, how inner city poverty and residential segregation may contribute to racial/ethnic differences in health outcomes, and health of immigrants versus native-born populations. Current policy debated and recent policy developments related to health are also briefly discussed. The course is organized as a seminar with a combination of lectures and class discussions.
Taught by: Elo
Course not offered every year
Also Offered As: URBS 264
Activity: Seminar
1.0 Course Unit
SOCI 266 Latinos in United States
This course presents a broad overview of the Latino population in the United States that focuses on the economic and sociological aspects of Latino immigration and assimilation. Topics to be covered include: construction of Latino identity, the history of U.S. Latino immigration, Latino family patterns and household structure, Latino educational attainment. Latino incorporation into the U.S. labor force, earnings and economic well-being among Latino-origin groups, assimilation and the second generation. The course will stress the importance of understanding Latinos within the overall system of race and ethnic relations in the U.S., as well as in comparison with previous immigration flows, particularly from Europe. We will pay particular attention to the economic impact of Latino immigration on both the U.S. receiving and Latin American sending communities, and the efficacy and future possibilities of U.S. immigration policy. Within all of these diverse topics, we will stress the heterogeneity of the Latino population according to national origin groups (i.e. Mexican, Puerto Rican, Cuban, and other Latinos), as well as generational differences between immigrants and the native born.
Taught by: Parrado, Armenta
One-term course offered either term
Also Offered As: LALS 235
Activity: Lecture
1.0 Course Unit

SOCI 268 Contemporary Issues in African Society
This course will deal with law and society in Africa. After surveying the various legal systems in Africa, the focus will be on how and to what extent the countries of Africa "re-Africanized" their legal systems by reconciling their indigenous law with western law and other legal traditions to create unified legal systems that are used as instruments of social change and development. Toward this end, the experiences of various African countries covering the various legal traditions will be included. Specific focus will be on laws covering both economic and social relations. This emphasis includes laws of contracts and civil wrongs, land law, law of succession, marriage and divorce and Africa's laws of International Relations, among other laws. Throughout this course a comparative analysis with non-African countries will be stressed.
Taught by: Omoagene, Zuberi
Also Offered As: AFRC 268
Activity: Lecture
1.0 Course Unit

SOCI 270 The Immigrant City
This course focuses on immigrant communities in United States cities and suburbs. We survey migration and community experiences among a broad range of ethnic groups in different city and suburban neighborhoods. Class readings, discussions, and visits to Philadelphia neighborhoods explore themes including labor markets, commerce, housing, civil society, racial and ethnic relations, integration, refugee resettlement, and local, state, and national immigration policies. The class introduces students to a variety of social science approaches to studying social groups and neighborhoods, including readings in sociology, geography, anthropology, social history, and political science. Ultimately, the class aims to help students develop: 1) a broad knowledge of immigration and its impacts on U.S. cities and regions; 2) a comparative understanding of diverse migrant and receiving communities; and 3) familiarity with policies and institutions that seek to influence immigration and immigrant communities.
For BA Students: Society Sector
Taught by: Vitiello, Domenic
Course usually offered in spring term
Also Offered As: LALS 273, URBS 270
Activity: Seminar
1.0 Course Unit

SOCI 277 Mental Illness
This course is designed to give a general overview of how sociologists study mental illness. We will be concerned with describing the contributions of sociological research and exploring how these contributions differ from those of psychology, psychiatry, and social work. This overview will be done in three parts: we will discuss (i) what "mental illness" is, (ii) precisely how many Americans are mentally ill, (iii) how social factors (e.g. race, gender, class) and social arrangements (e.g. social networks) lead to mental illness, and (iv) how we as a society respond to and treat the mentally ill. Throughout the course, we will be concerned with uncovering the assumptions behind different definitions of mental health and exploring their political, social, and legal implications.
Taught by: Schnittker
One-term course offered either term
Also Offered As: HSOC 277
Activity: Lecture
1.0 Course Unit

SOCI 299 Independent Study
Directed readings and research in areas of sociology. Permission of instructor needed.
One-term course offered either term
Activity: Independent Study
1.0 Course Unit
SOCI 300 Thesis Workshop
The purpose of this course is to guide senior sociology majors in writing a research proposal for a senior honors thesis. Students will learn about various research approaches, how to write a focused literature review, and kinds of data necessary to answer a wide variety of research questions, including their own. Throughout the course, students will work on designing a research question, generation researchable hypotheses, and coming up with a design for their proposed study. The final paper for this course will be a research proposal that is the basis for students' independent research project. This course satisfies the research requirement for sociology majors and is designed primarily for seniors who are planning to write an honors thesis.
One-term course offered either term
Prerequisite: SOCI 100
Activity: Seminar
1.0 Course Unit

SOCI 301 Thesis Workshop II
This is the second part of the Thesis Workshop course. Prerequisite: SOCI 300. Permission must be granted by the department.
Taught by: Flippen
One-term course offered either term
Prerequisite: SOCI 300
Activity: Independent Study
0.5 Course Units

SOCI 307 Race, Science & Justice
Taught by: Roberts
One-term course offered either term
Also Offered As: AFRC 307
Activity: Seminar
1.0 Course Unit

SOCI 325 Global Trans*
How do prevailing economic and political ideologies influence trans* experiences and theories of gender and sexuality? This course will examine this question from disciplinary perspectives across the social sciences and humanities. The main theme students will explore is that, as social relations, transgender identities or trans*nness as well as sex, gender and sexuality are produced through the interplay of individual desires and bodies with social norms. Just as sex and sexuality are not natural, unchanging entities or deep, inner essences of self or personhood, trans*nness is radically different where- and whenever it emerges across human societies. The course will survey theoretical and practical discussions over the implications of envisioning both trans*nness as both radical and normative; as sites for progressive politics as well as reinforcing oppressive social relations. Students will engage with a dimensional perspective, in lieu of the secret ethnocentrism of "intersectionality". Dimensionality makes visible markers of social difference, such as class, and nation as well as economic forces, that intersectionality ignores, and which change the many natures of global trans*nness.
Taught by: Fiereck
Also Offered As: ANTH 333, GSWS 333
Activity: Seminar
1.0 Course Unit

SOCI 398 Senior Research
Senior Research is for senior sociology majors only. Students are assigned Sociology advisors with assistance from Undergraduate Chair.
Taught by: Sociology Faculty
One-term course offered either term
Activity: Independent Study
1.0 Course Unit

SOCI 399 Independent Study
Independent study section for senior Sociology majors working on an honors thesis. Students are assigned an advisor by the undergraduate chair.
Taught by: Sociology Faculty
One-term course offered either term
Activity: Independent Study
1.0 Course Unit

SOCI 420 Perspectives on Urban Poverty
This course provides an interdisciplinary introduction to 20th century urban poverty, and 20th century urban poverty knowledge. In addition to providing an historical overview of American poverty, the course is primarily concerned with the ways in which historical, cultural, political, racial, social, spatial/geographical, and economic forces have either shaped or been left out of contemporary debates on urban poverty. Of great importance, the course will evaluate competing analytic trends in the social sciences and their respective implications in terms of the question of what can be known about urban poverty in the contexts of social policy and practice, academic research, and the broader social imaginary. We will critically analyze a wide body of literature that theorizes and explains urban poverty. Course readings span the disciplines of sociology, anthropology, urban studies, history, and social welfare. Primacy will be granted to critical analysis and deconstruction of course texts, particularly with regard to the ways in which poverty knowledge creates, sustains, and constrains meaningful channels of action in urban poverty policy and practice interventions.
Taught by: Fairbanks
Course usually offered in fall term
Also Offered As: HIST 440, URBS 420
Activity: Seminar
1.0 Course Unit

SOCI 424 Latinx Communities and the Role of CBO’s in Social Change
The purpose of this course to create a Latino Studies/Service Learning ABCS course that cultivates dialogue and knowledge about the social, political, cultural and historical complexities of the Latinx experience in the United States (Philadelphia in particular) and the roles Latinx CBO's play in meeting the needs of Latinx communities and in impacting social change.
Taught by: Irizarry
Course usually offered in fall term
Also Offered As: LALS 424
Activity: Seminar
1.0 Course Unit
SOCI 435 Globalization & The City: Global Urbanization
In 2008, the UN estimated that the world's population had become primarily urban, for the first time in history. According to the OECD, by the end of the century, close to 85% of the projected population will live in cities. The transition towards an urban planet is likely to have far-reaching economic, environmental, social, political, and cultural impacts on our species, many of which we cannot yet predict. But what is urbanization? Will it lead to more inequality, exploitation, conflict, resource consumption, and exposure to natural disasters and climate change, or is it an opportunity to move the world in a more sustainable and equitable direction? Taught by Chandan Deuskar and Patricio Zambrano Barragan, this course aims to explore these questions. In the first half of the semester, we will discuss various challenges associated with global urbanization and its impacts. In the second half, we will focus on responses to these challenges. The assignments will allow students to explore some of the most salient debates around global urbanization. By the end of the semester, students will be better able to understand the context for any future academic research, professional work, or business activities in the cities of the 'developing world'. The course will help provide a foundation for any students considering graduate studies or professional work in the fields of urban planning or international development.
Taught by: Chandan Deuskar and Patricio Zambrano Barragan
Course not offered every year
Also Offered As: URBS 457
Activity: Seminar
1.0 Course Unit

SOCI 453 Metropolitan Growth and Poverty
This course analyzes the role of metropolitan regions in the U.S. and global economies, including the sources of metropolitan productivity, the ways that metropolitan structures affect residents, and analyses of public policy in metropolitan areas. The economic, political, and social forces that have shaped World War II urban and regional development are explored, including technology, demography, and government. Special attention is paid to how metropolitan change affects residents by income and race. Topics include: gentrification, schools, suburbanization, sprawl, metropolitan fragmentation, concentration of poverty, race, and various economic revitalization initiatives.
Taught by: Madden
One-term course offered either term
Also Offered As: URBS 453
Activity: Seminar
1.0 Course Unit

SOCI 473 The History & Theory of Community Organizing
"Power concedes nothing without a demand."--Frederick Douglass. "Workers of the world, unite!"--Karl Marx. "Don't mourn. Organize."--Joe Hill. "Strong people do not need strong leaders."--Elia Borer. "Freedom is a constant struggle."--Angela Davis. We will review the history and theory of critique, resistance, and solidarity, as we consider old and new social movements and freedom struggles around the world (Africa, the Americas, Europe, Asia)--from encampments for indigenous sovereignty of tribal lands to demonstrations by poor and working people seeking "the right to the city," from sit-ins and strikes to occupations and takeovers, from uprisings and insurrections to revolutions and counterrevolutions, from anti-capitalist, anti-colonial, anti-racist, and anti-racist insurgencies to mobilizations for racial and gender justice and solidarity economy; from civil rights, labor rights, student rights, human rights, animal rights, and environmental organizing to movements for peace, democracy, equality, and liberation--and more (based on student interests and commitments). Strategies and techniques will be reviewed. Successes and failures will be registered. Limitations and possibilities will be debated. Source material will be drawn from mainstream and radical traditions within popular praxis and numerous fields, including urban studies, philosophy and critical theory, religion, history, art and culture, anthropology, politics, development economics, social psychology, sociology, organizational development, and law. Note: Attendance at the first class is mandatory (for those already enrolled and for those considering enrollment in the course). Enrolled students who miss the first class must drop the course. Those who were not able to enroll but who attend the first class will be permitted to enroll.
Taught by: Lamas
Course not offered every year
Also Offered As: URBS 473
Activity: Seminar
1.0 Course Unit

SOCI 488 Topics: Culture, Sexuality and Global Health
What, if anything, is global in "global health"? Whatever this field might be, it is more often than not actively produced through a range of conflicting ethical commitments of multiple expert cultures, social movements and laypersons. This course explores critical themes in the historical and sociocultural study of global health. Students will engage a number of disciplinary perspectives within the social sciences including the history, sociology, and anthropology of science, and we will pay particular attention to feminist, queer, and postcolonial science studies perspectives. Throughout, we will consider how both global and local cultural transformations have shaped the emergence of this multidisciplinary field of study. To understand the complexity of global health, students will engage with a number of theoretical and ethnographic texts while questioning its stability and coherence as a self-same object given its interdisciplinary character. In doing so, we will explore the ways in which diverse sets of interests converge to constitute as well as contest the ever-shifting boundaries of global health.
Taught by: Fiereck
Course usually offered in fall term
Also Offered As: AFRC 488, ANTH 488, GSWS 488
Activity: Seminar
1.0 Course Unit
SOCI 535 Quantitative Methods in Sociology I
This course is an introduction to the practice of statistics in social and behavioral sciences. It is open to beginning graduate students and--with the permission of the instructor--advanced undergraduates. Topics covered include the description of social science data, in graphical and non-graphical form; correlation and other forms of association, including cross-tabulation; bivariate regression; an introduction to probability theory; the logic of sampling; the logic of statistical inference and significance tests. There is a lecture twice weekly and a mandatory "lab."
Taught by: Allison, Smith
Course usually offered in fall term
Also Offered As: DEMG 535
Prerequisite: Basic algebra
Activity: Lecture
1.0 Course Unit

SOCI 536 Quantitative Methods in Sociology II
As the second part of a two-semester sequence, this graduate course focuses on regression analysis as used in social science research. In particular, we discuss features and assumptions of linear regression and logistic regression models. We learn how to apply regression models to real social science data using Stata and how to interpret the results.
Taught by: Allison, Kohler, Park, Schnittker, Smith
Course usually offered in spring term
Also Offered As: DEMG 536
Prerequisite: SOCI 535 or permission of instructor
Activity: Lecture
1.0 Course Unit

SOCI 544 Environmental Sociology
This seminar will explore how sociologists and adjacent social scientists have investigated the intersections of the environment with inequalities of wealth and power, with a focus on a broad "climate change and society" field. The seminar will cover a) recent efforts to reframe the history of capitalism as the history of a socio-environmental system (and overlaps between that agenda and the "racial capitalism" framework); b) the genesis of US-based environmental justice scholarship; c) the global sociology of carbon emissions and international environmental movements; and, d) new trends in "climate change and society" studies.
Taught by: Cohen
One-term course offered either term
Activity: Seminar
1.0 Course Unit

SOCI 553 Field Methods in Qualitative Research
This course is designed to introduce graduate students to basic skills and concepts in ethnographic field research, including participant observation, interviewing, field documentation, and the scholarly presentation of qualitative data. Students will learn to apply these skills and concepts through an assigned set of exercises in concert with a semester-long project based on intensive fieldwork at a research site of their choosing. In addition, we will examine exemplars of published fieldwork in both classical and contemporary sociology. Students outside of the Department of Sociology need permission of the instructor to enroll.
Taught by: Bosk, Grazian, Lareau
One-term course offered either term
Activity: Seminar
1.0 Course Unit

SOCI 555 Pro-Seminar in Sociological Research
In the non-credit seminar students will be introduce to key areas in sociological research, and a set of professional skills necessary to navigate graduate school and a successful academic career. Students will also be introduced to faculty and resources available at Penn. This course is required for all first-year graduate students in Sociology
Taught by: Hannum, Jacob, Kao, Leidner, Smith
Course usually offered in fall term
Activity: Seminar
0.0 Course Units

SOCI 556 Pro-Seminar in Sociological Research II
This graduate seminar for first-year graduate students will be a two-semester course covering the major subfields of sociology – their classical and contemporary theories, current methods and substance.
Taught by: Collins, Grazian, Hannum, Park, Schnittker, Smith, Wilde
One-term course offered either term
Activity: Seminar
1.0 Course Unit

SOCI 561 Class Cultures and Historical Change
Studies culture as values, scripts, practice, performance, and style in the contexts of everyday life, social class, and status groups, social movements, and changes of communication technologies. Approaches politics, society, institutions, identities, and social change as dynamic processes and complex interactions at both micro/meso and macro levels. Examines the production, reception, circulation and effects of signs, symbols, and stories. Readings include both classic authors (Elias, Simmel, Bakhtin, Goffman, Foucault, Bourdieu, Raymond Williams, etc.) and contemporary works from sociology and communication studies.
Taught by: Yang
Course not offered every year
Also Offered As: COMM 889
Activity: Seminar
1.0 Course Unit

SOCI 562 Soci Movements & Poli Sc
Activity: Lecture
1.0 Course Unit

SOCI 596 Sociology of Education
This graduate seminar will introduce students to some of the key theoretical and empirical work in the sociology of education. We will examine how schools work to maintain or alleviate inequality, and focus on differences in educational achievement and attainment by race, ethnicity, immigrant status, class, and gender. We will review work on the educational experiences of youth from early childhood to young adulthood.
Course not offered every year
Activity: Seminar
1.0 Course Unit
SOCI 601 Contemporary Social Theory
This is a graduate-level seminar structured around the main theoretical debates of contemporary sociology, including the interplay of rationality and emotion, the relationship between structure and agency, the nature of power, and the role of chance and contingency. In considering alternative positions on these debates, we will encounter the major theorists of the past fifty years, including Parsons, Merton, Goffman, Homans, Schutz, Coleman, Bourdieu, Luhmann, Habermas, Collins, and Giddens. Requirements include intensive primary source reading, writing, and participation. The course assumes, and does not provide, prior familiarity with the main theoretical perspectives, and thus does not substitute for the undergraduate theory course (SOCI 126)
Course not offered every year
Activity: Seminar
1.0 Course Unit

SOCI 602 Proseminar in Classical Sociology
This course is designed to introduce graduate students to the classical foundations of sociology by drawing on canonical readings by Marx, Engels, Durkheim, Weber, Du Bois, Addams, Simmel, Park, and Goffman, among others. We will read these texts in the context of three major sociological themes: work and social inequality, culture and social structure, and urban interaction and culture in the city. Final papers will require students to draw on classical sociological works in their analyses of contemporary empirical research in sociology.
Taught by: Grazian
One-term course offered either term
Activity: Seminar
1.0 Course Unit

SOCI 603 Master's Research in Sociology
This graduate course is intended to be helpful to students as they produce an MA thesis. The course is structured to provide social support and feedback as students move through the stages in the development of a project (i.e. data analysis, review of the literature, development of a thesis, and revision). Students should begin the semester with a data set in hand; additional data analysis will occur during the term. (In some cases, students may be finishing their data collection.) In addition, the course is intended to provide professional development opportunities for students by providing "insider" information about the publication process. Students will be given examples of journal review (including reviews that reject a paper), copies of papers as they move through the revision process, and guidelines for producing a publishable piece of work. The goal is for students to produce a manuscript that can be submitted for publication in the near future. This is a required course for second year graduate students in Sociology.
Taught by: Bosk, Grazian, Jacobs, Kao, Lareau, Leidner, Park, Schnittker
One-term course offered either term
Activity: Seminar
1.0 Course Unit

SOCI 604 Methodology of Social Research
This course will give students familiarity with the common research methods social scientists use to conduct research. Ethnographic, interview, survey, experimental and historical/comparative research methods will be covered. Four themes will be explored: 1) the basics of solid research design, 2) the various advantages and disadvantages of each method, 3) when the use of a method is appropriate or inappropriate for the research question, and 4) how to evaluate researchers' claims on the basis of the evidence they present. These themes will be explored by reading examples of and conducting exercises designed to give students hands-on experience in each of the methods. Students will conduct the exercises on a topic of their choice, which together will culminate in their final paper. The course is required and restricted to second year students in sociology and demography.
Taught by: Smith, Wilde, Zuberi
One-term course offered either term
Also Offered As: DEMG 604
Activity: Lecture
1.0 Course Unit

SOCI 607 Introduction to Demography
A nontechnical introduction to fertility, mortality and migration and the interrelations of population with other social and economic factors. Course usually offered in fall term
Also Offered As: DEMG 607
Activity: Lecture
1.0 Course Unit

SOCI 609 Basic Methods of Demography
The course is designed to introduce students to basic concepts of demographic measurement and modeling used to study changes in population size and composition. The course covers basic measures of mortality, fertility and migration; life table construction; multiple decrement life tables; stable populations; population projections; and age patterns of vital events. Students will learn to apply demographic methods through a series of weekly problem sets.
Taught by: Elo, Guillot, Smith
One-term course offered either term
Also Offered As: DEMG 609
Activity: Lecture
1.0 Course Unit

SOCI 611 Structural Equation Models
Statistical modeling with multiple equations and latent variables. The first part of the course will focus on linear models that could be estimated with any of the well-known SEM programs (e.g., LISREL, EQS, or Amos). Both Mplus and SAS will be used exclusively in this part of the course. The second part will focus on Mplus models for variables that are categorical, count, or censored. Maximum likelihood methods for missing data will also be covered.
Taught by: Allison
Course not offered every year
Also Offered As: DEMG 611
Activity: Lecture
1.0 Course Unit
SOCI 612 Categorical Data Analysis
This course deals with techniques for analyzing multivariate data which the dependent variable is a set of categories (a dichotomy or polytomy). Topics will include linear probability models, logit (logistic) regression models, probit models, logit analysis of contingency tables, cumulative logit and probit (for ordinal data), multinomial logit, conditional logit (discrete choice), unobserved heterogeneity, log-linear models, square tables, response-based sampling, and repeated measures. Methods will be illustrated using the Stata System. There will be several assignments using Stata to analyze data provided by the instructor.
Taught by: Allison, Smith
Course not offered every year
Also Offered As: DEMG 612
Activity: Lecture
1.0 Course Unit

SOCI 613 Event History
An applications-oriented course on statistical methods for the analysis of longitudinal data on the occurrence of events, also known as survival analysis, failure-time analysis, hazard analysis or duration analysis. Emphasis on regression-like models in which the risk of event occurrence is a function of a set of explanatory variables. Topics include accelerated failure-time models, hazard models, censoring, Cox regression models, time-dependent covariates, competing risks, repeated events, unobserved heterogeneity, discrete-time methods.
Taught by: Allison
Course not offered every year
Also Offered As: DEMG 613
Prerequisite: SOCI 536 or equivalent
Activity: Lecture
1.0 Course Unit

SOCI 620 Doctoral Seminar in Sociological Research II
This course is intended to aid in the selection, framing, writing and revising of sociological dissertation proposals. It is also intended to provide a forum for the presentation of dissertation research in progress. The goal is to provide a forum for the acquisition of professional socialization in sociology. We will discuss the framing of research questions, the design of research strategies, and the writing of dissertation proposals. We will discuss the process of submitting manuscripts for conferences and journals, preparing a curriculum vitae, job search strategies, and preparing for effective colloquium presentations. We will also review articles currently under review at the American Sociological Review. It is expected that third year graduate students in Sociology will enroll in this class.
Taught by: Grazian, Hannum, Jacobs, Schnittker, Wilde
One-term course offered either term
Prerequisite: Third year graduate students
Activity: Seminar
1.0 Course Unit

SOCI 621 Mortality
The course focuses on the description and explanation of health and mortality in human populations and their variability across several dimensions such as age, time, place, social class, race, etc. The course includes general theories of health, mortality and morbidity, investigations of mortality and related processes in developing and developed countries, and discussions of future mortality trends and their implications for individual lives and the society at large.
Taught by: Elo, Kohler
Course not offered every year
Also Offered As: DEMG 621
Activity: Lecture
1.0 Course Unit

SOCI 622 Fertility
The biological, social and demographic factors explaining the levels, trends and differentials in human fertility. Data, measures, and methods used in the context of the more and the less developed countries, with an emphasis on the historical and current course of the fertility transition.
Taught by: Kohler, Smith
Course not offered every year
Also Offered As: DEMG 622
Activity: Seminar
1.0 Course Unit

SOCI 634 Population Processes II
Population Processes II is part of a two-course sequence designed to introduce students to the core areas of demography (fertility, mortality, and migration) and recent developments in the field. PP II is divided into two parts. The first focuses on family demography and the biological, social and demographic factors explaining levels, trends, and differentials in human fertility transition with an emphasis on the historical and current course of fertility transition in developed and developing countries. The second part of the course provides a comprehensive review of theories and research on international migration. Readings examine patterns and processes of global migration during the classic age from 1800-1914 as well as during the postwar period from 1945 to the present. The course also covers a history and evaluation of immigration policies around the world, and devotes significant attention to theoretical and empirical perspectives on immigrant adaptation, including the relationship between gender and migration.
Taught by: Flippen, Kohler, Parrado, Smith
Course usually offered in spring term
Also Offered As: DEMG 634
Activity: Seminar
1.0 Course Unit

SOCI 643 Social Stratification
This is an advanced level graduate seminar where we will review contemporary research on social stratification and mobility. We will examine empirical and theoretical studies not only in the US but also in other countries to address how the pattern of social stratification varies across societies and over time. The main topics to be discussed are social mobility, occupational attainment, educational inequality, gender and race, and family processes and stratification. We will also examine studies that address how national contexts mediate social stratification. Advanced undergraduate students will be admitted with permission.
Taught by: Jacobs, Park
Course not offered every year
Also Offered As: DEMG 643
Activity: Lecture
1.0 Course Unit
SOCI 649 A Course on Elites
Most of the studies of inequality look at poverty and the impact of poverty. This course will be a study of those at the top of the social stratification system. We will take a broad vision of elites to include the upper-middle-class as well as those in the top 1%. The course will examine the concentration of wealth in American society. It will examine elite families. It will also look at elite education. There will be a unit on the financial industry, the 2008 debacle, and the failure of the government to regulate this important industry. We will also study the influence of race by comparing the black upper-middle-class with white upper-middle-class families. Thus, we will also look at the power of elites in a number of spheres. Finally, we will also read theoretical perspectives including the work of C. Wright Mills, Marx, and Bourdieu. Thus, in addition to the focus on social stratification, this course cuts across sociology of the family, economic sociology, cultural sociology, and race and ethnic relations.
Taught by: Lareau
Activity: Seminar
1.0 Course Unit

SOCI 662 Panel Data Analysis
Also Offered As: DEMG 662
Activity: Lecture
1.0 Course Unit

SOCI 664 Digital Media & Social Theory
This seminar explores critical issues in contemporary society through the lens of digital media studies and social theory. Special attention will be given to how social theory may inform the theorizing and empirical analysis of digital culture, digital politics, and digital practices. We will read recent monographs on the meanings and uses of digital media in international development, international migration, state power and popular protest, symbolic violence, and the formation and contestation of identities, communities, and publics. These works will be examined alongside the social theories of Jeffrey Alexander, Ulrich Beck, Bourdieu, Judith Butler, Foucault, Giddens, Goffman, Habermas, Melucci, Victor Turner, and others. A term paper required
One-term course offered either term
Also Offered As: COMM 665
Activity: Seminar
1.0 Course Unit

SOCI 667 Social Interaction
The dynamics of interpersonal interaction, especially in face-to-face encounters during limited short periods of time. Topics include: the theory of interaction rituals deriving from Durkheim, Goffman and their contemporary followers; conversation analysis; micro-ethnographic studies of non-verbal behavior and embodied interaction; sociology of emotions; symbolic interactionist theory and the social nature of mind, self, and inner dialogue; electronically mediated interaction and its effects on social ties; and the relationship between micro and macro sociology.
Course not offered every year
Activity: Seminar
1.0 Course Unit

SOCI 677 International Migration
A comprehensive review of theories and research on international migration. The course introduces the basic precepts of neoclassical economics, the new economics of labor migration, segmented labor market theory, world systems theory, social capital theory and the theory of cumulative causation. Readings examine patterns and processes of global migration during the classic age from 1800?1914 as well as during the postwar period from 1945 to the present. The course also covers a history and evaluation of immigration policies around the world, and devotes signification attention to theoretical and empirical perspectives on immigrant adaptation. Within this larger topic, we will also discuss internal migration and urbanization; the relationship between gender and migration; the spatial distribution of immigrants within the United States, immigrant communities, and ethnic enclaves; and the undocumented population in the United States.
Taught by: Flippen
Course not offered every year
Also Offered As: DEMG 677
Activity: Seminar
1.0 Course Unit

SOCI 707 Second-Year Research Seminar I
This course is intended to hone the skills and judgment in order to conduct independent research in sociology and demography. We will discuss the selection of intellectually strategic research questions and practical research designs. Students will get experience with proposal writing, the process of editing successive drafts of manuscripts, and the oral presentation of work in progress as well as finished research projects. The course is designed to be the context in which master's papers and second year research papers are written. This is a required course for second year graduate students in Demography. Others interested in enrolling in only one of the courses may do so with the permission of the Chair of the Graduate Group in Demography.
Course usually offered in fall term
Also Offered As: DEMG 707
Activity: Seminar
1.0 Course Unit

SOCI 708 Seminar: Demographic Research II
Demography 708 is the second part of a two-course sequence designed to introduce and familiarize second year students with current norms for academic research, presentation and publishing in the field of Demography. In Demg708 students are expected to finalize the analyses and to complete their second year research paper. This is a required course for second year demography students. Others interested in enrolling in the course may do so with the permission of the Chair of the Graduate Group in Demography.
Course usually offered in spring term
Also Offered As: DEMG 708
Activity: Seminar
1.0 Course Unit
SOCI 731 Advanced Demographic Methods
This course considers a variety of procedures for measuring and modeling demographic processes. We will consider both deterministic (drawn from classic demographic methods, stable population theory, and the like) and stochastic (drawn from statistics) perspectives and methods, including their integration. Prerequisites: DEMG 609 and SOCI 536 (or its equivalent).
Taught by: Smith
Course not offered every year
Prerequisites: DEMG 609 and SOCI 536 (or its equivalent)
Activity: Seminar
1.0 Course Unit

SOCI 796 Demographic, Economic, and Social Interrelations
The course investigates economic and social determinants of fertility, mortality, and migration, and it discusses the effects of population variables on economic and social conditions, including economic and social development. Topics discussed in the course include: How do economic changes affect marriage, divorce, and child bearing decisions? How do households make decisions about transfers and requests? How can economic and sociological approaches be combined in explanatory models of demography change? How does immigration to the US affect the ethnic composition of the population, the earnings of native workers, taxes on natives, and the macro-economy? What causes the aging of populations, and how will population aging affect the economies of industrial nations, and in particular, pension programs like Social Security? What accounts for the rise in women’s participation in the wage labor force over the past century? How are family composition and poverty interrelated? Does rapid population growth slow economic development with low income countries? In addition to these topics, the course also covers selected methods not included in DEMG/ SOCI 535/536 and 609

SAST 003 History, Culture, and Religion in Early India

This course surveys the culture, religion and history of India from 2500 BCE to 1200 CE. The course examines the major cultural, religious and social factors that shaped the course of early Indian history. The following themes will be covered: the rise and fall of Harappan civilization, the "Aryan Invasion" and Vedic India, the rise of cities, states and the religions of Buddhism and Jainism, the historical context of the growth of classical Hinduism, including the Mahabharata, Ramayana and the development of the theistic temple cults of Saivism and Vaisnavism, processes of medieval agrarian expansion and cultic incorporation as well as the spread of early Indian cultural ideas in Southeast Asia. In addition to assigned secondary readings students will read select primary sources on the history of religion and culture of early India, including Vedic and Buddhist texts, Puranas and medieval temple inscriptions. Major objectives of the course will be to draw attention to India's early cultural and religious past and to assess contemporary concerns and ideologies in influencing our understanding and representation of that past.

SAST 004 India's Literature: Love, War, Wisdom and Humor

This course introduces students to the extraordinary quality of literary production during the past four millennia of South Asian civilization. We will read texts in translation from all parts of South Asia up to the sixteenth century. We will read selections from hymns, lyric poems, epics, wisdom literature, plays, political works, and religious texts.

SAST 005 Performing Arts in South Asia

This course is a survey of selected traditions of theater, music, and dance in India and surrounding regions. Topics include ritual practices, theater, classical dance, classical music, devotional music, regional genres, and contemporary popular musics. Readings and lectures are supplemented by audio and visual materials and live performances. The aim of the course is to expose students to a variety of performance practices from this part of the world and to situate the performing arts in their social and cultural contexts. The course has no prerequisites.

SAST 006 Hindu Mythology

Premodern India produced some of the world's greatest myths and stories: tales of gods, goddesses, heroes, princesses, kings and lovers that continue to capture the imaginations of millions of readers and hearers. In this course, we will look closely at some of these stories especially as found in Purana-s, great compendia composed in Sanskrit, including the chief stories of the central gods of Hinduism: Visnu, Siva, and the Goddess. We will also consider the relationship between these texts and the earlier myths of the Vedas and the Indian Epics, the diversity of the narrative and mythic materials within and across different texts, and the re-imagining of these stories in the modern world.

SAST 007 Introduction to Modern South Asian Literatures

This course will provide a wide-ranging introduction to the literatures of South Asia from roughly 1500 to the present, as well as an exploration of their histories and impact on South Asian society today. How are literary movements and individual works - along with the attitudes towards religion, society, and culture associated with them - still influential in literature, film, and popular culture? How have writers across time and language engaged with questions of caste, gender, and identity? We will read from the rich archive of South Asian writing in translation - from languages that include Braj, Urdu, Bangla, and Tamil - to consider how these literatures depict their own society while continuing to resonate across time and space. Topics of discussion will include the Bhakti poetries of personal devotion, the literature of Dalits - formerly referred to as the Untouchables - and the ways in which literature addresses contemporary political and social problems. Students will leave this course with a sense of the contours of the literatures of South Asia as well as ways of exploring the role of these literatures in the larger world. No prior knowledge of South Asia is required; this course fulfills the cross-cultural analysis requirement.

SAST 009 Introduction to Hinduism
This course introduces students to the history, texts, philosophies and rituals of South Asia's oldest living religious traditions, represented today by the term "Hinduism." At the same time, it problematizes the idea of a monolithic "Hindu Tradition", in favor of an approach that recognizes several distinct, dynamic, yet symbiotic Hindu religious cultures. The course also places emphasis on the vitality of today's Hinduism(s), and the various historical, cultural, and social contexts that they represent and constitute. The course is organized around six modules: (1)Issues in the Academic Study of Hinduism; (2) Sanskrit (textual) tradition; (3) Philosophy; (4) Theology; (5) Ritual; and (6) Modernity and Contemporary Politics.

SAST 012 Spices, Gunpowder, and Pagodas: A History of Southeast Asia
This undergraduate course introduces students to the history of Southeast Asia from the earliest centuries of the Common Era to c.1950. It introduces students to Southeast Asia as religion, constituent historical societies of the region, and to the major academic literature and debates pertaining to the historical development of Southeast Asian societies and the region. Key themes explored include the origins and character of early civilizations, ideas and ideology about power and prowess, material culture, the transformation of ethnic, class, and gender relations, the impact of the arrival of world religions and early European expansion, and the nature of indigenous responses to the diffusion of new beliefs and ideas and intercultural contact.

SAST 050 Introduction to Indian Philosophy
This course will take the student through the major topics of Indian philosophy by first introducing the fundamental concepts and terms that are necessary for a deeper understanding of themes that pervade the philosophical literature of India – arguments for and against the existence of God, for example, the ontological status of external objects, the means of valid knowledge, standards of proof, the discourse on the aims of life. The readings will emphasize classical Hindu, Buddhist, and Jain philosophical articulations (from 700 B.C.E to 16th century CE) but we will also supplement our study of these materials with contemporary or relatively recent philosophical writings in modern India.

SAST 054 Religion and Resistance in South Asia
In this course, we focus on various medieval and contemporary devotional forms of Hinduism, Buddhism and Islam in South Asia. Several definitions try to tie the idea of devotion to classicism and traditionalism with a set of conservative ideas. However, this course introduces the students to a diverse and pluralistic understanding of Hinduism, Buddhism and Islam that also has a history of resistance and protest beginning with poets such as Kabir and others from the Bhakti movement, and Sufi devotional contexts in South Asia. We read about the histories of these rebellious poets and their interventions into the traditional practices of devotion. We also discuss about how these medieval trends find their way into contemporary times enriching the discourses of Dalit, Muslim and Feminist movements.
Taught by: Mohammad
Course not offered every year
Also Offered As: SAST 554
Activity: Seminar

SAST 057 Planning to be Off-shore?
Freshman Seminar. In this course we will trace the economic development of India from 1947 to the present. Independent India started out as a centrally planned economy in 1949 but in 1991 decided to reduce its public sector and allow, indeed encourage, foreign investors to come in. The Planning Commission of India still exists but has lost much of its power. Many in the U.S. complain of American jobs draining off to India, call centers in India taking care of American customer complaints, American patient histories being documented in India, etc. At the same time, the U.S. government encourages highly trained Indians to be in the U.S. Students are expected to write four one-page response papers and one final paper. Twenty percent of the final grade will be based on class participation, 20 percent on the four response papers and 60 percent on the final paper.

Course usually offered in fall term
Activity: Seminar
1.0 Course Unit

Sugar and Spices. Tea and Coffee. Opium and Cocaine. Hop aboard the Indian Ocean dhows, Chinese junks, Dutch schooners, and British and American clipper ships that made possible the rise of global capitalism, new colonial relationships, and the intensified forms of cultural change. How have the desires to possess and consume particular commodities shaped cultures and the course of modern history? This class introduces students to the cultural history of the modern world through an interdisciplinary analysis of connections between East and West, South and North. Following the circulation of commodities and the development of modern capitalism, the course examines the impact of global exchange on interactions and relationships between regions, nations, cultures, and peoples and the influences on cultural practices and meanings. The role of slavery and labor migrations, colonial and imperial relations, and struggles for economic and political independence are also considered. From the role of spices in the formation of European joint stock companies circa 1600 to the contemporary cocaine trade, the course’s use of both original primary sources and secondary readings written by historians and anthropologists will enable particular attention to the ways that global trade has impacted social, cultural, and political formations and practices throughout the world.

SAST 106 Beginning Sitar I

This course is an introduction to the repertoire and performance practices of the North Indian sitar. Fundamentals of sitar technique, composition, and improvisation are presented and practiced in class. Class lectures and discussions, audio and video material, and reading and listening assignments on selected topics supplement practice, to provide an overview of the social and historical context and the formal structures of North Indian music in general. There are no prerequisites for the course, but some experience with instrumental or vocal music is suggested. Each student is expected to put in two hours of individual practice per week, and complete reading, audio, and written assignments. The class gives a group performance at the end of the semester.
Taught by: Bhatti
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

SAST 107 Beginning Sitar II

This is the second semester of a performance course in the North Indian sitar. Students who have not taken the first semester but play any musical instrument are permitted to join. Principles of composition and improvisation will be explored in practice and supplemented by readings and listening. The class gives a group performance at the end of the semester.

SAST 112 Religion and Cinema in India
This seminar examines key themes in the study of religion and Indian cinema. The aim of the seminar is to foreground discussions of performativity, visual culture, representation, and politics in the study of modern South Asian religions. Themes include mythological cinema, gender and sexuality, censorship and the state, and communalism and secularism. The films we will be deploying as case studies will be limited to those produced in Hindi, Telugu and Tamil (the three largest cinema cultures of India). No knowledge of any South Asian language is needed for this course however.

SAST 120 Literature of the South Asian City: Space, Culture, Politics
The South Asian city as a way of organizing space and social relations, as a symbol, as a memories the subject of this course. Through primarily, though by no means exclusively, readings of literature in translation, we will gain a sense for the history of the city and the ways in which it is a setting for protest and nostalgia, social transformation and solitary flâneurie. We will see reflections of the city in poetry recited in its homes, detective novels sold in its train stations, stories scribbled in its cafes, plays staged in its theaters, and films produced in its backlots. Readings will attempt to address urban spaces across South Asia, and will include works by writers such as Mirza Ghalib, Rabindranath Tagore, Saadat Hasan Manto, and Vijay Tendulkar. We will examine these works in the context of secondary readings, including histories and ethnological works that take up life in the modern city. Students will finish this course prepared to pursue projects dealing with the urban from multiple disciplinary perspectives. This course is suitable for anyone interested in the culture, society, or literature of South Asia, and assumes no background in South Asian languages.

SAST 124 Narrative Across Cultures
The purpose of this course is to present a variety of narrative genres and to discuss and illustrate the modes whereby they can be analyzed. We will be looking at shorter types of narrative: short stories, novellas, and fables, and also some extracts from longer works such as autobiographies. While some works will come from the Anglo-American tradition, a larger number will be selected from European and non-Western cultural traditions and from earlier time-periods. The course will thus offer ample opportunity for the exploration of the translation of cultural values in a comparative perspective.

SAST 139 Introduction to Islam
This course is an introduction to Islam as a religion as it exists in societies of the past as well as the present. It explores the many ways in which Muslims have interpreted and put into practice the prophetic message of Muhammad through historical and social analyses of varying theological, philosophical, legal, political, mystical and literary writings, as well as through visual art and music. The aim of the course is to develop a framework for explaining the sources and symbols through which specific experiences and understandings have been signified as Islamic, both by Muslims and by other peoples with whom they have come into contact, with particular emphasis given to issues of gender, religious violence and changes in beliefs and behaviors which have special relevance for contemporary society.
Taught by: Elias

Also Offered As: NELC 136, RELS 143
Activity: Lecture
1.0 Course Unit
**SAST 142 Introduction to Buddhism**
This course seeks to introduce students to the diversity of doctrines held and practices performed by Buddhists in Asia. By focusing on how specific beliefs and practices are tied to particular locations and particular times, we will be able to explore in detail the religious institutions, artistic, architectural, and musical traditions, textual production and legal and doctrinal developments of Buddhism over time and within its socio-historical context. Religion is never divorced from its place and its time. Furthermore, by geographically and historically grounding the study of these religions we will be able to examine how their individual ethic, cosmological and soteriological systems effect local history, economics, politics, and material culture. We will concentrate first on the person of the Buddha, his many biographies and how he has been followed and worshipped in a variety of ways from Lhasa, Tibet to Phrae, Thailand. From there we touch on the foundational teachings of the Buddha with an eye to how they have evolved and transformed over time. Finally, we focus on the practice of Buddhist ritual, magic and ethics in monasteries and among aly communities in Asia and even in the West. This section will confront the way Buddhists have thought of issues such as “Just-War,” Women’s Rights and Abortion. While no one quarter course could provide a detailed presentation of the beliefs and practices of Buddhism, my hope is that we will be able to look closely at certain aspects of these religions by focusing on how they are practiced in places like Nara, Japan or Vietnam, Laos.

Activity: Lecture
1.0 Course Unit

**SAST 144 Modern Islam and Poetry**
This course focuses on a basic question: How and why a modern poem turns into a narrative device to debate contemporary Islamic discourses? We begin exploring this question by taking note of how a 12th-century Persian poet Rumi became - as described by Time magazine - “the best-selling poet in the US today,” and then introduces students to poems and various social, cultural and religious moments that were key in the making of modern Islam. Although the course primarily emphasizes the study of poetry produced and circulated among various Muslim communities world-wide, it also covers a diverse set of secondary readings from the field of religious studies, anthropology and literature to outline more clearly the contours of contemporary Islam. Readings begin with internationally famous Rumi and then include poets emerging from Arabic, Persian, Urdu, and several vernacular literary cultures in both Muslim and non-Muslim countries.

Course not offered every year
Activity: Seminar
1.0 Course Unit

**SAST 146 Islam in Modern World**
This course key issues facing Muslims in the modern world with an emphasis on gaining an understanding of how Muslims view themselves and the world in which they live. Beginning with a discussion of the impact of colonialism, we will examine Islamic ideas and trends from the late colonial period until the present. Readings include religious, political and literary writings by important Muslim figures and focus on pressing issues in the Islamic world an beyond: the place of religion in modern national politics; the changing status of women; constructions of sexuality (including masculinity); pressing issues in bioethics; Islam, race and immigration in America; the role of violence; and the manifestations of religion in popular culture.

1.0 Course Unit

**SAST 147 Love, Sex & Power**
This course explores the ways in which some of the biggest issues in human life are dealt with across religious traditions. Beginning with important questions of sexual identity, politics, religion and the individual in contemporary life, we will examine questions of eroticism, sex and love as they are reflected in religious literature, art and history. The concept of divine love and religious devotion will be explored in relation to acts of violence, including human sacrifice and self-sacrifice in the form of martyrdom seen in pre-modern concepts of saintly martyrdom and religious chivalry as well as the religious legitimacy of modern self-sacrifice of soldiers in war and terrorist suicides. The course focuses in particular on examples drawn from Christianity, Hinduism, Islam and Mesoamerican Religion, although discussions of contemporary issues will be conducted with a broader sweep. Important questions considered in this course include: how does the body function as the locus in which religion is enacted? What is the conflict between our agency over our bodies and socioreligious claims over the individual? Is violence an integral part of religion? What are religious understandings of the relationship between love and sex? How can a human being love gods erotically?

SAST 160 Godliness, Miracles, and 'Madness' in Indian Ocean Port Cities

This undergraduate-level course introduces students to religious worlds within port cities of the modern Indian Ocean that were centered upon peripatetic Muslim, Saiva, Christian and Sikh miracle-workers, missionaries and 'gods'. This course will particularly consider how extant, published sources reveal how religion in 19th and 20th century cosmopolitan port cities and islands: was centered upon holy men and women or spiritual beings, and intricately connected to modern economic, political and technological developments in the Indian Ocean. This course is divided into three parts. In the first part of this course, students will be introduced, on the one hand, to the scholarship on the port cities or islands of, and religions or religious networks in, the modern Indian Ocean. On the other hand, to anthropological, historical and literary works on Muslim saints, Christian missionaries and Saiva gods in the Indian Ocean. In the second and main section of this course, students will be introduced to contemporary academic literature pertaining to the inter-linkages between itinerant miracle-workers, missionaries, 'gods' and devotional cults, and economic, political and technological developments in the Indian Ocean. As well as works that explore European institutions, barracks, plantations, cells and asylums, and steam travel being steeped in customary religion, carnivals, ecstasy, madness and miracle stories. Here, students will be encouraged to consider ways in which a study of religion and religious economies of modern Indian Ocean port cities can be recovered through extracts from a range of anthropological, literary and historical sources. In the third part of this course, students will be encouraged to engage with the question of whether the religion of devotional cults preoccupied with the powers of Muslim, Saiva, Christian, and Sikh miracle-workers, missionaries and 'gods' in cosmopolitan port cities, was a distinct product of circulations within the Indian Ocean. Taught by: Sevea

SAST 162 History of South Asian Diaspora

While Indian influence has been noted in Asia, and parts of the West, the Indian Diaspora over several thousand years has had profound impacts on social, cultural, economic, political, religious, and linguistic norms around the world. This course seeks to highlight the outward migration of Indic peoples and ideas to other parts of the world beginning in the late Vedic era. Key areas of examination include Indic influence on Southeast Asia, the Caribbean and sub-Saharan Africa, and British Commonwealth countries after colonialism. In addition to examining primary source texts, students will engage with the works of Diasporic writers and thinkers. Course not offered every year
Activity: Lecture
1.0 Course Unit

SAST 166 Forgotten Asians of the Americas

Although Asians have lived in the Americas for centuries, the Asian American community and experience tends to be defined by the post-1965 wave of immigration to the United States. In an effort to correct this narrative this course will explore the histories, experiences, and contributions of some of the forgotten Asians of the Americas. In particular, we will focus on the earlier labor migrations of Chinese and South Asian individuals to the Caribbean and the United States. The experiences of these individuals, who built railroads, cut sugarcane, and replaced African slave labor, complicate our understandings of race today. By examining the legal and social debates surrounding their labor in the 19th century and exploring how their experiences are forgotten and their descendants are rendered invisible today, we will complicate what is Asian America and consider how this history shapes immigration policies today. Taught by: Pillai

1.0 Course Unit

SAST 169 Merchants, Saints, Slaves and Sojourners: the Worlds of the Indian Ocean

Do oceans serve to divide and demarcate distinct cultures and regions? Or do they facilitate exchange, connection and cosmopolitanism? This course will explore the manner in which the Indian Ocean has played both roles throughout history, and how the nature of those divisions and connections has changed over time from the ancient to the modern world. We will reconstruct the intertwined mercantile, religious and kinship networks that spanned the Indian Ocean world, across the Middle East, East Africa, South Asia, Southeast Asia and China, illuminating the histories of Hinduism, Buddhism and Islam, while also considering the role of successive imperial political formations, from Rome to Britain. Throughout the semester we will seek to understand the Indian Ocean through the people who lived and worked in its milieu - from consuls and military commanders, to traders, brokers, sailors, prisoners and slaves. Course materials will draw on a variety of disciplines (anthropology, archaeology, material culture, religious studies) to construct the cultural, economic, and environmental history of the Indian Ocean. Taught by: Petrie

SAST 171 Devotion's New Market: Religion, Economics, and the City
This graduate and undergraduate level course introduces students to the new forms of devotion as circulated in various urban centers in South Asia with a focus on growing market economy and urbanization. This course will particularly discuss case studies of how different modes of Hinduism, Islam, Christianity and other minor religions operate in an urbanized middle-class and educated communities. We will read theoretical and ethnographical works of contemporary research in religious studies and anthropology that deal with the questions of modernity, reformism and economic developmentalism. Throughout the semester, we focus on 1) how does religious forms such as sainthood practices, private and public rituals, narrative modes and everyday life evolve in the background of growing politics of development; 2) we discuss the tensions between classical notions of devotion and their new transformations in the city life; and finally 3) theoretically, we analyze concepts such as reformism, fundamentalism, recent discourses on identity politics and gender implications as connected to urban religious life.

SAST 189 Islam and the West
How did Muslims and modern South Asia interact with the West? What Islamic idioms, orientations and movements emerged in the nineteenth and twentieth centuries? Was South Asia a prominent global center of Islam? What kinds of Islamic educational institutions developed in modern South Asia? How did Muslims appropriate technologies? What materials were printed by Muslims? Were Muslims part of the British army? What was jihad in modernity? How did Muslim ‘modernists’ and ‘traditionalists’ respond to the challenges of colonialism and modernity? What was the nature of Sufism in modern South Asia? What was the nature of political Islam in South Asia? How did some Muslims demand a Muslim State? What was the Partition? How has Muslim history been remembered in Bangladesh, India and Pakistan? This is an introductory course, and aims to introduce students to a facet of the long history of Islam, Muslims, and the West.

SAST 200 Introduction to Art in South Asia
This course is a survey of sculpture, painting and architecture in the Indian sub-continent from 2300 B.C., touching on the present. It attempts to explore the role of tradition in the broader history of art in India, but not to see India as ‘traditional’ or unchanging. The Indian sub-continent is the source for multi-cultural civilizations that have lasted and evolved for several thousand years. Its art is as rich and complex as that of Europe, and as diverse. This course attempts to introduce the full range of artistic production in India in relation to the multiple strands that have made the cultural fabric of the sub-continent so rich and long lasting.

SAST 208 Doing Research: Qualitative Methods and Research Design
This interdisciplinary course introduces students to qualitative research methods and frameworks in the social sciences and humanities. Students will learn how to frame an effective research question, situate it in relation to existing research, select the most appropriate methods for addressing the question, and develop an effective research plan. Each week students will be introduced to a new set of frameworks for analysis, see specific examples of their application drawn from anthropological, historical, and related scholarship and have opportunities to practice applying and evaluating the strengths and weaknesses of specific methodological tools. The goals of the semester will be for each student to develop their own research proposal for a specific project. Students will be introduced to a range of textual, archival and media collections and databases available at Penn, with particular attention to South Asia and other specific regions of interest to course participants. Students will also have the opportunity to identify sources of funding for summer and/or thesis research projects, and submit applications for these opportunities as part of the course. The course is ideal for students considering summer research, an undergraduate thesis, or an application to the Fulbright or other research program. It may be taken by itself as a freestanding course, or may be sequenced with SAST 209, Writing Research, the following fall semester.

1.0 Course Unit

SAST 215 Asian American Gender and Sexualities
This course explores the intersection of gender, sexuality, and race in Asian America. Through interdisciplinary and cultural texts, students will consider how Asian American gender and sexualities are constructed in relation to racism while learning theories on and methods to study gender, sex, and race. We will discuss masculinities, femininities, race-conscious feminisms, LGBTQ+ identities, interracial and intraracial relationships, and kinship structures.
Taught by: Rupa Pillai
Course usually offered in spring term
Also Offered As: ASAM 215, GSWS 215

SAST 217 CU In India - Topics Course
C.U. in India is a hybrid, domestic/overseas course series which provides students with the opportunity to have an applied learning and cultural experience in India or South East Asia where students participate in 1) 28 classroom hours in the Fall term 2) a 12-day trip to India or South East Asia with the instructor during the winter break visiting key sites and conducting original research (sites vary) 3) 28 classroom hours at Penn in the Spring term and 4) a research paper, due at the end of the Spring term. Course enrollment is limited to students admitted to the program. For more information and the program application go to http://sites.sas.upenn.edu/cuinindia This is a 2-CU yearlong course DEADLINE TO REGISTER IS MARCH 31
Two terms. student must enter first term.
Also Offered As: ARTH 317, COML 216, GSWS 217, SAST 517
Activity: Seminar
1.0 Course Unit

SAST 220 Creating New Worlds: The Modern Indian Novel
Lonely bureaucrats and love-struck students, Bollywood stars and wayward revolutionaries: this course introduces students to the worlds of the Indian novel. From the moment of its emergence in the 19th century, the novel in India grappled with issues of class and caste, colonialism and its aftermath, gender, and the family. Although the novel has a historical origin in early modern Europe, it developed as a unique form in colonial and post-colonial India, influenced by local literary and folk genres. How did the novel in India—and in its successor states after 1947—transform and shift in order to depict its world? How are novels shaped by the many languages in which they are written, including English? And how do we, as readers, engage with the Indian novel in its diversity? This course surveys works major and minor from the past 200 years of novel-writing in India—with surveys both into predecessors of the Indian novel and parallel forms such as the short story. Readings will include works in translation from languages such as Hindi, Bangla, Urdu, Telugu, and Malayalam, as well as works written originally in English.
Students will leave this course with an understanding of the Indian novel, along with the social conditions underlaying it, especially those relating to caste and gender.

SAST 247 Gender and Sexuality in Hinduism
Issues related to gender and sexuality occupy a complex, often contradictory place in Hinduism. Sexual desire, sexual activity, and the body are simultaneously celebrated, manipulated, controlled, and restricted. This fundamental ambiguity is at the core of this course, which concerns itself with religious perspectives on the body, gender and sexual activity in Hinduism. Topics include: dharma, morality, and sexual practice; menstruation; pregnancy and childbirth; Bhakti and Tantra; same-sex relations; masculinities; hijras and the notion of the "third sex"; eroticism in the literary, visual, and performing arts; colonialism; and somatic nationalism.

SAST 249 Re-enchanting Modernity: A Guide to Sufism in South Asia
This undergraduate level course introduces students to Sufism in modern South Asia, with a particular focus on how Muslim 'mystics' and their 'mystical' methods interacted with modernity, colonialism, technological developments and globalization. This course is divided into three parts. In the first part of this course, students are provided with an overview of the theological and historical background of the dominant expression of Islam that came to be identified as 'Sufism' or 'Islamic mysticism', the historical development of Sufi institutions and spaces in South Asia, and the historical emergence of South Asia as a prominent global center of Sufism. The second and main part of this course introduces students to a range of anthropological and historical works that are revelatory about how Sufi in modern South Asia were and remain intimately connected to modern political and technological developments. Providing students with an overview of Sufi re-enchantments of modernity from the 19th to 21st century, this section of the course focuses upon Sufi movements and masters who perpetuated or defended customary Islam through sophisticated appropriations of technologies and print networks, and negotiations with non-Muslim rulers and societies. Moreover, students will be introduced to anthropological and historical scholarship on religious worlds in modern South Asia that were and remain steeped in 'customary Islam' and Sufi performances and interpretations of Islam. These sources reveal how 'mystical' methods of performing Islam through ecstasy and spiritual restoration, and interpretations of dreams and visions, have regularly interacted with contemporaneous technologies. The third part of this course introduces students to the globalization of South Asian Sufism in North America, Europe and Southeast Asia. Herein, students will be encouraged to engage with anthropological and literary works pertaining to itinerant South Asian Sufi masters and their devotional cults, and introduced to active South Asian Sufi centers in Philadelphia.

SAST 250 History of Hinduism
This course will explore the history of the religion(s) designated by the term 'Hinduism' from their earliest articulations down to the rise of modern reforms in the nineteenth century. The study of Hinduism is perhaps unique among the scholarly traditions on world religions in that it has to date had no serious connected account of its historical development, as scholars have preferred to take structural, sociological, phenomenological, and doctrinal approaches to the religion. The course, after a brief review of scholarly approaches to Hinduism and their interpretive legacies, will seek to develop a historical sense of the religion through attention to shifts in liturgy, ritual, theology, doctrine, sacral kingship, and soteriology. The course will include the reading of primary sources relevant to understanding these changes a well as highlight both modern and premodern traditions of their interpretation. It will also consider and assess some of the key interpretive ideas in the study of Hinduism, including, Sanskritization, Great and Little Traditions, cult formation, regional and popular religious movements, and canon formation. There will also be sustained consideration of the question of religion and socio-political power as well as relations between Hinduism and other religions like Buddhism and Islam.

Activity: Lecture
1.0 Course Unit
SAST 251 Muslim Sainthood Practices
This course aims at introducing various classical, popular and modern Muslim saints in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will learn about the major concepts initiated and circulated by these saints and their distinctive ways of dealing with spiritual aspects. While focusing on the sainthood practices, we also study the nature of the dialogue which addresses the questions such as pluralism, localism, and a new paradigm of spirituality that continually interacts with diverse modes of everyday life in South Asia. In order to understand their impact on visual and media cultures, we also watch two documentaries and compare these visual sources with sainthood literature and practices.
Taught by: Mohammad, M.A.
Course not offered every year

SAST 252 Music, Religion, Ritual in South and Southeast Asia.
What role does music play in articulating religious identities and spaces? What is the importance of ritual musics as they persist and change in the modern world? How does music reflect and articulate religious ways of thinking and acting? In this course, we explore these and other questions about the interrelations between music, religion, and ritual in South and Southeast Asia. Focusing on India, Sri Lanka, Malaysia, and Indonesia, the course emphasizes musics from Hindu, Buddhist, Muslim and Christian traditions; nevertheless, it draws widely to touch upon sacred musics in Pakistan, Nepal, Burma, Thailand, Vietnam, and among some indigenous peoples in the region. Throughout, we explore ontologies of sound; sonic occurrences in religious structures, public processions, and pilgrimage sites; the construction of religion and ritual as ideas forged through colonial encounter and modern scholarship on religion; the politics of sacred sounds in today’s public spaces and contemporary media, such as television and online; and the surprising fluidity between popular and sacred musical genres.

Activity: Lecture
1.0 Course Unit

SAST 262 The Making of Medieval India
This course will provide an in-depth understanding of South Asia in what is often called its ‘medieval’ period—from the rise of the great temple kingdoms until the end of the Delhi Sultanate in the sixteenth century (c. 500 CE - c. 1500 CE). This millennium is arguably one of the most transformative in South Asia’s history, a period when many of its most distinctive social and cultural features evolved. The course will provide both an overview of the period as well as an introduction to major interpretations and types of sources (textual, visual, and archaeological). The focus throughout the course will be on the heterogeneous development of states, societies and cultures with special attention to long-term processes of transformation. One set of themes explored will be largely social and economic, focusing on the development of agrarian and peasant societies, aristocracies and intellectuals, as well as the role of mercantile, pastoralist, nomadic and forest-living groups. Another set of themes will explore cultural transformation, including the development, transformation and interaction of religious practices, the emergence of cosmopolitan and regional literary cultures, and the rise of distinctive urban, courtly, and rural world views. Special themes of discussion may include violence and manners, material cultures, religious conflict, devotional religion and gender relations.
Taught by: Ali
Course not offered every year
Also Offered As: SAST 562
Activity: Lecture
1.0 Course Unit

SAST 266 Modern Southeast Asia
This freshman-friendly course provides a broad introductory overview of modern Southeast Asia, surveying the region’s extraordinary diversity and ongoing social, economic, and political transformations. Centering on the nation-states that have emerged following the second World War, we will assess elements of Southeast Asian geography, history, language and literature, cosmologies, kinship systems, music, art and architecture, agriculture, industrialization and urbanization, politics, and economic change. We will remain particularly attentive to the ways Southeast Asians negotiate and contend with ongoing challenges with modernization, development, and globalization.

Activity: Lecture
1.0 Course Unit

SAST 269 Migration and the Middle East
This reading and discussion-intensive seminar examines the phenomenon of migration into, out of, within, and across the Middle East and North Africa. We will focus on the period from the late nineteenth century to the present, and will emphasize the cultural (rather than economic) consequences of migration. Along the way we will trace connections between the Middle East and other regions— notably the Americas, sub-Saharan Africa, South Asia, the Caucasus, and Western Europe. Readings are interdisciplinary and include works of history, anthropology, sociology, medical research, literature, political science, geography, and human rights advocacy. As students develop final projects on topics of their choice, we will spend time throughout the semester discussing tactics for research and writing.

Notes: This is a topics course and will vary from year to year.
SAST 290 South Asians in the United States
This course investigates the everyday practices and customs of South Asians in America. Every immigrant group has its own history, customs, beliefs and values, making each unique while simultaneously a part of the "melting pot" or salad bowl of American society. Yet how do people define themselves and their ethnicities living in a diasporic context? By taking into account the burgeoning South Asian American population as our model, this course will explore the basic themes surrounding the lives that immigrants are living in America, and more specifically the identity which the second generation, born and/or raised in American, is developing. South Asians in the U.S. will be divided thematically covering the topics of ethnicity, marriage, gender, religion, and pop culture. Reading and assignments will discuss a variety of issues and viewpoints that are a part of the fabric of South Asia, but will focus on the interpretation of such expressive culture in the United States.
Taught by: Khan
Course usually offered in fall term
Also Offered As: ASAM 160
Activity: Seminar

SAST 293 Caste & Class in South Asia
This course will explore the reality of caste and class in South Asian society, and the theories, classical and modern, that attempt to explain it. We shall survey a wide sweep of sources, from the earliest evidence for a division into caste-classes in the Rig-Veda to reports in modern media of caste-related social problems; from orthodox Hindu normative texts justifying and upholding a rigid hierarchical division of society to voices, in Sanskrit and in vernaculars, criticizing the caste system. Our goal is to gain a nuanced and many-sided insight into a deeply pervasive phenomenon that has shaped South Asian society, culture, and religion in general (Muslim, Sikh, and Christian castes) from ancient time up to the twentieth century.
Taught by: Sreenivasan

Also Offered As: SAST 593
Activity: Seminar
1.0 Course Unit

SAST 297 Nature Culture Environmentalism: Urban Water
In Spring 2018, this course is specially designed to appeal to students with interests in urban studies and environmental studies across different disciplines. We will explore the nature, cultures and environmentalisms of cities by exploring the matter of urban water. Cities have long been made through historic projects to tame the unruly relations between land and water. As the catastrophic human disasters in Houston, Florida and Puerto Rico have recently shown, these relations are today everywhere being unsettled and exacerbated by climate change. In cities as diverse as Philadelphia and Mumbai, climate change promises to exacerbate social inequalities and further squeeze non-human natures. How is the urban environment produced, magnified, divided and shrunk with water? In these times, how might we make space for social justice and non-human natures in and along rising urban waters?

SAST 300 Directed Study
This course is required for all senior honors majors, and open to senior majors. Honors majors must, in addition, prepare a research paper. One-term course offered either term
Activity: Independent Study
1.0 Course Unit

SAST 305 Spiegel-Wilks Seminar
Spring 2019: Multicultural, multi-religious, and spanning millennia, India’s artistic heritage is complicated and contested. This course is not an introduction to Indian art but rather an exploration of some of the conceptual, ethical, aesthetic, and practical issues involved in exhibiting, interpreting, and collecting it by U.S. museums in the 21st century. Students will dive behind the scenes with a working curator to focus on permanent collections. Case studies include two recent projects the new South Asian Galleries at the Philadelphia Museum of Art (opened 2016) and the Seattle Asian Art Museum (expected opening late 2019). Weekly readings will address the politics of display and ownership; religious objects in museums; identity and community; design, technology, and visitor experience. These will be enhanced by discussions with other Philadelphia Museum of Art staff (e.g. specialists in audience and provenance research, conservator, educator interpreter). In March the class will take a two-day trip to New York during annual Asian Art Week to visit dealers, auction houses, and museums. There will be two short writing assignments (a critical analysis of an installation walkthrough and a recommendation for the purchase of a work of art you find in New York). As a final project, students will create and present an original virtual mini-exhibition that could become a part of an actual gallery rotation at the Philadelphia Museum of Art. Classes will be held at the PMA; New York trip is required and will span at least one weekday.
PERMISSION NEEDED FROM INSTRUCTOR, CLASS SIZE LIMITED

SAST 340 Religious Bodies and Sex in South Asia
This graduate-level course introduces students to the writings of key religious scholars in modern South Asia who associated the regeneration of Hinduism, Islam, and Sikhism with the cultivation of bodies and sexual practices. Particular attention will be paid towards religious texts produced in modern India, Pakistan and Bangladesh pertaining to sexual bodies, exercises and health; celibacy, body-building; the transmission of sexual knowledge; and the political roles of the ‘Hindu,’ ‘Muslim’ and ‘Sikh’ body. In this course, students will be encouraged to engage a range of sources including religio-sexual manuals, autobiographies, novels, speeches, pamphlets, official records, recipes and films. Moreover, students will be introduced to the academic literature on South Asian religious scholars and ‘sex gurus’ in South and Southeast Asia; religious sexuality in South Asia, Southeast Asia, the Middle East and Europe; and, the transcultural literary networks that led to the production of religio-sexual texts in modern South Asia.

SAST 400 Beginning Hindi-Urdu Online (Startalk)
This introductory, proficiency-based course covers the core content of first-year Hindi-Urdu. It is designed for students with little or no prior exposure to Hindi or Urdu. The course covers all four language skills (speaking, listening, reading, and writing), but there is a special focus on developing speaking and listening skills. Students will also develop literacy skills in one script of their choice (Hindi or Urdu script). All written materials will be provided in both scripts. All classes are interactive and students acquire the language by using it in realistic contexts. Culture is introduced through various authentic materials including Bollywood songs. This program has a special application process. Please visit our website (https://www.southasiacenter.upenn.edu/startalk) for more information on the program and how to apply.
Taught by: Pien, J.
Course usually offered summer term only
Activity: Lecture
1.0 Course Unit
Notes: This is a summer online course known also as Startalk.

SAST 405 Beginning Pashtu I
The first semester is focused on mastering the writing system, basic structures, and simple conversation using texts, writing samples, and numerous structure and dialogue drills. We remain within the present and future tenses only, developing vocabulary with lessons and discussions centered around greetings, family, weather, foods, and directions. Students use authentic online and textbook materials.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: PERS 111
Activity: Lecture
1.0 Course Unit
Notes: Offered through Penn Language Center

SAST 406 Beginning Pashtu Part II
The second semester covers more advanced structures with reinforcing drills, and begin reading longer texts of an assorted variety, mostly short stories and some news articles. The past tense is introduced, as well as longer more complex texts. Topics within simple simulated contexts (taxi, hotel, restaurant, food shopping, time, family). Short writing exercises and dictations are expected at this time, as well as simultaneous translations to and from Pashto.
For BA Students: Language Course
Course usually offered in spring term
Also Offered As: PERS 112
Prerequisites: Beginning Pashtu Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit
Notes: Offered through Penn Language Center.

SAST 407 Beginning Kannada Part I
This is a systematic introduction to the Kannada language and culture for beginners. The course aims at developing listening and comprehension and a real life interactive speaking ability in a variety of everyday topics. The Kannada script is introduced from the beginning and the language is presented in its socio-cultural context for achieving a meaningful and operational control of the language. Students acquire basic rules for structural and socio-cultural appropriateness. Students learn vocabulary related to a variety of topics during the semester. Class activities include watching videos, role-playing, language games and group work. Evaluation is based on class participation, performance in quizzes and tests and completed assignments.
For BA Students: Language Course
Taught by: Swaminathan
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: Offered through Penn Language Center
SAST 408 Beginning Kannada Part II
This is a systematic introduction to the Kannada language and culture for beginners. The course aims at developing listening and comprehension and a real life interactive speaking ability in a variety of everyday topics. The Kannada script is introduced from the beginning and the language is presented in its socio-cultural context for achieving a meaningful and operational control of the language. Students acquire basic rules for structural and socio-cultural appropriateness. Students learn vocabulary related to a variety of topics during the semester. Class activities include watching videos, role-playing, language games and group work. Evaluation is based on class participation, performance in quizzes and tests and completed assignments.
For BA Students: Language Course
Taught by: Swaminathan
Two terms. student must enter first term.
Prerequisites: Beginning Kannada Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit
Notes: Offered through Penn Language Center.

SAST 410 Beginning Marathi Part I
The first year course in Marathi begins with learning the Devnagari script which is common for other important languages like Hindi and Nepali. With proper emphasis on grammar, vocabulary, and phonetics, the syllabus will see the student becoming able to speak conversational Marathi, read Marathi data from the Internet, and compose simple short essays on selected topics.
For BA Students: Language Course
Taught by: Ranade
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit
Notes: Offered through Penn Language Center.

SAST 411 Beginning Marathi Part II
Simple sentences in the present tense, narration (spoken as well written) of day to day activities, expressing likes & dislikes, culturally appropriate greetings and addressing, ability to describe events happening in present and present incomplete tense, consolidation of reading and writing skill acquired in the previous semester as well as proper pronunciations of common usage words and phrases. Speaking practices based upon the My Marathi Text book created by University of Mumbai.
For BA Students: Language Course
Taught by: Ranade
Course usually offered in spring term
Prerequisite: Beginning Marathi Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Lecture
1.0 Course Unit
Notes: Offered through Penn Language Center.

SAST 412 Intermediate Marathi I
Intermediate Marathi builds up upon the Beginning Level of Marathi. Gaining ability to speak about past and future is the most important skill in the intermediate course. Students learn the grammar, vocabulary, sentence structures to narrate and write in simple language about their experiences, short anecdotes, their observations and opinions and future plans.
For BA Students: Language Course
Taught by: Ranade
Course usually offered in fall term
Prerequisite: Beginning Marathi Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit

SAST 413 Intermediate Marathi Part II
In the syllabus for the fourth semester Marathi course gaining language inputs regarding Marathi culture and day to day daily life in Maharashtra becomes one important topic. Day to day communication skills necessary to survive in Maharashtra on the street like interaction with a grocery store clerk or a vegetable sales woman in the market, a rikshaw driver, a policeman, a commoner, asking and providing directions on the street and various day to day real life situations are improvised and practiced. Vocabulary, sentence structures and associated grammar is acquired during practice and real life situations based exercises.
For BA Students: Last Language Course
Taught by: Ranade
Course usually offered in spring term
Prerequisites: Intermediate Marathi Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit

SAST 425 Intermediate Pashtu Part I
A more in-depth study of the Pashto language. Reading, writing, speaking, and listening comprehension are all stressed in this more advanced course which also builds on the grammar of beginning level.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: PERS 113
Activity: Lecture
1.0 Course Unit
Notes: Offered through Penn Language Center.

SAST 426 Intermediate Pashtu Part II
The second semester of intermediate study and a more in-depth study of the Pashto language. Reading, writing, speaking, and listening comprehension are all stressed in this more advanced course which also continues to build on grammer skills.
Two terms. student must enter first term.
Also Offered As: PERS 114, PERS 514
Prerequisites: Intermediate Pashtu Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit
Notes: Offered through Penn Language Center.
SAST 427 Intermediate Kannada Part I
This course continues the study of the Kannada language and culture from where the beginners II course ended. The course continues developing listening and comprehension and a real life interactive speaking ability in a variety of everyday topics. The Kannada script is learned in its socio-cultural context for achieving a meaningful and operational control of the language. Students acquire rules for structural and socio-cultural appropriateness. Students learn vocabulary related to a variety of topics during the semester. Class activities include watching videos, role-playing, language games and group work. Evaluation is based on class participation, performance in quizzes and tests and completed assignments.
For BA Students: Language Course
Taught by: Sundaram
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit
Notes: Offered through Penn Language Center

SAST 428 Intermediate Kannada Part II
Students continue their study of Intermediate Kannada I, both in language and culture. The course aims at honing listening and comprehension and a real life interactive speaking ability in a variety of everyday topics. The Kannada script is learned in its socio-cultural context for achieving a meaningful and operational control of the language. Students acquire basic rules for structural and socio-cultural appropriateness. Students learn vocabulary related to a variety of topics during the semester. Class activities include watching videos, role-playing, language games and group work. Evaluation is based on class participation, performance in quizzes and tests and completed assignments.
For BA Students: Last Language Course
Taught by: Sundaram
Course usually offered in spring term
Prerequisites: Intermediate Kannada Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit
Notes: Offered through Penn Language Center.

SAST 447 Advanced Kannada: Selected Topics
Directed topics vary by semester in advanced level Kannada.
Taught by: Rajagopalan
One-term course offered either term
Activity: Lecture
1.0 Course Unit

SAST 449 Advanced Marathi
Theater and Films, Literature and poetry, Folk Songs, Dance and Music; this one semester course will explore the rich Marathi culture as well as will work on increasing the spoken, listening, reading and written proficiency of the students. News stories from the Marathi print media as well as glimpses from Marathi Television, News as well as Serials and popular comedy shows become the authentic materials in this course. Students learn the linguistic as well as cultural aspect of the variety of material through discussions, presentations in which students acquire and use the language to describe, narrate, express their opinions, evaluate, critique and appreciate these aspects of Marathi urban and rural culture.
For BA Students: Advanced Language Course
Taught by: Ranade
Course not offered every year
Activity: Lecture
1.0 Course Unit

SAST 500 Introduction to Art in South Asia
This course is a survey of sculpture, painting and architecture in the Indian sub-continent from 2300 B.C., touching on the present. It attempts to explore the role of tradition in the broader history of art in India, but not to see India as ‘traditional’ or unchanging. The Indian sub-continent is the source for multi-cultural civilizations that have lasted and evolved for several thousand years. Its art is as rich and complex as that of Europe, as diverse. This course attempts to introduce the full range of artistic production in India in relation to the multiple strands that have made the cultural fabric of the sub-continent so rich and long lasting.
Course not offered every year
Also Offered As: ARTH 104, SAST 200, VLST 234
Activity: Lecture
1.0 Course Unit

SAST 503 Historical Transitions In Early India
This course will focus on major historical transitions in the South Asian subcontinent until approximately AD 1200. It will focus on particularly on political, social and liturgical philosophical change. It will also introduce students to the major narratives and interpretations of the ancient and early medieval periods as they bear on these questions and will also familiarize students with the sources upon which this history has been based. It will review debates, critical perspectives and recent trends in this historiography with a view toward developing a sensitivity to the theoretical problems that attend the study of pre-modern India. Its persistent themes will be historical continuity and disjuncture in the history of religious practices and ideas, the emergence of political forms and the nature of the ‘state’ in precolonial india, transformations of society and economy, and the relationship between discursive production and relations of power. It will be of interest to students of history, literature, religion and archaeology.
Taught by: Ali
Course not offered every year
Activity: Seminar
1.0 Course Unit
SAST 505 Topics in Indian Art
Aspects of sculpture, painting, iconography, or architecture in the Indian sub-continent. Topic varies. Fall 2016: Important texts have been translated to South Asia’s history, perceptions of the physical world dominate experience within South Asian cultures. Seeing and being seen, vocalizing and hearing, contribute to the construction of meaning. This pro-seminar will approach South Asia’s perceptual world as expressed and tested by art, and methods to frame art as a source of knowledge.
Course not offered every year
Also Offered As: ARTH 511
Activity: Seminar
1.0 Course Unit

SAST 508 Doing Research: Qualitative Methods and Research Design
This interdisciplinary course introduces students to qualitative research methods and frameworks in the social sciences and humanities. Students will learn how to frame an effective research question, situate it in relation to existing research, select the most appropriate methods for addressing the question, and develop an effective research plan. Each week students will be introduced to a new set of frameworks for analysis, see specific examples of their application drawn from anthropological, historical, and related scholarship and have opportunities to practice applying and evaluating the strengths and weaknesses of specific methodological tools. The goals of the semester will be for each student to develop their own research proposal for a specific project. Students will be introduced to a range of textual, archival and media collections and databases available at Penn, with particular attention to South Asia and other specific regions of interest to course participants. Students will also have the opportunity to identify sources of funding for summer and/or thesis research projects, and submit applications for these opportunities as part of the course. The course is ideal for students considering summer research, an undergraduate thesis, or an application to the Fulbright or other research program.

SAST 541 Religion and the Visual Image: Seeing is Believing
Seeing is Believing engages in a historical, theoretical, and cross-cultural analysis of the place of visuality in religion and of religion in visual culture. We will examine images, buildings, places, objects, performances and events. The geographical, cultural and historical scope of the material is broad, including subjects from Europe, the Islamic World, non-Muslim South Asia, the US and Latin America from the medieval period until the present. Theoretical works will be read in conjunction with representative examples to invite intellectual engagement in a socially and historically grounded way. Important issues to be covered include the relationship of visual to material culture; visual theories versus theories of vision; locating religion in human sensory experience; perception at individual and collective levels; authentic, fakes and simulacra; iconoclasm and image veneration; aesthetics, use and utility, and things.

SAST 550 History of Hinduism
This course will explore the history of the religion(s) designated by the term ‘Hinduism’ from their earliest articulations down to the rise of modern reforms in the nineteenth century. The study of Hinduism is perhaps unique among the scholarly traditions on world religions in that it has to date had no serious connected account of its historical development, as scholars have preferred to take structural, sociological, phenomenological, and doctrinal approaches to the religion. The course, after a brief review of scholarly approaches to Hinduism and their interpretive legacies, will seek to develop a historical sense of the religion through attention to shifts in liturgy, ritual, theology, doctrine, sacral kingship, and soteriology. The course will include the reading of primary sources relevant to understanding these changes as well as highlight both modern and premodern traditions of their interpretation. It will also consider and assess some of the key interpretive ideas in the study of Hinduism, including, Sanskritization, Great and Little Traditions, cult formation, regional and popular religious movements, and canon formation. There will also be sustained consideration of the question of religion and socio-political power as well as relations between Hinduism and other religions like Buddhism and Islam.

SAST 551 Muslim Sainthood Practices
This course aims at introducing various classical, popular and modern Muslim saints in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will learn about the major concepts initiated and circulated by these saints and their distinctive ways of dealing with spiritual aspects. While focusing on their sainthood practices, we also study the nature of the dialogue which addresses the questions such as pluralism, localism, and a new paradigm of spirituality that continually interacts with diverse modes of everyday life in South Asia. In order to understand their impact on visual and media cultures, we also watch two documentaries and compare these visual sources with sainthood literature and practices.

SAST 552 MLA Proseminar: Philosophy East and West: An Introduction to Indian and Chinese Philosophy
This course will take the student through the major topics of Indian philosophy by first introducing the fundamental concepts and terms that are necessary for a deeper understanding of themes that pervade the philosophical literature of India – arguments for and against the existence of God, for example, the ontological status of external objects, the means of valid knowledge, standards of proof, the discourse on the aims of life. The readings will emphasize classical Hindu, Buddhist, and Jain philosophical articulations (from 700 B.C.E. to 16th century CE) but we will also supplement our study of these materials with contemporary or relatively recent philosophical writings in modern India.

SAST 554 Religion and Resistance in South Asia
In this course, we focus on various medieval and contemporary devotional forms of Hinduism, Buddhism and Islam in South Asia. Several definitions try to tie the idea of devotion to classicism and traditionalism with a set of conservative ideas. However, this course introduces the students to a diverse and pluralistic understanding of Hinduism, Buddhism and Islam that also has a history of resistance and protest beginning with poets such as Kabir and others from the Bhakti movement, and Sufi devotional contexts in South Asia. We read about the histories of these rebellious poets and their interventions into the traditional practices of devotion. We also discuss about how these medieval trends find their way into contemporary times enriching the discourses of Dalit, Muslim and Feminist movements.

SAST 556 Modern History of Pakistan
This course is designed as an introduction to the contemporary history of Afghanistan and Pakistan, with an emphasis on the intertwined history of both countries; their other regional neighbors; and global politics. The course focuses on global trends such as empire, nationalism, the Cold War, superpower competition, and transnational Islamism. At the same time, participants will explore how local people viewed their lives amidst these trends, and how local dynamics on this northwestern fringe of the Subcontinent changed the face of global politics. The readings supplement political and economic history with primary sources drawn from popular poetry, oral narrative, and memoir. Finally, we'll be following current events in the region, and placing them in their sociohistorical context. Therefore, there are two main goals for this course: (1) to introduce the specific history of Afghanistan and Pakistan up to present, and (2) to introduce typologies of social institutions and events, assisting class participants to develop their own frameworks for interpreting current events in the region after the end of the course.

SAST 562 The Making of Medieval India
This course will provide an in-depth understanding of South Asia in what is often called its 'medieval' period— from the rise of the great temple kingdoms until the end of the Delhi Sultanate in the sixteenth century (c. 500 CE - c. 1500 CE). This millennium is arguably one of the most transformative in South Asia's history, a period when many of its most distinctive social and cultural features evolved. The course will provide both an overview of the period as well as an introduction to major interpretations and types of sources (textual, visual, and archaeological). The focus throughout the course will be on the heterogeneous development of states, societies and cultures with special attention to long-term processes of transformation. One set of themes explored will be largely social and economic, focusing on the development of agrarian and peasant societies, aristocracies and intellectuals, as well as the role of mercantile, pastoralist, nomadic and forest-living groups. Another set of themes will explore cultural transformation, including the development, transformation and interaction of religious practices, the emergence of cosmopolitan and regional literary cultures, and the rise of distinctive urban, courtly, and rural worldviews. Special themes of discussion may include violence and manners, material cultures, religious conflict, devotional religion and gender relations.

SAST 571 Devotion's New Market: Religion, Economics, and the City
This graduate and undergraduate level course introduces students to the new forms of devotion as circulated in various urban centers in South Asia with a focus on growing market economy and urbanization. This course will particularly discuss case studies of how different modes of Hinduism, Islam, Christianity and other minor religions operate in an urbanized middle-class and educated communities. We will read theoretical and ethnographical works of contemporary research in religious studies and anthropology that deal with the questions of modernity, reformism and economic developmentalism. Throughout the semester, we focus on 1) how religious forms such as saithood practices, private and public rituals, narrative modes and everyday life evolve in the background of growing politics of development; 2) we discuss the tensions between classical notions of devotion and their new transformations in the city life, and finally 3) theoretically, we analyze concepts such as reformism, fundamentalism, recent discourses on identity politics and gender implications as connected to urban religious life.

SAST 589 Islam and the West
This course introduces students to Islam in modern South Asia, with a particular focus on the development of ‘new’ Muslim religious idioms, orientations, pedagogies and movements in 19th and 20th century South Asia. This course is divided into three parts. In the first part of this course, students are provided with an overview of: Muslim institutions and spaces in pre-colonial South Asia, the historical emergence of South Asia as a prominent global center of Islam, and the development of Urdu as an Islamic idiom. The second and main part of this course introduces students to academic literature concerning sophisticated encounters between the Muslim elite in north India and modern political and technological developments. The intimate interactions of the ‘Mullah’ and the ‘Englishman’ from the 19th to 20th century will thus be revealed to students. This part focuses upon, on the one hand, the role of Islam and pious Muslims in the colonial army, and on the other hand, Muslim initiatives to educate an Islamic ‘modernism’, ‘traditionalism’, ‘fundamentalism’ and ‘Sufism’, and appropriate print technologies for the creation of public spheres. Students will be introduced to historical scholarship revelatory of how these Muslim pedagogies and print initiatives were based upon sophisticated transcultural networks and exchange. In the third part of this course, students will be encouraged to engage with contemporary literature on South Asian Muslim political philosophy and nationalism, and the transcultural intellectual exchanges that produced key Muslim political ideologies.

SAST 593 Caste & Class in South Asia
This course will explore the historiography and theory of caste and class in South Asia. While we will survey the evidence from the pre-modern period briefly, the primary focus of the course will be on the period between the eighteenth and twentieth centuries. We will examine the degree to which colonial rule triggered particular kinds of class-oriented and caste-oriented ‘reform’, and the extent to which South Asian actors themselves shaped the nature of such change. The course will also provide an introduction to the work of the Subaltern school historians who have engaged with such questions, and situate them within the wider field of South Asian historiography.

SAST 604 Neoliberalism and the City
Over fifty percent of the world’s population now lives in cities. Neoliberalism—the ideology and accompanying policies and practices that champion the shifting of political decision making from the public sector to the private sector—has been widely recognized as having shown dramatic growth worldwide since the 1970s. It has also been widely regarded as a product of globalization. This course traces the history of neo-liberalism in global context with particular attention to neoliberalism’s relationship to cities, and exam the role that urban growth has played in spurring neoliberal policies and practices. It asks how policy makers, voters, and private interest worldwide have responded to the growth of urban poverty and slums, challenges withing urban public education, unequal resource distribution, environmental pressures experienced within urban sanitation and waste disposal systems, and increased demands for municipal services like water, electricity, and transport infrastructers, and examined the rise of public-private partnerships, gated communities, initiatives to privatized education and municipal services, and efforts to relocate slum-dwellers and beautify cities as explicit strategies for attracting “global capital”. The course also asks how the recent rise of neoliberal policies and practices differs from earlier market-driven and private sector led forms of political governance. The British and Dutch East India Companies are two famous examples of joint stock companies that assumed administrative and political roles over their colonies. How did the rise of these colonial relationships differ from current neoliberal shifts. Readings will draw heavily from ethnographic and urban studies, scholarship on South Asia, as well as Latin America, South Africa, the Middle East, Europe, and North America, exploring what each of these specific contexts has to teach us more generally about the relationship between urbanization, global capitalism, public and private sectors, and political processes and decision making.

SAST 617 Readings in Modern Indian History
This course will introduce students to the major themes and debates of modern Indian historiography. Though the course will not provide a survey outline of events, it will be organized around themes that have a broad chronological sequence. It will touch on key topical themes like the transition to colonialism, the development of the colonial economy, the evolution and significance of colonial knowledge systems, the impact and shape of religious and social reform, the rise of nationalism and communalism, and peasant, labour and subaltern history. The goal of the course will be to provide students with an understanding of the significance of debates around key themes in modern Indian history and a familiarity with the different 'schools' or 'traditions' of historical interpretation, including Nationalist, Marxist, the so-called 'Chicago', and 'Cambridge' schools, as well as the Subaltern collective and post-Subaltern historiography.

SAST 620 Godliness, Miracles, and 'Madness' in Indian Ocean Port Cities
This graduate-level course introduces students to religious worlds within port cities of the modern Indian Ocean that were centered upon peripatetic Muslim, Saiva, Christian and Sikh miracle-workers, missionaries and 'gods'. This course will particularly consider how extant, published sources reveal how religion in 19th and 20th century cosmopolitan port cities and islands: was centered upon holy men and women or spiritual beings, and intricately connected to modern economic, political and technological developments in the Indian Ocean. This course is divided into three parts. In the first part of this course, students will be introduced, on the one hand, to the scholarship on the port cities or islands of, and religions or religious networks in, the modern Indian Ocean. On the other hand, to anthropological, historical and literary works on Muslim saints, Christian missionaries and Saiva gods in the Indian Ocean. In the second and main section of this course, students will be introduced to contemporary academic literature pertaining to the inter-linkages between itinerant miracle-workers, missionaries, 'gods' and devotional cults, and economic, political and technological developments in the Indian Ocean. As well as works that explore European institutions, barracks, plantations, cells and asylums, and steam travel being steeped in customary religion, carnivals, ecstasy, madness and miracle stories. Here, students will be encouraged to consider ways in which a study of religion and religious economies of modern Indian Ocean port cities can be recovered through extracts from a range of anthropological, literary and historical sources. In the third part of this course, students will be encouraged to engage with the question of whether the religion of devotional cults preoccupied with the powers of Muslim, Saiva, Christian, and Sikh miracle-workers, missionaries and 'gods' in cosmopolitan port cities, was a distinct product of circulations within the Indian Ocean.

SAST 623 Literary History and Aesthetics in South Asia
This seminar surveys the multiple components of literary culture in South Asia. Students will engage critically with selected studies of literary history and aesthetics from the past two millennia. In order to introduce students to specific literary cultures (classical, regional, contemporary) and to the scholarly practices that situate literature in broader contexts of culture and society, the course will focus both on the literary theories - especially from the nineteenth and twentieth centuries - that position South Asia's literary cultures within broader disciplinary frameworks that use literary documents to inform social, historical and cultural research projects. The aim is to open up contexts whereby students can develop their own research projects using literary sources.

SAST 625 Philology and History: Reading South Asian Texts
Taught by: Patel, D
Activity: Seminar
1.0 Course Unit
**SAST 627 South Asia Literature as Comparative Literature**
This course takes up the question of reading South Asian Literature both as a collection of diverse literary cultures, as well as the basis for a methodology of reading that takes language, region, and history into account. It takes as a starting point recent work that foregrounds the importance of South Asian language literatures, and their complex interactions, to an understanding of South Asian literary history, as well as critiques of the concept of world literature that question its underlying assumptions and frequent reliance on cosmopolitan languages such as English. In what ways can we describe the many complex interactions between literary cultures in South Asia, rooted in specific historical contexts, reading practices, and cultural expectations, while maintaining attention to language and literary form? How, in turn, can we begin to think of these literatures in interaction with larger conversations in the world? With these considerations in mind, we will examine works of criticism dealing with both modern and pre-modern literatures, primarily but not exclusively focused on South Asia. Topics will include the concept of the cosmopolis in literary and cultural history, the role of translation, the transformations of literature under colonialism, and twentieth century literary movements such as realism and Dalit literature. Readings may include works by Erich Auerbach, Frederic Jameson, Aijaz Ahmad, Gayatri Spivak, Aamir Mufti, Sheldon Pollack, David Shulman, Yigal Bronner, Shamshur Rahman Faruqi, Francesca Orsini, Subramanian Shankar, Sharankumar Kimbale, and Torlae Jatin Gajarawala. We will also examine selected works, in English and in translation, as case studies for discussion. This course is intended both for students who intend to specialize in the study of South Asia, as well as for those who focus on questions of comparative literature more broadly.

**SAST 632 Hinduism and Colonial Modernity**
This seminar deals with the question of modernity in South Asia, with a specific focus on the construction, dissemination, and politicization of Hinduism in nineteenth and twentieth century India. It focuses on three central heuristic lenses—namely those of European imperialism, Orientalism, and nationalism—to study modernity and its discontents. What was at stake in the encounter between colonial modernity and India's religions in nineteenth and early twentieth centuries? How did colonial and native discourses on "reform" and "revival" shape Indian religions as we understand them today? How is modern "Hinduism" inextricably hinged to early forms of cultural transnationalism, Orientalism, and incipient forms of nationalism? This seminar approaches questions such as these and others, with an eye to understanding how nineteenth and early twentieth century discourses continue to shape contemporary understandings of Hinduism in deep and highly politicized ways.

**SAST 633 THE PERSIAN INTELLECTUAL TRADITION**
What makes Persian culture distinctive within broader Islamic intellectual history, and what constitutes the historical and geographical boundary of the Persianate intellectual and cultural zone? These questions lie at the center of inquiry in this seminar in which participants will read and discuss a broad range of works from the 11th to the 20th centuries. Readings will include works on philosophy and language, Sufi epic poems, religious and cultural geographies, accounts of natural and manufactured wonders, urban and political histories, as well as other kinds of texts. All readings will be in English for the regular meeting of the seminar; students with a reading knowledge of Persian and an interest in participating in an additional meeting to read the assignments in their original language should register for the higher of the two numbers listed for this course.

**SAST 640 Religious Bodies and Sex in South Asia**
This graduate-level course introduces students to the writings of key religious scholars in modern South Asia who associated the regeneration of Hinduism, Islam, and Sikhism with the cultivation of bodies and sexual practices. Particular attention will be paid towards religious texts produced in modern India, Pakistan and Bangladesh pertaining to sexual bodies, exercises and health; celibacy; body-building; the transmission of sexual knowledge; and the political roles of the ‘Hindu’, ‘Muslim’ and ‘Sikh’ body. In this course, students will be encouraged to engage a range of sources including religio-sexual manuals, autobiographies, novels, speeches, pamphlets, official records, recipes and films. Moreover, students will be introduced to the academic literature on South Asian religious scholars and ‘sex gurus’ in South and Southeast Asia; religious sexuality in South Asia, Southeast Asia, the Middle East and Europe; and, the transcultural literary networks that led to the production of religio-sexual texts in modern South Asia.

SAST 713 Literature in Translation: South Asia and the World
This course primarily introduces how to critically read literature in light of major global developments in contemporary literary theory and aesthetics from the past century (including structuralism, semiotics, reception theory, deconstruction, Marxist approaches to literature, feminist readings of texts, translation theory, etc.). It also draws attention to scholastic practices of textual criticism, paleography, and the preparation of critical editions. In doing so, the course emphasizes specific texts and essays related to South Asian literature, literary theory, and aesthetics from the past two millennia as case studies in order to: a) supplement students' knowledge of South Asian cultural production, b) frame social and historical questions related to art and aesthetics in contexts that have been otherwise under-explored, and c) to inspire debate about the extent to which analytical models and approaches developed within a given cultural setting are translatable to literary materials produced elsewhere. Students will develop their own projects, workshop what they have already begun, or explore new directions for studying literature and literary culture. Comparative approaches with other literary traditions are welcome and no background in South Asian languages or history is required.

SAST 762 Women in South Asia
This course on women in South Asian history has several objectives. To comprehend the genres of narratives in which South Asian women between the sixteenth and twentieth centuries have spoken and have been spoken about. To gain an understanding of evolving institutions and practices shaping women's lives, such as the family, law and religious traditions. To understand the impact of historical processes -- the formation and and breakdown of empire, colonialism, nationalism and decolonization -- upon South Asian women between the sixteenth and twentieth centuries. We will read primary sources in addition to familiarizing ourselves with the historiography of women in South Asia.

SAST 769 Feminist Theory
Specific topic varies. Dissent is a key word in our world today -- from the Arab Spring to the American Fall, we have seen expressions of political disobedience and protest around the world. It is more urgent than ever to consider what dissent might mean, what shapes it has taken historically, what connection might exist between it and literature, and what futures are possible. We will read key critical and theoretical work alongside some powerful, tender and controversial writings and films (largely but not exclusively produced in the postcolonial world), to inquire into the politics and poetics of governance and dissent. Students are invited to make connections with other historical and geographical contexts, and explore the different forms of dissent individual, collective, urban, rural, nationalist, pan-nationalist, religious, marxist, or feminist, to name but a few. We will pay special attention to different performances of dissent at a popular, mass or individual level. We will think about the social and cultural channels attention to different performances of dissent at a popular, mass or individual level. We will think about the social and cultural channels through which dissent is expressed, spread or quelled, how it might morph, or become obsolete, or give rise to new forms of disobedience.

Spanish (SPAN)

SPAN 110 Elementary Spanish I

Spanish 110 is a first-semester language course that emphasizes the development of foundational listening, speaking, reading and writing skills while exploring the rich cultural mosaic of the Spanish-speaking world. Through listening activities and videotaped interviews with native speakers, your aural and oral abilities will improve at the same time that you will become familiarized with different varieties of standard spoken Spanish. You will be given ample opportunities to practice orally and in writing so that you can reinforce newly acquired vocabulary and grammatical structures. Reading strategies will facilitate your comprehension of the texts included in the course syllabus. Readings focused on a specific country or region, visual items (such as maps, photos, films) and a class project will advance your knowledge of Hispanic cultural practices and products while increasing your intercultural competence. Conducted entirely in Spanish, this class will provide you with guided practice before moving to more independent and spontaneous language production. Working in small groups and in pairs, you will participate in class activities that simulate real-life situations that will help you gain confidence communicating in Spanish. Goals: By the end of this course you can expect to handle a variety of day-to-day situations in a Spanish-speaking setting: 1) Greet and introduce people, invite people to events, accept or reject invitations, ask for directions, tell time, shop and order meals in a restaurant. 2) Talk about yourself, family, and friends regarding physical and emotional states, daily routines, leisure, preferences and plans. 3) Use the cultural information learned in class as an icebreaker to find common ground with a wide variety of Spanish speakers.

SPAN 112 Elementary Spanish I and II: Accelerated

Spanish 112 is an intensive course designed for students who have already satisfied the language requirement in another language and have not previously studied Spanish. By combining the curriculum of Spanish 110 and 120, Spanish 112 seeks to develop students’ foundational listening, speaking, reading, and writing skills while exploring the rich cultural mosaic of the Spanish-speaking world. Through listening activities and mini documentaries shown in class, students will develop their aural and oral skills at the same time that they will become familiarized with different varieties of standard spoken Spanish. Students will be given ample opportunities to practice orally and in writing so that they can reinforce newly acquired vocabulary and linguistic structures. Readings focused on a specific country or region, visual items (such as maps, photos, and films) and a class project will advance students’ knowledge of Hispanic cultural practices and products while increasing their intercultural competence. Goals: By the end of this course students can expect to handle a variety of day-to-day situations in a Spanish-speaking setting such as: 1) Introduce themselves, use greetings, describe people, places and things, give instructions, tell time, go shopping, order meals in a restaurant, and make travel plans. 2) Talk about themselves, families, and friends regarding academic life, daily routines, health, work, leisure, and preferences (using the present and past tenses). 3) Use the cultural information learned in class as an icebreaker to find common ground with a wide variety of Spanish speakers.

SPAN 115 Spanish for the Medical Professions, Elementary I
Spanish 115 is a first-semester elementary Medical Spanish Language course and the first in the Spanish for Medical Professions sequence. It is designed for students with no prior coursework in Spanish. This course teaches beginning students the fundamentals of practical Spanish with an emphasis on medical situations and basic medical terminology. In this course, particular attention will be given to developing speaking and listening skills, as well as cultural awareness. It incorporates activities, vocabulary, and readings of particular interest to healthcare practitioners, while adhering to the goals and scope of Spanish 110, the first-semester Spanish language course. Students who have already taken Spanish 110 will not receive credit for Spanish 115. Although these courses have different numbers, they are at the same level. Students who have already fulfilled the language requirement (AP, SAT II, etc.) or have taken courses at the 200- and 300-level may not take basic level language courses (100-level courses) in the same language. They will not receive credit for this course (Spanish 115).

For BA Students: Language Course
Course usually offered in fall term
Prerequisites: The prerequisites for registering for this course are clearly detailed in this Credit Regulation Form, which students will have to complete and submit during the first week of classes so their instructors can verify that they are enrolled in the appropriate course. https://www.sas.upenn.edu/hispanic-portuguese-studies/sites/www.sas.upenn.edu.hispanic-portuguese-studies/files/SPANISH%20115%20CRF%200.pdf
Activity: Seminar
1.0 Course Unit
Notes: Offered through the Penn Language Center.

SPAN 125 Spanish for the Medical Professions, Elementary II
The continuation of Spanish 115, Spanish 125 is a second-semester elementary language course. See the description of Spanish 110.

For BA Students: Language Course

Prerequisites: The prerequisites for registering for this course are clearly detailed in this Credit Regulation Form: http://ccat.sas.upenn.edu/roml/spanish/undergraduate/SPANISH 125 CRF.pdf Students will have to complete and submit this form during the first week of classes so their instructors can verify that they are enrolled in the appropriate course.
Activity: Seminar
1.0 Course Unit
Notes: Offered through the Penn Language Center.

SPAN 121 Elementary Spanish I and II: Advanced Beginners
Spanish 121 is designed for students who have some prior experience in Spanish. It is an intensive elementary-level language course that in one semester covers the material studied over two semesters in our Spanish 110 and Spanish 120. The course provides a quick-paced review of material normally covered in a first-semester Spanish course and then proceeds to introduce new material so students will be prepared to take Spanish 130 during the subsequent semester. As in other Spanish courses, Spanish 121 emphasizes the development of foundational listening, speaking, reading, and writing skills while exploring the rich cultural mosaic of the Spanish-speaking world. Through listening activities and mini documentaries shown in class, students will develop their aural and oral skills at the same time that they will become familiarized with different varieties of standard spoken Spanish. Students will be given ample opportunities to practice orally and in writing so that they can reinforce newly acquired vocabulary and linguistic structures. Readings focused on a specific country or region, visual items (such as maps, photos, and films) and a class project will advance students’ knowledge of Hispanic cultural practices and products while increasing their intercultural competence. Conducted entirely in Spanish, this class will provide you with guided practice before moving to more independent and spontaneous language production. You will participate in paired, small-group and whole-class activities that simulate real-life situations that will help you gain confidence communicating in Spanish. Goals: By the end of this course students can expect to handle a variety of day-to-day situations in a Spanish-speaking setting such as: 1) Introduce themselves, use greetings, describe people, places and things, give instructions, tell time, go shopping, order meals in a restaurant, and make travel plans. 2) Talk about themselves, families, and friends regarding academic life, daily routines, health, work, leisure, and preferences (using the present and past tenses). 3) Use the cultural information learned in class as an icebreaker to find common ground with a wide variety of Spanish speakers.

Prerequisites: The prerequisites for registering for this course are clearly detailed in this Credit Regulation Form, which students will have to complete and submit during the first week of classes so their instructors can verify that they are enrolled in the appropriate course. https://www.sas.upenn.edu/hispanic-portuguese-studies/sites/www.sas.upenn.edu.hispanic-portuguese-studies/files/SPANISH%20121%20CRF%200.pdf
Activity: Seminar
1.0 Course Unit
SPAN 134 Intermediate Spanish I
Spanish 130, a first-semester intermediate-level course, emphasizes students’ acquisition of new vocabulary and linguistic structures in a cultural and communicative context while building on their previous speaking, reading, listening and writing skills. A substantial amount of the course is devoted to learning and using the past tenses. As in other Spanish courses, students will take part in a wide range of activities, including video blogging, role-plays, film viewings, listening to music and class discussions of current social and cultural topics. Unique to this course is the creation of a "cultural journal" throughout the semester in which students pursue their own interests in the Spanish-speaking world while taking advantage of some of the rich resources within Philadelphia's own Hispanic community. Goals: By the end of this course students can expect to handle a variety of common situations in a Spanish-speaking setting such as: 1) Narrate past actions, ranging from personal anecdotes to historical events 2) Give advice, recommendations, and commands to people 3) Express their feelings and doubts when reacting to what others have said 4) Talk about their future expectations and wishes 5) Demonstrate their knowledge and understanding of Hispanic cultural practices and products

SPAN 134 Intermediate Spanish I and II: Accelerated
During the spring semester, Spanish 134 is limited to those students who have satisfied the language requirement in another language. During the summer, (at the Penn campus and the Penn-in-Buenos Aires Summer Abroad Program), Spanish 134 is open to all students. Spanish 134 is an intensive intermediate-level language course that covers the material presented in Spanish 130 and Spanish 140. The course emphasizes the development of the four canonical skills (reading, writing, listening and speaking) within a culturally based context. Class time will focus on communicative activities that combine grammatical concepts, relevant vocabulary, and cultural themes. Students will participate in pair, small-group and whole-class activities to practice linguistics skills in a meaningful context. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the past tense, and the development of writing skills at a paragraph level with transitions. Students who have previously studied Spanish must take the online placement examination. Students who have already fulfilled the language requirement (AP, SAT II, etc.) or have taken courses at the 200- and 300-level may not take basic-level language courses (100-level courses) in the same language. They will not receive credit for this course (Spanish 135). For BA Students: Language Course

1.0 Course Unit
Notes: Offered through the Penn Language Center.

SPAN 135 Spanish for the Medical Professions, Intermediate I
Spanish 135 is a first-semester intermediate-level language course that emphasizes the development of the four basic skills (reading, writing, listening, and speaking), and the acquisition of medical terminology. Students will be expected to participate in classroom activities such as role-plays based on everyday situations that they may encounter at work settings such as doctors' offices, clinics, hospitals, and emergency rooms in order to develop meaningful and accurate communication skills in the target language. Students will also review and acquire other essential tools of communication in the target language applicable both within and outside the medical field. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the past tense, and the development of writing skills at a paragraph level with transitions. Students who have already taken Spanish 130 will not receive credit for Spanish 135. Although these courses have different numbers, they are at the same level. Students who have already fulfilled the language requirement (AP, SAT II, etc.) or have taken courses at the 200- and 300-level may not take basic-level language courses (100-level courses) in the same language. They will not receive credit for this course (Spanish 135).

2019-20 Catalog | Generated 10/18/19
SPAN 140 Intermediate Spanish II
Spanish 140 is a fourth-semester language course that both reinforces and enhances the communicative skills (listening, speaking, reading and writing) previously acquired while exploring the rich cultural mosaic of the Spanish-speaking world. Class activities are designed so that students can build up these four skills in order to function at an intermediate level. Readings focused on contemporary social and political issues of the Hispanic world will advance your knowledge of Hispanic and cultural practices while increasing your intercultural competence. Unique to this course is the preparation of an oral presentation on a topic related to the Hispanic world throughout the semester and presented during the last days of classes. The purpose of this task is to help students develop their presentational competence in Spanish. Conducted entirely in Spanish, this class will provide students with ample opportunities to work in small groups and in pairs while gaining confidence communicating in Spanish. This course satisfies the language requirement at Penn. Goals: By the end of this course, students can expect to handle a variety of situations in a Spanish-speaking setting, such as: 1) Express their opinions on a variety of contemporary events and issues 2) Defend their position when presented with a hypothetical situation 3) Deliver short presentations on a chosen subject after thorough preparation 4) Demonstrate their knowledge and understanding of Hispanic cultural practices and products

SPAN 145 Spanish for the Medical Professions, Intermediate II
Spanish 145, the continuation of Spanish 135, is an intermediate-level integrated skills language course. It emphasizes the development of reading, writing, listening, and speaking abilities. Students will be expected to participate actively in classroom activities such as communicative activities, role-playing based on typical doctor/patient interactions as well as other medical situations. Students will also review and learn other essential tools of communication applicable both inside and outside the medical field. Students who have already taken Spanish 140 will not receive credit for Spanish 145. Although these courses have different numbers, they are at the same level. Students who have already fulfilled the language requirement (AP, SAT II, etc.) or have taken courses at the 200- and 300-level may not take basic level language courses (100-level courses) in the same language. They will not receive credit for this course (Spanish 145). This course satisfies the language requirement in Spanish.

SPAN 180 Spanish Conversation
Must be a resident of the Modern Language College House.
Two terms. student must enter first term.
Prerequisite: Residence in Modern Language House
Activity: Seminar
0.5 Course Units

SPAN 202 Advanced Spanish
The purpose of this course is twofold: (a) to develop students’ communicative abilities in Spanish, that is, speaking, listening, reading and writing, and (b) to increase their awareness and understanding of Hispanic cultures and societies. Homework and classroom activities are designed to help students build their oral proficiency, expand and perfect their knowledge of vocabulary and grammatical structures, improve their reading and writing skills, and develop their critical thinking abilities. The material for this class includes short stories, newspaper articles, poems, songs, cartoons, video clips and a novel, such as Cesar Aira’s La villa. At the completion of this course, students will feel confident discussing and debating a variety of contemporary issues (cultural and religious practices, family relationships, gender stereotypes, political events, immigration to the USA, etc.). Any questions about placement should be addressed to the Director of the Spanish Language Program.
For BA Students: Advanced Language Course
One-term course offered either term
Prerequisite: Successful completion of Spanish 140 or equivalent
Activity: Seminar
1.0 Course Unit

SPAN 205 Advanced Spanish for the Medical Professions
The goal of this course is to provide advanced practice in Spanish to those students who are interested in pursuing careers in the medical and health care fields. Through readings and authentic materials on contemporary health issues, for example, i.e., H1N1 influenza, comparative healthcare systems, obesity, “chagas” disease, etc., students will acquire the vocabulary and grammatical structures needed to discuss a wide array of topics pertaining to the health-related professions. Students will also gain awareness of those health care issues affecting the Hispanic/Latino patient. Oral and written presentations will complement topics covered in class.
For BA Students: Advanced Language Course
One-term course offered either term
Prerequisites: Successful completion of Spanish 140 or 145 or equivalent.
Activity: Seminar
1.0 Course Unit

SPAN 208 Business Spanish I
Spanish for Business I provides advanced-level language students with technical vocabulary and communicative skills covering business concepts as they apply to the corporate dynamics of the Spanish-speaking world, with a special emphasis on Latin America. Through readings, presentations, discussions, and video materials, we shall analyze those cultural aspects that characterize the business environment in the region as well as focus on economies and markets in light of their history, politics, resources and pressing international concerns.
For BA Students: Advanced Language Course
One-term course offered either term
Prerequisite: Successful completion of Spanish 140 or equivalent
Activity: Seminar
1.0 Course Unit
SPAN 209 Business Spanish II
This course is specifically designed for advanced speakers of Spanish (e.g., native speakers, high-level heritage speakers, and students who have studied in a Spanish-speaking country for at least one semester). Students will take an in-depth look at the corporate dynamics of a number of countries in Latin America, focusing on their economies and markets, as well as on the cultural and business protocols of each region. Through the creation of an entrepreneurial project and the writing of a business plan, students will enhance their business and language skills. Any questions about placement should be addressed to the Director of the Spanish Language Program.
For BA Students: Advanced Language Course
Course usually offered in fall term
Prerequisite: Permission from the instructor
Activity: Seminar
1.0 Course Unit

SPAN 212 Advanced Spanish II: Grammar and Composition
Spanish 212 is an advanced-level language course that emphasizes the acquisition of the tools necessary for successful written expression in Spanish. These tools include a solid knowledge of the major points of Spanish grammar, an ample vocabulary, control of the mechanics of the language (spelling, punctuation, etc.), and a thorough understanding of the writing process. Throughout the semester, students will use these tools to analyze authentic texts and to produce a variety of written assignments. By the end of the course, students will have developed their awareness of the norms of standard Spanish and learned to incorporate these features into their own writing. The class will be conducted in Spanish and students are expected to speak in Spanish at all times. Any questions about placement should be addressed to the directors of the Spanish language program.
One-term course offered either term
Prerequisite: Spanish 202 or equivalent
Activity: Seminar
1.0 Course Unit

SPAN 215 Spanish for the Professions
Spanish for the Professions is designed to provide advanced-level language students with a wide-ranging technical vocabulary and the enhancement of solid communicative skills within the cultural context of several developing Latin American countries. Focusing on topics such as politics, economy, society, health, environment, education, science and technology, the class will explore the realities and underlying challenges facing Latin America. Through essays, papers, articles, research, discussions, case studies, and videotapes, we shall take an in-depth look at the dynamics of Latin American societies. The course will focus on—but not be restricted to—Mexico, Cuba and Argentina. Any questions about placement should be addressed to the Director of the Spanish Language Program.
For BA Students: Advanced Language Course
Course usually offered in spring term
Prerequisite: Spanish 202 or equivalent
Activity: Seminar
1.0 Course Unit

SPAN 219 Hispanic Texts and Contexts
The primary aim of this course is to develop students’ knowledge of the geographical, historical and cultural contexts in those regions where Spanish is used. At the same time that they are introduced to research techniques and materials available in Spanish, students strengthen their language skills through readings, class discussions, and frequent writing assignments. This course is designed to give students a broad understanding of Hispanic culture that will prepare them for upper-level course work and study abroad.
For BA Students: Humanities and Social Science Sector
One-term course offered either term
Prerequisites: Spanish 202 or Spanish 212.
Activity: Seminar
1.0 Course Unit

SPAN 223 Introduction to Literary Analysis
By helping students develop skills to carefully read and analyze Spanish literary works, Spanish 223 prepares them for upper-level courses and study abroad. After reviewing the main elements and conventions of the most popular genres (narrative, poetry, theater and essay), students become familiarized with current theoretical approaches to the study of literature with the purpose of applying them to their own analytical writing. The last weeks of the semester are devoted to the reading of a well-crafted detective novel and the examination of both its formal features and its ideological underpinnings. Throughout the course, students will have ample opportunities to hone their skills through the close reading and class discussion of varied and stimulating literary works produced by canonical and non-canonical Hispanic authors.
For BA Students: Arts and Letters Sector
One-term course offered either term
Prerequisites: Spanish 202 or Spanish 212.
Activity: Seminar
1.0 Course Unit

SPAN 317 Spanish Phonetics and Morphology
This course is an introduction to Hispanic linguistics, with special emphasis on the Spanish sound system (phonetics and phonology) and Spanish word-formation (morphology). Topics to be covered include articulatory phonetics, use of the phonetic alphabet, English and Spanish contrastive phonology, regional and social variations of Spanish pronunciation, word formation (derivation and composition), and the structure of the Spanish verb (inflection). Evaluation will be based on participation and homework, periodic quizzes, mid-term exam, and a final examination during finals week. Students will be required to write a linguistic autobiography.
Course not offered every year
Prerequisites: Spanish 219 or Spanish 223.
Activity: Seminar
1.0 Course Unit

SPAN 319 History of the Spanish Language
A survey treatment of the development of Latin to modern Spanish, with emphasis on relations between external history and the development of grammatical structure and vocabulary, and major sound shifts. Lectures and discussions of reading.
Course not offered every year
Prerequisites: Spanish 219 or Spanish 223.
Activity: Seminar
1.0 Course Unit
SPAN 325 Spanish-English Translation
This course is designed for students who already have a solid foundation in Spanish and English grammar. It provides an introduction to the theory and practice of translating between English and Spanish, addressing important topics such as discourse strategies, register and mood, dialect, genre, and cultural norms linked to written and oral communication. This is a very writing-intensive class, both in and out of the classroom. There are assigned readings from the textbooks and/or assignments online for every class meeting, which will be used to discuss both the practicalities and the cultural implications of translation. Class meetings will consist of class discussions about translation in general, and critiques of your own translation efforts in particular, combined with small group or pair work on translation exercises. While there will necessarily be some use of English, the class is conducted primarily in Spanish.
Course not offered every year
Prerequisites: Spanish 219 or Spanish 223.
Activity: Seminar
1.0 Course Unit

SPAN 330 Medieval Literature
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc
Course not offered every year

SPAN 606 Pedagogy Across the Spanish Curriculum
The aim of this seminar is to prepare graduate students in Hispanic Studies to teach a wide range of courses typically offered at North American universities and colleges—from the elementary Spanish language level to upper-division seminars—while familiarizing themselves with current approaches and methodological trends in foreign language instruction. By designing a content-based syllabus, including selecting and sequencing of reading materials and choosing the appropriate learning outcomes and assessment methods, graduate students will gain a greater awareness of curricular planning and development and acquire skills that will significantly ease their future teaching endeavors such as using a backward design model, incorporating their own research interests into their lessons and courses, or taking advantage of the resources available to language learners on campus. By the end of the course, graduate students will be able to talk about and reflect on their teaching in an effective and professional manner.
Course usually offered in fall term

Statistics (STAT)

STAT 101 Introductory Business Statistics
Data summaries and descriptive statistics; introduction to a statistical computer package; Probability: distributions, expectation, variance, covariance, portfolios, central limit theorem; statistical inference of univariate data; Statistical inference for bivariate data: inference for intrinsically linear simple regression models. This course will have a business focus, but is not inappropriate for students in the college.
One-term course offered either term
Prerequisite: MATH 104 or MATH 110 or equivalent; successful completion of STAT 101 is prerequisite to STAT 102
Activity: Lecture
1.0 Course Unit

STAT 102 Introductory Business Statistics
One-term course offered either term
Prerequisite: STAT 101
Activity: Lecture
1.0 Course Unit

STAT 111 Introductory Statistics
Introduction to concepts in probability. Basic statistical inference procedures of estimation, confidence intervals and hypothesis testing directed towards applications in science and medicine. The use of the JMP statistical package.
One-term course offered either term
Prerequisites: High school algebra.
Activity: Recitation
1.0 Course Unit

STAT 112 Introductory Statistics
Further development of the material in STAT 111, in particular the analysis of variance, multiple regression, non-parametric procedures and the analysis of categorical data. Data analysis via statistical packages.
One-term course offered either term
Prerequisite: STAT 111
Activity: Lecture
1.0 Course Unit

STAT 399 Independent Study
One-term course offered either term
Prerequisites: Written permission of instructor and the department course coordinator.
Activity: Independent Study
1.0 Course Unit

STAT 405 Statistical Computing with R
The goal of this course is to introduce students to the R programming language and related eco-system. This course will provide a skill-set that is in demand in both the research and business environments. In addition, R is a platform that is used and required in other advanced classes taught at Wharton, so that this class will prepare students for these higher level classes and electives.
Taught by: Stine, Waterman, Zhang
One-term course offered either term
Also Offered As: STAT 705
Prerequisite: STAT 102 or STAT 112 or STAT 430
Activity: Lecture
0.5 Course Units

STAT 422 Predictive Analytics for Business
This course follows from the introductory regression classes, STAT 102, STAT 112, and STAT 431 for undergraduates and STAT 613 for MBAs. It extends the ideas from regression modeling, focusing on the core business task of predictive analytics as applied to realistic business related data sets. In particular it introduces automated model selection tools, such as stepwise regression and various current model selection criteria such as AIC and BIC. It delves into classification methodologies such as logistic regression. It also introduces classification and regression trees (CART) and the popular predictive methodology known as the random forest. By the end of the course the student will be familiar with and have applied all these tools and will be ready to use them in a work setting. The methodologies can all be implemented in either the JMP or R software packages.
One-term course offered either term
Also Offered As: STAT 722
Prerequisite: STAT 102 or STAT 112 or STAT 431
Activity: Lecture
0.5 Course Units
**STAT 424 Text Analytics**
This course introduces methods for the analysis of unstructured data, focusing on statistical models for text. Techniques include those for sentiment analysis, topic models, and predictive analytics. Course includes topics from natural language processing (NLP), such as identifying parts of speech, parsing sentences (e.g., subject and predicate), and named entity recognition (people and places). Unsupervised techniques suited to feature creation provide variables suited to traditional statistical models (regression) and more recent approaches (regression trees). Examples that span the course illustrate the success of text analytics. Hierarchical generating models often associated with nonparametric Bayesian analysis supply theoretical foundations.

Taught by: Stine
One-term course offered either term
Also Offered As: STAT 724
Prerequisites: Students should be familiar with regression models at the level of STAT 102 and the R statistics language at the level of STAT 405. Familiarity with the R-Studio development environment is presumed, as well as common R packages such as stringr, dplyr and ggplot. Those with more knowledge of Statistics, such as from STAT 422, or computing skills will benefit. The predominant software used in the course is R, with bits of JMP when helpful for interactive illustration. Familiarity with basic probability models is helpful but not presumed.
Activity: Lecture
0.5 Course Units

**STAT 430 Probability**
Discrete and continuous sample spaces and probability; random variables, distributions, independence; expectation and generating functions; Markov chains and recurrence theory.
One-term course offered either term
Also Offered As: STAT 510
Prerequisite: MATH 114 or MATH 115 or equivalent
Activity: Lecture
1.0 Course Unit

**STAT 431 Statistical Inference**
Graphical displays; one- and two-sample confidence intervals; one- and two-sample hypothesis tests; one- and two-way ANOVA; simple and multiple linear least-squares regression; nonlinear regression; variable selection; logistic regression; categorical data analysis; goodness-of-fit tests. A methodology course. This course does not have business applications but has significant overlap with STAT 101 and 102.
One-term course offered either term
Also Offered As: STAT 511
Prerequisite: STAT 430
Activity: Lecture
1.0 Course Unit

**STAT 432 Mathematical Statistics**
An introduction to the mathematical theory of statistics. Estimation, with a focus on properties of sufficient statistics and maximum likelihood estimators. Hypothesis testing, with a focus on likelihood ratio tests and the consequent development of *t* tests and hypothesis tests in regression and ANOVA. Nonparametric procedures.
Course usually offered in spring term
Also Offered As: STAT 512
Prerequisite: STAT 430 or 510 or equivalent
Activity: Lecture
1.0 Course Unit

**STAT 433 Stochastic Processes**
An introduction to Stochastic Processes. The primary focus is on Markov Chains, Martingales and Gaussian Processes. We will discuss many interesting applications from physics to economics. Topics may include: simulations of path functions, game theory and linear programming, stochastic optimization, Brownian Motion and Black-Scholes.
One-term course offered either term
Also Offered As: STAT 533
Prerequisites: STAT 430, or permission of instructor
Activity: Lecture
1.0 Course Unit

**STAT 435 Forecasting Methods for Management**
This course provides an introduction to the wide range of techniques available for statistical forecasting. Qualitative techniques, smoothing and decomposition of time series, regression, adaptive methods, autoregressive-moving average modeling, and ARCH and GARCH formulations will be surveyed. The emphasis will be on applications, rather than technical foundations and derivations. The techniques will be studied critically, with examination of their usefulness and limitations.
Taught by: Shaman
One-term course offered either term
Also Offered As: STAT 711
Prerequisite: STAT 102 or 112 or 431
Activity: Lecture
1.0 Course Unit

**STAT 442 Introduction to Bayesian Data Analysis**
Undergraduate students. We will cover important concepts in Bayesian probability modeling as well as estimation using both optimization and simulation-based strategies. Key topics covered in the course include hierarchical models, mixture models, hidden Markov models and Markov Chain Monte Carlo.
Taught by: Jensen
Course usually offered in spring term
Prerequisites: A course in probability (STAT 430 or equivalent); a course in statistical inference (STAT 102, STAT 112, STAT 431 or equivalent); and experience with the statistical software R (at the level of STAT 405 or STAT 470)
Activity: Lecture
1.0 Course Unit

**STAT 451 Fundamentals of Actuarial Science I**
This course is the usual entry point in the actuarial science program. It is required for students who plan to concentrate or minor in actuarial science. It can also be taken by others interested in the mathematics of personal finance and the use of mortality tables. For future actuaries, it provides the necessary knowledge of compound interest and its applications, and basic life contingencies definition to be used throughout their studies. Non-actuaries will be introduced to practical applications of finance mathematics, such as loan amortization and bond pricing, and premium calculation of typical life insurance contracts. Main topics include annuities, loans and bonds; basic principles of life contingencies and determination of annuity and insurance benefits and premiums.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 451, BEPP 851, STAT 851
Prerequisites: MATH 104, STAT 430. STAT 430 can be taken concurrently with BEPP 451 or STAT 451
Activity: Lecture
1.0 Course Unit
STAT 453 Actuarial Statistics
This course covers models for insurer's losses, and applications of Markov chains. Poisson processes, including extensions such as non-homogeneous, compound, and mixed Poisson processes are studied in detail. The compound model is then used to establish the distribution of losses. An extensive section on Markov chains provides the theory to forecast future states of the process, as well as numerous applications of Markov chains to insurance, finance, and genetics. The course is abundantly illustrated by examples from the insurance and finance literature. While most of the students taking the course are future actuaries, other students interested in applications of statistics may discover in class many fascinating applications of stochastic processes and Markov chains.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 453, BEPP 853, STAT 853
Prerequisite: STAT 430
Activity: Lecture
1.0 Course Unit

STAT 471 Modern Data Mining
Modern Data Mining: Statistics or Data Science has been evolving rapidly to keep up with the modern world. While classical multiple regression and logistic regression technique continue to be the major tools we go beyond to include methods built on top of linear models such as LASSO and Ridge regression. Contemporary methods such as KNN (K nearest neighbor), Random Forest, Support Vector Machines, Principal Component Analyses (PCA), the bootstrap and others are also covered. Text mining especially through PCA is another topic of the course. While learning all the techniques, we keep in mind that our goal is to tackle real problems. Not only do we go through a large collection of interesting, challenging real-life data sets but we also learn how to use the free, powerful software "R" in connection with each of the methods exposed in the class.
Taught by: Zhao
One-term course offered either term
Also Offered As: STAT 571, STAT 701
Prerequisite: STAT 102 or 112 or 431
Activity: Lecture
1.0 Course Unit

STAT 474 Modern Regression for the Social, Behavioral and Biological Sciences
Function estimation and data exploration using extensions of regression analysis: smoothers, semiparametric and nonparametric regression, and supervised machine learning. Conceptual foundations are addressed as well as hands-on use for data analysis.
Taught by: Berk
Course usually offered in spring term
Also Offered As: CRIM 474, STAT 974
Prerequisite: STAT 102 or 112 or equivalent
Activity: Lecture
1.0 Course Unit

STAT 475 Sample Survey Design
This course will cover the design and analysis of sample surveys. Topics include simple sampling, stratified sampling, cluster sampling, graphics, regression analysis using complex surveys and methods for handling nonresponse bias.
Course not offered every year
Prerequisite: STAT 102 or 112 or 431
Activity: Lecture
1.0 Course Unit

STAT 476 Applied Probability Models in Marketing
This course will expose students to the theoretical and empirical "building blocks" that will allow them to construct, estimate, and interpret powerful models of customer behavior. Over the years, researchers and practitioners have used these models for a wide variety of applications, such as new product sales, forecasting, analyses of media usage, and targeted marketing programs. Other disciplines have seen equally broad utilization of these techniques. The course will be entirely lecture-based with a strong emphasis on real-time problem solving. Most sessions will feature sophisticated numerical investigations using Microsoft Excel. Much of the material is highly technical.
Taught by: Fader
Course usually offered in spring term
Also Offered As: MKTG 476, MKTG 776, STAT 776
Prerequisite: A high comfort level with basic integral calculus and recent exposure to a formal course in probability and statistics such as STAT 430 is strongly recommended.
Activity: Lecture
1.0 Course Unit
STAT 480 Advanced Statistical Computing
This course will build on the fundamental concepts introduced in the prerequisite courses to allow students to acquire knowledge and programming skills in large-scale data analysis, data visualization, and stochastic simulation.
Taught by: Buja
Course usually offered in spring term
Also Offered As: STAT 580, STAT 780
Prerequisites: STAT 470 or STAT 405 or equivalent background acquired through a combination of online courses that teach the R language and practical experience.
Activity: Lecture
1.0 Course Unit

STAT 490 Causal Inference
Questions about cause are at the heart of many everyday decisions and public policies. Does eating an egg every day cause people to live longer or shorter or have no effect? Do gun control laws cause more or less murders or have no effect? Causal inference is the subfield of statistics that considers how we should make inferences about such questions. This course will cover the key concepts and methods of causal inference rigorously. The course is intended for statistics concentrators and minors.
Taught by: Small
Course usually offered in spring term
Also Offered As: STAT 590
Prerequisites: STAT 430 is a required course for this class. One of STAT 102, STAT 112 or STAT 431 is also required for this class. Knowledge of R such as that covered in STAT 405 or STAT 470.
Activity: Lecture
1.0 Course Unit

STAT 500 Applied Regression and Analysis of Variance
An applied graduate level course in multiple regression and analysis of variance for students who have completed an undergraduate course in basic statistical methods. Emphasis is on practical methods of data analysis and their interpretation. Covers model building, general linear hypothesis, residual analysis, leverage and influence, one-way anova, two-way anova, factorial anova. Primarily for doctoral students in the managerial, behavioral, social and health sciences.
Taught by: Rosenbaum
Course usually offered in fall term
Also Offered As: BSTA 550, PSYC 611
Prerequisite: STAT 102 or 112 or equivalent
Activity: Lecture
1.0 Course Unit

STAT 501 Introduction to Nonparametric Methods and Log-linear Models
An applied graduate level course for students who have completed an undergraduate course in basic statistical methods. Covers two unrelated topics: loglinear and logit models for discrete data and nonparametric methods for nonnormal data. Emphasis is on practical methods of data analysis and their interpretation. Primarily for doctoral students in the managerial, behavioral, social and health sciences. May be taken before STAT 500 with permission of instructor.
Taught by: Rosenbaum
Course usually offered in spring term
Also Offered As: PSYC 612
Prerequisite: STAT 102 or 112 or equivalent
Activity: Lecture
1.0 Course Unit

STAT 503 Data Analytics and Statistical Computing
This course will introduce a high-level programming language, called R, that is widely used for statistical data analysis. Using R, we will study and practice the following methodologies: data cleaning, feature extraction; web scrubbing, text analysis; data visualization; fitting statistical models; simulation of probability distributions and statistical models; statistical inference methods that use simulations (bootstrap, permutation tests). A methodology course.
One-term course offered either term
Also Offered As: STAT 470, STAT 770
Prerequisites: Two courses at the statistics 400 or 500 level.
Activity: Lecture
1.0 Course Unit

STAT 510 Probability
One-term course offered either term
Also Offered As: STAT 430
Prerequisite: A one year course in calculus
Activity: Lecture
1.0 Course Unit

STAT 511 Statistical Inference
Graphical displays; one- and two-sample confidence intervals; one- and two-sample hypothesis tests; one- and two-way ANOVA; simple and multiple linear least-squares regression; nonlinear regression; variable selection; logistic regression; categorical data analysis; goodness-of-fit tests. A methodology course.
One-term course offered either term
Also Offered As: STAT 431
Prerequisite: STAT 510 or equivalent
Activity: Lecture
1.0 Course Unit

STAT 512 Mathematical Statistics
An introduction to the mathematical theory of statistics. Estimation, with a focus on properties of sufficient statistics and maximum likelihood estimators. Hypothesis testing, with a focus on likelihood ratio tests and the consequent development of "t" tests and hypothesis tests in regression and ANOVA. Nonparametric procedures.
Course usually offered in spring term
Also Offered As: STAT 432
Prerequisite: STAT 430 or 510 or equivalent
Activity: Lecture
1.0 Course Unit

STAT 515 Advanced Statistical Inference I
STAT 515 is aimed at first-year Ph.D. students and builds a good foundation in statistical inference from the first principles of probability.
Taught by: Ma
Course usually offered in fall term
Prerequisites: STAT 430 and STAT 431 and MATH 114 and MATH 240 or equivalent
Activity: Lecture
1.0 Course Unit
STAT 516 Advanced Statistical Inference II
STAT 516 is a natural continuation of STAT 515, and the main focus is on asymptotic evaluations and regression models. Time permitting, it also discusses some basic nonparametric statistical methods.
Taught by: Low
Course usually offered in spring term
Prerequisite: STAT 515
Activity: Lecture
1.0 Course Unit

STAT 520 Applied Econometrics I
This is a course in econometrics for graduate students. The goal is to prepare students for empirical research by studying econometric methodology and its theoretical foundations. Students taking the course should be familiar with elementary statistical methodology and basic linear algebra, and should have some programming experience. Topics include conditional expectation and linear projection, asymptotic statistical theory, ordinary least squares estimation, the bootstrap and jackknife, instrumental variables and two-stage least squares, specification tests, systems of equations, generalized least squares, and introduction to use of linear panel data models.
Taught by: Shaman
Course usually offered in fall term
Prerequisites: MATH 114 and MATH 312 or equivalents, and an undergraduate introduction to probability and statistics
Activity: Lecture
1.0 Course Unit

STAT 521 Applied Econometrics II
Topics include system estimation with instrumental variables, fixed effects and random effects estimation, M-estimation, nonlinear regression, quantile regression, maximum likelihood estimation, generalized method of moments estimation, minimum distance estimation, and binary and multinomial response models. Both theory and applications will be stressed.
Taught by: Shaman
Course usually offered in spring term
Prerequisites: STAT 520. This is a continuation of STAT 520
Activity: Lecture
1.0 Course Unit

STAT 533 Stochastic Processes
An introduction to Stochastic Processes. The primary focus is on Markov Chains, Martingales and Gaussian Processes. We will discuss many interesting applications from physics to economics. Topics may include: simulations of path functions, game theory and linear programming, stochastic optimization, Brownian Motion and Black-Scholes.
One-term course offered either term
Also Offered As: STAT 433
Prerequisite: STAT 510 or equivalent
Activity: Lecture
1.0 Course Unit

STAT 542 Bayesian Methods and Computation
Sophisticated tools for probability modeling and data analysis from the Bayesian perspective. Hierarchical models, mixture models and Monte Carlo simulation techniques.
Taught by: Jensen
Course usually offered in spring term
Prerequisite: STAT 430 or 510 or equivalent or permission of instructor
Activity: Lecture
1.0 Course Unit

STAT 571 Modern Data Mining
Modern Data Mining: Statistics or Data Science has been evolving rapidly to keep up with the modern world. While classical multiple regression and logistic regression technique continue to be the major tools we go beyond to include methods built on top of linear models such as LASSO and Ridge regression. Contemporary methods such as KNN (K nearest neighbor), Random Forest, Support Vector Machines, Principal Component Analyses (PCA), the bootstrap and others are also covered. Text mining especially through PCA is another topic of the course. While learning all the techniques, we keep in mind that our goal is to tackle real problems. Not only do we go through a large collection of interesting, challenging real-life data sets but we also learn how to use the free, powerful software “R” in connection with each of the methods exposed in the class.
Taught by: Zhao
One-term course offered either term
Also Offered As: STAT 471, STAT 701
Prerequisite: Two courses at the statistics 400 or 500 level or permission from instructor
Activity: Lecture
1.0 Course Unit

STAT 580 Advanced Statistical Computing
This course will build on the fundamental concepts introduced in the prerequisite courses to allow students to acquire knowledge and programming skills in large-scale data analysis, data visualization, and stochastic simulation.
Taught by: Buja
Course usually offered in spring term
Also Offered As: STAT 480, STAT 780
Prerequisites: STAT 503 or equivalent background acquired through a combination of online courses that teach the R language and practical programming skills in large-scale data analysis, data visualization, and stochastic simulation.
Activity: Lecture
1.0 Course Unit

STAT 590 Causal Inference
Questions about cause are at the heart of many everyday decisions and public policies. Does eating an egg every day cause people to live longer or shorter or have no effect? Do gun control laws cause more or less murders or have no effect? Causal inference is the subfield of statistics that considers how we should make inferences about such questions. This course will cover the key concepts and methods of causal inference rigorously.
Taught by: Small
Course usually offered in spring term
Also Offered As: STAT 490
Prerequisites: Background in probability and statistics; some knowledge of R.
Activity: Lecture
1.0 Course Unit
STAT 613 Regression Analysis for Business
This course provides the fundamental methods of statistical analysis, the art and science of extracting information from data. The course will begin with a focus on the basic elements of exploratory data analysis, probability theory and statistical inference. With this as a foundation, it will proceed to explore the use of the key statistical methodology known as regression analysis for solving business problems, such as the prediction of future sales and the response of the market to price changes. The use of regression diagnostics and various graphical displays supplement the basic numerical summaries and provides insight into the validity of the models. Specific important topics covered include least squares estimation, residuals and outliers, tests and confidence intervals, correlation and autocorrelation, collinearity, and randomization. The presentation relies upon computer software for most of the needed calculations, and the resulting style focuses on construction of models, interpretation of results, and critical evaluation of assumptions.
Course usually offered in fall term
Prerequisites: The basic mathematical skills covered in STAT 611, Mathematics for Business Analysis
Activity: Lecture
1.0 Course Unit
Notes: Lecture and discussion, assigned exercises, data analysis project, quizzes, and a final exam.

STAT 621 Accelerated Regression Analysis for Business
STAT 621 is intended for students with recent, practical knowledge of the use of regression analysis in the context of business applications. This course covers the material of STAT 613, but omits the foundations to focus on regression modeling. The course reviews statistical hypothesis testing and confidence intervals for the sake of standardizing terminology and introducing software, and then moves into regression modeling. The pace presumes recent exposure to both the theory and practice of regression and will not be accommodating to students who have not seen or used these methods previously. The interpretation of regression models within the context of applications will be stressed, presuming knowledge of the underlying assumptions and derivations. The scope of regression modeling that is covered includes multiple regression analysis with categorical effects, regression diagnostic procedures, interactions, and time series structure. The presentation of the course relies on computer software that will be introduced in the initial lectures.
Taught by: George
Course usually offered in fall term
Prerequisites: Recent exposure to the theory and practice of regression modeling.
Activity: Lecture
0.5 Course Units
Notes: Lecture and discussion, assigned exercises, data analysis, quizzes, and a final exam.

STAT 701 Modern Data Mining
Modern Data Mining: Statistics or Data Science has been evolving rapidly to keep up with the modern world. While classical multiple regression and logistic regression technique continue to be the major tools we go beyond to include methods built on top of linear models such as LASSO and Ridge regression. Contemporary methods such as KNN (K nearest neighbor), Random Forest, Support Vector Machines, Principal Component Analyses (PCA), the bootstrap and others are also covered. Text mining especially through PCA is another topic of the course. While learning all the techniques, we keep in mind that our goal is to tackle real problems. Not only do we go through a large collection of interesting, challenging real-life data sets but we also learn how to use the free, powerful software "R" in connection with each of the methods exposed in the class.
Taught by: Zhao
One-term course offered either term
Also Offered As: STAT 471, STAT 571
Prerequisite: STAT 613 or equivalent
Activity: Lecture
1.0 Course Unit

STAT 705 Statistical Computing with R
The goal of this course is to introduce students to the R programming language and related eco-system. This course will provide a skill-set that is in demand in both the research and business environments. In addition, R is a platform that is used and required in other advanced classes taught at Wharton, so that this class will prepare students for these higher level classes and electives.
Taught by: Stine, Waterman, Zhang
One-term course offered either term
Also Offered As: STAT 405
Prerequisites: STAT 613 or STAT 621 or waiving the Statistics Core completely.
Activity: Lecture
0.5 Course Units

STAT 711 Forecasting Methods for Management
This course provides an introduction to the wide range of techniques available for statistical forecasting. Qualitative techniques, smoothing and decomposition of time series, regression, adaptive methods, autoregressive-moving average modeling, and ARCH and GARCH formulations will be surveyed. The emphasis will be on applications, rather than technical foundations and derivations. The techniques will be studied critically, with examination of their usefulness and limitations.
Taught by: Shaman
One-term course offered either term
Also Offered As: STAT 435
Prerequisite: STAT 613 or equivalent
Activity: Lecture
1.0 Course Unit
STAT 722 Predictive Analytics for Business (formerly STAT 622)
This course follows from the introductory regression classes, STAT 102, STAT 112, and STAT 431 for undergraduates and STAT 613 for MBAs. It extends the ideas from regression modeling, focusing on the core business task of predictive analytics as applied to realistic business related data sets. In particular it introduces automated model selection tools, such as stepwise regression and various current model selection criteria such as AIC and BIC. It delves into classification methodologies such as logistic regression. It also introduces classification and regression trees (CART) and the popular predictive methodology known as the random forest. By the end of the course the student will be familiar with and have applied all these tools and will be ready to use them in a work setting. The methodologies can all be implemented in either the JMP or R software packages.
One-term course offered either term
Also Offered As: STAT 422
Prerequisite: STAT 613 or STAT 621 or having waived the statistics core completely
Activity: Lecture
0.5 Course Units

STAT 724 Text Analytics
This course introduces methods for the analysis of unstructured data, focusing on statistical models for text. Techniques include those for sentiment analysis, topic models, and predictive analytics. Course includes topics from natural language processing (NLP), such as identifying parts of speech, parsing sentences (e.g., subject and predicate), and named entity recognition (people and places). Unsupervised techniques suited to feature creation provide variables suited to traditional statistical models (regression) and more recent approaches (regression trees). Examples that span the course illustrate the success of text analytics. Hierarchical generating models often associated with nonparametric Bayesian analysis supply theoretical foundations.
Taught by: Stine
One-term course offered either term
Also Offered As: STAT 424
Prerequisites: Students should be familiar with regression models at the level of STAT 613 and the R statistics language at the level of STAT 705. Familiarity with the R-Studio development environment is presumed, as well as common R packages such as stringr, dplyr and ggplot. Those with more knowledge of Statistics, such as from STAT 722, or computing skills will benefit. The predominant software used in the course is R, with bits of JMP when helpful for interactive illustration. Familiarity with basic probability models is helpful but not presumed.
Activity: Lecture
0.5 Course Units

STAT 770 Data Analytics and Statistical Computing
This course will introduce a high-level programming language, called R, that is widely used for statistical data analysis. Using R, we will study and practice the following methodologies: data cleaning, feature extraction; web scrubbing, text analysis; data visualization; fitting statistical models; simulation of probability distributions and statistical models; statistical inference methods that use simulations (bootstrap, permutation tests).
Taught by: Buja
One-term course offered either term
Also Offered As: STAT 470, STAT 503
Prerequisites: STAT 613 or STAT 621 or waiving the Statistics Core completely.
Activity: Lecture
1.0 Course Unit

STAT 776 Applied Probability Models in Marketing
This course will expose students to the theoretical and empirical "building blocks" that will allow them to develop and implement powerful models of customer behavior. Over the years, researchers and practitioners have used these methods for a wide variety of applications, such as new product sales forecasting, analyses of media usage, customer valuation, and targeted marketing programs. These same techniques are also very useful for other types of business (and non-business) problems. The course will be entirely lecture-based with a strong emphasis on real-time problem solving. Most sessions will feature sophisticated numerical investigations using Microsoft Excel. Much of the material is highly technical.
Taught by: Fader
Course usually offered in spring term
Also Offered As: MKTG 476, MKTG 776, STAT 476
Prerequisites: Students must have a high comfort level with basic integral calculus, and recent exposure to a formal course in probability and statistics is strongly recommended.
Activity: Lecture
1.0 Course Unit
Notes: Format: Lecture, real-time problem solving

STAT 780 Advanced Statistical Computing
This course will build on the fundamental concepts introduced in the prerequisite courses to allow students to acquire knowledge and programming skills in large-scale data analysis, data visualization, and stochastic simulation.
Taught by: Buja
Course usually offered in spring term
Also Offered As: STAT 480, STAT 580
Prerequisites: STAT 770 or STAT 705 or equivalent background acquired through a combination of online courses that teach the R language and practical experience.
Activity: Lecture
1.0 Course Unit

STAT 851 Fundamentals of Actuarial Science I
This course is the usual entry point in the actuarial science program. It is required for students who plan to concentrate or minor in actuarial science. It can also be taken by others interested in the mathematics of personal finance and the use of mortality tables. For future actuaries, it provides the necessary knowledge of compound interest and its applications, and basic life contingencies definition to be used throughout their studies. Non-actuaries will be introduced to practical applications of finance mathematics, such as loan amortization and bond pricing, and premium calculation of typical life insurance contracts. Main topics include annuities, loans and bonds; basic principles of life contingencies and determination of annuity and insurance benefits and premiums.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 451, BEPP 851, STAT 451
Prerequisite: One semester of calculus
Activity: Lecture
1.0 Course Unit
STAT 853 Actuarial Statistics
This course covers models for insurer’s losses, and applications of Markov chains. Poisson processes, including extensions such as nonhomogeneous, compound, and mixed Poisson processes are studied in detail. The compound model is then used to establish the distribution of losses. An extensive section on Markov chains provides the theory to forecast future states of the process, as well as numerous applications of Markov chains to insurance, finance, and genetics. The course is abundantly illustrated by examples from the insurance and finance literature. While most of the students taking the course are future actuaries, other students interested in applications of statistics may discover in class many fascinating applications of stochastic processes and Markov chains.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 453, BEPP 853, STAT 453
Prerequisite: Two semesters of Statistics
Activity: Lecture
1.0 Course Unit

STAT 899 Independent Study
One-term course offered either term
Prerequisites: Written permission of instructor, the department MBA advisor and course coordinator.
Activity: Independent Study
1.0 Course Unit

STAT 915 Nonparametric Inference
Statistical inference when the functional form of the distribution is not specified. Nonparametric function estimation, density estimation, survival analysis, contingency tables, association, and efficiency.
Course not offered every year
Prerequisite: STAT 520 or equivalent
Activity: Lecture
1.0 Course Unit

STAT 920 Sample Survey Methods
This course will cover the design and analysis of sample surveys. Topics include simple random sampling, stratified sampling, cluster sampling, graphics, regression analysis using complex surveys and methods for handling nonresponse bias.
Taught by: Small
Course not offered every year
Prerequisites: STAT 520, 961 or 970 or permission of instructor
Activity: Lecture
1.0 Course Unit

STAT 921 Observational Studies
This course will cover statistical methods for the design and analysis of observational studies. Topics will include the potential outcomes framework for causal inference; randomized experiments; matching and propensity score methods for controlling confounding in observational studies; tests of hidden bias; sensitivity analysis; and instrumental variables.
Taught by: Small
One-term course offered either term
Prerequisites: STAT 520, 961 or 970 or permission of instructor
Activity: Lecture
1.0 Course Unit

STAT 925 Multivariate Analysis: Theory
This is a course that prepares PhD students in statistics for research in multivariate statistics and high dimensional statistical inference. Topics from classical multivariate statistics include the multivariate normal distribution and the Wishart distribution; estimation and hypothesis testing of mean vectors and covariance matrices; principal component analysis, canonical correlation analysis and discriminant analysis; etc. Topics from modern multivariate statistics include the Marcenko-Pastur law, the Tracy-Widom law, nonparametric estimation and hypothesis testing of high-dimensional covariance matrices, high-dimensional principal component analysis, etc.
Taught by: Ma
Course not offered every year
Prerequisites: STAT 930, 970 and 972 or permission of instructor
Activity: Lecture
1.0 Course Unit

STAT 926 Multivariate Analysis: Methodology
This is a course that prepares PhD students in statistics for research in multivariate statistics and data visualization. The emphasis will be on a deep conceptual understanding of multivariate methods to the point where students will propose variations and extensions to existing methods or whole new approaches to problems previously solved by classical methods. Topics include: principal component analysis, canonical correlation analysis, generalized canonical analysis; nonlinear extensions of multivariate methods based on optimal transformations of quantitative variables and optimal scaling of categorical variables; shrinkage- and sparsity-based extensions to classical methods; clustering methods of the k-means and hierarchical varieties; multidimensional scaling, graph drawing, and manifold estimation.
Taught by: Buja
Course not offered every year
Prerequisite: STAT 961 or permission of instructor
Activity: Lecture
1.0 Course Unit
**STAT 927 Bayesian Statistical Theory and Methods**
This graduate course will cover the modeling and computation required to perform advanced data analysis from the Bayesian perspective. We will cover fundamental topics in Bayesian probability modeling and implementation, including recent advances in both optimization and simulation-based estimation strategies. Key topics covered in the course include hierarchical and mixture models, Markov Chain Monte Carlo, hidden Markov and dynamic linear models, tree models, Gaussian processes and nonparametric Bayesian strategies.
Taught by: Jensen
Course not offered every year
Prerequisite: STAT 430 or STAT 510
Activity: Lecture
1.0 Course Unit

**STAT 928 Statistical Learning Theory**
Statistical learning theory studies the statistical aspects of machine learning and automated reasoning, through the use of (sampled) data. In particular, the focus is on characterizing the generalization ability of learning algorithms in terms of how well they perform on "new" data when trained on some given data set. The focus of the course is on: providing the fundamental tools used in this analysis; understanding the performance of widely used learning algorithms; understanding the "art" of designing good algorithms, both in terms of statistical and computational properties. Potential topics include: empirical process theory; online learning; stochastic optimization; margin based algorithms; feature selection; concentration of measure.
Course usually offered in spring term
Prerequisites: Probability and linear algebra.
Activity: Lecture
1.0 Course Unit

**STAT 930 Probability**
Taught by: Pemantle
Course usually offered in fall term
Also Offered As: MATH 648
Prerequisite: STAT 430 or 510 or equivalent
Activity: Lecture
1.0 Course Unit

**STAT 931 Stochastic Processes**
Taught by: Pemantle
Course not offered every year
Also Offered As: MATH 547, MATH 649
Prerequisite: STAT 930
Activity: Lecture
1.0 Course Unit

**STAT 955 Stochastic Calculus and Financial Applications**
Selected topics in the theory of probability and stochastic processes. Course usually offered in fall term
Prerequisite: STAT 930 or equivalent
Activity: Lecture
1.0 Course Unit

**STAT 961 Statistical Methodology**
This is a course that prepares 1st year PhD students in statistics for a research career. This is not an applied statistics course. Topics covered include: linear models and their high-dimensional geometry, statistical inference illustrated with linear models, diagnostics for linear models, bootstrap and permutation inference, principal component analysis, smoothing and cross-validation.
Taught by: Buja
Course usually offered in fall term
Prerequisites: STAT 431 or 520 or equivalent; a solid course in linear algebra and a programming language
Activity: Lecture
1.0 Course Unit

**STAT 962 Advanced Methods for Applied Statistics**
This course is designed for Ph.D. students in statistics and will cover various advanced methods and models that are useful in applied statistics. Topics for the course will include missing data, measurement error, nonlinear and generalized linear regression models, survival analysis, experimental design, longitudinal studies, building R packages and reproducible research.
Taught by: Small
Course usually offered in spring term
Prerequisite: STAT 961
Activity: Lecture
1.0 Course Unit

**STAT 970 Mathematical Statistics**
Decision theory and statistical optimality criteria, sufficiency, point estimation and hypothesis testing methods and theory.
Taught by: Small
Course usually offered in fall term
Prerequisite: STAT 431 or 520 or equivalent; comfort with mathematical proofs (e.g., MATH 360)
Activity: Lecture
1.0 Course Unit

**STAT 971 Introduction to Linear Statistical Models**
Taught by: Ma
Course usually offered in spring term
Prerequisite: STAT 970
Activity: Lecture
1.0 Course Unit

**STAT 972 Advanced Topics in Mathematical Statistics**
A continuation of STAT 970.
Taught by: Cai
One-term course offered either term
Prerequisites: STAT 970 and 971
Activity: Lecture
1.0 Course Unit
Tamil (TAML)

TAML 406 Beginning Tamil Part I
This course introduces students to colloquial Tamil and formal written Tamil. A balance between production skills, namely writing and speaking, and comprehension skills, namely reading and listening, will be maintained throughout the course. Reading materials will introduce students to customs and habits of the Tamil speakers in Tamil Nadu, Sri Lanka, Malaysia, and Singapore. Lessons in the class will be based on a set of Tamil learning lessons and videos made available at http://www.southasia.upenn.edu/tamil and the book by the Instructor titled "Tamil Language in Context", information available at http://www.thetamillanguage.com. By the end of the semester, students will have a working knowledge in reading Tamil text with a basic skill to write and speak the language at ACTFL's Beginner High level.
For BA Students: Language Course
Taught by: Renganathan
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

TAML 407 Beginning Tamil Part II
This course is a continuation of the Beginner Tamil TAMIL406. It continues to teach grammar and spoken skill from semester I. Lessons in the class will be based on a set of Tamil learning lessons and videos made available at http://www.southasia.upenn.edu/tamil and the book by the Instructor titled "Tamil Language in Context", information available at http://www.thetamillanguage.com. By the end of the semester, students will have a working knowledge in reading Tamil text with a basic skill to write and speak the language at ACTFL's Beginner High level.
For BA Students: Language Course
Taught by: Renganathan
Course usually offered in spring term
Prerequisites: Intermediate Tamil Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit

TAML 426 Intermediate Tamil Part I
This course develops the skills obtained either from the Beginning Tamil course or from students' prior exposure to Tamil by some other means. Basic knowledge of Tamil script, reading and writing in Tamil is required to take this course. Heavy emphasis will be made on using the language in actual environments both in spoken medium and in written medium. Multimedia materials such as audio and video facilities from the book and the website Tamil Language in Context (http://www.southasia.upenn.edu/tamil) will be used extensively to provide students an exposure to the Tamil culture and customs as followed in Tamilnadu, India. Besides improving their speech and writing, students will also be introduced gradually to Tamil literature, which has two thousand years of literary history. The learning process in this course will be facilitated by the lessons and videos as provided in the website and the book. By the end of this course, students will have ACTFL's intermediate mid level proficiency in Tamil.
For BA Students: Language Course
Taught by: Renganathan
Two terms: student must enter first term.
Activity: Lecture
1.0 Course Unit

TAML 427 Intermediate Tamil Part II
This course is a continuation of Intermediate Tamil I (TAML426) and it continue to develop the skills obtained either from the Beginning Tamil course or from students' prior exposure to Tamil by other means. The emphasis will be on using the language in actual environments both in spoken medium and in written medium. Multimedia materials such as audio and videos as provided in the website http://www.southasia.upenn.edu/tamil or http://www.thetamillanguage.com will be extensively used to provide students an exposure to the Tamil culture and customs as authentic as possible. Besides improving their speech and writing, students will also be introduced gradually to Tamil literature, which has two thousand years of literary history. By the end of this course, students will have ACTFL's intermediate high proficiency level.
For BA Students: Last Language Course
Taught by: Renganathan
Course usually offered in spring term
Prerequisites: Intermediate Tamil Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit

TAML 428 Intermediate Tamil Part III
This course is a continuation of Intermediate Tamil II (TAML427) and it continue to develop the skills obtained either from the Beginning Tamil course or from students' prior exposure to Tamil by other means. The emphasis will be on using the language in actual environments both in spoken medium and in written medium. Multimedia materials such as audio and videos as provided in the website http://www.southasia.upenn.edu/tamil or http://www.thetamillanguage.com will be extensively used to provide students an exposure to the Tamil culture and customs as authentic as possible. Besides improving their speech and writing, students will also be introduced gradually to Tamil literature, which has two thousand years of literary history. By the end of this course, students will have ACTFL's intermediate high proficiency level.
For BA Students: Last Language Course
Taught by: Renganathan
Course usually offered in spring term
Prerequisites: Intermediate Tamil Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit

TAML 429 Intermediate Tamil Part IV
This is the advanced course in the Tamil Language Program. This course is a continuation of Intermediate Tamil III (TAML428) and it continue to develop the skills obtained either from the Beginning Tamil course or from students' prior exposure to Tamil by other means. The emphasis will be on using the language in actual environments both in spoken medium and in written medium. Multimedia materials such as audio and videos as provided in the website http://www.southasia.upenn.edu/tamil or http://www.thetamillanguage.com will be extensively used to provide students an exposure to the Tamil culture and customs as authentic as possible. Besides improving their speech and writing, students will also be introduced gradually to Tamil literature, which has two thousand years of literary history. By the end of this course, students will have ACTFL's intermediate high proficiency level.
For BA Students: Last Language Course
Prerequisites: Intermediate Tamil Part III or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit
TAML 446 Advanced Tamil
This course is a continuation of the Advance Tamil Course I and its primary focus is to concentrate particularly on any one of the genres of the Tamil language namely Sangam, medieval or modern Tamil, which span a vast variety of texts from Aham, Puram, religious poems along with a whole array of Tamil inscriptions. The familiarity from Advanced Tamil I course will be adequately used to master in any aspect of these three genres of the Tamil language. Based on the general interests of the students who are enrolled in this course specific variety of the text to concentrate upon will be selected. In the past, we have read poems from the Sangam genre Purananuru, Ahananuru, Silappatikaram, Manimekalai etc., along with the parallel religious poems from Tirumurai, Nalayira Divyaprabandam and so on. We have also read as part of this course texts from Islam literature, Tamil inscriptions and other related kinds. Text from the instructors book (to be published), "Ilakkiyap payaNangkal" will be used to give a birds eye view to students about Tamil literature and the transitions that took place from Sangam, medieval and modern period. This course will train students to have a near-native proficiency in Tamil along with a professional skill in any particular variety of the Tamil language.
For BA Students: Advanced Language Course
Course usually offered in spring term
Activity: Lecture
1.0 Course Unit

TELU 409 Beginning Telugu Part I
This course introduces students to the basic Telugu language skills, with an emphasis on practice for listening comprehension, and speaking Telugu. Combined with exposure to Andhra culture, the classroom and online work in this course will enable interested students to pursue further language study in Telugu at the intermediate level, to carry out field research in Andhra Pradesh, or to prepare them to advanced work in Telugu Studies. An introduction to Telugu like this will also be useful for students who just want to acquire basic Telugu language skills for learning a new language or being able to communicate with Telugu speaking family and friends or to enjoy Telugu music and films.
For BA Students: Language Course
Taught by: Magier
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

TELU 410 Beginning Telugu Part II
This course continues students to the basic Telugu language skills, with an emphasis on practice for listening comprehension, and speaking Telugu. Combined with exposure to Andhra culture, the classroom and online work in this course will enable interested students to pursue further language study in Telugu at the intermediate level, to carry out field research in Andhra Pradesh, or to prepare them to advanced work in Telugu Studies. An introduction to Telugu like this will also be useful for students who just want to acquire basic Telugu language skills for learning a new language or being able to communicate with Telugu speaking family and friends or to enjoy Telugu music and films.
For BA Students: Language Course
Taught by: Magier
Course usually offered in spring term
Prerequisites: Beginning Telugu Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Lecture
1.0 Course Unit

TELU 429 Intermediate Telugu Part I
This course is designed to expand the students' basic language skills in Telugu in order to allow them to function adequately in a Telugu-speaking environment, to immerse themselves in the rich Andhra culture, and to accomplish a more advanced competency in an interesting foreign language. This course is also aimed at students planning to conduct scholarly research in Telugu history, literature or society, or humanities or social science fieldwork in Telugu speaking areas.
For BA Students: Language Course
Taught by: Magier
Two terms. student must enter first term.
Prerequisites: Beginning Telugu Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Lecture
1.0 Course Unit

TELU 430 Intermediate Telugu Part II
This course is designed to expand the students’ basic language skills in Telugu in order to allow them to function adequately in a Telugu-speaking environment, to immerse themselves in the rich Andhra culture, and to accomplish a more advanced competency in an interesting foreign language. This course is also aimed at students planning to conduct scholarly research in Telugu history, literature or society, or humanities or social science fieldwork in Telugu speaking areas.
For BA Students: Language Course
Taught by: Sundaram
Prerequisites: Intermediate Telugu Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1.0 Course Unit

Theatre Arts (THAR)

THAR 066 African American Drama: From the 1920's to the present
This course will introduce students to Pulitzer-prize winning plays such as Lynn Nottage’s Sweat, groundbreaking plays such as Ntozake Shange’s For Colored Girls, as well as less known plays that show the wide range of form and themes in 20th and 21st century African American drama. We will focus on performance as a mode of interpreting a script and performance as a way of understanding the intersections of race, class, and gender. In-class viewings of selected scenes in recorded productions of the plays will energize our analysis of the scripts. Short creative, performance-oriented writing assignments will produce the questions explored in the two critical essays. In addition to Sweat and For Colored Girls, our line-up may include Zora Neale Hurston’s Color Struck, Anna Deavere Smith’s Twilight: Los Angeles, 1992, Suzan-Lori Parks’ 100 Plays for the First Hundred Days, August Wilson’s Radio Golf, Lydia Diamond’s Harriet Jacobs, Amiri Baraka’s The Slave, and Claudia Rankine’s The White Card.
Taught by: Crawford
One-term course offered either term
Also Offered As: AFRC 066, ENGL 066
Activity: Lecture
1.0 Course Unit

THAR 067 American Theatre
Activity: Lecture
1.0 Course Unit

THAR 073 Literature and the Visual Art
Also Offered As: ARTH 299, CIMS 073, COML 073, ENGL 073, LALS 073
Activity: Lecture
1.0 Course Unit
THAR 076 Theatre in Philadelphia
This course will investigate the state of the contemporary, non-profit theatre culture of Philadelphia by examining the history, artistic mission, and current production work of selected city theatre companies. This course will also explore the creative process of theatre-making as undertaken by these theatres through the reading of plays being produced by them this fall, through an analysis of the collaborative contribution of the playwright, director, actors, and designers to the creation of a production, and, finally, through attendance at those productions mounted by the theatre companies under investigation. The members of the class will write individual essays responding to these productions, do research and give group presentations on other Philadelphia theatre companies, and participate daily in a spirited dialogue about the vitality, level of artistic accomplishment, and cultural/social value of contemporary theatre in Philadelphia
Taught by: Malague and Schlatter
Course not offered every year
Activity: Seminar
1.0 Course Unit
Notes: Frequently offered as a Freshmen Seminar

THAR 100 Introduction to Theatre Arts
An introduction to different approaches to understanding and analyzing performance, representational theatre, and non-representational theatre, using as test cases both dramatic scripts and live performance. Different aspects of theatre art and theatrical process (acting, design, audience, musical theatre) will be taught by guest lecturers drawn from the Theatre Arts faculty and local professionals.
For BA Students: Arts and Letters Sector
Taught by: Malague and Schlatter
One-term course offered either term
Activity: Lecture
1.0 Course Unit

THAR 101 Theatre, History, Culture I: From Classical to the Middle Classes
This course investigates the state of the history of theatre practice in Europe and Asia from Fifth-Century Athens to roughly the end of the Eighteenth Century. In addition to analyzing major dramatic works, this course examines the evolution of production methods - scenography, acting, costuming, theatre architecture - across cultures and key socio-historical moments. Readings will be drawn from historical research, theoretical writings, plays and contemporary social documents. A particular focus will be on the integral role that the theatre plays as a cultural institution in the ongoing civic life of major cities. The course approaches theatre as broadly interdisciplinary and examines its intersection with religious practice, political developments, national identity, geography, the visual arts and the urban landscape.
For BA Students: Arts and Letters Sector
Also Offered As: ENGL 097
Activity: Lecture
1.0 Course Unit

THAR 102 Theatre, History, Culture II: Romantics, Realists and Revolutionaries
This course investigates the history of theatre practice from the end of the Eighteenth-Century to the present, with an emphasis on interplay of mainstream practices with the newly emerging aesthetics of acting, scenography, and theatrical theory, and the interplay of popular entertainment and audiences with the self-defined aesthetic elitism of the Avant Garde. Among the aesthetics and phenomena we will examine are romanticism and melodrama; bourgeois realism and revolutionary naturalism; emotional-realist acting; the reaction against realism; political theatre; physical theatre; theatre and media; non-dramatic theatre; and theatre that challenges long-standing categories of national identity, empire, gender, and sexuality.
For BA Students: Arts and Letters Sector
Also Offered As: ENGL 097
Activity: Lecture
1.0 Course Unit

THAR 105 Literary Genres
An introduction to literary study through a genre, either the short story or poetry. Versions of this course will vary widely in the selection of texts assigned. Some versions will begin with traditional stories or poems, including a sampling of works in translation. Others will focus exclusively on modern and contemporary American short fiction or poetry. This course is designed for the General Requirement, and is ideal for the students wishing to take an English course but not necessarily intending to major.
One-term course offered either term
Also Offered As: COML 125, ENGL 103, FOLK 125, NELC 180, SAST 124
Activity: Lecture
1.0 Course Unit

THAR 114 Playwriting Workshop
This course is designed as a hands-on workshop in the art and craft of dramatic writing. It involves the study of new plays, the systematic exploration of such elements as storymaking, plot, structure, theme, character, dialogue, setting, etc.; and most importantly, the development of students’ own short plays through a series of written assignments and in-class exercises. Since a great deal of this work takes place in class - through lectures, discussions, spontaneous writing exercises, and the reading of student work - weekly attendance and active participation is crucial. At the end of the semester, students’ plays are read in a staged reading environment by professional actors.
Course usually offered in spring term
Also Offered As: ENGL 114
Activity: Seminar
1.0 Course Unit
THAR 120 Introduction to Acting
Rooted in the system devised by Constantine Stanislavsky, but incorporating a wide variety of approaches, including improvisation, this course takes students step by step through the practical work an actor must do to live and behave truthfully on-stage. Beginning with relaxation and physical exercise, interactive games, and ensemble building, students then learn and put into practice basic acting techniques, including sensory work, the principles of action, objectives, given circumstances, etc. The semester culminates in the performance of a scene or scenes, most often from a play from the Realist tradition. This course strongly stresses a commitment to actor work and responsibility to one's fellow actors. Practical work is supplemented by readings from Stanislavsky and a variety of other acting theorists that may include Uta Hagen, Robert Cohen, Stella Adler, among others. Students are required to submit short essays over the course of the semester in response to the readings and in preparation for their final scene project.
Taught by: Ferguson, Malague, Schlatter, and Staff
One-term course offered either term
Activity: Seminar
1.0 Course Unit
Notes: Required of all Theatre Arts Majors

THAR 121 Introduction to Directing
This class will introduce the basic principals of stage directing, beginning with the fundamentals of three-dimensional storytelling in script and character analysis. The aim of this course is to provide students with a basic knowledge of directing through an introduction to the functional tools of the craft. Classes provide lectures and practical work in dealing with topics such as the function of the director, analyzing a script, visual composition, blocking, stage business, and working with actors. This course is a prerequisite for Advanced Directing.
Taught by: Ferguson, Malague, Mazer, Schlatter and O’Harra
One-term course offered either term
Activity: Seminar
1.0 Course Unit
Notes: Required of all Theatre Arts Majors

THAR 125 The Play: Structure, Style, Meaning
How does one read a play? Theatre, as a discipline, focuses on the traditions of live performance. In those traditions, a play text must be read not only as a piece of literature, but as a kind of "blueprint" from which productions are built. This course will introduce students to a variety of approaches to reading plays and performance pieces. Drawing on a wide range of dramatic texts from different periods and places, we will examine how plays are made, considering issues such as structure, genre, style, character, and language, as well as the use of time, space, and theatrical effects. Although the course is devoted to the reading and analysis of plays, we will also view selected live and/or filmed versions of several of the scripts we study, assessing their translation from page to stage.
Taught by: Malague and Schlatter
One-term course offered either term
Also Offered As: ENGL 056
Activity: Lecture
1.0 Course Unit

THAR 130 Introduction to Light, Set, and Costume Design
Design for theatre (and all of the performing arts) is a dynamic, collaborative process that engages both intellect and emotion in staging the dramatic moment. The personal vision of the designer must navigate the often-uncharted waters of the production process, from the earliest, personal moments of design inspiration to the opening night performance. Design flows from creativity, is structured by research and theory, and is realized in living form by collaboration in the dynamic process of theatre-making. This class will integrate history, theory and practice of stage design in the interactive setting of the Collaborative Classroom in Van Pelt Library in this special interdisciplinary, active-learning course offering open to all Penn students. Group and individual projects, field visits, practical projects and guest speakers will be featured in this newly-revised course.
Taught by: Baratta
One-term course offered either term
Activity: Seminar
1.0 Course Unit
Notes: Required of all Theatre Arts Majors

THAR 131 Concepts of Lighting
In this course we will cover the basic concepts of the art and craft of Stage Lighting Design. As a craft we will examine mechanics and technology of lighting design including light sources, power distribution, optics, and control. As an art we will explore how lighting ties together all the visual elements of a production and helps create an appropriate atmosphere that heightens the audience's understanding and enjoyment of the play. Topics include: what light is, what it does, and how light influences our perception and understanding of what we see. Exercises will help the student learn how to see and to understand how light shapes and affects the appearance people and objects on stage and in everyday life. Projects work will emphasize design theory and practice (design methods, script analysis, and drafting skills). Lighting design has it roots in the theatre. The theatre continues to be a prime training ground for lighting designers, no matter what their field.
Taught by: Whinnery
Course usually offered in fall term
Activity: Seminar
1.0 Course Unit

THAR 132 Costume
Costume history and design provides a framework for organized study and practice in this particular facet of theatre production. It is a one-semester course, scheduled to meet once a week for a three hour session. 
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit
THAR 133 Concepts of Stage Design
In this course we will cover the basic concepts of Scenic Design for the stage. Scene Design is about the look or physical appearance of the stage for a play. It reflects the way that the stage is composed artistically in regard to props, actors, shapes and color. We will explore Scene Design and the Theatre (story telling, place and local, time and period, society and culture), Scene Design as a Visual Art (principals of design and composition, style, use of space, expression of concept) and examine how it ties together all the visual elements of a production to create an appropriate atmosphere that heightens the audience's understanding and enjoyment of the play. Topics will include: Script Analysis, Technical Production, Period Decor and Ornament; Drawing, Drafting, Model Making; and Scene Painting.
Taught by: Whinnery
Course usually offered in fall term
Activity: Seminar
1.0 Course Unit

THAR 170 Voice for the Actor
This introductory course is designed to help the actor find new freedom and range of expression with their voice and to connect their voice to their impulse. Our focus on relaxation, sensitivity and awareness, using Fitzmaurice Voicework techniques inspired by yoga and meditation, help the student access and develop their own authentic sound. They will learn how to support their voice in a healthy way, with a view to longevity, spontaneity and flexibility of use. In this course, these kinds of vocal exercises will be applied to short, character monologues, in order to foster sensitivity to our voices and breath and to the habits and tensions we have formed around speaking in public. For an actor, reconnecting with their authentic voice is essential for an honest, connected and compelling performance. This training is also useful for anyone who wants to speak in public with confidence, sincerity and ease.
Taught by: Doherty
Course usually offered in fall term
Prerequisites: THAR 120 or equivalent.
Activity: Seminar
1.0 Course Unit

THAR 171 Movement for the Actor
The study of the art of bodily expression throughout history in theory and practice, from Classical and Oriental, African and Latin forms of dance and movement theater to the contemporary dance and theater, including mime, modern dance, post modern dance, physical theater, film, and performance art.
Taught by: Fischbeck
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit
Notes: Primarily for majors. Non-majors need permission of the instructor

THAR 214 Advanced Playwriting
This course is intended to reinforce and build upon the areas covered in Level 1 Playwriting (THAR-114) so that students can refine the skills they've acquired and take them to the next level. Topics covered will include techniques for approaching the first draft, in-depth characterization, dramatic structure, conflict, shaping the action, language/dialogue (incl.subtext, rhythm, imagery, exposition etc), how to analyse your own work as a playwright, dealing with feedback, the drafting process, techniques for rewriting, collaboration (with directors, actors etc) and the 'business of the art' - working with theatres, agents, dramaturgs etc. Students will undertake to write their own one-act plays over the course. The classes will be a mixture of lecture, discussion, study of dramatic texts, writing exercises and in-class analysis of students' work.
Course not offered every year
Also Offered As: ENGL 154
Prerequisite: Thar 114 - Playwriting Workshop or Permit of the instructor
Activity: Lecture
1.0 Course Unit

THAR 220 Advanced Acting
This course continues the work begun in the Introduction to Acting class. The specific focus of the course will be on helping students to connect more deeply and truthfully with each other on stage, freeing up the body of the actor to fulfill the physical demands of characterization, and analyzing the dramatic text to clarify objectives and focus action through unit breakdown. Attention will also be given to helping students work through specific problems and personal, creative obstacles. The basis of the course will be scene work taken from the twentieth-century repertoire (realist and non-realist plays), a classical monologue, and exercises taken from a variety of performance traditions. The course also includes readings from modern theorists and practitioners.
Taught by: Ferguson, Malague, Schlatter and O'Hara
Course not offered every year
Prerequisites: THAR 120 or by special permission of the instructor.
Activity: Seminar
1.0 Course Unit

THAR 236 Topics in Renaissance Drama: Acting Shakespeare
This is a hands-on studio course designed to empower actors (and directors, designers and dramaturgs) to use the structure of Shakespeare's language and the conventions of Shakespeare's stage to build performance, using the skills and method of the contemporary actor. After the class works collectively on sonnets and speeches, all of the speech- and scene-work will be drawn from a single Shakespeare play (to be determined), with two reciprocal goals: to use the script to build the performance, and to use what we discover through performance to build an interpretation of the script. NOTE: the normal prerequisite for this course is THAR 120 or THAR 121 or their equivalents; but exceptions will be made by permission of he instructor.
Taught by: Mazer
Course not offered every year
Also Offered As: ENGL 236
Prerequisite: THAR 120 or 121 or their equivalent or Permission of Instructor
Activity: Seminar
1.0 Course Unit
Notes: This course is not open to freshmen. Instructor permission is required.
THAR 240 Advanced Topics in Theatre History
The purpose of this course is to introduce students to the basic materials and methods of theatre history and historiography, as applied to a particular topic, organized around a specific period, national group, or aesthetic issue. This course is concerned with methodological questions: how the history of theatre can be documented; how primary documents, secondary accounts, and historical and critical analyses can be synthesized; how the various components of the theatrical event—acting, scenography, playhouse architecture, audience composition, the financial and structural organization of the theatre industry, etc.—relate to one another; and how the theatre is socially and culturally constructed as an art form in relation to the politics and culture of a society in a particular time and place. Taught by: Mazer
One-term course offered either term
Activity: Seminar
1.0 Course Unit
Notes: This class is the next level up from Thar 140 - Topics in Theatre History.

THAR 250 Theatre Workshop
This course will examine a specific aspect of theatrical practice, taught by a visiting professional theatre artist. The course, with different topics, may be repeated for credit. Recent topics have included performance art, Jacques LeCoq technique, Suzuki, and Viewpoints. Taught by: Various Theatre Professionals
Course not offered every year
Activity: Seminar
1.0 Course Unit
Notes: Cross-listings are contingent upon topics offered. For the current topics contact the Theatre Arts office.

THAR 271 American Musical Theatre
The American musical is an unapologetically popular art form, but many of the works that come from this tradition have advanced and contributed to the canon of theatre as a whole. In this course we will focus on both music and texts to explore ways in which the musical builds on existing theatrical traditions, as well as alters and reshapes them. Finally, it is precisely because the musical is a popular theatrical form that we can discuss changing public tastes, and the financial pressures inherent in mounting a production. Beginning with early roots in operetta, we will survey the works of prominent writers in the American musical theatre, including Kern, Berlin, Gershwin, Porter, Rodgers, Hart, Hammerstein, Bernstein, Sondheim and others. Class lecture/discussions will be illustrated with recorded examples.
Taught by: Fox
Course not offered every year
Also Offered As: CIMS 271, ENGL 285
Activity: Seminar
1.0 Course Unit

THAR 272 American Theatre and Performance
This course examines the development of the modern American theatre from the turn of the century to the present day. Progressing decade by decade the course investigates the work of playwrights such as Eugene O’Neil, Arthur Miller, Tennessee Williams, Edward Albee, David Mamet, August Wilson and Tony Kushner, theatre companies such as the Provincetown Players and the Group Theatre, directors, actors, and designers. Some focus will also be given to major theatrical movements such as the Federal Theatre Project, Off-Broadway, regional theatre, experimental theatre of the Sixties, and feminist theatre. Taught by: Schlatter and Malague
Course not offered every year
Also Offered As: CIMS 273, ENGL 067
Activity: Lecture
1.0 Course Unit

THAR 274 Dramaturgy
This course will examine the functions and methods of the dramaturg—the person in the theatrical process who advises the artistic collaborators on (among other things) new play development, the structure of the script, the playwright’s biography and other writings, the play’s first production and its subsequent production history, and the historical and regional details of the period depicted in the plays action. We will study the history of the dramaturg in the American theatre and discuss contemporary issues relating to the dramaturg’s contribution to the theatrical production (including the legal debates about the dramaturg’s contribution to the creation of RENT). And, in creative teams, the class will create dramaturgical portfolios for a season of imaginary (and, potentially, a few actual) theatrical productions. Taught by: Mazer
Course not offered every year
Also Offered As: ENGL 256
Activity: Seminar
1.0 Course Unit

THAR 275 Advanced Topics in Theatre
This course will combine an intensive practical and intellectual investigation of some area of the making of theatre: performance techniques, theatrical styles, a particular period of theatre history. Please visit the Theatre Arts Program website for current topics for Thar 275 and other Theatre Arts Courses and special topics: https://theatre.sas.upenn.edu Please visit the Theatre Arts Program website each semester for information on the available THAR 275 special topics courses: https://theatre.sas.upenn.edu
Taught by: Fox, Ferguson, Malague, Mazer, O’Harra & Schlatter
Course not offered every year
Also Offered As: CIMS 225, ENGL 276, URBS 274
Activity: Seminar
1.0 Course Unit
Notes: This course, which may with different topics, be repeated for credit, will examine a specific aspect of theatrical practice. Recent topics have included performance art, Jacques Lecoq technique, improvisation, and puppetry.
THAR 279 Women in Theatre and Performance
What is feminist theatre? How do artists use live performance to provoke not only thought and feeling, but also social, personal, and political change? This course will examine a wide array of plays and performances by and about women; these pieces are, in turn, serious, hilarious, outrageous, poignant—and always provocative. Our focus will be on English-language works from the late 20th century to the present (#metoo) moment. We will read these performance texts and/or view them on stage/screen; we will also read essays that provide contextual background on feminist theatre theory and history. Throughout the semester, we will engage diverse perspectives on women and race, ethnicity, class, sexuality, and gender identity; the issues we encounter will also include marriage and motherhood, career and community, feminism and friendship, and patriarchy and power. The class will take full advantage of any related events occurring on campus or in the city, and will feature visits with guest speakers. Students will have the opportunity to pursue research on their own areas of interest (some recent examples are "women in comedy," trans performance, drag kings, feminist directing, etc.).
Taught by: Malague
Course not offered every year
Also Offered As: ENGL 303, GSWS 279
Activity: Seminar
1.0 Course Unit

THAR 281 Arts and Research Studio: Queer Archives, Aesthetics, and Performance
This course focuses on questions of how to represent the queer past, which it approaches from several angles: through training in archival methods and in scholarly debates about historiographical ethics (or, in the words of David Halperin, "how to do the history of homosexuality"); through engagement with the work of artists who make archives central to their practice; and through lab-based training that aims to represent encounters with queer history through embodied performance.
Expectations: This course meeting weekly for 3 hours. But as you will see listed below (these activities and dates are not confirmed for this draft syllabus) the course includes and require that you attend a series of off-campus trips both in Philadelphia and to NYC that occur outside of the class schedule. Below is a list of archives we will visit, performances we will attend, and artists' studios we will visit for in-depth conversation with artist about their practice. The course will address both practical and theoretical issues raised by research in LGBT archives. We will take advantage of local resources in Philadelphia, including the John J. Wilcox Archives at the William Way Center (http://www.waygay.org/archives/). But we will also visit the Lesbian Herstory Archives (http://www.lesbianherstoryarchives.org/) and The Downtown Collection at the Fales Library at NYU (https://guides.nyu.edu/downtown-collection) and the Franklin Furnace Performance Archives (http://www.franklinfurnace.org), all in New York City. We will also bring artists to campus to work directly with students, and will meet with artists in New York. We will take advantage of the staging of Killjoy Kastle in Philadelphia in Fall 2019. This site-specific art installation, the work of Toronto artists Allyson Mitchell and Dierdre Logue, is a haunted house that addresses the difficult history of lesbian feminism, as well as its potential for contemporary LGBT politics. Since the Haunted House will include materials related to the history of feminist and LGBT activism in Philadelphia, students in the course can actively contribute to the research for this project.
Taught by: Love
Course offered fall; odd-numbered years
Also Offered As: ENGL 280
Activity: Studio
1.0 Course Unit

THAR 320 Scene Study
Scene Study is an advanced acting class that combines intensive script analysis with performance of scenes; material to be explored will be chosen specifically for the members enrolled in class. Open to students who have successfully completed Introduction to Acting, this course continues with greater emphasis on the actor’s work with the text. We will study several plays together as a group, conducting Stanislavskian table work. We will then workshop and perform scenes from these plays in subsequent class sessions. In consultation with the instructor, students will identify individual goals, building on discoveries made in other Theatre Arts courses and/or prior stage work, exploring roles and plays that present actors with new challenges and expand their range. Depending on the number of students enrolled in the class, we are likely to perform at least three scenes and a monologue. Plays will be read alongside key theoretical texts, and class work will be complemented by attendance at selected live productions on campus and in Philadelphia.
Taught by: Malague
Course usually offered in fall term
Prerequisites: Thar 120, Thar 220
Activity: Seminar
1.0 Course Unit
THAR 321 Acting & Directing Lab
This course operates as a continuation of both Introduction to Acting (THAR120) and Introduction to Directing (THAR121). Students can take the course as actors, directors, or both. Each semester the course covers a unique topic of exploration for actors and directors. This is a studio class with a focus on scene work within various genres, styles and concentrations of theatrical practices. Some special topics might include: Japanese Theatre, Theatre as Event, Experimental Theatre, and Feminism and Form.
Taught by: O’Harra
Course usually offered in spring term
Prerequisite: THAR 120 or THAR 121
Activity: Lecture
1.0 Course Unit

THAR 350 Rehearsal and Performance
Theatre Rehearsal and Performance provides students with deep intellectual and artistic immersion in the theatrical process through intensive research, rehearsal, and performance of a full-length stage piece. Students may enroll in this course as actors (by audition only) or as assistant directors, stage managers, dramaturgs, or designers (by permission of the instructor). Each semester, the play will be featured in the Theatre Arts Program production season; the class meeting times will vary, but will typically consist of 16-20 hours per week in the evening hours.
Taught by: Ferguson, Fox, Malague, Mazer and Schlatter
One-term course offered either term
Activity: Studio
1.0 Course Unit

THAR 485 Japanese Theater
Japan has an enormously rich and varied theatrical tradition. In this course, we will examine Japanese theatre in historical and comparative contexts.
Taught by: Kano
One-term course offered either term
Also Offered As: COML 385, EALC 255, EALC 655, FOLK 485

Turkish (TURK)

TURK 021 Elementary Turkish I
This is a course for beginners who have no previous knowledge of Turkish. Using a communicative approach, Elementary Turkish introduces basic vocabulary and grammar rules and focuses on building language competencies in listening, reading, speaking and writing. By the end of the course, students will be able to participate in simple conversations, to know daily expressions, and will understand simple dialogues in day-to-day context and will be able to count and tell time. Will be able to speak about events that happened in the past and express plans for the future. Students will also develop writing strategies that will allow them to write simple letters and fill in commonly-used forms.
For BA Students: Language Course
Taught by: Hatiboglu
Course usually offered in fall term
Also Offered As: TURK 621
Activity: Lecture
1.0 Course Unit

TURK 022 Elementary Turkish II
This course is a continuation of TURK 021 and is designed to strengthen and extend students’ listening, speaking, reading and writing competence and to deepen an understanding of Turkish people in Turkey. By the end of this course, students will be able to handle a variety of day to day needs in Turkish-speaking settings and engage in simple conversations. Students can expect to be able to order food and drinks, purchase things, and to be able to be familiar with current social topics. Students will be able to talk about all tenses, present, future, past, past continuous, make comparisons, describe people and things in detail, make travel plans, make reservations in hotels and holiday resorts, write complaint letters. By the end of the course, students will be able to talk about their studies and their plans for the future. Also, students will develop reading strategies that should allow them to understand the general meaning of articles, and short literary texts. Students will learn practical life in Turkey and will explore Turkish culture on the internet.
For BA Students: Language Course
Taught by: Hatiboglu

Urban Studies (URBS)

URBS 010 Homelessness & Urban Inequality
This freshman seminar examines the homelessness problem from a variety of scientific and policy perspectives. Contemporary homelessness differs significantly from related conditions of destitute poverty during other eras of our nation's history. Advocates, researchers and policymakers have all played key roles in defining the current problem, measuring its prevalence, and designing interventions to reduce it. The first section of this course examines the definitional and measurement issues, and how they affect our understanding of the scale and composition of the problem. Explanations for homelessness have also varied, and the second part of the course focuses on examining the merits of some of those explanations, and in particular, the role of the affordable housing crisis. The third section of the course focuses on the dynamics of homelessness, combining evidence from ethnographic studies of how people become homeless and experience homelessness, with quantitative research on the patterns of entry and exit from the condition. The final section of the course turns to the approaches taken by policymakers and advocates to address the problem, and considers the efficacy and quandaries associated with various policy strategies. The course concludes by contemplating the future of homelessness research and public policy.

1.0 Course Unit

URBS 050 Womanism and Identity Politics in the Realm of Hip-Hop
This course centers on the intersections of womanism, woman of color identity development, and agency within hip-hop culture. We will touch on several topics that uncover the condition of minoritized women in hip-hop media, including creating/owning space, lyrical assault, defining womanhood, sexuality, and fetishes. In exploring music, literature, advertisements, film, and television, we will discuss the ways women of color construct understandings of self, while navigating and reimagining reality within hip-hop contexts.

Also Offered As: GSW 040
Activity: Seminar
1.0 Course Unit

URBS 103 Industrial Metropolis
Although we no longer think of most U.S. cities as industrial cities, metropolitan areas today are all products of industrial economies, technologies, and social systems. This course explores the industrialization and deindustrialization of American cities within their evolving global context from the era of European colonization to the present. It includes weekly readings and discussion, regular response papers and walking tours, in- class exercises, and a research paper using primary sources. Themes include energy and ecology, labor and production, inner city and suburban development, globalization, and economic restructuring. Ultimately, the class aims to give students a broad knowledge of 1) the history of industrial capitalism, 2) its effects on cities and regions over the past three centuries, and 3) analytical tools for understanding the past, present, and future of metropolitan economies, geography, and society.
For BA Students: History and Tradition Sector
Taught by: Sidorick
Course usually offered in fall term
Also Offered As: HIST 209
Activity: Seminar
1.0 Course Unit
Notes: Course is available to freshmen and sophomores

URBS 104 Transformations of Urban America: Making the Unequal Metropolis, 1945 to Today
The course traces the economic, social, and political history of American cities after World War II. It focuses on how the economic problems of the industrial city were compounded by the racial conflicts of the 1950s and 1960s and the fiscal crises of the 1970s. The last part of the course examines the forces that have led to the revitalization and stark inequality of cities in recent years.
For BA Students: Society Sector
Taught by: Cebul

Activity: Lecture
1.0 Course Unit

URBS 106 Freshman Seminar
The primary goal of the freshman seminar program is to provide every freshman the opportunity for a direct personal encounter with a faculty member in a small sitting devoted to a significant intellectual endeavor. Specific topics be posted at the beginning of each academic year. Please see the College Freshman seminar website for information on current course offerings http://wwwcollege.upenn.edu/courses/seminars/freshman.php.
One-term course offered either term
Also Offered As: ARTH 100, CIMS 016, ENGL 017
Activity: Seminar
1.0 Course Unit
Notes: For Freshmen Only
URBS 122 Urban Sociology
This course is a comprehensive introduction to the sociological study of urban areas. It includes more general topics as the rise of cities and theories of urbanism, as well as more specific areas of inquiry, including American urbanism, segregation, urban poverty, suburbanization and sprawl, neighborhoods and crime, and immigrant ghettos. The course will also devote significant attention to globalization and the process of urbanization in less developed counties.
Taught by: Flippin
Course not offered every year
Also Offered As: ANTH 121, NELC 103
Activity: Lecture
1.0 Course Unit

URBS 120 Literature of the South Asian City: Space, Culture, Politics
The South Asian city as a way of organizing space and social relations, as a symbol, as a memory is the subject of this course. Through primarily, though by no means exclusively, readings of literature in translation, we will gain a sense for the history of the city and the ways in which it is a setting for protest and nostalgia, social transformation and solitary flaneurie. We will see reflections of the city in poetry recited in its homes, detective novels sold in its train stations, stories scribbled in its cafes, plays staged in its theaters, and films produced in its backlots. Readings will attempt to address urban spaces across South Asia, and will include works by writers such as Mirza Ghalib, Rabindranath Tagore, Saadat Hasan Manto, and Vijay Tendulkar. We will examine these works in the context of secondary readings, including histories and ethnological works that take up life in the modern city. Students will finish this course prepared to pursue projects dealing with the urban from multiple disciplinary perspectives. This course is suitable for anyone interested in the culture, society, or literature of South Asia, and assumes no background in South Asian languages.
Taught by: Goulding
One-term course offered either term
Also Offered As: COML 114, SAST 120
Activity: Lecture
1.0 Course Unit

URBS 121 Origin and Culture of Cities
The UN estimates that 2.9 of the world's 6.1 billion people live in cities and that this percentage is rapidly increasing in many parts of the world. This course examines urban life and urban problems by providing anthropological perspectives on this distinctive form of human association and land use. First we will examine the "origin" of cities, focusing on several of the places where cities first developed, including Mesopotamia and the Valley of Mexico. We will then investigate the internal structure of non-industrial cities by looking at case studies from around the world and from connections between the cities of the past and the city in which we live and work today.
For BA Students: History and Tradition Sector
Taught by: Zettler
Course usually offered in fall term
Also Offered As: ANTH 121, NELC 103
Activity: Lecture
1.0 Course Unit

URBS 122 The City in South Asia
This interdisciplinary social science course examines key topics, themes, and analytic methods in the study of South Asia by focusing on significant South Asian cities. With one-fifth of the world's population, South Asia and its urban centers are playing an increasingly important role in recent global economic transformations, resulting in fundamental changes within both the subcontinent and the larger world. Drawing primarily on ethnographic studies of South Asia in the context of rapid historical change, the course also incorporates research drawn from urban studies, architecture, political science, and history, as well as fiction and film. Topics include globalization and new economic dynamics in South Asia; the formation of a new urban middle class; consumption and consumer culture; urban political formations, democratic institutions, and practices; criminality & the underworld; population growth, changes in the built environment, and demographic shifts; everyday life in South Asia and ethnic, and ethnic, cultural, and linguistic identities, differences, and violence in South Asia's urban environments. This is an introductory level course appropriate for students with no background in South Asia or for those seeking to better understand South Asia's urban environments in the context of recent globalization and rapid historical changes.
No prerequisites. Fulfills College sector requirement in Society and foundational approach in Cross-Cultural Analysis.

1.0 Course Unit

URBS 136 Urban Politics in the United States
This course examines urban life and urban problems by providing anthropological perspectives on this distinctive form of human association and land use. First we will examine the "origin" of cities, focusing on several of the places where cities first developed, including Mesopotamia and the Valley of Mexico. We will then investigate the internal structure of non-industrial cities by looking at case studies from around the world and from connections between the cities of the past and the city in which we live and work today.
For BA Students: History and Tradition Sector
Taught by: Zettler
Course usually offered in fall term
Also Offered As: ANTH 121, NELC 103
Activity: Lecture
1.0 Course Unit

URBS 137 The Sociology of Media and Popular Culture
This course relies on a variety of sociological perspectives to examine the role of media and popular culture in society, with a particular emphasis on the power of the mass media industry, the relationship between cultural consumption and status, and the social organization of leisure activities from sports to shopping.
For BA Students: Society Sector
Taught by: Grazian
One-term course offered either term
Also Offered As: SOCI 137
Activity: Lecture
1.0 Course Unit
URBS 139 Ancient Civilizations of the World
This course explores the archaeology (material culture) of early complex societies or civilizations in Egypt, Mesopotamia, and the Aegean. According to the traditional paradigm, civilization first emerged during the fourth millennium BCE in Egypt and Mesopotamia. In the Mediterranean, state-level societies first appeared in Crete and mainland Greece in the early second millennium BCE. This course investigates how and why these civilizations developed, as well as their appearance and structure in the early historic (or literate) phases of their existence. A comparative perspective will illustrate what these early civilizations have in common and the ways in which they are unique. This course will consist largely of lectures and discussion rather than assigned readings. Students are encouraged to consult secondary sources based on the instructor’s approval.

For BA Students: History and Tradition Sector
Taught by: Zettler
Course not offered every year
Also Offered As: REES 171
Activity: Seminar
1.0 Course Unit
Notes: Previously URBS 214

URBS 140 Inequity and Empowerment: Urban Financial Literacy
This course provides students with a rich look at the historical and contemporary factors that have shaped America's wealth gaps. By studying the economic impacts of systemic forces such as discriminatory housing, predatory lending, and unbanking, students will develop a deep financial understanding of today's urban communities.

Students will also explore their own financial awareness and exposure, creating personalized financial histories and empowerment plans. By breaking the silence on topics such as credit scores, auto purchases, renting vs. owning a home, insurance, retirement plans, debt management, and investing, Urban Financial Literacy will prepare students for a financially healthy life at Penn and beyond. The course will also explore larger financial examples and case studies, including endowment funds and major foundations, the promises and perils of sports and entertainment, start-ups and the gig economy, and more.

In contrasting the opportunity and excess that is possible, with the debilitating realities of intergenerational poverty in America, the idea is that students will end the course with a robust appreciation for financial literacy, a portfolio of practical strategies, and a commitment to create new possibilities for financial wellness.

Taught by: Peterson and Copeland
Course not offered every year
Activity: Seminar
1.0 Course Unit
Notes: This course is co-designed and co-taught by New York Jets linebacker Brandon Copeland (W '13)

URBS 160 Race and Ethnic Relations
The course will focus on race and ethnicity in the United States. We begin with a brief history of racial categorization and immigration to the U.S. The course continues by examining a number of topics including racial and ethnic identity, interracial and interethnic friendships and marriage, racial attitudes, mass media images, residential segregation, educational stratification, and labor market outcomes. The course will include discussions of African Americans, Whites, Hispanics, Asian Americans and multiracials.

Taught by: Charles, Kao, Zuberi
One-term course offered either term
Also Offered As: AFRC 006, ASAM 006, SOCI 006
Activity: Lecture
1.0 Course Unit

URBS 171 The Socialist City
This course will explore the ideology and politics of the socialist city in the Soviet Union, East Europe, and the Second World. We will focus on how design professionals, politicians, and residents realized utopian socialist values in the face of national design traditions, local politics, and limited resources. Beginning with the Soviet case, the course will consider how planners and architects addressed modernization, multi-family housing, and neighborhood units in new city plans. We will consider capitals, like Moscow, as well as less well-known regional centers that had strong local identities, such as Tashkent, Belgrade, and Prague. We will examine the state's use of public spaces for commemorations and preservationists' reinterpretation of existing historic sites. In addition, we will consider how everyday residents experienced the socialist city, such as multi-family housing, shopping centers, and subway systems. We will address how citizens circumvented official state channels to obtain state housing and illegally build homes for themselves, sometimes in a folk style. The course will center on Soviet and East European cities, but also address socialist cities in Cuba and Africa whose design was influenced by transnational exchanges. Most broadly, this course explores the question, what was the socialist city? How did its planners, architects, and politicians understand it, and what did they intend to construct? And, what resulted? In the past fifteen years, North American scholars have begun to take seriously the study of the socialist city, and this course draws on the emerging scholarship on this exciting, cross-disciplinary topic. How do scholars understand the socialist city today? We will examine the shared legacies that socialist cities across East Europe shared with their Western European counterparts, as well as the particularities of design that have sparked North American scholars' debates on what distinguished the socialist city from ones that emerged in a capitalist context. In our discussions, we will seek to understand how socialist design professionals understood their work and the emerging cities at the time, as well as how North American scholars view the socialist city today. Disciplinarily, the focus of the call will fall at the intersection of architectural history and politics.

URBS 178 Faculty-Student Collaborative Action Seminar in Urban University-Community Relations
One of the goals of this seminar is to help students develop their capacity to solve strategic, real-world problems by working collaboratively in the classroom, on campus, and in the West Philadelphia community. Research teams help contribute to the improvement of education on campus and in the community, as well as the improvement of university-community relations. Among other responsibilities, students focus their community service on college and career readiness at West Philadelphia High School and Sayre High School. Students are typically engaged in academically based community service learning at the schools for two hours each week. A primary goal of the seminar is to help students develop proposals as to how a Penn undergraduate education might better empower students to produce, not simply "consume," societally-useful knowledge, as well as function as caring, contributing citizens of a democratic society. Please note new location of the class: The Netter Conference Room is on 111 South 38th Street, on the 2nd floor.

URBS 180 Asian American Food
You are what you eat. Asian American Food explores the history, politics, and ethnic identity of food through a cultural lens. Growing food, eating, and sharing meals serve as intimate expressions of self and community. By examining the production and consumption of food, the course investigates the ways that Asian Americans navigate traditions, gender norms, religious dietary laws, food habits, and employment as they create lives in the United States. The course overviews the history of Asian American foodways, but has a particular focus on Philadelphia’s Asian American communities.
Taught by: Khan, F
Course usually offered in spring term
Also Offered As: ASAM 180, SAST 180
Activity: Seminar
1.0 Course Unit

URBS 200 Urban Research Methods
This course will examine different ways of undertaking urban research. The goal will be to link substantive research questions to appropriate data and research methods. Computer-based quantitative methods, demographic techniques, mapping / GIS and qualitative approaches will be covered in this course. Student assignments will focus on constructing a neighborhood case study of a community experiencing rapid neighborhood change.
One-term course offered either term
Activity: Seminar
1.0 Course Unit
Notes: Fulfills Quantitative Data Analysis Requirement

URBS 202 Urban Education
This seminar focuses on two main questions: 1) How have US schools and urban ones in particular continued to reproduce inequalities rather than ameliorating them? 2) In the informational age, how do the systems affecting education need to change to create more successful and equitable outcomes? The course is designed to bridge the divide between theory and practice. Each class session looks at issues of equity in relation to an area of practice (e.g. lesson design, curriculum planning, fostering positive student identities, classroom management, school funding, policy planning...), while bringing theoretical frames to bear from the fields of education, sociology, anthropology and psychology.
Taught by: Clapper
One-term course offered either term

URBS 203 Introduction to City Planning: Planning Urban Spaces
This course will provide a general introduction to the concepts and practice of city planning. Topics to be discussed include: the process and nature of planning - theories, methods and roles as manifested in practice; history and trends in city planning; functional planning practice; planning within constraints—a field project; planning in the international arena; present crisis in planning.
Taught by: Gorostiza
Course usually offered summer term only
Activity: Seminar
1.0 Course Unit

URBS 204 Urban Law
This course will focus on selected aspects of urban law that are particularly relevant to areas of high population density. After an introduction to the American judicial system, it will examine the legal issues that arise in the management of land development and use, with special attention to constitutional questions involving equal protection, due process, and the "takings" clause, and routine run-of-the-mill zoning challenges. This course meets the Cultural Diversity requirement.
Taught by: Keene
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

URBS 205 People and Design
The built environment of a city is more than a mere backdrop; the design can actually affect people’s experiences. Environmental design primarily focuses on the relationship between people and the built environment. It also looks at how the built environment interacts with the natural one (and the potential for greater sustainability). This course will allow students to gain a deeper understanding of how people create, perceive, and use the designed environment. We’ll approach these concepts by analyzing design at a variety of scales, from products to interior design to architecture. Finally, using that knowledge, we’ll conclude by analyzing urban spaces of the city.
Taught by: Berman
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit
URBS 206 Public Environment of Cities: An Introduction to the Urban Landscape
This course will explore the role of public spaces - streets, boulevards, parks and squares - in cities and their social uses. With the University of Pennsylvania campus and the City of Philadelphia serving as our laboratory, we will critically examine the evolution of the movement of corridors, open space and buildings of the urban landscape and their changing uses. Following the flaneur tradition of Baudelaire and Benjamin, we will walk the city to experience and understand the myriad environments and neighborhoods that comprise it.
Taught by: Nairn
Course usually offered in spring term
Also Offered As: URBS 506
Activity: Seminar
1.0 Course Unit

URBS 207 Asian American Communities
Who is Asian American and how and where do we recognize Asian America? This interdisciplinary course explores the multiple factors that define Asian American identity and community. In order to provide a sketch of the multifaceted experience of this growing minority group, we will discuss a wide variety of texts from scholarly, artistic, and popular (film, cinematic) sources that mark key moments in the cultural history of Asia America. The course will address major themes of community life including migration history, Asian American as model minority, race, class, and transnational scope of Asian America. In combination with the readings, this class will foster and promote independent research based on site visits to various Asian American communities in Philadelphia and will host community leaders as guest lecturers.
Taught by: Khan

URBS 220 Jews and the City: Advanced Benjamin Franklin Seminar
Jews have always been an extraordinarily urban people. This seminar explores various aspects of the Jewish encounter with the city, examining the ways that Jewish culture has been shaped by and has helped to shape urban culture. We will examine European and American cities as well as some in Palestine/Israel, covering an expansive view of urban culture. We will consider Jewish involvement in political and cultural life, the various neighborhoods in which Jews have lived, relations with other ethnic groups, as well as many other topics. We will read some classic works in the field along with contemporary scholarship. No prior background in Jewish history is required. *This course may be applied toward the US, European, or Middle East requirements for the Hisory Major or Minor, depending upon the research paper topic. Students must consult with the instructor to determine which geographic requirement will be fulfilled.*

URBS 236 Iraq: Ancient Cities and Empires
This course consists of an analytical survey of civilization in the ancient Mesopotamia from prehistoric periods to the middle centuries of the first millennium B.C. A strong focus is placed on Mesopotamia (Iraq, eastern Syria) proper, but it occasionally covers its adjacent regions, including Anatolia (Turkey), north-central Syria, and the Levantine coast. As we chronologically examine the origin and development of civilization in the region, various social, political, economic, and ideological topics will be explored, including subsistence, cosmology, writing, trade, technology, war, private life, burial and empire. Based on both archaeological and historical evidence, these topics will be examined from archaeological, anthropological, historical and art historical perspectives. Students will be exposed to a variety of theoretical approaches and types of relevant evidence, including settlement survey data, excavated architectural remains and artifacts, and written documents. The course aims to provide students with a strong foundation for further study in Near Eastern civilization.

URBS 237 Berlin: History, Politics, Culture
What do you know about Berlin's history, architecture, culture, and political life? The present course will offer a survey of the history of Prussia, beginning with the seventeenth century, and the unification of the small towns of Berlin and Köpenick to establish a new capital for this country. It will tell the story of Berlin's rising political prominence in the eighteenth century, its transformation into an industrial city in the late nineteenth century, its rise to metropolis in the early twentieth century, its history during the Third Reich, and the post-war cold war period. The course will conclude its historical survey with a consideration of Berlin's position as a capital in reunified Germany. The historical survey will be supplemented by a study of Berlin's urban structure, its significant architecture from the eighteenth century (i.e. Schinkel) to the nineteenth (new worker's housing, garden suburbs) and twentieth centuries (Bauhaus, Speer designs, postwar rebuilding, GDR housing projects, post-unification building boom). In addition, we will read literary texts about the city, and consider the visual art and music created in and about Berlin. Indeed, Berlin will be a specific example to explore German history and cultural life of the last 300 years. The course will be interdisciplinary with the fields of German Studies, history, history of art, and urban studies. It is also designed as a preparation for undergraduate students who are considering spending a junior semester with the Penn Abroad Program in Berlin.

URBS 248 The Urban Food Chain
This class explores the social, economic, ecological, and cultural dynamics of metropolitan and community food systems. Field trips and assignments immerse students in various forms of experiential learning - including farming and gardening, cooking, eating, and more. Across the semester, we follow the food chain, from production to distribution, processing, consumption, and waste. Specific topics include urban agriculture, wholesale and retail, hunger and food assistance, restaurants and food trucks, food cultures and culinary traditions, food movements, and food justice. Students will learn how to research and map metropolitan and neighborhood food environments, and to analyze the relationships between food, culture, and society. Students taking this class should be open to trying new things, getting their hands dirty, and working with others in a variety of settings and activities.

Taught by: Vitiello
Course not offered every year

1.0 Course Unit

URBS 250 Urban Public Policy: Philadelphia -- A Case Study
An introduction to a broad range of substantive policy areas affecting the city, and an exploration into the complexities of policy formulation and implementation in a large and pluralistic metropolitan setting. The course subtitle, "Philadelphia -- A Case Study," describes our approach. Donna Cooper leads the region's foremost child advocacy organization focused on poverty, child welfare and education issues, she formerly served as the Deputy Mayor for Policy for the City of Philadelphia, and Secretary of Policy of the Commonwealth of Pennsylvania.

Taught by: Donna Cooper
One-term course offered either term
Activity: Seminar
1.0 Course Unit
URBS 252 Urban Journalism
This course will examine the state of urban journalism today with special emphasis on how large newspapers are redefining themselves, and the news, in an era of dwindling readership and growing financial pressures. The course will look at online journalism, ethics, and alternative sources of news, and will explore the techniques journalists use in reporting the news. Students will report and write four pieces of their own about Philadelphia and its environs. The course is taught by Dan Biddle, the Philadelphia Inquirer's former politics editor, an award-winning journalist for 40 years.
Taught by: Biddle
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit

URBS 253 Cities, Suburbs, Regions
This course will explore the political, economic, social, and demographic forces impacting development patterns in metropolitan areas, with a particular focus on Philadelphia. We will examine the government policies, economic forces, and social attitudes that affect the way a region grows, and the impact of these forces on poverty, equity, and segregation. Specific topics to be discussed include the factors that make a region competitive, the city's changing role in the region, the impact place has on opportunity, and approaches to revitalizing and improving communities.
Taught by: Black
Course offered spring; even-numbered years
Also Offered As: SOCI 254
Activity: Seminar
1.0 Course Unit

URBS 258 Global Urban Education
This course examines the demographic, social, and economic trends impacting the growth of global cities—providing the context for global urban education. Through the dual lens of globalization and local urban culture, we explore relationships between urban education and economic development, democratic citizenship, social movements, social inclusion, equity, and quality of urban life. We consider key historical legacies (e.g., Colonialism), informal settlements and “slums,” the rise of the "knowledge economy," and the role of international aid. Additional topics include: early childhood; gender equity; youth culture; impacts of crises and war; urban refugees; teacher training and identity; accountability & governance; information & computer technology; religion, indigenous cultures, and language identity; & the role of the private sector and school choice. We focus on cities like Sao Paolo, Mexico City, Shanghai, Hong Kong, Ho Chi Minh City, Johannesburg, Lagos, Nairobi, Jakarta, Mumbai, Lahore, Tehran, and Cairo, and draw comparisons to cities like New York, London, Paris, and Tokyo.
Taught by: Gershberg

Also Offered As: SOCI 258
Activity: Seminar
1.0 Course Unit

URBS 264 Poverty, Race and Health
This course is designed to introduce students to current literature on race/ethnic difference in health and mortality in the United States, covering such topics as explanations for why some race/ethnic groups fare better than others, how inner city poverty and residential segregation may contribute to racial/ethnic differences in health outcomes, and health of immigrants versus native-born populations. Current policy debated and recent policy developments related to health are also briefly discussed. The course is organized as a seminar with a combination of lectures and class discussions.
Taught by: Jaeger
Course not offered every year
Also Offered As: SOCI 264
Activity: Seminar
1.0 Course Unit

URBS 270 The Immigrant City
This course focuses on immigrant communities in United States cities and suburbs. We survey migration and community experiences among a broad range of ethnic groups in different city and suburban neighborhoods. Class readings, discussions, and visits to Philadelphia neighborhoods explore themes including labor markets, commerce, housing, civil society, racial and ethnic relations, integration, refugee resettlement, and local, state, and national immigration policies. The class introduces students to a variety of social science approaches to studying social groups and neighborhoods, including readings in sociology, geography, anthropology, social history, and political science. Ultimately, the class aims to help students develop: 1) a broad knowledge of immigration and its impacts on U.S. cities and regions; 2) a comparative understanding of diverse migrant and receiving communities; and 3) familiarity with policies and institutions that seek to influence immigration and immigrant communities.
For BA Students: Society Sector

URBS 274 Advanced Topics in Theatre
This course will combine an intensive practical and intellectual investigation of some area of the making of theatre: performance techniques, theatrical styles, a particular period of theatre history. Please visit the Theatre Arts Program website for current topics for Thar 275 and other Theatre Arts Courses and special topics: https://theatre.sas.upenn.edu Please visit the Theatre Arts Program website each semester for information on the available THAR 275 special topics courses: https://theatre.sas.upenn.edu
Taught by: Fox, Ferguson, Malague, Mazer, O’Harra & Schlatter
Course not offered every year
Also Offered As: CIMS 225, ENGL 276, THAR 275
Activity: Seminar
1.0 Course Unit
Notes: This course, which may with different topics, be repeated for credit, will examine a specific aspect of theatrical practice. Recent topics have included performance art, Jacques Lecoq technique, improvisation, and puppetry.
URBS 276 The Modern City
A study of the European and American city in the eighteenth, nineteenth, and twentieth centuries. Emphasis is placed on the history of architecture and urban design; political, sociological, and economic factors also receive attention. The class considers the development of London, St. Petersburg, Washington, Boston, Paris, Vienna and Philadelphia.
Taught by: Brownlee, D.
Course not offered every year
Also Offered As: ARTH 270, ARTH 670
Activity: Lecture
1.0 Course Unit

URBS 277 Gender, Sex & Urban Life
Is urban space gendered? Do we change how it is gendered as we move through it? Does it change us? This course explores gender and sexuality in the contemporary global city through the study of urban spaces. We will consider feminist, queer, and transgender theories of the city, as we investigate how practices of using and making space are gendered and sexualized.
Each week of the course will be organized around a type of space, including subway, school, and birthing center, nightclub, suburb, and park. Assignments will include an auto-ethnography, a short critical essay, and a final assignment that asks you to propose an additional type of space in which to study the intersections of sex, gender, and the urban built environment. In each space, we will conduct an interdisciplinary exploration, drawing from sociology, anthropology, geography, city planning history, feminist and queer theory, as well as from fiction, poetry, music videos, photography, and documentary film.
Taught by: Knittle
Course usually offered in spring term
Also Offered As: GSWS 277
Activity: Seminar
1.0 Course Unit

URBS 280 Neighborhood Dynamics of Crime
Crime varies in time, space and populations as it reflects ecological structures and the routine social interactions that occur in daily life. Concentrations of crime can be found among locations, with antisocial activities like assaults and theft occurring at higher rates because of the demographic make-up of people (e.g. adolescents) or conflicts (e.g. competing gangs), for reasons examined by ecological criminology. Variation in socio-demographic structures (age, education ratios, and the concentration of poverty) and the physical environment (housing segregation, density of bars, street lighting) predicts variations between neighborhoods in the level of crime and disorder. Both ethnographic and quantitative research methods are used to explore the connections between the social and physical environment of areas and antisocial behavior.
Taught by: Loeffler
Course usually offered in spring term
Also Offered As: CRIM 280
Activity: Seminar
1.0 Course Unit

URBS 285 Health on the urban margins: The experience of health in American cities
In this course we will investigate the social and spatial determinants of health in contemporary urban American. We will study how cities are impacted by healthcare delivery systems and social policy in the United States, with special attention toward understanding the relationship between health disparities and structures of urban inequality related to racial discrimination, extreme poverty, and the stigma of a criminal record. We will also explore how a variety of marginalized populations from war veterans to parolees to the homeless cope with mental illness and violence-related trauma in the urban environment.
Taught by: Tyson
Course not offered every year
Activity: Seminar
1.0 Course Unit

URBS 290 Metropolitan Nature
In order to understand the complex and often skewed relationship between the built and natural systems, we must think in processes and examine different scales simultaneously. The course explores urban sustainability and resilience. At its core, sustainability is a radical concept that integrates the economy, equity (social justice), and the environment. Co-opted by marketing slogans, stripped of meaning and context, it has become vague and pliable. Sustainability and resilience demand a holistic systems view of the world. The course focuses on communities such as New Orleans and Eastwick where urban development has focused on economic concerns at the expense of the environment and equity resulting in unintended, and sometimes, catastrophic consequences. Students will have the opportunity to interact with community residents who have organized to develop strategies to address these ongoing issues.
Taught by: Nairn
Course usually offered in fall term
Activity: Seminar
1.0 Course Unit

URBS 294 Global Cities: Urbanization in the Global South
This course examines the futures of urbanization in most of the world. With cities in “developing” countries set to absorb 95% of urban population growth in the next generation, the course explores the plans, spaces and social experiences of this dramatic urban century. How do proliferating urban populations sustain themselves in the cities of Latin America, Africa and Asia? What kinds of social and political claims do these populations make more just and sustainable cities? The course investigates the ongoing experiences in urban planning, infrastructure development and environmental governance in cities of the Global South. In so doing, it imagines new forms of citizenship, development and sustainability that are currently unfolding in these cities of the future.
Taught by: Anand
Course not offered every year
Also Offered As: ANTH 294
Activity: Seminar
1.0 Course Unit
URBS 300 Fieldwork Seminar
Students work 15 hours per week in field placement and meet weekly with class and instructors. The class is intended to help students reflect from a variety of perspectives on the work that they are doing in their placement organizations. The class format is primarily discussion. Students are required to complete assigned readings, prepare written and oral presentations, and submit a final project.
Course usually offered in spring term
Activity: Seminar
2.0 Course Units
Notes: Urban Studies majors and minors only.

URBS 320 Who Gets Elected and Why? The Science of Politics
What does it take to get elected to office? What are the key elements of a successful political campaign? What are the crucial issues guiding campaigns and elections in the U.S. at the beginning of the 21st century? This class will address the process and results of electoral politics at the local, state, and federal levels. Course participants will study the stages and strategies of running for public office and will discuss the various influences on getting elected, including: Campaign finance and fundraising, demographics, polling, the media, staffing, economics, and party organization. Each week we will be joined by guest speakers who are nationally recognized professionals, with expertise in different areas of the campaign and election process. Students will also analyze campaign case studies and the career of the instructor himself. Edward G. Rendell is the former Mayor of Philadelphia, former Chair of the Democratic National Committee, and former Governor of Pennsylvania.
A note if you are not able to gain a seat in this course: Please write to Professor Fay Walker (listed in the Penn Directory) with your name, year of study, and major in order to be added to a waitlist. The professors will be able to register many waitlisted students in the first week of the semester, but only after the first class session on Monday Sept. 9th, 6pm, in Cohen Hall Room 402. Waitlisted students are encouraged not to miss the first class.
Taught by: Rendell
Course usually offered in fall term
Also Offered As: GAFL 509, PSCI 320
Activity: Lecture
1.0 Course Unit

URBS 322 The Big Picture: Mural Arts in Philadelphia
The history and practice of the contemporary mural movement couples step-by-step analysis of the process of designing with painting a mural. In addition, students will learn to see mural art as a tool for social change. This course combines theory with practice. Students will design and paint a large outdoor mural in West Philadelphia in collaboration with Philadelphia high school students and community groups. The instructor, Jane Golden, is the founder and Director of the Philadelphia Mural Arts Program.
One-term course offered either term

URBS 323 Tutoring School: Theory and Practice
This course represents an opportunity for students to participate in academically-based community service learning. Students will be studying early childhood development and learning while providing direct, one-to-one tutoring services to young students in Philadelphia public elementary schools. The course will cover foundational dimensions of the cognitive and social development of preschool and elementary school students from a multicultural perspective. The course will place a special emphasis on the multiple contexts that influence children's development and learning and how aspects of classroom environment (i.e., curriculum and classroom management strategies) can impact children's achievement. Also, student will consider a range of larger issues impacting urban education embedded in American society. The course structure has three major components: (1) lecture related directly to readings on early childhood development and key observation and listening skills necessary for effective tutoring, (2) weekly contact with a preschool or elementary school student as a volunteer tutor and active consideration of how to enhance the student learning, and (3) discussion and reflection of personal and societal issues related to being a volunteer tutor in a large urban public school.
Taught by: Fantuzzo
Course usually offered in spring term
Also Offered As: EDUC 326
Activity: Seminar

URBS 330 GIS Applications in Social Science
This course will introduce students to the principles behind Geographic Information Science and applications of GIS in the social sciences. Examples of GIS applications in social services, public health, criminology, real estate, environmental justice, education, history, and urban studies will be used to illustrate how GIS integrates, displays, and facilitates analysis of spatial data through maps and descriptive statistics. Students will learn to create data sets through primary and secondary data collection, map their own data, and create maps to answer research questions. The course will consist of a combination of lecture and lab.

Course usually offered in fall term
Also Offered As: URBS 530
Activity: Seminar
1.0 Course Unit
Notes: Fulfills the Qualitative Data Analysis Requirement
URBS 344 Documentary Experiments in Urban Research
What can video art, experimental documentary, and sensory ethnography teach us about the practice of urban research? How can we build on the traditions of first person and essay cinema to produce compelling documents of our own questions and findings? This course surveys a range of film and video works on themes such as the production of space, urban nature, infrastructure, and collective memory. Taken as a genre, these time-based works provide a powerful model for training scholars' observational skills, conceptualizing scales of analysis, and engaging broader publics in urban research. In this course, we will explore this audiovisual genre in dialogue with selected theoretical, ethnographic, and case study readings in urban studies. As an advanced theory-practice course, it combines seminar readings and discussion with regular screenings and a series of workshops on photo, video, audio, and postproduction skills. The course will provide a general fluency in contemporary urban research, with particular emphasis on urban political ecology. In dialogue with this scholarship, students will develop and situate their own experimental documentary research projects.
Taught by: Mendelsohn
Course not offered every year
Also Offered As: ANTH 344, CIMS 344
Activity: Seminar
1.0 Course Unit

URBS 359 Nutritional Anthropology
The course is an introduction to nutritional anthropology, an area of anthropology concerned with human nutrition and food systems in social, cultural and historical contexts. On the one hand, nutritional anthropologists study the significance of the food quest in terms of survival and health. On the other hand, they also know that people eat food for a variety of reasons that may have little, if anything, to do with nutrition, health, or survival. While the availability of food is dependent upon the physical environment, food production systems, and economic resources, food choice and the strategies human groups employ to gain access to and distribute food are deeply embedded in specific cultural patterns, social relationships, and political and economic systems. Thus, nutritional anthropology represents the interface between anthropology and the nutritional sciences, and as such, can provide powerful insights into the interactions of social and biological factors in the context of the nutritional health of individuals and populations. Because food and nutrition are quintessential biocultural issues, the course takes a biocultural approach drawing on perspectives from biological, socio-cultural and political-economic anthropology. Course content will include: a discussion of approaches to nutritional anthropology; basics of human nutrition; food systems, food behaviors and ideas; methods of dietary and nutritional assessment; and a series of case studies addressing causes and consequences to nutritional problems across the world.
Taught by: Hoke
Course not offered every year
Also Offered As: ANTH 359, LALS 359
Activity: Lecture
1.0 Course Unit

URBS 367 Philadelphia, 1700-2000
Using Philadelphia as a lens, this course will examine the transformation of American cities from the colonial period to the present. Through readings, lectures, and tours, we will consider urbanization and suburbanization, race, class, and ethnicity, economic development, poverty and inequality, housing and neighborhood change, urban institutions, and politics and public policy.
Taught by: Sugrue
Course not offered every year
Also Offered As: HIST 367
Activity: Lecture

URBS 400 Senior Seminar
Urban Studies senior research project
Taught by: Grossman/McGlone/Simon
Course usually offered in fall term
Prerequisite: URBS 200; URBS 300
Activity: Seminar
1.0 Course Unit

URBS 401 Urban Studies Honors
Students in the fall Urban Studies Senior Seminar (URBS400) whose papers are exceptional and show promise for publication will be invited to participate in the spring honors seminar. If they choose to participate, honors seminar participants will revise and refine their research/papers with the goal of their work for publication in an academic journal relevant to the topic. The seminar meets periodically during the semester, structured around a set of assignments geared to facilitate the process of revision. Students will be assigned to read each other's work and meetings take the form of a workshop with students reporting on progress and providing feedback to improve and develop each other's papers. In addition to completing the revised paper for a grade, participants in the honors seminar are required to present their work to a wider Urban Studies audience in a special session at the end of the semester and to provide documentation that they have submitted their papers for publication. Students who successfully complete the honors seminar will graduate with distinction in the major, noted on their transcripts and in the graduation materials.
Taught by: Simon
Course usually offered in spring term
Prerequisite: URBS 400
Activity: Seminar
1.0 Course Unit
URBS 404 Philanthropy and the City
This course will focus on how urban communities are shaped by the nonprofit sector and the billions of philanthropic dollars that fuel their work. By bridging theory and practice, the class explores what dynamics are at play to deliver vital services or programs in healthcare, education, the arts, community development, and other issues. The course will also focus on these important questions: (1) Whose responsibility is the public good? How is that responsibility shared by the public, private, and nonprofit sectors? and (2) Given that responsibility for the public good, which individuals and groups make the decisions about how to serve the public good? How are these decisions made, and who benefits from these decisions? Students will consider these questions in an interdisciplinary context that will bring a historical and philosophical perspective to the examination of the values and institutions that characterize the contemporary philanthropy and the nonprofit sector.
Taught by: Bauer/Goldman
Course usually offered in fall term
Also Offered As: NPLD 797
Activity: Seminar
1.0 Course Unit

URBS 405 Religion, Social Justice & Urban Development
Urban development has been influenced by religious conceptions of social and economic justice. Progressive traditions within Judaism, Christianity, Islam, Buddhism, Hinduism, Jainism, Bahá'í, Humanism and other religions and systems of moral thought have yielded powerful critiques of oppression and hierarchy as well as alternative economic frameworks for ownership, governance, production, labor, and community. Historical and contemporary case studies from the Americas, Europe, Africa, Asia, and the Middle East will be considered, as we examine the ways in which religious responses to poverty, inequality, and ecological destruction have generated new forms of resistance and development.
Taught by: Lamas

Also Offered As: AFRC 405, RELS 439
Activity: Seminar
1.0 Course Unit

URBS 410 Urban Communities and the Arts
Urban Communities and the Arts concerns itself with Arts, Music and Activism in Philadelphia. We investigate the social, economic and cultural fabric from which activism in the arts arises. To do so, we will investigate the histories and artistic reactions to oppression in Philadelphia by drawing on specific examples from various sections of the city and through the media of music, visual art, theater, and dance. The long history of systemic and individual oppression in the US manifests itself in different ways in various urban neighborhoods in Philly and artists of various genres and inclinations participate in activism in many different ways. Examples of artistic and musical responses to the various forms of oppression will be offered and class participants will be asked to bring their own examples to share and analyze. By visiting significant arts practitioners and organizations that provide access to arts education and justice work, participants will have a hands-on experience to unpack the dynamics of artistic production in city life. In addition to art as an outlet for exposing oppression, we will also consider the ways that art and music become markers of the uniqueness of a neighborhood or city, which further complicates the idea of art as a tool for activism. Participants in Urban Communities and the Arts will unpack the role of music and art in defining city or neighborhood cultures by considering a few key sectors that reveal the ways in which cities fail to provide equal access to resources or participate in outright discrimination. At the same time, cities continue to cultivate creative spaces and socio-economic opportunities for economic gain and social understanding through art and music. It is the contradictions that this course will concern itself with and out of our study we will invite course participants to respond creatively. Participants will create either an original work of art, music or intellectual response like a visually interesting research poster as part of a final art/music show. Ultimately students will be asked to reflect back on the role of art in social and political activism to better understand the successes and failures of such movements as they come to define the ethos of city life and its limits.
Taught by: McGlone
Course not offered every year
Also Offered As: FNAR 410
Prerequisites: Students should have some knowledge of music and art communities in urban settings. Urban Studies and Fine Arts majors are particularly encouraged.
Activity: Seminar
1.0 Course Unit

URBS 412 Building Non-Profits: The Business of a Mission-Driven Organization
This course will cover the basic elements of building and growing a non-profit organization, including the development of the mission and the board; needs assessment, program design, development, and management; financial management, contract compliance and understanding an audit; fundraising, public, foundation, corporate, and individual; communication and marketing; organizational administration (including staff and volunteer selection, management and development); public policy, research and advocacy. Students will make site visits and engage role play, in addition to research and writing.
Taught by: Goldman
Course usually offered in fall term
Activity: Seminar
1.0 Course Unit
URBS 415 Urban Real Estate Markets
Cities evolve over time, comprised of various inputs of different sizes at different stages of urban evolution. However, as cities continue to densify and navigate real estate market cycles, opportunities to redefine the urban context, while promoting the individual brand, become ever more sensitive. Projects are increasingly complex, often involving multiple partnerships among private developers, public agencies, non-profits, and community groups. Today’s development professionals need to be well-versed across a variety of disciplines and property types to effectively execute in an urban environment. As an introductory course in real estate development, this course will provide the underpinnings for critical decision-making in markets that change frequently and often unevenly - whether for financing, investing, development, public policy formulation, or asset management/disposition.
Taught by: Packard
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit

URBS 417 Cities and Sustainability
A good idea is not enough - developing innovative and sustainable projects in cities requires understanding “how to get things done.” Developing projects to promote sustainability in major US cities requires sensitivity to the political and operational context within which cities implement innovative initiatives. Cities and Sustainability uses Philadelphia as a case study to explore the issues confronting modern American metropolises as they look to manage their resources and promote environmentally friendly policies. URBS 417 will introduce students to leading Philadelphia practitioners of sustainability and municipal projects. Students will be given the tools to politically, economically and critically analyze various sustainable policy initiatives across the United States.
Taught by: Ben-Amos
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit

URBS 419 Urban Transportation in Flux
Transportation systems and networks impact everything from the literal shape of American cities to their economic vitality and the well-being of their citizens. Urban Infrastructure in Flux provides students with an over view of the political, business, and policy concerns and processes that inform how Americans get around by foot, transit, and car. URBS 419 explores the use and reuse of legacy infrastructure, and roots innovations such as driverless cars, and scooters, in a historical conflict over the right-of-way (ROW). Students will have the opportunity to meet professionals in the field and engage in primary source research and data analysis.
Taught by: Ben-Amos
Course usually offered in fall term
Activity: Lecture
1.0 Course Unit

URBS 420 Perspectives on Urban Poverty
This course provides an interdisciplinary introduction to 20th century urban poverty, and 20th century urban poverty knowledge. In addition to providing an historical overview of American poverty, the course is primarily concerned with the ways in which historical, cultural, political, racial, social, spatial/geographical, and economic forces have either shaped or been left out of contemporary debates on urban poverty. Of great importance, the course will evaluate competing analytic trends in the social sciences and their respective implications in terms of the question of what can be known about urban poverty in the contexts of social policy and practice, academic research, and the broader social imaginary. We will critically analyze a wide body of literature that theorizes and explains urban poverty. Course readings span the disciplines of sociology, anthropology, urban studies, history, and social welfare. Primacy will be granted to critical analysis and deconstruction of course texts, particularly with regard to the ways in which poverty knowledge creates, sustains, and constrains meaningful channels of action in urban poverty policy and practice interventions.
Taught by: Fairbanks
Course usually offered in fall term
Also Offered As: HIST 440, SOCI 420
Activity: Seminar
1.0 Course Unit

URBS 424 Political Ecologies of the City
Cities have been centres of aspiration for much of human history. They have provided a limited yet critical locus for social mobility, both in political and economic terms. As large agglomerations of political and economic power, urban residents have also consumed growing proportions of the earth’s mineral, food and water resources from the national (and international) body. The contradictory aspects of urban aspiration frame this course. Drawing on the frameworks of political ecology, in this course we think through the cities of the global south to understand how cities are made. To do this, we will first focus on the construction on the liberal city and how it has been occupied, both formally and informally, by urban subjects in most of the world. Next, we will learn about projects through which natural resources have been directed to and through the city. Finally we will conclude with a particular attention to how urban resources are claimed by marginalized migrants, and the particular sorts of governance institutions these practices engender.
Taught by: Anand
Course not offered every year
Also Offered As: ANTH 424
Activity: Seminar
1.0 Course Unit

URBS 428 Undergraduate Urban Research Colloquium
A seminar run in conjunction with the Institute for Urban Research at Penn, students will learn about the range of cutting-edge topics in urbanism that Penn faculty are working on and work closely with a faculty member on current research. Students will learn about new topics and methods in interdisciplinary urban research, and get first hand experience collecting urban data under the close supervision of an experienced researcher. Students and faculty jointly will present their findings for discussion. This course is a good introduction for how to frame and conduct an urban research project.
Course usually offered in spring term
Also Offered As: CPLN 528
Activity: Seminar
1.0 Course Unit
URBS 431 Mapping Philadelphia
Philadelphia is a city that was mapped before it was built, inhabited before it was developed. Founder William Penn’s original concept for the gridded city continues to inform the historical evolution of Philadelphia, even as city planners, architects, artists, and social justice activists work to transform the layers of our built environment. This class will study the city through a variety of archival maps, historical mapping practices, and emergent digital approaches to representing space and time. We will explore public history projects that seek approaches to place-making and place-keeping at neighborhood intersections, share dialogue with social practice artists who produce site-specific works, and visualize civic data through platforms such as OpenDataPhilly. Each student will pursue a final research project resulting in a close study of a particular street or intersection in the city.
Taught by: Farber
Course not offered every year
Activity: Seminar
1.0 Course Unit

URBS 435 The Political Economy of Urban Development
This course provides an introduction to the economic and political theories that have come to shape, for better or for worse, the spatial characteristics of late 20th century urbanism. It is intended to offer a range of analytical approaches to understanding the urban structures and processes that strategies of community-based organizers and urban policy planners seek to influence. The course focuses on postwar U.S. cities (Chicago and other Midwestern/Northeast rust belt cities in particular), though a number of that number of readings explore these issues in broader contexts. As a way to further understand postwar US urbanism, we will expand our focus briefly to the geopolitical/international scale during the weeks on neoliberalism and microfinance. Urban political economy refers to different theoretical traditions within the social sciences that explain urban development in terms of the relationship between markets, states, and community actors (or, civil society).
Part I of the course covers four different theories of modern political economy: Neoclassical, Keynesian, Marxian, and Neoliberal. Our purpose is to provide a framework for political economic analysis and an historical foundation for understanding postwar transformation. Part II of the course grounds the foundational material of Part I by tracing the economic and political forces that have shaped post-war urban development trends in Northeastern and Midwestern cities (especially Chicago, Detroit, Philadelphia and NY). Particular attention will be given to issues such as race, suburbanization, deindustrialization, welfare state retrenchment, gentrification, and public housing transformation. Part III examines a range of contemporary (post 1970) approaches to urban development, focusing on processes of neoliberalization, neo-clientalism, urban informality, sub prime mortgage lending, and microfinance.
Taught by: Fairbanks
Course not offered every year
Activity: Lecture
1.0 Course Unit

URBS 440 Introduction to City Planning: Past, Present and Future
Orientation to the profession, tracing the evolution of city and regional planning from its late nineteenth century roots to its twentieth century expression. Field trips included.
Taught by: Vitelli or Ammon
Course usually offered in fall term
Also Offered As: CPLN 500
Activity: Lecture
1.0 Course Unit

URBS 448 Neighborhood Displacement and Community Power
This course uses the history of black displacement to examine community power and advocacy. It examines the methods of advocacy (e.g., case, class, and legislative) and political action through which community activists can influence social policy development and community and institutional change. The course also analyzes selected strategies and tactics of change and seeks to develop alternative roles in the group advocacy, lobbying, public education and public relations, electoral politics, coalition building, and legal and ethical dilemmas in political action. Case studies of neighborhood displacement serve as central means of examining course topics.
Taught by: Palmer
Course usually offered in spring term
Also Offered As: AFRC 448
Activity: Seminar
1.0 Course Unit

URBS 450 Urban Redevelopment
This course will consider urban redevelopment from the early 20th century to the present day, looking at ways the economic, political, and social underpinnings of redevelopment practice have changed over that time. From the City Beautiful movement to Transit Oriented Development, the course will look at why and how the public, private, and non-profit sectors have intervened in urban neighborhoods, and will contemplate consequences - positive and negative - of those interventions. Students will be introduced to some of the technical aspects of redevelopment, including architecture/design, planning, and financing. The class will be in seminar format, mixing lecture, discussion, and guest speakers. The course requirements include a mid-term paper, an in-class charrette, and a final development project.
Taught by: Rachlin, Andrew
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit

URBS 451 The Politics of Housing and Urban Development
This course offers an exploration of how legislative action, government policymaking, and citizen advocacy influence plans for the investment of public capital in distressed urban neighborhoods. Course topics this semester will include an evaluation of the results of City of Philadelphia development policies under the administration of former Mayor Michael A. Nutter, as well as consideration of plans being undertaken by the administration of Mayor James F. Kenney, who took office in January. The course will also include an assessment of a large-scale property acquisition and development strategy being implemented by the Philadelphia Housing Authority in North Philadelphia and a review of recent and current reinvestment proposals for Camden’s waterfront and downtown-area neighborhoods.
Taught by: Kromer
Course usually offered in fall term
Also Offered As: CPLN 625, GAFL 569
Activity: Lecture
1.0 Course Unit
URBS 452 Community Economic Development
Community economic development concerns the revitalization of impoverished communities. As with all things economic, poor and working people may be the subjects or the objects of development. We will utilize case studies from Philadelphia and around the world in an exploration of various models of economic justice and sustainable development. Note: Attendance at the the first class is mandatory (for those already enrolled and for those considering enrollment in the course). Enrolled students who miss the first class must drop the course. Those who were not able to enroll but who attend the first class will be permitted to enroll.
Taught by: Madden
Course usually offered in fall term
Activity: Seminar
1.0 Course Unit

URBS 453 Metropolitan Growth and Poverty
This course analyzes the role of metropolitan regions in the U.S. and global economies, including the sources of metropolitan productivity, the ways that metropolitan structures affect residents, and analyses of public policy in metropolitan areas. The economic, political, and social forces that have shaped World War II urban and regional development are explored, including technology, demography, and government. Special attention is paid to how metropolitan change affects residents by income and race. Topics include: gentrification, schools, suburbanization, sprawl, metropolitan fragmentation, concentration of poverty, race, and various economic revitalization initiatives.
Taught by: Madden
Course not offered every year
Also Offered As: SOCI 435
Activity: Seminar
1.0 Course Unit

URBS 454 City Limits: The Impact of Urban Policy
This course assesses the changing role of public policy in American cities. In the past, government often believed that it could direct urban development. New realities - the rise of an informal labor market, global capital and labor flows, the flight of businesses and the middle class to the suburbs - have demonstrated that government must see itself as one - but only one - 'player' in a more complete, transactional process of policy making that crosses political boundaries and involves business, organized interest groups, and citizens. This seminar uses a case-study method to study how public policy can make a difference in the revitalization of distressed American cities. The seminar is designed for advanced undergraduates and graduate students. Seminar readings and projects will be organized around three themes: 1) history and vision, 2) data and analysis, and 3) policy and implementation. Students will be divided into project teams assigned to work on current development issues that will be reviewed by both public and private-sector experts. Extensive use will be made of real estate, economic development, and social indicator data to understand the complex forces at work in both large and small cities. Students will learn to access, analyze, and map information; to frame and interpret these data within a regional perspective; and to construct profiles of cities and neighborhoods. Students will study recent urban redevelopment initiatives in the Philadelphia region, including Philadelphia's Neighborhood Transformations Initiative and New Jersey's Camden Revitalization plans.
Taught by: Goldstein, Stern
Course usually offered in spring term
Prerequisite: Student must have taken an introduction to research methods course
Activity: Seminar
1.0 Course Unit

URBS 457 Globalization & The City: Global Urbanization
In 2008, the UN estimated that the world’s population had become primarily urban, for the first time in history. According to the OECD, by the end of the century, close to 85% of the projected population will live in cities. The transition towards an urban planet is likely to have far-reaching economic, environmental, social, political, and cultural impacts on our species, many of which we cannot yet predict. But what is urbanization? Will it lead to more inequality, exploitation, conflict, resource consumption, and exposure to natural disasters and climate change, or is it an opportunity to move the world in a more sustainable and equitable direction? Taught by Chandan Deuskar and Patricio Zambrano Barragan, this course aims to explore these questions. In the first half of the semester, we will discuss various challenges associated with global urbanization and its impacts. In the second half, we will focus on responses to these challenges. The assignments will allow students to explore some of the most salient debates around global urbanization. By the end of the semester, students will be better able to understand the context for any future academic research, professional work, or business activities in the cities of the ‘developing world’. The course will help provide a foundation for any students considering graduate studies or professional work in the fields of urban planning or international development.

1.0 Course Unit
URBS 473 The History & Theory of Community Organizing
"Power concedes nothing without a demand."--Frederick Douglass.
"Workers of the world, unite!"--Karl Marx. "Don't mourn. Organize!"--Joe Hill. "Strong people do not need strong leaders."--Ella Baker. "Freedom is a constant struggle."--Angela Davis. We will review the history and theory of critique, resistance, and solidarity, as we consider old and new social movements and freedom struggles around the world (Africa, the Americas, Europe, Asia)--from encampments for indigenous sovereignty of tribal lands to demonstrations by poor and working people seeking "the right to the city," from sit-ins and strikes to occupations and takeovers, from uprisings and insurrections to revolutions and counterrevolutions, from anti-capitalist, anti-colonial, anti-caste, and anti-racist insurgencies to mobilizations for racial and gender justice and solidarity economy; from civil rights, labor rights, student rights, human rights, animal rights, and environmental organizing to movements for peace, democracy, equality, and liberation--and more (based on student interests and commitments). Strategies and techniques will be reviewed. Successes and failures will be registered. Limitations and possibilities will be debated. Source material will be drawn from mainstream and radical traditions within popular praxis and numerous fields, including urban studies, philosophy and critical theory, religion, history, art and culture, anthropology, politics, development economics, social psychology, sociology, organizational development, and law. Note: Attendance at the first class is mandatory (for those already enrolled and for those considering enrollment in the course). Enrolled students who miss the first class must drop the course. Those who were not able to enroll but who attend the first class will be permitted to enroll.

URBS 476 Urban Housing & Community Development Policy in America
This course examines how public policy influences housing markets and how markets influence public policy. The course reviews the development of housing policy since World War II and how shifts in policy have influenced people's ability to find suitable shelter. Topics include: poverty and affordability, residential segregation / civil rights in housing, the financial crisis of 2008, mortgage foreclosure, affordable housing, and homelessness. The course focuses on the changing roles of different levels of government in housing policy and how the financial sector, the construction industry, and non-governmental organizations influence Americans housing options.

Taught by: Stern, Goldstein
Course not offered every year
Activity: Seminar
1.0 Course Unit

URBS 480 Liberation and Ownership
Who is going to own what we all have a part of creating? The history of the Americas, and of all peoples everywhere, is an evolving answer to the question of ownership. Ownership is about: the ties that bind and those that separate; production, participation, and control; the creation of community and the imposition of hierarchies--racial, sexual, and others; dreams of possessing and the burdens of debt and ecological despoliation; dependency and the slave yearning to breathe free. Of all the issues relevant to democracy, oppression, injustice, and inequality, ownership is arguably the most important and least understood. Utilizing a variety of disciplinary perspectives--with a particular emphasis on radical and critical theories of liberation, and by focusing on particular global sites and processes of capitalism, students will assess and refine their views regarding ownership and liberation in light of their own social, political, religious, aesthetic, and ethical commitments.

Taught by: Lamas
Course usually offered in fall term
Also Offered As: AFRC 480

URBS 506 Public Environment of Cities: An Introduction to the Urban Landscape
This course will explore the role of public spaces - streets, boulevards, parks and squares - in cities and their social uses. With the University of Pennsylvania campus and the City of Philadelphia serving as our laboratory, we will critically examine the evolution of the movement of corridors, open space and buildings of the urban landscape and their changing uses. Following the flaneur tradition of Baudelaire and Benjamin, we will walk the city to experience and understand the myriad environments and neighborhoods that comprise it.

Taught by: Nairn
Course not offered every year
Also Offered As: URBS 206
Activity: Seminar
1.0 Course Unit

URBS 513 Urban Ethnography: Capturing the Cultures of Cities
Using Philadelphia as the site of students' praxis, this course explores the symbolic meanings and social production of urban life and culture in the nation's fifth largest city. This course is structured as a seminar with ethnographic background readings from Philadelphia and other urban settings to introduce students to the study of the city as a site of everyday practice, as well as training in conducting an ethnographic fieldwork project. The urban landscape provides an intensification of macro processes such as globalization. Such processes and how humans experience them are more easily studied and understood in an urban setting. The class will explore social relational and cultural themes such as the ethnic city, the gendered city, the contested city, the sacred city, the global city, and the aesthetic and expressive city. A diverse range of reading assignments, images, and videos will augment our understandings of urban life. Students will design and execute their own ethnographic fieldwork projects on an urban topic that interests them. Through step-by-step instruction throughout the semester, students will learn qualitative research techniques such as field notes, participant-observation, interviewing, and how to interpret their own data, so that they will be able to complete their semester project.

Also Offered As: FOLK 513, URBS 427
Activity: Seminar
1.0 Course Unit
URBS 516 Public Interest Workshop
This is a Public Interest Ethnography workshop (originally created by Peggy Reeves Sanday - Department of Anthropology) that incorporates an interdisciplinary approach to exploring social issues. Open to graduate and advanced undergraduate students, the workshop is a response to Amy Gutmann's call for interdisciplinary cooperation across the University and to the Department of Anthropology's commitment to developing public interest research and practice as a disciplinary theme. Rooted in the rubric of public interest social science, the course focuses on: 1) merging problem solving with theory and analysis in the interest of change motivated by a commitment to social justice, racial harmony, equality, and human rights; and 2) engaging in public debate on human issues to make the research results accessible to a broad audience. The workshop brings in guest speakers and will incorporate original ethnographic research to merge theory with action. Students are encouraged to apply the framing model to a public interest research and action topic of their choice. This is an academically-based-community service (ABCS) course that partners directly with Penn's Netter Center Community Partnerships.
Taught by: Suess

Activity: Seminar
1.0 Course Unit

URBS 530 GIS Applications in Social Science
This course will introduce students to the principles behind Geographic Information Science and applications of (GIS) in the social sciences. Examples of GIS applications in social services, public health, criminology, real estate, environmental justice, education, history, and urban studies will be used to illustrate how GIS integrates, displays, and facilitates analysis of spatial data through maps and descriptive statistics. Students will learn to create data sets through primary and secondary data collection, map their own data, and create maps to answer research questions. The course will consist of a combination of lecture and lab.
Taught by: Hillier
Course usually offered in fall term
Also Offered As: URBS 330
Activity: Seminar
1.0 Course Unit

URBS 544 Public Environmental Humanities
This broadly interdisciplinary course is designed for Graduate and Undergraduate Fellows in the Penn Program in Environmental Humanities (PPEH) who hail from departments across Arts and Sciences as well as other schools at the university. The course is also open to others with permission of the instructors. Work in environmental humanities by necessity spans academic disciplines. By design, it can also address and engage publics beyond traditional academic settings. This seminar, with limited enrollment, explores best practices in public environmental humanities. Students receive close mentoring to develop and execute cross-disciplinary, public engagement projects on the environment. In spring 2018, participants have the opportunity to participate in PPEH's public engagement projects on urban waters and environmental data. These ongoing projects document the variety of uses that Philadelphians make of federal climate and environmental data, in and beyond city government; they also shine light on climate and environmental challenges our city faces and the kinds of data we need to address them. Working with five community partners across Philadelphia, including the City's Office of Sustainability, students in this course will develop data use stories and surface the specific environmental questions neighborhoods have and the kinds of data they find useful. The course hosts guest speakers and research partners from related public engagement projects across the planet; community, neighborhood, open data, and open science advocates; and project partners in government in the City of Philadelphia and Commonwealth of Pennsylvania. Course assignments include: * 2 short-form essays (course blog posts); * a 12-hour research stay (conducted over multiple visits) with a community course partner to canvas data uses and desires; * authorship of 3 multimedia data stories; * co-organization and participation in a city-wide data storytelling event on May 2, 2018.
Taught by: Wiggin
Course not offered every year
Also Offered As: ANTH 543, COML 562, GRMN 544
Activity: Seminar
1.0 Course Unit

URBS 547 Anthropology and Education
An introduction to the intent, approach, and contribution of anthropology to the study of socialization and schooling in cross-cultural perspective. Education is examined in traditional, colonial, and complex industrial societies.
Taught by: Hall or Posecznick
One-term course offered either term
Also Offered As: ANTH 547, EDUC 547
Activity: Lecture
1.0 Course Unit

URBS 608 Urban Studies Proseminar
Open to PhD students, this scholar-oriented seminar explores how academic researchers from different disciplines define researchable questions, craft research designs, and contribute to knowledge through an examination of important and/or recently published books and monographs with an urban focus. Required of all doctoral students enrolled in the Urban Studies Graduate Certificate Program. Enrollment is limited to 15 students. Other doctoral students may enroll on a space available basis. Course requirements include completion of a major research paper on a topic selected in consultation with the instructor.
Taught by: Stern
Course usually offered in spring term
Activity: Seminar
1.0 Course Unit
**URBS 614 Weimar Landscapes**
This new course is designed for students of literature, landscape architecture and urban planning, and cultural history in general. It will explore the ideas of, and attitudes towards, landscape in selected works by Wolfgang Goethe, and consider his own considerable practical involvement in reshaping the town and gardens of Weimar. The course will provide the larger context of German literature, aesthetics and landscape taste, and politics of the later 18th and early 19th centuries. We will consider the development of new gardens and parks in a "new" style (e.g. Worlitz); they were regarded to be less formal and more "natural" than their French predecessors. We will study the English models for this movement, and offer and particular attention to the major German theorist, C.C.L. Hirschfeld, who would soon become famous outside Germany as well.

Taught by: Weissberg/Hunt
Course not offered every year
Also Offered As: ARTH 782, COML 615, ENGL 584, GRMN 614
Activity: Seminar
1.0 Course Unit

**URBS 706 Culture/Power/Subjectivities**
This doctoral level course will introduce students to a conceptual language and theoretical tools for analyzing and explaining the complex intersection of racialized, ethnic, gendered, sexual, and classed differences and asymmetrical social relations. The students will examine critically the interrelationships between culture, power, and subjectivity through a close reading of classical and contemporary social theory. Emphasis will be given to assessing the power of various theories for conceptualizing and explaining mechanisms of social stratification as well as the basis of social order and processes of social change.

Taught by: Hall
One-term course offered either term
Also Offered As: ANTH 704, EDUC 706
Prerequisite: EDUC 547
Activity: Lecture
1.0 Course Unit

**URDU 401 Beginning Hindi-Urdu Part I**
This introductory course core proficiency in Hindi-Urdu up to the intermediate level. It is designed for students with little or no prior exposure to Hindi or Urdu. The course covers all four language skills (speaking, listening, reading, and writing) and all three models of communication (interpersonal, presentational, interpretive). Students will develop literacy skills in the primary script of their choice (Hindi or Urdu script). All written materials will be provided in both scripts. All meetings are interactive and students acquire the language by using it in realistic contexts. Culture is embedded in the activities and is also introduced through various authentic materials.

For BA Students: Language Course
Taught by: Pien
Two terms. student must enter first term.
Also Offered As: HIND 400, NELC 401
Activity: Lecture
1.0 Course Unit

**URDU 402 Beginning Hindi-Urdu Part II**
This introductory course core proficiency in Hindi-Urdu up to the intermediate level. It is designed for students with little or no prior exposure to Hindi or Urdu. The course covers all four language skills (speaking, listening, reading, and writing) and all three models of communication (interpersonal, presentational, interpretive). Students will develop literacy skills in the primary script of their choice (Hindi or Urdu script). All written materials will be provided in both scripts. All meetings are interactive and students acquire the language by using it in realistic contexts. Culture is embedded in the activities and is also introduced through various authentic materials.

For BA Students: Language Course
Taught by: Pien
Two terms. student must enter first term.
Also Offered As: HIND 401, NELC 402
Prerequisites: Beginning Hindi or Urdu or equivalent ascertained through placement test or permission of instructor.
Activity: Lecture
1.0 Course Unit

**URDU 421 Intermediate Urdu Part I**
This course allows students to continue improving their Urdu proficiency while also gaining a broad foundational understanding of Urdu society and culture throughout South Asia. The course provides students the tools needed to handle a variety of authentic written and spoken Urdu sources including film, music, media reports, folk tales, and simple literature. Students will also continue to increase their speaking and writing proficiency to be able to discuss a broad range of concrete, real-world topics. The course is designed for students with one year previous Urdu or Hindi study or the equivalent proficiency. Students with speaking ability in Urdu or Hindi but without reading/writing skills are encouraged to contact the instructor for placement.

For BA Students: Language Course
Taught by: Menai
Two terms. student must enter first term.
Prerequisites: Beginning Hindi or Urdu or equivalent ascertained through placement test or permission of instructor.
Activity: Lecture
1.0 Course Unit

**URDU 422 Intermediate Urdu Part II**
This continuing second-year course allows students to continue improving their Urdu proficiency while also gaining a broad foundational understanding of Urdu society and culture throughout South Asia. The course provides students the tools needed to handle a variety of authentic written and spoken Urdu sources including film, music, media reports, folk tales, and simple literature. Students will also continue to increase their speaking and writing proficiency to be able to discuss a broad range of concrete, real-world topics. The course is designed for students with one year of previous Urdu or Hindi study or the equivalent proficiency.

For BA Students: Last Language Course
Taught by: Menai
Two terms. student must enter first term.
Also Offered As: NELC 422
Activity: Seminar
1.0 Course Unit
URDU 431 Advanced Urdu: Language and Literature
This course is designed to give in-depth exposure to some of the finest works of classical and modern Urdu prose and poetry along with the historical and socio-political trends they represent. Figures covered range from Ghalib (b.1797) to Faiz, Fehmida Riaz, and post 9/11 Urdu prose and poetry. The course is open to both undergraduates and graduate students, subject to having intermediate level proficiency. The course is repeatable, and the content changes every semester. Multi-media content such as music, videos, blogs etc. will be actively incorporated. Every effort will be made to accommodate individual interests. Students are encouraged to contact the instructor with any questions, or if they are unsure about eligibility.
For BA Students: Advanced Language Course
Taught by: Menai
Course usually offered in fall term
Also Offered As: NELC 431
Prerequisite: Intermediate Urdu or equivalent ascertained through placement test or permission of instructor
Activity: Lecture
1.0 Course Unit
Notes: Intermediate reading, writing and speaking skills in Urdu are recommended but please contact the instructor if you are unsure of your eligibility and want to discuss further. Topic changes each semester

URDU 452 Urdu Literature in Translation
This course will look at Urdu-Hindi expressions of resistance to militant fundamentalism trends, as well as literature resisting the influence of liberal progressive thought. Through comparisons of these divergent trends, we will explore the real inceptions, comfortable comprises and contradictions that are internalized by people on the ground in developing societies. The historical and linguistic roots of resistance poetry will be studied, contrasting South Asian Urdu-Hindi poetry and prose (original and translated) with resistance movements from other parts of the world. This course provides students with the opportunity to deepen their knowledge of Urdu culture, literature, and society while expanding and refining their Urdu language skills. We will explore various social, political, and cultural issues through authentic sources such as journalism and media, prose literature and poetry, and film and music. The course is designed to be flexible to address students’ needs and interests. It targets students with two years of Urdu study or the equivalent proficiency.
Taught by: Menai
Course not offered every year
Prerequisites: Intermediate reading, writing and speaking skills in Urdu are recommended but please contact the instructor if you are unsure of your eligibility and want to discuss further.
Activity: Seminar
1.0 Course Unit

Veterinary & Biomedical Science (VBMS)

VBMS 601 Gross Anatomy - Structural Adaptations to Function
This course is an intensive study by dissection of the gross anatomy of the dog, cat, horse, and goat. In addition, there is one laboratory session dedicated to the chicken. Functional and clinical considerations are intercalated throughout the laboratories. The lectures elucidate selected aspects of specific organ systems under study in the laboratory, stressing the theoretical, functional or comparative rather than descriptive aspects of anatomy. Radiographic anatomy is also presented in the course with the assistance of the radiology residents. All first-year students will have free access to the Easy Anatomy program, an interactive 3-D anatomy study guide for the complete canine, through the course page on Learn.vet.
Taught by: Drs. Grandstaff, Orsini and Staff
Two terms. student must enter first term.
Activity: Lecture
11.0 Credit Hours

VBMS 602 Histological Basis of Pathology
This course covers microscopic anatomy of tissues and organ systems of mammals important in veterinary medicine, e.g. dog, cat, mouse, rat, horse and cow. The central theme in the course is light microscopic structure as observed in standard stains, but this picture is amplified by electron microscopy, special stains and histochemistry. The material is presented, through lecture and laboratory, from the point of view of experimental biology, cell function, and disease. The course reveals that the structure or histology of the tissues of an animals body is not an arbitrary assemblage of cells but rather the structural expression of the diverse cell types that interact to carry out the functions of the body. Thus, through the microscopic study of the structure of tissues (histology) the functions of the tissues of the body may be inferred.
Taught by: Drs. M. May and O. Jacenko and Staff
Activity: Lecture
5.0 Credit Hours

VBMS 603 Developmental Biology
The course examines classic and modern concepts in embryonic development as they relate to veterinary medicine. The lectures are designed to cover recent advances in the field with special emphasis on stem cells, specification of cell fate, manipulation of the genome and organogenesis. Examples of pathologies associated with aberrant development of major organ systems will be presented and discussed in the context of veterinary medicine.
Taught by: Drs. Grandstaff, Orsini and Staff
Activity: Lecture
3.0 Credit Hours

VBMS 604 Introduction to the Neurosciences
This is an introductory course to the neurosciences and assumes a basic background in anatomy, cell biology, histology and biochemistry. At the cellular/molecular level the course covers neurocytology, membrane bioelectrical events and their channel protein basis, neurotransmitters and their actions at the synapse. It also covers aspects of neurochemistry, neuropathology and focuses on neuroanatomy and function of neural systems. The latter include the somatic and autonomic components of the peripheral nervous system, the spinal cord and reflexes, primary sensory systems, motor pathways and limbic systems of the brain.
Taught by: Dr. T. Bale and Staff
Activity: Lecture
5.0 Credit Hours
Veterinary Clinical Studies - Medicine Courses (VMED)

**VMED 600 Introduction to Clinical Veterinary Medicine I**
This course provides an introduction to clinical veterinary medicine for first year veterinary students, and includes sessions on management, restraint and physical examination of small animal patients. Laboratory sessions provide the opportunity for practicing physical examination and restraint of animals in supervised small groups. This course will be graded P/F.

Taught by: Dr. L. Waddell and Staff
Activity: Lecture
2.0 Credit Hours

**VMED 601 Introduction to Clinical Veterinary Medicine II**
Using a case-based organ/system approach, this course provides an introduction to the practice of clinical veterinary medicine in companion animals, and provides an introduction to special species companion animal, laboratory animal, and captive and wild animal veterinary practice. The course also introduces the concept of evidence-based medicine. Laboratory sessions provide exposure to auscultation, behavior abnormalities, clinical rounds discussion, grief management, nursing techniques and special species companion animal and laboratory animal examination.

Taught by: Dr. D. Clarke and Staff
Activity: Lecture
4.0 Credit Hours

**VMED 602 Introduction to Clinical Veterinary Medicine III**
This course provides an introduction to equine and production animal veterinary medicine for first year veterinary students, and includes sessions on management, restraint and physical examination of large animal patients. Laboratory sessions provide the opportunity for practicing physical examination and diagnostic procedures on horses and production animal species.

Taught by: Dr. E. Davidson and Staff
Activity: Lecture
4.0 Credit Hours

**VMED 603 Introduction to Radiology**
This lecture course is designed to provide the fundamental principles of clinical imaging in veterinary medicine as they pertain to physics and instrumentation. The emphasis is on radiography, but principles of ultrasonography, computed tomography, magnetic resonance imaging and nuclear medicine are also discussed. Topics include production of diagnostic images, radiation safety, differences between the various imaging modalities and some features of normal radiographic anatomy of small animals (thorax and abdomen). The course includes a two-hour mandatory laboratory, focusing on case presentations with emphasis on thoracic and abdominal radiography.

Taught by: Dr. W. Mai and Staff
Activity: Lecture
2.0 Credit Hours

---

**VBMS 605 Cellular and Biochemical Foundation of Disease**
This course teaches the principles of biological chemistry as applied to metabolic relationships underlying cellular and physiological processes and the molecular mechanisms of disease. The first third of the course covers the basic biochemistry of amino acids, proteins (e.g., enzymes), nucleic acids, vitamins and coenzymes, carbohydrates and lipids. Normal as well as disease-related pathways for the processing of these biological materials are discussed. Species differences in metabolic pathways and clinical relevance are pointed out, wherever pertinent. The latter part of the course includes discussions of molecular genetics, and the physiological-biochemical functioning and regulation of cellular structures, tissues and organs: membranes, endocrine glands and hormones, blood, bone and connective tissue, liver, muscle, etc. Diseases specific to these structures are discussed in the context of veterinary medicine. Also included are such topics as prostaglandins, biochemistry of growth regulation, vision, taste, cell cycle and cancer. Laboratories include clinically relevant problem-based and library research projects that relate biochemistry to veterinary medicine, and identification of reproductive and endocrine conditions by diagnostic problem solving using student generated biochemical data.

Taught by: Dr. A. Kashina and Staff
Activity: Lecture
10.0 Credit Hours

**VBMS 606 Animal Physiology**
A strong training in animal physiology is crucial for veterinary education. Extensive and profound knowledge of normal processes that maintain animal life and enable animals to cope with a changing environment provides the crucial foundation for the understanding of breakdowns in homeostasis and disease states, and of key principles underlying diagnostics and treatment of animal diseases. The course provides a brief review of relevant molecular and cell biology concepts that enhance the comprehension of physiology (including metabolism, cell membrane permeability, bioelectric potentials, active transport, etc.) and a detailed study of the functional processes in the circulatory, respiratory, digestive, endocrine, muscular, renal and reproductive systems. This course primarily focuses on normal physiologic mechanisms in mammals yet includes comparative physiology material pertinent to other vertebrates of veterinary interest. Furthermore, pathophysiologic alterations of normal function and physiological principles of diagnostics and therapy are amply illustrated by clinical case examples.

Taught by: Drs. Serge Fuchs, Elizabeth Woodward and Staff
Activity: Lecture
10.0 Credit Hours

**VBMS 607 Pharmacology & Toxicology**
The major objective of this course is to help veterinary students learn the principles of pharmacokinetics, the mechanisms of drug action, the sites at which drugs act, and how drugs may interact with, and alter the activity of, various organ systems. The material will also include properties, mechanisms of action, and biological effects of various chemical substances (drugs, environmental pollutants, toxins of plant origin, etc.) that interfere with normal cell and organ function. The course is intended to deal chiefly with basic Pharmacology and Toxicology rather than clinical therapeutics, although some therapeutics and clinical material will be discussed in relevant areas.

Taught by: Dr. F. Luca and Staff
Activity: Lecture
10.0 Credit Hours
VMED 604 Veterinary Medical Genetics
The objective of this course is to provide a background for understanding the underlying mechanisms, distribution, and control of genetic disease in domestic animals. Emphasis will be on concepts and information useful on a clinical level. Problem-based learning exercises integrate the concepts presented in the course.
Taught by: Dr. P. Henthorn and Staff
Activity: Lecture
2.0 Credit Hours

VMED 605 Nutrition
Fundamental principles of nutrition are the background of recommendations for feeding various classes of animals. Types of foodstuffs and their nutrient composition are evaluated in relation to nutrient requirements, voluntary intake and food preferences of domestic species. Feeding programs for nutritional management of animal classes commonly encountered in veterinary medicine are discussed, and examples of clinical nutrition applications are presented.
Taught by: Dr. D. Pitta and Staff
Activity: Lecture
3.0 Credit Hours

VMED 606 Principles of Epidemiology
The fundamentals of descriptive, analytic, and clinical epidemiology will be covered as they relate to both population and individual animal problems in veterinary medicine. The major aims of the course are to provide an analytic basis for clinical decision making and the ability to interpret the veterinary literature for application in a practice setting. These aims will be accomplished by using examples to illustrate the epidemiologic approach to studying infectious and non-infectious disease, and in clinical decision-making.
Taught by: Dr. Gary Smith and Staff
Activity: Lecture
2.0 Credit Hours

VMED 607 Veterinary Public Health
This course examines the nature and scope of animal-human interactions with emphasis on the consequences of this relationship from an epidemiologic viewpoint. Included are the zoonotic diseases, those naturally transmitted from animals to man, and the role of pets in society. The traditional involvement of veterinarians in prevention and control of food borne diseases and in public health practice will also be discussed.
Taught by: Dr. Gary Smith and Staff
Activity: Lecture
3.0 Credit Hours

VMED 608 Introduction to Poultry, Swine, and Dairy Medicine
This course will cover clinical problem solving for disease diagnosis, treatment and control. In addition, current topics of interest in food animal medicine will be discussed. These include food safety, regulatory medicine, environmental impact, welfare issues and opportunities for food animal veterinarians. Class time will be used for both lecture and discussion. All material for quizzes will be presented in class. The grade for the course will be based on weekly quizzes.
Taught by: Dr. S. Davison and Staff
Activity: Lecture
2.0 Credit Hours

VMED 609 Infectious & Metabolic Diseases
A core course of lectures on infectious and metabolic diseases of domestic animals. The topics in this course include: Rabies, Lymphosarcoma, Blue Tongue, Parturient Paresis, Listeriosis, Anthrax, Botulism, Leptospirosis, Canine Distemper, and many other polysystemic diseases.
Taught by: Dr. R. Sweeney and Staff
Activity: Lecture
7.0 Credit Hours

VMED 610 Clinical Reproduction
Course covers reproduction in large and small domestic species, and includes the estrous cycle, heat detection, pregnancy, pregnancy loss, obstetrics, parturition, the postpartum period, male and female reproductive physiology, behavior, breeding soundness examination, and fertility problems. A two-hour problem solving session with the class divided into small groups will be held to discuss clinical cases. Grades will be based on a mid-term and a cumulative final examination.
Taught by: Dr. R. Turner and Staff
Activity: Lecture
5.0 Credit Hours

VMED 611 Veterinary Medicine/Surgery I
Principles of diagnosis, including radiology, and medical and surgical management of infectious and noninfectious diseases of the head, neck and chest, including diseases of the oral structures, eye, ear, nose and throat, esophagus, lung, heart, pleura and chest wall. Course material is broken down in 4 sections covering ophthalmology, cardiology, diseases of the head and neck and non-cardiac intrathoracic diseases. An examination covering the lecture material is administered after each section.
Taught by: Dr. V. Thawley and Staff
Activity: Lecture
9.0 Credit Hours

VMED 612 Veterinary Medicine/Surgery II
This portion of the Medicine/Surgery core course deals with the pathophysiology, clinical features, and medical and surgical treatment of hematologic, endocrine, nephrologic, urogenital and oncologic disorders. Taught by: Dr. B. Callan and Staff
Activity: Lecture
9.0 Credit Hours

VMED 613 Veterinary Medicine/Surgery III
This core course covers the important medical and surgical diseases of the gastrointestinal system and the medical aspects of neurological diseases. Specific disease topics will include noninfectious gastrointestinal disorders; hepatobiliary, pancreatic and splenic disorders; and central and peripheral neurological diseases of domestic animals.
Taught by: Dr. M. Rondeau and Staff
Activity: Lecture
8.0 Credit Hours

VMED 615 Dermatology
A core course of lectures discussing the infectious, ectoparasitic, allergic, autoimmune and metabolic cutaneous disorders of small animals, exotics and horses. Diseases are discussed with particular emphasis on pathogenesis, clinical recognition and treatment. Methods of diagnosis also are stressed so that the student is prepared to recognize and treat the various dermatoses met in the clinical year.
Taught by: Dr. D. Morris and Staff
Activity: Lecture
3.0 Credit Hours
VMED 616 Clinical Animal Behavior
Behavior problems are among the most frequent reasons for surrender and euthanasia of pets. In this course we will discuss the most common behavior problems of dogs and cats, with an emphasis on diagnosis and treatment using both behavior modification and drug therapy. Prognosis and safety issues will also be discussed. Attention will be paid to the thought process used in working up and/or preventing behavioral disorders.
Taught by: Dr. C. Siracusa and Staff
Activity: Lecture
1.0 Credit Hour

VMED 617 Veterinary Ethical Issues
The course goal is to enhance students overall ethical literacy. The course involves a combination of lectures on ethical theory and methodology, and group discussions of ethical case studies drawn from various branches of veterinary practice. The course will be graded as Pass/Fail and full attendance by all students is required unless otherwise pre-authorized by the course organizer.
Taught by: Dr. J. Serpell and Staff
Activity: Lecture
1.0 Credit Hour

VMED 618 Introduction to Clinical Veterinary Medicine IV
This year-long course for second year veterinary students is designed as a reinforcement of the first year introduction to clinical veterinary medicine series (VMED 600, 601, 602) and as a transition to the clinical year rotations. The emphasis is on practical experiences in our hospitals that will increase your clinical and technical skills as you familiarize yourselves with the hospitals facilities, policies and operations. The course will include approximately 11 hours of lecture; 32 hours of small-group practical clinical sessions per student (NBC) and 29 hours of small-group practical clinical sessions per student (MJR-VHUP). This will be a graded course - A, B, C or F.
Taught by: Dr. C. Dougherty, Dr. L. Southwood and Staff
Two terms. student must enter first term.
Activity: Lecture
4.0 Credit Hours

VMED 619 Emerging and Exotic Diseases
This course will be offered on the internet through the Association of American Veterinary Medical Colleges web site. The Center for Food Security and Public Health at Iowa State University maintains the course and operates the learning management system. The course is part of a larger effort by US Department of Agriculture to improve awareness of and preparedness for foreign animal disease incursions among veterinarians and veterinary students. The ability of a veterinarian to suspect and assist in the diagnosis of a foreign animal disease in livestock or companion animals is crucial to safeguarding Americas animals and ag ricultural sector and to protecting public health. In addition, the course also aims to convey a more comprehensive understanding of the role of accredited veterinarians in world agriculture. Parts of this course will be required training for subsequent USDA veterinary accreditation of new graduates. There will be a mandatory one hour session to introduce the course site, objectives, materials and requirements. The course site comprises six overview topics; four accreditation modules; nineteen case scenarios and twenty infectious disease inquiries. There are short tests associated with the various sections and students are required to score at least an 80% on each test. Students can take the test multiple times if needed to achieve that score. In addition to the course per se, there are numerous links to supplementary materials. The only other requirement is that a course evaluation must be completed. Students will have five weeks to complete the course requirements: (1) complete overviews 1-4 and 6 in their entirety and 10 out of 13 disease incursion examples in overview 5; (2) complete four accreditation modules; (3) complete nine required and three elective case scenarios; (4) complete five of the 20 infectious disease inquiries representing at least three species. If requested by students, a second session will be held one week prior to the deadline for completion of the online portion of the course to answer any questions and ensure students are able to complete all of the requirements. Otherwise, students with questions or concerns may contact the course organizer, Dr. Aceto, by email or telephone at any time during the course period.
Taught by: Dr. H. Aceto
Activity: Lecture
3.0 Credit Hours
VMED 620 Introduction to Clinical Veterinary Medicine V
This course will comprise 8 hours of lecture/classroom exercises and discussion per student in addition to a series of online tutorials. Two of the 8 hours of lecture time will be devoted to orientation and trouble-shooting sessions to help students access and complete the online tutorials. Students are expected to complete the online tutorials outside of the classroom setting. The online tutorials will demonstrate how to navigate the hospital computer systems at both campuses so that students will be familiar with them prior to entering the clinics in their fourth year. The material presented in this course will build upon principles learned in previous ICVM courses, specifically by providing further instruction on and practice of written and verbal communication skills and by building upon the orientation to the teaching hospitals provided in ICVM IV. After completing this course, students should be able to: - Describe and use key aspects of client communication skills that are essential in the veterinary medical setting. - Recognize and interpret common aspects of non verbal communication and understand how their non verbal communication can be used to improve their encounters with clients. - Understand and demonstrate the basic elements of a written discharge summary. - Navigate and utilize the electronic hospital systems on both campuses. The course will be pass/fail based upon attendance, completion of the on-line tutorials and completion of a discharge summary by each student for the dog that s/he spayed in the Clinical Exercises course.
Taught by: Dr. E. Krick and Staff
Course usually offered in fall term
Activity: Lecture
2.0 Credit Hours

Veterinary Clinical Studies - New Bolton Center (VCSN)

VCSN 630 Equine Neonatology & Intensive Care Medicine
The objectives of this course are to: (1) Introduce students to neonatal physiology and behavior as it applies to the foal; (2) Acquaint students with the clinical signs and pathophysiologic mechanisms of diseases in neonates; and (3) Provide students experience in the neonatal intensive care unit learning monitoring techniques (e.g. noninvasive blood pressure measurements, PCV, TP, stall side blood glucose, etc.) Observing normal and abnormal neonatal behavior and neonatal/maternal interactions, learning techniques of neonatal restraint, and assisting with diagnostic and therapeutic procedures as well as general nursing. Lectures will focus on foal diseases, intensive care therapies, periparturient problems, ventilatory support, musculoskeletal disorders, pharmacology and the neonate. Seminars will be used to apply lecture and reading material to clinical case discussions. A set of clinically-oriented problems covering case presentations, blood gas analysis, nutrition formulations, fluid therapy, nursing care protocols and periparturient events will be completed during the fourth quarter. The course grade will be based upon evaluation of clinical case problems, seminar participation, and mastering clinical skills (monitoring techniques, etc.) learned during foal-sitting. Enrollment requires approval of the course organizer and satisfactory academic standing. Note: This course will commence in the Spring term and conclude during the summer as foal-sitting nursing shifts can extend into the early summer months.
Taught by: Dr. M. Linton and Staff
Prerequisites: Prerequisites: Satisfactory acad. performance through Q2/2nd yr.
Activity: Lecture
4.0 Credit Hours
Notes: Limitations: 70 students max. for foal-sitting nursing shifts. Note: YOU MUST PROVIDE YOUR OWN TRANSPORTATION TO AND FROM NEW BOLTON CENTER

VCSN 632 Diseases & Management of Sheep & Goats
This course is an introduction to small ruminant medicine and surgery. Flock and herd health programs involve control of infectious, parasitic, reproductive and metabolic disorders and provision of proper housing, feeding and reproductive management systems. Prevalent diseases and management systems of the Eastern U.S. will receive emphasis.
Taught by: Dr. M. Fecteau
Activity: Lecture
3.0 Credit Hours

VCSN 633 Animal Health Economics
An introduction to a variety of economic concepts and decision making techniques that relate to the business of an agricultural enterprise and to the impact of veterinary services on that enterprise. Discussion of the role of production medicine in the overall profitability of animal agriculture.
Taught by: Dr. D. Galligan and Staff
Activity: Lecture
2.0 Credit Hours
Notes: Conflict: Scheduled concurrently with Clinical Exercises in Quarter
VCSN 634 Clinical Biostatistics
This course presents a unified approach to the analysis and interpretation of clinical data. We start with a discussion of general linear models and show the types of problems to which they apply, and then move to generalized linear models, to survival models, and finally to general estimating equations. Our goal is to acquaint participants with a fairly comprehensive array of approaches to data analysis and, most particularly, to circumstances to which they apply. The objective is to prepare students for research activities, either as a career, or as a step towards "Board Certification" enabling them to plan studies, analyze data ensuing from studies, and to critically read articles in their area of interest.
Taught by: Dr. D. Stefanovski and Staff
Activity: Lecture
2.0 Credit Hours
Notes: Limitations: Min: 6 students/Max: 16 students

VCSN 635 Equine & Farm Animal Anesthesia
This course will discuss sedation and intravenous or inhalant anesthesia of equine, food animal and camelpid patients. The lectures will review the clinical pharmacology of the commonly used anesthetic drugs and the anatomic and physiologic differences among the species and their relevance to anesthetic management. Patient preparation, drug selection, induction and intubation techniques, intra-operative monitoring and management of cardiovascular and respiratory abnormalities, post-operative analgesia and recovery complications will also be discussed. Three case-based problems with multiple questions related to various aspects of anesthesia care will be distributed during the course. The problems are take-home, open-book and students may work alone or in pairs. Time will be spent discussing the cases after the written answers are turned in.
Taught by: Dr. K. Olson and Staff
Prerequisite: Prerequisites: VSUR 604 Anesthesia
Activity: Lecture
2.0 Credit Hours
Notes: Note: This course is a prerequisite for VCSN 815 and VCSN 875 Large Animal Anesthesia Rotation - NBC. This course is required for Equine Majors

VCSN 636 Clinical Applications of Pharmacology
This course is focused on the clinical pharmacological management of the major problems in veterinary practice. The vast majority of lectures directly apply to companion animals but when necessary, to emphasize a drug group or specific clinical problem, there are also several large animal lectures. This is an extension of core pharmacology and not an expanded version. The lectures will be given by the clinical and basic sciences faculty in their areas of expertise. Emphasis will be on the clinical aspects of drug therapy such as dosage range, duration of therapy, evaluation of therapy, and problems encountered with current drug therapy. Pharmacological therapy in the following areas of medicine and surgery are covered: antibiotics, cardiovascular, neurology, respiratory, urinary, gastrointestinal, endocrine, emergency medicine, ophthalmology, chemotherapeutic agents, fluid therapy, anti-inflammatory, pain medications and other topics as needed for the most comprehensive clinical overview. Emphasis is on case-based approaches to drug therapy. The major objectives of this course are: (1) Provide practical information on rational drug therapy before entering the clinics and the real world of veterinary practice. (2) Provide a sound basis for rationally evaluating the presently available drugs and the drugs of the future. The course grade is based on a weekly quiz and/or mid-term/final.
Taught by: Dr. J. Orsini and Staff
Prerequisites: Prerequisites: VBMS 607 Pharmacology and Toxicology, VPTH 605 Microbiology & VPTH 604 Immunology
Activity: Lecture
4.0 Credit Hours

VCSN 637 Animal Production Systems
This elective course provides an overview of: (i) management and operational basics of food animal production systems (dairy, beef, swine, poultry, and aquaculture), (ii) contemporary issues concerning current practice and sustainable future of animal production systems, e.g., food safety & biosecurity, antibiotics & antimicrobial resistance, nutrient management & environmental regulations, and animal welfare & public concerns. Students will work in teams on debates from pre-arranged topics, and will complete periodic assignments. Course grades will be based on class participation (40%), homework assignments (30%), and team debate performance (30%).
Taught by: Dr. Z. Dou and Staff
Activity: Lecture
2.0 Credit Hours
Notes: Limitations: Capacity of classroom
VCSN 638 Introduction to Animal Welfare
This course will cover the basic principles, history, and application of animal welfare science for multiple species. Over a series of lectures, the complex issue of assessing good versus poor welfare will be addressed. The first few lectures will provide students with the background of this field, as well as key terms which define the assessment methods of animal welfare science. The multifaceted issue of poor versus good welfare will be addressed in a lecture on ethics and sociology. The background lectures will also cover the disparity in the assessment of pain, pleasure, stress, and suffering based on applying physiological versus behavioral measurements. Given the tools provided by the background lectures, the students will then learn about species-specific welfare issues in the subsequent lectures to include swine, poultry, bovine, equine, aquaculture, exotic/zoo animals, lab animals, shelter animals, companion animals and current events. Following each one-hour lecture, the students will engage in an hour of hands-on activities, and debates concerning that week's topic. Students will also participate in one wet lab where they will have the opportunity to apply methods of welfare assessment that they have learned in class.
Taught by: Dr. M. Pierdon and Staff
Activity: Lecture
4.0 Credit Hours
Notes: Limitations: Permission of instructor since class is capped at 25 participants

VCSN 639 Animal Welfare Science
This course is a foundational course for students enrolling in the Animal Welfare Certificate Program. This course covers the basic principles, history, and application of animal welfare science. Over a series of video modules, online discussions, assignments, and quizzes, this course will teach students to assess the welfare of animals in a variety of settings using science-based methods and reasoning. Students will learn current welfare issues by species. This class will engage in activities that build the skills to find and assess scientific sources of information. Finally, the link between science and ethics will be explored such that students understand various ethical frameworks and how they relate to animal welfare. The objective of the course is to provide students with the background and tools to apply animal welfare science in order to facilitate students' ability to successfully engage in welfare deliberations and welfare science in a variety of fields.
Taught by: Dr. Meghann Pierdon and Staff
Prerequisites: Any student accepted for enrollment in the Animal Welfare and Behavior Certificate Program (a Bachelor's Degree is required and a background in biology or animal science is preferred.)
Activity: Online Course
1.0 Course Unit
Notes: Limitations: 20-25 students. At present, this online course will not be offered to UPenn VMD students.

VCSN 640 Large Animal Medicine - NBC
The course is comprised of advanced lectures and discussions on medical diseases of large domestic animals. Laboratory sessions will include "hands-on" experience in performing the more common diagnostic procedures in large animal medicine, including: urethral catheterization of horses; rectal examination; ophthalmic examinations; epidural anesthesia (bovine); nasolacrimal duct flushing; cardiovascular examinations; use of ultrasound equipment; venipuncture in cattle and horses; intravenous injections in cattle, balling gun procedure for cattle; TB testing in cattle and endoscopy of the horse. Two in-course Progressive examinations and a course Final examination will be given. Taught by: Dr. R. Nolen-Walston and Staff
Prerequisite: Prerequisites: Core Medicine Courses
Activity: Lecture
7.0 Credit Hours

VCSN 641 Advanced Poultry Medicine - NBC
This lecture/laboratory course is designed to provide students with a working knowledge of the recognition and diagnosis of selected diseases of poultry. Lectures will include discussion of the clinical, post-mortem and technical aspects of the diagnosis of selected avian diseases. The laboratory will provide each student with an opportunity to necropsy birds. Field visits to local poultry farms may be taken. The course grade will be based on weekly quizzes and a group project.
Taught by: Dr. S. Davison and Staff
Prerequisites: Prerequisites: VPTH 602 General & Systemic Pathology & VMED 608 Introduction to Poultry, Swine, and Dairy Medicine
Activity: Lecture
2.0 Credit Hours
Notes: Limitations: Maximum of 40 students. CONFLICT: VCSN 648 Equine Sports Medicine

VCSN 642 Dairy Cattle Nutrition - NBC
The complexity of evaluating and balancing rations requires computer models. CPM-Dairy - developed at Cornell University, The University of Pennsylvania and The William H. Miner Agricultural Research Institute - evaluates and formulates rations according to a modified National Research Council (NRC) model and according to The Cornell Net Carbohydrate and Protein System (CNCP). CPM-Dairy will be used to describe nutrient requirements, supplies and utilization. Environmental effects on nutritional requirements will be demonstrated. The dynamics of ruminal fermentation and microbial growth will be illustrated in terms of how they affect nutrient supply. "Hands on Computer Sessions" will lead participants through ration formulation.
Taught by: Dr. L. Baker and Staff
Prerequisite: Prerequisites: VMED 605 Nutrition
Activity: Lecture
3.0 Credit Hours
Notes: CONFLICTS: Mon. 8-10 am conflicts with VCSN646 Equine Lameness; Thurs. 4-6 pm conflicts with VCSN 647 Equine Orthopedics
VCSN 643 Large Animal Reproduction - NBC
This course covers in-depth reproductive management of cattle, horses, swine and small ruminants. Emphasis is placed on the herd or flock as a unit rather than on the individual animal. This course is the same course as VCSN644 but with one-half of the laboratory time. The course is intended for those students who intend to pursue a career that will be exclusively or predominantly companion animal. A three-hour canine reproduction laboratory is included. The Laboratories include demonstrations by clinicians and hands-on practical experience for students in evaluating the male and the female reproductive status: PATH F - female pathology, PATH M - male pathology, OB1 - obstetrics, B&R - bull and ram breeding soundness examination, DOG - dog breeding soundness examination, vaginal cytology of the bitch, MARE1 - palpation of the genital tract per rectum of mare, COW1 - physical exam of the bovine genital tract; ULTRA - ultrasonography of the genital tract of animals. Therapeutic information will be covered in problem-based cases that will be solved and formally presented by small student groups. Grades will be based on the therapeutic presentations, laboratory participation, mid-term exam and a comprehensive final examination. Taught by: Dr. P. Sertich and Staff
Prerequisites: Prerequisites: VMED 610 Clinical Reproduction 2
Activity: Lecture
3.0 Credit Hours
Notes: Limitations: No Drop/Add

VCSN 644 Large Animal Reproduction - NBC
The course covers in-depth reproductive management of cattle, horses, swine, sheep and small ruminants. Emphasis is placed on the herd or flock as a unit rather than on the individual animal. Laboratories include demonstrations by clinicians and hands-on practical experience for students in evaluating the male and the female reproductive status of dogs and large domestic animals. Therapeutic information will be covered in problem-based cases that will be solved and formally presented by small student groups. Grades will be based on the therapeutic presentations, laboratory participation, mid-term exam and a comprehensive final examination. In addition to the laboratories listed in VCSN643 are the following eight laboratories: OB2 - fetomy, STALL - stallion breeding soundness examination, SWINE - boar semen evaluation, heat detection and AI of sows, MARE2 - mare breeding soundness examination, palpation, MARE3 - using breeding soundness examination to solve infertility case, palpation, COW2 - bovine estrous cycle, palpation, COW3 - pregnancy diagnosis, palpation, COW4 - therapeutics, palpation. Taught by: Dr. P. Sertich and Staff
Prerequisite: Prerequisites: VMED 610 Clinical Reproduction
Activity: Lecture
4.0 Credit Hours
Notes: Limitations: No Drop/Add. Note: This course is a prerequisite for Course VCSN 774 Large Animal Clinical Reproduction Rotation

VCSN 645 Large Animal Surgery & Surgical Exercises - NBC
Lectures given in this course will cover common surgical problems of the respiratory, the gastrointestinal, the musculoskeletal, and the urogenital systems of horses and of the gastrointestinal system of domestic ruminants. Lecture material will cover the procedures to be done in each laboratory beforehand so that ample opportunity is allowed for preoperative preparation. Lectures are given on anesthesia with special emphasis on drugs to be used during the laboratory sessions. The surgical exercises and related laboratory procedures are designed to teach surgical techniques and principles, surgical anatomy, and basic surgical procedures in horses and domestic ruminants. Students will administer general anesthetics and apply the principles and techniques of physiologic monitoring of anesthetized large animals. The importance and the application of preoperative and postoperative management will be emphasized and students take full responsibility for their patient's progress throughout the course. The course grade is derived from performance in the laboratories, quality of patient care, participation in conferences, and one final exam. Ponies that fulfill all University Laboratory Animal Resources (ULAR) guidelines may be purchased at the end of the course.
Taught by: Dr. E. Parente and Staff
Prerequisite: Prerequisites: Core Surgery Courses
Corequisites: Post-requisite: must sign up for VCSN 870 Large Animal Surgery Clinical Rotation 7 Conference Hrs.
Activity: Lecture
4.0 Credit Hours
Notes: Limitations: No Drop/Add; Maximum of 30 students

VCSN 646 Equine Lameness - NBC
This course covers the principles of lameness diagnosis and treatment in horses. The course features didactic lectures, actual lameness examinations, video tape viewing, computer aided learning and a diagnostic nerve block laboratory using cadaver specimens. Taught by: Drs. M. Ross, D. Levine and Staff
Prerequisites: Prerequisites: Core Surgery and Anatomy Courses
Activity: Lecture
4.0 Credit Hours
Notes: CONFLICT: Mon. 8-10 am conflicts with VCSN 642 Dairy Cattle Nutrition. Notes: This course is a prerequisite for the following clinical rotations: VCSN 812, 872 Sports Medicine/Imaging and VCSN 878 Sports Medicine Clinic

VCSN 647 Equine Orthopedics - NBC
The course reviews specific techniques in equine orthopaedics, and emphasizes understanding orthopaedic principles that are applicable to all species. Topics include more detailed information on internal fixation, relevant first-aid techniques, osteochondrosis and orthopedic sepsis. Taught by: Dr. D. Richardson and Staff
Activity: Lecture
1.0 Credit Hour
Notes: CONFLICT: VCSN 642 Dairy Cattle Nutrition
VCSN 648 Equine Sports Medicine - NBC
This seminar course concerns the clinical application of basic physiologic and pathologic principles as they relate to the diagnosis and management of exercise-related diseases in the horse. Material will be presented in light of the demands of specific types of athletic activity. Laboratory demonstrations using the high-speed treadmill will be provided. Hands-on sessions are also provided to demonstrate the collection of arterial blood gas samples and upper airway endoscopy. Paper or oral presentation required.
Taught by: Dr. J. Slack and Staff
Prerequisites: Prerequisites: VBMS 601 Gross Anatomy, VBMS 605 Principles of Biochemistry & VBMS 606 Animal Physiology
Activity: Lecture
3.0 Credit Hours
Notes: Limitations: Permission of the Instructor; Cannot be repeated

VCSN 649 Large Animal Diagnostic Imaging - NBC
The course consists of a series of lectures, a radiographic positioning laboratory, and an ultrasound/anatomy laboratory. Plain film radiography comprises the majority of the lectures but ultrasound, scintigraphy and prepurchase examination are included. A brief introduction to CT & MRI is also presented. Strong emphasis is placed on the equine species but incorporates radiography of other large animals. The course is designed to cover the basic principles of the different imaging techniques, radiographic and sonographic anatomy, and the basic interpretation of the imaging modalities.
Taught by: Dr. V. Reef and Staff
Prerequisites: Prerequisites: Core Medicine, Surgery and Radiology Courses
Activity: Lecture
3.0 Credit Hours
Notes: Notes: This course is a prerequisite for the following clinical rotations: VCSN 812,872 Sports Medicine/Imaging and VCSN 814,874 Large Animal Radiology

VCSN 650 Applied Animal Welfare and Behavior
This course aims to provide students with practical skills helpful in the study of animal welfare and in the future offer a bridge to our proposed master’s program. Students will be exposed to critical reading of the scientific literature, development and testing of hypothesis as well as examining experimental paradigms used commonly to probe animal welfare and behavior. The goal of the course is for each student to conceive, develop, write, and present a research proposal on a question of interest in animal welfare that could provide the foundation for a future capstone project. Student assignments will include selected readings, synchronous and asynchronous online discussion of relevant course materials, and an oral presentation and written description of their research proposal.
Taught by: Dr. Thomas Parsons
Prerequisite: Student enrolled in the Animal Welfare Certificate Program who has taken the Animal Welfare Science and/or Animal Behavior course
Activity: Online Course
1.0 Course Unit
Notes: Limitations: 20-25 students. This course will not be offered to VMD students.

VCSN 657 One Health & Global Food Security
By 2050 can the world sustain a population of over 9 billion people in the face of climate change, limited water and other natural resources, pollution, urbanization, political and income inequality, conflict, changing diets and patterns of disease? An interdisciplinary group of faculty will explore this complex question through six broad trends that affect global food sustainability and environmental health; 1) nutritional needs; 2) changing patterns of communicable and non-communicable diseases of humans and all types of animals; 3) natural resource inventory and management; 4) production technologies (intensive/extensive systems); 5) societal changes impacting production and food demand; 6) food distribution systems and access to food. The course is open to graduate and undergraduate students and will involve student participation and research.
Taught by: Drs. D. Galligan, A. Kelly and Staff
Course usually offered in spring term
Also Offered As: ANTH 361, ANTH 661
Activity: Lecture
4.0 Credit Hours

VCSN 661 Swine Neonatology - NBC
This is an introductory course for students who want to learn more about swine production and swine medicine. It aims to familiarize 2nd and 3rd year veterinary students with several important aspects of swine neonatology/farrowing room management that includes periparturient physiology and behavior of both the sow and the piglet, baby pig processing, and sow dystocia. All students will be required to attend the four hours of lecture, and four laboratory shifts. Each laboratory shift is 7 hours and available nights and weekends. Students will be required to monitor the farrowing house for sows in labor and attend the farrowings as needed to critically assess animal well-being. Students will be expected to provide appropriate sow or piglet interventions when indicated. Students will also assist with any routine management tasks such as piglet processing and vaccination. Students will be graded on their participation and success in meeting the course objectives.
Taught by: Dr. T. Parsons and Staff
Activity: Lecture
1.0 Credit Hour
Notes: Limitations: Permission of the Instructor. May be repeated once

VCSN 662 Swine Neonatology - NBC
This course is similar to VCSN 661, but provides students with a more intensive experience and the opportunity to pursue a higher level of proficiency in swine neonatology. The course also aims to familiarize 2nd and 3rd year veterinary students with several important aspects of swine neonatology/farrowing room management that includes periparturient physiology and behavior of both the sow and the piglet, baby pig processing, and sow dystocia. All students will be required to attend the four hours of lecture, and eight laboratory shifts. Each laboratory shift is 7 hours and available nights and weekends. Students will be required to monitor the farrowing house for sows in labor and attend the farrowings as needed to critically assess animal well-being. Students will be expected to provide appropriate sow or piglet interventions when indicated. Students will also assist with any routine management tasks such as piglet processing and vaccination. Students will be graded on their participation and success in meeting the course objectives.
Taught by: Dr. T. Parsons and Staff
Activity: Lecture
2.0 Credit Hours
Notes: Limitations: Permission of the Instructor; Cannot be repeated
VCSN 663 Swine Husbandry - NBC
This is the second introductory course for students who want to learn more about swine production and swine medicine. It aims to familiarize 2nd and 3rd year veterinary students with several other aspects of swine husbandry and health management. All students will be required to attend four laboratory shifts, and write a short report on an aspect of mutual interest related to swine management or disease. Each laboratory shift is 7 hours and is available nights and weekends. Students will be required to participate in all aspects of swine husbandry with special emphasis given to herd health, reproductive and nutritional management. Students will be graded on their participation and success in meeting the course objectives.

Taught by: Dr. T. Parsons and Staff
Prerequisite: Prerequisites: Swine Neonatology (VCSN 661 twice or VCSN 662 once)
Activity: Lecture
1.0 Credit Hour
Notes: Limitations: Permission of the Instructor; can be repeated once

VCSN 664 Swine Husbandry - NBC
This course is similar to VCSN 663, but provides students with a more intensive experience and the opportunity to pursue a higher level of proficiency in swine husbandry. This course aims to familiarize 2nd and 3rd year veterinary students with several other aspects of swine husbandry and health management. All students will be required to attend eight laboratory shifts, and write a short report on some aspect of mutual interest related to swine management or disease. Each laboratory shift is 7 hours and is available nights and weekends. Students will be required to participate in all aspects of swine husbandry with special emphasis given to herd health, reproductive and nutritional management. Students will be graded on their participation and success in meeting the course objectives.

Taught by: Dr. T. Parsons and Staff
Prerequisite: Prerequisites: Swine Neonatology (VCSN 661 twice or VCSN 662 once)
Activity: Lecture
2.0 Credit Hours
Notes: Limitations: Permission of the Instructor; can be repeated once

VCSN 700 Large Animal Medicine -Foundation - NBC
Students in this rotation will assist clinicians in history taking, examinations and the medical management of large animal patients presented to the hospital at New Bolton Center. Students will participate in daily ward and Medicine teaching rounds, Radiology rounds and Pathology rounds. All students, whether in core or elective, will be expected to participate in night and weekend duty on a rotating basis. All students will prepare and present one clinical case discussion for Grand Rounds. Time commitment: at least 8 hours per day plus night and weekend duty.

Taught by: Dr. R. Sweeney and Staff
Also Offered As: VCSN 770
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours

VCSN 701 Large Animal Emergency/Critical Care - Foundation Rotation - NBC
This rotation is designed to teach students basic principles of large animal emergency medicine and surgery as well as the daily management of critically ill equine patients. Students will be involved in a variety of large animal emergency admissions including diagnostic procedures and surgery as well as post-operative or post-admission case management of horses with gastrointestinal disease. Students will attend regular 8 am morning rounds (see course description for Large Animal Surgery, VCSN 800), followed by morning case-based discussion rounds. The day will be spent either on emergency admissions or procedures and management of in-house patients. Daily afternoon rounds will be topic-based, and may be selected from the following topics: Laceration Repair, Emergency Stabilization of Fractures, Acute Abdomen (colic), Diarrhea, Fluid Therapy, Respiratory Distress, Acute Blood Loss/Hemorrhagic Shock, Food Animal Emergencies, Blood Gas Interpretation, Acute Neurologic Patient, Monitoring the Critically Ill Patient, Reproductive Emergencies, Management of Rectal Tears, Critical Care Journal Club. There will be one emergency student assigned to be on-call. On-call shifts are from 6 am to 6 pm (day) and 6 pm to 6 am (night). During the after hours shifts (night and weekends) all emergencies will be received by the emergency student with back up from students in the Medicine and Surgery rotations. During the day time shifts, emergency students will receive equine surgical emergencies and isolation cases. Students will also be assigned treatment duties. Three students will also be required to complete a case-based Grand Rounds presentation of approximately 15 minutes duration. The Emergency / Critical Care faculty and staff will provide primary coverage for the rotation, with assistance from Medicine and Surgery sections.

Taught by: Dr. L. Southwood and Staff
Also Offered As: VCSN 873
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours

VCSN 712 Food Animal Reproduction - NBC
The course is designed for those students anticipating entering large animal or mixed practice. Students will participate in the diagnosis and treatment of clinical reproductive cases in the hospital. Students will be responsible for the daily treatment and examination of all hospitalized cases at the Hofmann Center. Students will also assist in the management of reproductive problems of Widener Hospital patients. Exposure will vary due to fluctuations in case load. Additional "hands-on" practice of reproductive procedures will occur by the use of teaching animals. Organized laboratories will allow the student to become comfortable with diagnostic techniques of large animal species. On-call, weekend, and night duty are required. Students will be required to give a 15 minute presentation during the rotation and prepare two case letters/discharge instructions on animals they evaluated during the rotation. If student interest and time permit, students may go on field trips to breeding farms.

Taught by: Dr. T. Dobbie and Staff
Also Offered As: VCSN 772
Prerequisite: Prerequisites: VCSN 644 Large Animal Reproduction
Activity: Clinical Rotation Dental & Vet school
3.0 Credit Hours
Notes: Satisfies requirement for: EQ, FA, LA. Limitations: 2-6 students/rotation. Priority: FA
VCSN 713 Field Service - NBC
Students in this rotation will assist staff doctors in history taking, physical examinations, and the medical management of patients seen on the Field Service activities of the School's large animal practice. The student is required to attend the appropriate 8:00 a.m. daily rounds at New Bolton Center. The remainder of the day will be spent on field calls. The student will be required to be on night and weekend duty. Night duty will be divided equally among field service students in the rotation. Students on emergency duty are required to be within 15 minutes from New Bolton Center while on duty. Case presentations will be given by students on the second Wednesday of the rotation. Boots and coveralls are essential for this rotation.
Taught by: Dr. B. Smith and Staff
Also Offered As: VCSN 773
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Required: SALA

VCSN 715 Diagnostic Ultrasound in Large Animals - NBC
This rotation will provide students with experience in the diagnosis and treatment of large animal cardiac diseases and the use of M-mode, 2-dimensional real-time, pulsed wave, color flow and continuous wave Doppler echocardiography and exercising electrocardiography. Students will also gain experience in the use of diagnostic ultrasonography in the evaluation of tendon and ligament injuries, diseases of the thorax and abdomen, and the evaluation of masses, swellings, neonates and high-risk pregnancies. Students will also gain experience in patient preparation; obtaining a quality ultrasonographic or echocardiographic image and cardiac Doppler studies; and in interpretation of these images and studies with staff and faculty supervision. Students will be responsible for patient care of animals presented to the Heart Station/ Ultrasound Service during the rotation.
Taught by: Dr. V. Reef and Staff
Prerequisites: Prerequisites: Core Medicine and Surgery
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: 2 students/week in VCSN 776, VCSN 775 combined. Satisfies imaging requirement: EQ, FA, LA. Satisfies cardiology requirement: SALA. Notes: Not offered during VCSN 812,872 Sports Medicine/Imaging

VCSN 716 Ultrasonography in Large Animals - NBC
For full course description see VCSN 715.
Taught by: Dr. V. Reef and Staff
Also Offered As: VCSN 776
Prerequisites: Prerequisites: Core Medicine and Surgery
Activity: Clinical Rotation Dental & Vet school
2.0 Credit Hours
Notes: Limitations: 2 students/week in VCSN 106,776, VCSN 715,775 combined. Satisfies requirement for: EQ, FA, LA. Note: Not offered during VCSN 812,872 Sports Medicine/Imaging

VCSN 717 Food Animal Reproduction - NBC
The course is designed for those students anticipating entering large animal or mixed practice. Students will participate in the diagnosis and treatment of clinical reproductive cases in the hospital. Students will be responsible for the daily treatment and examination of all hospitalized cases at the Hofmann Center. Students will also assist in the management of reproductive problems of Widener Hospital patients. Exposure will vary due to fluctuations in case load. Additional "hands-on" practice of reproductive procedures will occur by the use of teaching animals. Organized laboratories will allow the student to become comfortable with diagnostic techniques of large animal species. On-call, weekend, and night duty are required. Students will be required to give a 15 minute presentation during the rotation and prepare two case letters/discharge instructions on animals they evaluated during the rotation. If student interest and time permit, students may go on field trips to breeding farms.
Taught by: Dr. T. Dobbie and Staff
Also Offered As: VCSN 712
Prerequisite: Prerequisites: VCSN 644 Large Animal Reproduction
Activity: Clinical Rotation Dental & Vet school
3.0 Credit Hours
Notes: Limitations: 2-6 students/rotation. Priority: FA

VCSN 770 Large Animal Medicine Clinic - NBC
Students participating in this elective rotation will be assigned with the core students in VCSN700 in the Medicine Section. These elective students will participate in the same manner as core students, although attempts will be made, when possible, to allow them to focus more on some cases or diseases of particular interest to them. They are expected to participate, to the same extent as core students, in all emergency duties including night and weekend on-call duty. At least eight hours per day, plus duty hours.
Taught by: Dr. R. Sweeney and Staff
Also Offered As: VCSN 700
Prerequisite: Prerequisites: Core Medicine Courses
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSN 773 Field Service - NBC
This is an elective rotation equivalent to course VCSN 713.
Taught by: Dr. B. Smith and Staff
Also Offered As: VCSN 713
Prerequisite: Prerequisites: Core Medicine Courses
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs
### VCSN 774 Large Animal Clinical Reproduction - NBC

The course is designed for those students anticipating entering large animal or mixed practice. Students will participate in the diagnosis and treatment of clinical reproductive cases in the hospital. Students will be responsible for the daily treatment and examination of all hospitalized cases at the Hofmann Center. Students will also assist in the management of reproductive problems of Widener Hospital patients. Exposure will vary due to fluctuations in case load. Additional "hands-on" practice of reproductive procedures will occur by the use of teaching animals. Organized laboratories will allow the student to become comfortable with diagnostic techniques of large animal species. On-call, weekend, and night duty are required. Students will be required to give a 15 minute presentation during the rotation and prepare two case letters/discharge instructions on animals they evaluated during the rotation. If student interest and time permit, students may go on field trips to breeding farms.

**Taught by:** Dr. P. Sertich and Staff  
**Prerequisite:** Prerequisites: VCSN 644 Large Animal Reproduction  
**Activity:** Clinical Rotation Dental & Vet school  
**6.0 Credit Hours**  
**Notes:** Limitations: 2-5 students/rotation. Priority: EQ, FA, LA Majors

### VCSN 775 Diagnostic Ultrasound in Large Animals - NBC

This is an elective rotation equivalent to course VCSN 715.

**Taught by:** Dr. V. Reef and Staff  
**Also Offered As:** VCSN 715  
**Prerequisite:** Prerequisites: Core Medicine and Surgery  
**Activity:** Clinical Rotation Dental & Vet school  
**5.0 Credit Hours**  
**Notes:** Limitations: 2 students/week in VCSN 776,VCSN 775 combined.  
**Note:** Not offered during VCSN 872 Sports Medicine/Imaging

### VCSN 776 Ultrasonography in Large Animals - NBC

For full course description see VCSN 715.

**Taught by:** Dr. V. Reef and Staff  
**Also Offered As:** VCSN 716  
**Prerequisite:** Prerequisites: Core Medicine and Surgery  
**Activity:** Clinical Rotation Dental & Vet school  
**2.0 Credit Hours**  
**Notes:** Limitations: 2 students/week in VCSN 776, VCSN 775 combined.  
**Note:** Not offered during VCSN 872 Sports Medicine/Imaging

### VCSN 777 Large Animal Neonatal Intensive Care Rotation - NBC

This elective provides students with experience in the management of critically ill large animal neonates and dams with periparturient complications. Daily rounds emphasize the use of monitoring techniques (e.g. capnography, ECG, BP monitor, fetal and neonatal ultrasonography), and various treatment modalities (e.g. parenteral nutrition, positive pressure ventilation, and fluid therapy) required in the management of critically ill neonatal foals and late-term pregnant mares. Students will have the opportunity to master the following manual and theoretical skills: arterial puncture and arterial blood gas analysis, calculation and application of parenteral and enteral nutrition formulations, catheterization techniques for veins and bladder, principles of fluid therapy as applied to patients with septic shock and patients requiring maintenance fluids, radiographic interpretation of neonatal thoracic and musculoskeletal disease, interpretation of fetal and neonatal sonograms, familiarity with different types of respiratory support and resuscitation protocols, and a working knowledge of a wide variety of pharmacologic agents including antibiotics, anticonvulsives, sedatives, analgesics, pressors and inotropic agents. Student responsibilities include presentation of NICU cases at rounds, performing patient treatments with assistance from the NICU nursing staff, morning SOAPs on all assigned cases, and assistance with the diagnosis, treatment and monitoring of neonates admitted to the NICU during their shifts, and assistance with monitoring and parturition in pregnant dams. Students are scheduled to assist with treatments in the intensive care unit every evening from 6 p.m. to 12 midnight and 6 a.m. to 12 midnight on weekends. Emergency duty is assigned equitably among the students on the rotation. Care of the NICU case population is a team effort shared by fourth year students, NICU clinicians, nursing staff, and foal sitters (second year students and volunteers).

**Taught by:** Dr. J. Palmer and Staff  
**Activity:** Clinical Rotation Dental & Vet school  
**6.0 Credit Hours**  
**Notes:** Limitations: 4 students min; 8 students maximum

### VCSN 780 Ration Evaluation and Formulation - NBC

This course is intended to provide students with practical experience in evaluating dairy feeding programs and formulation of rations. Students will visit dairy farms, inspect feed storage and delivery systems, obtain representative samples of feedstuffs for analysis, examine production records, and assess animal body condition. Students will then evaluate the nutritional and economic adequacy of the whole feeding program, suggest recommendations for its improvement and prepare producer reports for discussion with faculty prior to implementation.

**Taught by:** Dr. L. Baker and Staff  
**Prerequisite:** Prerequisites: VCSN 642 Dairy Cattle Nutrition  
**Activity:** Clinical Rotation Dental & Vet school  
**6.0 Credit Hours**  
**Notes:** Limitations: Minimum of 3 students
VCSN 800 Large Animal Surgery-Foundation - NBC
Students rotating through Large Animal Surgery at NBC will participate in all aspects of examination and diagnosis, including lameness evaluation and endoscopy, medical and surgical treatment and daily patient care of large animals. During one week of the two-week rotation, each student will be assigned to treat cattle, other domestic farm animals and horses, and during the other week, horses only. Night, weekend and holiday assignments, including treatments and emergency service, will be made according to the requirements of the overall hospital operation during a given session. Students usually are exposed to various surgical procedures (general soft tissue, abdominal, orthopedic, etc.) during any one rotation. During the rotation, students may gain experience with horses being examined on the High Speed Treadmill or undergoing imaging in the Nuclear Scintigraphy Unit. Students will also participate in a variety of didactic teaching rounds, barn rounds and teaching laboratories as described: Monday, Tuesday, Wednesday, Friday 4-5 pm - Surgery Teaching Rounds. Thursday 3-5 pm - Surgery Teaching Laboratory (Wet labs). Monday 8-9 am Radiology Rounds (case-based discussion led by surgery faculty). Tuesday 8-9 am - Lameness Rounds (case-based discussion led by Sports Medicine faculty). Wednesday 8-9 am - Radiology Rounds (case-based discussion led by radiology faculty). Thursday 8-9 am - Grand Rounds (Student case presentations). Friday 8-9 am - Medicine Teaching Rounds (case-based discussion with Medicine faculty and house officers). Nursing staff performs treatments between 9am and 5pm, Monday through Friday and 6pm to 6am Monday through Thursday to allow daily student participation in surgical cases. On Fridays, students perform treatments 6am - 8pm, at 6pm and midnight. On Saturdays, students do treatments from 6am through midnight and on Sundays, from 6am through 10pm. On the last day of a rotation, students do midnight treatments. To facilitate a smooth transition to your next rotation, nursing does 6am and 8am treatments on the first day of each new rotation.

Taught by: Dr. D. Richardson and Staff
Also Offered As: VCSN 870
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours

VCSN 812 Sports Medicine/Imaging - NBC
Goals of this rotation are to provide the students with the opportunity to obtain diagnostic skills through the use of different modalities and to incorporate these techniques into the decision-making process during the diagnosis and treatment of horses with performance problems. Students in this rotation will take more responsibility for their cases and follow them through the different specialties without being drawn away to the next case in their assigned area. Each student will spend his/her time in the following areas: 1 week - Ultrasound/Cardiology. 1 week - Nuclear Scintigraphy/Radiology/MRI. 1 week - Treadmill/Podology. 1 week - Poor performance clinic (lameness) Students will be responsible for in house patient care of their designated area plus weekends. All students attend daily afternoon rounds, which demonstrate the concepts behind the different diagnostic techniques and allow students hands on experience so they can be more involved in the clinical cases over the period of the rotation. In the last week the students will each be responsible for an oral presentation of a case on which they have worked during the rotation.

Taught by: Dr. E. Davidson and Staff
Also Offered As: VCSN 872
Prerequisites: VCSN 649 Large Animal Diagnostic Imaging and VCSN 646 Equine Lameness
Activity: Clinical Rotation Dental & Vet school
10.0 Credit Hours
Notes: Limitations: Maximum of 4 students per rotation
Notes: Offered Rotations 1-8, possibly 9-10; Individual rotations in Sports Medicine Clinic, LA Radiology, LA Ultrasound and Podology are not offered during this time period. Satisfies imaging requirement: EQ, LA, FA

VCSN 814 Large Animal Radiology - NBC
In this rotation, students will gain experience in making and interpreting large animal radiographic examinations. They will assist the radiology technicians in taking and processing routine radiographs, attend film reading sessions, daily hospital rounds and review large animal radiographs independently and under supervision. Students will be required to write radiology reports.

Taught by: Dr. K. Wulster and Staff
Also Offered As: VCSN 874
Prerequisite: VCSN 649 Large Animal Diagnostic Imaging
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: 2 students/rotation. Satisfies imaging requirement: EQ, FA, LA, SALA. Note: Not offered during VCSN 812,872 Sports Medicine/Imaging
VCSN 815 Large Animal Anesthesiology Service - NBC
During the Large Animal Anesthesia Service Rotation, students will gain experience in: (1) anesthetizing equine and other farm animal patients for elective and emergency procedures; (2) alleviating pain in animals; (3) maintaining adequate vital functions during anesthesia and (4) managing fluid, electrolyte and acid-base disturbances in the perioperative period. In addition, the course offers the opportunity to apply the clinical pharmacology of perianesthetic drugs in various farm animal species. Students are requested to attend Anesthesia Service rounds on Mondays and Fridays (8:00 am) during their clinical rotation, which will also offer the opportunity to discuss anesthesia cases. Night and weekend emergency duty is mandatory and shared with veterinary technician students. The maximum emergency duty is 4 weekday nights and one 24-hour weekend day. Students are expected to report to the Sports Medicine Conference Room or Anesthesia Office promptly at 8:00 am on the first Monday morning of the 2-week rotation with scrubs, stethoscope and calculator. Students are requested to review the information contained in the class notes of the following courses for appropriate sections prior to entering the rotation: General Pharmacology and Toxicology (VBMS 607), Animal Physiology (VBMS 606), Anesthesia (VSUR 604), and the Equine and Farm Animal Anesthesia Elective (VCSN 635). Students should also be familiar with dosages of commonly used drugs and their clinical pharmacology and technical aspects of the practice of large animal anesthesia. Students may consult the learn.vet web site to find out more about Student Evaluation & Clinical Skill Assessment in this rotation. Suggested texts: Muir, W.W., Hubbel, JAE. (eds) Equine Anesthesia: Monitoring and Emergency Therapy, 2nd edn, Saunders Elsevier, St. Louis, 2009; Tranquili, W.,J.,Thurmon, J.C., Grimm, K.A. (Eds) Lumb and Jones Veterinary Anesthesia, 4th edn, Blackwell, Ames, 200 7; Doherty, T ., Valverde, A. (Eds.) Manual of Equine Anesthesia and Analgesia, Blackwell, Ames, 2006.
Taught by: Dr. B. Driessen and Staff
Also Offered As: VCSN 875
Prerequisites: Prerequisites: VCSN 635 Equine and Farm Animal Anesthesia
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: 2 students/rotation, not Early Entry. Required: EQ. Satisfies anesthesia/pain management requirement: FA, LA, SALA

VCSN 816 Food Animal Anesthesiology Service - NBC
In this rotation, students will gain experience in planning and performing sedation and anesthesia in small ruminants, swine and camelids. Specific clinical objectives during the five-day rotation include physical and chemical restraint, regional and general anesthesia techniques in various food and fiber producing animals, and operation and use of various anesthetic monitoring devices. Emphasis is on techniques and drugs commonly used in the field. Students will formulate plans for sedation and/or short term anesthesia in sheep/goats, pigs and camelids and will then carry them out on teaching animals. Techniques for regional anesthesia for flank surgery in the bovine will be performed at Marshall Dairy.
Taught by: Dr. K. Olson and Staff
Also Offered As: VCSN 876
Activity: Clinical Rotation Dental & Vet school
3.0 Credit Hours
Notes: Limitations: 2-4 students/rotation, not Early Entry. Priority: Food Animal Majors. Satisfies anesthesia/pain management requirement: FA, LA

VCSN 870 Large Animal Surgery Clinic - NBC
This is an elective clinical rotation equivalent to VCSN 800. Students electing VCSN 645 during Large Animal Block are required to take this rotation in addition to VCSN 800 in their fourth year.
Taught by: Dr. D. Richardson and Staff
Also Offered As: VCSN 800
Prerequisite: Prerequisites: Core Surgery Courses
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs. Note: This rotation is a prerequisite of VCSN645 Large Animal Surgery and Surgical Exercises

VCSN 871 Equine Surgery Clinic - NBC
This elective is specifically designed to provide students interested in equine practice after graduation with additional exposure to a variety of orthopedic and soft tissue surgical problems of horses. Students will actively participate in all aspects of lameness and soft tissue diagnosis, treatment, surgery and patient care. Teaching rounds will involve daily barn rounds, daily didactic presentations and/or wet labs covering surgical topics. Laboratories include internal fixation of fractures, wound repair, arthroscopy, intestinal surgical techniques, laser surgery, head and neck surgery, video analysis of lameness and field anesthesia. Every effort is made to have students in this course perform field castrations with local veterinarians. Students will be expected to participate in after-hours treatments and surgical emergencies of horses; however, students will not be assigned to food animal patients during this rotation.
Taught by: Dr. D. Richardson and Staff
Prerequisite: Prerequisites: VCSN 800 Large Animal Surgery-Foundation
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: 6-10 students. Priority: Equine Majors

VCSN 872 Sports Medicine/Imaging - NBC
This is an elective rotation equivalent to course VCSN 812.
Taught by Dr. E. Davidson and Staff
Also Offered As: VCSN 812
Prerequisites: Prerequisites: VCSN 649 Large Animal Diagnostic Imaging and VCSN 646 Equine Lameness
Activity: Clinical Rotation Dental & Vet school
10.0 Credit Hours
Notes: Limitations: Maximum of 4 students per rotation Notes: Offered Rotations 1-8, possibly 9-10; Individual rotations in Sports Medicine Clinic, LA Radiology, LA Ultrasound and Podology are not offered during this time period

VCSN 873 Large Animal Emergency/Critical Care Service - NBC
This rotation is designed as a supplement to the Foundation Emergency / Critical Care rotation, for students with a specific interest in this field or those desiring more large animal exposure. The format will follow that outlined for the Foundation rotation (VCSN 701), with emphasis on more advanced critical care topics. Elective students will not be required to complete a Grand Rounds presentation.
Taught by: Dr. L. Southwood and Staff
Also Offered As: VCSN 701
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
VCSN 874 Large Animal Radiology - NBC
This is an elective rotation equivalent to course VCSN 814
Taught by: Dr. K. Wulster and Staff
Also Offered As: VCSN 814
Prerequisite: Prerequisites: VCSN 649 Large Animal Diagnostic Imaging
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: 2 students/rotation. Note: Not offered during VCSN 812,872 SportsMedicine/Imaging

VCSN 875 Large Animal Anesthesiology Service - NBC
This is an elective rotation equivalent to course VCSN 815
Taught by: Dr. B. Driessen and Staff
Also Offered As: VCSN 815
Prerequisites: Prerequisites: VCSN 635 Equine and Farm Animal Anesthesia
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: 2 students/rotation, not Early Entry

VCSN 876 Food Animal Anesthesiology Service - NBC
This is an elective rotation equivalent to course VCSN 816
Taught by: Dr. K. Olson and Staff
Also Offered As: VCSN 816
Activity: Clinical Rotation Dental & Vet school
3.0 Credit Hours
Notes: Limitations: 2-4 students/rotation, not Early Entry. Priority: FA Majors

VCSN 877 Food Animal Medicine and Surgery Clinic - NBC
This elective rotation is designed to provide additional experience in food animal medicine and surgery to students who are likely to pursue bovine practice following graduation. Students will participate in the diagnosis and treatment of food animal (primarily dairy cattle) medical and surgical diseases. Teaching rounds will involve daily barn rounds, didactic presentations and wet labs covering medical and surgical topics. The emphasis will be on individual animal (as opposed to herd health) problems. Students will be responsible for after-hours treatments and emergencies of food animals only; students will not work with equine patients during this rotation. Each student will have three weeknights and one 24-hour weekend shift during the rotation (based on 8 students enrolled). Note: students that desire further experience in medical or surgical problems of all large animal species should elect either VCSN 770 or VCSN 870.
Taught by: Dr. R. Sweeney and Staff
Prerequisites: Prerequisites: Large Animal Medicine and Surgery Rotations. Additional prerequisites for non-food animal majors: VCSN 640 Large Animal Medicine, VCSN 645 Large Animal Surgery and Surgical Exercises, and VCSN 644 Large Animal Reproduction
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Maximum of 8 students, not Early Entry Priority: FA majors. First priority to students who are taking VCSN 810,880 Dairy Production Medicine Clinic

VCSN 878 Sports Medicine Clinic - NBC
The Sports Medicine Clinic provides exposure to many types of problems facing the equine practitioner, concentrating on lameness and performance evaluations. While part of the course stresses traditional lameness evaluation and clinical diagnoses, high-speed treadmill evaluations and nuclear scintigraphy enable the student to participate in more intricate problems affecting sport horses. The course will provide students with the opportunity to develop techniques of examination and diagnosis, and permit direct contact with clients. Students are expected to perform in all areas and participate to the maximum of their ability. Duties may include care and SOAPs of in patients and may include care over a weekend. There is NO emergency duty. In order to participate students are required to have satisfactorily completed the prerequisite courses.
Taught by: Dr. E. Davidson and Staff
Prerequisites: Prerequisites: VCSN 646 Equine Lameness and VCSN 649 Large Animal Diagnostic Imaging
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: 2 students/rotation. Notes: Not offered during VCSN 812,872 Sports Medicine/Imaging

VCSN 879 Equine Podology - NBC
This course covers the principles of both normal and corrective shoeing as well as examining the current theories of hoofcare. The student will attend surgery rounds beginning in radiology each morning; and work with the resident farrier and equine clinicians on the various lameness problems presented to the clinic. Foot anatomy and physiology will be stressed. While the students will not be required or expected to manually make or nail on a shoe, they will be required to participate in and observe the procedures utilized. Procedures expected of Equine veterinarians such as removing shoes and debriding the sole will be covered in detail. Additional specialties such as the application of extensions to foal hooves can be incorporated into the rotation if requested.
Taught by: P. Reilly and Staff
Activity: Clinical Rotation Dental & Vet school
2.0 Credit Hours
Notes: Limitations: 2 students/rotation. Note: Not offered during VCSN 812,872 Sports Medicine/Imaging
VCSN 880 Dairy Production Medicine Clinic - NBC
This program is an integrated curriculum sponsored by the Sections of CAHP Field Service and Reproduction as a part of the Food Animal Majors Program of the School of Veterinary Medicine. Curriculum begins with an overview of the "Economic Reality" of dairy production progressing through "Quantitative Skills" - T test, Chi Square, and Proportions; "Semien Selection" - visit stud, concepts in genetics semen selection and allocation and linear programming approaches; "Heifer Rearing" - systems view of heifer rearing, evaluation of heifer weight gain and evaluation of heifer reproduction; "Dairy Herd" - vaccination programs through body condition scoring; "Milk Quality" - principles of milking machine, procedures evaluation, mastitis control programs, DHIA, SCC monitoring programs, microbiology and quality assurance Reproduction - traditional programs, new programs and evaluation and interpretation of infertility and pregnancy loss; "Monitoring Reproduction" - current measures, heat detection, breeding intervals, developing a heat detection program; "Record Systems" - DHIA records, paper records, DAIRY COMP 305 (down loading data); "Dairy Nutrition" - ration evaluation using Spantan, interaction with reproduction, MUN interpretations; "Culling" - basic economic concepts and sample applications; "Facilities Evaluation" - ventilation and free stalls; "Computer Data Bases" - DairyL, AABPL, Merck Diagnostic Program, Cornell Diagnostic Program and Internet sites; "Laboratories" - obstetrics/fetotomy, special procedures, follow the estrus cycle in a cow (2 students/cow), milk progestrone kits and breeding soundness examination; "Herd visits with private practitioners" Students will spend 2 weeks with private practitioners participating in on-farm investigations.
Taught by: Dr. D. Galligan, M. Kristula and Staff
Activity: Clinical Rotation Dental & Vet school
24.0 Credit Hours
Notes: Limitations: 10 students. Priority: FA Majors

VCSN 881 Food Safety and Quality Assurance - NBC
The purpose of this course is to prepare the student to: 1) Identify human health hazards in food of animal origin. 2) Define some of the roles of the veterinarian in preventing/reducing the introduction of biohazards into the food chain. 3) Discuss the principles of safe food practices for both animals and humans. 4) Recognize and describe where laboratory studies (microbiology, toxicology, chemistry) would help define real or potential problems. 5) Define the appropriate times to utilize laboratory evaluations and become familiar with interpretive criteria. 6) Participate in field trips to learn about different practices and processes. Assess sites in terms of HACCP criteria. 7) Interact with representatives from local and federal agencies concerning policies, application of technology and recommendations concerning problem solving issues. 8) Discuss intervention actions that can be initiated during acts of bioagroterrorism and/or naturally-occurring disasters (using recent events as models for discussion). Case studies will be introduced as problem solving activities.
Taught by: Dr. C. Benson and Staff
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: Maximum of 10 Students. NOT OFFERED UNTIL FURTHER NOTICE

VCSN 882 Swine Production Medicine - NBC
On-farm problem solving and client communications will be emphasized in this course. Students will be required to interact with producers. Students will write a follow-up report describing the findings and recommendations from the farm visit. Each student will also be assigned a case that will require collation of careful history taking, judicial performance of diagnostic tests and critical analysis of computerized production records to reach their diagnosis. Students will visit farms and other allied industries to survey production systems and collect data to be analyzed in the course. Various production systems and cycles will be reviewed, performance targets will be explained, and their elasticity and economic prioritization will be discussed. Records and data will be analyzed and students will learn how to identify significant production deficiencies and associate these with disease processes - either non-infectious, management-related, or infectious. Strategies for dealing with specific deficiencies will be outlined and the benefits of intervening to improve productivity will be compared to the costs of disease and used in developing a recommendation for action by the producer.
Taught by: Dr. M. Pierdon and Staff
Activity Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: 2-6 students. Note: Students are required to have no other contact with swine for the duration of the course

VCSN 883 Advanced Swine Production Medicine - NBC
A new role for swine veterinarians is emerging in large scale swine production. So-called "corporate veterinarians" are employed by a single company and have the challenge of overseeing the production and health care concerns of the animals owned or managed by their employer. This course provides students with the opportunity to gain exposure to this emerging discipline in swine veterinary medicine. Principles of epidemiology, economics and health care delivery systems and their application to optimizing swine health and production will be provided. Students will work closely with selected professionals who are in a leading role in defining the veterinarians place in large scale, vertically integrated swine production. This course extends the offerings in VCSN 882. Students will be expected to complete a small project or investigation during their visit.
Taught by: Dr. G. Althouse and Staff
Prerequisites: Prerequisites: VCSN 882 Swine Production Medicine and permission of instructor.
Activity Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Note: Students are required to have no other contact with swine for the duration of the course.
VCSN 884 Swine Production - NBC
Veterinarians today cannot make useful contributions to the swine industry without an intimate understanding of swine production. The successful practice of modern swine production medicine depends on the ability of the veterinarian to interweave their traditional training in medicine with the intricacies of swine husbandry. This course provides students with the opportunity to gain hands-on experience in modern swine production systems and/or swine production medicine practices. Students will learn through immersion the basic management, husbandry and/or production medicine practice by working with a practice or a farm in specific phases of swine production at a few selected, nationally recognized swine companies. Permission of instructors required.
Taught by: Dr. G. Althouse and Staff
Prerequisites: Prerequisites: VCSN 882 Swine Production Medicine and permission of instructor.
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Note: Students are required to have no other contact with swine for the duration of the course

VCSN 885 Equine Ophthalmology - NBC
This course is designed to provide students with ophthalmology experience to supplement what they obtain in the Large Animal Medicine foundation rotation, and, if taken, the Small Animal Ophthalmology elective. It is intended both for students with a special interest in ophthalmology, to broaden their exposure to include equine ophthalmology, and for equine students, to provide them with ophthalmology training that will benefit their equine patients in either general or specialty practice. This latter is particularly important given that most equine students do not take the Small Animal Ophthalmology elective and so graduate without clinical ophthalmology experience. Students will participate in the diagnosis and treatment of clinical ophthalmology cases in the hospital. Students will assist with evaluation of new cases, both inpatient and outpatient, and will be responsible for the daily treatment and examination of all hospitalized ophthalmology cases. Students will handle communication with clients and construct discharge summaries when appropriate. Exposure will vary due to fluctuations in case load. Organized laboratories in slit-lamp biomicroscopy, indirect ophthalmoscopy, and tonometry will allow the student to become comfortable with ophthalmic diagnostic techniques. If time permits, cadaver labs on lid laceration repair, supalpebral lavage placement and enucleation will be available. On-call, weekend, and night duty are required. Students will be required to give a 15 minute presentation during the rotation on a topic relevant to equine ophthalmology, such as corneal stromal abscess, eosinophilic keratitis, equine cataract, equine glaucoma, or Equine Recurrent Uveitis.
Taught by: Dr. N. Scherrer and Staff
Prerequisite: Prerequisites: Completion of Large Animal Medicine rotation
Activity: Lecture
6.0 Credit Hours
Notes: Limitations: This rotation offered two times throughout the year, with a maximum of three students per rotation. No minimum. Priority: The course is open to any student wishing to obtain more ophthalmology experience. A lottery may be necessary if interest exceeds availability

VCSN 890 Large Animal Medicine and Surgery Holiday Emergency Rotation - NBC
Students will assist emergency clinicians and house officers in history taking, examinations, and the medical and surgical management of large animal patients presented on an emergency basis to the hospital at New Bolton Center. Students will also be responsible for the care and treatment of medical and surgical patients hospitalized at New Bolton Center. This rotation will consist of two 12-hour shifts per day including the weekends and any holidays (example Christmas and New Years Day). All students will be expected to participate in night, weekend, and holiday duty on a rotating basis. Students in this rotation will be responsible for five 12-hour shifts each during the one-week rotation. Students are expected to be on the premises during their duty shifts. Rounds to acquaint students with the hospitalized patients will be held daily during each shift with the emergency clinician/house officer/nursing staff on duty, but no formal teaching or Grand Rounds will occur during this rotation.
Taught by: Dr. B. Dallap Schaer and Staff
Activity: Clinical Rotation Dental & Vet school
3.0 Credit Hours
Notes: Limitations: preferred minimum 14 students / rotation

Veterinary Clinical Studies - Surgery Courses (VSUR)

VSUR 601 Surgical Principles
This Core lecture/laboratory/computer course emphasizes the basic principles of surgery and the application to surgical diseases of domestic animals. Attendance at laboratories for this course is mandatory. Missed laboratories will result in the grade of Incomplete for the course. Missed laboratories will be made up during the next time the missed laboratory becomes available. Clinical Exercises, Course VSUR 602, in Quarter 1 cannot be taken until all course requirements for Surgical Principles have been completed.
Taught by: Drs. M. Ross, Ortved and Staff
Activity: Lecture
4.0 Credit Hours

VSUR 602 Clinical Exercises
Taught by: Dr. D. Holt & Dr. G. Gianotti and Staff
Prerequisites: Prerequisites: Passing grades in VSUR 601 Surgical Principles and VSUR 604 Anesthesia
Activity: Lecture
1.0 Credit Hour

VSUR 603 Clinical Orthopedics
This course presents the basic principles of orthopedic surgery and orthopedic disease. Course material includes small animal orthopedics, large animal orthopedics and orthopedic radiology. Laboratories include two radiograph reading sessions, one splint lab, and a lab pining and wiring plastic bones.
Taught by: Dr. K. Agnello and Staff
Activity: Lecture
4.0 Credit Hours
**VSUR 604 Anesthesia**

This course reviews basic physiologic and pharmacologic aspects and their relationship to clinical application of general anesthesia. Uptake of anesthetic agents and distribution to various organ systems are discussed as are the changes in acid-base balance produced by the state of anesthesia. Effects of anesthesia on pulmonary gas exchange and cardiovascular function are emphasized. The clinical aspects of pre-anesthetic medications, the choice of anesthesia, equipment and techniques, cardiopulmonary resuscitation, and the management of specialized cases are discussed. One progressive examination is given, and the final exam is comprehensive.

Taught by: Dr. J. Pavez and Staff  
Activity: Lecture  
5.0 Credit Hours

---

**VCSP 632 Diagnosis of Common Veterinary Intoxications**

This course is designed to provide the future veterinarian with the tools to evaluate, diagnose, and treat captive reptiles and amphibians in clinics and beyond. Although the course will mainly focus on common psittacine species kept as pets, information on columbiform and passerine species will be provided as well. Topics covered will include pet parrot taxonomy, husbandry, nutrition, clinical examination, common infectious diseases, and practical diagnostic and surgical techniques. The final grade is based on attendance (students with 3 unexcused absences will receive a penalty to their grade) and completion of an in-class final examination. Submission of a course evaluation at the end of the course is required for a grade.

Taught by: Dr. N. Wyre and Staff  
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses  
Activity: Lecture  
2.0 Credit Hours

---

**VCSP 633 Fundamentals of Animal Behavior**

This course is foundational for students enrolling in the Animal Welfare and Behavior Certificate Program and provides students with the fundamental tools to interpret the behavior of small (companion) and large (farm) animals, poultry, and laboratory animals. Specifically, the course will cover: The anatomy and physiology that regulate behavior, its modification through learning, and animal cognition. The evolution and individual development of a behavior, including the analysis of its mechanism, adaptive value, ontogeny, and phylogeny. The ecology of domestic and laboratory animals: environmental needs, body care, locomotion and exploration. The social behavior of domestic and laboratory animals: affiliative and aggressive behavior, body language. The reproductive and maternal behavior of domestic and laboratory animals.

Taught by: Dr. Carlo Siracusa and Staff  
Prerequisites: Any student accepted for enrollment in the Animal Welfare and Behavior Certificate Program (a Bachelor's degree is required and a background in biology or animal science is preferred.)

Activity: Online Course  
1.0 Course Unit

Notes: Limitations: 20-25 students. At present this online course will not be formally offered to UPenn VMD students.

---

**VCSP 630 Hematopoiesis**

This course aims to correlate clinical and basic science in comparative hematology. Faculty from the Veterinary and Medical Schools will present recent developments in clinical medicine and basic research of disorders of blood cells, including transfusion medicine, erythrocyte defects, myelodysplasia, transplantation, cytokines, etc. Informal lecture presentations will allow for ample discussions with instructors. Attendance, participation in class and a paper on a suitable topic of hematology submitted at the end of the course will make up part of the grade for this course. The written review and discussion of an original study paper will serve also as one of the clinical competency requirements.

Taught by: Dr. U. Giger and Staff  
Prerequisites: Prerequisites: 1st and 2nd year core courses  
Activity: Lecture  
2.0 Credit Hours

Notes: NOT OFFERED DURING 2017-2018

---

**VCSP 635 Introduction to Companion Avian Medicine**

This course is designed to provide the future veterinarian with the tools to evaluate, diagnose, and treat pet avian species in clinics and beyond. The course will mainly focus on common psittacine species kept as pets, information on columbiform and passerine species will be provided as well. Topics covered will include pet parrot taxonomy, husbandry, nutrition, clinical examination, common infectious diseases, and practical diagnostic and surgical techniques. The final grade is based on attendance (students with 3 unexcused absences will receive a penalty to their grade) and completion of an in-class final examination. Submission of a course evaluation at the end of the course is required for a grade.

Taught by: Dr. N. Wyre and Staff  
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses  
Activity: Lecture  
2.0 Credit Hours

---

**VCSP 636 Introduction to Reptile and Amphibian Medicine**

This course is designed to provide the future veterinarian with the tools to evaluate, diagnose, and treat captive reptiles and amphibians in clinics and private practice, zoological institutions, and herpetological collections. This course will focus on the more common species kept as pets. Topics covered will include captive husbandry, basic herpetology, nutrition, clinical examination, common infectious and noninfectious diseases, surgery and anesthesia, diagnostic and treatment techniques. The final grade is based on attendance (students with 3 unexcused absences will receive a penalty to their grade) and completion of an in-class final examination. Submission of a course evaluation at the end of the course is required for a grade.

Taught by: Dr. L. Latney and Staff  
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses  
Activity: Lecture  
2.0 Credit Hours
VCSP 637 Professional Foundations
Includes: 1) making the transition from student to employed veterinarian (resumes, cover letters/letters of intent, interviews, and job selection); 2) personal finance and investment strategies; 3) negotiation skills; 4) stress management; 5) evaluating disability insurance and understanding basic retirement planning options to know what to ask in an interview as part of your benefit plan; 6) time management & goal planning and 7) workshops on obtaining internship or a residency, and (b) Interview Role-Playing/Communication skills. Students are required to submit detailed personal budgets for their first year after graduation and a typewritten resume or curriculum vitae. To receive an "A" students also must submit a 3-year personal, professional, and financial plan. Course notes will be distributed at the first class session.
Taught by: Dr. M. Bryant and Staff
Activity: Lecture
2.0 Credit Hours

VCSP 638 Legal Issues for Veterinarians
Course is a broad overview of the legal issues veterinarians face on a daily basis, including legal constraints on practice; overview of laws regulating animals (including laws specific to Pennsylvania); divorce and custody battles; illegal drug compounding; internet pharmacies; lemon laws; pet health insurance; vaccination and liability; negotiating and understanding the employment relationship; veterinary malpractice and state board investigations; responding to client complaints; importance of medical records/informed consents; and, applied professional ethics with clients and colleagues including study of social media. A course hand-out will be provided. Testing of students will be through the use of 2 homework assignments. Attendance mandatory.
Taught by: Dr. C. Lacroix and Staff
Activity: Lecture
2.0 Credit Hours

VCSP 639 Animals & Society
This course is a foundational course for students enrolling in the Animal Welfare Certificate Program. It will describe the changing roles and status of animals in society, and examine the history of human-animal relationships through the lens of subsistence hunting, animal domestication, farming and pastoralism, animal research, and pet keeping. The historical development of ambivalent/oppositional attitudes to animal exploitation will also be described and discussed, and the remarkable diversity of contemporary human-animal relationships and their impacts on animal welfare will be explored across cultures and contexts. The influence of science, government, business, and non-governmental organizations in defining and influencing animal-related laws and policies will also be addressed.
Taught by: Dr. James A. Serpell and Staff
Prerequisites: Any student accepted for enrollment in the Animal Welfare and Behavior Certificate Program (a Bachelor's degree is required and a background in biology or animal science is preferred).
Activity: Online Course
1.0 Course Unit
Notes: Limitations: 20-25 students. At present this online course will not be offered to UPenn VMD students.

VCSP 642 Topics in Neurology
This seminar series will stress broad topics, the majority to be selected by the students, which relate to clinical neurology or neuroscience in general. Seminar topics will be selected and presented by students. The course grade (Pass/Fail) is based on class participation.
Taught by: Dr. C. Vite and Staff
Prerequisites: Prerequisites: 1st, 2nd, 3rd Year Core Medicine Courses
Activity: Lecture
2.0 Credit Hours
Notes: Limitations: Min. 8 students; Max. 20 students. CONFLICT: Possible conflict with VPTH641 Laboratory Animal Medicine

VCSP 643 Small Animal Clinical Nutrition
The first half of the small animal nutrition course will be devoted to: (1) information on feeding normal dogs and cats for maintenance and the prevention of disease and (2) the pet food industry, including labeling, regulation and laboratory on the evaluation of pet foods. The second half of the course will examine the role of dietary manipulation in the management of a wide variety of canine and feline diseases. The course format utilizes a combination of individual and group exercises, discussion, cases, and lectures some of which will require preparation outside of scheduled class time. Grading will be pass/fail and based on attendance, class participation and an individual take-home project.
Taught by: Dr. K. Michel and Staff
Prerequisite: Prerequisites: Core Nutrition Course
Activity: Lecture
2.0 Credit Hours

VCSP 644 Small Animal Surgery
This course will cover selected topics of advanced surgical procedures in dogs and cats. Emphasis will be given to diseases and conditions where treatment usually requires elaborate procedures. Material presented will involve most major organ systems such as the gastrointestinal tract, the respiratory tract and the urogenital tract. Furthermore, the skin, the endocrine system, and the peritoneal and pleural cavities will be given special consideration. Minimally invasive surgery as well as advanced surgical tools and equipment will also be discussed. The course will be restricted to what is generally understood as soft tissue surgery.
Taught by: Dr. L. Aronson and Staff
Activity: Lecture
3.0 Credit Hours
VCSP 647 Small Animal Surgery/Anesthesia Laboratory
The class is divided into 2 groups. Building on the Core Anesthesia and Surgery laboratory course, this course provides the student with experience as assistant surgeon, surgeon and anesthetist while performing exploratory laparotomy and hysterectomy in cats. The cats are provided by an animal shelter and are returned to the shelter for adoption following surgery. Students enrolled in the course, working in teams of three, are responsible for examination and veterinary care (under supervision) at least daily while the cats are in the Veterinary School. There are two additional laboratory sessions. One is a session during which enterotomy, intestinal anastomosis and other soft-tissue procedures will be performed by each student on tissues. The other is an orthopedic procedure session during which pinning and plating techniques are performed by each student on models. There is a mandatory orientation session on the Wednesday prior to the first laboratory session. Students cannot advertise any Spay or Neuter teaching animal used in this course on any website or any social network as this is considered as a violation of the School's Honor Code.
Taught by: Dr. J. Runge and Staff
Prerequisites: Prerequisites: Passing grade in Core Surgery and Anesthesia Courses
Corequisite: Postrequistes: Students taking this course must take Small Animal Orthopedic Surgery Rotation VCSP 811 or VCSP 871
Activity: Lecture
2.0 Credit Hours
Notes: Limitations: No Add/Drop period; max. of 24 students

VCSP 648 Small Animal Anesthesia
This lecture and discussion course will stress the application of physiology, pharmacology, clinical pharmacology, and economics to the problems encountered during the clinical administration of anesthesia. 
Taught by: Dr. Juan Pavez and Staff
Prerequisite: Prerequisites: VSUR604 Anesthesia
Activity: Lecture
1.0 Credit Hour

VCSP 649 Emergency/Critical Care Medicine
Small group case-based discussions pertain to the clinical evaluation and management of small animal emergency and critical care patients. Life-threatening abnormalities of the nervous, cardiovascular, respiratory, endocrine, gastrointestinal, and urinary systems are presented in a problem-oriented manner. Actual clinical case material is used to illustrate principles with emphasis placed on the physiology and pathophysiology of the presenting problem. Monitoring and therapeutic procedures (both conservative and non-conservative) will be presented. The grade will be based on a final examination given to small groups at the end of the course. The examination will be a clinical problem similar to all the other clinical problems presented in the course. Everyone in the same group will receive the same grade.
Taught by: Dr. E. Reineke and Staff
Prerequisites: Prerequisites: 1st, 2nd and 3rd Year Core Courses
Activity: Lecture
3.0 Credit Hours

VCSP 650 Small Animal Dentistry and Oral Surgery
Building on the dentistry and oral surgery information presented in VMED611, Med/Surg I, the lectures cover the spectrum of dental and oral diseases and procedures seen and practiced in small animals. The course is integrated with oral surgery lectures presented in VCSP 648, Small Animal Surgery elective. Although there are normally no laboratory practice sessions included in this course, laboratory practice sessions based on material in this course are included in the Small Animal Dentistry and Oral Surgery clinical rotation (VCSP 817,VCSP 877).
Taught by: Dr. A. Reiter and Staff
Prerequisites: Prerequisites: Core Medicine and Surgery Courses
Activity: Lecture
2.0 Credit Hours

VCSP 651 Practice Management
Includes establishing a realistic fee schedule; effectively marketing veterinary services; determining how much income a practice owner really makes; the veterinary client's perception of value; establishing a small or mixed animal practice; medical records as a legal defense and to generate income; understanding the vet-pet-client relationship to develop a bond-centered practice; introduction to personnel management and employment law; understanding the Internal Revenue Code, the payment of taxes, and the need for a schedule C to reduce one's tax liability; successfully organizing one's basic business management strategies; and marketing veterinary services. A 300-page notebook and 150 page hard cover book entitled The Art of Veterinary Practice Management will accompany this course and be provided at no charge by a corporate sponsor. The final examination consists of a group project to be completed by 2-4 people using a typical practice management "headache" as the problem to be resolved. Four guest speakers will participate in this course.
Taught by: Dr. D. Eigner and Staff
Activity: Lecture
3.0 Credit Hours

VCSP 652 Introduction to Shelter Animal Medicine
This course is designed to complement the senior year Shelter Animal Medicine rotation by introducing students to some of the particular problems and issues facing veterinarians who work with animal shelters and animal control facilities. The course will combine lectures and discussion periods, and will involve significant out-of-course reading assignments. Topics covered will include: Husbandry and disease management, pet population dynamics and control, behavior and behavior problems, feral cats, and animal cruelty & neglect. Course grades will be determined by attendance, participation in discussions and a final take home exam.
Taught by: Dr. B. Watson and Staff
Activity: Lecture
2.0 Credit Hours
Notes: CONFLICT: VPTH 635 Introduction to Fish Diseases
VCSP 654 Small Animal Critical Care Medicine
This course offers a comprehensive overview of several key aspects of critical care medicine. Lectures will primarily use a “case-based” approach with discussion of the physiology of organ function and the pathophysiology of disease, and will highlight state-of-the-art concepts for these exciting patients. The final session will be a “hands-on” laboratory in which the students will work with the monitoring instruments that have been discussed during the course. Evaluation will be based on a take home examination.
Taught by: Dr. D. Silverstein and Staff
Prerequisites: Prerequisites: Core Medicine and Surgery Courses
Activity: Lecture
2.0 Credit Hours

VCSP 655 Introduction to Wildlife Medicine I
This course is designed to provide an overview of the field of wildlife medicine for first year veterinary students through lectures from veterinarians working in various aspects in wildlife medicine. Wildlife Medicine I will present current issues in environmental monitoring, emerging diseases and public health, disease surveillance and prevention, disease outbreaks and control, captive propagation and species reintroduction, disaster medicine, and wildlife rehabilitation.
The format will consist of eight lectures, each approximately one hour in length, and a required two-hour wet lab held at Tri-States facility, the Frink Center for Wildlife in Newark, DE. Optional lectures may be scheduled during the semester based on student interest and speaker availability.
Students are expected to attend all required lectures and participate in the wet lab to receive credit for the course. Grades will be based on attendance (50%) and on three worksheets (50%); a five-page paper may be substituted with the approval of the instructor. Opportunities for clinical experience at the Frink Center for Wildlife will be scheduled during the semester; students are expected to sign up in advance and are responsible for their own transportation.
Taught by: Dr. S. Welte and Staff
Activity: Lecture
1.0 Credit Hour
Notes: Note: This course is a prerequisite for Course VCSP 656 Introduction to Wildlife Medicine II. This course is graded Pass/Fail

VCSP 656 Introduction to Wildlife Medicine II
This course is designed to provide an introduction to the clinical aspects of wildlife medicine for first year veterinary students through a lecture and wet lab format. Lecture and/or laboratory topics will include zoonotic diseases, diseases of native mammals, marine mammals, reptiles and birds; pathology, physical examination techniques, and introductions to necropsy techniques, fracture immobilization, and emergency care.
The format will consist of six lectures, each approximately one hour in length, and three two-hour wet labs. Optional lectures may be scheduled during the semester based on student interest and speaker availability. Students are expected to attend all lectures and participate in the wet labs to receive credit for the course. Grades will be based on attendance (50%) and on three worksheets (50%); a five-page paper may be substituted with approval of the instructor. Opportunities for clinical experience at the Frink Center for Wildlife will be scheduled during the semester; students are expected to sign up in advance and are responsible for their own transportation.
Taught by: Dr. S. Welte and Staff
Prerequisite: Prerequisite: VCSP 655 Introduction to Wildlife Medicine I
Activity: Lecture
1.0 Credit Hour
Notes: Limitations: Maximum of 72 students. This course is graded pass/fail. Note: In case of over enrollment, permission of course organizer is required

VCSP 657 Case Studies in Exotic Companion Animals
This course is designed to allow the student to use what they have learned about special species and put all of the information together to work through a clinical case. The first three weeks will be spent discussing topics in special species medicine. Week one will include ethical dilemmas in special species medicine. The second and third week will be reviewing and critiquing journal articles in special species medicine. Thereafter, each week, a case history will be posted on the course website and the students will come to class to discuss that case. The course instructor will lead the discussions including how to ask the correct history questions and how to interpret the physical examination findings. The class will decide on rule outs, diagnostic testing, and treatment options. During the second to last class, the students will be divided into groups and will be given an unknown case to work out on their own. At the last class meeting, each group will present their findings. Attendance is mandatory since this is a case-discussion class. Missed classes cannot be made up; for each missed class the grade will be lowered. Grades will be based on attendance and participation in the unknown case presentation.
Taught by: Dr. N. Wyre and Staff
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses
Activity: Lecture
2.0 Credit Hours
Notes: Limitations: Limited to 20 students

VCSP 658 Pet Small Mammal Med/Surg
This introductory course will mainly cover pet rabbits and ferrets with some discussion of rodents and other small mammals seen in veterinary practice. Husbandry, physical examination, diagnostic testing, and treatment approaches of these animals will be presented. The most common health problems and surgeries will be discussed. After this course, the student should be better prepared to see these patients during their clinical rotations and in practice. Student evaluation will be based on a final exam.
Taught by: Dr. L. Latney and Staff
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses
Activity: Lecture
2.0 Credit Hours

VCSP 659 Small Animal Advanced Cardiology
This course will build on the core cardiology curriculum by introducing a wider range of topics involving cardiovascular disease, treatment, and research in small animals. In-depth topics include diagnosis and treatment of cardiac arrhythmias, correction of congenital heart defects using minimally invasive catheter-based therapies, echocardiography of feline cardiomyopathy, clinical pathophysiology of degenerative mitral valve disease, and a review of the clinical trial evidence that forms the basis of standard treatment recommendations for congestive heart failure. The course is designed for a relatively small number of students so that discussion and interaction with the instructor(s) is facilitated. The course is suitable for students that might be interested in cardiology specialization or research careers as well as for future general practice veterinarians that wish to provide a high level of cardiac care for their patients.
Taught by: Dr. M. Oyama and Staff
Activity: Lecture
1.0 Credit Hour
Notes: Maximum enrollment 20 students
VCSP 660 Advanced Small Animal Electrocardiography and Arrhythmias
This course will build on the core cardiology curriculum by providing practical experience involving electrocardiographic (ECG) interpretation and the diagnosis and treatment of cardiac arrhythmias in small animals. Specific topics include diagnosis of both supraventricular and ventricular arrhythmias as well as proper selection of antiarrhythmic therapy and a introduction to artificial pacemaker implantation. The course is designed for a relatively small number of students so that discussion and interaction with the instructor(s) is facilitated. The course includes 6 hours of laboratory where students will work through ECG cases in a small group setting. The course is suitable for students that might be interested in cardiology specialization as well as for future general practice veterinarians that wish to provide a high level of cardiac care for their patients.
Taught by: Dr. M. Oyama and Staff
Activity: Lecture
2.0 Credit Hours

VCSP 664 Student Shelter Opportunities
This course is an introduction to High Quality High Volume (HQHV) surgery in the shelter environment and consists of 17 online lecture hours and 3 hours of in-person lecture hours of material that utilizes the Association of Shelter Veterinarians' Veterinary Medical Care Guidelines for Spay-Neuter Programs. Lecture topics, assignments, and pre/post tests are delivered online and include an overview of HQHV surgery, patient handling, anesthesia and pain management in the shelter environment, partner protocols, patient monitoring, patient pre-surgical preparation, basic surgical principles, sterilization of the male and female cat, and sterilization of the male and female dog. In-person lecture and discussion sessions will complement and expand upon online material. The lab component of this course consists of four hours of skills lab and 16 hours in a clinical setting with shelter medicine faculty participating in perioperative activities, which include physical exam, induction, patient preparation, surgery, and recovery. Emphasis in this course is a holistic approach to HQHV spay/neuter including pre-clinical skill acquisition that also introduces some concepts of shelter medicine and community programming. Grading is pass/fail. Purchase of an online webtext is required. Curriculum/course to cover high-quality, high-volume surgical and anesthetic principles to properly prepare students for not only these experiences, but give them a better foundation for learning life-long skills and enhancing their surgical experience at Penn via authentic learning experiences. Students will have to complete extensive online learning, assessments, and skills labs for this course.
Taught by: Dr. Brittany Watson and Dr. Chelsea Reinhard
Activity: Lecture
3.0 Credit Hours

VCSP 667 Student Shelter Opportunities II
This course is designed to be a continuation of Shelter Surgical Opportunities I and consists of six hours of online lectures/exam that cover inhalant anesthesia, more advanced knots and suture patterns, sterilization of the female cat, special sterilization cases, emergency procedures in the shelter environment and surgical instruments and pack preparation. Eighteen hours of on-site work at a partner shelter will be devoted to learning to spay and participation in peri-operative activities. Lecture topics, assignments, and pre/post tests are delivered online. Emphasis in this course is a holistic approach to HQHV spay-neuter including pre-clinical skill acquisition that also introduces some concepts of shelter medicine and community programming. To be eligible to spay, students must reach an appropriate level of competency at performing feline castration and clinical skills as determined by course instructors. This course can be taken any time, including the summer, after passing Student Shelter Opportunities I. Students must complete VSUR601 Surgical Principles (offered as part of the core curriculum in the first quarter of second year) before attending the skills lab. Grading is pass/fail and must be completed by end of core.
Taught by: Dr. Brittany Watson
Prerequisites: Prerequisites: VSUR 601 Surgical Principles, Shelter Surgical Opportunities I, Castration Certification
Activity: Lecture
1.0 Credit Hour
Notes: Ongoing (must be completed before end of core)

VCSP 668 Student Shelter Opportunities III
This course is designed to be a continuation of Student Shelter Opportunities II and is an advanced elective that consists of four hours of didactic instruction that will be offered online covering sterilization surgeries of adult and pediatric dogs as well as specialty surgeries such as enucleation, amputation, wound repair and mass removal. Twenty hours of a skills lab and on-site work at a partner shelter will be devoted to learning to spay, neuter, and participate in perioperative activities. Lecture topics, assignments, and pre/post tests are delivered online. Emphasis in this course is a holistic approach to HQHV spay-neuter including clinical skill acquisition that also introduces some concepts of shelter medicine and community programming. To be eligible to spay and neuter dogs or do specialty procedures, students must reach an appropriate level of competency in performing the feline spay, feline castration, and clinical skills as determined by course instructors. Every effort will be made to allow students to meaningfully participate in non-sterilization surgeries such as mass removal, enucleation, amputation and wound repair after they are spay certified, although achievement of this goal may require an on-call option depending on caseload and individual student interest. This course can be taken any time, including the Summer, after passing Student Shelter Opportunities II and grading is pass/fail.
Taught by: Dr. Brittany Watson
Prerequisites: Prerequisites: Student Shelter Opportunities II, VSUR601 Surgical Principles
Activity: Lecture
1.0 Credit Hour
Notes: Ongoing (must be completed before the end of core)
VCSP 700 Small Animal Internal Medicine—Foundation
The Internal Medicine rotation involves clinical training in all core medicine disciplines including endocrinology, gastroenterology, hematology, infectious disease, nephrology, oncology and pulmonary medicine. Fourth year students will assist doctors in history taking, physical examinations and the medical management of patients presented to the Matthew J. Ryan Veterinary Hospital of the University of Pennsylvania. Students will also have directed supervision on nutritional aspects of internal medicine cases by a board-certified clinical nutritionist. Emphasis will be placed on problem solving, understanding of pathophysiology and integration and utilization of principles of medicine. As experience is gained, students will assume more responsibility in patient management. Students and staff will participate in daily rounds and conferences.

Taught by: Dr. M. Rondeau and Staff
Activity: Clinical Rotation Dental & Vet school
12.0 Credit Hours

VCSP 710 Small Animal Internal Medicine
Fourth year students will assist the faculty and house officers in history taking, physical examination, and medical management of patients presented to the Matthew J. Ryan Veterinary Hospital of the University of Pennsylvania. Clinical teaching will emphasize a problem-solving approach to disease associated with the endocrine, gastrointestinal, hematologic, pulmonary and urogenital systems. Interpretation of clinical pathology data will be an integral part of this exercise. As experience is gained, the student will assume more responsibility in patient management. Students, faculty and house officers will participate in medicine rounds and conferences on a daily basis.

Taught by: Dr. M. Rondeau and Staff
Also Offered As: VCSP 770
Prerequisite: Prerequisites: VCSP 700 Small Animal Internal Medicine—Foundation
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Required: SA

VCSP 712 Small Animal Intensive Care Medicine Service
The ICU rotation provides a good medical approach to the management of critical and often very unstable patients. Since these cases are often very challenging diagnostically, and also very dynamic, they provide an excellent learning experience, with ample opportunity for one-on-one discussion with the clinician, and for background reading. Students have an opportunity to become familiar with use and interpretation of the advanced technical equipment available in the ICU, and are also encouraged to perform and perfect technical skills such as catheterization of blood vessels and urinary bladder, obtaining arterial blood samples, etc. During the rotation, we encourage integration and a team approach among the students, the ICU clinicians, and the nursing staff. Students on the ICU service start daily at or before 7:00 a.m., and stay until their cases are stable and all of the proposed diagnostics have been completed (usually 6-7 p.m.). Students are expected to SOAP the cases daily including weekends, to be closely involved in decision-making, diagnostics and therapeutics, and to present and discuss the cases at daily rounds. Students are internally scheduled to assist in treatments in the Intensive Care Unit; patient care shifts may include evening and overnight responsibilities. Weekend duties are distributed equitably among all assigned students. Cage rounds are held daily at approximately 2 PM. Student teaching rounds are held most weekdays at approximately 2.30 PM.

Taught by: Dr. D. Silverstein and Staff
Also Offered As: VCSP 772
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: 3-4 students per rotation. Required: SA

VCSP 715 Small Animal Cardiology Service
Students will participate in outpatient and inpatient cardiovascular examinations and treatments. Cardiology Clinic days are currently Wednesday/Thursday/Friday, but are subject to change. Cardiology invasive procedures are performed on Tuesdays. Cardiology also provides consultation to other services and accepts transfer of Cardiology cases for primary care. Student responsibilities include obtaining a complete medical history and performing a thorough physical examination with emphasis on the cardiovascular system. After an orientation period on the first day, students are responsible for recording and interpreting electrocardiograms as well as interpreting thoracic radiographs and pertinent clinical laboratory data. Students assist with recording echocardiograms and are expected to become familiar with echo image recognition and common measurement techniques. Students are also expected to summarize pertinent findings in cases under their care at daily rounds and be able to discuss their significance. Completion of the medical case record for review by the attending cardiologist is required. The group captain will develop a schedule for the daily examination and morning treatments (seven days/week) of all hospitalized cases for which the cardiology service is responsible. A quiz is administered the morning treatments in the Intensive Care Unit; patient care shifts may include evening and overnight responsibilities. Weekend duties are distributed equitably among all assigned students. Cage rounds are held daily at approximately 2 PM. Student teaching rounds are held most weekdays at approximately 2.30 PM.

Taught by: Dr. M. Oyama and Staff
Also Offered As: VCSP 775
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Note: satisfies requirement: SALA. Required: SA
VCSP 710 Small Animal Internal Medicine—Clinic
This elective rotation in small animal internal medicine will provide further contact and experience in problems of internal medicine (diseases of the endocrine, gastrointestinal, hematologic, pulmonary, and urogenital systems). Students in the elective rotation will be assigned more complex cases, and they will be expected to assume more responsibility for patient management and decision-making. Taught by: Dr. M. Rondeau and Staff
Also Offered As: VCSP 710
Prerequisite: Prerequisites: VCSP 700 Small Animal Internal Medicine—Foundation
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 772 Small Animal Pediatrics/Genetics/Reproduction
The Small Animal Pediatrics-Genetics-Reproduction Clinic is run under the supervision of two board-certified faculty and two residents and emphasizes the unique care of pediatric patients, the approach and management of hereditary diseases, and reproductive problems. Pediatric and genetics clinics are held on Mondays and Tuesdays, and reproduction appointments are seen any day of the week. In addition to the clinical appointments, there is opportunity to see several unique genetic diseases in dogs and cats and handle the youngest of pediatric patients in the animal colonies, as well as get an appreciation for the specialty diagnostic laboratories. The clinical rotation deals with the initial yet crucial pediatric wellness visits including nutrition, socialization and preventive care and disease issues specific to this age group. The clinic highlights the evaluation of normal development and diagnosis of diseases of puppies and kittens (<1 year). Moreover, kittens and puppies with known or suspected inherited disorders are examined for which genetic counseling or special diagnostic studies are required. It provides experience with routine immunizations, treatment and prevention of parasitism, and nutritional and spay/neuter counseling. The reproductive clinic involves the evaluation of healthy and infertile animals, as well as breeding management and counseling. Clinical activities include breeding timing, planned and emergency Cesarean sections and neonatal resuscitation, transcervical and surgical inseminations, diagnostic imaging studies of both male and female animals, which includes pregnancy determination, and semen freezing and banking. While the rotation officially only runs on Mondays and Tuesdays, students are welcome and encouraged to assist with the reproductive clinic during the rest of the week.
Taught by: Dr. M. Casal and Staff
Also Offered As: VCSP 782
Activity: Clinical Rotation Dental & Vet school
2.0 Credit Hours
Notes: Required for: SA; Recommended for SALA

VCSP 772 Small Animal Pediatrics/Genetics/Reproduction
The Small Animal Pediatrics-Genetics-Reproduction Clinic is run under the supervision of two board-certified faculty and two residents and emphasizes the unique care of pediatric patients, the approach and management of hereditary diseases, and reproductive problems. Pediatric and genetics clinics are held on Mondays and Tuesdays, and reproduction appointments are seen any day of the week. In addition to the clinical appointments, there is opportunity to see several unique genetic diseases in dogs and cats and handle the youngest of pediatric patients in the animal colonies, as well as get an appreciation for the specialty diagnostic laboratories. The clinical rotation deals with the initial yet crucial pediatric wellness visits including nutrition, socialization and preventive care and disease issues specific to this age group. The clinic highlights the evaluation of normal development and diagnosis of diseases of puppies and kittens (<1 year). Moreover, kittens and puppies with known or suspected inherited disorders are examined for which genetic counseling or special diagnostic studies are required. It provides experience with routine immunizations, treatment and prevention of parasitism, and nutritional and spay/neuter counseling. The reproductive clinic involves the evaluation of healthy and infertile animals, as well as breeding management and counseling. Clinical activities include breeding timing, planned and emergency Cesarean sections and neonatal resuscitation, transcervical and surgical inseminations, diagnostic imaging studies of both male and female animals, which includes pregnancy determination, and semen freezing and banking. Taught by: Dr. C. Cain and Staff
Also Offered As: VCSP 776
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Maximum 5-6 students per rotation

VCSP 771 Comprehensive Cancer Care Service
This rotation will expose students to a comprehensive approach to clinical oncology in small animals, including cancer diagnosis, staging, treatment, and palliative care. This service is primarily comprised of faculty and staff from Medical Oncology, Surgery, and Radiation Oncology. Other services, such as Interventional Radiology and Dentistry and Oral Surgery, will also be involved. Students are expected to participate in the care of outpatients and hospitalized cases (including pre and post-operative care for Surgical Oncology patients) and in patient care rounds in the morning and afternoon. Weekend duties include morning and afternoon treatments for hospitalized patients. Each student will present and discuss a journal article or relevant tumor topic once during the rotation.
Taught by: Dr. J. Mahoney and Staff
Also Offered As: VCSP 777
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Maximum 5-6 students per rotation

VCSP 721 Primary Care Services
This is an elective clinical rotation equivalent to VCSP 712.
Taught by: Dr. G. Mengel
Also Offered As: VCSP 781
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: Minimum of 3 and maximum of 5 students per rotation. Required for: SA, SALA

VCSP 720 Small Animal Pediatrics—Clinic
The Small Animal Pediatrics Clinic is run under the supervision of two board-certified faculty and two residents and emphasizes the unique care of pediatric patients, the approach and management of hereditary diseases, and reproductive problems. Pediatric clinics are held on Mondays and Tuesdays, and reproduction appointments are seen any day of the week. In addition to the clinical appointments, there is opportunity to see several unique genetic diseases in dogs and cats and handle the youngest of pediatric patients in the animal colonies, as well as get an appreciation for the specialty diagnostic laboratories. The clinical rotation deals with the initial yet crucial pediatric wellness visits including nutrition, socialization and preventive care and disease issues specific to this age group. The clinic highlights the evaluation of normal development and diagnosis of diseases of puppies and kittens (<1 year). Moreover, kittens and puppies with known or suspected inherited disorders are examined for which genetic counseling or special diagnostic studies are required. It provides experience with routine immunizations, treatment and prevention of parasitism, and nutritional and spay/neuter counseling. The reproductive clinic involves the evaluation of healthy and infertile animals, as well as breeding management and counseling. Clinical activities include breeding timing, planned and emergency Cesarean sections and neonatal resuscitation, transcervical and surgical inseminations, diagnostic imaging studies of both male and female animals, which includes pregnancy determination, and semen freezing and banking. While the rotation officially only runs on Mondays and Tuesdays, students are welcome and encouraged to assist with the reproductive clinic during the rest of the week.
Taught by: Dr. D. Silverstein and Staff
Also Offered As: VCSP 712
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs; 3-4 students per rotation
VCSP 775 Small Animal Cardiology Service
This is an elective clinical rotation equivalent to VCSP 715 for Equine, Food Animal and Larger Animal Majors or as a second rotation in Cardiology for Small Animal or Small Animal/Large Animal Majors. Unless a student electing a second clinical rotation through the Heart Station makes special arrangements with the cardiology faculty on service, there is no distinction between this elective rotation and VCSP715. However, if a student has objectives for the elective rotation beyond the opportunity to see additional case material, an attempt will be made to accommodate proposals for a more individualized rotation to the extent that the regularly scheduled Heart Station activities are not compromised. A quiz is administered the final day of the rotation and determines 15% of the students grade for the rotation.
Taught by: Dr. M. Oyama and Staff
Also Offered As: VCSP 715
Prerequisite: Prerequisites: Core Medicine Courses
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 776 Dermatology & Allergy Service
This is an elective clinical rotation equivalent to VCSP 716.
Taught by: Dr. C. Cain and Staff
Also Offered As: VCSP 716
Prerequisite: Prerequisites: Core Medicine Courses
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 777 Comprehensive Cancer Care Service
Taught by: Dr. J. Mahoney and Staff
Also Offered As: VCSP 717
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours

VCSP 778 SA Neurology
A two week long clinical rotation which will include: 1) Participation in receiving outpatients, 2) Participation in diagnosis, treatment/care and discharge of hospitalized patients, 3) Participation in all aspects of in-hospital patient consultations, 4) Students should anticipate having independent library-research projects for subsequent small group discussion, 5) Students will be expected to participate in all aspects of weekend duty which is typically (but not necessarily) 8:00 am to Noon each Saturday and Sunday. Primary emphasis will be placed on the student learning to perform and interpret the results of the neurologic examination. Reviewing the description of the examination procedures in any standard veterinary neurology textbook will be extremely valuable. The course will provide opportunity for the student to become familiar with various diagnostic methods. The student will be expected to have reviewed and know the contents of classroom notes. Faculty method of evaluation: Students will be judged on their knowledge, commitment, contribution and accomplishment.
Taught by: Dr. E. Galban and Staff
Also Offered As: VCSP 718
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: 4 students maximum. Recommended: SA and SALA majors

VCSP 781 Primary Care Services
This is an elective clinical rotation equivalent to VCSP 721.
Taught by: Dr. G. Mengel
Also Offered As: VCSP 721
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: Minimum of 3 and maximum of 5 students per rotation

VCSP 782 Small Animal Pediatrics/Genetics/Reproduction Clinic
The Peds/Gen/Repro Clinic and their board certified faculty will emphasize aspects of pediatrics such as preventative health care programs, clinical evaluation of normal development, and diagnosis and management of diseases in puppies and kittens. The Clinic will also cover examination and management of animals with known or suspected inherited disorders in young and adult animals for which genetic counseling or special diagnostic studies are required. Reproduction issues such as infertility and semen evaluation will be addressed. Breeding timing with clinical hormonal assays and vaginal cytology, artificial insemination (vaginal, transcervical and surgical), pregnancy diagnosis with ultrasound and radiographs, and the occasional Cesarean section will also be performed. The practical information and hands-on experience provided by the Peds practice. This rotation can be paired with VCSP 876-SA Behavior. Alternatively, students may appreciate the extra time off the rest of the week (no evening, weekend and holiday coverage).
Taught by: Drs. Casal, Giger and Staff
Also Offered As: VCSP 722
Activity: Clinical Rotation Dental & Vet school
2.0 Credit Hours
Notes: Limitations: Minimum of 3 and maximum of 4 students per rotation. Required: SA

VCSP 790 Small Animal Medicine Holiday Rotation
The holiday internal medicine rotation will be a “learning on your feet” experience. Students will have similar responsibilities as during the core medicine rotations. Clinic appointments will be scheduled only for the first part of week one. Students will be assigned out patients and ES transfers and will evaluate these patients, formulate problem lists and appropriate diagnostic plans, participate in diagnostic procedures (e.g., bone marrow aspirate, tracheal wash), and perform treatments. Formal teaching rounds may not be held, but students will discuss patients on an individual basis with clinicians. The hours of the rotation shifts will be 6AM to 6PM and 12 noon to 12 midnight. Each student will be assigned to five shifts and will likely cover four 6AM to 6 PM shifts and one noon to midnight shift.
Taught by: Dr. M. Rondeau and Staff
Prerequisite: Prerequisites: Satisfactory completion of VCSP 700 - SA Medicine Foundation rotation
Activity: Clinical Rotation Dental & Vet school
3.0 Credit Hours
Notes: Limitations: preferred minimum 7 students, preferred maximum 10 students/rotation. (Maximum may vary between H1 and H2)
VCSP 798 Small Animal Neurology Holiday Rotation
Two one-week rotations will be offered during the Holiday period, each for 3 credits. Each rotation will consist of half of the Holiday period. This holiday rotation will have similar responsibilities as during the core neurology rotation. Clinic appointments will be scheduled for the first week only. Students will be assigned out patients, ES transfers, and will participate in neurology consultations for other services. Students will evaluate these patients, formulate problem lists and appropriate diagnostic plans, participate in diagnostic procedures (electrodiagnostic testing, CSF taps, imaging), and perform treatments that may include surgery. Formal teaching rounds may not be held, but students will discuss patients on an individual basis with clinicians.
Taught by: Dr. E. Galban and Staff
Prerequisite: Prerequisites: Satisfactory completion of VCSP 778 - Small Animal Neurology Service
Activity: Clinical Rotation Dental & Vet school
3.0 Credit Hours
Notes: Limitations: preferred minimum of 2 students; preferred maximum of 3 students per rotation. (Maximum may vary between H1 and H2)

VCSP 800 Small Animal Soft Tissue Surgery-Foundation
Students rotate through the Soft Tissue Surgery Service and are responsible for the diagnosis, preoperative, operative and post-operative care of animals presented to this service under the supervision of Surgery staff. Night and weekend duties will be scheduled. Ward rounds (informal case discussions) are conducted regularly. A neuter service is scheduled each week. Every effort will be made to provide at least one opportunity for each student during the 2-week rotation to have primary responsibility as surgeon to spay or castrate a dog or a cat. CONFERENCE HOURS: 3 hrs/day of clinics (5) = 15 hours. 2-4 hrs/day of surgery (5) = 10-20 hours. 1 hr/weekend morning (4) = 4 hour. TOTAL 29-39 hours.
Taught by: Dr. M. Mison and Staff
Also Offered As: VCSP 870

VCSP 811 Small Animal Orthopedic Surgery
Students rotate through the Orthopedic Surgery Service and are responsible for the diagnosis, pre-operative, operative and post-operative care of animals presented to this service under the supervision of Surgery staff. Night and weekend duties will be scheduled. Ward rounds (informal case discussions) are conducted regularly. A neuter service is scheduled each week. Every effort will be made to provide at least one opportunity for each student during the 2-week rotation to have primary responsibility as surgeon to spay or castrate a dog or a cat. CONFERENCE HOURS: 4-5 hrs/day of clinics (4) = 16-20 hours. 6-8 hr/day of surgery (6) = 42-48 hours. 2-3 hr/weekend day (4) = 8-12 hours. TOTAL 70-80 hours. Emergency call - varies depending on the number of students and number of emergencies.
Taught by: Dr. M. Mison and Staff
Also Offered As: VCSP 871

VCSP 813 Small Animal Emergency Service
Students are assigned to a busy 24-hour, 7-day per week emergency service on a shift system. The students are responsible for diagnosis and management of animals presented to the service under the supervision of Emergency Service staff. Emergency Service rounds are held Monday through Thursday inclusive, and include topics related to emergency medicine and surgery centered around case discussion.
Taught by: Dr. K. Drobatz and Staff
Also Offered As: VCSP 873
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Note: Satisfies SA requirement. Required: SALA; SA

VCSP 814 Small Animal Radiology Service
This course primarily offers experience in small animal diagnostic radiology with some exposure to diagnostic ultrasound. Principles of radiographic interpretation teaching rounds are held daily. Students will assist in the positioning of animals and taking of routine and special procedure radiographic examinations and will observe and assist with ultrasonographic examinations of Ryan Hospital clinic cases. Students will also interact with the radiologist or radiology resident during their interpretation of the clinic cases. A 2-hour examination is given on the last day of the rotation. See Learn.vet for information on clinical competencies to be assessed in this rotation and to access additional study materials.
Taught by: Dr. J. Suran and Staff
Also Offered As: VCSP 874

VCSP 815 Small Animal Anesthesiology Service
Students are responsible for anesthetizing animals presented to the anesthesia service under the supervision of the Anesthesia staff. During the day, students will work closely with either the anesthesiologist on duty or a senior technician. Students will be scheduled with a technician for "on-call" night and weekend duty. On-call duties begin the first Tuesday (or second day) of the rotation and continue through to the last Sunday (or last day before the next rotation). The anesthesia service provides on-call services from 8 pm until 8 am during weekdays, and from Friday 8 pm until Monday 8 am over the weekend. In general, students schedule themselves for the on-call duties. Most rotations assign one student on-call per night during weekdays and split the weekend into 8 or 12-hour shifts. Anesthesia student rounds are conducted Mondays, Wednesdays, Thursdays, and Fridays. The first rounds on the first day of the rotation (usually a Monday) will occur at 9 am. Rounds on Wednesdays are at 8 am. Rounds on Thursdays and Fridays are at 7:30 am. Students are expected to attend grand rounds on Tuesdays. It is highly recommended that students prepare for their rotation by reviewing the course notes from the anesthesia core course and student surgery labs. The anesthesia handout will be given to students on the first day of the rotation. The rounds schedule and topics will be presented in more detail then. During the rotation, students will be evaluated on the following clinical competencies: 1) Intubate an anesthetized animal; 2) Select & administer an appropriate sedative drug regime, 3) Score pain & devise an appropriate analgesic plan, 4) Select and administer an appropriate anesthetic protocol for an animal of ASA status I, II, or III.
Taught by: Dr. G. Gianotti and Staff
Also Offered As: VCSP 875
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Required: SA. Satisfies SALA Imaging Requirement
VCSP 817 Small Animal Dentistry and Oral Surgery
Students participate in the client communication (including assessment of medical history), clinical examination, diagnostic testing (including patient restraint for intravenous catheter placement), treatment planning and treatment of animals presented with dental and oral diseases, including periodontal, endodontic, restorative and occlusal problems and oral and maxillofacial inflammation, infection, malformation, trauma and cancer. Mondays and Wednesdays are clinic appointment days, with rounds and a teaching laboratory or treatment procedures in the afternoons. Tuesdays, Thursdays and Fridays are treatment days. Occasionally, cases are hospitalized into Saturdays, and emergency cases may be referred from ES on Saturdays and Sundays. Responsibility for Saturday and Sunday patient care will be one to maximum two weekend days per student during the two-week rotation, and will most often consist of being on-call. Typically, Mondays and Wednesdays run from 8:30am-5:30pm (only rarely are there cases to SOAP on these mornings), and Tuesdays and Thursdays from 7am- 6:30pm. One student will be assigned to early-call (7am) on Fridays (other students will have an 8:30am start); Friday responsibilities typically extend to 4pm, except for one late-call student.

Taught by: Dr. A. Reiter and Staff
Also Offered As: VCSP 877
Prerequisites: Prerequisites: Core surgery lecture courses.
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: 2-4 students/rotation in VCSP 817, VCSP 877 combined. Required: SA

VCSP 870 Small Animal Soft Tissue Surgery
This is an elective clinical rotation equivalent to courses VCSP 800.

Taught by: Dr. M. Mison and Staff
Also Offered As: VCSP 800
Prerequisite: Prerequisites: Core Surgery Courses
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 871 Small Animal Orthopedics
This is an elective rotation equivalent to SA Orthopedic Surgery VCSP 811.

Taught by: Dr. M. Mison and Staff
Also Offered As: VCSP 811
Prerequisite: Prerequisites: Core Surgery Courses
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 872 Small Animal Ophthalmology
The goals of this clinical rotation are to ensure that students achieve proficiency in performing a complete ophthalmic examination and become familiar with recognizing and treating common problems in small animal ophthalmology practice. All students are required to meet at 7:30 am the first day, and then at 8:00 am on subsequent days of the rotation. Attendance is not required on Friday of each week but the free time is expected to be dedicated to independent study in ophthalmology. An introduction to the service will be given on the first day of the rotation which will include a graded, short quiz. It is recommended that students prepare for the clinical rotation by reviewing their course notes in ophthalmology. Clinical rounds will take place several times weekly. Topic rounds and a cadaver (pig eye), surgery wet lab will be included if time permits. Outpatient service (each day of the rotation): Students are responsible for history taking, clinical examination, treatment planning, preparation of client discharge instructions and some client communication. Surgery patients (each day of the rotation): Students assigned a patient for surgery will be responsible for helping with the patients admission (7:30am the day of surgery). In preparation for surgery, the student must have reviewed the surgical technique, performed a complete physical examination and reviewed pertinent bloodwork. SOAPs, a surgical report and client communication following the procedure are also expected. There will be an opportunity to assist with some of the surgical procedures. After-hours and weekend emergencies: The rotation captain will schedule students for on-call duties Monday through Sunday of each week of the rotation. There are occasional transfers from the emergency service which require surgery and these patients may be hospitalized overnight or at the at the weekend in preparation for or following the procedure. In-patients: Infrequently, there are hospitalized patients. Students are responsible for the daily treatments, SOAPs and client communication for these patients. The ophthalmology residents are responsible for the directing the day-to-day activities of the students on rotation.

Taught by: Dr. Elaine Holt and Staff
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 873 Small Animal Emergency Service
This is an elective clinical rotation equivalent to course VCSP 813.

Taught by: Dr. K. Drobatz and Staff
Also Offered As: VCSP 813
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 874 Small Animal Radiology Service
If this rotation is a first experience in small animal radiology (8721, e.g., equine, large animal or food animal majors), it is identical to course VCSP 814 and a two-hour final examination is given. If this represents a repeat experience in the small animal radiology service, and you have satisfied the clinical competencies in your previous radiology rotation, you are exempt from these clinical competency assessments in the elective rotation.

Taught by: Dr. J. Suran and Staff
Also Offered As: VCSP 814
Prerequisite: Prerequisites: Core Radiology Courses
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs
VCSP 875 Small Animal Anesthesiology Service
Students are responsible for anesthetizing animals presented to the anesthesia service under the supervision of the Anesthesiology staff. During the day, students will work closely with either the anesthetist on duty or a senior technician. Students will be scheduled with a technician for "on-call" night and weekend duty. On-call duties begin the first Tuesday (or second day) of the rotation and continue through to the last Sunday (or last day before the next rotation). The anesthesia service provides on-call services from 8 pm until 8 am during weekdays, and from Friday 8 pm until Monday 8 am over the weekend. In general, students schedule themselves for the on-call duties. Most rotations assign one student on-call per night during weekdays and split the weekend into 8 or 12-hour shifts. Anesthesia student rounds are conducted Mondays, Wednesdays, Thursdays, and Fridays. The first rounds on the first day of the rotation (usually a Monday) will occur at 9 am. Rounds on Wednesdays are at 8 am. Rounds on Thursdays and Fridays are at 7:30 am. Students are expected to attend grand rounds on Tuesdays. It is highly recommended that students prepare for their rotation by reviewing the course notes from the anesthesiology core course and student surgery labs. The anesthesia handout will be given to students on the first day of the rotation. The rounds schedule and topics will be presented in more detail then. For those students still requiring completion of clinical competencies in anesthesiology, students will be evaluated on the following tasks: 1) Intubate an anesthetized animal; 2) Select & administer an appropriate sedative drug regime, 3) Score pain & devise an appropriate analgesic plan, 4) Select and administer an appropriate anesthetic protocol for an animal of ASA status I, II, or III.

Taught by: Dr. G. Gianotti and staff
Also Offered As: VCSP 815
Prerequisite: Prerequisites: Core Anesthesia Courses
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 876 Small Animal Behavior Clinic
This is an elective clinical rotation in small animal behavioral medicine. Clinics are Wednesday and Thursday. Appointments are also seen on Fridays, and students are invited, but not required, to join us. Out-patient behavior clinic appointments are scheduled at approximately 3-4 hour intervals. Each student is responsible for reviewing behavior notes from VMED 616 (9005), prior to his/her first scheduled clinic. Students are required to attend all case rounds (twice per day), review records before rounds, and be prepared to present all cases. Students will assist with medical and behavioral history-taking, physical examination and diagnosis, and are responsible for a selecting handouts and writing discharge letter summarizing the recommendations made. Behavioral topics and volunteer training sessions are offered, when possible, between afternoon appointments and rounds.

Taught by: Dr. C. Siracusa and Staff
Prerequisite: Prerequisites: VMED 616 Clinical Animal Behavior
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: Based on hospital needs. Note: Not offered every rotation

VCSP 877 Small Animal Dentistry and Oral Surgery
This is an elective clinical rotation equivalent to VCSP 817.
Taught by: Dr. A. Reiter and Staff
Also Offered As: VCSP 817
Prerequisite: Prerequisites: Core surgery lecture courses
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: 2-3 students/rotation in VCSP 817, VCSP 877 combined

VCSP 878 Exotic Companion Animal Medicine/Surgery
The purpose of this rotation is to introduce the student to exotic companion animal medicine and surgery. Students will gain knowledge of these animals by hands-on experience and participation in rounds. The student will be expected to obtain histories, develop a rule-out list and a diagnostic plan on all appointments. Students will participate in patient management and assist with various diagnostic and treatment procedures for all scheduled appointments and exotic animal emergencies transferred from the emergency service. There will be a Monday through Sunday clinic schedule as appointments are seen 7 days a week. Additionally, students are expected to be "on-call" for night and daytime emergencies with a clinician. Students should expect the typical day to run from 8:00 AM - 7:00 PM. Rounds will include husbandry and medical and surgical diseases of exotic companion animals. Students will be encouraged to read handouts and use audio-visual material to supplement the rounds presentations and discussions.

Taught by: Dr. L. Latney and Staff
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Recommended - VCSP 635 Introduction to Companion Avian Medicine, VPTH 641 Laboratory Animal Medicine, VCSP 636 Introduction to Reptile and Amphibian Medicine, VCSP 657 Case Studies in Exotic Companion Animal Medicine/Surgery, VCSP 658 Pet Small Mammal Med/Surg

VCSP 879 Working Dog Medicine
To gain experience with all aspects of working dog medicine. Students will handle working dogs to perform general physical examinations as well as specialized assessments including but not limited to breeding soundness exams to assess dogs value in reproduction, dental examinations, and fitness evaluations. Student examinations and handling will be incorporated into behavioral training of dogs to being handled and touched on all areas of their body. Students will participate in routine preventive care and assess and treat injuries or illnesses that occur in the WDC working dogs. Students will gain experience in behavior and sports medicine through participation in impulse control, search work, fitness and conditioning exercises. Students may incorporate other aspects of working dog medicine into their rotations depending on their interests. These areas include sports nutrition, dentistry, and various aspects of research.

Taught by: Dr. C. Otto and Staff
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: permission of instructor required. Note: Not offered every rotation. Location: Penn Vet Working Dog Center, 3401 Grays Ferry Ave, Philadelphia PA 19146
VCSP 880 Shelter Animal Medicine
This rotation gives a complex overview of the field of shelter medicine and community outreach by partnering via a service-learning model with open and closed admission shelters, HQHV surgical clinics, schools, and outreach organizations like Pets for Life. A typical rotation focuses on authentic hands-on learning including four surgical days, mentored primary care management of medical cases and shelter population rounds, public clinical outreach, herd health management, training and behavioral assessment, and providing veterinary CE for shelter staff. Rounds and tour topics include cruelty investigation and humane law enforcement, behavior, ethics, exotics, and risk analysis. Dentistry, necropsies, consults, special procedures, and outreach to local middle schools can also be included as part of the rotation depending on the week. Because Penn Vet works with outside organizations keep in mind the schedule can change as our partner’s needs change. This course occurs off-campus and students must coordinate their own transportation.

Taught by: Dr. B. Watson and Staff
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: 4 students

VCSP 890 Small Animal Surgery Holiday Rotation
This rotation will be similar to a regular surgery rotation with some modifications dictated by the holiday schedule. Students will assist surgery faculty and house officers in history taking, examinations, and the surgical management of small animal patients presented on an emergency basis to the Veterinary Hospital of the University of Pennsylvania. Students will be responsible for the daily care of surgical patients hospitalized at Ryan Hospital. They will also assist in surgery and perform treatments. All students will be expected to participate in night, weekend, and holiday duty on a rotating basis. Two students will be assigned to On Call duty each night and will perform treatments until midnight and assist with cases needing surgery in the night and evening hours. Assignments will be made the first day of the rotation. Rounds to acquaint students with the hospitalized patients will be held each morning and as time permits with the emergency clinician/house officer/nursing staff on duty, but formal teaching or rounds will occur as time permits during this rotation.

Taught by: Dr. L. Aronson and Staff
Prerequisite: Prerequisite: Satisfactory completion of the Small Animal Soft Tissue or Orthopedics rotation
Activity: Clinical Rotation Dental & Vet school
3.0 Credit Hours
Notes: Limitations: preferred minimum 6 students, preferred maximum 10 students / rotation. (Maximum may vary between H1 and H2)

VCSP 893 Small Animal Emergency Service Holiday Rotation
This rotation will be very similar to the Emergency Medicine clinical rotation elective course. Students will be involved in triage, patient stabilization, history and physical examination, diagnostic workup and treatment of patients seen in the emergency room. (We want students who have an interest in learning more about emergency medicine!) Specific time will not be set aside during the rotation for student rounds; however, teaching on a case-to-case basis will be stressed. Rotation shifts will be 8 AM to 8 PM and 8 PM to 8 AM. Each student will be assigned to 5 shifts during the rotation. There will be at least two students assigned to each shift.

Taught by: Dr. Drobatz and Staff
Prerequisite: Prerequisites: Satisfactory completion of the Small Animal Emergency Medicine rotation
Activity: Clinical Rotation Dental & Vet school
3.0 Credit Hours
Notes: Limitations: preferred minimum 6 students, preferred maximum 9 students / rotation. (Maximum may vary between H1 and H2)

VCSP 894 Small Animal Radiology Service
Taught by: Dr. J. Suran and Staff
Prerequisites: Prerequisite: VCSP 814,841 SA Radiology
Activity: Clinical Rotation Dental & Vet school
3.0 Credit Hours
Notes: Limitation: 0 - 2 students per 1 week rotation

Veterinary Independent Study & Research (VISR)

VISR 648 Computer-Aided Learning
Independent study working on computer assisted learning (CAL) projects for the summer. Students work with Linda Lewis and various faculty members depending on the projects available. CAL students must be self-motivated and self-disciplined and able stay on task with minimal supervision. Students will need their own laptop and internet access or can work on either campus. Students should be comfortable working with computers, using Microsoft office, and browsing the web. Experience editing images, videos, and websites are helpful. Students may need to travel to NBC occasionally through the summer. Students work individually and as part of a team and typically work 40 hours/week for 10 weeks.

Taught by: L. Lewis
Activity: Lecture
5.0 Credit Hours

VISR 699 Independent Study and Research
This course enables student to undertake a self-directed study on a topic in Veterinary Medicine, under the supervision of a faculty member. Students are required to submit an Independent Study & Research (ISR) application to the Registrar Manager in the Office for Students. Credit may vary.

Taught by: Instructors Vary
Activity: Seminar
1.0 Credit Hour
Veterinary Pathobiology (VPTH)

VPTH 550 One Health Study Design Seminar
This course number is cross-listed with VPTH 650 and therefore shares the same schedule and course description. It exists for Penn students who wish to enroll and are not Vet students. Eligible students: Penn students who have completed one year of graduate or professional school and who have an interest in addressing problems related to human, animal, and environmental health. Students from the Med, Dental, Nursing, Social Policy, MPH, MES and Wharton programs are encouraged to apply. This seminar course will introduce students to One Health approaches that address critical local, regional and global health problems. Students will work in interdisciplinary teams to review case studies and analyze past and current literature where One Health approaches have been applied. The course is specifically designed to foster the development skills that allow students to think and communicate across professional disciplines. It will also help students develop transdisciplinary connections that might serve them in their professional futures. Students will be assigned a transdisciplinary team. Grading will be based on team-led presentations and analysis of literature, participation and discussion, and a final capstone project (One Health in Practice Plan) in the form of both a paper and a presentation.
Taught by: Drs. S. Rankin, S. Cole, and J. Punt
Also Offered As: VPTH 650
Activity: Lecture
0.5 Credit Hours
Notes: Limitations: 15 students. Penn students who have completed one year of graduate or professional school and who have an interest in addressing problems related to human, animal, and environmental health. Students from the Med, Dental, Nursing, Social Policy, MPH, MES, and Wharton programs are encouraged to apply. Please contact the Registrar at the School of Veterinary Medicine at vetr registrar@vet.upenn.edu if you wish to enroll.

VPTH 602 General and Systemic Pathology
The course includes general pathology and systemic pathology. The general principles and mechanisms of disease are discussed through the basic principles of cell and tissue reactions to injury, including degeneration, necrosis, pathological pigmentation, disturbances of circulation, disturbances of growth, inflammation and neoplasia. This course completes the systemic pathology of domestic animals with emphasis on the etiology, pathogenesis, gross and microscopic lesions, and diagnosis of diseases of the organ systems in the body. Formal classroom lectures are complemented with laboratory classes, gross pathology demonstrations and Moodle-based exercises all aimed at interpretation of gross and microscopic lesions.
Taught by: Dr. A. Durham and Staff
Activity: Lecture
16.0 Credit Hours

VPTH 603 Parasitology
This core course is concerned with fundamentals of the morphology and developmental cycles of helminth, arthropod and protozoan parasites of animals and those that are transmissible from animals to man. The epidemiology and control of the infections are stressed along with pathogenesis, pathology and immunology. Lectures are supplemented by demonstrations of living and fixed materials and by exercises in identification and diagnosis. Laboratory exercises are supplemented by independent work on case studies of clinical parasitisms.
Taught by: Dr. J. Farrell and Staff
Activity: Lecture
8.0 Credit Hours

VPTH 604 Immunology
This course aims to educate students in Veterinary Medicine on fundamental aspects of immunology, including functional anatomy of the immune system, mechanisms of innate and adaptive immunity, immunological mechanisms of disease, and principles of vaccination.
Taught by: Dr. C. Lopez and Staff
Activity: Lecture
4.0 Credit Hours

VPTH 605 Microbiology
This course presents the fundamentals of medical microbiology (bacteriology, mycology, virology) and the applied art of diagnostic bacteriology. Emphasis is placed on the microbial agents of veterinary disease, their biology, mode of pathogenesis, and control with some introductory material concerning treatment and recognition. This course is presented as prerequisite to a later study of infectious disease.
Taught by: Dr. R. Harty and Staff
Activity: Lecture
7.0 Credit Hours

VPTH 606 Clinical Pathology
Appropriate test selection and interpretation are essential to diagnostic evaluation. This course is an introduction to Clinical Pathology presented via case-based learning. Topics include hematology, serum chemistries, urinalysis, cytopathology, clinical endocrinology and blood banking. Within each topic, discussion will cover indications, limitations and interpretation of specific tests, but the emphasis will focus on integrating this information in the context of laboratory panels. Laboratory exercises provide the opportunity to perform and demonstrate basic competency in urinalysis, blood smear preparation and evaluation, and blood banking, as well as to evaluate clinical cases individually and in groups. A microscope is needed for the laboratories.
Taught by: Dr. N. Weinstein and Staff
Activity: Lecture
6.0 Credit Hours

VPTH 615 Introduction to Comparative Medical Research
This course will review the broad scope of animal involvement in contemporary biomedical and veterinary research, with specific discussions of unique species (rodents, nonhuman primates) and laboratory animal medicine and science. Goals for the course are to gain a strong appreciation for the role of research in furthering the practice of veterinary and human medicine, as well as for importance of the humane care, welfare and responsible use of laboratory animals. Completion of this course will permit students to readily participate in biomedical research opportunities available at the University. Grades will be determined by attendance, completion of compliance training, an out-of-class writing exercise and a final exam.
Taught by: Dr. J. Marx and Staff
Activity: Lecture
2.0 Credit Hours
VPTH 633 Ecotoxicology for Veterinarians
The major goal of this course is to provide an introduction to ecotoxicology, the science of assessing the effects of toxic substances on ecosystems with the goal of protecting entire ecosystems. The course will present lectures about various research and career opportunities involving ecotoxicology, such as measuring the effects of pollutants on ecosystems, wildlife serving as monitors of environmental quality, important environmental pollutants such as insecticides, petroleum hydrocarbons and metals, and approaches to rehabilitating damaged ecosystems. Students will research, plan, and present a PowerPoint presentation on a topic relevant to ecotoxicology. The course grade will be based on attendance, the group presentation, and student participation in class discussions.
Taught by: Dr. L. Murphy and Staff
Activity: Lecture
2.0 Credit Hours

VPTH 634 Microbial Pathogenesis
The goal of this course is to provide the student with a conceptual framework regarding the mechanisms of microbial pathogenesis. A range of host-microbe interactions will be studied to illustrate how different microbes breach host lines of defense and lead to infections. Transmission, etiological diagnosis, as well as prophylactic and therapeutic approaches against infectious agents will be discussed with examples related to viral and bacterial pathogens, including zoonotic and Category A select agents.
Taught by: Dr. D. Schifferli and Staff
Prerequisites: Prerequisites: VPTH 604 Immunology and VPTH 605 Microbiology
Activity: Lecture
2.0 Credit Hours
Notes: Limitations: Maximum of 20 students

VPTH 635 Introduction to Fish Diseases
This course is intended to introduce veterinary students to the biology and medicine of teleost fish. The first few lectures will provide a foundation in the classification, gross anatomy and immunology of fish, including practical laboratory classes. The remainder of the course will be more clinically oriented, and will present the most prevalent diseases of fish, emphasizing both the pathology and etiology of the diseases. In addition, the course will also focus on health maintenance through the control of water quality and treatment of diseases in fish. This part of the course will include some practical laboratory demonstrations. Grades will be determined on the basis of class participation and a 5-6 page research paper on a topic of the students choice.
Taught by: Dr.O.Sunyer and Staff
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses
Activity: Lecture
2.0 Credit Hours

VPTH 640 Large Animal Pathology & Toxicology
The first goal of this course is to introduce large animal autopsy techniques for the purposes of identification of common postmortem lesions and review of clinical-oriented anatomy. The second goal is to provide a systems-based approach to domestic and global diseases commonly encountered large animal anatomy, including horses, cattle and small ruminants, swine, camelids and cervids. The course requires students to recognize pertinent gross and microscopic lesions correlated with clinical history in order to formulate appropriate differential diagnoses and promote in-depth knowledge of non-infectious and infectious etiopathogenesises, including zoonoses and domestic and foreign reportable diseases. Components of this course include lecture, gross autopsy demonstration and laboratories that involve inspection of fresh gross specimens, and interactive small group seminars pertaining to toxicology and species-specific lesions. Grades will be determined by two homework assignments, one final exam, and attendance to laboratories and small group seminars.
Taught by: Dr. J. Engiles and Staff
Prerequisites: Prerequisites: VPTH 602 General and Systemic Pathology
Activity: Lecture
3.0 Credit Hours
Notes: Limitations: Maximum of 75 students

VPTH 641 Laboratory Animal Medicine
Note: This course is encouraged as a prerequisite for VPTH 789 ULAR - Laboratory Animal Medicine Clinical Rotation. This course is designed to provide further information about laboratory animal medicine to those students with a potential interest in the field. Issues of pain and distress, facility design, regulatory issues, and special procedures involving rodents and rabbits are addressed. Students will also be introduced to the mechanism of an Institutional Animal Care and Use Committee and will be primary participants in a "mock" meeting with visiting members of the committee here at Penn and actual research protocols. Grades will be determined by class participation and a short paper on a topic relevant to laboratory animal medicine.
Taught by: Dr. J. Marx and Staff
Activity: Lecture
2.0 Credit Hours
Notes: Limitations: Allergies to lab animals

VPTH 650 One Health Study Design Seminar
This seminar course will introduce students to One Health approaches that address critical local, regional and global health problems. Students will work in interdisciplinary teams to review case studies and analyze past and current literature where One Health approaches have been applied. The course is specifically designed to foster the development of skills that allow students to think and communicate across professional disciplines. It will also help students develop transdisciplinary connections that might serve them in their professional futures. Students will be assigned a transdisciplinary team. Grading will be based on team-led presentations and analysis of literature, participation in discussion, and a final capstone project (One Health in Practice Plan) in the form of both a paper and presentation.
Taught by: Drs. S. Rankin, S. Cole, and J. Punt
Also Offered As: VPTH 550
Activity: Lecture
3.0 Credit Hours
Notes: Limitations: 10 students
VPTH 710 Small Animal Diagnostic Services
The course in the Small Animal Section consists of exposure to the Diagnostic Services of MJR-VHUP, namely clinical pathology, anatomic pathology (necropsy service), parasitology and microbiology. The course is focused on development of clinical pathology and necropsy skills and will include a practicum of necropsy technique. A portion of the rotation is also focused on biopsy, parasitology and microbiology. Furthermore, students will be exposed large animal necropsy by spending time at PADLS at New Bolton Center. The bioanalytical pathology portion, which comprises clinical pathology, parasitology and microbiology, will be divided into microscopy, discussion, and online interactive lesson sections. During the microscopy section, students will work with the supervising clinical pathologist or resident in the evaluation, interpretation, and reporting of cytologic specimens and blood film reviews. Discussions involving parasitology and microbiology will also include treatment options and best practices. Online lessons include work in parasitology, clinical pathology and microbiology. Students are also required to perform necropsies, write necropsy reports and to familiarize themselves with the pathophysiology, histopathology and the clinical manifestations of various disorders encountered. Participation of students in presentation and discussion of cases is required. Students will be evaluated based upon enthusiasm, effort, ambition, and advancement in pathology knowledge as evaluated through the directed group discussions, necropsies, microscopy sessions and clinical competency outcomes assessments. A short paper is required. There is a web-based introduction to VPTH710 Diagnostic Services and VPTH770 Diagnostic Services Elective, which students must review prior to the start of their rotation. Students may find this introduction by logging into https://learn.vet.upenn.edu with their Penn Key and Vet Domain password. Please note that it will take approximately 3 hours to review the video and written materials on the website.

Taught by: Dr. C. Bradley and Staff
Also Offered As: VPTH 770
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: 4 students/rotation - Required: SA - Satisfies pathology requirement: SALA

VPTH 711 Farm Animal Pathology-NBC
The course will provide students with experience in farm animal and companion animal autopsies and biopsies including interpretation of gross and microscopic lesions in the context of clinical history, and proper collection of samples for histology and ancillary diagnostics (e.g. microbiology, parasitology, cytology and toxicology). Students will participate in the diagnostic services provided by the Pennsylvania Animal Diagnostic Laboratory System (PADLS) at New Bolton Center. Multiple species commonly encountered at our diagnostic laboratory (horses, cattle and small ruminants, swine, camelids and cervids, small animals and exotics) will be utilized to illustrate the pathogenesis of infectious and non-infectious disease, and the principles of gross and microscopic description with formulation of morphologic diagnoses. Students will be evaluated based upon enthusiasm, effort, ambition, and advancement in pathology knowledge as evaluated through diagnostic autopsy technique, directed group discussions, microscopy sessions and clinical competency outcomes assessments. A short paper providing a succinct scientific review of a select topic pertaining to large animal pathology is required. Although gross pathology will be emphasized, exposure to histopathology and occasionally cytology will be included. Although there is no lecture component to this course, there is a web-based introduction to VPTH 711 Diagnostic Services and VPTH 771 Diagnostic Services Elective, which students must review prior to the start of their rotation. Students may find this introduction by logging in to https://learn.vet.upenn.edu with their Penn Key and Vet Domain password.

Taught by: Dr. J. Engiles and Staff
Also Offered As: VPTH 771
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Required: EQ - Satisfies pathology requirement: SALA, LA, FA

VPTH 718 Poultry Production Medicine-NBC
This course is designed to provide students with a working knowledge of the management and production of poultry from hatchery to processing. The course will involve multiple field trips to a hatchery, grow out pullet house, layer house, breeder house, processing plant and a feed mill. There will also conduct necropsies on cases submitted to the diagnostic laboratory and learn the diagnostic procedures such as serology, virology and PCR testing.

Taught by: Drs. S. Davison and Staff
Also Offered As: VPTH 780
Prerequisites: Prerequisites: VMED 608 Introduction to Poultry, Swine, and Dairy Medicine
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: 1 student/rotation - Satisfies pathology requirement: FA, LA

VPTH 770 Small Animal Diagnostic Services
There is a web-based introduction to VPTH 710 SA Diagnostic Services and VPTH770 Small Animal Diagnostic Services Elective, which students must review prior to the start of their rotation. Students may find this introduction by logging in to https://learn.vet.upenn.edu with their Penn Key and Vet Domain password. Please note that it will take approximately 2 to 3 hours to review the video and written materials on the website.

Taught by: Dr. C. Bradley and Staff
Also Offered As: VPTH 710
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: 4 students/rotation - This is an elective rotation equivalent to VPTH 710
VPTH 771 Farm Animal Pathology-NBC
There is a web-based introduction to VPTH711 Diagnostic Services and VPTH 771 Diagnostic Services Elective, which students must review prior to the start of their rotation. Students may find this introduction by logging in to https://learn.vet.upenn.edu with their Penn Key and Vet Domain password.
Taught by: Dr. J. Engiles and Staff
Also Offered As: VPTH 711
Activity: Clinical Rotation Dental & Vet school
6.0 Credit Hours
Notes: Limitations: Based on Hospital Needs - This is an elective rotation equivalent to VPTH 711

VPTH 780 Poultry Production Medicine-NBC
Taught by Drs. S. Davison and Staff
Also Offered As: VPTH 718
Prerequisites: Prerequisites: VMED 608 Introduction to Poultry, Swine, and Dairy Medicine
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: 1 student/rotation - This is an elective rotation equivalent to VPTH 718

VPTH 789 ULAR-Laboratory Animal Medicine
This rotation will provide an opportunity to work with the wide variety of animal species used in biomedical research at the University of Pennsylvania, including nonhuman primates, small rodents, guinea pigs, rabbits, dogs, cats, pigs, and sheep. The students will participate in all aspects of the care and treatment of these animals across the facilities at the University of Pennsylvania. Participation may include handling, husbandry, diagnosis, treatment, anesthesia, and assistance with surgery. Students will perform daily rounds with the clinical veterinarians and other staff members. The student may have the opportunity to observe on-going interdisciplinary research programs including cardiopulmonary bypass, organ transplantation, gene therapy, device implantations, and metabolic disease progression. Students will participate in clinical rounds, didactic training classes, and related seminars and journal clubs as scheduled. Participation in necropsies of clinical cases, sentinel animals, and study animals is expected. A brief assignment on aspects of lab animal medicine will be required prior to completion of the rotation. Depending upon scheduling, the students will have an opportunity to attend a meeting of the Institutional Animal Care and Use Committee. A recent (within 6 months) negative skin test against tuberculosis is required by the first day of the rotation.
Taught by: Dr. J. Marx and Staff
Prerequisite: Prerequisites: Successful completion of VPTH 641
Laboratory Animal Medicine is encouraged but not required
Activity: Clinical Rotation Dental & Vet school
5.0 Credit Hours
Notes: Limitations: Maximum 2 students/rotation - Notes: The focus of this rotation is the humane care and use of animals in biomedical research. Students should have interest in the specialty of Laboratory Animal Medicine

VPTH 790 Small Animal Pathology Holiday Rotation
This is an elective rotation similar to the necropsy component of the Diagnostic Services Rotation, VPTH 710,770. The rotation consists of practice spent in performing necropsies and interpreting findings. Students are required to perform necropsies, write necropsy reports and to familiarize themselves with the pathophysiology, histopathology and the clinical manifestations of various disorders encountered. There will be two one-week rotations over the Holiday period, each for 2 credits. Each rotation will consist of half of the Holiday period and will not meet on either Christmas Day (week one) or New Years Day (week two). There is no clinical pathology, parasitology or microbiology component to this rotation. No paper is required for this rotation.
Activity: Clinical Rotation Dental & Vet school
2.0 Credit Hours
Notes: Limitations: 2 students/rotation

Viper (VIPR)

VIPR 120 Vagelos Integrated Program in Energy Research (VIPER) Seminar, Part I
This is the first part of the two-semester seminar designed to introduce students to the VIPER program and help them prepare for energy-related research. Research articles on various energy-related topics will be discussed, and students will be guided toward their research topic selection. Library research, presentation of data, basic research methods, research ethics, data analysis, advisor identification, and funding options will also be discussed. Sample energy topics discussed will include: Applications of nanostructured materials in solar cells; Solid oxide fuel cells; Global climate modeling: radiant heat transfer; Nanocrystal-based technologies for energy storage; Photo-bioreactor systems for mass production of micro-algae; Advanced rare earths separations chemistry; Modeling of oxides for solar energy applications; and Electronic transport in carbon nanomaterials.
Taught by: John M. Vohs, Andrew M. Rappe and Kristen L. Hughes
Course usually offered in spring term
Prerequisites: Admission to VIPER program.
Activity: Seminar
0.5 Course Units

VIPR 121 Vagelos Integrated Program in Energy Research (VIPER) Seminar, Part II
This is the second part of the two-semester seminar designed to introduce students to the VIPER program and help them prepare for energy-related research. In this semester we will continue to discuss research articles on various energy-related topics, best practices for library research, presentation of data, basic research methods, research ethics, data analysis, and funding options. A large focus of the course will also be on presenting (in both written and oral form) the work from the students’ summer research internships.
Taught by: Andrew M. Rappe, John M. Vohs, and Kristen L. Hughes
Course usually offered in fall term
Prerequisite: VIPR 120
Activity: Seminar
0.5 Course Units
Visual Studies (VLST)

VLST 101 Eye, Mind, and Image
Visual Studies 101 provides an introduction to the collaboration of eye, mind, and image that produces our experience of a visual world. How and what do we see? How do we perceive color, space, and motion? What is an image? Does seeing vary across cultures and time? What can art tell us about vision? Is there a 21st-century form of seeing? This course combines different approaches to the study of vision, drawing from psychology, cognitive science, philosophy, history of art, and fine art. Professors representing two or three disciplines present lectures that demonstrate the methods of their disciplines and draw connections across fields. This course combines different approaches to the study of vision, drawing from psychology, cognitive science, philosophy, history of art, and fine art. Professors representing two or three disciplines present lectures that demonstrate the methods of their disciplines and draw connections across fields. For BA Students: Hum/Soc Sci or Nat Sci/Math Sector Taught by: Hatfield/Leja One-term course offered either term Activity: Lecture 1.0 Course Unit Notes: This course is required of all Visual Studies Majors (stage 1).

VLST 102 Form and Meaning
This course will introduce students to the theory and practice of image making, focusing on the development of observational skills and analytical thinking. We will look at conventions of artistic representation across time and cultures; discuss types of visual information and modes of formal language; explore visual narrative techniques; and seek to expand our understanding of the role images play in our culture. We will look at conventions of pictorial representation across time and cultures; discuss types of visual information and modes of formal language; explore visual narrative techniques; and seek to expand our understanding of the role images play in our culture. Taught by: Bendtsen/Hyland One-term course offered either term Activity: Studio 1.0 Course Unit Notes: This course is required of all Visual Studies Majors (stage 1 or 2).

VLST 103 3 Dimensions: Time and Space
Through studio projects, readings and class discussion, this class will begin to address, both conceptually and physically, basic 3D structures and translations between 3D and 2D, as well as materiality, experiential phenomena, light and time-based processes. The interconnection between mediums in our cultural climate employs a wide range of tools, processes, and ideas. It is imperative that visual studies students recognize and think through these connections. The work produced and ideas confronted in this class will facilitate discussions and constructive criticism on the fundamentals of space and time via the experiential, conceptual, and the formal as essential elements of meaning. The interconnection between mediums in our cultural climate employs a wide range of tools, processes, and ideas. It is imperative that visual studies students recognize and think through these connections. The work produced and ideas confronted in this class will facilitate discussions and constructive criticism on the fundamentals of space and time via the experiential, conceptual, and the formal as essential elements of meaning. Taught by: Freedman/Neighbor One-term course offered either term Activity: Studio 1.0 Course Unit Notes: This course is required of all Visual Studies Majors (stage 1 or 2).

VLST 211 Perception
One-term course offered either term Also Offered As: PSYC 111 Activity: Lecture 1.0 Course Unit Notes: Topics for this course vary each semester. Dept permission required. This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 212 Research Experience in Perception
In this research course, students will begin by first replicating earlier experiments to measure human visual memory capacity. After several class discussions to discuss ideas, each student will design and conduct their own experiment to further investigate visual and/or familiarity memory. Taught by: Rust One-term course offered either term Also Offered As: PSYC 311 Prerequisites: One semester of statistics, and one of the following: PSYC 111, 149, 151, 217, or permission of instructor. Activity: Seminar 1.0 Course Unit Notes: Dept permission required. Undergraduates only. This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.
**VLST 213 Images in Science**

Pictures, diagrams, graphs, and (more recently) computer images are ubiquitous in modern science. Visualizations are crucial in the process of research; for communicating evidence, theories, and experiments to other scientists; and for transmitting scientific ideas to the public. But serious questions about the validity of using images to convey knowledge about nature have been raised from the earliest natural philosophers onwards, and understanding precisely what any particular scientific image does can be surprisingly difficult. In this class we will investigate, as historical and cultural artifacts, images related to the generation or transmission of knowledge about nature, knowledge that has claims to a privileged epistemological status. The focus will be on three kinds of visual depictions: images of the macrocosm (the universe as a whole), images of the microcosm (the body and its parts), and the visualization of theories and data. What are the material and technological conditions underlying these images? What can the images we examine tell us about the communities and societies, including our own, in which they were created? What do they reveal about the nature of the scientific enterprise, about the relationship between the sensible world and the mind, and about ideals concerning truth, objectivity, and morality?

Taught by: Baker  
Course usually offered in spring term  
Also Offered As: STSC 317  
Activity: Seminar  
1.0 Course Unit

**VLST 217 Visual Neuroscience**

An introduction to the scientific study of vision, with an emphasis on the biological substrate and its relation to behavior. Topics will typically include physiological optics, transduction of light, visual thresholds, color vision, anatomy and physiology of the visual pathways, and the cognitive neuroscience of vision.

Taught by: Stocker  
Course usually offered in spring term  
Also Offered As: BIBB 217, PSYC 217  
Prerequisites: PSYC 001, COGS 001, or VLST 101  
Activity: Lecture  
1.0 Course Unit  
Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

**VLST 221 Introduction to Philosophy of Mind**

In this course, we will explore philosophical questions concerning the nature of minds. In seeking to understand the nature of minds, philosophers and psychologists have often used metaphors drawn from the forms of technology available to them. Leibniz once described the mind as a mill, while Freud compared the mind to a hydrolytic and electromagnetic system. In our own time, many have followed Alan Turing's proposal and have viewed the mind as a special kind of computer; indeed, this "Computational Theory of Mind" forms the foundation for much work in contemporary cognitive science. In this class, we will explore the extent to which the computational theory of mind can adequately characterize the distinctive capacities involved in representing an external environment and having conscious experiences that is displayed by minds in general and human minds in particular. Although an introductory class in philosophy or logic will aid students' understanding, no prior familiarity with the philosophy of mind or cognitive science will be presumed.

Taught by: Domotor, Miracchi  
Also Offered As: PHIL 244, PPE 244  
Activity: Lecture  
1.0 Course Unit  
Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

**VLST 223 Philosophy and Visual Perception**

Central issues in the philosophy of perception from the modern period, including: what we perceive, the meaningful content of perception, and its relation to a mind-independent external world. Additional topics may include: (1) color perception and color metaphysics; (2) object perception in its interplay between Gestalt organizational factors and background knowledge; (3) the role of ecological regularities in the formation of our visual system and in the ongoing tuning of the system to the environment; (4) the geometry of visual space and the phenomenology of visual appearances of size and shape; (5) the problem of how visual scenes are experienced by means of images. Readings from authors such as Bertrand Russell, R. W. Sellars, Tim Crane, Evan Thompson, Robert Swartz, Wolfgang Metzger, Nelson Goodman, Richard Wollheim, and William Hopp, among others.

Taught by: Hatfield, Connolly  
One-term course offered either term  
Also Offered As: PHIL 223  
Activity: Seminar  
1.0 Course Unit  
Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.
VLST 232 Renaissance to Contemporary: Introduction to World Art, 1400 - Now
This course is an introduction to the global visual arts, roughly covering the years 1400 to the present and all media including painting, sculpture, architecture, print culture, and new media (such as photography, film, performance, and installation art). The class will cover aspects of art production across the globe and will begin to introduce students to the arts of Asia, the Americas, the Islamic world, as well as Europe, and will focus especially on the manifold interchanges between them. It offers a broad historical overview of the key techniques, movements and artists of the period, as well as an investigation into the crucial themes and contexts that mark visual art production after the middle ages. Such themes include the new materials and techniques of art making; transcultural visual exchange; the secularization of art; the (gendered) role of the artist in society; the sites of art production and consumption such as the artist’s studio, the royal courts, ecclesiastical environs and the art exhibition; the import of technology and science on art’s making, content and distribution; the rise of art criticism/writing; and the socio-political contexts of patronage and audience: among others. The content of the class will vary slightly according to the expertise of the instructors. For BA Students: Arts and Letters Sector Taught by: Dombrowski, Kim, Shaw, Davis Course usually offered in spring term Also Offered As: ARTH 102 Activity: Lecture 1.0 Course Unit Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 233 Art and Civilization in East Asia
Introduction to major artistic traditions of China and Japan and to the methodological practices of art history. Attention given to key cultural concepts and ways of looking, in such topics as: concepts of the afterlife and its representation; Buddhist arts and iconography; painting styles and subjects; and more broadly at the transmission of styles and cultural practices across East Asia. Serves as an introduction to upper level lecture courses in East Asian art history cultures. If size of class permits, certain sessions will be held in the University Museum or the Philadelphia Museum of Art. For BA Students: Arts and Letters Sector Taught by: Davis/Steinhart Course not offered every year Also Offered As: ARTH 103, EALC 013 Activity: Lecture 1.0 Course Unit Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 234 Introduction to Art in South Asia
This course is a survey of sculpture, painting and architecture in the Indian sub-continent from 2300 B.C., touching on the present. It attempts to explore the role of tradition in the broader history of art in India, but not to see India as ‘traditional’ or unchanging. The Indian sub-continent is the source for multi-cultural civilizations that have lasted and evolved for several thousand years. Its art is as rich and complex as that of Europe and diverse. This course introduces the full range of artistic production in India in relation to the multiple strands that have made the cultural fabric of the sub-continent so rich and long lasting. For BA Students: Arts and Letters Sector One-term course offered either term Also Offered As: ARTH 104, SAST 200, SAST 500 Activity: Lecture 1.0 Course Unit Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 235 Introduction to Visual Culture of the Islamic World
A one-semester survey of Islamic art and architecture which examines visual culture as it functions within the larger sphere of Islamic culture in general. Particular attention will be given to relationships between visual culture and literature, using specific case studies, sites or objects which may be related to various branches of Islamic literature, including historical,didactic, philosophical writings, poetry and religious texts. All primary sources are available in English translation. For BA Students: Humanities and Social Science S Taught by: Holod One-term course offered either term Also Offered As: AAMW 635, ARTH 235, ARTH 635, NELC 285, NELC 685 Activity: Lecture 1.0 Course Unit Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 236 Art Now
One of the most striking features of today's art world is the conspicuous place occupied in it by the photographic image. Large-scale color photographs and time-based installations in projections are everywhere. Looking back, we can see that much of the art making of the past 60 years has also been defined by this medium, regardless of the form it takes. Photographic images have inspired countless paintings, appeared in combines and installations, morphed into sculptures, drawings and performances, and served both as the object and the vehicle of institutional critique. They are also an increasingly important exhibition site: where most of us go to see earthworks, happenings and body-art. This course is a three-part exploration of our photographic present. Taught by: Silverman Course not offered every year Also Offered As: ARTH 294, ARTH 694, ENGL 063, GSWS 294 Activity: Lecture 1.0 Course Unit Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.
VLST 237 Material History of Photography
Photography is a young medium and yet its history can be traced through differing narratives. Was the medium born in a French patent office, when the sun burned a handprint in silver salt, or when human eyes saw an inverted image projected into a dark space? Does photography reflect the perspective and biases of its inventors and users, or does it re-invent how we see the world? This seminar will take theoretical and material approaches to understanding the histories of photography. In addition to lectures and readings, students will handle original materials and make photographs using historic chemical-processes and styles.
Taught by: Vershbow  
Course offered fall; even-numbered years  
Also Offered As: ARTH 374  
Activity: Seminar  
1.0 Course Unit

VLST 250 Introduction to Printmaking
The course offers an introduction to several forms of printmaking including: intaglio, screen printing, relief, and monoprinting. Through in-class demonstrations students are introduced to various approaches to making and printing in each medium. The course enhances a student's capacity for developing images through two-dimensional design and conceptual processes. Technical and conceptual skills are developed through discussions and critiques.
Course usually offered in spring term  
Also Offered As: FNAR 250, FNAR 550  
Activity: Studio  
1.0 Course Unit

VLST 251 Introduction to Photography
This course is an introduction to the basic processes and techniques of black & white photography. Students will learn how to expose and process 35mm film, SLR camera operation, darkroom procedures & printing, basic lighting and controlled applications. It begins with an emphasis on understanding and mastering technical procedures and evolves into an investigation of the creative and expressive possibilities of making images. This is a project-based course, where students will begin to develop their personal vision, their understanding of aesthetic issues and photographic history. Assignments, ideas and important examples of contemporary art will be presented via a series of slide lectures, critiques and discussion. No previous experience necessary. 35mm SLR cameras will be available throughout the semester for reservation and checkout from the photography equipment room.
One-term course offered either term  
Also Offered As: FNAR 271, FNAR 571  
Activity: Studio  
1.0 Course Unit

VLST 252 Sculpture Practices
As an introduction to traditional and contemporary three-dimensional practice, this course is concerned with the concepts and methodologies surrounding three-dimensional art making in our time. Students experiment with a variety of modes of production, and develop some of the fundamental techniques used in sculpture. In addition to these investigations, assignments relative to the history and social impact of these practices are reinforced through readings and group discussion. Processes covered include use of the Fab Lab, wood construction, clay, paper, mixed media, and more.
One-term course offered either term  
Also Offered As: FNAR 145, FNAR 545  
Activity: Studio  
1.0 Course Unit

VLST 253 Drawing I
This course is designed to develop visual awareness and perceptual acuity through the process of drawing. Students learn to sharpen perceptual skills through observational drawing, and to explore the expressive potential of drawing. A variety of problems and media will be presented in order to familiarize students with various methods of working and ways of communicating ideas visually. Subject matter will include object study, still life, interior and exterior space, self-portrait and the figure. Different techniques and materials (charcoal, graphite, ink, collage) are explored in order to understand the relationship between means, material and concept. Critical thinking skills are developed through frequent class critiques and through the presentation of and research into historical and contemporary precedent in drawing.
Two terms. student may enter either term.  
Also Offered As: FNAR 123, FNAR 523  
Activity: Studio  
1.0 Course Unit

VLST 260 Photography Practices
This course is an introduction to the basic principles, strategies and processes of photographic practice. It is designed to broaden the student's aesthetic explorations and to help the student develop a visual language based on cross-disciplinary artistic practice. Through a series of projects and exercises students will be exposed to a range of camera formats, techniques and encouraged to experiment with the multiple modes and roles of photography - both analogue and digital. Attention will also be given to developing an understanding of critical aesthetic and historical issues in photography. Students will examine a range of historical and contemporary photowork as an essential part of understanding the possibilities of image making.
One-term course offered either term  
Also Offered As: FNAR 150  
Activity: Studio  
1.0 Course Unit

VLST 261 Video I
This course provides students with the introductory skills and concepts related to producing short works that explore the language of the moving image. Students will learn the basics of cinematography and editing through a series of assignments designed to facilitate the use of the medium for artistic inquiry, cultural expression and narrative storytelling, through both individual and group projects.
For BA Students: Humanities and Social Science S  
One-term course offered either term  
Also Offered As: CIMS 061, FNAR 061, FNAR 661  
Activity: Seminar  
1.0 Course Unit
VLST 264 Art, Design and Digital Culture
This course is an introduction to the fundamental perception, representation, aesthetics, and design that shape today's visual culture. It addresses the way artists and designers create images; design with analog and digital tools; communicate, exchange, and express meaning over broad range of media; and find their voices within the fabric of contemporary art, design, and visual culture. Emphasis is placed on building an extended form of visual literacy by studying and making images using a variety of representation techniques; learning to organize and structure two-dimensional and three-dimensional space, and designing with time-based and procedural media. Students learn to develop an individual style of idea-generation, experimentation, iteration, and critique as part of their creative and critical responses to visual For BA Students: Humanities and Social Science S
One-term course offered either term

1.0 Course Unit

VLST 265 Digital Photography
This class offers an in-depth technical and conceptual foundation in digital imagery and the opportunity to explore the creative, expressive possibilities of photography. Students will become proficient with the basic use of the camera, techniques of digital capture, color management and color correction. They will also develop competency in scanning, retouching, printing and a variety of manipulation techniques in Photoshop. Through weekly lectures and critiques, students will become familiar with some of the most critical issues of representation, consider examples from photo history, analyze the impact of new technologies and social media. With an emphasis on structured shooting assignments, students are encouraged to experiment, expand their visual vocabulary while refining their technical skills. No previous experience is necessary. Although it is beneficial for students to have their own Digital SLR camera, registered students may reserve and checkout Digital SLR cameras and other high-end equipment from the department.
One-term course offered either term
Also Offered As: FNAR 340, FNAR 640
Activity: Studio
1.0 Course Unit

VLST 301 What is Visual Studies?
Visual Studies 301 is a seminar-format course that challenges students to develop independent ideas about how the eye, the mind and the image that is created therein, all work together to inform our conception of the world at large. Rather than present a unified viewpoint, the course asks the question, "What is visual studies?" by examining parallel and sometimes antagonistic approaches to the ways that human beings understand sight and the concept of visuality. Over the course of the semester, students will discuss and write about various approaches to vision, examining this contested field through the lenses of several disciplines -- including psychology, philosophy, and art history. By parsing and assimilating diverse ideas, students will decide for themselves what are the most pertinent and relevant approaches to the various avenues of research that present themselves in the emerging interdisciplinary field of Visual Studies.
One-term course offered either term
Prerequisite: VLST 101 or Instructor Permission
Activity: Seminar
1.0 Course Unit
Notes: This course is required of all Visual Studies Majors (Stage 2).

VLST 303 The Rise of Image Culture: History and Theories
Images are ubiquitous in the cultural life of the 21st century, yet only two centuries ago they were rare. When and how did pictures come to permeate daily life? How has ordinary experience--psychological, social, cultural, intellectual--changed as a result? This seminar addresses these questions through close reading of influential historical and theoretical writings about the rise of image culture and its effects, including Benjamin, Debord, McLuhan, Mitchell.
Taught by: Leja
Course not offered every year
Activity: Seminar
1.0 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 305 What is an Image?
The course explores various concepts of images. It considers natural images (as in optics), images as artifacts, virtual images, images as representations, and works of art as images. Themes to include: the image controversy in cognitive science, which asks whether some cognitive representations are irreducibly imagistic; the question of whether some images resemble what they represent; the development of the concept of the virtual image and of three-dimensional images; the notions of pictorial representation and non-representational images in art. Readings from C. S. Peirce, Nelson Goodman, Robert Hopkins, Dominic Lopes, W. J. T. Mitchell, John Kulvicki, and Mark Rollins, among others.
Taught by: Verstegen
Also Offered As: VLST 505
Activity: Seminar
1.0 Course Unit
Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 309 Investigative Photography for Scientists and Artists
Artists and scientists are likeminded when they make an image in pursuit of new insights. Pictures can reveal the composition of a specimen, expose a person's character, capture a place's distinctiveness, or produce a new occasion for intimacy. Rosalind Franklin's famous "Photograph 51" of DNA resulted from a desire to see the physical shape of heredity. The artist Shimpei Takeda places film directly on the ground in Fukushima to create a blind measurement of the radioactivity that remains in the earth. This course will introduce photography as an investigative medium for art and science. We will begin with learning the fundamentals of photography while considering ways in which photographs have changed and continue to change the way we perceive space and time. As the class progresses, students from the arts and sciences will work together to learn specialized photographic techniques and complete assignments that explore photography as an investigative medium.
Taught by: Vershbow
Course usually offered in spring term
Prerequisites: Access to a digital camera and a computer with imaging software.
Activity: Seminar
1.0 Course Unit

VLST 395 Senior Project
Permission of Instructor Required.
Two terms. student must enter first term.
Activity: Seminar
0.5 Course Units
Notes: This course is required of all Visual Studies Majors. (Stage 4) Seniors only.

Notes: See department for appropriate section numbers

WH 150 Evaluating Evidence
WH 150 provides an introduction to all stages of the research process for business topics. In the first third of the course, we discuss theory building, hypothesis development, and research design choices particularly in casual research. In the second third, we discuss data collection methods (e.g., surveys, experiments, case studies and fieldwork) and the use of archival databases. This part of the course emphasizes the interplay between research design and sampling/data collection methods. In the final third of the course, we introduce data analysis and interpretation, including methods for converting raw data into measurable constructs suited to statistical analysis.
One-term course offered either term
Activity: Seminar
1.0 Course Unit

WH 201 Business Communication for Impact
The objective of WH 201 is to prepare you to communicate effectively as you pursue your educational, professional, and personal goals over the next few years. We have incorporated input from employers, employees, alumni and past WH 201 students to create a course that will prepare you to succeed at all types of communication: spoken and written, formal and informal, prepared and spontaneous. Communication is a skill that requires repeated practice to master. The class size is limited to eight students to allow you the opportunity to practice communicating every week. Class will meet for 80 minutes once a week for fourteen weeks.
Please note that we are piloting different approaches to teaching this year in different sections of the course. The logistical details of some sections may differ from others, but everyone will be taught the same material and complete the same assignments.

0.5 Course Units
Notes: You must have taken WH 101 prior to this class unless you are a sophomore transfer student. Freshmen and non-Wharton students are not permitted to enroll. This class may not be audited.

WH 297 Wharton Industry Exploration Program
WIEP features short-term courses that focus on various industries and feature visits to businesses, lectures, extracurricular activities, and networking opportunities with alumni. Students must apply online: https://undergrad-inside.wharton.upenn.edu/wiep/
Activity: Seminar
0.5 Course Units

WH 298 Wharton International Program
This short-term international business course gives undergraduate students an amazing global opportunity featuring business-site visits, lectures at partner schools, cultural excursions, and networking opportunities with undergraduate students and business contacts from the destination countries. In addition to learning about another country’s business environment and culture, students earn 0.5 course units that can be used towards business-breadth or elective credits.
Activity: Seminar
0.5 Course Units

WH 299 Honors Thesis
This seminar takes place over two semesters and provides students with the skills to perform their own research under the guidance of a Wharton faculty member. At the conclusion of the fall semester, students will produce a thesis proposal including literature review, significance of the research, methodology, and exploratory data if relevant. Throughout the fall semester faculty guests from a range of disciplines will present on their research in class, highlighting aspects that are relevant to the work students are engaging in at that point. During the second semester, students will collect and analyze data and write up the results in close collaboration with their faculty mentor. At the end of the spring semester, each student will present their research in a video presentation. Throughout the course, students will work individually, in small groups, and under the mentorship of a Wharton faculty member. The goal is to become capable independent researchers who incorporate feedback and critical (self-) analysis to take their research to the next level.
Two terms. student must enter first term.
Also Offered As: WH 399

Yiddish (YDSH)

YDSH 101 Beginning Yiddish I
The goal of this course is to help beginning students develop skills in Yiddish conversation, reading and writing. Yiddish is the medium of a millennium of Jewish life. We will frequently have reason to refer to the history and culture of Ashkenazic Jewry in studying the language.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: JWST 031, YDSH 501
Activity: Lecture
1.0 Course Unit

YDSH 102 Beginning Yiddish II
In this course, you can continue to develop basic reading, writing and speaking skills. Discover treasures of Yiddish culture: songs, literature, folklore, and films.
For BA Students: Language Course
Course usually offered in spring term
Also Offered As: JWST 032, YDSH 502
Prerequisite: YDSH 101 or permission of the instructor
Activity: Lecture
1.0 Course Unit

YDSH 103 Intermediate Yiddish I
The course will continue the first year’s survey of Yiddish grammar with an additional emphasis on reading Yiddish texts. The course will also develop conversational skills in Yiddish.
For BA Students: Language Course
Course not offered every year
Also Offered As: JWST 033, YDSH 503
Prerequisite: YDSH 102 or permission of the instructor
Activity: Lecture
1.0 Course Unit

YDSH 104 Intermediate Yiddish II
Continuation of YDSH 103. Emphasis on reading texts and conversation.
For BA Students: Last Language Course
Course not offered every year
Also Offered As: JWST 034, YDSH 504
Prerequisite: YDSH 103 or permission of the instructor
Activity: Lecture
1.0 Course Unit

YDSH 108 Readings in Modern Yiddish Literature
This course will survey modern Yiddish literature through readings of Yiddish prose and poetry from the end of the 19th century through the late 20th century. The class will be conducted in both Yiddish and English. Reading knowledge of Yiddish is required, although some texts will be available in English translation. Authors include I.L. Peretz, Isaac Bashevis Singer, Moyshe-Leyb Halpern, and Kadya Molodowsky.
Taught by: Hellerstein
Course not offered every year

YDSH 509 Topics in Yiddish Literature
One version of this seminar considers works by Jewish women who
wrote in Yiddish, Hebrew, English, and other languages in the late 19th
through the 20th century. The texts, poetry and prose, will include
both belles lettres and popular writings, such as journalism, as well as
private works (letters and diaries) and devotional works. The course will
attempt to define “Jewish writing,” in terms of language and gender, and
will consider each writer in the context of the aesthetic, religious, and
national ideologies that prevailed in this period. Because students will
come with proficiency in various languages, all primary texts and critical
and theoretical materials will be taught in English translation. However,
those students who can, will work on the original texts and share with
the class their expertise to foster a comparative perspective. Because
we will be discussing translated works, a secondary focus of the course
will, in fact, be on literary translation's process and products. Another
version of this seminar presents Jewish modernism as an international
phenomenon of the early 20th century. The course will attempt to define
“Jewish modernism” through the prism of poetry, which inevitably, given
the historical events in Europe and America during this time, grapples
with aesthetic, religious, and national ideologies and methods. The
syllabus will focus mainly on poetry written in Yiddish and English, and
will also include German, Russian, and Hebrew verse. All poetry, critical,
and theoretical materials will be taught in English translation, although
students who know the languages will work on the original texts and
will bring to the table a comparative perspective. Because we will be
discussing translated poems, a secondary focus of the course will, in
fact, be on literary translation's process and products.

Notes: “Jewish Women Writers” is a graduate seminar also be open
to advanced undergraduates. Based in the Department of Germanic
Languages and Literatures, this course will be cross-listed with
Comparative Literature, English, Gender, Sexuality Women’s Studies, and
Jewish Studies. Topics vary annually.
The Pennbook is a collection of policies that relate to student life at the University of Pennsylvania. These policies govern academic activities such as grading and exams, provide guidance on the use of campus resources, and explain expectations for membership in the university community.

The two most important policies in the Pennbook are the Code of Student Conduct (p. 1771) and the Code of Academic Integrity (p. 1771). These two policies outline the general responsibilities of being a student at Penn. All students are expected to have read and understood both policies before coming to campus.

If you live on campus, consult the Residential Handbook (https://cms.business-services.upenn.edu/residential-services-handbook/handbook.html) for the policies, rules, and regulations that govern living in Penn’s residential community.

For policies governing faculty, please consult the Faculty Handbook (p. 1861). For those governing Penn employees, see the Human Resources Policy Manual (https://www.hr.upenn.edu/policies-and-procedures/policy-manual).

Academic Policy for Participation in Intercollegiate Athletics
To be certified academically eligible to participate (practice and/or compete) in intercollegiate athletics at the University of Pennsylvania, a student:
In observance of NCAA legislation,
term progress and/or GPA requirement.
athlete's academic performance for the fall semester not meet the NCAA
it is granted or at the start of the spring semester should the student-
other applicable requirements are satisfied. Provisional eligibility, when
semester or the good standing – a cumulative GPA of 2.00 provided all
an average of four (4) course units of academic credit per full-time
who does not satisfy the prescribed norms for progress – being awarded
Provisional eligibility may be granted onetime only to a student-athlete
Transfer student-athletes and student-athletes participating in study abroad
programs are not exempted from the percentage of degree requirement.

Provisional eligibility may be granted onetime only to a student-athlete who
does not satisfy the prescribed norms for progress – being awarded
an average of four (4) course units of academic credit per full-time semester
or the good standing – a cumulative GPA of 2.00 provided all
other applicable requirements are satisfied. Provisional eligibility, when
granted, shall terminate at the conclusion of the academic year in which
it is granted or at the start of the spring semester should the student-
athlete's academic performance for the fall semester not meet the NCAA
term progress and/or GPA requirement.

In observance of NCAA legislation, certification of satisfaction of
academic requirements is required prior to competition in each semester. Additionally, senior student-athletes or student-athletes
who are exhausting their athletic eligibility must be recertified prior to
participation in postseason competition occurring between semesters –
fall to spring as well as spring to fall.

Information for:

• Incoming Freshman (p. 1742)
• Rising Sophomores (p. 1742)
• Rising Juniors (p. 1743)
• Rising Seniors (p. 1743)
• Fifth Year Students (p. 1744)

I. Incoming Freshmen (or students who are enrolling as full-time college
students for first time):

All students who are in their first or second semester of full-time college
enrollment (anywhere) must be registered in a full-time course load of
study. Additionally, a student participating in a NCAA sponsored sport
is required to be certified by the NCAA Initial Eligibility Clearinghouse as
having satisfied the applicable academic requirements for participation
in intercollegiate athletics during a student's first-year of college
matriculation.

This means if you are a freshman, to be academically eligible you must be:

• A full-time student, and
• Certified eligible by the NCAA Clearinghouse (except freshmen
participating in non-NCAA sponsored sports)

II. Rising Sophomores (or students who have completed two full-time
semesters (or equivalent) of college enrollment (including transfer
student-athletes):

By the beginning of the third semester of enrollment (start of sophomore
year for most student-athletes) a student must have achieved a minimum
cumulative grade-point-average of 2.00, earned a minimum of one and
one half (1.5) course units for the prior academic semester (not summer
term) and the student's transcript must display a minimum of eight
(8) course units as having been awarded for the period commencing
with the student's first full-time semester and ending with the second
full-time semester (including applicable summers). A minimum of four
and one half (4.5) of the eight (8) course units awarded must be from
academic course work completed in the first two full-time semesters (at
Penn or elsewhere). Additional course units may be awarded from the
first two full-time semesters and/or from any of the following: advanced
placement credit, Penn's Pre-Frosh Program credit, summer and/or
transfer credit, all of which must be displayed on the student's transcript
at the time of eligibility evaluation.

This means if you are a sophomore, to be academically eligible you must:

• Be a full-time student, and
• Have a minimum cumulative GPA of 2.00, and
• Have 8 course units (on transcript at time of eligibility evaluation),
  • A minimum of 4.5 of the 8 course units must be for academic
  work completed in the first two full-time semesters (excluding
  summer), and
• A minimum of 1.5 course units must be for academic work
  completed in the previous full-time semester (excluding summer).

New transfer students (matriculating at Penn for first time), to be
academically eligible you must:

• Be a full-time student, and
• Have been awarded 24 course units of course work (equivalent of 6
  Penn course units) at your former school.
  • A minimum of 18 of the 24 course units must be for academic
  work completed in the first two full-time semesters (excluding
  summer), and/or
• Have 3 course units of transfer credit that is Penn degree
  applicable per term of full-time enrollment from the two-year
  college previously attended. Transfer credits must be displayed
  on transcript at time of eligibility evaluation.

Provisional Eligibility – After two full-time semesters.

If by the beginning of the third full-time semester a student-athlete
satisfies all of the above requirements except for the cumulative GPA of
at least 2.00 and/or eight (8) awarded course units on the transcript, the
student-athlete may be considered for provisional eligibility.
• Minimum cumulative GPA for provisional eligibility consideration is 1.85.
• Minimum total number of awarded course unit credit is 6 CUs.
  • A minimum of 4.5 of the 6 course units must be for academic work completed in the first two full-time semesters (excluding summer).

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school. The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

III. Rising Juniors (including transfer student-athletes):

By the beginning of the junior year (fifth and sixth semesters), a student must be in a degree program, have satisfied forty (40) percent of degree requirements, achieved a minimum cumulative grade-point-average of 2.00, earned a minimum of one and one half (1.5) course units for the prior full-time semester (not summer term) and the student’s transcript must display an average of four (4) course units as having been awarded for each full-time semester of Penn enrollment. (A rising junior (unless a transfer student-athlete) must have a minimum of sixteen (16) awarded course units on his or her transcript) with a minimum of six (6) awarded course units being for work completed in the two most recently completed full-time semesters (including summer sessions). A minimum of four and one half (4.5) of these six course units must be from academic course work completed in the prior two full-time semesters (not including summer) with the additional one and one half (1.5) course units coming from academic work completed in the prior two full-time semesters and/or summer (including course units awarded for transfer credit), all of which must be displayed on the student’s transcript at the time of the eligibility evaluation.

This means if you are a junior, to be academically eligible you must:

• Be a full-time student, and
• Be in a degree program (have an approved major, if applicable), and
• Have an official academic worksheet, and
• Have completed 40% of the requirements for your specific Penn degree, and
• Have a minimum cumulative GPA of 2.00, and
• Have a minimum of 16 course units (on transcript at time of eligibility evaluation),
  • A minimum of 6 course units awarded must be for academic work completed in the prior two full-time semesters and/or previous summer sessions),
  • A minimum of 4.5 course units awarded, must be for academic work completed in the prior two full-time semesters (excluding summer sessions),
  • A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer sessions),

New transfer students (matriculating at Penn for first time), to be academically eligible you must:

• Be a full-time student, and
• Be in a degree program (have an approved major, if applicable), and
• Have an official academic worksheet, and
• Have completed 40% of the requirements for your Penn degree
• Thus, you will be required to have a sufficient number of awarded Penn and/or transfer credit on your transcript at the time of the eligibility review to satisfy the 40% percentage of degree requirement.

Provisional Eligibility – After four full-time semesters.

If by the beginning of the fifth full-time semester a student-athlete satisfies all of the above requirements except for the cumulative GPA of at least 2.00 and/or sixteen (16) awarded course units on transcript, the student-athlete may be considered for provisional eligibility.

• Minimum cumulative GPA for provisional eligibility consideration is 1.90.
• Minimum total number of awarded course unit credit is 14 CUs.

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school. The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

IV. Rising Seniors (including transfer student-athletes):

By the beginning of the senior year (seventh and eighth semesters), a student must be in a degree program, have satisfied sixty (60) percent of degree requirements, achieved a minimum cumulative grade-point-average of 2.00, earned a minimum of one and one half (1.5) course units for the prior Penn academic semester (not summer term) and the student’s transcript must display an average of four (4) course units as having been awarded for each full-time semester of Penn enrollment. A rising senior (unless a transfer student-athlete) must have a minimum of twenty-four (24) awarded course units on the transcript with a minimum of six (6) awarded course units being for work completed in the most recently completed two full-time semesters (including summer sessions). A minimum of four and one half (4.5) of these six course units must be from academic course work completed in the prior two full-time semesters (not including summer) with the additional one and one half (1.5) course units coming from academic work completed either in the prior two full-time semesters and/or summer (including course units awarded for transfer credit), all of which must be displayed on the student’s transcript at the time of the eligibility evaluation.

This means if you are a senior, to be academically eligible you must:

• Be a full-time student (unless you satisfy the criterion for a NCAA exception), and
• Be in a degree program (have an approved major, if applicable), and
• Have an official academic worksheet, and
• Have completed 60% of the requirements for your specific Penn degree, and
• Have a minimum GPA of 2.00, and
• Have a minimum of 24 course units (on transcript at time of eligibility evaluation),
  • A minimum of 6 course units awarded must be for academic work completed in the prior two full-time semesters and/or previous summer), and
  • A minimum of 4.5 course units awarded, must be for academic work completed in the prior two full-time semesters (excluding summer), and
  • A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer).

New transfer students (matriculating at Penn for first time), to be academically eligible you must:

• Be a full-time student, and
• Be in a degree program (have an approved major, if applicable), and
• Have an official academic worksheet, and
• Have completed 60% of the requirements for your Penn degree
  • Thus, you will be required to have a sufficient number of awarded Penn and/or transfer course units on your transcript at the time of the eligibility review to satisfy the 60% percentage of degree requirement.

Provisional Eligibility – After six full-time semesters.

If by the beginning of the seventh full-time semester a student-athlete satisfies all of the above requirements except for having the twenty-four (24) course units awarded, the student-athlete may be considered for provisional eligibility provided a graduation audit has been completed.

• Minimum cumulative GPA for provisional eligibility consideration is 2.00.
• Minimum total number of awarded course unit credit is 22 CUs.

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school.

The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

A minimum of four and one half (4.5) of these six course units must be from academic course work completed in the prior two full-time semesters (not including summer) with the additional one and one half (1.5) course units coming from academic work completed in the prior two full-time semesters and/or summer sessions (including course units awarded for transfer credit), all of which must be displayed on the student’s transcript at the time of the eligibility evaluation.

This means if you are a 5th year student, to be academically eligible you must:

• Be a full-time student (unless you satisfy the criterion for a NCAA exception), and
• Be in a degree program (have an approved major, if applicable), and
• Have an official academic worksheet, and
• Have completed 80% of the requirements for your specific Penn degree, and
• Have a GPA of a minimum of 2.00, and
• Have a minimum of 32 course units (on transcript at time of eligibility review),
  • A minimum of 6 course units awarded must be for academic work completed in the prior two full-time semesters and/or previous summer), and
  • A minimum of 4.5 course units awarded, must be for academic work completed in the prior two full-time semesters (excluding summer), and
  • A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer).

New transfer students (matriculating at Penn for first time), to be academically eligible you must:

• Be a full-time student, and
• Be in a degree program (have an approved major, if applicable), and
• Have an official academic worksheet, and
• Have completed 80% of the requirements for your Penn degree
  • Thus, you will be required to have a sufficient number of awarded Penn and/or transfer course units on your transcript at the time of the eligibility review to satisfy the 80% percentage of degree requirement.

Provisional Eligibility – After eight full-time semesters.

If by the beginning of the ninth full-time semester a student-athlete satisfies all of the above requirements except for having thirty-two (32) course units awarded, the student-athlete may be considered for provisional eligibility provided a graduation audit has been completed.

• Minimum cumulative GPA for provisional eligibility consideration is 2.00.
• Minimum total number of awarded course unit credit is 30 CUs.

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school.

The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

V. Fifth Year Students (including transfer student-athletes):

By the beginning of fifth year (ninth and tenth semesters), a student must be in a degree program, have satisfied eighty (80) percent of degree requirements, achieved a minimum cumulative grade-point-average of 2.00, earned a minimum of one and one half (1.5) course units for the prior Penn academic semester (not summer term) and the student’s transcript must display an average of four (4) course units as having been awarded for each full-time semester of Penn enrollment. A rising senior (unless a transfer student-athlete) must have a minimum of thirty-two (32) awarded course units on transcript with a minimum of six (6) awarded course units being for work completed in the most recently completed two full-time semesters (including summer sessions).
Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

### Academic Rules for PhD Programs

The doctor of philosophy degree is conferred in recognition of marked ability and high attainment in a specific branch of learning. The Ph.D. degree is granted by the Trustees of the University of Pennsylvania upon the approval of the Graduate Council of the Faculties and upon satisfaction of all degree requirements, including acceptance of the dissertation by the student’s Dissertation Committee. Students may enroll in more than one degree program with prior permission of both schools/programs; only one Ph.D. is earned.

The University’s standards, set forth below, are to be viewed as minimum requirements. The school or the graduate group has the right to establish additional requirements and to refuse to examine any student who is not qualified according to its standards. If there are additional program or school requirements, that information must be communicated and available to all students.

### Curriculum

Graduate groups determine the curricular requirements for their programs. The course of study can include a combination of specific required courses, electives, teaching, independent study or laboratory rotations, colloquia, and demonstration through examination of comprehensive knowledge in the major field.

A student who enters the Ph.D. program with a bachelor’s degree will be expected to spend two to three years taking 3-4 course units a semester before satisfying the graduate group’s academic requirements, passing the required examinations and being advanced to candidacy. Graduate groups may require more extensive preparation through additional work, especially those programs with substantial language requirements. The University’s standards, set forth below, are to be viewed as minimum requirements. The school or the graduate group has the right to establish additional requirements and to refuse to examine any student who is not qualified according to its standards. If there are additional program or school requirements, that information must be communicated and available to all students.

### Evaluations and Examinations

A Qualifications Evaluation of each student is conducted in the first two years. The evaluation is designed by the graduate group and may be based on an examination or on a review of a student’s overall academic progress. Satisfaction of this requirement is necessary in order to continue in the graduate program and is recorded in the student’s academic record. The student and the school’s graduate office must be notified of the outcome of the evaluation.

A Candidacy Examination on the major subject area is required. This examination is normally held after the candidate has completed all required courses and may be satisfied by the successful defense of a dissertation proposal. It may be oral, written, or both, at the discretion of the graduate group. Feedback will be provided to the student within one month. Satisfactory completion of the Candidacy Examination requirement is recorded in the student’s academic record. Upon successful completion of the Candidacy Examination, the student is advanced to candidacy. Normally, a student should advance to candidacy by the end of the third year. The maximum time limit for a student to be advanced to candidacy is five years, after which time the student will be dropped from the rolls.

### Dissertation

The student and dissertation supervisor meet regularly (at least twice a year and, in many cases, much more frequently) to establish expectations and review the progress of the student’s research.

### Dissertation Committee Composition and Meetings

Upon advancement to candidacy, each student has a Dissertation Committee consisting of at least three faculty members (including at least two members of the graduate group). At least half of the members of the dissertation committee must be members of the graduate group at the time of appointment to the committee. Faculty who are not members of the graduate group may serve only with the written approval of the graduate group. The authority to approve membership on committees may be delegated to the graduate chair. A graduate group may establish additional requirements, such as a requirement for outside reviewers on the dissertation committee.

The chair of the dissertation committee must be a member of the Standing Faculty in the graduate group. If the chair of the dissertation committee leaves the Standing Faculty before the dissertation is completed, then a new chair from the Standing Faculty in the Graduate Group must be appointed as chair. The dissertation committee chair is responsible for convening committee meetings, advising the student on graduate group and University expectations, and assuring the graduate group chair that the group’s requirements have been met. The dissertation supervisor may serve as chair of the dissertation committee, but is not required to do so.

The dissertation supervisor is the person primarily responsible for overseeing the student’s dissertation research. A student may have both a dissertation supervisor and a dissertation co-supervisor, or two dissertation co-supervisors, if that responsibility is shared equally.

Dissertation supervisors, and dissertation co-supervisors, must be members of the Standing Faculty at Penn, with special approved exceptions. A member of the associated faculty (such as research faculty or adjunct faculty) may be permitted to serve as a dissertation supervisor with prior approval of the Vice Provost for Education on a case by case basis. The Graduate Group Chair may petition the Vice Provost for Education, in advance, for an exception. In such cases, a member of the Standing Faculty in the graduate group must be appointed as the dissertation committee chair.

The dissertation committee meets at least once annually with the student to review the student’s progress. The student prepares an Annual
Dissertation Progress Report and the committee gives timely feedback (within one month) and confirms whether progress is satisfactory. A copy of the signed progress report is submitted to the Supervisor/Advisor and Graduate Group Chair and is documented by the school in the student’s PhD Worksheet.

Dissertations based on joint work with other researchers are allowed, provided that, in such cases, a unique and separate dissertation is presented by each degree candidate. The candidate must include a concise account of his or her contribution to the whole work. Authorship of a dissertation by more than one degree candidate is not allowed.

Public Presentation and Defense Examination
A public, oral presentation of the dissertation is required. The presentation may take the form of a workshop based on a complete draft of the dissertation, or it may be based on the final version of the dissertation, depending on the rules of the graduate group. In either case, the presentation must either include or be followed by an oral examination. This examination may be private if specified by the rules of the graduate group.

At least three members of the dissertation committee must participate in the defense. Participation of one of the three may be via video or audio.

In exceptional and compelling circumstances, and with the permission of the Graduate Group Chair, a student may defend the dissertation using video conferencing (e.g., Skype, Google Chat, FaceTime).

Acceptance
By the prescribed deadline, the graduate group shall report to the Graduate Division Office of the School of Arts and Sciences regarding acceptance of the dissertation and its suitability for immediate publication. The report shall include the date and location of the oral presentation or the date of the meeting of the dissertation committee, the names of the dissertation committee members, and whether they individually approve the dissertation. The student and the Advisor/Supervisor will also be given a copy of the report.

Publication and Submission
Dissertations must follow the format prescribed in the Dissertation Manual. Candidates also should familiarize themselves with any special requirements imposed by the graduate groups under which they are working.

The dissertation is, essentially, a manuscript. In some fields, the dissertation may consist of articles published by the student during the course of the PhD program, accompanied by a narrative explaining the context and significance of the collected works. Essential supplementary mixed media files, such as photographs, audio recordings, and film may be submitted to augment the written text.

All Penn PhD dissertations are published by ProQuest and a hard copy is placed in the Penn Library once the student graduates. Beginning in fall 2015, Penn will also require open access publication of dissertations in the institutional repository, Scholarly Commons. Students should discuss with their advisor whether a delay in publication is necessary or advisable. Students may apply for delay in publication by Proquest and in Scholarly Commons as follows: A request for a three-year delay is approved automatically. A request for a delay of an additional three years requires approval by the Graduate Group Chair. In the event that a further delay is needed, the graduate should petition his or her School’s Graduate Dean (or Associate Dean for Graduate Studies) for an extension.

All PhD dissertations must be submitted in digital format through ProQuest's ETD Administrator module.

Regarding Tutoring Students for Compensation
Many PhD programs have an academic requirement that students teach for one or more semesters. Teaching assistantships and teaching fellowships are done under the supervision of the faculty instructor. The Center for Teaching and Learning is a valuable resource for all graduate students interested in improving their professionalism as teachers— even those who do not have the opportunity to serve as a TA.

A Teaching Assistant (or Teaching Fellow) shall not be allowed to tutor for compensation any student that s/he is grading or has influence in assessing.

Research Abroad
A student who will conduct dissertation research abroad for the semester registers for Dissertation Research Abroad status. Full tuition is charged to students in years 1-5, reduced tuition to students in years 6-10; a reduced general fee is charged for students on Dissertation Research Abroad regardless of their year.

Time Limits
As of 2010-11, the University’s maximum time limit for completion is ten years after matriculation; some graduate groups and schools have established more stringent criteria. Graduate students who have been dropped after ten years may petition the graduate group to return as a student for a maximum of one year in order to achieve recertification and defend the dissertation. (See sections below on Petition for Readmission and Recertification.)

Combined degree students (e.g., M.D.-Ph.D.s) typically enroll full-time in medical school during the first two years of study and do not begin full time Ph.D. course work until the third year; for these students, the ten-year time limit begins at the start of full-time Ph.D. study.

Petition for Readmission After Reaching the Maximum Time To Degree
A student who has been dropped after reaching the maximum time limit may petition the graduate group to return as a student for a maximum of one further year in order to achieve recertification and complete and defend the dissertation. Faculty members have no obligation to continue working with a student who has been dropped, nor is there any presumption that a graduate group will respond favorably to a petition for re-admission. If a graduate group wishes to recommend re-admission, it must present to the graduate dean a list of faculty members willing to serve as a dissertation committee and a detailed, realistic plan of how the student will, within one year of reenrollment, achieve recertification, pass the dissertation examination, and submit the final copy of the dissertation. If re-admission is approved by the graduate dean, the student must pay Reduced Tuition for two semesters, unless all requirements are completed within one semester. A student may petition for readmission at the time s/he is dropped from the program, or at a later date. The student should be fully ready and committed to completing within a one-year timeframe; enrollment will not be extended beyond that...
final year, and no further petition for readmission will be considered by the University.

**Recertification**

If the graduate group and graduate dean approve the petition for readmission, the student must immediately be recertified. In order to ensure that a student's dissertation research remains at the frontier of current research in the field, the student must retake and pass the Candidacy Examination, or satisfy alternative recertification criteria designed by their graduate group and approved by the Graduate Council of the Faculties. The new deadline for completion of all requirements for the Ph.D., including recertification, shall be within one year.

**Approved Individual Graduate Group Recertification Policies**

The following policies have been approved by the Graduate Council of the Faculties and supplement the University’s Recertification Policy.

**Anthropology (Revised July 2010)**

Students who have not completed the dissertation within the University’s maximum time limit may apply for readmission, but must then complete all requirements for the Ph.D., including deposit of the dissertation, within one year. In order to reapply, the student should have a complete draft of their dissertation that has been approved by their advisor. At that point, the student should meet with the graduate chair, who will then bring the student's case before the graduate group for a vote. Should the vote support the student's readmission, the graduate chair will present the case to the graduate dean, outlining the student's outstanding requirements and a timetable for completing them. In some cases, the student may be asked to repeat the Candidacy Examination in order to demonstrate a satisfactory grasp of current scholarship in the field. The graduate dean then reviews the case, and if it is approved, writes a letter formally spelling out the arrangements, and the tuition and fees that the student will be expected to pay.

**Communication (Revised June 2010)**

Students who have not completed all requirements for the Ph.D., including the deposit of the dissertation, within ten years of matriculating must submit all written work they have completed on their dissertation to a committee comprised of a minimum of three members of the Communications standing faculty. This committee may be the student’s dissertation committee or, if that committee is not intact, an Ad Hoc committee appointed by the Committee on Graduate Studies. The committee members will evaluate this material (they may, at their discretion, meet with the student), and take one of the following actions:

1. require the student to retake all or part of the Comprehensive Examination (if the committee believes there is a question about the continued currency of the student’s research);
2. impose other conditions such as the committee believes will ensure the currency and timely completion of the student’s work toward the Ph.D.;
3. recommend to the Committee on Graduate Studies that the student be disqualified from continued doctoral candidacy (if the committee believes the written work provides insufficient evidence of progress toward the completion of an adequate doctoral dissertation).

In the case of (1) or (2), above, the committee will report its decisions and actions to the Committee on Graduate Studies. Upon satisfactory re-certification, the student must complete all requirements for the Ph.D., including deposit of the dissertation, within one year.

**Comparative Literature (Revised July 2010)**

Students who have not completed all requirements for the Ph.D., including the deposit of the dissertation, within the University’s maximum time limit must retake the dissertation prospectus exam (also known as the “final exam”). This exam will involve submitting an updated version of the prospectus to the student’s committee; the committee must approve the new prospectus in order for the student to satisfy the recertification requirement. Upon satisfactory re-certification, the student must complete all requirements for the Ph.D., including deposit of the dissertation, within one year.

**Economics (Revised July 2010)**

Students who have not completed all requirements for the Ph.D., including the deposit of the dissertation, within the University’s maximum time limit must submit a progress report and plan to his or her dissertation committee. The purpose of this report/plan is:

- to document which degree requirements the student has completed;
- to provide a rationale for why he or she has been unable to complete all the requirements within the time limit and to provide a timeline/schedule of steps for completion of the remaining requirements within a one-year extension.

The student’s chair and a majority of his or her dissertation committee must review and approve the progress report and plan. The student must then submit the progress report and plan to the Committee on Degrees for their review and approval. The student must re-take a preliminary exam that documents familiarity with the current status of their field.

**Hispanic Studies (Revised October 2017)**

Students who have not completed all requirements for the Ph.D., including the deposit of the dissertation, within the University’s maximum time limit must 1) submit an updated version of the prospectus and 2) submit a review of the most recent literature on the dissertation topic. The student’s committee must approve the new prospectus and review of literature in order for the student to satisfy the recertification requirement. Upon satisfactory re-certification, the student must complete all requirements for the Ph.D., including deposit of the dissertation, within one year.

**Linguistics (Revised July 2010)**

A student can be re-certified by submitting a revised dissertation proposal reflecting current scholarship on the topic and then undergoing a new dissertation proposal defense, following the usual procedures for the Graduate Group. Upon satisfactory re-certification, the student must complete all requirements for the Ph.D., including deposit of the dissertation, within one year or less as determined by the Graduate Group.
Near Eastern Languages and Civilizations (Revised October 2010)

For Near Eastern Languages and Civilizations, students who apply to be re-enrolled in the Ph.D. program must pass a recertification examination demonstrating satisfactory grasp of current scholarship in their field. The Graduate Group Chair and the dissertation committee will constitute the recertification committee for this purpose. After an initial oral examination, the committee may, at its discretion, require that the student retake the Candidacy Examination and/or submit a revised dissertation proposal prior to recertification. Upon satisfactory re-certification, the student must complete all requirements for the Ph.D., including deposit of the dissertation, within one year.

Political Science (July 2010)

All students who have not completed all requirements for the Ph.D. (including deposit of the dissertation) within the University’s maximum time limit must submit to their full dissertation committee (i.e., the supervisor and two readers) a copy of all written work they have completed on their dissertation. The committee members will evaluate this material, and report to the whole group, recommending that one of the following actions be taken:

- The student is required to retake the qualifying examination (if the committee believes there is a question about the continued currency of the student’s research). The student is disqualified from continued doctoral candidacy (if the committee believes the written work provides insufficient evidence of progress toward the completion of an adequate doctoral dissertation). Other conditions are imposed on the student’s dissertation research, such as the committee believes will ensure the currency and timely completion of the student’s work toward the Ph.D. within one year of recertification.

- The student is required to retake the qualifying examination (if the committee believes this is necessary to ensure the student’s ability to complete the dissertation in a timely fashion). Other conditions are imposed on the student’s dissertation research, such as the committee believes will ensure the currency and timely completion of the student’s work toward the Ph.D. within one year of recertification.

Social Welfare (Revised July 2010)

Ph.D. students who have not completed all their degree requirements within the University’s maximum time limit may apply for recertification. The standards for granting an extension are:

- There is a full committee working with a student on a dissertation;
- the student’s dissertation work represents an extension of preliminary degree work and is conducted in constant consultation with the dissertation chair and committee;
- a plan for completion within one year is realistic, particularly in relation to the student’s prior diligence in completing work;
- the Dissertation Committee Chair supports the student’s plan for completion of the dissertation.

An application for an extension consists of the following steps: The student meets with the dissertation chair about an extension and the chair calls a meeting of the full dissertation committee. The Dissertation Committee hears a student presentation detailing work thus far on the dissertation and a plan for completion within one year. In addition to fielding questions about the dissertation work and the feasibility of the completion plan, the student may also be orally examined on the broader social welfare context of the dissertation work, to demonstrate currency in the field. The presentation is given in a closed meeting to dissertation committee members and steering committee members. The Dissertation Committee makes a recommendation to the doctoral program director on whether or not the student should be recertified.

Upon receiving the recommendation of the dissertation committee, the doctoral program director makes the final decision about whether or not the extension is granted. The doctoral program director will inform the student of a decision. Decisions to recertify will be relayed to the University administration by the program director.

Tuition

Beginning in fall 2008, Ph.D. students will be charged full tuition until they have completed five years of full-time study or the equivalent of approximately 30 course units. The time may be as brief as three years if a student enters with credits from a post-baccalaureate degree program or successfully completes the Ph.D. in fewer than five years.

If the student has not earned the Ph.D. degree by the end of five years, the student will be charged reduced tuition until the degree is awarded, or for a maximum of five additional years. Continuous enrollment is required through year ten (or until graduation), with an exception for approved leave (for family leave, military, medical reasons). After a maximum of five years at reduced tuition, the student ceases to be enrolled. With permission and recertification from the graduate group, a student may re-enroll for a final year in order to defend and deposit the dissertation. Such a student must pay reduced rate tuition for a final two semesters, unless all requirements are completed within one semester.

A student engaged in research overseas may be registered for Dissertation Abroad; charges are posted for Reduced Tuition and Reduced General Fee.

Transfer Credit

Credit may be transferred toward the Ph.D. from a masters degree or other work completed in a post-baccalaureate degree program, upon recommendation by the graduate chair and approval of the graduate dean, reducing full tuition registration by up to two years. No work done as an undergraduate, whether at this institution or at any other, will be counted toward a Ph.D., A.M., or M.S., with the following exception: graduate courses completed by undergraduates as submatriculants in a graduate group may be counted toward graduate degree requirements.

Continuous Registration

Continuous registration as a graduate student is required unless a formal leave of absence is granted by the dean of the student’s school. A leave of absence will be granted for military duty, medical reasons, or family leave; this leave is typically for up to one year and “stops the clock” on time to completion. Personal leave for other reasons may be granted for up to one year with the approval of the Graduate Dean, but it does not automatically change the time limit. Leave should not be granted for the purpose of evading tuition charges. Additional requirements for return may be imposed by the Graduate Dean. No language or other degree examinations may be taken while a student is on leave of absence. A student without an approved leave of absence who fails to register each semester will be considered to have withdrawn from candidacy for the degree; approval by the Graduate Dean and recertification are required for reinstatement.

Dissertation registration takes place in the fall and spring semesters. Dissertation students who are candidates for August degree remain full-time students through August 31st without summer registration.

Extramural Research

If graduate credit is sought for research work pursued at laboratories not officially a part of the University of Pennsylvania (for example, where the investigator is not a member of the graduate group), the student must obtain prior permission from the graduate chair. University policies
regarding intellectual property apply in the case of research conducted in extramural settings.

**Copyright and Patent Policies**

A dissertation submitted as part of the requirements for a degree is the property of the University. Any copyrights or patent rights arising therefrom shall be governed by the policies of the University of Pennsylvania, including the Patent and Tangible Research Property Policies and Procedures and the Policy Relating to Copyrights and Commitment of Effort for Faculty.

**New Parent Accommodation**

A student in a Ph.D. program at Penn is eligible for time off of eight weeks for the birth or adoption of a child. The student must complete the online New Parent Accommodation/Family Leave Request Form (https://vpe.wufoo.com/forms/r72pat10x6xvtk) at least 60 days prior to the anticipated start date of the leave so that appropriate arrangements can be made to cover any teaching/research responsibilities.

The graduate group chair and dissertation advisor will be notified via email of the details of the student’s accommodation request. The graduate group is responsible for making the necessary arrangements within their department and school.

A. Normally the “Time Off” period commences within two weeks of the birth or adoption.

B. During the “Time Off” period, the student remains enrolled full-time. In order to facilitate a rapid return, s/he may participate in the program as fully as s/he deems appropriate. By remaining on full-time status, student visa status and loan repayment schedules, if any, will remain unchanged.

C. The student is entitled to academic accommodation including relief from academic requirements, such as postponement of exams and course requirements.

D. A student receiving stipend support is entitled to continuation of support during the “Time Off” period as follows:
   1. Students receiving stipends from University/school funds are entitled to draw support for eight weeks during the academic year.
   2. Students funded by government grants or other external funding sources are entitled to benefits as determined by the funding agency.

**Family Leave of Absence Policy**

A student in a Ph.D. program at Penn may take an unpaid Family Leave of Absence for the birth or adoption of a child, child care, or care of an immediate family member (spouse, domestic partner, child, or parent) with a serious health condition.

The graduate group chair and dissertation advisor will be notified via email of the details of the student’s leave request. The graduate group is responsible for making the necessary arrangements within their department and school.

A. Students may take a Family Leave of Absence for one semester or for two semesters.

B. The student must complete the online New Parent Accommodation/Family Leave Request Form (https://vpe.wufoo.com/forms/r72pat10x6xvtk) at least 60 days prior to an anticipated leave so that appropriate arrangements can be made to cover any teaching/research responsibilities. In unanticipated and/or emergency situations, students should fill out the form as soon as possible.

C. Family Leave “stops the clock” on the student’s academic requirements, including service requirements, for the duration of the leave.

D. During the period of Family Leave, the student may arrange to continue Student Health Insurance, but is responsible for the payment of his or her own premiums. Upon paying a fee, students on approved Family Leave will retain their PennCard, e-mail accounts, library privileges, and building access.

E. Funding commitments from the institution are deferred until the student returns from Family Leave. Students receiving funding from external sources, such as government grants, are subject to the conditions established by the funding source.

F. Service requirements (e.g., teaching, research) will be met by the student following return from Family Leave.

G. Requests for extension of Family Leave beyond one year, or for repeated Family Leaves, may be made. Approval of an extension, deferral of funding, and continued academic accommodation is at the discretion of the Graduate Dean.

**Important:** If you anticipate adding a dependent (e.g., newborn) to your Penn Student Insurance Policy while on Family Leave, you must remain in active student status at the start of the fall semester. Students should arrange with their school/division to maintain full-time student status for at least 31 days from the start of fall classes, after which time the Family Leave status can be recorded in the Student Records System. After the birth/adoption, contact the SHS Insurance Coordinator to enroll the dependent. The premium for dependent coverage is payable directly to Aetna Student Health.

**Graduate Grades and Academic Standing**

The grading system is as follows:

- A, excellent;
- B, good;
- C, fair;
- D, poor but passing; and
- F, failure.

At the graduate level, the grade of C, while passing, does not constitute satisfactory performance. Letter grades may be modified by a plus (+) or minus (-) sign at the discretion of the school. The minimum standard for satisfactory work for the graduate faculties is a B average in each academic year, but the graduate group may set additional requirements that determine advancement; these requirements may require a student to withdraw despite a satisfactory grade average, if the quality of the student’s work is not at a level that predicts successful dissertation research.

The mark of S is used to indicate satisfactory “progress”. It may be used as a permanent grade for 999 courses only. It is a temporary grade for all other courses.

The mark of I is used to designate “incomplete.” A student who fails to complete a course and does not withdraw or change his/her status to auditor within the prescribed period shall receive at the instructor’s discretion either a grade of I (incomplete) or F (failure). It is expected, in general, that a student shall complete the work of a course during the term in which that course is taken. The instructor may permit an extension of time up to one year for the completion of the course. In such
cases, any course which is still incomplete after one calendar year from its official ending must remain as “incomplete” on the student’s record and shall not be credited toward a degree.

Auditors
A student who desires to attend a course without performing the work of the course must first secure the consent of the instructor. He or she must register in order for the audited course to appear on the transcript; no credit will be received for the audited course. A teaching fellow registered for three course units may register as auditor for one additional course with permission of the graduate group chair.

A student may request that the school graduate office change his or her status in a course to auditor, provided that the request is endorsed by the chairperson of his or her graduate group and the instructor giving the course and is submitted to the graduate office no later than the end of the second week of the term.

Change of a Graduate Group
A student who wishes to change his or her graduate group must submit an application for admission to the new graduate group.

Institutional Courtesy/Exchange Programs
The Exchange Scholar Program allows Penn Ph.D. students to apply to study for a semester or academic year at one of ten other participating institutions:

• Brown,  
• Columbia,  
• Cornell,  
• Harvard,  
• MIT,  
• Princeton,  
• Stanford,  
• University of California-Berkeley,  
• University of Chicago, and  
• Yale.

Through cooperative arrangements with Bryn Mawr College, Haverford College, and Swarthmore College, University of Pennsylvania students may, upon presentation of the proper credentials and with the permission of the instructor concerned, enroll for courses in these institutions. The University of Pennsylvania will accept toward a masters or Ph.D. degree up to the equivalent of three course units for work completed under this arrangement.

Through a cooperative arrangement between The Annenberg School for Communication and Johns Hopkins University, students selected as exchange scholars from the Annenberg School for Communication may count up to one academic year of study at John Hopkins (taken while registered at Penn), subject to the approval of the graduate group, toward the Ph.D. degree at the University of Pennsylvania.

Ph.D. and research masters students enrolled in Anthropology, or History of Art may, upon approval of their graduate group and the instructor, enroll for a maximum of two courses in the Department of Art Conservation at the University of Delaware. The University of Pennsylvania will accept credits completed under this agreement for a masters or Ph.D. degree.

Ph.D. students enrolled in Ancient History, Classical Studies, Religious Studies, Germanic Languages and History may, upon approval of their graduate group and the instructor at the host institution, enroll for a maximum of four courses for graduate credit at the Lutheran Theological Seminary at Philadelphia.

Ph.D. students enrolled for at least one full academic year in the Graduate Groups in Ancient History, Classical Studies, Art and Archaeology of the Mediterranean World, History of Art, Religious Studies, German, Political Science or History may, subject to the approval of their graduate group and the instructor, enroll for a maximum of four courses at the Jewish Theological Seminary.

Each year, up to two English Ph.D. students (one in film and one in poetics) may, upon approval of the graduate group and the instructor at the host institution, take one course each offered by Temple University’s Department of Film and Media Arts and in English.

Under the terms of the PhD Student Exchange Program with Rutgers University, PhD students in all fields may take up to four courses at Rutgers University upon approval of their graduate group chair.

Details regarding the institutional exchange agreements are available from the Office of the Vice Provost for Education.

Updated July 29, 2019

Academic Rules for Research Master's Programs
The master's degree represents the successful completion of at least a full academic year (two terms) of graduate work including some training in research.

Course Requirements
A minimum of eight course units is required for the master’s degree. Additional work may be prescribed in individual cases. Any student registered for the full amount of four course units may register as an auditor for one additional course with the permission of the graduate dean. No more than four course units in any one term may be counted toward the minimum requirement of eight course units. No course may be counted toward degree requirements if it has been used toward the requirements for more than one other degree.

Major Subject
A prospective candidate for a master’s degree must complete at least four course units in the field of the major, and the work as a whole shall be directed by the chairperson of the graduate group concerned.

In the case of a research requirement (thesis, seminar, or laboratory course), the candidate shall also:

1. prepare a thesis in the field of the major subject; or
2. complete a course of research character or engage in supervised research, as the graduate group shall direct, which, in either case, shall be of at least one term in duration and shall include the preparation of at least one comprehensive scholarly or scientific paper.

A thesis or research paper based on joint work with other researchers is allowed, provided that, in such cases, a unique and separate document
is presented by each degree candidate. The candidate must include a concise account of his or her contribution to the whole work. Authorship of a master's thesis or research paper by more than one degree candidate is not allowed.

If a thesis is required, two printed copies shall be deposited in the Graduate Division Office by the date specified in the degree calendar for that term. Specific information regarding the form in which the master's thesis manuscripts are to be prepared must be obtained from the Graduate Division Office.

General Examination
A general examination by the graduate group in the major subject is required in addition to all other examinations. The purpose of this examination is to test the candidate's knowledge of his or her major subject in its broader aspects and proficiency in the particular courses he or she has taken. This examination may be oral, written, or both, at the discretion of the graduate group. The mere satisfaction of minimum requirements does not entitle the student to be admitted to this examination.

With the approval of the Graduate Council of the Faculties, the graduate group may substitute other assessment procedures for the general examination as a means of assuring that master's students have broad knowledge of the field.

Transfer of Credit
At least eight course units of the total program required for the master's degree must be completed in a graduate program at the University of Pennsylvania or through an approved program at another school. Where more than eight course units are required, graduate work done at other universities may be accepted for the balance of the course requirements, if approved by the graduate dean. A student may transfer courses completed at other graduate schools of the University with the approval of the appropriate graduate dean. No work done as an undergraduate, whether done at this institution or at any other, will be counted toward a higher degree. (Graduate courses completed by an undergraduate as part of submatriculation in a graduate group count as graduate courses and, therefore, may be counted toward graduate degree requirements.)

Credit towards satisfaction of the minimum course requirements for a post-baccalaureate degree can be given for a maximum of four course units of work completed while registered in the College of Liberal and Professional Studies.

Time Limits
The minimum requirement of eight course units must be completed within six consecutive years with the understanding that one additional year will be allowed for the completion of a thesis if required.

Registration
Registration takes place in the fall and spring semesters. Research masters students who are candidates for an August degree remain full-time students through August 31st without summer registration.

Leave of Absence
A student who wishes a leave of absence must submit a written request to his or her graduate group chairperson for initial approval and then to the appropriate dean for final approval. The granting of a leave of absence does not automatically change the time limit. Time spent in military service does not count under the time limit.

Alcohol and Other Drug Policy

I. Introduction
The University Alcohol and Other Drug Policy, like other standards of conduct applicable to the University community, is intended to further the educational mission of the University of Pennsylvania. The University is committed to fostering an environment that promotes the acquisition of knowledge and nurtures the growth of the individual. Each member of our intellectual community is responsible for his or her own actions and is expected to contribute to the Penn community and to respect the rights of others to participate in the academic and social life of the University. The following Alcohol and Other Drug Policy, with its emphasis on individual and shared responsibility, healthy and informed decision-making, maintaining a caring environment, and the promotion of genuine dialogue, is adopted in this spirit. Students, staff and faculty may be subject to additional requirements and procedures set forth by their respective schools or departments, and which may be stated in handbooks generated by those entities.

II. Standards of Conduct

Drugs [See Summary of Controlled Substance Statutes in Appendix]
The University of Pennsylvania prohibits the unlawful manufacture, distribution, dispensation, sale, possession or use of any drug by any of its students, employees in its workplace, on its premises or as part of any of its activities. This includes the unlawful sale, distribution, dispensation, possession, or use of any prescription drug. Use or possession of marijuana is prohibited on University premises, per federal law, which supersedes Pennsylvania laws governing the use and possession of marijuana and marijuana products on university campuses. This policy is intended to supplement and not limit the provisions of the University's Drug-Free Workplace policy (https://www.hr.upenn.edu/policies-and-procedures/policy-manual/performance-and-discipline/drug-free-workplace).

Alcohol [See Summary of Alcohol Statutes in Appendix]
A. General Rules Governing the Use of Alcohol
The University of Pennsylvania seeks to encourage and sustain an academic environment that respects individual freedom and promotes the health, safety and welfare of all members of its community. In keeping with these objectives, the University has established the following policy governing the possession, sale and consumption of alcoholic beverages by members of the University community, and conforming to the laws of the Commonwealth of Pennsylvania. Penn's alcohol policy and programs are intended to encourage its members to make responsible decisions about the use of alcoholic beverages, and to promote safe, legal, and healthy patterns of social interaction.

1. The University of Pennsylvania prohibits:

   a. The possession and/or consumption of alcoholic beverages by persons under the age of twenty-one on property owned or controlled by the University or as part of any University event or meeting organized by a University department, organization or group.
b. The intentional and knowing selling, or intentional and knowing furnishing (as defined by Pennsylvania law) of alcoholic beverages to persons under the age of twenty-one or to persons obviously inebriated on property owned or controlled by the University or as part of any University event or meeting organized by a University department, organization or group. Pennsylvania law currently defines “furnish” as “to supply, give, or provide to, or allow a minor to possess on premises or property owned or controlled by the person charged.”

1. The consumption of alcoholic beverages by all University students and employees as to adversely affect academic or job performance and/or endanger the physical well-being of other persons and/or oneself, and/or which leads to damage of property.

2. The possession, sale, distribution, promotion, or consumption of an alcoholic beverage in a manner that constitutes a violation of federal, state or local law, including the sale, directly or indirectly, of any alcoholic beverages at a premises or by an entity not licensed for such sales on property owned or controlled by the University or as part of any University event or meeting organized by a University department, organization or group.

3. When an entity without a liquor license is providing service of alcohol, the following is prohibited per Pennsylvania law:
   - Sales of alcoholic beverages at a cash bar
   - Sales of tickets or entrance fees to an event where alcohol is served
   - Donations or reimbursements to support the cost of an event where alcohol is served
   - Sales of drink tickets or inclusion of drink tickets in entry fees at events where alcohol is served

The University of Pennsylvania permits the lawful keeping and consumption, in moderation, of alcoholic beverages on its property or property under its control by persons of legal drinking age (21 years or older).

In cases of intoxication and/or alcohol poisoning, the primary concern is the health and safety of the individual(s) involved. Individuals are strongly encouraged to call for medical assistance for themselves or for a friend/acquaintance who is dangerously intoxicated. No student seeking medical treatment for an alcohol or other drug-related overdose will be subject to University discipline for the sole violation of using or possessing alcohol or drugs. This policy shall extend to another student seeking help for the intoxicated student.

4. Vice Provosts, Vice Presidents, Deans, and heads of administrative and residential units have the authority and responsibility to govern the use of alcohol in areas they control, both indoors and out, and to approve or disapprove of plans designed to ensure that (at events where alcohol will be served in such areas) only legal age individuals will have access to such alcohol. Further, those hosting such events must take reasonable steps to ensure that the acquisition, distribution and consumption of alcohol otherwise complies with applicable law and University policy.

5. At any event at which alcohol will be served, sufficient quantities of non-alcoholic beverages and food must also be available to guests without cost.

6. Consistent with Pennsylvania law, advertisements of social events shall not promote nor describe the availability of alcoholic beverages; nor shall such advertisements promote the consumption of alcohol by minors.

7. Ordinarily, consumption of alcoholic beverages in outdoor public areas such as walkways, building steps and porches, unenclosed patios, green spaces, and the like is not permitted regardless of the age of the drinker. However, appropriate administrators and University of Pennsylvania Police (UPPD) may grant exceptions to this guideline on an event-by-event basis. Exceptions will be granted only for those events where an overwhelming majority of those reasonably expected to attend an event are of legal drinking age. Events for which exceptions have been granted must be limited to areas that are clearly demarcated and in which it is possible to exercise adequate control of access to and consumption of alcohol. Event hosts must ensure that barriers and other alterations to the outdoor venue which are required by the UPPD and/or the manager of the venue are in place.

8. Kegs of any amount of beer are not permitted at student-run events and are not allowed in any University-managed undergraduate residence. Kegs are permitted at University-sponsored, staff-run events only.

B. Rules Governing Alcohol Use at Registered Undergraduate Social Events

In order to minimize the risk of alcohol abuse, promote compliance with the law, and encourage students to make responsible decisions about the use of alcohol, the following rules are designed to control the volume and nature of alcohol products available and, ultimately, reduce the risk of alcohol-related incidents that pose a threat to the health and welfare of students and colleagues.

1. Undergraduate student groups—those recognized, registered, or identified as an organization by the University—which intend to sponsor events to be held at an on-campus space, an off-campus residence, or a third-party venue, and where alcohol will be served and consumed, must register the event with the Office of Alcohol and Other Drug Program Initiatives (AOD) and with their organization’s advising office (where applicable) at least ten days in advance of the event. Failure to register an event at which alcohol is served does not exempt student organizations from the applicability of these rules. Registration of an event with AOD does not relieve the sponsor(s) of the event from complying with applicable codes and/or life safety standards.

2. Approval from UPPD must be obtained for any events, including alcohol-free events, which will have:
   - a. More than 400 guests,
   - b. Outside area/yard, and/or
   - c. Live music outside.

The party organizers must contact UPPD for approval as part of the event registration process with the Office of Alcohol and Other Drug Program Initiatives.

3. Professional security must be hired to check age identification of all attendees and wristbands must be distributed to guests who are of legal age to consume alcohol. Security will be coordinated by AOD or by the venue.

4. Hard alcohol, distilled liquor with an alcohol content of more than 15%, is prohibited at all registered on-campus undergraduate events, except at events with a set guest list of 150 attendees or fewer. A guest list must be supplied to AOD prior to the event. At such events, no more than two
types of hard alcohol may be provided, and must be provided in single-shot drinks only. Shots or multiple-shot beverages are prohibited.

5. Service of alcohol at all on-campus registered events must end no later than 1 a.m.; events may continue until 2 a.m.

6. Undergraduate student organizations hosting events at an on-campus space, an off-campus residence, or a third-party venue, at which alcohol is served are responsible for assuring that alcohol is served and consumed lawfully and safely. To comply with this expectation undergraduate student organizations must adhere to the following conditions:
   a. No oversized or common source containers of any sort [including but not limited to kegs, punchbowls, beer balls, party balls] are permitted at any on-campus event;
   b. Only individuals with valid proof of legal drinking age may be served alcohol; alcohol may not be served to any visibly intoxicated person, regardless of age;
   c. Alcohol may be served only from a controlled, designated area by University-approved, sober, trained, of-age bartenders who are unaffiliated with the host organization;
   d. For the duration of registered events, individual members of host organizations may not entertain guests in private areas, including private bedrooms. Party attendance is restricted to the public area designated for the party. This means that individual members of a host organization may not serve alcohol in their private rooms for the duration of registered events, even if those in the room are of legal drinking age;
   e. No University funds may be used to purchase alcohol for any event sponsored by an undergraduate organization;
   f. Drinking contests or games of any sort are expressly prohibited.

* The amount of alcohol available at an event should not exceed a ratio of more than four (4) alcoholic drinks (premium beer, table wine, or wine coolers) per-age person attending the event. One drink = 12 ounces of premium beer (alcohol content of less than 6% by volume) or 4-5 ounces of (unfortified) table wine or a standard serving size wine cooler (usually 10 ounces).

7. All registered events held at an on-campus space, an off-campus residence, or a third-party venue must have appropriately trained bartenders who are unaffiliated with the host organization and who are at least 21 years of age.

8. At all registered events, whether held at an on-campus space, an off-campus residence, or a third-party venue, the host organization must identify trained, host monitors who may not consume any alcoholic beverages during or immediately prior to the event. There shall be at least one such host monitor for each 30 guests at an on-campus venue or off-campus residence, or one monitor for each 50 guests at an off-campus third-party venue. Sober host monitors must be designated in advance of each event during the event registration process. Sober hosts must remain sober for the duration of the event. Each academic year, organizations hosting events with alcohol must demonstrate to the Director of the Office of Alcohol & Other Drug Program Initiatives that they have a clear understanding of the function of the sober host monitors and the University’s alcohol and other drug policies and that they have participated in training or taken other steps to develop the ability to, wherever possible (1) handle emergency situations, (2) respond to alcohol-related medical concerns, (3) identify and intervene with overly intoxicated guests, whether or not they require medical treatment, (4) and take any necessary steps to protect the health and safety of guests.

9. University trained and appointed monitors will assist in assuring that University policy is followed at all on-campus events.

10. The organizers of events must properly dispose of partially filled and empty alcohol containers at the conclusion of the event.

11. The University supports the enforcement of all University, local, state and federal policies and laws by retail and wholesale distributors of alcohol on or near campus.

12. It is understood that in addition to University policy and state law, many University undergraduate student organizations are subject to policies regarding the possession and consumption of alcohol imposed by a parent organization. If the policies governing an individual organization impose more restrictive regulations regarding alcohol possession and consumption it will be necessary for that organization to follow its parent organization’s policies or risk sanctions. If, however, the parent organization permits the possession or consumption of alcohol where otherwise prohibited by University policy, the organization must comply with the University’s policy, notwithstanding its parent organization’s rules.

C. Rules Governing Alcohol Use at Registered Graduate and Professional Student Social Events

1. Graduate and professional student organizations which intend to sponsor on-campus or off-campus third-party venue events at which it is anticipated alcohol will be served and consumed must have their event plans approved by the appropriate administrators in their school, department, or center.

   a. If the event is to be held within facilities managed by the student organization’s school, department, or center, the event plan must be approved by the appropriate administrators within that space. The event must follow all policies for events with alcohol outlined by the administrators overseeing the student organization and venue.
   b. If the event is to be held in another on-campus venue, such as a Perelman Quadrangle space or an outdoor area, or at an off-campus third-party venue, the event plan will require additional approval by the appropriate administrator responsible for that space and by the Office of Alcohol and Other Drug Program Initiatives. UPPD approval must be obtained for any events taking place outdoors or that will feature live music. The event must follow the rules governing the use of alcohol in that particular space.

2. In order to minimize the risk of alcohol abuse, promote compliance with the law, and encourage students to make responsible decisions about the use of alcohol, the following rules are designed to control the volume and nature of alcohol products available and, ultimately, reduce the risk of alcohol-related incidents that pose a threat to the health and welfare of students and colleagues.

   a. Individuals under the age of 21 may not be served alcohol.
   b. Service of alcohol must be managed by a licensed bartender.
   c. Security must be present at the event or at the entrance to the building in which the event is to be held.
   d. Food and non-alcoholic beverages must be provided at events where alcohol is served.
III. Penn’s Commitment to Health Education and a Supportive Environment

Consistent with its educational mission, the University sponsors programs which help eradicate misperceptions about alcohol use among peers, create opportunities for open, honest dialogue about alcohol use and abuse, and promote awareness of the physical and psychological, social and behavioral effects of alcohol consumption. The University, along with its students, is committed to the creation of multiple recreational opportunities to help promote a wider variety of social experiences for undergraduates.

1. The University is committed to providing every Penn undergraduate student and parent or guardian with alcohol education from multiple sources when students are pre-freshman, during New Student Orientation, and during the course of the student’s undergraduate education.

2. The University is committed to supporting continuous and expanded peer education, to creating opportunities for the integration of alcohol and drug related issues in its undergraduate co-curricular programs and maintaining an effective, coordinated and responsive alcohol abuse prevention plan implemented by the University’s Director of the Office of Alcohol & Other Drug Program Initiatives.

3. In order to promote responsible group behavior regarding alcohol use, each student organization having more than 10 members and recognized by Division of Recreation and Intercollegiate Athletics, Vice Provost for University Life, Office of Fraternity and Sorority Life, Student Activities Council, Office of Student Affairs, Graduate and Professional Student Assembly, one of Penn’s 12 schools, on-campus residential facilities and/or the College Houses is expected to meet the following requirements:

   Each organization or group that intends to host registered events with alcohol (both on-campus and at off-campus third-party venues), must design and implement an individualized plan to demonstrate competency in managing risk related to alcohol consumption. Such a plan would identify the methods through which the organization will control service of alcohol, promote moderate alcohol consumption, and respond to alcohol-related medical concerns. Each organization must specifically identify appropriate strategies for creating an environment in which alcohol use is secondary to the event itself and which emphasizes food and activities not related to alcohol so as to minimize the risk associated with its presence. This plan will be reviewed as part of event registration prior to each event with alcohol.

   Failure to meet this requirement could result in the loss of University recognition and/or support.

4. Organizations not officially recognized by the University are expected to undertake similar efforts to ensure that high-risk drinking and substance abuse are appropriately addressed.

IV. Consequences for Policy Violations

All members of the University community and all University organizations are expected to comply with applicable local, state and federal laws regarding the possession, use or sale of alcohol or other drugs, whether on or off-campus, and are expected to comply with all University regulations regarding alcohol possession or use. Individuals and organizations which violate this policy may be subject to appropriate disciplinary action.

1. Any student or employee who violates University policies or applicable law may be subject to disciplinary actions and/or referral for prosecution. Disciplinary actions for students may include, but are not limited to, sanctions by the Office of College Houses & Academic Services, the Office of Residential Services, sanctions as set forth in the Charter of the University of Pennsylvania Student Disciplinary System, procedures outlined in the Fraternity and Sorority Advisory Board Judicial Charter, and other formal University consequences, as well as possible civil and criminal penalties. The severity of the sanctions will depend, in part, on whether there have been repeated violations and on the seriousness of the misconduct. Faculty, staff, and other non-students found to be in violation of this policy or applicable law may be subject to University disciplinary procedures which may impose sanctions up to and including termination of employment and/or referral for prosecution. The University also supports enforcement, by applicable law enforcement agencies, of all local, state and federal laws.

2. Along with disciplinary consequences, the University is committed to providing resources and education as appropriate to assist members of the community.

V. Resources in the Penn Community for Information and Counseling Related to Alcohol and Other Drug Use

The University provides services and resources for community members who experience alcohol and/or other drug related difficulties. The following programs are available for students, staff, and faculty:

1. Office of Alcohol & Other Drug Program Initiatives (https://www.vpul.upenn.edu/alcohol)
   The Office of Alcohol & Other Drug Program Initiatives is responsible for ensuring the efficient and productive coordination of all relevant, alcohol-related campus services. Assistance is available by calling (215) 573-3525.

2. Employee Assistance Program (https://www.hr.upenn.edu/PennHR/wellness-worklife/counseling-and-employee-assistance-program)
   The Employee Assistance Program is a free, confidential one-on-one counseling service provided by the University for Penn faculty and staff and their family members. This program can offer assistance with serious life issues 24 hours a day, seven days a week by calling 1-888-321-4433. Services are available at over 450 locations throughout the Delaware Valley, including an on-campus office at 36th and Market Streets.

3. Additional Resources
   The following offices provide information, education and services related to alcohol and other drug concerns. All services are provided free of charge and are available to students, faculty and staff at the University of
Pennsylvania. If you are concerned about your own or someone else’s use of substances, please contact one of these offices.

Office of Affirmative Action and Equal Opportunity Programs (http://www.upenn.edu/affirm-action) (Faculty, Staff, & Students)
Franklin Building, 4th Floor, Room 421
3451 Walnut Street
(215) 898-6993 (Voice), (215) 898-7803 (TDD)

Counseling and Psychological Services (http://www.vp.upenn.edu/caps) (Students)
3624 Market Street #1
(215) 898-7021

Office of Alcohol & Other Drug Program Initiatives (https://www.vpul.upenn.edu/alcohol) (Students)
3611 Locust Walk
(215) 573-3525

Human Resources (https://www.hr.upenn.edu/PennHR/wellness-worklife) (Faculty and Staff)
527A 3401 Walnut Street/6228
(215) 898-0380

Penn Women’s Center (http://www.vpul.upenn.edu/pwc) (Faculty, Staff, & Students)
Locust House, 3643 Locust Walk/6230
(215) 898-8611/12

Student Health Service (https://www.vp.upenn.edu/shs) (Students)
3535 Market Street, Suite 100
(215) 746-3535

HELP Line (https://www.publicsafety.upenn.edu/safety-initiatives/help-line-215-898-help) (Faculty, Staff, & Students)
(215) 898-HELP

A 24/7 phone line for members of the Penn community seeking help in navigating Penn’s resources for health and wellness.

The amount of alcohol available at an event should not exceed a ratio of more than four (4) alcoholic drinks (premium beer, table wine, or wine coolers) per person attending the event. One drink = 12 ounces of premium beer (alcohol content of less than 6% by volume) or 4-5 ounces of (unfortified) table wine or a standard serving size wine cooler (usually 10 ounces).

### Appendix

#### I. Legal Sanctions

The following is a brief review of the legal sanctions under local, state, and federal law for the unlawful possession or distribution of illicit drugs and alcohol:

**A. Drugs**

1. The Controlled Substance, Drug, Device and Cosmetic Act, 35 Pa. C.S.A. 780-101 et seq., sets up five schedules of controlled substances based on dangerousness and medical uses. It prohibits the manufacture, distribution, sale or acquisition by misrepresentation or forgery of controlled substances except in accordance with the Act as well as the knowing possession of controlled substances unlawfully acquired. Penalties for first-time violators of the Act range from thirty days imprisonment, $500 fine, or both for possession or distribution of a small amount of marijuana or hashish, not for sale, to fifteen years or $250,000 or both for the manufacture or delivery of a Schedule I or II narcotic.

A person over eighteen years of age who is convicted for violating The Controlled Substance, Drug, Device and Cosmetic Act, shall be sentenced to a minimum of at least one year total confinement if the delivery or possession with intent to deliver of the controlled substance was to a minor. If the offense is committed within 1,000 feet of the real property on which a university is located, the person shall be sentenced to an additional minimum sentence of at least two years total confinement.

2. The Pharmacy Act of 1961, 63 Pa. C.S.A. 390-8 makes it unlawful to procure or attempt to procure drugs by fraud, deceit, misrepresentation or subterfuge or by forgery or alteration of a prescription. The first offense is a misdemeanor, with a maximum penalty of one year and 39 days imprisonment, a $5,000 fine, or both.

3. The Vehicle Code, 75 Pa. C.S.A. 3101 et seq., which was amended effective July 1, 1977, prohibits driving under the influence of alcohol or a controlled substance, or both, if the driver thereby is rendered incapable of safe driving. A police officer is empowered to arrest without a warrant any person whom he or she has probable cause to believe has committed a violation, even though the officer may not have been present when the violation was committed. A person so arrested is deemed to have consented to a test of breath or blood for the purpose of determining alcoholic content, and if a violation is found it carries the penalties of a misdemeanor of the second degree, which includes imprisonment for a maximum of thirty days.

4. Federal drug laws, the Controlled Substances Act, 21 U.S.C. 801 et seq., are similar to the Pennsylvania Controlled Substance, Drug, Device, and Cosmetic Act, but contain, for the most part, more severe penalties. Schedules of controlled substance are established, and it is made unlawful to knowingly or intentionally to manufacture, distribute, dispense, or possess with intent to distribute or dispense a controlled substance. If the quantity of controlled substance is large (e.g. 1,000 kg of a mixture or substance containing marijuana), the maximum penalties are life imprisonment, a $4,000,000 fine, or both. Lesser quantities of a controlled substance (e.g. 100 kg of a mixture or substance containing marijuana) result in maximum penalties of life imprisonment, a $2,000,000 fine, or both. The distribution of small amounts of marijuana for no remuneration or simple possession of a controlled substance carries a maximum of one year imprisonment, a $5,000 fine, or both, with the penalties for the second offense doubling. Probation without conviction is possible for first offenders. Distribution to persons under the age of twenty-one by persons eighteen or older carries double or triple penalties. Double penalties also apply to the distribution or manufacture of a controlled substance in or on or within 1,000 feet of the property of a school or college.

5. Students who have been convicted under state or federal law involving the possession or sale of a controlled substance, are ineligible for federal student aid for specific periods (ranging from one year to an indefinite period depending on the nature of the offense and whether the student is a repeat offender).

**B. Alcohol**
The Pennsylvania Liquor Code, 47 Pa. C.S.A. 1-101 et seq., controls the possession and sale of alcoholic beverages within the Commonwealth. The Code as well as portions of the Pennsylvania Statutes pertaining to crimes and offenses involving minors, 18 Pa. C.S.A. 6307 et seq., provide the following:

1. It is a summary offense for a person under the age of twenty-one to attempt to purchase, consume, possess or knowingly and intentionally transport any liquor or malt or brewed beverages. Penalty for a first offense is suspension of driving privileges for 90 days, a fine up to $500 and imprisonment for up to 90 days; for a second offense, suspension of driving privileges for one year, a fine up to $1,000, and imprisonment for up to one year; for subsequent offenses, suspension of driving privileges for two years, a fine up to $1,000 and imprisonment for up to one year. Multiple sentences involving suspension of driving privileges must be served consecutively.

2. It is a crime intentionally and knowingly to sell or intentionally and knowingly to furnish or to purchase with the intent to sell or furnish, any liquor or malt or brewed beverages to any minor (under the age of twenty-one). "Furnish" means to supply, give or provide to, or allow a minor to possess on premises or property owned or controlled by the person charged. Penalty for a first violation is $1,000; $2,500 for each subsequent violation; imprisonment for up to one year for any violation.

3. It is a crime for any person under twenty-one years of age to possess an identification card falsely identifying that person as being twenty-one years of age or older, or to obtain or attempt to obtain liquor or malt or brewed beverages by using a false identification card. Penalties are stated in (2) above.

4. It is a crime intentionally, knowingly or recklessly to manufacture, make, alter, sell or attempt to sell an identification card falsely representing the identity, birth date, or age of another. Minimum fine is $1,000 for first violation; $2,500 for subsequent violations; imprisonment for up to one year for any violation.

5. It is a crime to misrepresent one’s age knowingly and falsely to obtain liquor or malt or brewed beverages. Penalties are as stated in (2) above.

6. It is a crime knowingly, willfully and falsely to represent that another is of legal age to obtain liquor or malt or brewed beverages. Penalty is a minimum fine of $300 and imprisonment for up to one year.

7. It is a crime to hire, request or induce any minor to purchase liquor or malt or beverages. Penalty is a minimum fine of $300 and imprisonment for up to one year.

8. Sales without a license or purchases from an unlicensed source of liquor or malt or brewed beverages are prohibited.

9. It is unlawful to possess or transport liquor or alcohol within the Commonwealth unless it has been purchased from a State Store or in accordance with Liquor Control Board regulations.

10. The use in any advertisement of alcoholic beverages of any subject matter, language or slogan directed to minors to promote consumption of alcoholic beverages is prohibited.

11. The Pennsylvania Liquor Code prohibits advertisements of alcoholic beverages, either directly or indirectly, in any booklet, program, book, yearbook, magazine, newspaper, periodical, brochure, circular, or other similar publication, published by, for, or on behalf of any educational institution. In Pitt News v. Pappert, 379 F.3d 96 (2004) this prohibition was construed to restrict constitutionally protected speech and the current applicability of these Liquor Code prohibitions is limited. Please note that University policies regarding advertisement of alcoholic beverages in University publications, which are more restrictive than those contained in the Liquor Code, govern.

The University will cooperate with the appropriate law enforcement authorities for violations of any of the above-mentioned laws by an employee in the workplace or student.

II. Health Risks
Consistent with its mission to promote wellness and reduce the harm of alcohol and other drug use, the University is committed to providing education on the health risks associated with alcohol and other drug use, and providing counseling and support services to students. The list below is not a complete list of substances that are regulated or illegal, or that have health risks. More information can be found on the website of the Office of Alcohol and Other Drug Program Initiatives (http://www vpul.upenn.edu/alcohol).

**Alcohol.** Alcohol consumption causes a number of changes in behavior and physiology. Even low doses significantly impair judgment, coordination, and abstract mental functioning. Statistics show that alcohol use is involved in a majority of violent behaviors on college campuses, including acts of violence, vandalism, and incidents of drinking and driving. Continued abuse may lead to alcohol use disorder, which can lead to permanent damage to vital organs and deterioration of a healthy lifestyle.

**Amphetamines.** Amphetamines can cause a rapid or irregular heartbeat, tremors, loss of coordination, collapse, and death. Use can lead to erratic behavior.

**Cannabis (Marijuana, Hashish).** The use of marijuana may impair or reduce short-term memory and comprehension, alter sense of time, and reduce coordination and energy level. Frequent users often have a lowered immune system and an increased risk of lung cancer. The active ingredient in marijuana, THC, is stored in the fatty tissues of the brain and reproductive system for a minimum of 28 to 30 days.

**Cocaine/Crack.** The immediate effects of cocaine use include dilated pupils and elevated blood pressure, heart rate, respiratory rate, and body temperature, followed by depression. Crack, or freebase rock cocaine, is extremely addictive and can cause delirium, hallucinations, blurred vision, severe chest pain, muscle spasms, convulsions, and even death.

**Hallucinogens.** Lysergic acid (LSD), mescaline, and psilocybin cause illusions and hallucinations. The user may experience panic, confusion, suspicion, anxiety, and loss of control. Delayed effects, or flashbacks, can occur even when use has ceased. Phencyclidine (PCP) affects the section of the brain that controls the intellect and keeps instincts in check. Because the drug blocks pain receptors, violent PCP episodes may result in self-inflicted injuries.

Antihazing Regulations

The University of Pennsylvania is a scholarly community. Each member of our community is expected to respect the rights of others to participate in the academic and social life of the University. Hazing is inconsistent with the goals and purposes of the University and is explicitly forbidden. The following Regulations apply to all University students and student groups, irrespective of whether those groups are recognized, registered, or identified as being affiliated with the University.

I. Hazing: Definition

A. For purposes of these Regulations, and consistent with the Anti-Hazing Law of Pennsylvania, hazing means any action or situation (1) which recklessly or intentionally endangers the mental or physical health or safety of a student or (2) which willfully destroys or removes public or private property for the purpose of initiation or admission into or affiliation with, or as a condition for continued membership in, an organization operating under the sanction of, or recognized, registered, or identified by the University including, without limitation, fraternities and sororities ("organization"). For purposes of these Regulations, any activity as described herein upon which the initiation or admission into or affiliation with or continued membership in an organization is directly or indirectly conditioned, regardless of whether that organization is recognized by or registered with the University, shall be presumed to be "forced" activity, the willingness of an individual to participate in such activity notwithstanding.

B. Examples of types of prohibited behavior follow. These examples are merely illustrative of specific forbidden practices and are not intended to be all inclusive.

1. Any brutality of a physical nature, such as whipping, beating, branding, forced calisthenics or exposure to the elements.
2. Forced consumption of any food, liquor, drug, or other substance, or any other forced physical activity which could adversely affect the physical health and safety of the individual.
3. Any activity which would subject the individual to extreme mental stress, such as sleep deprivation, forced exclusion from social contact, forced conduct which could result in extreme embarrassment, or any other forced activity which could adversely affect the mental health or dignity of the individual.
4. Any willful destruction or removal of public or private property.
5. Placing a member or pledge in a situation of actual or simulated peril or jeopardy.
6. Undignified stunts or methods, either private or public and/or any ordeal that is in any respect indecent or shocking to moral or religious scruples or sensibilities.
7. Kidnapping and paddling.

C. There are time and place limitations on all organization activities related to new member orientation, pledging, and initiation. For purposes of this section, orientation or pledging activities include anything expected or required of an applicant or new member in an organization.

1. There shall be no orientation or pledging activities between midnight and 8:00 a.m. Sunday through Thursday. This rule will be strictly enforced.
2. Orientation and pledging activities shall not occupy more than ten hours per week, excluding study hours and community service.

D. Organizations

1. All organizations are subject to sanctions including loss of University facility use privileges, loss of Student Activities Council recognition and funding, and referral to the Office of Student Conduct.

II. Penalties

Penalties for engaging in hazing activities include University sanctions against individuals and organizations, and criminal sanctions under state law.

A. Individuals

All students, whether or not they are affiliated with an organization, are governed by the Guidelines on Open Expression and the Code of Conduct.

Infractions of the Anti-Hazing Regulations are subject to sanctions described in the Charter of the Student Disciplinary System. These sanctions include the following: warning, reprimand, fine, restitution, disciplinary probation for a specified period, withdrawal of privileges, indefinite probation (i.e., probation whenever and as long as the respondent is a full- or part-time student at the University), term suspension (ordinarily not to exceed two years), indefinite suspension with no automatic right of readmission, or expulsion.

B. Organizations

1. All organizations are subject to sanctions including loss of University recognition, and referral to the Office of Student Conduct.

2. In addition, all fraternities and sororities are governed by the University policy entitled "Recognition and Governance of Undergraduate Social Fraternities and Sororities" (the "Recognition Policy") (p. 1826). For infractions of the Anti-Hazing Regulations above, the fraternity or sorority is subject to sanctions as set forth in the Recognition Policy. These sanctions include administrative warning, chapter probation, suspension of University recognition, and withdrawal of University recognition. The national fraternity of any chapter found to have violated these Anti-Hazing Regulations will be notified.

C. Criminal and Civil Liability

In addition to the sanctions described above, a student or organization may be subject to civil liability or to criminal liability under Pennsylvania’s Anti-Hazing or other laws.

Updated March 20, 2018
Bicycle Policy

Preamble

The University recognizes that concerns exist within the University community regarding the safe use of bicycles on and about the campus. Pedestrians are concerned that they must be overly vigilant to avoid physical encounters with cyclists, particularly in heavy traffic areas. They argue that, to prevent a possible injury, walking a short distance should not be a hardship on the cyclist. Many University community members have concerns about bicycles impeding the free ingress/egress of buildings, especially in the event of an emergency. Additionally, some experience extreme difficulty using the stairs when the handrails are not accessible. Many are concerned about the disorderly appearance of campus when bicycles are secured to trees, trip rails and other inappropriate fixed objects.

Cyclists have legitimate concerns of their own. Their concerns are that regulatory reaction by the University might impair their functional use of bicycles for transportation to and about campus, that there are an insufficient number of reliable bicycle racks available, and that they are victimized by the theft of their bicycles or component parts.

In order to address the concerns of the entire community, the University has adopted the following bicycle use policy which, we believe, balances and provides for the needs of all concerned parties. Enforcement of the policy is authorized by the Pennsylvania Vehicle Code, the Philadelphia Code and the Philadelphia Fire Code. However, like most policies, it relies on the thoughtfulness, cooperation and consideration of the entire University community.

I. Purpose

1. To enhance pedestrian and rider safety within the inner campus during peak traffic periods.
2. To provide for the safe and free ingress/egress to and from all the University buildings and facilities.
3. To reduce bicycle theft losses.
4. To identify, establish and publish written guidelines and regulations to facilitate the movement of bicycle traffic to and about the campus while safeguarding the needs of the community population at large.

II. Scope

This policy applies to all University faculty, staff and students who own, operate or store any pedal drive, human powered vehicles, on or about the building, grounds or premises of the University of Pennsylvania, West Philadelphia campus.

III. Policy defined

A. Registration

The University recommends that every bicycle owned, operated or stored on or about the campus, should be registered with the University Division of Public Safety. The advantages of bicycle registration are:

1. Police will have a quick means to establish the ownership of a bicycle that has been removed from your control. Return of the property, and if appropriate, the arrest of a thief or receiver of stolen property will be greatly enhanced.
2. If your bicycle is lost or stolen the University Police (UPPD) will verify the existence of that bicycle to your insurance carrier, if requested. If the bicycle is not registered UPPD will take your report of lost or stolen property; however, no verification of the prior existence of that bicycle, as your property, can be affixed to that report when forwarded to your insurance carrier.
3. Bicycles remaining in UPPD custody without identification of ownership are periodically sold at public auction. Dates, times, and places of registration for bicycles will be widely advertised throughout each academic year with periodic reminders as may be appropriate with changes in the University population such as the beginning of the spring semester and the summer sessions.

B. Synopsis of Pennsylvania and Philadelphia Law

1. Human-powered, pedal cycles are vehicles according to the Pennsylvania Vehicle Code.
2. Vehicles, as indicated in #1 above are subject to the provisions of the vehicle code when operated on the highways and may not stop, stand or park where prohibited or where controlled by official traffic control devices to include firelanes, handicapped zones, etc.
3. The Philadelphia Code prohibits any person above the age of 12 from riding a cycle on any sidewalk or pedestrian pathway in a business district. The Penn Campus area meets the definition of a business district.
4. A person walking a bicycle is considered a pedestrian.
5. The Philadelphia Fire Code requires clear passage from all exits and stairways at all times. No obstruction shall be permitted.
6. University Police are authorized to enforce both the Pennsylvania Vehicle Code and City of Philadelphia Ordinances.

C. Riding restricted by time or place

In order to provide the opportunity for the accident-free passage of both pedestrians and cyclists the following ride restrictions are instituted:

1. Cyclists can ride their vehicles on Locust, Smith, and Hamilton Walks only between the hours of 5:30 p.m. and 8:30 a.m. If heavy pedestrian traffic occurs it is expected that riders will dismount in deference to pedestrians.
2. Cyclists will walk their vehicles on Locust, Smith, and Hamilton Walks between the hours of 8:30 a.m. and 5:30 p.m.
3. The ride/walk provisions of 1 and 2 above, also apply to the pedestrian feeders to Locust Walk from Walnut and Spruce streets via 36th and 37th streets.
4. University Police on bicycles will be exempt from the above described restrictions in order to provide enforcement, efficient patrol service and emergency response. Police, consistent with their specialized training and the guidance of their supervisors, will operate bicycles in a responsible manner.

D. Parking and Securing of Bicycles

In order to reduce the opportunity for theft the University has significantly increased the number of structurally sound bicycle security racks distributed at convenient locations throughout inner campus. University Police are particularly attentive to these concentrations of security racks during their patrols.
1. Bicycles should be secured to a bike rack every time they must be left unattended on campus, even if it is to be left for a moment.

2. Bicycles shall not be locked, secured, or otherwise parked to handrails, fences, trees, trip rails, or to, or in any other location that, in any manner, obscures the free ingress/egress of any building, stairway, pathway, or in such a manner as to interfere with the access to facilities as required by the U.S. Americans with Disabilities Act.

3. Locking Devices and Methods.
   a. The U-shaped Kryptonite-type bicycle locks appear to be among the best type of locking devices.
   b. When physically possible secure the main frame to the security rack.
   c. If wheels are of the quick-release type, attempt to secure lock through the security rack, the bike frame and the wheel. If necessary, use an additional lock with a long shackle or a cable and lock to secure all the parts together.
   d. If the bicycle is equipped with a quick-release seat adjustment, consider removing the seat and taking it with you.
   e. Never secure a bicycle to an object which can, itself, be disassembled, cut or removed.
   f. Use the bicycle security racks on the inner campus.

E. Enforcement
In order to preserve the intent and the integrity of any policy there must always be a means to ensure compliance. The University's Division of Public Safety Police Department is charged with enforcement action.

1. Parking and securing of Bicycles. Owners or operators of bicycles parked in violation of Para. D., section 2, of this policy will be subject to the following sanctions:
   a. UPPD officers will confiscate the bicycle by removal to their headquarters or by adding a UPPD lock.
   b. A confiscated bicycle will be released upon proof of ownership and the payment of a $5 fee. For a second confiscation in the same academic year (September 1 to August 31) a fee of $15 will apply.
   c. Third and subsequent confiscations in the same academic year will generate a report to the appropriate University authority with a request for sanction(s). A $25 fee will apply.
   d. A pattern of noncompliance extending over multiple academic years will be addressed by the Commissioner of the Division of Public Safety, with those University officials deemed most appropriate to bring about compliance.
   e. When the bicycle is also parked in violation of the Vehicle Code or City Ordinance the officer may, at his/her discretion, issue a Parking Violation Report or a Traffic Citation each of which requires payment of a fine and costs to civil authorities.

2. Operation of Bicycles When/Where Prohibited
   a. Cycles operated in violation of Para. C, sections 1, 2, & 3, of this policy qualify under the Vehicle Code for issuance of a Traffic Citation.
   b. Violation as in a. immediately above, could also qualify for issuance of a Non-Traffic Criminal Citation under City Ordinances. Only one of these can be issued for the same offense. Normally the Traffic Citation will be used.
   c. In addition, disregard for traffic control devices, operation of the bicycle in such a manner as to be considered reckless, or to reasonably be considered to have caused damage or injury by negligent operation are some of the more common provisions of the Pennsylvania Vehicle Code which will also qualify for the issuance of a Traffic Citation.
   d. All citations require payment of a fine and costs to civil authorities upon conviction.

Appropriate authorities are:
1. JIO for undergraduate students.
2. Dean of a School for graduate students.
3. Office of the Provost for faculty.
4. Department Director w/copy to Vice President of Human Resources for employees.

(Source: Almanac, October 22, 2002 (http://www.upenn.edu/almanac/v49/n09/bike_policy.html))

Canvassing
Canvassing or solicitation for funds, sales, or subscriptions in University buildings is prohibited unless written permission is granted by the building administrator. Soliciting or selling goods and services in areas of the residential buildings not designated for such purposes is not permitted. Permission to raise funds or conduct sales in designated areas of the campus to support the activities of student groups may be granted by the Office of Student Life Activities and Facilities in accordance with the Campus Vending Policy.

Charter of the University of Pennsylvania Student Disciplinary System
Preamble
In response to increasing concern about sexual assault and its consequences, the U.S. Department of Education, Office for Civil Rights (OCR) issued a new “guidance” document concerning compliance with Title IX of the Education Amendments of 1972. Title IX prohibits discrimination on the basis of sex in educational programs, including sexual misconduct. In this context, the Office of Student Conduct and the Office of the General Counsel, working closely with other University student affairs professionals, prepared amendments to the Charter of the Student Disciplinary System. As required by the Charter, the amendments have been approved by the Council of Deans, the Faculty Senate and the Provost and are in effect as of April 10, 2012.
Changes
The significant points of OCR’s guidance include the following:

- Once a school knows or reasonably should know of possible sexual misconduct, it must take immediate and appropriate action to investigate or otherwise determine what occurred.
- If sexual misconduct has occurred, a school must take prompt and effective steps to end the sexual violence, prevent its recurrence, and address its effects, whether or not the sexual violence is the subject of criminal investigation.
- A school must take steps to protect the complainant as necessary, including interim steps taken prior to the final outcome of the investigation.
- A school must provide a procedure for students to file complaints of sex discrimination, including complaints of sexual misconduct. These procedures must include an equal opportunity for both parties to present witnesses and other evidence and the same appeal rights.
- A school’s procedures must use the preponderance of the evidence standard to resolve complaints of sexual misconduct.\(^1\)

With the guidance in mind, we developed some special procedures for handling sexual misconduct cases and added a section in the Charter describing these. For the full text of these amendments, please refer to Section II.J. (p. \(\text{p. } \)) of the amended Charter. The amendments also include other minor clean-up revisions, such as correction of scrivener’s errors.

\(^1\) U.S. Department of Education, Office for Civil Rights, Dear Colleague Letter: Sexual Violence, Background, Summary and Fast Facts, April 4, 2011

The Charter of the Student Disciplinary System sets forth the procedures under which alleged violations of the University’s Code of Student Conduct, Code of Academic Integrity, and other policies, rules, and regulations are resolved.

The Code of Student Conduct sets forth the responsibility of all students at the University of Pennsylvania to exhibit responsible behavior regardless of time or place. This responsibility includes, but is not limited to, the obligation to comply with all provisions of the Code of Student Conduct; with all other policies and regulations of the University, its Schools, and its Departments; and with local, state, and federal laws.

The Code of Academic Integrity, and similar codes adopted by some of the University’s Schools, set forth the standards of integrity and honesty that should be adhered to in all student academic activities at the University of Pennsylvania.

Violations of the Code of Academic Integrity or School regulations are also violations of the University’s Code of Student Conduct. Further, violations of local, state, and federal laws may be violations of the Code of Student Conduct. Therefore, throughout the Charter references to violation(s) or alleged violation(s) of the Code of Student Conduct include violations of these other policies and laws.

The University disciplinary process at Penn may involve the following stages:

- Bringing a Complaint to the Office of Student Conduct
- Resolving a Complaint by Mediation
- Investigating a Complaint
- Filing Charges by the University against a Student
- Resolving Charges by Voluntary Agreement to Sanctions
- Resolving Charges by Disciplinary Hearing
- Appealing the Decision of a Hearing Panel
- Imposing Sanctions on a Student
- Fulfilling Sanctions Imposed by the University

Under the University’s Student Disciplinary System, charges are brought on behalf of the University, not on behalf of the complainant(s) who brought the matter to the Office of Student Conduct (OSC) or the party(ies) who may have been directly or indirectly harmed by the alleged violation of University regulations. Therefore, complainants who wish to maintain greater control over their complaints, such as is sometimes appropriate in cases involving serious cultural or communicative differences, or those who wish merely to create a record of their complaint without necessarily beginning a formal disciplinary process, may wish to bring their complaint to other University resource offices, particularly the Office of the Ombudsman, which are equipped to handle cases in this manner. Such offices may, when appropriate and helpful in an individual case, consult with relevant campus communities or other resource offices in the process of resolving a complaint and are able to work closely with both complainants and respondents in resolving such matters. If such efforts fail to arrive at a satisfactory resolution, the complainant still has the option of bringing a complaint to the OSC.

Through the University Honor Council, students play a major role in the Student Disciplinary System by advising the Director of the Office of Student Conduct and the Provost on matters of policy and the operation of the System and by sitting as members of disciplinary hearing panels. Students also serve as advisors and mediators within the System.

The System places great emphasis on the mediation of disputes, as is appropriate in a University Community.

I. The Student Disciplinary System

A. Statement of Purpose

The purpose of the Student Disciplinary System is to further the educational mission of the University of Pennsylvania by providing a fair and effective mechanism for investigating and resolving disputes involving students and alleged violations by students of the University’s rules, regulations, and policies.

B. Jurisdiction of the Student Disciplinary System

1. Through the Office of Student Conduct (OSC), the Student Disciplinary System handles complaints from members of the University community—trustees, faculty, staff or registered students—about alleged violations of the Code of Student Conduct, the Code of Academic Integrity, or other University policies. Persons outside the University community may also bring complaints of alleged violations of the Code of Student Conduct and other University policies to OSC. The Director of OSC will make a case-by-case determination of whether it is appropriate to handle such complaints under the Student Disciplinary System. Among other factors, the Director will consider whether the alleged conduct affects a substantial University interest or whether the conduct may present a threat or danger to the community. When OSC undertakes to handle such complaints, the procedures described in this Charter will apply.

2. Except as provided below, the Student Disciplinary System has jurisdiction in all disciplinary matters arising under the regulations of the University against registered students, whether they be
undergraduate, graduate or professional students, or others, including students who are on unexpired leaves of absence. Approved or unapproved absence from the University is not a bar to the conduct or completion of disciplinary proceedings under this Charter.

3. In general, a student is any individual who has been admitted, matriculated, enrolled, or registered in any academic program or other educational activity provided by the Trustees of the University of Pennsylvania.

4. The Student Disciplinary System does not handle complaints against graduate and professional students when such cases lie within the jurisdiction of a hearing board or other disciplinary body established by the School of the University in which the student is enrolled. When such a School-based disciplinary procedure exists, it should be the recourse of first resort for the resolution of an alleged violation of University or School regulations, unless the OSC decides, in consultation with the Provost, that it is appropriate in light of the circumstances for the Student Disciplinary System to handle the matter. Schools with such procedures are encouraged to refer disciplinary matters (excluding academic integrity matters) to the University Mediation Program whenever appropriate. When an alleged violation of University regulations by a graduate or professional student is not within the jurisdiction of a disciplinary system established by the student's School, the Student Disciplinary System will have jurisdiction over the matter.

5. The Student Disciplinary System does not handle alleged violations of the University's parking regulations.

6. Alleged violations of the University's Residential Living policies and contracts are ordinarily handled under the procedures of the Department of Residential Living but, if serious enough to warrant sanctions beyond those which the Department of Residential Living is authorized to impose, may be referred by the Director of Residential Living to the OSC. The fact that proceedings have been held and sanctions imposed under Residential Living policies does not preclude proceedings under this Charter.

7. The Director of the Office of Student Conduct decides all questions of jurisdiction of the Student Disciplinary System arising under this Charter, consulting with the Provost (or designee) and with the University's General Counsel when necessary. When appropriate, the OSC may refer a complaint to another University office or disciplinary process.

C. General Principles of the Disciplinary System

1. The University's Student Disciplinary System is not a legal system, and University disciplinary proceedings are not civil or criminal litigation. Thus, they operate under different rules, standards, and procedures, and seek to achieve ends different from criminal or civil proceedings.

2. Any member of the University community may bring a complaint about student conduct or academic integrity to the attention of the Office of Student Conduct. Doing so in no way limits a complainant's rights or obligations to bring such matters to the attention of other University offices, officers, or resources, including the Office of the Ombudsman and appropriate Deans, or to seek recourse outside the University through civil or criminal legal proceedings.

3. In all cases, the University reserves the right to determine how to process a disciplinary complaint. Once a complaint is brought to the attention of the Office of Student Conduct, the OSC, on behalf of the University, will decide how the complaint will be handled, including whether disciplinary charges should be brought against a student.

4. Complainants in sexual misconduct cases have rights and responsibilities similar to respondents under this Charter. In addition, certain special procedures apply in sexual misconduct cases (see section II.J. (p. )).

5. Except as otherwise specified in this Charter, when appropriate and if all parties agree, a matter brought to the OSC may be resolved through mediation and will not result in charges or disciplinary hearings. Because of their seriousness within an academic community, alleged violations of the Code of Academic Integrity will not be referred for mediation. Thus, except in academic integrity matters and matters that warrant treatment as serious violations of the Code of Student Conduct or other University policies, the initial response by the OSC may be to refer the complainant and respondent to the University's Mediation Program. If mediation fails or is inappropriate, the OSC will begin the more formal disciplinary processes outlined in this Charter.

6. All members of the University community are required to cooperate with the Student Disciplinary System. Those individuals who may be interviewed or called as witnesses in a disciplinary matter (including respondents and complainants) are obligated to provide honest and complete statements to the OSC and to the Hearing Panel. While in some circumstances a respondent may choose not to answer questions or provide information because of pending civil claims or criminal charges arising out of the same or other events, the respondent's decision not to answer questions or provide information will not be a reason to delay or defer an investigation or proceedings under this Charter. A student who fails, without good cause, to appear for a hearing after receiving notice, or to cooperate with the investigation conducted by the OSC, may be charged with a violation of the Code of Student Conduct. Repeated disruption of disciplinary hearings or the disciplinary process by a student or the student's advisor may result in charges against the student of non-cooperation with the Student Disciplinary System or exclusion of the student or advisor from disciplinary proceedings, including disciplinary hearings. Such exclusion is not a bar to the completion of disciplinary proceedings involving that student.

D. Organization of the Disciplinary System

1. Office of Student Conduct
The Office of Student Conduct is the central office responsible for resolving alleged violations of University policies by students. The duties of the OSC include determining whether complaints warrant action by the OSC, referring complaints for mediation or resolution by other University offices, investigating complaints, determining whether to charge a student with violations of University policies, resolving complaints by voluntary agreements to sanctions, bringing charges of violations to a disciplinary hearing, presenting evidence at hearings, monitoring and enforcing the fulfillment of sanctions imposed pursuant to voluntary agreements or after disciplinary hearings, maintaining records of all disciplinary matters, providing administrative support for all aspects of the disciplinary process (including hearings), and preparing reports and compiling statistics.

2. University Mediation Program
The University Mediation Program (UMP) may use the volunteer services of faculty, students, and staff members who have been trained in mediation and dispute resolution and may also use resources available in the University's Law School, in University resource offices such as the Office of the Ombudsman, or outside the University.

3. University Honor Council
4. **Disciplinary Hearing Officer**

Every two years, the Provost, after consultation with the UHC, and the chairs of the Faculty Senate, will appoint a tenured member of the Standing Faculty of the University of Pennsylvania as Disciplinary Hearing Officer (DHO), preferably from among those faculty who have experience with the Student Disciplinary System. The DHO (or designee) selects members to serve on Disciplinary Hearing Panels and determines the time, location, etc., of hearings. The DHO presides over all disciplinary hearings held under this Charter. The DHO is responsible for overseeing the procedural integrity of disciplinary hearings. The DHO will, for example: consider and resolve pre-hearing challenges to the authority or procedures of a Disciplinary Hearing Panel; rule on all disqualification requests and objections to individual panel members; assist parties to adhere to the basic principles of fairness prior to, during, and subsequent to disciplinary proceedings; and may consult at any time with students, faculty members, the University's General Counsel or others about procedural issues. The DHO also participates in the training of prospective faculty and student members of Disciplinary Hearing Panels. The DHO serves and may be reappointed at the discretion of the Provost, but his or her removal or reappointment may not occur without prior consultation with the UHC and the chairs of the Faculty Senate.

5. **Disciplinary Appellate Officer**

Every two years, the Provost, after consultation with the UHC, and the chairs of the Faculty Senate, will appoint a tenured member of the Standing Faculty of the University of Pennsylvania as a Disciplinary Appellate Officer (DAO), preferably from among faculty who have experience with the Student Disciplinary System. The DAO decides appeals of findings and recommended sanctions made by Disciplinary Hearing Panels based on the record of such proceedings and written submissions from the relevant parties. The DAO serves and may be reappointed at the discretion of the Provost, but his or her removal or reappointment may not occur without prior consultation with the UHC, and the chairs of the Faculty Senate.

6. **Disciplinary Hearing Panels**

a. The University Honor Council (UHC) provides independent advice to the Provost and the OSC regarding the operation of the Student Disciplinary System in the area of academic integrity and student conduct, the general handling of academic integrity and conduct violations, appropriate sanctions for various types of academic integrity and conduct violations, and the effectiveness and implementation of the University’s Code of Student Conduct and Code of Academic Integrity. Members of the UHC also sit on Disciplinary Hearing Panels. The UHC meets regularly with the Director of the Office of Student Conduct and may also discuss academic integrity and conduct issues with appropriate administrators and student, faculty, or administrative groups or committees. In addition, the UHC initiates and participates in educational programs about academic integrity and student conduct and works to help students understand and respect the academic and behavioral standards of the University community.

b. The UHC consists of a minimum of 13 undergraduate students, chosen by current members of the UHC. The UHC is encouraged to ensure that nominees represent a broad cross-section of the undergraduate student body. The UHC selects a chair from among its members by a majority vote of the current members. Faculty members and graduate students designated by the Faculty Senate or Graduate and Professional Students Assembly (GAPSA) to sit on Disciplinary Hearing Panels may participate in the work of the UHC if the UHC so desires.

c. In disciplinary matters involving alleged violations of the Code of Academic Integrity, the Disciplinary Hearing Panel is composed of three faculty members and two students of the same category (undergraduate or graduate) as the respondent. If a disciplinary matter involves both undergraduate and graduate respondents, the panel will include at least one undergraduate and at least one graduate student and two faculty members; the fifth panel member will be an undergraduate or graduate student selected by the DHO.

d. Except for participation on the University Honor Council, no one designated to serve on Disciplinary Hearing Panels may serve simultaneously in any other capacity within the Student Disciplinary System.

e. If any nominating body chooses fewer than 13 members to serve on Disciplinary Hearing Panels or cannot make additional members available when needed, the Provost will make the necessary appointments to fill the complement of the appropriate group. If any member is unable to serve for any reason, a replacement is selected in the same manner that the original member was chosen.

f. Student members of Disciplinary Hearing Panels must be in good academic and disciplinary standing, as defined by their Schools. The UHC, as appropriate, by a vote of two-thirds of its members, may remove a member who fails to perform his or her duties. When a member ceases to be in good standing or is removed by the UHC, a replacement from the same category will be chosen in the same manner that the original member was chosen.

7. **Advisors**

a. Advisors help students involved in disciplinary proceedings to understand the disciplinary process, respect and comply with the provisions of this Charter, and deal with all aspects of the process. Any University faculty member, staff member, or student in good academic and disciplinary standing may serve as an advisor. The OSC maintains lists of individuals who are willing to serve as advisors and who have received training in the operation of the Student Disciplinary System.
b. Upon receiving notice of a complaint and the accompanying list of trained advisors, a respondent may select an advisor from this list or choose any other University faculty member, staff member, or student in good academic and disciplinary standing to advise the respondent during the disciplinary process. If criminal charges are pending against a respondent or, in the judgment of the Office of the University's General Counsel, are reasonably in prospect, the respondent's advisor may be an attorney who is not a member of the University community. In such instances, the attorney will be expected to observe the procedures of this Charter and comply fully and promptly with decisions of the DHO or other University officials or bodies charged with the administration of this Charter in the same manner expected of members of the University community.

c. An advisor may accompany any complainant, witness, or respondent to, and may participate in, any meeting regarding a disciplinary complaint. Advisors also may accompany complainants, respondents, and witnesses to hearings, but generally may not participate directly in such hearings (except as provided in section II.F.4.f and g. (p. ) below). Advisors may, however, quietly provide advice during the hearing and may also make a brief statement at the conclusion of the hearing, before the panel begins its deliberations.

d. Any advisor who fails to observe the procedures of this Charter or comply fully and promptly with decisions of the DHO may, after appropriate warning, be disqualified by the DHO from continuing to serve. In the event of such disqualification, the hearing may proceed whether or not a replacement advisor is available or it may be rescheduled at the sole discretion of the DHO. Any person disqualified from serving as an advisor will be ineligible to serve as an advisor for a period of two years. Repeated disruption of disciplinary hearings or the disciplinary process by an advisor may result in charges against the advisee of non-cooperation with the Student Disciplinary System. If the advisor is a member of the student body, faculty, or staff or the University, disciplinary charges may be brought against the advisor in the appropriate forum.

II. The Disciplinary Process

A. Bringing a Complaint to the Office of Student Conduct

1. Any member of the University community, who believes that a student has violated University rules, regulations or policies may file a complaint, which must be in writing, with the OSC. Students, faculty, staff members and trustees also may consult informally with the OSC staff to determine whether they wish to file a complaint. Others should consult with the Director about whether they may file a complaint under the Student Disciplinary System. Complaints made to other University offices or personnel also may be referred to the OSC. A complaint asks the OSC to consider the matter for possible referral or investigation.

2. The OSC promptly evaluates each complaint it receives to determine whether the University's Code of Student Conduct, Code of Academic Integrity, or other applicable rules, regulations or policies may have been violated. When the OSC determines that no such violation may have occurred, it may dismiss the matter without further investigation, or it may refer the parties to the University Mediation Program or elsewhere to resolve their dispute. When the OSC determines that a violation may have occurred, it may refer the matter for mediation or undertake an investigation that may lead to the filing of formal charges against a student or students.

3. A complaint is not a charge that a student has violated University regulations. Charges against a student are only made by the University (not by complainants) following an investigation. Until there is a determination to the contrary by voluntary agreement to sanctions or by a Disciplinary Hearing Panel, there is a presumption that an accused student has not violated University rules, regulations, or policies.

4. When a complaint is filed, the OSC promptly gives written notice of the complaint and its allegations to the student(s) alleged to have violated University rules. A copy of the Charter will be included with the notice, as well as a list of potential advisors who have received training from the OSC.

B. Resolving a Complaint by Mediation

1. The University encourages informal mediation whenever practical and appropriate. If the parties agree, at any time the OSC may refer any disciplinary matter other than an alleged violation of the Code of Academic Integrity to the University Mediation Program (UMP) or other resources for mediation. Members of the University community may also contact the University Mediation Program directly.

2. It is within the sole discretion of the OSC to determine whether a disciplinary complaint is suitable for mediation. If mediation fails or new information comes to light about an unresolved matter then in mediation, the OSC may proceed with an investigation and the filing of disciplinary charges. The OSC may also set a date after which it will begin to investigate the original complaint or file charges if a matter has not been successfully mediated.

3. If the OSC refers a complaint for mediation and both parties to the dispute agree to participate, the UMP will assign a trained mediator and advise the complainant(s) and respondent(s) in advance of the date, time and place set for mediation. In order to resolve a disciplinary matter by mediation, both the complainant and the respondent must agree, first, to participate in the mediation and, second, to the proposed resolution.

4. If a student fails to comply with the terms of a mediation agreement, the OSC may take steps to enforce the agreement (including use of a Disciplinary Hold or the filing of new charges under the Code of Student Conduct) or may investigate the original complaint and bring disciplinary charges under this Charter.

C. Investigating a Complaint

1. If, after a preliminary evaluation of a complaint, the OSC determines that a violation of the Code of Student Conduct may have occurred and if the complaint is inappropriate for mediation or mediation fails, the OSC will then investigate the complaint and determine whether to bring charges of a violation.

2. In the course of its investigation, the OSC may interview any witnesses, including the respondent(s) or potential respondent(s). The OSC will inform each witness that anything they say in such interviews may be introduced as evidence at a hearing.

3. Except in extraordinary circumstances, or if the complainant makes a request of the OSC to delay the investigation based on good cause, the OSC will make every effort to complete its investigation within 60 days of the filing of the complaint.

D. Filing Charges by the University Against a Student

In light of its investigation of a complaint, the OSC may file charges against a student(s) of a violation(s) of the University's Code of Student Conduct, Code of Academic Integrity, or other University rules, regulations, or policies. The OSC also may add charges beyond the scope
of the original complaint, may add additional students as respondents, or may dismiss the original complaint as unfounded. If the OSC decides to charge a student with a violation of University regulations, the OSC must inform the respondent(s) of the charges in writing, identifying the University rules, regulations, or policies alleged to have been violated. The OSC will inform both respondent(s) and complainant(s) whether charges have been filed.

E. Resolving Charges by Voluntary Agreement to Sanctions

1. Following the notice that charges have been filed against a student, the OSC may discuss with the respondent and the respondent’s advisor what disciplinary sanction(s) would be appropriate to resolve the matter by voluntary agreement to sanctions. The respondent may accept, reject, or propose an alternative to the proposed sanction(s) and may be accompanied and assisted by an advisor, who may participate in these discussions. Statements made during discussions about whether a respondent will enter into a voluntary agreement to sanctions may not be introduced as evidence at any subsequent hearing, but may provide a basis for further investigation by the OSC.

2. A resolution by voluntary agreement to sanctions may be entered into by written agreement at any time after a complaint has been filed and prior to a disciplinary hearing. All sanctions allowed under this Charter are available to the OSC as part of a resolution by voluntary agreement to sanctions. By agreeing to such a resolution, a respondent waives further proceedings under this Charter.

3. Complainants and complainants’ advisors are not parties to voluntary agreements to sanctions.

4. If, in the judgment of the OSC, a voluntary agreement to sanctions is not reasonably in prospect, or if the respondent(s) reject(s) a proposed sanction, the OSC may bring the disciplinary matter to a hearing.

F. Resolving Charges by Disciplinary Hearing

1. Scheduling Disciplinary Hearings
   a. If disciplinary charges are not resolved by a voluntary agreement to sanctions, the Disciplinary Hearing Officer (or designee) promptly begins the process of scheduling the Disciplinary Hearing, with due regard for the time required for all parties to prepare for the hearing. The DHO will provide reasonable advance notice in writing to the complainant(s), respondent(s), and witnesses of the date, time, and place of the hearing and of the names of the panel members assigned to hear the disciplinary matter.
   b. Hearings normally take place as soon as possible after the filing of charges, ordinarily within 30 days of the respondent’s request for a hearing or OSC’s decision to bring the matter to a hearing. Upon a showing of good cause by a party, the DHO may grant a reasonable extension of any time limit relating to a disciplinary hearing set forth in the Charter.
   c. The DHO may expedite a Disciplinary Hearing in appropriate circumstances, including disciplinary matters involving students who have been placed on mandatory temporary leave of absence or conditional attendance, graduating students, or students who are about to take a leave of absence or to leave campus to study elsewhere.

2. Disqualification of Hearing Panel Members
   a. Members of the Hearing Panel selected by the DHO (or designee) should disqualify themselves from hearing a disciplinary matter if they believe in good faith that their capacity for making an objective judgment in the disciplinary matter is, or may reasonably appear to be, impaired. Members should not disqualify themselves for any other reason.
   b. The respondent(s) or the OSC may object for specific cause to any panel member selected by the DHO. The objection must be in writing and must be received by the DHO at least 48 hours in advance of the date and time set for the hearing.
   c. The DHO will rule upon all disqualification requests and objections to panel members. If the DHO decides that a challenge is valid, or if there is a voluntary disqualification, the DHO, after notifying the respondent(s) and the OSC, will replace the disqualified member with another panel member randomly selected from the same category.

3. Pre-Hearing Exchanges and Testimony
   a. Within a reasonable time before the hearing or any other time frame specified by the DHO, the OSC and the respondent(s) will exchange among themselves and with the DHO copies of all exhibits to be presented, the names of witnesses to be called, and a brief summary of the substance of testimony expected to be presented to the Hearing Panel.
   b. When the DHO believes that it will contribute to the expedition and fairness of a Disciplinary Hearing, he or she may (but need not) ask the OSC to prepare a written statement of its case against the respondent(s) and give the respondent(s) a reasonable opportunity to prepare a written response. The OSC and the respondent(s) may also submit statements at their own initiative. The statements and any accompanying exhibits may be considered by the Hearing Panel, in addition to testimony, arguments, or evidence presented at the actual hearing.
   c. In exceptional circumstances, when a witness or exhibit does not become known or available until immediately before the hearing, the DHO may, at her or his discretion, permit the evidence to be presented or may reschedule the hearing to a later time.
   d. If a respondent or the OSC anticipates that a key witness will be unavailable for a hearing, they may ask the DHO to preserve the testimony of the witness on tape and present it as evidence at the hearing. The OSC and the respondent(s) must be notified in advance of the date, time and place of the taping. All parties who would be permitted to question such a witness at a hearing may question the witness at the taping.

4. Conduct of Hearings
   a. Disciplinary hearings are not trials, and they are not constrained by technical rules of procedure, evidence, or judicial formality. They are designed to encourage open discussion among the participants that promotes the Hearing Panel’s understanding of the facts, the individuals involved, the circumstances under which the incident occurred, the nature of the conduct, and the attitudes and experience of those involved. The rules of evidence applicable to legal proceedings do not apply to disciplinary hearings. Information, including hearsay evidence, may be considered if it is relevant, not unduly repetitious, and the sort of information on which responsible persons are accustomed to rely in the conduct of serious affairs.
   b. The DHO presides over all hearings and decides all questions about the admissibility of evidence and the conduct of hearings. While the DHO may be present for the Hearing Panel’s discussions to answer procedural questions, the DHO does not deliberate or vote with the Panel regarding its findings or its recommendation of sanctions.
c. Disciplinary hearings are held in private unless the respondent(s) and the complainant(s) agree in writing to an open hearing. The DHO may limit attendance at a hearing to ensure fair and orderly proceedings. If a hearing is opened in accord with this procedure, the DHO may, when necessary to maintain order or to protect the rights of participants, declare the hearing closed to the public. In a case involving important privacy interests, the DHO may close a hearing or part of a hearing that has been opened upon determining that the privacy rights of a participant may be jeopardized.

d. Upon a showing that the required notice was provided, the hearing against a respondent(s) may proceed in her or his absence.

e. At the hearing, the OSC presents the results of the OSC’s investigation of the complaint, calls witnesses to testify and presents the University’s evidence against the student(s). Members of the Hearing Panel may also call witnesses to testify and may question any witness appearing before it. Respondents may also call witnesses to testify and ask questions of all witnesses.

f. A respondent is responsible for presenting his or her own case before the Hearing Panel. However, at the discretion of the DHO, the respondent’s advisor may be permitted to question witnesses on behalf of a respondent or to address the Hearing Panel. The DHO’s exercise of discretion in this matter will be guided by the principles that govern disciplinary hearings, specifically fairness, the need for orderly procedures, and the Hearing Panel’s duty to understand the facts and parties in the disciplinary matter.

g. Complainants may attend the hearing, testify if they wish to do so, and may be accompanied by an advisor. Except as described in section II.J. (p. ) of this Charter, neither complainants nor their advisors may call witnesses or present evidence or arguments.

h. At the conclusion of the hearing, the OSC and the respondent(s) or their advisor(s) may make brief statements. At the discretion of the Disciplinary Hearing Officer, the complainant(s) or their advisor(s) may be permitted to make a brief statement. The time allowed for such statements will be set by the DHO.

i. The OSC will arrange for a verbatim transcript or recording to be made of all disciplinary hearings. The transcript or recording is the property of the University of Pennsylvania and becomes part of the record of the disciplinary proceedings.

5. Findings and Recommendations of the Hearing Panel

a. Only evidence presented at the hearing will be considered by the Hearing Panel. The Hearing Panel will presume a respondent innocent unless proven responsible for a violation by clear and convincing evidence. All decisions of the Hearing Panel require a majority vote.

b. Following the hearing, the members of the Hearing Panel meet to discuss in private their findings, which consist of two parts:
   1. a determination of whether the respondent is responsible for any violation; and
   2. if so, a recommendation of sanction(s).

c. The OSC may recommend to the Hearing Panel a sanction to be imposed if the Hearing Panel finds the respondent(s) responsible for a violation. The respondent(s) may respond to the OSC’s proposed sanction(s). Before the Hearing Panel makes its recommendation on sanctions, it will review any previous disciplinary offenses by and sanctions against the respondent(s) and sanctions imposed in other similar cases.

d. If the Hearing Panel determines that the respondent(s) is not responsible for a violation, no sanction may be recommended against the respondent(s) and the respondent may not be subject to further proceedings under this Charter on the same charge(s).

e. If the Hearing Panel finds that a student is responsible for a violation of University rules or regulations, it will recommend to the Provost appropriate sanctions. Only the Provost (or designee), acting on behalf of the University, may actually impose a sanction on a student. The Provost (or designee) will not impose a sanction until after any appeal of the Hearing Panel’s decision has been decided by the DAO.

6. Notice of Hearing Panel Decision

The Hearing Panel will promptly transmit its decision, including its findings and recommendation regarding sanctions, in writing to the DAO, the OSC, the respondent(s) and the Provost as soon as possible after the end of the hearing.

G. Appealing a Hearing Panel’s Decision

1. The Disciplinary Appellate Officer (DAO) has exclusive jurisdiction to decide appeals. Appeals are based solely on the record of the disciplinary hearing and the written submissions and responses of the respondent(s) and the OSC.

2. Only respondent(s) may appeal the Hearing Panel’s findings of responsibility except where applicable laws or regulations may extend this right to complainants. Both the respondent(s) and the OSC may appeal the Hearing Panel’s recommendation of sanction(s). An appellant must submit any appeal to the DAO in writing within 10 days after the Hearing Panel has rendered its opinion. The appeal must state in detail the specific grounds upon which it is based and must be sent to the OSC and respondent(s), as appropriate.

3. When the appeal is received, the OSC provides the DAO with a copy of the respondent’s charge letter, a copy of the Hearing Panel’s findings, a verbatim transcript or tape recording of the Disciplinary Hearing, and any exhibits considered by the panel in reaching its recommendations. A response to an appeal must be in writing and must be submitted to the DAO within 10 days from the date the appeal is filed.

4. Appellate review is limited to allegations of material and prejudicial procedural error in the conduct of hearings, error in the interpretation or application of relevant University regulations, consideration of new evidence sufficient to alter the Hearing Panel’s findings or severity of the recommended sanctions. If the DAO finds sufficient basis, he or she may reverse or modify the Hearing Panel’s findings or proposed sanctions, or may remand the disciplinary matter for further investigation by the OSC or a new hearing before a new Hearing Panel. However, the DAO may not recommend a more severe sanction(s) unless the OSC has appealed the sanction(s) recommended by the Hearing Panel.

5. After considering an appeal, the Disciplinary Appellate Officer will promptly issue his or her decision in writing and will provide copies to the OSC, the DHO, the Provost, the respondent(s) and other appropriate parties.

H. Imposing Sanctions on a Student

1. Sanctions recommended against a respondent by a Hearing Panel or the DAO are imposed by the Provost (or designee) and may include any reasonable sanction, including, but not limited to, the following:
   • Warning: A Warning is a written admonition given by the OSC on behalf of the University in instances of minor misconduct.
Reprimand: A Reprimand is written censure for violation of the
University’s rules, regulations, or policies, given by the OSC on
behalf of the University, which includes notice to the student
that continued or repeated conduct violations will result in the
imposition of more serious sanctions.

Fine: A monetary Fine may be levied as a disciplinary sanction
and is payable to the Trustees of the University of Pennsylvania.
(Not appropriate in cases of academic integrity violations.)

Restitution: Restitution is reimbursement for the damage, loss,
or misappropriation of University private or public property or
compensation for injury to individuals. Restitution may take the
form of monetary payment, property, or appropriate service. (Not
appropriate in cases of academic integrity violations.)

Disciplinary Probation: Disciplinary Probation may be imposed
for a specified period or indefinitely (i.e., for as long as and
whenever a student is a full- or part-time student at the University
of Pennsylvania). Probation may be imposed for a single
instance of misconduct or for repeated minor misconduct. Any
future conduct or academic integrity violation by a student
on Disciplinary Probation, found to have occurred during the
probationary period, may be grounds for suspension or, in
especially serious instances, expulsion from the University.

Withdrawal of Privileges: Withdrawal of Privileges is the denial
of specified privileges or the ability to participate in specified
activities for a designated period of time.

Suspension: Suspension is the termination of student status
and separation from the University until a specified date.
Suspension means the loss of all rights and privileges normally
accompanying student status. While on disciplinary suspension,
students may not obtain academic credit at the University or
elsewhere toward completion of a University of Pennsylvania
degree. Students are eligible to return to the University after
the specified suspension term has elapsed. Suspension is imposed
in instances of serious misconduct; it is generally the minimum
sanction imposed for a violation of the Code of Academic
Integrity.

Indefinite Suspension: An Indefinite Suspension is termination
of student status and separation from the University for an
unspecified period, without an automatic right of return to the
University as a student (though specific conditions for return
as a student may be specified). When the conditions of an
Indefinite Suspension have been fulfilled, the student must make
a formal request, as specified in the conditions, to return to
student status. Indefinite suspension is imposed in instances
of extremely serious misconduct or in instances of continued
serious misconduct following the imposition of probation or
suspension for a specified period.

Expulsion: Expulsion is a permanent termination of student
status and permanent separation from the University of
Pennsylvania. Expulsion is imposed in instances of the most
serious misconduct or in instances of continued serious
misconduct following the imposition of probation or suspension.

2. In addition to the sanctions defined above, students may be required
to perform a designated number of hours of University or other
community service or to utilize University or other educational or
counseling services related to the nature of the misconduct.

3. Sanctions may be imposed alone or in combination with other
sanctions. The Disciplinary Hearing Panel or the DAO may
recommend whether the sanctions should appear on the transcript of
a respondent and if so, for how long.

4. After the imposition of sanctions, a faculty member involved in an
academic integrity matter will be informed of the outcome of the
disciplinary proceedings. If the student has been found not to be
responsible for an academic integrity violation, the instructor should
assign a grade (which may differ from the grade originally assigned)
based on the student’s academic performance in the course. If
the student has been found responsible for an academic integrity
violation, the instructor may assign any grade the instructor deems
appropriate. In the event that the student believes the final grade
is unfair or fails to take account of the outcome of the disciplinary
proceeding, the student may appeal the grade through the existing
academic grievance procedure for the evaluation of academic work
established by each School and academic department.

I. Fulfilling Sanctions Imposed by the University

1. Under the Code of Student Conduct, students are required to comply
with all disciplinary sanctions. Failure to do so constitutes a violation
of the Code and is itself subject to disciplinary proceedings by the
OSC.

2. The OSC monitors the implementation and fulfillment of sanctions. In
performing this duty, the OSC will have the cooperation of the Division
of University Life, the respondent’s Dean, and other appropriate
University offices. No sanction will be enforced while an appeal is
pending.

J. Special Procedures for Sexual Misconduct Cases

In sexual misconduct and other sex discrimination cases, the OSC will
follow applicable federal law, including Title IX of the Higher Education
Amendments of 1972, as amended.

The complainants in sexual misconduct cases have rights and
responsibilities similar to the respondents under this Charter. The
time frames set for respondents also apply to complainants and when
notice is required to be provided to the respondent, similar notice will be
provided to the complainant.

1. Specified Rights of Complainants in Sexual Misconduct Cases

The complainant will have an opportunity to participate in the
entire disciplinary process, including the opportunity to provide
information and witnesses during the investigation to participate in
the preliminary exchange of information, to attend the disciplinary
hearing, and to present evidence and witnesses at the hearing.
The complainant will have an opportunity equal to the respondent to
have others present during meetings and at the disciplinary hearing.
The complainant will be informed of the outcome of his or her
complaint and any appeal.

2. Investigation and Pre-Hearing Stages

a. An OSC staff member will ordinarily meet with the complainant
to hear or clarify his or her account of the incident and to review
the disciplinary process. To initiate a formal complaint, the
complainant must submit a written complaint.

b. OSC will make every effort to complete its investigation within
60 days from the filing of a formal complaint. In extraordinary
cases, such as when the gathering of information is completely
under the control of law enforcement, OSC’s investigation may
be delayed. In the event of such delay, OSC will advise the
complainant of the reason for the delay. An investigation may
also be delayed upon the complainant’s request based on good
cause.

c. During the investigation, and until resolution of the matter,
interim restrictions, including restrictions on contact between
III. Additional Matters

A. Administration of the Disciplinary System

1. The Provost is responsible for implementation of this Charter, administrative oversight of the Student Disciplinary System, including the OSC, and ensuring that the Student Disciplinary System functions fairly and in furtherance of the educational mission of the University. The Provost may instruct the OSC regarding the handling of specific cases, but he or she may not so instruct the DHO, the DAO, or the members of Disciplinary Hearing Panels.

2. When circumstances warrant, the OSC may take such administrative steps as may be necessary and feasible to effect the prompt resolution of a disciplinary matter, including, but not limited to, tape recording the testimony of witnesses who may be unavailable at the time of hearing, making special arrangements to ensure the attendance of complainants, respondents, witnesses, or other participants at a hearing and scheduling hearings outside of the normal academic year.

3. In any disciplinary matter in which a member of the Student Disciplinary System cannot perform her or his duties under this Charter, an alternate may be designated by the Provost using the procedures appropriate to that individual's position in the system. In addition, when the Provost determines that circumstances warrant, such as (but not limited to) when a conflict of interest or a particularly complex or controversial disciplinary matter arises, the Provost may appoint a special OSC staff member, a special Disciplinary Hearing Officer, or a special Disciplinary Appellate Officer using the procedures appropriate to the position.

B. Reports to the University Community

1. Subject to the limitations imposed by law and the University's policies on the confidentiality of student records and information, the OSC and the University Honor Council, in consultation with the Provost, will make periodic reports to inform the University community about the character and extent of the work of the Disciplinary System, including the nature of violations of University rules and regulations and the sanctions imposed. The reports of the OSC will deal both with disciplinary matters that go to hearing and with disciplinary matters that are resolved before hearing, and will include such information as the total number of disciplinary matters handled during the preceding year broken down by type of resolution (e.g., mediation, voluntary agreement to sanctions, hearing, etc.), by type of violation, by type of sanction(s) imposed, by whether or not the respondent(s) were found responsible for a violation, and so forth.

2. With the approval of the Provost, the OSC may also make extraordinary reports to the University community concerning the outcome of certain exceptional disciplinary matters, subject to the limitations imposed by law and the University's policies on the confidentiality of student records and information.

C. Disciplinary Holds

At any time after the filing of a complaint, the OSC, after consulting with the student's academic dean, may place a "Disciplinary Hold" on the academic and/or financial records of any student for the purpose of preserving the status quo pending the outcome of proceedings, enforcing a disciplinary sanction, or ensuring cooperation with the Student Disciplinary System. A Disciplinary Hold may prevent, among other things, registration, the release of transcripts, and the awarding of a degree.

D. Mandatory Leave of Absence and Conditional Attendance

In extraordinary circumstances, when a student's presence on campus is deemed by the University to be a threat to order, health, safety, or the conduct of the University's educational mission, the Provost (or designee), in consultation with the student's Dean or Associate Dean, may place the student on a mandatory temporary leave of absence or impose conditions upon the student's continued attendance, pending a hearing of disciplinary charges. When reasonably possible, the student will be provided with an opportunity to be heard before a decision is made by the Provost (or designee) to impose a mandatory temporary leave of absence or conditions on the student's attendance. At the respondent's request, and where feasible, the OSC may expedite the investigation of a complaint and the disciplinary hearing against a student placed on a mandatory temporary leave of absence or conditional attendance.
E. Civil or Criminal Proceedings
The University may proceed with disciplinary proceedings against a student under this Charter regardless of possible or pending civil claims or criminal charges arising out of the same or other events. The OSC, with the concurrence of the Provost and after consultation with the University’s General Counsel, will determine whether to proceed with charges against a student who also faces related charges in a civil or criminal tribunal. If the University defers proceeding with disciplinary charges against a student in light of related charges in a civil or criminal tribunal, the University may at any subsequent time proceed with disciplinary proceedings against that student under this Charter irrespective of the time provisions set forth in this Charter.

F. Disciplinary Records
1. Maintenance of Records
Except as may be otherwise provided by applicable law, records of all complaints, disciplinary proceedings, mediations, and voluntary agreements to sanctions are maintained by the OSC in accordance with the University’s Protocols for the University Archives and Records Center and University policies on the confidentiality and maintenance of student records.

2. Confidentiality
Except as may be otherwise provided by applicable law, all disciplinary proceedings, the identity of individuals involved in particular disciplinary matters, and all disciplinary files, testimony, and findings are confidential, in accordance with University policies and federal law concerning the confidentiality of student records. However, no provision of this Charter or the University’s policies on confidentiality shall be interpreted as preventing a student from seeking legal advice.

3. Policy Violation of Confidentiality
Failure to observe the requirement of confidentiality of a disciplinary hearing by any member of the University community, other than the respondent, constitutes a violation of University rules and may subject the individual to the appropriate procedures for dealing with such violations. The respondent may disclose confidential information pertaining to him- or herself but may not violate the confidentiality of others. If the respondent discloses, causes to be disclosed, or participates in the disclosure of information that is confidential, any person whose character or integrity might reasonably be questioned as a result of such disclosure shall have the right to respond in an appropriate forum, limited to the subject matter of the initial disclosure.

G. Release of Information on Disciplinary Proceedings
1. To provide students involved in disciplinary matters with appropriate liaison with their School offices in regard to their academic work, the Dean or appropriate Associate Dean of the School(s) of the respondent(s) will be confidentially informed when a complaint is filed, when a sanction is imposed, or when a disciplinary complaint is otherwise resolved by the Student Disciplinary System. When a sanction is imposed, the Director of Career Planning and Placement may be informed by the OSC if the sanction(s) is reportable outside the University. When a transcript notation is required as part of a sanction, the University Registrar is also informed and required to implement the sanction as directed by the OSC on behalf of the Provost.

2. As required by law, in disciplinary matters involving allegations of sexual offenses, the complainant(s) will be informed of the outcome of the proceeding, including voluntary agreement to sanctions.

H. Reportability of Sanctions
1. Subject to applicable law and the University’s policies on the confidentiality of student records and information, any disciplinary sanction may be reportable outside the University of Pennsylvania, subject to specific policies governing the reporting of sanctions adopted by the Council of Undergraduate Deans for undergraduate students and the Council of Graduate Deans for graduate and professional students.

2. Resolution of disciplinary charges by voluntary agreement to sanctions is treated like a finding of responsibility and is reportable in the same manner as sanctions imposed following a Disciplinary Hearing.

I. Amendment of the Charter
Amendments to this Charter may be recommended by the UHC, OSC, University Council, Faculty Senate Executive Committee, or other appropriate members of the University community and proposed by the Provost. Amendments take effect upon the approval of the Council of Deans, except that the Council of Deans may at its discretion refer proposed amendments to the Deans and faculties of the individual Schools for approval.

(Classroom Guidelines
No Eating, Drinking or Smoking
Based on recommendations that were made by the Classroom Facilities Review Committee in their report on February 11, 1992 (Almanac, March 17, 1992), we are currently upgrading the conditions of the central-pool classrooms throughout the University. That report also underscored the need for the University Community to adhere to University guidelines that encourage everyone NOT to eat, drink or smoke in a University classroom.

Faculty and teaching assistants should take responsibility for the classrooms in which they teach. This responsibility includes:
- making sure that food and drink never enter the classroom;
- not allowing anyone to smoke in the classroom;
- seeing that students remove any personal items they bring into the classroom; and
- reporting to the building administrator any classroom in need of maintenance, housekeeping, or equipment repairs.

Classrooms can only be maintained at an acceptable level if the above guidelines are maintained and enforced.

Closed Circuit Television Monitoring and Recording of Public Areas for Safety and Security Purposes

I. Purpose
The purpose of this policy is to regulate the use of closed circuit television (CCTV) cameras to monitor and record public areas for the purposes of safety and security.

II. Scope
This policy applies to all personnel, UPHS, schools and centers of the University, in the use of CCTV monitoring and recording. Legitimate uses of this technology related to research are covered by University policies governing research with human subjects and, therefore, excluded from this policy.

III. General Principles
1. The Division of Public Safety is committed to enhancing the quality of life of the campus community by integrating the best practices of public and private policing with state-of-the-art technology. A critical component of a comprehensive security plan using state-of-the-art technology is closed circuit television (CCTV).
2. The purpose of CCTV monitoring of public areas by security personnel is to deter crime and to assist the Penn Police in protecting the safety and property of the University community. Any diversion of security technologies and personnel for other purposes (e.g., CCTV monitoring of political or religious activities, or employee and/or student evaluations) would undermine the acceptability of these resources for critical safety goals and is therefore prohibited by this policy.
3. Video monitoring for security purposes will be conducted in a professional, ethical and legal manner. Personnel involved in video monitoring will be appropriately trained and continuously supervised in the responsible use of this technology. Violations of the Code of Procedures for video monitoring referenced in this policy will result in disciplinary action consistent with the rules and regulations governing employees of the University.
4. Information obtained through video monitoring will be used exclusively for security and law enforcement purposes. Information obtained through video monitoring will only be released when authorized by the Vice President of Public Safety according to the procedures established in this policy.
5. Video monitoring of public areas for security purposes will be conducted in a manner consistent with all existing University policies, including the Non-Discrimination Policy, the Sexual Harassment Policy, Open Expression Guidelines and other relevant policies. The code of practice for video monitoring prohibits monitoring based on the characteristics and classifications contained in the Non-Discrimination Policy (e.g., race, gender, sexual orientation, national origin, disability, etc.)
6. Video monitoring of public areas for security purposes at the University is limited to uses that do not violate the reasonable expectation to privacy as defined by law.
7. To maintain an informed University community, the Division of Public Safety will periodically disseminate written materials describing the purpose and location of CCTV monitoring and the guidelines for its use. The location of outdoor CCTV cameras monitored by the Division of Public safety will be published in Almanac.
8. Information obtained in violation of this policy may not be used in a disciplinary proceeding against a member of the University faculty, staff or student body.
9. All existing uses of video monitoring and recording must comply with this policy.

IV. Responsibilities
1. The Division of Public Safety is the department authorized to oversee and coordinate the use of CCTV monitoring for safety and security purposes at the University. All University areas using CCTV monitoring are responsible for implementing this policy in their respective operations. Public Safety has primary responsibility for disseminating the policy and assisting other units in implementing the policy and procedures.
2. The Vice President of Public Safety has the responsibility to authorize all CCTV monitoring for safety and security purposes at the University. All new installations will follow the Division of Public Safety operating principles. All existing CCTV monitoring systems will be evaluated for compliance with this policy.
3. The Division of Public Safety will monitor new developments in the relevant law and in security industry practices to ensure that CCTV monitoring at the University is consistent with the highest standards and protections.
4. A CCTV Monitoring Committee will be established to assure that the Division of Public Safety adheres to established policy and procedure in the use of CCTV and to review camera locations and request for release of recorded video images.
   a. The CCTV Monitoring Committee will consist of seven members who will serve for a term of one year
   
   The Chairperson of the University Council’s Committee on Campus & Community Life or his/her designee will serve as chair.
   Two faculty members appointed by the Chair of the Faculty Senate
   One member appointed by the President
   One student member
   One staff member
   Representative of the Office of Audit & Compliance & Privacy
   An individual may appeal an adverse decision by the CCTV Monitoring Committee through existing University appeal mechanisms such as the Committee on Open Expression or the University Ombudsman.
   b. The CCTV Monitoring Committee will review camera locations to ensure the perimeter of view of public cameras conforms to this policy.

   The proposed location of permanent CCTV cameras will be provided to the CCTV Monitoring Committee for review and published in the Almanac before installation. A list of all University-owned or controlled camera locations will be published semi-annually in Almanac and made available by the Division of Public Safety to anyone requesting the list.

   The locations of temporary cameras to be used for special events will be reviewed by the CCTV Monitoring Committee for approval and published in Almanac before the event if possible.
Closed Circuit Television Monitoring and Recording of Public Areas for Safety and Security Purposes

V. Procedures

1. All operators and supervisors involved in video monitoring of public areas will perform their duties in accordance with the Code of Practice consistent with this policy developed by the Division of Public Safety.

2. Division of Public Safety Management will assure that responsible and proper camera monitoring practices by control operators is continuous.

3. The Division of Public Safety has posted signage at appropriate locations. Signage states: “This area is subject to Video Monitoring by the University of Pennsylvania Police Department.”

4. The Division of Public Safety will limit camera positions and views of residential housing. Any view given to the housing will be no greater than what is available with unaided vision. Furthermore, the view of a residential housing facility must not violate the standard of “reasonable expectation of privacy.”

5. The Division of Public Safety Central Monitoring Center and other central monitoring centers will be configured to prevent camera operators tampering with or duplicating recorded video information.

6. Recorded video will be stored for a period not to exceed 30 days and will then be erased, unless retained as part of a criminal investigation or court proceedings (criminal or civil), or other bona fide use as approved by the Vice President of Public Safety and the CCTV Monitoring Committee.

7. Recorded video images will be stored in a secure location with access by authorized personnel only.

8. Camera control operators will conduct video observation of areas only in plain view of others situated in the public area viewable to the public.

9. Camera control operators will be trained in the technical, legal and ethical parameters of appropriate camera use.
   a. Camera control operators will receive a copy of this policy and provide written acknowledgement that they have read and understood its contents.
   b. Camera control operators will receive training in cultural awareness.

10. Camera control operators will not monitor individuals based on characteristics of race, gender, ethnicity, sexual orientation, disability, or other classifications protected by the University’s Non-Discrimination Policy. Camera control operators will monitor based on suspicious behavior, not individual characteristics.

11. Camera control operators will not spot and continuously view people becoming intimate in public areas.

12. Camera control operators will not view private rooms or areas through windows.

13. Mobile video equipment may be used in criminal investigations. Mobile video equipment will only be used in non-criminal investigations in specific instances creating significant risk to public safety, security, and property as authorized in writing by the President to the Division of Public Safety and the Open Expression Committee. Portable hidden cameras with recording equipment will only be used for criminal investigation by the University Police Detective Unit with the approval of the Vice President of Public Safety.

Examples of Video Monitoring and Recording of Public Areas

Legitimate safety and security purposes include, but are not limited to the following:

- Protection of buildings and property
- Building perimeter, entrances and exits, lobbies and corridors, receiving docks, special storage areas, laboratories, cashier locations, etc.
- Monitoring of Access Control Systems

(Note: “Temporary cameras” does not include mobile video equipment or hidden surveillance cameras used for criminal investigations.)

Included with the list of CCTV camera locations will be a general description of the technology employed and the capabilities of the cameras.

Students and staff entering certain sensitive locations on campus may have an increased concern for privacy or confidentiality. In order to prevent a possible chilling effect on the use of service at these locations, concerned persons may petition the CCTV Monitoring Committee to forgo the installation of a proposed camera or for the removal of an existing camera. The CCTV Monitoring Committee will determine the appropriateness of an installation weighing the concerns of the person(s) making the requests and the safety and security of the entire community.

In recognizing students may also have an enhanced expectation of privacy in the hallways and lounges of residence facilities, CCTV monitoring for safety and security purposes will not be used in residential hallways and lounges unless the Vice President of Public Safety determines a specific safety/security risk exists.

The CCTV Monitoring Committee will review complaints regarding camera locations and determine whether the CCTV Monitoring Policy is being followed. The panel should weigh whether the potential increment in community security outweighs any likely infringement of individual privacy.

c. The CCTV Monitoring Committee, with the Vice President of Public Safety, will review all requests received by the Division of Public Safety to release recorded video images obtained through CCTV monitoring. No releases of recorded video images will occur without authorization by the Vice President and the CCTV Monitoring Committee. Excluded from review by the CCTV Monitoring Committee are releases of recorded video images directly related to a criminal investigation, arrest or subpoena. The CCTV Monitoring Committee may also approve release of recorded video images only for legitimate purposes, such as to protect the University and its members from harm or liability. Five affirmative votes are necessary to approve the release of recorded video images. Any release of recorded video images will be recorded on a written log.

d. Any member of the CCTV Monitoring Committee may audit the Division of Public Safety’s CCTV monitoring operations, including video storage, at any time without prior notice.

e. The Chair of University Council’s Committee on Campus & Community Life will report to the CCTV Monitoring Committee at least once a year describing all requests for camera locations and release of recorded video images and disposition of those requests.

f. The CCTV Monitoring Committee will review this policy annually and recommend revisions if needed.
• Monitor and record restricted access transactions at entrances to buildings and other areas.
• Verification of security alarms
• Intrusion alarms, exit door controls, hold-up alarms
• Video Patrol of Public Areas
• Transit Stops, parking lots, public streets (enclosed and unenclosed), shopping areas and vehicle intersections, etc.
• Criminal Investigation
• Robbery, burglary, and theft surveillance
• Protection of pedestrians
• Monitoring of pedestrian and vehicle traffic activity

Code of Academic Integrity

Since the University is an academic community, its fundamental purpose is the pursuit of knowledge. Essential to the success of this educational mission is a commitment to the principles of academic integrity. Every member of the University community is responsible for upholding the highest standards of honesty at all times. Students, as members of the community, are also responsible for adhering to the principles and spirit of the following Code of Academic Integrity.

Academic Dishonesty Definitions

Activities that have the effect or intention of interfering with education, pursuit of knowledge, or fair evaluation of a student's performance are prohibited. Examples of such activities include but are not limited to the following definitions:

A. Cheating: using or attempting to use unauthorized assistance, material, or study aids in examinations or other academic work or preventing, or attempting to prevent, another from using authorized assistance, material, or study aids. Example: using a cheat sheet in a quiz or exam, altering a graded exam and resubmitting it for a better grade, etc.
B. Plagiarism: using the ideas, data, or language of another without specific or proper acknowledgment. Example: copying another person's paper, article, or computer work and submitting it for an assignment, cloning someone else's ideas without attribution, failing to use quotation marks where appropriate, etc.
C. Fabrication: submitting contrived or altered information in any academic exercise. Example: making up data for an experiment, fudging data, citing nonexistent articles, contriving sources, etc.
D. Multiple submission: submitting, without prior permission, any work submitted to fulfill another academic requirement.
E. Misrepresentation of academic records: misrepresenting or tampering with or attempting to tamper with any portion of a student's transcripts or academic record, either before or after coming to the University of Pennsylvania. Example: forging a change of grade slip, tampering with computer records, falsifying academic information on one's resume, etc.
F. Facilitating academic dishonesty: knowingly helping or attempting to help another violate any provision of the Code. Example: working together on a take-home exam, etc.
G. Unfair advantage: attempting to gain unauthorized advantage over fellow students in an academic exercise. Example: gaining or providing unauthorized access to examination materials, obstructing or interfering with another student's efforts in an academic exercise, lying about a need for an extension for an exam or paper, continuing to write even when time is up during an exam, destroying or keeping library materials for one's own use, etc.
If a student is unsure whether his action(s) constitute a violation of the Code of Academic Integrity, then it is that student's responsibility to consult with the instructor to clarify any ambiguities.
(Source: Almanac, September 10, 1996, Volume 43, No. 3) (http://www.upenn.edu/almanac/v43/n03/codechar.html)

Code of Student Conduct

I. Preamble

When Benjamin Franklin founded the Pennsylvania Academy, he defined its mission as "education for citizenship." In pursuit of this mission, the University of Pennsylvania is committed to achieving academic excellence, to creating an environment for inquiry and learning, and to cultivating responsible citizenship in the larger society.

The University of Pennsylvania is a community in which intellectual growth, learning from others, mutual tolerance, and respect for freedom of thought and expression are principles of paramount importance. In an environment that promotes the free interchange of ideas, cultural and intellectual diversity, and a wealth of social opportunities, Penn students take advantage of the academic and non-academic opportunities available to them, deepening their intellectual insights through formal instruction, and expanding their educational experience beyond their academic programs. Members of the Penn community participate actively in the greater Philadelphia, state, national, and international communities in which they reside. "Citizens" of the University community include students, faculty, staff and those otherwise affiliated with the University.

Accepting membership into the University of Pennsylvania community as a student entails an obligation to promote its welfare by assuming the rights and responsibilities listed below. Each individual member of this community is responsible for his or her own actions and is expected to respect the rights of others.

II. Rights of Student Citizenship

Membership in the University of Pennsylvania community affords every student certain rights that are essential to the University's educational mission and its character as a community:

a. The right to have access to and participate in the academic and non-academic opportunities afforded by the University, subject to applicable standards or requirements.
b. The right to freedom of thought and expression.
c. The right to be free from discrimination on the basis of race, color, gender, sexual orientation, religion, national or ethnic origin, age, disability, or status as a disabled or Vietnam Era veteran.
d. The right to fair University judicial process in the determination of accountability for conduct.

III. Responsibilities of Student Citizenship

Students are expected to exhibit responsible behavior regardless of time or place. Failure to do so may result in disciplinary action by the University. Responsible behavior is a standard of conduct which reflects higher expectations than may be prevalent outside the University.
Concerts Policy

The Social Planning and Events Committee (SPEC) is responsible for University concerts and other major events that involve artists’ fees, except those that are related to an academic program or to the program of the Annenberg Center. SPEC also is responsible for coordinating the scheduling of such events. Student organizations or other campus groups planning a major ticketed event such as a concert, comedy show, or other event that involves the payment of professional artists’ fees should contact the Office of Student Affairs for more information.

Exceptions to this policy must be approved in writing, in advance, by the Office of Student Affairs.

All funds from ticket sales for concerts and other major ticketed events sponsored by student organizations must be deposited in a University account and disbursed in accordance with established student activities guidelines.

Confidentiality of Student Records

I. Statement of Purpose

The purpose of this policy is to describe the rights and responsibilities of students, faculty and staff regarding the confidentiality of student records, including as specified under the Family Educational Rights and Privacy Act ("FERPA").

II. Scope

A. Information

This policy pertains to personally identifiable information contained in education records. The term “education records” generally includes records that are directly related to a student and maintained by the University or a party acting for the University.

Exceptions:

1. Sole possession of the maker. This policy does not apply to records kept in the sole possession of the maker and used only as a personal memory aid and not accessible to any other individual except a temporary substitute of the maker of the record.
2. Peer graded papers. This policy does not apply to grades on peer-graded papers/assignments before they are collected and recorded by a teacher.
3. Law enforcement records. This policy does not apply to records created and maintained by a law enforcement unit, including the Penn Police, for law enforcement purposes.
4. Employment records. This policy does not apply to records relating exclusively to an individual in his or her capacity as an employee except that records regarding an individual in attendance who is employed as a result of his or her status as a student.
5. Treatment-related records. This policy does not apply to records made or maintained by a healthcare professional that are used only in connection with treatment of the student and disclosed only to individuals providing treatment.
6. Other FERPA exceptions. This policy does not apply to any records or information specifically excepted from the term “education records” under FERPA and its implementing regulations, as they may be amended.

B. Individuals

1. Individuals in attendance. This policy applies to students who are or have been in attendance at the University.
2. Alumni. In general, this policy does not apply to records that contain only information about an individual after he or she is no longer a student at the University. However, if the record relates back to the student’s attendance at the University, it is still an “education record.” A separate policy protecting the privacy of alumni records may be found at http://www.upenn.edu/privacy.

Concerts Policy

The Social Planning and Events Committee (SPEC) is responsible for University concerts and other major ticketed events that involve artists’ fees, except those that are related to an academic program or to the program of the Annenberg Center. SPEC also is responsible for coordinating the scheduling of such events. Student organizations or other campus groups planning a major ticketed event such as a concert, comedy show, or other event that involves the payment of professional artists’ fees should contact the Office of Student Affairs for more information.

Exceptions to this policy must be approved in writing, in advance, by the Office of Student Affairs.

All funds from ticket sales for concerts and other major ticketed events sponsored by student organizations must be deposited in a University account and disbursed in accordance with established student activities guidelines.

Confidentiality of Student Records

I. Statement of Purpose

The purpose of this policy is to describe the rights and responsibilities of students, faculty and staff regarding the confidentiality of student records, including as specified under the Family Educational Rights and Privacy Act ("FERPA").

II. Scope

A. Information

This policy pertains to personally identifiable information contained in education records. The term “education records” generally includes records that are directly related to a student and maintained by the University or a party acting for the University.

Exceptions:

1. Sole possession of the maker. This policy does not apply to records kept in the sole possession of the maker and used only as a personal memory aid and not accessible to any other individual except a temporary substitute of the maker of the record.
2. Peer graded papers. This policy does not apply to grades on peer-graded papers/assignments before they are collected and recorded by a teacher.
3. Law enforcement records. This policy does not apply to records created and maintained by a law enforcement unit, including the Penn Police, for law enforcement purposes.
4. Employment records. This policy does not apply to records relating exclusively to an individual in his or her capacity as an employee except that records regarding an individual in attendance who is employed as a result of his or her status as a student.
5. Treatment-related records. This policy does not apply to records made or maintained by a healthcare professional that are used only in connection with treatment of the student and disclosed only to individuals providing treatment.
6. Other FERPA exceptions. This policy does not apply to any records or information specifically excepted from the term “education records” under FERPA and its implementing regulations, as they may be amended.

B. Individuals

1. Individuals in attendance. This policy applies to students who are or have been in attendance at the University.
2. Alumni. In general, this policy does not apply to records that contain only information about an individual after he or she is no longer a student at the University. However, if the record relates back to the student's attendance at the University, it is still an “education record.” A separate policy protecting the privacy of alumni records may be found at http://www.upenn.edu/privacy.
3. Deceased individuals. Neither FERPA nor this policy applies to records of deceased persons. The person responsible for such records, however, should exercise informed discretion in responding to requests for disclosures and should ensure that the person making the request has a legitimate interest in the information and that the privacy interests of the deceased and third parties are considered.

4. Applicants. This policy does not apply to applicants for admission. However, the admission-related records of applicants who become students at the University are subject to the policy.

III. Notice

Penn will annually inform individuals in attendance of their rights under FERPA, including the right to consent to disclosure of personally identifiable information contained in their education records, the right to opt out of the disclosure of “directory information,” the right to review and seek correction of education records, and the right to file a complaint with the Department of Education concerning the University’s alleged failure to comply with FERPA.

IV. Disclosure of Education Records

A. Consent Required

As a general rule, personally identifiable information from education records may not be disclosed to other parties without the student’s prior written or electronic consent. Such consent shall be signed (on paper or using an appropriate electronic signature method) and dated and specify records or information to be disclosed, the purpose(s) of the disclosure, and the party or class of parties to whom disclosure may be made.

B. Consent Not Required

In certain cases (some of which are described below) personally identifiable information from education records may, and in some cases must, be disclosed from the records of a student without that individual’s prior written consent. If such disclosure is made, it should be limited to that information necessary for the purpose of the disclosure. Note also that specific requirements and qualifications may apply to these exceptions.

1. To “school officials” with “legitimate educational interests.”
   a. “School officials” means employees of the University, including faculty and staff, as well as certain individuals such as vendors or contractors, performing work for the University under proper authorization.
   b. A school official has “legitimate educational interests” in personally identifiable information in the records of a student if the information in question is required or would be helpful to the official in the performance of his or her duties.
   c. A contractor, consultant, volunteer, or other party to whom the University has outsourced services may be considered a school official provided that the outside party
      1. performs a service for which the University would otherwise use its employees
      2. is under the direct control of the University with respect to the use and maintenance of education records and
      3. is subject to FERPA requirement governing the use and redisclosure of personally identifiable information from education records.
   d. The University must use reasonable methods to ensure that school officials obtain access to only those education records in which they have legitimate educational interests. Custodians of records will establish control procedures to ensure that these limitations are observed. If the custodian does not use physical or technological access controls, the custodian must ensure that its administrative policy for controlling access to education records is effective.

2. To another school where the student seeks or intends to enroll or where the student is already enrolled so long as the disclosure is for purposes related to the student’s enrollment or transfer and the University has provided notice of the disclosure or annual notice of its policy to make such disclosures.

3. In connection with financial aid for which a student has applied, or which he or she has received, but only for such purposes as determining eligibility for financial aid, the amount of financial aid, and the conditions that will be imposed, or for enforcing the terms or conditions of financial aid.

4. To comply with a judicial order or lawfully issued subpoena provided that the University makes a reasonable effort to notify the student whose records are involved in advance of disclosing the information. Prior notification may be prohibited in certain situations. All subpoenas and court orders should be directed to the Office of General Counsel and disclosure in response to them must be approved by that office.

5. In connection with an emergency, to appropriate persons if knowledge of the information is necessary to protect the health or safety of the student or other individuals.

6. To parents as described in Section IV.(c) (p. 1774) below.

7. Regarding directory information as described in Section IV.(d) (p. 1774) below.

8. Other circumstances as authorized by FERPA and its implementing regulations, as they may be amended or as otherwise required by law. Questions about legal requirements should be directed to the Office of General Counsel.

C. Parental Notification — Consent Not Required

The University’s policy regarding disclosure of student information to parents is based both upon legal requirements and the University’s philosophy that students should be treated as adults. The University generally will not share personally identifiable information (other than directory information) from a student’s education records with third parties, including parents or guardians, without student consent, except in limited circumstances where such disclosure is permitted under FERPA (described below) and where the University determines in its discretion that disclosure is appropriate.

1. In connection with an emergency if knowledge of the information is necessary to protect the health or safety of the student or other individuals.

2. To the parent or legal guardian of a student under the age of 21, information regarding the student’s violation of a University policy governing the use or possession of alcohol or drugs.

3. To a person who submits a written affirmation that he or she is the parent or legal guardian of a student and that the student is a dependent within the meaning of Section 152 of the Internal Revenue Code of 1954.

4. In other limited circumstances as allowed under FERPA and its implementing regulations, as they may be amended.

In cases involving a health or safety emergency or a violation of a University policy regarding the use or possession of alcohol or drugs, a decision to notify parents or guardians about information
Confidentiality of Student Records

D. Consent Not Required – Directory Information
“Directory Information” is generally regarded to be less sensitive than other types of information in a student’s education record. The University designates as “directory information,” which may be disclosed from records relating to a student without his or her consent if the student has not “opted out” of allowing such disclosure, the following categories of information: a student’s name, address (local, home or electronic mail), telephone number, date and place of birth, Penn ID number, major field of study, participation in officially recognized activities (including social and honorary fraternities) and sports, weight and height if a member of an athletic team, dates of attendance, degrees and awards received, and previous educational institutions attended.

Each year, a notice will be given to students concerning these categories and their right to refuse to permit the University to make any or all of them available (i.e., “opt out”). Failure to respond to the annual notice in certain cases may result in the routine disclosure of one or more of the designated categories of personally identifiable information. The University will continue to exercise informed discretion in responding to requests for directory information.

E. Limitation on Redisclosure
As required by FERPA, the University will inform a party to whom a disclosure of personally identifiable information from the records of a student is made; that disclosure is made only on the condition that the party will not disclose the information to any other party without the student’s prior written consent. Exceptions to this requirement include disclosure of directory information, disclosures to the student, to parents under appropriate circumstances, to victims of certain disciplinary matters, and disclosures pursuant to court orders and valid subpoenas.

F. Verification of Identity and Authority
Before disclosing personally identifiable information from education records, University employees must take reasonable steps to verify the identity of the requesting party as well as their authority to have access to the information.

V. Maintaining a Record of Disclosures
As required by FERPA, the University will maintain a record of requests for and/or disclosures of personally identifiable information from a student’s education records. The record must include the identities of the requesters and recipients and the legitimate interests they had in the information. This record should be maintained with records for as long as the records themselves are maintained and may be inspected by the student.

These recordkeeping requirements do not apply to requests from or disclosures to:

1. the student;
2. a school official with a legitimate educational interest;
3. a person with written consent from the student;
4. a person seeking directory information; or
5. a federal grand jury or law enforcement agency in connection with an order or subpoena requiring nondisclosure of its existence or contents.

VI. Right to Review Education Records & Seek Correction
A. Individuals who are or have been in attendance at the University are entitled to inspect and review their education records upon a written request. The request to inspect or review records must be honored within 45 days after the University has received the request. The request should be directed to the office that maintains the record and such office may charge a reasonable fee for copies.

B. A student does not have a right to inspect or review the following:

1. Financial records and statements of the student’s parent(s), except with the written permission of the parent(s).
2. Confidential letters and statements of recommendation related to admission to an educational institution, application for employment, or the receipt of an honor or honorary recognition that were placed in a student’s records after January 1, 1975, and as to which the student has executed a written waiver of his or her right to inspect and review; provided that the University uses the letters and statements only for the purpose for which they were originally intended and notifies the student upon request of the names of all individuals providing such letters and statements.
3. Other records as to which the student has executed a written waiver of his or her right to inspect and review. The University may not require a student to waive his or her rights under FERPA or this policy.
4. Those portions of records that contain information on other students.
5. Other exceptions as prescribed by FERPA and its implementing regulations, as they may be amended.

C. Opportunity to Seek Correction

1. A student who believes that information contained in his or her education records is inaccurate or misleading or violates his or her privacy rights may request that the University amend them, and the University will decide whether to do so within a reasonable period of time.
2. If the University decides that the information is inaccurate or misleading or otherwise in violation of the privacy rights of a student, the University will amend the record and inform the student of the amendment in writing.
3. If the University declines to amend the student’s records, it will so inform the student and inform him or her of the right to request a hearing to challenge the information believed to be inaccurate, misleading or in violation of his or her privacy rights. A hearing, however, may not be requested by a student to contest the appropriateness of a grade.
4. The hearing will be conducted by an individual who does not have a direct interest in the outcome of the hearing and will provide the student an opportunity to present evidence, relevant to the request to amend the student’s records. The University will provide a written decision within a reasonable period of time after the hearing based on the evidence presented at the hearing. The decision will include a summary of the evidence and the reasons for the decision.
Additionally, information regarding hearing procedures will be provided when the student receives notice of his or her rights.

5. If, after a hearing, the University determines that a student’s challenge is without merit it will notify the student of the right to place in his or her records a statement commenting on the challenged information and/or setting forth reasons for disagreeing with the University’s decision. The University will maintain such statement with the student’s record and disclose the statement whenever it discloses the portion of the record to which the statement relates.

VII. Right to File Complaint
Students have a right to file a complaint concerning any alleged failure by the University to comply with the requirements of FERPA and its implementing regulations. A complaint may be filed with the federal office that administers FERPA:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5901

A complaint may be filed internally via the University’s Compliance and Reporting Line by phone at 215-726-6759, or online at www.upenn.edu/215pcomply.

VIII. Waiver of Rights
A student may waive any of his or her rights under FERPA and this policy, provided that the waiver is made in writing and signed by the student. The University may not require a student to waive his or her rights under FERPA or this policy.

1 The term “personally identifiable information” includes, but is not limited to, the name of the student or family member, the address of the student or family member, identification number, biometric record, indirect identifier (such as date of birth or mother’s maiden name) or other information that, alone or in combination, is linked to the student and would allow a reasonable person in the school community, without personal knowledge of relevant circumstances, to identify the student with reasonable certainty.

(Source: Almanac, March 16, 2010, Volume 56, No. 25 (http://www.upenn.edu/almanac/volumes/v56/n25/confidentiality.html))

Confiscation of Publications
The confiscation of publications on campus is inconsistent with the University’s policies and procedures, and with the ideals of the University. It is inconsistent with the University’s Guidelines on Open Expression, and could violate contractual arrangements between the University and other parties.

Members of the University community who are responsible for confiscating publications should expect to be held accountable.

(Source: Almanac, July 18, 1989 (https://almanac.upenn.edu/archive/v36pdf/n01/071889.pdf))

Contracts
No student may sign a contract on behalf of the University. All contracts for lectures, performing arts activities, programs and services sponsored by student organizations must be reviewed by the Associate Director of Student Life and signed by the Vice Provost for University Life or her/his approved designate.

Dean's List
The Dean's List citation appears on the transcript and is awarded annually to any student who achieves a combined GPA of 3.7 for the fall and spring semesters, provided that during those two semesters, he or she has:

• Completed 6 or more credit units for letter grades
• Received no grades lower than C
• Completed all courses on time with no Incompletes, NRs, or GRs

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Dean's List in the academic year in which the violation occurred. The Dean's List citation will be removed from the transcript if the finding occurs after this honor has been posted or if the violation occurs during the summer term following the academic year in which this honor was awarded.

(Source: Almanac – April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html), updated May 3, 2016, Volume 62, No. 33 (http://www.upenn.edu/almanac/volumes/v62/n33/changes-to-policies.html))

Drug Free Workplace
Prohibited Drug Activity
1. The University of Pennsylvania prohibits the unlawful manufacture, distribution, dispensation, sales, possession, or use of any drug by its employees in its workplace. Each University employee agrees, as a condition of employment, to abide by this policy and to notify his or her supervisor no later than five days after any conviction under a criminal drug statute for a violation that occurred in the workplace.

Sanctions
Any University employee who violates the University’s policy or who is convicted under a criminal drug statute for a violation occurring in the workplace will be subject to the University’s disciplinary procedures up to and including dismissal and may be required to participate satisfactorily in a drug abuse assistance or rehabilitation program.

Drug-Free Workplace Program
1. The University of Pennsylvania has established a drug-free awareness program to inform employees about:
   a. The dangers of drug abuse in the workplace through such activities as “Drug Awareness Week” and training programs for supervisors;
   b. The University’s policy of maintaining a drug-free workplace through distribution of the policy to all employees;
   c. Available drug counseling, rehabilitation and employee assistance programs such as those provided through the Faculty/Staff Assistance Program; and
   d. The penalties that may be imposed upon employees for drug abuse violations in the workplace.
2. Each University employee will be given a copy of the University Drug-Free Workplace Policy.

3. Each employee, as a condition of employment, must agree to abide by the University's Drug-Free Workplace Policy and to notify his or her supervisor no later than five (5) days after any conviction under a criminal drug statute for a violation that occurred in the workplace. When a supervisor is notified by an employee of such a conviction, he or she will immediately notify the Vice President for Human Resources, and, if the employee is paid in whole or part from a federal grant, contract, or cooperative agreement, the Executive Director for Sponsored Programs. The Executive Director for Sponsored Programs will notify the appropriate federal agency within ten (10) days of receiving such notification.

4. An employee who violates the University policy or who is convicted under a criminal drug statute for a violation occurring in the workplace will be subject to the University's disciplinary procedure up to and including dismissal, and may be required to participate satisfactorily in a drug abuse assistance or rehabilitation program.

5. The University will make a good faith effort to continue to maintain a drug-free workplace through implementation of the above program.

Equal Opportunity and Affirmative Action Policy

The University of Pennsylvania's special character is reflected in the diversity of the Penn community. Diversity is prized at Penn as a central component of its mission and helps create an educational and working environment that best supports the University's commitment to excellence in teaching, research, and scholarship. We seek talented faculty, students and staff who will constitute a vibrant community that draws on the strength that comes with a substantive institutional commitment to diversity along dimensions of race, ethnicity, gender, sexual orientation, age, religion, disability, veteran status, interests, perspectives, and socioeconomic status.

Grounded in equal opportunity, nondiscrimination, and affirmative action, Penn's robust commitment to diversity is fundamental to the University's mission of advancing knowledge, educating leaders for all sectors of society, and public service. The University of Pennsylvania prohibits unlawful discrimination based on race, color, sex, sexual orientation, gender identity, religion, creed, national or ethnic origin, citizenship status, age, disability, veteran status or any other legally protected class status.

Penn is committed to ensuring that its academic, social, recreational programs, and services as well as opportunities for admission and employment are available on an equitable and nondiscriminatory basis without regard to an individual's legally protected class status. Penn also has written affirmative action programs to address any underrepresentation of women, minorities, people with disabilities, and qualified covered veterans. The Office of Affirmative Action and Equal Opportunity Programs, in collaboration with the Division of Human Resources and the Office of the Provost, oversees the implementation and administration of the University's equal opportunity, affirmative action, and nondiscrimination policies and programs.

The University recognizes the right of members of the community to raise questions and pursue complaints of discrimination and adheres to a strict policy that prohibits retaliation for doing so. Questions, complaints of alleged discrimination, or concerns regarding these policies or their implementation may be directed to the

Executive Director
Office of Affirmative Action and Equal Opportunity Programs
Sansom Place East, Suite 228
3600 Chestnut Street
Philadelphia, PA 19104-6106
(215) 898-6993 (Voice) or (215) 898-7803 (TDD)

University of Pennsylvania Nondiscrimination Statement
(to be used in University publications)

The University of Pennsylvania values diversity and seeks talented students, faculty and staff from diverse backgrounds. The University of Pennsylvania does not discriminate on the basis of race, color, sex, sexual orientation, gender identity, religion, creed, national or ethnic origin, citizenship status, age, disability, veteran status or any other legally protected class status in the administration of its admissions, financial aid, educational or athletic programs, or other University-administered programs or in its employment practices. Questions or complaints regarding this policy should be directed to the

Executive Director of the Office of Affirmative Action and Equal Opportunity Programs
Sansom Place East
3600 Chestnut Street, Suite 228
Philadelphia, PA 19104-6106
or (215) 898-6993 (Voice) or (215) 898-7803 (TDD)

Evaluation and Certification of the English Fluency of Undergraduate Instructional Personnel

In 1990, the Commonwealth of Pennsylvania enacted legislation requiring that every member of an institution of high learning who teaches undergraduates be certified as fluent in the English language, if it is not his or her first language. In order to comply with this legislation, Penn instituted a set of requirements that are enforced through training and teaching performed by the Office of English Language Programs.

I. Undergraduate Instructional Personnel

All persons hired on or after July 1, 1997, as members of the Standing or Associated Faculties, Academic Support Staff, graduate and professional student teaching staff, or as tutors, or for other undergraduate instructional duties (including, for example, leading laboratory or discussion sections or holding office hours), regardless of rank or title, in the Schools of Arts and Sciences, Engineering and Applied Science, Nursing, Wharton or the School of Design, the Annenberg School for Communication, and the Graduate School of Education, must be evaluated and certified as having met the University's standard of English fluency in the classroom before completion of the hiring process. In addition, all individuals who hold appointments elsewhere in the University and who are to be engaged in the teaching, tutoring, or other
instruction of undergraduates must also be evaluated and certified before appointment.

Only members of the Visiting Faculty, instructional personnel whose entire undergraduate instruction (including office hours) will be conducted in a language other than English, and graduate students who have no direct instructional contact (including office hours) with undergraduates (e.g. some graders or research assistants) are exempt from this requirement.

II. Standard of English Fluency in the Classroom

To be certified by the University of Pennsylvania as “fluent in the English language in the classroom,” a speaker must always be intelligible to a non-specialist in the topic under discussion, despite an accent or occasional grammatical errors. General and field-specific vocabulary must be broad enough so that the speaker rarely has to grope for words. Listening comprehension must be sufficiently high so that misunderstandings rarely occur when responding to students’ questions or answers. While teaching, the speaker should be able to use transitions to show the relationships between ideas, and to set main points apart from added details. When asked an ambiguous question, the speaker should be able to clarify the question through discussion with the student. When asked to restate a main point, the speaker should be able to paraphrase clearly. When challenged, the speaker should be able to defend his or her position effectively and appropriately.

Prospective instructional personnel, regardless of rank or title, who do not meet the above criteria shall not be certified and may not be assigned to any undergraduate instructional responsibilities.

III. Certification Procedures

A. Newly-Hired Faculty Members

Prospective members of the Standing or Associated Faculties, or of the Academic Support Staff, regardless of rank or title, shall be evaluated and certified by their department chairperson as to their English fluency in the classroom based on one of the methods of evaluation listed in section IV, below. The department chairperson shall certify their English fluency in the classroom to their dean, or to the dean’s designee and the dean shall certify the same to the Provost. In schools having no departments, evaluation and certification shall be carried out by the dean or the dean’s designee.

B. Native English-Speaking Graduate Teaching Assistants

Prospective graduate teaching assistants whose native language is English shall be evaluated and certified by their department chairperson as to their English fluency in the classroom on the basis of one of the methods of evaluation listed in section IV, below. The department chairperson shall certify their English fluency in the classroom to their dean, or to the dean’s designee and the dean shall certify the same to the Provost. (This procedure applies to all native English-speaking graduate and professional student teaching staff, including those undertaking instructional duties as tutors, leading laboratory or discussion sections, graders, or holding office hours.) In schools having no departments, evaluation and certification shall be carried out by the dean or the dean’s designee.

C. Non-native English-Speaking Graduate Teaching Assistants

Prospective graduate teaching assistants whose native language is other than English who have not taken either the Test of Spoken English (TSE) or the ACTFL Oral Proficiency Interview, or who score 55 or below on the TSE or below Superior on the ACTFL, shall be referred by their department chairperson to the English Language Programs (ELP) for professional evaluation of their English fluency in the classroom.

It is anticipated that most graduate students whose native language is not English shall not be sufficiently fluent in the use of English in the classroom to undertake undergraduate instructional responsibilities during their first year of graduate enrollment at Penn. Such individuals may be able to acquire fluency in English in the classroom by enrolling in the ELP’s summer International Teaching Assistants Training Program, or during the academic year, by enrolling in the Graduate Division of Arts and Sciences course GAS 600 (fall semester) or the ELP's intensive English language and cultural familiarization courses, or through alternative programs appropriate to the student’s needs. Graduate students placed in any of the above programs must be re-evaluated by the ELP before the Director may certify to the Provost that they are fluent in English in the classroom.

D. All Other Undergraduate Instructional Personnel

All other undergraduate instructional personnel, regardless of rank or title, shall be evaluated and certified by their department chairperson as to their English fluency in the classroom based on one of the methods of evaluation listed in section IV, below. The department chairperson shall certify their English fluency in the classroom to their dean, or to the dean’s designee, and the dean shall certify the same to the Provost. In schools having no departments, evaluation and certification shall be carried out by the dean or the dean’s designee.

IV. Evaluation and Testing

A. Methods of Evaluation

Department chairpersons and deans shall certify only those prospective instructional personnel whose English fluency in the classroom has been evaluated using one or more of the means of evaluation listed below and has been found to meet or exceed the standard set forth in Section II., above. The following methods of evaluation may be used as the basis for a departmental certification:

- A score above 55 on the ETS Test of Spoken English or a score of 27 or above on the Speaking Section of the ETS iBT TOEFL.
- A score of Superior on the ACTFL Oral Proficiency Interview
- Academic presentation and discussion (such as a colloquium, lecture, seminar, or scholarly conference presentation) evaluated by two or more members of the standing faculty and/or the English Language Programs staff.
- Extended, in-person discussion with one or more members of the standing faculty, and/or English Language Programs staff on a topic related to the candidate's research interests, teaching plans and/or experience.
- Observation and evaluation of teaching performance in the classroom by two or more members of the standing faculty and/or the English Language Programs staff.
- Videotape of classroom teaching or academic presentation evaluated by two or more members of the standing faculty and/or the English Language Programs staff.
All prospective graduate teaching assistants whose native language is other than English shall be referred by their department chairperson to the English Language Programs for professional evaluation of their English fluency in the classroom, using the SPEAK Test (Penn’s institutional version of the TSE) or future replacements, the advisory ACTFL Oral Proficiency Interview, or the Interactive Performance Test (IPT) administered by the English Language Programs (described in V.B., below).

**B. Referral to and Consultation with the English Language Programs**

Using one of the methods listed above, department chairpersons and deans (or the dean’s designee) shall either certify to the Provost that a prospective faculty member or other undergraduate instructional personnel is fluent in English in the classroom or refer them to the English Language Programs for further evaluation before they undertake any undergraduate instructional duties. It should be borne in mind that, at the discretion of the department chairperson or the deans, both native and non-native speakers of English may be referred to the English Language Programs for further evaluation before certification of their English fluency.

The department chairperson or deans may find it useful, especially where the native language of prospective faculty members or instructional personnel is other than English, to consult with the directors of the English Language Programs regarding the advisability of further evaluation or the most appropriate method of evaluation before certification of their English fluency. Prospective graduate teaching assistants with questions regarding the evaluation or certification of their English fluency in the classroom should consult with their department or graduate group chairperson, or the English Language Programs staff, 110 Fisher-Bennett Hall, 215-898-8681.

**V. Further Evaluation and Appeals**

**C. Further Evaluation by the English Language Programs**

Prospective instructional personnel who are not certified under section III, above, shall be referred to the University’s English Language Programs for further evaluation.

**D. Interactive Performance Test**

Graduate students whose native language is not English and who receive scores on the Test of Spoken English (or Penn’s SPEAK Test) of between 45 and 55 inclusive may be certified for classroom instruction by passing the Interactive Performance Test (IPT) administered by the English Language Programs. The IPT consists of a 10-minute mini-lecture with a question and answer component on a topic in the candidate’s academic discipline.

**E. Evaluation and Certification as Graders with Limited Office Hours**

Alternately, and upon the written referral of the graduate group chair, graduate students whose native language is not English and who receive scores on the Test of Spoken English (or Penn’s SPEAK Test) of between 45 and 55 inclusive may be certified as graders with limited office hours by passing the Grader Exam administered by the English Language Programs. Graders with limited office hours are defined as graduate students who are responsible for grading exams and assignments and holding individual appointments with undergraduate students for explaining grades and answers to exam questions or assignments. Graders with limited office hours can have no responsibility for classroom teaching, tutoring, recitation, or laboratory sessions. Passing of this exam, which is tailored to one-on-one questions and answers, shall certify graduate students as sufficiently fluent in English to serve as graders with limited office hours, but does not certify them to undertake other instruction duties at a later date.

**F. Appeals of Certification Decisions**

Appeals of certification decisions made by department chairpersons may be directed to the appropriate dean and appeals of certification decisions made by deans or by the Directors of English Language Programs may be directed to the Provost.

**VI. Deadlines for Certification and Reporting**

In the case of appointment to the Standing or Associated Faculties, all submissions to the Provost’s Staff Conference or Mini-Conference for appointments in Arts and Sciences, Engineering and Applied Science, Nursing, Wharton, Design, the Annenberg School for Communication and the Graduate School of Education, and for any faculty members in other schools who will ever teach undergraduates, shall include in the required documentation a certification by the dean stating that the candidate’s fluency in the English language in the classroom has been evaluated and found to meet or exceed the University’s standard of fluency. The dean’s certification shall also include a brief description of the means used to evaluate such fluency and the results of such evaluation.

In all other cases, including graduate teaching assistants and academic support staff, the certification of fluency must be approved by the Provost before final approval of the appointment in the school or department and prior to the start of the term for which the individual is first hired for undergraduate instructional duties (specifically, by September 1 for the Fall term, by January 1 for the Spring Term, and by May 1 for the Summer term).

Each dean shall report to the Provost, no later than August 1 of each year, that all faculty and other undergraduate instructional personnel (as defined in section I, above) hired since the dean’s previous certification have been evaluated for English fluency in the classroom prior to their appointment and were found to meet or exceed the University’s standard of fluency.

**VII. Monitoring and Reporting of Complaints**

Each school shall put in place one of the following procedures for the ongoing monitoring of English fluency in the classroom of all undergraduate instructional personnel:

- A systematic program of classroom observation of both faculty and teaching assistants by faculty members or English language specialists.
- Inclusion of a question about communication with the instructor on the student course evaluations of all faculty, teaching assistants, and laboratory or recitation instructors each term. (Student evaluations may also be supplemented by peer, alumni, or other teaching evaluation mechanisms.
- Other monitoring mechanisms proposed by the dean and approved by the Provost.

In addition, each school shall ensure that all complaints regarding the English fluency of instructional personnel are reported (with the
VIII. Review of English Fluency Standards and Procedures

These standards and procedures shall be reviewed periodically by the Provost’s Council on Undergraduate Education, and in the light of Pennsylvania Department of Education regulations, when issued. It also should be noted that each school, at its option, may institute English fluency requirements more stringent than the minimum standards outlined above.

(Source: Almanac, March 18, 1997; Revised: Almanac, April 21, 1998)

Faculty Authority to Assign Grades and Academic Integrity

The Disciplinary Charter rests on the principle that faculty members have the authority to judge the academic work of students and have a general responsibility for the academic progress of students, so much as lies within the power of faculty. Furthermore, the charter assumes that violations of the norms of academic integrity fall along a continuum from minor to major and that not all violations need to be treated as disciplinary cases. The authority and responsibility of faculty members require them to judge the relative severity of a violation. Good individual judgment and institutional practice will help faculty members make the judgment about when to treat a case as requiring disciplinary action.

The distinction between academic evaluation and disciplinary action is also important. Faculty members have the authority to make academic judgments in relation to their students and to make decisions in the interests of furthering their students’ education. Only the institution, acting through its formal processes, may discipline a student. Grades are not sanctions, even if they arise from a judgment that a student has violated a norm of academic integrity. In such cases, the grade may reflect the faculty member’s view that a piece of work was done inappropriately, but it represents a judgment of the quality of the work, not a record of discipline for the behavior. There are many ways to do work inappropriately or badly, resulting in low or failing grades. The policy of the charter is to preserve the faculty member’s right to grade work on the basis of all of its qualities and to make the decision to pursue disciplinary action a separate matter.

Students who believe that they have been graded unfairly have recourse of appeal through the grade appeal procedures established by each school. The charter explicitly recognizes the right of students to appeal grades. The appeal of a grade given because a faculty member believed that the student violated the norms of academic integrity is, for the purposes of the charter, no different from other grade appeals.

(Source: Almanac, September 10, 1996, Volume 43, No. 3)

Fairness of Authorship Credit in Collaborative Faculty-Student Publications for PhD, AM, and MS Students

The Graduate Council of the Faculties has unanimously approved a policy on authorship credit in collaborative faculty-student publications. The intent of the policy is to avoid situations in which graduate students or faculty feel that their contribution to published work has not been fairly recognized. Our intent in the distribution of this policy statement to faculty and graduate students is to make authorship discussions a routine part of conversations about intellectual collaboration.

Why is a policy needed?

1. For students who intend to pursue academic and/or research careers, scholarly publications that reflect the product of their research work are essential to being considered for a job and establishing a career.
2. Faculty members are almost always directly involved in the student’s scholarly work as mentors, employers, collaborators, or consultants.
3. When publications emerge from collaborative faculty-student effort, it is not always clear who should be given authorship credit, and in what order the authors’ names should appear on the published work.
4. The Vice Provost, the Council of Graduate Deans and the Graduate Council of the Faculties have been made aware over the years that there is widespread uncertainty among graduate students about what constitutes fair practices for the determination of authorship. Practices vary widely between and within departments at Penn.
5. Graduate students are understandably reluctant to raise issues of authorship at the beginning of projects, and skeptical about the efficacy of raising issues once the work has been completed.
6. Students feel that authorship credit is a difficult issue to raise, because their questioning of the arrangements can be interpreted as a challenge to the mentor on whom the student depends for intellectual and/or financial support as well as future letters of recommendation.
7. The lack of clarity concerning fairness in authorship is evident not only among graduate students. Faculty members, too, are often uncertain about fair practices. Some feel that their intellectual and written contribution to a student’s published work has not been sufficiently acknowledged.
8. As part of their appropriate professional education, young scholars need to learn about how questions of joint-authorship are decided. Guidelines can facilitate discussions between students and their faculty mentors which further such learning.

Diversity of Practices in Different Disciplines and Departments

In considering the task of formulating a university-wide policy on Fairness in Authorship Credit, the Graduate Council of the Faculties is aware that
different traditions of joint authorship exist in different disciplines and departments.

- In some fields, the Principal Investigator of the lab is first author of all publications.
- In some fields, faculty members rarely or never receive authorship credit on student publications, no matter what their contribution to the project or the product.
- In some fields, authorship depends on intellectual leadership and actual contribution to the ideas for the project and the written product.
- In some fields, authorship rules are clear; in others they are subject to negotiation.
- In some fields, research assistants and research fellows are automatically included as authors when the outcome results from paid work. In other fields, these students are automatically excluded as authors when the outcome results from paid work.

A University-wide Process for Establishing Authorship Credit

In light of the variability, ambiguity, and uncertainty regarding faculty-student authorship of published work, there are no specific rules that can be enunciated by the Graduate Council of the Faculties that will address the situation in all departments and academic disciplines. Instead, the Graduate Council of the Faculties is mandating a set of processes within each graduate group that will clarify expectations concerning authorship for each student and faculty member.

A. Graduate Group, School, and University-wide Policies

Graduate groups must publish and publicize general guidelines concerning authorship and make them available to all graduate students. School-wide policies have been established for the programs in Biomedical Graduate Studies (https://webdev.med.upenn.edu/contribute/bgs/authorshippolicy_May18_2012.pdf) and Wharton Doctoral Programs (https://provost.upenn.edu/uploads/media_items/2014-2015-final-wharton-doctoral-policies-procedures-original.original.pdf). For individual Graduate Group policies see the alphabetical listing. In the absence of School or individual policies, the University-wide policy applies:

University-wide Policy

Humanities

1. The graduate group expects students and faculty to produce individual scholarship and to cite all contributions to their work accordingly.
2. All student work for the fulfillment of degree requirements is student work and the property of the student, with due citation and acknowledgment of contributions from others.
3. Students have the right to publish their work.
4. Any joint project will be publicly presented as such from the outset and the collaborators will agree from the beginning that their joint efforts will be presented publicly under both names.
5. If there is any dispute as to propriety in joint work, the matter should be brought to the attention of the graduate chair and then handled within the graduate group with appropriate consultation with other members of the graduate faculty.

Science

1. Qualifications for Authorship. Authorship should be based on any of the following:
   - Initiating the scientific ideals addressed in the paper. Qualify that person for authorship.
   - Significant contribution to building the experimental apparatus.
   - Significant contribution to the data taking.
   - Major contribution to the data analysis.
   - Important role in writing the paper and reviewing its scientific content.

Authorship should not be based on the following:

- Participation in obtaining funding or general supervision of the group but not participating in the general intellectual activity of the group does not qualify that person for authorship.
- Simply being a member of a group does not qualify that person for authorship.

2. Authorship Order. The person making the greatest scientific contribution is the first author. It is usually clear who has done this. Subsequent authors are listed in order of decreasing scientific contribution.

3. When Conflicts Arise. Sometimes, even when the rules have been followed, a student may feel unfairly treated. The best possible solution is for the faculty advisor and the student to discuss and hopefully resolve the conflict. If that does not work, a student and faculty advisor may ask the graduate chair to arbitrate. The graduate chair may ask the department chair for assistance.

Social Science

1. It is to everyone's benefit if there is a clear understanding about potential joint authorship roles whenever there is research collaboration among faculty and students, whether the latter are assigned as apprentices, students in a class, hired assistants, or any other role. Initial arrangements can always be discussed again should circumstances change, for example if the student contributes more to the project than originally anticipated.

2. Authorship is not presumed to be a right obtained by association with a research project. Hence the need for prior understandings, as stated above.

3. In general authorship implies that the person made a major substantive contribution to the research being reported.

4. Data gathered for a research project or program of research under a Principal Investigator [under a grant or otherwise] are the property of that Investigator. It is an academic tradition that such data are not used without the PI's permission, unless they have been made part of a public archive. In either case, proper acknowledgements are expected.

5. It is the presumption that the person who conceptualized the project, secured the funding, developed the research instruments, etc., should review any publications or other public presentations from the project and give his or her permission if something from the project is to be published without his or her name on it.

6. A student is presumed to have authorship of his or her masters thesis and/or doctoral dissertation and is encouraged to publish any parts or all of the approved thesis or dissertation unless there have been some prior restrictions to which the student has agreed, e.g. that authorship must be shared with others contributing to the project or to wait for a jointly authored or edited book combining several theses.
Family Leave of Absence Policy

A student in the Ph.D. program at Penn may take an unpaid Family Leave of Absence for the birth or adoption of a child, child care, or care of an immediate family member (spouse, domestic partner, child, or parent) with a serious health condition.

The graduate group chair and dissertation advisor will be notified via email of the details of the student's leave request. The graduate group is responsible for making the necessary arrangements within their department and school.

A. Students may take a Family Leave of Absence for one semester or for two semesters.

B. The student must complete the online New Parent Accommodation/Family Leave Request Form (https://vpe.wufoo.com/forms/r72pat10x6xvtk) at least 60 days prior to an anticipated leave so that appropriate arrangements can be made to cover any teaching/research responsibilities. The graduate group chair and dissertation advisor will be notified via email of the details of the student's leave request. The graduate group is responsible for making the necessary arrangements within their department and school.

C. Family Leave “stops the clock” on the student’s academic requirements, including service requirements, for the duration of the leave.

D. During the period of Family Leave, the student may arrange to continue Student Health Insurance, but is responsible for the payment of his or her own premiums. Upon paying a fee, students on approved Family Leave will retain their PennCard, e-mail accounts, library privileges, and building access.

E. Funding commitments from the institution are deferred until the student returns from Family Leave. Students receiving funding from external sources, such as government grants, are subject to the conditions established by the funding source.

F. Service requirements (e.g., teaching, research) will be met by the student following return from Family Leave.

G. Requests for extension of Family Leave beyond one year, or for repeated Family Leaves, may be made. Approval of an extension, deferral of funding, and continued academic accommodation is at the discretion of the Graduate Dean.

*Important: If you anticipate adding a dependent (e.g., newborn) to your Penn Student Insurance Policy while on Family Leave, you must remain in active student status at the start of the fall semester. Students should arrange with their school/division to maintain full-time student status for at least 31 days from the start of fall classes, after which time the

Family Friendly Policies for PhD Students

New Parent Accommodation

A student in a Ph.D. program at Penn is eligible for time off of eight weeks for the birth or adoption of a child. The student must complete the online New Parent Accommodation/Family Leave Request Form (https://vpe.wufoo.com/forms/r72pat10x6xvtk) at least 60 days prior to the anticipated start date of the leave so that appropriate arrangements can be made to cover any teaching/research responsibilities.

The graduate group chair and dissertation advisor will be notified via email of the details of the student’s accommodation request. The graduate group is responsible for making the necessary arrangements within their department and school.

A. Normally the “Time Off” period commences within two weeks of the birth or adoption.

B. During the “Time Off” period, the student remains enrolled full-time. In order to facilitate a rapid return, s/he may participate in the program as fully as s/he deems appropriate. By remaining on full-time status, student visa status and loan repayment schedules, if any, will remain unchanged.

C. The student is entitled to academic accommodation including relief from academic requirements, such as postponement of exams and course requirements.

D. A student receiving stipend support is entitled to continuation of support during the “Time Off” period as follows:

1. Students receiving stipends from University/school funds are entitled to draw support for eight weeks during the academic year.

2. Students funded by government grants or other external funding sources are entitled to benefits as determined by the funding agency.

B. Faculty-Student Level

Individual mentors should conform to the graduate group policy on authorship credit. Mentors are responsible for anticipating possible disagreements concerning authorship credit regarding specific collaborative projects and should initiate clarifying discussions before students have invested substantial time on such projects. These discussions should be reopened if relative contributions change.

C. Appeals Process

No policy can prevent the occurrence of all instances of actual or perceived unfair treatment. Although inequities can occur to either faculty or graduate students, we believe that graduate students are usually more vulnerable to faculty practices and less able to act when they feel that fairness has been violated.

In cases of disagreements about authorship, the following steps should be taken:

1. Students who feel that they have been mistreated should raise the issue with their mentor and their graduate chair.

2. If the disagreement is not resolved to all participants’ satisfaction, an appeal can be made to the Dean of the School, who should convene a committee of faculty and graduate students to hear the disagreement and attempt to resolve it. Cases will be decided in the context of the published norms and guidelines of the graduate group.

C. The student is entitled to academic accommodation including relief from academic requirements, such as postponement of exams and course requirements.

7. Authorship Order. The order of names should be mutually agreed, preferably at the outset. The person making the greatest scientific contribution is the first author. Subsequent authors are listed in order of decreasing scientific contribution. If contributions are spread equally, the order of authors is usually alphabetical.

8. It is impossible to anticipate all potential problems. We believe that mutual respect, trust and clear communication will forestall difficulties. However, if disagreements about authorship do arise and cannot be resolved by the people involved, it is recommended that the matter be referred to the Chair of the Graduate Group for prompt consideration and suggested resolution.

7. Authorship Order. The order of names should be mutually agreed, preferably at the outset. The person making the greatest scientific contribution is the first author. Subsequent authors are listed in order of decreasing scientific contribution. If contributions are spread equally, the order of authors is usually alphabetical.

8. It is impossible to anticipate all potential problems. We believe that mutual respect, trust and clear communication will forestall difficulties. However, if disagreements about authorship do arise and cannot be resolved by the people involved, it is recommended that the matter be referred to the Chair of the Graduate Group for prompt consideration and suggested resolution.
Financial Policies

Payment of Tuition, Fees, and Other Charges

All amounts billed to students are due on the due date indicated on the bill. You will receive an email notification each month when a new billing statement is available on Penn.Pay (Penn's electronic billing service). Students whose parents or other payers are making payments are reminded that you (the student) must invite them to be an ‘other payer’ on Penn.Pay so that they can both view and pay your bill. Payments must be made on or before the due date. Payments can be made online, by check, wire transfer or in person. Please refer to the Student Financial Services web site at http://www.sfs.upenn.edu/paymybill/index.htm. Balances remaining beyond the due date are subject to a late payment penalty of 1.5% per month, which will appear on the next statement. A student could be placed on Financial Hold if bills remain unpaid which will jeopardize continuing enrollment and future registration.

Failure to Pay

The University reserves the right to withhold registration, transcripts, diplomas and all other information regarding the record of any student who is in arrears in the payment of tuition, fees, or any other charges, including student loans. The enforcement of this policy shall not relieve the student of the obligation to pay any outstanding fees and charges.

Withdrawal/Leave of Absence: Reduction of Tuition and Fees

A student who withdraws from the University (or who is requested to withdraw for failure to maintain a satisfactory scholastic standing) or who is granted a leave of absence from a full-time division of the University during either term of the academic year will be eligible for a reduction in tuition and fees in accordance with the conditions set forth below.

The effective date of separation from the University is the date the student files a written request for withdrawal or leave of absence.

A student who is required to withdraw because of a violation of University regulations shall receive no tuition refund. For all other students, term charges will be adjusted as follows:

- First two weeks of class: 100%
- Third and fourth weeks of class: 50%
- Thereafter: 0%

In the case of students receiving financial aid, eligibility for the term will be determined based on actual charges and prorated allowances for living expenses.

For rules regarding reductions in residence and meal contract charges, see the current year's Residential Handbook (http://www.business-services.upenn.edu/housing/assets/pdf/handbook0910.pdf) and the terms and conditions of meal plans (http://www.business-services.upenn.edu/dining).

Note: Please contact your home school representative regarding rules for Graduate, Professional, LPS and other Special Programs.

First-Year Housing and Dining Requirement

The College Houses are unique residential communities for Penn undergraduates that connect the academic life of the University to the residential experience. They foster smaller, intimate communities that students call home and from which they are supported in pursuing their academic goals and in navigating the complexities of university life. The College Houses provide academic and personal support to residents and promote social interaction, engagement, accountability and leadership within a setting that honors the diverse needs and backgrounds of the Penn community.

The College House experience is a central component of a student's successful transition to and mastery of the rigors of university life at Penn. To support our undergraduates in their academic and personal endeavors, and to engage them with each other and the larger Penn community, we require all first-year, transfer and exchange students to live on campus in a College House and participate in a meal plan during their first year of enrollment.

Students enrolled in the College of Liberal Studies or in the Penn Nursing BSN Second Degree Program, or are married, living with a dependent, or in a University-recognized domestic partnership, are exempt from this policy.

Fraternity / Sorority Advisory Board Disciplinary Chapter

Statement of Purpose

To acknowledge and strengthen the contributions of fraternities and sororities to the University of Pennsylvania, the following Fraternity and Sorority Advisory Board Disciplinary Charter was established. This Charter is intended to establish a framework for fraternity/sorority governance, and to hold fraternities and sororities accountable to standards of conduct. There is a fundamental difference between the proceedings detailed herein and those of a court of law. This judicial charter is within the University community and is part of the educational process. To the greatest degree possible, the process detailed herein should remain informal, non-adversarial, and directed towards achieving fundamental fairness for all parties involved.

As outlined in the Charter, the Fraternity and Sorority Advisory Board is to be a fair and impartial board which will recommend to the Vice Provost for University Life actions necessary to ensure the commitments and obligations of both the fraternities/sororities and the University are being maintained (as outlined in the policy on “Recognition and Governance of Undergraduate Social Fraternities and Sororities” (Recognition
Policy). Each recognized fraternity or sorority, and its associated sponsoring body, agrees to abide by the basic principles applied to any University affiliation with an externally incorporated organization, including commonality of goals and standards, disclosure of principals, mechanisms for accountability, and provisions for the discontinuation of the affiliation should goals diverge or standards decline in ways that would expose the University to liability or loss of reputation. To accomplish this, each fraternity and sorority will be held collectively responsible for the well being of its members, the chapter’s performance, as well as the reputation of the organizations within the University community.

The University recognizes that fraternities and sororities are associations of students, operated to enhance the educational experience. It is appropriate that the University provide support services that will help the chapters function effectively and will protect their stability given the inherent turnover of membership and leadership.

The following document defines the judicial system for cases involving collective responsibility of fraternities and sororities. This document details the required procedures for the resolution of violations of the Recognition and Governance of Undergraduate Social Fraternities and Sororities at the University of Pennsylvania (the “Recognition Policy”) within the fraternity and sorority system and between these Organizations and the Community. In addition, should a conflict come to the attention of OFSA, the Director has the authority to mediate conflicts prior to engaging in any formal judicial process.

I. Fraternity/Sorority Advisory Board

A. Jurisdiction

1. There shall be a University-wide board of original jurisdiction to be known as the Fraternity/Sorority Advisory Board (the “Advisory Board”). The Advisory Board shall have exclusive original jurisdiction in all cases arising under the policy entitled Recognition and Governance of Undergraduate Social Fraternities and Sororities at the University of Pennsylvania (the “Recognition Policy”), as amended from time to time, involving University recognized fraternities and sororities as defined by the Recognition Policy. The Advisory Board shall have no jurisdiction over complaints brought against individual students under the Charter of the University Student Disciplinary System except to the extent a complaint arising out of the same activity or event is also brought against a fraternity or sorority.

2. The Advisory Board will also hear appeals regarding sanctions levied by the Interfraternity and Panhellenic Judicial Inquiry Boards (JIB). Such appeals shall be made to the Advisory Board in accordance with the IFC or Panhellenic JIB Charters. (As used in this Judicial Charter for the Advisory Board, the term “respondent” or respondent chapter” shall mean a University-recognized fraternity or sorority as more fully described in Section B of the Recognition Policy entitled “Framework for Recognition – Applicability of Recognition Policy.”)

B. Composition

1. The Advisory Board will be composed of:
   4 faculty (one of whom shall serve as chair)
   3 Greek students (one from Panhellenic, BIG-C and IFC each)
   1 non-Greek student
   2 members from the Greek Alumni Council
   2 non-voting administrators
   a. Faculty members will be selected by the Faculty Senate Executive Committee. The communication to the faculty selected should be clear that we need their participation in this role.
   b. The three Greek students will be selected by each organization’s respective president with the approval of their Executive Board. Interested students will apply in writing and be interviewed by the Interfraternity, Panhellenic, and Biocultural InterGreek Councils.
   c. The non-Greek student will be appointed by the Nominations and Election Committee of the Undergraduate Assembly.
   d. The Greek Alumni Council (GAC) members will be selected from the general membership of the GAC. The appointee must have been an active member of the GAC for the year preceding his/her appointment.
   e. The two non-voting administrators (one being the Director of Fraternity and Sorority Affairs) will be appointed by the Vice Provost for University Life.

C. Responsibility

1. Monitor the efforts of the IFC/Panhellenic/BIG-C in achieving the goals and objectives of their strategic plans.

2. Audit each chapter at least once annually based on the required paperwork that each chapter submits annually to the Office of Fraternity and Sorority Affairs (OFSA). Assign specific goals for quality improvement of each chapter based on these annual reviews.

3. Support the offices of OFSA to improve compliance of chapters with University policies.

4. Meet with all chapters that are in violation of established University rules that are non-compliant with expected performance standards, or that are sub-optimal in achieving their target goals of performance.

5. Address, as outlined in this charter, any incidents of misconduct related to fraternities and sororities, especially those that result in injury, illness, psychological harm, or property damage.

6. Meet at least seven times during the academic year to conduct the audit review and attend to hearing of misconduct, and to monitor progress on probationary agreements.

This committee should report on an annual basis to the Provost, the President, the Chair of the Faculty Senate, and the Undergraduate Assembly.

D. Conflict of Interest

1. Definition

   On occasion, the presence and/or participation of a particular Advisory Board member may be deemed as representing a conflict of interest with the role of the Advisory Board. Such “conflict of interest” shall be defined as either
   a. membership in a fraternity or sorority involved in a disciplinary incident under Advisory Board review, or
   b. involvement or affiliation with a particular incident or its participants which may impair his or her ability to consider objectively and impartially the facts of any situations or any Advisory Board review.

2. Procedures

   Alleged conflicts of interest must be brought to the director of Fraternity and Sorority Affairs by any member of the Advisory Board, any member of the University community, or any representative of the fraternity or sorority under review at least forty-eight hours prior to the review proceedings. In instances of conflict of interest, it is an Advisory Board member’s obligation to withdraw from the Advisory Board prior to the convening of the review. In addition, at the beginning of any review the Chair shall ask all Advisory Board members if there are any conflicts of interest involved in the review. The Chair shall then conduct discussion. Final determination of
conflict of interest shall be made by a majority vote of the Advisory Board members present for the review (excluding ex-officio members and the advisory Board member who is the subject of the conflict of interest vote). The chair (as defined in Section II. A.1. below) shall vote only to break a tie vote. To facilitate such determinations, the fraternity or sorority under review shall present to the Director a full list of all participating fraternity or sorority representatives and witnesses and their roles and affiliations at least five calendar days prior to the date of the Advisory Board’s review; information concerning the composition of the Advisory Board shall be given to the fraternity/sorority at least ten calendar days prior to the review. The minutes shall reflect any withdrawal due to conflict of interest.

3. Implementation
Any Advisory Board member who is deemed to have a conflict of interest by the Advisory Board shall not be present at internal Advisory Board discussions, shall not vote on any issue relating to the review in question, and shall not receive Advisory Board minutes or other confidential written materials pertaining to the review in question. The individual shall be permitted to participate in the review on behalf of the fraternity/sorority or on behalf of the Administration.

4. Disqualification of Advisory Board Members
Members of the Advisory Board may disqualify themselves from hearing the case if they believe, in good faith, that their capacity for making an objective judgment in the case is or may appear to be impaired.

E. Quorum
1. The quorum required to start a meeting/review will consist of at least one GAC member, three faculty members, and two student members (excluding any ex-officio member or any individual disqualified because of conflict of interest). The members attending the first meeting of any review shall be termed the “original quorum.”

2. The quorum required for continuing the review is five members, including at least two members who have been present at all preceding reviews and constituted part of the “original quorum”. The Chair (as defined in Section II. A.1. below) shall vote only to break a tie vote. All decisions require a majority vote of those present and eligible to vote.

F. Operation of the System
1. The Office of Fraternity and Sorority Affairs (OFSA) shall provide administrative support for the Advisory Board: verify student standing, schedule hearings, taken and prepare minutes, and process all other paperwork for the Advisory Board.

2. To calculate days as required in this charter, only the fall and spring semesters shall be considered. Days shall be counted on a calendar basis, including Saturdays, Sundays, and holidays when the University is in session. No days will be counted when the University is not in session, except with agreement from the complainant.

G. Confidentiality of Judicial Records and Process
1. The identity of individuals in particular cases before the Director of OFSA, the Director of the Office of Student Conduct, the FSAB, or the VPUL, and all files and testimony as to individuals, are confidential, in accordance with University guidelines concerning the confidentiality of student records pursuant to the Family Educational Rights and Privacy Act of 1974, as amended.

2. Sanctions against chapters are not confidential.

II. Staff
A. Chair
1. The Faculty member with the most experience with the FSAB shall serve as Chair. The Chair shall administer this Chapter and preside at all meetings and reviews. The Chair is responsible for overseeing the procedural integrity of this Advisory Board. The Chair will, for example, consider and resolve pre-review challenges to procedures. Such decisions by the Chair will be affirmed by the Advisory Board at the beginning of each review (see Section III.D.6.b.). The Chair will also alert Advisory Board of inconsistencies between the demands of fairness and its actions at any point procedural issues and convey their advice, together with his or her own recommendations, to the Advisory Board.

2. In instances where a “conflict of interest” (as previously defined) arises that disqualifies the Chair, or when the Chair is otherwise absent, the Faculty member present who is next most senior with respect to continuous tenure of service on the Advisory Board shall act as Chair.

3. The Chair will advise respondents, complainants, and their advisors, of procedural matters.

4. The Chair may confer with appropriate University officials regarding the provisions of this Charter.

5. In the event the appointed Chair cannot be present at a meeting of the Advisory Board, an Acting Chair shall assume the responsibilities of the Chair. The Faculty member present who is most senior with respect to continuous tenure of service on the Advisory Board shall serve as Acting Chair.

B. Director of Fraternity and Sorority Affairs (Director)
The Director shall be a University employee and shall be appointed by the VPUL. The duties to the Director of Fraternity and Sorority Affairs under this Charter will be to resolve by agreement changes against the chapters; to present history and information about the chapter in reviews before the Advisory Board after a determination of collective responsibility; to ensure that agreements and sanctions are enforced; to perform all other responsibilities specified in this Chapter.

C. Director, Office of Student Conduct (OSC)
The duties of the Director of OSC under this Charter will be to investigate complaints against chapters under the regulations of the University and the Recognition Policy; to help determine whether charges involve a chapter’s collective responsibility and subject the chapter to the jurisdiction of this charter and whether such charges should be brought before the Advisory Board; to present at the review relevant evidence concerning the charges. The Director of OSC can testify; call witnesses, present documents before the Advisory Board, and recommend appropriate sanctions.

III. Procedures
A. The Complaint and Investigation
1. Any person who believes that a fraternity or sorority chapter has violated University rules or regulations may file a complaint with the Office of Fraternity and Sorority Affairs (OFSA). OFSA may conduct preliminary fact-finding before a case is forwarded to the OSC for in-depth investigation. The complaint may also be filed with a University office other than OFSA (e.g. Public Safety, OSC, VPUL). The OSC may also bring charges against a chapter on behalf of a complainant who requests anonymity or on behalf of the University in general. Office of Fraternity and Sorority Affairs should be notified of these complaints.
2. The OSC will investigate complaints within the jurisdiction of the Advisory Board and shall decide, after consultation with the Director, if there is reasonable cause to believe that a chapter has violated the Recognition Policy. The OSC shall make the determination of reasonable cause ordinarily after conducting a preliminary investigation. The OSC may interview any appropriate witnesses, including members of a potential respondent chapter. All witnesses have the right to consult with a University advisory, as defined elsewhere in this Chapter, while being interviewed, and the OSC shall inform them that anything they say may later be introduced as evidence at a review.

3. The Director and/or the Advisory Board may proceed under this Charter regardless of possible or pending civil, criminal, or individual Student Disciplinary proceedings arising out of the same or other events. The Director, with concurrence of the VPUL, and other appropriate University officials, shall determine whether the Advisory Board shall, in fact, proceed with the hearing of the charges against a respondent whose members may also face related charges in OSC/Student Disciplinary, civil or criminal proceedings. If the Director defers proceeding with the charges against a respondent in light of related charges, the Director, with concurrence of the VPUL, after consultation with the General Council, may subsequently proceed under this Charter at any time before or after resolution of the other charges.

B. Procedures for Judicial Reviews

1. Notice of Investigation

Within a reasonable time after the OSC receives a complaint and determines that there is reasonable cause that a chapter may be held collectively responsible, she will inform the Director of OFSA. The Director will then promptly notify the chapter, and the chapter advisory of record, that an investigation is in progress involving allegations of collective responsibility. At this time and at the Director’s discretion, a letter of Administrative Warning may be issued to the respondent chapter or is consistent with the Recognition Policy.

2. Issuing of charges

At the investigation’s conclusion, the OSC, after consultation with the Director of OFSA, will make a preliminary determination of whether an incident or event involves collective responsibility. If such a determination is made, then the Office of Fraternity and Sorority Affairs will send to the respondent chapter, the chapter advisory of record, as well as the chapter’s national office, a statement of the charges against the respondent and a copy of the chapter status report.

a. The statement will cite the regulation, rules or policies alleged to have been violated and will describe the alleged acts, or failures to act, constituting the violation(s). The statement will also enclose a copy of this Charter and a copy of the regulations, rules or policies alleged to have been violated. The cover letter for the charges should outline the time line for settlement.

b. Additionally, if the Director anticipates that there will be a formal review of the chapter and the violations by the FSAB, the Director of OFSA will prepare and include a copy of the chapter status report. The Chapter States Report will be a summary of both positive and negative chapter activity within the fraternal and University communities: financial health, scholarship, IFC/PANHEL/BIGC involvement and support, leadership, alumni(ae) involvement within the chapter and University (GAC/Advisory Board), membership data, faculty affiliation, community development program, and the comprehensiveness of the pledge/membership education program, and may cite any laws, which might have been violated. The report will not be given to the Advisory Board until the sanctioning portion of their deliberations. (The Chapter will have the ability to respond to this report, See Section III.D.3.b.).

C. Agreement of Responsibility

1. The Director, in consultation with the OSC, the National Headquarters, the alumni advisory (whenever possible) and the respondent, may resolve (settle) the complaint by way of an Agreement of Responsibility at any time after the charges have been served and before final disposition by a review of charges by the Advisory Board.

2. After the charges are served, the respondent chapter must promptly schedule a conference with the Director of OFSA to discuss a potential Agreement of Responsibility, otherwise a review will be scheduled in accordance with Section III.D.3 of this Charter. If an Agreement of Responsibility has not been reached within a reasonable amount of time from the date the charges were served, or the Director of OFSA determines an impasse in the resolution has occurred, a review may be scheduled in accordance with Section III.D.3 of this Charter.

3. If the respondent chapter chooses to schedule a conference with the Director of OFSA, the Director will notify appropriate officers from the appropriate JIB (Interfraternity or Panhellenic) that charges have been served against a chapter. A meeting will be scheduled with JIB officers within a reasonable time after the charges have been served to discuss options for resolution. Any JIB Officer who is a member of a respondent chapter, is a complainant, or is in any other way involved or affiliated with a particular incident or its participants so that it would impair his or her ability to consider resolution options objectively and impartially, shall be excluded to avoid a conflict.

4. Agreement of Responsibility will be written and signed by the Director, the respondent’s President, the respondent’s chapter advisor of record, a representative of the respondent’s national office, and all members of the respondent chapter. Upon receipt of the signed agreement, the Chair of the FSAB will be notified that an agreement has been reached.

5. When a determination of collective responsibility has been found and a previous agreement of responsibility exist which includes provisions for further violations, the Advisory Board must uphold the agreement of responsibility and may impose further sanctions, extend the probation or other elements of the previous agreement of responsibility with an amendment to that original agreement.

D. Review

1. Scheduling Disciplinary Hearings

a. If disciplinary charges are not resolved by an agreement of responsibility, the Director of OFSA in coordination with the Chair of the FSAB promptly begins the process of scheduling an FSAB review, with due regard for the time required for all parties to prepare for the hearing. The Director of OFSA will provide reasonable advance notice in writing to the complainant(s), respondent(s), and witnesses of the date, time, and place of the hearing and of the names of the panel members assigned to hear the disciplinary matter.

b. Reviews normally take place as soon as possible after the filing of charges. Upon a showing of good cause by the FSAB, OSC or the respondent(s), the Director of OFSA may grant a reasonable extension of any time limit set forth in the Charter.

2. Pre-Hearing Exchanges and Testimony
3. Conduct of Reviews

a. Before the review and through the Director of OFSA and the FSAB, the OSC and the respondent(s) will exchange copies of all exhibits to be presented, the names of witnesses to be called, and a brief summary of the substance of testimony expected to be presented at the Hearing Panel.

b. When the Director of OFSA and Chair of the FSAB believe that it will contribute to the expedition and fairness of a Disciplinary Hearing, he or she may (but need not) ask the OSC to prepare a written statement of its case against respondent(s) and give the respondent(s) a reasonable opportunity to prepare a written response. The OSC and respondent(s) also may submit statements at their own initiative. The statements and any accompanying exhibits may be considered by the FSAB, in addition to testimony, arguments, or evidence presented at the actual hearing.

c. In exceptional circumstances, when a witness or exhibit does not become known or available until immediately before the hearing, the Chair of the FSAB may, at her or his discretion, permit the evidence to be presented or may reschedule the hearing to a later time.

d. If a respondent or the OSC anticipates that a key witness will be unavailable for a hearing, they may ask the Director of OFSA and/or Chair of the FSAB to preserve the testimony of the witness on tape and present it as evidence at the hearing. The OSC and the respondent(s) must be notified in advance of the date, time, and place of the taping. All parties who would be permitted to question such a witness at a hearing may question the witness at the taping.

4. Findings and Recommendations of the Advisory Board

a. Following the hearing, the members of the Advisory Board meet to discuss in private their findings, which consist of two parts:
   i. a determination of whether the respondent chapter is responsible for any violation; and
   ii. if so, a recommendation of sanction(s).

b. Only evidence presented at the hearing will be considered by the Advisory Board for a decision on this incident and possible violations of law or University policy. The Advisory Board will presume a respondent innocent unless proven responsible for a violation by clear and convincing evidence. All decisions of the Advisory Board require a majority vote.

c. The OSC may recommend to the Advisory Board a sanction to be imposed if the Advisor Board finds the respondent chapter(s) responsible for a violation. The respondent chapter(s) may respond to the OSC's proposed sanction(s). Before the Advisory Board makes its recommendations on sanctions, it will review any previous disciplinary offenses by and sanctions the respondent(s) and the chapter status report (as outlined in Section IIIB.2b).

d. If the Advisory Board determines that the respondent chapter(s) is not responsible for a violation, no sanction may be recommended against the respondent(s) and the respondent may not be subject to further proceedings under this Charter on the same charge(s).

e. If the Advisory Board finds that a respondent chapter is responsible for a violation of University rules or regulations, it will recommend to the Vice Provost for University Life appropriate sanctions. Only the Vice Provost for University Life (or designee), acting on behalf of the University, may actually impose a sanction on a chapter The Vice Provost for University Life (or designee) will not impose a sanction until after any appeal of the Advisory Board's decision has been decided by the Vice Provost for University Life.

5. Notice of Advisory Board Decision
The Director of OFSA will promptly transmit its decision, including its findings and recommendation regarding sanctions, in writing to the Advisory Board, the OSC, the respondent(s) and the Vice Provost for University life as soon as possible after the end of the hearing.

E. Advisors to the Respondent and the Complainant
1. At hearings before the Advisory Board, each respondent and complainant may be accompanied by an advisor who is a member of the University community (student, faculty, or staff) or of a national or local alumni sponsoring organization; advisors may address the Board.
2. Attorneys may not serve as advisors unless the previously designated alumnus/a chapter advisor is an attorney by profession. If criminal charges are pending against a respondent or its members, the chapter may be accompanied and advised by an attorney; however, the attorney may not address the Advisory Board or directly participate in the hearing.
3. Advisors are obligated to acquaint themselves thoroughly with the University’s policies, regulations, and procedures, and must hold confidential any information which they learn through their participation in the proceedings.
4. At least five calendar days before the hearing the complainant and/or respondent will notify the OFSA of the name, address, title and relationship of their advisor who will be present.

F. Failure to Appear, Cooperate, or Comply
1. A fair, conclusion adjudication of a dispute under this Charter depends on the cooperation of all involved persons, including complainants, respondents, and witnesses. Therefore, all community members who may be interviewed are obliged to provide honest, complete statements to the Director, he OSC, and the Advisory Board in order that dispute may be equitably resolved as quickly as possible.
2. If the Advisory Board determines that a witness failed to appear or cooperate with the investigation and/or review, the Advisory Board may serve as complaint seeking, disciplinary sanctions described in the Charter of the University Student Disciplinary System (Section IV.C.7bi.)
3. The failure of a respondent chapter or its individual members to comply with sanctions shall be a violation of this Charter and the University’s Policies and Procedures.

Fundraising Guidelines

I. University Organizations
1. Student organizations are permitted to raise funds for their own group activities and for non-University charities. All fundraising events and activities by student organizations recognized by the Student Activities Council (SAC), funded by the Graduate and Professional Student Assembly (GAPSA), or sponsored by the Undergraduate Assembly (UA) must be approved, in advance, by the Executive Director of the Office of Student Affairs. All fundraising events and activities by “School Affiliated” student organizations must be approved, in advance, by the relevant School student affairs administrator. Approval will only be granted for fundraising on behalf of charities which are nonprofit, tax exempt organizations.
2. The procedures for reserving and using University facilities apply to fund-raising activities by University organizations. See also the Concert Policy (p. 1772).
3. Student fundraising activities must comply University, municipal, state, and federal policies.
4. All checks received by student organizations in support of their own group activities must be made payable to the Trustees of the University of Pennsylvania and must be immediately endorsed with “For deposit only to the account of the Trustees of the University of Pennsylvania” on the back of the check. Checks received in response to charitable projects for non-University charities must be made payable to the non-University charity.
5. Student organizations should follow reasonable procedures for safeguarding cash. The number of individuals authorized to receive and handle cash should be limited. The individuals who receive cash should prepare a log of all receipts, broken down by cash, checks payable to the University, and checks payable to the non-University charity, including the dates and amounts received, with totals for each category. Currency and checks should be kept in a secure location, and stored in a safe or other locked secure place with restricted access until deposited by the University or delivered to the non-University charity.
6. Funds raised by student organizations for their own group activities must be deposited in a University account and disbursed in accordance with established student activities guidelines. SAC recognized, GAPSA funded and UA sponsored student organizations should hand deliver all checks made payable to the University and all cash to the Office of Student Affairs Business Office Manager. The Office of Student Affairs should compare the record of the cash receipts and checks with the amount to be deposited. School Affiliated student organizations should hand deliver all checks and cash to their respective School Business Offices. Student organizations should not use cash received to pay expenses.
7. Checks made payable to a non-University charity should be sent by the student organization directly to the charity. The University will not issue gift receipts on behalf of non-University charities. Student organizations should contact non-University charities to determine whether the charities will provide gift receipts directly to donors.

II. Non-University Groups
Non-University groups must follow the procedures for reserving and using University facilities at Perelman Quad.

Graduation Honors
In recognition of distinguished academic achievement and high standards of academic integrity, the University of Pennsylvania awards Latin honors to undergraduate students based on the cumulative GPA on their transcripts at the time of graduation:

- **Summa Cum Laude:** 3.80 or higher
- **Magna Cum Laude:** 3.60 or higher, but less than 3.80
- **Cum Laude:** 3.40 or higher, but less than 3.60

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Latin honors. Notation of Graduation Honors will be removed from the transcript if the finding occurs after this honor has been posted.
Guidelines for Addressing Academic Issues of Students with Disabilities

The University of Pennsylvania is committed to providing access and equal educational opportunities to all students, including students with disabilities. Penn does not discriminate against students with disabilities. The University provides reasonable accommodation to a student’s known disability in order to afford that student an equal opportunity to participate in University-sponsored academic and extracurricular programs, activities and services.

Reason for Policy Guidance

This guidance, known as the Provost’s Memorandum, serves two purposes:

• To provide guidance to faculty and staff so that they may reasonably accommodate and support students with disabilities without compromising academic standards and requirements;
• To assure students with disabilities that the University will provide access to all University-sponsored programs, benefits and activities through reasonable accommodation and program accessibility as required under the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, as amended (“ADA”).

Protection from Discrimination

The Rehabilitation Act and the ADA prohibit discrimination against people with disabilities by institutions like Penn that receive or benefit from federal financial assistance. These and other laws require that reasonable accommodations be provided to otherwise qualified individuals with a disability.

Some Key Definitions

Disability — A person with a disability is defined as an individual who
1. has a physical or mental impairment that substantially limits one or more major life activities,
2. has a record of such an impairment, or
3. is regarded as having such an impairment.

Examples of recognized disabilities include, but are not limited to, blindness, deafness, paralysis, diabetes, epilepsy, lupus, bipolar disorder, generalized anxiety disorder, HIV/AIDS, specific learning disabilities, autism spectrum disorder and Attention Deficit Hyperactivity Disorder (ADHD).

Reasonable Accommodation — A reasonable accommodation is a modification or adjustment that enables an otherwise qualified individual with a disability full access to participation in University-sponsored programs. These modifications should not fundamentally alter the purpose or requirements of the course or program. Reasonable accommodations are determined on an individual basis and take into account the functional limitations of the impairment. Accommodations may vary from class to class depending upon course content and format. They are intended to be effective and reasonable; they may not be exactly what the student wishes or requests.

Appropriate Documentation — Appropriate documentation is a written evaluation or report provided by a clinician in a specific profession or area of expertise who is considered qualified to make the diagnosis. The documentation must be current and comprehensive and may include clinical and social histories from parents, counselors and specialists. A diagnosis must be included. Documentation must identify the student’s specific functional limitations within the academic setting and must show substantial limitation compared to most people. The documentation should conform to well-established practices in specific area(s)/field(s). For more information, see Documentation Guidelines on the Student Disabilities Services website at the following link: http://www.vpul.upenn.edu/lrc/sds/ps_documentation_guidelines.php.

Responsible University Office

Students with disabilities and temporary conditions are served by the Office of Student Disabilities Services (SDS). The office is located in the Weingarten Learning Resources Center (WLRC), a department under the Office of the Vice Provost of University Life. SDS is responsible for assessing all student requests for accommodations and determining reasonable accommodations for students with disabilities.

The Office of Student Disabilities Services is available to assist faculty and professional staff with the provision of academic accommodations and for consultation regarding students with disabilities.

Phone: (215) 573-9235
TTY: (215) 746-6320
Fax: (215) 746-6326
E-mail: sdsmail@zimbra.upenn.edu

Accommodation Procedures

Responsibilities of Students

Students with disabilities who seek accommodation at Penn are responsible for self-identifying with SDS. Identification may take place upon admission or at any time during the student’s course of study.

Students requesting accommodations are responsible for providing documentation, at their own expense, according to the guidelines published on the SDS website: http://www.vpul.upenn.edu/lrc/sds/ps_documentation_guidelines.php. SDS may request additional information if the documentation provided does not support the existence of a disability or the need for the accommodations requested.

The SDS Documentation Review Committee thoroughly reviews the documentation and accommodations are determined through an interactive process with input from the student. Consultation with faculty may be important in determining how to best accommodate a student in a specific course. A determination from the Committee may take four to six weeks, or longer if additional information is needed. For examples of reasonable accommodations, please see the SDS website: http://www.vpul.upenn.edu/lrc/sds/academic_accommodations.

Students who are approved for accommodations must authorize SDS to inform professors about their approved accommodations. They must also make online requests to SDS for individual exam accommodations each semester. Students are encouraged to introduce themselves to professors to initiate a dialogue about their particular needs.
Responsibilities of Faculty and Staff
Faculty and staff are responsible for ensuring equity and access in their programs and classrooms. The SDS approved accommodations should not fundamentally alter the academic requirements essential to a course or program of study or to licensing prerequisites. It is also important to recognize that students with disabilities must reach the same performance standards to fulfill degree requirements as their non-disabled peers. Accommodations provide students with disabilities equal access, not an unfair advantage.

Instructors are required to accommodate students only after receiving an email from SDS indicating the accommodations that have been approved. A statement about services for students with disabilities should be included in the syllabus for each course. Below is a sample syllabus statement:

Sample Syllabus Statement
The University of Pennsylvania provides reasonable accommodations to students with disabilities who have self-identified and received approval from the Office of Student Disabilities Services (SDS). If SDS has approved your request for accommodations, please make an appointment to meet with me as soon as possible in order to discuss the arrangements for your accommodations.

If you have not yet contacted Student Disabilities Services, and would like to request accommodations or have questions, you can make an appointment by calling (215) 573-9235. The office is located in the Weingarten Learning Resources Center at Stouffer Commons, 3702 Spruce Street, Suite 300. Please visit the SDS website at http://www.vpul.upenn.edu/lrc/sds/index.php.

SDS services are free and confidential.

Accommodated Exams
In order to effectively manage the logistics of exam accommodations, instructors are expected to respond promptly to SDS emails requesting information about exam accommodations. Although the exam may not be written until shortly before the exam date, other details are needed by the SDS accommodations staff as early as possible in order to arrange for exam administration and inform students of the arrangements. Professors are encouraged to provide SDS with exams as early as possible prior to the exam to allow SDS time to prepare exam materials. Exams are locked in a secure location until the exams are being administered.

In the event that questions arise during the administration of the exam at SDS, it is important that SDS has contact information for the instructor or TA (phone, text and/or email).

The Standards for Accommodating Exams for Students with Disabilities is available on the SDS website: http://www.vpul.upenn.edu/lrc/sds/StandardsforAccommodatingExams.php. This document provides guidelines for accommodated exams that are administered by faculty or their designees.

Note-taking Announcements
Faculty may be asked to assist SDS by identifying note-takers through an announcement or email to the class and referring interested note-takers to SDS. A template for the email will be included when SDS contacts faculty regarding note-taker accommodations.

Accessibility of Information and Course Materials
Faculty should collaborate with their department offices and SDS to ensure that their course materials, presentations, audio-visual materials and exams are available in an accessible format for students with sensory and print disabilities.

Confidentiality
All disability documentation provided by the student is confidential and remains in the Office of Student Disabilities Services for the purpose of determining reasonable accommodations. Students may not request accommodations from faculty that have not been approved by SDS. If documentation is provided to the instructor, it should be returned to the student and the student should be referred to SDS.

Faculty should refrain from discussing a student’s disabilities and accommodations in front of the class, in the presence of other students or to faculty or staff not directly involved in the accommodation process.

Reconsideration Process
Students may request reconsideration of the SDS accommodation determination through the SDS Reconsideration Process found on the website at: http://www.vpul.upenn.edu/lrc/sds/reconsiderationprocess.php.

Concerns and Complaints
The Office of Affirmative Action and Equal Opportunity Programs is responsible for overseeing the University’s implementation of its equal opportunity and nondiscrimination obligations arising under Federal, Commonwealth, and local laws. Any concerns or complaints should be addressed to:

Office of Affirmative Action and Equal Opportunity Programs
Sansom Place East
3600 Chestnut Street, Suite 228
Philadelphia, PA 19104-6106
(215) 898-6993 (voice) or (215) 746-7088 (fax)

Additional Information
Related policies and procedures are available on the SDS website (http://www.vpul.upenn.edu/lrc/sds) in the section for Faculty and Staff.

This Memorandum is available in alternate format upon request.

Guidelines for Research in the Community
A significant number of Penn faculty and students are engaged in research that involves the study of the Philadelphia community, and, in particular, West Philadelphia, or that involves community members as
Guidelines for Student Protection in Sponsored Research Projects

Participation in sponsored research may be an important part of a student’s undergraduate or graduate education, as well as an important source of his or her financial support. The University recognizes that the student must be protected in cases where the terms of the research project conflict with the student’s academic progress, and affirms that the student has the right to reject such funding if he or she chooses to do so. The University recognizes the sensitivity of these issues, since they pertain directly to the relationship of personal trust which exists between a student and his or her faculty sponsor; they are also fundamental to the development of the student’s intellectual and moral integrity. Therefore, the University adopts the following policy:

1. The University recognizes the central role of sponsored research in fostering educational opportunities for students at all levels and in every discipline and encourages the involvement of students in research projects. On rare occasions, the terms of a research agreement may contain limitations which may inhibit the participation of students, such as delays in publication of results which might conflict with a student’s academic schedule. In such cases, the University requires that careful consideration be given to the appropriateness of student participation and that the Faculty Sponsor or Principal Investigator assures in advance that students are fully aware of any such restrictions.

2. The University affirms the student’s right to know the source(s) of financial support for his or her educational and living expenses, individual research projects, or the research activities of a faculty sponsor in which the student is involved and from which the student obtains financial support. It is the responsibility of the faculty sponsor to make this information known to the student.

3. Should a student choose to reject financial assistance, the University affirms and upholds the student’s right to do so.

Guidelines for the Operation of Unmanned Aircraft Systems at the University of Pennsylvania

The University of Pennsylvania establishes the following Guidelines to govern the operation by any person of an Unmanned Aircraft System (UAS) on or above the University of Pennsylvania’s campus or properties. These guidelines are established to support the use of Unmanned Aircraft Systems in ways that ensure the safety and protect the privacy of all members of the University community and promote compliance with all applicable federal and state laws. These guidelines cover the University of Pennsylvania Campus, Morris Arboretum, New Bolton Center, and Pennovation Works.

The University of Pennsylvania, consistent with the regulations and guidance from the Federal Aviation Administration, allows the operation of a UAS on or above the Penn campus for permitted educational and recreational purposes (for which a Section 107 Remote Pilot in Command Certification is optional) and research or UAS-dedicated curriculum purposes (for which a Section 107 Remote Pilot in Command Certification is mandatory) provided that all operations are in compliance with the following guidelines:

- The operation of the UAS is a component of research, science, technology, communication, art, or aviation-related coursework at Penn, or 2) recreational and hobby use is conducted at the designated location for UAS operation at Penn, Penn Park South Field, Attachment A. Scheduled hours for operation are set monthly, and can be found at http://www.pennathletics.com/page/athletic-facilities-schedules under the South Field schedule. The University of Pennsylvania reserves the right to restrict use to Penn-affiliated persons.

- Operation of the UAS aircraft must adhere to these restrictions:
  - Flights must be below 200 feet and clear of surrounding obstacles.
• Flights may not exceed 100 mph.
• UAS must be in visual sight of its operator at all times.
• UAS may not operate over any persons not participating in the operation or in a building or other covered structure.¹
• UAS must remain clear of all manned aircraft operations. Note: Penn Hospitals have frequent medical helicopter flights coming and going and all UAS operations must not be in proximity to or interfere with medical helicopter flights.
• Anyone intending to operate a UAS at the University of Pennsylvania must notify the PennSTAR Communications Center, 215-662-7736 (primary) or 215-662-7737 (alternate), at least one hour prior to the flight and provide flight location and duration.
• Individual notification is not required for flights at the designated Penn South Field UAS location during scheduled flight hours.
• No flights are allowed in proximity of large gatherings of people or sporting events.
• No flights are allowed 30 minutes before official sunset to 30 minutes after official sunrise.²
• UAS must weigh less than 55 pounds.
• No reckless operation.
• UAS may not be used to photograph, video, record or monitor areas or locations where members of the University of Pennsylvania community or members of the general public would have a reasonable expectation of privacy.
• The operator must safely ground and suspend operations of any UAS when ordered by a University of Pennsylvania Police Officer or public safety official.
• UAS use must comply with all federal, state, and local laws and guidelines.
• The operator of a UAS weighing between .55 to 55 pounds must register the UAS with the FAA.
• Information on FAA rules and online registration can be accessed at: http://www.faa.gov/uas/registration.
• Registration of a UAS aircraft under .55 pounds is not required, but all other safety restrictions apply.
• Recreational and educational operators may not receive any compensation (including cost reimbursement, honorarium, or pay) directly or indirectly related to operation of the UAS.
• Any use for instructional, research, or commercial purposes by Penn faculty, students, and staff must comply with all FAA Part 107 or Section 333 requirements. (https://www.faa.gov/uas/media/Part_107_Summary.pdf, https://www.faa.gov/uas/beyond_the_basics/section_333/333_authorizations/media/University-of-Pennsylvania-14755.pdf). Flight restrictions in these guidelines may be modified through compliance with the FAA waiver application and approval process.
• Commercial Operation of UAS
  • All civil commercial UAS use must comply with all federal, state and local laws and guidelines and operators must obtain a Part 107 Certification, a Section 333 Exemption, or a “Special Airworthiness Certificate” issued by the FAA.
  • Commercial use of a UAS from or above University of Pennsylvania property is permitted only for educational, research, or University-related purposes.
  • A commercial UAS operator must provide proof of $5 Million in general liability insurance on an occurrence basis, with a certificate of insurance naming the Trustees of the University of Pennsylvania as an additional insured. Proof of insurance shall be submitted to the University of Pennsylvania risk management department prior to flight operations.
• A commercial UAS operator must be accompanied by a representative of the University of Pennsylvania at all times when operating a UAS on University property.

Penalties for Violation of University UAS Guidelines

Any violation of law (trespassing, illegal surveillance, reckless endangerment, etc.) or violation of this policy may subject the individual responsible for the violation to disciplinary action and/or prosecution.

Any damages or injuries to property or individuals during the operation of a UAS on University of Pennsylvania property, other than for a University of Pennsylvania authorized research or educational use, shall be the sole financial responsibility of the UAS operator. However, an operator shall be solely liable for negligent or intentional use outside of the authorized research or educational use.

For questions regarding the operation of a UAS at the University of Pennsylvania, you may contact:

Division of Public Safety 215-573-3333

Guidelines on Open Expression

I. Principles

A. The University of Pennsylvania, as a community of scholars, affirms, supports and cherishes the concepts of freedom of thought, inquiry, speech, and lawful assembly. The freedom to experiment, to present and examine alternative data and theories; the freedom to hear, express, and debate various views; and the freedom to voice criticism of existing practices and values are fundamental rights that must be upheld and practiced by the University in a free society.

B. Recognizing that the educational processes can include meetings, demonstrations, and other forms of collective expression, the University affirms the right of members of the University community to assemble and demonstrate peaceably in University locations within the limits of these Guidelines and undertakes to ensure that such rights shall not be infringed. In keeping with the rights outlined in I.A. (p. 1791) above, the University affirms that the substance or the nature of the views expressed is not an appropriate basis for any restriction upon or encouragement of an assembly or a demonstration. The University also affirms the right of others to pursue their normal activities within the University and be protected from physical injury or property damage. The University shall attempt to ensure that, at any meeting, event or demonstration likely to be attended by non-University law enforcement authorities, the rights provided by these Guidelines are not infringed.

C. The University shall be vigilant to ensure the continuing openness and effectiveness of channels of communication among members
of the University community on questions of common interest. To
further this purpose, a Committee on Open Expression has been
established as a standing Committee of the University Council. The
Committee on Open Expression has as its major tasks: participating
in the resolution of conflicts that may arise from incidents or
disturbances implicating these Guidelines; mediating among the
parties to prevent conflicts and violations of these Guidelines;
interpreting these Guidelines; advising administrative officers when
appropriate; and recommending policies and procedures for the
improvement of all levels of communication.

D. In case of conflict between the principles of the Guidelines on
Open Expression and other University policies, the principles of the
Guidelines shall take precedence.

II. Definitions

A. For the purposes of these guidelines, the “University community”
shall mean the following individuals:
1. Persons who are registered as students or who are on an
unexpired official leave of absence.
2. All persons who are employed by the University.
3. Trustees and associate trustees of the University and members of
Boards of Overseers or other bodies advisory to the University.

B. For the purposes of these Guidelines, “meeting” and “event” designate
a gathering of persons in a University location previously reserved for
that purpose. Unless designated as public, meetings are considered
to be private. Events are considered to be public. “Demonstration”
designates the presence of one or more persons in a University
location with the intent to express a particular point of view in a
manner that attracts attention, as in protest, rallies, sit-ins, vigils, or
similar forms of expression. “University location” designates:
1. The campus of the University;
2. Any location owned, leased or used by the University, when used
by members of the University community; and
3. Areas immediately adjacent thereto.

III. Standards

A. The University, through the President, the Provost, and the Vice
Provost for University Life, shall act to encourage and facilitate free
and open expression within these Guidelines.
1. The University shall publish these Guidelines at least once each
academic year in a manner that brings them to the attention
of members of the University community. The University shall
publish the rules adopted pursuant to IV.B.1 (p. 1793) by the
Committee on Open Expression at least once each academic year
in a manner that brings them to the attention of members of the
University community.

2. The University shall establish standards for the scheduling of
meetings and events. This shall involve:
a. Publishing policies and procedures whereby members of the
University community, upon suitable request, can reserve and
use designated spaces within University buildings for public
or private meetings or events;
b. Publishing policies and procedures whereby members of the
University community, upon suitable request, can reserve and
use designated outdoor spaces on the University campus for
public meetings or events;
c. Publishing policies and procedures that specifically
address requests involving groups composed entirely or
predominantly of persons who are not members of the
University community (see Section VI (p. 1795));
d. Consulting with the Committee on Open Expression with
regard to the substance of the policies and procedures and
the manner of their publication; and, if practicable, consulting
with the Committee on Open Expression before denying a
request for use of a room, facility, or space by an organization
recognized by the University for a reason other than prior
assignment of the room, facility, or space. In any event, any
such denial must be reported promptly to the Committee.

B. Each member of the University community is expected to know and
follow the Guidelines on Open Expression. A person whose conduct
violates the following Standards may be held accountable for that
conduct, whether or not the Vice Provost or delegate has given an
instruction regarding the conduct in question. Any member of the
University community who is in doubt as to the propriety of planned
conduct may obtain an advisory opinion from the Committee on Open
Expression in advance of the event.
1. Individuals or groups violate these Guidelines if:
a. They interfere unreasonably with the activities of other
persons. The time of day, size, noise level, and general tenor
of a meeting, event or demonstration are factors that may be
considered in determining whether conduct is reasonable;
b. They cause injury to persons or property or threaten to cause
such injury;
c. They hold meetings, events or demonstrations under
circumstances where health or safety is endangered; or
d. They knowingly interfere with unimpeded movement in a
University location.

2. Individuals or groups violate these Guidelines if they hold a
demonstration in the following locations:
a. Private offices, research laboratories and associated facilities,
and computer centers; or
b. Offices, museums, libraries, and other facilities that
normally contain valuable or sensitive materials, collections,
equipment, records protected by law or by existing University
policy such as educational records, student-related or
personnel-related records, or financial records; or

c. Classrooms, seminar rooms, auditoriums or meeting rooms
in which classes or private meetings are being held or are
immediately scheduled; or

d. Hospitals, emergency facilities, communication systems,
utilities, or other facilities or services vital to the continued
functioning of the University.

3. a. Individuals or groups violate these Guidelines if they continue
to engage in conduct after the Vice Provost for University Life
or delegate has declared that the conduct is in violation of the
Guidelines and has instructed the participants to modify
or terminate their behavior. Prompt compliance with the
instructions shall be a mitigating factor in any disciplinary
proceedings based upon the immediate conduct to which
the instructions refer, unless the violators are found to have
caused or intended to cause injury to person or property or to
have demonstrated willfully in an impermissible location.
b. If the individuals or groups refuse to comply with the
Vice Provost’s or delegate’s order, they may challenge
the appropriateness of the order to the judicial system. If
the judiciary finds that the conduct was protected by the
Guidelines, all charges shall be dismissed.
c. Individuals or groups complying with the Vice Provost’s or delegate’s order may request that the Committee on Open Expression determine if the Guidelines were properly interpreted and applied to their conduct.

**IV. Committee on Open Expression**

**A. Composition**

1. The Committee on Open Expression consists of seventeen members: eight faculty members named by the Faculty Senate Executive Committee, two representatives of the Penn Professional Staff Assembly, one representative of the Weekly-Paid Professional Staff Assembly, and three undergraduate students and three graduate/professional students selected by the appropriate student governance organizations (currently the Nominations and Elections Committee of the Undergraduate Assembly and the Graduate and Professional Student Assembly).

2. Members of the Committee are appointed for the following terms:
   a. The faculty and representatives of the Penn Professional Staff Assembly are appointed to two-year terms, staggered so that in each year either two or three faculty members are appointed and one representative of the Penn Professional Staff Assembly is appointed.
   b. The representative of the Weekly-Paid Professional Staff Assembly is appointed for a two-year term.
   c. The undergraduate and graduate/professional student members are appointed to one-year terms.
   d. Vacancies shall be filled for the unexpired term by the appropriate nominating body or persons.

3. The Chair of the Committee shall be selected by the Committee on Committees from among the members of the Committee on Open Expression.

**B. Jurisdiction**

The Committee has competence to act in issues and controversies involving open expression in accordance with these Guidelines. The Committee’s responsibilities are the following:

1. Issuing rules to interpret or give more specific meaning to the Guidelines. Before adopting a rule, the Committee must hold an open hearing on the proposed rule and receive the views of individuals or groups. An affirmative vote of eight members is required for adoption, modification or rescission of a rule to be effective.

2. Recommending to the University Council proposals to amend or repeal the Guidelines. An affirmative vote of seven members is required to make such recommendations.

3. Giving advisory opinions interpreting the Guidelines at the request of a member of the University community for the purpose of advising that person or the University community. Such advice is provided to guide future action. If the Committee does not give a requested opinion, it must indicate its reasons for not doing so. The Committee must respond to such requests as soon as feasible but in any event not later than within one month of the receipt by the Chair of the Committee.

4. Giving advisory opinions interpreting the Guidelines at the request of administrative officials with responsibilities affecting freedom of expression and communication. Such advice is provided for the purpose of guiding future action.

5. Mediating in situations that involve possible violations of the Guidelines. Those Committee members available at the time may act on behalf of the Committee. In carrying out the mediation function, the Committee or those members present may advise the responsible administrative officials and any other person with respect to the implementation of the Guidelines. Those Committee members who have acted on behalf of the Committee must report on their activities to the full Committee.

6. Reviewing the following administrative decisions for the purpose of providing advice on future actions.
   a. At the discretion of the Committee, administrative decisions involving these Guidelines made without consultation with the full Committee.
   b. All instructions by the Vice Provost or delegate to modify or terminate behavior under Section III.B.3 (p. 1792) of these Guidelines.

7. Investigating incidents involving the application of these Guidelines to aid the Committee in its functions of rule making, recommending changes in the Guidelines or issuing advisory opinions. Such functions provide guidance to the University community for future action. The results of Committee investigations for these purposes shall not be a part of the initiation, consideration or disposition of disciplinary proceedings, if any, arising from the incidents.

8. Adopting procedures for the functions of the Committee, varied to suit its several functions, consistent with these Guidelines. Procedures that are not wholly matters of internal Committee practice must be made public in advance of implementation. Except as otherwise provided, the Committee may determine its own voting procedures.

9. Submitting an annual report to the Council and the University on the status of the Committee’s work in the University journal of record.

**C. Procedures**

1. Except as provided with respect to the mediation function in Section IV.B.5 (p. 1793), seven members of the Committee constitute a quorum.

2. The Committee can authorize subcommittees, selected from its own members, to act for the Committee in any matter except the issuance of rules interpreting or implementing the Guidelines or the making of recommendations to amend or repeal the Guidelines.

3. The Committee shall respect the privacy of individuals as its general policy and shall maintain the right to declare the confidentiality of its proceedings.
   a. If a person appearing before the Committee requests that his or her testimony or information be kept confidential, the Committee shall consider such a request. The Committee shall determine whether to honor that request and shall inform that person of its decision before testimony is given.
   b. Minutes of particular Committee meetings may be declared confidential by the Committee or be so declared at the discretion of the chair subject to review by the Committee.
   c. All Committee documents containing confidential material, as determined by the chair, shall be clearly marked “confidential” and shall carry a warning against unauthorized disclosure.

**V. Responsibilities for Enforcement**

**A.** It is the responsibility of the Vice Provost for University Life (hereafter referred to simply as the "Vice Provost") to protect and maintain the right of open expression under these Guidelines.
B. Observation of meetings, events or demonstrations, when deemed necessary by the Vice Provost to protect and maintain open expression, shall be the responsibility of the Vice Provost, who may delegate such responsibility. This delegate shall have full authority to act in the name of the Vice Provost under these Guidelines.

1. The observer (Vice Provost or delegate) shall identify himself or herself to those responsible for the meeting or event or to the leaders of the demonstration.

2. The Vice Provost shall attempt to inform the chair of the Committee on Open Expression of meetings, events or demonstrations to which an observer will be sent. The chair may designate a member or members of the Committee to accompany and advise the observer. Such a Committee representative shall also be identified to those responsible for the meeting or event or to the leaders of the demonstration.

3. Except in emergencies, the Vice Provost’s authority under these Guidelines shall not be delegated to employees of the University’s Department of Public Safety. The role of public safety personnel at a meeting, event or demonstration is defined below, in Section V.C.3 (p. 1794).

4. Any observer or Committee representative who attends a meeting, event or demonstration shall respect the privacy of those involved. If there has been no violation of these Guidelines, other University regulations, or applicable laws, an observer, committee representative, or public safety employee who attends a meeting, event or demonstration shall not report on the presence of any person at such meeting, event or demonstration.

C. The Vice Provost or delegate is responsible for enforcing Section III.B (p. 1792), and may instruct anyone whose behavior is violating or threatens to violate these Guidelines to modify or terminate such behavior. The instruction shall include notice that failure or refusal to comply is a further violation according to Section III.B (p. 1792). of these Guidelines. However, an instruction or warning by the Vice Provost or delegate is not a prerequisite for a finding that a violation has occurred.

1. When the Vice Provost or delegate declares that an individual or a group has violated the Guidelines, he or she may request to examine their University identification.
   a. Failure to comply with this request is in violation of the Guidelines.
   b. In the event that any person(s) are deemed by the Vice Provost or delegate, in consultation with available members of the Committee on Open Expression, to have violated the Guidelines and such person(s) refuse to show University or other identification, the Vice Provost or delegate shall if practicable inquire of other individuals present as to the identity of the claimed violator(s). Identification by two other individuals shall suffice to establish identity. Should it not be possible to establish identity in this way, the Vice Provost or delegate may direct that photographs be taken of the participant(s) in the claimed violation. The Vice Provost or delegate must warn the individual(s) that their photographs will be taken unless identification is presented. Photographs and videotapes obtained without such warning may not be used as evidence in disciplinary proceedings. It is preferred that a member of the Committee on Open Expression take any such photographs; however, if no such person is able or willing to do so, another member of the University community may be requested to do so. As soon as safely practicable, all such photographs shall be turned over to the Vice Provost or delegate. Any photographs taken (including videotapes and negatives) shall be used solely by the Office of Student Conduct for the purpose of investigation of alleged violations and possible identification of alleged violators of these Guidelines. If it is determined that no violation has occurred, the Vice Provost or delegate shall destroy the photographs. If a violation is found to have occurred, after identification has been made and the case has been adjudicated, the Vice Provost or delegate shall destroy the photographs. None of the photographs shall be published. After each incident at which photographs are taken, the Committee on Open Expression shall report on the incident to the University Council, via the chair of the University Council Steering Committee, regarding what happened in the incident, which individuals saw the photographs, and the disposition of the photographs.

2. In carrying out this responsibility for safeguarding the right of open expression, the Vice Provost shall obtain the advice and recommendation of the representatives of the Committee on Open Expression whenever feasible.

3. The Vice Provost or delegate may request members of the University Police to attend meetings, events or demonstrations to help protect the open expression of those involved.
   a. Any person acting as an agent of the Division of Public Safety who attends a meeting, event or demonstration in a University location shall be clearly identifiable as such and in normal duty uniform. (Arms may be carried if they are part of “normal duty uniform.”)
   b. Public Safety personnel also may attend meetings, events or demonstrations when requested to do so by the person or group responsible for the event, when prominent public figures are involved, or when the Commissioner of Public Safety or delegate determines that there exists an imminent danger of violence at the event.

4. Terminating a meeting, event or demonstration by force is a most serious step, as this action may exacerbate existing tensions and may lead to personal injury and property damage.
   a. Avoidance of injury to persons by the continuation of a meeting, event or demonstration is a key factor in determining whether it should be forcibly terminated. Property damage and significant interference with educational processes are also factors to be considered and may be of sufficient magnitude to warrant forcible termination.
   b. Whenever possible, the Vice Provost or delegate should consult with the Committee on Open Expression before seeking a court injunction against those involved in a meeting, event or demonstration or calling for police action.
   c. The Vice Provost or delegate shall inform those involved that he or she intends to seek an injunction or call for police intervention before he or she does so.
   d. When a meeting, event or demonstration is forcibly terminated, a full statement of the circumstances leading to the incident shall be publicized by the Vice Provost within the University.

D. 1. Cases involving undergraduate students are referred to the Office of Student Conduct who investigates the event and decides what disciplinary proceedings, if any, to pursue.

2. Cases involving graduate or professional students are referred to the Office of Student Conduct or to the established disciplinary body of the school in which the student is enrolled.
I. Inviting Speakers to Campus

pursuant to Guidelines on Open Expression, Section IV.B.

2014-15 Committee on Open Expressions of the University Council, These are interpretative guidelines adopted by the members of the University community. The extent to which the privileges and obligations of these Guidelines may be made applicable in particular circumstances to individuals who are not members of the University community shall be determined by the Vice Provost or delegate. Participants in meetings, events and demonstrations in a University location are required to comply with the instructions of the Vice Provost or delegate. (See III.A.2.c (p. 1792).)

1 An “unreasonable noise level” is defined as sound above 85 decibels measured by a calibrated sound-level meter at an “A” weighting on “slow” response ten feet away from and directly in front of the source, amplifier or loudspeaker when the latter is within 50 feet of a building.

2 Videotaped or closed circuit television information collected by posted, fixed location cameras is excluded, as long as it is in conformance with the rules of the CCTV policy as of January 13, 1999.

(Source: Almanac, March 16, 1993 (https://almanac.upenn.edu/archive/v39pdf/n25/031693.pdf))

These are interpretative guidelines adopted by the members of the 2014-15 Committee on Open Expressions of the University Council, pursuant to Guidelines on Open Expression, Section IV.B.

I. Inviting Speakers to Campus

A. The Guidelines clearly express the foundational value of free speech at Penn (I.A.): “The University of Pennsylvania, as a community of scholars, affirms, supports and cherishes the concepts of freedom of thought, inquiry, speech, and lawful assembly. The freedom to experiment, to present and examine alternative data and theories; the freedom to hear, express, and debate various views; and the freedom to voice criticism of existing practices and values are fundamental rights that must be upheld and practiced by the University in a free society.” These values are of paramount importance: “In case of conflict between the principles of the Guidelines on Open Expression and other University policies, the principles of the Guidelines shall take precedence” (I.D).

By allowing a controversial speaker to speak or a group to organize and invite a speaker or hold an event, the University of course in no way endorses that speaker’s or event organizer’s content or viewpoint; rather, it affirms the value of creating a robust marketplace of ideas and fostering reasoned disagreement and discourse.

B. The Guidelines on Open Expression already unambiguously forbid discriminating against particular content and viewpoints (I.B): “the substance or nature of the views expressed is not an appropriate basis for any restriction upon or encouragement of an assembly or demonstration.” The unpopularity of a speech’s content or viewpoint is not a reason to suppress speech. Objectors may not have a “heckler’s veto” over speech with which they disagree. Allowing threats of protests or violence to suppress speech in any way would encourage protesters to make such threats. In keeping with this foundational principle, the University has never revoked a commencement speaker’s invitation to speak based upon the substance of the speaker’s views, including any controversy they might generate.

Most speakers at Penn are invited not by the University itself, but by particular organizations, departments, schools, and individuals at Penn. The Guidelines protect members of the entire University community against official reprisals for hosting controversial speakers and events. An event organizer is at liberty to change its mind freely, without duress, and to cancel an event or a speaker invitation. Other members of the University community likewise have the right to criticize a proposed speaker’s or event’s substance or viewpoint, or even to call upon the event organizer to cancel an event or rescind an invitation. But they may not go beyond criticism to exert any duress on the event organizer or speaker to withdraw. Duress includes any express or implied threat—by an administrator, a member of an administrative staff, a student leader, or a faculty member or teaching assistant in a supervisory or hierarchical relationship to an event organizer or speaker (particularly one within the same department or school)—to an organization’s or speaker’s or event’s safety, recognition, registration, budget, funding, or access to venues or security, or to any faculty, student, administrator, or staff member’s employment, tenure candidacy, funding, grades, honors, academic standing, or other status within the University, or a threat of violence or similar unlawful conduct. Any such duress, express or implied, gives rise to the natural inference that the actor is seeking to suppress speech because it is controversial or unpopular. That would amount to “any restriction upon” “the substance or nature of the views expressed,” in violation of the Guidelines (I.B).

C. The norm at the University is to allow reservations of rooms and other venues on a first-come, first-served basis. Denying a room-reservation request on any other basis, or worse rescinding an existing reservation of a room or other venue, raises the almost inescapable inference that the denial or rescission is based on “the substance or nature of the views expressed” (I.B). Thus, the Guidelines already require, “if practicable, consulting with the Committee on Open Expression before denying a request for use of a room, facility, or space by an organization recognized by the University for a reason other than prior assignment of the room, facility, or space. In any event, any such denial must be reported promptly to the Committee” (III.A.2.d).

The same principle, in keeping with the Guidelines’ letter and spirit, applies to the authorization of events and to the provision of security, audiovisual, publicity, and other logistical support. An organization must of course have a budget sufficient to defray the necessary expenses and must reserve any such resources sufficiently in
Involuntary Leave of Absence Policy

I. Introduction

The University of Pennsylvania provides a wide range of services to support and address the mental and physical health needs of students. Our first concern is for the health and welfare of each individual in our community. Our goal is to enable all of our students to participate fully as members of Penn's academic community. However, students whose psychiatric, psychological, or other medical condition causes them to pose a threat to themselves or others, or causes them to significantly disrupt the educational and other activities of the University community, may be required to take a leave of absence from the University. Under these circumstances, students will be given the opportunity to take a voluntary leave through the process in place in their school. Should a student decline to take a voluntary leave, the University may determine that the student's health and welfare, and/or the needs of the community, require a period of involuntary leave of absence. The following policy establishes the protocol under which an involuntary leave of absence may occur and the process for return from leave.

II. Guidelines

The University may place a student on an involuntary leave of absence or require conditions for continued attendance under the following circumstances when the student exhibits behavior resulting from a psychological, psychiatric, or other medical condition that:

- threatens, harms, or has the potential to harm the health or safety of the student or others;
- causes or threatens to cause significant property damage; or
- significantly disrupts the educational and other activities of the University community.

The process for withdrawal and return from leave is set forth below.

III. Withdrawal Process

When a student exhibits any of the behaviors described above, the matter should be brought to the attention of the Office of the Vice Provost for University Life who will be responsible for informing the Vice Provost for Education (or such person who holds those responsibilities at the time) that an involuntary leave may be warranted. The Office of the Vice Provost for University Life will manage the process, convene case conferences, and work with University and School offices to coordinate the delivery of services. In most cases, the student will be required to undergo an immediate assessment of his or her psychological, psychiatric or other medical condition. This assessment will be performed by Counseling and Psychological Services (CAPS), the Student Health Service, or other appropriate professionals.

The student will be notified that the Provost's Office is seeking to determine whether he or she should be required to take a leave of absence. When reasonably possible, the student will be given the opportunity to confer with the Vice Provost for Education or his/her designee to provide additional information for consideration.

In consultation with the School Dean and the Office of the Vice Provost for University Life, the Vice Provost for Education will review the available information and make a decision that may include the following:

- Education as a first option for change, including academic, social, and personal counseling;
- Unfunded leave of absence to provide the student with the opportunity to address and resolve the issues identified;
- Reduced course load;
- Change of campus;
- Change of living arrangements;
- Change of faculty advisor;
- Change of study major;
- Other arrangements as necessary.
V. Temporary Removal

If the Vice Provost for Education has reason to believe, based on the information available, and in consultation with professionals with appropriate expertise, that the student's continued presence on campus poses an imminent threat of significant harm to him or herself or to others in the community, the Vice Provost for Education may take immediate action to remove the student from campus pending receipt and review of relevant information and a determination. At the Vice Provost for Education's discretion, this temporary removal may remain in place pending completion of any appeal process.

VI. Process for Return from Leave

A student seeking a return from leave must apply in writing to the Office of the Vice Provost for University Life. Such a request must be submitted no less than 30 days before the beginning of the semester in which the student seeks to reenroll. The student must demonstrate that he/she has met any conditions for return specified by the University.

The University may require any documentation or evaluation it deems appropriate. (Reports from health professionals should be directed to the director of CAPS or Student Health Services.) In addition, the University may require a release from the student to enable CAPS or SHS to discuss the student's condition with his/her treating health professional.

In consultation with the School Dean and the Office of the Vice Provost for University Life, the Vice Provost for Education will review the request and other relevant information, including the student's compliance with specified conditions for return from leave and the assessments of CAPS or Student Health Services and other health professionals, and make a determination of whether it is appropriate for the student to return.

If the Vice Provost for Education denies the request to return from leave, the student may challenge that decision by submitting a written appeal to the Provost within 5 days of receipt of the Vice Provost's decision.

VII. Confidentiality

All records concerning involuntary leaves of absence will be kept in accordance with the University confidentiality policy and other applicable policies. The student's transcript will indicate only the notation of "leave of absence." 

Note: A student on leave may not participate or hold a leadership position in a registered University organization.

VIII. Administration of the Process

Administrative duties with respect to convening this leave process and maintaining its records will be the responsibility of the Office of the Vice Provost for University Life.

(Source: Almanac, March 16, 2010, Volume 56, No. 25 (http://www.upenn.edu/almanac/volumes/v56/n25/absence.html))

Missing Students Notification Policy

Any member of the University community, including parents, who believes that a Penn student is missing should notify the University of Pennsylvania Police Department (UPPD) in the Division of Public Safety. To report a missing person, dial 5-1-1 from a campus telephone, use one of the blue light emergency telephones on campus and in the surrounding neighborhood, or dial (215) 573-3333 from an off-campus or cell phone.

In addition, the person should notify the Office of the Vice Provost for University Life (VPUL). VPUL and the Division of Public Safety are responsible for coordinating efforts in response to a report of a missing student. Any other University office that receives a report of a missing student is responsible for promptly notifying UPPD and VPUL of such report.

When a Penn student is reported to be missing, the University will take steps to try to locate the student or to determine why the student has not been seen. If UPPD determines that a police investigation is warranted, the University will support the investigation by providing information relevant to the search for the student, including photos, schedules, etc.

All students are strongly encouraged to provide the University with a confidential contact whom the University will notify in the event that the student is determined to be missing. This contact information, which will be maintained in the University's Management Information Services (UMIS) database and Advisor-in-Touch, will be accessible only to authorized campus officials and law enforcement authorities and will be used only in connection with responding to a report that the student is missing.

To register a contact person, a student should go to the Penn Portal home page, and under "Action items for all students" click on the link "Emergency Contact." This will direct the student to the "Penn-in-Touch Emergency Contact" page (using Penn Key and password) where
the student should select the tab for “Emergency or Missing Person Contact(s)” and provide the information requested.

If a student has been missing for more than twenty-four (24) hours, the Division of Public Safety or the University, through VPUL, will notify the student’s designated missing persons contact. UPPD will also notify the Philadelphia Police or other appropriate local police. If the missing student is under 18 years old and is not emancipated, the Division of Public Safety will notify the student’s custodial parent or guardian and/or any other designated contact within 24 hours of the determination that the student is missing. In addition, UPPD will enter the missing student into the National Crime Information Center database. For students over 18 years of age who have not designated a missing person contact, UPPD may notify the law enforcement agency where the student’s primary residence is located.

With respect to any student determined to be missing, the Division of Public Safety and/or VPUL may notify others at the University as appropriate—including, but not limited to, RAs, Deans, the Office of Student Affairs/Fraternity Sorority Life (in the case of a student residing in a fraternity or sorority) and the Office of International Programs (in the case of an international student). In addition, VPUL may contact parents and others if the student is not located within a reasonable period.

Parking Regulations

General Information

These regulations are intended to facilitate the work of the faculty, staff, students, and visitors through control of the parking and movement of motor vehicles of these individuals while on campus. The fact that a person parks in violation of any regulations and is not towed does not mean that the regulation is no longer in effect.

The University is not responsible for loss or damage to your car or personal property within it while it is parked on University facilities. To avoid losses and the inconvenience they cause, park your car carefully so that it will not be struck by others, lock your car and avoid leaving personal items inside. Individuals are particularly encouraged not to leave citizen band radios and tape players visible. These should be disconnected and locked in the trunk of the car. Any car not displaying a parking sticker will be towed away at owner’s expense.

The Department of Transportation and Parking also coordinates a van pool program and car pool matching service. Information about these functions may be obtained by calling 898-8667.

Towing Policy

Motor vehicles in University facilities (including parking garages and lots) without the appropriate parking permit sticker are towed by a private contractor. The towing fee and designated location to recover towed cars are posted at all University parking facilities. The contractor is bonded and is responsible for any damage that may occur to a car in the process. The contractor’s personnel will release, to its owner, a car that has been towed upon payment of towing fee plus storage charge. If an owner finds his car about to be towed away, he may pay the tow truck operator a drop fee (and have his car released immediately) to reimburse the operators for the time that has been expended in coming to get the violating vehicle. The contractor requires payment in cash before releasing a towed car or about to be towed car. If in doubt as to the location where towed vehicles may be claimed, please call Public Safety at 898-7297 or 7298.

Private Streets

Several streets within the University campus have been designated as private streets under the control of the Department of Public Safety. These include all roads bordered by Walnut, 33rd and 40th Streets except 38th and 34th Streets. Parking is specifically forbidden on all private thoroughfares. Illegally parked vehicles on the streets will be ticketed and/or towed by a private contractor.

Permits

Faculty, staff, and students must apply for a parking permit for all motor vehicles (including two- and three-wheeled vehicles) if they park or expect to park on the University grounds. Fees will be charged and decals issued which will allow vehicles to be parked in specific parking areas assigned to them. For information call the Parking Office (898-8667).

Registration is considered completed when decals are affixed to vehicles being registered. Decals are not transferable. Replacement decals may be obtained at the Parking Office, Suite 447A, 3401 Walnut Street.

Towing Appeals

A towed vehicle is only released after the fee has been paid to the towing contractor. When a student or employee feels that her or his vehicle has been unjustly towed, she or he may appeal to the Parking Violations Board for a refund. The appeal should be in writing, state the relevant facts, and be addressed to

Attn: Associate Director for Housing Operations
Parking Violations Board
Housing and Conference Services
3702 Spruce St.
Stouffer Commons
Philadelphia, PA 19104

A fee refund is made when the Board decides in the complainant’s favor.

Patent and Tangible Research Property Policies and Procedures

(Note: Words appearing in capital letters are defined in Article 5 unless defined in the document itself.)

The University periodically revises and updates its policies and procedures regarding patents and tangible research property, to help ensure that such policies and procedures keep pace with best practices and national trends in this highly significant area. Such revisions have been the subject of previous resolutions presented to the Board of Trustees in 2010, 2005 and 1993. In 2014, the Vice Provost for Research undertook a review of the existing Patent Policy and advanced revisions designed to keep the University at the leading edge of the rapidly changing landscape around commercialization of university research. The proposed revisions were discussed and approved by the Council of Deans, the Academic Planning and Budget Committee, the Provost’s Council on Research, the Faculty Council on Innovation, the Penn Center for Innovation Steering Committee, the Faculty Senate Committee on Faculty and the Administration, and the Faculty Senate Executive Committee. The proposed revised policy was published For Comment in Almanac (January 20, 2015), and all comments were taken under advisement. The final revised policy was adopted by the Board of Trustees at its meeting of February 26, 2015 and made effective as of July 1, 2015.

—Vincent Price, Provost
Article 1. Preamble

1.0 The Trustees of the University of Pennsylvania affirm the following principles as the basis for governing the intellectual property created by faculty, employees, students and guest scholars of the University:

1.1 The mission of the University includes the stimulation of basic and applied research activities of faculty, employees and students of the University, and the dissemination of the results of their research for the purpose of adding to the body of knowledge and serving the public interest.

1.2 The purpose of this policy is to encourage and enable faculty, employees and students to translate new knowledge into social good and provide a framework within which the University can support and facilitate these actions.

1.3 The University endeavors, where it deems appropriate, to secure intellectual property protection for the products of such research and to encourage commercial investment in and development of University intellectual property for the benefit of the public.

1.4 The community has endowed the University with certain privileges, resources and assets in the expectation that no single party will derive sole benefit or be unjustly enriched from what the community has endowed to the University.

1.5 The University as a non-profit organization endeavors to marshal its resources and exploit its assets to serve the public interest, and in so doing reinvests in the research enterprises of its faculty, employees and students. Members of the University community share in the University’s responsibility to serve the public interest, and have a duty to disclose and assign their inventions.

1.6 The University is regularly the recipient of grants from the government, foundations or commercial enterprises for the support of research, and is subject to legal and contractual obligations imposed by these entities.

1.7 The University wishes to share the economic benefits of inventions or other intellectual property with the creators of such works in a way that is consistent with the research and educational mission of the University, and conforms to the University’s obligations to regulatory authorities, research sponsors and licensees.

1.8 In protecting and managing its intellectual property assets, the University insists that the academic freedom of its faculty and students be preserved, and that collegiality and the open expression of ideas by and among members of the University community be encouraged.

Article 2. Policy and Procedures on Inventions and Patents

2.0 Policy Statement on Inventions and Patents

It is the policy of the University that all INVENTIONS, together with associated MATERIALS, which are conceived or reduced to practice by INVENTORS in the course of employment at the University, or result from work directly related to professional or employment responsibilities at the University, or from work carried out on University time, or at University expense, or with SUBSTANTIAL USE OF UNIVERSITY RESOURCES under grants or otherwise, are the property of the University, effective immediately as of the time such INVENTIONS are conceived or reduced to practice. INVENTORS hereby irrevocably assign to the University all right, title and interest in and to the INVENTIONS, MATERIALS and related patent applications and patents, and shall cooperate fully with the University in the preparation and prosecution of patent applications and patents. Patents, as they may be available on such INVENTIONS, may be applied for in any country by the University. The University will exercise its ownership and management of such INVENTIONS, with or without economic benefit, with due regard for the principles set forth in the Preamble of this Policy. Procedures for implementation of this Policy, including a PARTICIPATION AGREEMENT, shall be developed and promulgated by the President of the University.

2.1 Procedures for the Administration and Management of Inventions and Patents

The following procedures have been approved by the President as of the EFFECTIVE DATE:

2.1.1 Participation Agreement

All faculty, emeritus faculty, visiting faculty or other visitors using research facilities (including but not limited to individuals on sabbatical from another university or research facility), researchers, adjunct faculty, postdoctoral employees and trainees, graduate students, and undergraduate students participating in research as employees or otherwise, and all salaried employees, shall execute a PARTICIPATION AGREEMENT (Appendix A) as a condition of employment, matriculation, participation in research, or use of University resources. Notwithstanding the above, an individual acknowledges that he or she is bound by this Policy by accepting or continuing University employment or by using University resources or facilities, and acknowledges that he or she hereby irrevocably assigns all right, title and interest in and to INVENTIONS, together with associated MATERIALS, and patent applications and patents which may issue, effective as of his or her first date of employment, matriculation, participation in research, or use of University resources, whichever occurs first, regardless of whether he or she executes or executed a PARTICIPATION AGREEMENT. All students shall be advised of the University’s intellectual property policies and procedures through publication and dissemination in the Penn Book: Resources, Policies and Procedures Handbook, and elsewhere.

2.1.2 Disclosure and Review

INVENTORS shall file INVENTION DISCLOSURES for all INVENTIONS covered by the PATENT POLICY promptly with the PENN CENTER FOR INNOVATION (PCI) at the University. PCI shall direct the review and management of the INVENTIONS under procedures and practices monitored by the EXECUTIVE COMMITTEE. PCI will undertake the review of the INVENTION DISCLOSURE within thirty (30) business days after the submission is completed, or, if requested by one or more INVENTORS, PCI will use reasonable efforts to undertake the review sooner if necessary to facilitate an upcoming publication, presentation, or other public disclosure which could adversely affect whether to pursue patent protection. PCI will convey its determination whether the University wishes to retain title to and pursue a patent application on an INVENTION as soon as practicable, in writing, after completing its review of a completed INVENTION DISCLOSURE submission, and use reasonable efforts to convey such decision to all INVENTORS within three (3) months after receiving a complete INVENTION DISCLOSURE submission.
If the University wishes to retain title to an INVENTION, upon the request of the INTELLECTUAL PROPERTY ADMINISTRATOR (IPA), an INVENTOR shall sign all documents necessary for the University to protect an INVENTION, file patent application(s), comply with applicable law in connection with such INVENTION, and confirm in writing the INVENTOR's prior assignment to the University of all right, title and interest in and to such INVENTION.

2.1.3 Inventions Outside the Policy

If a faculty member, emeritus faculty, visiting faculty, other visitor using research facilities, researcher, adjunct faculty, postdoctoral employee or trainee, graduate student, undergraduate student, or salaried employee (an "INDIVIDUAL") believes that a given INVENTION was made outside the scope of the PATENT POLICY, he or she shall provide the IPA with a written statement of the circumstances leading to the making of the INVENTION. If, after reviewing the facts, the IPA determines that the INVENTION falls outside the scope of the PATENT POLICY, the IPA shall confirm in writing within thirty (30) days after receiving such written statement that the University has no right, title and interest to the INVENTION. If the facts are equivocal, or if the IPA believes that such INVENTION falls under the PATENT POLICY, the matter of ownership will be referred by the IPA or the INDIVIDUAL to the APPEALS BOARD, and the APPEALS BOARD shall make a recommendation to the President concerning ownership. Nothing in this PATENT POLICY is intended to imply or assume that an emeritus faculty member is making or has made a SUBSTANTIAL USE OF UNIVERSITY RESOURCES, or imply or assume that his or her invention falls under or outside the scope of this PATENT POLICY.

If an INDIVIDUAL makes an INVENTION which is outside the scope of the PATENT POLICY, and the IPA (or, if appealed, the President) agrees that such INVENTION is outside the scope of the PATENT POLICY, such INDIVIDUAL may request in writing to use the services of PCI in connection with the assessment, protection, and/or commercialization of such INVENTION. PCI, in its sole discretion, may decline, or may elect to use its personnel and services with respect to such INVENTION, on the condition that:

1. the INDIVIDUAL makes ASSIGNMENT to the University in a writing deemed sufficient by PCI; and
2. the INDIVIDUAL shall be deemed to be an INVENTOR and such invention shall be deemed to be an INVENTION within the scope of this PATENT POLICY, for all purposes (including but not limited to distributions), effective as of the date of ASSIGNMENT.

The use of PCI shall be deemed to be a SUBSTANTIAL USE OF UNIVERSITY RESOURCES. PCI's decision to decline shall not be reviewable by the APPEALS BOARD.

2.1.4 Student Inventions.

2.1.4.1 INVENTIONS made by students will remain the property of the students except:

1. when an INVENTION is made in the course of employment at the University, or
2. when an INVENTION results from work directly related to employment responsibilities at the University, or
3. when an INVENTION results from work or research performed under a grant or other sponsorship where the grant or sponsorship requires ASSIGNMENT to the University, or
4. when an INVENTION is created with another INVENTOR who has a duty to make or has made ASSIGNMENT to the University.

In such instances, students are hereby deemed to have irrevocably transferred and assigned all of their right, title and interest in and to such INVENTION, effective as of the first date conceived or reduced to practice, regardless whether or when such student executes a PARTICIPATION AGREEMENT or other written agreement confirming assignment, and such undergraduate student shall be deemed an INVENTOR for purposes of sharing in distributions and otherwise pursuant to this Policy.

2.1.4.2 INVENTIONS created by or resulting from research carried out in University laboratories as part of a post-baccalaureate or postdoctoral degree or non-degree program shall be subject to this PATENT POLICY. In such instances, the individual shall be deemed to have hereby irrevocably made ASSIGNMENT to the University effective as of the first date of matriculation, and will be deemed an INVENTOR for purposes of distributions and otherwise pursuant to this PATENT POLICY, regardless of whether or when such individual executes or executed a PARTICIPATION AGREEMENT or other written agreement confirming assignment.

2.1.5 Return of Inventions

2.1.5.1 Inventions Made without Outside Sponsorship. If an INVENTION is made without sponsorship of the federal government or other sponsor, and the University does not wish to pursue a patent application in the United States or other jurisdiction, or elects to abandon a pending patent application, or does not wish to own an issued patent on a given INVENTION, the IPA may, after consultation with and subject to the approval of the Vice Provost for Research, return all of the University's right, title and interest to the INVENTION, patent application or issued patent to the INVENTORS, subject to and upon the terms and conditions set forth in Section 2.1.5.3.

2.1.5.2 Inventions Made with Outside Sponsorship. If an INVENTION is made with sponsorship of the federal government or other sponsor, and the University does not wish to pursue a patent application in the United States or other jurisdiction, or elects to abandon a pending patent application, or does not wish to own an issued patent on a given INVENTION, and the United States Government or other sponsor waives ownership rights, if any, the IPA may, after consultation with and subject to the approval of the Vice Provost for Research, return all of the University's right, title and interest to the INVENTION, patent application or issued patent to the INVENTORS, subject to and upon the terms and conditions set forth in Section 2.1.5.3. If the INVENTION was made with sponsorship of the federal government, the INVENTORS are responsible for obtaining written approvals from the appropriate federal government representatives allowing the University to transfer the University's right, title and interest to the INVENTION to the INVENTORS, and providing such written approvals to PCI prior to any return to the INVENTORS. If the INVENTION was made with sponsorship of the federal government, to the extent applicable under then-current law, the INVENTOR
shall use reasonable efforts to arrange for development and commercialization opportunities for the INVENTION, and otherwise comply with all laws regarding the INVENTION and any additional requirements imposed by the federal government when approving the transfer to the INVENTORS.

2.1.5.3 Conditions Regarding Return of Inventions. Prior to the University transferring its right, title and interest to an INVENTION and any related patent(s) and/or patent application(s), each INVENTOR and PCI shall enter into a written agreement including at least the following terms:

2.1.5.3.1 If the University elects to return an INVENTION made by more than one INVENTOR, the University will return an undivided interest in the whole, as defined by prevailing United States patent law, to each INVENTOR, unless directed otherwise in writing by all INVENTORS.

2.1.5.3.2 In every case in which an INVENTION is returned to an INVENTOR, the University hereby reserves a royalty free, non-exclusive, irrevocable right to practice the INVENTION for research, educational, and clinical care purposes, and to permit other academic institutions and not-for-profit research institutions to do the same.

2.1.5.3.3 The University may seek reimbursement for any INVENTION ASSESSMENT COSTS incurred before the return from the INVENTOR. After the effective date of the return of the INVENTION, the University shall not be responsible for paying any ongoing INVENTION ASSESSMENT COSTS or other costs or expenses in connection with the returned INVENTION and any patents or patent applications for the returned INVENTION.

2.1.5.3.4 The INVENTOR or INVENTORS jointly and severally, shall pay the University five percent (5%) of all GROSS COMPENSATION, and report nonconfidential information at least annually to PCI regarding efforts to commercialize the returned INVENTION and GROSS COMPENSATION received.

2.1.5.3.5 Each INVENTOR shall represent and warrant that the INVENTOR has disclosed to PCI, as part of the INVENTION DISCLOSURE or otherwise: the best mode contemplated by the INVENTOR for carrying out the INVENTION; all facts and circumstances relevant to assessing the INVENTION DISCLOSURE and INVENTION; and has answered each question or inquiry from PCI truthfully, to the best of the INVENTOR's knowledge and belief.

2.1.5.3.6 INVENTORS have the obligation to disclose to the IPA, and make ASSIGNMENT of, improvements on returned INVENTIONS at the time such improvements are conceived or reduced to practice, if such improvements are conceived or reduced to practice under circumstances subject to the PATENT POLICY.

2.1.5.3.7 Each INVENTOR shall acknowledge that the transfer of the University's interest in the INVENTION may raise issues under applicable University policies, including without limitation its conflict of interest policies and restrictions on use of University facilities and assets for private purposes, and that the return of an INVENTION does not constitute a waiver of any term in any University policy or its applicability to the INVENTOR. The INVENTOR will agree not to use University resources, personnel, time, facilities or assets to further develop, protect or commercialize the returned INVENTION, unless permitted after review by the University's Conflict of Interest Standing Committee, and approved by the Vice Provost of Research.

2.1.5.3.8 Each INVENTOR will, and will cause any licensees or third persons participating in the development and commercialization of the INVENTION, to indemnify the University from any claims arising out of or resulting from or in connection with the INVENTION and its development and commercialization. The University will transfer its right, title and interest as is, without warranties.

2.2 Conveyance of Rights to Inventions.

2.2.1 Licensing.

The University may convey rights to its INVENTIONS through license agreements under the terms of which the University retains all right, title and interest in and to its INVENTIONS, while granting to a commercial entity the right to make, use, and/or sell products based on the INVENTION(S).

2.2.1.1 INVENTORS or other University faculty or employees involved in the licensing of an INVENTION to a prospective licensee shall disclose any fiduciary or financial interest in or contractual relationship with the prospective licensee to their Deans and Chairs, or their relevant administrative supervisor, in accordance with the applicable University policy on conflicts of interest. In addition, INVENTORS or other University faculty or employees involved in the licensing of an INVENTION to a prospective licensee shall disclose any fiduciary or financial interest in that prospective licensee to the IPA, who shall refer consideration of the matter to the EXECUTIVE COMMITTEE.

2.2.1.2 PCI will notify INVENTORS of prospective licensees in an early stage of the negotiation process. The final decision on whether to license an INVENTION, to whom to license an INVENTION, the terms in the agreements, and otherwise how to proceed with the license rests with PCI, and is not appealable to the APPEALS BOARD or otherwise.

2.2.2 Exceptions to Licensing.

Exceptions to the requirement that rights be conveyed through a license agreement shall be considered only in extreme or unusual circumstances and shall require approval by the President of the University.

2.3 Distributions.

(For a hypothetical illustration of the distributions set forth in Sections 2.3.1 and 2.3.2, see Appendix C. Definitions for ADJUSTED PCI REVENUES FOR AN INVENTION, NET PCI INCOME FOR AN INVENTION, and other key definitions are in Article 5.)

2.3.1 Distribution of Adjusted PCI Revenues.

Unless otherwise required by law or contract, ADJUSTED PCI REVENUES for the INVENTION (defined in Section 5.0.1, but
generally described as the PRO RATA SHARE of GROSS PCI REVENUES (defined in Section 5.0.13) minus the INITIAL DEDUCTION (defined in Section 5.0.14)), shall be distributed as follows:

2.3.1.1 The INVENTORS PERSONAL SHARE shall be thirty percent (30%) of the ADJUSTED PCI REVENUES for the INVENTION (See Sec. 2.3.4).

2.3.1.2 The INVENTORS RESEARCH ACTIVITY SHARE shall be twelve and one-half percent (12.5%) of the ADJUSTED PCI REVENUES for the INVENTION (See Sec. 2.3.5).

2.3.2 Distribution of Net PCI Income.
NET PCI INCOME for the INVENTION (defined in Section 5.0.22, but generally described as the amount remaining after distributions in Section 2.3.1, minus the PRO RATA SHARE of AGGREGATE PCI OPERATING COSTS (defined in Section 5.0.3)) shall be distributed as follows:

2.3.2.1 The DEPARTMENTS OF INVENTORS SHARE shall be twenty percent (20%) of the NET PCI INCOME for the INVENTION (See Sec. 2.3.6).

2.3.2.2 The SCHOOLS OF INVENTORS SHARE shall be forty percent (40%) of the NET PCI INCOME for the INVENTION (See Sec. 2.3.7).

2.3.2.3 The UNIVERSITY RESEARCH SHARE shall be forty percent (40%) of the NET PCI INCOME for the INVENTION (See Sec. 2.3.8).

2.3.3 Allocation of the EQUITY POOL.
(Procedures governing licensing transactions for EQUITY are set forth in Appendix B). Under license agreements for which the University has negotiated an EQUITY POOL, where, in accordance with Appendix B.4, EQUITY will be issued directly to the INVENTOR(S), the INVENTORS shall receive thirty percent (30%) of the EQUITY POOL, unless one or more INVENTOR receives EQUITY from the licensee outside of the EQUITY POOL. An INVENTOR who receives EQUITY from the licensee outside of the EQUITY POOL shall not receive EQUITY from the EQUITY POOL except with approval of the University. The IPA shall make a recommendation in this regard to the Vice Provost for Research, who shall make a determination in consultation with the relevant Deans. Furthermore, if one or more INVENTOR receives EQUITY outside of the EQUITY POOL, the portion of the EQUITY POOL to be received by the other INVENTORS shall be reduced in proportion to the contribution to the licensed INVENTIONS, as determined by PCI, made by the INVENTORS who receive EQUITY outside of the EQUITY POOL.

2.3.3.1 INVENTORS receiving EQUITY from the EQUITY POOL or outside the EQUITY POOL may also receive INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES FOR THE INVENTION. An exception to this may arise in certain circumstances, such as when INVENTORS receive founders EQUITY, EQUITY for consulting services or other consideration from the licensee. In such cases, the University may determine that such INVENTORS shall not receive some or any of the INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES for the INVENTION. The IPA shall make a recommendation in this regard to the Vice Provost for Research, who shall make a determination in consultation with the relevant Deans.

2.3.3.2 Non-cash component of License. Any tangible, non-cash considerations (except EQUITY) in licenses will be distributed by PCI on a case by case basis, in consultation with the INVENTOR(S), Vice Provost for Research, and the relevant Dean(s).

2.3.4 Rules Governing the Inventors Personal Share.
The INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES for the INVENTION, under Section 2.3.1.1, shall be distributed among all INVENTORS (if more than one), as the INVENTORS unanimously designate in writing to the IPA. If the INVENTORS fail to make such unanimous written designation before the license agreement is executed, the INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES shall be distributed among all INVENTORS as PCI, in its sole discretion, shall designate. The INVENTORS share of the EQUITY POOL under Section 2.3.3 shall be distributed among all INVENTORS entitled to share in the EQUITY POOL (if more than one), as such INVENTORS unanimously designate in writing to the IPA. If the INVENTORS entitled to share in the EQUITY POOL fail to make such unanimous written designation before the license agreement is executed, the INVENTORS share of the EQUITY POOL shall be distributed among INVENTORS entitled to share in the EQUITY POOL as PCI, in its sole discretion, shall designate.

2.3.4.1 If an INVENTOR ceases employment at and association with the University, his or her designated portion of the INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES under Section 2.3.1.1 and of the INVENTORS share of the EQUITY POOL under Section 2.3.3 shall remain payable to such INVENTOR. If an INVENTOR dies, his or her designated portion of the INVENTORS PERSONAL SHARE shall remain payable to his or her estate.

2.3.5 Rules Governing the Inventors Research Activity Share.
The INVENTORS RESEARCH ACTIVITY SHARE, when the INVENTORS are faculty, shall be used only for research purposes approved by the Department Chair(s) of the relevant Department(s).

2.3.5.1 The INVENTORS RESEARCH ACTIVITY SHARE shall be divided among the INVENTORS (if more than one) in the same proportion as the INVENTORS PERSONAL SHARE is divided among the INVENTORS (the “DESIGNATED PROPORTION”), unless the INVENTORS unanimously request in writing, and the Dean(s) of the relevant Department(s) and Vice Provost for Research approve, some other distribution.

2.3.5.2 If a sole faculty INVENTOR is no longer employed by or associated with the University, the INVENTORS RESEARCH ACTIVITY SHARE shall be distributed to the INVENTOR’S School at the University to support research in the School. If there is more than one faculty INVENTOR, and one of those INVENTORS is no longer employed by or associated with the University, that share shall be distributed evenly to support the research activity of the INVENTORS who remain. If no faculty INVENTORS remain employed by or associated with the University, the INVENTORS RESEARCH ACTIVITY SHARE will be distributed to the INVENTORS School(s) to support research in the School(s).

2.3.5.3 When an INVENTOR is an undergraduate student, the INVENTORS RESEARCH ACTIVITY SHARE shall be distributed to the University’s Center for Undergraduate Research and
Fellowships (CURF) or its successor organization, or if no successor organization, to the Provost's Office to be used to further and support research by undergraduate students, through a budget approved by the Provost. When INVENTORS are graduate students or postdoctoral employees or trainees, the corresponding INVENTORS RESEARCH ACTIVITY SHARE shall be distributed to the laboratory to which they are primarily assigned or in which they primarily conducted the research leading to the INVENTION. If such INVENTORS do not have a primary laboratory affiliation, their corresponding INVENTORS RESEARCH ACTIVITY SHARE shall be distributed to their Department. Amounts so distributed shall be used to further the education and research activity of the INVENTOR while at the University and/or for other research purposes through a budget approved by the Department Chair(s) of the relevant Department(s).

2.3.5.4 When an INVENTOR is an emeritus faculty member at the time of the INVENTION, the INVENTORS RESEARCH ACTIVITY SHARE shall be distributed equally between the INVENTOR'S last SCHOOL and the INVENTOR's last Department before assuming emeritus status, unless that emeritus faculty INVENTOR, and his/her Dean and Department Chair, agree in writing upon a different distribution, after a meeting with participation by the IPA and a representative from the Vice Provost for Research's Office. Such different distribution may include, without limitation, payment of all or a portion of such INVENTORS RESEARCH ACTIVITY SHARE to the emeritus faculty as part of his or her INVENTORS PERSONAL SHARE. Any such proposed different distribution of an INVENTORS RESEARCH ACTIVITY SHARE for an emeritus faculty INVENTOR is subject to review and approval by the Vice Provost for Research. The emeritus faculty INVENTOR may appeal the inability to reach an agreement upon a different distribution, or any disapproval by the Vice Provost for Research, to the Appeals Board. Amounts received by the School and/or the Department shall be used for research purposes only through a budget approved by the Dean(s) of the relevant School(s).

2.3.6 Rules Governing the Departments of Inventors Share. The DEPARTMENTS OF INVENTORS SHARE shall be used only for research purposes through a budget approved by the Dean(s) of the relevant Department(s).

2.3.6.1 If an INVENTION is made by INVENTORS within a Division, Research Center, or Institute, the Department(s) of the INVENTORS may make an equitable distribution of income to that Division, Research Center, or Institute from the DEPARTMENTS OF INVENTORS SHARE.

2.3.6.2 If an INVENTION is made by INVENTORS from different Departments, the DEPARTMENTS OF INVENTORS SHARE shall be divided among the Departments in the DESIGNATED PROPORTION. A Department shall retain its portion of DEPARTMENTS OF INVENTORS SHARE if an INVENTOR from that Department is no longer employed by or associated with the Department or the University.

2.3.7 Rules Governing the Schools of Inventors Share. The SCHOOLS OF INVENTORS SHARE may be used for any research purpose designated by the Dean(s) of the School(s). At the discretion of the Dean(s), any portion of the SCHOOLS OF INVENTORS SHARE may be distributed to Department(s) of the INVENTORS or used to support the research activity of the INVENTORS.

2.3.7.1 If an INVENTION is made by INVENTORS from different Schools, the SCHOOLS OF INVENTORS SHARE shall be divided among the Schools in the DESIGNATED PROPORTION. A School will retain its portion of SCHOOLS OF INVENTORS SHARE if an INVENTOR from that School is no longer employed by or associated with the School or the University.

2.3.8 Rules Governing the University Research Share. The UNIVERSITY RESEARCH SHARE shall be used for the general support of research at the University as determined by the Provost. The Provost will release periodic reports describing the use of these funds.

2.3.9 Periodic Reports of Use of Funds to Support Research. The Deans of each School that receives funds during the Fiscal Year as SCHOOLS OF INVENTORS SHARES or DEPARTMENTS OF INVENTORS SHARES shall release a report to the Vice Provost for Research at least once during the subsequent Fiscal Year describing the use of these funds for research purposes and the support of research.

2.3.10 Invention Revenue Distribution for Non-Academic Inventors. When an INVENTOR is other than a faculty member, emeritus faculty, employee of an academic laboratory, student or postdoctoral employee or trainee, the distribution of ADJUSTED PCI REVENUES FOR THE INVENTION (other than the INVENTORS PERSONAL SHARE) and NET PCI INCOME for the INVENTION shall be determined by the President on a case-by-case basis with a recommendation from the IPA together with the Executive Vice President, the Vice Provost for Research, the Chief Executive Officer of the Medical Center (where applicable), relevant Deans, and/or other involved administrative heads.

2.3.11 INVENTORS with Joint Appointments. If an INVENTOR has joint appointments in two or more Schools or Departments and there is no primary appointment (for example only, a Penn Integrates Knowledge professor), the Deans shall determine an equitable apportionment of that INVENTOR’S portion of the INVENTORS RESEARCH ACTIVITY SHARE, DEPARTMENTS OF INVENTORS SHARE, and SCHOOLS OF INVENTORS SHARE, unless the Deans of such Schools had previously agreed on an allocation for such INVENTOR.

2.4 Implementation of Procedures for Distributions. 2.4.1 Inventions Disclosed and Licensed After the Effective Date. Distributions from all INVENTIONS disclosed and licensed on or after the EFFECTIVE DATE shall be governed by the procedures in Section 2.3.

2.4.2 Inventions Disclosed Before the Effective Date, but Licensed After the Effective Date. Distribution of income from all INVENTIONS disclosed before the EFFECTIVE DATE, but not yet subject to a license agreement as of the EFFECTIVE DATE, shall be governed by the procedures in Section 2.3.
2.4.3 Inventions Disclosed and Licensed Before the Effective Date.
All distributions during and after the fiscal year that the revised policy becomes effective, including distributions for an INVENTION whose disclosure or licensing was completed prior to the EFFECTIVE DATE of the revised policy, will be made according to the revised policy, and shall thus be governed by the procedures in Section 2.3.

2.5 Administration of Distributions and Reporting.
Distributions, with a report outlining how the amounts were calculated, shall be made to each recipient within forty-five (45) days after the end of the FISCAL YEAR. The University will not pay interest on amounts received and held by the University pending distribution.

2.6 Use of Outside Facilities.
Faculty members, employees or students who use research facilities at another institution or a corporation (including, without limitation, when on sabbatical from the University or as visiting faculty or visiting researchers) shall contact the IPA prior to commencing such use, for assistance in evaluating the policies of the host institution or corporation as appropriate. Graduate students who are conducting research in commercial research facilities should obtain a written assurance of their right to publish the results of their research. Faculty members, employees or students who engage in outside employment or consulting agreements are referred to Article 3.

Article 3. Policy and Procedures Relating to Consulting and Outside Activities

3.1 Consulting Policy.
As stated in the University policy entitled “Conflict of Interest Policy for Faculty Members” (Section II.E.10 of the Handbook for Faculty and Academic Administrators), the University recognizes the value to the institution and to its faculty of permitting the faculty to engage in extramural consulting activities. These activities offer the potential of strengthening the competence and expertise of the faculty as scholars, as well as the potential of developing intellectual property owned by the University. In all circumstances where consulting activities may result in the creation of an INVENTION, the following procedures and principles apply:

3.1.1 To ensure that the consulting activities are consistent with faculty members' professional obligations to the University, responsibilities with respect to the avoidance of conflicts of interest, and to their commitments for teaching and research, faculty members should comply with the provisions of Section II.E.10 of the Handbook which include both the prospective disclosure of the potential consulting activities to their Department Chairs and School Deans, as well as written reports on such activities as set forth in the Handbook, or other related procedures established by their School or Department.

3.1.2 In any case where the faculty member, Department Chair, or Dean believes that there is a potential conflict of interest or conflict of commitment, the matter shall be referred to the University Conflict of Interest Standing Committee. The Committee shall review the matter and make recommendations to the Provost, or his/her designee, who has the authority to approve, modify, or disapprove any consulting arrangement that raises a potential conflict. In determining whether review by the Conflict of Interest Standing Committee is appropriate, the faculty member, Department Chair, or Dean may consult with the General Counsel.

3.1.3 In all consulting relationships, faculty members have the duty to protect any intellectual property owned by the University and the ability of the University to fulfill its obligations to government funding agencies and commercial and non-commercial sponsors of research.

3.2 Consulting Agreements.
Except to the extent set forth in Section 3.4 below, faculty members contemplating entering into a consulting agreement shall ensure that his/her obligations under the PATENT POLICY are not compromised and the University’s rights are protected. Specifically, faculty members have the responsibility to ensure that the following terms are not part of any consulting agreement:

1. confidentiality provisions that prevent the individual from publishing research or from reporting results of University research to research sponsors;
2. confidentiality provisions that prevent the individual from providing TANGIBLE RESEARCH PROPERTY or other deliverables to a University research sponsor or other entity as required by federal law, federal regulation, or by sponsor agreement;
3. intellectual property provisions that preclude the consultant from assigning any inventions that arise out of the consulting relationship to the University; and
4. any provisions that are designed to circumvent University policies and procedures for the disclosure, review and approval of sponsored research projects or other University policies concerning intellectual property.

Moreover, in the context of academic research, it may be difficult to avoid commingling of research activity or resources with services provided under the consulting agreement. It is the obligation of the faculty member in negotiating the consulting agreement to ensure that any consulting relationship entered into protects against any such commingling of research or resources.

3.2.1 Faculty members may seek the assistance of the IPA in determining whether a proposed agreement conforms to these guidelines. Such assistance should not be construed to be advice or counsel as to the faculty member’s personal interests in the consulting agreement.

3.3 Consulting Activity with a Company Providing Sponsored Research.
In addition to the procedures set forth above, if a faculty member contemplates a consulting relationship with a company that sponsors research for that individual at the University, the proposed consulting agreement shall be disclosed to the IPA, along with an explanation of the nature and scope of the individual’s anticipated activities. The IPA shall refer the matter to the University Conflict of Interest Standing Committee, with copies of all applicable documentation to relevant Deans, Department Chairs and the General Counsel, or his/her designee, for review. The Committee shall make recommendations to the Provost, or his/her designee, who shall have the authority to approve, modify or disapprove any such proposed agreements.

3.4 Exception to the General Consulting Policy.
Notwithstanding the policies articulated in Article 2.0 above, and in the general consulting policy set forth above, the University recognizes
that faculty members may seek to undertake consulting engagements, at the direction of a firm or entity other than the University, that may require that any resulting INVENTIONS be assigned to the sponsor of the engagement. While not providing the University with ownership of the INVENTION, these consulting engagements may nevertheless provide significant benefits to faculty members and to the University. For this reason, it is the policy of the University to authorize a Dean, in his or her discretion, to permit these consulting engagements, without claiming any ownership interest in the INVENTION for the University, under the following conditions.

3.4.1 Conditions for Consulting Engagements.
In order for a faculty member and his or her particular proposed consulting engagement to be eligible for consideration under this exception to the consulting policy:

1. The engagement must be consistent with the policy on "Conflict of Interest Policy for Faculty Members" (Handbook for Faculty and Academic Administrators, II.E.10);
2. no undergraduate or graduate students may be involved in the engagement;
3. the faculty member must be compensated in cash, and the compensation must be fixed and not variable, must reflect the fair market value of the consulting to be performed, and must not vary according to the perceived value of INVENTIONS assigned. (The faculty member may not be compensated with EQUITY or any form of contingent or variable compensation, including but not limited to options, warrants, royalties, or a payment that varies based upon the sales, revenues or other perceived success of an INVENTION or product or service based upon such INVENTION);
4. the faculty member may not have a SIGNIFICANT EQUITY INTEREST in the sponsoring entity or an affiliate of that entity;
5. performance of the engagement may not involve the use of any University facilities, personnel, equipment or assets, except for de minimus amounts or uses; and
6. the terms of the engagement must not conflict with any existing commitments under sponsored research or otherwise for ownership of resulting inventions, and shall not make assignment of ownership of any future INVENTION not conceived and reduced to practice during the term of, and as a direct and sole result of performing, the consulting engagement.

3.4.2 Procedures for Disclosing Consulting Engagements.
To qualify for consideration under Section 3.4 and allow for meaningful advance review, the specific terms of the proposed agreement must be disclosed to the Department Chair and the Dean at a reasonable time prior to the commencement of the engagement and, in all circumstances, prior to the faculty member entering into any legally binding agreement to engage in the engagement. The engagement and its terms must be reported to the Department Chair and the Dean, in writing, on an annual basis. If the Dean determines, after consultation with the Department Chair and the IPA that criteria set forth in Section 3.4.1 have been met, the Dean may approve the engagement, in his or her discretion, but is not required to approve the engagement. If the Dean determines that the criteria set forth in Section 3.4.1 have not been met, or otherwise declines to approve the engagement, the Dean should so notify the faculty member, who may then seek review of the decision by the APPEALS BOARD. The Dean should notify the faculty member of his or her decision promptly, and if possible, within thirty (30) days of receipt of the disclosure.

3.4.3 Procedures for Waiver of Conditions.
Should a faculty member seek to undertake a consulting engagement that is neither within the general consulting policy, nor satisfies the criteria of Section 3.4.1, the faculty member may request a waiver from the Dean to permit the faculty member to enter into the consulting arrangement. In order to request a waiver, the faculty member must comply with Section 3.4.2 as well as disclose the proposed consulting engagement to the Conflict of Interest Standing Committee (CISC) as required under the Policy on Conflicts of Interest Related to Research. After the review by CISC, the Dean, in consultation with the General Counsel, the Provost or his/her designee and the IPA—may grant the waiver. If the Dean determines that, under the facts and circumstances of the particular case, the waiver would undermine the principles underlying the PATENT POLICY, violate any legal or regulatory requirement, present an unmanageable conflict of interest or otherwise violate University policy, he or she should deny the waiver and notify the faculty member. The decision should be made and communicated to the faculty member as promptly as possible, generally within fifteen (15) days of receipt of the waiver request. Should the waiver be denied, the faculty member may appeal the decision to the APPEALS BOARD. Approval of a waiver under the PATENT POLICY shall not constitute approval under or waiver of other University policies, such as the Policy on Conflicts of Interest Related to Research. Waivers will ordinarily be granted to allow for EQUITY compensation in cases in which the amount of EQUITY is fixed based on the fair market value of the consulting services at the time delivered, and it does not involve a form of contingent or variable compensation, including but not limited to options, warrants, or a conditional grant of EQUITY that varies based upon the sales, revenues or other perceived success of an INVENTION or product or service based upon an INVENTION.

3.4.4 Liability when Consulting.
Faculty members entering into consulting engagements should understand that they are undertaking personal responsibilities and may be assuming certain personal risks of liability. For that reason, all faculty members may wish to seek personal legal counsel, at their own expense, for the purpose of reviewing proposed consulting agreements so as to protect their personal interests. To the extent, however, that faculty members are availing themselves of this exception to the PATENT POLICY, they are doing so entirely at their own risk and are not, in any way, protected by the University. For this reason, faculty members are well advised to seek personal legal advice before entering into such a consulting relationship.

3.5 Application of the Consulting Policy and Procedures to Administrators and Staff.
The University recognizes the value to the institution and of permitting administrators and staff, as well as faculty, to engage in extramural consulting activities, under certain circumstances. Except as specifically set forth below, the above policy applies to administrators and staff who seek to enter into consulting engagements.

3.5.1 Staff and administrators who contemplate entering into consulting engagements are subject to the “Guidelines for Extramural Activities, Associations, and Interest for Staff” (Human
Resources Policy Manual, Policy No. 006, effective 2/1/1990) and should follow the procedures for disclosure and clearance of potential conflict of interest issues set forth in those guidelines.

Article 4. Policy and Procedures Relating to Tangible Research Property

4.0 Policy Statement on Tangible Research Property.

TANGIBLE RESEARCH PROPERTY made by INVESTIGATORS in the course of employment at the University, or work or research directly related to professional, educational or employment responsibilities, or work or research carried out on University time, or at University expense or with SUBSTANTIAL USE OF UNIVERSITY RESOURCES under grants or otherwise, is the property of the University. INVESTIGATORS shall cooperate fully with the University in the preparation and prosecution of patents or other intellectual property protection, if available and applicable. The University and INVESTIGATORS will endeavor to make such property available to the research community on a reasonable basis, consistent with other University policies, procedures and legal obligations, and pursuant to a written agreement in a form approved by the Office of the General Counsel, including but not limited to a materials transfer agreement, license agreement, deposit to a research or data bank repository, or other form of agreement.

4.1 Disclosure to PCI.

INVESTIGATORS shall disclose new TANGIBLE RESEARCH PROPERTY promptly to PCI.

4.2 Revenues from Transfer of Tangible Research Property.

Unless otherwise required by law or contract, for TANGIBLE RESEARCH PROPERTY which is defined as an INVENTION, distributions will be calculated in accordance with Section 2.3. For TANGIBLE RESEARCH PROPERTY which is not defined as an INVENTION, distributions will be calculated as follows, unless otherwise required by law or contract:

PCI shall determine the GROSS PCI REVENUES for the TANGIBLE RESEARCH PROPERTY. Then, PCI shall determine, in conjunction with the INVESTIGATORS, the ADJUSTED PCI REVENUES for the TANGIBLE RESEARCH PROPERTY, where applicable in and to the TANGIBLE RESEARCH PROPERTY, if any, while remaining in compliance with its legal obligation.

4.2.1 Thirty percent (30%) of ADJUSTED PCI REVENUES for the TANGIBLE RESEARCH PROPERTY as the INVESTIGATORS PERSONAL SHARE (see Sec. 2.3.4)

4.2.2 Twelve and one-half percent (12.5%) of ADJUSTED PCI REVENUES FOR AN INVENTION, minus the INVENTORS RESEARCH ACTIVITY SHARE, as the INVESTIGATORS RESEARCH ACTIVITY SHARE.

4.2.3 Twenty percent (20%) of NET PCI INCOME for the TANGIBLE RESEARCH PROPERTY as the DEPARTMENTS OF INVESTIGATORS SHARE (see Sec. 2.3.6)

4.2.4 Forty percent (40%) of NET PCI INCOME for the TANGIBLE RESEARCH PROPERTY as the SCHOOLS OF INVENTORS SHARE (see Sec. 2.3.7)

4.2.5 Forty percent (40%) of NET PCI INCOME for the TANGIBLE RESEARCH PROPERTY as the UNIVERSITY RESEARCH SHARE (see Sec. 2.3.8).

4.3. Program Income and Sponsored Awards.

INVESTIGATORS and PCI shall report any GROSS PCI REVENUES from TANGIBLE RESEARCH PROPERTY to the Office of Research Services for a determination whether such revenues must be reported to a funding agency or sponsor as program income. In those circumstances in which GROSS PCI REVENUES from the TANGIBLE RESEARCH PROPERTY may be considered program income under federal law, or grant, award or contract terms, or where the distribution formula set forth in Sections 4.2. would be prohibited by law or applicable contract, the UNIVERSITY will equitably share any ADJUSTED PCI REVENUES for such TANGIBLE RESEARCH PROPERTY, if any, while remaining in compliance with its legal obligation.

Article 5. Definitions and Miscellaneous.

5.0. TOTAL ADJUSTED PCI REVENUES means GROSS PCI REVENUES for an INVENTION minus the INITIAL DEDUCTION. ADJUSTED PCI REVENUES FOR AN INVENTION means the PRO RATA SHARE of the TOTAL ADJUSTED PCI REVENUES.

5.0.2 ADJUSTED PROCEEDS FOR AN INVENTION means ADJUSTED PCI REVENUES FOR AN INVENTION, minus the INVENTORS PERSONAL SHARE and minus the INVENTORS RESEARCH ACTIVITY SHARE.

5.0.3 AGGREGATE PCI OPERATING COSTS means all of PCI's internal or out-of-pocket expenses to operate PCI, as allocated to and determined by the University, during a Fiscal Year, including, without limitation: salaries, benefits and other personnel costs; expenses related to licensing and distribution, and attempts to license and/or distribute, INVENTIONS, TANGIBLE RESEARCH PROPERTY, copyrightable works, and trademarks; fees and expenses paid to third persons (excluding any amounts included within IP EXPENSES); overhead expense; finder's fees or commissions; EQUITY or other consideration paid or due to patent management organizations; expenses in connection with the sale, investment or management of EQUITY or the EQUITY POOL; litigation or dispute resolution costs and expenses (not otherwise included within IP EXPENSES); and consideration paid or due third persons as a result of settlement of or judgment in a dispute; applicable taxes (if any), and other operating expenses the University allocates to PCI. AGGREGATE PCI OPERATING COSTS includes all UNREIMBURSED IP EXPENSES that exceed the amounts deducted as the INITIAL DEDUCTION.

5.0.4 The APPEALS BOARD is empowered to resolve disputes arising from the interpretation or administration of this PATENT POLICY, as described in Section 5.2. The APPEALS BOARD...
comprises nine (9) voting members (seven [7] standing members and two [2] ad hoc members). The seven standing members shall be comprised of:

- one (1) voting Chair, appointed by the Faculty Senate and who shall be a Standing Faculty member;
- four (4) administrators (each appointed by the Vice Provost for Research); and
- two (2) term faculty appointed by the Faculty Senate.

The two (2) ad hoc members shall be faculty selected for expertise by the Dean(s) of the relevant School(s) or the Chair(s) of the relevant Department(s), except that if one or more of the individuals involved in the appeal is an emeritus faculty, the two ad hoc voting members selected by the Dean(s) or Department Chair(s) shall be emeritus faculty, and if one or more of the individuals involved in the appeal is a graduate student, the two ad hoc voting members selected by the Dean(s) or Department Chair(s) shall be graduate students. In addition, the APPEALS BOARD shall include one nonvoting member ex officio, who shall be an attorney from the Office of the General Counsel and appointed by the General Counsel. The APPEALS BOARD shall be staffed by the Office of the Vice Provost for Research.

5.0.5 ASSIGNMENT means the execution of a written agreement by an INVENTOR assigning all of the INVENTOR’S right, title and interest in and to an INVENTION or TANGIBLE RESEARCH PROPERTY. INVENTIONS are deemed automatically and irrevocably assigned, effective as of the time they are conceived or reduced to practice, regardless of whether or when such individual executes a PARTICIPATION AGREEMENT or other written agreement confirming assignment.

5.0.6 PENN CENTER FOR INNOVATION (PCI) means the administrative unit, under the direction of the INTELLECTUAL PROPERTY ADMINISTRATOR, which is responsible for the receipt, review, management and administration of intellectual property matters of the University.

5.0.7 EFFECTIVE DATE means the earlier of July 1, 2015 or the date this version of this PATENT POLICY was adopted by the Trustees of the University.

5.0.8 EQUITY means ownership interests or securities, including but not limited to shares of stock or securities; stock options; warrants or any other rights to purchase stock or securities; debt instruments; partnership interests in a general or limited partnership; or membership interests in a limited liability company or partnership.

5.0.9 EQUITY POOL means the total allotment of EQUITY negotiated by the University as consideration for a license of the University’s interests in an INVENTION or TANGIBLE RESEARCH PROPERTY.

5.0.10 EXECUTIVE COMMITTEE provides oversight and steering of the technology transfer process, including assisting in setting the operating budget for the PCI. The EXECUTIVE COMMITTEE is appointed by the Provost in consultation with the Vice Provost for Research, and chaired by the Vice Provost for Research. The EXECUTIVE COMMITTEE is comprised of the INTELLECTUAL PROPERTY ADMINISTRATOR, ex officio; the Vice Provost for Research; the Dean of the School of Medicine or his/her designee; one faculty from each of the School of Arts and Sciences and the School of Engineering and Applied Science; one at-large faculty; and an attorney from the Office of the General Counsel selected by the General Counsel, who shall be non-voting and ex officio.

5.0.11 FISCAL YEAR means the period from July 1 through June 30 (or, should the University adjust its fiscal year, the same period as the University’s then-current fiscal year for federal tax purposes.)

5.0.12 GROSS COMPENSATION means all cash or other compensation received or to which someone is entitled due to or arising out of or related to or in connection with the licensing, sale, development, commercialization, or other exploitation of the INVENTION, including without limitation royalties, sales receipts, upfront payments, option fees, milestone payments, equity proceeds, other securities or investments, infringement or settlement proceeds, or other forms of monetization or compensation.

5.0.13 GROSS PCI REVENUES means all gross revenues actually received by PCI during the Fiscal Year from all agreements arising out of or related to or in connection with the licensing, development, commercialization, or other exploitation of an INVENTION or TANGIBLE RESEARCH PROPERTY, or intellectual property related to an INVENTION or TANGIBLE RESEARCH PROPERTY, whether involving patents, know-how, trademarks, copyrights, and/or other forms of intellectual property, but excluding:

1. payments made to the University under sponsored research agreements or research awards, grants and contracts;
2. revenues payable to a third party sponsor or funder pursuant to a funding agreement, where performance of the sponsored or funded research directly gave rise to the INVENTION or TANGIBLE RESEARCH PROPERTY;
3. revenues related to the licensing of a University or Penn Medicine trademark (e.g., trademark royalties in connection with Penn-branded apparel, etc.) and unrelated to the licensing, development or other exploitation of an INVENTION or TANGIBLE RESEARCH PROPERTY;
4. consideration payable to a university or other third party related to co-inventor(s) or contributors to INVENTIONS or TANGIBLE RESEARCH PROPERTY having a duty to assign to such university or other third party (for example only, revenues payable to another institution due to joint inventorship or inter-institutional arrangements); and
5. accrued interest.

GROSS PCI REVENUES includes, without limitation: license fees; license maintenance fees; minimum royalties; sublicense payments; milestone payments; option fees; royalties on sales of products and services; proceeds realized from the sale or other disposition of EQUITY from an EQUITY POOL; dividends and other monetary distributions related to EQUITY from an EQUITY POOL; and settlements of lawsuits or intellectual property disputes with third parties related to an INVENTION DISCLOSURE, INVENTION or TANGIBLE RESEARCH PROPERTY. GROSS PCI REVENUES does not include REIMBURSED IP EXPENSES.

5.0.14 INITIAL DEDUCTION means eighteen percent (18%) of GROSS PCI REVENUES for an INVENTION, and five percent (5%) of GROSS PCI REVENUES for TANGIBLE RESEARCH PROPERTY which is not defined as an INVENTION. The percentage amount of the INITIAL DEDUCTION will be reviewed, and may be adjusted, at
least once each five (5) years, by the EXECUTIVE COMMITTEE. The EXECUTIVE COMMITTEE may recommend adjusting the INITIAL DEDUCTION percentage to an amount no greater than twenty-five percent (25%) and not less than ten percent (10%) for INVENTIONS, and/or to an amount no greater than seven percent (7%) and not less than three percent (3%) for TANGIBLE RESEARCH PROPERTY which is not defined as an INVENTION. Any adjustment to the INITIAL DEDUCTION recommended by the EXECUTIVE COMMITTEE and approved by the President will take effect as of the first day of the Fiscal Year following the President's approval, and will be announced broadly prior to the start of such Fiscal Year.

5.0.15 INTELLECTUAL PROPERTY ADMINISTRATOR (IPA) means the Executive Director of PCI (or his or her successor, as designated by the Vice Provost for Research).

5.0.16 INVENTION means and includes discoveries and inventions, and related technical information, trade secrets, developments, know-how, methods, techniques, formulae, data, and processes; TANGIBLE RESEARCH PROPERTY upon which a patent has issued or a patent application has been filed and is still pending; and other proprietary matter.

5.0.17 INVENTION DISCLOSURE means the written submission to the IPA, on standard invention disclosure forms available from PCI, of a written description of any INVENTION that an INVENTOR believes he or she has made.

5.0.18 INVENTORS means University faculty, emeritus faculty, visiting faculty or researchers, adjunct faculty, postdoctoral employees or trainees, or other employees, or students, or others who individually or jointly make an INVENTION subject to the PATENT POLICY and who meet the criteria for inventorship under United States patent laws and regulations.

5.0.19 INVENTION ASSESSMENT COSTS means all historic out-of-pocket costs and expenses related to the review, assessment and protection of the INVENTION DISCLOSURE and the INVENTION, including without limitation patent and copyright application costs and expenses, legal fees, filing fees, search fees, fees for legal opinions, patent maintenance fees, IP EXPENSES, and any other out-of-pocket transactional costs attributable to the INVENTION DISCLOSURE and the INVENTION.

5.0.20 INVESTIGATOR means any University faculty member, emeritus faculty, visiting faculty or researcher, adjunct faculty, postdoctoral employee or trainee, or other employee, or an undergraduate or graduate student engaged in sponsored or unsponsored research.

5.0.21 IP EXPENSES means all out-of-pocket expenses incurred or accrued during the Fiscal Year by PCI arising out of or related to or in connection with the review, assessment, protection, licensing, defense, enforcement, or audit of intellectual property rights related to INVENTION DISCLOSURES, INVENTIONS, TANGIBLE RESEARCH PROPERTY, and copyrightable works, or the defense, enforcement or audit of licenses or other agreements related to INVENTION DISCLOSURES, INVENTIONS, TANGIBLE RESEARCH PROPERTY, or copyrightable works, including but not limited to: outside legal and patent agent fees and expenses; search fees and expenses; application fees; fees for legal opinions; government filing and maintenance fees; legal fees to defend or enforce intellectual property, license agreements, option agreements, confidentiality agreements, or other agreements related to the INVENTION DISCLOSURE, INVENTION, TANGIBLE RESEARCH PROPERTY or copyrightable work; fees and expenses to audit licensees and related agreements; and other out-of-pocket transactional costs related to patent, copyright, trademark and other intellectual property protection or licensing anywhere in the world. REIMBURSED IP EXPENSES means IP EXPENSES for which PCI received or accrued payment or reimbursement from a licensee, INVENTOR or third person before the end of the Fiscal Year. UNREIMBURSED IP EXPENSES means all of the IP EXPENSES minus the REIMBURSED IP EXPENSES at the end of the Fiscal Year, as shown in the accounting records of PCI (excluding accrued payments or reimbursements.)

5.0.22 MATERIALS means lab notebooks, records, drawings, sketches, photographs, radiographs or other images, models, biological specimens, chemical samples, or other materials needed to support the preparation, submission, prosecution, defense or enforcement of a patent in the United States or other applicable jurisdictions.

5.0.23 NET PCI INCOME FOR AN INVENTION means the ADJUSTED PROCEEDS FOR AN INVENTION, minus the PRO RATA SHARE of the AGGREGATE PCI OPERATING COSTS. If zero or a negative number, then there is no NET PCI INCOME FOR AN INVENTION. (As an example, if the ADJUSTED PROCEEDS FOR AN INVENTION equals $273,125, the PRO RATA SHARE is five percent (5%), and the AGGREGATE PCI OPERATING COSTS equals $4,500,000, the NET PCI INCOME FOR AN INVENTION equals $273,125 minus (0.05 x $4,500,000) or $48,125.)

5.0.24 PATENT POLICY means this Patent and Tangible Research Property Policies and Procedures of the University of Pennsylvania, with any amendments.

5.0.25 PARTICIPATION AGREEMENT means a written agreement substantially in the form of Appendix A to the PATENT POLICY, setting out rights and responsibilities of University faculty, emeritus faculty, visiting faculty and researchers, adjunct faculty, postdoctoral employees and/or other salaried employees, students, and others under the University's policies and procedures, and confirming the automatic assignment of ownership of INVENTIONS covered under the PATENT POLICY, to the University.

5.0.26 PRO RATA SHARE means the ratio (expressed as a percentage) of the GROSS PCI REVENUES directly generated by and attributable to an INVENTION and/or TANGIBLE RESEARCH PROPERTY, as determined by PCI, compared to the entire GROSS PCI REVENUES, during a Fiscal Year. (As an example, if the GROSS PCI REVENUES directly generated by and attributable to an INVENTION total $600,000 in a Fiscal Year, and the GROSS PCI REVENUES total $12,000,000 in a Fiscal Year, the PRO RATA SHARE is five percent (5%).)

5.0.27 SIGNIFICANT EQUITY INTEREST means any EQUITY or other financial interest that when aggregated for the individual and the individual's spouse and dependent children exceeds $25,000 in value, as determined through reference to public prices or other reasonable measures of fair market value, and does not represent more than five percent (5%) ownership interest in any single entity.
5.0.28 STAKEHOLDERS means shareholders, owners, members, general partners, limited partners, or other owners or investors in an entity.

5.0.29 SUBSTANTIAL USE OF UNIVERSITY RESOURCES means the use of University funds, facilities, equipment, or other resources significantly in excess of the norm for educational and research purposes in the Department or School in which the faculty member(s) holds his or her (their) primary appointment(s) or in which a staff member or student is enrolled or employed. Academic year salary, office, usual library resources, usual secretarial and administrative staff resources or usual computer equipment, among other things, are not regarded as constituting “substantial use of University resources.” Any question about what constitutes substantial use of University resources should be referred to the Vice Provost for Research.

5.0.30 TANGIBLE RESEARCH PROPERTY means unique research products or tools, such as biological materials or chemical moieties, whether or not patentable or otherwise protectable using intellectual property laws. Categories of biological material include organisms, cells, viruses, cell products, cloned DNA, as well as DNA sequences, mapping information and crystallographic coordinates. Some specific examples of biological materials include specialized and/or genetically defined cells, including normal and diseased human cells; monoclonal cell lines; hybridoma cell lines; microbial cells and products; viruses and viral products; recombinant nucleic acid molecules; DNA probes; nucleic acid and protein sequences; and transgenic mice or other animals. Categories of chemical moieties or engineered products include sample compounds, reagents, intermediates, models, sensors, devices, equipment, computer hardware or firmware, diagrams, or computer media.

5.0.31 TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS means all of the documented and verifiable direct costs and expenses attributable or allocated to the generation of the quantities of TANGIBLE RESEARCH PROPERTY distributed which led to the receipt of GROSS PCI REVENUES from such TANGIBLE RESEARCH PROPERTY. As an example only, the costs of raw materials, supplies, re-agents, specialized equipment, and other direct costs and expenses necessary to generate the quantity of TANGIBLE RESEARCH PROPERTY constitutes TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS. Salaries, overhead, and equipment which is otherwise used for teaching or numerous research purposes is not part of TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS. (Any disagreement among the INVESTIGATORS and PCI regarding the calculation of TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS may be appealed to the APPEALS BOARD.)

5.1 Review of Policies and Procedures. The EXECUTIVE COMMITTEE together with the Vice Provost for Research shall review the PATENT POLICY (including Appendix B), from time to time to determine whether it is accomplishing its intended purposes and is in conformity with applicable laws and regulations, including intellectual property laws. The EXECUTIVE COMMITTEE shall make recommendations for amendments or other changes to the Provost and the Faculty Senate, who shall confer with the President. The President may amend the patent policy as provided in 5.0.14 upon consultation with Faculty Senate, the Office of General Counsel and the Vice Provost for Research.

5.2 Disputes Under Policies and Procedures. Except as expressly set forth otherwise in this PATENT POLICY, disputes arising from the interpretation or administration of the PATENT POLICY may be referred by any interested party to the Chair of the APPEALS BOARD and the Office of the Vice Provost for Research, who will promptly notify the IPA. The APPEALS BOARD shall first determine whether it has jurisdiction to hear any such dispute before proceeding. The APPEALS BOARD shall provide an equitable mechanism for the review and resolution of disputes brought before it, and shall have the authority to make a judgment with respect to such disputes. The APPEALS BOARD shall use reasonable efforts to make a judgment with respect to any dispute within thirty (30) days after having any such dispute referred to it. Any judgment of the APPEALS BOARD may be appealed by any interested party to the Vice Provost for Research. The Vice Provost for Research shall consider the matter de novo, and shall use reasonable efforts to review any such appeal and make a judgment with respect to any appeal, within thirty (30) days after having any such dispute referred to him or her. Any judgment of the Vice Provost for Research may be appealed to the President, who will make a final decision for the University.

5.3 No Change to Relationships. Nothing in this PATENT POLICY or the actions taken in connection with INVENTIONS, TANGIBLE RESEARCH PROPERTY, or EQUITY, is intended to or shall be interpreted or deemed to create a fiduciary, trust, or agency relationship between the University or any of its units or personnel, and any faculty, staff, student or INVENTOR.

Appendix A. Participation Agreement

In order that the University may fulfill legal and contractual obligations to sponsors of research, including but not limited to the federal government, and in consideration of my employment by the University, or my participation in sponsored research, or my use of funds, facilities, or other resources provided by the University, I hereby agree as follows:

1. I have read, and I understand and agree that I am bound by the terms of the Patent and Tangible Research Property Policies and Procedures of the University of Pennsylvania, as well as by the terms of any revisions or amendments adopted by the President and/or the Trustees of the University of Pennsylvania (collectively, the “Patent Policy”), effective retroactively to the first date of my employment, appointment or matriculation, and/or participation in sponsored research, and/or SUBSTANTIAL USE OF UNIVERSITY RESOURCES (”Start Date”). I understand that words appearing as all capitalized letters in this Agreement are used as defined in the Patent Policy.

2. I agree to report to the INTELLECTUAL PROPERTY ADMINISTRATOR (“IPA”) any INVENTION which is conceived or reduced to practice in the course of my employment at the University, or from work directly related to professional or employment responsibilities at the University, or from work carried out on University time, or at University expense, or with SUBSTANTIAL USE OF UNIVERSITY RESOURCES under grants or otherwise. I hereby irrevocably assign to The Trustees of the University of Pennsylvania all right, title and interest in and to any and all such INVENTIONS, effective retroactively to my Start Date.

3. I acknowledge that any TANGIBLE RESEARCH PROPERTY, whether or not patentable, which is made in the course of employment at the University or from work directly related to professional or employment responsibilities at the University, or from work carried out on University time, or at University expense, or with SUBSTANTIAL USE OF UNIVERSITY RESOURCES under grants or otherwise is the property of the University. I hereby irrevocably assign to The Trustees of the University of Pennsylvania all right, title and interest in and to any and all such TANGIBLE RESEARCH PROPERTY, effective retroactively to my Start Date.
4. I understand that the University incurs binding obligations to sponsors under the terms of sponsored research agreements. When I participate in sponsored research, I understand that it is my responsibility to ascertain and abide by the terms of the sponsored research agreement as it relates to me. In particular, when engaged in outside activity, such as consulting, I recognize my duty to protect the University’s obligations to its research sponsors and its rights pursuant to the PATENT POLICY.

5. I also understand that on occasion University policy or the University’s obligations to research sponsors may require that I assign my interest in copyrightable materials to the University. In such cases, I hereby irrevocably assign all right, title and interest in and to such materials and the copyrights therein, if any, to The Trustees of the University of Pennsylvania, effective retroactively to my Start Date. I further understand that, in agreements with research sponsors, the University seeks to retain copyrights for its faculty.

6. I will cooperate fully with the University in the preparation, filing and prosecution of patents, in the registration of copyrights and in the preparation and execution of all documents necessary or incidental thereto, including but not limited to any additional written assignments deemed desirable by the University to further evidence my legal assignment of ownership or otherwise facilitate protection of the intellectual property.

7. I accept the provisions for the sharing of amounts and EQUITY in the PATENT POLICY and the then-current Policy Relating to Copyrights and Commitment of Effort for Faculty (the “Copyright Policy”).

8. I am under no obligation to any person, organization or corporation with respect to any INVENTION(S), TANGIBLE RESEARCH PROPERTY or copyrightable materials which are, or could be reasonably be construed to be, in conflict with this Agreement, except as set forth in writing in the signed attachment to this letter (if any).

9. This Agreement and the assignments and obligations are effective as of my Start Date and apply to any INVENTION(S), TANGIBLE RESEARCH PROPERTY, and copyrightable materials made during the time I am employed by the University, hold an appointment, continue to matriculate, participate in sponsored research or otherwise make a SUBSTANTIAL USE OF UNIVERSITY RESOURCES.

Appendix B. Rules Governing EQUITY Transactions

B.1 Licenses in Consideration of EQUITY.

The principal purpose of licensing by the University is to promote the development of technologies to serve the public interest. If after a diligent effort to identify prospective licensees, the IPA determines that the public interest is best served by a license in consideration of EQUITY, the IPA may negotiate such a license on behalf of the University, following consultation with the Vice Provost for Research, the INVENTORS, the General Counsel (or his/her designee), the Treasurer (or his/her designee), and the University Conflict of Interest Standing Committee. The IPA should be satisfied that the licensee can demonstrate management and technical capability, and that it has the financial resources necessary to meet its developmental objectives and its obligations to the University. The IPA may accept EQUITY in the license for the University in lieu of or in addition to license or other fees, provided that the EQUITY represents a fair valuation for the technology. The IPA shall include in each license measures of performance that must be met in order to maintain the license granted by the University.

B.2 Disclosure of EQUITY.

The University will require the prospective licensee to disclose all EQUITY offered to the University (and other institutions or individuals which may co-own an INVENTION with the University) in consideration for the license agreement. In addition, the prospective licensee will be required to disclose in writing to the IPA and the Treasurer the specific terms and conditions associated with such EQUITY and the current and pro forma capital structure of the venture. Furthermore, the prospective licensee and the INVENTORS must disclose to the IPA and the Treasurer in writing the EQUITY to be issued to INVENTORS for their role as founders, consultants or otherwise.

B.3 Conflicts of Interest in License Agreements Involving EQUITY.

License agreements involving EQUITY must be structured to protect the University and faculty members from liability and to avoid conflicts of interest. Prior to the University executing any agreement, the INVENTOR(S) shall disclose to the IPA and the University Conflict of Interest Standing Committee, any existing or proposed consulting agreement between the INVENTOR(S) and the prospective licensee or any other consulting agreements with other entities that have potential for conflicts of interest. Upon the recommendation of the Vice Provost for Research, the University and the relevant Deans may impose limitations on the proposed license agreement, associated sponsored research agreement, consulting agreement between the INVENTOR and the licensee or other agreements. In addition, the University, Deans or Chairpersons may create an oversight mechanism for the relevant INVENTORS.

B.3.1 Board Participation and Fiduciary Roles.

In general, the University will not accept a position on the board of directors (or other comparable governing entity) of the licensee but may accept and exercise observer rights on such boards or comparable governing entities. Exceptions to this policy require the approval of the Executive Vice President of the University in consultation with the IPA and the General Counsel. As a matter of policy, INVENTORS may not serve on the board of directors (or other comparable governing entity) of the licensee, or in any other fiduciary capacity during the time their University research is sponsored by the licensee. In general, INVENTORS may accept a seat on scientific advisory boards providing that membership on such a board does not create a fiduciary responsibility to the licensee or any of its STAKEHOLDERS.

B.3.2 Minority Ownership.

The INVENTORS (and members of their families) together may not be majority STAKEHOLDERS of the venture at the time that the license agreement is negotiated and thereafter.

B.3.3 Licensee Representation.

In license negotiations with the University, the prospective licensee must be represented by a party other than an INVENTOR or a member of the INVENTOR’S family.

B.4 Direct Personal Ownership of EQUITY.

The University generally requires that the EQUITY provided to INVENTORS from the EQUITY POOL must be issued directly to the INVENTORS at the time the EQUITY is issued. The INVENTORS will be responsible for
retaining their own business advisors, legal counsel and tax counsel. INVENTORS are responsible for all financial, tax and legal consequences related to the EQUITY they receive. The University Conflict of Interest Standing Committee reserves the right to require that any EQUITY issued to INVENTORS by the licensee be held in a “blind trust” for a defined period of time. An INVENTOR who receives EQUITY from the EQUITY POOL or from the licensee outside of the EQUITY POOL generally will receive a reduced INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES for the INVENTION, pursuant to Section 2.3.3.1 above, to avoid an unintended incentive to structure transactions whereby the INVENTORS retain 100% of the proceeds from their share of the EQUITY POOL, and obtain 30% of the proceeds to the University when the University liquidates EQUITY held by the University. Under rare circumstances, the University may agree to accept all shares of the EQUITY POOL including INVENTORS shares, providing that all INVENTORS and other institutions release the University in writing from any liability associated with the management, investment and ownership of the EQUITY. In such cases, the Investment Board of the University will control the EQUITY. Any income received by the University from EQUITY held on behalf of INVENTORS will be distributed among INVENTORS in accordance with Section 2.3.4 of the Patent and Tangible Research Policies and Procedures.

B.5 Management of EQUITY.

Any EQUITY received by the University under a license agreement will be held by the Office of the Treasurer until such time that the University’s Investment Board decides to liquidate such EQUITY.

APPENDIX C: HYPOTHETICAL EXAMPLE

GROSS PCI REVENUES for FY 2016 equals $12,000,000

GROSS PCI REVENUES for FY 2016 attributable to the XYZ INVENTION equals $600,000

The PRO RATA SHARE equals 5% ($600,000 divided into $12,000,000 equals 0.05)

The INITIAL DEDUCTION equals 18% of GROSS PCI REVENUES, or $2,160,000 (0.18 times $12,000,000 equals $2,160,000)

Thus, TOTAL ADJUSTED PCI REVENUES equals $9,840,000 ($12,000,000 minus the INITIAL DEDUCTION of $2,160,000 equals $9,840,000).

The PRO RATA SHARE of the INITIAL DEDUCTION attributable to the XYZ INVENTION equals $108,000 (0.05 times $2,160,000 equals $108,000).

Thus, the ADJUSTED PCI REVENUES for the XYZ INVENTION equals $492,000 ($600,000 minus $108,000 equals $492,000).

The INVENTORS PERSONAL SHARE equals 30% of ADJUSTED PCI REVENUES for the XYZ INVENTION, or $147,600. ($492,000 times 0.3 equals $147,600).

The INVENTORS RESEARCH ACTIVITY SHARE equals 12.5% of ADJUSTED PCI REVENUES for the XYZ INVENTION, or $61,500. ($492,000 times 0.125 equals $61,500).

The ADJUSTED PROCEEDS for the XYZ INVENTION equals $282,900 ($492,000 minus $147,600 and minus $61,500).

AGGREGATE PCI OPERATING COSTS for FY 2016 equals $4,500,000

The PRO RATA SHARE of AGGREGATE PCI OPERATING COSTS attributable to the XYZ INVENTION equals $225,000 (0.05 times $4,500,000 equals $225,000).

Thus, the NET PCI INCOME for the XYZ INVENTION equals $57,900 ($282,900 minus $225,000).

The DEPARTMENTS OF INVENTORS SHARE equals 20% of the NET PCI INCOME or the XYZ INVENTION, or $11,580 ($57,900 times 0.2 equals $11,580.)

The SCHOOLS OF INVENTORS SHARE equals 40% of the NET PCI INCOME for the XYZ INVENTION, or $23,160 ($57,900 times 0.4 equals $23,160.)

The UNIVERSITY RESEARCH SHARE equals 40% of the NET PCI INCOME for the XYZ INVENTION, or $23,160 ($57,900 times 0.4 equals $23,160.)

Photocopying for Educational Purposes

The enactment of a federal Copyright Act, effective January 1, 1978, has produced much misunderstanding among teachers regarding the permissible amount of photocopying for educational purposes. Only copyrighted works are protected by the act. This elemental point is often overlooked. Court opinions, legislative hearings and other government documents are not copyrighted, and may be freely photocopied. The same is true of works for which the copyright has expired, and of works which prior to January 1978 were sold or disseminated without proper notice of copyright.

There is a danger, however, of acting unlawfully when one photocopies without permission works which are covered by the act. The act applies to all “original works of authorship” in written (or other tangible) form, from the moment the work is created, whether it was created before or after January 1, 1978 and whether or not it has been published.

But even copyrighted materials may be photocopied without permission from, or payment to, the copyright owner, if it is a “fair use,” a doctrine recognized by American courts for nearly a century and a half whose principal purpose is to protect the public interest in the dissemination of knowledge. This doctrine is endorsed in the text of the act, which explicitly refers to the allowable reproduction of copyrighted works for purposes, such as “criticism, comment, news reporting, teaching (including multiple copies for classroom use), scholarship, or research.”

Congress appreciated the impossibility of announcing in a statute an exact quantitative measure that would distinguish copying which is a fair use from copying which is an infringement. Rather, the act provides factors to be considered:

1. the purpose and character of the use, including whether such is of a commercial nature or is for non-profit educational purposes;
2. the nature of the copyrighted work;
3. the amount and substantiality of the portion used in relation to the copyrighted work as a whole; and
4. the effect of the use upon the potential market for or value of the copyrighted work.

The making of a single copy of copyrighted material for a teacher’s personal use in teaching, scholarship or research will almost always be a fair use. More difficult questions rise when multiple copies are made for distribution to students. Certainly, the risk of infringement increases in
liable for statutory damages (although he or she may be liable for actual

damages) in lieu of actual damages, and the court is given discretion to enter an award between $250 and $10,000 (which may be increased this reason, the act permits the copyright owner to sue for “statutory

loss in sales of the copyrighted work, normally an uncertain figure. For profits to the teacher or school, damages will be measured by the likely

rule, a copyright infringer is liable for damages, measured by the loss of

universities and copy centers for copyright infringement. As a general

have declared and demonstrated their intention to sue faculty members,

sanctions for an incorrect decision must be appreciated. Book publishers

If a teacher decides to photocopy for classroom use, the possible legal

sanctions for an incorrect decision must be appreciated. Book publishers have declared and demonstrated their intention to sue faculty members, universities and copy centers for copyright infringement. As a general rule, a copyright infringer is liable for damages, measured by the loss of profits to the copyright owner and any additional profits acquired by the infringer. Since in the academic setting there will not generally be profits to the teacher or school, damages will be measured by the likely loss in sales of the copyrighted work, normally an uncertain figure. For this reason, the act permits the copyright owner to sue for “statutory damages” in lieu of actual damages, and the court is given discretion to enter an award between $250 and $10,000 (which may be increased to $50,000 for willful violations). If, however, a teacher had reasonable grounds to believe that the photocopying was a fair use, he or she is not liable for statutory damages (although he or she may be liable for actual damages). In all cases, the court may issue an order against the teacher or the educational institution barring future infringements.

Without regard to legal implications, a teacher should be sensitive to the dictates of good practice and courtesy in the use of copyrighted material. Authors and copyright owners appreciate notification that uses are being made of their work. It is common for the copyright owner to permit substantial photocopying for educational purposes, provided that the author and copyright owner are identified and proper copyright notice is affixed.

Questions regarding the application of the Copyright Act in specific situation should be addressed to the Office of the General Counsel.

I. Guidelines

A. Single Copying for Teachers

A single copy may be made of any of the following by or for a teacher at his or her individual request for his or her scholarly research or use in teaching or preparation to teach a class:

1. A chapter from a book;
2. An article from a periodical or newspaper;
3. A short story, short essay or short poem whether or not from a collective work;
4. A chart, graph, diagram, drawing, cartoon or picture from a book, periodical, or newspaper.

B. Multiple Copies for Classroom Use

Multiple copies (not to exceed in any event more than one copy per pupil in a course) may be made by or for the teacher giving the course for classroom use or discussion provided:

1. The copying meets the tests of brevity and spontaneity as defined below; and,
2. Meets the cumulative effect test as defined below; and,
3. Each copy includes a notice of copyright.

II. Definitions

A. Brevity

1. Poetry:
   a. A complete poem if less than 250 words and if printed on not more than two pages, or
   b. from a longer poem, an excerpt of not more than 250 words.

2. Prose:
   a. Either a complete article, story or essay of less than 2,500 words,
   b. an excerpt from any prose work of not more than 1,000 words or 10% of the work, whichever is less, but in any event a minimum of 500 words.

   (Each of the numerical limits stated in 1 and 2 above may be expanded to permit the completion of an unfinished line of a poem or of an unfinished prose paragraph.)

3. Illustration: One chart, graph, diagram, drawing, cartoon or picture per book or per periodical issue.

4. “Special” works: Certain works in poetry, prose or in “poetic prose” which often combine language with illustrations and which are intended sometimes for children and at other times for a more general audience, fall short of 2,500 words in their entirety. Paragraph “b” above notwithstanding, such “special works” may not be
reproduced in their entirety; however, an excerpt comprising not more than two of the published pages of such special work and containing not more than 10 percent of the words found in the text thereof, may be reproduced.

B. Spontaneity
1. The copying is at the instance and inspiration of the individual teacher, and
2. The inspiration and decision to use the work and the moment of its use for maximum teaching effectiveness are so close in time that it would be unreasonable to expect a timely reply to a request for permission.

C. Cumulative Effect
1. The copying of the material is for only one course in the school in which the copies are made.
2. Not more than one short poem, article, story, essay or two excerpts may be copied from the same author, not more than three from the same collective work or periodical volume during one class term.
3. There shall not be more than nine instances of such multiple copying for one course during one class term.

(The limitations stated in "b" and "c" above shall not apply to current news periodicals and newspapers and current news sections of other periodicals.)

III. Prohibitions as to the above. Notwithstanding any of the above, the following shall be prohibited:
1. Copying shall not be used to create or to replace or substitute for anthologies, compilations or collective works. Such replacement or substitution may occur whether copies of various works or excerpts therefrom are accumulated or are reproduced and used separately.
2. There shall be no copying of or from works intended to be "consumable" in the course of study or of teaching. These include workbooks, exercise, standardized tests and test booklets and answer sheets and like consumable material.
3. Copying shall not:
   a. substitute for the purpose of books, publisher’s reprints or periodicals;
   b. be directed by higher authority;
   c. be repeated with respect to the same item by the same teacher from term to term.
4. No charge shall be made to the student beyond the actual cost of the photocopying.

Policy on Acceptable Use of Electronic Resources

Summary
This policy defines the boundaries of “acceptable use” of limited University electronic resources, including computers, networks, electronic mail services and electronic information sources, as detailed below. It includes by reference a self-contained compilation of specific rules that can be modified as the electronic information environment evolves.

The policy is based on the principle that the electronic information environment is provided to support University business and its mission of education, research and service. Other uses are secondary. Uses that threaten the integrity of the system; the function of non-University equipment that can be accessed through the system; the privacy or actual or perceived safety of others; or that are otherwise illegal are forbidden.

By using University electronic information systems, you assume personal responsibility for their appropriate use and agree to comply with this policy and other applicable University policies, as well as City, State and Federal laws and regulations, as detailed below.

The policy defines penalties for infractions, up to and including loss of system access, employment termination or expulsion. In addition, some activities may lead to risk of legal liability, both civil and criminal.

Users of electronic information systems are urged in their own interest to review and understand the contents of this policy.

Purpose
The University of Pennsylvania makes computing resources (including, but not limited to, computer facilities and services, computers, networks, electronic mail, electronic information and data, and video and voice services) available to faculty, students, staff, registered guests, and the general public to support the educational, research and service missions of the University.

When demand for computing resources may exceed available capacity, priorities for their use will be established and enforced. Authorized faculty and staff may set and alter priorities for exclusively local computing/networking resources. The priorities for use of University-wide computing resources are:

Highest: Uses that directly support the educational, research and service missions of the University.

Medium: Other uses that indirectly benefit the education, research and service missions of the University, as well as and including reasonable and limited personal communications.

Lowest: Recreation, including game playing.

Forbidden: All activities in violation of the General Standards or prohibited in the Specific Rules interpreting this policy.

The University may enforce these priorities by restricting or limiting usages of lower priority in circumstances where their demand and limitations of capacity impact or threaten to impact usages of higher priority.

Implied consent
Each person with access to the University’s computing resources is responsible for their appropriate use and by their use agrees to comply with all applicable University, School, and departmental policies and regulations, and with applicable City, State and Federal laws and regulations, as well as with the acceptable use policies of affiliated networks and systems (See Appendices to Specific Rules).

Open Expression in the Electronic Information Environment: The rights to freedom of thought, inquiry and expression, as defined in the University’s
Guidelines on Open Expression (p. 1791), are paramount values of the University community. The University's commitment to the principles of open expression extends to and includes the electronic information environment, and interference in the exercise of those rights is a violation of this policy and of the Guidelines on Open Expression (p. 1791). As provided in the Guidelines (p. 1791), in case of conflict between the principles of the Guidelines on Open Expression (p. 1791) and this or other University policies, the principles of the Guidelines (p. 1791) take precedence.

**General Standards for the Acceptable Use of Computer Resources:** Failure to uphold the following General Standards for the Acceptable Use of Computer Resources constitutes a violation of this policy and may be subject to disciplinary action.

The General Standards for the Acceptable Use of Computer Resources require:

- Responsible behavior with respect to the electronic information environment at all times;
- Behavior consistent with the mission of the University and with authorized activities of the University or members of the University community;
- Respect for the principles of open expression;
- Compliance with all applicable laws, regulations, and University policies;
- Truthfulness and honesty in personal and computer identification;
- Respect for the rights and property of others, including intellectual property rights;
- Behavior consistent with the privacy and integrity of electronic networks, electronic data and information, and electronic infrastructure and systems; and
- Respect for the value and intended use of human and electronic resources.

**Enforcement and Penalties for Violation:** Any person who violates any provision of this policy, of the Specific Rules interpreting this policy, of other relevant University policies, or of applicable City, State, or Federal laws or regulations may face sanctions up to and including termination or expulsion. Depending on the nature and severity of the offense, violations can be subject to disciplinary action through the Student Disciplinary System or disciplinary procedures applicable to faculty and staff.

**Content of Communications**

- Except as provided by applicable City, State, or Federal laws, regulations or other University policies, the content of electronic communications is not by itself a basis for disciplinary action.
- Unlawful communications, including threats of violence, obscenity, child pornography, and harassing communications (as defined by law), are prohibited.
- The use of University computer resources for private business or commercial activities (except where such activities are otherwise permitted or authorized under applicable University policies), fundraising or advertising on behalf of non-University organizations, or the reselling of University computer resources to non-University individuals or organizations, and the unauthorized use of the University's name, are prohibited. The Vice President for Information Systems (or designee) may specify rules and specific forums where limited use of University resources for non-recurring exchange and sale of personal items is permitted.

**Identification of Users**

Anonymous and pseudonymous communications are permitted except when expressly prohibited by the operating guidelines or stated purposes of the electronic services to, from, or through which the communications are sent. However, when investigating alleged violations of the Guidelines on Open Expression (p. 1791), the Committee on Open Expression may direct the University's Information Security Officer, or an authorized system administrator, to attempt to identify the originator of anonymous/
pseudonymous messages, and may refer such matters to appropriate disciplinary bodies to prevent further distribution of messages from the same source.

The following activities and behaviors are prohibited:

• Misrepresentation (including forgery) of the sender's identity or an electronic communication's source;
• Acquiring or attempting to acquire passwords of others;
• Using or attempting to use the computer accounts of others;
• Alteration of the content of a message originating from another person or computer with intent to deceive; and
• The unauthorized deletion of another person's news group postings.

Access to Computer Resources
The following activities and behaviors are prohibited:

• The use of restricted-access University computer resources or electronic information without or beyond one's level of authorization;
• The interception or attempted interception of communications by parties not explicitly intended to receive them;
• Making University computing resources available to individuals not affiliated with the University of Pennsylvania without approval of an authorized University official;
• Making available any materials the possession or distribution of which is illegal;
• The unauthorized copying or use of licensed computer software;
• Unauthorized access, possession, or distribution, by electronic or any other means, of electronic information or data that is confidential under the University's policies regarding privacy or the confidentiality of student, administrative, personnel, archival, or other records, or as defined by the cognizant Data Steward;
• Intentionally compromising the privacy or security of electronic information; and
• Intentionally infringing upon the intellectual property rights of others in computer programs or electronic information (including plagiarism and unauthorized use or reproduction).

Operational integrity
The following activities and behaviors are prohibited:

• Interference with or disruption of the computer or network accounts, services, or equipment of others, including, but not limited to, the propagation of computer "worms" and "viruses", the sending of electronic chain mail, and the inappropriate sending of "broadcast" messages to large numbers of individuals or hosts;
• Failure to comply with requests from appropriate University officials to discontinue activities that threaten the operation or integrity of computers, systems or networks, or otherwise violate this policy;
• Revealing passwords or otherwise permitting the use by others (by intent or negligence) of personal accounts for computer and network access;
• Altering or attempting to alter files or systems without authorization;
• Unauthorized scanning of networks for security vulnerabilities;
• Attempting to alter any University computing or networking components (including, but not limited to, bridges, routers, and hubs) without authorization or beyond one's level of authorization;
• Unauthorized wiring, including attempts to create unauthorized network connections, or any unauthorized extension or re-transmission of any computer or network services;
• Intentionally damaging or destroying the integrity of electronic information;
• Intentionally disrupting the use of electronic networks or information systems;
• Intentionally wasting human or electronic resources; and
• Negligence leading to the damage of University electronic information, computing/networking equipment and resources.

Appendices

Relevant University policies
This Acceptable Use Policy incorporates and supersedes the earlier Policy on Ethical Behavior with Respect to the Electronic Information Environment. The use of computing resources is also required to conform to the following University policies:

• Code of Student Conduct (p. 1771)
• Guidelines on Open Expression (p. 1791)

In addition, specific policies of the University's Schools, departments, computer systems and networks, and other general University policies and regulations are also applicable to the use of computer resources. These policies include, but are not limited to, the following:

• Patent Policy (p. 1798)
• Copyright Policy (p. 1990)
• Computer Software Policy (http://www.upenn.edu/almanac/v45/n08/copy.html)
• Policy on the Uses of University Resources (https://www.hr.upenn.edu/policies-and-procedures/policy-manual/other-policies/uses-of-university-resources)
• Policy on Confidentiality of Student Records and Information (p. 1772)
• Policy Regarding Faculty Misconduct in Research (p. 1917)
• Policy on Privacy in the Electronic Environment (p. 1816)
• Code of Academic Integrity (p. 1771)
• Protocols for human subjects research: any research involving human subjects must be approved by the Committee on Studies Involving Human Beings
• Acceptable Use Policies of individual Schools, departments, computer systems, and networks
• Guidelines for Administrators of Penn E-mail Systems (http://www.upenn.edu/computing/email/admin-guidelines.html)

Applicable laws
Computer and network use is also subject to Pennsylvania and Federal laws and regulations. Suspected violations of applicable law are subject to investigation by University and law enforcement officials. Among the applicable laws are:

• Federal Copyright Law: U.S. copyright law grants authors certain exclusive rights of reproduction, adaptation, distribution, performance, display, attribution and integrity to their creations, including works of literature, photographs, music, software, film and video. Violations of copyright laws include, but are not limited to, the making of unauthorized copies of any copyrighted material (such as commercial software, text, graphic images, audio and video
Policy on Class Meeting Times

To allow travel time between classes, each one-hour class session is actually 50 minutes long, each hour and a half session is actually 80 minutes long, and each three-hour session is 2 hours and 50 minutes long, usually with a 10 minute break.

Examples: (class meeting times as listed in the Course Timetable)
- T 2-5 class begins at 2:00 PM and ends at 4:50 PM
- MWF 1-2 class begins at 1:00 PM and ends at 1:50 PM
- TR 10:30-12 class begins at 10:30 AM and ends at 11:50 AM

Policy on Common Midterm Examinations

Instructors teaching a course with multiple sections who plan to schedule a common midterm examination outside the class’s regular meeting time must notify students of this event during the first week of the semester and be prepared to offer one or more make-up examinations to accommodate any student who is enrolled in a course that meets at the time of the common examination.

Students enrolled in a course that conflicts with the time of a common midterm examination must notify the instructor administering the common midterm examination of the conflict by the end of the course selection (add) period. Students may not be required to miss their regularly scheduled class.

(Source: Almanac – April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html))

Policy on Military Leave

If a student who has not received full academic credit for the term is called to service through enrollment in a military reserve unit, or through enlistment in the military service, the student’s tuition and mandatory fees for the term shall be cancelled, provided a request, substantiated by the proper evidence, is filed with the dean of the school in which he or she is registered.

(Source: Almanac, February 23, 2003, Volume 49, No. 23 (http://www.upenn.edu/almanac/v49/n23/military_policy.html)

Policy on Privacy in the Electronic Environment

I. Preliminary Observations

The University affirms that the mutual trust and freedom of thought and expression essential to the academic mission of a university rest on an expectation of privacy, and that the privacy of those who work, study, teach, and conduct research in a university setting will be respected. The University recognizes that as faculty, staff and students create, use and store more information in electronic form, there is growing concern that information the user or creator considers private may be more vulnerable to invasion than information stored in more traditional media. This policy is intended to highlight some general principles that should help to define the expectations of privacy of those in the University community. While no document addressing the fluid issue of technology can be exhaustive or inflexibly dictate outcomes in all circumstances, this policy attempts to articulate current practices and provide guidance, so that individuals may make informed and appropriate decisions concerning their various interactions in the electronic environment.

Before addressing these issues, it should also be noted that in carrying out their operations, various departments of the University accumulate information about members of its community, e.g., for purposes of payroll, employment or enrollment. Data are also created, though not necessarily compiled or retained on a personally identifiable basis, as an incident to the use of technology, e.g., the charging of purchases on Penn Card or the borrowing of library books. The University does not condone disclosure or release of such personal information stored or transmitted through University systems, except for legitimate University purposes as outlined in this policy.

Those responsible for maintaining the University’s computers and electronic networks have an important and special responsibility to recognize when they may be dealing with sensitive or private information. They may access such information without the user’s consent and without obtaining higher level approval, but only when necessary to fulfill their official responsibilities, and they are expected to carry out their duties in ways that are not unreasonably intrusive. They will be subject to
disciplined action if they misuse their access to personally identifiable data or to individuals' personal files, e-mail and voice mail or otherwise knowingly act in ways counter to University policies and applicable laws.

Finally, this policy should be understood in light of the many other University policies and laws that bear on individuals' rights to privacy and the institution's responsibilities with respect to information in its possession about individuals. Examples of applicable laws include the Family Educational Rights and Privacy Act of 1974 (the "Buckley Amendment"), the Electronic Communications Privacy Act of 1986, and medical records regulations promulgated under the Health Insurance Portability and Accountability Act of 1996. Examples of applicable University policies include the Acceptable Use Policy for the Electronic Environment, Administrative Computing Security Policy, Policy for Closed Circuit Television Monitoring and Recording of Public Areas for Safety and Security Purposes and policies on Records Confidentiality and Safeguarding University Assets.

II. Policy on Information Created, Stored or Transmitted Through University Electronic Media

A. In General:

The University provides computers, computer and e-mail accounts, networks and telephone systems to faculty members, staff and students for furthering the University's academic mission and conducting University business. While incidental and occasional personal use of such systems, including e-mail and voice mail, is permissible, personal communications and files transmitted over or stored on University systems are not treated differently from business communications; there can be no guarantee that such personal communications will remain private or confidential (see Appendix).

As is the case for information in non-electronic form stored in University facilities, the University's need for information will be met in most situations by simply asking the author or custodian for it. The University reserves the right, consistent with this policy, to access, review and release electronic information that is transmitted over or stored in University systems or facilities. When questions arise about such access, review or release of information, the University commits to treat electronic information no differently from non-electronic information. As with paper information, it is often the case by custom or rule that electronic files are shared and properly accessible by multiple parties in office settings. Where that is the case, the special provisions for access and notification outlined here need not be followed. In other cases, properly authorized University officials including the Vice President for Audit and Compliance and the Information Security Officer may access e-mail, voice mail or computer accounts without the consent of the assigned user when there is a reasonable basis to believe that such action

1. Is necessary to comply with legal requirements or process, or
2. May yield information necessary for the investigation of a suspected violation of law or regulations, or of a suspected serious infraction of University policy (for example alleged research misconduct, plagiarism or harassment), or
3. Is needed to maintain the integrity of University computing systems, or
4. May yield information needed to deal with an emergency, or
5. In the case of Staff, will yield information that is needed for the ordinary business of the University to proceed.

Except as may otherwise be dictated by legal requirements, individuals will be notified of access to, or disclosure of, the contents of their e-mail, voice mail or their computer accounts as soon as practicable. In cases where such notification might jeopardize an ongoing investigation of suspected wrongdoing it may be delayed until the conclusion of the investigation. The Office of General Counsel is responsible for maintaining an official record of e-mail searches performed by authorized parties.

B. Faculty:

The University has the utmost respect for the freedom of thought and expression that are at the core of Penn's academic mission. Whenever possible, therefore, the University will resolve any doubts about the need to access a University computer or other systems in favor of a faculty member's privacy interest. Computer files, e-mail and voice mail created, stored, transmitted or received by faculty will be afforded the same level of privacy as the contents of their offices. The Policy on Safeguarding University Assets governs access to faculty records in connection with investigations carried out by the University's Office of Audit and Compliance, and provides for prior consultation with the Provost and Faculty Senate and for notifying the subject of a search of any files or materials taken during an investigation. Except as may otherwise be dictated by legal requirements, the procedures outlined in that policy will be followed with respect to a faculty member's computer files, e-mail or voice mail in connection with other investigations or proceedings.

C. Staff:

It is generally not University policy to access staff members' electronically stored information. As noted above, the University's need for information will normally be met by asking an employee for it. Properly authorized University officials, including supervisors acting with the consent of their management, may, however, access, review and release the contents of staff computer files, e-mail or voice mail transmitted over or stored on University systems when, for example, an employee is absent or has left the University and the information is not available elsewhere, or in other situations in which it is necessary if the ordinary business of the University is to proceed. In more complicated situations where, for example, a supervisor believes University resources are being misused-he or she should consult with senior administrators, the Division of Human Resources, or the Office of General Counsel.

D. Students:

Students are provided e-mail and computer accounts for use primarily in connection with their academic activities. While the University does not generally monitor or access the contents of a student's e-mail or computer accounts, it reserves the right to do so. However, access to and disclosure of a student's e-mail messages and the contents of his or her computer accounts may only be authorized by any one of the Dean of the student's School or his/her designee, the Vice Provost for University Life, or the Office of Audit and Compliance, in consultation with the Office of General Counsel.

E. Multiple Affiliation:

Some individuals have multiple University affiliations (e.g. students employed by the University). When the need for access to information arises from a particular status, the provisions above for that status will be applied. In other cases, the provisions for the individual's primary status will be applied.
III. Violations of this Policy

Members of the University community who believe that this policy has been violated with respect to their privacy should attempt initially to resolve the issue within their unit or department, if necessary with the mediation of the leadership of their representative assembly or the University Ombudsman. Others who become aware of violations of this policy should report them to the University Information Security Officer, Office of General Counsel, Division of Human Resources or the Office of Audit and Compliance. All University offices that substantiate such violations should report them to the University Information Security Officer, who will monitor them for repeat instances and patterns. Those who violate this policy may be subject to disciplinary procedures up to and including dismissal.

Appendix: Special Note on E-mail Privacy

Despite the best intentions of users and the University or other system operators, it is difficult, if not impossible, to assure the privacy of e-mail. E-mail is not a good medium to use for sensitive matters that you would not want disclosed. There are numerous ways that plain text e-mail may be disclosed to persons other than the addressee, including:

- Recipient's address is mistyped; message is sent to someone else.
- Recipient forwards e-mail to someone else.
- Intruders break into e-mail system and read/disclose messages.
- Despite owner's belief that s/he deleted it, e-mail continues to exist on computer hard drive or a copy is archived on tape backup; disclosure of such copies may be required in connection with judicial or administrative proceedings or government investigations.
- E-mail is observed as it travels over public networks like PennNet and the Internet.
- In addition, e-mail users may want to consider routinely or periodically deleting old messages, and encrypting personal messages. Systems administrators should consider shorter retention of backup tapes, consistent with data integrity requirements.

Policy on Secular and Religious Holidays

1. The University recognizes/observes the following secular holidays: Martin Luther King, Jr. Day, Memorial Day, July 4, Thanksgiving and the day after, Labor Day, and New Year's Day.

2. The University also recognizes that there are several religious holidays that affect large numbers of University community members, including Christmas, Rosh Hashanah, Yom Kippur, the first two days of Passover, and Good Friday. In consideration of their significance for many students, no examinations may be given and no assigned work may be required on these days. Students who observe these holidays will be given an opportunity to make up missed work in both laboratories and lecture courses. If an examination is given on the first class day after one of these holidays, it must not cover material introduced in class on that holiday.

Faculty should realize that Jewish holidays begin at sundown on the evening before the published date of the holiday. Late afternoon exams should be avoided on these days. Also, no examinations may be held on Saturdays or Sundays in the undergraduate schools unless they are also available on other days. Nor should seminars or other regular classes be scheduled on Saturdays or Sundays unless they are also available at other times.

3. The University recognizes that there are other holidays, both religious and secular, which are of importance to some individuals and groups on campus. Such occasions include, but are not limited to, Sukkot, the last two days of Passover, Shavuot, Shemini Atzerat and Simchat Torah, Chinese New Year, the Muslim New Year, Diwali, Navaratri, Rama Navami, Paryushan, and the Islamic holidays Eid Al-Fitr and Eid Al-Adha. Students who wish to observe such holidays must inform their instructors within the first two weeks of each semester of their intent to observe the holiday even when the exact date of the holiday will not be known until later so that alternative arrangements convenient to both students and faculty can be made at the earliest opportunity. Students who make such arrangements will not be required to attend classes or take examinations on the designated days, and faculty must provide reasonable opportunities for such students to make up missed work and examinations. For this reason it is desirable that faculty inform students of all examination dates at the start of each semester. Exceptions to the requirement of a make-up examination must be approved in advance by the undergraduate dean of the school in which the course is offered.

Policy on Undergraduate Students, High School Students and Non- affiliates Participating in Research in Penn Research Facilities

For the purpose of this policy, non-affiliates are individuals who are not University of Pennsylvania faculty, staff, graduate students or post-doctoral trainees. The Principal Investigator is responsible for assuring that all students and non-affiliates working in his/her laboratory are appropriately trained, supervised and comply with the requirements of this policy. At a minimum this training must include Profiler and all training determined by Profiler such as EHRS, HIPAA, IACUC, etc.

- Students who are not yet in High School are not permitted to participate in laboratory activities.
- Non-affiliates may not serve in laboratories as unpaid volunteers or trainees without University approval.

This policy applies to the three categories listed below.

A. High School Students (HSS): HSS are permitted to participate in laboratories at Penn provided that all of the following conditions are met and none of the prohibitions set forth in item (7) are violated.

1. All programs for HSS must comply with the requirements described in the Vice Provost for University Life current year’s “Special Summer Programs Protocols.”
2. Each HSS must have a Principal Investigator or Sponsor who agrees to supervise and be responsible for the HSS while the student is present in the laboratory. The HSS must be appropriately supervised at all times when in the laboratory.
3. HSS may not be employed in laboratories nor perform the duties and responsibilities of an employee. (HSS participating as trainees in officially sanctioned and approved programs may receive a stipend in connection with the program.)

4. A Consent/Signature sheet must be submitted to the Principal Investigator/Sponsor with signatures from the HSS and his/her parents.

5. The Principal Investigator/Sponsor must provide the HSS with hazard specific information and appropriate personal protective equipment and instruct the student in its use and disposal.

6. Each HSS must attend Laboratory Safety training provided by EHRS before the laboratory activity begins. If a student is working in a lab where radioactive materials are used, Radiation Safety Training is also required.

7. HSS are not permitted to participate in the following activities in laboratories:
   i. Any laboratory or facility designated as BSL-3
   ii. Any laboratory or facility in which Select Agents or Explosives (as defined in OSHA Hazard Communication Standard Appendix B) are used or stored.
   iii. Work with acutely toxic substances or reproductive hazards (as defined in OSHA Hazard Communication Standard Appendix A).
   iv. Operate farm machinery
   v. Work in machine shops

8. HSS are permitted to participate in the following activities only after completing specialized training:
   i. Work with recombinant or synthetic DNA (EHRS r-s-DNA online training)
   ii. Limited work with radioactive materials is permitted. Work must be performed under the supervision and in the physical presence of a trained radiation worker. Only H-3, C-13, P-32 and S-35 in amounts less than 100 uCi may be used.
   iii. HSS who will work with live animals must be associated with a specific ARIES animal research protocol, have their qualifications or training described and the specific procedures that they will be performing/assisting identified. Prior to working with animals, HSS must complete all necessary IACUC-related training associated with the HSS’ role on the protocol.
   iv. HSS who will work with non-human primates or tissue/body fluids from non-human primate must complete specialized IACUC-related training in addition to standard training for other species.

B. Undergraduates (UG): UG from Penn or from other institutions are permitted to participate in laboratories at Penn provided that all of the following conditions are met and none of the prohibitions set forth in item (4) are violated.

1. Each UG must have a Principal Investigator/Sponsor who agrees to supervise and be responsible for the UG while the student is present in the laboratory.

2. The Principal Investigator/Sponsor must provide the UG with hazard specific information and appropriate personal protective equipment and instruct the student in its use and disposal.

3. Each UG must attend Laboratory Safety training provided by EHRS before the laboratory activity begins. If a student is working in a lab where radioactive materials are used, Radiation Safety Training is also required.

4. UGs are not permitted to participate in the following activities in laboratories:
   i. Any laboratory or facility designated as BSL-3
   ii. Any laboratory or facility in which Select Agents or Explosives (as defined in OSHA Hazard Communication Standard Appendix B) are used or stored.

5. UGs are permitted to participate in the following activities in laboratories after completing specialized training:
   i. Work with recombinant DNA
   ii. Operate farm machinery
   iii. Work in machine shops
   iv. Work with radioactive material if over age 18. Undergraduate students under the age of 18 must follow the same restrictions as High School Students for this component.

6. UGs who will work with live animals must be associated with a specific ARIES animal research protocol, have their qualifications or training described and the specific procedures that they will be performing/assisting identified. Prior to working with animals, UGs must complete all necessary IACUC-related training associated with the UGs’ role on the protocol.

7. UGs who will work with non-human primates or tissue/body fluids from non-human primate must complete specialized IACUC-related training in addition to standard training for other species.

C. Non-Affiliates (NA) with undergraduate degrees: Post graduates including visiting scholars and trainees (not Penn faculty, staff or students)

1. A NA must have a Principal Investigator/Sponsor who agrees to supervise the NA while he/she is present in the laboratory.

2. The Principal Investigator/Sponsor must provide the NA with hazard specific information and appropriate personal protective equipment and instruct the NA in its use and disposal.

3. Each NA must affirm that he/she completed a Laboratory Safety course at his/her home institution or complete relevant Laboratory Safety training offered by EHRS before the laboratory activity begins.

4. A NA is permitted to participate in the following activities after completing specialized training:
   i. A laboratory or facility designated as BSL-3 or ABSL-3
   ii. A laboratory or facility in which Select Agents (DHHS Security Risk Assessment Approval required) or Explosives are used or stored.
   iii. Work with recombinant DNA
   iv. Work with radioactive materials
   v. Operate farm machinery
   vi. Work in machine shops.

5. NAs who will work with live animals must be associated with a specific ARIES animal research protocol, have their qualifications or training described and the specific procedures that they will be performing/assisting identified. Prior to working with animals, NAs must complete all necessary IACUC-related training associated with the NAs’ role on the protocol.

6. Work with non-human primates or tissues/body fluids from non-human primate requires specialized IACUC-related training in addition to standard training for other species.

(Source: Almanac, April 22, 2014, Volume 60, No. 31 (http://www.upenn.edu/almanac/volumes/v60/n31/ofrecord.html))

Policy on University Drivers and Mandatory Safety Training

Effective immediately, the Offices of Risk Management and Fire and Occupational Safety have instituted a mandatory drivers’ safety program
for all University staff, faculty, and students who are assigned by a
division or department to operate a vehicle loaned to, leased or owned by
the University or University-related business. Departments and divisions
will be given a reasonable opportunity to schedule such drivers to attend
a basic drivers' safety program sponsored by our offices and conducted
by a National Transportation Safety expert. Thereafter, any department
or division which sustains collision damage to a vehicle operated by a
driver who has not attended this program will incur a 100% deductible for
replacement of or repairs to the vehicle.

Programs will be offered throughout the summer and fall in a central
location on campus and at various times to accommodate our staff,
faculty, and student drivers. The program is four hours long and includes
a lecture, a film, and demonstration on safe vehicle operation and
maintenance and on accident management. Materials will be provided
to attendees, including a Pennsylvania Driver’s Manual and vehicle
accident kit. Following the program, attendees will receive a certificate
of attendance which will be delivered to their supervisor or department
head. The cost for the presentation and materials are borne by Risk
Management and Safety Offices.

It is the responsibility of departmental and division supervisors to ensure
compliance with this program. All scheduling should be conducted by the
supervisors who must account for attendance to the program in the event
of a vehicle accident for which a claim for reimbursement is made to the
Office of Risk Management. This policy does not relieve a department
or division from the responsibility for reporting all incidents involving
University vehicles and the property or vehicles of others, regardless of
the status of the drivers. The Office of Risk Management must receive
an incident report with verification of all drivers and witnesses, as well
as copies of police reports. The failure to report all such incidents may
result in the loss of insurance coverage, including liability protection, to
the University and its representatives.

Questions regarding this policy should be addressed to Risk Management
Ext 8-6235. Please also read Safety Bulletin #32 regarding motor vehicle
operation, available by calling Ext 8-6921, and address any questions
concerning this bulletin to that office.

**Policy on University Recognition of Undergraduate Honor Societies**

The University through its faculty in schools and academic departments
alone reserves the right to bestowed academic honors on its undergraduate
students and to report such honors on students’ transcripts. Academic
honors of various types are established and awarded by the relevant
faculty body. The relevant body depends on the nature of the honor:

- In the case of honors for which students in a particular major are
  uniquely eligible, the authorizing body is the academic department or
  interdisciplinary program committee responsible for that major.
- In the case of honors for which students in a particular school are
  uniquely eligible, the authorizing body is the faculty of that school.
- In the case of honors for which all undergraduates are eligible, the
  authorizing body is the Council of Undergraduate Deans acting with
  the consent of the faculties of the separate undergraduate schools.

**Release of Student Academic Status Information for Honor Society Selection**

Student academic status information (eg. GPA, term standing, class rank/
percent) may be released only in accordance with the University's Policy
On Confidentiality Of Student Records, particularly regarding designated
directory information.

Student academic status information is not to be released to honor
societies for recruiting purposes. This includes cohort information such
as “names of students with a 3.2 or higher GPA.” Student academic status
information may be utilized internally for selection purposes by Schools,
Centers, or other University departments under the auspices of an
officially designated selection committee and following the University's
Policy On Confidentiality Of Student Records.

**Policy Regarding Human Subject Research in the Sociobehavioral
Sciences**

**Scope**

This policy is applicable to all employees, students, trainees, faculty,
and other persons working for or in facilities owned and operated by the
University of Pennsylvania and conducting sociobehavioral research. This
policy is meant to apply University-wide to all research involving human
subject data, and inclusive of biomedical research protocols applying
sociobehavioral techniques (e.g., survey research). Depending on the type
of research, other policies (e.g., those pertaining to biomedical research)
may apply as well. Relevance is determined by the involvement of living
human subjects in observational or experimental research, or in the use
of records or specimens that may conceivably place the subjects of these
records at risk, as per the Common Rule.

The term “sociobehavioral sciences” (or the term “social and behavioral
sciences”) must be understood as a shorthand term for the set of
inquiries involving human subjects not otherwise subsumed under the
biomedical sciences. It includes fields of research specifically defined
as behavioral and social sciences in federal manpower reports, that
is, “anthropology, demography, the non-clinical fields of psychology,
sociology, and the speech and hearing sciences.” It also includes human
subject research in economics, business, education, and history, among
others (see the Common Rule). Thus, the proposed policy applies to all
sociobehavioral research irrespective of its institutional setting within the
University or its source of funding. Note that disciplinary predilections—
for example, rejection of the rubric “science”—are insufficient warrant
for self-abstention from the policy promulgated here.

**Regulatory Background**

In the context of Institutional Review Board (IRB) oversight of human
subject research, the Common Rule specifies three levels of review of
proposed research, which can be summarized as follows:

1. *full board review*—a convened IRB committee must approve the
   proposed research, applying criteria set forth in the Common Rule,
   before the research can be conducted;
2. *expedited review*—certain kinds of research involving no more than
   minimal risk, as well as minor changes in approved research, can be
   approved by an administrative mechanism not requiring a convened
   IRB committee;
3. **exempt from review**—minimal risk research activities in a number of specified categories, involving human subjects not from vulnerable populations, are exempt from full review as per the Common Rule.

These three levels of review require submission of a research protocol to the IRB. Specific submission requirements for each category can be found at the IRB website.

At the University of Pennsylvania, “expedited review” is typically performed by Office of Regulatory Affairs personnel. The University is also required to have a mechanism in place for determining whether a proposed research protocol is “exempt from review.” As per the federal-wide assurance (FWA) that the University has in place, this determination is made by an administrative mechanism similar to that for “expedited review.” In addition, there are certain kinds of research not covered by the Common Rule. Such research does not require any involvement of the IRB, even at the level of “exempt from review.”

This policy clarifies that specific activities in the social behavioral sciences do not require IRB involvement. As a category distinct from “exempt from review,” it is referred to as “not under the purview of the IRB.”

**Implementation**

Implementation of the policy outlined below will be the responsibility of the Office of the Vice Provost for Research. In consultation with the Schools and their faculty, the Vice Provost will create a training program, and a certification process documenting successful completion of the training program. Any sociobehavioral research activities involving human subjects or human subject data will require prior official certification once this policy becomes effective.

**Policy**

**Education and Certification**

This policy extends to the sociobehavioral sciences a requirement currently in place in the School of Medicine that has been enforced outside of the School of Medicine only for key personnel submitting grants to federal agencies. The requirement now becomes University-wide, covers sociobehavioral research, and is not restricted to federal grant activity.

1. All personnel—faculty, research fellows, students and staff—engaging in sociobehavioral research must have documented discipline-appropriate education regarding human subject protection, in accordance with certification standards defined by the Vice Provost for Research.

The training program and certification process are to be kept current under the auspices of the Vice Provost for Research and in consultation with the Schools and their faculty.

**Survey Research**

Survey research, which includes face-to-face or telephone interviewing, or self-administered questionnaires (as through the mail or via the Internet), generally has a low cost of participation, since it usually requires only a small amount of subjects’ time. According to the Common Rule, such research is “exempt from review” and does not require written consent, as clarified below.

2a. Survey research is **exempt from review** if the survey is anonymous or protection of the confidentiality of research subjects is adequately demonstrated, and if all other applicable criteria for **exempt from review** are fulfilled (e.g., research must not involve vulnerable populations or put subjects at more than minimal risk).

2b. For research that is exempt from IRB review, human subjects responding to a survey are automatically considered to have given informed consent.

In order to qualify for a default waiver of written consent as per policy item 2b, an exemption form must be presented to the IRB showing that:

i) human subjects will be informed of all applicable elements of consent prior to responding to the survey; and

ii) all criteria for “exempt from review” are fulfilled.

**Secondary Data Analysis**

Secondary data analysis is the (usually statistical) investigation of individual-level data records collected in another study, with the following characteristics: (1) no direct contact with or experimental manipulation of human subjects; (2) no new data collection; and (3) no identification of individual research subjects. In agreement with recommendations 1 and 6 of the Draft Recommendations Regarding Public Use Data Files issued by the National Human Research Protections Advisory Committee (NHPRAC), this policy states that such research may either be “exempt from review” or “not under the purview of the IRB,” as clarified below.

3a. Research on a public-use data file, which contains only non-identifiable data or data for which a breach of confidentiality is not an issue (e.g., public business statements), is not considered human subject research for the purpose of IRB review and as such is **not under the purview of the IRB**.

3b. Research on a non-public-use data file—that is, non-identifiable data in a non-publicly available or proprietary file—**is exempt from review** unless vulnerable populations are involved. Non public use data files may be submitted by a School to the IRB for approval. If approved, with the appropriate maintenance of safeguards, studies using these data sets are no longer human subject research and as such are **not under the purview of the IRB**.

Investigators must agree not to attempt to re-identify the human subjects.

Investigators planning to study non-public-use data files must demonstrate to the IRB that confidentiality of research subjects is protected, by providing direct evidence of protection procedures or by showing that the data supplier already received IRB approval in which non-identifiability was considered and confirmed. The latter does not necessarily require submitting to the IRB the survey instrument or consent form used in the research that yielded the data.

Researchers operating in one of the categories of the Health Insurance Portability and Accountability Act (HIPAA) should refer to the HIPAA regulations that contain a definition of identifiability.

**Evolving Research**

Evolving research is a class of research in the sociobehavioral sciences in which the questions that are posed evolve in the course of investigation. An example is ethnography, where research questions may only be clarified after a period of observation and where current findings drive the next steps in the study. This class of research typically involves studying human behavior in non experimental settings, with or without active participation by the investigator; but it can also occur in more structured observational settings (e.g., oral histories, focus groups). In specific cases, such research does not pose more than minimal risk to human subjects and is considered to be “exempt from review,” as stated.
below. An approved mechanism is necessary for presenting to the IRB a research protocol that will evolve in the course of investigation. This policy institutes such a mechanism via certification.

4a. Research involving only non-interventionist observation of behavior occurring in public (including domains of the Internet clearly intended to be publicly accessible), for which no identifying information is recorded, is exempt from review.

4b. Investigators are allowed to use their certification, as per policy item 1, as a reference for describing evolving research activities to the IRB in lieu of a fixed research protocol.

This policy eliminates the need for investigators doing evolving research to spell out the details of a dynamic research protocol. The IRB can be assured that the research will be conducted in an ethically appropriate fashion, with full protection of human subjects, when certified investigators attest that their pre-registered research plan will be conducted within the ethical framework laid out in the training program for which they are certified.

Note that different studies by the same investigator(s) must be submitted to the IRB as separate research protocols. These must not be viewed as a single study evolving from one investigation into another.

**Feasibility Assessment**

Feasibility assessment (or exploratory research) is understood to involve the conceptualization or refinement of a research question through harmless observation, casual conversation, and browsing of extant data. The Common Rule applies only to generalizable research. Therefore, feasibility assessment is “not under the purview of the IRB” if a number of strict conditions are met, as specified below.

5. Feasibility assessment is not under the purview of the IRB, if and only if the following conditions are met:

(a) the assessment involves no more than minimal risk;

(b) the assessment does not involve any vulnerable populations, including prisoners, minors, pregnant women and fetuses, mentally impaired or disabled persons, terminally ill patients, the very elderly, and anyone incapable of self-determination;

(c) the human subjects are not identifiable from any of the information acquired;

(d) the assessment does not involve any deceptions;

(e) the assessment data and results are not disclosed or published;

(f) there is no systematic collection of data, or any systematic data collection serves only to calibrate a research instrument that involves no more than minimal risk.

If at any time any of these conditions cannot be satisfied, the project must be submitted to the IRB for review.

**Adverse Effects**

This policy prescribes the documentation of possible negative effects on human research subjects and how they can be reversed.

6. For research involving manipulations or deceptions of human subjects that may cause harmful or undesirable effects, research protocols submitted to the IRB must specifically describe the recovery or debriefing procedures of the study, and address how the effectiveness of these procedures will be assessed.

When a research study may have foreseeable untoward effects on human subjects, the investigator must explain in the research protocol how these effects will be mitigated.

The IRB must be informed of the occurrence of any adverse events that take place during the research study or as a result of the research study. For research protocols that are reviewed by the IRB in one of the three review categories (full board review, expedited review, or exempt from review), adverse events must be reported for the annual continuing review. Research protocols “not under the purview of the IRB” require reporting of any adverse events within a month of occurrence, as such events may change the review status of the study. Unanticipated events or effects on human subjects that may change the interpretation of the risk of the protocol must be reported to the IRB as soon as they are identified.

---

1. [http://www.hhs.gov/ohrp/humansubjects/guidance/45cfr46.htm](http://www.hhs.gov/ohrp/humansubjects/guidance/45cfr46.htm)

3. Briefly, these include research conducted in established or commonly accepted educational settings involving normal educational practices; certain research involving the use of educational tests; certain research on elected or appointed public officials or candidates for public office; research involving the collection or study of publicly available or non-identifiable existing data; certain research on public benefit or service programs; and certain taste and food quality evaluation and consumer acceptance studies.

4. According to the Common Rule, vulnerable populations include minors, prisoners, pregnant women, mentally disabled persons, and economically or educationally disadvantaged persons. Other categories of human subjects may be considered vulnerable depending on the research activities.

7. Demonstrating adequate protection of the confidentiality of research subjects does not necessarily imply a requirement to submit the survey instrument to the IRB.

8. For survey research, pregnant women are not considered a vulnerable population.

9. [http://www2.asanet.org/footnotes/feb02/indexone.html](http://www2.asanet.org/footnotes/feb02/indexone.html)

(Source: Almanac, October 3, 2006, Volume 53, No. 6) (https://almanac.upenn.edu/archive/volumes/v53/n06/or-hsresearch.html)

**Political Candidates**

University students are frequently involved in political events and activities on behalf of candidates for political office. Students are, of course, free to sponsor or participate in campaign-related activities as long as they do not use University resources. When engaging in partisan political activities, students should not imply that the University itself endorses or opposes any candidate for political office.

The following rules apply to student groups.
1. No group, whether recognized or not, that plans to campaign for a particular candidate can receive an allocation from the Student Activities budget.

2. Facilities that customarily are made available to student groups may, on a very limited basis, be used by student groups supporting candidates if such use does not preempt the use of facilities by nonpolitical groups. Fees normally charged for use of facilities must be paid in advance. Under no circumstances may groups supporting candidates use University space to establish a campaign headquarters nor can such groups be assigned permanent office space.

3. No group that supports a candidate for public office may sponsor events in University facilities to raise money for the candidate’s campaign. Advance ticket sales or admissions charges at the door for campaign fund raising are not permitted.

### Poster Policy

#### Posting Notices in Outdoor Areas

1. Groups should restrict posters to kiosks.
2. Each activity will be limited to two posters per kiosk per event.
3. No poster or notice may be larger than 14” x 17”.
4. All activities found in violation of these policies will pay a fine of at least $1.00 per poster.
5. Mounting of posters or use of paint on walls, sidewalks, trees, benches, or other surfaces not intended for posting is prohibited. Posting of notices with adhesives which damage surfaces also is prohibited. The cost of removal of this type of publicity will automatically be charged to the group and/or individuals who posted said publicity.

#### Posting Notices in Indoor Areas

1. Posters may only be placed in those areas designated for posting.
2. Groups wishing to mount posters in University buildings should contact the appropriate building administrator’s office to ascertain the proper locations for posters.

### Sanctions

Groups failing to adhere to the poster policy may be denied use of funds allocated to them by the Activities Council and/or be denied further use of University facilities until such time as corrective action is taken and payment for damages, if any, is received.

All fines will go into the budget of the Student Activities Council.

### Policy for Locust Walk Banners

Any registered organization may reserve one of 16 locations and sets of poles for banner display along Locust Walk between 36th & 37th Streets.

Reserved poles may be picked up in the OSA, as early as 9:00am on the first day of a reservation (a group must have received an APPROVED reservation email from the OSA in order to have a confirmed reservation).

At the time the poles are picked up, a cash deposit of $25.00 must be made. This deposit will be returned to the reserving group when the poles are returned to the OSA at the end of the reservation period.

**FAILURE TO RETURN RESERVED POLES BY THE END OF THE RESERVATION PERIOD (FRIDAY AFTERNOON AT 4:00 PM OF THE WEEK FOR WHICH THE RESERVATION WAS MADE), RETURN OF DAMAGED POLES, AND/OR FAILURE TO RETURN POLES BECAUSE THEY WERE LOST OR STOLEN WILL RESULT IN FORFEITURE OF THE $25.00 SECURITY DEPOSIT AND AN AUTOMATIC $100 FINE TAKEN FROM THE ORGANIZATION’S UNIVERSITY ACCOUNT.** Poles still need to be returned even if the deposit is forfeited.

Any poles found in sleeves that have not been reserved ahead of time, or for which there is no deposit on record, will be removed. The deposit will not be returned.

If a group fails to return its poles ONCE in one year, it forfeits all rights to use the poles for four academic months from the day the poles were due.

Poles and the spaces in which to place them are the only things obtainable through the OSA. Neither twine, string, rope, tape, scissors, ladders nor any other materials will be provided. Such items must be provided by the reserving groups.

Facilities Services personnel have been authorized to remove any banners hung in unauthorized locations, i.e. any location unmarked on the schematic diagram mentioned previously in this document and/or the absence of the use of University provided poles.

Failure to abide by any of the guidelines listed in this policy may result in the loss of a group’s permission to reserve poles and locations on Locust Walk for the balance of the academic year.

### Office of College Houses and Academic Services Postering and Flyering Policies

#### Instructions for Residential Posting:

This policy covers posting within the Penn College Houses. Posting elsewhere in the University is covered by the University Poster Policy. Posting on floors or in lobbies requires the approval of each House Office. Postings and notices in these areas are reserved for the College House, CHAS, Residential Services and Facilities. Any exceptions to this may only be granted by College House staff.

If interested in posting on floors or in lobbies, you have three options:

**Option #1** Bring the following number of flyers or posters to the appropriate House Office for posting by staff:

- Du Bois: 8
- Fisher-Hassenfeld: 24
- Gregory: 12
- Harrison: 24
- Harnwell: 24
- Hill: 17
- Kings Court Eng: 16
- New: 10
- Riepe: 22
- Rodin: 24
- Sansom West: 15

University of Pennsylvania
A few general guidelines:

- Leafleting under doors and soliciting are prohibited within all residences.
- No more than one or two copies of a poster may be placed on an open board and should be promptly removed when information is outdated.
- Posters should not exceed the size of 11 x 17 inches.
- Posters may not be placed on top of existing posters.
- Posting is not allowed in stairwells and elevators.

*Think before you post.* College Houses defend the right of free speech and expression on campus and actively promotes the civil exchange of ideas. In the spirit of the latter aim, students are urged to reconsider creating and distributing posters or flyers containing material or language that could be construed as malicious toward or dangerous to other responsible members of the University community.

**Unauthorized posters may, at the discretion of residential staff, be removed.** In all cases, the above policy will be implemented within the framework and spirit of the Code of Student Conduct, which defines the general rights and responsibilities of student citizenship in the Penn community, and where appropriate, the Charter of the University of Pennsylvania Student Disciplinary System, which sets forth the processes for disciplinary action against students and organizations. Pursuant to the Code of Student Conduct (Sec. III.d), "the content of student speech or expression is not by itself a basis for disciplinary action," and no posters shall be prohibited or restricted solely on the basis of their content, except when they may violate other applicable laws or regulations.

(Source: College Houses & Academic Services; Office of Student Affairs Manual (http://www.vpul.upenn.edu/osa/manual/banner))

(updated December 2016)
• There be a significant departure from accepted practices of the relevant research community; and
• The misconduct be committed intentionally, or knowingly, or recklessly; and
• The allegation be proven by a preponderance of evidence.

Jurisdiction and Applicable Process
There are a number of University policies and procedures for responding to allegations of misconduct by students, postdoctoral fellows, or staff. This policy is intended to be invoked only in instances where research misconduct (i.e. activity related to the proposing, performing, or reviewing of research, or in the reporting of research results and which therefore may have an impact on the integrity of the research record) is involved. Questions of jurisdiction and the applicability of the appropriate University procedure will be decided by the responsible administrative entity (such as the Office for Student Conduct, Office for Postdoctoral Programs, or the Office of Human Resources), in consultation with the Vice Provost for Research. Allegations of misconduct not involving the research process or the integrity of the research record will be resolved by the disciplinary process ordinarily applicable.

1. Inquiry
1.1 Allegations of research misconduct should be directed in the first instance to the Vice Provost for Research who, along with the responsible administrative entity, will determine jurisdiction and which process is applicable to resolve the allegation. If the Vice Provost determines that this process is properly invoked, the Vice Provost will forward the complaint—which must be in writing—to the Dean of the School where the research is being performed.

1.2 Upon receipt of a properly documented complaint, the Dean will inform the respondent of the nature of the charges, and will provide the respondent with a copy of these procedures. The Dean will also take steps to secure relevant documents, data and other materials.

The Dean will appoint one or more unbiased, impartial individuals with appropriate expertise who will conduct a preliminary inquiry to determine whether a full investigation is warranted.

1.3 The inquiry committee will gather information and determine whether there is sufficient, credible basis to warrant a formal investigation. The committee shall offer the respondent an opportunity to provide them with relevant information regarding the allegations. The committee will submit a written report of its assessment to the Dean and the respondent, and to the complainant where appropriate. The report should state what evidence was reviewed, summarize relevant interviews, and include the committee’s recommendation. This report will ordinarily be submitted within 30 calendar days of receipt of the written complaint by the Dean.

1.4 If the report of the inquiry committee determines that a formal investigation is not warranted, the Dean may (i) drop the matter, or (ii) not initiate a formal investigation, but take such other action as the circumstances warrant, or (iii), in extraordinary circumstances, nonetheless initiate a formal investigation. The Dean will inform the concerned parties of the decision.

1.5 If the inquiry committee determines that a formal investigation is warranted, the Dean will initiate a formal investigation as provided in Section 2. The Provost (Vice Provost/designee) will inform the appropriate government agency or source funding the research, in writing, that a formal investigation has been initiated and will identify the respondent to the agency or source (1).

2. Formal Investigation
2.1 To initiate a formal investigation, the Dean will appoint a formal investigation committee of not less than two disinterested individuals with sufficient expertise, one or more of whom may have served on the preliminary inquiry committee.

2.2 Investigation. The formal investigation committee will be provided with copies of the complaint, the report of the initial inquiry and any other materials acquired during the preliminary inquiry. The formal investigation committee will undertake a thorough examination of the allegations, including, without limitation, a review of relevant research data and proposals, publications, correspondence, and records of communication in any form. Experts within or outside the University may be consulted. The Committee shall have authority to investigate, pursue and document any related research misconduct by the respondent, even if such misconduct was not covered by the initial complaint. Whenever possible, interviews will be conducted with the complainant, as well as with others having information regarding the allegations. The Committee must allow the respondent an opportunity to be interviewed at this formal investigation stage. When being interviewed by the committee the respondent and the complainant may each be accompanied by an adviser, who may be a lawyer but who may not participate directly in the proceedings except when and as requested to do so by the committee.

2.3 Reporting the findings. Following its investigation, the formal investigation committee will prepare and provide a written report of its findings to the respondent, to the Dean, to the Provost, and, if appropriate, to the complainant. The report will describe the allegations investigated, how and from whom information was obtained, the findings and basis of the findings, and will include texts or summaries of the interviews conducted by the committee. The report will conclude with a clear statement regarding which charges have been considered and what its findings are with respect to each charge the committee considered. If the committee finds that a violation of University policy in addition to or other than research misconduct might have been committed, a description of the possible violation will be included.

The committee will indicate whether each charge considered during the course of its proceedings is unsubstantiated or substantiated by a preponderance of evidence. If the matter involves a respondent who would be subject to University sanctions for misconduct only if the evidence met a clear and convincing standard, the Committee will make an additional determination as to whether that standard has also been met (2).

The final report will ordinarily be submitted within 90 days of the appointment of the formal investigation committee. The respondent will be permitted to make a written reply to the Dean with a copy to the Provost, and Vice Provost for Research, within 15 calendar days of submission of the report. The Dean may ask the committee to respond in writing to any replies from the respondent. The Dean may also ask the complainant to respond to the report if deemed appropriate. All such responses and replies will be incorporated as appendices to the report of the formal investigation committee.

3. Disposition of Final Report and Findings
3.1 The Dean will consider the final report and replies. Upon acceptance of the report by the Dean, the Provost (Vice Provost/designee) will submit a copy of the report containing the outcome of the investigation to the appropriate government agency or source funding the research, if such
action is required by regulation or otherwise appropriate. The entire formal investigation process should be completed within 120 calendar days of its initiation, unless documented circumstances warrant a delay.

3.2 If the final report of the formal investigation committee finds the charges of research misconduct against a respondent not to be substantiated, the research misconduct proceeding is terminated and the concerned parties will be informed. A finding that a charge of research misconduct has not been substantiated shall not preclude the University from taking other appropriate action against the respondent if the respondent’s behavior or actions violate another University policy or rule.

3.3 If the final report of the formal investigation committee finds the charges of research misconduct against a respondent to be substantiated, the matter will then be referred to the responsible administrative entity within the University to determine the appropriate University sanctions, if any, to be imposed for the misconduct (3).

4. Other Actions and Procedures

4.1 The Dean in consultation with the Provost will, during the course of the inquiry or formal investigation, take administrative action, as appropriate to protect the welfare of animal or human subjects.

4.2 At any time during the inquiry or formal investigation, the Dean and Provost will immediately notify the relevant funding agency(ies) if public health or safety is at risk; if agency resources or interests are threatened; if research activities should be suspended; if there is reasonable indication of possible violations of civil or criminal law; if Federal action is required to protect the interests of those involved in the investigation; if the University believes the inquiry or formal investigation may be made public prematurely so that appropriate steps can be taken to safeguard evidence and protect the rights of those involved; or if the research community or public should be informed.

4.3 If the final report of the formal investigation committee finds charges have been substantiated, the Provost or Dean will take appropriate steps to correct any misrepresentations resulting from the misconduct. If, at any time during the inquiry or investigatory stages, the respondent admits to the alleged misconduct, the Dean will take the necessary steps to complete the inquiry in order to correct the scientific record. If misrepresented results have been submitted for publication, already published, or otherwise disseminated into the public domain, appropriate journals and other sponsors will be notified. In addition, collaborators, and other affected individuals, organizations, institutions, and sponsors will be informed.

4.4 Complete records of all relevant documentation on cases treated under the provisions of this policy will be preserved by the offices of the Dean and the Provost in a manner consistent with the Protocols for the University Archives and Record Center. In cases adjudicated under Section 3, records will be preserved for a minimum of ten years following completion of all proceedings. Records of cases which are dropped will be preserved for at least three years following the initial inquiry. When students are involved in these procedures, the confidentiality provisions applicable to educational records will govern the disclosure of the records.

4.5 The University may act under these procedures irrespective of possible civil or criminal claims arising out of the same or other events. The Dean, in consultation with the Provost and the General Counsel, will determine whether the University will proceed against a respondent who also faces related charges in a civil or criminal tribunal. If the University defers proceedings, it may subsequently proceed irrespective of the time provisions set forth in these procedures.

Endnotes

1. The decision to initiate a formal investigation must be reported to the Office of Research Integrity, Department of Health and Human Services, if the research has been supported by a grant from DHHS, according to DHHS regulations.

2. There is a discrepancy between University regulations, which use the standard of “clear and convincing” evidence, and regulations of the Office of Research Integrity, which use the lower standard of “preponderance of evidence”. Therefore, if there is a finding of fault, the inquiry must explicitly state whether the higher University standard is met, to inform the University administrative entity which is responsible for determining possible sanctions.

3. The intent of this policy is that the appropriate administrative entity will take responsibility for determining and implementing sanctions.

For instance, if the respondent is an undergraduate student any disciplinary sanctions will be determined by the Office of Student Conduct (OSC) in accordance with its amended Charter procedures dealing with research misconduct findings. In order to determine sanctions, the findings and accompanying documents should be forwarded to the Office of Student Conduct. Upon review of all findings, including all submissions by the respondent etc., the Office of Student Conduct will propose appropriate sanctions to the respondent. The respondent would then have an opportunity to accept, reject or propose alternative sanctions. If either the original sanction or an alternative sanction is accepted and agreed upon, the OSC then has primary responsibility for implementing and monitoring sanctions. If the respondent rejects the sanction, the respondent may appeal the nature and severity of the sanction only to the Disciplinary Appellate Officer within the Student Disciplinary System. If the decision of the appellate officer is to uphold the proposed sanction, the sanction will be imposed, with no further levels of review.

Likewise, if the respondent is a graduate student, postdoctoral fellow, or staff member, the responsible administrative entity would consider the information and determine sanctions.

Recognition and Governance of Undergraduate Social Fraternities and Sororities

The University of Pennsylvania values collegiate fraternities and sororities as an important component of the undergraduate student experience at the University. Fraternal organizations have existed at the University since 1849. These organizations complement the academic and non-academic aspects of the campus life by serving as a source of cultural, academic and social support as their members pursue their educational goals.

This policy

1. describes the relationship between individual fraternity/sorority colonies/chapters (“chapters”) and the University,
I. Framework for Recognition

A. General Principles

1. Recognition is the formal process by which the University of Pennsylvania agrees that a fraternity or sorority may function on the campus, enroll members from the student body through recruitment and/or intake activities and identify its chapter with the University.

2. Only chapters of an inter/national independently incorporated organization (“National Sponsoring Body”) are eligible for University recognition. The University’s recognition is premised on the same basic principles that apply to the University’s affiliation with external organizations: there must be commonality of goals and standards, mechanisms for accountability and provisions for the discontinuation of the affiliation should goals diverge or standards decline.

3. For colony and chapter recognition, it is critical that a local network of alumni/ae (“Alumni Sponsor”) exists to work with the colony/chapter. The Alumni Sponsor is a critical element for the success of any colony/chapter. The Alumni Sponsor will consist of an identified group of alumni/ae or other adults who have agreed to provide mentoring and guidance to the chapter and its members to ensure long term functioning and organizational stability. The Alumni Sponsor also is tasked to ensure that all actions of the chapter are consistent with the mission and values of the University and the National Sponsoring Body. The Alumni Sponsor may be organized as a separate legal entity, and may be the legal fraternity entity identified as a responsible party in agreements between the University and the fraternity relating to disciplinary action against a chapter or to a chapter’s use and occupancy of University-owned property as a residential chapter house. For all residential fraternities, the Alumni Sponsor must also help to promote the financial viability of the chapter and will, to the extent individuals with the requisite expertise are available to the Alumni Sponsor, assist in developing and implementing plans for the management of and improvements to the chapter house. Continued recognition of a chapter requires ongoing active involvement by an Alumni Sponsor.

4. Because fraternity and sorority chapters should enhance the educational experience of students, it is appropriate for the University to provide support services that will help the chapters to function effectively for their members and enhance their stability over time.

B. Levels of Recognition

1. Provisional Recognition

Provisional Recognition is the University’s conditional approval of affiliation with a local chapter for a specified period, usually no shorter than one year, after an organization meets the criteria for recognition. To be eligible for Provisional Recognition, a chapter must meet all of the criteria described in section III.B. At the end of the period of Provisional Recognition, OFSL will conduct a review of the chapter and consult with the Fraternity and Sorority Advisory Board (“FSAB”) and the Vice Provost for University Life (“VPUL”). The Director of OFSL (“Director”) will determine whether the chapter qualifies for Full Recognition or continued Provisional Recognition, or should have its recognition revoked or altered. Ordinarily, Provisional Recognition will apply during the establishment of a new chapter or the reestablishment of a formerly active chapter. In addition to meeting all requirements described in sections II and III.B, formerly active chapters seeking to re-establish must also meet any additional conditions set by the Director. A chapter in Provisional Recognition status may only participate in University-wide rush/membership selection processes to the extent permitted by the IFC, Panhellenic or IGC.

2. Full Recognition

Full Recognition accords a fraternity/sorority all of the privileges and resources described in section III.A of this policy while also establishing the fraternity/sorority’s responsibilities under this policy, including those set forth in section III.B. If the University believes that the activities of a chapter are inconsistent with its policies or goals, the University reserves the right to change or revoke the chapter’s recognition through the appropriate process.

3. Probationary Recognition

Probationary Recognition is a reduced level of recognition resulting from the University’s withdrawal of certain privileges for a set time period. This status may be applied to a chapter that has failed to abide by applicable University policies and/or state, local or federal law. Before the end of the probationary period, the chapter’s officers, National Sponsoring Body and Alumni Sponsor will be required to produce a written plan regarding corrective action to bring the chapter into full compliance with the policies and/or legal requirements that affected the chapter’s status. At the end of the probationary period, OFSL will conduct a review of the chapter in consultation with the FSAB. Based on this review, the Vice Provost for University Life will determine whether the chapter will regain Full Recognition, continue Probationary Recognition or have its recognition revoked or altered.

II. The Recognition Process

A. Overview

1. Recognition is a multi-step process through which the University, in consultation with a National Sponsoring Body and an Alumni Sponsor, determines that a chapter meets the criteria established by this policy for affiliation with the University.

2. City-wide fraternities and sororities which, by charter of the National Sponsoring Body, are authorized to draw membership from more than one college/university within the greater Philadelphia area may be recognized under this policy, subject to the following additional conditions: only the membership drawn from the University of Pennsylvania will be recognized as the official fraternity/sorority chapter; participants from outside of the University will be considered “guests” of the chapter and the chapter will be held accountable for the actions of guests.

3. The recognition process begins with informal consultation among the OFSL, the Office of the Provost and other University offices identified by the Office of the Provost to assess how the possible addition of a chapter would affect the University community’s social, cultural and academic environment.

4. Following a favorable recommendation upon the conclusion of the consultative process described in section II.A.3, a chapter seeking recognition and its National Sponsoring Body shall make a written application and submit all information specified in application guidelines provided by OFSL. This information will generally include:
privileges:

In general, Full Recognition affords a fraternity/sorority the following privileges:

A. Privileges

B. Approval Process

1. Provisional Recognition is the first step in the recognition process. To be eligible for Provisional Recognition, a fraternity or sorority chapter must:
   a. secure a commitment for affiliation from a National Sponsoring Body; and
   b. identify an Alumni Sponsor.
   The chapter must also obtain approval from the appropriate undergraduate Governing Council, the GAC and OFSL.

2. The Director will submit each application to the appropriate Governing Council, as requested by the chapter, and the Governing Council will make a decision on the application in accordance with its policies and procedures.

3. If the chapter receives the approval of a Governing Council, the application for recognition will be forwarded to the GAC. After the chapter receives the approval of both the applicable Governing Council and the GAC, OFSL will complete its review of the application.

4. Provided that the information submitted by the chapter is acceptable to the University, the Director will issue an Offer of Provisional Recognition letter, which will include any special terms or conditions that apply to the chapter. The National Sponsoring Body, the Alumni Sponsor and the chapter seeking recognition must accept the offer of recognition in writing through their respective authorized officers before a chapter can be granted Provisional Recognition.

5. After a chapter has satisfied requirements contained in the Offer of Provisional Recognition as well as any other prerequisites to Full Recognition established by the University and the National Sponsoring Body, it may seek Full Recognition from the University. Both its National Sponsoring Body and its Alumni Sponsor must certify in writing that a chapter seeking Full Recognition has complied with all requirements for Full Recognition contained in the Offer of Provisional Recognition.

6. If the Director confirms that
   a. all requirements for Full Recognition contained in the Offer of Provisional Recognition have been satisfied and
   b. the chapter meets generally applicable criteria for Full Recognition, the Director will issue a letter awarding the chapter Full Recognition status.

III. Privileges and Responsibilities of Recognition

A. Privileges

In general, Full Recognition affords a fraternity/sorority the following privileges:

1. Identification of the chapter with the University and, subject to approval of OFSL, use of the University’s name along with, but not in place of, identification with the National Sponsoring Body.

2. Advice and assistance of OFSL and other appropriate University offices in the conduct of the chapter’s business affairs, operation of its house, if any, and its short-term and long-term financial planning.

3. Assistance and support of various University resources, such as the Division of Public Safety and the Division of Facilities and Real Estate Services, regarding safety and facilities-related issues.

4. Assistance from University offices, such as the Office of Development, Alumni Relations and Annual Giving, in communicating with the University’s alumni of the local chapter.

5. Access to University facilities for official chapter functions, subject to the approval of OFSL and/or other appropriate University offices and subject to applicable charges.

6. Participation in the University’s fraternity/sorority governance system, through IFC, Panhellenic or IGC and GAC.

7. Participation in official University-wide recruitment or membership solicitation programs, facilitated by the IFC, Panhellenic, IGC and/or GAC.

8. Participation in athletic, social and educational programs and activities provided for fraternal organizations.

B. Responsibilities of All Chapters

Each chapter, regardless of its level of recognition or residential status, assumes the following obligations:

1. The chapter and its members must comply with all applicable laws and University policies as well as the requirements of its National Sponsoring Body organization.

2. The chapter must cooperate with University administrators, including, but not limited to, emergency response and law enforcement officials.

3. The chapter, collectively, must maintain a satisfactory cumulative grade point average and each of its individual members must remain in good standing. A student who is not in good standing with his or her school may not retain membership status or reside in the chapter house.

4. The chapter must notify OFSL, in a timely fashion, of any changes in the persons responsible for the chapter’s operation (including, but not limited to, chapter officers and Alumni Sponsor and/or National Sponsoring Body representatives).

5. At least once per semester, the chapter must review with the Director its general progress and contributions during the previous term regarding chapter viability, compliance with University standards, issues of collective responsibility, projected planning and programming needs and any specific need for advisory services from the University.

6. The chapter must prepare an annual report for its National Sponsoring Body and Alumni Sponsor regarding the status of the undergraduate membership. The National Sponsoring Body must communicate at least once per semester with OFSL regarding its evaluation of the chapter.

7. The chapter must comply with the insurance and risk management requirements established by the University for residential chapter houses, set forth in the University’s Policy Establishing Insurance Coverage Requirements and Indemnity Obligations for Residential Fraternities and Sororities.

8. The chapter must accept collective responsibility for activities of the chapter that violate the University’s Code of Student Conduct or other policies and for violations of the University’s rules by individual members and guests when such violations are approved or tolerated by the chapter, its leadership or members.
9. The chapter must maintain chapter viability through sound financial management and supervision.
10. The chapter must maintain participation in the University's fraternity and sorority governance system through active membership in the IFC, Panhellenic or IGC, and the GAC.
11. The chapter must contribute positively to the University community and to the development of individual chapter members in their role as students at the University.

C. Safety and Risk Management Standards for Residential Chapters Operating in Chapter Houses That Are Not Owned or Managed by the University

Each residential chapter must meet the following additional requirements for initial and continued recognition:

1. The chapter must provide accommodations that are equal in safety and comfort to University dormitory housing. Chapter house accommodations are subject to the same University regulations, guidelines and standards applied to University dormitories and other residential facilities.
2. Chapter house accommodations must comply, on an ongoing basis, with the standards established in the University of Pennsylvania Life Safety Standards for Residential Fraternity/Sorority Chapter Houses. All required certifications must be issued by third party service providers approved by the University and must provide evidence of life safety system functionality required by governmental authorities. The Alumni Sponsor will ensure that any identified deficiencies in the condition or operation of the chapter house are promptly corrected.
3. Chapter house accommodations must be structurally sound and maintained in safe, sanitary and tenantable condition.
4. The chapter must submit to regular safety and compliance inspections, as set forth in the University of Pennsylvania Life Safety Standards for Residential Fraternity/Sorority Chapter Houses. All required certifications must be issued by third party service providers approved by the University and must provide evidence of life safety system functionality required by governmental authorities. The Alumni Sponsor will ensure that any identified deficiencies in the condition or operation of the chapter house are promptly corrected.

D. Chapter Houses in University-Owned Property

1. Chapters that occupy University-owned properties are governed by two separate agreements. The Dormitory Agreement is a long-term agreement between the University and the National Sponsoring Body and/or the Alumni Sponsor that sets forth the structure and conditions under which a chapter may occupy a specific property. The Dormitory Agreement affirms that the governing principle of chapter house occupancy is the property’s status as a University dormitory, and the operational and management relationship between the University and Sponsoring entity will be consistent with that concept. A Dormitory Agreement may be for any number of years, although usually these agreements have a term of 10 to 25 years, assuming all necessary conditions for continued occupancy are met. As constituent units of the University’s system of dormitory housing, chapter houses must submit to regular safety and compliance inspections as set forth in the University of Pennsylvania Life Safety Standards for Residential Fraternity/Sorority Chapter Houses. They also must promptly correct any safety or compliance violations caused by chapter house residents or chapter activities.
2. Additionally, residents of all University-owned chapter houses sign an Occupancy Agreement, between each individual occupant and the University, lasting for not more than one academic year. The Occupancy Agreement reaffirms the chapter house resident's obligations, including the obligation to comply with the safety and behavioral standards that apply to every University student occupying dormitory housing.

IV. Mechanisms for Accountability

Once a chapter receives Full Recognition by the University, the chapter will continue in that status as long as it meets all of the expectations articulated in this policy. On an annual basis, OFSL will review each chapter’s compliance with these standards. If it is determined that a chapter has failed to meet its responsibilities under this policy, the University may implement alterations in the chapter’s status in accordance with the appropriate process.

The process for addressing a chapter’s violation of this or other University policy will depend on the nature and severity of the violation. The procedural options are described below:

A. Administrative Warning

1. The Director, in consultation with University colleagues, may issue an administrative warning to address minor violations of this policy. Such a warning may be issued by OFSL following agreement between OFSL and the chapter about a course of corrective action to remedy the violation(s) at issue. Ordinarily, the time frame for corrective action will not extend beyond one month.
2. Before issuing an administrative warning, the Director or his designee should meet with the president and/or appropriate officers of the chapter to discuss the violation(s). If the Director and the chapter do not agree on a course of corrective action, the Director may refer the matter for formal discipline. In addition, if the chapter fails to take required corrective action after reaching an agreement with OFSL, the University reserves the right to refer the chapter to the formal disciplinary process.

B. Temporary Suspension Status

1. The University may impose a temporary suspension status upon a chapter pending the outcome of the formal disciplinary process when it has reason to believe that the conduct or activities of a chapter poses a risk to safety or has caused or threatens to cause significant harm to person or property. Such a suspension may be imposed only after consultation between the Director or his or her designee and at least one senior member of the central VPUL administration and the Director of the Office of Student Conduct (OSC).
2. OFSL must provide prompt written notice to the chapter’s president, the Alumni Sponsor and the National Sponsoring Body outlining the reason(s) for the temporary suspension status, and any restrictions or conditions attached to it.
3. Ordinarily, during a temporary suspension, a chapter will not be able to conduct any chapter activities and the chapter members may be required to vacate the chapter house.
4. A temporary suspension does not eliminate the possibility of other, more permanent, modifications of a chapter’s recognition status.

C. Process for Addressing Violations of Safety and Risk Management Standards for Residential Chapters

1. If the University determines that a chapter has failed to comply with any of the Safety and Risk Management Standards established under section III.C or section III.D of this policy, the VPUL, after consulting with the Division of Public Safety, the Office of Risk Management and Insurance and the Division of Facilities and Real Estate Services, may impose restrictions on chapter house activities up to and including requiring that the chapter house be vacated until the condition is remedied and the non-compliance is corrected.
2. If, after reasonable notice and an opportunity to address the violation, a chapter fails to remedy a violation of any Safety and
B. Suspension of Recognition

1. The University may suspend a chapter's recognition when it determines that the chapter has violated this or other University policy and the chapter's conduct was serious enough to warrant the chapter's separation from the University for a period of time. In addition, suspension of a chapter by its National Sponsoring Body will automatically result in suspension of recognition by the University without further process.

2. Except for a temporary suspension, described above, a chapter's recognition may be suspended only following the initiation of the procedures described in the FSAB Judicial Charter. Suspension can be imposed through an agreement of responsibility or following a disciplinary hearing. Suspension of recognition will be for a specified period.

3. During the period of suspension, all activities of a chapter are suspended and all of its privileges revoked. During this period the National Sponsoring Body, working with the Alumni Sponsor, will be required to develop and submit a written plan of corrective action to bring the chapter into full compliance with this policy. If a chapter house is maintained, the Alumni Sponsor must cease its operation of the chapter house and the chapter and all residents must vacate the chapter house.

4. After the completion of a term of suspension, chapter members in good standing may be authorized to live in the chapter house and may be granted permission to resume participation in chapter activities and programs. Alternatively, the suspended chapter may be reorganized with newly recruited members. If a chapter has been suspended for three years or more, it must go through the process for seeking Provisional Recognition, outlined in section II of this policy.

C. Withdrawal of Recognition

1. A chapter's recognition may be withdrawn when it is determined to be incapable of meeting its obligations under the terms of this policy for any reason. If a chapter house is maintained, the Alumni Sponsor must cease its operations of the chapter house, the chapter and all residents must vacate the chapter house and the National Sponsoring Body must revoke all privileges and authority for the chapter to function. Withdrawal of recognition terminates all previously established agreements between the University and the chapter.

2. If a chapter's charter is suspended or withdrawn by its National Sponsoring Body, the University will withdraw the chapter's recognition immediately without further process.

3. A chapter's recognition may be withdrawn following initiation of the procedures described in the FSAB Judicial Charter even if no action has been taken by the National Sponsoring Body. If a chapter's recognition is withdrawn through the FSAB process, the FSAB will ordinarily make a recommendation as to when the National Sponsoring Body may be allowed to seek recolonization at the University.

D. Voluntary Withdrawal of Recognition

1. A chapter may voluntarily relinquish its recognition for a specific period of time or indefinitely. The circumstances under which voluntary withdrawal might be appropriate include, but are not limited to, inadequate financial management, inadequate alumni support, overall lack of viability and inability to comply with the conditions of a chapter's Probationary Recognition.

2. In the event of voluntary withdrawal of recognition, the Alumni Sponsor must cease operations of the chapter house, the chapter and all residents must vacate the chapter house and the National Sponsoring Body must revoke all privileges and authority for the chapter to function.

E. Expulsion

1. The University may expel a chapter when it determines that the chapter has violated this or other University policy in such an
egregious manner as to warrant permanent separation from the University.

2. Expulsion means permanent closure of a chapter and terminates all agreements and relationships between the University and the chapter. At the time of expulsion, the Alumni Sponsor must cease operations of the chapter house, the chapter and all residents must vacate the chapter house and the National Sponsoring Body must revoke all privileges and authority for the chapter to function.

3. A chapter may be expelled only following the initiation of disciplinary procedures described in the FSAB Judicial Charter.

VI. Amendments

Recommendations for amendments to this policy may originate with the IFC, Panhellenic, IGC, the FSAB or OFSL. Any amendments to this policy will be issued in writing by the Vice Provost for University Life, with a reasonable period for chapters already in recognition status to comply with new requirements.

Resources for Student Bereavement

Penn recognizes that its students may experience the loss of a loved one during their time at Penn, and that grief impacts us all differently. The following guidelines are meant to describe the resources Penn has in place to help students navigate through this difficult time; students should work with their academic advisors to determine the best course of action for their individual needs.

For emergency assistance, call 511 or the Division of Public Safety at 215-573-3333. Help is available 24/7.

If you are grieving or have experienced a death of a loved one, one of the first questions you may have is about missing class. Class attendance policies vary by course, and if you feel overwhelmed about how to get in touch with your instructors, your academic advisor can help.

If you are not sure how to contact your academic advisor, or if you are unable to reach your advisor or would prefer to talk to someone else, please contact your school’s advising office:

Undergraduate Students

College of Arts and Sciences: (http://wwwcollege.upenn.edu/college-office) College Office, 215-898-6341

College of Liberal & Professional Studies: (http://wssas.upenn.edu/lps/students/current) Academic Advising, 215-746-7040

School of Nursing: (http://wwwnursing.upenn.edu/student-services/advising/accelerated) Student Services, 215-898-6687

Graduate, Professional, and Other Students

Annenberg School for Communication: (https://wwwasc.upenn.edu/academics/graduate-program) Graduate Studies, 215-573-6349

If you are a family member or a friend who is concerned about a Penn student suffering a loss, please feel free to contact the student’s school advising office as well.

In addition to speaking to an academic advisor, Penn offers a number of other resources to support grieving students:

University Offices

Counseling and Psychological Services (http://wwwvpul.upenn.edu/caps) (CAPS) offers free and confidential services to all undergraduate, graduate, and professional students at Penn. CAPS’ trained clinicians offer both individual and group therapy. Students can make an appointment or discuss available options by calling CAPS at 215-898-7021, 24 hours a day, 7 days a week.

Student Intervention Services (http://wwwvpul.upenn.edu/intervention.php) (SIS) assists the University community in handling emergencies or critical incidents involving the welfare and safety of students. The SIS teams work in partnership with CAPS, the Chaplain’s Office, and Special Services in the Division of Public Safety to manage cases involving major critical incidents. The SIS team utilizes a network of University resources and administrators to support the direct provision of services to students and others impacted by an emergency or crisis situation and provide case management and collaborative follow-up
services as needed. SIS can be contacted at 215-898-6081 during regular office hours, or on nights or weekends, please call the Department of Public Safety at 215-573-3333.

The Office of the Chaplain (http://www.upenn.edu/chaplain) is available to students for pastoral support and guidance. The office also serves and supports a wide range of student organizations, fellowships and religious communities on Penn’s campus. If you need to reach someone in the Chaplain’s Office immediately, please call 215-898-8456 or email the chaplain (choward@pobox.upenn.edu) or the associate chaplain (skocher@pobox.upenn.edu).

Student Groups on Campus
Actively Moving Forward (AMF) at Penn is a student organization/Support Network for students at Penn grieving the illness or death of a loved one. The organization includes a peer-led Grief Support Group for Penn students who are coping with the illness or death of a loved one to connect with others “who get it,” and a Service Group open to ALL students to go to service events together throughout the Philadelphia area. Visit AMF’s website page to learn more at http://pennstudentsofamf.weebly.com/, or you can visit their Facebook page at https://www.facebook.com/AMFatUPenn/.

Revocation of Degrees
I. Purpose
This policy outlines the process to be followed when a question arises as to whether a degree previously granted to a student, should be revoked.

II. Statement of Policy
The University’s award of a degree constitutes its certification of student achievement. In order to preserve the integrity of its academic standards and the degrees it grants, the University may exercise its right to revoke a previously conferred degree. Such action may be considered in a case where it is alleged, for example, that the degree has been obtained by fraud or other serious misconduct, such as, but not limited to, providing false information on an application for admission, cheating on an examination, tampering with student records, plagiarism, or research misconduct while enrolled in the degree program.

III. Process for the Revocation of Doctor of Philosophy, Master of Arts and Master of Science
A. Initiation
1. Information that places into question the validity of a previously conferred Doctor of Philosophy, Master of Arts or Master of Science degree should be referred to the dean of the school that houses the graduate group in which the degree holder was enrolled.
2. Upon discovery or receipt of credible information that a graduate may have obtained a degree by fraud or other serious misconduct, the dean should initiate an investigation.

B. Investigation
1. The dean will appoint an investigative committee, composed of 2 or more faculty, to review the matter and recommend to the dean whether no further action should be taken, whether corrective action short of revocation is appropriate, or whether the degree should be revoked.
2. The graduate will be notified in writing of the investigation, the reason for the investigation, and the procedures to be followed during the investigation. In addition, the graduate will have an opportunity to provide information for the investigative committee to consider.
3. The investigative committee will submit a written summary of its findings and recommendations to the dean. A copy of the committee’s report will be provided to the graduate and the graduate may submit a response to it.
4. After reviewing the committee’s report and the graduate’s response (if any), the dean will decide whether to proceed toward a revocation of the degree, whether to obtain corrective action or whether to drop the matter. If the dean decides to pursue revocation of the degree, the matter must be referred to the Graduate Council of the Faculties for a hearing. The dean or his/her designate will also bring the matter to the attention of the Provost.

C. Hearing
1. The graduate may have an advisor, of his or her own choosing, during this process. (Throughout this policy, the term “process advisor” is used to refer to the graduate’s advisor for this process.)
2. The graduate should be provided written notice of the hearing at least one month in advance of the hearing. This notice should include information about the hearing process. Every effort should be made to schedule the hearing at a date and time when the graduate and his or her process advisor are able to attend in person or via teleconference. Upon a showing that the required notice was provided, the hearing may proceed in the absence of the graduate and/or his or her process advisor.
3. Members of the Graduate Council will receive the investigative report and supporting documentation in advance of the hearing. The graduate will be invited to submit information in advance of the hearing as well.
4. Both the graduate and the dean will be expected to identify witnesses and provide copies of any additional documents to be offered at the hearing at least one week prior to the hearing date. In the event that a witness is not able to attend the hearing, the witness may present information via teleconference or a signed written statement.
5. The dean (or designate) and the graduate will have an opportunity to present evidence and to question witnesses presented by the other party. Members of the Graduate Council may ask questions of any participant or witness. At the appropriate time, both the dean (or his/her designate) and the graduate may present opening and closing statements.
6. At the hearing, the graduate may be accompanied by a process advisor, who may be an attorney. If the graduate’s process advisor is an attorney, a representative of the Office of General Counsel may be invited to attend the hearing. A member of the investigative committee and the graduate group chair may attend the hearing.
as well. The graduate’s process advisor/attorney may provide counsel to the graduate during the hearing but (except as provided in paragraph 7 of this subsection) may not actively participate in the hearing. Likewise, the University’s counsel, if present, may not actively participate in the hearing.

7. The graduate is responsible for presenting his or her own case before the Graduate Council. However, when, in the Graduate Council’s discretion, the circumstances so warrant, the graduate’s process advisor may be permitted to address the Graduate Council or make a statement on the graduate’s behalf.

8. The rules of evidence applicable to legal proceedings do not apply to the hearing. Information, including hearsay, may be considered if it is relevant, not unduly repetitious and the sort of information on which responsible persons are accustomed to rely in the conduct of serious affairs.

9. Student members and ex officio members of the Graduate Council may be present at the hearing and the closed session. They may participate in the closed deliberations in the same way as other members of the Graduate Council; however, they may not participate in or be present for the vote.

10. At the conclusion of the hearing, the dean (or designate), the graduate and the process advisor, and all other guests will withdraw and the Graduate Council will deliberate in closed session and then vote on the question of revoking the degree. A two-thirds vote of those voting members present is required for revocation. The determination to revoke a degree must be supported by clear and convincing evidence.

11. The Graduate Council will issue a written decision. If the vote of the Graduate Council does not support revocation of the degree, the Graduate Council will so advise the dean and the matter will be dropped. If the vote supports revocation of the degree, the Graduate Council’s decision will be transmitted to the dean and the President, along with copies of all documents reviewed by the Graduate Council.

12. The Graduate Council will arrange for a verbatim recording of the hearing (but not the deliberation and voting phases). The recording and any transcription of it will become part of the record of the proceeding and will remain the property of the University.

IV. Process for the Revocation of Degrees Recommended by the Faculties of the Schools

A. Initiation

1. Information that places into question the validity of a degree should be referred to the dean of the school that houses the program in which the degree holder was enrolled.

2. Upon discovery or receipt of credible information that a graduate may have obtained a degree by fraud or other serious misconduct, the dean should initiate an investigation.

3. In cases, where there are two or more degrees housed in different schools and the validity of one or more the degrees is in question, the deans of the schools involved should confer and act in concert. In such cases, the word “dean” in the following sections shall mean the deans acting together.

B. Investigation

1. The dean will appoint an investigative committee, composed of 2 or more faculty, to review the matter and recommend to the dean whether no further action should be taken, whether corrective action short of revocation is appropriate, or whether the degree should be revoked.

2. The graduate will be notified in writing of the investigation, the reason for the investigation, and the procedures to be followed during the investigation. In addition, the graduate will have an opportunity to provide information for the investigative committee to consider.

3. The investigative committee will submit a written summary of its findings and recommendations to the dean. A copy of the committee’s report will be provided to the graduate and the graduate may submit a response to it.

4. After reviewing the committee’s report and the graduate’s response (if any), the dean will decide whether to proceed toward a revocation of the degree, whether to obtain corrective action or whether to drop the matter. If the dean decides to pursue revocation of the degree, the matter must be referred to the appropriate committee in the school, which shall convene a hearing. If no such committee exists or in cases of two or more degrees being investigated, the dean or deans should appoint a hearing committee consisting of a chair and at least three other members of the faculty of the school or schools. The dean (or designate) will also bring the matter to the attention of the Provost.

C. Hearing

1. The graduate may have an advisor, of his or her own choosing, during this process. (Throughout this policy, the term “process advisor” is used to refer to the graduate’s advisor for this process.)

2. The graduate should be provided written notice of the hearing at least one month in advance of the hearing. This notice should include information about the hearing process. Every effort should be made to schedule the hearing at a date and time when the graduate and his or her process advisor are able to attend in person or via teleconference. Upon a showing that the required notice was provided, the hearing may proceed in the absence of the graduate and/or his or her process advisor.

3. Members of the hearing committee will receive the investigative report and supporting documentation in advance of the hearing. The graduate will be invited to submit information in advance of the hearing as well.

4. Both the graduate and the dean will be expected to identify witnesses and provide copies of any additional documents to be offered at the hearing at least one week prior to the hearing date. In the event that a witness is not able to attend the hearing, the witness may present information via teleconference or a signed written statement.

5. The dean (or designate) and the graduate will have an opportunity to present evidence and to question witnesses presented by the other party. Members of the hearing committee may ask questions of any participant or witness. At the appropriate time, both the dean (or designate) and the graduate may present opening and closing statements.

6. At the hearing, the graduate may be accompanied by a process advisor, who may be an attorney. If the graduate’s process advisor is an attorney, a representative of the Office of General Counsel may be invited to attend the hearing. A member of the investigative committee and the vice or associate dean who oversees the graduate’s program may attend the hearing as well. The graduate’s process advisor/attorney may provide counsel to the graduate during the hearing but (except as provided in paragraph 7 of this subsection) may not actively participate in the hearing. Likewise, the University’s counsel, if present, may not actively participate in the hearing.
7. The graduate is responsible for presenting his or her own case before
the hearing committee. However, when, in the hearing committee’s
discretion, the circumstances so warrant, the graduate’s process
advisor may be permitted to address the hearing committee or make
a statement on the graduate’s behalf.
8. The rules of evidence applicable to legal proceedings do not apply to
the hearing. Information, including hearsay, may be considered if it is
relevant, not unduly repetitious and the sort of information on which
responsible persons are accustomed to rely in the conduct of serious
affairs.
9. If the hearing committee includes student members and ex officio
members, they may be present at the hearing and the closed session
and participate in the closed deliberations in the same way as
other members of the hearing committee; however, they may not
participate in or be present for the vote.
10. At the conclusion of the hearing, the dean (or designate), the graduate
and the process advisor, and all other guests will withdraw and the
hearing committee will deliberate in closed session and then vote on
the question of revoking the degree. A two-thirds vote of those voting
members present is required for revocation. The determination to
revoke a degree must be supported by clear and convincing evidence.
11. The hearing committee will issue a written decision. If the vote of the
hearing committee does not support revocation of the degree, the
committee will so advise the dean and the matter will be dropped. If
the vote supports revocation of the degree, the hearing committee’s
decision will be transmitted to the dean and the President, along with
copies of all documents reviewed by the hearing committee.
12. The hearing committee will arrange for a verbatim recording of the
hearing (but not the deliberation and voting phases). The recording
and any transcription of it will become part of the record of the
proceeding and will remain the property of the University.

V. Appeal
1. If there is a vote in favor of revoking the degree, the graduate may
appeal to the Provost within ten (10) days after notification of the
hearing committee’s decision. The appeal must be written and state
the specific grounds upon which it is based.
2. The grounds for an appeal are limited to the following points: a) that
there was material and prejudicial procedural error in the conduct
of the hearing; and b) that the result of the hearing was arbitrary or
capricious.
3. Appellate review will be based solely on the record of the hearing
(including written submissions and responses provided by the
parties). When an appeal is received, the Provost will be provided with
the full record.
4. After consideration of the appeal, the Provost will issue a written
decision and provide copies of it to the graduate, the dean, and other
appropriate parties. If the Provost finds sufficient basis, he or she
may reverse the decision to revoke or remand the matter for further
investigation and/or a new hearing.

VI. Revocation of the Degree
1. If the Provost denies the graduate’s appeal, or if an appeal is not
submitted within the prescribed period, the decision to revoke
will be referred to the President for final action. The President will
formally revoke the degree or degrees and notify the Secretary of
the University to write to the graduate informing him or her that the
grant of the degree has been revoked and requesting that the diploma
or diplomas be returned. The Secretary may also request that the

Rules Governing Final Examinations
1. No instructor may hold a final examination nor require the submission
of a take-home final exam except during the period in which final
examinations are scheduled. When necessary exceptions to this
policy may be granted for postponed examinations (see 3 and 4
below). No final examinations may be scheduled during the last week
of classes or on reading days.
2. No student may be required to take more than two final examinations
on any calendar day during the period in which final examinations are
scheduled. If more than two are scheduled, the student may postpone
the middle exam. If a take-home final exam is due on a day when
two final examinations are scheduled, the take-home exam shall be
postponed by one day.
3. Examinations that are postponed because of conflicts with other
examinations, or because more than two examinations are scheduled
in the same day, may be taken at another time during the final
examinations period if the faculty member and student can agree on
that time. Otherwise, they must be taken during the official period for
postponed examinations.
4. Examinations that are postponed because of illness, a death in the
family, for religious observance, or some other unusual event may be
taken only during the official periods: the first week of the spring and
fall semesters. Students must obtain permission from their Dean’s
office to take a postponed exam. Instructors in all courses must
be willing to offer a make-up examination to all students who are
excused from the final examination.
5. No instructor may change the time or date of a final exam without
permission from the appropriate Dean.
6. No instructor may increase the time allowed for a final exam beyond
the scheduled two hours without permission from the appropriate
Dean.
7. No classes or required class activities may be held during the reading
period.
8. The first examination of the day begins at 9 a.m. and the last
examination concludes by 8 p.m. There will be one hour between
exam time blocks.
9. All students must be allowed to see their final examination. Exams
should be available as soon as possible after being graded with
access ensured for a period of at least one regular semester after
the exam has been given. To help protect student privacy, a student should have access only to his or her own exam and not the exams of other students. Therefore, for example, it is not permissible to leave student exams (or grades or papers) in publicly accessible areas.

10. Students may not be asked for their Social Security Numbers. Instructors may not publicly display a student’s Penn ID or any portion of the Social Security Number, nor use names, initials, or any personally identifiable information to post grades. Even when an identifier is masked or absent, grades may not be posted in alphabetical order, to protect student privacy.

11. Final exams for College of Liberal and Professional Studies (LPS) courses must be given on the regular class meeting night during the week of final examinations. No change in scheduling is permitted without unanimous consent of all students in the class and the director of LPS. LPS final exams may not be administered during the last week of class or on a reading day.

In all matters relating to final exams, students with questions should first consult with their Dean’s offices. Faculty wishing to seek exceptions to the rules also should consult with their Dean’s offices. Finally, the Council of Undergraduate Deans and Student Committee on Undergraduate Education (SCUE) urge instructors to see that all examinations are actively proctored.

**Sexual Misconduct Policy, Resource Offices and Complaint Procedures**

Effective July 1, 2019

The mission of the University of Pennsylvania is to offer a world class education to our students, train future leaders, expand and advance research and knowledge, serve our community and society both at home and abroad, and provide the most expert and outstanding health care for our patients. To create and sustain a campus climate in which members of the University community are able to thrive and achieve their full potential, the University has established a wide range of policies, educational programs, resources, support, and reporting systems to respond to complaints of sexual misconduct made against students, postdoctoral fellows or other trainees, faculty, and staff. Sexual harassment, sexual violence, and other forms of sexual misconduct will not be tolerated. The University’s policies, resources, and complaint procedures include the following:

- **I. Sexual Harassment Policy** (p. 1836)
- **II. Consensual Romantic and Sexual Relations in the Workplace and Educational Setting Policy** (p. 1837)
- **III. Sexual Violence, Relationship Violence and Stalking Policy** (p. 1838)
- **IV. Student Disciplinary Procedures for Resolving Complaints of Sexual Misconduct** (p. 1840)
- **V. Procedures for Resolving Complaints of Sexual Misconduct Against Faculty** (p. 1844)
- **VI. Procedures for Resolving Complaints of Sexual Misconduct Against Staff** (p. 1848)

As detailed in these policies and procedures, in all cases where a member of the community, or other person, wishes to initiate a complaint against a member of the community (student, faculty, or staff) for sexual misconduct, the complaint should be brought to the Associate Vice President for Equity and Title IX Officer (“AVP”). The AVP will be responsible for determining the appropriate procedures to be followed and will be charged with overseeing the process.

Not every act that might be offensive to an individual or a group necessarily will be considered harassment and/or a violation of the University’s standards of conduct. In determining whether an act violates University policy, the totality of the circumstances surrounding the conduct must be carefully reviewed. Due consideration must be given to the protection of individual rights, freedom of speech, academic freedom, and open expression.

**Complaints Against Faculty**

Any member of the University community, visitor to campus, or a participant in a University-sponsored activity may bring a complaint of sexual harassment, including romantic or sexual relationships in the educational setting or workplace, sexual violence, relationship violence, or stalking against a faculty member, instructor, postdoctoral fellow or other trainee, or teaching assistant. The complaint should be made to the AVP who will meet with the complainant, determine the appropriate process under University policy for resolution or investigation, and oversee that process. If a determination is made that the complaint involves a violation of the Sexual Violence, Relationship Violence and Stalking Policy, then the AVP will direct the process in accordance with the Procedures for Resolving Complaints of Sexual Misconduct Against Faculty. If a determination is made that the complaint involves a violation of the Sexual Harassment Policy (other than sexual violence or sexual assault), then the AVP will oversee the informal resolution or investigative process(es), advising the Dean of the applicable School that a complaint has been made and discussing any interim measures that may be needed. In either case, for Standing Faculty, the Procedure Governing Sanctions Taken Against Members of the Faculty, Handbook for Faculty and Academic Administrators, Part II.E.16, will be followed where applicable.

**Complaints Against Staff**

Any member of the University community, visitor to campus, or a participant in a University-sponsored activity may bring a complaint of sexual harassment, including romantic or sexual relationships in the educational setting or workplace, sexual violence, relationship violence, or stalking against a staff member. The complaint should be made to the AVP who will meet with the complainant and coordinate with the Office of Staff and Labor Relations in the Division of Human Resources, as appropriate. If a determination is made that the complaint involves a violation of the Sexual Harassment Policy (other than sexual violence or sexual assault), then the AVP will oversee the informal resolution or investigative process(es), advising the Dean or Vice President of the applicable administrative Division that a complaint has been made and discussing any interim measures that may be needed. If a determination is made that the complaint involves a violation of the Sexual Violence, Relationship Violence and Stalking Policy, then the AVP will direct the process in accordance with the Procedures for Resolving Complaints of Sexual Misconduct Against Staff or the applicable collective bargaining agreement.

**Complaints Against Enrolled Students**

Any member of the University community, visitor to campus, or a participant in a University-sponsored activity may bring a complaint of
sexual harassment, including romantic or sexual relationships in the educational setting or workplace, sexual violence, relationship violence, or stalking against an enrolled student. The complaint should be directed to the AVP who will oversee the investigative and resolution process(es). If a determination is made that the complaint involves a violation of the Sexual Harassment Policy (other than sexual violence or sexual assault), then the AVP will oversee the informal resolution or investigative process(es), advising the Dean of the applicable School that a complaint has been made and discussing any interim measures that may be needed. If a determination is made that the complaint involves a violation of the Sexual Violence, Relationship Violence and Stalking Policy, then the AVP will direct the process in accordance with the Student Disciplinary Procedures for Resolving Complaints of Sexual Misconduct.

The University has resource offices available to provide information, education and support as outlined in the policies and procedures below.

A. Reporting and Monitoring

The University is committed to ensuring that members of the University community who share information regarding incidents of sexual misconduct receive the information, counseling and support that they need and are aware of the process for making a complaint. The University is also committed to monitoring reports and complaints of sexual misconduct so that any patterns or systemic problems revealed by such reports and complaints can be addressed.

Consistent with these commitments, the University has determined that the AVP should be advised when incidents of sexual misconduct are reported to any of the University's resource offices (except those identified as confidential resources), Division of Human Resources (as well as Human Resources staff in the Schools and Centers), Office of Affirmative Action and Equal Opportunity Programs (OAA/EOP), and Division of Recreation and Intercollegiate Athletics (DRIA). When an incident of sexual misconduct is reported to the AVP, appropriate steps will be taken to ensure that the individual who reported the incident has been advised of the available resources and the process for making a formal complaint.

Members of the University community who have crime statistics reporting obligations under the Clery Act are obligated to report the matter to the Division of Public Safety, in addition to the AVP. For additional information about Clery Act reporting or to make a report, refer to the Clery Act & Crime Reporting page at https://www.publicsafety.upenn.edu/clery/.

I. Sexual Harassment Policy

For the purposes of University policy, the term "sexual harassment" refers to any unwanted conduct that is based on an individual's sex, sexual orientation, gender identity, or gender expression and that:

1. Involves a stated or implicit threat to the individual's academic or employment status;
2. Has the purpose or effect of interfering with the individual's academic or work performance; and/or
3. Creates an intimidating or offensive academic, living or work environment.

The University regards such behavior as a violation of the standards of conduct required of all members of its community. Accordingly, the University's resources are available to provide information, counseling and support, as well as the informal and formal procedures for resolving complaints of sexual harassment.

A. Resources

Schools, Centers, and administrative Divisions should make known to all of their members the available resource offices for information, counseling and support, as well as the informal and formal procedures for resolving complaints of sexual harassment within the appropriate School, Center, Division, or at the University level. These resources include the following:

1. Confidential Resources for Information, Counseling and Support

The following University resources are available to members of the University community who seek information and counseling about University policies on sexual harassment, standards of behavior, informal and formal mechanisms for resolving complaints and resources for complainants and respondents. These resource offices are also available to support members of the University community making an informal or formal complaint.

The resources listed below are considered confidential, which means that the information shared with these resources generally will be held in confidence, consistent with the University's obligation to address complaints of sexual harassment, unless the person sharing the information gives his or her consent to the disclosure of that information. The commitment to confidentiality does not preclude the sharing of information among responsible University administrators as needed, including to keep members of the University community safe.

- African-American Resource Center (resource for students, staff or faculty)
- Counseling and Psychological Services, including its Sexual Trauma Treatment Outreach and Prevention team also known as STTOP (resource for students),
- Employee Assistance Program (resource for staff or faculty)
- Lesbian Gay Bisexual Transgender Center (resource for students, staff or faculty)
- Office of the University Chaplain (resource for students, staff, faculty, post-doctoral and other trainees or visitors)
- Office of the Ombuds (resource for students, staff, faculty, post-doctoral and other trainees, or visitors)
- Penn Violence Prevention (resource for students)
- Penn Women's Center (resource for students, staff or faculty)
- Special Services Department, Division of Public Safety (resource for students, staff, faculty, post-doctoral and other trainees or visitors)
- Student Health Service (resource for students)
2. Informal and Formal Mechanisms for Complaint Resolution

If both parties agree and the AVP deems it to be an appropriate instance for an informal resolution of a complaint, the AVP will meet with the parties individually, and others as appropriate, in an effort to resolve the complaint. When informal resolution is not chosen, one of the parties is not satisfied with the results, or the proposed resolution is not appropriate, the formal mechanisms described below should be used.

Complaints Against Faculty

Any member of the University community, visitor to campus or a participant in a University-sponsored activity may bring a complaint of sexual harassment, including romantic or sexual relationships in the educational setting or workplace, sexual violence, relationship violence, or stalking against a faculty member, instructor, postdoctoral fellow or other trainee, or teaching assistant. The complaint should be made to the AVP who will meet with the complainant, determine the appropriate process under University policy for investigation, and oversee that process. If a determination is made that the complaint involves a violation of the Sexual Violence, Relationship Violence and Stalking Policy, then the AVP will direct the process in accordance with the Procedures for Resolving Complaints of Sexual Misconduct Against Faculty. If a determination is made that the complaint involves a violation of the Sexual Harassment Policy (other than sexual violence or sexual assault), then the AVP will oversee the informal resolution or investigative process(es), advising the Dean of the applicable School that a complaint has been made and discussing any interim measured that may be needed. In either case, for Standing Faculty, the Procedure Governing Sanctions Taken Against Members of the Faculty, Handbook for Faculty and Academic Administrators, Part II.E.16, will be followed where applicable.

Complaints Against Staff

Any member of the University community visitor to campus or a participant in a University-sponsored activity may bring a complaint of sexual harassment, including romantic or sexual relationships in the educational setting or workplace, sexual violence, relationship violence, or stalking against a staff member. The complaint should be made to the AVP who will meet with the complainant and coordinate with the Office of Staff and Labor Relations in the Division of Human Resources, as appropriate. If a determination is made that the complaint involves a violation of the Sexual Harassment Policy (other than sexual violence or sexual assault), then the AVP will oversee the informal resolution or investigative process(es), advising the Dean or Vice President of the applicable administrative Division that a complaint has been made and discussing any interim measured that may be needed. If a determination is made that the complaint involves a violation of the Sexual Violence, Relationship Violence and Stalking Policy, then the AVP will direct the process in accordance with the Procedures for Resolving Complaints of Sexual Misconduct Against Staff or the applicable collective bargaining agreement.

Complaints Against Enrolled Students

Any member of the University community or a visitor to campus may bring a complaint of sexual harassment, including romantic or sexual relationships in the educational setting or workplace, sexual violence, relationship violence, or stalking against an enrolled student. The complaint should be directed to the AVP who will oversee the investigative and resolution process(es). If a determination is made that the complaint involves a violation of the Sexual Harassment Policy (other than sexual violence or sexual assault), then the AVP will oversee the informal resolution or investigative process(es), advising the Dean of the applicable School that a complaint has been made and discussing any interim measures that may be needed. If a determination is made that the complaint involves a violation of the Sexual Violence, Relationship Violence and Stalking Policy, then the AVP will direct the process in accordance with the Student Disciplinary Procedures for Resolving Complaints of Sexual Misconduct.

Members of the University community who would like assistance with making a formal complaint may contact any of the confidential resources identified above. As further set forth below, all formal complaints involving Sexual Misconduct are to be initiated by contacting the Associate Vice President for Equity and Title IX Officer (“AVP”) who will be responsible for deciding which investigative process to pursue.

B. Education and Prevention

The prevention of sexual harassment and the establishment of effective procedures with due concern for all parties require a thoughtful educational program.

1. University resource offices will provide to the community information on available informal and formal resolution resources and resources for support and information for complainants and respondents.
2. Deans, Vice Presidents, Center Directors, and heads of departments should distribute this policy to faculty and staff and are encouraged to discuss the policy and issues of sexual harassment at meetings with faculty, staff, and students.
3. Training programs for faculty, postdoctoral fellows and other trainees, staff, students who work in the College Houses, and those who assist students in crisis situations, and/or serve in an advisory capacity to students will include training about referrals, resources and methods for handling complaints of sexual harassment.
4. Students will be provided with information about sexual harassment and available resources during new student orientations and throughout the academic year.
5. The University will publish this policy statement annually, including information about how and where to contact University-wide resource offices available to advise, counsel and assist in the informal and formal resolution of sexual harassment complaints. All members of the University community have a responsibility to aid in the prevention of sexual harassment and are encouraged to discuss concerns with the AVP or another of the University resource offices listed in the policy.

C. Policy Against Retaliation

University policy expressly prohibits retaliation against faculty, staff or students who in good faith make reports of violations of this policy. In addition, knowingly and intentionally making a false report of a violation of this policy is prohibited. Members of the Penn community who take adverse action against, intimidate, threaten or otherwise engage in retaliation against a person because they filed a complaint of sexual misconduct or served as a witness during an investigation are subject to disciplinary action, up to and including termination of their employment or expulsion from the University.

II. Consensual Romantic and Sexual Relations in the Workplace and Educational Setting Policy

A. Faculty and Students and Academic Settings

The relationship between faculty member and student is central to the academic mission of the University. No non-academic or personal ties should be allowed to interfere with the integrity of the faculty-student relationship. Consensual sexual relations between faculty and student
can adversely affect the academic enterprise, distorting judgments, or appearing to do so to others, and providing incentives or disincentives for student-faculty contact that are inappropriate.

For these reasons, any sexual relations or dating relationships between a faculty member and an undergraduate student enrolled at the University are prohibited. The prohibition extends to all academic advisors and program directors, including those based in the College Houses and other University-owned or administered housing. The prohibition also extends to graduate, professional, or undergraduate student assistants, but, in their case, only with respect to those undergraduate students over whom they have academic responsibility.

Although consensual sexual relations or dating relationships between faculty and graduate or professional students are not categorically prohibited, the University strongly discourages all sexual relations or dating relationships between faculty and graduate or professional students. Further, sexual relations or dating relationships between a faculty member and a graduate or professional student during the period of the faculty/student relationship are prohibited. The prohibition extends to sexual relations or dating between a graduate or professional student and other students for whom they have some supervisory academic responsibility, between department chairs and students in that department, and between graduate group chairs and students in that graduate group. Likewise, sexual relations and dating relationships are prohibited between a graduate or professional student and their academic advisors, program directors, and all others who have any supervisory responsibility for that student.

**Workplace and Other Settings**

Those entrusted with responsibility for supervising, evaluating, advising, or mentoring other members of the Penn community are in inherently unequal positions. Faculty, staff, and others should not evaluate or supervise those with whom they have a familial, romantic or sexual relationship because of the potential for conflict of interest, or the appearance of favoritism, exploitation or bias. As is the case for faculty, sexual or romantic relationships between staff members and undergraduate students are prohibited. Although consensual sexual relations or dating relationships between staff and graduate or professional students, are not categorically prohibited, the University strongly discourages all sexual relations or dating relationships between staff and graduate or professional students.

Consensual sexual or romantic relationships between those employed by the University as faculty or staff are not in general prohibited by this policy. However, relationships between employees in which one has direct or indirect authority over the other are potentially problematic, including relationships between supervisors and their direct and indirect reports, between senior faculty and junior faculty, and managers and those who report to them (directly or indirectly). If such a relationship develops or exists as a result of a change in employment or academic status, the person in the position of greater authority or power must recuse themselves to ensure that they do not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify their supervisor, department chair, dean or manager, so that person can ensure adequate alternative supervisory or evaluative arrangements are put in place. Such notification is always required where recusal is required. This obligation to recuse and notify exists for past as well as for current relationships. Failure to disclose the relationship in a timely fashion will itself be considered a violation of policy.

It is understood that sexual or romantic relationships may be private and the University treats such information sensitively and (to the extent practicable) confidentially. The University has the option to take any action necessary to ensure compliance with the spirit of this policy, including transferring either or both employees to minimize disruption of operations.

**Mechanisms for Complaint Resolution**

To make a complaint alleging a violation of this policy the Associate Vice President for Equity and Title IX Officer (“AVP”) should be contacted. The applicable informal and formal complaint resolution policies set forth in the University’s Sexual Harassment Policy will be used to determine whether there has been a policy violation. Similarly, the confidential resources listed in the Sexual Harassment Policy are available to assist and support the parties to the complaint and any witnesses.

**B. Policy Against Retaliation**

University policy expressly prohibits retaliation against faculty, staff or students who in good faith make reports of violations of this policy. In addition, knowingly and intentionally making a false report of a violation of this policy is prohibited. Members of the Penn community who take adverse action against, intimidate, threaten or otherwise engage in retaliation against a person because they filed a complaint of sexual misconduct or served as a witness during an investigation are subject to disciplinary action, up to and including termination of their employment or expulsion from the University.

**III. Sexual Violence, Relationship Violence and Stalking Policy**

**A. Introduction**

This policy, which prohibits behaviors that are more generally addressed by the University’s Sexual Harassment Policy, applies to faculty, post-doctoral fellows and other trainees, students, staff and visitors to the University campus and facilities. All forms of sexual violence, relationship violence and stalking and attempts to commit such acts are considered to be serious misconduct and may result in disciplinary action up to and including expulsion or termination of employment. In addition, such acts may violate federal, state and local laws and perpetrators of such acts may be subject to criminal prosecution.

**B. Definitions**

Sexual violence, relationship violence and stalking in any form, including sexual assault and rape, are prohibited by University policy. Important definitions appear below.

**Sexual violence** includes a range of behaviors in which an act of a sexual nature is taken against another individual without that person’s consent or when the individual is unable to consent. There are various types of sexual violence, including but not limited to sexual assault and rape (defined below).

**Sexual assault** (including but not limited to rape) is defined as having committed any of the following acts:

- Any physical sexual contact that involves the use or threat of force or violence or any other form of coercion or intimidation.
- Any physical sexual contact with a person who is unable to consent due to incapacity or mental or physical impairment. “Incapacity” or “impairment” include but are not limited to being under the influence of alcohol or drugs or being too young to consent.
Rape is defined as sexual assault involving an act of penetration and includes acquaintance rape (assailant and victim know each other).

Non-forcible sex acts include unlawful sex acts where consent is not relevant, such as sexual contact with an individual under the statutory age of consent as defined by Pennsylvania law.

Consent is an affirmative decision to engage in mutually agreed upon sexual activity and is given by clear words or actions. Consent may not be inferred from silence, passivity or lack of resistance alone. Furthermore, consent to one form of sexual activity does not imply consent to other forms of sexual activity and the existence of a current or previous dating, marital or sexual relationship is not sufficient to constitute consent to additional sexual activity. Assent shall not constitute consent if it is given by a person who, because of youth, disability, intoxication or other condition, is unable to lawfully give his or her consent.

C. Resources

1. Confidential Resources for Information, Counseling and Support

Resource offices are available to assist members of the Penn community and visitors to the campus who have been, or know someone who has been, the victim of sexual violence, relationship violence or stalking. The staff of these offices are available to provide counseling and support, as well as information about and assistance with making a complaint. The information shared with the resources listed below generally will be held in confidence, consistent with the University’s obligation to address complaints of sexual violence, unless the person sharing the information gives his or her consent to the disclosure of that information. Non-identifying information regarding complaints should be provided to the AVP for purposes of assuring compliance with Title IX. Confidential resources are not obligated to share identifying information with the AVP when an incident of sexual violence is shared with that resource. However, the commitment to confidentiality does not preclude the sharing of information among University administrators as appropriate to keep members of the University community safe. In addition, confidential resources should submit non-identifying information about incidents of sexual violence to the Division of Public Safety for the purpose of crime statistics reporting under the Clery Act. (For additional information regarding requirements, see the Clery Act & Crime Reporting page at https://www.publicsafety.upenn.edu/clery/)

D. Reporting and Monitoring

The University is committed to ensuring that members of the University community who share information regarding incidents of sexual violence receive the information, counseling and support that they need and are aware of the process for making a formal complaint. The University is also committed to monitoring reports and complaints of sexual violence so that any patterns or systemic problems revealed by such reports and complaints can be addressed.

Consistent with these commitments, the University has determined that the AVP should be advised when incidents of sexual misconduct, including sexual violence, are reported to any of the University’s resource offices (except those identified as confidential resources), Division of Human Resources (as well as Human Resources staff in the Schools and Centers), Office of Affirmative Action and Equal Opportunity Programs
When an incident of sexual violence is reported to the AVP, appropriate steps will be taken to ensure that the individual who reported the incident has been advised of the resources available to him or her and the process for making a formal complaint.

Members of the University community who have crime statistics reporting obligations under the Clery Act are obligated to report the matter to the Division of Public Safety in addition to the AVP. For additional information about Clery Act reporting or to make a report, refer to the Clery Act & Crime Reporting page at https://www.publicsafety.upenn.edu/clery/.

E. Rights of Complainants and Respondents

Persons who make a complaint and those who are responding to complaints have the following rights:

- The right to receive equal treatment from the University;
- The right to be informed of the procedures and deadlines for filing complaints and responding to allegations;
- The right to be treated with courtesy and respect by all parties involved in the process;
- The right to an investigation that is conducted in a prompt and safe manner;
- The right to be informed of the results of the investigation;
- The right to confidentiality and to have that confidentiality respected;
- The right to have the opportunity to be heard and have representation in the process;
- The right to an explanation of the outcome of the investigation;
- The right to appeal the decision of the investigator;
- The right to be advised of the resources available to him or her and the process for making a formal complaint.

F. Policy Against Retaliation

University policy expressly prohibits retaliation against faculty, staff or students who in good faith make reports of violations of this policy. In addition, knowingly and intentionally making a false report of a violation of this policy is prohibited. Members of the Penn community who take adverse action against, intimidate, threaten or otherwise engage in retaliation against a person because they filed a complaint of sexual misconduct or served as a witness during an investigation are subject to disciplinary action, up to and including termination of their employment or expulsion from the University.

B. Confidentiality

Confidentiality is of critical importance in ensuring that these sensitive matters are handled appropriately. The University has an obligation to respond to violations of its Sexual Misconduct Policy as fairly and expeditiously as possible when a complaint is received. University staff and faculty may share information with others who have a legitimate need to know in order to fairly and effectively address complaints, but the information should be considered confidential and should be protected to the extent possible consistent with legal obligations. Such administrators may include, for example those in the Office of the Vice Provost for University Life, the Office of the Associate Vice President and Title IX Officer (AVP), the Division of Public Safety, the Office of General Counsel, Counseling and Psychological Services, Student Health Service, and academic advising offices.

C. Reporting Complaints of Violation of Sexual Misconduct

1. Office of the Associate Vice President for Equity and Title IX Officer (AVP)

The Office of the AVP will be responsible for managing all complaints made against enrolled University students for violations of its Sexual Misconduct Policy (including sexual harassment and sexual violence). Complaints should be lodged with the AVP who will assign the complaint to a trained investigator (IO) who will work under the AVP's direction and supervision.

Complaints must either be presented in writing or based upon information provided by the complaint to the IO who will then memorialize the allegations in writing and have the allegations confirmed by the complainant. Complainants may include University students or others both within and outside the community alleging a violation of the Policy by a student enrolled at the University.

2. Office of the District Attorney and Office for Civil Rights

Complainants may also choose to file a report with the District Attorney, the Office for Civil Rights of the U.S. Department of Education, or other external agencies. The University processes and the legal system work independently of one another and the University has its own interest in, and responsibility for, ensuring the enforcement of its Sexual Misconduct Policy. Therefore, the University will not unilaterally defer its processes pending the outcome of any criminal process, nor will the outcome of any legal process be determinative of the University result. The University will, however, comply with reasonable requests by law enforcement for cooperation, and will upon reasonable request temporarily suspend its fact-finding process in a sexual misconduct investigation so as not to impede the law enforcement process.

3. Support, Counseling and Advice

In making a decision about how to proceed with a complaint, complainants may seek support, counseling, and advice from other offices on campus, including the Special Services Department in the Division of Public Safety, the Penn Violence Prevention, the Office of the University Chaplain, the Penn Women’s Center, Counseling and Psychological Services, the Office of the Ombuds, African-American Resource Center or the Lesbian Gay Bisexual Transgender Center. A list of these offices is provided in Section E below. Should a complainant decide to proceed with the University's disciplinary process against an enrolled University student, the Office of the AVP will be the single place to initiate the process.

IV. Student Disciplinary Procedures for Resolving Complaints of Sexual Misconduct

A. Introduction

The University of Pennsylvania is committed to providing a safe and healthy environment, free of gender-based misconduct, to all members of our community and visitors to our community. As such, sexual harassment, sexual assault, sexual violence, relationship violence, and stalking will not be tolerated. In order to ensure the creation of a climate where students are able to thrive and achieve their full potential, the University has developed a wide range of policies, educational programs, broad-based resources, support, and reporting systems. This amendment to the Student Disciplinary Charter supplements these other policies and initiatives, addressing the process by which complaints against an enrolled University student for a violation of the Sexual Misconduct Policy (which includes its Sexual Harassment and Sexual Violence, Relationship Violence, and Stalking Policy (“Sexual Violence Policy”)) will be adjudicated and resolved.

(OAA/EOP), and Division of Recreation and Intercollegiate Athletics (DRIA).
4. Timeframe for Submitting a Complaint

The University does not limit the timeframe for filing a report of a violation of the Sexual Misconduct Policy. Reports may be filed at any time, although the University’s ability to investigate or take any action may be limited by the passage of time or the matriculation status of the alleged respondent.

5. Complainant Request for Confidentiality

The University is required by Title IX to weigh the complainant’s request for confidentiality/privacy with the University's commitment to provide a reasonably safe and nondiscriminatory environment. In situations where a complainant requests confidentiality, the University's ability to investigate and respond to the allegations may be limited. The IO will notify the complainant if the University cannot, in unusual cases, maintain the complainant’s confidentiality/privacy. The complainant’s and respondent’s identities will only be revealed to those individuals who need to know their names in order to investigate or adjudicate the complaint or provide interim measures. If the University becomes aware of a pattern of behavior by one or more respondents, the University will take appropriate action in an attempt to protect the University community.

D. Investigation and Resolution of Complaints

1. Timely Resolution

Where possible, the process of resolving complaints, exclusive of any appeal, should be completed within 60 business days of the filing of the written complaint. The appeal should be completed, where possible, within 30 business days of the filing of the appeal.

In the event that a Hearing Panel is convened, the complainant and the respondent will both be provided with a copy of the decision of the Panel and given 10 business days to file an appeal.

2. Rights and Protections for Complainant and Respondent

(a) The complainant and respondent have the right to a process that is fundamentally fair, and free of bias or prejudice.

(b) The complainant and respondent have the right to be treated with respect, dignity, sensitivity, and fairness throughout the entire process. They are both entitled to seek support from the University and to be informed about the process both before the process is initiated and throughout the process as it unfolds.

(c) Both parties have the right to participate in the process, or to refrain from participation. The failure to participate will not be used as evidence against either party, but also will not prevent the process from proceeding unless the complainant withdraws the complaint and the University determines to abide by that request or the respondent withdraws from the University.

(d) Both parties may have a lawyer or other advisor present when being interviewed by the Investigative Team and the Hearing Panel, but the lawyer or other advisor will not be permitted to present statements, seek the production of evidence, or question any witnesses.

(e) Evidence of prior sexual conduct by the complainant or respondent with other partners will not ordinarily be considered in the process, and any evidence of a prior sexual relationship between the parties will not be determinative of the issue of consent.

(f) If there is credible evidence of a pattern of violations of the Sexual Misconduct Policy, that evidence may be considered by the Hearing Panel if there is a finding of responsibility and a sanction is being determined.

(g) While the process is underway, the Vice Provost for University Life (VPUL) will work with the complainant and respondent, ensuring support is provided to both parties. VPUL will also be responsible for implementing interim measures to protect the parties, or any of the witnesses, consistent with principles of fairness, including implementing measures regarding housing, academic accommodations and scheduling changes, no contact orders, and any other appropriate actions to protect the parties or any of the witnesses.

3. Preliminary Determination

Upon receiving a complaint, the IO will make a preliminary determination as to whether the complaint falls within the purview of a Sexual Misconduct Policy and whether, on its face, there appears to be a sufficient basis to conduct a full investigation. In making this determination, the IO may interview the complainant and the respondent (after advising the respondent of the allegations in writing) and conduct whatever preliminary investigation the IO deems necessary to determine if the actions alleged in the complaint would, if true, constitute a violation of the University’s Sexual Violence Policy and there is a reasonable basis for investigating the charges. If the IO concludes there is insufficient basis to proceed, the matter will be concluded, and the parties so advised.

4. Investigation

If the IO makes the determination that there is a sufficient basis to proceed, the IO will issue a Statement of Charge Letter, based on the complaint and any preliminary investigation conducted. The Charge Letter will be provided to the complainant and the respondent. The respondent will be provided the opportunity to respond in writing to the Charge, and any response will be shared with the complainant.

The IO will lead a thorough and fair investigation, assisted by one or more coinvestigators who may come from the School of the complainant or respondent or from elsewhere in the University (the “Investigative Team”). The coinvestigator(s) will be University administrators or faculty members appropriately trained to investigate and handle sexual misconduct cases who are selected for individual cases by the IO. The investigation will include interviews of the complainant and respondent, interviews of witnesses, and review of documentation, physical evidence, and any other relevant evidence.

Prior to interviews, the complainant, the respondent, and any relevant witnesses will be informed by the IO that statements they make during the process may be admissible in concurrent or subsequent civil or criminal court proceedings, and will accordingly also be informed of their rights as outlined in Section D.2(c) above. They will also be reminded of the consequences of making false statements to the IO under the Code of Student Conduct and the Charter of the University of Pennsylvania Student Disciplinary System. The complainant and respondent may have their advisors’ and/or or outside counsel present for their interviews, but the advisors or outside counsel will not be permitted to participate in the interview other than to provide advice to the student, and they may be excluded from the interview for disruptive behavior.

In conducting the investigation, the Investigative Team may, as appropriate, also consult with other campus officials including but not limited to administrators in the relevant School, Division of Public Safety, the AVP and Title IX Officer, Senior Vice President for Institutional Affairs and Chief Diversity Officer, or the Vice Provost for University Life. The Investigative Team may also consult with the Office of General Counsel, who may determine in particular cases to engage outside counsel to
assist the University throughout this process. The Investigative Team may engage forensic and other experts, as needed.

5. Investigative Report
At the conclusion of the investigation, the Investigative Team will prepare a draft factual investigative report, including assessments of credibility, a recommended finding as to responsibility, and recommended sanctions, if appropriate. In making the responsibility determination, the Investigative team will use a “preponderance of the evidence” standard. In other words, to find a student responsible for violating the Sexual Misconduct Policy, the Investigative Team must be convinced that it is more likely than not that a violation of the Sexual Misconduct Policy has occurred.

(a) Opportunity for Review and Comment
The draft investigative report will be provided to both the complainant and respondent for review and comment, under strict instructions that the draft report is confidential, and not to be shared with anyone other than their families and advisors, who must be members of the University community and/or outside counsel, as described above. Sharing of the report by either party, their families, advisors or outside counsel with any additional persons is strictly prohibited. The complainant and respondent will also be provided the opportunity to review the underlying evidence and witness statements with their advisors, but they will not be provided copies. The complainant and the respondent will be given the opportunity to respond to and comment on the draft investigative report in writing.

(b) Final Report
As a result of the response and comments received, the Investigative Team may conduct a further investigation and/or amend the draft report, if the Team determines either action to be warranted. The Investigative Team will prepare a final investigative report, incorporating any changes they believe are appropriate, and then share it with the complainant and the respondent. The complainant and respondent may submit formal objections or comments to the final report, which will become part of the final report of the matter.

6. Resolution Without a Hearing
The matter may be resolved at this stage if both parties agree to the recommendations of the Investigative Team with respect to responsibility and, if applicable, sanctions, or if the parties otherwise reach a mutually acceptable resolution. The University, however, will not compel either the complainant or the respondent to engage in face-to-face mediation or to accept the recommendations of the Investigative Team.

7. Hearing Panel
If the matter is not resolved at this stage in a mutually acceptable manner, either party may request a hearing before a Hearing Panel (Panel) within 10 business days of transmission of the final report.

(a) Panel Membership
The Panel will be comprised of three (3) faculty members and the Disciplinary Hearing Officer (DHO), who will be a non-voting member. The DHO will make all decisions about the organization of the Panel, including decisions regarding the admissibility of evidence, witnesses to appear before the Panel, or any additional decisions regarding the administration of the hearing process.

Membership of the Panel, including the DHO, will observe the following guidelines:

1. Members will be selected from a pool of faculty who have agreed to serve for a term of one or more years.
2. Only mixed-gender panels that have received training in handling complaints involving sexual misconduct will hear sexual misconduct cases.
3. Faculty comprising the Panel should be from academic departments in which neither of the parties is enrolled in a course of study, and no faculty member should serve on the Panel who has a mentoring relationship or other personal relationship with either of the parties.
4. Faculty asked to serve should recuse themselves or be dismissed if they have any personal ties to either of the parties or to individuals with whom the parties are closely associated, or if they have prior personal knowledge of the alleged incident of sexual misconduct.
5. The University will train members of the pool to fulfill their responsibilities as adjudicators according to the procedures and policies outlined here and to ensure compliance with Title IX and other applicable state and federal guidelines. In addition, the Panel will be provided with “just in time” training on adjudicating sexual misconduct cases.
6. The IO may not serve on the Panel; however, the IO may be interviewed by the Panel regarding the investigation and may assist the DHO as needed in organizational and administrative matters related to the Panel.
7. The complainant and respondent will be notified of the membership of the Panel in advance of the Hearing. Any challenges for cause against individual Panel members must be made promptly so as not to delay the conduct of the Hearing and will be given serious consideration by the DHO to ensure impartiality of the proceedings.
8. All proceedings must be kept strictly confidential among the parties, witnesses and members of the panel. All individuals involved in such hearings must agree to such conditions of confidentiality.

(b) Hearing Procedures
Hearings must be prompt, fair, and impartial, affording the complainant’s allegations and the respondent’s defenses all due consideration and protecting the rights of both parties. The Panel will review the Investigative Team’s final report, including any response, objections, or comments provided by the complainant or respondent. The Panel will also carefully review the evidentiary record, including witness statements, documents, and physical evidence.

Hearing Panel Interviews
The Panel will interview separately the IO (and co-investigator(s) if the Panel so chooses), the complainant, and the respondent. The Panel will, whenever possible, provide the complainant and respondent with 10 days advance notice of the Hearing. If reasonably possible, interviews will be conducted on one day, but if such scheduling would require an unreasonably long delay, or if such scheduling would unreasonably delay the proceeding, the hearing may be scheduled over multiple days.

The Panel may seek additional evidence from the IO and interview key witnesses on whom the IO relied in drawing his or her conclusions, as well as request additional evidence from the IO to clarify the evidentiary record, provided that it can do so without unreasonably delaying the process. In the event that a new witness comes forward during the Hearing who was not originally interviewed by the IO, or new evidence is discovered after the IO has issued his or her report, the DHO may allow that witness to testify or admit the evidence to the hearing, but only if the DHO judges the new witness or evidence to be highly relevant to an accurate and fair determination of the outcome.

1. The Hearing will be held in private, and only the Panel may conduct interviews. Only the person interviewed (and that person’s advisor or
outside counsel, as applicable) will be present at the Hearing during interviews. The complainant or respondent (and their advisor or outside counsel, as applicable) will be able to view testimony from separate rooms, upon request, via closed-circuit television or similar video transmission.

2. Subject to the Rights and Protections set forth in Section D.2 above, the Panel has wide latitude when questioning the complainant, the respondent, and any witnesses in order to determine the accuracy of the final report.

3. The complainant and respondent may propose witnesses and provide specific questions in advance that they believe important to ask of other parties or witnesses. The DHO, in consultation with the Panel, will determine the relevance as well as the appropriateness of witnesses and questions, and may accordingly place restrictions on, include, or exclude witnesses or other information.

4. When the Panel is conducting the interview of the complainant and respondent, each student may bring an advisor or outside counsel with them to provide advice and support, but the advisor or outside counsel will not be permitted to participate in the interview other than to provide advice to the student and may be excluded from the interview by the DHO for disruptive behavior.

5. The interviews by the Panel will be recorded (audio only). No observers will be permitted to make any audio or video recordings.

(c) Hearing Panel Decision

After the Hearing concludes, the Panel will immediately deliberate in private to decide whether, by clear and convincing evidence, the respondent has violated the University's Sexual Violence Policy. Clear and convincing evidence means that the Panel must find that substantial evidence has been presented, that the staff member is responsible for a violation of the Policy. A finding of responsibility requires a majority vote of the members of the Panel.

1. If the respondent is found responsible, the Panel will also determine the appropriate sanction, by majority vote, based upon the facts of the case and University precedent, with a presumption in favor of the sanction recommended by the IO.

2. The Panel will arrive at its conclusion as expeditiously as possible and will promptly advise both the complainant and the respondent in writing of its decision with respect to responsibility and, if applicable, sanctions. In keeping with guidelines for timely resolution as provided in Section D.1 above, the written decision will be provided as soon after the conclusion of the proceeding as is possible.

3. Decisions made by the Panel are considered final, subject only to appeal as outlined below.

(d) Appeal of Hearing Panel Decision

Either party may appeal the decision of the Hearing Panel by submitting a written request within 10 business days of transmission of the decision of the Hearing Panel. Letters of appeal should specifically state whether the objection is to the judgment of a violation of University policy, the recommended sanction, or both, and explain in detail the grounds for appeal.

1. The DAO will review the report of the Investigative Team and supporting evidence, the audio record from the Panel Hearing in the discretion of the Appellate Officer, and any other material the DAO deems relevant, in addition to the decision of the Panel in order to ensure that the process was consistent with University policy and that the result was not arbitrary or capricious.

2. After considering the appeal, the DAO will promptly issue his or her decision in writing and will provide copies to the DHO, the Provost, the Senior Vice President for Institutional Affairs and Chief Diversity Officer, the complainant, respondent(s) and other appropriate parties.

E. Resource Offices

1. Confidential Resources

The following can be contacted for support, counseling, and advice:

- **Special Services Department, Division of Public Safety**
  - 24-hour Helpline: (215) 898-6600
  - 4040 Chestnut Street
  - [http://www.publicsafety.upenn.edu/special-services/](http://www.publicsafety.upenn.edu/special-services/)

- **Counseling & Psychological Services (CAPS)**
  - Main Number: (215) 898-7021
  - After-hours emergency number: (215) 349-5490 3624 Market Street, 1st Floor, West
  - [http://www.vpul.upenn.edu/caps/](http://www.vpul.upenn.edu/caps/)

- **Sexual Trauma Treatment, Outreach and Prevention (CAPS)**
  - [http://www.vpul.upenn.edu/caps/sttop.php](http://www.vpul.upenn.edu/caps/sttop.php)

- **Penn Women's Center (PWC)**
  - Main Numbers: (215) 898-8611 and (215) 898-6500
  - 3643 Locust Walk
  - [http://www.vpul.upenn.edu/pwc/](http://www.vpul.upenn.edu/pwc/)

- **Student Health Service (SHS)**
  - Main Number: (215) 746-3535
  - Suite 100, 3535 Market Street
  - [http://www.upenn.edu/shs/](http://www.upenn.edu/shs/)

- **Lesbian Gay Bisexual Transgender Center**
  - Main number: (215) 898-5044
  - 3907 Spruce Street
  - [https://www.vpul.upenn.edu/lgbtc/](https://www.vpul.upenn.edu/lgbtc/)

- **African-American Resource Center**
  - Main number: (215) 898-0104
  - 3643 Locust Walk
  - [http://www.upenn.edu/aarc/](http://www.upenn.edu/aarc/)

- **Office of the Ombuds**
  - (215) 898-8261
  - 113 Duhring Wing, 236 S. 34th Street
  - [http://www.upenn.edu/ombuds/](http://www.upenn.edu/ombuds/)

- **Office of the University Chaplain**
  - Main Number: (215) 898-8456
  - 240 Houston Hall, 3417 Spruce Street
  - [http://www.upenn.edu/chaplain/](http://www.upenn.edu/chaplain/)

- **Penn Violence Prevention**
  - Main number: (215) 746-2642
  - VPUL, 3539 Locust Walk

2. Official Reporting Offices for Sexual Misconduct Complaints

If reports of sexual misconduct are made with or come to the attention of the following offices, they must ensure that appropriate action is taken, including notifying the University's AVP and Title IX Officer:

- **Office of Affirmative Action and Equal Opportunity Programs**
  - (215) 898-6993
F. Investigative Office for Sexual Misconduct Complaints

The official office for reporting, initiating a formal complaint, and investigation of violations of the Sexual Misconduct Policies, including violations of the Sexual Harassment or Sexual Violence Policies, is the Office of the Associate Vice President for Equity and Title IX Officer. The contact information for that Office is:

Associate Vice President for Equity and Title IX Officer
(215) 898-2887
3901 Walnut Street, Suite 320
TitleIXOfficer@upenn.edu

V. Procedures for Resolving Complaints of Sexual Misconduct Against Faculty

A. Introduction

The University of Pennsylvania is committed to providing a safe and healthy environment, free of gender-based misconduct, to all members of our community and visitors to our community. As such, sexual assault, sexual violence, relationship violence and stalking will not be tolerated. In order to ensure the creation of a climate where members of the community are able to thrive and achieve their full potential, the University has developed a wide range of policies, educational programs, broad-based resources, support and reporting systems. These procedures supplement these other policies and initiatives, addressing the process by which complaints against a University faculty member for a violation of the Sexual Misconduct Policy (which includes the Sexual Harassment Policy, Consensual Romantic and Sexual Relations Policy and Sexual Violence, Relationship Violence and Stalking Policy (“Sexual Violence Policy”)) will be adjudicated and resolved.

B. Confidentiality

Confidentiality is of critical importance in ensuring that these sensitive matters are handled appropriately. The University has an obligation to respond to violations of its Sexual Misconduct Policy as fairly and expeditiously as possible when a complaint is received. University staff and faculty may share information with others who have a legitimate need to know in order to fairly and effectively address complaints, but the information should be considered confidential and should be protected to the extent possible consistent with legal obligations. Such administrators may include, for example, those in the Office of the Vice Provost for University Life, the Office of the Associate Vice President for Equity and Title IX Officer (AVP), the Division of Public Safety, the Office of General Counsel, Counseling and Psychological Services, Student Health Service, and academic advising offices.

C. Reporting Complaints of Violation of the Sexual Misconduct Policy

The Office of the Associate Vice President for Equity and Title IX Officer (AVP) will be responsible for overseeing all complaints made against University faculty member, instructor, post-doctoral fellow or trainee, or teaching assistant (“faculty member”) for violations of the Sexual Misconduct Policy (including the Sexual Harassment and Sexual Violence Policies). Complaints should be lodged with the AVP who will ensure that complaints are investigated by a trained Investigative Officer (IO), who will select a co-investigator to form the Investigative Team. The Investigative Team will consult with the appropriate Dean, or in any case for which the Dean has an actual or appearance of a conflict of interest or simpliciation in the complaint, the Vice Provost for Faculty.

1. Office of the Associate Vice President for Equity and Title IX Officer

Complaints must either be presented in writing or based on information provided by the complainant or another individual making the report who will then memorialize the allegations in writing and ask the complainant to confirm them. Complainants may include University students, staff, or faculty members, as well as others both within and outside the University community, alleging a violation of the Policy by a University faculty member.

(a) Sexual Harassment/Consensual Romantic

If the AVP determines that the complaint involves a possible violation of the Sexual Harassment Policy, or Consensual Romantic or Sexual Relation and not the Sexual Violence, Relationship Violence or Stalking Policy, the complaint will be investigated by an IO. The facts, conclusions, and recommendations reached by the IO will be reported to the Dean of the applicable school who may seek an informal resolution, if appropriate, or initiate the University’s Procedure Governing Sanctions Taken Against Members of the Faculty. (Faculty Handbook II.E.16).

(b) Sexual Violence, Relationship Violence, and Stalking

If the AVP determines that the complaint involves a possible violation of the Sexual Violence Policy, the procedures outlined below in Section D of this policy will apply.

2. Office of the District Attorney and Office for Civil Rights

Complainants may also choose to file a report with the District Attorney, the Office for Civil Rights of the U.S. Department of Education, or other external agencies. The University’s processes and the legal system are independent of one another, and the University has its own interest in, and responsibility for, the enforcement of its Sexual Violence Policy. Therefore, the University will not unilaterally defer its processes pending the outcome of a criminal process, nor will the outcome of any legal process be determinative of the University result. The University will, however, comply with reasonable requests by law enforcement for cooperation, and may suspend its fact-finding process in a sexual misconduct investigation so as not to impede the law enforcement process.

3. Support, Counseling and Advice

In making a decision about whether to file a sexual violence complaint, complainants may seek support, counseling and advice from other offices on campus. A list of these offices is provided in Section E below.
Should the complainant determine to proceed with an on-campus complaint investigation and resolution process against a University faculty member, the Office of the AVP will be the single place to initiate the process.  

4. Timeframe for Submitting a Complaint
The University does not limit the timeframe for filing a sexual misconduct complaint. Reports may be filed at any time, although the University’s ability to investigate or take action may be limited by the passage of time, changes in the employment relationship of the alleged respondent at the time the report is made, or other circumstances.

5. Complainant Request for Confidentiality
The University is required by Title IX to weigh the complainant’s request for confidentiality/privacy with the University’s commitment to provide a reasonably safe and nondiscriminatory environment. In situations where a complainant requests confidentiality, the University’s ability to investigate and respond to the allegations may be limited. The IO will notify the complainant if the University cannot, in unusual cases, maintain the complainant’s confidentiality/privacy. The complainant’s and respondent’s identities will only be revealed to those individuals who need to know their names in order to investigate or adjudicate the complaint or provide interim measures. If the University becomes aware of behavior or a pattern of behavior by one or more respondents, the University will take appropriate action in an attempt to protect the University community.

D. Investigation and Resolution of Complaints of Sexual Violence

1. Timely Resolution
The process of resolving complaints, not including any appeal, should be completed, where practicable, within 60 business days of the filing of the written complaint. The appeal should be completed, where practicable, within 30 business days of the filing of the appeal. In the event that a Hearing Panel is convened, the complainant and the respondent will both be provided with a copy of the decision of the Panel and given 10 business days from the date of the transmittal of the Hearing Panel’s decision to file an appeal.

2. Rights and Protections for Complainant and Respondent
(a) The complainant and respondent have the right to a process that is fundamentally fair, and free of bias or prejudice.
(b) The complainant and respondent have the right to be treated with respect, dignity, sensitivity and fairness throughout the entire process. They are both entitled to seek support from the University and to be informed about the process both before the process is initiated and throughout the process as it unfolds.
(c) Both parties have the right to participate in the process, or to refrain from participation. The failure to participate will not be used as evidence against either party, but also will not prevent the process from proceeding unless the complainant determines to withdraw the complaint and the University determines to abide by that request.
(d) Both parties may have an advisor, who may be their lawyer, present when being interviewed by the Investigative Team and the Hearing Panel, but the lawyer or other advisor will not be permitted to present statements, seek the production of evidence, or question any witnesses. Advisors must be a member of the University community, unless the advisor is serving as legal counsel to one of the parties.

(e) Evidence of prior sexual conduct by the complainant or respondent with other partners will not ordinarily be considered in the process, and any evidence of a prior sexual relationship between the parties will not be determinative of the issue of consent.
(f) If there is credible evidence of a pattern of violations of the Sexual Misconduct Policy, evidence that helps to establish such a pattern may be considered by the Hearing Panel.
(g) While the process is underway, appropriate interim measures will be taken to protect the parties. If both the complainant and the respondent are faculty members, the Dean(s) of the school(s) to which the faculty members have appointments—or the Dean(s)’ designee(s)—would work with the complainant and respondent, ensuring support is provided to both parties, and implementing interim measures to protect the parties, consistent with principles of fairness. In the event that the complainant is a staff member or a student, the Dean of the School to which the respondent has an appointment—or the Dean’s designee—will work with Human Resources (for staff members) and the Vice Provost for University Life (for students) to implement interim measures.

3. Preliminary Determination
Upon receiving a complaint, the AVP will make a preliminary determination as to whether the complaint on its face appears to be a sufficient basis to conduct a full investigation. In making this determination, the AVP may interview the complainant and the respondent (after advising the respondent of the allegations in writing) and conduct whatever preliminary investigation the AVP deems necessary to determine if the actions alleged in the complaint would, if true, constitute a violation of the University’s Sexual Violence Policy and there is a reasonable basis for investigating the charges. If the AVP concludes there is insufficient basis to proceed, the matter will be concluded, and the parties so advised.

4. Investigation
If the AVP makes the determination that there is a sufficient basis to proceed, an IO will be assigned to conduct the investigation. The IO will issue a Statement of Charge Letter, based on the complaint and any preliminary investigation conducted. The Charge Letter will be provided to the complainant and the respondent. The respondent will be provided the opportunity to respond in writing to the Charge, and any response will be shared with the complainant. The Dean of each school to which the respondent faculty member has an appointment will also receive a copy of the Charge Letter.

The IO will lead a thorough and impartial investigation, assisted by one or more co-investigators who may come from the School of the complainant or respondent or from elsewhere in the University (the "Investigative Team"). Co-investigator(s) will be University staff or faculty members appropriately trained to investigate and handle sexual misconduct cases who will be selected for individual cases by the IO. The investigation will include interviews of the complainant and respondent, interviews of witnesses as well as review of documentation, physical evidence and any other relevant evidence.

Prior to interviews, the complainant, the respondent and any relevant witnesses will be informed by the IO that statements they make during the process may be admissible in concurrent or subsequent civil or criminal court proceedings. Accordingly, the parties and witnesses will be informed of their rights as outlined in Section D2 above. The parties will be advised of the seriousness of the proceeding and the expectation that the information they provide is both accurate and complete. Any false or misleading statements may subject the party making such
statements to proceedings under the applicable University policy, handbook, code and/or charter. The complainant and respondent may have their advisors and/or outside counsel present for their interviews, but the advisors or outside counsel will not be permitted to participate in the interview other than to provide advice to the person they have accompanied, and they may be excluded from the interview for disruptive behavior.

In conducting the investigation, the Investigative Team may, as appropriate, also consult with other campus officials including but not limited to administrators in the relevant School(s), the Division of Public Safety, the AVP; the Senior Vice President for Institutional Affairs and Chief Diversity Officer, the Vice Provost for Faculty or the Vice Provost for University Life. The Investigative Team may also consult with the Office of General Counsel, which may determine in particular cases to engage outside counsel to assist the University throughout this process. The Investigative Team may engage forensic and other experts, as needed.

5. Investigative Report

At the conclusion of the investigation, the Investigative Team will prepare a draft factual investigative report, including assessments of credibility, a recommended finding as to responsibility, and recommended sanctions, if appropriate. In making the responsibility determination, the Investigative Team must be convinced that there is substantial evidence that a violation of the Sexual Misconduct Policy has occurred.

(a) Opportunity for Review and Comment

The draft investigative report will be provided to both the complainant and respondent for their prompt review and comment, under strict instructions that the draft report is confidential, and not to be shared with anyone other than their families and advisors, who must be members of the University community and/or outside counsel, as described above. Sharing of the draft report by either party, their families, advisors or outside counsel with any additional persons will be strictly prohibited. The complainant and respondent will also be provided the opportunity to review the underlying evidence and witness statements with their advisors, but they will not be provided with nor permitted to make copies.

(b) Final Report

As a result of the response and comments received, the Investigative Team may conduct a further investigation and/or amend the draft report, if the Team determines either action to be warranted. A final investigative report will be prepared, incorporating any changes, and shared with the complainant and the respondent. The complainant and respondent may submit formal objections or comments to the final report, which will become part of the final report of the matter.

6. Resolution Without a Hearing

The matter may be resolved at this stage if both parties agree to the recommendations of the Investigative Team with respect to responsibility and, if applicable, sanctions, or if the parties otherwise reach a mutually acceptable resolution. The University, however, will not compel either the complainant or the respondent to engage in face-to-face mediation or to accept the recommendations of the Investigative Team.

7. Hearing Panel

If the matter is not resolved at this stage in a mutually acceptable manner, either party may request a hearing before a Hearing Panel (Panel) within 10 business days of transmission of the final report.

(a) Panel Membership

The Panel will be comprised of three (3) faculty members and the Designated Hearing Officer (DHO), who will be a non-voting member. The DHO will make all decisions about the organization of the Panel, including decisions regarding the admissibility of evidence, witnesses to appear before the panel, or any additional decisions regarding the administration of the hearing process. Membership of the Panel, including the DHO, will observe the following guidelines:

1. Members will be selected from a pool of faculty who have agreed to serve for a term of one or more years.
2. Only Panels that have training in handling complaints involving sexual misconduct will hear sexual misconduct cases.
3. Faculty appearing on a Panel may not share an academic department affiliation with either of the parties (e.g., has a faculty appointment or is enrolled in a course of study), nor may any faculty member serve on the Panel who has a professional, academic or personal relationship with either of the parties. Faculty asked to serve must recuse themselves or be dismissed if they have any personal ties to either of the parties or to individuals with whom the parties are closely associated. Faculty with personal knowledge of the alleged incident of sexual misconduct also must recuse themselves or be dismissed.
4. The University will train members of the pool to fulfill their responsibilities as adjudicators according to the procedures and policies outlined here and to ensure compliance with Title IX and other applicable state and federal guidelines. In addition, the Panel will be provided with “just in time” training on adjudicating sexual violence cases, unless the Panel members have recently been trained.
5. No member of the Investigative Team may serve on the Panel; however, any such individual may be interviewed by the Panel regarding the investigation and may assist the DHO as needed in organizational and administrative matters related to the Panel.
6. The complainant and respondent will be notified of the membership of the Panel in advance of the Hearing. Any challenges for cause against individual Panel members must be made promptly so as not to delay the conduct of the Hearing and will be given serious consideration by the DHO to ensure impartiality of the proceedings.
7. All proceedings must be kept strictly confidential among the parties, witnesses and members of the Panel. All individuals involved in such hearings must agree to such conditions of confidentiality.

(b) Hearing Procedures

Hearings must be prompt, fair and impartial, affording the complainant’s allegations and the respondent’s defenses all due consideration and protecting the rights of both parties. The Panel will review the Investigative Team’s final report, including any responses, objections or comments provided by the complainant and/or respondent. The Panel will also carefully review the evidentiary record, including witness statements, documents and physical evidence.

Hearing Panel Interviews

The Panel will interview separately the IO (and co-investigator(s) if the Panel so chooses), the complainant and the respondent. The Panel will, whenever possible, provide the complainant and respondent with 10 days advance notice of the Hearing. If reasonably possible, interviews will be conducted on one day, but if such scheduling would require an unreasonably long day, or if such scheduling would unreasonably delay the proceeding, the Hearing may be scheduled over multiple days. The Panel may seek additional evidence from the IO and interview key witnesses on whom the IO relied in drawing their conclusions, as well as
request additional evidence from the IO to clarify the evidentiary record, provided that it can do so without unreasonably delaying the process. In the event that a new witness comes forward during the Hearing who was not originally interviewed by the IO, or new evidence is discovered after the IO has issued their report, the DHO may allow that witness to be interviewed or admit the evidence to the hearing, but only if the DHO judges the new witness or evidence to be relevant to an accurate and fair determination of the outcome.

i. The Hearing will be held in private, and only the Panel may conduct interviews. Only the person interviewed (and in the case of the parties, that person’s advisor or outside counsel) will be present at the Hearing. The complainant or respondent (and their advisor or outside counsel, as applicable) will be able to view interviews from separate rooms, upon request, via closed-circuit television or similar video transmission.

ii. Subject to the protections set forth in Section D2 above, the Panel has wide latitude when questioning the complainant, the respondent and any witnesses in order to determine the accuracy of the report.

iii. The complainant and respondent may propose witnesses and provide specific questions in advance that they believe important to ask of other parties or witnesses. The parties also may submit questions during the Hearing that they wish to have asked. The DHO, in consultation with the Panel, will determine the relevance as well as the appropriateness of witnesses and questions, and may accordingly place restrictions on, include or exclude witnesses or other information.

iv. When the Panel is conducting the interview of the complainant and respondent, each may bring an advisor or outside counsel with them to provide advice and support, but the advisor or outside counsel will not be permitted to participate in the interview other than to provide advice to the complainant or respondent and may be excluded from the interview by the DHO for disruptive behavior.

ev. The interviews by the Panel will be recorded (audio only). No observers will be permitted to make any audio or video recordings.

(c) Hearing Panel Decision

After the Hearing concludes, the Panel will immediately deliberate in private to decide whether, by clear and convincing evidence, the respondent has violated the University’s Sexual Violence Policy. Clear and convincing evidence means that the Panel must find that substantial evidence has been presented, that the faculty member is responsible for a violation of the Policy. A finding of responsibility requires a majority vote of the members of the Panel.

i. If the respondent is found responsible, the Panel will also recommend an appropriate sanction, by majority vote, based upon the facts of the case and University precedent, with a presumption in favor of the sanction recommended by the IO.

ii. The Panel will arrive at its conclusion as expeditiously as possible and will promptly advise both the complainant and the respondent in writing of its decision with respect to responsibility and, if applicable, recommended sanctions. In keeping with guidelines for timely resolution as provided in Section D1 above, the written decision will be provided as soon after the conclusion of the proceeding as is possible.

8. Sanctions

After a final decision has been rendered by the Panel, the matter is presented to the Dean of the School in which the respondent has a primary appointment for procedures related to sanctions, if applicable. The Dean is provided the final investigative report, along with the Panel’s decision and the appellate decision (if any).

(a) If the respondent is a member of the Standing Faculty, the Dean will follow the procedures described in the Faculty Handbook’s section regarding Procedure Governing Sanctions Taken Against Members of the Faculty (Section II.E.16), as appropriate, to determine what, if any, sanction should be imposed against the respondent based on the determination rendered by the Investigative Team, and if applicable, the Panel, and following the Dean’s consultation with the Vice Provost for Faculty.

(b) If the respondent is a member of the Associated Faculty, the Dean will consider the determination rendered by the Investigative Team, as well as the Panel and consult with the Vice Provost for Faculty before implementing an appropriate sanction.

The matter will be referred to the Provost to determine the appropriate sanction in the event that the Dean is the respondent or if referral to the Provost would create an actual or apparent conflict of interest.

E. Resource Offices

1. Confidential Resources

The following is a list of confidential resources that can be contacted for support, counseling and advice. The information shared with these resources generally will be held in confidence, consistent with the University’s obligation to address complaints of sexual violence, unless the person sharing the information gives his or her consent to the disclosure of that information. The commitment to confidentiality does not preclude the sharing of information among responsible University administrators as needed, including to keep members of the University community safe.

http://www.upenn.edu/ombuds/
The University of Pennsylvania is committed to providing a safe and healthy environment, free of gender-based misconduct, to all members of our community and visitors to our community. As such, sexual harassment, sexual assault, sexual violence, relationship violence, and stalking will not be tolerated. In order to ensure the creation of a climate where members of the community are able to thrive and achieve their full potential, the University has developed a wide range of policies, educational programs, broad-based resources, support, and reporting systems. These procedures supplement these other policies and initiatives, addressing the process by which complaints against a University staff member for a violation of its Sexual Misconduct Policy and its Sexual Harassment Policy and Sexual Violence, Relationship Violence and Stalking Policy (“Sexual Violence Policy”) will be investigated and resolved.

B. Confidentiality

Confidentiality is of critical importance in ensuring that these sensitive matters are handled appropriately. The University has an obligation to respond to violations of its Sexual Misconduct Policy as fairly and expeditiously as possible when a complaint is received. University staff and faculty may share information with others who have a legitimate need to know in order to fairly and effectively address complaints, but the information should be considered confidential and should be protected to the extent possible consistent with legal obligations. Such administrators may include, for example, those in the Office of the Vice Provost for University Life, the Office of the Associate Vice President and Title IX Officer (AVP), the Division of Public Safety, the Office of General Counsel, Counseling and Psychological Services, Student Health Service, and academic advising offices.

C. Reporting Complaints of Sexual Misconduct

1. Office of the Associate Vice President and Title IX Officer

The Office of the Associate Vice President and Title IX Officer (AVP) will be responsible for ensuring that all complaints made against a University staff member alleging a violation of the University’s Sexual Misconduct Policy (which includes the Sexual Harassment or Sexual Violence Policies) are handled appropriately. All AVP responsibilities as described in these procedures will be performed directly by the AVP or by the AVP's designee.

Complaints must either be presented in writing or based upon information provided by the complainant or another individual making the report to the AVP who will then memorialize the allegations in writing and ask the complainant to confirm the allegations. Complaints may be made by University students, staff, or faculty members, as well as others both within and outside the University community, alleging a violation of the Sexual Misconduct Policy by a University staff member.

2. Office of the District Attorney and Office for Civil Rights

Complainants may also choose to file a report with the District Attorney, the Office for Civil Rights of the U.S. Department of Education, or other external agencies. The University’s processes and the legal system work independently of one another, and the University has its own interest in, and responsibility for, the enforcement of its Sexual Violence Policy. Therefore, the University will not unilaterally defer its processes pending the outcome of a criminal process, nor will the outcome of any legal process be determinative of the University result. The University will, however, comply with reasonable requests by law enforcement for cooperation, and may temporarily suspend its fact-finding process in a sexual assault investigation so as not to impede the law enforcement process.

3. Support, Counseling and Advice

In making a decision about whether to file a complaint, complainants may seek support, counseling, and advice from other offices on campus. A list of these offices is provided in Section III below. Should the complainant determine to proceed with an on-campus complaint investigation and resolution process against a University staff member, the Office of the AVP will be the single place to initiate the process.

4. Timeframe for Submitting a Complaint

The University does not limit the timeframe for filing a report of a violation of the Sexual Misconduct Policy. Reports may be filed at any time, although the University’s ability to investigate or take action may
be limited by the passage of time, or by changes in the employment relationship of the alleged respondent at the time the report is made.

5. Complainant Request for Confidentiality
The University is required by Title IX to weigh the complainant’s request for confidentiality/privacy with the University’s commitment to provide a reasonably safe and nondiscriminatory environment. In situations where a complainant requests confidentiality, the University’s ability to investigate and respond to the allegations may be limited. The AVP will notify the complainant if the University cannot, in unusual cases, maintain the complainant’s confidentiality/privacy. The complainant’s and respondent’s identities will only be revealed to those individuals who need to know their names in order to investigate or adjudicate the complaint or provide interim measures. If the University becomes aware of behavior or a pattern of behavior by one or more respondents, the University will take appropriate action in an attempt to protect the University community.

D. Investigation and Resolution of Complaints
The Office of the Associate Vice President for Equity and Title IX Officer (AVP) is responsible for overseeing the informal or formal resolution of all complaints made against a University staff member for a violation of the University’s Sexual Misconduct Policy. Complaints should be lodged with the AVP who will ensure that complaints are investigated by a trained Investigative Officer (IO), who will select a co-investigator to form the Investigative Team. The Investigative Team will consult with the Dean of the School or Vice President of the Division in which the respondent works, or the Vice President for Human Resources in any case for which the Dean or Vice President has an actual or the appearance of a conflict of interest or is implicated in the complaint.

Complaints must either be presented in writing or based on information provided by the complainant or another individual making the report who will then memorialize the allegations in writing and ask the complainant to confirm them. Complainants may include University students, staff or faculty members, as well as others both within and outside the University community, alleging a violation of the University’s Sexual Misconduct Policy by a University staff member.

1. Timely Resolution
The process of resolving complaints, exclusive of any appeal, should be completed, unless there are special circumstances, within 60 business days of the filing of the written complaint. The appeal should be completed, absent special circumstances, within 30 business days of the filing of the appeal.

The complainant and the respondent will both be provided with a copy of the investigative team’s decision and given 10 business days from the date of the transmittal of that decision to file an appeal.

2. Rights and Protections for Complainant and Respondent
(a) The complainant and respondent have the right to a process that is fundamentally fair, and free of bias or prejudice.

(b) The complainant and respondent have the right to be treated with respect, dignity, sensitivity, and fairness throughout the entire process. They are both entitled to seek support from the University and to be informed about the process both before the process is initiated and throughout the process as it unfolds.

(c) Both parties have the right to participate in the process, or to refrain from participation. The failure to participate will not be used as evidence against either party, but also will not prevent the process from proceeding unless the complainant determines to withdraw the complaint and the University decides to abide by that request.

(d) Both parties may have an advisor present when being interviewed by the Investigative Team, but the advisor will not be permitted to present statements, seek the production of evidence, or question any witnesses. Advisors must be members of the University community.

(e) Evidence of prior sexual conduct by the complainant or respondent with other partners will not be considered in the process, and any evidence of a prior sexual relationship between the parties will not be determinative of the issue of consent. If there is credible evidence of a pattern of violations of the Sexual Misconduct Policy, evidence that helps to establish such a pattern may be considered.

(f) While the process is underway, appropriate interim measures will be taken to protect the parties. The Office of Staff and Labor Relations in the Division of Human Resources (or another appropriate office), in consultation with the respondent’s supervisor, will implement interim measures to protect the parties consistent with principles of fairness. The Office of Staff and Labor Relations in the Division of Human Resources (or other appropriate office) will work with the complainant and respondent to ensure that both parties have access to support and assistance during the process.

Sexual Harassment
If the AVP determines that the complaint involves a possible violation of the Sexual Harassment Policy, and not the Sexual Violence, Relationship Violence or Stalking Policy, the complaint will be investigated by an IO, working with the appropriate Dean or Vice President, or in the event of an actual or perceived conflict of interest, the Vice President for Human Resources. The facts, conclusions, and recommendations reached by the IO will be reported to the appropriate Vice President or Dean. In the event of a finding of responsibility for a violation of the Sexual Misconduct Policy, appropriate disciplinary action will be taken.

Any disciplinary action taken against a staff person is subject to appeal by either party in writing to the Vice President for Human Resources (or his or her designee) and the Dean of the School or Vice President of the Division in which the respondent works, who jointly have exclusive jurisdiction to decide appeals.

i. Appeals should be submitted within 10 business days of transmission of the decision of the Investigative Team. Letters of appeal should specifically state whether the objection is to the judgment of a violation of University policy, the recommended sanction, or both, and explain in detail the grounds for appeal.

ii. The Vice President for Human Resources (or his or her designee) and the Dean or Vice President of the School or Division will review the report of the Investigative Team to ensure that the process was consistent with University policy and that the decision was not arbitrary or capricious. Any supporting evidence, and any other relevant materials may also be reviewed by the Vice President for Human Resources (or his or her designee) and the Dean or Vice President of the relevant School or Division at their discretion.

iii. After considering the appeal, the Vice President for Human Resources (or designee) and the relevant Dean or Vice President (or designee) will promptly notify the parties in writing as to whether the Investigative Team’s decision will be upheld or modified. The decision of the relevant
Dean or Vice President and the Vice President for Human Resources will be final.

**Sexual Violence, Relationship Violence, and Stalking**

If the AVP determines that the complaint involves a possible violation of the Sexual Violence Policy, the procedures set forth below will apply.

1. **Preliminary Determination**

Upon receiving a complaint, the AVP will make a preliminary determination as to whether the complaint falls within the purview of the Sexual Misconduct Policy and whether, on its face, there appears to be a sufficient basis to conduct a full investigation. In making this determination, the AVP may interview the complainant and the respondent (after advising the respondent of the allegations in writing) and conduct whatever preliminary investigation the AVP deems necessary to determine if the actions alleged in the complaint would, if true, constitute a violation of the University's Sexual Misconduct Policy (including the Sexual Harassment or Sexual Violence Policies) and there is a reasonable basis for investigating the complaint. If the AVP concludes there is insufficient basis to proceed, the matter will be concluded, and the parties so advised.

2. **Investigation**

If the AVP makes the determination that there is a sufficient basis to proceed, a Statement of Charge Letter will be issued, based on the complaint and any preliminary investigation conducted. The Charge Letter will be provided to the complainant and the respondent. The respondent will be provided the opportunity to respond in writing to the Charge, and any response will be shared with the complainant. The Dean or Vice President of the Division in which the respondent is employed will also receive a copy of the Charge Letter.

The AVP will appoint an Investigative Officer (IO) to lead a thorough and impartial investigation, assisted by one or more co-investigators who may come from the School or Center of one of the parties or from elsewhere in the University (the "Investigative Team"). The co-investigator(s) will be University staff or faculty members appropriately trained to investigate and handle sexual misconduct cases who will be selected for individual cases by the IO. The investigation will include interviews of the complainant and respondent, interviews of witnesses, and review of documentation, physical evidence, and any other relevant evidence.

Prior to interviews, the complainant, the respondent, and any relevant witnesses will be informed by the IO that statements they make during the process may be admissible in concurrent or subsequent civil or criminal court proceedings and will accordingly also be informed of their rights as outlined in Section B above. The parties will be advised of the seriousness of the proceeding and the expectation that the information they provide is both accurate and complete. Any false or misleading statements may subject the party making such statements to proceedings under the applicable University policy, handbook, code and/or charter. The complainant and respondent may have their advisors and/or outside counsel present for their interviews, but the advisors or outside counsel will not be permitted to participate in the interview other than to provide advice to the person they have accompanied, and they may be excluded from the interview for disruptive behavior.

In conducting the investigation, the Investigative Team may, as appropriate, also consult with other campus officials including but not limited to administrators in the relevant Division(s), School(s), Public Safety, the AVP and Title IX Officer, the Senior Vice President for Institutional Affairs and Chief Diversity Officer, or the Vice President for Human Resources. The Investigative Team may also consult with the Office of General Counsel, who may determine in particular cases to engage outside counsel to assist the University throughout this process. The Investigative Team may engage forensic and other experts, as needed.

3. **Investigative Report**

At the conclusion of the investigation, the Investigative Team will prepare a draft report, including assessments of credibility, a finding as to whether there has been a violation of University policy, and, if applicable, recommended disciplinary action. In making a determination regarding responsibility, the Investigative team will use a "clear and convincing evidence" standard. In other words, to find a staff member responsible for violating the Sexual Harassment Policy or Sexual Violence Policy, the Investigative Team must be convinced that it is substantially more likely than not that a violation of the Sexual Misconduct Policy has occurred.

(a) **Opportunity for Review and Comment**

The draft investigative report will be provided to both the complainant and respondent for their prompt review and comment, under strict instructions that the draft report is confidential, and not to be shared with anyone other than their families and advisors, who must be members of the University community and/or outside counsel, as described above. Sharing of the report by either party, their families, advisors or outside counsel with any additional persons will be strictly prohibited and may subject a party who violates this rule to disciplinary action. The complainant and respondent will also be provided the opportunity to review the underlying evidence and witness statements with their advisors, but they will not be provided or permitted to make copies.

(b) **Final Report**

As a result of the response and comments received, the Investigative Team may conduct a further investigation and/or amend the draft report, if the Team determines either action to be warranted. A final investigative report will be prepared, incorporating any changes, and shared with the complainant and the respondent. The complainant and respondent may submit formal objections or comments to the final report, which will become part of the final report of the matter. This determination shall be final unless it is modified, overturned, or otherwise set aside as a result of an appeal.

4. **Resolution Without a Hearing**

The matter may be resolved at this stage if both parties agree to the recommendations of the Investigative Team with respect to responsibility and, if applicable, sanctions, or if the parties otherwise reach a mutually acceptable resolution. The University, however, will not compel either the complainant or the respondent to engage in face-to-face mediation or to accept the recommendations of the Investigative Team.

5. **Hearing Panel**

If the matter is not resolved at this stage in a mutually acceptable manner, either party may request a hearing before a Hearing Panel (Panel) within 10 business days of transmission of the final report.

(a) **Panel Membership**

The Panel will be comprised of three (3) faculty members and the Designated Hearing Officer (DHO), who will be a non-voting member. The DHO will make all decisions about the organization of the Panel, including decisions regarding the admissibility of evidence, witnesses to appear before the panel, or any additional decisions regarding the administration of the hearing process. Members of the Panel, including the DHO, will observe the following guidelines:
1. Members will be selected from a pool of faculty who have agreed to serve for a term of one or more years.

2. Only Panels that have training in handling complaints involving sexual misconduct will hear sexual misconduct cases.

3. Faculty appearing on a Panel may not share an academic department affiliation with either of the parties (e.g., has a faculty appointment or is enrolled in a course of study), nor may any faculty member serve on the Panel who has an professional, academic or personal relationship with either of the parties. Faculty asked to serve must recuse themselves or be dismissed if they have any personal ties to either of the parties or to individuals with whom the parties are closely associated. Faculty with personal knowledge of the alleged incident of sexual misconduct also must recuse themselves or be dismissed.

4. The University will train members of the pool to fulfill their responsibilities as adjudicators according to the procedures and policies outlined here and to ensure compliance with Title IX and other applicable state and federal guidelines. In addition, the Panel will be provided with “just in time” training on adjudicating sexual violence cases, unless the Panel members have recently been trained.

5. No member of the Investigative Team may serve on the Panel; however, any such individual may be interviewed by the Panel regarding the investigation and may assist the DHO as needed in organizational and administrative matters related to the Panel.

6. The complainant and respondent will be notified of the membership of the Panel in advance of the Hearing. Any challenges for cause against individual Panel members must be made promptly so as not to delay the conduct of the Hearing and will be given serious consideration by the DHO to ensure impartiality of the proceedings.

7. All proceedings must be kept strictly confidential among the parties, witnesses and members of the Panel. All individuals involved in such hearings must agree to such conditions of confidentiality.

(b) Hearing Procedures

Hearings must be prompt, fair and impartial, affording the complainant’s allegations and the respondent’s defenses all due consideration and protecting the rights of both parties. The Panel will review the Investigative Team’s final report, including any responses, objections or comments provided by the complainant and/or respondent. The Panel will also carefully review the evidentiary record, including witness statements, documents and physical evidence.

Hearing Panel Interviews

The Panel will interview separately the IO (and co-investigator(s) if the Panel so chooses), the complainant and the respondent. The Panel will, whenever possible, provide the complainant and respondent with five days advance notice of the Hearing. If reasonably possible, interviews will be conducted on one day, but if such scheduling would require an unreasonably long day, or if such scheduling would unreasonably delay the proceeding, the Hearing may be scheduled over multiple days.

The Panel may seek additional evidence from the Investigative Team and interview key witnesses on whom the Investigative Team relied in drawing their conclusions, as well as request additional evidence from the IO to clarify the evidentiary record, provided that it can do so without unreasonably delaying the process. In the event that a new witness comes forward during the Hearing who was not originally interviewed by the Investigative Team, or new evidence is discovered after the Investigative Team has issued their report, the DHO may allow that witness to be interviewed or admit the evidence to the hearing, but only if the DHO judges the new witness or evidence to be relevant to an accurate and fair determination of the outcome.

i. The Hearing will be held in private, and only the Panel may conduct interviews. Only the person interviewed (and in the case of the parties, that person’s advisor or outside counsel) will be present at the Hearing. The complainant or respondent (and their advisor or outside counsel, as applicable) will be able to view interviews from separate rooms, upon request, via closed-circuit television or similar video transmission.

ii. Subject to the protections set forth in Section D2 above, the Panel has wide latitude when questioning the complainant, the respondent and any witnesses in order to determine the accuracy of the report.

iii. The complainant and respondent may propose witnesses and provide specific questions in advance that they believe important to ask of other parties or witnesses. The parties also may submit questions during the Hearing that they wish to have asked. The DHO, in consultation with the Panel, will determine the relevance as well as the appropriateness of witnesses and questions, and may accordingly place restrictions on, include or exclude witnesses or other information.

iv. When the Panel is conducting the interview of the complainant and respondent, each may bring an advisor or outside counsel with them to provide advice and support, but the advisor or outside counsel will not be permitted to participate in the interview other than to provide advice to the complainant or respondent and may be excluded from the interview by the DHO for disruptive behavior.

v. The interviews by the Panel will be recorded (audio only). No observers will be permitted to make any audio or video recordings.

(c) Hearing Panel Decision

After the Hearing concludes, the Panel will immediately deliberate in private to decide whether, by clear and convincing evidence, the respondent has violated the University’s Sexual Violence Policy. Clear and convincing evidence means that the Panel must find that substantial evidence has been presented, that the staff member is responsible for a violation of the Policy. A finding of responsibility requires a majority vote of the members of the Panel.

i. If the respondent is found responsible, the Panel will also recommend an appropriate sanction, by majority vote, based upon the facts of the case and University precedent, with a presumption in favor of the sanction recommended by the IO.

ii. The Panel will arrive at its conclusion as expeditiously as possible and will promptly advise both the complainant and the respondent in writing of its decision with respect to responsibility and, if applicable, recommended sanctions. In keeping with guidelines for timely resolution as provided in Section A above, the written decision will be provided as soon after the conclusion of the proceeding as is possible.

E. Appeals

Either party may appeal the decision of the Hearing Panel by submitting a written request within 10 business days of transmission of the decision of the Hearing Panel. Letters of appeal should specifically state whether the objection is to the judgment of a violation of University policy, the recommended sanction, or both, and explain in detail the grounds for appeal.

1. The Vice President for Human Resources (or designee) and the Dean or Vice President of the School or Division will review the report of the Investigative Team to ensure that the process was consistent with
University policy and that the decision was not arbitrary or capricious. Any supporting evidence, and any other relevant materials may also be reviewed by the Vice President for Human Resources (or designee) and the Dean or Vice President (or designee) of the relevant School or Division at their discretion.

2. After considering the appeal, the Vice President for Human Resources (or designee) and the relevant Dean or Vice President (or designee) will promptly notify the parties in writing as to whether the Investigative Team's decision will be upheld or modified.

F. Resource Offices

1. Confidential Resources

The following is a list of confidential resources that may be contacted for support, counseling, and advice. The information shared with these resources generally will be held in confidence, consistent with the University's obligation to address complaints of sexual violence, unless the person sharing the information gives his or her consent to the disclosure of that information. The commitment to confidentiality does not preclude the sharing of information among responsible University administrators as needed, including to keep members of the University community safe.

Special Services Department, Division of Public Safety
24-hour Helpline: (215) 898-6600

https://www.hr.upenn.edu/workplace-issues/staff-labor-relations

3. Investigative Office for Sexual Misconduct Complaints

The official office for reporting, initiating a formal complaint, and investigation of violations of the Sexual Misconduct Policies, including violations of the Sexual Harassment or Sexual Violence Policies, is the Office of the Associate Vice President for Equity and Title IX Officer. The contact information for that Office is:

Associate Vice President for Equity and Title IX Officer
(215) 898-2887
3901 Walnut Street, Suite 320
TitleIXOfficer@upenn.edu

---

1 The terms “harassment” and “sexual harassment” are used throughout and are defined as a matter of University policy, and are not necessarily identical or limited to the uses of the term in external sources, including governmental guidelines, laws, regulations or legal decisions. Where sexual harassment involves sexual violence, relationship violence, domestic violence and/or stalking, refer also to the University’s Sexual Violence, Relationship Violence and Stalking Policy. This Sexual Harassment Policy, Consensual Romantic & Sexual Relations in the Workplace and Educational Setting and the Sexual Violence, Relationship Violence and Stalking Policy are sometimes referred to together as the “Sexual Misconduct Policies.”

2 For purposes of this policy, “faculty” includes (but is not limited to) standing faculty, clinical faculty, associated faculty, and academic support staff, as well as clinical or lab supervisors, postdoctoral fellows, house staff, residents, graduate and undergraduate teaching assistants, and any other person providing instruction, academic advising, or academic oversight of an enrolled student in any school, course, or program, including summer and off-campus programs, irrespective of geographical location.

3 Academic responsibility” includes (but is not limited to) teaching, grading, mentoring, advising, or evaluating research or other academic activity, participating in decisions regarding funding or other resources, clinical supervision, and recommending for admissions, employment, fellowships, or awards. In this context, students include graduate and professional school students, postdoctoral scholars, and clinical residents or fellows.

4 This procedure amends and supersedes the Charter of the University of Pennsylvania Student Disciplinary System with respect to violations of University policy for behaviors that are defined in the University's Sexual Misconduct Policy. It applies to each of the 12 schools, notwithstanding the existence of separate procedures that individual schools may have adopted for violations of laws or policies other than the University Sexual Misconduct Policy. If a complaint involves allegations of violations of the Sexual Misconduct Policy as well as other University policies, the
matter can either be fully resolved using this process, or divided into two separate proceedings, as appropriate in any particular case.

5 The University recognizes that should it be proceeding in cases where criminal charges are pending, however, the respondents may choose not to participate in the disciplinary process in order to protect their Fifth Amendment rights. Such decision will not be used as evidence against any respondent and the Hearing Panel will be instructed not to draw any adverse inference from the failure to participate.

6 While the IO assigned by the AVP will be responsible for managing the complaint investigation and resolution process, the IO will work with other appropriate University offices, including the Vice Provost for University Life, to determine if interim measures are appropriate before a final resolution is reached.

7 The University will provide a list of advisors from the Penn community to complainants and respondents who have been trained by the University to support both complainants and respondents in this process. The parties need not select an advisor from this list. The parties may select any Penn faculty or staff member to advise them. The parties may also retain outside counsel in addition to, or instead of, using an advisor. The role of outside counsel, however, will be limited to an advisory role and counsel will not be permitted to have an active role in the proceedings.

8 In carrying out these responsibilities, the DHO may consult with the IO, the Office of General Counsel and other appropriate offices such as the Office of Student Conduct and the Senior Vice President for Institutional Affairs and Chief Diversity Officer. University officers thus consulted will respect the confidentiality conditions of the proceedings.

9 The decision as to whether a complaint involves sexual violence is determined by the AVP.

10 The University recognizes that in the event criminal charges are pending, a respondent may choose not to participate in the process described in these procedures in order to protect his or her Fifth Amendment rights. Such decision will not be used as evidence against any respondent and the Hearing Panel will be instructed not to draw any adverse inference from the failure to participate.

11 While the AVP will be responsible for managing the complaint investigation and resolution process, the IO will work with other appropriate University offices, including the Vice Provost for University Life and the Vice Provost for Faculty, to determine if interim measures are appropriate.

12 The University will provide a list of advisors from the Penn community to complainants and respondents. Advisors will be offered training by the University to support both complainants and respondents in this process. The parties need not select an advisor from this list. The parties may select any Penn faculty or staff member to advise them, but they will not have an active role in the proceedings. The parties may also retain outside counsel in addition to, or instead of, using an advisor. Only one advisor (either a lawyer or a member of Penn’s faculty or staff) may be present during the hearing and related proceedings. The role of the outside counsel, however, will be limited to an advisory role and counsel will not be permitted to have an active role in the proceedings.

13 The parties will be advised, and acknowledge, that the Investigative Report, Exhibits and Drafts are confidential to be used by them and their families and advisors in connection with these proceedings.

14 In carrying out these responsibilities, the DHO may consult with the IO, the Office of General Counsel and other appropriate offices such as the Vice Provost for Faculty and the Senior Vice President for Institutional Affairs and Chief Diversity Officer. University officers thus consulted will respect the confidentiality conditions of the proceedings.

15 The University recognizes that should it be proceeding in cases where criminal charges are pending, the respondents may choose not to participate in the process described in these procedures in order to protect their Fifth Amendment rights. Such decision will not be used as evidence against any respondent and the Hearing Panel will be instructed not to draw any adverse inference from the failure to participate.

16 While the Investigative Officer will be responsible for managing the complaint investigation and resolution process, as described below, the AVP will work with other appropriate University offices, including the Office of Affirmative Action and Equal Opportunity Programs and Division of Human Resources, to determine if interim measures are appropriate before a final resolution is reached.

17 The University will provide a list of advisors from the Penn community to complainants and respondents. Advisors will be offered training by the University to support both complainants and respondents in this process. The parties need not select an advisor from this list. The parties may select any Penn faculty or staff member to advise them, but they will not have an active role in the proceedings. The parties may also retain outside counsel in addition to, or instead of, using an advisor. The role of the outside counsel, however, will be limited to an advisory role and counsel will not be permitted to have an active role in the proceedings.

18 In carrying out these responsibilities, the DHO may consult with the IO, the Office of General Counsel and other appropriate offices such as the Vice Provost for Faculty and the Senior Vice President for Institutional Affairs and Chief Diversity Officer. University officers thus consulted will respect the confidentiality conditions of the proceedings.

Student Activities Council Funding Policies and Guidelines for Student Groups

Funding Policies for Student Groups
(The following policies are binding and must be adhered to by the Student Activities Council Executive Committee)

1. While determination may be made that organizations or activities are not eligible for funding, decisions on whether or not an organization or activity is denied funding will not be based on the content of the speech or expression of such organization or activity.

2. A student activity or program that is designed to support or oppose a particular party or candidate or to influence legislation will not be funded.

3. In accordance with University guidelines, Student Activities or programs designed to elicit support for religious ideologies and promote membership in sectarian groups will not be funded.
4. All activities must file and maintain complete capital equipment inventories with the Office of Student Life. This should be submitted in the beginning of the year with the annual registration form.
5. All activities are held responsible for full disclosure of all financial actions of the group to the Executive Committee (especially changes or planned changes in usage of allocated funds) upon penalty of immediate forfeiture of all funds remaining in their accounts.
6. All funded activities must maintain their own set of books upon penalty of immediate forfeiture of all funds remaining in their accounts. These should be available to the Executive Committee upon request.
7. Executive Committee members intimately connected with a student organization must declare their affiliations with these activities and may not vote on the allocations of that particular student activity. Furthermore, they may not attempt to influence the other Executive Committee members. They may function only as resource people.
8. No organization shall enter into any contract without the written consent of the Director of OSL or designee. Moreover, all monies involved must first be approved by the Executive Committee.
9. All activities must submit reports on the activities sponsored by the organizations during the previous year as a part of their annual report requirements.

Examples of programs or activities not eligible for funding under these criteria include:

1. College Democrats, College Republicans, or other groups designed to support a political party;
2. A student activity that is designed to or does in fact campaign on behalf of a candidate for public office or participate in a political campaign. For example, Students for Smith or Congress;
3. An activity designed to influence legislation.

These criteria would not prohibit funding a political forum at which different viewpoints are expressed.

**Funding Guidelines for Student Groups**
(These guidelines are not binding on the Student Activities Council Executive Committee)

1. Duplication in activities will be eliminated; the better program in the Committee’s judgment will be funded.
2. No mailings (summer or otherwise) will be funded.
3. Meal subsidies for members of student activities will not be funded.
4. Publications will be required to collect 25% of their total budgeted operation through advertising or other revenue. If this is not done, the Executive Committee will freeze the account. Any changes in the status of a publication (e.g., dates, issue size, copies printed) must be reported to the Executive Committee Liaison.
5. All publications printing more than one issue per academic year must submit a schedule of distribution dates to the Executive Committee with their annual budget request. Complete copy for each issue must be submitted to the printer at least three weeks prior to the date of distribution. Failure to meet this requirement will result in the cancellation of one issue. Under no circumstances may a publication submit copy after April 1st or distribute an issue after the third week of April.
6. No individual can be paid a salary or wage for services which can or should be rendered by a student.

7. All capital equipment allotted to an activity must be stored in a University facility.
8. Concerning conferences and travel for non-competitive groups, travel will be funded ONLY if a group provides proof that said travel is essential to the operation of that group (e.g., required by national charter or necessary for national membership). In this case, only one-half of all travel and lodging will be funded. In this case, only one-half of all travel and lodging or $250 per person for travel and lodging will be funded.
9. No funding will be given for SAC student-run conferences. All cost must be covered in the conference registration fees (or by other sources of income).
10. The cost of printing tickets for all events should be covered in the price of the tickets.
11. No funding will be given for printing of Newsletters.
12. If a SAC-paid director or coach requests his/her salary before the normal end of semester pay date, he/she may be paid 20% of the total semesterly salary. The remaining 80% will be paid at the semester’s end.
13. Any group seeking to bring a speaker must approach Connaissance for co-sponsorship before approaching the Executive Committee. The Executive Committee will not fund speakers if the speaker is specific to a group’s the organization during the previous year as a part of their annual budget requests.

Federal law requires the University to designate an employee to coordinate its compliance, including the investigation of complaints with Title VI of the Civil Rights Act of 1964, Title IX of the Education amendments of 1972, and the Rehabilitation Act of 1973. In addition, the
University is required to have procedures for the resolution of student and employee grievances alleging violations of these laws.

Any student in the University who feels that he or she has been discriminated against by an individual or office acting for the University or that the University is not complying with the requirements of Title VI, Title IX, or the Rehabilitation Act, has a right to register a complaint and seek redress of his or her grievance. The student may take his/her complaint to the following University offices:

**Office of Affirmative Action & Equal Opportunity Programs**

The Office of Affirmative Action and Equal Opportunity Programs monitors the University’s equal opportunity/affirmative action policies and programs. The Office also is responsible for coordinating complaints with non-discrimination laws (including investigating complaints and coordinating programs for the disabled). The OAA staff is available to consult with faculty, staff, students, and members of the community who have questions or concerns regarding the application or possible violation of these policies, Title VI or Title IX. The Office is located at

3600 Chestnut Street  
Sansom Place East  
Suite 228  
Philadelphia, PA 19104  
215-898-6993

In addition to the description of duties given earlier, the Office of Affirmative Action is also responsible for coordinating complaints with non-discrimination laws, including investigating complaints and coordinating programs for the disabled. The OAA staff is available to consult with faculty, staff, students, and members of the community who have questions or concerns regarding the application or possible violation of these policies, Title VI or Title IX.

**Other Grievance Procedures**

**Academic Grievances**

Schools and academic departments within the University have established procedures for the resolution of student grievances concerning academic matters. Students should contact the Dean’s Office of the particular school for a copy of the appropriate procedures and for guidance regarding the grievance process. A student who wishes to register a grievance regarding the evaluation of his/her academic work should follow the academic grievance procedure applicable in the school or department in which the academic work was performed.

- School of Arts and Sciences (https://www.sas.upenn.edu/graduate-division/resources/academic-grievance-procedure) & Professional and Liberal Education
- Biomedical Graduate Studies (http://www.med.upenn.edu/bgs/documents/ExpectationsofStudents2015.pdf), PSOM Section V
- School of Engineering and Applied Science (http://www.seas.upenn.edu/graduate/handbook/student-ethics.php) Part D

- School of Law (https://www.law.upenn.edu/students/policies/grades-review-of-courseseminar-requirements.php)
- School of Nursing (https://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/phd-handbook)
- School of Social Policy and Practice (http://www.sp2.upenn.edu/resources/masters-student-handbook/student-rights-and-responsibilities)
- School of Veterinary Medicine (https://inside.vet.upenn.edu/docs/default-source/bulletindocs/2015_2016pennvethandbook-03_24_2016.pdf?sfvrsn=0v)

**Administrative and Employment Grievances**

Students with administrative grievances should contact the Office of the Vice Provost for University Life, 3611 Locust Walk, 215-898-6081. Students with grievances related to their appointment as a teaching assistant, research assistant, or graduate assistant should contact their Dean’s Office or the Vice Provost for Education, 215-898-7225.

**Suspension of Normal Operations**

Although Penn normally never stops operating, emergencies such as severe weather conditions may sometimes result in the cancellation of classes and/or the full or partial closure of certain areas of the University. Decisions affecting work schedules and class cancellation are made by the Executive Vice President in consultation with the Provost.

The University will announce a closing or other modification of work schedules through the following means:

- the University’s emergency information number: (215) 898-6358 (215-898-MELT)
- communications from Division of Public Safety
- KYW News Radio (1060 AM)
- the UPennAlert Emergency Notification System (for University related incidents and crises)

The University’s emergency radio identification code numbers are “102” for day classes and schools/centers and “2102” for evening classes. The message that accompanies the code number will provide the operating status of the University. Make sure to keep this emergency information in a place you can easily access.

Even when Penn is officially closed due to an emergency, there are some essential services that must still be provided, such as Public Safety or Facilities. Staff members in essential positions are still required to work as normally scheduled under these circumstances.

More information on suspension of normal operations is available online at https://www.hr.upenn.edu/policies-and-procedures/policy-manual/other-policies/suspension-of-normal-operations-(formerly-emergency-closing-policy).

**Tobacco-Free Campus Policy**

The University of Pennsylvania is committed to maintaining a healthy and safe learning, working and living environment for all members and guests of our community. It therefore is the policy of the University of Pennsylvania...
Pennsylvania that all smoking and tobacco use (including the use of smokeless tobacco) is prohibited in all University buildings and facilities, including but not limited to any meeting rooms, community areas, performance venues and private residential space within University of Pennsylvania housing. Smoking and tobacco use is also prohibited in all University of Pennsylvania vehicles (owned or leased), regardless of location. Finally, smoking and the use of tobacco products is prohibited on any University of Pennsylvania property, including but not limited to outdoor spaces (such as College Green, Shoemaker Green, Locust Walk, etc.), as well as parking lots, paths, fields, sports/recreational areas, and stadiums. Where University of Pennsylvania buildings are adjacent to public sidewalks or streets, smoking and the use of tobacco products is prohibited on those public sidewalks and streets within twenty (20) feet of the entrance to the building.

The tobacco policy covers all smoking methods, including but not limited to the use of electronic smoking devices (e-cigarettes, e-cigars, e-pipes) and hookah-smoked products.

Enforcement

Compliance with the applicable law and this policy is the responsibility of all members and guests of the University of Pennsylvania community. Any person with concerns about the implementation of or compliance with this policy should refer the matter to his or her immediate supervisor or manager for resolution. If the matter cannot be resolved at this level, the concern should be referred to the Division of Human Resources, Staff and Labor Relations or the appropriate Dean or Vice President.

Effective Date: 10/1/2017

Unauthorized Copying or Use of Licensed Software

The University of Pennsylvania does not condone or tolerate the unauthorized copying or use of licensed computer software by staff, faculty, or students. The University shall adhere to its contractual responsibilities and shall comply with all copyright laws, and expects all members of the University community to do so as well. Members of the University community who violate this policy may be subject to discipline through standard University procedures. An individual or University department engaged in the unauthorized copying or use of software may also face civil suits, criminal charges, and/or penalties and fines. Subject to the facts and circumstances of each case, such individuals or departments shall be solely responsible for their defense and any resulting liability. If you have questions about the terms and conditions of a software license, please contact the Computing Resource Center at 898-9085.

(Source: Almanac, October 20, 1998 (https://almanac.upenn.edu/archive/v45pdf/981020/102098.pdf))

University of Pennsylvania Nondiscrimination Statement

The University of Pennsylvania values diversity and seeks talented students, faculty and staff from diverse backgrounds. The University of Pennsylvania does not discriminate on the basis of race, color, sex, sexual orientation, gender identity, religion, creed, national or ethnic origin, citizenship status, age, disability, veteran status or any other legally protected class status in the administration of its admissions, financial aid, educational or athletic programs, or other University-administered programs or in its employment practices. Questions or complaints regarding this policy should be directed to:

Executive Director of the Office of Affirmative Action and Equal Opportunity Programs
Sansom Place East
3600 Chestnut Street, Suite 228
Philadelphia, PA 19104-6106
(215) 898-6993 (Voice) or (215) 898-7803 (TDD)

University of Pennsylvania Required Disclosures

The Higher Education Opportunity Act of 2008 requires the University to provide a list of student-related disclosures and policies, as well as information about how to obtain the required information. This information is provided below in a list format with links to the appropriate information.

I. Non-Loan Related Disclosure Requirements

A. Availability of Institutional Financial Aid Information

2. Contact information for assistance in obtaining institutional or financial aid information: http://www.sfs.upenn.edu/contacts/index.htm

B. Student Financial Assistance

1. Student financial aid information: http://www.sfs.upenn.edu/paying/index.htm

C. General Institutional Information

1. Consumer information on College Navigator website: http://nces.ed.gov/collegenavigator/?q=university+of+pennsylvania&s=all&pg=2&id=215062
2. Price of attendance
   - Undergraduate: http://www.sfs.upenn.edu/paying/cost-of-attendance.htm
   - Graduate*: Each graduate/professional school has its own cost of attendance structure. See listing below for links directly to their sites.
3. Net Price Calculator:
   b. http://netpricecalculator.collegeboard.org/participating-schools
4. Refund policy, requirements for withdrawal and for the return of Title IV, HEA financial aid:
   https://catalog.upenn.edu/pennbook/financial-policies/
5. Banking Relationship Disclosures
In compliance with the U.S. Department of Education’s guidelines, Penn makes information on its marketing relationships with financial institutions publically available. Such disclosures can be found on the PennCard website (https://cms.business-services.upenn.edu/penncard/the-penncard-center/services/banking.html). For additional information on banking options visit: http://www.srfs.upenn.edu/banking/index.htm

Graduate/Professional Schools Cost of Attendance (COA):
• Annenberg – No published COA. All students are fully funded with stipends.
• Arts & Sciences – http://www.upenn.edu/provost/graduate_admissions/finance/ (No reference to living expenses)
• Design – http://www.design.upenn.edu/graduate-admissions/tuition-and-financial-aid (No reference to living expenses)

Use of Facilities
The facilities of the University of Pennsylvania exist for the primary purpose of education. Priority for the use of facilities is given first to University academic activities and second to programs of University groups. The decision to permit or restrict the use of facilities by University groups will be based first on the prior academic commitment of that facility, then on prior reservation by another University group. University groups are defined as consisting almost entirely of students, faculty, administrators, staff or alumni of the University, or combination thereof, whose primary activities are based at or directly related to the University. Dates that remain open after the spring and fall calendar processes for University groups may be assigned to approved non-University organizations upon request.

The policy governing the use of University facilities was developed under the auspices of the Committee on Open Expression. Before a request of a University group to use any facility is rejected for reasons other than prior commitment of the facility or the like, the Committee on Open Expression should be consulted.

All groups using University facilities must include in their advertising, promotional materials, and other literature distributed on campus the name of the organization (prominently displayed) and sufficient information about the group and the activities it intends to conduct for readers to understand the group’s purpose. Deceptive advertising,
soliciting, and recruiting practices are prohibited. It is the responsibility of the Director of Student Life to determine whether adequate standards of disclosure are met. Groups failing to comply with this regulation can be denied access to University facilities for as long as the director may determine. The director's decision may be reviewed by the Committee on Open Expression.

Granting of permission to use University facilities does not constitute University endorsement of the activities or purposes of the user group. Unauthorized use of the University's name, other than to indicate the location of an event, is prohibited.

Groups sponsoring activities judged to be unrelated to the University but permissible under the policy governing the use of University facilities will be charged appropriate fees. It is the responsibility of the Director of Student Life to determine whether the activities for which University space is requested are University related. Factors to be considered in making this decision include

1. the relationship to the University of the sponsor and others who are expected to participate,
2. the purpose for which space is requested,
3. whether the activity will promote the objectives of the institution,
4. whether the person(s) organizing and conducting the specific activity is (are) affiliated with the University, and
5. whether the proposed activity will be conducted primarily for the benefit of a group not under the auspices of the University.

In the case where a group wishes to use University facilities on a continuing basis, yet no clear benefit to the institution is accrued by housing proposed activities, substantial ongoing involvement by University students or personnel, or both, is required for such activities to be classified as University related.

I. Reservation Procedures

1. All non-academic events requiring the use of Perelman Quadrangle, performing arts facilities, Blanche Levy Park, Locust Walk other VPUL spaces and Central Pool classrooms must be registered with the Office of the Perelman Quad and VPUL Facilities. Applications for space use should be made with the staff in 307 Houston Hall, or online two weeks in advance.
2. The person, whether or not a member of the University community, who requests the use of a University facility shall be responsible for maintaining the requested facility in good condition.
3. The University reserves the right to reject any request for use of its facilities and to terminate use at any time upon failure of a University group or a non-University organization to comply fully with University policy and safety procedures.
4. Requests must be timely. For example, it is expected that auditoria, large multipurpose spaces, and other large spaces must be reserved with a minimum lead time of one month to ensure adequate provision of facilities resources. Smaller venues of fifty persons or fewer should be reserved a minimum of one week in advance of use.

II. Payment of Charges

1. All groups must agree to pay for incurred costs according to the current schedule of University security, maintenance and service fees.
2. University groups desiring to charge admission to a function must deposit all revenue from such admission charges directly into their University account either to help defray expenses of the program or to support future related on-campus programs. All admissions charges must be reasonable.

III. Admission Charges

1. Because the University is a tax-exempt corporation, the use of its facilities by external, commercial agents should be limited
2. University groups desiring to charge admission to a function must deposit all revenue from such admission charges directly into their University account either to help defray expenses of the program or to support future related on-campus programs. All admissions charges must be reasonable.

IV. Use of Outdoor Spaces

The procedures governing the use of University facilities shall apply to the reservation and use of outdoor spaces belonging to the University, with the recognition that permission may be denied, if noise resulting from an event occurring in an outdoor space may at times interfere and conflict with library, office and classroom activities.

Depending on the location of an outdoor event, on scheduled classes in nearby buildings, and on the proximity of offices in use, non-conflicting activities should be scheduled by prior arrangements with the Perelman Quad and VPUL Facilities staff.

Use of University Name Policy

On September 30, 1791, an act confirmed an agreement which united the University of the State of Pennsylvania with the College, Academy and Charitable School and provided that the name of the institution would be “The Trustees of the University of Pennsylvania.” To facilitate communication both internally and externally, the institution's name is commonly simplified as the “University of Pennsylvania,” or, more recently, “Penn.”

The University regulates use of its name, the names of its schools and programs, its shield and related insignia, trademarks and logos (“insignia”) to ensure that such use is related to the University’s educational, service and research missions and promotes its objectives. Responsibility for overseeing use of the University's names and insignia lies with the Secretary of the University.

Official Use

When representing the University in an official capacity, all units of the University and members of the faculty and administration must use “University of Pennsylvania” in their publications and documents. Approved University stationery must be used for official correspondence. University names and insignia may be used in connection with any academic University program provided that the program has been approved in advance by the responsible department chair and dean or director, and Provost, as appropriate. University units, faculty, staff and student organizations that wish to use University names or insignia in connection with any non-academic University program, activity, service or product must obtain the approval of the Secretary of the University before proceeding. Requests to use University names or insignia must first be presented to the appropriate department chair and dean, director, or, in the case of student organizations, to the Vice Provost for University Life, for review. If approved by the dean, director, or Vice Provost, a request with supporting information must be submitted to the Secretary for review. The Secretary will review the proposed use and determine, in consultation with appropriate colleagues, whether it is properly related to
the University's missions and whether the benefits of the proposed use outweighs any risks associated with the use. The Secretary may approve the proposed use, with or without conditions, or disapprove the proposed use.

**Licensed Uses by Outside Entities**

University names or insignia may be used on products or in connection with services offered by outside entities only under license from the University. Requests for such licenses are processed jointly through the Office of the Vice President for Business Services ("Business Services") and the Penn Center for Innovation ("PCI"), and with guidance from the Office of the University Secretary.

Outside sponsors of University programs or activities often seek to use University names or insignia in promotional or advertising materials. While the University is pleased to recognize the contributions of sponsors, such recognition must not suggest University endorsement of the sponsor's activities. Therefore, University names or insignia may not be used in connection with any outside entity's name or logo without prior approval of the Secretary of the University. In general, the Secretary will approve uses which recognize or acknowledge the sponsor's contribution to the University program or activity. Uses which, in the Secretary's judgment, may suggest University endorsement or approval of the sponsor's goods or services will not be permitted.

**Private Use**

University faculty, staff and students may refer to their affiliation or status with the University in connection with personal activities, including consulting, provided that the affiliation or status is accurately represented and any title or position is accurately identified, and provided that such use does not imply University endorsement of the activity. In some cases, a disclaimer of University endorsement may be required.

Outside sponsors of University programs or activities often seek to use University names or insignia in promotional or advertising materials. While the University is pleased to recognize the contributions of sponsors, such recognition must not suggest University endorsement of the sponsor's activities. Therefore, University names or insignia may not be used in connection with any outside entity's name or logo without prior approval of the Secretary of the University. In general, the Secretary will approve uses which recognize or acknowledge the sponsor's contribution to the University program or activity. Uses which, in the Secretary's judgment, may suggest University endorsement or approval of the sponsor's goods or services will not be permitted.

**Related Policies**

All faculty, staff and students are reminded that University equipment, stationery, campus mail service, and electronic media are to be used solely for University business by authorized University personnel and by officially recognized campus organizations. See Human Resources Policy No. 003 (https://www.hr.upenn.edu/policies-and-procedures/policy-manual/other-policies/uses-of-university-resources). Additional information on faculty and staff involvement in extramural activities and organizations can be found in the Conflict of Interest Policy for Faculty Members, and Human Resources Policy Nos. 005 (https://www.hr.upenn.edu/policies-and-procedures/policy-manual/other-policies/conflict-of-interest) and 006 (https://www.hr.upenn.edu/policies-and-procedures/policy-manual/other-policies/guidelines-for-extramural-activities-associations-and-interest-for-staff).

1 Statutes of the Trustees of the University of Pennsylvania, p. 1.

(Source: Almanac, October 24, 2017 (https://almanac.upenn.edu/uploads/media/102417.pdf))

**Vending Policy**

1. In consideration for the University permitting organization to conduct vending or promotional activities on campus, the applicant organization agrees to fully comply with the University's policies and all applicable, local, state and federal laws, including, but not limited to applicable consumer protection laws.

2. In addition, organization agrees not to discriminate against any employee, student or customer on the basis of race, religion, national origin, gender, sexual preference, age or disability.

3. If the organization is a non-University affiliate, it further agrees to the following terms and conditions:
   a. The University shall not be liable for any injuries to persons or damage to property which organization, other participants or their respective representatives may suffer.
   b. Organization is responsible for any damage to facilities, which might result from its activities.
   c. Organization hereby voluntarily waives and releases any and all claims and causes of action against the University, its trustees, officers, employees, agents and students that arise from or relate to the activities covered by this permit request.
   d. Organization agrees to indemnify, defend and save harmless, the University, its trustees, officers, employees, agents and students from all claims, costs, causes of action, damages, expense and liabilities whatsoever (including attorneys' fees) that arise from or relate to the activities covered by this permit request.
   e. Organization, at its own cost and expense, shall obtain and maintain in force during the period of its activities at the University the following insurance coverage:
      i. A policy of Worker's Compensation insurance, in amounts required by law, covering all officers, employees and agents of the Organization.
      ii. A policy of comprehensive general liability insurance with broad form property damage endorsement, with such policy to afford protection to the limit of One Million Dollars ($1,000,000) with respect to bodily injury or the death of any number of persons in any one occurrence and One Million Dollars ($1,000,000) with respect to the property of any one owner for one occurrence.
     iii. A policy of comprehensive automobile liability coverage covering the operation of all automobiles, whether owned or not by the Organization, used in connection with the performance of this Agreement with such policy to afford protection to the limit of One Million Dollars ($1,000,000) with respect to bodily injury or death of any number of persons in any one occurrence and Five Hundred Thousand Dollars ($500,000) with respect to damage to property of any one owner from one occurrence.

1 Each of these insurance policies shall be issued by insurance companies licensed to conduct business in the Commonwealth of Pennsylvania and shall name the Trustees of the University of Pennsylvania as an Additional Insured except for Worker's Compensation. The Organization shall furnish to the Office of the Vice Provost for University Life or the Office of the Vice President for Business Services a certificate of insurance for each of the above-mentioned policies.
Campus Organizations

Since the University of Pennsylvania is a tax-exempt organization, the use of its indoor and outdoor facilities for the purpose of selling or promoting any product or service must be strictly regulated. Accordingly, the following guidelines have been established:

1. Machine vending inside University buildings falls under the jurisdiction of the Managing Director of Campus Dining and those others to whom that authority has been given. Any other vending is not permitted in accordance with Human Resource Policy #710.

2. The Director of Student Life or designee is responsible for requests from University affiliates and non-University affiliates to conduct vending or promotional activities on Locust Walk between 36th and 37th Streets, Perelman Quadrangle, Hamilton Village and other University Life Facilities.

3. Apart from approved truck vendors, outdoor sales and promotional activities are generally restricted to registered student organizations and University departments who wish to fundraise for their own benefit. Approval for such activities must be obtained from the Office of Student Life. Outside groups or corporations, however, will not normally be permitted to conduct sales and vending or promotional activities on University property under the sponsorship of University groups.

4. Because the profits raised by Penn Student Agencies (PSA) are transferred into the University's funds for student financial aid and other services, PSA should be given exclusive rights or preferential treatment in the selling of certain products or services in the outdoor area of campus. Responsibility for such decisions rests with the Director of Student Life, and at the beginning of each academic year, PSA shall provide the Director of Student Life or designee with a list of those products or services it wishes to sell. The Director will share that information with any other student organizations that may be interested in selling similar products or services.

5. Vending/promotions permits are required for all organizations, registered student groups or departments wishing to sell items or conduct promotional activities in outdoor campus areas. Permits must be approved in writing by an authorized employee of the Vice Provost for University Life for the following areas: Locust Walk between 36th and 37th Streets, Perelman Quadrangle, Hamilton Village and other University Life Facilities, and to the Vice President for Business Services for all other areas and must be shown to any University official, including Public Safety officers, on request. Failure to obtain a vending/promotions permit will result in the vendor's eviction from campus and may result in loss of future privileges.

6. All vending/promotional activities, including ticket sales, credit card applications, etc., will normally be located in the block of Locust Walk between 36th and 37th Streets in order to eliminate traffic congestion elsewhere on campus. Requests to conduct vending or promotional activities in other campus areas may be approved by the Office of Student Life or designee in consultation with other appropriate administrators when unusual circumstances warrant a different location.

7. The distribution of non-commercial handbills or flyers by University groups is generally permitted on Locust Walk as long as the individuals conducting such activities are not impeding traffic, imposing their will on the University community (e.g., forcing people to take handbills), creating a disturbance, or generating an excessive amount of trash. Posting of handbills and flyers is restricted to authorized kiosks and bulletin boards. Individuals or groups are responsible to clean up trash related to their activities.

8. Those who conduct vending or promotional activities on Locust Walk close to classroom or residential buildings are asked to keep the volume of noise to a level that does not interfere with normal University activities. The noise level at such activities must be consistent with the standard. Bullhorns and other forms of sound amplification may not be used unless special permission is received from the Office of Student Life.

9. The Division of Public Safety has the right to challenge anyone conducting vending or promotional activities in any University outdoor area and to require them to obtain permission from the appropriate University office or leave the campus.

10. Those who conduct vending or promotional activities must comply with all University, City, Commonwealth and Federal Laws and policies.

FACULTY HANDBOOK

The Handbook for Faculty and Academic Administrators is a set of policies governing faculty life at Penn.

I. University Structure

• I.A. Introduction (p. 1861)
• I.B. The Trustees (p. 1861)
• I.C. The Central Administration (p. 1862)
• I.D. The Faculties and the Schools (p. 1863)
• I.E. General Provisions Concerning a Faculty (p. 1864)
• I.F. Organization and Responsibilities of Graduate Groups (p. 1864)
• I.G. Policies Concerning Academic and Administrative Officers (p. 1865)
• I.H. The University Council, the Faculty Senate, and University Committees (p. 1870)
• I.I. Academic Planning and Budget Committee (p. 1873)
• I.J. The Ombudsman (p. 1874)
• I.K. Equal Opportunity and Affirmative Action (p. 1874)

I.A. Introduction

The University of Pennsylvania is a non-profit corporation chartered under the laws of the Commonwealth of Pennsylvania. Under the Charter, the Trustees are charged with the ultimate responsibility for the course of the University. The administrative management of the University, on the other hand, is delegated by the Trustees to the President. The University’s faculties participate in the decision-making process through two major bodies advisory to the President and administration—the University Council and the Faculty Senate. Non-faculty employees and students also participate with the faculty in the University’s governance through their membership in the University Council and in an extensive number of advisory groups and committees. In addition, the University has a policy on consultation that articulates procedures for involving faculty, staff and students in decision-making where the administration has final or primary responsibility.

Organizationaly, the University is divided into twelve schools. Each school is under the direction of a dean. Some schools are further subdivided into departments.

I.B. The Trustees

(Source: Statutes of the Trustees, 1969; revised, April 28, 1980; revised, April 15, 1981; revised, June 17, 1983; revised, October 20, 1995; revised, June 21, 1996; revised, June 15, 2007 (https://archives.upenn.edu/digitized-resources/docs-pubs/trustees-minutes/minutes-2007/june-15/#Resolutions); revised, June 17, 2011 (https://archives.upenn.edu/digitized-resources/docs-pubs/trustees-minutes/minutes-2011/june-17))

The Statutes classify the trustees as follows:

1. Trustees Ex Officio (Non-voting): The Governor of the Commonwealth of Pennsylvania and the President of the University during their respective terms.
2. Charter Trustees (Voting): Up to ten in number, elected to serve until retirement from among persons who have served as trustees for a period of not less than five years.
3. Term Trustees (Voting): Up to thirty in number, elected to serve for terms of five years. A term trustee may serve only two terms, which would ordinarily be successive, for a total of ten years’ service. Prior service in any other voting class will also be applied toward this ten-year maximum.
4. Alumni Trustees (Voting): Up to fourteen in number, to include the President of Penn Alumni during his or her term of office and up to thirteen trustees elected by the alumni in accordance with rules established by Penn Alumni with the concurrence of the trustees, to serve for terms of five years, from among those persons who have received degrees from the University. An alumni trustee may not succeed himself or herself in office, but may be elected in another class.
5. Trustees Emeriti (Non-voting): Charter Trustees shall be designated as Trustees Emeriti upon attaining the age of seventy (70), or as early as age sixty-five (65), if they so choose. Other trustees who have been elected to two five-year terms in any class shall be eligible for election as trustees emeriti upon attaining the age of seventy (regardless of the age at which their ten-year term of service ends or the time remaining in their second term if they turn seventy before its conclusion) or, in rare circumstances, at an earlier age.
6. Commonwealth Trustees (Voting): Four non-elected officials appointed by the following representatives of the Pennsylvania General Assembly: the President Pro Tempore of the Senate, the Leader of the Senate, the Minority Speaker of the House of Representatives, and the Majority Leader of the House of Representatives, each of whom shall have the power to appoint one Commonwealth Trustee in accordance with Act No. 1994-25A.
7. Special Trustees (Voting): Up to two in number, to serve for a term determined by the Chair and approved by the Trustees Executive Committee, as defined at the time of their election, and whose service is in the best interests of the University to meet a particular need or purpose.

The Executive Committee of the Trustees exercises all of the powers and authority of the trustees, except for those cases where the Statutes specify action by the full board. The Executive Committee is elected annually by the trustees and shall normally be comprised of no fewer than ten voting trustees. The trustees may form such boards and committees as they see fit for any of the purposes and activities of the University. The standing committees at present are: Academic Policy; Audit and Compliance; Budget and Finance; Compensation; Development; Facilities and Campus Planning; Honorary Degrees and Awards; Local, National, & Global Engagement; Nominating; and Student Life. There is also an Investment Board.

The trustees annually elect the chair of the trustees and one or more vice chairs, who also serve as members of and as chair and vice chairs of the Executive Committee. The trustees hold two-day meetings three times a year, normally in the spring, fall, and winter. The meetings consist primarily of committee sessions and culminate in a stated meeting of the trustees. The Executive and Budget and Finance Committees are scheduled to meet at additional times throughout the year, and the other standing committees may have additional meetings if necessary. In accordance with Pennsylvania law, formal action on resolutions is taken in stated meetings open to any member of the University community, subject to space.

Each standing committee is staffed by a University administrator who assists the chair in planning agendas and preparing background material for meetings. Six of the standing committees currently have faculty and student liaisons elected by the Faculty Senate, the Graduate and
Professional Student Assembly, and the Undergraduate Assembly, who help represent the University community in committee discussions.

Ten of the schools and six University centers have boards of overseers composed of informed laypersons who act in an advisory capacity to the trustees, the President, the Provost, and the dean of a school or director of a center.

Copies of the Statutes and more detailed information about the trustees are available on the web site of the Secretary of the University (https://secretary.upenn.edu).

I.C. The Central Administration

(Source: Statutes of the Trustees (https://secretary.upenn.edu/trustees-governance/statutes-trustees), Article 2, 1969; revised, Article 3, June 19, 1981; revised June 19, 2009)

I.C.1. The Officers

The officers of the University shall be the President, the Provost, the Vice Presidents, the Secretary, the Treasurer, the Comptroller, and the General Counsel.

Subject to the policies of the University, all officers except the President shall be elected by the Trustees upon nomination by the President and shall be suspended or terminated by the Trustees upon the recommendation of the President.

The President may appoint a temporary successor or substitute to act as required because of the death, absence, disability, suspension, or termination of any officer of the University other than the President, but such temporary appointments shall be effective only until the next meeting of the Trustees or the Executive Committee, at which time a successor shall be nominated and elected either on an acting or a permanent basis.

With the consent of the President and subject to the policies of the University, officers may appoint such associates and assistants and assign them such duties as they shall deem appropriate.

I.C.2. The President

The President shall hold office upon such terms as the Trustees shall determine.

Functions and Duties of the President

As the Chief Executive Officer of the University, the President is its educational and administrative head. He/she is responsible to the Trustees for the conduct, coordination, and quality of the University’s programs and for their future development. The President shall have the authority to perform all acts that are necessary to make effective the policies and actions of the Trustees unless a resolution of the Trustees specifically grants such authority to another person or entity. As a liaison between the Trustees and the faculty, the President shall inform each of the views and concerns of the other relating to the programs and administration of the University.

The President shall hold the academic rank of Professor; shall be a member of every Faculty of the University, and may at his/her discretion call a meeting of any Faculty.

The President is assisted in the management of the University by several Vice Presidents. The current Vice Presidents who report directly to the President are: the Executive Vice President; the Executive Vice President for Student Life; the Executive Vice President for Faculty and Academic Affairs; the Executive Vice President for Finance and Investment; the Executive Vice President for Information Systems and Technology; the Executive Vice President for Research; the Executive Vice President for Health Affairs; the Executive Vice President for University Communications. Vice Presidents who report to the President through the Executive Vice President are the Vice President for Budget and Management Analysis; the Vice President for Business Services; the Vice President for Facilities and Real Estate Services; the Vice President for Finance and Treasurer; the Vice President for Human Resources; the Vice President for Information Systems and Computing, who also reports to the Provost; the Vice President for the Division of Public Safety; the Associate Vice President for Audit, Compliance and Privacy; and the Chief Investment Officer.

Election of the President

When it becomes necessary to elect a new President, the Chair of the Board of Trustees shall convene a Consultative Committee, composed of trustees, deans, faculty, staff, and students, to advise in the selection process by identifying priorities, issues, challenges, candidate qualifications and other factors important to the constituencies represented by the members of the Consultative Committee. The Chair shall also convene a Search Committee, whose members will be selected primarily from among those of the Consultative Committee, to be responsible for the identification, recruitment, and selection of candidates for recommendation to the Executive Committee. The composition of and procedures governing the Consultative Committee and the Search Committee shall be specified in a Standing Resolution of the Trustees and can be found in section I.G.1 of this handbook, Consultation for the Election of a President.

The Executive Committee shall, at a closed meeting, review the report of the Search Committee and shall present a final nomination of one candidate to be voted upon by the Trustees.

At least ten days prior to the stated or special meeting of the Trustees at which the election of the President is proposed, the Secretary shall give to each trustee notice stating that the election of the President shall be held at such a meeting and giving the names of the person or persons who have been nominated by members of the Executive Committee. No such election shall be valid unless a nominee shall receive the affirmative votes of at least two-thirds of the number of trustees then in office.

Removal of the President

The President may be removed only after consultation with representatives of the faculty and by the affirmative vote of trustees actually present at a stated or special meeting equal to at least two-thirds of the number of trustees then in office. Notice of such proposed action must be included in the notice of the meeting.

The Executive Committee shall appoint a temporary successor or substitute to act in case of the death, extended absence, disability, or removal of the President. The President may appoint an officer of the University to act for him/her during a period of temporary absence.

I.C.3. The Provost

The Provost shall be the officer responsible for the conduct, coordination, and quality of the University’s academic programs and for the planning of their future development. Hence, the Provost is crucially involved in the recruitment and maintenance of a faculty of the highest distinction in research and teaching. He/she also is concerned with maintaining...
a student body of superior quality and thus exercises oversight over academic program standards and over the admissions process. All deans report to the Provost, and under the President, the Provost has ultimate authority for all academic budgets.

The Provost shall hold the academic rank of Professor, shall be a voting member of every Faculty of the University, and may at his or her discretion call a meeting of any Faculty. In the performance of his/her duties, the Provost will consult with representatives of the Faculty.

The Provost is assisted in his role by several administrators with considerable responsibilities in their areas of expertise. The Vice Provost for Education has primary responsibility for the oversight of graduate and undergraduate education and other such educational programs and policies as the Provost shall designate. The Vice Provost for Faculty manages the academic personnel process, including recruitment of faculty, appointments, promotions, tenure cases and grievances. The Senior Vice Provost for Research is responsible for the development and implementation of policies and procedures that promote excellence in research across the University and for the overall operation of the University's extensive research enterprise, as well as for the development and implementation of Penn's strategy for technology transfer and entrepreneurial initiatives and the University's corporate relations and regional economic development strategy. The Vice Provost for University Life is responsible for all nonacademic aspects of student life. This includes addressing a wide array of student concerns in order to improve the quality of campus life for students and other members of the University community. The Vice Provost and Director of Libraries administers the University library system and plays an important role in the dissemination of information on campus.

(Almanac, May 2, 2017 [https://almanac.upenn.edu/articles/wendell-pritchett-penns-30th-provost])

I.C.4 The Secretary

The Secretary of the University shall attend and keep minutes of the meetings of the Trustees, shall act as secretary of all boards and committees of the Trustees, and shall be custodian of communications, reports, and other documents of importance presented to the Trustees. The Secretary shall give notice to Trustees and to members of boards and committees of all stated and special meetings. The Secretary shall have custody of the Seal of the Corporation, shall affix it to such instruments as require its use, and when so affixed, shall attest it by signature.

The Secretary shall prepare all diplomas and certificates of study, shall have charge of official convocations of the University, and shall have such other powers and duties as may be conferred from time to time by the Trustees. Any minute books, documents, and records of the University not yet deposited in the Archives shall be open at all times to the inspection of trustee boards and committees, to any trustee, and to authorized University officers.

I.C.5. The Treasurer

The Treasurer shall have custody of all evidences of ownership of real or personal property owned by the University or pledged to it, other than those evidences in the custody of the Investment Board. The Treasurer shall also have custody of all policies of insurance, and shall have the authority to accept receipt for the same on behalf of the Trustees, and under their supervision he/she shall arrange for the safekeeping thereof.

The Treasurer shall collect and receive all monies due and payable to the University and deposit them in the name of the University in such banking institutions as the Trustees may approve. He/she shall discharge all debts or other obligations of the University when due and payable. He/she shall keep a complete set of accounts showing in detail the financial transactions of the Treasurer's Office, and these shall be open at any time to the inspection of any trustee. The Treasurer shall furnish such financial statements compiled from his/her accounts as from time to time may be required by the proper University officers, Trustee boards and committees, or any trustee.

I.C.6. The Comptroller

The Comptroller shall maintain a complete set of accounts, except those maintained by the Treasurer, showing in detail the business and financial transactions of the University. He/she shall be responsible for the proper keeping of accounts of every department of the University and shall have authority to direct the methods, including audit and control, by which such accounts are kept. The Comptroller shall compile and furnish such financial or statistical reports or information as may be required by the proper University officers, Trustee boards and committees, or any trustee. He/she shall approve all vouchers before they are submitted to the Treasurer for payment; such approval shall be evidence that the charge has been recorded against an approved budget on file, and that it is within the appropriation of the budget against which it is charged.

I.C.7. The General Counsel

The General Counsel shall represent the University in legal matters. All matters requiring legal advice or legal action shall be referred to the General Counsel.

I.D. The Faculties and the Schools

(Source: Statutes of the Trustees, Article 7, January, 1956; revised, 1979; revised, Article 9, June 17, 1983; revised as Article 10, November 2, 2001; revised, February 11, 2005; revised, September 18, 2008 [https://secretary.upenn.edu/trustees-governance/statutes-trustees/#ten])

There shall be such faculties and such schools as authorized by the trustees. The Trustees recognize the following (listed in the order of their origin):

Faculty of Arts and Sciences
The School of Arts and Sciences, including the College of Arts and Sciences as its undergraduate division, the Graduate Division of Arts and Sciences, and the College of Liberal and Professional Studies, as its lifelong learning program.

Faculty of Medicine
The Perelman School of Medicine

Faculty of Law
The School of Law

Faculty of Engineering and Applied Science
The School of Engineering and Applied Science

Faculty of Design
The Stuart Weitzman School of Design

Faculty of Dental Medicine
The School of Dental Medicine

Faculty of the Wharton School
Subject to general policies established by the Trustees, the responsibility for determining the quality of the student body shall rest with the Faculty of that school. Each Faculty shall articulate the criteria for selection of applicants for admission and shall establish a written admissions policy that describes these criteria. Each Faculty shall also monitor implementation of its admissions policy and amend it when necessary.

Subject to general policies established by the Trustees, and in a manner consistent with general University policies, each Faculty shall also set its regulations for instruction of students and requirements for recommendations for degrees in course and in faculty.

Subject to general policies established by the Trustees, and in a manner consistent with general University policies, each Faculty shall set its own procedures for governance and determine the qualifications for membership in the Faculty.

I.F. Organization and Responsibilities of Graduate Groups

(Source: Office of the Provost, Almanac, September 29, 1981; revised, Almanac, March 19, 1996 (http://www.upenn.edu/almanac/v42/n24/grad.html))

I.F.1. Introduction

In the University of Pennsylvania, graduate programs leading to the Ph.D. and related master's degrees are carried out by associations of faculty members called "graduate groups." Many of these groups are based in individual departments. In such groups, all members of the Standing Faculty in that department are ipso facto members of the graduate group, but the group also may include faculty who come from other departments or schools. There are, in addition, a significant number of graduate groups that are not based in any one department and are composed of faculty from several departments or schools.

The graduate group structure provides the adaptability necessary to mount graduate programs in newly developing areas of intellectual endeavor or to phase out programs in areas of declining vigor, without disrupting the underlying structure of the traditional departments and schools. The price paid for this adaptability is continuing vigilance over the academic quality and vigor of each graduate program, particularly those that are not based in a single disciplinary department or school. The purpose of the sections that follow is to outline the organization and responsibilities of the faculty who are members of graduate groups, and of the group chairpersons.

I.F.2. Graduate Group Faculty

Only members of the Standing Faculty, the Associated Faculty and Emeritus Faculty are eligible for membership in graduate groups. Members of the Academic Support Staff—for example, Instructors, Lecturers and Research Associates—are not eligible, nor are Visiting Faculty unless they have an appointment in the Associated Faculty. It should be noted that while members of the Research Faculty may serve on a graduate group, according to a Provostial memorandum dated August 5, 1983, they may not take responsibility for courses or seminars nor may they supervise theses or dissertations unless the prior approval of the Provost is obtained for each such activity.
The fundamental responsibility for the academic quality and effectiveness of a graduate program rests with the faculty of the appropriate graduate group. The essential duties of this faculty include:

- Design of an academic program that meets the requirements of the student and of the University for depth, breadth and academic quality of the highest order. Equally important is the continuous adaptation of this program in response to the challenges by and opportunities for new developments in its scholarly field.
- Establishment of well defined academic standards and requirements that are rigorous yet flexible and that ensure quality and encourage the free development of the scholarly abilities of each student. These standards and requirements must be consistent with the intellectual style and spirit of the field and also with the minimum requirements of the University, as established by the Graduate Council of the Faculties.
- Establishment and operation of graduate admissions programs that will attract and admit students of the highest quality. Admissions standards and procedures must be consistent with those established by the Graduate Council of the Faculties, the Council of Graduate Deans or the Associate Provost for Education.
- Wise and intensive counseling of graduate students in matters both academic and nonacademic, to encourage their rapid progress toward their academic goals.
- Active participation in the quest for financial resources for support of graduate students and in the allocation of available resources so as to optimize the quality of the program and its students.
- Active assistance in the placement of the program’s graduates in positions where their abilities and training are utilized to the fullest degree possible.

At least half of the members of Ph.D. examination and dissertation committees must be members of the graduate group at the time of appointment to the committees. Faculty who are not members of the graduate group may serve only with the written approval of the graduate group. The authority to approve membership on committees may be delegated to the graduate chair. The chairs of dissertation committees and of all examination committees must be members of the Standing Faculty in the graduate group.

If the chair of a dissertation committee leaves the Standing Faculty before the dissertation is completed, then a new chair from the Standing Faculty must be appointed as chair. The dissertation committee chair is responsible for convening committee meetings, advising the student on graduate group and university expectations, and assuring the graduate group chair that the group’s requirements have been met. The committee chair does not have to be the primary dissertation adviser.

Instructors in courses that satisfy the requirements for the Ph.D. must hold the Ph.D. degree or be members of the Standing Faculty or the Associated Faculty. No one may teach a required core course for more than one semester without becoming a member of the Standing Faculty or the Associated Faculty.

The selection and appointment of faculty to membership in a graduate group are the responsibility of the appropriate dean, in consultation with members of the graduate group and such other faculty groups or individuals and academic administrators as may be appropriate. The standards and criteria to be used in selection and appointment of members of the Standing Faculty or the Associated Faculty to graduate groups are established by the dean in consultation with his or her faculty and include academic excellence and commitment to the academic goals of the program.

In cases where a graduate group is based in an academic department or school, appointment to membership in the graduate group accompanies and is implicit in a primary appointment to the Standing Faculty in the department or school and is for the same term. In all other cases, appointment to membership in a graduate group is for a term specified at the time of appointment.

All appointments to membership in a graduate group carry full voting rights in the deliberations of the group unless otherwise specified at the time of appointment.

All appointments to membership in a graduate group must be reported to the Office of the Provost at the time of appointment by making a record in the Faculty Information System.

The procedure for appointment of a faculty member to membership in a graduate group not based in his/her department or school differs from and is independent of two other types of intra-university “linking” appointments:

- Interlocking faculty appointments, made by the Provost to facilitate interaction between the faculties of the several schools.

- Secondary faculty appointments, made by the Trustees following the normal academic appointment process.

These two types of appointments, as well as all appointments to other than Standing Faculty positions, do not automatically carry with them appointment to a graduate group.

I.G. Policies Concerning Academic and Administrative Officers

I.G.1. Consultation Procedures for the Election of a President

Article 3.2.b. of the Statutes of the University states: “When it becomes necessary to elect a new President, the Chair of the Board of Trustees shall convene a Consultative Committee, composed of trustees, deans, faculty, staff, and students, to advise in the selection process by identifying priorities, issues, challenges, candidate qualifications, and other factors important to the constituencies represented by the members of the Consultative Committee. The Chair shall also convene a Search Committee, whose members shall be selected primarily from among those of the Consultative Committee, to be responsible for the identification, recruitment and selection of candidates for recommendation to the Executive Committee. The composition of and procedures governing the Consultative Committee and the Search Committee shall be specified in a Standing Resolution of the Trustees.

The Executive Committee shall, at a closed meeting, review the report of the Search Committee and shall present a final nomination of one candidate to be voted upon by the Trustees.

At least ten days prior to the stated or special meeting of the Trustees at which the election of the President is proposed, the Secretary shall give to each trustee notice stating that the election of the President shall be held at such a meeting and giving the names of the person who has been nominated by members of the Executive Committee. No such election
shall be valid unless a nominee shall receive the affirmative votes of at least two thirds of the number of trustees then in office."

A Consultative Committee to advise the Executive Committee shall be formed, chaired by the Chair of the Board of Trustees, or his or her designee, and comprised of trustees, deans, faculty, staff, graduate / professional students and undergraduate students. The size and exact composition of the Consultative Committee shall be determined by the Executive Committee, provided, however, that the Consultative Committee shall include in addition to the chair at least four current trustees, four faculty members, one dean, one member of the university staff, one graduate/professional student, and one undergraduate student. The faculty members shall be selected by the Faculty Senate Executive Committee in consultation with the Consultative Committee Chair. All other members of the committee shall be selected by the Chair.

The Chair shall charge the Consultative Committee members with the responsibility for seeking the advice of their respective constituencies on issues relevant to the search process, such as challenges a new president might face, strategic priorities, and recommended strengths and experience for the new President. The Consultative Committee shall meet to discuss and review the recommendations and shall provide a summary of its findings to the Chair.

A Search Committee, whose chairman and members shall be appointed by the Chair of the Board of Trustees primarily from among the members of the Consultative Committee, shall be convened to initiate the search process and review the Consultative Committee's guidance. The size of the Search Committee shall be determined by the Chair of the Board of Trustees, but shall include at least two trustees and two faculty members, and shall not exceed a total of eight members, in addition to the Committee Chairman. The Search Committee shall be responsible for the identification, recruitment and selection of candidates to be interviewed, shall conduct the interviews of the candidates, and shall endeavor to recommend at least three candidates in rank order to the Executive Committee. The Search Committee shall keep the Consultative Committee apprised of its progress during the interview process, without disclosing any personal information about particular candidates.

Based on the recommendation of candidates by the Search Committee, the Executive Committee shall then present a final nomination of one candidate to the Board of Trustees for approval.

All proceedings of the Consultative Committee, the Search Committee, the Executive Committee, and the Board of Trustees shall be confidential and no member of any body shall disclose the deliberations to any other person, except as expressly authorized by the Chair in the course of the selection process.

I.G.2. Consultation Procedures for the Appointment and Reappointment of Deans and University-wide Administrators

(Source: Proposed Consultation Procedures, University Council Steering Committee, Almanac, February 17, 1981; revised, Offices of the President and Provost, Almanac, September 15, 1981 (https://almanac.upenn.edu/archive/v28pdf/n02/091581.pdf))

The University administration, before recommending the appointment of certain officers, typically seeks the advice of ad hoc committees composed of faculty and students. The offices subject to this practice include all those having a significant influence in academic affairs. While the application of this criterion is clear when positions such as the Provost and deans are in question, it is difficult to draw a precise line of demarcation for subordinate positions or for major administrative posts not directly in academic affairs. This is in part because influence on academic affairs is not an "either/or" question for many of these positions, but a matter of degree which, given the changing nature of the University’s problems, is sometimes difficult to gauge in advance. Another complication is that new posts with different titles may be created from time to time.

These procedures take cognizance of these difficulties by providing for consultative input that is graduated according to the degree of influence that a post seems likely to have in the academic life of the University. Thus, where the post is one that involves little direct authority or influence, the consultative process should be informal and should give great scope to the preferences of the administration. For such a position, the appointing officer may consult faculty and student leaders individually about a candidate proposed by the appointing officer.

For non-academic appointees whose duties have a more substantial impact on academic affairs or on campus life, consultation may proceed through a small advisory faculty-student committee, which gives advice concerning one or more candidates proposed by the administration. For subordinate academic officers, such an advisory committee may both offer its own suggestions and react to suggestions of the administrator for whom an aide is being chosen. Finally, where the post is one in which major academic authority is exercised, more formal consultative procedures should be followed. In these procedures a consultantive committee is established for the purpose of conducting a search and drawing up a list of recommended candidates. Such a consultative committee receives its charge from the President or Provost and may meet from time to time with one or both of these officers during its deliberations. The committee does not confine itself to suggestions made by the President or Provost. Both advisory and consultative committees make their decisions in executive session.

In selecting members for consultative and advisory committees, consideration should be given to diversity of membership, including affirmative action concerns, range of interests and rank, as well as quality of membership. In addition, the affirmative action policy of the University requires that searches be conducted so as to identify potential candidates from within the broadest possible pool, including women and members of minority groups. Acceptance of appointment to a consultative committee implies a commitment to making such a search, and no one who does not share this commitment should accept appointment to the committee.

Spelled out below are specific consultative procedures for the appointment and reappointment of deans and certain University-wide academic officers, as well as a mechanism—the University Committee on Consultation—for resolving questions regarding the appropriate level of consultation in doubtful cases. Unless otherwise provided, the composition of consultative committees should conform to the principle that "the normal maximum proportion of students on the consultative committee shall not exceed one-quarter of the membership of the committee, except in the case of a consultative committee for offices in the area of student affairs, in which case, the proportion of students shall not exceed one-third of the membership."

University Committee on Consultation

Where doubt exists about the appropriate level of consultation for any given post that the administration wishes to fill, the President or Provost should seek the advice of the University Committee on Consultation. This committee is composed of the Chair, Past Chair and Chair-Elect of the
Faculty Senate and the chairpersons of the Undergraduate Assembly and the Graduate and Professional Student Assembly. The University Committee on Consultation shall respond quickly to the President's or Provost's request for an opinion, indicating the nature of the procedure that it recommends. The President and Provost should err on the side of inclusiveness in seeking opinions from the committee.

Consultation for University-wide Academic Offices

Provost

When a vacancy has occurred or is expected to occur in the office of Provost, an ad hoc consultative committee composed of twelve faculty members, two undergraduate students, and two graduate or professional students shall be established by the President. The President shall request from the Senate Executive Committee, through its chair, nominations of six faculty members. The President shall appoint to the consultative committee those nominated by the Senate Executive Committee and shall appoint an equal number of other faculty members.

The committee shall meet with the President and/or the Provost for the purpose of obtaining information and views concerning the responsibilities of the position and the qualifications of the person to be sought. The committee may develop additional qualifications in consultation with the President and/or the Provost. The President and/or the Provost shall be free to submit names of candidates at the initial meeting or at any subsequent time prior to the completion of the work of the consultative committee. In the case of a person from outside the University, a consideration of academic appointment in a school and department will normally be appropriate. If this is the case, the department, school, and administration should act expeditiously.

It is understood that the role of the ad hoc committee shall be an advisory one; the final authority for the appointment rests with the President and the Trustees. In those cases in which the President wishes to appoint a person not considered by the ad hoc committee, the committee shall be asked to review the qualifications of that person and determine if they wish to recommend that person for the position.

Deputy, Associate, and Vice Provosts

With respect to the selection of Deputy, Associate, and Vice Provosts, more flexibility in the consultative arrangements is appropriate, depending on the particular circumstances at the time the vacancy exists. It is also necessary to ensure that the Provost have aides in these posts with whom he/she can establish a close personal rapport. Before an ad hoc committee is appointed, the Provost should consult with the University Committee on Consultation regarding the appropriate size for the committee, the relative proportion of faculty, undergraduate and graduate or professional students to serve on the committee, the extent of the search to be undertaken, the timing of the appointment, and similar questions.

Appointment of Deans, Associate Deans and Vice Deans

The Statutes of the Corporation (10.4) state that the Dean shall be appointed or removed by the Trustees, upon recommendation by the President and the Provost, and according to policies and procedures promulgated by the President and Provost.

When a vacancy has occurred or is expected to occur for a dean of a faculty, the Faculty concerned, by its own procedures, shall nominate to the President four members of its own faculty. The President shall appoint those four persons and shall also appoint four other faculty members to a committee to nominate a new dean. The President shall also appoint two students from that school of whom one shall be an undergraduate if the school has an undergraduate as well as a graduate program. These students shall be nominated by the students according to their own procedures. When appropriate, the President may designate one or two alumni advisers to the committee. In special circumstances or where the faculty of the school is very small, exceptions to the numerical limitations above may be made. The committee shall meet with the President and/or the Provost for the purpose of obtaining information and exchanging views concerning the responsibilities of the position and the qualifications of the person to be sought. The final appointment of a dean is made by the Trustees upon the recommendation of the President of the University. In the case of a person from outside the University, a consideration of academic appointment in the school concerned will normally be appropriate.

In the selection of associate deans and vice deans, the dean of a Faculty should seek advice from his or her faculty and student body. Should doubts or issues arise about the procedure for obtaining such advice, guidance should be sought from the University Committee on Consultation.

Renewals of Terms of Office

Provost

The initial term of office of the Provost shall be no longer than seven years and the total length of service normally no more than twelve years. If, when the initial term of the Provost expires, the President favors the continuation of the Provost in office, he/she shall determine whether the incumbent is willing to accept further service. If a reappointment or extension is contemplated by the President, the President, with the advice of the University Committee on Consultation, shall appoint an ad hoc committee to ascertain and report on faculty and student opinion, and advise the President with respect to the proposed reappointment or extension.

Deans

Deans shall normally serve no more than twelve years with an initial term of no more than seven years. A consultative review committee shall be established in the sixth year of the initial term of a deanship if a reappointment (i.e., an extension of more than two years) is contemplated. The Faculty of the school shall choose four of its own members for this committee, to be matched by up to an equal number chosen by the President and the Provost, who will make sure that there are faculty representatives from within the University but outside the school. Students will select two student members from the student body of the school, one of whom shall be an undergraduate if the school has an undergraduate as well as a graduate program. There will be one nonvoting alumni representative. The consultative committee will advise the President and the Provost on the desirability of reappointment. In addition, each member of the Standing Faculty of that school shall have the opportunity to give advice and views to the President and the Provost. The President and the Provost will consult as well with knowledgeable colleagues and officials of the school. When the school has been recently reviewed by an outside accreditation organization or by some other means, the findings will be considered pertinent in the decision whether to recommend reappointment.

A school or the President and the Provost are free to propose another consultative path for the reappointment of a dean after an initial term, but any such alternative path would require the concurrence of the appropriate elected committee of the school involved, of the President and Provost, as well as review by the University Committee on Consultation.

If an extension for only one or two years is proposed, the Provost may constitute a faculty and student committee by inviting faculty and
student members currently holding elective office, such as members of the school’s academic freedom committee, University Council representatives, or members of the school’s council (where such an elective body exists), to serve on a consultative body.

Removal of a Dean
(Source: Offices of the President and Provost, Almanac, September 5, 1995 (https://almanac.upenn.edu/archive/v42/n2/handbook.html))

The procedure for the removal of a dean prior to the expiration of his/her term may be initiated by the President and the Provost. It may also be initiated by a faculty vote of no confidence taken at a meeting in accordance with the bylaws of the school. The vote of no confidence must be confirmed by a majority of the Standing Faculty in a subsequent mail ballot. In either case, the Provost shall appoint, in consultation with the Senate Committee on Consultation, an advisory committee of at least five faculty members, a majority of whom shall be from outside of the school. The committee shall be charged by the Provost and the President to gather information relevant to the issues specified in the charge, including interviews with the faculty and dean. The committee shall forward its recommendations, with supporting documents, to the Provost, the President, and the dean, within four weeks of its appointment. The committee shall report its recommendations to the faculty of the school.

Appointments of Acting Administrators

When there is a need to appoint a person to occupy a position temporarily, the University Committee on Consultation and, in the case of a school administrator, the appropriate elected school committee, should be consulted. The University Committee on Consultation may, according to the circumstances, decide to propose other arrangements to insure adequate consultation.

Reports about Searches

In the case of a University-wide post, the President and the consultative committee, before its discharge, shall submit a final report to the University Council, the Faculty Senate, the Undergraduate Assembly and the Graduate and Professional Student Assembly, and shall publish the report in Almanac. The report shall include, but not be limited to, the following:

1. The nature of the search, including goals and objectives;
2. The consensus on policy issues;
3. A copy of the job description and/or advertisement, if any;
4. Information concerning the candidates, including:
   a. Characteristics of the individuals (such as ethnic background, sex, etc.).
   b. Number of names considered,
   c. How many candidates were from within the University,
   d. Specifically, was the person selected to fill the position, if it was filled, recommended by the consultative committee, and
   e. Any additional relevant information.

Should there be disagreement between the President and the consultative committee, separate reports should be submitted.

In the case of the election of a new dean, the ad hoc committee shall submit a report along similar lines to the faculty and the students of the school involved. The report or a summary of it shall be published in Almanac.

Confidentiality on Search Committees

Confidentiality of much of the material handled during a consultation is essential to the process. Acceptance of appointment to a committee entails full acceptance of the conditions of confidentiality as follows: the name, background, personality and character of any candidate and the proceedings of the committee shall be maintained in strictest confidence by all members of the committee and by administrative personnel who have access to the names. This principle, of course, does not preclude the revelation of names of candidates in officially authorized efforts to obtain outside appraisals.

The committee shall have the option to keep confidential any other items it deems necessary for its functioning by roll call vote requiring a two-thirds majority of the committee members present and voting. Each letter of appointment to an advisory or consultative committee should make plain the obligation to maintain confidentiality, and the chair of the committee shall remind the members of this obligation. Anyone who cannot accept those conditions should be asked by the chair to resign. Failing this, he/she should automatically be removed from membership of the committee.

Administrative Support for Search Committees

Administrative and secretarial assistance shall be provided to advisory and consultative committees for deans and University-wide administrators.

I.G.3. Appointment of Department Chairs
(Source: Offices of the President and Provost, Almanac, October 18, 1977; revised, 1983)

All department chairs are appointed by the President upon recommendation of the Provost and the Dean and with the advice of faculty both inside and often outside the department. Responsibility for initiating the appointment of a new department chair and the charge to any nominating/search/selection body, including criteria and number of persons to be recommended, rests with the Dean. The Dean should state from the outset whether there is available a position in the Standing Faculty to allow consideration of external candidates. The means by which nominations are secured and reviewed will vary from school to school, but should be regularized and clearly stated for each school.

In all cases, the Dean should play an active role, either as a participant in the departmental review, or by requiring two or three names from which to choose. A change in department chairs should normally be preceded by a review of the direction, quality, and plans of the department. Such a review may be initiated by the Dean, Provost, President, or members of the department and should be planned cooperatively by all parties. Reviews with external evaluators should take place as a matter of course in departments at regular intervals, but preferably at such times as to be helpful to new departmental leadership.

A recommendation for appointment as a department chair takes the form of a letter from the Dean to the Provost, accompanied by a current curriculum vitae of the nominee and other information about the selection process, including names of others considered. The letter should set forth the proposed period of appointment (most often five years, renewable, but may be less and occasionally more according to prevailing school practice). The letter is sent to the Provost, who will transmit it to the President for final approval and preparation of the appointment letter.
I.G.4. Responsibilities of Department Chairs
(Source: Offices of the President and Provost, 1969 Handbook for Faculty and Administration; revised, 1979)

To the Administration
It is the responsibility of the department chair to execute within the department the policies of the University concerning teaching and research, fiscal affairs, and other administrative business.

The chair has the responsibility, after consultation with appropriate members of his or her department, for securing and retaining staff and faculty members of high caliber and recommending those to whom tenure should be granted and to whom promotions should be awarded. It is the duty of the chair to submit departmental recommendations in these matters, including the names of those consulted, to the administration for consideration, and a separate statement giving his or her personal opinion.

The chair is responsible, after conferring with faculty and students, for ensuring the appropriateness of the courses and adequacy of the program offered by the department in accord with educational policies established by the faculties concerned. The chair should have the courses staffed so as to promote teaching that is as effective and stimulating as possible in content and in presentation.

The chair has a general responsibility for promoting the quality of the scholarly and research activities of the department. The chair reviews applications for research projects for appropriateness and transmits those approved to the administration, making sure that the human, fiscal, and space demands of all such projects are in the best interests of both the department and the University as a whole.

To the Department
The chair is the department’s executive officer. In aid of the development and maintenance within the department of collegial respect for the educational enterprise, the chair is responsible not only to the dean but also to the department as a collectivity for the conduct of its affairs. He/she is responsible for the administration of its teaching, academic advising, and research functions and also the implementation of its policies.

The chair has the obligation to foster the welfare of his/her entire staff and to encourage and facilitate their work and professional development. The chair should take the initiative in reporting the needs and championing the legitimate causes of the department to the Dean. The chair carries the basic responsibility for obtaining merited recognition by the University for his/her staff members with respect to promotions, and for making recommendations concerning faculty salaries and salary increases to the Dean and Provost, who supervise this area. Each faculty member has the right to discuss with the chair that faculty member’s own salary, status, requests for academic leaves, and applications for research projects. If the faculty member is dissatisfied after consultation with the chair, he/she may discuss these matters with the Dean.

I.G.5. Appointment and Responsibilities of Graduate Group Chairs
(Source: Offices of the President and Provost, Almanac, October 18, 1977; revised, Office of the Provost, 1983; revised, Office of the Provost, Almanac, March 19, 1996 (https://almanac.upenn.edu/archive/v42/n24/grad.html))

The chair of a graduate group is charged with the responsibility of leading and coordinating the work of the graduate group faculty in the discharge of their responsibilities. This is an important task requiring academic and personal abilities of a high order.

Graduate group chairs are appointed by the Provost upon recommendation of the appropriate dean or deans and other appropriate officials such as the Associate Provost for Education. The letter from the Dean to the Provost transmitting the recommendation should refer to the selection process (e.g. department chairs and other deans consulted, procedure for self-selection by the graduate group) and the proposed term of appointment (generally three to five years, renewable).

In cases where a graduate group is based in an academic department, the graduate group chair reports to the department chair and may carry a title such as “Associate Chair for Graduate Affairs.” In all other cases, the graduate group chair reports directly to the appropriate dean or delegate. (The latter may carry a title such as “Associate Dean for Graduate Studies and Research.”) The Dean determines the appropriate reporting channel.

I.G.6. Reappointment of Department and Graduate Group Chairs
(Source: Office of the Provost, Almanac, September 7, 1982 (https://almanac.upenn.edu/archive/v29/pdf/nt/n02/090782.pdf))

The following procedures shall guide the reappointment of department and graduate group chairs.

1. No department chair shall be reappointed under circumstances such that his/her total term shall exceed six years unless a review of his/her performance is made. Ideally this review should be combined with a review of the department, since an evaluation of an incumbent chair inevitably involves an evaluation of the department’s evolution during his/her tenure. In the event that a full-scale review of the department is untimely or particularly inconvenient when a reappointment is being considered, a review committee, chosen by whatever formal mechanisms have been adopted by the school or department and accepted by the Dean, should be convened to evaluate the chair’s performance and recommend appropriate action to the Dean. In the event the department has no formal procedures, the following procedures should be used: The review committee will consist of three faculty members selected by the chaired faculty in the absence of the chair, one untenured faculty member (if any exist), and two other faculty members, who may be from other departments or schools, selected by the Dean. The chair of the review committee will be selected by the Dean from among the six (or five) members. Total service in excess of twelve years as chair should be rare and should not occur in the absence of compelling reasons. Exceptions to this limit should be approved in advance by the President and Provost after consultation with the Chair, Chair-Elect, and Past Chair of the Faculty Senate.

2. Where graduate groups are generally based within a single department, the graduate group chair will either be the
department chair, in which case the above procedures apply, or report to the chair, in which case independent review mechanisms are not necessary. However, when the graduate group is not based within a single department, the guidelines below should be followed. No graduate group chair shall be reappointed under circumstances such that his/her total term shall exceed six years unless a review of his/her performance is made. Ideally, this review should be combined with a review of the graduate group, since evaluation of an incumbent graduate group chair inevitably involves an evaluation of the group’s evolution during his/her tenure. In the event a full-scale review of the graduate group is untimely or particularly inconvenient when a reappointment is being considered, a review committee, chosen by whatever formal mechanisms have been adopted by the graduate group and accepted by the relevant dean or deans, should be convened to evaluate the graduate group chair’s performance and recommend appropriate action to the dean or deans. In the event the group has no formal procedures the following procedures should be used: The review committee shall consist of three faculty members selected in the absence of the chair by the tenured faculty members of the group, one untenured faculty member (if any exist) selected by the untenured faculty members of the group, and two other faculty members, who may be from other groups or schools, selected by the dean or deans. The chair of the review committee will be selected by the dean or deans from among the six (or five) members.

Total services in excess of twelve years as graduate group chair should be rare and should not occur in the absence of compelling reasons. Exceptions to this limit should be approved in advance by the President and Provost after consultation with the Chair, Chair-Elect, and Past Chair of the Faculty Senate.

I.H. The University Council, the Faculty Senate, and University Committees

There are two University-wide deliberative bodies: the University Council and the Faculty Senate. The University Council was established in 1963, was modified in 1969, and assumed its present form in 2007. The Faculty Senate was established in 1952 and assumed its present function through reorganization in 1962.

I.H.1. The University Council

(The text below is an abbreviated description of the University Council’s bylaws (https://secretary.upenn.edu/univ-council/bylaws-university-council).)

I. Scope and Purpose

The University Council is a deliberative and broadly representative forum that exists to consider the activities of the University in all of its phases, with particular attention to the educational objectives of the University and those matters that affect the common interests of faculty, staff and students. It may recommend general policies and otherwise advise the President, the Provost, and other officers of the University. It is authorized to initiate policy proposals as well as to express its judgment on those submitted to it by the administrative officers of the University and its various academic divisions. It is also empowered to request information through appropriate channels from any member of the University administration.

II. Membership

The University Council shall be composed of administrative officers and elected representatives of the faculty, students, and staff as follows:

Forty-five members of the Executive Committee of the Faculty Senate. The Faculty Senate shall insure that each faculty is represented and that at least three assistant professors serve on the Council.

One full-time lecturer and one full-time member of the Research Faculty to be selected to serve two-year terms by vote of the full-time lecturers and research faculty, respectively. Eleven administrative officers, including the President, the Provost, and nine members of the administration to be appointed annually by the President, at least five of whom shall be deans of faculties.

Fifteen graduate and professional students elected as members of the Graduate and Professional Student Assembly. The Graduate and Professional Student Assembly shall insure that, to the extent possible, each school is represented.

Fifteen undergraduate students elected as members of the Undergraduate Assembly. The Undergraduate Assembly shall insure that, to the extent possible, each undergraduate school is represented.

Two elected representatives of the Penn Professional Staff Assembly.

One elected representative of the Librarians Assembly.

Two elected representatives of the Weekly-Paid Professional Staff Assembly.

One elected representative of the United Minorities Council.

III. Positions

The President of the University is the presiding officer of the Council. Each year, with the advice of the Steering Committee and the consent of the Council, the President shall appoint a Moderator of the Council, who shall become a non-voting member of the Council. The President, or in the absence of the President, the Provost, shall open each meeting and shall normally turn the conduct of the meeting over to the moderator.

The President shall each year appoint a Parliamentarian, in consultation with the Steering Committee. It is the parliamentarian’s duty to advise the moderator and the presiding officer in the application of Robert’s Rule of Order Revised, as modified by special rules of the Council.

The Secretary of the University or the Secretary’s designee shall be Secretary of the Council.

IV. Steering Committee

Duties

The Steering Committee shall prepare the agenda for meetings of the Council. Resolutions that committees elect to place on the Council
agenda should be submitted to the Council through the Steering Committee. The Steering Committee may give its advice concerning such resolutions to the Council whenever the Steering Committee believes that its advice would be helpful.

The Steering Committee shall publish an annual report to the University community. This report, to be published early in the academic year, shall include a review of the previous year’s Council deliberations (highlighting both significant discussions and the formal votes taken on matters of substance) and a survey of major issues to be taken up by the Council during the coming year.

**Composition**

The Steering committee shall consist of the President of the University, the Provost, the Chair, the Chair-Elect and the Past Chair of the Faculty Senate, the Chair of the Undergraduate Assembly, the Chair of the Graduate and Professional Student Assembly, the Chair of the Penn Professional Staff Assembly, and the Chair of the Weekly-Paid Professional Staff Assembly.

Drawn from the Council membership there shall be in addition four faculty members, one graduate/professional student, and one undergraduate student elected by the respective governing bodies, as well as one additional member of the Penn Professional Staff Assembly, and one additional member of the Weekly-Paid Professional Staff Assembly, each elected by their representative assemblies. The Chair of the Faculty Senate shall be the Chair of the Steering Committee. The Council Moderator will be an official observer at meetings of the Steering Committee.

The Secretary of the Council shall serve as secretary of the Steering Committee. Members of the Steering Committee may attend the meetings of Council committees.

**V. Committees**

Any member of the University may be asked to serve on committees of the University Council, which include standing committees, subcommittees of standing committees, special committees created by the Council from time to time, and the independent committees; only members of the University shall be eligible for membership on these committees. All committee members are eligible for reappointment, if mutually agreeable, for a maximum of four years total consecutive service. To provide continuity, chairs-elect may be designated. Committee chairs, in consultation with their committee, may invite guests to attend committee meetings.

To the extent possible, each committee shall normally include at least one faculty member, one undergraduate student and one graduate student who are members of the Council.

1. **Standing Committees**

   The standing committees of the Council are those whose activities are directly instrumental in advancing the work of the Council. The President, Provost, Chair and Chair-Elect of the Faculty Senate, Chair of the Graduate and Professional Student Assembly and Chair of the Undergraduate Assembly (or their designees) shall be entitled to attend meetings of all standing committees of the Council and to participate in the discussions.

   Each standing committee (except as otherwise specified below) shall consist of not fewer than five and not more than eight faculty members, two representatives of the Penn Professional Staff Assembly, two representative of the Weekly-Paid Professional Staff Assembly, two graduate/professional students, and two undergraduate students.

   a. **Committee on Academic and Related Affairs.** The Committee

      i. shall have cognizance over matters of recruitment, admissions, and financial aid that concern the University as a whole and that are not the specific responsibility of individual faculties, including the authority to carry out studies on existing recruitment and admissions procedures and their relationships with existing policies on admissions and financial aid and to recommend changes in policy to the Council;

      ii. shall consider the purposes of a University bookstore and advise the Council and the management of the University bookstore on policies, development, and operations;

      iii. shall review and monitor issues related to the international programs and other international activities of the University, including advice and policy recommendation in such areas as services for international students and scholars, foreign fellowships and studies abroad, faculty, staff and student exchange programs and cooperative undertakings with foreign universities;

      iv. shall advise the Vice Provost and Director of libraries on the policies, development, and operation of the University libraries;

      v. shall have cognizance over recreation and intramural intercollegiate athletics and their integration with the educational program of the University, including the planning and provision of adequate facilities for various sports and recreational activities; and (vi) shall have cognizance of all matters of policy relating to research and the general environment for research at the University, including the assignment and distribution of indirect costs and the assignment of those research funds distributed by the University, and shall advise the administration on those proposals for sponsored research referred to it because of potential conflict with University policy.

   b. **The Committee on Campus and Community Life.** The Committee

      i. shall have cognizance over the University’s communications and public relations activities in their various formats and media including electronic, audio (the telephone system), video and printed copy, and it shall monitor the University’s internal communications, the operations of the University Communications Office, communications to alumni, and the interpretation of the University to its many constituencies;

      ii. shall advise the Council on the relationship of the University to the surrounding community and the relevant University policies, work to ensure that the University develops and maintains a constructive relationship with the community, and monitor pending real estate activities of concern to the community;

      iii. shall have cognizance of the conditions and rules of undergraduate and graduate student life on campus, including gathering and analyzing information concerning student life and student affairs and making recommendations to Council, and responding as appropriate to requests from and reporting information and recommendations concerning student life and student affairs to the Vice Provost for University Life and other appropriate administrative officers; and

      iv. shall have cognizance over student life and student affairs to the Vice Provost; and

      v. shall have cognizance over the University’s communications, including gathering and analyzing information concerning student life and student affairs and making recommendations to Council, and responding as appropriate to requests from and reporting information and recommendations concerning student life and student affairs to the Vice Provost for University Life and other appropriate administrative officers; and
iv. shall advise the President, the Vice President of Public Safety, and the administrators or directors of specific buildings, offices, or projects on all matters concerning safety and security in the conduct of their operations, including consideration and assessment of means to improve safety and security on the campus.

c. Committee on Committees. The Committee on Committees, on behalf of the Steering Committee, shall monitor all Council standing and ad hoc committees to assess their continuing usefulness. It shall familiarize itself with the work and performance of committees and present recommendations to the Steering Committee for such changes in the structure, charges and number of members as it thinks appropriate.

The Committee on Committees shall receive nominations from the various constituencies for membership on the standing committees and the independent committees with the exception of the Committee on Open Expression. It shall transmit those nominations together with recommendations for committee chairs to the Steering Committee.

The Committee shall consist of six faculty members (including the Chair-Elect of the Faculty Senate). They shall nominate faculty members for the various committees on behalf of the Faculty Senate. In addition there shall be a representative from each of the following: the Penn Professional Staff Assembly, the Weekly-Paid Professional Staff Assembly, the Graduate and Professional Student Assembly, and the (undergraduate) Nominations and Elections Committee. The Chair-Elect of the Faculty Senate shall be a voting ex officio member of the committee.

d. Committee on Facilities. The Committee shall be responsible for keeping under review the planning and operation by the University of its physical plant and all services associated therewith, including transportation and parking.

Committee on Personnel Benefits. The Committee shall have cognizance over the benefits programs for all University personnel. The Committee shall consist of eight faculty members (of whom one shall be a member of the Senate Committee on the Economic Status of the Faculty), three representatives of the Penn Professional Staff Assembly, and three representatives of the Weekly-Paid Professional Staff Assembly. The Vice President for Human Resources, Associate Provost for Faculty Affairs, and Director of Benefits shall serve as nonvoting ex officio members.

e. Committee on Diversity and Equity. The Committee aids Penn in fostering and taking full advantage of its diversity as well as in strengthening ties across all boundaries to enrich and enliven the campus community. The Committee shall advise the offices of the President, Provost, the Executive Vice President, and the Vice Provost for University Life on ways to develop and maintain a supportive atmosphere on campus for the inclusion and appreciation of pluralism among all members of the University community. The Committee shall review and provide advice regarding the University’s equal opportunity and affirmative action programs and policies. The areas in which the Committee shall report to the Council include diversity within the educational and work settings, integration of staff and faculty into the larger campus community, and ways to foster a campus environment that is inclusive and supportive of difference. The Committee also shall advise the administration on specific diversity issues that may arise on campus.

Any standing committee shall have the power to delegate specific tasks or functions to subcommittees whose members shall include one or more members of the parent committee. In addition, as issues arise, subcommittees of standing committees may be constituted, appointed, and given specific charges by the Steering Committee or, in consultation with the Steering Committee, by the Chair of the Faculty Senate, the Committee on Committees, or the chair of a standing committee. The membership of a subcommittee is not limited to members of the relevant standing committee, but to the extent possible members of subcommittees shall include at least one member of that standing committee. Where appropriate a subcommittee may be a joint subcommittee of more than one standing committee.

3. Special Committees

The Council may create special committees to undertake specific tasks or functions. The membership of special committees shall be specified in the charges detailed by the Council in creating such committees.

4. Independent Committees

The Council takes cognizance of several University committees, which it does not directly charge but which may be called upon to report to the Council on specific issues within their purview.

a. Committee on Open Expression. This Committee has as its major task: monitoring the communication processes to prevent conflicts that might emerge from failure of communication, recommending policies and procedures for improvement of all levels of communication, investigating alleged infringements of the right of open expression of any member or members of the University community, advising administrative officers where appropriate, and participating in evaluation and resolution of conflicts that may arise from incidents or disturbances on campus.

The Committee shall consist of seventeen members: eight faculty members, two representatives of the Penn Professional Staff Assembly, one representative of the Weekly-Paid Professional Staff Assembly, three undergraduate students, and three graduate/professional students. The faculty and representatives of the Penn Professional Staff Assembly are appointed to two-year terms, staggered so that in each year either two or three faculty members are appointed, and one representative of the Penn Professional Staff Assembly is appointed. The student members are appointed to one-year terms. The chair of the Committee shall be selected by the Committee on Committees from among the members. The jurisdiction of and procedures of the Committee shall follow the Guidelines on Open Expression.

b. Committee on Honorary Degrees. The Committee solicits nominations from faculty and staff members and students for honorary degrees to be awarded by the University at Commencement and at special convocations and submits a slate of nominees for action by the trustees. It may make recommendations to the President regarding Commencement speakers and the conduct of special convocations. The Committee shall consist of eight faculty members, two graduate/professional students, two undergraduate students, one representative of the Penn Professional Staff Assembly, and one representative of the Weekly-Paid Professional Staff Assembly.
The Faculty Senate
(Source: Manual of the University Senate, 1969; revised, Office of the Faculty Senate, 1981; revised, 2006)

The Statutes of the Trustees (Article 9) state that "there shall be a Faculty Senate composed of members of the Standing Faculty and the Standing Faculty-Clinician-Educator holding the rank of Professor, Associate Professor, or Assistant Professor. The Senate shall provide opportunity for its members to discuss and express their views upon any matter that they deem to be of general interest to the faculty, and to make recommendations and pass resolutions with respect thereto. It shall have power to make recommendations directly to the President, the Provost, and the Trustees, and to request reports from the University administration.

The officers of the Senate are the Chair, the Past Chair, the Chair-Elect, the Secretary, and the Secretary-Elect. The Chair of the Senate is the principal executive officer, calls meetings of the Senate and of the Executive Committee, prepares agendas, and presides at meetings. The Senate Chair also serves simultaneously as the chair of the University Council's Steering Committee.

The Senate Executive Committee consists of the officers of the Senate, thirty-six faculty members elected by separate faculty constituencies, twelve at-large faculty members, three Assistant Professors elected by the faculty as a whole, and one nonvoting representative from the Penn Association of Senior and Emeritus Faculty (PASEF). The Executive Committee meets once each month during the academic year and may act for the Senate on substantive policy issues.

The Committee on Academic Freedom and Responsibility, the Committee on the Economic Status of the Faculty, and the Nominating Committee are standing committees of the Senate whose members are elected by the entire Senate. The Senate Consultation Subcommittee consists of the Chair, Chair-Elect, and Past Chair and regularly meets with the President and Provost during the academic year to discuss matters of concern to the faculty. Other standing committees, appointed by the Executive Committee, are the Committee on the Faculty and Administration, the Committee on Faculty and the Academic Mission, the Committee on Students and Educational Policy, the Committee on Publication Policy for the Almanac, the Committee on Faculty Development, Diversity and Equity and the Committee on Committees. Further information and copies of the Manual of the Faculty Senate may be obtained through the Office of the Faculty Senate.

I.I. Academic Planning and Budget Committee

The purpose of the Committee shall be:

1. to provide the administration advice on the composition of the annual budget and on multi-year financial plans for the University;
2. to take into account, study, and report on long-range implications of current budget issues and alternatives;
3. to provide systematic thought about the evolving educational mission and educational needs of the University, and their present and future budgetary implications;
4. to provide useful early warnings of potential problems and early information on potential opportunities; and
5. to clarify means-ends relationships regarding programs and resources, including a reasoned basis for proposed priorities.

In addition to the general charge to the Committee, the President may from time to time give more specific charges to the Committee. Preferably, such periodic charges will be given at the beginning of the academic year, but the President may frame an ad hoc charge on matters that are either more specific or that are more immediate than the charge given at the beginning of each year. The Committee may, of course, develop its own agenda apart from the President's charges, based upon the Committee's interpretation of the general charge in the context of the University's situation at a given time.

It is to be understood that in regard to major reallocations that would change the character of an academic or other center or school, the President will seek and/or receive advice from other duly constituted advisory and consultative bodies according to the provisions and practices obtaining at the time.

The Committee's work shall be confidential, and it shall be empowered to promise corresponding confidentiality to those with whom it interacts.

The requirement of confidentiality applies only to the proceedings of formal business meetings, including documents and information provided for or at such meetings. It does not apply to open hearings or other non-business formats that the Provost as chair wishes to employ.

The Provost will implement and administer this rule of confidentiality not as an end in itself, but as a means towards the larger ends of the Committee. As such, the Provost will develop, in and through the Committee's practices, the practical accommodations necessary to foster a necessary openness to the University community on the one hand and the confidentiality of the Committee's actual deliberations on the other hand. The practical goal in mind will be to reconcile properly all three of the following principles: openness to information and opinion from outside the Committee; the protection of ongoing deliberations and developing individual positions within the Committee; and the communication of the positions of the Committee as a whole after they have been achieved. In order to achieve this goal, the Committee shall provide progress reports and information on items on the agenda with the aim of facilitating communication between the Committee and the University community.

The Provost, on behalf of the Committee, shall communicate with the President through whatever means and at whatever times are appropriate. In addition, the Provost shall periodically, but at least annually, inform the University community about the advice the Committee has given the President and its reasons.

The Committee shall have fourteen members and two alternate members: nine faculty members, two graduate or professional students (one member, one alternate), two undergraduate students (one member, one alternate), two representatives of the Penn Professional Staff Assembly, and the Provost. The nine faculty shall be chosen as follows: four faculty shall be chosen by the President and five shall be chosen by the Faculty Senate Executive Committee. The two student members and two alternates shall be chosen as follows: one graduate or professional student member and one alternate by the Graduate and Professional Student Assembly; one undergraduate student member and one alternate...
by the Undergraduate Assembly. The two representatives of the Penn Professional Staff Assembly shall be named by the President each year. The Provost shall serve ex officio, and shall serve as chair.

The nine faculty members, chosen as above, may be appointed by the Faculty Senate or the administration for single three-year terms. Faculty members who have served previously may be appointed for one additional term after an interval of at least three years. When vacancies occur due to faculty leaves, resignations, etc., replacement members will be appointed to full three-year terms. It has been the practice that the Past Chair of the Faculty Senate serve a one-year term as a Senate appointee. This one year of service will not be counted as a term. The two student members, and the student alternates, shall serve one-year renewable terms. A student alternate may be renewed as a student member if a vacancy exists and vice versa. In order that there be the potential for partial faculty membership rotation annually, the nine initial faculty appointments shall include three one-year and three two-year appointments which may be renewed as three-year appointments.

The fourteen members shall each have a vote; the Provost as chair shall vote only to resolve a tie. The two alternates may attend all proceedings of the Committee, may be privy to all its information and deliberations, but shall not have voting power, except when a primary student member (undergraduate or graduate or professional) is absent for a particular vote; then the respective alternate may vote in his/her stead.

I.J. The Ombudsman
(Source: Office of the Ombudsman, 1971)

The Ombudsman is appointed by the President and has the following duties:

- To advise members of the University community concerning the authority, actions, and procedures of the University, and the various grievance mechanisms that may be available. The University Community includes faculty, students, alumni, and administrative and staff employees;
- To help resolve grievances of members of the University community on a confidential, informal basis, except where the issues involved are subject to a collective bargaining agreement; and,
- To recommend changes in the policies and procedures of the University that appear desirable so as to assure that, first, members of the University are treated fairly and with respect, and, second, that the principles on which decisions are based are sound.

The Ombudsman is independent of the University's administrative structures and does not make decisions or set policy. The Ombudsman may investigate the facts underlying individual grievances and determine the nature of relevant policies and regulations. In the course of such investigations, the Ombudsman has access to relevant University records and to all members of the University community. When the complainant concerned has granted permission to do so, his or her findings and recommendations may be presented to officers of the University and, if deemed appropriate, to the community at large.

I.K. Equal Opportunity and Affirmative Action
(Source: Office of Equal Opportunity, 1979; revised, Office of Affirmative Action, 1982; revised, Almanac, January 20, 2009 (https://almanac.upenn.edu/archive/volumes/v55/n18/aapolicy.html))

The University of Pennsylvania's special character is reflected in the diversity of the Penn community. Diversity is prized at Penn as a central component of its mission and helps create an educational and working environment that best supports the University's commitment to excellence in teaching, research, and scholarship. We seek talented faculty, students, and staff who will constitute a vibrant community that draws on the strength that comes with a substantive institutional commitment to diversity along dimensions of race, ethnicity, gender, sexual orientation, age, religion, disability, veteran status, interests, perspectives, and socioeconomic status.

Grounded in equal opportunity, nondiscrimination, and affirmative action, Penn's robust commitment to diversity is fundamental to the University's mission of advancing knowledge, educating leaders for all sectors of society, and public service. The University of Pennsylvania prohibits unlawful discrimination based on race, color, sex, sexual orientation, gender identity, religion, creed, national or ethnic origin, citizenship status, age, disability, veteran status, or any other legally protected class.

Penn is committed to ensuring that its academic, social, recreational programs and services as well as opportunities for admission and employment are available on an equitable and nondiscriminatory basis without regard to an individual's legally protected class status. Penn also has written affirmative action programs to address the underrepresentation of women, minorities, people with disabilities, and qualified covered veterans. The Office of Affirmative Action and Equal Opportunity Programs, in collaboration with the Division of Human Resources and the Office of the Provost, oversees the implementation and administration of the University's equal opportunity, affirmative action, and nondiscrimination policies and programs.

The University recognizes the right of members of the community to raise questions and pursue complaints of discrimination and adheres to a strict policy that prohibits retaliation for doing so. Questions, complaints of alleged discrimination, or concerns regarding these policies or their implementation may be directed to the Executive Director, Office of Affirmative Action and Equal Opportunity Programs, Sansom Place East, Suite 228, 3600 Chestnut Street, Philadelphia, PA 19104-6106, (215) 898-6993 (Voice) or (215) 898-7803 (TDD).

University of Pennsylvania Nondiscrimination Statement
(To be used in University publications)

The University of Pennsylvania values diversity and seeks talented students, faculty and staff from diverse backgrounds. The University of Pennsylvania does not discriminate on the basis of race, color, sex, sexual orientation, gender identity, religion, creed, national or ethnic origin, citizenship status, age, disability, veteran status or any other legally protected class status in the administration of its admissions, financial aid, educational or
II. Faculty Policies and Procedures

II.A. Academic Freedom and Responsibility

(Source: Resolution of the Executive Board of Trustees, February 13, 1953; Statutes of the Trustees, September 16, 1959 and Handbook for Faculty and Administration, 1969; revised, Statutes of the Trustees, Article 10, June 17, 1983; revised as Article 11, November 2, 2001 [https://secretary.upenn.edu/trustees-governance/statutes-trustees/#eleven])

The University recognizes the importance of a system of tenure for faculty members as the preeminent means of fostering and protecting academic freedom in teaching and in scholarly inquiry. There shall be a Senate Committee on Academic Freedom and Responsibility of ten members, consisting of the Faculty Senate Chair-Elect and nine members of the Faculty Senate, three of whom are selected each year in accordance with the Rules of the Senate. This committee shall advise and consult with each faculty’s Committee on Academic Freedom and Responsibility, and with administrative officers, on the establishment of appropriate procedures to be followed in the event of a claim of violation of academic freedom or responsibility. At the beginning of each year, the Senate Committee on Academic Freedom and Responsibility shall distribute the “Procedural Principles for Handling Complaints Concerning Academic Freedom and Responsibility” to the members of each faculty’s Committee on Academic Freedom and Responsibility. The Committee shall have power to make investigations, reports, and recommendations on any matter relating to academic freedom and responsibility within the University. The Committee shall be governed in its responsibilities and procedures by rules established by the Faculty Senate. Each faculty shall have a standing Committee on Academic Freedom and Responsibility that shall be elected annually. Each faculty’s Committee on Academic Freedom and Responsibility shall, subject to review by the faculty, and to the extent provided in the relevant procedures, including the Procedures Governing Sanctions Taken Against Members of the Faculty adopted on June 20, 1997, and as they may be hereafter amended, represent the faculty in all proceedings that involve temporary exclusion of or imposition of a major sanction on a faculty member; suspension or termination of the appointment of a faculty member, some matters arising from financial exigency proceedings, or other questions concerning an individual faculty member’s claim of violation of his or her academic freedom. The committee shall have power to make investigations, reports, and recommendations on any matter relating to academic freedom and responsibility within the school that may affect one or more faculty members.

II.B. Structure of the Academic Staff

II.B.1. Standing Faculty

(Source: Standing Resolution of the Trustees, June 4, 1976; revised, September 9, 1983 and Statutes of the Trustees, Article 9, 1983; revised as Article 10, November 2, 2001 [https://secretary.upenn.edu/trustees-governance/statutes-trustees/#ten]; revised, Office of the Provost, June 13, 2019)
The essential requisite for membership in the Standing Faculty is a commitment to both the advancement and the communication of knowledge. The Standing Faculty is composed of all faculty members with tenure or in tenure-probationary status. Permissible ranks in the Standing Faculty are Professor, Associate Professor, and Assistant Professor.

**Professor**

The title of Professor signifies that the holder is a mature scholar whose achievements have won outstanding approval both by scholars outside the University and by his or her faculty colleagues, and whose presence on the faculty enhances the prestige of the University. Appointment to this rank is not merely a recognition of length of service, but also of outstanding quality. Such an appointment is for an indefinite term.

**Associate Professor**

Appointment to this rank is made only to a person who has demonstrated the personal and intellectual qualities that with increased maturity are expected to lead to appointment to a professorship. Appointment to the rank of Associate Professor may be for a fixed or indefinite term.

**Assistant Professor**

Appointment as Assistant Professor is accorded to a person who has completed his or her final earned degree or other professional certification relevant to his or her discipline and who has given evidence of superior potential for development in academic stature. As most persons in this rank are passing through an early period of their scholarly growth, departmental and school policies should provide a variety of educational experiences, including the opportunity to conduct original research and to participate in undergraduate, graduate, and professional levels of instruction. Appointment in this rank provides a period during which an individual has an opportunity to confirm his/her own interest and motivation to assume University faculty responsibilities, and also one in which senior faculty may assess the promise and the competence of the faculty member's performance in both instruction and scholarly productivity. Appointment to the rank of Assistant Professor is always for a fixed term.

**II.B.2. Standing Faculty-Clinician-Educator**

(Source: Standing Resolution of the Trustees, June 4, 1976; revised as Article 10, Statutes of the Trustees, November 2, 2001 (https://secretary.upenn.edu/trustees-governance/statutes-trustees/#ten); for dates of specific resolutions regarding the adoption of this rank by various University schools, see paragraph two below; revised by Resolution of the Trustees, June 20, 2014 (https://almanac.upenn.edu/archive/volumes/v61/n01/clinician-educator.html#sthash.JV3oVbvdqfPD.))

The category of Clinician-Educator is maintained within the University’s four health schools—the School of Dental Medicine, the Perelman School of Medicine, the School of Nursing and the School of Veterinary Medicine. This track is intended for full-time faculty whose responsibilities include clinical activities, scholarship and teaching.

For each of the health schools, appropriate Trustee action has been taken. In the School of Dental Medicine, the Clinician-Educator category was established in 1981; in the Perelman School of Medicine, in 1976; and in the Schools of Nursing and Veterinary Medicine, in 1983. The Clinician-Educator guidelines for the four health schools were clarified in 2013.
