## TABLE OF CONTENTS

Undergraduate Catalog ................................................................. 17

Programs .......................................................................................... 17

School of Arts & Sciences ................................................................. 21

Curriculum .......................................................................................... 22

General Education Curriculum .......................................................... 22

Foundational Approaches ................................................................ 23

Sectors ................................................................................................ 24

The Major ........................................................................................... 25

Free Electives .................................................................................... 25

Academic Opportunities ...................................................................... 25

Advising ................................................................................................ 25

Policies and Procedures ...................................................................... 25

Majors .................................................................................................. 25

Africana Studies: African American Studies, BA ......................... 27

Africana Studies: African Diaspora Studies, BA ......................... 28

Africana Studies: African Studies, BA .......................................... 28

Ancient History, BA ........................................................................... 29

Anthropology: Archaeology, BA .................................................... 30

Anthropology: Cultural and Linguistic Anthropology, BA ............. 30

Anthropology: Environmental Anthropology, BA ....................... 31

Anthropology: General Anthropology, BA ..................................... 31

Anthropology: Biological Anthropology, BA ................................. 32

Anthropology: Medical Anthropology & Global Health, BA .......... 33

Architecture: Design (Intensive), BA .............................................. 33

Architecture: Design, BA ................................................................. 34

Architecture: History and Theory, BA .......................................... 34

Biochemistry, BA .............................................................................. 35

Biological Basis of Behavior, BA ................................................... 35

Biology: Computational Biology, BA ............................................ 36

Biology: Ecology & Evolutionary Biology, BA ............................... 37

Biology: General Biology, BA ......................................................... 38

Biology: Mathematical Biology, BA ............................................... 39

Biology: Mechanisms of Disease, BA ............................................ 39

Biology: Molecular & Cell Biology ................................................ 40

Biology: Neurobiology, BA .............................................................. 41

Biophysics, BA .................................................................................. 42

Chemistry, BA .................................................................................. 42

Cinema and Media Studies, BA ..................................................... 43

Classical Studies: Classical Civilizations, BA ................................. 44

Classical Studies: Classical Languages and Literature, BA .......... 44

Classical Studies: Mediterranean Archaeology, BA .................... 45

Cognitive Science: Cognitive Neuroscience, BA ......................... 45

Cognitive Science: Computation and Cognition, BA .................... 46

Cognitive Science: Individualized, BA ........................................... 47

Cognitive Science: Language & Mind, BA ..................................... 48

Communication & Public Service, BA ............................................ 48

Communication, BA ......................................................................... 49

Comparative Literature: (Trans)national Literatures, BA .............. 50

Comparative Literature: Globalization, BA ..................................... 51

Comparative Literature: Theory, BA .............................................. 52

Criminology, BA .............................................................................. 53

Design, BA ....................................................................................... 53

Earth Science: Environmental Science, BA .................................... 54

Earth Science: Geology, BA .............................................................. 55

Earth Science: Paleobiology, BA ....................................................... 56

East Asian Languages and Civilizations: Chinese and Japanese, BA .......................................................... 57

East Asian Languages and Civilizations: Chinese, BA .................. 57

East Asian Languages and Civilizations: East Asian Area Studies, BA .......................................................... 58

East Asian Languages and Civilizations: Japanese, BA ................ 59

East Asian Languages and Civilizations: Korean, BA .................... 59

Economics, BA ................................................................................. 60

English: 18th/19th Centuries, BA ..................................................... 61

English: 20th/21st Centuries, BA ...................................................... 61

English: Africana Literatures & Culture, BA ................................... 62

English: American Literature & Culture, BA ................................. 63

English: Celtic Literature & Culture, BA ........................................ 63

English: Cinema & Media Studies, BA ........................................... 64

English: Colonial & Postcolonial, BA ............................................. 64

English: Creative Writing, BA ........................................................ 65

English: Drama, BA ........................................................................ 66

English: Gender/Sexuality, BA ....................................................... 66

English: General English, BA ........................................................ 67

English: Historical, BA .................................................................... 67

English: Individualized, BA ............................................................ 68

English: Law and Literature, BA .................................................... 69

English: Literary Theory & Cultural Studies, BA ......................... 69

English: Literature, Journalism and Print Culture, BA ............... 70

UNDERGRADUATE CATALOG

This Catalog provides detailed information for current and prospective students about traditional undergraduate programs at Penn as well as important academic policies and resources for undergraduate students. It also provides information about courses at all levels of study.

This Catalog is intended to provide general information about the University of Pennsylvania and is accurate as of May 2019. The University reserves the right to change, modify, or correct any information contained herein without prior notice, at any time.

Programs

The following list includes undergraduate programs. PhD, master’s, certificate, and other professional degree programs are listed in the Graduate Catalog (p. 286).

A

- Accounting, BS (p. 229)
- Actuarial Mathematics, Minor (p. 143)
- Actuarial Science, BS (p. 229)
- Africana Studies, Minor (p. 143)
- Africana Studies: African American Studies, BA (p. 27)
- Africana Studies: African Diaspora Studies, BA (p. 28)
- Africana Studies: African Studies, BA (p. 28)
- American Public Policy, Minor (p. 144)
- American Sign Language and Deaf Studies, Minor (p. 144)
- Ancient History, BA (p. 29)
- Ancient History, Minor (p. 144)
- Anthropology, Minor (p. 145)
- Anthropology: Archaeology, BA (p. 30)
- Anthropology: Biological Anthropology, BA (p. 32)
- Anthropology: Cultural and Linguistic Anthropology, BA (p. 30)
- Anthropology: Environmental Anthropology, BA (p. 31)
- Anthropology: General Anthropology, BA (p. 31)
- Anthropology: Medical Anthropology & Global Health, BA (p. 33)
- Applied Positive Psychology, Certificate (p. 186)
- Archaeological Science, Minor (p. 145)
- Architectural History, Minor (p. 145)
- Architecture, Minor (p. 145)
- Architecture: Design (Intensive), BA (p. 33)
- Architecture: Design, BA (p. 34)
- Architecture: History and Theory, BA (p. 34)
- Asian American Studies, Minor (p. 146)

B

- Behavioral Economics, BS (p. 230)
- Biochemistry, BA (p. 35)
- Bioengineering, BSE (p. 193)
- Bioethics, Minor (p. 146)
- Biological Basis of Behavior, BA (p. 35)
- Biological Basis of Behavior, Minor (p. 146)
- Biology, Minor (p. 147)
- Biology: Computational Biology, BA (p. 36)
- Biology: Ecology & Evolutionary Biology, BA (p. 37)
- Biology: General Biology, BA (p. 38)
- Biology: Mathematical Biology, BA (p. 39)
- Biology: Mechanisms of Disease, BA (p. 39)
- Biology: Molecular & Cell Biology, BA (p. 40)
- Biology: Neurobiology, BA (p. 41)
- Biomedical Science, BAS (p. 194)
- Biophysics, BA (p. 42)
- Biophysics, Minor (p. 147)
- Business Analytics, BS (p. 231)
- Business Economics and Public Policy, BS (p. 233)

C

- Chemical and Biomolecular Engineering, BSE (p. 196)
- Chemical and Biomolecular Engineering, Minor (p. 210)
- Chemistry, BA (p. 42)
- Chemistry, Minor (p. 148)
- Cinema and Media Studies, BA (p. 43)
- Cinema and Media Studies, Minor (p. 148)
- Classical Studies, Minor (p. 148)
- Classical Studies: Classical Civilizations, BA (p. 44)
- Classical Studies: Classical Languages and Literature, BA (p. 44)
- Classical Studies: Mediterranean Archaeology, BA (p. 45)
- Climate Change, Certificate (p. 186)
- Cognitive Science, Minor (p. 149)
- Cognitive Science: Cognitive Neuroscience, BA (p. 45)
- Cognitive Science: Computation and Cognition, BA (p. 46)
- Cognitive Science: Individualized, BA (p. 47)
- Cognitive Science: Language & Mind, BA (p. 48)
- Communication: Communication & Public Service, BA (p. 48)
- Communication: General Communication, BA (p. 49)
- Comparative Literature, Minor (p. 149)
- Comparative Literature: (Trans)national Literatures, BA (p. 50)
- Comparative Literature: Globalization, BA (p. 51)
- Comparative Literature: Theory, BA (p. 52)
- Computational Biology, BAS (p. 197)
- Computational Neuroscience, Minor (p. 149)
- Computer and Cognitive Science, BAS (p. 198)
- Computer Engineering, BSE (p. 199)
- Computer Science, BAS (p. 202)
- Computer Science, BSE (p. 200)
- Computer Science, Minor (p. 210)
- Consumer Psychology, Minor (p. 150)
- Creative Studies, BAAS (p. 175)
- Creative Writing, Certificate (p. 187)
- Creative Writing, Minor (p. 150)
- Criminology, BA (p. 53)
### Programs

**D**
- Data Analytics and Psychological Sciences, BAAS (p. 177)
- Data Analytics and Social Sciences, BAAS (p. 178)
- Data Analytics, Certificate (p. 187)
- Data Science, Minor (p. 211)
- Design, BA (p. 53)
- Digital Humanities, Minor (p. 151)
- Digital Media Design, BSE (p. 203)

School of Arts & Sciences

In the tradition of its eighteenth-century founders, the College of Arts and Sciences (https://www.college.upenn.edu) regards the enduring purpose of education as the liberation of the mind from ignorance, superstition, and prejudice. From its central position in an international research university, the College invites students to explore the broad spectrum of human knowledge and takes pride in its capacity to respond to the particular intellectual needs of those who join it. The College thrives on the diversity of scholars and students whose interests it sustains and whose intellectual goals it unites.

Study of the arts and sciences provides a solid basis for advanced scientific and scholarly research, for subsequent training in the professions, and for the informed exercise of the rights and responsibilities of citizenship. The College’s goal is to help students to become knowledgeable about the world and the complexities of today’s society, aware of moral, ethical, and social issues, prepared to exercise intellectual leadership, and enlivened by the use of their mind.

The College is committed to offering a broad education that will lay a durable foundation for critical and creative thinking. We believe that students should explore fundamental approaches to the acquisition and interpretation of knowledge through introduction to substantive bodies of current thought in the natural sciences, social sciences, and humanities. Equally important, they should learn to understand and evaluate the sources and methods from which this knowledge derives. In this way they can be led to appreciate the contingency of all knowledge and to participate in the ongoing excitement of intellectual discovery that is at the heart of the College.

We challenge our students to develop the skills of analysis and communication that will enable them to perceive pattern in complexity, render reasoned judgments, make wise choices under conditions of uncertainty, and join with others in the pursuit of common endeavors. They should, for example, be able to write and speak effectively and to use another people’s language as one means of access to the diversity of contemporary and historical culture.

A student’s emerging interests and talents find expression through an organized program of study in a major field. In the specialized context of the major, students investigate the traditions and contemporary status of an established branch of knowledge. The structured study of a discipline complements the general exploration of our intellectual heritage to provide the balance of educational breadth and depth to which the College is committed.

There is no single or easy path to the benefits of liberal education. A program of study must be shaped as a student grows. But the special strengths of the University of Pennsylvania—its combination of academic and professional excellence, its diverse and interdisciplinary tradition, its active community of scholars at all levels of experience—provide a setting in which the College can dedicate itself to nurturing honest, eager, and critical minds. The College welcomes those who seek to understand, appreciate, and contribute to the achievements of the human intellect.

The College of Arts and Sciences (https://www.college.upenn.edu) is the full-time undergraduate division of the School of Arts and Sciences (SAS), which offers the Bachelor of Arts (B.A.) degree. Other divisions include:

- The Graduate School of Arts and Sciences which offers the advanced degrees of Master of Arts (M.A.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.);
- The College of Liberal and Professional Studies (LPS) is the home of lifelong learning at the University of Pennsylvania. It offers high school, undergraduate, post-baccalaureate, graduate, summer and online studies as well as customizable professional training with courses that span across disciplines. LPS also administers the Summer Sessions.

The twenty-seven departments in SAS represent the core disciplines of the liberal arts. They individually offer thirty-two major programs. In addition, through interdepartmental collaborations, the SAS faculty offer a number of interdisciplinary majors. Around SAS are grouped the various specialized professional schools, all of them drawing extensively on the intellectual resources provided by SAS. Two of these schools, the Annenberg School for Communication and the School of Design, offer undergraduate majors for College students through special collaborative relationships with SAS.

The College aims to provide its undergraduates with a broad general education that will lay the groundwork for critical and creative thinking in all fields. Ideally the graduate of the College will be well informed about the world and confident in today’s complex technological society. He or she will be willing and able to make critical judgments and to exercise intellectual leadership. The B.A. degree thus provides a solid basis for specialized scientific and scholarly research, for education for the professions, and for the informed exercise of the rights and responsibilities of citizenship.

The University of Pennsylvania is particularly well placed to provide its students with an education that links the theoretical and the practical. Within the College and the other schools is an extraordinary range of programs. The College alone offers over fifty different major programs. The College does its best to make all of the University’s resources accessible to its students, giving them wide latitude in planning their programs of study and in deciding on their areas of specialization.

In 1739, the noted evangelist George Whitefield preached to thousands of Philadelphians. His sermons were so impressive that, one year later, a “House of Public Worship” and “Charity School” were established at Fourth and Arch Streets for the religious education of young men. Whitefield supported the idea of forming a “Negro School,” but it was never implemented due to lack of support. The “Charity School” was not officially opened until 1749, when Benjamin Franklin and twenty-one leading citizens of Philadelphia founded an “Academy.” By 1755, the academy had come to be known as the “College, Academy and Charitable School of Philadelphia in Pennsylvania.” The first commencement took place on May 17, 1757, and graduated a class of seven.

Alumni of the College of Philadelphia were instrumental in the development of the nation and played vital roles in the American Revolution. Twenty-one members of the Continental Congress were graduates of the College; nine signers of the Declaration of Independence were either trustees or alumni; and eleven signers of the Constitution were associated with the College. In 1779, Pennsylvania’s state legislature decided that the College was a hotbed of loyalism and tried to abrogate its charter. The provost and trustees of the College refused to be unseated. This forced the legislature to transfer the assets and property to a new board of trustees of a “University of the State of Pennsylvania.” After a ten-year legal battle, the College was allowed to reopen its doors in its old buildings. Meanwhile, the University continued down the block on Fifth and Chestnut Streets. This situation continued until 1791, when the two merged to form what we now know as the University of Pennsylvania, the first university in the United States.
During Benjamin Franklin’s forty years on the board of trustees, his idea of combining practical and traditional education guided the curriculum of the University. Thanks to Franklin, Penn went beyond the traditional classical education and diversified into the sciences, mathematics, history, logic and philosophy. Franklin indicated his philosophy of education when, in establishing the University, he said, “As to their Studies, it would be well if they could be taught every thing that is useful . . . Regard being held to the several Professions for which they are intended.” This emphasis on the practical aspects of education distinguished the University of Pennsylvania from other colleges and universities of the era. The tradition has continued. For example, the first medical school (1765), the first law classes (1850) and the first business school (1881) in America were founded here.

The University arrived at its present location by twice moving west. In 1802, it moved from Fourth and Arch Streets into a mansion on Ninth and Chestnut Streets built for, but never occupied by, the President of the United States. It moved again in 1872 to a ten-acre spot of land located across the Schuylkill River that was purchased for $80,000. That plot of land was in a section called Blockley Township, a semi-rural area known mostly for its alm house and the Hamilton Grange, a farm.

The Pennsylvania courts ruled in 1877 that the University should provide scholarships to young men and “instruction to female students so far as may be convenient and practicable in the University building.” Therefore, in 1878, the Towne Scientific School and the Music Department responded by admitting nine women into their programs. In 1879 George Whitefield’s dream of a “Negro School” was realized when Penn admitted one black student to the College, one to the Dental School and one to the Medical School. The Law School was the first major division of the University to admit women to its courses as degree candidates. The College of Liberal Arts for Women was established in 1933 to provide women with a liberal arts education instead of one designed specifically for teachers. The College for Women merged with the College of Arts and Sciences in 1974, thus forming our modern-day School of Arts and Sciences, which includes the Graduate School, the College of Liberal and Professional Studies and the College of Arts and Sciences.

The College is the largest of the undergraduate schools, enrolling 6,000 of the University’s 10,000 undergraduates, and it teaches all of Penn’s undergraduates. The study of the arts and sciences provides students with critical perspectives on their world and with the fundamental intellectual skills necessary for engaging it. As Franklin recognized, professional education relies on the sustenance provided by the arts and sciences and could not exist without them. The School of Arts and Sciences remains the heart and the soul of the modern University.

The fundamental purpose of the University as an academic community is the pursuit of knowledge. Essential to the success of this educational mission is a commitment to the principles of academic integrity. Academic work represents not only what we have learned about a subject but also how we have learned it. Values and beliefs about academic integrity have been adopted by scholars so that others may trace our honorable footsteps, verify what we have learned, and build upon our work. Every member of the University community is responsible for upholding the highest standards of honesty at all times.

As members of the University community, students are also responsible for adhering to the principles and spirit of the Code of Academic Integrity (p. 1771). Penn believes strongly in the importance of academic integrity. Students who violate its precepts are subject to punishment through the judicial system. Ignorance of the rules is no excuse. If a student is unsure whether his or her action(s) constitute a violation of the Code of Academic Integrity, it is that student’s responsibility to consult with the instructor to clarify any ambiguity.

**Curriculum**

**The Purpose of the Curriculum**

A curriculum is often identified with a set of degree requirements: “What do I have to do to receive my degree?” But degree requirements are not themselves sufficient to define appropriate educational goals. One might fulfill all of the College’s degree requirements and yet fail to get a good education. It would also be possible to acquire a good education but neglect to fulfill the degree requirements. Now, we certainly do want you to fulfill all of the degree requirements, and we will work with you to see that this happens. But you are not here fundamentally for the purpose of completing degree requirements. If you think of your education solely in those terms, the result will be dull and unsatisfying.

“Curriculum” comes from the Latin for “course,” in the sense in which one might speak of the course of a journey. The term denotes a means rather than an end, but it suggests better than “degree requirements” what it is to become educated. It denotes a movement from a starting point to a destination, a movement that proceeds along some path. You are not left to your own devices to figure out how to get from here to there. But neither is the path straight and narrow. You will have many choices to make as you negotiate the course of your education, but they will be informed by the experience of the faculty, who in the curriculum offer their considered advice for your educational journey.

The College’s curriculum draws you toward two distinctive goals: toward general education across the wide range of the arts and sciences and toward specialized education in a major. A commitment to holding these two—general and specialized education—together has been the genius of American higher education since the early part of the last century. We continue to believe that these two elements constitute an education best suited to enabling intelligent individuals to live humane, productive and fulfilling lives in the 21st century.

The College of Arts and Sciences curriculum (https://www.college.upenn.edu/curriculum) provides you with an academic framework for becoming an educated and successful citizen of the 21st century. Its flexible structure is designed to inspire curiosity and frame opportunities while drawing you toward two distinct goals: general education across the wide range of the arts and sciences and specialized education in a major. With help from academic advisors, you will select from a variety of courses to fulfill each element of the curriculum. You may also choose to expand your academic experience beyond the classroom through options like research or study abroad.

The elements of the College Curriculum are:

- The General Education Curriculum (p. 22)
- The Major (p. 25)
- Free Electives (p. 25)

Visit the College website (https://www.college.upenn.edu/curriculum-policy) for policies governing the College Curriculum.

**General Education Curriculum**

The College’s General Education Curriculum for its part has two broad objectives. It seeks to develop in you some general skills or approaches
to knowledge and to engage you in the intellectual work of the disciplines in a variety of fields across the arts and sciences.

In following this curriculum, you will be guided by two kinds of degree requirements corresponding to these two objectives. One deals with foundational approaches, the other with specific disciplines and fields of knowledge. Within any given course, these two—an approach and a field of study—are integral to one another. An approach is learned by practice in relation to a field of knowledge: your ability to use a foreign language is developed through learning about the culture in which the language is rooted; understanding a work of art is acquired by learning how to write about it—that is, by learning how to use words to describe, compare, question and argue about works of art and the contexts in which they were created and are appreciated; you learn how to analyze quantitative data by thinking about what data mean for our knowledge of natural or social phenomena we observe. Some courses, however, give priority to developing skills and approaches, while others give priority to the field under investigation.

The General Education component of the Curriculum is comprised of two elements. Foundational Approaches (p. 23) develop key intellectual capabilities demanded in a variety of disciplines, while Sectors of Knowledge (p. 24) allow you to tailor your own education in the arts and sciences while gaining valuable knowledge across a broad range of disciplines.

Visit the College website (https://www.college.upenn.edu/curriculum) for more information on the College curriculum.

Foundational Approaches

Writing

Writing is the primary medium through which the quality of a student’s intellectual work will be judged. The ability to express oneself clearly and persuasively in writing is fundamental for success across all academic disciplines, and throughout one’s personal and professional life.

For these reasons, writing plays a central role within the College curriculum. Students must take a writing seminar to fulfill the College’s Writing Requirement. It is recommended that students take this course during their first year of study. Students are also encouraged to continue development of their writing skills by participating in Penn’s writing programs.

Foreign Language

Competence in a foreign language is essential for an educated person. Participation in the global community is predicated on the ability to understand and appreciate cultural difference, and nothing brings this more sharply into focus than the experience of learning a foreign language. The foreign language not only affords unique access to a different culture and its ways of life and thought; it also increases knowledge of one’s own language and culture. For this reason, College students are required to attain a certain degree of competency.

While students often opt to satisfy the Language Requirement by continuing to study the language that they have already begun in high school or earlier, the wealth of languages that the University offers is such that many students decide to explore a new culture and area of our globe by beginning a foreign language that they have never studied before. French, Spanish, and a few other languages are taught at the pre-collegiate level, but students are less likely to have been exposed to Arabic, Hindi or Japanese—let alone Uzbek or Hausa—and each of these languages is a mode of access to a fascinating culture and history.

Quantitative Data Analysis

In contemporary society, citizenship, work and personal decision-making all require sophisticated thinking about quantitative evidence.

Students in the College must complete a course that uses mathematical or statistical analysis of quantitative data as an important method for understanding another subject. Through such study, students learn to think critically about quantitative data and the inferences that can be drawn from these data. They also gain experience with the use of quantitative analysis to interpret empirical data and to test hypotheses.

Courses in calculus and computer science do not fulfill the requirement because these courses do not require students to analyze actual data sets with the goal of evaluating hypotheses or interpreting results. To count toward the Quantitative Data Analysis Requirement, a course must include such data analysis.

Formal Reasoning and Analysis

In contrast to Quantitative Data Analysis courses, which deal with inductive reasoning, courses designated for this requirement focus on deductive reasoning and the formal structure of human thought, including its linguistic, logical and mathematical constituents. These courses emphasize mathematical and logical thinking and reasoning about formal structures and their application to the investigation of real-world phenomena. In addition to courses in mathematics, this requirement includes courses in computer science, formal linguistics, symbolic logic and decision theory.

Cross Cultural Analysis

In our increasingly interconnected world, the Cross-Cultural Analysis Requirement aims to increase students’ knowledge and understanding of socio-cultural systems outside the United States.

College students are required to take at least one course to develop their ability to understand and interpret the cultures of peoples with histories different from their own. The focus may be on the past or the present and it should expose students to distinctive sets of values, attitudes and methods of organizing experience that may not be obtained from American cultures. This exposure to the internal dynamic of another society should lead students to understand the values and practices that define their own cultural framework.

Cultural Diversity in the U.S.

The Cultural Diversity in the U.S. Requirement complements the Cross-Cultural Analysis Requirement and aims to develop students’ knowledge of the history, dynamic cultural systems and heterogeneous populations that make up the national culture of the United States.

College students are required to take at least one course to develop the skills necessary for understanding the population and culture of the United States as it becomes increasingly diverse. Through historical inquiry, the study of cultural expressions and the analysis of social data, students will develop their ability to examine issues of diversity with a focus on race, ethnicity, gender, sexuality, class and religion. The goal is to equip graduates with the ability to become perceptive and engaged members of society.
Sectors

The sectors are intended to ensure breadth of education across the sectors or fields of knowledge, along with interdisciplinary explorations that link several fields of knowledge.

I. Society

This sector focuses on the structure and norms of contemporary human society, including their psychological and cultural dimensions.

Courses in this sector use many analytical techniques that have been developed to study contemporary society, with its complex relations between individuals and larger forms of mass participation. Some Society courses are largely devoted to the analysis of aggregate forms of human behavior (encounters, markets, civil society, nations, supranational organizations, and so on), while others may focus on the relations between individuals and their various societies. While historical materials may be studied, the primary objective of Society courses is to enable students to develop concepts and principles, test theories, and perfect tools that can be used to interpret, explain and evaluate the behavior of human beings in contemporary societies. This objective will be realized through the specific content of the various courses, but the emphasis in each course should be on developing in students a general capacity for social analysis and understanding.

II. History and Tradition

This sector focuses on studies of continuity and change in human thought, belief and action. Understanding both ancient and modern civilizations provides students with an essential perspective on contemporary life. Courses in this sector examine the histories of diverse civilizations, their cultures and forms of expression, their formal and informal belief systems and ideologies, and the record of their human actors. Students should learn to interpret primary sources, identify and discuss their core intellectual issues, understand the social contexts in which these sources were created, pose questions about their validity and ability to represent broader perspectives and utilize them when writing persuasive essays.

III. Arts & Letters

This sector encompasses the means and meaning of visual arts, literature and music, together with the criticism surrounding them.

Most courses in this sector are concerned with works of creativity—paintings, films, poetry, fiction, theatre, dance and music. They generally address a considerable breadth of material rather than an individual work or artist. The objective of Arts and Letters courses is to confront students with works of creativity; cultivate their powers of perception (visual, textual, auditory); and equip them with tools for analysis, interpretation and criticism. This objective will be realized through the specific content of the various courses, but the emphasis in each course should be on developing and strengthening in students a general capacity for understanding meaning and the ways in which it is achieved in its distinctive environment of culture and moment.

IV. Humanities & Social Science

This sector comprises courses that combine methods and approaches at work in at least two of the first three sectors.

Students will engage with diverse approaches to society, history, tradition and the arts more deeply than a single course from each domain can allow. Greater depth of experience is gained by bringing to bear several humanistic and social scientific perspectives upon a single issue or topic or by engaging directly in academically-based service or performance informed by these perspectives.

In this sector, students seek to broaden their perspective by taking a course in the humanities or social sciences that has been approved as a general education course but that cuts across two or more of sectors I, II, and III. Some courses approved for this sector will seek a more integrative approach by addressing a problem or topic from a variety of disciplinary perspectives. Others will combine disciplinary study with community service or activism, and constructively and reflectively connect the theoretical with the actual. Finally, some courses in the arts that combine creative or performance experience with reflection and grounding within a discipline may be found in this sector.

V. The Living World

This sector deals substantively with the evolution, development, structure and/or function of living systems.

Courses in this sector study the variety of approaches that are useful in understanding the diversity of living organisms, their interrelatedness, and their interactions with their environment. Analytical approaches employed range from analyses at the molecular and cellular level, to analyses of the cognitive and neural bases of behavior, to analyses of evolutionary processes and ecological systems. Students learn the methods used by contemporary natural science to study these topics, including ways in which hypotheses are developed, tested, and reformulated in light of new research findings. A full understanding of living organisms incorporates insights from approaches at many different levels.

VI. The Physical World

This sector focuses on the methodology and concepts of physical science.

Courses in this sector aim to provide insight into the content and workings of modern physical science. Some courses in this sector are part of a major, while others are designed primarily to provide an introduction to the field for non-science majors. Courses for non-science majors may include some discussion of the historical development of the subject as well as the most important conceptual notions and their mathematical expressions. All courses in this sector seek to demonstrate the generally accepted paradigm of modern science: experiment and observation suggest mathematically formulated theories, which are then tested by comparison with new experiments and observations.

All courses in this sector use a significant mathematical prerequisite (advanced high school algebra through introductory calculus) – that is, students will actually be expected to use mathematical methods and concepts to achieve an understanding of subjects in physical science.

VII. Natural Sciences & Mathematics

Students should engage with the diverse approaches to the natural sciences and mathematics more deeply than a single course from the physical and life sciences would allow. Greater depth of experience can be accomplished by either greater focus on one area, study in a related area, bringing various scientific perspectives to bear upon a single issue or topic, or engaging directly in academically-based activities informed by these perspectives.
In this sector, students broaden their perspective by taking a course in the natural sciences or mathematics that has been approved as a General Education course and that cuts across the two sectors. Other courses approved for this sector will seek a more integrative approach by addressing a problem or topic from a variety of disciplinary perspectives. Still others will combine disciplinary study with community service or activism, constructively and reflectively connecting the theoretical with the actual.

The Major

The Major provides an opportunity to know a segment of human knowledge deeply, with a sufficient grasp of its modes of thinking and analysis to make your own contribution.

The College offers more than 55 majors (p. 25) across the humanities, social sciences and natural sciences, and many programs provide options for concentrating in any number of specialty areas.

Visit the College website (https://www.college.upenn.edu/curriculum) for more information on the College curriculum.

Free Electives

In addition to these structural elements, the curriculum provides space in your studies for a number of Free Electives. These give you the freedom to pursue interests that may lie outside your major and that extend beyond those addressed in the General Education Curriculum. Take a course in a field that you have not otherwise encountered. Use one or more Free Electives to explore further a subject introduced in a sector course or learn about a subject that sheds light on your major.

Visit the College website (https://www.college.upenn.edu/curriculum) for more information on the College curriculum.

Academic Opportunities

Learning happens inside and outside of the traditional classroom.

The value of a rich liberal arts tradition extends beyond the curriculum itself to the far reaches of cutting edge research and real-world internships, community partnerships and study abroad.

• Penn is a world-class research institution where undergraduates have the opportunity to participate in the creation of knowledge.
• Students in the College integrate knowledge from a variety of specializations or dig deeply into a particular area of study.
• Through their work with local schools and organizations, students in Academically Based Community Service Courses combine classroom and community work to solve critical issues.
• Students in study abroad programs and internship experience diverse communities and real world challenges in and outside of Philadelphia.

Visit the College website (https://www.college.upenn.edu/courses-options) for a comprehensive view of academic opportunities for College students.

Advising

College students need to choose courses, declare a major and define career goals. They will need to examine their performance in different courses, identify their skills and those they wish to develop, and decide what really matters to them. Much of this assessment they will do themselves, but faculty members, academic advisors, career counselors and peers can help.

Students in the College have a strong network of academic advisors available to assist them throughout their undergraduate careers.

• Pre-major advisors help first- and second-year students navigate their entrance into academic and intellectual life in the College beginning with the issues of incoming freshmen and continuing through the student’s exploration of a potential major.
• Peer advisors work with the pre-major advisor and are one of the first points of contact for incoming College students. They provide the perspective of an upperclass student in the College and assist first-year students in making the transition from high school to Penn by sharing their strategies for academic success and knowledge of campus resources.
• After declaring a major, students are assigned an academic advisor affiliated with the major department or program.
• All students are welcome and encouraged to speak with assistant deans for advising in the College Office. These advisors can help students explore the many options and opportunities available to College students, and are available by appointment or on a walk-in basis throughout the year.

For more information, visit the College website (https://www.college.upenn.edu/advising).

Policies and Procedures

The College of Arts and Sciences Policies and Procedures are intended to provide guidelines for academic conduct and planning.

• Students are subject to the policies and procedures in place for the class into which they matriculated. Class-specific Policies and Procedures manuals can be found on the College site.
• Policies and procedures are subject to change throughout the year at the discretion of the University of Pennsylvania and the College of Arts and Sciences.
• Students are encouraged to consult with an academic advisor in the College Office for further information and clarification.

For class-specific manuals and current policies, visit the College website (https://www.college.upenn.edu/policies).

Africana Studies: African American Studies, BA

Africana Studies is an interdisciplinary field of study devoted to the critical and systematic examination of the cultural, political, social, economic, and historical experiences of African Americans, Africans, and peoples of African descent around the world. Our course of study is designed to provide students with an integrated understanding and appreciation for a new global black studies. An undergraduate degree in Africana Studies prepares students for graduate work in the humanities, social sciences, and professional schools, as well as a range of careers in teaching, business, public service, and the arts, among others.

The minimum total course units for graduation in this major is 32. Double majors may entail more course units.

African Language courses do not count toward the Major Requirements.

For more information: https://africana.sas.upenn.edu/department/undergraduate

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Anthropology: Archaeology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

Archaeology is the study of past societies through the excavation of material culture, from the Paleolithic into the early Historical periods. Students study excavation methods and techniques of analysis, and have opportunities to work with collections in the Penn Museum and its Center for the Analysis of Archaeological Materials (CAAM). Archaeology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Archaeology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/anthropology/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

ANCH 398  Honors Thesis                          1.0

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Anthropology: Cultural and Linguistic Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

Cultural and Linguistic Anthropology is the study of cultural, social, and semiotic variation in the modern world since the development of the ethnographic method in the late 19th century. Areas of study include comparisons of different cultural communities and their relationship to social and demographic factors, as well as communication and media. Cultural and Linguistic Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Cultural and Linguistic Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/anthropology/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.
Block I: Introductory Courses

ANTH 001 Archaeology: Window to the Human Past 1
or ANTH 005 Great Transformations
ANTH 002 Introduction to Cultural Anthropology 1
or ANTH 004 The Modern World and Its Cultural Background
ANTH 003 Introduction to Human Evolution 1

Block II
Select 1 course unit in Biological Anthropology 1
Select 1 course unit in Archaeology 1

Block III
Select 8 course units in Cultural and Linguistic Anthropology 2 8
Capstone Seminar
ANTH 300 Research Seminar in Anthropology 1

Total Course Units 34

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 For up to three of these, non-ANTH courses with anthropological content may be requested. All non-ANTH courses must be approved by the Undergraduate Program Coordinator.

Honors

Applicants must have a minimum GPA of 3.5 in the Major and write a senior thesis.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Anthropology: Environmental Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

Environmental Anthropology is a thematic concentration that investigates how human societies create and change geologies and climates up to a planetary scale, and the ways that anthropologists have questioned the division between cultures and nature. Students may choose to study topics from contemporary society to the impact of environmental change over long spans of time. Students have the opportunity to do original fieldwork, engage in research with the collections of the Penn Museum and the resources of the Center for the Analysis of Archaeological Materials (CAAM) and study abroad. After they fulfill the foundational course requirements in anthropology, students take three distribution electives from the four themes of Political Ecology, Science Technology and the Environment, Material Worlds, Landscapes and Archaeology, and Biology, Environment and Health.

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 Foundation courses are drawn from at least 3 of the 4 elective groups:
   - Political Ecology
   - Science, Technology, Environment
   - Material Worlds, Landscapes, Archaeology
   - Biology, Environment, and Health

3 Up to 3 of these, non-ANTH courses with anthropological content may be requested. All non-ANTH courses must be approved by the Undergraduate Program Coordinator.

Honors

Applicants must have a minimum GPA of 3.5 in the Major and write a senior thesis.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Anthropology: General Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major
that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

General Anthropology majors study all four anthropology sub-fields, acquiring an introduction to the full range of anthropological research. Students are required to take courses in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, and Medical Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

### Anthology: Biological Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

Biological Anthropology is the study of human evolution and the biology of modern populations. Areas of study include genetics, osteology, and forensics. Students have the opportunity to work in laboratory settings, as well as in the Penn Museum’s Physical Anthropology section or its Center for the Analysis of Archaeological Materials (CAAM). Biological Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Biological Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
Up to three courses from BIBB, BIOL, HSSC and PSYC may be requested. All non-ANTH courses must be approved by the Undergraduate Program Coordinator.

**Honors**

Applicants must have a minimum GPA of 3.5 in the Major and write a senior thesis.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Anthropology: Medical Anthropology & Global Health, BA**

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

Medical Anthropology applies anthropological methods to the study of global health, well-being, and disease. The concentration provides students with a theoretical and methodological foundation to address problems of global health inequality. Medical Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Medical Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/anthropology/

**Architecture: Design (Intensive), BA**

The Intensive Major in Architecture is for students in the Design Concentration who intend to pursue a graduate professional degree in architecture. Students in the Intensive Major enroll in their senior year in the technology courses offered in the first year of the Master of Architecture Professional Degree Program. Those accepted into the School of Design’s Master of Architecture Professional Degree Program are qualified to be admitted with advanced placement into the second year of the graduate program, reducing the length of study from three to two years.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Application requirements: At least Sophomore Standing. Please consult with the Undergraduate Chair for other important criteria.

For more information: www.architecture.sas.upenn.edu

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Architecture: Design, BA

The Major in Architecture is for students who intend to pursue a career in architecture or a related design discipline (e.g., landscape architecture, urban design, product design, etc.). The Major is a studio-based liberal arts program offering two concentrations. The Design Concentration includes a six-semester sequence of design studios and courses in the history and theory of art, architecture, and landscape architecture. The minimum total course units for graduation in this major is 36. Double majors may entail more course units.

Architecture: History and Theory, BA

The Major in Architecture is for students who intend to pursue a career in architecture or a related design discipline (e.g., landscape architecture, urban design, product design, etc.). The Major is a studio-based liberal arts program offering two concentrations.

The History and Theory Concentration includes a four-semester sequence of design studios and courses in the history and theory of art, architecture, and landscape architecture followed by additional coursework and a written thesis in the history and theory of architecture.

The minimum total course units for graduation in this major is 34. Double majors may entail more course units.

Biochemistry, BA

Contemporary biological sciences are based on principles of chemistry and physics. The importance of this relationship is the basis of the Penn biochemistry major, which prepares students for advanced study in areas as diverse as biophysics, biotechnology, cell biology, genetic engineering, genomics, molecular biology, molecular genetics, nanotechnology, neurobiology, structural biology, systems biology, and biochemistry. It provides the basic science background for graduate and health professional schools and for prospective science teachers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Honors

Requirements: GPA of 3.2 in courses required for the major, taken at Penn, and not including BCHE 404 Biochemistry Laboratory.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biological Basis of Behavior, BA

Biological Basis of Behavior is an interdisciplinary program in which students explore the relationship between behavior (both human and animal) and its organic bases. The Program offers courses in virtually all areas of neuroscience ranging from cellular neurobiology to cognitive neuropsychology and integrates these basic interdisciplinary courses with basic science requirements in biology, chemistry and psychology. Students also engaged in supervised research in areas as diverse as molecular neurobiology, chemical neuroanatomy, visual sciences and behavioral ecology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2. See the BBB web site for approved courses in areas of specialized study. Students are encouraged to take a research course or do sponsored research in their junior or senior year.
3. BIBB 399 Independent Research, BIBB 499 Advanced Independent Research or a 400-level BIBB course are three of the options.

### Honors Option

BIBB Honors Complete

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Biology: Computational Biology, BA**

Computational and Mathematical Biology are important new areas in the biological sciences. Many areas in genetics, ecology, and evolution depend on sophisticated quantitative analyses. For example, the advent of data from the human genome project (and similar data from other species) has shown the need for computer, statistical and mathematical methods to store, retrieve and analyze massive data sets. Recognizing the growing importance of these quantitative techniques and skills, we have developed undergraduate concentrations in both Computational and Mathematical Biology. These Concentrations are designed to prepare students for the world of data-driven science.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

With permission of the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

**For more information:** http://www.bio.upenn.edu/undergraduate/concentrations/computational-and-mathematical-biology

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

**Biology: Ecology & Evolutionary Biology, BA**

Ecology and evolutionary biology are among the most exciting and challenging fields in biology today. The Concentration in Ecology and Evolutionary Biology provides intensive training in both areas, along with essential background in the statistical and mathematical methods essential for understanding Ecological and Evolutionary research and field practices.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

**Honors**

Applicants must have a minimum GPA of 3.25 in the major and the thesis must be approved by the departmental honors committee.

---

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Biology: General Biology, BA

Studies in biology can serve as preparation for graduate study in the biological sciences, graduate training in health-related professions, teaching, or employment in a laboratory or conservation-related job. The Biology Department offers courses in many areas of biology, ranging from the workings of cells and cellular components to species interactions and ecosystem function. Penn's curriculum keeps pace with recent developments in molecular biology and the study of evolutionary processes, including proteomics, computational genomics, molecular evolution, and epigenetics. The General Biology Major allows students to explore the wide range of topics in Biology, while also providing a strong foundation in core subject areas such as cell and molecular biology, genetics, physiology, and ecology and evolution.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For more information: http://www.bio.upenn.edu/undergraduate/current-students-major-requirements

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Major Requirements

Introductory Biology

Select one of the following tracks: 2

Track 1:

- BIOL 121 Introduction to Biology - The Molecular Biology of Life
- BIOL 123 Introductory Molecular Biology Laboratory
- BIOL 124 Introductory Organismal Biology Lab

Track 2:

- BIOL 101 Introduction to Biology A
- BIOL 102 Introduction to Biology B

Intermediate Biology

- BIOL 221 Molecular Biology and Genetics 1
- BIOL 230 Evolutionary Biology 1

Introductory Chemistry or Physics

Select one of the following: 1.5

- CHEM 101 General Chemistry I
- & CHEM 053 and General Chemistry Laboratory I
- PHYS 101 General Physics: Mechanics, Heat and Sound
- PHYS 150 Principles of Physics I: Mechanics and Wave Motion
- PHYS 170 Honors Physics I: Mechanics and Wave Motion

Introductory Math & Statistics

- STAT 102 Introductory Business Statistics
- STAT 111 Introductory Statistics
- STAT 431 Statistical Inference

Mathematics Requirement

- MATH 114 Calculus, Part II 1
- MATH 240 Calculus, Part III 1
- MATH 320 Computer Methods in Mathematical Science I 1

Capstone Courses

- BIOL 437 Introduction to Computational Biology & Biological Modeling 1
- BIOL 399 Independent Study 1

Additional Biology Major Courses

Select 2 course units of Additional Biology Major courses 2

Mathematical Biology-Related Courses

Select 3 course units of Computational Biology-Related courses 3

Total Course Units 36

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

Honors

Applicants must have a minimum GPA of 3.25 in the major and the thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: Mechanisms of Disease, BA

Among the most important and interesting areas of scientific investigation are the mechanisms that underlie disease. The study of this topic can be of great interest to those pursuing fundamental research, as well as to those drawn to medicine, biotechnology, law, and public health. The introductory and intermediate level course offerings of the Biology Department provide a foundation in understanding the fundamental principles underlying the mechanisms of disease. Advanced electives...
are selected from the fields of Microbes and Infectious Disease, Genetic Disease, Molecular Genetics and Genomics, and Biochemistry.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2. Students in Track 2 need only 4 electives.

**Honors**

Applicants must have a minimum GPA of 3.25 in the major and have taken BIOL 399 Independent Study. Thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Biology: Neurobiology, BA

Neurobiology is one of the most exciting fields within biology today. The basis of neurological disease, molecular mechanisms of brain function, and behavior are major foci of research in medicine, biotechnology, and academia. The Neurobiology Concentration provides fundamental training in brain physiology, coupled with a background in molecular genetics that is essential for understanding the molecular mechanisms of brain function at the gene and protein levels.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

SURB 2

**Total Course Units** 36

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2. Students are required to present their research at the annual Symposium on Undergraduate Research in Biology (SURB) poster session, held at the end of the Spring Term.

**Honors**

Applicants must have a minimum GPA of 3.25 in the major and the thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Bridging the biological sciences and the physical sciences, Biophysics is concerned with physical and chemical explanations of living processes, especially at the cellular and molecular levels. Detailed molecular descriptions are emerging for genetic elements and the mechanisms that control their propagation and expression. Biophysical studies include the investigation of protein structure, nucleic acid structure, enzyme mechanisms, the phenomena underlying cellular behavior, excitable phenomena in nerve, muscle and visual cells, and integrative neural phenomena.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Note: Though not a requirement of the major, participation in an independent research project is strongly encouraged.

For more information: http://www.sas.upenn.edu/biophysics/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.
Chemistry is concerned with the study of matter and the changes matter can undergo. The chemistry program provides a basic foundation for career opportunities in chemical research and teaching, in scientific communication and information transfer, and in the health professions. Students who want to prepare for advanced study in chemistry or allied fields where research experience is advantageous should complete the chemistry honors program.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Those considering the Chemistry major should consult with the undergraduate chairman as soon as possible, preferably in the freshman year, especially if you have AP credit in Science and Mathematics from high school.

For more information: http://www.chem.upenn.edu/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

### Cinema and Media Studies, BA

The Penn Cinema and Media Studies major and minor are traditional humanities programs involving the critical study of film and media history, theory, and aesthetics. Reflecting the hybrid nature of the field of Cinema and Media Studies, our faculty members are housed in departments across SAS and the university, and we cross-list courses with various departments and schools, including Africana Studies, Anthropology, Communications, East Asian Language and Civilizations, English, Fine Arts, German, History, History of Art, Near Eastern Languages and Civilizations, Romance Languages, Slavic Languages and Literatures, and Women's Studies. This truly interdisciplinary program will introduce students to the wide range of methodologies used to study film and media, and this intersection with other disciplines makes Cinema and Media Studies an ideal component of a double major.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

Classical Studies: Classical Civilizations, BA

Classical Studies encompasses the civilization of the ancient Greeks and Romans from prehistory to the Middle Ages, with emphasis on the literature, philosophy, and history of the classical Greek and Roman periods. It includes economic, political, social, and intellectual history as well as philosophy, archaeology, religion, and myth. Students may choose a track that emphasizes the study of texts in Greek and/or Latin or opt for a program of courses that do not require any knowledge of the ancient languages. The Classical Studies Department provides extensive training at the Undergraduate level and graduate training in both Classical Studies and Ancient History. We also offer a special Post-Baccalaureate Program for students who wish to continue the study of Greek and Latin but who do not yet meet the requirements of a conventional graduate program.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://www.classics.upenn.edu/

You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

Honors

Honors Thesis

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Classical Studies: Mediterranean Archaeology, BA

Classical Studies encompasses the civilization of the ancient Greeks and Romans from prehistory to the Middle Ages, with emphasis on the literature, philosophy, and history of the classical Greek and Roman periods. It includes economic, political, social, and intellectual history as well as philosophy, archaeology, religion, and myth. Students may choose a track that emphasizes the study of texts in Greek and/or Latin, or they may opt for a program of courses that do not require any knowledge of the ancient languages. The Classical Studies Department provides extensive training at the Undergraduate level and graduate training in both Classical Studies and Ancient History. The department also offers a special Post-Baccalaureate Program for students who wish to continue the study of Greek and Latin but do not yet meet the requirements of a conventional graduate program.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.
Honors

Required: A Minimum Overall GPA of 3.0 and 3.5 in Major Related Courses

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Cognitive Science: Computation and Cognition, BA

Cognitive science is the empirical study of intelligent systems, including the human mind. An interdisciplinary science, it combines results from biology, computer science, linguistics, mathematics, neuroscience, philosophy and psychology to the study of language processing, perception, action, learning, concept formation, inference and other activities of the mind, with applications for information technology and the study of artificial intelligence.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

For more information: https://web.sas.upenn.edu/cogsci/program/major/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.
Cognitive Science: Individualized, BA

Cognitive science is the empirical study of intelligent systems, including the human mind. An interdisciplinary science, it combines results from biology, computer science, linguistics, mathematics, neuroscience, philosophy and psychology to the study of language processing, perception, action, learning, concept formation, inference and other activities of the mind, with applications for information technology and the study of artificial intelligence.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Honors

Required: A Minimum Overall GPA of 3.0 and 3.5 in Major Related Courses

Communication: Communication & Public Service, BA

A Communication major with a concentration in Communication and Public Service (ComPS) offers students a special program that combines individual research opportunities with hands-on experience in the public arena. Classes, seminars, internships, field experiences, and individual research projects provide students with opportunities to meet and learn from current and former officeholders, journalists, and public servants who have been leaders in government and civil society. The program is closely matched to the undergraduate Communication major, and like the Communication major, ComPS students must complete 14 courses.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum requirements as a condition of application to the major. Meeting these prerequisites is NOT a guarantee of admission to the major:

1. Completion of at least two of the following introductory courses:
Communication: General Communication, BA

The Communication Program, housed at Penn’s Annenberg School for Communication, offers a dynamic environment where students and faculty explore a wide range of communication-centered questions using a variety of methods and theories from the humanities and social sciences. Undergraduates (who major in Communication through the School of Arts and Sciences) explore how messages are created and adapted to audiences and examine the implications of those messages for individuals and society.

Areas of concentration include critical, cultural, and historical media studies; research on children, family, and media; health communication; the media business; and political communication. The curriculum also offers opportunities for independent study, internship experience, study abroad, and putting communication to work in the service of community (through the Communication and Public Service Program).

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum requirements prior to acceptance into the major.

1. Completion of a third Communication course.
2. Cumulative GPA at time of application should be at least 2.0.
3. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

For more information: https://www.asc.upenn.edu/communication-and-public-service

COMM 495 | COMPS Capstone Thesis                       | 1            |

Major Cluster

Select 3 course units in up to three departments. Only 1 course unit may be an introductory class.

Total Course Units 34

Honors

A capstone thesis project is completed over two semesters during the senior year. Students choose the topic of the capstone thesis from a range of public policy or public service issues. During the year they work with a thesis advisor and are enrolled in a thesis seminar to complete their project. A credit is earned in both semesters. Students who achieve a cumulative grade point average of 3.5 or higher and earn an A- or higher on their project will graduate with honors.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement [http://www.college.upenn.edu/sectors-policy](http://www.college.upenn.edu/sectors-policy).
2. Course not used for the Core may count toward the Intermediate requirement.
3. Please visit the website [https://www.asc.upenn.edu/academics/undergraduate-program/curriculum-and-major-requirements/course-requirements](https://www.asc.upenn.edu/academics/undergraduate-program/curriculum-and-major-requirements/course-requirements) for a listing of approved Method Courses.
4. Intermediate Level Courses are those courses numbered between 100 and 299.
5. Advanced Level courses are those course numbered 300 through 499.
6. Only 1 course unit may be an introductory class. Must be approved by the Director of Student Services.

Honors

A thesis project is completed over two semesters during the senior year. A credit is earned in both semesters. Students who achieve a cumulative grade point average of 3.5 or higher and earn an A- or higher on their project will graduate with honors.

Optional Concentrations

Concentrations give our majors an opportunity to pursue their personal interests within the diverse field of Communication. In some cases, these concentrations can also help students market themselves for employment or graduate school in a related field. The concentration utilizes five of the fourteen courses listed below (three of which are COMM courses, two of which are cognate courses). No course can be used more than once toward concentration requirements. A list of approved concentration courses can be found here [https://www.asc.upenn.edu/academics/undergraduate-program/curriculum-and-major-requirements/concentrations](https://www.asc.upenn.edu/academics/undergraduate-program/curriculum-and-major-requirements/concentrations). Cognate courses are to be approved by Annenberg's Director of Student Services.

Students may only complete one concentration.

Concentration

- Political Communication
- Critical Journalism
- Global Communication
- Culture & Communication
- Visual Communication
- Media Effects
- Media Institutions & Policy
- Health Communication
- Race, Gender & Identity
- Civic Communication
- Messaging and Marketing
- Individualized

Requirements

Select 3 course units of Major courses: 3 units
Select 2 course units of Cognate courses: 2 units

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Comparative Literature: (Trans)national Literatures, BA

The undergraduate program in Comparative Literature welcomes students interested in the study of literature from theoretical, interdisciplinary, cross-cultural, and global perspectives. The core
courses train students to appreciate the variety of meanings that texts acquire in different institutional and philosophical contexts and different socio-political frameworks. There are three concentrations within the major: National and Transnational Literatures (four courses in each of two languages), Theory, and Globalization.

Comparative Literature is a flexible program, allowing students to take courses in a variety of departments in the College. Students with interests in more than one national literature and in fields such as philosophy and political theory, art and aesthetics, and film and music will find the requirements congenial. The program provides students with a cosmopolitan intellectual background that is increasingly in demand today.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: http://ccat.sas.upenn.edu/Complit/undergraduate.htm

Criminology, BA
The major in Criminology enables students to acquire a theoretical and methodological framework for generating and assessing knowledge about crime and social control. The program draws upon disciplines from statistics to neuroscience to develop a liberal arts approach to the subject of crime.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: http://crim.sas.upenn.edu/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Design, BA
The Fine Arts department is committed to cultivating global thought leaders in the fields of Art and Design. The Major in Design addresses a need for innovative pedagogy exploring the expansive nature of contemporary design and its relationship to the humanities, the sciences, and emerging technologies. The curriculum emphasizes an integrated understanding of design that brings together different disciplinary approaches that respond to complex social, cultural, and environmental challenges. Students will acquire contemporary representation, prototyping, and fabrication skills and engage with theoretical frameworks yielding advanced research and knowledge production.

Students begin the Design Major with two required core studios that introduce fundamental design methodologies, computational literacy, technological fabrication, and the study of contemporary digital culture. Majors then select from a series of theoretical and historical seminars that contextualize and expand their understanding of design practices including data-driven, speculative, and inquiry-based design. Majors also have the freedom to select from an expansive list of art and design electives that further their interdisciplinary expertise. The Design Major culminates in a year-long design project, researched design brief, public exhibition, and panel review with leading experts in the field.

A goal for students entering the major is to develop the ability to critically and resourcefully synthesize the expansive potentialities of design. These skill sets are gained through exposure to diverse approaches to design methodologies, histories, and theories. Learning outcomes are evident in the individual and collaborative conceptual, technological, and speculative projects that emerge from the core and integrative studios. Design electives and seminars enrich, complicate, and expand disciplinary modalities, while engaging in deeper explorations of positionality within a global climate. Ultimately, the Design Major seeks to guide students through a process of learning to independently question, interpret, and analyze integrative design.

Earth Science: Environmental Science, BA

The Earth Science major provides graduates with a broad understanding of the physical and chemical processes that operate in and on the planet and how direct and indirect methods are used to examine and understand the structure, composition, and dynamics of the Earth. Graduates appreciate how humans and ecosystems interact with the dynamic Earth, and they have an in-depth knowledge of the atmosphere and climate change, the rock cycle, natural hazards, and the hydrologic and biogeochemical cycles. Additionally, they understand how to measure and use the structure, sequence, and properties of rocks, sediments, and fossils to reconstruct events in Earth's history and identify potential natural hazards or earth resources.

The Environmental Science concentration within the Earth Science major integrates geology, biology, chemistry, and physics in an effort to have students undertake a scientific study of the environment and the effects of humans on Earth systems.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

Math, Physics & Chemistry Requirement

Select 3 course units of Math, Physics and Chemistry courses with at least one course from two different disciplines.

Mathematics:

- MATH 104 Calculus, Part I
- or MATH 114 Calculus, Part II
- or MATH 115 Calculus, Part II with Probability and Matrices
- or STAT 111 Introductory Statistics

Physics:

- PHYS 101 General Physics: Mechanics, Heat and Sound
- or PHYS 150 Principles of Physics I: Mechanics and Wave Motion
- or PHYS 170 Honors Physics I: Mechanics and Wave Motion

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
### Earth Science: Geology, BA

The Earth Science major provides graduates with a broad understanding of the physical and chemical processes that operate in and on the planet and how direct and indirect methods are used to examine and understand the structure, composition, and dynamics of the Earth. Graduates appreciate how humans and ecosystems interact with the dynamic Earth, and they have an in-depth knowledge of the atmosphere and climate change, the rock cycle, natural hazards, and the hydrologic and biogeochemical cycles. Additionally, they understand how to measure and use the structure, sequence, and properties of rocks, sediments, and fossils to reconstruct events in Earth’s history and identify potential natural hazards or earth resources.

Students in the Geology concentration learn the various processes at work within the planet and on its surface. Students gain hands-on experience with fossils, rocks, minerals, maps, aerial photographs, and satellite images in the laboratory and on field trips.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

**For more information:** [http://www.sas.upenn.edu/earth/earth-science/geology-concentration](http://www.sas.upenn.edu/earth/earth-science/geology-concentration)

East Asian Languages and Civilizations: Chinese and Japanese, BA

The undergraduate program in EALC offers language training and courses in the culture, history, literature, and archaeology of East Asia. The graduate program in EALC deals with two major areas, China and Japan (a graduate program in Korean is planned for the future), and all of its programs focus mainly upon language, philology, and the study of civilization and culture. Each provides training for the Ph.D. and A.M. degrees.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

2019-20 Catalog | Generated 10/18/19
Economies, BA

Economics is a social science and, as such, an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; and international trade and international finance (e.g., exchange rates). The Economics Major provides training in economic principles and provides a useful background for students preparing for a career in public policy, business, or finance.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://economics.sas.upenn.edu/undergraduate-program/economics-major

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Year Long Course

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

English: 18th/19th Centuries, BA

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical "core," majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

For more information: http://www.english.upenn.edu/Undergrad/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Seminars

Select one seminar in each area from ENGL 110-ENGL 599:

- Sem 1: Literature Before 1700
- Sem 2: Literature Before 1900
- Sem 3: ENGL (may be double-counted in the core)
- Sem 4: ENGL or Related (may be double-counted in the core)

Electives

Select 2-5 course units from ENGL 016-ENGL 599

Concentration Requirements

Select 4 course units of 18th & 19th Century Literature and Culture courses with 2 course units 200-level seminar or higher

Total Course Units

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2. For up to three sectors, a seminar may be double-counted in the core.
3. Take additional 3 course units if Seminars 1, 2 and 3 are double-counted in core.
4. Concentration may be comprised from the 13 course units of the major, or other courses.

Honors

Applicants must have a 3.6 GPA in the major. Thesis required.

\(^1\) You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

\(^2\) For up to three sectors, a seminar may be double-counted in the core.

\(^3\) Take additional 3 course units if Seminars 1, 2 and 3 are double-counted in core.
Concentration may be comprised from the 13 course units of the major, or other courses.

### Honors

Applicants must have a 3.6 GPA in the major. Thesis required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

#### English: American Literature & Culture, BA

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical “core,” majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

ENGL 200 Junior Research Seminar (Seminar 1) (may be double-counted in the core) 1

Seminars

Select one seminar in each area from ENGL 110-ENGL 599: 4

- Sem 1: Literature Before 1700
- Sem 2: Literature Before 1900
- Sem 3: ENGL (may be double-counted in the core)

Electives

Select 2-5 course units from ENGL 015-ENGL 599 3

Concentration Requirements

Select 4 course units of Law and Literature courses with 2 course units 200-level seminar or higher 4

Total Course Units 33

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2 For up to three sectors, a seminar may be double-counted in the core.
3 Take additional 3 course units if Seminars 1, 2 and 3 are double-counted in core.
4 Concentration may be comprised from the 13 course units of the major, or other courses.
## English: Literature, Journalism and Print Culture, BA

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical "core," majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

For more information: http://www.english.upenn.edu/Undergrad/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

**Environmental Studies: Environmental History and Regional Studies, BA**

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

Students in the Environmental History and Regional Studies concentration learn a temporal and spatial perspective to the study of the Environment.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

This concentration is for students with a background in the Arts or Social Sciences.

Environmental Studies: General Environmental Studies, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

This is an individualized, specialized concentration designed for students who want to concentrate in an area not represented by the other concentrations. Formal proposals for this concentration must be developed and submitted for review and approved by both the EES program director and undergraduate chair before admittance into this concentration.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/earth/environmental-studies/individualized-concentration

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Environmental Studies: Global Environmental Systems, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

Students in the Global Environmental Systems concentration will focus their coursework on understanding global environmental systems.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.
This concentration is for students who have a background in either the Natural or the Social Sciences.

For more information: http://www.sas.upenn.edu/earth/environmental-studies/global-environmental-systems-concentration

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

**Environmental Studies: Sustainability and Environmental Management, BA**

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

The Sustainability and Environmental Management concentration is designed to help students understand the nature of environmental constraints which face organizations and individuals in the modern world, and to understand how these constraints can be effectively considered as part of the decision-making process in for-profit and non-profit organizations.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

This concentration is for students who have a background in either the Natural or the Social Sciences.

## Fine Arts, BFA

For nearly 100 years, the University of Pennsylvania has partnered with the Pennsylvania Academy of the Fine Arts to provide students with an unparalleled opportunity to pursue their artistic passions and intellectual pursuits in the Ivy League.

The Bachelor of Fine Arts offers self-motivated and committed students the chance to design a curriculum at the intersection of your interests. As a Penn BFA student, you have access to a broad range of more than 500 courses taught throughout the School of Arts and Sciences and more than 300 courses within the College of Liberal and Professional Studies, in more than 50 areas of study. The Bachelor of Fine Arts program prioritizes the power of personal connection—between students, teachers, and program staff.

For more information: [https://www.sas.upenn.edu/lps/undergraduate/bfa](https://www.sas.upenn.edu/lps/undergraduate/bfa)

## Curriculum

As a Bachelor of Fine Arts (BFA) student, you’ll have access to a broad range of courses taught within the College of Liberal and Professional Studies and have choices from throughout the School of Arts and Sciences. Upon acceptance into the program, you will be assigned an advisor who will help you choose your coursework.

To earn the Bachelor of Fine Arts degree at Penn, you must complete the 90-credit, three-year program at PAFA, as well as a minimum of 16 course units (CU) at Penn.

Curriculum requirements at Penn include the completion of four course units chosen from within the History of Art Department and 12 free electives chosen from throughout the School of Arts and Sciences.

Participation in the joint Bachelor of Fine Arts degree program is a unique opportunity designed with specific curricular goals. As a result, some types of courses cannot be counted toward your degree. These include:

- Other Penn courses outside the School of Arts & Sciences (the School of Engineering and Applied Sciences, the Wharton School of Business, the School of Nursing, etc.)
- Studio-based courses offered by or cross-listed with the Fine Arts department at Penn
- Courses from any other educational institution

### Minors

As a Bachelor of Fine Arts degree student, you may wish to complete a minor chosen from within the School of Arts and Sciences offerings. The number of courses required to complete a minor varies between departments but is usually between six and eight courses. If you would like to explore the possibility of minoring, please be sure to consult with your academic advisor in the College of Liberal Arts and an advisor in your minor department of interest. Once you have declared a minor, you will have a minor advisor assigned to you, who will provide guidance with appropriate course selection to meet requirements.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

## Fine Arts, BA

The Undergraduate Fine Arts Program combines studio practices, seminar courses, and interactions with visiting artists and professionals to provide an open intellectual framework in order to foster critical awareness and independent methods of artistic research and learning. The Fine Arts Department offers a diverse range of studio courses in the areas of animation and 3D modeling, ceramics, design, drawing and painting, photography, printmaking, sculpture, and video. The dynamic curriculum also provides students with the opportunity to thoroughly examine contemporary art, creative research, interactive design, and public art through seminar-based instruction.

A goal of the Undergraduate Fine Arts program is to facilitate an environment where the potentialities of art are considered in relation to the real life conditions of our students. Encouraged to test themselves against the rigors of divergent artistic approaches and their histories, our students develop a more complex set of skills to creatively and critically negotiate the turbulent shifts taking place globally in terms of human experiences.
The Fine Arts major is available for students in the College of Arts and Sciences and the School of Engineering, and the minor is available for undergraduate students across the university. The Fine Arts program works in conjunction with three interdisciplinary degree programs in Cinema Studies, Digital Media Design, and Visual Studies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.design.upenn.edu/fine-arts/undergraduate/program

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

**French and Francophone Studies, BA**

French and Francophone Studies introduces students to the full span of historical and cultural traditions from France and the French-speaking world. Languages courses - from introductory to advanced - promote linguistic fluency, building on the skills students have acquired in high school or at Penn. Upper-level seminars explore a range of topics pertaining to literature, history, visual arts, and/or the media, and they offer majors and minors the opportunity to engage in research on French and global Francophone cultures across periods into contemporary times.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

At least half of all courses for the major must be taken in the Department at Penn. ALL courses must be taken in French, with the possible exception of Major-related courses.

For more information: http://www.sas.upenn.edu/french/undergraduate/requirements-majors-and-minors-major-french-francophone-studies

**Gender, Sexuality, & Women’s Studies, BA**

The Gender, Sexuality, and Women’s Studies Program (GSWS) is an interdisciplinary program that provides exciting intellectual opportunities to explore the role of gender in human affairs. The program offers over 50 courses each year, many cross-listed with other departments, as well as a major, a minor, and a graduate certificate.

**History & Culture**

Select 2 course units of the following:

- FREN 226 French History and Culture until 1789
- FREN 227 French History and Culture 1789-1945
- FREN 228 Contemporary France
- FREN 229 French in the World

**Literature & Arts**

Select 2 of the following:

- FREN 230 Masterpieces of French Cinema
- FREN 231 Perspectives in French Literature: Love and Passion
- FREN 232 Perspectives in French Literature: The Individual and Society
- FREN 233 Francophone Literature and Film

**Electives**

Select a minimum of 5 course units of 300-level courses with 2 in the Department at Penn

**Additional French or Major-related Courses**

Select 2 course units of French courses at the 200 or 300 level

**Research Requirement**

Must be completed in the Department at Penn

**Total Course Units**

32

You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

**Honors**

Applicants must have a minimum GPA of 3.4 in the Major.

**Concentrations**

Students may select one of five concentrations (https://www.sas.upenn.edu/gsws/content/concentrations):

- Feminist Studies
- Global Gender and Sexuality Studies
- Health and Disability
- LGBTQ Studies
- Self-designed

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**German, BA**

The major and minor programs in the Department of Germanic Languages and Literatures provide deep understandings of language.
and cultures. Building from basic language competency to synthesizing significant literary works, historical context and current media and politics, the program offers a comprehensive education through engaged, active learning in a combination of core courses with a wide range of electives. Your learning experiences can be broadened and applied in study abroad as well as internship programs.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32.5. Double majors may entail more course units.

Health and Societies: Bioethics & Society, BA

The Health and Societies (HSOC) major examines health and medicine in social context, equipping students with the critical faculties and multidisciplinary skills that will prepare them for careers in public health, health services, and a variety of other arenas. The program is built on the foundation of three core disciplines: anthropology, history, and sociology. Methods and courses from other disciplines and fields—including epidemiology, political science, business/economics, law, environmental studies, and bioethics—supplement the core disciplines and provide majors with the variety of skills necessary to grasp the forces that have shaped our contemporary health landscapes. The Health and Societies graduate is a “multilingual” scholar and citizen, fluent in the methods and perspectives of several social science disciplines— theoretically informed but practically minded, with a global outlook and local experience.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://hss.sas.upenn.edu/undergraduate/health-societies-major

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Health and Societies: Global Health, BA

The Health and Societies (HSOC) major examines health and medicine in social context, equipping students with the critical faculties and multidisciplinary skills that will prepare them for careers in public health, health services, and a variety of other arenas. The program is built on the foundation of three core disciplines: anthropology, history, and sociology. Methods and courses from other disciplines and fields—including epidemiology, political science, business/economics, law, environmental studies, and bioethics—supplement the core disciplines and provide majors with the variety of skills necessary to grasp the forces that have shaped our contemporary health landscapes. The Health and Societies graduate is a "multilingual" scholar and citizen, fluent in the methods and perspectives of several social science disciplines - theoretically informed but practically minded, with a global outlook and local experience.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://hss.sas.upenn.edu/undergraduate/health-societies-major

### Hispanic Studies, BA

The demographic, economic and political realities of the United States, the articulation of a mainstream English culture with an ever-increasing diversity of Hispanic and Latino cultures, and the ongoing forging of strong cultural and economic ties throughout the Americas, have moved Spanish out of the bounds of the category of "foreign" language and culture in the United States. Culture is the controlling category in this field; the program is orientated to the knowledge generated by new disciplines such as cultural studies, new historicism, ethics and postcolonial studies. The major in Hispanic Studies orients itself to the types of knowledge generated by new disciplines such as cultural studies, new historicism, ethics, and postcolonial studies. In order to reflect these changing realities, the Department of Romance Languages has changed the name of its Spanish concentration from "Spanish" to "Hispanic Studies."

Hence, the knowledge of Spanish culture gives students much more than the ability to communicate in the third-most-spoken language of the world. It prepares them to account for an entirely different national, continental and global reality in all its complexity.

Majors in Hispanic Studies are overwhelmingly double majors. This means that they bring to their classes a dialogic perspective that engages in the study of Hispanic cultures informed by interest in other fields such as history, government, sociology, economics, medicine, and law. The richness and depth of these interests make for lively and intellectually rewarding classroom discussions.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

All courses must be at or above the 200 level.

**History of Art, BA**

The Major in the History of Art seeks to deepen students’ knowledge of artistic production and practice over the scope of human history, as well as to broaden awareness of the critical and interpretive aims of the discipline itself. Students develop skills in the analysis of works of art, sharpen their understanding of the social, cultural, and personal values embodied by works, and explore the relation of art history to other disciplines. The Department particularly encourages a broad geographic understanding of art production and encourages students to consider the relations and distinctions among different visual cultures.

Students are strongly advised to make an appointment each semester to discuss their progress through the major with the undergraduate chair.

Majors are also encouraged to achieve an advanced level of French, German, or other languages as relevant to their subject interests. During their senior year majors may pursue independent research by writing an honors thesis and are invited to become regular participants in the department colloquium series.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

**Honors**

Application for Honors is by petition. Please consult with the Undergraduate Chair.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**History: American History, BA**

The Department of History offers a variety of courses dealing with the political, social, diplomatic, intellectual, economic, and cultural history of the Americas, Europe, Asia, and Africa, from the early medieval period to the present. The department seeks to give undergraduates both specific mastery of particular times, places, and aspects of the human condition and the critical skills to think historically about both long-term and modern phenomena, emphasizing the dynamics of change and continuity over time. The History Department at the University of Pennsylvania has a long tradition of distinction. Beginning as one of the first programs in the United States to offer doctoral study in history, the department continues to pioneer new areas of scholarship. In the last twenty years, faculty members of the departments in American, European, and World history have assumed a leading role in introducing and promoting new varieties of historical research and writing. Today, no other institution surpasses the Penn history department’s coverage of social history or equals the distinction of its faculty in that field.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

8 courses must be taken in History at the University of Pennsylvania.

**History: Economic History, BA**

The Department of History offers a variety of courses dealing with the political, social, diplomatic, intellectual, economic, and cultural history of the Americas, Europe, Asia, and Africa, from the early medieval period to the present. The department seeks to give undergraduates both specific mastery of particular times, places, and aspects of the human condition and the critical skills to think historically about both long-term and modern phenomena, emphasizing the dynamics of change and continuity over time. The History Department at the University of Pennsylvania has a long tradition of distinction. Beginning as one of the first programs in the United States to offer doctoral study in history, the department continues to pioneer new areas of scholarship. In the last twenty years, faculty members of the departments in American, European, and World history have assumed a leading role in introducing and promoting new varieties of historical research and writing. Today, no other institution surpasses the Penn history department’s coverage of social history or equals the distinction of its faculty in that field.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

8 courses must be taken in History at the University of Pennsylvania.

Thesis Research

International Relations, BA

International Relations addresses the ways in which governments, private groups, and individuals relate to each other in the global political and economic systems. The program provides a solid grounding in the methodologies of political science, history, and economics. The curriculum draws on the best courses relevant to world politics, offers a well-rounded liberal arts education, and helps prepare students for law or business school, Ph.D. programs, and international careers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

**Italian Studies: Italian Culture, BA**

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

The minimum total course units ([https://www.college.upenn.edu/credits-needed-major](https://www.college.upenn.edu/credits-needed-major)) for graduation in this major is 32. Double majors may entail more course units.

1 Must be completed in the Department at Penn.

---

**Italian Studies: Italian Literature, BA**

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

The minimum total course units ([https://www.college.upenn.edu/credits-needed-major](https://www.college.upenn.edu/credits-needed-major)) for graduation in this major is 32. Double majors may entail more course units.

For more information: [http://www.sas.upenn.edu/italians/undergraduate/requirements](http://www.sas.upenn.edu/italians/undergraduate/requirements)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum ([https://www.college.upenn.edu/curriculum](https://www.college.upenn.edu/curriculum)) page.

</tbody>
</table>

**Honors**

Must have a minimum 3.5 GPA in the Major and a GPA of 3.6 in the Major. An honors thesis and completion of an upper level language course are required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement ([http://www.college.upenn.edu/sectors-policy](http://www.college.upenn.edu/sectors-policy)).

2 Courses should cluster around no more than 2 scholarly disciplines or periods in Italian civilization. At least 3 courses must be taken in Italian Studies in Romance Languages, including at least 2 at the 300-level in Italian. The disciplinary courses should include at least 2 in History, 1 of which may be an Art History course. No more than 6 elective courses can be taken abroad.

Up to 8 courses taught in English may be chosen in Romance Languages or from courses in other departments if they have an Italian focus or an Italian cultural component.

---

**Italian Studies: Italian Culture, BA**

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

Jewish Studies, BA

The Jewish Studies Program provides an opportunity for students to study the Jewish experience from several perspectives including: language (Hebrew, Yiddish, and Ladino), literature in the original languages and in translation, the history and culture of the Jewish people from Biblical Israel to 21st-century America and modern Israel, the exploration of Jewish law, and the roles of gender and sex in Judaism. Students may specialize in Jewish Studies through a major or a minor, or through one of the following concentrations: Jewish History within the History Department, Hebraica/Judaica within the Department of Near Eastern Languages & Civilizations, and Judaism within the Department of Religious Studies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: http://ccat.sas.upenn.edu/jwst/undergraduate

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Latin American & Latino Studies, BA

The Latin American and Latino Studies (LALS) Program offers an interdisciplinary major and minor to study the history, arts, languages, cultures, societies, politics, and/or regional organizations of Latin
American and Caribbean countries as well as Latino communities and individuals in the United States. With courses offered across many departments in the School of Arts and Sciences, in study abroad programs taught throughout Latin American cities, and with academically based community service courses with Latino organizations in the Greater Philadelphia area, the LALS major and minor afford our students a very comprehensive approach to Latin American and Latino Studies as well as the possibility of a flexible curriculum, where students can pursue and combine their academic interests.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

Students must satisfy the Language Requirement in Spanish or Portuguese. Language courses under 219 may not be counted.

For more information: https://lals.sas.upenn.edu/undergraduate-major-requirements

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Linguistics, BA

The Linguistics Program is intended to acquaint students with the methods and findings of the scientific study of human language and its relationships to cognition, society, and history. It serves as a preparation for graduate training in linguistics or related areas, and as part of a rigorous general education. Linguistic training is relevant to work in anthropology, philosophy, psychology, and language and literature, as well as to careers in such fields as education, computer science, and law. Founded by Zellig Harris in 1947, the Penn Linguistics Department is the oldest modern linguistics department in the United States. We have outstanding programs in the core disciplines of syntax and phonology, as well as in sociolinguistics, semantics, discourse, historical linguistics, phonetics, and psycholinguistics. Penn is also the home of the Linguistic Data Consortium (LDC), a compiler and distributor of linguistic materials for language engineering research. The graduate group in Linguistics at the University of Pennsylvania is an interdisciplinary team of faculty from the Department of Linguistics and related departments. Our program has strong concentrations in several areas and a tradition of collaboration among its faculty.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Logic, Information, & Computation, BA

Modern mathematical logic began with work by Cantor, Frege, and other mathematicians during the last three decades of the nineteenth century who were concerned with providing a sound basis for the development of mathematical analysis. In the wake of "the crisis in the foundations of mathematics" precipitated by the discovery of various logical paradoxes at the turn of the twentieth century, mathematicians and philosophers such as Hilbert and Russell intensively pursued investigations into the logical foundations of mathematics. Connections between logic and the foundations of mathematics remained an important source for scientific developments in logic through the epochal results of Gödel in 1930 and 1931, which indicated both the scope and limits of the mechanization of mathematical reasoning. The great burst of scientific activity occasioned by Gödel’s results led directly to Turing’s mathematical characterization of mechanical computation in terms of simple devices, now known as Turing machines. The work of Gödel, Turing, and other logicians during the 1930s laid the scientific foundations for the revolution in computer and information technology that began in the last half of the twentieth century and continues today.

The Logic, Information, and Computation Program offers students the opportunity to engage in a systematic, integrative program of study within the School of Arts and Sciences. Logic remains one of the core disciplines in investigations of information and computation. Indeed, logic is playing a major role in advances in computer security, database technology, networking, and software engineering. Moreover, logic has expanded its role within mathematics beyond foundational studies and now enjoys rich connections with areas as diverse as algebra, analysis, and combinatorics. In light of the current importance of the investigation of computation and information from both a scientific and technological point of view, the Major and Minor in Logic, Information, and Computation will provide students with a strong background to pursue computational aspects of the natural, biological, and social sciences and prepare them for careers in information technology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

² Check: http://logic.sas.upenn.edu for for pre-approved courses.

Honors

Applicants must have an overall GPA of 3.0 and a GPA of 3.5 in the Major. Senior research project required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Mathematical Economics, BA

Economics is a social science and, as such, an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are the following:

- The determination of prices and quantities in various types of markets, from perfectly competitive commodity markets to highly regulated utility markets and internet auctions.
- The effects of taxes, subsidies, and regulations.
- The determination of aggregate economic activity (e.g., GDP, unemployment).
- Inflation, monetary policy, and financial intermediation.
• Economic growth and income distribution.
• International trade and international finance (e.g., exchange rates).

The Mathematical Economics Major is intended for students with a strong intellectual interest in both mathematics and economics and, in particular, for students who may pursue a graduate degree in economics. Advanced economics makes extensive use of formal mathematical models. The major introduces undergraduate students to rigorous theoretical-quantitative and empirical-quantitative approaches to the analysis of economic problems. In comparison to the Economics Major, the Mathematical Economics Major emphasizes a more formal mathematical analysis, preparing students for academic-style research in economics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Mathematics: Biological Mathematics, BA

At the core of modern theoretical science, mathematics has historically provided an expressive language and a theoretical framework for advances in the physical sciences. It has since become central in the life and social sciences and in computer science. Mathematics at Penn embraces traditional core areas of mathematics and developing areas (Penn is one of the world's leading centers in the application of logic to theoretical computer science). The goals of the major program are to assist students in acquiring both an understanding of mathematics and the ability to use it. The mathematics major provides a solid foundation for graduate study in mathematics and a background for study in economics, the biological sciences, the physical sciences, and engineering, as well as many non-traditional areas.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Majors and prospective majors: Please email majoradvisor@math.upenn.edu. You will be assigned to one of the Math Major Advisors who will discuss your current and future plans with you. It is important that you see this advisor at least once per semester thereafter.

Below is a planning tool that is meant to help you but does not replace the web and advisor visit requirements.

For more information: https://www.math.upenn.edu/undergraduate/math-majors-and-minors/biological-mathematics-concentration-mathematics-major

</table>

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2. Students intending to major in Mathematical Economics are encouraged to take MATH 116 Honors Calculus and to consider MATH 260 Honors Calculus, Part II.
3. NOTE: These MATH and ECON courses count toward the MATH and ECON electives.
4. If ECON 103 Statistics for Economists is taken, one additional ECON or MATH course from the following: MATH 546 Advanced Probability, MATH 547 Stochastic Processes, ECON 104 Econometrics, ECON 221 Econometric Forecasting, or ECON 222 Advanced Econometric Techniques and Applications.
5. LPS academic year courses require approval of Undergraduate Chair EXCEPT for ECON 001 Introduction to Micro Economics & ECON 002 Introductory Economics: Macro.
6. ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro are prerequisites for all economics courses. ECON 001 Introduction to Micro Economics is the prerequisite for ECON 002 Introductory Economics: Macro.
7. ECON Course Required if ECON 010 Introduction to Economics for Business is taken.
8. Requires the permission of the instructor. Please contact the instructor and be prepared to share information about the ECON and MATH courses you have taken and the grades that you have obtained in these courses. Based on this information, the instructor will determine whether the course is suitable for you.

Honors

Applicants must have a minimum GPA of 3.5 and an A- or better in 3 graduate level courses:

2019-20 Catalog | Generated 10/18/19
MATH 320 Computer Methods in Mathematical Science I 1
STAT 431 Statistical Inference 1

Upper Level Math Course:
Select one of the following: 1
MATH 241 Calculus, Part IV
MATH 420 Ordinary Differential Equations
MATH 425 Partial Differential Equations
MATH 480 Topics in Modern Math (only if Life Science related)

Other

Biology Requirement
Select one of the following Tracks: 8.5
Track 1:
BIOL 121 Introduction to Biology - The Molecular Biology of Life
BIOL 124 Introductory Organismal Biology Lab
Select two of the following:
BIOL 221 Molecular Biology and Genetics
BIOL 230 Evolutionary Biology
BIOL 240 Ecology: From individuals to ecosystems
Select three of the following:
BIOL 410 Advanced Evolution
BIOL 417 Theoretical Population Biology
BIOL 431 Genome Science and Genomic Medicine
BIOL 437 Introduction to Computational Biology & Biological Modeling
BIOL 536 Computational Biology
Select one of the following additional science courses:
CHEM 101 General Chemistry I
& CHEM 053 and General Chemistry Laboratory I
CHEM 101 General Chemistry I
& CHEM 054 and General Chemistry Laboratory II
PHYS 151 Principles of Physics II: Electromagnetism and Radiation

Track 2:
BIOL 101 Introduction to Biology A
BIOL 102 Introduction to Biology B
Select two of the following:
BIOL 221 Molecular Biology and Genetics
BIOL 230 Evolutionary Biology
BIOL 240 Ecology: From individuals to ecosystems
Select two of the following:
BIOL 410 Advanced Evolution
BIOL 431 Genome Science and Genomic Medicine
BIOL 485 The RNA World: A functional and computational analysis
BIOL 537 Advanced Computational Biology
Select one of the following additional science courses:
CHEM 101 General Chemistry I
& CHEM 053 and General Chemistry Laboratory I
CHEM 101 General Chemistry I
& CHEM 054 and General Chemistry Laboratory II

PHYS 151 Principles of Physics II: Electromagnetism and Radiation

Total Course Units 36-37

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2 MATH 116 Honors Calculus is a Honors Course.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Mathematics: General Mathematics, BA

At the core of modern theoretical science, mathematics has historically provided an expressive language and a theoretical framework for advances in the physical sciences. It has since become central in the life and social sciences and in computer science. Mathematics at Penn embraces traditional core areas of mathematics as well as developing areas (Penn is one of the world’s leading centers in the application of logic to theoretical computer science). The goals of the major program are to assist students in acquiring both an understanding of mathematics and the ability to use it. The mathematics major provides a solid foundation for graduate study in mathematics and a background for study in economics, the biological sciences, the physical sciences, and engineering, as well as many non-traditional areas.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

Majors and prospective majors: Please email majoradvisor@math.upenn.edu. You will be assigned to one of the Math Major Advisors who will discuss your current and future plans with you. It is important that you see this advisor at least once per semester thereafter.

Below is a planning tool that is meant to help you but does not replace the web and advisor visit requirements.

Modern Middle Eastern Studies, BA

The interdisciplinary Modern Middle Eastern Studies degree is designed to allow students to specialize in the Middle East as a region of the world and human experience by combining course work using both social scientific and humanistic approaches, underpinned by relevant language skills. Students will work with faculty committed to supporting interdisciplinary, applied, research-oriented advanced study. The major gives students opportunities to work on problems of politics, policy, history, ideology, social thought, economic development, and international relations.
For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

### Near Eastern Languages & Civilizations: Ancient Near East, BA

The major in Ancient Near East examines the languages, history, cultures, and archaeology of the Ancient Near East: from Prehistory through the early complex of civilizations in Mesopotamia, Egypt, and Levant. Because of the interdependence of language and culture an emphasis of the major is gaining facility of one or more ancient languages, alongside courses in history, religion, and archaeology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/nelc/undergrad_programs/nelc_major.html

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.
Concentration Requirements

Select 5 course units in Concentration Requirement 5
Select 1 course unit in Concentration Paper 1
Total Course Units 34

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2. This requirement may be fulfilled by taking at least 4 course units of Egyptian or Biblical Hebrew or West Semitic languages or Cuneiform (Akkadian/ Sumarian) and no more than 2 course units of appropriate literature in translation.

3. May focus on at least two ancient civilizations. To be chosen in consultation with the major advisor.

Honors

Requirements: A minimum overall GPA of 3.0 and a GPA of 3.5 in major related courses.

Near Eastern Languages & Civilizations: Arabic & Hebrew Studies, BA

The major in Arabic and Hebrew Studies explores the interrelationships between Arab and Hebrew cultures in the context of the modern and medieval Middle East. Emphasis includes facility in Arabic and/or Hebrew language, alongside courses in history, literature, and cultures of the medieval and modern Middle East.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/nelc/undergrad_programs/nelc_major.html

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Near Eastern Languages & Civilizations: Arabic & Islamic Studies, BA

Arabic and Islamic Studies focuses on languages and cultures of the wider Middle East in the context of Islamic Civilization. Because of the interdependence of language and culture, a primary emphasis is on gaining mastery of Middle Eastern languages such as Arabic, Persian, and Turkish, alongside coursework in history, religion, and culture.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

### Near Eastern Languages & Civilizations: Hebrew & Judaica, BA

The major concentration in Hebrew and Judaica explores the development of Hebrew culture from the Biblical through Rabbinic and Medieval Periods through modern times. Because of the interrelationship between language and culture an emphasis is placed on gaining facility in the use of Hebrew language alongside courses in history, culture, literature, and religion of Judaism.

The minimum total course units ([https://www.college.upenn.edu/credits-needed-major](https://www.college.upenn.edu/credits-needed-major)) for graduation in this major is 34. Double majors may entail more course units.

Nutrition Science, BA

Jointly sponsored by the College of Arts and Sciences and the School of Nursing, the second major in Nutrition Science builds on a student's basic science skills with a deep dive into the science of nutrition. Linkages of nutritional compounds and dietary approaches with health and disease, novel approaches to the study of nutritional impact on health, and future avenues of exploration in the field are examined. Elective courses in anthropology, biology, economics, physiology, psychology, health care, and public policy provide a rounded context for the study of nutrition science.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.nursing.upenn.edu/nutrition-major/

**Elective Courses**

Select 4 course units of electives (see website for list of suggested courses)  4

**Total Course Units**  34

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2 BIOL 123 Introductory Molecular Biology Laboratory must be concurrent with BIOL 121 Introduction to Biology - The Molecular Biology of Life.
3 3 course units count as 2 for this major.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Philosophy, Politics and Economics: Choice & Behavior, BA**

Philosophy, Politics and Economics allows undergraduates to study a variety of comprehensive analytical frameworks that have been developed to understand and justify political and economic structures, particularly constitutional democracy and the market system. The program prepares its graduates for careers in public policy, public services, business, and law among others.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

**For more information:** https://ppe.sas.upenn.edu/

Choice & Behavior Theme

Select 5 courses in any theme 5

For a description of each theme, including sample concentrations and courses, visit: https://ppe.sas.upenn.edu/study/curriculum/thematic-concentrations

Capstone Seminar

PPE’s Capstone requirement may be filled by any course listed between PPE 470 and PPE 490. Select one of the following:

PPE 470 Capstone: Social Policy
PPE 471 Capstone: Political Economy
PPE 472 Capstone: Networks
PPE 473 Capstone: Modeling
PPE 474 Capstone: Judgment and Decision Making
PPE 476 Philosophy, Politics and Economics
PPE 477 Capstone: Social Psychology
PPE 481 Capstone: Political Science
PPE 482 Capstone: Psychology
PPE 483 Capstone: Economics
PPE 484 Capstone: Philosophy

Total Course Units 36

You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

Honors

Applicants must have a minimum GPA of 3.6 in the major.

PPE 498 Directed Honors Research 1

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Philosophy, Politics and Economics: Distributive Justice, BA

Philosophy, Politics and Economics allows undergraduates to study a variety of comprehensive analytical frameworks that have been developed to understand and justify political and economic structures, particularly constitutional democracy and the market system. The program prepares its graduates for careers in public policy, public services, business, and law among others.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/ppe/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

---

**Honors**

Must be a Senior Major in Philosophy and have a minimum 3.33 GPA in the major. Applicants must have completed the distribution requirements for the major including two courses above 200 one of which must be above 301. Please consult with the Undergraduate Chair for other specific criteria.

Code  Title  Course Units

PHIL 301  Directed Honors Research (or a 500-level course)  1

---

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Philosophy: Humanistic Philosophy, BA**

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The four concentrations available within the major allow students to emphasize different sets of questions.

The Humanistic Philosophy Concentration emphasizes practical philosophy and its history; it pairs philosophy courses with courses in one or more humanistic disciplines.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Philosophy: General Philosophy, BA**

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The four concentrations available within the major allow students to emphasize different sets of questions.

The General Philosophy Concentration requires a balanced selection of coursework from within both practical and theoretical philosophy as well as the history of these enterprises.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://philosophy.sas.upenn.edu/undergraduate/philosophy-majors-and-minor/philosophy-majors-major-general-philosophy

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
The minimum total course units on questions about ethics, morality, politics, and law. Philosophical treatment of normative questions. Its coursework focuses students to emphasize different sets of questions. (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, humanities. Philosophical topics can be divided roughly into practical and achievement of other disciplines, such as science, the arts, and the ration, purposive, and social beings. The study of philosophy aims at nature is explained in terms of elementary relations between constituent criteria.

### Philosophy: Political and Moral Philosophy, BA

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The four concentrations available within the major allow students to emphasize different sets of questions.

The new Political and Moral Philosophy Concentration emphasizes the philosophical treatment of normative questions. Its coursework focuses on questions about ethics, morality, politics, and law.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

### Physics: Astrophysics, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research.

**Physics: Biological Science, BA**

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration reflects increasing contributions of physicists (including members of our faculty) to implications of Physics to Biological Sciences. Undergraduate students choosing this concentration will prepare themselves for careers in scientific research or professional Medical Physics programs that have been instituted at Penn and other universities, among other possibilities.

The proposed concentration is distinct from the existing Biophysics Major, although the two share several required courses. The Biophysics Major requires much more chemistry, making it appropriate for students interested in protein science and other topics within the well-established field of Biophysics. The Physics major with a Concentration in Biological Science targets students with interests in the emerging field of Biological Physics, where researchers directly apply physical concepts and techniques to investigate biological systems; the emphasis is on developing new insights regarding biological systems from a perspective strongly rooted in Physics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.physics.upenn.edu/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.
# Physics: Business & Technology, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration is particularly appropriate for students whose ultimate goal is a career in modern industry involving both technical and managerial components. A student choosing this concentration will have a solid background in Physics, be comfortable with electronics and computers, and have some appreciation of modern business methods and economics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Physics: Chemical Principles, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration is particularly appropriate for students planning to enter the health professions. Such students should be aware that, although not part of the concentration requirements, laboratories in general and organic chemistry and lecture and laboratory work in biology are generally required by professional schools in the health area. The concentration may also be appropriate for other students pursuing double majors in Physics and Chemistry or Biochemistry.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Note: For Biology concentration, see Biophysics track outlined below.

**Political Science: American Politics, BA**

Political Science explores systematic approaches to understanding politics. Students may choose to take a general approach to the subject or pursue a concentration in the sub-fields of American politics, comparative politics, international relations or political theory. In addition students may select a world region for an area studies concentration. The Political Science Department’s course offerings span the discipline of political science, from American political institutions, to the politics of world regions, the emergence of a new international order, and recent and ancient political ideas. The Department’s curriculum is divided into the four standard fields of American politics, comparative politics, international relations, and political theories. There are also other opportunities for study in political processes of elections and communications and public policy.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

A minimum of 9 course units in Political Science are required, of which 6 must be taken in the Political Science Department at the University of Pennsylvania (includes Washington, DC Semester). See Major Program Booklet for Transfer and AP credit restrictions.

For more information: http://www.sas.upenn.edu/polisci/content/undergraduate-program

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

The Department's curriculum is divided into the four standard fields of American politics, comparative politics, international relations, and political theories. There are also other opportunities for study in political processes of elections and communications and public policy.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

A minimum of 9 course units in Political Science are required, of which 6 must be taken in the Political Science Department at the University of Pennsylvania (includes Washington, DC Semester). See Major Program Booklet for Transfer and AP credit restrictions.

---

**Political Science: Political Theory, BA**

Political Science explores systematic approaches to understanding politics. Students may choose to take a general approach to the subject or pursue a concentration in the sub-fields of American politics, comparative politics, international relations or political theory. In addition students may select a world region for an area studies concentration. The Political Science Department's course offerings span the discipline of political science, from American political institutions, to the politics of world regions, the emergence of a new international order, and recent and ancient political ideas. The Department's curriculum is divided into the four standard fields of American politics, comparative politics, international relations, and political theories. There are also other opportunities for study in political processes of elections and communications and public policy.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

A minimum of 9 course units in Political Science are required, of which 6 must be taken in the Political Science Department at the University of Pennsylvania (includes Washington, DC Semester). See Major Program Booklet for Transfer and AP credit restrictions.

Psychology, BA

Studies in psychology introduce students to contemporary understandings of how organisms perceive, learn, think and interact with one another, how they develop, how they are motivated and how, individually and as members of species, they may be compared with one another. Psychology at Penn is a diverse discipline, with topics ranging from neuroscience to psychopathology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

A minimum GPA of 2.0 is required.

6 course units of Psychology courses must be taken at the University of Pennsylvania.

Religious Studies, BA

Religion is a complex network of ideas and actions (ethical and ritual) that express a group’s sense of ultimate meaning of life. The academic study of religion examines how the beliefs and values of contemporary and historical cultures shape and are shaped by societal factors, long-standing traditions, and distinctive forms of literary and artistic expression.

Because of the multi-faceted nature of the subject matter, the University of Pennsylvania’s Religious Studies major program of study is open to students looking to tailor their educational experience to fit with their
own personal and academic areas of interest. Each undergraduate who wishes to major in Religious Studies will meet with the Chair of the Department prior to claiming the major to discuss their desired coursework and create an individualized plan of execution.

As our core faculty shares research foci and skills in the study of material culture (art, manuscripts, archaeology, inscriptions, and other primary historical sources), we are well-suited to lead serious students in intensive research to better prepare them for graduate study which requires research and evaluation skills.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

### Romance Languages: French and Italian, BA

The Dual Romance Languages Major allows students to pursue advanced coursework across two Romance Languages: French, Spanish, and/or Italian. It is an 18-credit major, with nine advanced courses in each language. Interested students should contact the Undergraduate Coordinator or the appropriate undergraduate chairs for more information and guidance.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Students are required to meet with the appropriate undergraduate chairs prior to beginning course work. Study Abroad courses must be pre-approved by the Undergraduate Chair to count for the major.

**Russian and East European Studies: Cinema, Arts and Letters, BA**

The major in Russian and East European Studies provides a program of study that enables a broad multi-disciplinary and multi-cultural understanding of the languages, literatures, cultures, histories, and societies of Russia, Central and Eastern European, and the Balkan and Baltic regions. For the language requirement, students can choose any regional language offered at Penn (i.e. Bosnian/Croatian/Serbian, Hungarian, Polish, Russian, Ukrainian) or in which they can demonstrate an equivalent proficiency. In addition to linguistic flexibility, the major allows students to pursue their specific disciplinary interests through three concentrations: Language, Literature, and Culture; History, Politics, and Society; and Cinema, Arts, and Letters. Majors are encouraged to complete a summer or semester abroad to gain first-hand understanding of the communities they study and to advance their language competency. The major offers an honors option.

Knowledge of Russian and East European languages and cultures is a marketable and impressive skill, whether you are in academia, arts, law, medicine, governmental service, public interest, business, or politics. Russian and East European majors and minors land jobs in a variety of settings. They go on to work in business as financial and policy analysts for American and foreign companies. They work for NGOs, publishing houses, or the media. They teach abroad and consult in marketing, advertising, aerospace, or computer engineering. And, of course, some work as educators in universities and schools and as employees of the US government.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

**Major Requirements**

**Russian and East European Studies Core**

Select one of the following: 1

- EEUR 010 Central and Eastern Europe: Cultures, Histories, Societies
- RUSS 010 Intro to Russia and Eurasia: Histories, Cultures, Societies

**Concentration Requirements** 2

- Select 7 courses 7

**Electives**

- Select 4 Electives 4

Total Course Units 32
You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

Students take seven REES courses* with cinema studies, art history, and literature content. 400-level or 500-level (or equivalent) content-based language courses may be counted towards this requirement. * Note that some REES courses (defined as those with RUSS and EEUR course numbers) are offered through Penn Language Center (PLC) (http://plc.sas.upenn.edu)

Chronological, Disciplinary, and Geographical requirements must be met with concentration and free elective courses.

Because the language of cinema in this part of the world is deeply historical and cultural, students must take at least one broad survey course that covers the period before 1800, one that covers the period before 1900 and one that covers the period after 1900 to fulfill the Chronological Distribution requirement.

Students must take at least one course with cinema studies content, one with art history content, and one with literature content to fulfill the Disciplinary Distribution requirement.

Honors

Applicants must have a minimum overall 3.3 and a GPA of 3.5 in the major.

Russian and East European Studies: History, Politics and Society, BA

The major in Russian and East European Studies provides a program of study that enables a broad multi-disciplinary and multi-cultural understanding of the languages, literatures, cultures, histories, and societies of Russia, Central and Eastern European, and the Balkan and Baltic regions. For the language requirement, students can choose any regional language offered at Penn (i.e. Bosnian/Croatian/Serbian, Hungarian, Polish, Russian, Ukrainian) or in which they can demonstrate an equivalent proficiency. In addition to linguistic flexibility, the major allows students to pursue their specific disciplinary interests through three concentrations: Language, Literature, and Culture; History, Politics, and Society; and Cinema, Arts, and Letters. Majors are encouraged to complete a summer or semester abroad to gain first-hand understanding of the communities they study and to advance their language competency. The major offers an honors option.

Knowledge of Russian and East European languages and cultures is a marketable and impressive skill, whether you are in academia, arts, law, medicine, governmental service, public interest, business, or politics. Russian and East European majors and minors land jobs in a variety of settings. They go on to work in business as financial and policy analysts for American and foreign companies. They work for NGOs, publishing houses, or the media. They teach abroad and consult in marketing, advertising, aerospace, or computer engineering. And, of course, some work as educators in universities and schools and as employees of the US government.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

Science, Technology and Society: Science/Nature/Culture, BA

Science, Technology & Society (STSC) examines the social contexts in which science and technology occur, the organizations of people and things that make up science and technology systems, and the social and cultural consequences of scientific and technological change over time. In a wide array of courses, STSC majors explore the relationship between scientific knowledge, technological innovations, technological systems, and society past and present.

This program equips students with sophisticated critical faculties, multidisciplinary skills and wide knowledge that enables our graduates to go into business, law, government, journalism, research, and education.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

2019-20 Catalog | Generated 10/18/19
Sociology: Global and International Studies, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

In this concentration, students examine a variety of global and international issues such as immigration, urbanism, demographic change, world health, and the persistence of social inequality.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

For more information: https://sociology.sas.upenn.edu/global_international_studies

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

---

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 Students are encouraged to take some courses outside of their concentration.

Honors

The course unit requirements for honors count toward the 14 course units needed to complete the Sociology major. Applicants must have an overall GPA of 3.3 and a GPA of 3.5 in the major.

Sociology: Law and Society, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Sociologists study institutions, and among the most important is the law. This concentration examines issues such as: What is deviance and how do we define it? What is the relationship between the law and other social institutions? The concentration is suitable for students with a variety of interests, but may be especially well-suited to those interested in careers in law and criminal justice.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

For more information: https://sociology.sas.upenn.edu/content/concentrations-sociology-law-and-society

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.
Sociology: Quantitative Methods, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Sociologists pursue knowledge in many ways, one of which is through the examination of society through surveys, demographic data, and statistical models. In this concentration, students will become familiar with quantitative methods in sociology, both with respect to how to use them in general (e.g., Introduction to Demographic Methods) and how they are used for specific topics (e.g., Health of Populations).

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

### Sociology: Sociology of Culture, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

The sociology of culture investigates an aspect of human life that is central to its definition: the origins and development of meaning - religious, moral, normative, aesthetic, cognitive - and how they are expressed in and serve to shape human conduct. Processes of cultural innovation and cultural stability are examined in various social institutions and settings of American, Middle Eastern, European, and Asian societies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be taken in Sociology.

For more information: https://sociology.sas.upenn.edu/sociology_of_culture

### Sociology: Sociology of Families and Populations, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

The sociology of families and populations investigates an aspect of human life that is central to its definition: the origins and development of meaning - religious, moral, normative, aesthetic, cognitive - and how they are expressed in and serve to shape human conduct. Processes of cultural innovation and cultural stability are examined in various social institutions and settings of American, Middle Eastern, European, and Asian societies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be taken in Sociology.

professionally under the large-scale mission of the College of Arts & Sciences.

The family is one of the most important institutions in any society, and it is critical to the socialization of each generation and the stability and functioning of the larger society. Family systems vary across cultures and have changed dramatically in the United States in recent decades. Understanding the causes and consequences of such variation is a central focus of social research. Family change is reflected in demographic patterns through its impact on fertility, marriage, divorce, migration, and mortality. Population processes also respond to technological factors, economic change and social policy. The study of population patterns provides an opportunity to investigate quantitatively the interactions between large social aggregates and the behavior of individuals.

Conceptions of health and illness, although not uniform the world over or even in any one society, are of fundamental importance in every society. In this concentration, students focus on the following topics: How health is defined in various societies; how the ill are viewed by the well; how illness is treated; who the healers are, how they are trained, and what their position is in society; the relationships among the religion, class, gender, and age of the ill and their healers; and when and how public health policies are inaugurated.

Sociology: Structures of Opportunity and Inequality, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

What is the balance of individual self-determination and institutionalized constraint in shaping people's lives? Social institutions such as the educational system and the economy sort people and distribute rewards, but their workings are profoundly shaped by persistent inequalities of class, ethnicity, gender, age, race, and nationality. How and why do such inequalities persist? How might opportunities be more fairly distributed? What sorts of individual and collective action affect existing structures of constraint?

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

Applicants must have an overall GPA of 3.3 and a GPA of 3.5 in the major.
Sociology: Urban Sociology, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Neighborhoods, cities, and metropolitan areas are communities defined by geographic, economic, legal, political, cultural, and social boundaries. The characteristics distinguishing urban areas that affect social interactions include density of concentration of residents and firms-relative homogeneity in ethnicity, class, education, language, and income of neighbors; shared representations, such as sports teams; common meeting places and facilities, such as churches, schools, clubs, restaurants, and businesses; and facilities of communication and transportation. How does the configuration of urban areas affect opportunities for employment, education, health, and safety? What shapes the interactions within and across neighborhoods? Why are jobs suburbanizing? Why are neighborhoods and schools segregated by race, ethnicity, and income?

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

South Asia Studies, BA

South Asia Studies is an interdisciplinary field focusing on the history, languages, society, literature, and art from India, Pakistan, Bangladesh, Nepal, Sri Lanka, Afghanistan, and Bhutan. We are America’s oldest and arguably most distinguished South Asia regional studies program dealing with the past and contemporary life of one-fifth of the world’s population and teaching more languages than any other South Asian studies program in the US. Having a deep knowledge of the country set to outpace the US as the second largest economy in the world in an increasingly competitive global job market gives graduates a competitive edge over others with more generic skills. Make your home in a department where you get to know your Faculty and they know you as an individual, whether as a major or double major. You don’t have to
know anything about India or be South Asian to find a home with us; just
be curious!

The minimum total course units (https://www.college.upenn.edu/credits-
needed-major) for graduation in this major is 32. Double majors may
entail more course units.

**Theatre Arts, BA**

The Theatre Arts program focuses on all intellectual and creative aspects of theatre and performance studies. Our courses link academic approaches to the theatre such as the study of dramatic literature, theory, history, and criticism, to practical aspects of performance such as acting, directing, designing, devising, and playwriting. Special features of our program include faculty-directed productions, which are taught as courses for credit, and extracurricular programs such as workshops and talks with visiting artists, staged readings, and theatre outings. One special highlight of our program is the Edinburgh Project. On alternating years, majors are selected to enroll in a course that develops a performance piece that travels to the Edinburgh Festival Fringe in Scotland. The honors thesis is another special opportunity in which majors who are accomplished in both academic and production work are invited to work on honors thesis projects, which may be based on practice such as acting, directing, and design or on scholarly research.

Penn Theatre Arts graduates proceed to a wide array of successful careers, both in and out of the theatre. Our majors are well-prepared to enter professional MFA programs in acting, directing, or design, as well as doctoral programs. We also count among our alumni not only those who are successful in theatre and film as artists, producers, and business people, but also those who flourish in unrelated fields, such as medicine and law.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

Urban Studies, BA

Urban Studies students are interested in making a difference and connecting to real world issues. To do this well, students learn about urban history and current challenges. They come to understand how policy at the national level and global economic trends affect what we see at the local, even neighborhood level. In a broad, theoretical sense, the central intellectual frame of Urban Studies is about understanding people and place at different spatial scales. Individuals, groups, and public officials make decisions and design policy that in turn affects how people and resources are distributed in space and defines what kinds of places result. Urban Studies students take this understanding to explain the conditions of urban places and work towards creating places that foster equity, better health outcomes, environmental sustainability, and a better quality of life. In addition to urban studies coursework and coursework in a disciplinary concentration, all of our students complete an internship for credit and carry out an original research project.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Honors

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Visual Studies: Architecture Practice and Technology, BA

Visual Studies at the University of Pennsylvania prepares students to forge innovative connections across the disciplines that study vision and images. Students acquire a critical awareness of seeing and the problems and possibilities for investigating, thinking, and writing about seeing in the 21st century. Fundamentally interdisciplinary, the Visual Studies Program partners with the Departments of Philosophy, Psychology, History of Art, Fine Arts, and Architecture. Students may also find interest in Penn Programs such as Cinema Studies and Gender, Sexuality, and Women’s Studies or outside of the School of Arts and Sciences in the Annenberg School of Communication, and the School of Engineering and Applied Science.

Sector C enables students to develop skills in the making of art ranging from the two- and three-dimensional to digital and time-based media, and includes both fine arts and architecture tracks.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

</tbody>
</table>

Total Course Units: 35

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2. Important - Check for Pre-Requisites on PSYC and some FNAR courses.
3. Four courses (4 course units) in your concentration and one course (1 course unit) from another Sector. (Note: No Stage 2 courses may be double-counted in Stage 3).

### Honors

Applicants must have a minimum GPA of 3.70 in the major.

- Senior Project Completed (Grade of A)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Visual Studies: Art, Practice and Technology, BA

Visual Studies at the University of Pennsylvania prepares students to forge innovative connections across the disciplines that study vision and images. Students acquire a critical awareness of seeing and the problems and possibilities for investigating, thinking, and writing about seeing in the 21st century. Fundamentally interdisciplinary, the Visual Studies Program partners with the Departments of Philosophy, Psychology, History of Art, Fine Arts, and Architecture. Students may also find interest in Penn Programs such as Cinema Studies and Gender, Sexuality, and Women’s Studies or outside of the School of Arts and Sciences in the Annenberg School of Communications, and the School of Engineering and Applied Sciences.

Sector C enables students to develop skills in the making of art ranging from the two- and three-dimensional to the digital and time-based media, and includes both fine arts and architecture tracks.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

**Actuarial Mathematics, Minor**

Actuarial Science stands at the intersection of risk and money. Actuaries use their knowledge of mathematics and probability theory to define, analyze and solve complex business, financial and social problems. Actuaries evaluate individual and corporate risks, and design financially sound insurance and pension plans. Graduates from the University of Pennsylvania with an Actuarial Mathematics Minor are expected to be in great demand by the insurance and banking industry.

For more information: [https://www.math.upenn.edu/undergraduate/math-majors-and-minors/minor-actuarial-mathematics](https://www.math.upenn.edu/undergraduate/math-majors-and-minors/minor-actuarial-mathematics)

**Africana Studies, Minor**

Africana Studies is an interdisciplinary field of study devoted to the critical and systematic examination of the cultural, political, social, economic, and historical experiences of African Americans, Africans, and peoples of African descent around the world. Our course of study is designed to provide students with an integrated understanding and appreciation for a new global black studies. An undergraduate degree in Africana Studies prepares students for graduate work in the humanities, social sciences, and professional schools, as well as a range of careers in teaching, business, public service, and the arts, among others.
American Public Policy, Minor

The minor in American Public Policy enables undergraduates interested in American Public Policy to construct an integrated program across the University. The minor — for students who do not major or concentrate in PSCI or BEPP — requires six courses, three from each department, in addition to the course work required for their major or concentration.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Ancient History, Minor

Classical Studies encompasses the civilization of the ancient Greeks and Romans from prehistory to the Middle Ages, with emphasis on the literature, philosophy and history of the classical Greek and Roman periods. It includes economic, political and social and intellectual history as well as philosophy, archaeology, religion and myth. Students may choose a track that emphasizes the study of texts in Greek and/or Latin, or they may opt for a program of courses that do not require any knowledge of the ancient languages.

**Anthropology, Minor**

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. The Anthropology minor is a 6 credit minor, in which students are encouraged to draw from all sub-fields of the discipline.

1 No more than 4 courses from any one field (Cultural/Linguistic, Archaeology, Human Biology) can be applied to the minor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Archaeological Science, Minor**

The Minor in Archaeological Science consists of six course units. Of these six, four will be CAAM classes from introductory, intermediate and advanced levels; one must be an advanced class with an archaeological science research component (the capstone class); and one must be a class in the archaeology or culture of a relevant area.

To Declare:

Students interested in declaring a Minor in Archaeological Science should contact Dr. Marie-Claude Boileau at mboileau@upenn.edu.

For more information: [https://www.penn.museum/teachers-and-students/for-penn-students/caam/minor-in-archaeological-science](https://www.penn.museum/teachers-and-students/for-penn-students/caam/minor-in-archaeological-science)

**Architectural History, Minor**

The Architectural History Minor aims to deepen students’ knowledge of artistic production and practice over the scope of human history. A Minor program in architectural history may complement the student’s Major in a cognate field, or it may be unrelated to the student’s primary field instruction.

For more information: [http://www.sas.upenn.edu/archhistory/undergraduate/minor](http://www.sas.upenn.edu/archhistory/undergraduate/minor)

Asian American Studies, Minor

Asian American Studies explores the historical and contemporary experiences of Asian immigrants and of persons of Asian ancestry in North America, and the relevance of those experiences for understanding race and ethnicity in national and global contexts. The program introduces students to the methods and concerns of a wide spectrum of disciplines: anthropology and ethnography, economics, history, law, literature, sociology and demography, political science, and urban studies, as well as creative and expository writing.

Biological Basis of Behavior, Minor

Biological Basis of Behavior is an interdisciplinary program in which students explore the relationship between behavior (both human and animal) and its organic bases. The Program offers courses in virtually all areas of neuroscience ranging from cellular neurobiology to cognitive neuropsychology and integrates these basic interdisciplinary courses with basic science requirements in biology, chemistry and psychology. Students also engaged in supervised research in areas as diverse as molecular neurobiology, chemical neuroanatomy, visual sciences and behavioral ecology.

Biology, Minor

The Biology minor introduces students to fundamental topics in the areas of cell and molecular biology, genetics, physiology, and ecology and evolution. This broad range of coursework is designed to provide students with a sufficient background to understand the basics underlying many of the current advances in the field.

Biophysics, Minor

Bridging the biological sciences and the physical sciences, Biophysics is concerned with physical and chemical explanations of living processes, especially at the cellular and molecular levels. Detailed molecular descriptions are emerging for genetic elements and for the mechanisms that control their propagation and expression. Biophysical studies include the investigation of protein structure, nucleic acid structure, enzyme mechanisms, the phenomena underlying cellular behavior, excitable phenomena in nerve, muscle and visual cells, and integrative neural phenomena.

Chemistry, Minor

Chemistry is concerned with the study of matter and the changes matter can undergo. The chemistry program provides a basic foundation for career opportunities in chemical research and teaching, in scientific communication and information transfer, and in the health professions. The chemistry minor provides an introduction to several areas of chemistry, providing exposure to both lecture and laboratory courses.

Cinema and Media Studies, Minor

The Penn Cinema and Media Studies major and minor are traditional humanities programs involving the critical study of film and media history, theory, and aesthetics. Reflecting the hybrid nature of the field of Cinema and Media Studies, our faculty members are housed in departments across SAS and the university, and we cross-list courses with various departments and schools, including Africana Studies, Anthropology, Communications, East Asian Language and Civilizations, English, Fine Arts, German, History, History of Art, Near Eastern Languages and Civilizations, Romance Languages, Slavic Languages and Literatures, and Women’s Studies. This truly interdisciplinary program will introduce students to the wide range of methodologies used to study film and media, and this intersection with other disciplines makes Cinema and Media Studies an ideal component of a double major.

Classical Studies, Minor

Classical Studies encompasses the civilization of the ancient Greeks and Romans from prehistory to the Middle Ages, with emphasis on the literature, philosophy and history of the classical Greek and Roman periods. It includes economic, political and social and intellectual history as well as philosophy, archaeology, religion and myth. Students may choose a track that emphasizes the study of texts in Greek and/or Latin, or they may opt for a program of courses that do not require any knowledge of the ancient languages. The Classical Studies Department provides extensive training at the Undergraduate level as well as graduate training in both Classical Studies and Ancient History.

For more information: [http://www.classics.upenn.edu/](http://www.classics.upenn.edu/)

Please see Undergraduate Chair for for details on course approval.

Cognitive Science, Minor

Cognitive science is the empirical study of intelligent systems, including the human mind. An interdisciplinary science, it combines results from biology, computer science, linguistics, mathematics, neuroscience, philosophy and psychology to the study of language processing, perception, action, learning, concept formation, inference and other activities of the mind, with applications for information technology and the study of artificial intelligence.

1 Consult with Undergraduate Chair.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Comparative Literature, Minor

The undergraduate program in Comparative Literature welcomes students interested in the study of literature from theoretical, interdisciplinary, cross-cultural, and global perspectives. The core courses train students to appreciate the variety of meanings that texts acquire in different institutional and philosophical contexts and different socio-political frameworks. There are three concentrations within the major: National and Transnational Literatures (four courses in each of two languages), Theory, and Globalization.

Comparative Literature is a flexible program, allowing students to take courses in a variety of departments in the College. Students with interests in more than one national literature and in fields such as philosophy and political theory, art and aesthetics, and film and music will find the requirements congenial. The program provides students with a cosmopolitan intellectual background that is increasingly in demand in an era of globalization.

The minor in Comparative Literature requires students to take an introductory course and a course in theory, along with an open selection of four literature and film courses.

Computational Neuroscience, Minor

The BBB Program has established a new cross-school, inter-disciplinary Minor in Computational Neuroscience, which is an emerging field involving the application of quantitative methods to the analysis of neural circuits and the brain. In brief, the Minor requires eight courses, four core classes and four electives, the latter encouraging breadth. No more than
five of these courses can also be used to fulfill requirements for another major or minors.

### Consumer Psychology, Minor

The goal of the interschool Consumer Psychology Minor is to create a program that fosters the natural link between Psychology in the College and Marketing in Wharton. To fulfill the Minor in Consumer Psychology students must complete four courses from the Psychology Department in the College and four courses from the Marketing Department in Wharton, and the stats requirement. Both College and Wharton requirements will consist of core courses along with a set of elective courses. College students who wish to minor in Consumer Psychology must count two of the four required psychology (PSYC) courses towards only the Consumer Psychology minor (and towards no other major or minor).

1 Note: Two of the four courses must count ONLY toward the CNPS minor, no other major or minor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Creative Writing, Minor

Creative Writing is the study of writing and literature with an emphasis on cultivating students’ own approach to craft. Students can choose from a range of workshops in fiction, creative nonfiction, poetry, screenwriting, playwriting, or journalism, all of which expose them to a range of writing in the field and give them opportunities to craft their own original work. Students can minor in Creative Writing by completing four workshop courses and two courses in the study of literature.

Journalistic Writing is the study of nonfiction writing and literature with an emphasis on cultivating students’ own skills in reporting, editing, interviewing, investigative journalism, media scholarship, and writing for a range of platforms. Students can minor in Journalistic Writing by
completing six workshop courses in journalism and creative nonfiction, including one required course in long-form journalism.

Digital Humanities, Minor

The Undergraduate Minor in Digital Humanities is offered by the School of Arts and Sciences at the University of Pennsylvania. It has been designed for students who want to augment their disciplinary studies in the humanities or humanistic social sciences with advanced digital research techniques and in-depth engagement with theoretical and practical questions raised by digital humanities. Students who are not majoring in humanities fields are also welcome to complete the minor.

Dutch (Netherlandic), Minor

The Dutch-speaking Low Countries (the Netherlands and part of Belgium) are a unique cultural community of about 22 million speakers in Northwestern Europe. The names of famous Dutch artists readily come to mind: Rembrandt, Rubens, Breughel, Van Eyck, Mondriaan, as do some of the cities where they lived: Amsterdam, Brussels, Leyden, Maastricht. But artists do not flourish in a vacuum. Each of these artists assumes a cultural, political, economic, and historical context that is worthy of study in its own right. The resources in Dutch Studies at Penn offer students and faculty the ability to learn more about:

• The Dutch Economy
• The Dutch Language
• The Netherlands and Belgium During the Nazi Occupation
• The Literature and Culture of the Dutch Colonial Period

For more information: https://www.sas.upenn.edu/germanic/languages/dutch

Intensive Summer study in Zeist or Gent can also count toward Minor requirements.

East Asian Area Studies, Minor

East Asian Area Studies focuses on East Asia as a region of the world and human experience, and provides an integrated curriculum drawing on the approaches of the social sciences and the humanities. The program requires relevant courses in areas including history, international
relations, political science, sociology, legal studies, and East Asian arts and cultures, while maintaining high standards in language study.

**For more information:** [https://ceas.sas.upenn.edu/undergraduate/secondary-undergraduate-page](https://ceas.sas.upenn.edu/undergraduate/secondary-undergraduate-page)

With intensive language courses (4 course units) the Minor will require 8 course units.

**Economic Policy, Minor**

Economics is a social science and as such an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are: the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; international trade and international finance (e.g., exchange rates).

Economic policy questions stand at the center of public policy debates in the U.S. and countries all around the world. The goal of the Economic Policy Minor is to provide students who are not majoring in economics with the analytical tools that are necessary to participate in and shape public policy debates. The foundation for the minor is provided by the microeconomics and macroeconomics principles courses. After having completed the principles courses, the student can choose a minimum of four elective courses, which apply the basic tools of economic analysis to specific policy questions. The completion of the Economic Policy Minor does not require university-level calculus courses.

For more information: http://economics.sas.upenn.edu/undergraduate-program/economic-policy-minor

East Central European Studies, Minor

The Minor program in East Central European Studies offers students the opportunity for the interdisciplinary study of the language, history, politics, literature, and culture of Eastern and Central Europe. The minor requires a total of six courses (6 c.u.) beyond the language requirement (two semesters), which students can satisfy by choosing any regional language currently offered at Penn (i.e. Bosnian/Croatian/Serbian, Hungarian, Polish, Ukrainian, Yiddish), by completing language coursework through a study abroad program, or by demonstrating equivalent proficiency.

For more information: http://ccat.sas.upenn.edu/slavic/

It is highly recommended that students take ECON 030 Public Policy Analysis as one of the electives.

Students may substitute a 0-level for a 200-level in the same subject area provided they fulfill the prerequisites.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Economics, Minor

Economics is a social science and as such an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are: the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; international trade and international finance (e.g., exchange rates).

The Economics Minor is intended for students with a strong interest in rigorous economics who are majoring in related fields. For instance, this minor should be attractive for students who are majoring in political science or sociology, who are interested in quantitative data analysis, or students looking for an applied field that accompanies a major in mathematics.

### English, Minor

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical "core," majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

European Studies, Minor

European Studies at Penn is an interdisciplinary minor and an ideal addition to the study of many disciplines in the humanities and social sciences. It supplements majors in history, political science, sociology and art history as well as in French, German, English, Spanish, Italian and Slavic languages. It is designed to give students access to:

- An understanding of Europe as a historical and cultural entity and its world leadership in business, politics and culture.
- A great variety of countries, cultures and languages whose interaction with each other and with the United States is an essential part of transatlantic culture.
- The institutions of a new Europe—European Union, Council of Europe, European Court of Human Rights—reflecting the largest experiment in building a global system of governance in human history.

Fine Arts, Minor

The Undergraduate Fine Arts Program combines studio practices, seminar courses, and interactions with visiting artists and professionals in order to provide an open intellectual framework to foster critical awareness and independent methods of artistic research and learning. The Fine Arts Department offers a diverse range of studio courses in the areas of animation and 3D modeling, ceramics, design, drawing and painting, photography, printmaking, sculpture and video. The dynamic curriculum also provides students with the opportunity to thoroughly
French and Francophone Studies, Minor

French and Francophone Studies introduces students to the full span of historical and cultural traditions from France and the French-speaking world. Languages courses - from introductory to advanced - promote linguistic fluency, building on the skills students have acquired in high school or at Penn. Upper-level seminars explore a range of topics pertaining to literature, history, visual arts, and/or the media, and they offer majors and minors the opportunity to engage in research on French and global Francophone cultures across periods into contemporary times.

Gender, Sexuality, and Women's Studies, Minor

The Gender, Sexuality and Women's Studies Program is an interdisciplinary program that provides exciting intellectual opportunities to explore the role of gender in human affairs. The Gender, Sexuality and Women's Studies Program offers over 50 courses each year, many
cross-listed with other departments. GSWS offers a major, a minor, and a graduate certificate.

---

German, Minor

The major and minor programs in the Department of Germanic Languages and Literatures provide deep understandings of language and cultures. Building from basic language competency to synthesizing significant literary works, historical context and current media and politics, the program offers a comprehensive education through engaged, active learning in a combination of core courses with a wide range of electives. Your learning experiences can be broadened and applied in study abroad as well as internship programs.

---

Geology, Minor

The Geology minor is designed to provide the graduates with skills to determine the environmental and/or geologic events that have led to the structures and features of a location and to analyze a field site or geologic region. Areas of interest include mineralogy, petrology, volcanology, stratigraphy, economic geology and paleontology. Geology also includes subjects as varied as environmental geology, evolutionary biology, solid-state chemistry, oceanography, mineral economics and geochronology.

Global Medieval Studies, Minor

Eleven Penn departments contribute to the interdisciplinary program in Global Medieval Studies, which allows students to discover the pre-modern world together, as the root and necessary precondition to the modern. The program is broad geographically and temporally; it includes Europe, the Middle East, Asia, and Africa, and in the latter part of our period even the New World, from Late Antiquity to 1700. This was a formative historical and cultural period in a variety of civilizations, from the north-western corner of Europe, across the Mediterranean and the Middle East, and on to southern and eastern Asia, south to Africa and over the Atlantic Ocean to the New World. The program encourages students to view the world through the lens of various disciplinary and geographic perspectives and discover the interaction of diverse civilizations and religions. As the era that gave birth to contemporary nations and a time before the formation of modern geopolitical concepts, this period provides a critical space for thinking about the composite nature of contemporary identities.

The minor program in Global Medieval Studies can easily be combined with a major in a language and literature tradition, philosophy, science, international relations, or even natural sciences, to name a few. As broadly educated historians and humanists, students of Global Medieval Studies can go on to a variety of occupations or continue their education in a range of graduate programs or professional schools.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Hispanic Studies, Minor**

The demographic, economic and political realities of the United States, the articulation of a mainstream English culture with an always increasing diversity of Hispanic and Latino cultures, and the ongoing forging of strong cultural and economic ties throughout the Americas, have moved Spanish out of the bounds of the category of "foreign" language and culture in this country. There are many instances that point to the fact that Spanish will become–de facto if not officially–a second national language and culture of the United States. Furthermore, in Europe, Spain is assuming an ever-more significant role in the affairs of the European Union. The Spanish transition to democracy in the 1970s fostered an environment of cultural, linguistic and political diversity that for half a century has served as a fascinating model for the rest of Europe, both east and west.

Hence, the knowledge of Spanish culture gives students much more than the ability to communicate in the third-most-spoken language of the world. It prepares them to account for an entirely different national, continental and global reality in all its complexity. Since culture is the controlling category in this field of studies, the major in Hispanic Studies orients itself to the types of knowledge generated by new disciplines such as cultural studies, new historicism, ethics, and postcolonial studies.

Majors in Hispanic Studies are overwhelmingly double majors. This means that they bring to their classes a dialogic perspective that engages in the study of Hispanic cultures informed by interest in other fields such as history, government, sociology, economics, medicine, and law. The richness and depth of these interests make for lively and intellectually rewarding classroom discussions.

---

**Health Care Management, Minor**

The Biological Basis of Behavior Program and the Health Care Management Department of the Wharton School have jointly sponsored this effort. The objective is to provide students with exposure to two related areas: study in neuroscience and behavioral biology, as a leading example of the bioscience enterprise, and health services management, as the environment in which science innovation must be developed and managed.

The minor consists of eight courses, four from the Biological Basis of Behavior Program and four from Wharton. Students must earn a minimum grade of C- in courses taken to fulfill the minor requirements. Students must have a minimum of 3 courses that they count towards the minor and not towards any other major of minor.

**History of Art, Minor**

The Minor in the History of Art, like the Major, aims to deepen students’ knowledge of artistic production and practice over the scope of human history. A Minor program in art history may complement the student’s Major in a cognate field, or it may be unrelated to the student’s primary field instruction.

**History, Minor**

A Minor in History consists of six courses, four of which must be taken in the Penn Department of History. Students may count a maximum of two courses from either study abroad, credit away or transfer credit. History Minors may not count any major-related courses - these are courses from other Penn departments that are not cross-listed with History. Courses for a Minor may not be taken pass/fail.
International Development, Minor

The International Development minor is intended for students who wish to complement their primary area of study with an interdisciplinary focus on complex social problems associated with international development. The minor is intended to expand a student's chosen major by focusing on critical development issues from several different academic perspectives. Approved courses emphasize problems of development in poor countries and poorer regions of wealthier countries. The interdisciplinary nature of the minor allows students to embrace a global perspective on the processes of change and development, critically assess internal and external influences on the development process, and gain a deeper perspective on the interconnectedness of complex problems.

International Relations, Minor

International Relations addresses the ways in which governments, private groups and individuals relate to each other in the global political and economic systems. The program provides a solid grounding in the methodologies of political science, history and economics. The curriculum draws on the best courses relevant to world politics, offers a well-rounded liberal arts education and helps prepare students for law or business school, Ph.D. programs and international careers.

### Italian Studies: Italian Culture, Minor

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

For more information: [http://www.sas.upenn.edu/italians/](http://www.sas.upenn.edu/italians/)

1 At least 2 of the 4 electives must be taught in Italian. At least 1 of these 2 must be at the 300-level. No more that 2 extra-departmental Italian Studies courses taught in English may be counted towards the minor. No more than 3 courses may be taken abroad.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Jewish Studies, Minor

The Jewish Studies Program provides an opportunity for students to study the Jewish experience from several perspectives including: language (Hebrew, Yiddish, and Ladino), literature in the original languages and in translation, the history and culture of the Jewish people from Biblical Israel to 21st-century America and modern Israel, the exploration of Jewish law, and the roles of gender and sex in Judaism. Students may specialize in Jewish Studies through a major or a minor, or through one of the following concentrations: Jewish History within the History Department, Hebraica/Judaica within the Department of Near Eastern Languages & Civilizations, and Judaism within the Department of Religious Studies.

Journalistic Writing, Minor

Creative Writing is the study of writing and literature with an emphasis on cultivating students’ own approach to craft. Students can choose from a range of workshops in fiction, creative nonfiction, poetry, screenwriting, playwriting, or journalism, all of which expose them to a range of writing in the field and give them opportunities to craft their own original work. Students can minor in Creative Writing by completing four workshop courses and two courses in the study of literature.

Journalistic Writing is the study of nonfiction writing and literature with an emphasis on cultivating students’ own skills in reporting, editing, interviewing, investigative journalism, media scholarship, and writing for a range of platforms. Students can minor in Journalistic Writing by completing six workshop courses in journalism and creative nonfiction, including one required course in long-form journalism.

Law and Society, Minor

The Law and Society Minor program gives students the opportunity to study and understand the law within a sociological framework, by examining both the factors that affect variations in the law, as well as how those variations affect individuals and populations differently. In addition to a theoretical foundation in Sociology, students in the minor will study issues involving the state, its relationship to other institutions such as religions, corporations, civil liberties, the organization of courts, punishment and detention, legislatures, international bodies and trade agreements (such as NAFTA and the EU), race, class and gender discrimination, reproductive rights, LGBT rights and the legal profession in general. Although the focus of this minor will be on U.S. laws and the

1 Only two courses counted toward a major may be double-counted toward the LALS Minor. Study Abroad courses may count. Consult with your Minor Advisor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
U.S. society, laws and societies of other countries as well as international law and the international society will be used for comparative analysis.

The minor prepares students interested in the broad aspects of legal regulations and social organization. It is for students who are interested in graduate studies in law, applied community organizations, or business.

---

**Logic, Information, & Computation, Minor**

Modern mathematical logic began with work by Cantor, Frege, and other mathematicians during the last three decades of the nineteenth century who were concerned with providing a sound basis for the development of mathematical analysis. In the wake of “the crisis in the foundations of mathematics” precipitated by the discovery of various logical paradoxes at the turn of the twentieth century, mathematicians and philosophers such as Hilbert and Russell intensively pursued investigations into the logical foundations of mathematics. Connections between logic and the foundations of mathematics remained an important source for scientific developments in logic through the epochal results of Gödel in 1930 and 1931, which indicated both the scope and limits of the mechanization of mathematical reasoning. The great burst of scientific activity occasioned by Gödel's results led directly to Turing's mathematical characterization of mechanical computation in terms of simple devices, now known as Turing machines. The work of Gödel, Turing, and other logicians during the 1930s laid the scientific foundations for the revolution in computer and information technology that began in the last half of the twentieth century and continues today.

The Logic, Information, and Computation Program offers students the opportunity to engage in a systematic, integrative program of study within the School of Arts and Sciences. Logic remains one of the core disciplines in investigations of information and computation. Indeed, logic is playing a major role in advances in computer security, database technology, networking, and software engineering. Moreover, logic has expanded its role within mathematics beyond foundational studies and now enjoys rich connections with areas as diverse as algebra, analysis, and combinatorics. In light of the current importance of the investigation of computation and information from both a scientific and technological point of view, the Major and Minor in Logic, Information, and Computation will provide students with a strong background to pursue computational aspects of the natural, biological, and social sciences and prepare them for careers in information technology.

---

**Linguistics, Minor**

The Linguistics Program is intended to acquaint students with the methods and findings of the scientific study of human language and its relationships to cognition, society, and history. It serves as a preparation for graduate training in linguistics or related areas, and as part of a rigorous general education. Linguistic training is relevant to work in anthropology, philosophy, psychology, and language and literature, as well as to careers in such fields as education, computer science and law. Founded by Zellig Harris in 1947, the Penn Linguistics Department is the oldest modern linguistics department in the United States. We have outstanding programs in the core disciplines of syntax and phonology, as well as in sociolinguistics, semantics, discourse, historical linguistics, phonetics, and psycholinguistics. Penn is also the home of the Linguistic Data Consortium (LDC), a compiler and distributor of linguistic materials for language engineering research. The graduate group in Linguistics at the University of Pennsylvania is an interdisciplinary team of faculty from the Department of Linguistics and related departments. Our program has strong concentrations in several areas and a tradition of collaboration among its faculty.

For more information: http://www.ling.upenn.edu/undergraduate/minor-linguistics

---

*1 Must be taken in the Linguistics Dept. at Penn. Please consult with the Undergraduate Chair for selection of courses to match interests.*
Mathematics, Minor

At the core of modern theoretical science, mathematics has historically provided an expressive language as well and theoretical framework for advances in the physical sciences. It has since become central in the life and social sciences and computer science. Mathematics at Penn embraces traditional core areas of mathematics as well as developing areas (Penn is one of the world’s leading centers in the application of logic to theoretical computer science). The goals of the major program are to assist students in acquiring both an understanding of mathematics and an ability to use it. The mathematics major provides a solid foundation for graduate study in mathematics as well as background for study in economics, the biological sciences, the physical sciences and engineering, as well as many non-traditional areas.

Medical Sociology, Minor

The Medical Sociology minor gives students the opportunity to engage in the sociological study of medicine and the health of populations. A sociological perspective on medicine allows students to critically engage with the social and cultural framing of what is defined as "illness"; the structural factors that may contribute to those illnesses; and the interactive dynamics between healthcare providers and patients.

Students will be able to critically connect the organization of social groups with the profession of medicine, the practice of medical care, and the social factors that contribute to sickness and well-being. Students who complete this minor will have a theoretical foundation in Sociology, and a dynamic perspective on health and healthcare in the world today.

For more information: [https://sociology.sas.upenn.edu/medicalsociologyminor](https://sociology.sas.upenn.edu/medicalsociologyminor)

- Bioethics and Medical Sociology minors cannot double count more than 1 course unit.
- HSOC majors and Medical Sociology minors cannot double count more than 1 course unit.

**Modern Middle Eastern Studies, Minor**

The interdisciplinary Modern Middle Eastern Studies degree is designed to allow students to specialize in the Middle East as a region of the world and human experience by combining course work using both social scientific and humanistic approaches, underpinned by relevant language skills. Students will work with faculty committed to supporting interdisciplinary, applied, research-oriented advanced study. The minor gives students opportunities to work on problems of politics, policy, history, ideology, social thought, economic development, and international relations.

**Music: Jazz and Popular Music, Minor**

There are two paths of study for the Music minor. One flexible path allows students to draw together five courses on a wide array of topics in History, Theory, and Ethnomusicology. The other path is the Interdisciplinary minor in Jazz and Popular Music studies, which is intended for students who wish to integrate their interest in music in the contemporary world and in academically-based community service as a form of learning. This minor is also for music majors who wish to include knowledge of jazz and popular music performance into their degrees.

### Native American and Indigenous Studies, Minor

The Native American and Indigenous Studies (NAIS) Initiative at Penn features an inter-disciplinary Minor that focuses on the cultures and histories of Native Americans, First Nations, and other Indigenous peoples. Students can explore a diverse range of topics, including cross-cultural historical encounters, heritage landscapes, language recovery, cultural performance, law and sovereignty, museum anthropology, archaeology, decolonizing methods, and more. Many NAIS courses are cross-listed in more than one department (e.g., Anthropology, History, Religion). NAIS Faculty often use comparative case studies of Indigenous communities in different world settings, past and present, to illuminate current issues, locally and globally.

For more information: https://nais.sas.upenn.edu/

NAIS courses must be taken for a grade (not pass/fail). Students must achieve a grade no lower than a C in each course.

</tr>
</tbody>
</table>

1. With proficiency in Hebrew before entering Penn, the minor may be fulfilled with 6 course units.
2. At least 2 course units must be in the study of Hebrew texts from any two areas: Biblical, Rabbinic or Medieval, and Modern Hebrew literature.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages & Civilizations: Arabic & Islamic Studies, Minor

Arabic and Islamic Studies focuses on languages and cultures of the wider Middle East in the context of Islamic Civilization. Because of the interdependence of language and culture, a primary emphasis is on gaining mastery of Middle Eastern languages such as Arabic and Turkish, alongside coursework in history, religion, and culture.

For more information: http://www.sas.upenn.edu/nelc/undergrad_programs/nelc_minor.html

2. See website (http://www.nursing.upenn.edu/nutrition-minor/plans-of-study) for list of approved elective courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Philosophy, Minor

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The Philosophy Minor requires a Philosophy balanced selection of courses in the various fields of philosophy and its history.

Physics, Minor

The aim of physicists is to discover the most fundamental principles of nature. Their tools are mathematics and experiment. The physical world as we perceive it is very complex, yet the principles of physics are inherently simple. A physicist’s forte is the ability to analyze a problem, reduce its complexity, and arrive at an understanding of the underlying patterns of nature in terms of simple relationships among constituent elements. Learning to do this gives Physics minors an intellectual versatility that can serve them well in a variety of future activities ranging from research and teaching in Physics or related sciences to careers in law, the health professions, and high-technology companies.

For more information: http://www.physics.upenn.edu/undergraduate/physics-astronomy-major#minor

Political Science, Minor

The Political Science Department's course offerings span the discipline of political science, from American political institutions, to the politics of world regions, the emergence of a new international order, and recent and ancient political ideas. The Department's curriculum is divided into the four standard fields of American politics, comparative politics, international relations, and political theories. There are also other opportunities for study in political processes of elections and communications and public policy. A minor involves one introductory political science course and five political science electives.

Psychoanalytic Studies, Minor

Psychoanalytic ideas provide a coherent basis for understanding how people feel and think, and how they function as individuals and in groups. These ideas, centered on unconscious emotional processes and human relationships, continue to evolve and develop. They form a bridge across many disciplines throughout the humanities, social sciences, and some of the natural sciences. Penn is now one of very few schools in the country (and the world) to offer the exciting opportunity of a minor in Psychoanalytic Studies.

As it provides a unifying body of ideas, Psychoanalytic Studies comprises courses in many departments. The minor is designed in partnership with the Psychoanalytic Center of Philadelphia, and students who sign up for the minor also have the opportunity to meet monthly with a practicing psychoanalyst to learn about contemporary psychoanalytic theories and therapies. Students who complete six courses that count toward the minor as well as a series of meetings with a psychoanalytic mentor will receive both the minor on their transcript and a Certificate of Accomplishment from the Psychoanalytic Center of Philadelphia.

For more information: http://web.sas.upenn.edu/psys/
Psychology, Minor

Studies in psychology introduce students to contemporary understandings of how organisms perceive, learn, think and interact with one another, how they develop, how they are motivated and how, individually and as members of species, they may be compared with one another. Psychology at Penn is a diverse discipline, with topics ranging from neuroscience to psychopathology.

The Minor in Psychology consists of six courses. It is intended to give the student a broad base in Psychology without the commitment to the full course load of the major. The requirements are therefore comparable to those of the major in type but reduced in number. At least three of the six required course units must be taken at Penn. In addition, students minoring in psychology must have a minimum of 3 PSYC courses that they count only towards the minor and not towards any other major or minor.

For more information: https://psychology.sas.upenn.edu/penn-undergraduate-psychology

Religious Studies, Minor

The Religious Studies minor is a great way to gain background in the scholarly study of religion in order to supplement or enhance major studies in other fields like Jewish Studies, History, Anthropology, Art History, Psychology, Political Science, or even Nursing, Engineering, Pre-Med, Pre-Law, and Business. Students in Wharton or the College of Nursing have taken a Religious Studies minor to gain some fluency in matters of business ethics, bio-ethics, cross-cultural analysis, inter-religious affairs, and the like.

Every minor program must include six courses in at least two different religious traditions. At least two of the six courses must be taken with core Department faculty. Students wishing to focus on an individualized topic may work out a program with the Undergraduate Chair. RELS also offers many course options which can count towards College Sector requirements, which makes it easier to incorporate the RELS minor into a typical undergraduate course-load.

For more information: https://www.sas.upenn.edu/religious_studies/undergraduate/minor
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Russian and East European Studies: Russian Culture and History, Minor**

The Department of Slavic Languages and Literatures offers programs in Russian and, with the support of the Penn Language Center, courses in the Czech and Polish languages. The department also offers a series of courses for students who have spoken Russian at home and wish to gain literacy and/or improve their language skills or to pursue the study of Russian literature and culture in Russian. Students of Russian at Penn are invited to reside in the Russian House (which brings together students interested in daily use of the language) and encouraged to spend a semester of study abroad.

**Science, Technology and Society, Minor**

Science, Technology & Society (STSC) examines the social contexts in which science and technology occur, the organizations of people and things that make up science and technology systems, and the social and cultural consequences of scientific and technological change over time. In a wide array of courses, STSC majors explore the relationship between scientific knowledge, technological innovations, technological systems, and society past and present.

For more information: [https://hss.sas.upenn.edu/undergraduate/stsc-major/stsc-minor](https://hss.sas.upenn.edu/undergraduate/stsc-major/stsc-minor)
### Sociology, Minor

The Sociology Minor program allows students to get an introduction to major sociological concepts and theories, along with methods for sociological research, and a broad foundation of substantive, empirical, and theoretical knowledge rooted in the discipline.

### South Asia Studies, Minor

South Asia Studies is an interdisciplinary field focusing on the history, languages, society, literature, and art from India, Pakistan, Bangladesh, Nepal, Sri Lanka, Afghanistan, and Bhutan. We are America’s oldest and arguably most distinguished South Asia regional studies program dealing with the past and contemporary life of one-fifth of the world’s population and teaching more languages than any other South Asian studies program in the US. Having a deep knowledge of the country set to outpace the US as the second largest economy in the world in an increasingly competitive global job market gives graduates a competitive edge over others with more generic skills. You don’t have to know anything about India or be South Asian to enjoy our great, flexible minor. So ask us about it today!

For more information: [http://www.southasia.upenn.edu/undergraduate/major-and-minor-requirements](http://www.southasia.upenn.edu/undergraduate/major-and-minor-requirements)

### Statistics, Minor

The aim of statistical modeling is to empower effective decision making, and the field’s unique contribution is its ability to incorporate multiple levels of uncertainty in the framing of wise decisions. Over the last few years, the development of new computational tools and the unprecedented evolution of “big data” have propelled statistical modeling to new levels. Today, statistical modeling and machine learning have reached a level of impact that no large organization can afford to ignore. The information landscape is changing as it has never changed before.

Students interested in this minor must have the prior approval of the Statistics Undergraduate Program Director, Professor Abraham Wyner (ajw@wharton.upenn.edu), to develop a curriculum for the minor that is appropriate for their interests. Wharton students are not eligible for this minor.

For more information: [https://statistics.wharton.upenn.edu/programs/undergraduate/statistics-minor/](https://statistics.wharton.upenn.edu/programs/undergraduate/statistics-minor/)

**Theatre Arts, Minor**

The Theatre Arts Program offers a six-course minor, with three courses that focus on academic approaches to the theatre, such as the study of dramatic literature, theory, history and criticism, and three that focus practical aspects of performance, such as acting, directing, designing, devising, and playwriting. English majors concentrating on drama will find courses that cross-list; a diverse group of students with a wide array of major fields of study find it possible to pursue their interest in Theatre Arts with a minor.

For more information: [http://theatre.sas.upenn.edu](http://theatre.sas.upenn.edu)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Urban Education, Minor

The Urban Education Minor is open to undergraduates in all disciplines, and requires seven CUs. Students choose from among three concentrations depending on interest in pursuing teaching certification or deepening one’s background in urban education policy: Elementary Education; Secondary Education; Urban Education Policy, Research, and Practice. Students in all three concentrations take three core courses. The additional four requirements vary depending on the track.

Urban Studies, Minor

The Urban Studies minor offers students an opportunity to think and learn about cities in an informed, disciplined and integrated way. The program introduces a variety of perspectives on the origins, development, and nature of cities, stressing the application of theory to practice. Students take four Urban Studies courses, and complete an internship for an additional two CUs in this six CU minor. The internship component allows students the opportunity to work closely with a community group, public agency, non-profit or private organization in the city.

Liberal and Professional Studies

The College of Liberal and Professional Studies (LPS) is the home of lifelong learning at the University of Pennsylvania. Housed within the School of Arts and Sciences, we offer high school, undergraduate, post-baccalaureate, graduate, summer and online studies as well as customizable professional training with courses that span across disciplines.

Our outstanding students—engaged, curious and driven—come to Penn from all over the world with diverse academic and professional backgrounds. Whether you want to learn English while immersed in an Ivy League institution, join the global classroom in a MOOC, spend your summer abroad or start a new career, LPS offers the very best opportunities.

No matter where you are in life, or in the world—preparing for college, living overseas, working full-time, active in the military or studying on-campus—the College of Liberal and Professional Studies opens the Ivy League to you.

Creative Studies, BAAS

By studying the transformative creations of others in the social, cultural, and historical contexts in which they were produced, you can nurture your own creative expression and develop a deeper understanding of the creative process in action. A concentration in Creative Studies offered by Penn LPS Online combines experiential and applied humanities through the study of the creative arts, expanding your ability to critically analyze, compare, and evaluate the meanings and significance of creativity as expressed across a variety of media. In this degree concentration, you engage in individual and collaborative creative writing and explore a
range of creative accomplishments in fields including literature, cinema studies, theater, and other arts.

For more information: https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-concentrations/creative-studies

Curriculum

The Bachelor of Applied Arts and Sciences (BAAS) recognizes the power of an applied liberal arts education to provide students with strong communication skills, understanding of different cultures and perspectives, and the ability to apply their knowledge to nuanced, complex scenarios with insight, perspective, and empathy.

Overview of degree requirements

30 course units are required for the Bachelor of Applied Arts and Sciences degree.

<table>

BAAS students are only required to visit campus for two on-campus learning experiences, which may be as short as an extended weekend. In addition to course requirements, BAAS students complete a capstone project in their degree concentration as well as an e-portfolio.

Foundational requirements

The foundational requirements of the BAAS degree reflect the core competencies and values of Penn LPS Online: the skills and knowledge needed to understand and solve complex problems, the ability to communicate effectively with a wide variety of audiences and an appreciation for diverse cultures and traditions. Students can transfer a maximum of 4 course units of foundational courses from a regionally accredited institution. Our program team can also give a preliminary evaluation of transfer credits before students officially apply. Visit the Transfer Preparation & Policies (https://lpsonline.sas.upenn.edu/admissions/baas-admissions/transfer-preparation-policies) page for more details.

Must be taken at Penn

Concentrations

Just as a college major serves to focus your studies during a four-year degree, the BAAS concentrations enable students to tailor their undergraduate education to specific personal and professional goals. Concentrations progress from introductory-level courses to higher-level courses so that students develop skills and knowledge with greater complexity as they move through the curriculum. Many concentrations are interdisciplinary, to provide students with opportunities to explore their areas of interest from multiple perspectives and develop a flexible approach to solving complex problems in professional as well as academic contexts.

With input from an academic advisor (up to 3 courses can transfer with advisor’s approval).

Creative Writing courses: https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/creative-writing

Cinema Studies courses: https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/cinema-studies

English Literature courses: https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/english-literature

Electives

Electives are courses that do not apply toward your foundational or degree concentration requirements. You may choose to deepen your field of study by taking additional classes within your concentration, develop a new skill by completing all of the courses within a course block outside of your degree concentration, or discover new interests and abilities by taking individual courses that appeal to your interests. Students choose 10 electives from any of Penn LPS Online’s areas of study. Transfer students can apply a maximum of 8 course units from a regionally accredited institution toward this requirement.

E-portfolio and capstone requirements

Throughout the BAAS degree, students draw on their coursework to build a digital collection of materials, or e-portfolio. The e-portfolio is a powerful tool to ensure that academic studies are aligned with professional, personal and academic goals. Developing the e-portfolio provides students with the opportunity to reflect on selected assignments and how they can be applied to the broader context of their current and future careers. Students can share their e-portfolios with prospective and current employers to provide evidence of the skills and knowledge they have developed through coursework.
One advanced course in each concentration will require students to complete a final project, or capstone, in which they integrate learning and skills from across the full concentration. Capstone projects will be graded as a requirement of the course and also will serve as the final culminating artifact for students’ e-portfolios. Students will have the option to come to campus to present their final projects and receive face-to-face feedback from fellow students as well as the course instructor. Students who choose this option can use it to fulfill their elective on-campus learning experience requirement.

**On-campus learning experience requirements**

BAAS students are only required to visit campus for two on-campus learning experiences, which may be as short as an extended weekend. These face-to-face instructional experiences have been developed to provide students with opportunities for engagement with the Penn campus, while also providing students with choices for the experiences that best fit into their own schedules.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Data Analytics and Psychological Sciences, BAAS**

The Data Analytics and Psychological Sciences concentration offers the opportunity to improve your data literacy while developing strategies that support personal, organizational, and community well-being. In this degree concentration, you learn how well-being is measured, what activities can increase human flourishing, and how to apply analytical and statistical methods to effectively interpret and communicate data.

For more information: https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-concentrations/data-analytics-and-psychological-sciences

**Concentrations**

Just as a college major serves to focus your studies during a four-year degree, the BAAS concentrations enable students to tailor their undergraduate education to specific personal and professional goals. Concentrations progress from introductory-level courses to higher-level courses so that students develop skills and knowledge with greater complexity as they move through the curriculum. Many concentrations are interdisciplinary, to provide students with opportunities to explore their areas of interest from multiple perspectives and develop a flexible approach to solving complex problems in professional as well as academic contexts.

**Electives**

Electives are courses that do not apply toward your foundational or degree concentration requirements. You may choose to deepen your field of study by taking additional classes within your concentration, develop a new skill by completing all of the courses within a course block outside of your degree concentration, or discover new interests and abilities by taking individual courses that appeal to your interests. Students choose 10 electives from any of Penn LPS Online's areas of study. Transfer students can apply a maximum of 8 course units from a regionally accredited institution toward this requirement.

**E-portfolio and capstone requirements**

Throughout the BAAS degree, students draw on their coursework to build a digital collection of materials, or e-portfolio. The e-portfolio is a powerful tool to ensure that academic studies are aligned with professional, personal and academic goals. Developing the e-portfolio provides students with the opportunity to reflect on selected assignments and how they can be applied to the broader context of their current and future careers. Students can share their e-portfolios with prospective and current employers to provide evidence of the skills and knowledge they have developed through coursework.

One advanced course in each concentration will require students to complete a final project, or capstone, in which they integrate learning and skills from across the full concentration. Capstone projects will be graded as a requirement of the course and also will serve as the final culminating artifact for students’ e-portfolios. Students will have the option to come to campus to present their final projects and receive face-to-face feedback from fellow students as well as the course instructor. Students who choose this option can use it to fulfill their elective on-campus learning experience requirement.

**On-campus learning experience requirements**

BAAS students are only required to visit campus for two on-campus learning experiences, which may be as short as an extended weekend. These face-to-face instructional experiences have been developed to provide students with opportunities for engagement with the Penn campus, while also providing students with choices for the experiences that best fit into their own schedules.

---

**Data Analytics and Social Sciences, BAAS**

Combine the analytical tools of data science with an applied understanding of the social sciences. The Data Analytics and Social Sciences concentration offers the opportunity to integrate data analytics with insight into historical, political, economic, or behavioral contexts. In this degree concentration, you develop statistical and data programming skills to address real-world problems, learn to make and persuasively communicate data-driven decisions, and customize your studies with courses in global and area studies, organizational anthropology, leadership, and other social sciences.

**For more information:** [https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-concentrations/data-analytics-and-social-sciences](https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-concentrations/data-analytics-and-social-sciences)

**Curriculum**

The Bachelor of Applied Arts and Sciences (BAAS) recognizes the power of an applied liberal arts education to provide students with strong communication skills, understanding of different cultures and perspectives, and the ability to apply their knowledge to nuanced, complex scenarios with insight, perspective, and empathy.

**Overview of degree requirements**

30 course units are required for the Bachelor of Applied Arts and Sciences degree.

* With input from your academic advisor, choose six additional Penn LPS Online courses (https://lpsonline.sas.upenn.edu/academics/courses) in the social sciences to complete this degree concentration. Up to 3 of these courses can be transferred in with approval of your academic advisor.

E-portfolios and capstone requirements
Throughout the BAAS degree, students draw on their coursework to build a digital collection of materials, or e-portfolio. The e-portfolio is a powerful tool to ensure that academic studies are aligned with professional, personal and academic goals. Developing the e-portfolio provides students with the opportunity to reflect on selected assignments and how they can be applied to the broader context of their current and future careers. Students can share their e-portfolios with prospective and current employers to provide evidence of the skills and knowledge they have developed through coursework.

One advanced course in each concentration will require students to complete a final project, or capstone, in which they integrate learning and skills from across the full concentration. Capstone projects will be graded as a requirement of the course and also will serve as the final culminating artifact for students’ e-portfolios. Students will have the option to come to campus to present their final projects and receive face-to-face feedback from fellow students as well as the course instructor. Students who choose this option can count it toward their elective on-campus learning experience requirement.

On-campus learning experience requirements
BAAS students are only required to visit campus for two on-campus learning experiences, which may be as short as an extended weekend. These face-to-face instructional experiences have been developed to provide students with opportunities for engagement with the Penn campus, while also providing students with choices for the experiences that best fit into their own schedules.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Individualized, BAAS
The Bachelor of Applied Arts and Sciences is designed to meet your unique needs—including the ability to design your own degree concentration to develop the knowledge and skills you need to fulfill your life goals and career ambitions. While most BAAS degree concentrations are interdisciplinary, combining areas of study to encourage greater complexity and flexibility as you explore your interests, the Individualized Studies concentration goes a step further. With input from your academic advisor, you can combine courses from any three certificates or course blocks for a highly personalized learning experience.

Curriculum
Students in the Bachelor of Applied Arts and Sciences degree will choose a concentration to tailor their undergraduate education to specific personal and professional goals. Courses within each concentration may be taken in any order, unless prerequisites are specified.

Students must complete foundational courses for the Bachelor of Applied Arts and Sciences degree. In addition, students in the Individualized Studies degree concentration can work with an academic advisor to focus their studies toward any three certificates or course blocks;
complete four courses in each of your selected course blocks for a total
of 12 courses (12 c.u.*).

Take four courses from any three of the following course blocks:

- Applied Positive Psychology (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/applied-positive-psychology)
- Cinema Studies (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/cinema-studies)
- Classics (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/classics)
- Climate Change (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/climate-change)
- Creative Writing (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/creative-writing)
- Data Analytics (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/data-analytics)
- English Literature (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/english-literature)
- Global Studies (https://lpsonline.sas.upenn.edu/academics/about-our-bachelors-degree/baas-course-blocks/global-studies)
- Leadership and Communication (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/leadership-and-communication)
- Mathematical Sciences (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/mathematical-sciences)
- Modern Middle East Studies (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/modern-middle-eastern-studies)
- Music (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/music)
- Neuroscience (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/neuroscience)
- Organizational Anthropology (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/organizational-anthropology)
- Professional Writing (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/professional-writing)
- Religion and Culture (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/religion-and-culture)

Students completing certain course blocks while enrolled in the Bachelor of Applied Arts and Sciences (BAAS) degree are awarded a certificate upon completion of the degree.

- Climate Change Certificate (https://lpsonline.sas.upenn.edu/academics/certificates/climate-change)
- Creative Writing Certificate (https://lpsonline.sas.upenn.edu/academics/certificates/creative-writing)
- Data Analytics Certificate (https://lpsonline.sas.upenn.edu/academics/certificates/data-analytics)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Leadership and Communication, BAAS

The Leadership and Communication concentration is an exciting skills-building and career-enhancing program designed by distinguished, award-winning Ivy League academic experts and researchers in consultation with top executives and leaders from the real worlds of business, government, and the nonprofit sector. An Ivy League degree path to effective, ethical and career-boosting leadership (subheading – same size as "Overview of degree requirements" below). Drawing expertise on the social sciences, humanities, and data sciences, each of the twelve Leadership and Communication courses is scheduled especially for working adults and taught by dedicated and experienced Penn-affiliated scholars. Each Leadership and Communication course brings you one step closer to having the intellectual understanding and professional skills needed for effective, ethical, career-boosting leadership and communication. Each course meets for eight weeks in an accelerated semester format. The curriculum is divided into four parts: Leadership Foundations; Leading Across Sectors; Leading Positively; and Global Leadership.

For more information: https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-concentrations/leadership-and-communication

Curriculum

The Bachelor of Applied Arts and Sciences (BAAS) recognizes the power of an applied liberal arts education to provide students with strong communication skills, understanding of different cultures and perspectives, and the ability to apply their knowledge to nuanced, complex scenarios with insight, perspective, and empathy.

**Electives**

Electives are courses that do not apply toward your foundational or degree concentration requirements. You may choose to deepen your field of study by taking additional classes within your concentration, develop a new skill by completing all of the courses within a course block outside of your degree concentration, or discover new interests and abilities by taking individual courses that appeal to your interests. Students choose 10 electives from any of Penn LPS Online’s areas of study. Transfer students can apply a maximum of 8 course units from a regionally accredited institution toward this requirement.

**E-portfolio and capstone requirements**

Throughout the BAAS degree, students draw on their coursework to build a digital collection of materials, or e-portfolio. The e-portfolio is a powerful tool to ensure that academic studies are aligned with professional, personal and academic goals. Developing the e-portfolio provides students with the opportunity to reflect on selected assignments and how they can be applied to the broader context of their current and future careers. Students can share their e-portfolios with prospective and current employers to provide evidence of the skills and knowledge they have developed through coursework.

One advanced course in each concentration will require students to complete a final project, or capstone, in which they integrate learning and skills from across the full concentration. Capstone projects will be...
graded as a requirement of the course and also will serve as the final
culminating artifact for students’ e-portfolios. Students will have the
option to come to campus to present their final projects and receive face-
to-face feedback from fellow students as well as the course instructor.
Students who choose this option can use it to fulfill their elective on-
campus learning experience requirement.

On-campus learning experience requirements

BAAS students are only required to visit campus for two on-campus
learning experiences, which may be as short as an extended weekend.
These face-to-face instructional experiences have been developed to
provide students with opportunities for engagement with the Penn
campus, while also providing students with choices for the experiences
that best fit into their own schedules.

The degree and major requirements displayed are intended as a guide
for students entering in the Fall of 2019 and later. Students should
consult with their academic program regarding final certifications and
requirements for graduation.

Literature, Culture and Tradition,
BAAS

The humanities and social sciences help us to understand cultures
through historical and contemporary lenses. In the Literature, Culture,
and Tradition concentration, offered by Penn LPS Online, you study and
analyze the worldviews of different cultures, exploring cultural change
and continuity over time and place. Through historical, literary, and
cultural analysis of sources and artifacts, you develop research skills
and learn to evaluate complex cultures and scenarios. You also apply the
same analytical approaches to gain critical insights into current world
challenges.

For more information: https://lpsonline.sas.upenn.edu/academics/
bachelors-degree/baas-concentrations/literature-culture-and-tradition

Curriculum

The Bachelor of Applied Arts and Sciences (BAAS) recognizes the
power of an applied liberal arts education to provide students with
strong communication skills, understanding of different cultures and
perspectives, and the ability to apply their knowledge to nuanced,
complex scenarios with insight, perspective, and empathy.

Overview of degree requirements

30 course units are required for the Bachelor of Applied Arts and
Sciences degree.

In addition to course requirements, BAAS students complete a capstone
project in their degree concentration as well as an e-portfolio.

Foundational requirements

The foundational requirements of the BAAS degree reflect the core
competencies and values of Penn LPS Online: the skills and knowledge
needed to understand and solve complex problems, the ability to
communicate effectively with a wide variety of audiences and an
appreciation for diverse cultures and traditions. Students can transfer
a maximum of 4 course units of foundational courses from a regionally
accredited institution. Our program team can also give a preliminary
evaluation of transfer credits before students officially apply. Visit
the Transfer Preparation & Policies (https://lpsonline.sas.upenn.edu/
admissions/baas-admissions/transfer-preparation-policies) page for
more details.

**Organizational Studies, BAAS**

The Organizational Studies concentration offered by Penn LPS Online provides you with the critical and interpersonal skills required to work effectively in any professional context. Through integrated and applied courses in writing, speaking, and group dynamics, you learn to identify your communication goals, understand your audience, and adapt your messaging and strategy to achieve a successful outcome. To meet the challenges of today’s complex work environments, you also develop the skills to build and work effectively in diverse teams, both in physical and virtual professional environments.

** With input from an academic advisor, which could be transferred in with advisor’s approval.

Electives

Electives are courses that do not apply toward your foundational or degree concentration requirements. You may choose to deepen your field of study by taking additional classes within your concentration, develop a new skill by completing all of the courses within a course block outside of your degree concentration, or discover new interests and abilities by taking individual courses that appeal to your interests. Students choose 10 electives from any of Penn LPS Online’s areas of study. Transfer students can apply a maximum of 8 course units from a regionally accredited institution toward this requirement.

E-portfolio and capstone requirements

Throughout the BAAS degree, students draw on their coursework to build a digital collection of materials, or e-portfolio. The e-portfolio is a powerful tool to ensure that academic studies are aligned with professional, personal, and academic goals. Developing the e-portfolio provides students with the opportunity to reflect on selected assignments and how they can be applied to the broader context of their current and future careers. Students can share their e-portfolios with prospective and current employers to provide evidence of the skills and knowledge they have developed through coursework.

One advanced course in each concentration will require students to complete a final project, or capstone, in which they integrate learning and skills from across the full concentration. Capstone projects will be graded as a requirement of the course and also will serve as the final culminating artifact for students’ e-portfolios. Students will have the option to come to campus to present their final projects and receive face-to-face feedback from fellow students as well as the course instructor. Students who choose this option can use it to fulfill their elective on-campus learning experience requirement.

On-campus learning experience requirements

BAAS students are only required to visit campus for two on-campus learning experiences, which may be as short as an extended weekend. These face-to-face instructional experiences have been developed to provide students with opportunities for engagement with the Penn campus, while also providing students with choices for the experiences that best fit into their own schedules.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Physical & Life Sciences, BAAS

The physical and life sciences share fundamental principles that lie at the heart of scientific discovery and innovation. The Physical and Life Sciences concentration is a hybrid course of study including both online and on-campus courses. If you are enrolled in the Bachelor of Applied Arts and Sciences (BAAS) program and wish to declare a concentration in Physical and Life Sciences and enroll in some on-campus courses, you must take a diagnostic exam to be admitted. On-campus science courses become available to Physical and Life Sciences students beginning in Fall 2020.

While Penn LPS Online students may enroll in online courses within the Climate Change and Neuroscience course blocks without committing to the Physical and Life Sciences concentration, on-campus science courses are only available to BAAS degree students who have been admitted to the Physical and Life Sciences concentration.

For more information: https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-concentrations/physical-and-life-sciences
Curriculum

The Bachelor of Applied Arts and Sciences (BAAS) recognizes the power of an applied liberal arts education to provide students with strong communication skills, understanding of different cultures and perspectives, and the ability to apply their knowledge to nuanced, complex scenarios with insight, perspective, and empathy.

Overview of degree requirements

30 course units are required for the Bachelor of Applied Arts and Sciences degree.

<table>

BAAS students are only required to visit campus for two on-campus learning experiences, which may be as short as an extended weekend. In addition to course requirements, BAAS students complete a capstone project in their degree concentration as well as an e-portfolio.

Foundational requirements

The foundational requirements of the BAAS degree reflect the core competencies and values of Penn LPS Online: the skills and knowledge needed to understand and solve complex problems, the ability to communicate effectively with a wide variety of audiences and an appreciation for diverse cultures and traditions. Students can transfer a maximum of 4 course units of foundational courses from a regionally accredited institution. Our program team can also give a preliminary evaluation of transfer credits before students officially apply. Visit the Transfer Preparation & Policies (https://lpsonline.sas.upenn.edu/admissions/baas-admissions/transfer-preparation-policies) page for more details.

With input from an academic advisor (up to 3 courses can be taken as a requirement of the course and also will serve as the final project in their degree concentration as well as an e-portfolio.

Concentrations

Just as a college major serves to focus your studies during a four-year degree, the BAAS concentrations enable students to tailor their undergraduate education to specific personal and professional goals. Concentrations progress from introductory-level courses to higher-level courses so that students develop skills and knowledge with greater complexity as they move through the curriculum. Many concentrations are interdisciplinary, to provide students with opportunities to explore their areas of interest from multiple perspectives and develop a flexible approach to solving complex problems in professional as well as academic contexts.

Applied Positive Psychology, Certificate

Applied Positive Psychology is a discipline that examines the intersections of body, brain, culture, and science to develop tools and practices that enhance human flourishing and well-being. In this 4-course, 4 course unit course of study, you will be introduced to the field of positive psychology and will learn tools and practice strategies that support personal, organizational, and community well-being. The courses teach you the theoretical and empirical foundations of human flourishing, how well-being is measured, and what activities increase human flourishing in various contexts and settings.

Penn LPS Online courses in the Certificate in Applied Positive Psychology are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule) page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests. Courses within the Certificate in Applied Positive Psychology may be applied to our Bachelor of Applied Arts and Sciences degree, but do not count toward Penn’s Master of Applied Positive Psychology degree.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/applied-positive-psychology

The Certificate in Applied Positive Psychology prepares you to:

• Learn the historical and empirical foundations of positive psychology and the science of well-being
• Explore key research themes (e.g., positive emotions, strengths, engagement, relationships, meaning, and accomplishment) and their relevance in personal and organizational settings
• Apply research in positive psychology by practicing strategies that influence well-being
• Investigate applications of positive psychology in different professional settings, including business, education, healthcare, and the nonprofit sector

• Learn the basics of research, measurement, and evaluation in positive psychology

Curriculum

It is strongly recommended that students earning the Certificate in Applied Positive Psychology first complete APOP 100 Introduction to Positive Psychology.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Climate Change, Certificate

Climate change represents one of the most controversial and least understood threats to human, economic and environmental well-being on a global scale. The study of climate change offers an opportunity to develop the skills and effective policies to reduce risk and better adapt to a changing environment. In this 4-course, 4 course unit certificate you gain an understanding of the Earth’s climate system and how and why it has changed over time. Within the disciplines of oceanic and atmospheric science, you focus on the mechanisms that drive climate change, both natural and the result of human actions. You also develop the communication skills to more effectively share an understanding of climate change and its relevant policy implications with a broad audience.

Penn LPS Online courses in the Certificate in Climate Change are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule) page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/climate-change

The Certificate in Climate Change prepares you to:

• Reconstruct the history and scales of climate changes
• Learn basic atmospheric and ocean dynamics to understand fundamental climatic processes and future changes
• Examine the mechanisms that act to drive climate change
• Analyze long-term natural climate variability on a global and regional scale
• Understand the importance of natural environmental change as a benchmark against which to assess human impacts, recent climate change, and future environmental change
• Refine communication skills to effectively share an understanding of climate change, with a focus on both science and policy implications

Curriculum
Students must complete all four courses from the list below to earn a Certificate in Climate Change.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Creative Writing, Certificate
The Certificate in Creative Writing offers an innovative, collaborative course of study for those who have always wanted to unlock their creativity. Each course is designed as a workshop in which you explore new ideas, tackle new writing tools, generate original insights and discover your own powers of expression. You create, collaborate, and discuss and revise your original writing with feedback from your instructors and your peers. You also engage with a range of assigned readings and multimedia that inform and grow your innovative practice.

The Certificate in Creative Writing prepares you to:

- Understand how text conveys meaning across a variety of literary genres and styles
- Explore how to use innovation, flexibility, and collaboration to cultivate a creative writing practice
- Create, revise, and edit your original writing in multiple literary genres, including poetry, fiction, nonfiction, and screenwriting

Curriculum
Certificate students who complete four of the courses listed below earn a Certificate in Creative Writing. Those students are then eligible to pursue an Advanced Certificate in Creative Writing by taking two additional courses.

Data Analytics, Certificate
We live in a data-centered world, and the ability to make data-driven decisions and craft strategy informed by an effective analysis of data are key elements of successful leadership in any work environment. The Certificate in Data Analytics is a 4-course, 4 course unit sequence designed to provide a reasonable point of entry for individuals to gain expertise in data analytics. The certificate’s four courses are scheduled at times to accommodate working adults, so you can improve your data literacy while working on your career. Courses are taught by experts and experienced practitioners, including members of the Penn faculty from the Penn Program on Opinion Research and Election Studies. You
don’t need an extensive background in math, statistics, or programming to succeed in the data analytics program. The only prerequisites are a familiarity with using a computer, basic math skills, and a willingness to learn.

Prior to the start of the term, students in DATA 101 are required to complete a pre-course module that takes approximately 5-8 hours. Read more about this module on the DATA 101 course page (https://lpsonline.sas.upenn.edu/academics/courses/data-101-introduction-data-analytics).

Penn LPS Online courses in the Certificate in Data Analytics are offered on an accelerated (8-week) schedule. Courses in this certificate program include a weekly synchronous session. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule) page.

Although the courses can be taken sequentially to build your expertise in data analytics, you have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/data-analytics

The Certificate in Data Analytics prepares you to:

• Implement and interpret basic regression models
• Understand advanced predictive modeling and machine learning
• Implement and analyze surveys
• Design experiments and A/B tests to test solutions and address problems
• Develop skills in statistical programming and data analysis in R
• Apply skills and knowledge to solve real-world problems
• Visualize and communicate data clearly and persuasively

Curriculum
Certificate students who complete the basic courses listed below earn the Certificate in Data Analytics.

Leadership & Communication, Certificate

The Certificate in Leadership and Communication at Penn LPS Online is an exciting skills-building and career-enhancing program designed by distinguished, award-winning Ivy League academic experts and researchers in consultation with top executives and leaders from the real worlds of business, government, and the nonprofit sector. Drawing expertly on the social sciences, humanities, and data sciences, each of the five Leadership and Communication courses is scheduled especially for working adults and taught by dedicated and experienced Penn-affiliated scholars. It is designed, developed and delivered through a working partnership between the leaders and staff of Penn’s College of Liberal and Professional Studies (LPS), the Robert A. Fox Leadership Program, and those of Civic Enterprises, headquartered in Washington, DC.

The Certificate in Leadership and Communication is a 5-course, 5 course unit program of study taught by University of Pennsylvania faculty. Penn LPS Online courses in the Certificate in Leadership and Communication are offered on an accelerated (8-week) schedule. Courses in this certificate program include a weekly synchronous session. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule) page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/leadership-and-communication

Curriculum
To earn the Certificate in Leadership and Communication, students must successfully complete all five courses listed below and maintain a 3.0 overall grade point average (GPA).

Modern Middle East Studies, Certificate

Given today's interconnected, geopolitical environment, an in-depth understanding of the cultures, history, and politics of the contemporary Middle East has never been more important. Through interdisciplinary study across fields such as history, gender studies, religious studies, politics, and economics, this 4-course, 4 course unit certificate is designed to enhance your understanding of the Middle East as a complex, diverse region. You examine how history helped shape the contemporary Middle East and develop skills necessary to interpret primary texts and academic research to explore key issues in areas such as politics, policy, economic development, and international relations.

Penn LPS Online courses in the Certificate in Modern Middle Eastern Studies are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule) page.

You also have the option to enroll in individual courses within this certificate without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/modern-middle-eastern-studies

The Certificate in Modern Middle Eastern Studies prepares you to:

- Understand key themes and issues in Middle Eastern history from the medieval era to the present, with an emphasis on encounters and exchanges between the Middle East and the West
- Interpret key texts in Middle Eastern history, from the perspectives of gender, religion, politics, and economics
- Study the complex issues surrounding oil and politics in the Middle East, incorporating the perspectives from multiple disciplines, including history, economics, and politics
- Explore the diverse history of religion in the Middle East, from ancient societies to the present, and how this history informs contemporary Middle Eastern cultures, politics, and societies

Curriculum

Students must complete all four courses from the list below to earn a Certificate in Modern Middle Eastern Studies.

Neuroscience, Certificate

Understanding the intricate correlations between neural mechanisms and behavior is an important area of contemporary scientific research. The Certificate in Neuroscience is a 4-course, 4 course unit program of study that allows you to explore biological, psychological and clinical approaches to understand the nervous system as the biological basis of behavior. You apply studies in cognitive neuroscience, neurochemistry, and psychology as a basis for a better understanding of human behavior, focusing on areas including perception, memory, motivation, and emotion.

Penn LPS Online courses in the Certificate in Neuroscience are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule) page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

The Certificate in Neuroscience prepares you to:

- Describe the structure and function of the vertebrate nervous system and its application to the neurobiology of behavior
- Understand the structures and functions of neurochemicals that are generated by and modulate the nervous system
- Examine the various roles played by the nervous and endocrine systems in controlling physiological processes and behavior, with a focus on sexual and parental behaviors, aggression, and ingestion
- Understand the form, function, and pathology of the adult nervous system in terms of antecedent development processes
- Critically evaluate research strategies and hypotheses in neuroanatomy, neuropathology, neurochemistry, and neuropharmacology to understand psychiatric disorders from a biological perspective

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/neuroscience

Curriculum

Certificate students and individual course takers must first complete Introduction to Neuroscience. Certificate students must complete three additional courses from the list below to earn the Certificate in Neuroscience. Students who have earned a Basic Certificate can then earn an Advanced Certificate in Neuroscience by taking an additional two NEUR courses.

2019-20 Catalog | Generated 10/18/19
**Organizational Anthropology, Certificate**

Today’s workplaces are characterized by high levels of diversity. Organizational leaders who can effectively manage interpersonal relationships within complex and varied team structures are in high demand across all professional environments. The Certificate in Organizational Anthropology at Penn LPS Online, a 4-course, credit-bearing program of study, is designed to develop your understanding of how teams, corporations and other organizations develop and reinforce culture, and how to apply this research to create stronger functioning groups. Beginning with an anthropological approach to organizational culture, you explore different theories of how culture forms and evolves in organizations and why it matters for performance. You learn strategies for influencing change in an increasingly digital workplace and getting alignment at the conversational level based on research into best practices in communication.

Penn LPS Online courses in the Certificate in Organizational Anthropology are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/organizational-anthropology

**The Certificate in Organizational Anthropology prepares you to:**

- Understand current anthropological research on team, corporate, and organizational culture
- Explore the effects that modern corporations have on their surrounding environments, with attention to local, regional, national, and global effects
- Develop an understanding of theories of organizational culture, and how to apply those theories in specific professional and organizational contexts
- Examine underlying social and cultural influences on diverse teams, and learn how to apply theory to foster diversity and create inclusive cultures
- Identify the variables that underlie communication in virtual, internet-mediated spaces, and apply social science research to create strong collaborative professional relationships, even when working remotely

**Curriculum**

Students must complete all four courses listed below to earn a Certificate in Organizational Anthropology.

**Professional Writing, Certificate**

The Certificate in Professional Writing at Penn LPS Online gives you a scenario-based deep dive into the kinds of writing essential to business. Our courses offer a series of concepts and practical applications that provide an accelerated understanding of the subtle arts of communication, enhanced by tips to make anyone a power-writer—a master of grammar, concision, and clarity.

Whether you are in an entry-level position and want to ramp up your writing skills or are an accomplished writer ready to expand and refine your repertoire, our professional writing courses take you to the next level. We take you beyond the basics of structure and style. Our coursework emphasizes professional expertise and extensive feedback as we share and cutting-edge findings in the field of writing. Find out how to incorporate your personal or corporate brand’s story into every piece of communication and discover the best ways to identify and appeal to target audiences.

The Certificate in Professional Writing is a 4-course, 4 course unit program of study taught by University of Pennsylvania faculty. To earn the certificate, it is recommended that students enroll first in the Fundamentals of Professional Writing course, followed by any additional three professional writing courses.

Penn LPS Online courses in the Certificate in Professional Writing are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule page.
You also have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests. Students who complete the basic certificate may pursue an advanced certificate (6-course, 6 course unit) by adding two additional courses from the advanced course list.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/professional-writing

The Certificate in Professional Writing prepares you to:
• Assess audience and purpose for communication targeted at achieving specific goals
• Analyze different audiences, scenarios, and contexts in order to shape your messaging most effectively whatever your audience
• Develop effective rhetorical strategies and skills to persuade specific audiences—personal, professional, and social—through visual, written, and multimedia communication
• Draft and revise written work for precision, clarity, and power
• Develop empathetic and analytic skills to integrate and build upon other viewpoints and perspectives
• Learn how readers, writers, and designers use complex multimedia texts incorporating language, image, sound, and gesture to produce a coherent, engaging message
• Explore how to engage the senses—visual, aural, and somatic—to convey information effectively through social media
• Understanding how to make complex information accessible to audiences through effective visualization

Curriculum
Certificate students who complete four of the five basic courses listed below earn the Certificate in Professional Writing. Those students are then eligible to pursue an Advanced Certificate in Professional Writing by adding two advanced courses.

Courses are subject to change.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

School of Engineering and Applied Science

Penn School of Engineering is unlike any other. Traditionally untraditional. Pioneers in interdisciplinary education and research. Theory linked with real-world practice. The path for students who want to shape the future.

With the pace of innovation and technological advancement accelerating ever faster, engineers hold the keys to the next generation's routine wonders.

As an Ivy League institution — and the first university in the nation — Penn delivers a transformative experience in the classroom and laboratory, while ensuring its engineering and applied science students receive a fully rounded liberal arts education.

Penn Engineering is a pioneer in interdisciplinary education, allowing students the flexibility to craft a program that suits their individual interests, career, or graduate education plans. Both Bachelor of Science in Engineering (BSE) and Bachelor of Applied Science (BAS) degrees are offered, along with specialized dual-degree programs, an array of majors and minors, special programs, and study-abroad opportunities.

Penn Engineering students get valuable and extensive hands-on experience, conducting research and pursuing creative designs and new products alongside faculty renowned in their fields. The working relationship with faculty pervades Penn Engineering, where full-time faculty teach all core undergraduate courses, and each student has a faculty advisor.

As the global marketplace for technology grows, graduates go on to leadership roles in business, medicine, law, and academia. They leave armed with the technical knowledge, imagination, communication skills, and understanding of the social and human context of their work, all engendered with a fervor for the future nurtured at Penn Engineering.

Learn more about our history: http://www.seas.upenn.edu/about-seas/history.php.

Learn more about our school leadership: http://www.seas.upenn.edu/about/school-leadership/.

Two key elements distinguish the Penn Engineering experience from that provided by many other institutions: Exceptional academic programs, and practical design and research experience.

Our undergraduate programs emphasize both theory and practice while forming intellectual linkages across a breadth of disciplines. The opportunity for hands-on research, over the four years, allows undergraduates the chance to learn about the creation of knowledge, further explore their chosen field, and thereby become collaborators in the search for knowledge. The design experience over the four years, culminating in the senior design project, challenges students to utilize their academic training and problem-solving skills in practical ways, and provides them with direct experience with real-world problems that they will encounter as practicing engineers.

Technology is transforming our times and our lives, no longer on a scale of decades but of years and even months. A successful career through such changing times requires engineering graduates endowed with skills that are applicable to widely different technologies, skills that transcend the details of any one job. Such is the result of an education that pays much more attention to the fundamental than to the trendy,
to the creative more than to the routine. Engineers must also be firmly educated as responsible citizens, concerned with the impact of their work on society.

Penn Engineering is an integral partner in Penn’s initiatives to prepare students for leadership in a high-tech world. Our goal is to prepare students for leadership roles in engineering and applied science as well as in other fields, such as medicine, business, and law, for which creativity, critical quantitative thinking, effective communication skills, and a strong commitment to humane values are essential.

Mission of the School
1. The creation and dissemination of scholarly research in both basic and applied arenas to be an international center of engineering excellence and the regional catalyst for technological innovation;
2. The design and delivery of engineering education known for its rigor, breadth and relevance to prepare its students to become global leaders in technology-based fields.

Mission Statements of Bachelor of Science in Engineering Programs (ABET-accredited)
- Bioengineering (http://www.be.seas.upenn.edu/about-academics)
- Chemical and Biomolecular Engineering (http://www.cbe.seas.upenn.edu/about-ugrad)
- Computer Science (http://www.cis.upenn.edu/ugrad/abet.shtml)
- Computer Engineering (http://www.seas.upenn.edu/cmpe/accreditation.php)
- Electrical Engineering (http://www.ee.upenn.edu/about-ugrad)
- Materials Science and Engineering (http://www.mse.seas.upenn.edu/about-ugrad/accreditation.php)
- Mechanical Engineering and Applied Mechanics (http://www.me.upenn.edu/about-ug-ed/accreditation.php)
- Systems Science and Engineering (http://www.ese.upenn.edu/about-ugrad)

Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below are examples of student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, visit: http://www.seas.upenn.edu/undergraduate/research/index.php.

Finding a Research Mentor and Research Experiences
Students are encouraged to explore the Penn Engineering Faculty Expertise Directory (http://www.seas.upenn.edu/directory/departments.php), featuring the School’s standing faculty and is searchable by department, research center affiliation, and research expertise keyword. Users can identify which faculty are conducting research in a specific area and contact faculty members whose research interests them.

The Engineering Dean’s Advisory Board (EDAB) puts together a guide for fellow students that gives step-by-step instructions and tips on how to secure research positions as an undergraduate.

For Bioengineering majors, the Penn student chapter of the Biomedical Engineering Society (BMES) has assembled its own student guide on starting up research.

Summer Undergraduate Research in Engineering (SURE)
Penn Engineering’s world-acclaimed faculty, along with state-of-the-art research laboratories and highly interdisciplinary curricula, offers summer research opportunities for talented undergraduates who seek hands-on research experience. From robotics and computer animation, nanotechnology, genomics and biotechnology, Penn’s centers and institutes are at the forefront of research on multiple scientific and technological frontiers.

International Summer Undergraduate Research in Engineering (iSURE)
Opportunities for undergraduates are available during the summer to spend eight to 12 weeks on a research internship in one of Penn Engineering’s partner institutions abroad.

Littlejohn Undergraduate Research Program
Thanks to a generous gift by Angus Littlejohn, the School of Engineering is able to offer Summer Research Opportunities to Penn Engineering Students. The program is open to rising, sophomores, juniors and seniors.

The program intends to provide students the opportunity to get involved in hands-on engineering research under the supervision of a faculty member. Topics of research include all areas covered by the departments in the School of Engineering and Applied Science. Students will receive a stipend of $4,500 for a 10 week period.

Rachleff Scholars Program
This program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

The following BSE programs are accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).
- Bioengineering (http://www.be.seas.upenn.edu/about-academics)
- Chemical and Biomolecular Engineering (http://www.cbe.seas.upenn.edu/about-ugrad)
- Computer Science (http://www.cis.upenn.edu/ugrad/abet.shtml)
- Computer Engineering (http://www.seas.upenn.edu/cmpe/accreditation.php)
- Electrical Engineering (http://www.ee.upenn.edu/about-ugrad)
- Materials Science and Engineering (http://www.mse.seas.upenn.edu/about-ugrad/accreditation.php)
- Mechanical Engineering and Applied Mechanics (http://www.me.upenn.edu/about-ug-ed/accreditation.php)
- Systems Science and Engineering (http://www.ese.upenn.edu/about-ugrad)

The BSE program in Computer Science is accredited by the Computing Accreditation Commission of ABET (http://www.abet.org).

For more information, visit: http://www.seas.upenn.edu/undergraduate/handbook/programs/abet-acreditation.php.

Each student is assigned a faculty advisor with whom they are required to meet at least twice per year. No student is permitted to register for classes in any semester without first meeting with an advisor. Students who take the time to prepare for these meetings generally find them beneficial and informative. Faculty advisors are the best source of
information about electives within the major, research opportunities, and options for graduate study.

For more information, visit: https://www.seas.upenn.edu/undergraduate/advising/.

Curriculum
Each major (p. 193) within the School of Engineering and Applied Science has its own curriculum. Specific curricular requirements for each major are listed by program.

However, all Engineering students must complete requirements in four specific tracks:

- core engineering courses within the chosen major
- professional electives
- social science/humanities (http://www.seas.upenn.edu/undergraduate/handbook/courses/ssh-requirements.php) and free electives (http://www.seas.upenn.edu/undergraduate/handbook/courses/free-elective.php)

A course planning guide exists for each major to assist with planning and keeping track of the requirements toward graduation.

In addition, all Engineering students must complete the following requirements.

Writing Requirement
Beginning with the Class of 2001, Penn Engineering has implemented a Writing Requirement. The Writing Requirement will not necessitate the completion of additional course units. Students can easily satisfy the requirement without altering the existing constraints of BAS or the BSE degrees.

Students are strongly encouraged to fulfill the Writing Requirement during the first two years of study because it becomes increasingly difficult to schedule first-year courses as one moves through the curriculum.

For more information, visit: http://www.seas.upenn.edu/undergraduate/handbook/courses/writing-requirement.php.

Engineering Ethics Requirement
Beginning with the Class of 2017, Penn Engineering students must fulfill the Engineering Ethics requirement. The Ethics Requirement will not necessitate the completion of any additional course units in the existing BAS or the BSE degrees, as the requirement may be double-counted from the student’s SSH course requirements.

The Engineering Ethics requirement can be satisfied by taking EAS 203 Engineering Ethics. This course may be used (double-counted) for the Social Science requirement as well. **Students are strongly encouraged to take the Ethics Requirement course during the sophomore year.**

For more information, visit: http://www.seas.upenn.edu/undergraduate/handbook/courses/ethics-requirement.php.

Majors

- Bioengineering, BSE (p. 193)
- Biomedical Science, BAS (p. 194)
- Chemical and Biomolecular Engineering, BSE (p. 196)

- Computer and Cognitive Science, BAS (p. 198)
- Computer Engineering, BSE (p. 199)
- Computer Science, BAS (p. 202)
- Computer Science, BSE (p. 200)
- Digital Media Design, BSE (p. 203)
- Electrical Engineering, BSE (p. 204)
- Individualized Program, BAS (p. 205)
- Materials Science and Engineering, BSE (p. 206)
- Mechanical Engineering and Applied Mechanics, BSE (p. 207)
- Networked and Social Systems Engineering, BSE (p. 208)
- Systems Science and Engineering, BSE (p. 209)

Bioengineering, BSE
Bioengineering is a multidisciplinary area where the engineering sciences interface biology, biomedical sciences, and medicine, to advance human health. Bioengineering brings together the creation of new knowledge and understanding of biological systems through engineering analysis and experimentation, with the application of engineering design and practice principles for the development of devices, processes, methods and biotechnologies to improve medical practice and health care delivery.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/bioengineering/

Bioengineering (BE) Major Requirements
40.5 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook).

1 ENM 375 Biological Data Science I - Fundamentals of Biostatistics is recommended.
2 If PHYS 150 Principles of Physics I: Mechanics and Wave Motion or PHYS 170 Honors Physics I: Mechanics and Wave Motion & PHYS 151 Principles of Physics II: Electromagnetism and Radiation or PHYS 171 Honors Physics II: Electromagnetism and Radiation taken then only 1 course unit technical elective required.
3 The Social Science & Humanities Depth, Writing & Ethics Requirements can be satisfied with the 7 total course units.

### Concentrations

Students may select one of eight concentrations (http://www.be.seas.upenn.edu/current-students/undergraduates/concentrations.php):

- Biomedical Data Science and Computational Medicine
- Biomedical Devices
- Cellular/Tissue Engineering and Biomaterials
- Biomedical Imaging and Radiation Physics
- Systems and Synthetic Biology
- Neuroengineering
- Multiscale Biomechanics
- Therapeutics, Drug Delivery & Nanomedicine

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Biomedical Science, BAS

Interface the engineering sciences, biology, biomedical sciences, and medicine to advance human health and solve problems in medicine and the biological sciences. The Bachelor of Applied Science degree offers students breadth and flexibility and allows them to combine a technology-based degree with considerable course work in the liberal arts, communications, business or fine arts. It is designed primarily for students whose interests are not oriented toward a professional engineering career. It is a popular degree option for those preparing for careers in medicine, business, and law. Many students who are pursuing dual degree programs opt for this degree.

For more information: http://www.be.seas.upenn.edu/prospective-students/undergraduates/program-bse-bas.php
### Biomedical Science (ASBS) Major Requirements

40.5 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook).

Chemical and Biomolecular Engineering, BSE

Chemical Engineers apply concepts from the physical sciences (chemistry and physics) and life sciences (biochemistry and microbiology) to the design and optimization of processes for the efficient production of products ranging from fuels and chemicals to pharmaceuticals to advanced materials. Penn’s chemical engineering department provides students with both a strong foundation in engineering fundamentals and exposure to modern chemical engineering technologies. The program’s versatility allows our students to excel in diverse careers in the chemical industries, research, medicine, law, government, and education.

Total Course Units 41

1 Must be upper level CBE course, 300 or higher, or ENM 510 Foundations of Engineering Mathematics - I, ENM 511 Foundations of Engineering Mathematics - II.
2 One less Technical Elective required if PHYS 150 Principles of Physics I: Mechanics and Wave Motion/PHYS 151 Principles of Physics II: Electromagnetism and Radiation taken.
3 CBE 150 Introduction to Biotechnology recommended.
4 The Social Science & Humanities Depth and Writing requirements can be satisfied with the 7 total course units.

Concentrations

Students may select one of four concentrations (http://www.cbe.seas.upenn.edu/current-students/undergraduates/concentrations.php):

- Pharmaceutics and Biotechnology
- Polymer Science and Engineering
For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/bachelor-of-applied-science/

Computational Biology (ASCB) Major Requirements

40 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook).

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Computational Biology, BAS

The BAS in Computational Biology is an interdisciplinary area that crosses between the biological sciences, math, and computer science. More specifically, it requires that students augment a basic computer science curriculum with courses in biology, chemistry, genetics and statistics. The program is intended to train students in key areas of Computational Biology and is also designed so that a student may focus on those areas of biology in which he or she wishes to specialize. A broad background in computer science, from programming to algorithms to database systems, is also required. This program has a year-long capstone course in computational biology that is co-taught by faculty in computer science, biology, and genetics. The development of Computational Biology has been influenced by various factors. One main influence derives from the need to solve problems associated with the assimilation, storage, retrieval and analysis of data arising from the Human Genome Project and similar projects that involve massive data sets containing bibliographic information, DNA sequence information and testing methods and results. The analysis of such data involves the development and use of complex information modeling techniques, languages, visualization techniques, and computational methods. The second broad area of biology in which computational methods have for some time been used is in evolution and ecology. Many evolutionary processes when viewed from the genetic point of view involve equations of such complexity that ordinary algebraic and calculus methods are simply insufficient to solve them, and numerical methods entailing the use of a computer are necessary. The construction of phylogenetic trees of evolution has for a long time been carried out by computational as opposed to mathematical methods. Many ecological processes similarly involve such complexities that computer methods offer the only way forward. Computational Biology is a field of current interest and is essential to train computer scientists with enough knowledge of biology to be able to understand the problems and computational opportunities in this domain. Employment opportunities are excellent at major pharmaceutical companies, biotech companies and research labs.

1 A CIS elective is a CIS or NETS engineering course. The SEAS handbook defines all CIS and NETS classes numbered 1xx-5xx as engineering courses, with the following exceptions that cannot be used: CIS 105 Computational Data Exploration, CIS 106 Visualizing the Past, CIS 125 Technology and Policy, CIS 160 Mathematical Foundations of Computer Science, CIS 261 Discrete Probability, Stochastic Processes, and Statistical Inference, CIS 262 Automata, Computability, and Complexity.

2 Please note: Students may count at most 1 cu of 1xx credit as a CIS Elective.

3 The Social Science & Humanities Depth, Writing & Ethics Requirement can be satisfied with the 7 total course units.
the degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Computer and Cognitive Science, BAS

The BAS in Computer and Cognitive Science through the School of Engineering and Applied Science combines the application of theoretical insights from Computer Science, Linguistics, Neuroscience, Philosophy, and Psychology to the formal study of intelligence, perception, reasoning, and other properties of mind, and their application in the service of Information Technology. The degree combines a form grounding in relevant aspects of Computer Science, from programming to algorithms to artificial intelligence, with a concentration in specific courses from the contingent disciplines. The non-computer science courses have been selected for formal rigor and scientific relevance. The degree prepares students for a wide variety of careers in a number of distinct academic, industrial, and professional arenas relating to psychology, philosophy and linguistics. In particular, these careers pertain to the impact of knowledge and information technology on the professions, including those in Media and Communications, Software Development, and Education (among many others), in which a broad background in computer science must be combined with a deep understanding of the human mind. The BAS in Computer and Cognitive Science is intended to address the need for properly trained computer scientists who have sufficient understanding of these other disciplines to be able to solve the many open problems in applications, research, and development that must be addressed if we are to realize the full potential of information processing technologies in these domains. Employment opportunities for students going through such a program are excellent at major information technology companies, software houses, and research labs, as well as in the standard career structures in the areas identified above.

Computer Engineering, BSE

Computer Engineering is the discipline that designs and engineers computer systems from digital circuits, through compilers and runtime systems, to networking and world-wide distributed systems. As an engineering discipline, the computer engineer must appreciate the physical aspects of computations (energy, delay, area, reliability, costs) and be able to expertly navigate the multidimensional tradeoff space associated with implementing computations. Since today’s high performance programmable computing devices mean enormous computational tasks can be performed entirely in software, the computer engineer must manage computational capabilities and functionalities which migrate between hardware and software driven by advancing technology and these engineering tradeoffs. Recent advances in manufacturing make it economical to construct systems containing billions of components and millions of lines of code, and these systems are increasingly invaluable in life-critical and real-time systems; computer engineering is the discipline that seeks to understand how to design and manage systems of this complexity while providing adequate guarantees of safety and trustworthiness for such systems.

Satisfied with PHYS 150 Principles of Physics I: Mechanics and Wave Motion, PHYS 170 Honors Physics I: Mechanics and Wave Motion, MEAM 147 Introduction to Mechanics Lab, BIOL 101 Introduction to Biology A, BIOL 121 Introduction to Biology - The Molecular Biology of Life or CHEM 053 General Chemistry Laboratory I
2 A limit of two freshman-level Engineering courses may be used as a Technical Elective.
3 The Social Science & Humanities Depth, Writing & Ethics Requirements can be satisfied with the 7 total course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Computer Science, BSE

Computer scientists and engineers have revolutionized society and created the computer and telecommunications industries that are so important to human life and the world’s economy. As a result of this revolution, expertise in computer science is essential in many new areas, including computer and network service and consulting companies, financial institutions, health industries, natural science labs and medical research labs, and other contexts where intensive manipulation of information is important. As a result, opportunities for computer scientists and engineers have expanded greatly, both in specialized fields as well as in numerous dual-career opportunities in which computer expertise is combined with advanced degrees in business, communication, engineering, law, medicine, and science.

Ethics Requirement

- EAS 203 Engineering Ethics | 1 |

Free Elective

Select 3 course units of free electives | 3 |

Total Course Units | 40

1 A CIS elective is a CIS or NETS engineering course. The SEAS handbook defines all CIS and NETS classes numbered 1xx5xx as engineering courses, with the following exceptions that cannot be used: CIS 100, 101, 106, 125, 160, 261. ESE 350 Embedded Systems/Microcontroller Laboratory can also be used to satisfy the CIS elective requirement. Please note: Students may count at most 1 cu of 1xx credit as a CIS elective.

2 For CSCI Majors, Natural Science may also include the following Cognitive Science Courses: LING 250 Introduction to Syntax, PSYC 111 Perception, (these courses cannot be used by CSCI majors in the SSH category).

3 One year of laboratory course work is required which can be used as one of the 4 course units. One way to satisfy this requirement is by taking PHYS 150 Principles of Physics I: Mechanics and Wave Motion and PHYS 151 Principles of Physics II: Electromagnetism and Radiation.

4 Two of the six must be Engineering courses.

5 The Social Science & Humanities Depth, Writing and Ethics requirements can be satisfied with the 7 total course units.

Technical Electives

(Department Approval Required)

Two Engineering courses required. Remaining course can be from:

- Option 1: Any approved minor or minor equiv; or a sequence of approved courses.
- Option 2: Any Math, Natural Science, or Engineering, or the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Computer Science, BAS

Computer scientists and engineers have revolutionized society and created the computer and telecommunications industries that are so important to human life and the world's economy. As a result of this revolution, expertise in computer science is essential in many new areas, including computer and network service and consulting companies, financial institutions, health industries, natural science labs and medical research labs, and other contexts where intensive manipulation of information is important. As a result, opportunities for computer scientists and engineers have expanded greatly, both in specialized fields as well as in numerous dual-career opportunities in which computer expertise is combined with advanced degrees in business, communication, engineering, law, medicine, and science.

Select 2 Social Science or Humanities or Technology in Business & Society courses

EAS 203 Engineering Ethics

Free Elective

Select 3 course units of free electives

Total Course Units 40

1. A CIS elective is a CIS or NETS engineering course. The SEAS handbook defines all CIS and NETS classes numbered 1xx-5xx as engineering courses, with the following exceptions that cannot be used: CIS 105 Computational Data Exploration, CIS 106 Visualizing the Past., CIS 125 Technology and Policy, CIS 160 Mathematical Foundations of Computer Science, CIS 261 Discrete Probability, Stochastic Processes, and Statistical Inference, CIS 262 Automata, Computability, and Complexity.

2. ESE 350 Embedded Systems/Microcontroller Laboratory can also be used to satisfy the CIS elective requirement.

3. Science labs are not required. Labs taken can be used as Natural Science credit.

4. For ASCS Majors, Nat Sci may also include the following Cog Sci Courses:

5. OPTION 1: Any approved minor, or sequence of approved courses. Remaining must be Math, Nat Sc or Engineering.

   (MINORS ARE STRONGLY ENCOURAGED)

6. OPTION 2: Any 8 CU's from Math, Nat Sc, Engineering, or from the following specified Tech Electives: LING 106 Introduction to Formal Linguistics; PHIL 231 Epistemology; OIDD 321 Introduction to Management Science; OIDD 325 Computer Simulation Models
The Social Science & Humanities Depth, Writing & Ethics Requirement can be satisfied with the 7 total course units.

**Concentration**

Department approval is required.

- Option 1: Any approved minor, or sequence of approved courses. Remaining must be Math, Natural Science or Engineering. (Minors are strongly encouraged.)
- Option 2: Any 8 course units from Math, Natural Science, Engineering, or from the following specified tech electives:

<table>
<thead>
<tr>

established in response to what we perceived as a growing rift within the computer graphics and animation industry.

**For more information:** https://www.seas.upenn.edu/prospective-students/undergrad/majors/digital-media-design/
Electrical Engineering connects the physical world with the information world. Electrical engineers apply physics and chemistry in modern nanotechnology devices, encode and manipulate information in circuits and networks, and mathematically understand and reason with large amounts of data in real time. This makes electrical engineering one of the broadest forms of engineering, resulting in a multitude of possible careers. The societal impact of electrical engineering can be found in numerous domains, from smartphones, 5G wireless, and medical imaging to electric/driverless cars and the Internet of Things. Electrical engineering includes the engineering of electrons, magnets, photons, electromagnetic waves, quantum states, and electromagnetic structures. Electrically engineering systems provide communication, sensing, actuation, display, storage, conversion, control, and computation. The electrical engineering discipline includes both the design and implementation of physical realizations (devices, circuits, antennas) and the mathematical tools for optimizing the exploitation of these systems (control theory, information theory, digital logic, signal processing).

**Free Elective**

Select 3 course units of free electives 3

| Total Course Units | 40 |

---

1. If not taken freshman year, must be replaced by another department approved engineering course.
2. Dual Degree, Dual Major or Second Major candidates in Math or Natural Science, may use up to three Professional Electives to satisfy requirements for their second major. One freshman-level Engineering course may be used as a Professional Elective.
3. One approved Natural Science Lab (.5cu) is required. Satisfied if PHYS 050 Physics Laboratory I, PHYS 150 Principles of Physics I: Mechanics and Wave Motion, PHYS 170 Honors Physics I: Mechanics and Wave Motion, MEAM 147 Introduction to Mechanics Lab, BIOL 101 Introduction to Biology A or CHEM 053 General Chemistry Laboratory I is taken.
4. The Social Science & Humanities Depth and Writing Requirement can be satisfied with the 7 total course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Individualized Program, BAS**

The individualized major offers an opportunity for exceptional, creative, self-motivated students to explore innovative and multi-disciplinary fields of knowledge. The individualized major is intended to foster a closer relationship between the student and the faculty advisors.

Materials Science and Engineering, BSE

The Materials Science and Engineering (MSE) program reflects the explosive growth of interest in the nano and bio sectors of engineering science and technology. MSE prepares students to use fundamental scientific principles to synthesize, manipulate, design and characterize the structural and functional properties of advanced engineering materials. The program offers students advantages seldom found in other MSE programs: the opportunity to tailor the curriculum to their own interests, guaranteed research experience and an excellent student-faculty ratio.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/materials-science-and-engineering/

Mechanical Engineering and Applied Mechanics, BSE

Mechanical Engineering & Applied Mechanics (MEAM) is the study of forces, deformations and motions of solid bodies and fluids, heat generation and transport, and applications to analysis, design, and manufacture of components, machines, and systems. Students in mechanical engineering follow a program which contains basic groundwork in all aspects of mechanical engineering, but flexibility in the curriculum allows students to pursue elective programs in fields such as aeronautics, robotics, computers, electronics, automatic controls, and materials.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/mechanical-engineering-and-applied-mechanics/

Mechanical Engineering and Applied Mechanics (MEAM) Major Requirements

Total Course Units 40

1. MEAM 147 Introduction to Mechanics Lab is required if MEAM 110 Introduction to Mechanics is taken.

2. A max of (3) 100 level courses permitted.

   Other Programming Courses such as CIS 110 Introduction to Computer Programming, or CIS 120 Programming Languages and Techniques I may be substituted for ENGR 105 Introduction to Scientific Computing.

   MEAM Upper Level courses include: MEAM 405 Mechanical Properties of Macro/Nanoscale Materials and all MEAM 500 level courses.

   Professional Electives include courses from the Math, Science and Engineering categories. Up to two Professional Electives may be satisfied with advanced dual degree requirements (with approval).

3. The Social Science & Humanities Depth and Writing Requirement can be satisfied with the 7 total course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Networked and Social Systems Engineering, BSE

The Rajendra and Neera Singh Program in Networked and Social Systems Engineering (NETS), formerly called Market and Social Systems Engineering (MKSE), is the world’s first course of study to fully integrate the disciplines needed to design and analyze the complex networks that are reshaping our society. This program prepares students to shape the technologies that underpin Internet-based search and electronic commerce, financial networks, social networks, and even such exchanges as the power grid. Graduates of this program will be prepared to engineer networks that work for both end-users and investors. Other graduates may become the policy-makers who are urgently needed to regulate these networks for the protection of commercial property and societal good.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/networked-social-systems-engineering/

Networked and Social Systems Engineering (NETS) Major Requirements

Total Course Units 39

1. Approval of the advisor and undergrad chair required. At least 3 course units required from an approved Depth area of choice available on the NETS website, plus 3 additional courses from any Depth Area and/or CIS, ESE, CMPE, OODD, MATH, STAT, ECON.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should
consult with their academic program regarding final certifications and requirements for graduation.

# Systems Science and Engineering, BSE

Systems Engineers provide technical management for societal-scale problems that often encompass the connections between the physical and the information world. Examples of the many cutting-edge applications include autonomous robotics, smart buildings, national power grid management, global networks, service optimization, and biological systems. Systems engineering is the set of reusable mathematics, intellectual tools, and methodologies for attacking large-scale engineering problems. These common tools are adaptable for problems in different engineering domains (e.g., electrical, mechanical, biological, chemical, and computing) and help us understand, design, and manage systems that contain elements from multiple domains. Systems engineering deals with how we extract useful, abstract models from lower level systems, use these models to analyze and predict behavior, and use the analysis to control behavior and optimize/synthesize solutions. System engineering helps us understand what happens when we compose many elements, each with their own behavior, and how to design and constrain the individual elements to engineer desired behavior for the composed system.

- Engineering Entrepreneurship, Minor (p. 213)
- Materials Science and Engineering, Minor (p. 214)

Chemical and Biomolecular Engineering, Minor

Chemical Engineers apply concepts from the physical sciences (chemistry and physics) and life sciences (biochemistry and microbiology) to the design and optimization of processes for the efficient production of products ranging from fuels and chemicals to pharmaceuticals to advanced materials. Penn’s chemical engineering department provides students with both a strong foundation in engineering fundamentals and exposure to modern chemical engineering technologies. The program’s versatility allows our students to excel in diverse careers in the chemical industries, research, medicine, law, government, and education.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.seas.upenn.edu/undergraduate/degrees/minors.php

Chemical and Biomolecular, Minor

Electives

Select 6 CBE Courses

Total Course Units

If not taken by the end of freshman year, must be replaced by another department approved Engineering course.

Natural Science Lab - 1.0 cu total; ESE 112 Engineering Electromagnetics, PHYS 150 Principles of Physics I: Mechanics and Wave Motion/PHYS 170 Honors Physics I: Mechanics and Wave Motion, MEAM 147 Introduction to Mechanics Lab; PHYS 151 Principles of Physics II: Electromagnetism and Radiation/PHYS 171 Honors Physics II: Electromagnetism and Radiation, BIOL 101 Introduction to Biology A/BIOL 121 Introduction to Biology - The Molecular Biology of Life; CHEM 053 General Chemistry Laboratory I can each count 0.5 cu toward this requirement.

Approval required; A complete list of approved SPA electives can be found on the ESE undergraduate webpage.

The Social Science & Humanities Depth and Writing Requirement can be satisfied with the 7 total course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Computer Science, Minor

Computer scientists and engineers have revolutionized society and created the computer and telecommunications industries that are so important to human life and the world’s economy. As a result of this revolution, expertise in computer science is essential in many new areas, including computer and network service and consulting companies, financial institutions, health industries, natural science labs and medical research labs, and other contexts where intensive manipulation of information is important. As a result, opportunities for computer scientists and engineers have expanded greatly, both in specialized fields as well as in numerous dual-career opportunities.
in which computer expertise is combined with advanced degrees in business, communication, engineering, law, medicine, and science.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.seas.upenn.edu/undergraduate/degrees/minors.php

For more information: http://www.cis.upenn.edu/current-students/undergraduate/minor.php
Digital Media Design, Minor

The DMD minor is a programming-intensive exploration into interactive computer graphics. The interested student is encouraged but not required to take courses in Fine Arts (in the SEAS SSH category, for example) to gain the artistic knowledge and skills that would augment the DMD technology emphasis. Suggested relevant Fine Arts courses include Digitia Design Foundations and 3D Modeling. The DMD minor also encourages exploration of the connections of computer graphics programming with human cognition and interactive experiences. A capstone EAS499 Integrative Project is required to link the DMD minor with the student’s major.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://cg.cis.upenn.edu/dmd-minor.html

Electrical Engineering Minor

Electrical engineering (EE) connects the physical world with the information world. Electrical engineers can apply physics and chemistry in modern nanotechnology devices, can encode and manipulate information in circuits and networks, and can mathematically understand and reason with large amounts of data in real time. Students can pursue an EE minor by completing a six courses that includes the conception, design, analysis, and implementation of devices, circuits, and signal processing.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.eee.upenn.edu/current-students/undergraduates/minors.php

Digital Media Design Minor

Select one of the following:

- CIS 106 Visualizing the Past
- CIS 110 Introduction to Cognitive Science
- CIS 110 Introduction to Computer Programming
- CIS 120 Programming Languages and Techniques I
- CIS 121 Programming Languages and Techniques II

Total Course Units 6

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Electives

- Select 2 ESE Electives

Total Course Units 7.5

1. An intermediate or Advanced ESE elective can be taken with department approval.
2. Advance ESE course required. An approved list can be found on the most recent EE worksheet.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Energy & Sustainability, Minor

The minor in Energy and Sustainability provides students with broad coverage of technical and societal issues in energy and sustainability. It is designed to help students become leaders in developing technologies for a more sustainable energy future.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.seas.upenn.edu/undergraduate/degrees/minor-energy.php

Energy and Sustainability Minor (ENSU)

Students participating in the minor are expected to have taken at least one semester of intro chemistry, mathematics and physics.

1 Of the two CBE courses, CBE 231 Thermodynamics of Fluids is preferred.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Engineering Entrepreneurship, Minor

Penn Engineering offers a Minor in Engineering Entrepreneurship (EENT), complementing the core engineering disciplines. This Minor is designed for students majoring in engineering and applied science. However, it is open to all University undergraduates subject to available class space. Non-engineering students should check with their home schools to determine their eligibility to take the EENT Minor. All courses for the EENT Minor must be taken for a grade (no Pass/Fail).

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: https://www.seas.upenn.edu/entrepreneurship/

Engineering Entrepreneurship Minor (EENT)

This minor is designed for students majoring in engineering and applied science. However, it is open to all University undergraduates subject to class availability. Non-engineering students should check with their home school to determine their eligibility to take the EENT minor. All courses must be taken for grade (no Pass/Fail).
**Materials Science and Engineering, Minor**

The Materials Science and Engineering (MSE) program reflects the explosive growth of interest in the nano and bio sectors of engineering science and technology. MSE prepares students to use fundamental scientific principles to synthesize, manipulate, design and characterize the structural and functional properties of advanced engineering materials. The program offers students advantages seldom found in other MSE programs: the opportunity to tailor the curriculum to their own interests, guaranteed research experience and an excellent student-faculty ratio.

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

Total Course Units 6
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Mechanical Engineering and Applied Mechanics, Minor**

Mechanical Engineering & Applied Mechanics (MEAM) is the study of forces, deformations and motions of solid bodies and fluids, heat generation and transport, and applications to analysis, design, and manufacture of components, machines, and systems. Students in mechanical engineering follow a program which contains basic groundwork in all aspects of mechanical engineering, but flexibility in the curriculum allows students to pursue elective programs in fields such as aeronautics, robotics, computers, electronics, automatic controls, and materials.

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.me.upenn.edu/prospective-students/undergraduates/majors-minors.php

1 Completion of 6 course units with a grade of “C” or better. No pass/fail permitted. All MEAM courses (except MEAM 445 Mechanical Engineering Design Projects and MEAM 446 Mechanical Engineering Design Projects) can be used. Only (2) 100 level courses are permitted. Up to (2) approved Cognate courses can be substituted with department approval from the following list: BE 200 Introduction to Biomechanics, BE 330 Self Assembly of Soft Materials, BE 510 Biomechanics and Biotransport, CBE 430 Introduction to Polymers, CBE 535 Interfacial Phenomena, MSE 330 Self-Assembly of Soft Materials, MSE 393 Materials Selection, MSE 405 Mechanical Behavior of Macro/Nanoscale Materials, MSE 530 Thermodynamics and Phase Equilibria.

**Systems Science and Engineering, Minor**

System engineering (SSE) helps us to understand what happens when we compose many elements, each with their own behavior, and helps us understand how to design and constrain the individual elements to engineer desired behavior for the composed system. Students can pursue a SSE minor by completing six courses that includes decision making, data processing and modeling, simulation, and design of systems.

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Academic Opportunities**

Penn Engineering offers a number of academic opportunities for undergraduate students.

**Global Opportunities**

Experience in an international setting is an opportunity that Penn Engineering strongly encourages students to obtain. Spending time in another country allows students to develop their intercultural abilities, and increase their independence and confidence as they immerse themselves in a new environment – all while fulfilling their major requirements. Students can study abroad for a semester or a year, take part in a Global Service Learning project, enroll in a Global Immersion Course, or complete a summer internship.
Opportunities include:

- Study Abroad
- Global Service Learning
- Global Immersion

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/study-abroad.php.

Research Opportunities

Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below you can see examples of outstanding student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, including summer and additional research programs available, visit the Penn Engineering Research section (p. 192).

Submatriculation

Penn undergraduates may begin an engineering master’s program while still completing their undergraduate program via the submatriculation application procedure.

For more information, visit the Submatriculation section (p. 276).

Dual Degrees

You may combine your BAS or BSE degree with a second degree in one of Penn’s other undergraduate schools. A Dual Degree is not to be confused with a Dual Major (http://www.seas.upenn.edu/undergraduate/handbook/programs/dual-majors.php), where a student earns two majors within Penn Engineering, or with a Second Major (http://www.seas.upenn.edu/undergraduate/degrees/second-major.php) where an engineering student also earns a major within the College.

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/dual-degrees.php.

School of Nursing

Penn Nursing offers a number of resources and experiences not found at most other schools, including a state-of-the-art simulation lab with mannequins that respond as patients would, classrooms with the latest hospital-based electronic medical records (EMR) technology, and clinical experiences in The Children’s Hospital of Philadelphia and the Hospital of the University of Pennsylvania, two of the nation’s best hospitals. Penn Nursing is a premier academic and research institution renowned for advancing the frontiers of nursing science and patient care. Our students learn from the thought leaders in nursing research, education, and practice who ensure Penn Nursing remain one of the top schools of nursing in the world. At Penn Nursing, students become part of the next generation of healthcare leaders, prepared to care for patients, to conduct landmark research, and to make new strides in healthcare management and health policy.

Learn more about our history: http://www.nursing.upenn.edu/about/history/

Learn more about our school leadership: http://www.nursing.upenn.edu/about/our-leadership/

Mission

The mission of the University of Pennsylvania School of Nursing is to make a significant impact on health by advancing science, promoting equity, demonstrating practice excellence, and preparing leaders in the discipline of nursing.

Philosophy

The mission of the School of Nursing is aimed at meeting the health needs of society in a global and multicultural world. To this end, scholarship, research, education, and practice are integrated to create a culture of inquiry that values intellectual curiosity and diversity, and where faculty, clinicians, staff, and students thrive and learn from one another.

Scholarship and Research

We believe that integrating the arts and sciences is the basis for nursing knowledge and the framework for nursing practice and scholarship. Nursing knowledge encompasses empirical, philosophical, historical, ethical, and personal ways of knowing and is fundamental to the advancement of professional practice. Scholarship encompasses more than research, but also the integration of research into practice and health policy formation and the advancement and dissemination of nursing knowledge. Research is integral in every educational program and strengthened by participating in and contributing to the rich scholarly environment of the University and across national and international health policy organizations.

Nursing is scientifically based and carried out autonomously, as well as interdependently. The focus is development, dissemination, and utilization of knowledge about nursing actions that promote positive changes in patients, systems of care, and the larger society. Nurses collaborate with individuals, families, groups, communities, and other professions to achieve health and well-being for all people.

The School of Nursing is responsive to numerous influences that shape health care, including evolving models of care, consumer advocacy, demographic changes, and advances in science and technology. The faculty are committed to a scholarly agenda that pushes the boundaries of nursing science, in turn influencing education and shaping policy and practice.

Education

Education at the University of Pennsylvania facilitates the intellectual, personal and social development of students as they identify and attain academic and professional goals. Our educational environment fosters independence, ethical behavior, creative and critical thinking, increased breadth of knowledge, and sensitive interactions concerning cultures and viewpoints.

Programs, from baccalaureate to post-doctoral and lifelong learning, are enriched by the varied needs and perspectives of a culturally diverse population, as well as pressing needs for nursing leaders in a rapidly changing world. These leaders will be the clinical experts, health policy shapers, and nursing scholars of the future.

The baccalaureate program, including traditional and second degree students, focuses on professional nursing practice across the continuum of health care, with particular emphasis on vulnerable populations. The
curriculum is dynamic and includes leadership skills, interdisciplinary collaboration, and content and clinical experiences that emphasize evidence-based practice. The curriculum also reflects changes in science and technology.

The Master's programs focus on advanced practice nursing and administration, with an emphasis on specialty and subspecialty practice in concert with changing societal needs. Graduate nurses are prepared for advanced practice that creatively combines knowledge and skills in critical thinking and expert interventions across the lifespan. Special attention is given to clinical decision-making and management skills, as well as methods of evaluation of quality and cost of care.

Pre- and post-doctoral education is dedicated to advancing the discipline of nursing through research. The goal is to equip students with a foundation in nursing and a field of concentration to make substantive contributions to scholarship. Strong faculty mentorship is integral to the development of a critical cadre of future researchers, academicians, and leaders, nationally and internationally.

**Practice**

The primary goal of nursing practice is to optimize care and outcomes for patients and their family members. The practice of nursing is the foundation for informing educational pedagogies and for the generation of discipline-specific research. Practice is defined as the diverse and varied construction, application, and evaluation of knowledge and the action within the discipline of nursing, particularly for the recipients of nursing care. We believe it is the responsibility of academic nursing to serve as the fulcrum of modeling the intentional integration of education, research, and clinical care to improve the delivery of quality health services.

Nursing is an evidence-based, caring profession that improves the health and quality of life for individuals, families, and communities throughout the world. Nursing possesses a unique body of knowledge that guides its practice in both autonomous and collaborative health care settings. Penn Nursing serves as the model for nurses who care for society’s needs in a global and multicultural context. Thus at Penn, we seek to promote health and alleviate suffering in every part of the world by preparing nurses to be responsive to the health-related issues and preferences, values, and needs of all societies. Our goals are to improve and maintain optimal health, prevent disease, enhance the quality of recovery from illness, and support patients and families to cope with acute and chronic health problems. Penn Nursing serves as a model to direct the advancement of the translation of evidence-based knowledge toward culturally competent models of care.

Revised Mission and Philosophy approved by the School of Nursing Faculty Senate 2/3/03.

Revised Mission and Philosophy approved by the School of Nursing Faculty Senate 5/7/12.

Revised Practice statement approved by the School of Nursing Faculty Senate 4/8/13.

Revised Mission approved by the School of Nursing Faculty Senate 10/5/15.

The Office of Nursing Research (http://nursing.livewhale.net/research/onn), along with our four research centers (http://nursing.livewhale.net/research/research-centers) and partnerships across Penn, provide students with resources and support that are virtually unparalleled in our field. Students, from undergraduates to doctoral students, have numerous opportunities to engage in research and work alongside some of the most recognized researchers in their fields.

For more information, visit: https://www.nursing.upenn.edu/research/.

Accreditation is a hallmark of educational quality, and we are proud to share our credentials on our website: http://www.nursing.upenn.edu/about/accreditation/.

Penn Nursing students benefit from a dual advising structure. All students are assigned a faculty advisor and have access to the professional staff advisors in the Office of Student Affairs.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/accelerated/.

**Curriculum**

**Baccalaureate Program Objectives**

**Leveled by Year**

The faculty has defined behaviors that each student must achieve before progressing to the next level. The objectives are leveled by year: level 1 references freshman year; level 2 references sophomore year, and so on. Students are encouraged to refer to these objectives at the mid-point of the semester and again at the end of the semester to actively participate in the learning and self-evaluation processes.

**End of Program. Synthesize knowledge from the humanities and the natural and social sciences as the basis for continuing personal, intellectual, social, and professional development.**

**Level 3.** Apply knowledge from the humanities and the natural and social sciences in the development of the role of nurse in patient care situations in acute care settings.

**Level 2.** Articulate the relevance of knowledge from the humanities and the natural and social sciences to the evolving role of the nurse.

**Level 1.** Demonstrate knowledge of the interrelationship of the humanities and the natural and social sciences as a basis for the development of nursing practice and as a source of personal development.

**End of Program. As a generalist, use theoretical and scientific bases for nursing to deliver nursing care to clients as individuals, families, communities, and organizations in a variety of settings at any level of wellness, illness, and risk.**

**Level 3.** Apply theoretical and scientific bases for nursing practice related to individuals and families with potential or actual health-related problems in acute care settings.

**Level 2.** Demonstrate the use of theoretical and scientific bases for nursing practice related to risk assessment and health promotion activities to individuals within selected communities and healthcare agencies.

**Level 1.** Identify theoretical and scientific bases for nursing practice.
End of Program. Apply research findings to evaluate and improve nursing care and the healthcare system.

- **Level 3.** Appraise the relevance, quality, and applicability of research in decision making related to patient care.

- **Level 2.** Discuss the research implications for various nursing practice environments.

- **Level 1.** Recognize the relationship between research and nursing practice.

End of Program. Assume responsibility for providing nursing care in a collaborative relationship with individuals and groups in a variety of settings.

- **Level 3.** Participate in providing nursing care in a collaborative relationship with individuals and families in complex healthcare settings.

- **Level 2.** Participate in providing nursing care in a collaborative relationship with individuals, selected communities, and healthcare agencies.

- **Level 1.** Observe the process of how nurses collaborate with individuals.

End of Program. Participate in collaborative relationships with colleagues through referral, consultation, planning, and evaluation.

- **Level 3.** Initiate a collaborative relationship with colleagues to facilitate consultation, referrals, planning, and evaluation in a complex healthcare setting.

- **Level 2.** Participate in a collaborative relationship with colleagues by consultation, planning, and evaluating selected communities and healthcare agencies.

- **Level 1.** Identify various interdisciplinary roles in healthcare.

End of Program. Demonstrate leadership and management skills through direction and support of clients and colleagues as individuals, families, communities, and organizations.

- **Level 3.** Integrate an understanding of leadership and management skills through the direction and support of colleagues, individuals, and families in acute care settings.

- **Level 2.** Provide peer support and management of individual clients in selected communities and healthcare agencies.

- **Level 1.** Define leadership and management skills using professional organizations as a model.

End of Program. Participate as an agent of change in scientific, social, and political action for the advancement of research, healthcare, and policy at any level from local to international.

- **Level 3.** Initiate change for the advancement of research and healthcare in an acute care setting.

- **Level 2.** Participate as an agent of change to effect modification in health promotion behavior and level of wellness in selected local communities and healthcare agencies.

- **Level 1.** Recognize the need for change related to healthcare reform and policymaking at the national level.

End of Program. Communicate coherently, comprehensively, and systematically in written and oral forms as they pertain to nursing care, collaboration, research, and policy.

- **Level 3.** Analyze written and oral communication patterns and recommend modification if necessary as they pertain to nursing care, collaboration, and research.

- **Level 2.** Demonstrate therapeutic and professional oral communication with individuals, groups, and peers in selected local communities and healthcare agencies.

- **Level 1.** Demonstrate effective written communication skills.

End of Program. Perform clinical skills appropriate to generalist nursing practice, with competence and judgment within specific settings.

- **Level 3.** Demonstrate advanced nursing skills with competence and judgment in acute care settings.

- **Level 2.** Demonstrate and expected level of judgment in basic nursing skills in selected communities and healthcare agencies.

- **Level 1.** Identify components of professional nursing practice.

BSN Undergraduate Curriculum Organizing Framework and Vision

Class of 2015 and Beyond
(Accelerated BSN Class of December 2014 and Beyond)

**Our Mission**

Penn Nursing is committed to teach the art and science of nursing and to create opportunities for service, practice, leadership, and research. This is achieved through talented faculty, internationally recognized scholarship, respect for the diversity of our own community (of faculty, staff, and students), and a commitment to individualizing the pedagogical and material resources necessary for success.

**Our Vision**

Penn baccalaureate nursing graduates are broadly educated and socially engaged. They demonstrate the capacity for clinical expertise, leadership at the bedside and around the globe, and translating the science of the profession into practice. Our graduates have matured in the intellectual and social environment of both the University and the School of Nursing. This environment is built upon the values of civic engagement, critical inquiry, interdisciplinary knowledge, and the integration of research and practice. It has prepared our graduates to create and realize their own vision and ambition for themselves and their profession.

**Our Values**

- Respect for the diversity of individuals and their ideas
- Dedication to rigorous clinical inquiry as the basis of clinical judgment
- Commitment to collaboration with individuals, families, communities, and colleagues
- Responsible and engaged advocacy
Engagement:
The following examples:
- Professional identity. The application of these themes is demonstrated in
  the curriculum, and essential to the formation of a graduate nurse's
  competencies that are fluid, adapt to various learning experiences when presented
  in a sequential manner. Rather, this framework explicates competencies
  derived from this framework are not intended to be achieved in a
  manner of nursing practice situated in caring relationships that facilitate health and healing. The
  baccalaureate curriculum builds on this conceptualization of nursing as
  it moves students toward increasingly contextualized understandings of
  individuals, families, communities, and populations living with health and
  illness. It also moves students into increasingly complex situations and
  care environments as they experience the dynamic nature of nursing’s
  embeddedness in health care systems, social structures, and society.

The baccalaureate curriculum concentrates on four intersecting core
themes that characterize the complex and contextual nature of nursing
practice: engagement, inquiry, judgment, and voice. The competencies
derived from this framework are not intended to be achieved in a
sequential manner. Rather, this framework explicates competencies
that are fluid, adapt to various learning experiences when presented
in the curriculum, and essential to the formation of a graduate nurse’s
professional identity. The application of these themes is demonstrated in the
following examples:

Engagement: The student understands the relationships among:
- Caring relationships with individuals, families, and patient
  populations
- Collegial intra-disciplinary, interdisciplinary, and multidisciplinary
  collaborative relationships
- Observer and participant in policies and politics
- Situational advocacy and civic commitment to social and political
  change

Inquiry: The student understands the relationships among:
- Knowledge use, acquisition, and development
- Scientific ways of knowing patients and families and multi-
  dimensional and contextual ways of knowing
- Knowledge and implementation of humanistic understandings in
  practice and research
- Evidence-based practices and the social and political processes of
  practice with less clear scientific rationales
- Knowledge of how to use and manipulate technological information
  systems to acquire meaningful data
- Knowledge use and ongoing clinical knowledge development
- Measures of quality in clinical care environments

Judgment: The student understands the relationships among:
- Acquisition of knowledge and skill and the integration of both
  within relational practices with individuals, families, communities,
  populations, and healthcare systems
- Knowledge of individuals and families and collective knowledge
  about communities, populations, and systems
- Core nursing knowledge and integrated knowledge
- Situated judgment and clinical know-how

Voice: The student understands the relationships among:
- Observer, advocate, and moral agent
- Facilitation of patient and family learning and advocacy affecting
  social and political practices
- Informal methods of dialogue, discourse, and debate and those
  necessary for formal writing and publication and for joining a
  community of scholars
- Vision for self and the profession

More information including individual course requirements can be
found in the BSN Handbook (http://www.nursing.upenn.edu/student-
services/resources/handbooks-forms/policies/bsn-handbook/
degree-requirements). (http://www.nursing.upenn.edu/student-
services/resources/handbooks-forms/policies/bsn-handbook/
degree-requirements)

Students who are receiving their second bachelor’s degree in nursing
(known as “second degree students” or “BSN/MSN students”) are
not required to complete the liberal arts component while at Penn.
All plans of study include an 11 course unit waiver for liberal arts
requirements because students who have already completed one
undergraduate degree are exempt from all sector requirements, the
language requirement, the writing requirement, and free electives. If you
have questions regarding your plan of study or the requirements specific
to your program, please reach out to the Office of Academic Affairs:
http://www.nursing.upenn.edu/student-services/advising/.

Majors
- Nursing, BSN (p. 219)
- Nutrition, BSN (p. 222)

Nursing, BSN

Penn Nursing combines the resources and opportunities of a large
university with the intimacy and personal attention of a small college. Our
traditional four-year BSN is a direct-entry program for graduating high
school seniors.

At Penn Nursing, you will learn from a passionate faculty (http://
www.nursing.upenn.edu/about/our-faculty) whose accomplishments are
recognized worldwide. You will benefit from the academic opportunities (http://www.nursing.upenn.edu/academics/bachelor-of-science-in-nursing-bsn) of an Ivy League university while enjoying a fun and fulfilling campus life (http://www.nursing.upenn.edu/about/our-students/student-life). You will gain clinical experience (http://www.nursing.upenn.edu/practice/practice-partners) in some of the nation’s top hospitals, located just steps from your classrooms. And you will have the chance to participate in faculty-driven research (http://www.nursing.upenn.edu/research), supported by state-of-the-art technology (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/learning-through-simulation). Penn Nursing graduates are the leaders shaping the future of health care practice, policy, research, and education.

The nursing program begins in your freshman year with a combination of science, nursing, and liberal arts courses, and students are encouraged to take advantage of our flexible curriculum and take courses offered within Penn’s four undergraduate schools. Clinicals begin in the spring of your sophomore year, and students will have experiences in primary care, acute care, women’s health, and mental health settings working with patients from newborns to older adults.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

The following sample Plan of Study is just one possibility for undergraduate study. This plan may not be compatible with several academic options you might choose (e.g., study abroad, submatriculation, dual degree, etc.). If you are interested in pursuing any of the special academic options available to you during the course of your undergraduate experience and want to know how this will alter your plan of study, please contact your faculty advisor and/or the Office of Student Services at 215-898-6687 or advisor@nursing.upenn.edu. Please note that all plans of study are subject to curricular change.

1. Sector requirements can be taken in any order. For more information on sector requirements, refer to p.26 of the BSN Handbook (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook).

2. Free electives and language requirement courses may be taken pass/fail. For more detailed information on pass/fail policies, refer to the Pass/Fail section in the BSN handbook (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#pass/fail).

3. Check with your advisor for additional approved Health Policy courses.

4. Check with your advisor for additional approved Health Care Ethics courses.

The Nursing Case Study can be taken during the junior or senior year (following completion of NURS 164 Integrated Human Anatomy, Physiology & Physical Assessment II). Only one course is required from the case study group. The Nursing Elective can be taken earlier in the plan of study depending upon the course selected.

Students must consult with an academic advisor prior to making revisions to the plan of study to ensure that the necessary curricular requirements are being met and to prevent delays in academic progression.

The following sample Plan of Study is just one possibility for second-degree students, and individual plans depend on what prerequisites students have fulfilled prior to matriculating at Penn. This plan may not be compatible with several academic options you might choose (e.g., submatriculation, study abroad, minors, etc.). If you are interested in pursuing any of the special academic options available to you during the course of your undergraduate experience and want to know how this will alter your plan of study, please contact your faculty advisor and/or the Office of Student Services at 215-898-6687 or advisor@nursing.upenn.edu. Please note that all plans of study are subject to curricular change.

1. There is some flexibility as to when these courses can be taken (fall vs. spring). Please consult with an advisor about your options and course offerings.
2. See the BSN Handbook (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook) for an approved list of courses.

### Notes

1. All plans of study are subject to curricular change. Students must consult with an academic advisor prior to making revisions to the plan of study to ensure that the necessary curricular requirements are being met and to prevent delays in academic progression.
2. Clinical experiences may include evenings, weekends, and 12 hour shifts. Most clinical rotations are accessible by public transportation; however a car may be necessary for transportation to some clinical sites.
3. Course work outside the School of Nursing is not permitted, with the exception of approved non-nursing courses for the Health Care Ethics and Health Policy requirements.
4. 5.5 course units is the maximum course load for undergraduate nursing students. Students who wish to exceed this limit must seek approval from the Office of Student Services prior to the advance registration period for the semester in question. If approved, the Office of Student Services will increase the maximum course load accordingly in Penn in Touch.

### Nutrition, BSN

Our Bachelor of Science in Nutrition major is an interdisciplinary collaboration with Penn’s School of Arts & Sciences. You will study concepts like dietary behaviors and metabolism, as well as scientific approaches to the physiological roles of nutrients in the diet, from the cellular to human level. You will explore the role of nutrition in cancer, cardiovascular diseases, diabetes, and obesity, which together account for nearly seventy percent of global mortality. We believe that the next generation of nurse researchers and clinicians need a well-rounded background in nutrition science, social sciences, and public health, and we built this innovative program with these goals in mind.

The major consists of 14 course units: six basic science courses (such as cellular biology, anatomy and physiology, and chemistry), four fundamental nutrition science courses, and four electives. Penn Nursing BSN undergrads can add this as a second major.

For more information: https://www.nursing.upenn.edu/nutrition-major/

</table>
Satisfy by exemption or if language proficiency completed in less than 4 semesters, use remaining course units as free electives.

**Distribution by Sectors**

- Arts & Letters Sector: 1
- Society and Social Structures Sector: 1
- Histories and Traditions Sector: 1
- Global and Cultural Studies Sector: 1
- Reasoning, Systems, and Relationships Sector: 1
- Natural Sciences Sector - satisfied by:
  - NURS 061 Biologically-Based Chemistry
  - NURS 068 Integrated Cell Biology and Microbiology
- Free Elective: 1

**Nursing Major Courses**

**Nursing Foundational Courses**

- NURS 101 The Nature of Nursing Practice: 0.5
- NURS 102 Situating the Practice of Nursing: 0.5
- NURS 103 Psychological and Social Diversity in Health and Wellness: 1

**Nursing Clinical Courses**

- NURS 215 Nursing of Women and Infants: 1.5
- NURS 225 Pediatric Nursing: 1.5
- NURS 235 Psychiatric Nursing: 1.5
- NURS 245 Nursing of Young and Middle Aged Adults: 1.5
- NURS 255 Nursing of Older Adults: 1.5

Select a Nursing Case Study from among NURS 355-NURS 369: 1

- NURS 380 Nursing in the Community: 2
- NURS 390 Leadership in the Complex Healthcare System: 3

**Science Requirements**

- NURS 061 Biologically-Based Chemistry: 0.5
- NURS 068 Integrated Cell Biology and Microbiology: 1
- NURS 065 Fundamentals of Nutrition: 1
- NURS 163 Integrated Anatomy, Physiology, and Physical Assessment I: 2
- NURS 164 Integrated Human Anatomy, Physiology & Physical Assessment II: 2
- NURS 165 Integrated Pathophysiology, Pharmacology, and Therapeutics: 2

**Non-Clinical Courses**

- Health Policy Requirement: 1
- NURS 230 Statistics for Research and Measurement: 1
- NURS 547 Scientific Inquiry for Evidence-based Practice: 1

Select one of the following: 1

- NURS 330 Theoretical Foundations of Health Care Ethics
- PHIL 072 Biomedical Ethics
- NURS 389 Research/Inquiry-Based Service Residency: 0.5

**Nursing Elective**

- Select a Nursing Elective: 1

**Nutrition Major Requirements**

**Required Basic Science Courses**

- NURS 061 Biologically-Based Chemistry
- NURS 068 Integrated Cell Biology and Microbiology
- NURS 163 Integrated Anatomy, Physiology, and Physical Assessment I
- NURS 165 Integrated Pathophysiology, Pharmacology, and Therapeutics

**Required Nutrition Science Courses**

- NURS 065 Fundamentals of Nutrition
- NURS 312 Nutritional Aspects of Disease
- NURS 523 Advanced Nutrition: Molecular Basis of Nutrition
- NURS 524 Advanced Human Nutrition and Micronutrient Metabolism

**Elective Courses**

Select four course units: Total Course Units: 40.5

---

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Minors**

- Global Health, Minor (p. 223)
- Health Communications, Minor (p. 224)
- History, Health and the Humanities, Minor (p. 224)
- Nursing and Health Services Management, Minor (p. 224)
- Nutrition, Minor (p. 225)

BSN students are also eligible to complete no more than half of an MSN minor while enrolled as an undergraduate student. For more information, visit: [https://www.nursing.upenn.edu/academics/master-of-science-in-nursing-msn/minors/](https://www.nursing.upenn.edu/academics/master-of-science-in-nursing-msn/minors/).

**Global Health, Minor**

This minor offers students the option to focus their studies on the domestic or international level. Opportunities are provided via clinical experiences, and students gain advanced multicultural knowledge and skills. It is our goal that graduates will rise to professional leadership roles, serving as catalysts to disseminate new research and clinical skills as they work among diverse social and cultural groups.

For more information: [https://www.nursing.upenn.edu/global-health-minor/](https://www.nursing.upenn.edu/global-health-minor/)

The Global Health Minor requires a total of 6 course units.

</tbody>
</table>
Health Communications, Minor

The Health Communication minor is a collaboration between the School of Nursing and the Annenberg School for Communication. This program expands students’ knowledge of the communication process, theory, and behavior, and it prepares them for roles as professionals who develop cutting edge models for health behavior intervention or implement patient education and health communications programs locally, nationally, and globally.

For more information: http://www.nursing.upenn.edu/health-communications-minor/

The Health Communications Minor requires a total of 6 course units.

Required COMM Courses

Select two of the following:

- COMM 123 Critical Approaches to Popular Culture
- COMM 125 Introduction to Communication Behavior
- COMM 130 Media Industries and Society

Elective Courses

Select 3 course units

Total Course Units: 6

1. See the website (https://www.nursing.upenn.edu/global-health-minor/plan-of-study-undergrad) for a list of approved elective courses.

History, Health and the Humanities, Minor

A number of universities have forged bridges between the humanities and sciences to nourish students intellectually, build self-awareness, consider social justice-related phenomena through a new lens, and help them develop empathy. The School of Nursing has launched a new minor in History, Health and the Humanities for undergraduate students. This innovative initiative provides students with the tools and perspectives to study clinical issues in ways different than the lens provided by natural or social sciences. It amplifies the humanities component of the Judgement, Inquiry, Voice, and Engagement pillars that define the “Penn Advantage.” It offers formalized opportunities for writing, both reflective and analytical, beyond that available in the required nursing curriculum.

Student enrolled in this minor will be considered Bates’ Center associates and will be invited to lunches, dinners, and other events with visiting scholars and faculty.

For more information: https://www.nursing.upenn.edu/academics/bachelor-of-science-in-nursing-bsn/minors/

The History, Health and the Humanities Minor requires a total of 6 course units.

For more information contact the director of the History, Health and the Humanities minor, Cynthia Connolly PhD RN FAAN at cac1@nursing.upenn.edu.

Elective Courses

Select 5 course units

Total Course Units: 6

1. At least 1 elective course must be in the School of Nursing.

Nursing and Health Services Management, Minor

The delivery of health care increasingly involves decisions that entail considerations beyond clinical or medical issues. With the rise of managed care in the United States, it is critical for health professionals to understand not only the clinical factors that affect patients but also the business environment in which healthcare institutions function. This program, a partnership between the School of Nursing and The Wharton School, helps students understand both the nature of the economic and managerial constraints that healthcare organizations face, and how to effectively manage these constraints to provide the best possible health care for patients.
The Nursing and Health Services Management Minor requires a total of 8 course units.

---

**Academic Opportunities**

Penn Nursing offers a wide variety of supplemental academic opportunities designed to enhance your academic experience and professional development.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/opportunities/.

**Benjamin Franklin Scholars Program - Nursing**

The Benjamin Franklin Scholars (BFS) Program for Nursing (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program) seeks to foster the development of the next generation of nurse achievers - scholars, leaders, and researchers - through intellectual rigor, academic excellence, and outstanding achievements. Scholars are required to complete four Benjamin Franklin Seminars - small, intensive classes in a wide range of disciplines across the liberal arts and sciences - and a Capstone Honors course in the Nursing school.

**Dual Degrees**

We recognize the value of interdisciplinary learning, which is why student at all levels - undergraduate, masters, and doctoral - can pursue a dual degree with other schools across campus. Our Dual Degree (http://www.nursing.upenn.edu/academics/dual-degrees) page provides a complete listing of our approved programs.

**Global Opportunities**

Penn Nursing offers a variety of international experiences for students in the BSN and MSN programs, which range from short-term opportunities...
that focus on comparative healthcare in international contexts, to full-semester clinical experiences.

**Hillman Scholars Program in Nursing Innovation** ([http://www.nursing.upenn.edu/academics/accelerated-options/bsn-phd-hillman-scholars](http://www.nursing.upenn.edu/academics/accelerated-options/bsn-phd-hillman-scholars))

The Hillman Scholars Program in Nursing Innovation ([http://www.nursing.upenn.edu/academics/accelerated-options/bsn-phd-hillman-scholars](http://www.nursing.upenn.edu/academics/accelerated-options/bsn-phd-hillman-scholars)) is an integrated BSN-to-PhD program designed to educate a new cadre of nurse scientists and leaders to develop innovative solutions in healthcare. The program is available for current Penn Nursing undergraduate students, as well as students applying to the Accelerated Second Degree BSN program.

**Minors** (p. 223)

Penn Nursing offers a variety of minors in such in-demand areas as global health, palliative care, health services management, and oncology. Adding a minor allows students to complement their major by diving more deeply into a specific area of inquiry.

**Nutrition Major** (p. 222)

Our Nutrition major ([http://www.nursing.upenn.edu/nutrition-major](http://www.nursing.upenn.edu/nutrition-major)) is an interdisciplinary collaboration with Penn’s School of Arts & Sciences. You will study concepts like dietary behaviors and metabolism, as well as scientific approaches to the physiological roles of nutrients in the diet, from the cellular to human level.

**Research Opportunities** ([http://www.nursing.upenn.edu/research/student-research](http://www.nursing.upenn.edu/research/student-research))

Students have numerous opportunities to engage with research at Penn Nursing, whether that means participating in one of the school-supported research centers, applying for a prestigious fellowship through the Center for Undergraduate Research and Fellowships ([http://www.upenn.edu/curf](http://www.upenn.edu/curf)) (CURF), or working one-on-one with a faculty mentor on a student-driven research project.

**Submatriculation** ([http://www.nursing.upenn.edu/academics/apenn-nursing-education/submatriculation](http://www.nursing.upenn.edu/academics/apenn-nursing-education/submatriculation))

One of the most popular options at Penn Nursing, submatriculation allows undergraduate students the opportunity to apply to a graduate program and begin coursework while completing the BSN degree. Students can apply to any of the MSN / DNP majors ([http://www.nursing.upenn.edu/academics](http://www.nursing.upenn.edu/academics)) here at Penn Nursing, or to Penn Law.

**School Policies**

The majority of Penn Nursing policies can be found in the Policies and Procedures (p. 279) section of the Catalog.

The following additional policies apply specifically to School of Nursing students:

- **Statement of Personal Attributes and Capabilities** ([https://www.nursing.upenn.edu/live/files/218-statement-personal-attributes-and-capabilities](https://www.nursing.upenn.edu/live/files/218-statement-personal-attributes-and-capabilities))

  The curricula leading to degrees in nursing require students to engage in diverse and complex experiences directed to the practice, refinement and full acquisition of essential nursing competencies and functions. Unique combinations of cognitive, behavioral, sensory, communication, psychomotor and communication abilities are required to perform these functions in a satisfactory manner and to consistently demonstrate these competencies. In addition to being essential to the successful completion of the requirements for the respective nursing degree, these competencies and functions are necessary to ensure the health and safety of patients, fellow students, faculty and other health care providers. This statement describes the minimum competencies and functions necessary for entrance to, continuation in, and graduation from the nursing degree programs of the School of Nursing at the University of Pennsylvania. Candidates for nursing degrees must be able to meet these minimum standards with or without reasonable accommodation.

  This document serves as the official policy for student use of social media at the SON. These guidelines apply to all students creating or contributing to any kind of social media affiliated with the SON. Please check back periodically to make sure you're up to date. We trust that you will adhere to these policies. If, for any reason an incident occurs that violates the policy, we expect you to bring it to our attention immediately so we can work together toward a resolution.

  The School of Nursing recognizes the importance of educating its students about the problems of substance abuse because this significant health risk, and in many cases, criminal matter, is unfortunately prevalent among healthcare providers. Aside from impacting upon the personal and psychological integrity of the abusers, substance abuse may significantly impact the ability of healthcare providers to administer safe, competent patient care. Recognizing that substance abuse is both a disease and a professional hazard, the School of Nursing has incorporated substance abuse topical content areas into its curriculum. The School of Nursing has likewise established this substance abuse policy.

  This policy impacts upon and augments the student’s ability to maintain personal and professional integrity, and facilitates the student’s success both clinically and didactically. It promotes a healthy learning environment for the student. In the clinical setting, this policy enhances patient safety. It also fosters the development of professional nurses who are well educated about the prevalence and adverse outcomes of substance abuse.
The Wharton School

Founded in 1881 as the first collegiate business school, the Wharton School (https://www.wharton.upenn.edu) of the University of Pennsylvania is recognized globally for intellectual leadership and ongoing innovation across every major discipline of business education. With a broad global community and one of the most published business school faculties, Wharton creates economic and social value around the world. The School has 5,000 undergraduate (https://undergrad.wharton.upenn.edu), MBA (https://mba.wharton.upenn.edu), executive MBA (https://executivemba.wharton.upenn.edu), and doctoral (https://doctoral.wharton.upenn.edu) students; more than 9,000 participants in executive education (http://executiveeducation.wharton.upenn.edu) programs annually and a powerful alumni network (https://alumni.wharton.upenn.edu) of 96,000 graduates.

Learn more about our history: www.wharton.upenn.edu/about-wharton
Learn more about our school leadership: www.wharton.upenn.edu/senior-leadership

The Wharton School of the University of Pennsylvania was a remarkable innovation when Joseph Wharton, a self-educated 19th-century industrialist, first proposed its establishment more than 135 years ago.

Wharton believed the role of business was to advance society as a whole, creating new wealth and economic opportunity for all people. He approached the Trustees of the University of Pennsylvania in 1880 to establish a new kind of institution specifically designed to prepare leaders for business and public service.

His suggestion was a radical one, but also remarkably prescient. With the admission in 1881 of the first class of students — just 13 undergraduates — Joseph Wharton and the University of Pennsylvania created a successful formula that forever changed the landscape of business and education. Now, more than 1 million students graduate each year from more than 13,000 graduate and undergraduate business programs around the world.

The Wharton School remains a leader in business education through a steadfast commitment to our founder’s vision of applying unparalleled intellectual resources to prepare young men and women for leadership in the global society. With programs on every continent, Wharton continues to educate and empower the best minds in business.

Research provides an individualized method of learning and an in-depth treatment of a topic of personal interest with input from a faculty expert. Research experience is helpful if applying for distinguished international fellowships and is important if going on to graduate studies in an analytical discipline. Research skills are useful for decision-making in the private and public sectors and are required in academic positions. Below you can find a variety of research opportunities and scholarship programs.

- Courses (https://undergrad-inside.wharton.upenn.edu/research/courses)—Create “tools” in a research-methods course.
- Research assistantships (https://undergrad-inside.wharton.upenn.edu/research/assistantships)—Learn by executing research-related tasks while working on a project for a faculty member.
- Summer programs (https://undergrad-inside.wharton.upenn.edu/research/summer PROGRAMS)—Gain hands-on experience from proposal to presentation through a project commensurate with program duration.
- Scholars programs (https://undergrad-inside.wharton.upenn.edu/scholars programs)—Gain hands-on, in-depth experience from proposal to presentation via a senior thesis and other activities.
- Wharton PhD Submatriculation Program (http://doctoral inside.wharton.upenn.edu/submatriculation)—Submatriculate into a PhD program in Accounting, Finance, Health Care Systems, Insurance and Risk Management, Management, Marketing, Operations and Information Management, Business and Public Policy, or Statistics.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/research/.

The University of Pennsylvania Wharton School is accredited by AACSB – the International Association for Management Education.

1916: AACSB founded initially as the Association of Collegiate Schools of Business (ACSB); constitution is adopted June 17, 1916. Founding members include the following: Columbia University • Cornell University • Dartmouth College • Harvard University • New York University • Northwestern University • Ohio State University • Tulane University • University of California, Berkeley • University of Chicago • University of Illinois • University of Nebraska • University of Pennsylvania • University of Pittsburgh • University of Texas • University of Wisconsin–Madison • Yale University

For more information, visit: http://www.aacsb.edu/.

The goal of the Wharton Undergraduate Division academic advising team is to help students make informed decisions about their educational plans and professional/life goals that are consistent with their interests, abilities, and values.

Advising by appointment, walk-in advising, and specialized advising (https://undergrad-inside.wharton.upenn.edu/advising-services/#specialized_advising) are services available in G95 Huntsman Hall to current Wharton undergraduate students.

Professional advisors (https://undergrad-inside.wharton.upenn.edu/advising services), concentration advisors (https://undergradinside.wharton.upenn.edu/concentration-advisors), and peer advising fellows (https://undergrad inside.wharton.upenn.edu/peer-advISING) are available to assist students.

For more information, visit: https://undergrad inside.wharton.upenn.edu/advising-services/.

Curriculum

All Wharton single-degree undergraduate students must complete a minimum of 37 course units and meet the curricular requirements described below. Students enrolled in a coordinated dual-degree (https://undergrad inside.wharton.upenn.edu/coordinated-dual-degree) program should check with their program advisor to learn about their unique requirements. For a Wharton single-degree undergraduate student, the standard course load is 4 to 5 CUs per semester (see a sample course sequence (https://undergradinside.wharton.upenn.edu/sampl e-curriculum-2017)).

The requirements of the Wharton single-degree curriculum are delineated on the academic planning worksheet (https://undergradinside.wharton.upenn.edu/download/academic-planning-
Concentrations

First-Year Foundations

Economics (https://undergrad-inside.wharton.upenn.edu/requirements-2017/econ-010)
1 required course: ECON 010

Math (https://undergrad-inside.wharton.upenn.edu/requirements/math)
Select 1 of the following: MATH 104 or MATH 110

Writing (https://undergrad-inside.wharton.upenn.edu/requirements/writing)
1 required course: Critical Writing Seminar

Business

3 required courses: WH 101, WH 201, WH 301
1 senior capstone course or project

11 required courses: ACCT 101, ACCT 102, BEPP 250, STAT 101, STAT 102, FNCE 100, FNCE 101, LGST 100 or LGST 101, MGMT 101, MKTG 101, OIDD 101

1 required course unit

1 required course unit

Business Breadth (https://undergrad-inside.wharton.upenn.edu/requirements/business-breadth)
3 required course units

Concentration (Business Depth) (https://undergrad-inside.wharton.upenn.edu/concentrations)
4 required course units

Liberal Arts & Sciences

Cross-Cultural Perspectives (https://undergrad-inside.wharton.upenn.edu/requirements-2017/cross-cultural-perspectives)
3 required course units

General Education Distribution (https://undergrad-inside.wharton.upenn.edu/requirements-2017/general-education-distribution)
6 required course units with at least 1 course unit in each of the following categories:
  - Humanities
  - Natural Science, Math, and Engineering
  - Social Science

Unrestricted

Electives (https://undergrad-inside.wharton.upenn.edu/requirements-2017/unrestricted-electives)
5 required course units

Concentrations

All students graduate from Wharton with a Bachelor of Science in Economics; however, each student is required to choose a concentration, which consists of four upper-level courses that explore a particular area of business in depth.

  - Accounting, BS (p. 229)
  - Actuarial Science, BS (p. 229)
  - Behavioral Economics, BS (p. 230)
  - Business Analytics, BS (p. 231)
  - Business Economics and Public Policy, BS (p. 233)
  - Environmental Policy & Management, BS (p. 234)
  - Finance, BS (p. 235)
  - Global Analysis, BS (p. 236)
  - Health Care Management and Policy, BS (p. 237)
  - Individualized, BS (p. 238)
  - Legal Studies & Business Ethics, BS (p. 239)
  - Management
    - Entrepreneurship and Innovation Track, BS (p. 240)
    - General Track, BS (p. 241)
    - Multinational Management Track, BS (p. 242)
    - Organizational Effectiveness Track, BS (p. 243)
    - Strategic Management Track, BS (p. 244)
  - Managing E-Commerce, BS (p. 245)
  - Marketing & Communication, BS (p. 246)
  - Marketing & Operations Management, BS (p. 247)
  - Marketing, BS (p. 248)
  - Operations, Information & Decisions
Academic Programs at the University of Pennsylvania

- Decision Processes Track, BS (p. 250)
- General Track, BS (p. 251)
- Information Systems Track, BS (p. 252)
- Operations Management/Management Science Track, BS (p. 253)
- Real Estate, BS (p. 254)
- Retailing, BS (p. 255)
- Social Impact & Responsibility, BS (p. 256)
- Statistics, BS (p. 257)

**Accounting, BS**

Although strong quantitative skills and attention to detail are important qualities for an accounting concentration, students need to acquire other skills as well. Many students find the accounting concentration to be useful preparation for careers in consulting, investment banking, general management, public accounting, and securities analysis.

For more information: [https://accounting.wharton.upenn.edu/](https://accounting.wharton.upenn.edu/)

For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

Two can double-count as General Education Distribution courses.

**Global Economy, Business & Society**

One course unit required: 1 unit

**Technology, Innovation & Analytics**

One course unit required: 1 unit

**Liberal Arts & Sciences**

Second semester-level foreign language: 6 units

General Education Distribution

Select 6 courses with at least 1 course unit in each of the following categories:

- Humanities: 1 unit
- Natural Science, Math & Engineering: 1 unit
- Social Science: 1 unit

Cross-Cultural Perspectives: 3 units

Select 3 courses: 2

Unrestricted Electives: 3 units

Select five courses: 5 units

Total Course Units: 33 units

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Actuarial Science, BS**

Actuarial science stands at the intersection of risk and money. Actuaries are experts in evaluating the likelihood and financial consequences of future events, designing creative ways to reduce the cost of undesirable events, and decreasing the impact of tragic events that do occur. They are in great demand by insurance companies, consulting firms, and financial institutions.

This concentration provides an intriguing blend of mathematics and business management for students with a strong mathematics aptitude. Ideally, students graduating from Wharton with an actuarial science concentration will be prepared to pass or will have passed many of
the professional examinations given by the Society of Actuaries or the Casualty Actuarial Society.

For more information: https://statistics.wharton.upenn.edu/programs/actuarialprogram/

**Behavioral Economics, BS**

This new collaborative field, behavioral economics, has provided an understanding of how people's decisions deviate from "optimal" choices and the consequences of such deviations for consumers, managers, firms, and policy. This joint concentration between the Operations, Information, and Decisions Department and the Business Economics and Public Policy Department explores the behavioral aspects of economics and decision making.

This concentration provides students with the opportunity to develop an understanding of (a) the rational actor model, (b) modifications to that model that reflect the psychology of human behavior, and (c) implications of those modifications for decision-makers, markets, and public policy.

### Business Analytics, BS

The Business Analytics joint concentration between the OID and STAT departments is designed to build deep competency in the skills needed to implement and oversee data-driven business decisions, including (i) collecting, managing, and describing datasets, (ii) forming inferences and predictions from data, and (iii) making optimal and robust decisions. Business analytics makes extensive use of statistical analysis, and the applications of business analytics span all functional areas.

Students choosing the Business Analytics concentration are ideally suited for the growing set of careers broadly defined under the header of “data science” with responsibilities for managing and analyzing data. In addition, the concentration provides an excellent complement to students who choose to focus on one of the functional areas of business (e.g., accounting, finance, marketing, operations).

For more information: [https://oid.wharton.upenn.edu/programs/undergraduate/business-analytics-joint-concentration/](https://oid.wharton.upenn.edu/programs/undergraduate/business-analytics-joint-concentration/)

Global Economy, Business & Society
One course unit required 1

Technology, Innovation & Analytics
One course unit required 1

Liberal Arts & Sciences
Second semester-level foreign language

General Education Distribution
Select 6 courses with at least 1 course unit in each of the following categories: 6
- Humanities
- Natural Science, Math & Engineering
- Social Science

Cross-Cultural Perspectives
Select 3 courses 2

Unrestricted Electives
Select five courses 5

Total Course Units 33

1 For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2 Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Business Economics and Public Policy, BS

The Business Economics and Public Policy concentration offers a wide range of courses for students interested in the role of economics in business, competition and public policy. Our courses specialize in market structure and competition, insurance and risk management, behavioral economics, energy, public finance, business & international politics, and business and development. A concentration in Business Economics and Public Policy is vital for students planning a career in consulting, the public sector, industries with a high social impact factor, and anyone with a general interest in how economics interacts with law, policy, and politics.

### Environmental Policy & Management, BS

The concentration in environmental policy and management examines the relationship between business and the natural environment, including human health and safety as well as addressing a range of policy issues. This concentration provides an in-depth foundation for those interested in pursuing careers in the growing environmental sector of the economy, whether in private business, government, or environmental consulting. It takes an interdisciplinary approach, drawing on faculty and courses from several Wharton departments.

Students are encouraged to pursue additional coursework on environmental and technological risks in parallel with the Wharton program through the School of Arts and Sciences and the School of Engineering and Applied Science.

For more information: [https://igel.wharton.upenn.edu/education/wharton-undergrad-concentration/](https://igel.wharton.upenn.edu/education/wharton-undergrad-concentration/)

### Finance, BS

The finance concentration develops the skills necessary to work at a high level of expertise in all areas of finance, including:

- Asset management
- Commercial and investment banking in an international context
- The financial management ("treasury function") of commercial and industrial enterprises and of financial institutions
- The financial aspects of venture capital, mergers, and acquisitions
- Most aspects of management consulting in both domestic and international sectors

Concentrating in finance also equips students well for careers in law and government in addition to the private sector.

The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2. Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Global Analysis, BS

The global analysis (GLAN) secondary concentration permits Wharton students to extend their understanding of the global economy as it applies to firms. One may think of it as a broad concentration in international business.

For more information: https://undergrad-inside.wharton.upenn.edu/concentrations/glan/

Global Analysis Concentration

Secondary concentration only.

Study Abroad for at least one semester.

The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

For more information: hcmg.wharton.upenn.edu

The concentration in health care management and policy focuses on the management, financing, and economics of the health care sector.

Students learn about health care markets and factors that significantly influence decision making both at the policy level and at the level of the firm or organization. The health care sector includes government agencies, non-profit institutions, major private corporations, medical practices and partnerships, and many small and early-stage health care service and product firms.

This concentration prepares students for careers as managers in health care companies or health care service firms such as consulting, banking or health care IT companies, or government agencies. Students planning careers in the health professions such as medicine, nursing, or dentistry have found the concentration very useful in understanding the context in which they will be working.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Individualized, BS

Students have the option to design an individualized concentration if they cannot find a standard concentration that aligns with their interests. An individualized concentration consists of four CUs that are united by a common theme. An established concentration may also be tailored, with approval from the concentration advisor, to specific student interests by replacing a required course with one not on the list of courses that traditionally defines the concentration.

Students should note that (1) at least three of the courses must be business courses, and (2) a faculty member from the Wharton academic department most closely associated with the individualized concentration must sign off on the proposal.

Individualized concentration proposals are considered by the Undergraduate Division Petitions Committee. Students who wish to pursue an individualized concentration should complete the following steps:

1. Consult with an academic adviser in the Undergraduate Division to discuss your proposal prior to submission.
2. Fill out the Individualized Concentration Proposal form.
3. Submit the completed form to the front desk in the Wharton Undergraduate Division (G95 Huntsman Hall).

For more information: http://undergrad.wharton.upenn.edu/academics/

2019-20 Catalog | Generated 10/18/19
Legal Studies & Business Ethics, BS

The Legal Studies and Business Ethics Concentration focuses on the social values, moral concerns, and legal considerations that are essential aspects of business decision making in our global market system. The courses students take in this program help them explore how responsible business leaders can engage ethically and effectively with diverse cultures, corporate stakeholders, government regulators, and legal systems. Of special value to students seeking to broaden their business education, this concentration will help them acquire essential, non-quantitative reasoning skills that are required when leaders face difficult choices under conditions of empirical uncertainty and/or moral ambiguity – a frequent occurrence in fast-moving market economies.

Students pursuing this concentration will gain a number of analytic skills, including:

- Identifying moral and legal issues hidden within complex, culturally rich fact patterns
- Reasoning from moral principles to specific ethical and legal conclusions
- Reasoning by analogy between like cases and situations
- Arguing from authoritative rules and precedents to specific, logically consistent recommendations for action

Management: Entrepreneurship and Innovation Track, BS

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Management: Entrepreneurship and Innovation Track, BS

The Management–Entrepreneurship and Innovation concentration combines theory with practice, providing you with the skills and analytic tools to test theories, models, and strategies learned in the classroom on real ventures. Whether you want to start your own business, join a startup, scale a growing venture, or pursue a career in innovation management, the concentration prepares you for a variety of exciting options. Entrepreneurial and innovative skills are actively sought by competitive and profitable growing businesses.

Total Course Units 33

1 Students may petition to substitute other courses toward the requirements of the major. Such requests will be expected to demonstrate that the student is pursuing a coherent plan of entrepreneurship and innovation studies at Wharton. Petitions should be sent in writing to the Entrepreneurship and Innovation academic advisor, Nellie Gaynor at nelliebk@wharton.upenn.edu. Other courses cannot exceed 1.0 cu equivalent of Wharton coursework. Only 1 cu of Independent Study Project or Advanced Student Project including Global Modular Courses or MKTG890, Global Consulting Practicum, can be counted toward the major and must have approval by the department.

Management: Multinational Management Track, BS

The specialization in Multinational Management provides students with the toolkit to understand how global economic, political, and social forces influence the competitive environment of the firm. Topics include international trade, foreign investment and acquisitions, stakeholder engagement, political risk, foreign market entry, global teams, and global strategy. Students will learn how to evaluate the international environment and to operate in an increasingly complex global business landscape that shapes a variety of industries (e.g., consulting, financial services, real estate, social enterprise) and functions (e.g., strategic,
technological, general or project management, business development, communications or marketing) at companies both large and small.

### Management: Organizational Effectiveness Track, BS

A concentration in management prepares students to take on major managerial challenges and responsibilities in private, public, and nonprofit organizations. Students can pursue a general management concentration or choose from specialized tracks in strategic management, multinational management, organizational effectiveness, and entrepreneurship and innovation.

For more information: https://mgmt.wharton.upenn.edu/programs/undergraduate/management-specializations/organizational-effectiveness/

Management: Strategic Management Track, BS

The specialization in Strategic Management prepares students who are interested in competitive and corporate strategy. A deeper understanding of strategy is useful for those who want to help companies with their strategies (e.g., through consulting), need to understand the strategies of companies (e.g., to make decisions of whether to invest in certain companies), and want to create new organizations and need to develop a strategy that would provide them with a competitive advantage in the market place.

Managing E-Commerce, BS

The secondary concentration in electronic commerce is intended to complement primary concentrations by providing students with an additional capability to understand, analyze, and participate in electronic commerce and electronic business activities in new and established firms. To pursue the concentration in electronic commerce, students must have also declared a primary concentration.

For more information: https://undergrad-inside.wharton.upenn.edu/concentrations/ecom/

Marketing & Communication - Dual Concentration

Marketing professionals must understand the communication process and the most effective methods of conveying information, regardless of whether they intend to focus on advertising, the development of web-based initiatives, or the conduct of market research. Students in this dual concentration will augment their understanding of the core concepts taught in their marketing courses and be better prepared for employment or graduate study. The dual concentration in marketing and communication allows Wharton students concentrating in marketing to take four courses in the Annenberg School of Communication and have this cluster of courses recognized on their transcript as a second concentration.

Students who wish to pursue a second concentration in communication must first declare a primary concentration in marketing. The concentration in communication may not be used as a primary or sole concentration.

For more information: https://undergrad-inside.wharton.upenn.edu/concentrations/mkcm/

Marketing & Operations Management, BS

The Marketing and Operations Management joint concentration emphasizes the importance of partnership between marketing and operations for new product development (NPD) in light of the fact that NPD is a critical company effort highly dependent on internal innovation processes. Given the complexity of these processes, the insights provided by cross-disciplinary collaboration can be particularly beneficial in many efforts, including:

- Creativity-based new product development
- Innovation in service manufacturing and new service development
- Customer response to next-generation products
- The use of conjoint analysis in engineering designs
- Platform-owner market entry
- Design-intensive innovation

### Marketing, BS

Students pursuing a concentration in marketing acquire a solid grounding in applying the basic disciplines (e.g., psychology, economics, statistics) essential for understanding consumer and organizational buying patterns and developing successful marketing strategies. They also gain practical experience applying these concepts and methods via half-semester mini-courses (e.g., new product development, advertising, retailing). Many students with a marketing concentration have gone on to work in brand management, advertising, sales, marketing research, consulting, and entrepreneurial ventures.

**Operations, Information & Decisions: Decision Processes Track, BS**

The Decision Processes (DP) track establishes rigorous scientific foundations for describing, predicting, and improving the processes through which individuals and groups collect data and information, form judgments, and make decisions. This program examines descriptive theories and empirical research on human behavior that identify systematic biases in judgment and heuristics, or rules of thumb, that individuals and groups use to cope with complex decision-making and negotiations environments. It also examines the ways in which individuals and groups can make better decisions given their biases and information-processing limitations.

**Operations, Information & Decisions: General Track, BS**

Computer-based management systems and analytic approaches to decision making are increasingly vital to effective management in a range of industries across public and private sectors. As organizations develop and implement sophisticated decision-support systems, they increase the demand for managers who have the expertise to understand, create, and profitably exploit rapidly developing management technology. There is also a growing demand for skilled professionals who can effectively manage the operations encompassing the manufacturing and distribution of products and services.

The Operations and Information Management curriculum prepares students to meet these challenges by providing a rigorous foundation of coursework across different but complementary disciplines, including decision processes, information systems, and operations management/management science.

Operations, Information & Decisions: Information Systems Track, BS

The Information Systems track is designed to provide the necessary understanding of both technical and business issues relating to information systems. The program is ideal for students interested in managing information technology, either as a technologist, a general manager, or a consultant in technology-intensive industries. The program also provides a good supplement to engineering or other technologically-sophisticated students who wish to obtain greater exposure to managerial issues or students in finance or management who wish to better understand the role of technology in their core disciplines.

Operations, Information & Decisions: Operations Management/Management Science Track, BS

The Operations Management / Management Science track addresses central issues necessary to understand production and service operations in today's global economy. This program provides a rigorous foundation for immediate careers in consulting and analytic strategy support for companies, as well as future graduate studies in economics and business. The courses allow students to build a fundamental understanding of the tradeoffs to consider when managing the development of products and services, as well as the operations used to produce them and fulfill customer requirements.

The need to effectively manage the production of goods and services has also sparked the development of a number of useful mathematical tools. Besides their direct application to operational problems, these management science techniques have been broadly applied to a wide variety of other economic activities, from the pricing of financial instruments to decisions concerning markdown policies in retailing.

---

**Real Estate, BS**

The real estate concentration consists of one required course (REAL 209: Real Estate Investment: Analysis and Financing) and three electives. While the required course focuses on real estate finance, the electives allow students to explore a variety of issues related to real estate. These include real estate development, the legal aspects of real estate investment and financing, and the relationship between government policy and real estate development.

For more information: https://real-estate.wharton.upenn.edu/programs/undergraduate/undergraduate-concentration/

Social Impact & Responsibility, BS

The social impact & responsibility (SIR) concentration seeks to examine the question: “How should business enterprises and business thinking be engaged to improve society in areas not always associated with business?” SIR is an interdisciplinary field that encourages students to approach their core courses and primary concentration courses from a socially oriented perspective.

For more information: lgst.wharton.upenn.edu

Global Economy, Business & Society

One course unit required

Technology, Innovation & Analytics

One course unit required

Liberal Arts & Sciences

Second semester-level foreign language

General Education Distribution

Select 6 courses with at least 1 course unit in each of the following categories:

- Humanities
- Natural Science, Math & Engineering
- Social Science

Cross-Cultural Perspectives

Select 3 courses ²

Unrestricted Electives

Select five courses

Total Course Units

---

1 One course unit from the secondary concentration will double count as a Business Breadth Requirement.
Three course units from the secondary concentration will double count as Unrestricted Electives.

2 Approved by concentration advisor.
For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Statistics, BS

A key challenge facing managers is the interpretation of the vast amount of data generated by computing systems. As these data do not directly answer important business questions, managers must use data analysis and statistics to interpret them. Statistics courses develop the skills and insights required to make effective use of quantitative methods, select and apply techniques, and communicate statistical results. All courses provide skills that augment substantive managerial abilities, along with exposure to computer software that implements key techniques.

Minors

For Wharton Students

Students who wish to study a subject of interest in greater depth may choose to pursue a minor. Minors generally require six to eight courses in a particular field of study. A carefully planned program of study allows a Wharton student to complete a minor within the Wharton curriculum, capitalizing on potential overlap with General Education, Non-Business Elective, and Unrestricted Elective requirements. Students are encouraged to begin planning as early as possible to ensure the minor can be completed in a timely manner and without taking extra courses.
Wharton students have the option of pursuing either a departmental minor or a University Minor (https://undergrad-inside.wharton.upenn.edu/university-minors).

For Non-Wharton Students
- Statistics, Minor (p. 172)

Academic Opportunities

Students at Wharton have many on-campus curricular opportunities to enrich their academic experience. As a Wharton student, you can pursue specialized interdisciplinary studies through four different coordinated dual-degree programs (p. 260). If the coordinated dual-degree programs do not meet your needs, you can pursue a dual degree (p. 258) with the College of Arts and Sciences, the School of Engineering and Applied Science or the School of Nursing. In addition to undergraduate degree options, submatriculation programs (p. 276) offer Wharton students the chance to accelerate their graduate pursuits while satisfying their undergraduate curriculum.

Academic opportunities are also available for single-degree Wharton students. Minors (p. 257) allow students to explore a topic of interest in-depth, while independent study (p. 281) options encourage students to tailor their academic experience to their intellectual interests. Additional opportunities like the Wharton Field Challenge (https://undergrad-inside.wharton.upenn.edu/field-challenge) and the Quaker Consortium (https://undergrad-inside.wharton.upenn.edu/quaker-consortium) further enrich the academic experience at Wharton. Take time to learn more about all the academic opportunities available to you!

For more information, visit: https://undergrad-inside.wharton.upenn.edu/academic-opportunities/.

Wharton Industry Exploration Program (https://undergrad-inside.wharton.upenn.edu/wiep)

These short-term, half-credit courses focus on various industries and cities and take place during school breaks.

Wharton International Programs (https://undergrad-inside.wharton.upenn.edu/wip)

WIP (WH 298) is a short-term international business course that is fully escorted by the Wharton Undergraduate Division. The program gives undergraduate students an amazing global opportunity featuring business site visits, lectures at our partner schools, cultural excursions, and networking opportunities with undergraduate students and business contacts from the destination countries.

In addition to learning about another country’s business environment and culture, students earn 0.5 course units that can be used towards business-breadth or elective credits. Three WIP courses are offered each year.

Integrative Business Simulation (https://undergrad-inside.wharton.upenn.edu/senior-capstone)

The Wharton Integrative Business Simulation (WH 401) is a for-credit, interactive business simulation that provides Wharton seniors with the opportunity to draw on their business knowledge—finance, management, marketing, leadership, and social responsibility—while formulating and executing business strategy in a competitive, team-based environment.

Utilizing real-time problem solving within a dynamic simulation environment, teams design and implement strategic plans, integrate feedback from the consequences of those decisions, and interact with other teams to create shareholder and social value.

Wharton Research Scholars (https://undergrad-inside.wharton.upenn.edu/wrs)

Wharton Research Scholars is an intensive one-year research program for a select group of students who are interested in conducting research under the supervision of some of Wharton’s preeminent faculty members. As part of the program, participants complete an honors thesis.

Students apply to work on a specific project they propose in consultation with a Wharton faculty member who agrees to act as their faculty mentor. Students are allowed to have more than one faculty mentor provided at least one is a member of the Wharton faculty.

Throughout the year, students convene to discuss progress, strategies, and challenges within their projects. This interaction fosters a strong scholarly community where students can learn from each other’s experience. The research scholars also meet regularly with their faculty mentors who advise the students throughout the year. The program culminates with final presentations and publication of research papers on the University of Pennsylvania Libraries’ ScholarlyCommons (http://repository.upenn.edu/wharton_research_scholars).

Interdisciplinary Studies

Interdisciplinary opportunities at Penn allow students to explore their academic interests and discover new ways of integrating knowledge.

Dual Degree

Undergraduates can receive two Bachelor’s Degrees by completing the requirements for any two of the four undergraduate schools at the same time. A dual degree program has no prescribed course of study, and the student does not have to choose to participate prior to matriculation.

The application process for a dual degree varies among the undergraduate schools. Contact the advising office (p. 267) for the school to which you are applying for details on how to submit an application.

Coordinated Dual Degree Programs (p. 260)

Penn’s specialized dual degree programs offer students the opportunity to pursue an integrated curriculum jointly offered by two schools within the University. Program participants graduate from Penn with two degrees.

University Minors (p. 262)

In addition to minors completed within one school, several interdisciplinary minors combine coursework from the four undergraduate schools.
Coordinated Submatriculation Programs (p. 261)

Penn offers students many opportunities to begin a graduate program while completing an undergraduate degree. Students may apply for admission as submatriculants to a variety of the University's graduate and professional areas of study. Submatriculation programs exist in the four undergraduate schools and in several of Penn's graduate schools.

Featured Interdisciplinary Programs

Penn offers a number of opportunities for students to pursue an integrated curriculum jointly offered by two or more schools within the University, and graduate with a single degree. Examples of such programs include:

Digital Media Design

The Digital Media Design (DMD) program is an interdisciplinary major in the School of Engineering and Applied Science at Penn. As a full-fledged Bachelors in Engineering and Science (BSE) degree, it combines major coursework in computer graphics within the Computer & Information Science Department with Fine Arts courses from Penn's School of Design. The program is designed for students who have an interest in the computer programming, mathematics, and design behind computer graphics, animation, games, virtual reality environments, and interactive technologies.

View Program Requirements (p. 203)

For more information, visit: http://cg.cis.upenn.edu/dmd_program.html.

Integrated Studies Program

The Integrated Studies Program (ISP) (https://www.college.upenn.edu/integrated-studies) is the freshman curriculum for Benjamin Franklin Scholars pursuing degrees in the College of Arts and Sciences.

Deeply rooted in the liberal arts tradition of acquiring and applying expansive knowledge, this residential academic program invites highly-motivated students to examine complex themes through the integration of multiple academic disciplines and methodologies. Students are guided through the semester by some of Penn's leading faculty. By investigating the same ideas under three distinct lenses, drawing simultaneously from the humanities, social sciences, and sciences, students sharpen their focus on the similarities—and differences—between the disciplines’ habits of mind.

For more information, visit: https://www.college.upenn.edu/integrated-studies/.

Moelis Advance Access Program

The Moelis Advance Access Program is a deferred admission program that gives Penn undergraduates a guaranteed pathway to the Wharton MBA while they pursue work experience. Moelis Fellows access Wharton resources and network during their deferment period and can be considered for a $10,000 fellowship per year during the 2-year full-time MBA program. Beginning in 2018, the program will accept a highly selective cohort of Penn seniors whose academic and career interests expand traditional notions of business education. The program was established with a $10 million gift from Ken Moelis, W‘80, WG’81, and Julie Taffet Moelis, W’81. The program is open to all Penn undergraduates, beginning with the Class of 2018, who aspire to set the stage early for their advanced education and highly successful careers. Seniors in the College of Arts and Sciences, School of Engineering and Applied Science, School of Nursing, the Wharton School, and all coordinated dual degrees may apply.

For more information, visit: https://mba.wharton.upenn.edu/moelis-advance-access-program/.

Networked & Social Systems Engineering

The Rajendra and Neera Singh Program in Networked and Social Systems Engineering (NETS), formerly called Market and Social Systems Engineering (MKSE), is the world’s first course of study to fully integrate the disciplines needed to design and analyze the complex networks reshaping our society. This program prepares students to shape the technologies that underpin Internet-based search and electronic commerce, financial networks, social networks, and even such exchanges as the power grid. Graduates of this program will be prepared to engineer networks that work for both end-users and investors. Other graduates may become the policy-makers urgently needed to regulate these networks for the protection of commercial property and societal good.

View Program Requirements (p. 208)

For more information, visit: http://www.nets.upenn.edu/.

Nutrition

The Nutrition major is an interdisciplinary collaboration between the School of Nursing and the School of Arts & Sciences, and it builds on a student’s basic science skills with a deep dive into the science of nutrition. Linkages of nutritional compounds and dietary approaches with health and disease, novel approaches to the study of nutritional impact on health, and future avenues of exploration in the field are examined. Elective courses in anthropology, biology, economics, physiology, psychology, health care, and public policy provide a rounded context for the study of nutrition science.

For more information, visit: https://www.nursing.upenn.edu/nutrition-major/.

Penn offers many opportunities for interdisciplinary study in global contexts. Here are some of the opportunities available to undergraduates.

Penn offers the opportunity to study more than 40 languages at the Penn Language Center. (p. 270) For more information, visit Foreign Language Study Opportunities (p. 270).

Coordinated Dual Degree Programs

Penn’s specialized dual degree programs offer students the opportunity to pursue an integrated curriculum jointly offered by two schools within the University. Program participants graduate from Penn with two degrees.

Computer and Cognitive Science
School of Arts & Sciences/School of Engineering & Applied Science

Bachelor of Science in Engineering (BSE)/BAS and Bachelor of Arts (BA)

This program combines studies in computer science and engineering with linguistics, mathematics, philosophy, or psychology, and students receive a BSE or BAS degree from Penn Engineering and Bachelor of Arts from the College of Arts and Sciences. Requirements for the program are guided by the degree sought (BAS or BSE) and include 12-16 course units in Linguistics, Mathematics, Philosophy, or Psychology and 4 course units in a Foreign Language.

For more information, visit: http://www.cis.upenn.edu/current-students/undergraduate/dual.php.

Huntsman Program in International Studies and Business
School of Arts & Sciences/The Wharton School
BA in International Studies/BS in Economics

This innovative four-year joint degree program between the School of Arts and Sciences and the Wharton School combines a business education, liberal arts, and advanced language training in one of eleven languages of focus. It prepares students for global leadership in career paths around the world in diverse areas such as consulting, finance, medicine, politics, diplomacy, the non-profit sector, and entrepreneurship. Students must apply to the program when they apply to Penn; they cannot transfer into the program. Admission is highly competitive.

For more information, visit: http://huntsman.upenn.edu/.

Jerome Fisher Program in Management & Technology
School of Engineering & Applied Science/The Wharton School

BAS/BSE and BS in Economics

The Jerome Fisher Program in Management & Technology (M&T) is sponsored jointly by the School of Engineering and the Wharton School. The impetus for this joint-degree program came from the Board of Overseers of the School of Engineering and Applied Science. The Board of Overseers, a distinguished group of corporate executives and academicians, emphasized that an understanding of the engineering and technology fundamentals is as essential to the background of future leaders in business and industry as a sound knowledge of management principles. They pointed to the growing need for people who can bridge the management and technical disciplines.

Undergraduate students enrolled in the M&T Program pursue degrees from both schools concurrently, creating a truly interdisciplinary learning experience. This combination enables students not only to understand engineering and business concepts but also the integration of the two and how this intersection distinctively shapes our world. M&T students pursue a Bachelor of Science in Economics from the Wharton School and either a Bachelor of Science in Engineering (BSE) or a Bachelor of Applied Science in Engineering (BAS) from Penn Engineering. The curriculum includes two special M&T linking courses that allow for added interdisciplinary learning opportunities. The common goal for all M&T students is the mastery of the technical and managerial skills necessary to define and solve problems in today’s complex technological society. The structure of the joint-degree program gives each student considerable flexibility in meeting this goal. Particular attention is directed to the importance and processes of innovation in our technology-based industries.

For more information, visit: http://www.upenn.edu/fisher/.

Nursing and Health Care Management Program (NHCM)
School of Nursing/The Wharton School
Bachelor of Science in Economics/Bachelor of Science in Nursing (BSN)

Nurses with excellent clinical and administrative skills are in higher demand than ever. Our Nursing and Health Care Management Program (NHCM) gives you the chance to combine two of Penn’s greatest assets: Penn Nursing and The Wharton School. In the NHCM program, you’ll study simultaneously in both schools and graduate with a Bachelor of Science in Nursing and a Bachelor of Science in Economics. Your work will include science and clinical courses along with general education courses in the Arts and Sciences. We designed the curriculum to boost expertise in patient care and deepen your knowledge of how to manage the way that care is delivered. We also use a multidisciplinary approach that integrates nursing, business, and liberal arts. Students enrolled in the...
program have advisors at both Nursing and Wharton and complete this integrated academic and clinical program in five years.

For more information, visit: http://www.nursing.upenn.edu/nhcm/.

**Roy and Diana Vagelos Program in Life Sciences and Management (LSM)**

School of Arts & Sciences/The Wharton School

Bachelor of Arts (BA)/Bachelor of Science in Economics

On the surface, bioscience and business may seem like unrelated fields. But if the full benefits of science are to be realized, discoveries made at the laboratory bench must be taken to market and made accessible to society at large—a process that demands great skill both scientifically and managerially. Given the pace of recent advances in bioscience and biotechnology, never before has the need been so great for decision makers who can understand and advance scientific innovations as well as manage and promote them. It is with this in mind that the University of Pennsylvania launched the Vagelos Life Sciences & Management (LSM) program.

LSM is an undergraduate dual-degree program administered jointly between Penn's College of Arts & Sciences and the Wharton School. Each year, the program enrolls approximately 25 exceptional students and offers them the opportunity to pursue an interdisciplinary curriculum combining bioscience and business, leading to the completion of two degrees: a Bachelor of Arts in a life science major and a Bachelor of Science in Economics. To ensure that every student learns how to apply their knowledge, the program provides the means for them to find two required, paid internships, one centered in scientific research and the other in business or public policy. Completion of the LSM program is an ideal starting point for students intent on careers in the life sciences sector by preparing them for advanced training, and we anticipate they will then go on to pursue through MD, PhD, MBA, JD, and/or other graduate programs. LSM is suited to students with interests in health care; biomedical, agricultural, and environmental research and development; public policy; and the financial and strategic management of life science organizations.

For more information, visit: https://lsm.upenn.edu/.

**Vagelos Integrated Program in Energy Research (VIPER)**

School of Arts & Sciences/School of Engineering & Applied Science

BA/BSE

The Vagelos Integrated Program in Energy Research (VIPER) enrolls talented, prepared, and motivated students interested in energy science and engineering. VIPER students receive instruction and state-of-the-art research experiences, enabling them to pursue advanced degrees in these fields and establish high-caliber research careers as innovators in the discovery and development of sustainable ways to harness, convert, and use energy. Candidates for the program apply as they seek admission to the University. A joint program of Penn's School of Arts and Sciences (SAS) and the School of Engineering and Applied Science (SEAS), VIPER leads to dual Bachelor of Arts (BA) and Bachelor of Science in Engineering (BSE) degrees by combining majors from each school. Possible combinations include: Physics and Astronomy, Chemistry, Biology, or Mathematics from SAS and Chemical and Biomolecular Engineering, Electrical Engineering, Materials Science and Engineering, or Mechanical Engineering and Applied Mechanics from SEAS. Some students may also apply for a master's degree through a fifth year of study.

For more information, visit: https://www.viper.upenn.edu.

**Coordinated Submatriculation Programs**

The University offers a number of coordinated, interdisciplinary submatriculation programs to undergraduate students.

For more information about submatriculation, click here (p. 276).

**BA/JD Program in Arts & Sciences and Law**

This rigorous program offers an opportunity for highly qualified and motivated students to apply to Penn Law School during what is generally the first semester of a student’s junior year (between 16 and 23.99 course units). If accepted, the student will submatriculate into the J.D. program in their senior year. Applicants must be committed to the study of law in its theoretical and practical aspects.

For more information, visit: https://www.college.upenn.edu/submatriculation.

**Bio-Dental Program**

Bio-Dental submatriculation is a seven-year joint program of the College and Penn’s School of Dental Medicine for students who will major in Biology and wish to enroll in the Dental School during their senior year in the College. Students must apply to the program when they apply to Penn, and applicants will be notified of their conditional acceptance into the program when they are notified of their admission to Penn. Full acceptance into the program is made after the student’s junior year and is based on academic performance during those three years and meeting the admissions standards of the Dental School.

For more information, visit: http://www.bio.upenn.edu/https%3A/%252Fwww.bio.upenn.edu/accelerated-dental-program.

**BSN/JD Program**

Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in the JD program (https://www.law.upenn.edu/academics/degrees.php) at Penn Law School while still undergraduates. The current climate of healthcare litigation and malpractice suits is well suited for professionals who combine nursing education and experience with legal expertise. A background in both nursing and law gives students a powerful and marketable skillset and prepares them to make an impact on the medical and legal professions. To submatriculate into Penn Law, students should take the LSAT one year. If a student is admitted, they will begin taking courses at the law school during their fourth year, completing both the BSN and JD degrees in six years instead of the usual seven.

For more information, visit https://www.nursing.upenn.edu/live/files/56-submatriculation-law2015.
Penn Engineering/Penn Law Program
Penn’s Law School offers an opportunity for qualified juniors in Penn Engineering to apply early to the Law School and submatriculate into the JD program beginning their fourth year. The program is designed as a 3-year + 3-year accelerated program for highly qualified Engineering undergraduates either in the Bachelor of Applied Science (BAS) or Bachelor of Science in Engineering (BSE) degree programs.

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/submatriculation-law.php.

Roy and Diana Vagelos Program in Molecular Life Sciences
Ambitious and highly motivated students interested in the molecular view of life should consider the Vagelos Scholars Program in Molecular Life Sciences. Students begin as freshmen and major in two sciences or submatriculate for a Master of Science degree in the standard four years. Students in this program plan to pursue scientific research careers. Scholars are invited from the admitted pool of high school seniors at the beginning of April at the discretion of the faculty director and the admissions committee.

For more information, visit: http://www.sas.upenn.edu/biochem/vsmls.html.

Wharton Law School Submatriculation Program
During the junior year, qualified Wharton undergraduate students may apply for admission to the Penn Law School and submatriculate into the Juris Doctor (JD) program. In this 3-year + 3-year accelerated program, the student’s fourth year of study is spent entirely at the Law School completing the first-year law curriculum. The remaining undergraduate and/or graduate degree requirements are then completed in the student’s fifth and sixth years of study.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

University Minors
In addition to minors completed within one school, several interdisciplinary minors combine coursework from the four undergraduate schools.

Actuarial Mathematics
School of Arts & Sciences/The Wharton School
Actuarial Science stands at the intersection of risk and money. Actuaries use their knowledge of mathematics and probability theory to define, analyze, and solve complex business, financial, and social problems. Actuaries evaluate individual and corporate risks and design financially sound insurance and pension plans. Graduates from the University of Pennsylvania with an Actuarial Mathematics Minor are expected to be in great demand by the insurance and banking industry.

View Program Requirements (p. 143)

For more information, visit: https://www.math.upenn.edu/undergraduate/math-majors-and-minors/minor-actuarial-mathematics.

American Public Policy
School of Arts & Sciences/The Wharton School
This program enables undergraduates interested in American public policy to construct an integrated program between the School of Arts and Sciences and the Wharton School.

View Program Requirements (p. 144)

For more information, visit: https://bepp.wharton.upenn.edu/programs/undergraduate/program-information1/american-public-policy-minor/.

Biological Basis of Behavior and Health Services Management
School of Arts & Sciences/The Wharton School
The Biological Basis of Behavior Program and the Health Care Management Department of the Wharton School have jointly sponsored this effort. The objective is to provide students with exposure to two related areas: study in neuroscience and behavioral biology as a leading example of the bioscience enterprise, and health services management as the environment in which science innovation must be developed and managed. The minor consists of eight courses, four from the Biological Basis of Behavior Program and four from Wharton. Students must earn a minimum grade of C- in courses taken to fulfill the minor requirements. Students must have a minimum of 3 courses that they count towards the minor and not towards any other major of minor.

View Program Requirements (p. 158)

For more information, visit: https://www.sas.upenn.edu/bbb/requirements/bbbhsmsminor.

Consumer Psychology
School of Arts & Sciences/The Wharton School
The goal of the interschool Consumer Psychology Minor is to create a program that fosters the natural link between Psychology in the College and Marketing in Wharton. To fulfill the minor, students must complete four courses from the Psychology Department in the College, four courses from the Marketing Department in Wharton, and the stats requirement. Both College and Wharton requirements will consist of core courses along with a set of elective courses. College students who wish to minor in Consumer Psychology must count two of the four required psychology (PSYC) courses towards only the Consumer Psychology minor (and towards no other major or minor).

View Program Requirements (p. 159)

For more information, visit: https://psychology.sas.upenn.edu/more-information-minors.

Nursing and Health Services Management
School of Nursing/The Wharton School
Increasingly, the delivery of health care involves decisions that entail considerations beyond clinical or medical issues. With the rise of managed care in the United States, it is critical for health professionals to understand not only the clinical factors that affect patients but also the business environment in which healthcare institutions function. This program, a partnership between the School of Nursing and The Wharton School, helps students understand both the nature of the economic and managerial constraints that healthcare organizations face, as well as how
these constraints can be effectively managed to provide the best possible health care for patients.

View Program Requirements (p. 224)

For more information, visit: http://www.nursing.upenn.edu/nursing-and-health-services-management-minor/.

**Nutrition**

**School of Arts & Sciences/School of Nursing**

Jointly sponsored by the Schools of Nursing and Arts and Sciences, the Nutrition Minor presents a broad view of the field, and illustrates the pervasiveness of nutrition-related issues in such diverse fields as anthropology, economics, folklore, history, physiology, psychology, health care, and public policy.

View Program Requirements (p. 225)

For more information, visit: http://www.nursing.upenn.edu/nutrition-minor/.

**Sustainability and Environmental Management**

**School of Arts & Sciences/School of Engineering & Applied Science/The Wharton School**

The Sustainability and Environmental Management Minor is focused on sustainability and designed to help students understand the nature of environmental constraints that face organizations and individuals in the modern world, and to understand how these constraints can be effectively considered as part of the decision-making process in for-profit and non-profit organizations.

View Program Requirements (p. 173)

For more information, visit: https://www.sas.upenn.edu/earth/minors/sustainability-and-environmental-management-minor.

**Urban Education**

**School of Arts & Sciences/Graduate School of Education**

The crisis in American education continues to confound major sectors of American life. National attention has engaged various constituencies - non-profit business organizations; local, state and federal governments; teachers' unions; and universities - in trying to understand and improve public education. At Penn, students and faculty have become deeply involved in local schools through community service, research, teaching, and coursework. In response to student interest in community and education issues, the College of Arts and Sciences and the Graduate School of Education sponsor an interdisciplinary minor in Urban Education. This seven-course undergraduate minor offers students a unique opportunity to bridge learning between the classroom and community, and it features:

- Academically-based community service in local schools
- Deeper understanding of the complex factors affecting urban education
- Field-based research in an area of interest
- Hands-on opportunity to investigate a career in education
- Credit toward Pennsylvania teacher certification requirements

This minor is open to undergraduates in all disciplines. Students choose from among three concentrations depending on interest in pursuing teaching certification or deepening one's background in urban education policy: Elementary Education; Secondary Education; Urban Education Policy, Research, and Practice.

View Program Requirements (p. 174)

For more information, visit: http://www.sas.upenn.edu/urban/students/urban-education-minor.

**Urban Real Estate and Development**

**School of Arts & Sciences/The Wharton School**

This minor, co-sponsored by Real Estate (Wharton) and Urban Studies (Arts and Sciences), is designed to enable students to combine an interest in Urban Studies and Real Estate Development. Students take a total of seven Urban Studies and Real Estate courses, in consultation with the minor advisor.

View Program Requirements (p. 174)

For more information, visit: http://www.sas.upenn.edu/urban/students/real-estate-development-minor.

**Academic Resources**

Penn offers a wide variety of resources, offices, and programs for undergraduate students to support them in all aspects of their Penn experience. The following list highlights some of the most commonly used resources and areas of interest relating to academics and educational opportunities. For more information about campus resources available to students, visit the Division of the Vice Provost for University Life (http://www.vpul.upenn.edu).

- Academic Calendar (p. 264)
- Advising (p. 267)
- Career Services (p. 267)
- Community Engagement (p. 268)
- Enrollment & Degree Verification (p. 268)
- Fellowships and Prizes (p. 268)
- Financial Aid (p. 270)
- Foreign Language Study Opportunities (p. 270)
- Global Programs (p. 270)
- Information for Athletes (p. 271)
- Information for First-Generation, Low Income Students (p. 271)
- Information for International Students (p. 271)
- Learning Resources (p. 272)
- Libraries (p. 272)
- Quaker Consortium (p. 273)
- Registrar's Office (p. 273)
- Research (p. 273)
- Scholars Programs (p. 274)
- Submatriculation (p. 276)
- Summer Sessions (p. 277)
- Transcripts (p. 278)
- Wellness (p. 278)
### Notes:

Graduate and professional programs follow their own calendars with different registration/drop deadlines, which are typically available on the website of the school or program. The College of Liberal and Professional Studies may have different registration/drop deadlines. Please visit the LPS website, [www.sas.upenn.edu/lps/](http://www.sas.upenn.edu/lps/), for more information.

Rosh Hashanah, Yom Kippur, the first two days of Passover and Good Friday are religious holidays that affect large numbers of University community members and that fall during the academic year. View the University’s policy regarding these and other holidays (p. 1818).

The University’s Three-Year Academic Calendar is subject to change. In the event that changes are made, the latest, most up-to-date version will be posted to the Almanac’s website ([https://almanac.upenn.edu/penn-academic-calendar](https://almanac.upenn.edu/penn-academic-calendar)).

### 2020-21 Academic Calendar

**Final examinations**
- Monday-Tuesday, May 4-12

**Spring semester ends**
- Tuesday, May 12

**Alumni Day**
- Saturday, May 16

**Baccalaureate**
- Sunday, May 17

**Commencement**
- Monday, May 18

**2020 Summer Term**

- **Memorial Day (no classes)**: Monday, May 25
- **11-week Session classes begin**: Tuesday, May 26
- **Session I classes begin**: Tuesday, May 26
- **Session I Classes end**: Wednesday, July 1
- **Session II Classes begin**: Thursday, July 2
- **Independence Day (no classes)**: Friday, July 3
- **Session II & 11-Week Session classes end**: Friday, August 7

**2020 Fall Term**

- **Move-in for First Year Students**
  - Wednesday, August 26
- **New Student Orientation**
  - Wednesday-Monday, August 26-31
- **Opening Exercises and Freshman Convocation**
  - Monday, August 31
- **First day of classes**
  - Tuesday, September 1
- **Labor Day (no classes)**
  - Monday, September 7
- **Course Selection Period ends**
  - to be decided
- **Fall term break**
  - Thursday-Sunday, October 1-4
- **Classes resume**
  - Monday, October 5
- **Drop Period ends**
  - to be decided
- **Grade Type Change Deadline**
  - to be decided
- **Family Weekend**
  - Friday-Sunday, October 16-18 (Columbia)

**Advance Registration for Spring Term**
- to be decided

**Last Day to withdraw from a course**
- to be decided

**Homecoming**
- Saturday, November 14 (Harvard)

**Thursday/Friday class schedule on Tuesday/Wednesday**
- Tuesday/Wednesday, November 24-25

**Thanksgiving Break**
- Thursday-Sunday, November 26-29

**Classes resume**
- Monday, November 30

**Last day of classes**
- Thursday, December 10

**Reading days**
- Friday-Monday, December 11-14

**Final examinations**
- Tuesday-Tuesday, December 15-22

**Fall term ends**
- Tuesday, December 22

**2021 Spring Term**

- **First day of classes**
  - Monday class schedule on Tuesday/Wednesday, January 13 (Monday classes)
- **Martin Luther King, Jr. Day Observed (no classes)**
  - Monday, January 18
- **Course Selection Period ends**
  - to be decided
- **Drop Period ends**
  - to be decided
- **Spring term break**
  - Saturday-Sunday, March 6-14
- **Classes resume**
  - Monday, March 15
- **Grade Type Change Deadline**
  - to be decided
- **Advance Registration for Fall Term and Summer Sessions**
  - to be decided
- **Last Day to withdraw from a course**
  - to be decided
- **Last day of classes**
  - Wednesday, April 28
- **Reading days**
  - Thursday-Sunday, April 29-May 2
- **Final examinations**
  - Monday-Tuesday, May 3-11
- **Spring term ends**
  - Tuesday, May 11
### 2021 Summer Term

**11-week Session**
- Classes begin: Monday, May 24

**Session I classes begin**: Monday, May 24

**Memorial Day observed** (no classes): Monday, May 31

**Session I Classes end**: Wednesday, June 30

**Session II Classes begin**: Thursday, July 1

**Independence Day observed (no classes)**: Monday, July 5

**Session II & 11-Week Session classes end**: Friday, August 6

### 2021 Fall Term

**Move-in for First Year Students**:
- Wednesday, August 25

**New Student Orientation**:
- Wednesday-Monday, August 25-30

**Opening Exercises and Freshman Convocation**: Monday, August 30

**First day of classes**: Tuesday, August 31

**Labor Day (no classes)**: Monday, September 6

**Course Selection Period ends**: to be decided

**Fall term break**: Thursday-Sunday, October 14-17

**Classes resume**: Monday, October 18

**Drop Period ends**: to be decided

**Grade Type Change Deadline**: to be decided

**Family Weekend** (Brown): Friday-Sunday, October 29-31

**Advance Registration for Spring Term** (Monday, November 1

**Last Day to withdraw from a course**: to be decided

**Homecoming**: Saturday, November 6 (Cornell)

### 2022 Spring Term

**First day of classes** (Monday class schedule on Tuesday/Wednesday):
- Monday, January 12

**Martin Luther King, Jr. Day Observed** (no classes)
- Monday, January 17

**Course Selection Period ends**: to be decided

**Drop Period ends**: to be decided

**Spring term break**: Saturday-Sunday, March 5-13

**Classes resume**: Monday, March 14

**Grade Type Change Deadline**: to be decided

**Advance Registration for Fall Term and Summer Sessions**:
- to be decided

**Last Day to withdraw from a course**: to be decided

**Last day of classes**: Wednesday, April 27

**Reading days**: Thursday-Sunday, April 28-May 1

**Final examinations**:
- Monday-Tuesday, May 2-10

**Spring term ends**: Tuesday, May 10

**Alumni Day**:
- Saturday, May 14

**Baccalaureate** (Sunday, May 15)
Advising

Each school has its own advising office with a network of academic advisors available to assist students. The structure of the advising varies by school; you can find the links to your school’s advising office below.

School of Arts and Sciences

College students need to choose courses, declare a major and define career goals. They will need to examine their performance in different courses, identify their skills and those they wish to develop, and decide what really matters to them. Much of this assessment they will do themselves, but faculty members, academic advisors, career counselors and peers can help.

Students in the College have a strong network of academic advisors available to assist them throughout their undergraduate careers.

- Pre-major advisors help first- and second-year students navigate their entrance into academic and intellectual life in the College beginning with the issues of incoming freshmen and continuing through the student’s exploration of a potential major.
- Peer advisors work with the pre-major advisor and are one of the first points of contact for incoming College students. They provide the perspective of an upperclass student in the College and assist first-year students in making the transition from high school to Penn by sharing their strategies for academic success and knowledge of campus resources.
- After declaring a major, students are assigned an academic advisor affiliated with the major department or program.
- All students are welcome and encouraged to speak with assistant deans for advising in the College Office. These advisors can help students explore the many options and opportunities available to College students, and are available by appointment or on a walk-in basis throughout the year.

For more information, visit the College website (https://www.college.upenn.edu/advising).

School of Engineering and Applied Science

Each student is assigned a faculty advisor with whom they are required to meet at least twice per year. No student is permitted to register for classes in any semester without first meeting with an advisor. Students who take the time to prepare for these meetings generally find them beneficial and informative. Faculty advisors are the best source of information about electives within the major, research opportunities, and options for graduate study.

For more information, visit: https://www.seas.upenn.edu/undergraduate/advising/.

School of Nursing

Penn Nursing students benefit from a dual advising structure. All students are assigned a faculty advisor and have access to the professional staff advisors in the Office of Student Affairs.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/accelerated/.

The Wharton School

The goal of the Wharton Undergraduate Division academic advising team is to help students make informed decisions about their educational plans and professional/life goals that are consistent with their interests, abilities, and values.

Advising by appointment, walk-in advising, and specialized advising (https://undergrad-inside.wharton.upenn.edu/advising-services/#specialized_advising) are services available in G95 Huntsman Hall to current Wharton undergraduate students.

Professional advisors (https://undergrad-inside.wharton.upenn.edu/advising-services), concentration advisors (https://undergrad-inside.wharton.upenn.edu/concentration-advisors), and peer advising fellows (https://undergrad-inside.wharton.upenn.edu/peer-advising) are available to assist students.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/advising-services/.

Career Services

Career Services helps students define their career goals and learn how to achieve them. The office helps students and alumni obtain permanent and short-term career-related employment and graduate and professional school admission through counseling sessions, workshops, alumni networks, a large career resource library and on-line information. Career Services also establishes and promotes contact between employers, graduate/professional schools, and the University; and hosts employer interviews through the on-campus recruiting program.

- Career Services Contacts for Undergraduates (http://www.vpul.upenn.edu/careerservices/undergrad/connectwithus.php)
- Undergraduate Career Workshops and Events (http://www.vpul.upenn.edu/careerservices/undergrad/events.php)
- Information about Graduate School Study (http://www.vpul.upenn.edu/careerservices/gradprof)

For more information, visit: http://www.vpul.upenn.edu/careerservices/.
Community Engagement

The Barbara and Edward Netter Center for Community Partnerships (https://www.nettercenter.upenn.edu) is Penn's central administrative office for community partnership programs, including academically based community service, direct traditional service, and community development.

Penn’s hub for civic engagement, Civic House (http://www.admissions.upenn.edu/academics/civic-house) supports student service and advocacy groups while providing resources, information, and meeting space for service-oriented efforts throughout campus and beyond.

The Robert A. Fox Leadership Program (http://www.admissions.upenn.edu/academics/fox-leadership-program) prepares students for present and future leadership through hands-on experience, service, course work, and mentorship from successful leaders.

Enrollment & Degree Verification

The University Registrar’s office provides verification of dates a student attended Penn and degrees awarded by the Schools of the University. Details concerning Academic Certification may be found on the University Registrar web page (http://www.upenn.edu/registrar/student-services/academic-certification.html).

Fellowships and Prizes

The Center for Undergraduate Research and Fellowships (CURF) (https://www.curf.upenn.edu) serves as the University of Pennsylvania’s information clearinghouse and primary support office for Penn students and alumni considering applying for major grants and fellowships.

CURF’s Fellowships Team educates Penn students and alumni about fellowships and assists potential applicants in creating their strongest possible application through information sessions, conversations with fellowship recipients, and individual advising. CURF also supports and manages selection committees consisting of leading Penn faculty that evaluate applications and select applicants to endorse.

Fellowships provide funding for a wide range of activities:

- full tuition, fees, and a living stipend to earn a graduate degree abroad
- undergraduate or graduate study in the US
- conducting a research project abroad
- teaching English abroad
- internships abroad
- social engagement projects in the US or abroad

CURF aims to demystify these opportunities to help students determine the most appropriate awards for which to apply.

School-based Awards

In addition to departmental awards, there are a variety of awards available to undergraduate students within a particular school.

College of Arts and Sciences

- Abraham D. Cohn Prize
- Charles W. Burr Book Prize
- College Alumni Society 250th Commemoration Award
- Phi Beta Kappa Awards (https://www.college.upenn.edu/pbk)
- Vagelos Challenge Award (https://www.college.upenn.edu/honors)

For more information, visit: https://www.college.upenn.edu/honors.

School of Engineering and Applied Science

Undergraduate Awards

- C. N. Weygandt Award (Student Choice Award)

Departmental Awards

- Bioengineering
- Chemical and Biomolecular Engineering
- Computer and Information Science
- Electrical and Systems Engineering
- Materials Science and Engineering
- Mechanical Engineering and Applied Mechanics

Awards From Additional Sources

- From the Moore School
  - John Grist Brainerd Award
  - Stuart Eichert, Jr. Memorial Prize
  - Atwater Kent Prize in Electrical Engineering
  - Walter Korn Award
  - Moore School Council Cwikla Award
- From Advancing Women in Engineering
  - Jaros Baum and Bolles Award
- From the Undergraduate Affairs Committee
  - Penn Engineering Exceptional Service Award
  - Manfred Altman Memorial Award
  - Ben and Bertha Gomberg Kirsch Prize (Applied Science Prize)
  - Engineering Alumni Society E. Stuart Eichert, Jr. Award
  - Engineers’ Club of Philadelphia Young Engineer Award
  - Albert P. Godsho Engineering Prize
• Wolf-Hallac Award
• Hugo Otto Wolf Memorial Prize

• Delta Sigma Pi Scholarship Key
• Financial Executives Institute Award
• Herbert S. Steuer Memorial Prize
• John J. Holahan Memorial Prize
• Louis Rudolph Accounting Award
• William D. Gordon Award
• Vice Dean’s Award for Service

University Prizes

The following academic prizes are awarded at the University level:

President’s Innovation Prize (https://www.curf.upenn.edu/presidents-innovation-prize)
Unique at both Penn and across higher education, the President’s Innovation Prize underscores the University’s considerable commitment to encouraging students to put their knowledge to work for the betterment of humankind.

Senior Awards
The University of Pennsylvania grants numerous undergraduate awards to outstanding graduating seniors, in addition to some sophomores and juniors. Eligibility and criteria vary by award.

The Senior Honor Awards (Spoon, Bowl, Cane and Spade for those who identify as men; Hotel, Karnwell, Goddard and Brownlee Awards for those who identify as women) (http://www.vpul.upenn.edu/osa/seniors.php)

Nominees must be members in good academic standing who have actively contributed to campus life through activities and leadership. All nominees are placed on a ballot (one for men, one for women) which is distributed to a committee of staff members and the Senior Class Board. This committee votes and narrows the candidate pool to 15 men and 15 women, who are then voted upon by the entire Senior Class. The top 4 men and 4 women receive the awards on Ivy Day.

Granted to graduating students of color who demonstrate leadership, advance diversity at Penn through student activities or community service, and exemplify excellence.

The James Howard Weiss Memorial Award and The Penn Student Agencies Award (http://www.vpul.upenn.edu/osa/seniors.php)

Both awards recognize distinguished academic achievement (minimum G.P.A. of 3.7) and significant leadership in undergraduate activities by members of the senior class. A committee of students, faculty and staff makes the final selection from the list of candidates. Ideally, nominees should be the most outstanding members of group (1) above.

The Sol Feinstone Undergraduate Awards (http://www.dolphin.upenn.edu/oslaf/feinstone.html)

These awards may be presented to a sophomore, junior or senior who has contributed to "orderly and constructive social and educational change within or outside the University community." Past recipients have included the undergraduate who established the first mental health student group in the nation; the creators of a Saturday African-centered enrichment program for local children; the organizers of a pre-orientation leadership program for first-year students; and the founder of the first and the only youth-led LGBT statewide organization in the nation. Finalists are chosen by the same committee as in (2) above. (Keep in mind the fact that there must be a specific contribution, not just a list of activities).

Student Award of Merit (http://www.dolphin.upenn.edu/oslaf/alumni.html)

This award, sponsored by Penn Alumni, is presented to members of the Senior Class on the May graduation roster in recognition of their service to the University of Pennsylvania, which, in combination with other activities/endeavors, strengthens and enhances the University. The selection committee recognizes that University service takes many different forms, including but not limited to academic, co-curricular, athletic, and community service. Alumni relations and/or advancement
experience is not required. Applicants are asked to use the brief essay portion of this application to describe the nature of their contributions to the Penn community and provide meaningful examples of the same. This award will be given to no fewer than one and no more than five members of the senior class. A committee comprised of alumni makes the final selection from the list of candidates. There is no minimum G.P.A. requirement.

For more information, visit: http://www.vpul.upenn.edu/osa/seniors.php.

Financial Aid
The Office of Student Registration and Financial Services (SRFS) provides solutions to students’ concerns and encompasses the offices of the University Registrar and Student Financial Services.

- Information about Paying for a Penn Education (http://www.sfs.upenn.edu/paying)
- Information about Applying for Financial Aid (http://www.sfs.upenn.edu/finaid)
- Information about Loans (http://www.sfs.upenn.edu/loans)

- Information about Financial Aid (http://www.sfs.upenn.edu/finaid)
- Information about Billing and Payment (http://www.sfs.upenn.edu/billing)

Undergraduate Cost of Attendance
The cost of attendance represents the cost of attending Penn for an academic year, and includes both direct costs that appear on a student’s bill such as tuition, fees, housing, and dining, and indirect costs that are not billed by Penn, such as books and supplies, transportation, and an allowance for personal expenses. Students should consider their cost of attendance as their budget for each academic year. Penn also uses the cost of attendance to help determine a student’s eligibility for financial aid.

View the 2019-2020 Cost of Attendance: http://www.sfs.upenn.edu/paying/cost-of-attendance.htm

Foreign Language Study Opportunities
The Penn Language Center offers over 40 world languages per semester to both undergraduate and graduate students and is a leader in the field of language education and pedagogy training language instructors in language methodology in accordance with the National Standards.

Penn Language Center: plc.sas.upenn.edu

Some schools have foreign language requirements. Information about requirements and options for foreign language study varies by school:

- College of Arts and Sciences (https://www.college.upenn.edu/language-writing-speaking)
- School of Nursing (https://www.nursing.upenn.edu/live/files/247-language-requirement2016pdf)

The Penn Language Center maintains a list of languages (http://plc.sas.upenn.edu/languages) offered at Penn:

- Afrikaans (http://plc.sas.upenn.edu/node/2538)
- American Sign Language (http://plc.sas.upenn.edu/asl)
- Amharic (http://plc.sas.upenn.edu/amharic)

Global Programs
Each year approximately 3,000 Penn students participate in a global experience as part of their academic career at Penn. Of these students, about 1,000 engage in a global opportunity through the office of Penn Abroad.

Penn Abroad (https://global.upenn.edu/pennabroad), a division of Penn Global (https://global.upenn.edu), manages three types of global programs:
• Study Abroad (https://global.upenn.edu/pennabroad/semester) allows undergraduate students to spend a semester or academic year abroad and earn Penn credit.

• Penn Global Seminars (https://global.upenn.edu/pennabroad/pgs) are intensive semester-long seminars with short-term international travel components.

• Global Research & Internship Program (https://global.upenn.edu/pennabroad/grip) placements allow students to go abroad for 8 to 12 weeks over the summer to pursue research or an internship, with funding awarded to all accepted students.

In addition to the opportunities made available by Penn Abroad, other global opportunities for Penn undergraduate students exist across campus. These include:

• Penn Summer Abroad (http://www.sas.upenn.edu/summer/programs/abroad) – offers faculty-led undergraduate courses offered in the summer through the School of Arts and Sciences to a range of international destinations each year.

• Wharton International Program (https://undergradinside.wharton.upenn.edu/wip) – provides short term international business courses at three global locations each year.

• Penn Nursing Short Term & Independent Programs (https://www.nursing.upenn.edu/global-health/student-opportunities/short-term) – provides students with a number of elective courses that can be taken abroad, including some clinical elective opportunities.

• Penn Engineering (http://www.seas.upenn.edu/community/international-opps.php) – provides a range of programs for undergraduate Engineering students including Summer Study Abroad, International Summer Research and Service Learning Opportunities.

Students are encouraged to speak to their department and home school about additional study abroad opportunities that may exist.

Information for Athletes

Penn Athletics (http://www.pennathletics.com) offers a number of programs to support student-athletes academically:

Student Athlete Development Center (http://www.pennathletics.com/page/student-athlete-development-center)

Academic Resources (http://www.pennathletics.com/page/academic-resources)

Student-Athlete Academic Achievement Program

The Student-Athlete Academic Achievement Program is designed to provide student-athletes with supplemental study and tutoring opportunities, as well as to foster academic interaction with fellow student-athletes. During the academic year, students have access to reserved rooms for scheduled study time, and individualized and group tutoring sessions. In addition, workshops are conducted to offer strategies for succeeding at Penn.

For more information, visit http://www.pennathletics.com/page/student-athlete-academic-achievement-program.

Information for First-Generation, Low Income Students

Penn offers a generous program of need-based financial aid (http://www.sfs.upenn.edu/paying) and a strong commitment to ensuring access to a Penn education for qualified students from all social and economic backgrounds (http://www.sfs.upenn.edu/finaid/penn-finaid-initiative.html).

The Penn First Plus Program (P1P) provides a hub of resources, programs, and support for undergraduate students who are the first in their families to attend college and/or have lower-to-modest financial means. P1P collaborates with academic programs, individual faculty members, and student services and centers across the University to make more accessible and inclusive the many opportunities provided by a Penn education, including funding support; individualized advising and advocacy for students; educational workshops for students, faculty, and staff; and initiatives to make more transparent the resources available to students.

Working closely with P1P, the First-Generation, Low-Income (FGLI) Program is housed at the Greenfield Intercultural Center. This program provides a supportive and inclusive environment to facilitate community-building and a sense of belonging at Penn for students from low-income backgrounds who are the first in their families to attend college. In partnership with departments across campus, the FGLI Program provides personal coaching, and varied student support services. In collaboration with student organizations, staff also assist in developing co-curricular initiatives, as well as, exposure to leadership and career opportunities to enhance the overall student experience. You can find more information on FGLI Program initiatives on the Vice Provost for University Life website. (https://www.vpul.upenn.edu/FGLI_books.php)

Information for International Students

Penn’s International Student and Scholar Services (ISSS) (https://global.upenn.edu/issss) provides immigration benefits assistance and integration initiatives for the international community at Penn. ISSS works with international students through all stages of their journey at Penn, providing guidance every step of the way.

ISSS provides support to students in many different areas. Some examples include:

• Preparing students for arrival to the U.S.
• Helping get adjusted to life in Philadelphia
• Advising on maintaining status, travel, and immigration guidelines
• Providing integration opportunities such as social events, cultural trips and leadership roles
• Assisting with employment authorization before internships or jobs
• Assigned advisors and central online portal for requests and forms via the iPenn system (https://www.ipenn.oip.upenn.edu)

Find out more information for:

• New Students (https://global.upenn.edu/issss/new)
• Current Students (https://global.upenn.edu/issss/students)
• Beyond Immigration (https://global.upenn.edu/issss/beyond-immigration)
Click the iPenn logo to see your assigned advisor and make requests with eforms.

**Learning Resources**

**Center for Programs in Contemporary Writing (http://www.writing.upenn.edu)**
The Center for Programs in Contemporary Writing (http://www.writing.upenn.edu) (CPCW) brings together all of Penn’s writing programs, entities, and projects to form a collaborative whole. The Center presents writing courses, workshops and a reading circle. In addition, it offers students an opportunity to perform their writing or to become involved as a tutor, mentor or editorial apprentice.

**College Houses and Academic Services (http://www.collegehouses.upenn.edu)**
The eleven College Houses bring together undergraduates, faculty, staff, and graduate students to form vibrant residential communities within the larger context of our renowned urban campus, right in the heart of historic Philadelphia.

Each House has a Faculty Director, one or more Fellows, a House Dean, a House Coordinator, a plentiful staff of student Residential Advisors (RAs) and Graduate Associates (GAs), student Information Technology Advisors (ITAs), and many student managers in key positions.

Open to all Penn students, House tutoring sessions in math, chemistry, and economics are free and require no advance sign-up. For more information on tutoring within the Houses, visit: http://www.collegehouses.upenn.edu/life/tutoring.

**Communication within the Curriculum (http://www.sas.upenn.edu/cwic)**
Communication Within the Curriculum (CWIC)’s (http://www.sas.upenn.edu/cwic) undergraduate speaking advisors help students develop their public speaking skills through workshops and one-on-one advising sessions during walk-in hours. CWIC also offers two critical speaking seminars and a number of affiliate courses.

**Penn College Achievement Program (PENNCAp) (http://www.vpul.upenn.edu/eap/penncap)**
The Penn College Achievement Program (http://www.vpul.upenn.edu/eap/penncap) works closely with a diverse group of students, many from low-income and/or first-generation (http://www.vpul.upenn.edu/LowIncomeFirstGenerationStudents) backgrounds, to support their success at Penn. Among the many services offered are laptop and textbook loans, summer tuition grants, tutoring and advising.

**SCUE Preceptorials (http://preceptorials.org/newsite)**
Preceptorials are short, small, non-credit seminars generated by students and led by distinguished faculty, outstanding graduate students, lauded external educators and exceptional undergraduate students. The program is designed to foster an interactive and educative environment that values learning for learning’s sake. To that end, there are no grades or tests. Preceptorials are not graded, so that students are given the opportunity to have a guided learning experience outside the traditional setting of a classroom. Most Preceptorials emphasize a hands on approach to learning, and meet once over the course of the semester.

**Tutoring Center (http://www.vpul.upenn.edu/tutoring)**
The Tutoring Center (http://www.vpul.upenn.edu/tutoring) offers Penn undergraduates a wide variety of free, accessible, and convenient options to supplement their academic experience.

**Weingarten Learning Resources Center (http://www.vpul.upenn.edu/lrc)**
The Weingarten Center provides academic support services and programs for undergraduate, graduate, and professional students at the University of Pennsylvania through its two offices. The services and programs of both offices are free and confidential.

**Office of Learning Resources (http://www.vpul.upenn.edu/lrc/ir)**
The Office of Learning Resources (http://www.vpul.upenn.edu/lrc/ir) staff provide a wide range of programming and professional consultation services in university-relevant skills such as reading, writing, study strategies, and time management.

**Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds)**
Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds) staff work closely with students who self-identify with disabilities in order to ensure equal access to all University programs, activities and services.

**Libraries**
Penn has a large and service-oriented library system. The combined 15 libraries on campus contain over 4,500,000 volumes, subscribe to more than 33,000 serials, and offer a rapidly growing set of electronic services which can be accessed from home or office, as well as in the libraries.

- Locations and hours (http://www.library.upenn.edu/locations)

**Research**
- For Research Guides by subject, visit: https://guides.library.upenn.edu/hometabs.
- To get help with research, students can submit questions online (http://faq.library.upenn.edu/ask) or make an appointment for in-person assistance (http://faq.library.upenn.edu/widget_standalone.php?la_widget_id=3206).

**Canvas**
Canvas is the online learning management system used at Penn. A valid PennKey is required to login to the system.

- To login to Canvas, visit: https://canvas.upenn.edu.
- For help with Canvas, visit: http://guides.library.upenn.edu/canvas_students.
Quaker Consortium

University of Pennsylvania students have a unique opportunity to study at Bryn Mawr, Haverford, or Swarthmore Colleges during the fall and spring terms of the academic year.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/quaker-consortium)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/quaker-consortium)

Registrar's Office

The Office of the University Registrar (http://www.upenn.edu/registrar) supports teaching and learning at the University of Pennsylvania by maintaining the integrity of academic policies and the student information system. We are the stewards of Penn’s student records from application to degree conferral in perpetuity.

We provide the following services to Students, Faculty, Alumni, Parents, Staff and many other constituents across our campus:

- Support Students and Departments during Registration
- Reserve Classrooms for Courses and Academic Events
- Schedule Final Exams
- Record and Report Enrollment and Final Grades
- Certify Attendance
- Manage Veterans Affairs Educational Benefits
- Issue Transcripts
- Verify Graduation and Degrees

A transcript is a representation of a student’s academic record while at the University of Pennsylvania.

The University Registrar’s office provides verification of dates a student attended Penn and degrees awarded by the Schools of the University. Details concerning Academic Certification may be found on the University Registrar web page (http://www.upenn.edu/registrar/student-services/academic-certification.html).

Research

As one of the world’s leading research universities, Penn has a broad array of faculty conducting cutting-edge research in all disciplines. There are many routes into research involvement for undergraduates, including research-intensive courses, independent study with a faculty member, and summer programs of varying types and foci.

The Center for Undergraduate Research and Fellowships (https://www.curf.upenn.edu/research) is a resource for undergraduates in all traditional programs who are interested in getting involved in research opportunities around campus and around the world. CURF helps Penn undergraduates become involved in research by helping you identify resources, narrow your search, and shape your initial inquiries so you can find appropriate faculty mentors and research funding.

- Penn Undergraduate Research Mentoring Program (https://www.curf.upenn.edu/content/penn-undergraduate-research-mentoring-program)
- Research Opportunity Directory (https://www.curf.upenn.edu/research-opportunity-directory)
- Research Grants (https://www.curf.upenn.edu/research/funding-opportunities)
- Summer Humanities Research Internships (https://www.curf.upenn.edu/summer-humanities-internships)

College of Arts and Sciences

Research reinforces and instills mastery of academic skills: how to formulate a question or hypothesis, how to gather evidence, and how to answer that question or test that hypothesis.

One of the major advantages of being an undergraduate at a research university is the wide variety of opportunities available for scholarship. Research in the College encompasses a range of activities. In some disciplines, such as English, philosophy and history, students read original works, or the primary literature, and look for new connections and interpretations of these writings. In areas such as anthropology or history of art, students study artifacts, works of art or ancient languages, gaining insights on earlier civilizations and the lives of those who contributed to them. Some students do research in biology, chemistry or psychology, seeking insights on genetic coding, molecular structure or animal behaviors.

Sometimes, students may receive College credit for research activities and scholarship, or receive work-study funds or stipends from faculty grants.

For more information, visit: https://www.college.upenn.edu/research/.

School of Engineering and Applied Science

Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below are examples of student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, visit: http://www.seas.upenn.edu/undergraduate/research/index.php.

Finding a Research Mentor and Research Experiences

Students are encouraged to explore the Penn Engineering Faculty Expertise Directory (http://www.seas.upenn.edu/directory/departments.php), featuring the School’s standing faculty and is searchable by department, research center affiliation, and research expertise keyword. Users can identify which faculty are conducting research in a specific area and contact faculty members whose research interests them.
The Engineering Dean’s Advisory Board (EDAB) puts together a guide for fellow students that gives step-by-step instructions and tips on how to secure research positions as an undergraduate.

For Bioengineering majors, the Penn student chapter of the Biomedical Engineering Society (BMES) has assembled its own student guide on starting up research.

Summer Undergraduate Research in Engineering (SURE)
Penn Engineering’s world-acclaimed faculty, along with state-of-the-art research laboratories and highly interdisciplinary curricula, offers summer research opportunities for talented undergraduates who seek hands-on research experience. From robotics and computer animation, nanotechnology, genomics and biotechnology, Penn’s centers and institutes are at the forefront of research on multiple scientific and technological frontiers.

International Summer Undergraduate Research in Engineering (iSURE)
Opportunities for undergraduates are available during the summer to spend eight to 12 weeks on a research internship in one of Penn Engineering’s partner institutions abroad.

Littlejohn Undergraduate Research Program
Thanks to a generous gift by Angus Littlejohn, the School of Engineering is able to offer Summer Research Opportunities to Penn Engineering Students. The program is open to rising, sophomores, juniors and seniors.

The program intends to provide students the opportunity to get involved in hands-on engineering research under the supervision of a faculty member. Topics of research include all areas covered by the departments in the School of Engineering and Applied Science. Students will receive a stipend of $4,500 for a 10 week period.

Rachleff Scholars Program
This program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

School of Nursing
The Office of Nursing Research (http://nursing.livewhale.net/research/ on), along with our four research centers (http://nursing.livewhale.net/ research/research-centers) and partnerships across Penn, provide students with resources and support that are virtually unparalleled in our field. Students, from undergraduates to doctoral students, have numerous opportunities to engage in research and work alongside some of the most recognized researchers in their fields.

For more information, visit: https://www.nursing.upenn.edu/research/.

The Wharton School
Research provides an individualized method of learning and an in-depth treatment of a topic of personal interest with input from a faculty expert. Research experience is helpful if applying for distinguished international fellowships and is important if going on to graduate studies in an analytical discipline. Research skills are useful for decision-making in the private and public sectors and are required in academic positions.

Below you can find a variety of research opportunities and scholarship programs.

- Courses (https://undergrad-inside.wharton.upenn.edu/research/courses)—Create “tools” in a research-methods course.
- Research assistantships (https://undergrad-inside.wharton.upenn.edu/research/assistantships)—Learn by executing research-related tasks while working on a project for a faculty member.
- Summer programs (https://undergrad-inside.wharton.upenn.edu/research/summer-programs)—Gain hands-on experience from proposal to presentation through a project commensurate with program duration.
- Scholars programs (https://undergrad-inside.wharton.upenn.edu/scholars-programs)—Gain hands-on, in-depth experience from proposal to presentation via a senior thesis and other activities.
- Wharton PhD Submatriculation Program (http://doctoral-inside.wharton.upenn.edu/submatriculation)—Submatriculate into a PhD program in Accounting, Finance, Health Care Systems, Insurance and Risk Management, Management, Marketing, Operations and Information Management, Business and Public Policy, or Statistics.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/research/.

University Policies
- Guidelines for Research in the Community (p. 1789)
- Guidelines for Student Protection in Sponsored Research Projects (p. 1790)
- Policy on Undergraduate Students, High School Students and Non-affiliates Participating in Research in Penn Research Facilities (p. 1818)
- Procedures Regarding Misconduct in Research for Nonfaculty members of the Research Community (p. 1824)

Scholars Programs
The following programs are available to all undergraduate students.

Benjamin Franklin Scholars
The Benjamin Franklin Scholars (https://www.curf.upenn.edu/bfs) are one of Penn’s most distinctive undergraduate communities.

Each year we welcome a group of extraordinary incoming students, committed to the transformative power of ideas. Benjamin Franklin Scholars are selected based on their interest in, and demonstrated capacity for, a deep engagement in the liberal arts and sciences, both as ends in themselves and as engines of change in the world. With unique course offerings, and under the guidance of extraordinary faculty and advisors, we encourage our students to pursue, in the spirit of Franklin himself, our guiding principles of breadth, curiosity, and a tinkering habit of mind.

We are a home for students who seek the advantages of wide-ranging knowledge, whatever particular educational path they choose. We look for spirited, independent people who find their own passions and are predisposed to explore their own ideas, wherever they might lead. We welcome restless minds who are not content just to appreciate great ideas as abstractions up on a shelf, but who see them as transformative; changing minds and so changing the world. We are a community of students and faculty who find value in the saying of the great classical
writer Plutarch, from whom Franklin himself claims to have "read abundantly" and see a truly great education as a kind of playing with fire.

BFS welcomes students in all the undergraduate schools: The College, Engineering, Wharton, and Nursing. Parts of the program, including admissions, work a bit differently in the different schools. For all our scholars, the BFS experience includes opportunities for overseas internships, a presentation of research to the BFS community, and our Seminars — a set of enriching opportunities to work on challenging topics, without requiring extensive prerequisites, both inside and outside of their major fields of study.

**University Scholars**

The University Scholars program ([https://www.curf.upenn.edu/university-scholars](https://www.curf.upenn.edu/university-scholars)) provides an exceptional academic environment for intellectually dynamic students who have already demonstrated their commitment and dedication to research.

Through mentoring, research funding and scholarly events the program encourages and supports students to make the most of their undergraduate years, not only with in-depth research, but also by making an early start in graduate and professional courses, ranging widely or in some cases focusing narrowly on their curricular choices.

The focus of the University Scholars program is undergraduate research. In order to aid students in doing creative and in-depth research, the University Scholars has a fund with which to help students defray research expenses. Funding is meant to cover the expense of the research itself; this most often pertains to room and board costs over the summer months. Occasionally, students' research will take them away from Penn. In those instances, the University Scholars program may be able to fund travel expenses as well.

**Civic Scholars**

Penn Civic Scholars ([http://www vpul.upenn.edu/civichouse/ civicscholars](http://www vpul.upenn.edu/civichouse/ civicscholars)) is a unique program providing undergraduates with a sustained four-year experience in civic engagement and scholarship. The program culminates in certification upon graduation and designation as a Civic Scholar on the student's transcript.

The Civic Scholars program is based on a few basic principles:

- Civic engagement and academic work are mutually reinforcing.
- Meaningful and sustained involvement in community affairs while at Penn is the base for life-long civic commitments and contributions.
- Undergraduates can conduct significant applied social and public policy research through a multi-year preparatory process.
- Forming a community of dedicated students and faculty will encourage distinctive civic service and scholarship.

The following programs are available to students in a particular school.

**College of Arts and Sciences**

**Integrated Studies Program**

The Integrated Studies Program (ISP) ([https://college.upenn.edu/integrated-studies](https://college.upenn.edu/integrated-studies)) is the freshman curriculum for Benjamin Franklin Scholars pursuing degrees in the College of Arts and Sciences.

Deeply rooted in the liberal arts tradition of acquiring and applying expansive knowledge, this residential academic program invites highly-motivated students to examine complex themes through the integration of multiple academic disciplines and methodologies.

Students are guided through the semester by some of Penn's leading faculty. By investigating the same ideas under three distinct lenses, drawing simultaneously from the humanities, social sciences and sciences, students sharpen their focus on the similarities—and differences—between the disciplines' habits of mind.

**School of Engineering and Applied Science**

**Rachleff Scholars**

The School Of Engineering and Applied Science is pleased to announce the Rachleff Scholars Program ([https://www.seas.upenn.edu/undergraduate/research/rachleff-scholars.php](https://www.seas.upenn.edu/undergraduate/research/rachleff-scholars.php)). The Program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

The Rachleff Scholars Program is open to rising sophomores with at least a 3.4 Cumulative GPA and strong interests in engineering research. Each student accepted into the Rachleff Program is required to complete work in three separate areas: summer research experience, honors coursework, and scholarly community activities.

**School of Nursing**

**Benjamin Franklin Scholar- Nursing**

As a Benjamin Franklin Scholar - Nursing ([https://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program](https://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program)), you will engage in an intensive academic experience, along with peers in the College of Arts and Sciences, the Wharton School and in the School of Engineering and Applied Science, to complete the undergraduate Nursing major with an intensive liberal arts component. In addition to a variety of campus-wide programs as part of BFS, you will be able to enroll in the justly famed BFS Seminars — course taught by expert faculty from across campus in a variety of topics.

**The Wharton School**

**Joseph Wharton Scholars**

Founded in 1988, the Joseph Wharton Scholars ([https://undergrad-inside.wharton.upenn.edu/jws](https://undergrad-inside.wharton.upenn.edu/jws)) program is designed to emphasize the importance of scholarly research and the liberal arts and sciences within the framework of a business education. Students in the program are required to take scholars courses both in Wharton and outside of Wharton (in the College of Arts & Sciences, Nursing, and/or Engineering), engage in a significant research project, and participate in a variety of academic, career-oriented, and social activities.

The JWS program is the Wharton component of the Penn-wide Benjamin Franklin Scholars ([https://undergrad-inside.wharton.upenn.edu/bfs](https://undergrad-inside.wharton.upenn.edu/bfs)) program, through which students gain access to BFS Seminars. In addition to the course requirements, students must maintain a minimum 3.4 GPA.

Joseph Wharton Scholar students must take three non-Wharton BFS Seminars as well as four Wharton honors courses (which may include Wharton BFS Seminars). The Wharton courses include honors sections of BEPP 250, FNCE 100, FNCE 101, MKTG 101, MGMT 101, MKTG/STAT 476, STAT 430, STAT 431, WH 399; and the Wharton BFS Seminars: LGST 101,
LGST 210, and LGST 215. All JWS students must take WH150x—Evaluating Evidence as one of their four honors classes in Wharton.

**Public Policy Research Scholars**

The Public Policy Research Scholars (PPRS) (https://publicpolicy.wharton.upenn.edu/for-students/public-policy-research-scholars) offers a unique opportunity for students to study and explore public policy.

PPRS is an interdisciplinary certificate program intended for undergraduates with a background in economics, who want to explore the impact of U.S. public policy on the domestic economy.

The PPRS program is not a major. Instead, it offers a supplemental course of study, focusing on the quantitative analysis of public policy at the federal level, that can be pursued alongside any major, in any of Penn's undergraduate schools. Beyond the curriculum, students also are required to do at least one public policy summer internship, for which they will receive funding from the Penn Wharton Public Policy Initiative. They also will have opportunities to assist with faculty-led policy research on campus. Through PPRS, we aim to create a tight-knit cohort of undergraduates from across the University who are committed to gaining the skills and experience necessary to critically assess U.S. public policy, as well as to prepare for graduate study and career opportunities in the field.

The core skills at the heart of PPRS include:

- Economic and political analysis of public policy, for assessing why, how, and with what degree of success the government designs and implements policy.
- Statistical thinking and quantitative analysis of economic data.
- Knowledge of the policymaking process.
- The application of theoretical and quantitative tools to practical, real-life policy questions.

Students that complete the program will have the designation “Public Policy Research Scholar” noted as an honor on their transcripts and will receive a certificate upon graduation.

**Wharton Research Scholars**

Wharton Research Scholars (https://undergrad-inside.wharton.upenn.edu/wrs) is an intensive one-year research program for a select group of students who are interested in conducting research under the supervision of some of Wharton's preeminent faculty members. As part of the program, participants complete an honors thesis.

Students apply to work on a specific project they propose in consultation with a Wharton faculty member who agrees to act as their faculty mentor. Students are allowed to have more than one faculty mentor provided at least one is a member of the Wharton faculty.

Throughout the year, students convene to discuss progress, strategies, and challenges within their projects. This interaction fosters a strong scholarly community where students can learn from each other's experience. The research scholars also meet regularly with their faculty mentors who advise the students throughout the year. The program culminates with final presentations and publication of research papers on the University of Pennsylvania Libraries' ScholarlyCommons (http://repository.upenn.edu/wharton_research_scholars).

**Submatriculation**

Penn offers students many opportunities to begin a graduate program while completing an undergraduate degree. Students may apply for admission as submatriculants to a variety of the University's graduate and professional areas of study. Submatriculation programs exist in the four undergraduate schools and in several of Penn's graduate schools.

Application for admission as a submatriculant is made within the regular deadlines and processes for application to the graduate program of interest, usually during the student's junior year. Prior to applying for admission as a submatriculant, a student should meet with an academic advisor in both the undergraduate school and in the intended graduate program.

Policies, options, and procedures for submatriculation vary depending on a student's undergraduate school:

- College of Arts and Sciences (https://www.college.upenn.edu/submatriculation)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/degrees/submatriculation.php)
- School of Nursing (https://www.nursing.upenn.edu/academics/apenn-nursing-education/submatriculation)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/submatriculation)

For more information about interdisciplinary submatriculation opportunities, click here (p. 261).

**School of Arts and Sciences**

For a list of School of Arts and Sciences departments that consider submatriculation applications, visit: https://www.college.upenn.edu/submatriculation/.

In addition to submatriculating within a department, College undergraduate students are also eligible for the following specialized submatriculation programs:

**BA/JD Program in Arts & Sciences and Law**

This rigorous program offers an opportunity for highly qualified and motivated College students to apply to Penn Law School during what is generally the first semester of a student's junior year (between 16 and 23.99 course units). If accepted, the student will submatriculate into the J.D. program in their senior year. Applicants must be committed to the study of law in its theoretical and practical aspects.

For more information, visit: https://www.college.upenn.edu/submatriculation.

**Bio-Dental Program**

Bio-Dental submatriculation is a seven-year joint program of the College and Penn’s School of Dental Medicine for students who will major in Biology and who wish to enroll in the Dental School during their senior year in the College. Application to the program must be made at the time of application to Penn. Applicants will be notified of their conditional acceptance into the program when they are notified of their admission to Penn. Full acceptance into the program is made after the student's junior year and is based on academic performance during those three years and meeting the admissions standards of the Dental School.
BSN programs to formally enroll in the JD program

Submatriculation allows students in traditional and accelerated BSN/JD Program submatriculation programs:

Nursing undergraduate students are eligible for the following specialized School of Nursing degrees/submatriculation-law.php.

For more information, visit: http://www.seas.upenn.edu/undergraduate/

undergraduates either in the Bachelor of Applied Science (BAS) or a 3-year + 3-year accelerated program for highly qualified Engineering to apply early to the Law School and submatriculate into Penn's Law School offers an opportunity for qualified juniors in Penn Engineering/Penn Law Program submatriculation program:

undergraduate students are also eligible for the following specialized submatriculation program:

School of Engineering and Applied Sciences

• Both BSE and BAS degree students in Penn Engineering may apply for submatriculation into engineering master's programs. (Note that Engineering students are not permitted to submatriculate into the Master of Computer and Information Technology (MCIT) program.)

• Qualified undergraduates in Penn's other schools may apply to submatriculate into any of the Penn Engineering master's degree programs, subject to their home school's rules and regulations.

In addition to submatriculating within a department, Engineering undergraduate students are also eligible for the following specialized submatriculation program:

Penn Engineering/Penn Law Program

Penn's Law School offers an opportunity for qualified juniors in Penn Engineering to apply early to the Law School and submatriculate into the JD program beginning their fourth year. The program is designed as a 3-year + 3-year accelerated program for highly qualified Engineering undergraduates either in the Bachelor of Applied Science (BAS) or Bachelor of Science in Engineering (BSE) degree programs.

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/submatriculation-law.php.

School of Nursing

Nursing undergraduate students are eligible for the following specialized submatriculation programs:

BSN/JD Program

Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in the JD program (https://www.law.upenn.edu/academics/degrees.php) at Penn Law School while still undergraduates. The current climate of healthcare litigation and malpractice suits is well suited for professionals who combine nursing education and experience with legal expertise. A background in both nursing and law gives students a powerful and marketable skillset, and prepares students to make an impact on the medical and legal professions.

To submatriculate into Penn Law, students should take the LSAT and apply (https://www.law.upenn.edu/admissions/jd) during their junior year. If a student is admitted, they will begin taking courses at the law school during their fourth year, completing both the BSN and JD degrees in six years, instead of the usual seven.

For more information, visit https://www.nursing.upenn.edu/live/files/56-submatriculation-law2015.

BSN/MSN Program

The demand for nurses with MSN degrees is higher than ever. Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in one of Penn Nursing’s MSN Programs (https://www.nursing.upenn.edu/academics/master-of-science-in-nursing-msn) while still undergraduates. Students are encouraged to apply (https://www.applyweb.com/upennng) as early as their junior year. If accepted, students will begin to take master's level coursework, earning credit toward both degrees.

For more information, visit: https://www.nursing.upenn.edu/live/files/55-submatriculation-msn2016.

The Wharton School

Wharton undergraduate students are eligible for the following specialized submatriculation programs:

Wharton Law School Submatriculation Program

During the junior year, qualified Wharton undergraduate students may apply for admission to the Penn Law School and submatriculate into the Juris Doctor (JD) program. In this 3-year + 3-year accelerated program, the student’s fourth year of study is spent entirely at the Law School completing the first-year law curriculum. The remaining undergraduate and/or graduate degree requirements are then completed in the student’s fifth and sixth years of study.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

Wharton MBA Submatriculation Program

Qualified juniors in the Wharton Undergraduate Program may apply for early entry (submatriculation) into the Wharton Master of Business Administration (MBA) Program. In this 3-year + 2-year accelerated program, students’ fourth and fifth years of study are spent entirely as part of the MBA Program. The program is designed to attract academically talented undergraduates with well-defined career goals and significant work experience. Students apply in the junior year.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

Wharton PhD Submatriculation Program

The goal of the program is to allow selected Wharton undergraduates the opportunity to submatriculate into one of Wharton's Ph.D. programs directly from the undergraduate program.

For more information, visit https://doctoral-inside.wharton.upenn.edu/submatriculation/.

Summer Sessions

Penn Summer (http://www.sas.upenn.edu/summer) offers a wide variety of summer programs to current Penn students, with more than 300 classes available during the day or evening.

Current Penn students are encouraged to take advantage of advising resources during the summer term in the same manner as during the
fall and spring. Before enrolling in summer courses, students should consult with their academic advisor (p. 267) regarding their intended coursework to ensure adequate degree progress.

Penn Summer On-Campus

There are three academic sessions during Penn Summer On-Campus (http://www.sas.upenn.edu/summer/programs/on-campus), and more than 300 courses are offered from academic departments across the university. Flexible day and evening classes are offered to fit students’ schedule and needs.

For more information, visit: http://www.sas.upenn.edu/summer/programs/on-campus.

Penn Summer Online

Not going to be in Philadelphia this summer? Consider taking one of Penn’s Summer Online (http://www.sas.upenn.edu/summer/programs/online) courses. Online courses allow students to earn credit as they participate in real-time with their Penn instructor and peers while having 24/7 access to their virtual learning materials.

For more information, visit: http://www.sas.upenn.edu/summer/programs/online.

Penn Summer Abroad

Students can earn Penn credit as they experience culture in another country with Penn Summer Abroad (http://www.sas.upenn.edu/summer/programs/abroad). Students travel with Penn faculty and other undergraduates with accommodations and excursions planned for them, enjoying the flexibility of a short-term commitment and make the most of their summer break.

For more information, visit: http://www.sas.upenn.edu/summer/programs/abroad.

Transcripts

A transcript is a representation of a student’s academic record while at the University of Pennsylvania.

Offical transcripts are ordered through the Office of the University Registrar website (http://www.upenn.edu/registrar/student-services/transcripts.html). Unofficial transcripts are available at anytime, online for students and alumni class of 1988 or later via the Penn in Touch portal (https://weblogin.pennkey.upenn.edu/login?factors=UPENN.EDU,UPENN.EDU-PORTAL&cosign-isc-seo-portal_prodng-0&https://pennintouch.apps.upenn.edu/pennInTouch/jsp/fast2.do).

Wellness

There are a wide variety of resources available to support students at Penn. Some of the most commonly used resources are listed below.

Wellness at Penn (https://www.wellnessatpenn.com)

The Wellness at Penn initiative provides support, resources, and practical tools for wellness across the Penn community. It affirms wellness as a core priority and necessary driver of life on campus; and it offers a wide range of opportunities to reflect and engage on issues of wellness, stress, mental health, resilience, happiness, personal and academic goals, and the meaning of success.

Peer Community Wellness Guide (https://static1.squarespace.com/static/5a430cd518b27d357e661824/t/5a432e0bc830257df7b8df49/1514352139961/NEW-Wellness+Guide-Aug11.pdf)

The Penn Peer Community Wellness Guide (https://static1.squarespace.com/static/5a430cd518b27d357e661824/t/5a432e0bc830257df7b8df49/1514352139961/NEW-Wellness+Guide-Aug11.pdf) was developed by Penn Wellness, the Penn Undergraduate Health Coalition, the Vice Provost for University Life, and the Undergraduate Assembly.

Counseling and Psychological Services (CAPS) (http://www.vpul.upenn.edu/caps)
215-898-7021 (Nights and weekends, ask for CAPS counselor on call.)

Counseling and Psychological Services (CAPS) provides professional psychological and psychiatric services to undergraduate, graduate, and professional students who need support in fulfilling their academic, social, and personal objectives. Along with health and wellness partners throughout the Penn community, CAPS directly supports student mental health through counseling, crisis management, consultation, education and outreach, and training.

Division of Public Safety (https://www.publicsafety.upenn.edu)

A central source for information about police, fire, and emergency services, security services, including walking escorts, and special victim services. Public safety also manages the University’s extensive electronic security infrastructure.

Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds)
(215) 573-9235; TDD: (215) 746-6320

The Office of Student Disabilities Services (SDS), part of the Weingarten Learning Resources Center (http://www.vpul.upenn.edu/lrc), provides comprehensive, professional services and programs for students who self-identify with disabilities to ensure equal academic opportunities and participation in University-sponsored programs. Professional staff evaluate current documentation, determine individual students’ eligibility according to program guidelines, and determine reasonable accommodations for all qualified students with documented disabilities on a case-by-case basis, including academic adjustments, e-text, accessible campus housing, and transportation and parking. SDS also coordinates auxiliary aids and services such as sign language interpreters and Computer Aided Realtime Translation (CART) reporters, as well as the loan of equipment and assistive technologies.
Student Health Service (http://www.vpul.upenn.edu/shs)
215-746-3535

Student Health Service is a state-of-the-art primary care center dedicated to the health and well-being of Penn students. Student Health provides accessible, cost-effective, culturally-sensitive, and student-focused healthcare, including care for acute and chronic health problems, preventive health services, and health and wellness education. The Health Service works in close collaboration with our partners in the University Life Division, and with our colleagues in the University of Pennsylvania Health System (http://www.pennmedicine.org) to help ensure the health and wellness of the campus community.

Student Intervention Services (http://www.vpul.upenn.edu/intervention.php)
215-898-6081

Penn Student Intervention Services (SIS) assists the University community in handling emergencies or critical incidents involving the welfare and safety of students.

Office of the Chaplain (https://chaplain.upenn.edu)
215-898-8456

The staff of the Office of the Chaplain (https://chaplain.upenn.edu/about-us/staff) is available to students, faculty and staff for pastoral support, guidance, or informal advising and counseling. The Chaplain, an ordained clergy person, participates in campus ceremonies such as Convocation, Baccalaureate and Commencement and also officiates at weddings (https://chaplain.upenn.edu/about-us/weddings-blessings) and campus memorial services. The office serves and supports a wide range of student organizations (https://chaplain.upenn.edu/student-organizations), fellowships and religious communities on our campus. They also develop programming designed to improve interfaith understanding and build meaningful, collaborative relationships across religious difference.

Campus Health (http://www.vpul.upenn.edu/shs/campushealth)

Part of Student Health Service, Campus Health (http://www.vpul.upenn.edu/shs/campushealth) seeks to empower the Penn community to Live Well through advocacy, education, and action. Campus Health staff focus on a wide variety of healthy living topics including sleep, hygiene, stress reduction, nutrition, exercise, tobacco-free lifestyles and bike safety. Key initiatives include annual flu immunization clinics, which vaccinate more than 2,000 people, and yearlong sexual wellness education through events such as "Sex Camp" and "Sex Jeopardy."

Alcohol and Other Drug Program Initiatives (http://www.vpul.upenn.edu/alcohol)

The Office of Alcohol and Other Drug Program Initiatives oversees critical areas of health and wellness that can challenge the academic success of Penn students. The office comprises alcohol policy initiatives, violence prevention, data collection, strategic project management, and (in a collaboration with Student Intervention Services (http://www.vpul.upenn.edu/intervention.php)) proactive crisis management.

Policies and Procedures

The following policies and procedures relate to undergraduate academics at Penn, and are organized by topic.

Most academic policies and procedures at Penn are school-based. University policies (p. 1739) are also often administered through the schools. Students should consult with their school or program academic advisors (p. 267) with questions or for help in understanding academic policies and procedures.

- Course and Exam-Related Policies (p. 279)
- Grade and GPA-Related Policies (p. 282)
- Graduation Policies (p. 284)
- Leaves of Absence (p. 284)
- Residency Requirement (p. 285)
- Transfer Policies (p. 285)

Course and Exam-Related Policies

Students should consult with their academic advisors (p. 267) about course and course-related policies and procedures.

- Add/Drop Period (p. 279)
- Auditing (p. 280)
- Class Attendance (p. 280)
- Course Load (p. 280)
- Course Numbering & Academic Credit (p. 280)
- External Exam Credit (p. 281)
- Independent Study (p. 281)
- Liberal and Professional Studies Course Credit (p. 281)
- Part Time Status (p. 281)
- Petitions (p. 281)
- Policy on Common Midterm Examinations (p. 281)
- Retaking Courses (p. 282)
- Rules Governing Final Examinations (p. 282)
- Withdrawing From a Course (p. 282)

Add/Drop Period

Courses may be added only during the first two weeks of each semester; course may be dropped through the fifth week of the semester. Students should consult with their advisors before dropping below a defined number of course units (generally 4), which may have adverse consequences.

Some courses may have different add/drop policies; students should consult with their school’s advising office for further details.

Add/drop deadlines for each semester can be found in the Academic Calendar (p. 264).

School specific policies:

- College of Arts and Sciences (https://wwwcollege.upenn.edu/registration-process)

• School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#drop/add)

• The Wharton School (https://undergrad-inside.wharton.upenn.edu/course-selection)

Auditing

Undergraduate students cannot officially audit courses; however, subject to the approval of the instructor, students may be permitted to sit in on some courses without registering. These courses will not appear on students’ records. Not all departments or schools allow this type of informal audit.

Class Attendance

Policies regarding class attendance vary by school and instructor.

School specific policies:

• College of Arts and Sciences (https://www.college.upenn.edu/attendance)

• School of Engineering and Applied Science (https://www.seas.upenn.edu/undergraduate/handbook/policy/class-attendance.php)

• School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#attendance)

• The Wharton School (https://undergrad-inside.wharton.upenn.edu/attendance)

Course Load

Policies regarding minimum and maximum course loads vary by school.

School specific policies:

• College of Arts and Sciences (https://www.college.upenn.edu/courseload)

• School of Engineering and Applied Science (https://www.seas.upenn.edu/undergraduate/handbook/policy/course-load.php)

• School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#course%20load)

• The Wharton School (https://undergrad-inside.wharton.upenn.edu/course-load)

Course Numbering & Academic Credit

Course Numbering

Courses are designated with a subject code and course number. The number assigned to a course generally denotes its level and may also indicate a course type.

• 1-399 Undergraduate courses

• 400-499 Mixed courses primarily for Undergraduate students

• 500-599 Mixed courses primarily for Graduate students

• 600-989 Graduate courses

• 990-999 Graduate individual study (thesis/dissertation) courses

Academic Credit at Penn

All of Penn’s undergraduate programs and many of its graduate and professional programs use course units (CUs) as a general measure of academic work and progress toward a degree. Penn’s use of CUs conforms to the practices of peer institutions that use a similar system of academic credit including Brown, Duke, Harvard, Princeton, and Yale. A CU is a general measure of academic work over a period of time, typically a term (semester or summer).

The Schools of Law, Dental Medicine, and Veterinary Medicine do not use CUs. The Law School uses credit hours in a way that is consistent with law schools in the United States. The Schools of Dental Medicine and Veterinary Medicine use credit hours in ways that are consistent with professional education in those fields of study.

Definition of a Course Unit

A course unit (CU) is a general measure of academic work over a period of time, typically a term (semester or summer). A CU (or a fraction of a CU) represents different types of academic work across different types of academic programs and is the basic unit of progress toward a degree. One CU is usually converted to a four-semester-hour course. A degree from one of Penn’s undergraduate programs requires the completion of 32 to 40 (or more) course units. Graduate and professional degrees vary in the number of years of study and the number of CUs required.

Assignment of Academic Credit

The course unit (CU) value of a course determined by the faculty reflects their judgment regarding the expected work of a student completing that course. Factors that may be considered when assigning academic credit for a course include scheduled class time, expected time outside of class, the difficulty and range of materials covered, and the mastery of specific knowledge through written reports, exams, and other evaluations.

The assignment of academic credit for a course is formally approved by the curriculum committee (or similar body) of the school when a course is first proposed. It is reviewed formally by the faculty of a program, department, or school through periodic program reviews or curriculum revisions. Additionally, it is reviewed by the faculty of a program, department, or school informally as part of ongoing assessments of curriculum and teaching effectiveness.

Transfer Credit

The course unit (CU) value of a course determined by the faculty reflects their judgment regarding the expected work of a student completing that course. Factors that may be considered when assigning academic credit for a course include scheduled class time, expected time outside of class, the difficulty and range of materials covered, and the mastery of specific knowledge through written reports, exams, and other evaluations.

At the University of Pennsylvania, faculty in individual departments and schools make decisions about awarding credit for external courses (courses taken at a college or university other than Penn). Each school has policies and procedures for evaluating and awarding external credit. Judging both course content and student work, faculty determine whether external courses are equivalent to courses offered through their own departments and thus what credit, if any, to award. In awarding credit at Penn for external courses, faculty also determine how those credits may be used (e.g., whether they satisfy general education requirements or requirements in a major).

Undergraduate schools use a web-based, password protected application called the External Course Approval Tool, or (http://www.college.upenn.edu/xcat) XCAT (http://www.college.upenn.edu/xcat). When academic credit is awarded for courses taken at other
institutions, typically courses worth 3, 4, or 5 semester hours or worth 5 quarter hours are awarded one course unit (CU) at Penn.

**External Exam Credit**

The University of Pennsylvania may award credit or advanced course standing to students who have taken Advanced Placement (AP), International Baccalaureate (IB), or other internationally-recognized examinations. Scores warranting University credit vary by department.

Penn Admissions External Exam Credit Policy (http://www.admissions.upenn.edu/apply/freshman-admission/externalexamcredit) (for prospective students)

**School specific policies:**

- College of Arts and Sciences (https://www.college.upenn.edu/placement)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#AP%20Policies)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/apib-credit)

**Independent Study**

Independent study allows students to pursue academic interests not available in regularly offered courses.

Students should approach their academic or departmental advisor to explore the possibility of pursuing independent study.

Further information about independent study procedures is available by school.

- College of Arts and Sciences (https://www.college.upenn.edu/research)
- School of Nursing (http://www.nursing.upenn.edu/live/files/157-independent-study-form-ipdf)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/independent-study)

**Liberal and Professional Studies Course Credit**

The College of Liberal and Professional Studies (LPS) (http://www.sas.upenn.edu/lps) is a division of the School of Arts and Sciences. LPS administers programs for adult, professional, and part-time students and offers late-afternoon, evening, and Saturday courses at the undergraduate, post-baccalaureate, and graduate levels. Traditional undergraduate students are eligible to take LPS courses. A certain number of spaces may be reserved for LPS students until the first week of classes, and some classes have restricted enrollments for LPS students only. Students should direct questions about enrollment policies and permits for specific LPS classes to LPS (http://www.sas.upenn.edu/lps).

**Part Time Status**

Traditional undergraduate students are generally expected to maintain full-time status. Students should consult with their school advising office for further details.

Please note that dropping to part-time status may affect other considerations, such as visa status, athletic eligibility, financial aid, and/or insurance coverage.

**School specific policies:**

- College of Arts and Sciences (https://www.college.upenn.edu/parttime-policy)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#course%20load)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/part-time-status)

**Petitions**

Students who believe a special circumstance might warrant an exemption from a school policy and/or requirement may submit a petition. Petitions are subject to review by a school-based committee. Students should first consult with their academic advisor.

Policies and procedures regarding petitions vary by school.

**School specific policies:**

- College of Arts and Sciences (https://www.college.upenn.edu/petitions)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#petition)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/petitions)

**Policy on Common Midterm Examinations**

Instructors teaching a course with multiple sections who plan to schedule a common midterm examination outside the class’s regular meeting time must notify students of this event during the first week of the semester and be prepared to offer one or more make-up examinations to accommodate any student who is enrolled in a course that meets at the time of the common examination.

Students enrolled in a course that conflicts with the time of a common midterm examination must notify the instructor administering the common midterm examination of the conflict by the end of the course selection (add) period. Students may not be required to miss their regularly scheduled class.
Rules Governing Final Examinations

1. No instructor may hold a final examination nor require the submission of a take-home final exam except during the period in which final examinations are scheduled. When necessary, exceptions to this policy may be granted for postponed examinations (see 3 and 4 below). No final examinations may be scheduled during the last week of classes or on reading days.

2. No student may be required to take more than two final examinations on any calendar day during the period in which final examinations are scheduled. If more than two are scheduled, the student may postpone the middle exam. If a take-home final exam is due on a day when two final examinations are scheduled, the take-home exam shall be postponed by one day.

3. Examinations that are postponed because of conflicts with other examinations, or because more than two examinations are scheduled in the same day, may be taken at another time during the final examinations period if the faculty member and student can agree on that time. Otherwise, they must be taken during the official period for postponed examinations.

4. Examinations that are postponed because of illness, a death in the family, for religious observance, or some other unusual event may be taken only during the official periods: the first week of the spring and fall semesters. Students must obtain permission from their Dean’s office to take a postponed exam. Instructors in all courses must be willing to offer a make-up examination to all students who are excused from the final examination.

5. No instructor may change the time or date of a final exam without permission from the appropriate Dean.

6. No instructor may increase the time allowed for a final exam beyond the scheduled two hours without permission from the appropriate Dean.

7. No classes or required class activities may be held during the reading period.

8. The first examination of the day begins at 9 a.m. and the last examination concludes by 8 p.m. There will be one hour between exam time blocks.

9. All students must be allowed to see their final examination. Exams should be available as soon as possible after being graded with access ensured for a period of at least one regular semester after the exam has been given. To help protect student privacy, a student should have access only to his or her own exam and not the exams of other students. Therefore, for example, it is not permissible to leave student exams (or grades or papers) in publicly accessible areas.

10. Students may not be asked for their Social Security Numbers. Instructors may not publicly display a student’s Penn ID or any portion of the Social Security Number, nor use names, initials, or any personally identifiable information to post grades. Even when an identifier is masked or absent, grades may not be posted in alphabetical order, to protect student privacy.

11. Final exams for College of Liberal and Professional Studies (LPS) courses must be given on the regular class meeting night during the week of final examinations. No change in scheduling is permitted without unanimous consent of all students in the class and the director of LPS. LPS final exams may not be administered during the last week of class or on a reading day.

In all matters relating to final exams, students with questions should first consult with their Dean’s offices. Faculty wishing to seek exceptions to the rules also should consult with their Dean’s offices. Finally, the Council of Undergraduate Deans and Student Committee on Undergraduate Education (SCUE) urge instructors to see that all examinations are actively proctored.

(Source: Almanac, April 17, 2018, Volume 64, No. 31 (https://almanac.upenn.edu/volume-64-number-31/#of-record-rules-governing-final-examinations1))

Withdrawing From a Course

Students may withdraw from a course through the end of the tenth full week of the semester, with the permission of the instructor, and should consult the Academic Calendar (p. 264) for the official withdrawal deadline for each semester.

Summer courses and part-of-term courses have different deadlines. Consult with an academic advisor for more information.

Withdrawal procedures vary by school:

- College of Arts and Sciences (https://www.college.upenn.edu/withdrawing)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#a)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/retaking-courses)

Grade and GPA-Related Policies

Students should consult with their academic advisors (p. 267) about grading and GPA-related policies and procedures.

- Academic Standing (p. 283)
- Dean’s List (p. 283)
- Grade Grievance Process (p. 283)
- Grades (p. 283)
Academic Standing

The University of Pennsylvania expects students to maintain a minimum level of academic performance or risk being placed on Academic Probation. The requirements for good academic standing vary by school; students enrolled in more than one undergraduate school are subject to the academic standing policies of both schools.

The requirements for good academic standing are:

- College of Arts and Sciences (https://www.college.upenn.edu/academic-standing)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#Academic%20Standing)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/academic-standing)

Dean's List

The Dean's List citation appears on the transcript and is awarded annually to any student who achieves a combined GPA of 3.7 for the fall and spring semesters, provided that during those two semesters, he or she has:

- Completed 6 or more credit units for letter grades
- Received no grades lower than C
- Completed all courses on time with no Incompletes, NRs, or GRs

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Dean's List in the academic year in which the violation occurred. The Dean's List citation will be removed from the transcript if the finding occurs after this honor has been posted or if the violation occurs during the summer term following the academic year in which this honor was awarded.

(Source: Almanac – April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html), updated May 3, 2016, Volume 62, No. 33 (http://www.upenn.edu/almanac/volumes/v62/n33/changes-to-policies.html))

Grade Grievance Process

Students who wish to have a course grade reviewed must first attempt to resolve the issue with the course instructor. For detailed policies and procedures, students should refer to the policies of the school in which the course was taken.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/credits-grades-policy)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/handbook/policy/grades.php)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#grading%20policy)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/grades)

Incomplete Grades

The decision to grant an Incomplete is solely that of the instructor teaching the course. Students should request Incompletes rarely if at all; it is far better to plan ahead and use advising and academic support resources to ensure that coursework is finished on time. There are a number of consequences of requesting an Incomplete, and unfinished coursework may result in an F grade or delay of graduation. Generally, students with one Incomplete must finish the work by the fifth week of the next semester.

Specific procedures and policies regarding incomplete grades vary by school.

School specific policies:
Pass/Fail

Students may be eligible to take certain courses pass/fail. Policies regarding pass/fail options vary by school and course.

School specific policies:
- College of Arts and Sciences (https://www.college.upenn.edu/pass-fail)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#pass/fail)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/pass-fail)

Graduation Policies

Students should consult with their academic advisors (p. 267) about graduation requirements, Latin honors, and the procedures for applying for graduation and participating in graduation ceremonies.

- Graduation Honors (p. 284)
- Graduation Requirements (p. 284)
- Maximum Time to Complete a Degree (p. 284)

Graduation Honors

In recognition of distinguished academic achievement and high standards of academic integrity, the University of Pennsylvania awards Latin honors to undergraduate students based on the cumulative GPA on their transcripts at the time of graduation:

- **Summa Cum Laude**: 3.80 or higher
- **Magna Cum Laude**: 3.60 or higher, but less than 3.80
- **Cum Laude**: 3.40 or higher, but less than 3.60

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Latin honors. Notation of Graduation Honors will be removed from the transcript if the finding occurs after this honor has been posted.

(Source: Almanac, April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html), updated May 3, 2016, Volume 62, No. 33 (http://www.upenn.edu/almanac/volumes/v62/n33/changes-to-policies.html))

Graduation Requirements

Students are responsible for fulfilling all the requirements of their curriculum as determined by their school in order to graduate.

School specific policies:
- College of Arts and Sciences (https://www.college.upenn.edu/graduation-policies)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/handbook/policy/course-requirements.php)
  - Students must complete all courses within their major, as addressed individually by each department.
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/graduation-academic-honors/#graduation%20requirements)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/degree-requirements)

Maximum Time to Complete a Degree

Some schools set a maximum period within which students must complete their degree. Students with questions should contact their school advising office.

School specific policies:
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#completion)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/sunset-policy)

Leaves of Absence

Students take time away from their studies for a wide variety of reasons, including to:

- Work on a political campaign
- Manage a medical concern
- Fulfill a family obligation
- Pursue career-related opportunities
- Complete military service
- Take a break

Students typically take a leave for a full academic year. Individual circumstances may require more or less time; the length of the leave is determined by the school. Students on leave should remain in contact with their advisor and update them about plan changes. The return from leave process supports students in a successful re-entry to academic life at Penn. When preparing to return, students must consult their school advising office to develop a plan that includes connection with appropriate resources.

While interrupting one's studies to take time away may seem intimidating, a leave is a means to the successful completion of a degree, not a barrier to graduating. Students considering a leave should take time to think carefully about their goals for the time away and for when they return. Speaking with an academic advisor is an important first step. Students
should also consult others important to their decision-making process, such as family members or, if the student intends to address health concerns during the time away, their healthcare provider(s). Your school advising office will help you connect with other campus resources as you prepare to take a leave of absence, such as Student Financial Services, Housing, and International Student and Scholar Services.

Procedures for requesting a leave vary by school.

**School specific policies**

- School of Arts and Sciences (https://www.college.upenn.edu/leave-of-absence)
- School of Nursing (https://www.nursing.upenn.edu/live/files/216-leave-of-absence-policy)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/leave)

**Residency Requirement**

Residency requirement policies vary by school.

**School specific policies:**

- School of Arts and Sciences (https://www.college.upenn.edu/residency-requirement)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#residency)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/transfer-residency)

**Transfer Policies**

Students should consult their academic advisors (p. 267) about transferring within Penn or receiving credit for academic experiences at other universities. Students who are intending to transfer to another institution should speak with officials at their new institution.

When students receive credit for courses or other types of academic work done elsewhere, it is referred to as equivalent credit. Some of these credits will be the result of coursework taken before matriculation at Penn, but it is also possible to do a limited number of courses “away” after matriculation.

Credit earned before the student matriculates at Penn is referred to as Transfer Credit (p. 285). Credit earned at another institution while the student is enrolled at Penn (post-matriculation) is referred to as Credit Away (p. 285).

Policies regarding the types and amount of equivalent credit allowed vary by school.

Students who wish to apply for an internal transfer between any of the four undergraduate schools should meet with an advisor in their home school and an advisor from the school they wish to enter. Applicants should be prepared to discuss why the curriculum of the school to which they are applying for transfer is a good fit for their academic interests and goals. Students applying for internal transfer must be in good academic standing in their home school and should have no NR’s, GR’s, or I’s on their record.

External transfers admitted to any of Penn’s undergraduate schools or divisions are not eligible to transfer again within the University.

Specific policies and procedures for transferring internally vary by school.

**School specific policies:**

- College of Arts and Sciences (https://www.college.upenn.edu/transfer-within-university)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/leaves-transfers-and-withdraw)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/transfer-credits)

These policies govern the transfer of credits taken before a student is officially enrolled at the University of Pennsylvania.

Penn Admissions Policy: http://www.admissions.upenn.edu/apply/transfer-admission/transfer-of-credits

**School specific policies:**

- College of Arts and Sciences (https://www.college.upenn.edu/credits-grades-policy)
- School of Nursing (https://www.nursing.upenn.edu/student-services/registration/transfer-credit)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/transfer-credits)

These policies govern credits earned at another institution while enrolled at the University of Pennsylvania.

**School specific policies:**

- College of Arts and Sciences (https://www.college.upenn.edu/credits-grades-policy)
- School of Nursing (https://www.nursing.upenn.edu/student-services/registration/transfer-credit)

GRADUATE CATALOG

This Catalog provides detailed information for current and prospective students about graduate programs at Penn including PhD, research master’s, professional master’s, and other professional degrees. It also provides information about important policies and resources for graduate students and courses at all levels of study.

This Catalog is intended to provide general information about the University of Pennsylvania and is accurate as of May 2019. The University reserves the right to change, modify, or correct any information contained herein without prior notice, at any time.

Feedback? Email catalog@lists.upenn.edu.

Programs

The following list includes PhD, master’s, certificate, and other professional degree programs. Undergraduate programs are listed in the Undergraduate Catalog (p. 17).

A

- Accounting, MBA (p. 506)
- Accounting, PhD (p. 496)
- Actuarial Science, MBA (p. 507)
- Adult Gerontology Acute Care Nurse Practitioner, MSN (p. 449)
- Adult Gerontology Primary Care Nurse Practitioner, MSN (p. 450)
- Adult Oncology Specialist, Certificate (p. 451)
- Adult Oncology Specialist, Minor (p. 452)
- Africana Studies, PhD (p. 358)
- Ancient History, PhD (p. 359)
- Animal Welfare and Behavior, Certificate (p. 476)
- Anthropology: Archaeology, PhD (p. 359)
- Anthropology: Cultural, PhD (p. 360)
- Anthropology: Linguistic, PhD (p. 361)
- Anthropology: Medical, PhD (p. 361)
- Anthropology: Physical, PhD (p. 362)
- Applied Economics, PhD (p. 498)
- Applied Geosciences, MSAG (p. 407)
- Applied Mathematics and Computational Science, MA (p. 362)
- Applied Mathematics and Computational Science, PhD (p. 363)
- Applied Positive Psychology, MAPP (p. 401)
- Architecture, MArch (p. 478)
- Architecture, MS (p. 477)
- Architecture, PhD (p. 477)
- Architecture: Advanced Architectural Design, MSD (p. 479)
- Architecture: Environmental Building Design, MSD (p. 480)
- Architecture: Historic Preservation, MSD (p. 480)
- Art and Archaeology of the Mediterranean World, MA (p. 363)
- Art and Archaeology of the Mediterranean World, PhD (p. 364)

B

- Behavioral and Decision Sciences, MBDS (p. 401)
- Biochemistry and Molecular Biophysics, PhD (p. 334)
- Bioengineering, MSE (p. 430)
- Bioengineering, PhD (p. 425)
- Bioethics, MBE (p. 346)
- Biology, PhD (p. 364)
- Biomedical Informatics, Certificate (p. 348)
- Biomedical Informatics, MBMI (p. 347)
- Biotechnology, MBIOT (p. 430)
- Business Analytics, MBA (p. 508)
- Business Economics & Public Policy, MBA (p. 510)
- Business, Energy, Environment and Sustainability, MBA (p. 511)

C

- Cell and Molecular Biology: Cancer Biology, PhD (p. 335)
- Cell and Molecular Biology: Cell Biology, Physiology, and Metabolism, PhD (p. 336)
- Cell and Molecular Biology: Developmental, Stem Cell, and Regenerative Biology, PhD (p. 337)
- Cell and Molecular Biology: Gene Therapy and Vaccines, PhD (p. 338)
- Cell and Molecular Biology: Genetics and Epigenetics, PhD (p. 339)
- Cell and Molecular Biology: Microbiology, Virology, and Parasitology, PhD (p. 340)
- Chemical & Biomolecular Engineering, MSE (p. 433)
- Chemical and Biomolecular Engineering, PhD (p. 426)
- Chemical Sciences, MCS (p. 402)
- Chemistry, PhD (p. 365)
- City & Regional Planning: Community and Economic Development, MCP (p. 481)
- City & Regional Planning: Land Use & Environmental Planning, MCP (p. 482)
- City & Regional Planning: Public & Private Development, MCP (p. 482)
- City & Regional Planning: Smart Cities, MCP (p. 483)
- City & Regional Planning: Sustainable Transportation & Infrastructure, MCP (p. 484)
- City & Regional Planning: Urban Design, MCP (p. 485)
- City Planning, PhD (p. 478)
- Classical Studies, PhD (p. 366)
- Clinical Epidemiology, MSCE (p. 347)
- Clinical Ethics Mediation, Certificate (p. 348)
- Communication, PhD (p. 290)
- Comparative Literature, PhD (p. 366)
- Computer & Information Science, MSE (p. 433)
- Computer & Information Technology, MCIT (p. 435)
- Computer and Information Science, PhD (p. 427)
- Computer Graphics & Game Technology, MSE (p. 436)
- Counseling and Mental Health Services, MSED (p. 299)
- Criminology, MS (p. 367)
- Criminology, PhD (p. 368)

D

- Data Science, MSE (p. 437)
- Demography, PhD (p. 368)
- Doctor of Dental Medicine, DMD (p. 411)
• Doctor of Medicine, MD (p. 357)
• Doctor of Science in Dentistry, DScD (p. 412)

E
• Earth and Environmental Science, PhD (p. 369)
• East Asian Languages and Civilizations, MA (p. 370)
• East Asian Languages and Civilizations, PhD (p. 370)
• Ecological Architecture, Certificate (p. 486)
• Ecological Planning, Certificate (p. 486)
• Economics, PhD (p. 370)
• Education Entrepreneurship, MEd (p. 302)
• Education Policy, MEd (p. 300)
• Education Policy, PhD (p. 292)
• Education, Culture, and Society, MEd (p. 299)
• Education, Culture, and Society, PhD (p. 293)
• Educational and Organizational Leadership, EdD (p. 301)
• Educational Leadership, EdD (p. 302)
• Educational Linguistics, EdD (p. 303)
• Educational Linguistics, PhD (p. 294)
• Electrical and Systems Engineering, PhD (p. 428)
• Electrical Engineering, MSE (p. 438)
• Embedded Systems, MSE (p. 439)
• Emerging Design and Research, Certificate (p. 487)
• Endodontics, Certificate (p. 415)
• Energy Management & Policy, Certificate (p. 487)
• English, MA (p. 371)
• English, PhD (p. 372)
• Entrepreneurship and Innovation, MBA (p. 512)
• Environmental Building Design, Certificate (p. 488)
• Environmental Studies, MES (p. 408)
• Epidemiology and Biostatistics: Biostatistics, MS (p. 341)
• Epidemiology and Biostatistics: Biostatistics, PhD (p. 342)
• Epidemiology and Biostatistics: Epidemiology, PhD (p. 343)
• Ethics and Legal Studies, PhD (p. 498)
• Executive MBA (p. 529)

F
• Family Nurse Practitioner, MSN (p. 452)
• Finance, MBA (p. 514)
• Finance, PhD (p. 499)
• Fine Arts, MFA (p. 488)

G
• Genetic Counseling, MSGC (p. 349)
• Genomics and Computational Biology, PhD (p. 343)
• Geographical Information Systems & Spatial Analysis, Certificate (p. 489)
• German Languages and Literatures, PhD (p. 372)
• Global Health, Minor (p. 453)
• Government Administration (Exec), MPA (p. 403)
• Government Administration (FT), MPA (p. 404)

H
• Health Care Innovation, Certificate (p. 350)
• Health Care Innovation, MHCI (p. 350)
• Health Care Management & Economics, PhD (p. 500)
• Health Care Management, MBA (p. 515)
• Health Informatics, Minor (p. 453)
• Health Leadership, MSN (p. 453)
• Health Policy Research, MSHP (p. 351)
• Health Policy Research: Health Care Quality & Safety, Certificate (p. 351)
• Higher Education Management, EdD (p. 304)
• Higher Education, EdD (p. 305)
• Higher Education, MEd (p. 306)
• Higher Education, PhD (p. 295)
• Historic Preservation, Certificate (p. 489)
• Historic Preservation, MSHP (p. 489)
• History and Sociology of Science, PhD (p. 373)
• History of Art, MA (p. 374)
• History of Art, PhD (p. 374)
• History, MA (p. 374)
• History, PhD (p. 375)

I
• Immunology, PhD (p. 344)
• Independent School Teaching Residency, MEd (p. 307)
• Individualized Major, MBA (p. 528)
• Individualized, MPhil (p. 407)
• Insurance and Risk Management, MBA (p. 516)
• Integrated Nursing Care of Autism Spectrum Disorder, Certificate (p. 454)
• Integrated Nursing Care of Autism Spectrum Disorder, Minor (p. 454)
• Integrated Product Design, Certificate (p. 490)
• Integrated Product Design, MIPD (p. 440)
• Integrated Product Design, MSE (p. 441)
• Intercultural Communication, MEd (p. 307)
• Interdisciplinary Studies in Human Development, MEd (p. 308)
• Interdisciplinary Studies in Human Development, PhD (p. 296)
• International Educational Development, MEd (p. 309)
• International, MPA (p. 404)

L
• Land Preservation, Certificate (p. 490)
• Landscape Architecture & Regional Planning, MLA (p. 491)
• Landscape Studies, Certificate (p. 492)
• Law, JD (p. 331)
• Law, LLCM (p. 329)
• Law, LLM (p. 329)
• Law, ML (p. 329)
• Law, SJD (p. 330)
• Learning Sciences & Technologies, MEd (p. 310)
• Liberal Arts Individualized, MLA (p. 400)

• Women’s Health/Gender Related Nurse Practitioner, MSN (p. 465)

Annenberg School for Communication

Home to 22 full-time faculty members (https://www.asc.upenn.edu/people/faculty?faculty-type=28&field_research_area_target_id=All&name=), more than 80 doctoral students (https://www.asc.upenn.edu/people/students/graduate-students), more than 20 postdoctoral fellows (https://www.asc.upenn.edu/people/faculty?faculty-type=104), 70 research and support staff (https://www.asc.upenn.edu/people/staff), and 16 research centers (https://www.asc.upenn.edu/research/research-centers) and programs, the Annenberg School is the nation’s premiere doctoral program in Communication.

As the smallest of 12 schools at Penn, it is a close-knit and supportive environment for innovative scholarship. The school hosts a variety of academic events (https://www.asc.upenn.edu/news-events/events) every year, including the Elihu Katz Colloquium Series; the Annenberg and Gerbner Lectures, and numerous other lectures, master classes, workshops, conferences, and symposia.

In addition to bringing some of the world’s top scholars to Annenberg as visiting scholars and guest lecturers, the school provides generous funding to encourage our graduate students to present their research at national and international communication conferences (https://www.asc.upenn.edu/news-events/news/highlights-and-awards-66th-international-communication-association-annual) and travel globally for their dissertation research (https://www.asc.upenn.edu/news-events/news/student-profile-eleanor-marchant), making the school a stepping off point to the world of global scholarship.

For more information, visit https://www.asc.upenn.edu/.

In 1958, publisher, diplomat, and philanthropist Walter Annenberg founded the Annenberg School for Communication at the University of Pennsylvania with these words:

“Every human advancement or reversal can be understood through communication. The right to free communication carries with it responsibility to respect the dignity of others – and this must be recognized as irreversible. Educating students to effectively communicate this message and to be of service to all people is the enduring mission of this school.”

Over the ensuing years the Annenberg School has remained true to the mission articulated by Ambassador Annenberg, while responding to changes in both the nature of communication as a social process and in Communication as a discipline and an interdisciplinary field of study. Today, we advance our mission through four central goals:

• Producing and disseminating cutting-edge scholarly research designed to advance our theoretical and empirical understanding of the role of communication in public and private life.
• Producing and disseminating high-quality applied research designed to advance the public’s understanding and effective use of communication, and policy-makers’ ability to create a media environment that fosters the personal and collective development of its citizens.
• Educating Ph.D. graduate students in the theories, substance, and methods of communication research and placing them in leading academic and professional positions in the field.
• Providing a first-class liberal arts education to undergraduates, designed to help them become better consumers and producers of public information, strengthen their understanding of the role of communication in their personal, professional and civic lives, and prepare them for private and public-sector leadership positions in communication-related and other fields.

The Annenberg School stands at the forefront of basic and applied empirical research on the institutions, processes, nature, and consequences of communication. This research is based on theories, methods, and knowledge emerging from our own discipline as well as those adapted from cognate disciplines in the humanities, social sciences and sciences. Many Annenberg faculty members are jointly appointed or hold secondary faculty positions in other schools and departments at Penn. Annenberg faculty and students regularly collaborate with each other and with faculty, researchers, and students from Penn’s other distinguished schools and centers.

The result of this inter- and intra-disciplinary research network is a faculty and student body with the theoretical, methodological and substantive breadth, depth, and agility to produce cutting-edge research on the most pressing communication-centered issues of the twenty-first century.

We invite you to learn more about Annenberg’s core research areas, our research centers, labs and working groups, and our grant-related research projects.

Research Areas (https://www.asc.upenn.edu/research/research-areas)
Annenberg faculty, students, and staff have particular expertise in several intersecting and evolving research areas.

For more information: https://www.asc.upenn.edu/research/research-areas

Research Centers (https://www.asc.upenn.edu/research/research-centers)
Collaborative research is common at the Annenberg School, often taking place through our established centers and labs, as well as through a variety of more informal research working groups.

For more information: https://www.asc.upenn.edu/research/research-centers

Programs

PhD and Research Master’s Programs
• Communication, PhD (p. 290)

Communication, PhD
Annenberg is interdisciplinary by design. Members of the faculty and students come from a wide range of backgrounds, including Communication, Psychology, Political Science, Sociology, Anthropology, History, and Law. Students are also encouraged to supplement their Communication courses with those offered through one of Penn’s 11 other distinguished schools. The result is a vibrant intellectual experience that trains students to apply and adapt diverse theories and methods to the cutting-edge communication issues of the twenty-first century.

All doctoral students are fully funded for up to five years, including tuition and fees, health care, teaching and research fellowships, and dissertation research fellowships. All students also receive yearly research and travel funds, allowing them to develop their research and present it at major national and international conferences. In addition to formal classes, students are able to work with faculty on grant- and center-supported projects, attend and participate in frequent colloquia and workshops, and engage in research and learning opportunities around the globe — all designed to enhance their intellectual growth and professional training.

Annenberg alumni go on to productive and fulfilling careers in academia as well as in research-oriented private and public-sector institutions.

The Annenberg Ph.D. program represents a five-year commitment. In addition to satisfactory completion of the core courses, all students are required to take a noncredit proseminar as well as introductory classes in research methods and statistics. In order to progress to dissertation stage, candidates must complete the following milestones, Qualifications Evaluation, Comprehensive Exams, & Dissertation Proposal and Oral Defense.

1 All Ph.D. students must take at least one separate class with each of at least five different members of the ASC standing faculty. The intent of this is to foster students’ knowledge of a diverse range of approaches to communication.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Sample Plan of Study**

A typical course plan for a student entering the program without a Master’s degree includes these components:

- Seven semesters of courses, typically three courses per semester
- Three required classes:
  - COMM 500 Proseminar
  - COMM 522 Introduction to Communication Research
  - Approved statistics course
- A Qualifications Evaluation (see below) at the end of semester 4
- A dissertation proposal defense in semester 8
- Dissertation research in semesters 8 through 10
- Dissertation defense and graduation at the end of semester 10

**Program Milestones**

- **Qualifications Evaluation (QE)** is a review conducted to ensure doctoral students have the requisite skills, creativity, initiative, and plans to successfully complete their degree, including their dissertation. The QE must be completed at the end of the semester during which the student accumulates 12 classes (at least eight of which must be acquired at Penn) toward the degree, but no earlier than the end of the first year.
- **Comprehensive Exams**: In order to advance to candidacy, become eligible to defend the dissertation proposal and to receive a dissertation research fellowship (DRF), students must successfully pass a comprehensive examination. These exam cover theory, methods and research in the student’s field of expertise.
- **Dissertation Proposal and Oral Defense**: Before becoming eligible for a dissertation research fellowship and beginning work on the dissertation, the student must submit and defend a proposal for dissertation research to his or her Dissertation Committee. The proposal is a full statement of the research problem, including its theoretical rationale and methodology.

**Graduate School of Education**

**Overview**

The University of Pennsylvania Graduate School of Education is one of the nation’s premier education schools. At Penn GSE, students and faculty enjoy an Ivy League environment that supports both practical knowledge building and high-quality research. Our alumni are recognized as some of the world's most influential education leaders, and our distinguished professors are pioneers in their fields.

A world-class school of education in a dynamic Ivy League setting, Penn GSE is a national leader in education research and preparing talented educators. With 40 tenured and tenure-track faculty and just under 1,300 students, Penn GSE is a small school with remarkable scholarly productivity and influence.

Penn GSE offers a vibrant array of high-quality degree programs in education research and practice. Renowned for our expertise in urban education, policy research, quantitative methods, practitioner inquiry, developmental psychology, and qualitative analysis, Penn GSE provides rigorous academic training and professional mentoring to help our students become effective leaders. Graduates of our innovative and interdisciplinary programs are shaping the future of education.

**By the Numbers**

- Ranked #2 graduate school of education in the 2020 U.S. News & World Report
- 950+ Masters students
- 390+ Doctoral students
- 24% International students
- 43% Domestic students of color
- 40 Standing faculty

For more information: https://www.gse.upenn.edu/

**Research**

Penn GSE emphasizes the interplay of theory, research, and practice in everything we do, believing that education research produces knowledge to inform practice, but also that research must be informed by the issues, needs, and concerns of practitioners. We are recognized for our strengths in research on urban education, policy, teaching and learning, the cultural contexts of education, language education, qualitative analysis, practitioner inquiry, developmental psychology, and quantitative and multimethod inquiry.

For more information: https://www.gse.upenn.edu/faculty_research

**Diversity**

Penn GSE has long been committed to preparing its students to live, work, and become leaders in a world marked by sweeping demographic change and interconnectedness. Our students, faculty, and staff come from diverse backgrounds, and the diversity of the school is intentionally fostered by Penn GSE’s policies and practices.

Over the last few years, we have deeply engaged in ongoing learning and dialogue about difference, as well as our shared interest in using education to create opportunity. We work extensively to foster understanding and a climate of inclusion and respect.

Penn GSE is proud of its diverse student population. On average, domestic students of color represent 43% of our student body. Penn GSE continues to enact a number of successful efforts to create a broader pipeline of students.

For more information: https://www.gse.upenn.edu/

**Faculty**

Penn GSE's world-class faculty and researchers—the intellectual heart of our School— have a major impact on education research and practice across the globe. This influential faculty answer vital questions and solve pressing problems in local, national, and global education. From literacy to college access to the Common Core, our researchers are leading the conversation about critical issues in education.

Our professors possess particular strengths in teaching and learning, the cultural contexts of education, language education, qualitative research methods, and practitioner inquiry. In recent years, these strengths have deepened to include national leadership in policy research, urban education, developmental psychology, and quantitative and multimethod inquiry.
For more information: https://www.gse.upenn.edu/faculty_research

Outreach

PHILADELPHIA: Philadelphia is a national testing ground for many of the issues facing American education: school reform, charters, school funding, deep poverty, and a diverse and diversifying student body. In the words of Dean Pam Grossman, “We partner with schools in small and large ways to work towards social justice – always endeavoring to leverage the expertise of the larger research university in service of a better education for all.”

Penn GSE’s students, alumni, faculty, and staff are making an impact in schools, informal learning environments, and community organizations in every neighborhood of the city. The school’s deepest school partnerships include the award-winning Sadie Tanner Mossell Alexander–University of Pennsylvania Partnership School (“Penn Alexander”) and the Lea School, both in West Philadelphia. Other initiatives and programs include bilingual language initiatives, projects with specific learning networks, collaborations with the central District administration, mental health counseling, and studying the effects of immigration upon community cohesion in South Philadelphia.

Our commitment to active, on-the-ground engagement in Philadelphia is a reflection of the University-wide values expressed in the Penn Compact. Penn GSE is not just located in Philadelphia—it is of Philadelphia. It is crucial to our mission that Penn GSE faculty and students engage in all levels of education, both formal and informal, in traditional and alternative settings, to better learn how we can solve the challenges of urban education and contribute to the growth and wellbeing of our citizens.

For more information: https://www.gse.upenn.edu/

INTERNATIONAL: The University of Pennsylvania nurtures global networks and encourages innovative, cross-disciplinary research to better understand and resolve global issues. As part of this campus-wide initiative, Penn GSE students research, study, teach, and work across the globe, and over 70% of our faculty members are involved in international initiatives. From high-quality international degree programs to a stellar international student body, Penn GSE is committed to global education.

• School Leadership, Certificate (p. 315)

Education Policy, PhD

Students in the Education Policy Ph.D. program pursue an individualized program of study that reflects their specific interests in education policy at the local, state, national, or international levels.

The Education Policy Ph.D. program equips graduates with the knowledge and methodological tools to use, understand, and conduct research on the pressing educational issues of the day. Students pursue an individualized program of study that reflects their specific interests, and are required to write a significant qualifying paper and complete a dissertation on an issue in education. At the heart of the Ph.D. program is the research apprenticeship, where students work on research projects alongside faculty members. Doctoral students are matched with Education Policy faculty members whose research interests align with their own. Our program prepares students for a variety of careers,
including faculty positions at institutions of higher education, and policy research positions at research firms, nonprofit organizations, and government agencies.

1 Elective courses may be taken at any school at Penn. Courses must be at the 500 level or above and taken for a letter grade.

**Required Milestones**

**Qualifications Evaluation (Also known as Program Candidacy)**

A Qualifications Evaluation of each student is conducted after the completion of 6 but not more than 8 course units. The evaluation is designed by the specialization faculty and may be based on an examination or on a review of a student's overall academic progress.

**Preliminary Examination (Also known as Doctoral Candidacy)**

A Candidacy Examination on the major subject area is required. The candidacy examination is a test of knowledge in the student's area of specialization, requiring students to demonstrate knowledge and reasoning in the key content areas in their specialization as defined by their academic division. This examination is normally held after the candidate has completed all required courses.

**Oral Proposal**

All doctoral candidates must present their dissertation proposals orally and in person to the dissertation committee.

**Final Defense of the Dissertation**

The final dissertation defense is approximately two hours in length and is based upon the candidate's dissertation.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Education, Culture, and Society, PhD**

Rooted in the social sciences and humanities, the doctoral program in Education, Culture, and Society focuses on the historical, political, philosophical and sociocultural foundations of education.

The Education, Culture, and Society Ph.D. program provides a rigorous theoretical and methodological framework for the study of education, focusing on social, cultural, political, and normative dimensions. Following a rich academic curriculum centered in social theory and qualitative research methods, the program invites students to interrogate and contribute to scholarship on the social and cultural contexts of learning, both inside and outside of schools. Most students supplement their educational studies with significant coursework in other disciplines of their choosing, including anthropology, sociology, history, urban studies, philosophy, and linguistics. Students may be eligible to pursue a joint Ph.D. degree with other departments such as: anthropology, sociology, Africana studies, or history.

For more information: http://www.gse.upenn.edu/ecs/phd

View the University's Academic Requirements for PhD Degrees (p. 1745).

**Required Courses**

The total course units required for graduation is 16, in addition to whatever advisor and student agree for individualized program of study; doctoral exams; and an acceptable dissertation. A minimum of 12 courses must be taken at Penn, of which 10 must be taken in the Graduate School of Education; a maximum of 6 courses can be transferred from another institution. Students should confer with their faculty advisor in choosing the most appropriate course for an area of specialization. All courses counted toward the degree must be level 500 or higher.

The Educational Linguistics program is rooted in the view that language must be examined within the cultural contexts and social situations in which it occurs. Faculty and students are involved in generating research on language and learning in areas such as:

- Bilingualism, biliteracy, and bilingual education
- Multilingual language planning and policy
- Linguistic, cognitive, and sociocultural aspects of (language) learning, and (second) language acquisition/socialization
- Educational and social consequences of ethnic and linguistic diversity
- Local/global perspectives on English language teaching policy and practice in K-12 and higher education
- Multimodal discourse in social and institutional settings
- Language revitalization

For more information: http://www.gse.upenn.edu/elx/phd

View the University’s Academic Requirements for PhD Degrees (p. 1745).

The total course units required for graduation is 20. If approved by your advisor, 8 CUs may be transferred into the program; normally these will be electives. Core courses may not be transferred in. The requirements include 5 core courses, 3 research courses, 3 linguistics courses, and your choice of elective courses agreed upon with your advisor.

### Required Milestones

#### Qualifications Evaluation (Also known as Program Candidacy)

A Qualifications Evaluation of each student is conducted after the completion of 6 but not more than 8 course units. The evaluation is designed by the specialization faculty and may be based on an examination or on a review of a student’s overall academic progress.

#### Preliminary Examination (Also known as Doctoral Candidacy)

A Candidacy Examination on the major subject area is required. The candidacy examination is a test of knowledge in the student’s area of specialization, requiring students to demonstrate knowledge and reasoning in the key content areas in their specialization as defined by their academic division. This examination is normally held after the candidate has completed all required courses.

#### Oral Proposal

All doctoral candidates must present their dissertation proposals orally and in person to the dissertation committee.

#### Final Defense of the Dissertation

The final dissertation defense is approximately two hours in length and is based upon the candidate’s dissertation.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

## Educational Linguistics, PhD

The Educational Linguistics Ph.D. program is rooted in the view that language must be examined within the cultural contexts and social situations in which it occurs. Faculty and students are involved in generating research on language and learning in areas such as:

- Bilingualism, biliteracy, and bilingual education
- Multilingual language planning and policy
- Linguistic, cognitive, and sociocultural aspects of (language) learning, and (second) language acquisition/socialization
- Educational and social consequences of ethnic and linguistic diversity
- Local/global perspectives on English language teaching policy and practice in K-12 and higher education
- Multimodal discourse in social and institutional settings
- Language revitalization

### Electives

Consult with your advisor to select elective courses appropriate to your professional goals and interests. Electives may be from Education, Culture, and Society (ECS), GSE programs, or from graduate programs across the university.

### Core Requirements

<table>
<thead>
<tr>
<th>Code</th>

Select one of the following 900-Level Doctoral Seminars:

- EDUC 911 Issues in Second Language Acquisition
- or EDUC 927 Research Seminar: Language Policy and Education

### Research Methods

Select one Qualitative Methods course

Select one Advanced Quantitative OR Qualitative Methods course

### Linguistics

Select one course from the Linguistics Dept in one of the following core areas: Phonetics, Phonology Morphology, Syntax, Semantics, Pragmatics

Select two additional courses, which may be from the Linguistics Dept., Anthropology Dept., or other relevant linguistics course

### Electives

A Qualifications Evaluation of each student is conducted after the completion of 6 but not more than 8 course units. The evaluation is designed by the specialization faculty and may be based on an examination or on a review of a student’s overall academic progress.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Higher Education, PhD

The Ph.D. in Higher Education (HE) is a highly individualized program that prepares students for an academic career in the field of higher education.

Through coursework, research assistantships, and working closely with their academic advisors, students in the Ph.D. in Higher Education program develop the skills they need to conduct primary research in higher education. These skills include understanding research design and the analysis of both qualitative and quantitative data. This program is highly individualized and students work closely with their academic advisor to draw from courses from the division and from other areas on campus that relate to their area of inquiry. Ph.D. students develop a planned program of study in consultation with their academic advisor.

For more information: http://www.gse.upenn.edu/hed/phd

View the University’s Academic Requirements for PhD Degrees (p. 1745).

The PhD program in Higher Education is highly individualized. The program requires students to complete 2 methods courses and a cognate in another academic discipline as described below. PhD students develop a planned program of study in consultation with their academic advisor.

Total number of courses is determined by the student’s advisor.

1 The Quantitative Methods and Methods requirements are defined by the advisor. The courses that are used to fulfill these requirements will NOT be allowed to double count to meet other doctoral course requirements.

Transfer credit

GSE will, under certain conditions, accept equivalent credit toward the degree. Up to 8 graduate level CUs taken at GSE, Penn, or another institution, may count toward the PhD degree.

Transfer credit is not automatically accepted or applied toward the doctoral degree. Students should consult their academic advisor and the GSE website for the policies governing the application for transfer credit in their first semester of coursework at GSE. Students who are not awarded a full 8 CUs of transfer credit should consult their academic advisor for the appropriate elective coursework to fulfill the coursework required for the PhD degree program. Please consult the GSE website for the proper forms and and procedures.

Methods Course

All HE doctoral students are required to take 2 methods courses either within GSE or another school at Penn. One of these courses must be a statistics course. Students should consult their academic advisor regarding the appropriate methods courses for their program of study. Methods courses filled at GSE outside of the HE Division will also fulfill GSE’s distribution requirement.

Electives courses

Electives may be taken at any school at Penn, although the majority of HE students fulfill their electives within the division. Courses must be at the 500 level or above and students must consult their academic advisor before enrolling in any course outside of GSE. Students without a master’s degree in HE may be required to fulfill some of their electives with required coursework from the HE MSEd program.

Cognate

All HE PhD students are required to fill a cognate in another discipline at the University. Students should consult their academic advisor regarding their cognate interests and the appropriate courses for their program of study.

Students may not register for more than 4 independent studies over the course of their program. Information regarding program candidacy, doctoral preliminary examination, forming a dissertation committee, holding an oral proposal hearing and scheduling a final defense can be found on the GSE website (http://www.gse.upenn.edu/phd).
Required Milestones

Qualifications Evaluation (Also known as Program Candidacy)
A Qualifications Evaluation of each student is conducted after the completion of 6 but not more than 8 course units. The evaluation is designed by the specialization faculty and may be based on an examination or on a review of a student's overall academic progress.

Preliminary Examination (Also known as Doctoral Candidacy)
A Candidacy Examination on the major subject area is required. The candidacy examination is a test of knowledge in the student's area of specialization, requiring students to demonstrate knowledge and reasoning in the key content areas in their specialization as defined by their academic division. This examination is normally held after the candidate has completed all required courses.

Oral Proposal
All doctoral candidates must present their dissertation proposals orally and in person to the dissertation committee.

Final Defense of the Dissertation
The final dissertation defense is approximately two hours in length and is based upon the candidate's dissertation.

Interdisciplinary Studies in Human Development, PhD
The doctoral program in Interdisciplinary Studies in Human Development, (ISHD) provides a strong interdisciplinary foundation in developmental theory and research, and prepares students for faculty positions and research careers.

The ISHD Ph.D. program combines the study of social, emotional, and cognitive aspects of human development considered within cultural contexts and relevant to social policies. Penn GSE's commitment to urban education as well as its West Philadelphia setting offers students the opportunity to create a specialized program of study that leads to an enriched understanding of the diverse perspectives of human development across the lifespan. Students create an individualized program of study in close consultation with an academic advisor. Students are encouraged to take an interdisciplinary approach to human development and may take courses in other schools and departments at Penn.

Quantitative Methods, PhD
The Ph.D. program in Quantitative Methods is designed to prepare students for faculty positions at universities and important responsibilities at research and assessment organizations. Graduates will be prepared to design first rate empirical research and data analyses and to contribute to development of new research methodologies.

Doctoral degree studies include advanced graduate coursework, a research apprenticeship, a Ph.D. Candidacy Examination, and the completion of a doctoral dissertation that represents an independent
and significant contribution to knowledge. The research apprenticeship provides students with an opportunity to collaborate with a faculty sponsor on an ongoing basis and to participate in field research leading to a dissertation.

Students who apply directly to the doctoral-level study program following a baccalaureate degree will enroll in the core courses described for M.S.Ed. degree in SMART and the more advanced courses for the Ph.D. degree. This will include the development of independent empirical research projects.

For more information: http://www.gse.upenn.edu/qm/phd

View the University's Academic Requirements for PhD Degrees (p. 1745).

The Ph.D. degree program in Quantitative Methods requires a minimum of 20 course units or relevant courses and advanced degree accomplishments. A maximum of eight (8) credits from other institutions may be taken into account in reducing this basic requirement where appropriate.

**Required Milestones**

**Qualifications Evaluation (Also known as Program Candidacy)**

A Qualifications Evaluation of each student is conducted after the completion of 6 but not more than 8 course units. The evaluation is designed by the specialization faculty and may be based on an examination or on a review of a student’s overall academic progress.

**Preliminary Examination (Also known as Doctoral Candidacy)**

A Candidacy Examination on the major subject area is required. The candidacy examination is a test of knowledge in the student’s area of specialization, requiring students to demonstrate knowledge and reasoning in the key content areas in their specialization as defined by their academic division. This examination is normally held after the candidate has completed all required courses.

**Oral Proposal**

All doctoral candidates must present their dissertation proposals orally and in person to the dissertation committee.

**Final Defense of the Dissertation**

The final dissertation defense is approximately two hours in length and is based upon the candidate’s dissertation.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Reading/Writing/Literacy, PhD**

The Ph.D. in Reading/Writing/Literacy program prepares scholar-practitioners for positions in research universities and other educational organizations with a primary mission related to furthering knowledge in literacy and literacy education.

Students focus on developing their understanding and expertise in particular aspects of the field (e.g., teacher education, pedagogy and curriculum, leadership, policy, urban education, multicultural education, adult and community based literacy in and out of school, literacy in international contexts, etc.) and in learning to conduct research on critical issues and problems in literacy. Students are encouraged to develop one or more areas of concentration. Students choose electives from across the divisions in GSE and from other departments in the university.

For more information: http://www.gse.upenn.edu/rwl/rwl/phd

View the University's Academic Requirements for PhD Degrees (p. 1745).

The total course units for graduation is 20. The requirements include 7 core courses, 3 additional research courses, 1 distribution course, and the remainder your choice of elective courses.

Teaching, Learning, and Teacher Education, PhD

The Ph.D. and Ed.D. programs in Teaching, Learning, and Teacher Education prepare graduates to serve as researchers and teacher educators in universities and colleges, curriculum developers and evaluators in educational agencies, curriculum specialists in school districts and state departments of education, and instructional leaders and classroom teachers in K-12 schools.

Coursework and research experiences address a range of practice-based and theoretical problems in schools and community settings from sociopolitical, cultural, philosophical, psychological, and historical perspectives. Taking an interdisciplinary stance, faculty and students explore issues of equity, social justice and educational change in a range of formal and informal educational settings. Through their programs of study, students select focal areas such as teaching and learning, research and practice in teacher education, mathematics or science education, and the study of urban education and urban contexts. Applicants interested in the focal area of literacy are encouraged to consider the doctoral program in Reading/Writing/Literacy.

For more information: http://www.gse.upenn.edu/tll/tlte/phd

View the University’s Academic Requirements for PhD Degrees (p. 1745).

The program requires a minimum of 12 course units beyond the master’s degree.

Counseling and Mental Health Services, MSEd
The M.S.Ed. in Counseling and Mental Health Services (Year 1) is designed to introduce students to advanced training in psychology, mental health counseling, and school counseling. The program’s innovative format combines coursework with practical field experience in preparation for future roles as mental health professionals who provide counseling services for children, adolescents, college students, families, and adults in a variety of settings. Many graduates of CMHS continue on to the M.Phil.Ed. in Professional Counseling (Year 2) at Penn GSE in order to qualify for licensure as a professional counselor or to pursue certification in school counseling.

For more information: https://www.gse.upenn.edu/aphd/cmhs/msed

Curriculum

Required Milestones
Comprehensive Examination (or Portfolio or Thesis)
Master’s degree candidates must demonstrate thorough knowledge of the field of specialization by passing a comprehensive examination in their area of study. The examination/portfolio/thesis serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork. Comprehensive formats vary.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Education, Culture, and Society, MSEd
Under the supervision and mentorship of a faculty advisor, master’s students in the Education, Culture, and Society program undertake individualized and interdisciplinary programs of study in the social foundations of education. The program therefore provides students with a nuanced understanding of education as an historical, socio-cultural, political, and moral activity. ECS students explore the role education plays in reproducing and potentially transforming racialized, classed, and gendered relations and structures of inequality – in the U.S. or around the world. Working in small cohorts, students explore and build a unique vision for the program through collaborative dialogue, intensive writing, and critical inquiry.

Students may be eligible to pursue a dual-degree with public policy, non-profit leadership, or social work. Interested students who do not wish to pursue a second degree of study, may also consider the concentration in Community Action and Social Change. Although many ECS students are preparing for a path to doctoral study or academia, many others find the program helpful for establishing careers in schools, administration, educational non-profits, higher education, community advocacy work and/or educational consultancy.

For more information: https://www.gse.upenn.edu/ecs/msed

Master’s Research Paper
ECS students are required to write a Master’s Paper on a core content area in Education, Culture, and Society. The Master’s Research Seminar in Education, Culture, and Society (EDUC668) is a year-long, writing-intensive seminar that prepares students to cultivate a narrow area of educational expertise through the preparation of the capstone: an
academic paper that demonstrates mastery through a close examination and original synthesis of previous research and argumentation. The course’s instructional team and the students’ faculty advisors coordinate in support of building a robust paper. The Master’s Paper is reviewed and approved by Program Faculty.

1 Methods courses prepare students in both the practical and theoretical implications of collecting, interpreting, analyzing and presenting data on the human condition broadly (and education/learning in particular).

2 Students with interest in qualitative traditions tend to enroll in EDUC 682 Qualitative Modes of Inquiry (offered Fall, Spring and Summer) while those interested in quantitative traditions enroll in EDUC 667 Introductory Statistics for Educational Research (offered Fall, Spring and Summer). Students are encouraged to discuss other options with their faculty advisors.

3 Electives must be graduate level and taken for a letter grade. Students should determine elective courses in conference with their faculty advisors to ensure they align with the Planned Program of Study. With faculty advisor approval, electives may potentially be taken in Education, Culture, and Society (ECS), other GSE programs, or from graduate programs across the university.

4 Students seeking the Community Action and Social Change Concentration must dedicate three CUs as described as follows: the student will complete 2 Community Concentration Electives; 1 Academically Based Community Service (ABCS) course; and an aligning topic for the master’s paper, and has thus meet all requirements of the Community Action and Social Change Concentration. A list of suggested electives is available in the program. ABCS courses are offered through the Netter Center and must be 500 level or higher.

5 Candidates for the M.S.Ed. degree must demonstrate knowledge of the field of education beyond the area of specialization. Students must complete one approved graduate level (500 and above) GSE course outside the student’s area of specialization, earning a grade of “B” or better. In ECS, the requirement must meet the additional following criteria/conditions: (1) it must not be a core course as required in this Planned Program of Study; and (2) it must not be taught by a faculty member whose core appointment is in ECS.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Education Policy, MSEd**

The M.S.Ed. in Education Policy equips students with the knowledge and methodological tools to understand, evaluate, and implement programs and policies that impact students and communities across the country and around the world. Our graduates go on to take leading roles in such organizations as school districts, federal and state departments of education, education policy research institutes, and education-related non-profit organizations.

For more information: https://www.gse.upenn.edu/ep/msed

**Curriculum**

M.S.Ed. students in Education Policy must complete 10 course units, in accordance with the curriculum outlined below, including the Education Policy Research Practicum (which fulfills the Comprehensive Examination requirement) and the Distribution Requirement. All degree candidates must maintain a minimum cumulative GPA of 3.0.

Master’s degree candidates must demonstrate thorough knowledge of the field of specialization by completing the Education Policy Research Practicum. The Practicum serves an educational and evaluative purpose through which students are expected to review, integrate, and apply what they have learned over the course of their degree.

Required Milestones:

Comprehensive Examination (or Portfolio or Thesis)

Master's degree candidates must demonstrate thorough knowledge of the field of specialization by passing a comprehensive examination in their area of study. The examination/portfolio/thesis serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork. Comprehensive formats vary.

1. Fulfills MSEd Comprehensive examination

Candidates for the M.S.Ed. degree must demonstrate knowledge of the field of education beyond the area of specialization. This requirement is met by satisfying the distribution requirement. To meet the distribution requirement, students must complete one approved graduate level (500 and above) GSE course outside the student's area of specialization, earning a grade of "B" or better. Students should check with their program manager for a list of courses approved to fulfill the distribution requirement.

2. Elective courses may be taken at any school at Penn. Any of courses listed in #1, #3 and #4 can qualify as elective courses as long as they are not fulfilling other degree requirements. Courses must be at the 500 level or above and taken for a letter grade (no pass/fail). Students must consult their academic advisor before enrolling in any course outside of the GSE.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Educational and Organizational Leadership, EdD

The Mid-Career Doctorate in Educational Leadership (Mid-Career) prepares school leaders to be strategic decision makers at their institutions and guiding voices in education policy and practice. The Mid-Career program curriculum fosters a deep understanding of educational organizations, instruction, and learning as it intersects with the rapidly changing demands of education leadership. A typical student brings 10 to 15 years of experience to the seminar table, drawn from experiences in public, private, and parochial schools. This mix is vital to the cohort and is the backbone of the curriculum. Taking an inquiry-based leadership perspective toward the ongoing transformation of public and private education, students become experts in:

- Instructional Leadership
- Organizational Leadership
- Public Leadership
- Evidence-based Leadership

Support for students does not stop at graduation. The program is deeply committed to continuing to help alumni promote their ideas in the world, connect them with others who can solve practical problems, and advance their careers.

For more information: https://www.gse.upenn.edu/exec-ed/midcareer

## Education Entrepreneurship, MSEd

Students in the M.S.Ed. in Education Entrepreneurship program acquire a strong grounding in three domains: Foundations of Education, Business Essentials, and Entrepreneurial Management of Knowledge. The nation’s first Master’s degree in Education Entrepreneurship is designed at the intersection of education, business, and entrepreneurship. The accelerated program is delivered through onsite weekend programs and blended distance education to accommodate working adults. The program provides working professionals with the knowledge, practical skills, and experiences necessary to chart new solutions in education. The 13-month capstone experience teaches students to identify a new opportunity, either for an existing entity or for the creation of a new venture, and design their own education program, service, or product. Graduates of this unique program leave with the tools necessary to create new schools and initiatives, launch education startups, fund and manage technology ventures, scale leading-edge programs, and drive innovation in educational organizations and corporations.

### Capstone Project

Master’s degree candidates must demonstrate thorough knowledge of the field of specialization by completing a capstone in their area of study. The examination/portfolio/thesis serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork. Comprehensive formats vary.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

## Educational Leadership, EdD

The Ed.D. in Educational Leadership program prepares students to become instructional leaders in public and non-public schools, state agencies, and new entrepreneurial ventures. Students gain a deep understanding of the context of American education from anthropological, historical, and sociological perspectives, and of the central elements of instructional, organizational, public, and evidenced-based leadership. Students develop a variety of qualitative and quantitative analytical skills that are required to identify, understand, and assess evidence on educational problems.
Curriculum

The program requires a minimum of 12 course units beyond the master's degree.

Required Milestones

Qualifications Evaluation (Also known as Program Candidacy)

The purpose of program candidacy is to provide rigorous review and feedback to Ed.D. students regarding their academic progress within the first two years of study. Program candidacy is a prerequisite to doctoral candidacy.

Preliminary Examinations (Also known as Doctoral Candidacy)

The preliminary examination is a test of knowledge in the candidate's area of specialization. The examination requires students to demonstrate knowledge and reasoning in the key content areas in their specialization as specified by the academic division. The format of the examination varies from program to program, but must include at least six hours of examination, at least three hours of which must be written.

Oral Proposal

All doctoral candidates must present their dissertation proposals orally and in person to the dissertation committee.

Final Defense of the Dissertation

The final dissertation defense is approximately two hours in length and is based upon the candidate's dissertation.

1. Chosen in consultation with the advisor.
2. Electives may be taken outside of GSE with advisor approval.
3. A non-credit bearing Research Apprenticeship Course is required from second semester of first year forward in the Professional Experiences Strand.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Educational Linguistics, EdD

The Educational Linguistics Ed.D prepares students with the theoretical foundations and technical expertise necessary to pursue positions as leaders of world language programs. The Educational Linguistics, Ed.D program is designed for early to mid-career world language educators who have a strong commitment to bringing research into their practice. Coursework focuses on language and learning in areas such as:

- Linguistic, cognitive, and sociocultural aspects of additional language development and socialization.
- Local/global perspectives on English language teaching policy and practice in K-12 and higher education
- Multimodal discourse in social and institutional settings
- Bilingualism, biliteracy, and bilingual education
- Multilingual language planning and policy

For more information: https://www.gse.upenn.edu/elx/edd

Curriculum

16 CU Total Requirements. With advisor approval, up to 4 (non-Penn graduate coursework), or up to 8 (Penn graduate coursework) CUs may be transferred into the program as electives. Core courses may not be transferred in. Program will include 5 core courses, 3 research courses, 2 linguistics courses, and your chose of elective courses agreed upon with your advisor. This is a part-time only program, with students taking no more than 2 course units per semester.

The final dissertation defense is approximately two hours in length and is based upon the candidate's dissertation.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Higher Education Management, EdD
Peerless in our focus on the unique strengths and challenges of senior-level leaders in higher education, the Executive Doctorate reaches far beyond a standard doctoral program, as it brings together cohorts of current senior leaders to challenge each other and engage with world-renown faculty— all without career interruption. The Executive Doctorate in Higher Education Management trains an emerging generation of top higher education leaders from campuses, government, and affiliated organizations to manage resources strategically, leverage evidence-based decision-making, create entrepreneurial opportunities, challenge practices critically, and conquer the dynamics of complex organizations. The program redefines academic inquiry: we focus on using sound analytic principles to tackle relevant, practical questions of strategy for governing broad segments of the higher education enterprise. Our alumni form a growing and influential network of college presidents, vice presidents, deans, and other leaders who overwhelmingly report that the program propelled their careers and increased their impact.

2019-20 Catalog | Generated 10/18/19
### Course Requirements

Candidates for the Executive Doctorate must complete the equivalent of at least 20 course units of approved graduate work beyond the baccalaureate degree. Admission to the Executive Doctorate requires a master's degree (M.S. or M.A.) or professional degree (M.B.A., J.D., M.S.W., M.P.A., M.Ed.) and transfer of eight post-baccalaureate courses. These credits must be approved by the program director.

Students are admitted to the Executive Doctorate as a cohort. A minimum of 12 course units of graduate work is included in the program. The program consists of a prescribed curriculum that students take as a single cohort offered over six consecutive semesters of enrollment—there are no elective courses or distribution requirements. Students begin in August, and complete coursework over the next five terms. Dissertations are completed during the sixth and final semester of the program. All degree students must maintain a cumulative grade point average of at least “B” in order to graduate.

### CU count

The program is designed as an integrated twenty-two-month experience where all classes are predetermined and continue across terms. Students are considered full time and pay a flat tuition/program fee rate regardless of the number of course units they are registered for each term.

### Elective courses

The course load per term for Executive Doctorate students is prescribed; students may not take additional courses, either at Penn or elsewhere, nor may students drop or add courses, during the period of their enrollment.

### Dissertation Requirements

Information regarding program candidacy, the doctoral preliminary examination, forming a dissertation committee, holding an oral proposal hearing and scheduling a final defense can be found on the GSE website.

### Dissertation Supervision Registration

For students registered after the sixth semester of the program, registration for consecutive semesters is required in the form of dissertation supervision (EDUC 995). Applicable Penn tuition and fees will apply.

Registering for dissertation supervision does not necessarily mean that a student is on dissertation status. Dissertation status is attained once a student completes all coursework and passes the preliminary examination.

1. This includes transfer of eight post-baccalaureate courses. These credits must be approved by the program director.
2. Course offerings vary per term, academic year, and/or cohort.
3. International site location changes per year
4. Session may require travel to off site location

### Transfer credit

GSE will, under certain conditions, accept equivalent credit toward the degree. Up to 8 graduate level CUs taken at GSE, Penn, or another institution, may count toward the EdD degree. Transfer credit is not automatically accepted or applied toward the doctoral degree. Students should consult their academic advisor and the GSE website for the policies governing the application for transfer credit in their 1st semester of coursework at GSE. Students who are not awarded a full 8 CUs of transfer credit should consult their academic advisor for the appropriate elective coursework to fulfill the 20 CUs of coursework required for the EdD program. Students without a master's degree in HE may be required to to fulfill some of their electives with required coursework from the HE MSEd program. Transfer credit paperwork needs to be completed after the the student's 1st semester of coursework; please consult the GSE website for the proper forms and procedures.

### Required Higher Education Courses

All HE doctoral students should take EDUC 556 Higher Education Finance and EDUC 705 Proseminar in Research & Analysis. It is strongly advised that students enroll in required HE courses at the 1st opportunity they are offered. Course substitutions must be approved by your advisor.

---

**Higher Education, EdD**

The Ed.D. in Higher Education is for experienced professionals who wish to continue their careers as practitioners. This program emphasizes the practice of education and consultation in colleges and universities, governmental agencies, and foundations. Aimed at preparing practitioner-scholars, the Ed.D. in Higher Education is designed for experienced professionals who wish to continue their careers as research-practitioners and institutional leaders. Individuals learn to use research to make a difference in the lives of students and institutions by focusing on pressing problems of practice. Ed.D. students attain a broad comprehension of higher education through completion of classes that are designed to facilitate their understanding of research and completion of a dissertation. In addition to these courses, doctoral students draw on their professional work experience to develop the skills they will need to conduct quality primary research in higher education administration.

For more information: [https://www.gse.upenn.edu/hed/edd](https://www.gse.upenn.edu/hed/edd)

Methods Course
All HE doctoral students are required to take 2 methods courses either within GSE or another school at Penn. One of these courses must be a statistics course. Students should consult their academic advisor regarding the appropriate methods courses for their program of study. Methods courses filled at GSE outside of the HE Division will also fulfill GSE’s distribution requirement.

CU count
This planned program of study is based on enrollment in 2 courses per semester, including summer session. Doctoral candidates must be registered each fall and spring term for coursework.

Elective courses
Elective courses may be taken at any school at Penn; however, the majority of HE students fulfill their electives within the division. Courses must be at the 500 level or above and students must consult their academic advisor before enrolling in any course outside of GSE. Students may not register for more than 4 independent studies (EDUC 999) over the course of their program of study.

Requirements:
Qualifications Evaluation (Also known as Program Candidacy)
The purpose of program candidacy is to provide rigorous review and feedback to Ed.D. students regarding their academic progress within the first two years of study. Program candidacy is a prerequisite to doctoral candidacy.

Preliminary Examinations (Also known as Doctoral Candidacy)
The preliminary examination is a test of knowledge in the candidate’s area of specialization. The examination requires students to demonstrate knowledge and reasoning in the key content areas in their specialization as specified by the academic division. The format of the examination varies from program to program, but must include at least six hours of examination, at least three hours of which must be written.

Oral Proposal
All doctoral candidates must present their dissertation proposals orally and in person to the dissertation committee.

Final Defense of the Dissertation
The final dissertation defense is approximately two hours in length and is based upon the candidate’s dissertation. The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Higher Education, MSEd
The M.S.Ed. in Higher Education will prepare students to take on leadership roles in institutions of higher education, nonprofit organizations, and government agencies involved in constructing higher education nationally and worldwide. The program explores a wide range of topics including access to and equity within higher education, student development, postsecondary administration and management, organizational change, curriculum and pedagogy, economics and financing, and postsecondary policies at federal, state, and global levels. The program offers a variety of courses that enable students to shape a plan of study that will prepare them for their area of interest. The curriculum is based on interactive case studies, discussion-oriented seminars, individual and group projects, and hands-on, work-based applications of learning. The program offers practical higher education administrative experiences through graduate assistantships for full-time students.

For more information: https://www.gse.upenn.edu/hed/msed

Curriculum

Comprehensive Examination
Higher Ed MSEd candidates must pass a comprehensive exam in order to graduate. To qualify to take the examination, students must have completed at least 5 Higher Ed CU's, or be enrolled in at least the fifth course unit. The exam is given in both the Fall and Spring terms. Under this planned program of study, FT students can take the exam in the spring semester.

1. Students must complete SIX total Higher Education courses, including EDUC 594. *EDUC 592 is recommended for full-time students with fewer than 4 years of professional work experience.
   Students with more than 4 years of work experience may be exempt from EDUC 592, and a substitute HE course would serve as a substitute requirement in such cases.
2. Any substitutions for required courses must be approved by your advisor and/or the Division Chair.
3. Candidates for the MSEd must demonstrate knowledge of the field of education beyond their area of specialization, which is met by satisfying the distribution requirement. Students must complete one approved graduate level GSE course outside the Higher Education division, earning a grade of “B” or better (i.e., any non-HE "EDUC" course, 500-level or above).
Electives may be taken at any school at Penn; however, the majority of Higher Ed MSEd students fulfill their electives within the division. Courses must be at the 500-level or above and students should consult their academic advisor before enrolling in any course outside of GSE. Students may not register for more than 2 independent study courses over the course of their program of study.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Independent School Teaching Residency, MSEd**

The Independent School Teaching Residency, M.S.Ed. program (ISTR) prepares early educators in our partnered schools with foundational pedagogy and classroom management skills to become successful teachers through a highly mentored, in person and online fellowship. ISTR enables aspiring and early career teachers to receive a master’s degree in education while completing teaching fellowships at host partner schools. With an innovative and comprehensive curriculum designed specifically for the independent schools’ unique settings, ISTR features intensive on-site sessions in combination with innovative and collaborative distance learning.

**Master’s Portfolio**

Master’s degree candidates must demonstrate thorough knowledge of the field of specialization by creating a portfolio and passing a portfolio review in their area of study. The portfolio serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork. Portfolio formats vary.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Intercultural Communication, MSEd**

The M.S.Ed. in Intercultural Communication, housed within the Educational Linguistics Division, provides the skills and knowledge necessary to understand linguistic and social practices in a variety of environments. The M.S.Ed. in Intercultural Communication (ICC), provides a solid foundation in ethnographic and discourse analytic research methods. The core courses examine linguistic and social practices that occur in face-to-face interaction, the cultural expectations and ideologies that inform communicative practices, and the cultural dynamics of power and identity. A degree in ICC prepares students for careers such as cultural exchange advising and administration, study-abroad programming, refugee and immigrant support, and curriculum development, training, and facilitation. The program also provides a
solid theoretical foundation for those students considering a career in intercultural research and/or doctoral study.

Elective Courses
Select 1 ELX elective course 1
Select 2 electives 2

Distribution Requirement
Select 1 Distribution Requirement course 5

Capstone Course 4
EDUC 567 Internship: ICC 1

Total Course Units 12

Required Milestone:
Master's degree candidates must demonstrate thorough knowledge of the field of specialization by passing a comprehensive examination in their area of study. The examination/portfolio/thesis serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork. Comprehensive formats vary.

1 Students must complete an internship of at least 160 hours. The internship proposal (part of EDUC 845 Seminar in Microethnography) must be approved before you can begin your internship; the internship must be completed before you may register for EDUC 567 Internship: ICC. EDUC 567 Internship: ICC is offered in the spring semester only.

2 Students must maintain a 3.5 cumulative GPA after the completion of the first fall semester in order to register for 4 CU's in subsequent semesters. Students must maintain a 4.0 cumulative GPA after the completion of the first fall semester in order to register for 5 CU's in subsequent semesters.

3 Two courses may be transferred into the program (as electives only) with the approval of ELX faculty.

4 Students must earn a grade of B- or higher in core courses (see Handbook).

Candidates for the M.S.Ed. degree must demonstrate knowledge of the field of education beyond the area of specialization. This requirement is met by satisfying the distribution requirement. To meet the distribution requirement, students must complete one approved graduate level (500 and above) GSE course outside the student's area of specialization, earning a grade of "B" or better. Students should check with their program manager for a list of courses approved to fulfill the distribution requirement. Further requirements regarding these courses may be specified by each division.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Interdisciplinary Studies in Human Development, MSEd

The M.S.Ed. in Interdisciplinary Studies in Human Development (ISHD) program examines the social, emotional, cognitive, and physical aspects of human development within the context of culture and social policy. The ISHD master's program offers students the opportunity to create an individualized program of study that leads to an enriched understanding of the diverse perspectives of human development across the lifespan in one of the following career interests: traditional academic research, youth programming and services, urban and ethnic studies, adult development and learning, international programming (e.g., work with NGOs), foundation administration, and program development. The program is designed for pre-professional training and to prepare students to advance within their careers by gaining a better understanding of human development issues. The M.S.Ed. in ISHD also gives students a solid foundation for applying to doctoral programs in human development and related fields.

Applied Development and Counseling Skills Concentration:

ISHD MSEd students may opt for a concentration in Applied Development and Counseling Skills by taking 7 ISHD courses in addition to 3 courses that would fulfill requirements for the concentration.

**Required Milestones**

**Comprehensive Examination (or Portfolio or Thesis)**

Master’s degree candidates must demonstrate thorough knowledge of the field of specialization by passing a comprehensive examination in their area of study. The examination/portfolio/thesis serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork. Comprehensive formats vary.

Counseling Area of Concentration students select at least 2 of these courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**International Educational Development, MSEd**

The M.S.Ed. in International Educational Development program (IEDP) prepares students with distinctive skills required to address social, political and economic concerns in the world’s most marginalized communities through both academic coursework and hands-on experiences. Students draw on the program’s strong interdisciplinary foundations to develop expertise in areas such as: curriculum and pedagogy, early childhood education, gender, human rights, language policy, literacy, migration, nonprofit management, poverty alleviation, public health, program evaluation, school climate, and technology for development. Graduates of the IEDP have an enhanced understanding of the interplay of local, national, and international politics, policies, and priorities in a world of rapid educational change, and are able to critically read and persuasively communicate evidence-based knowledge to a diverse set of stakeholders.

For more information: [https://iedp.gse.upenn.edu/about](https://iedp.gse.upenn.edu/about)

**Curriculum**

A total of 10 course units are required for the IEDP MSEd.

**IEDP Policy Brief**

The Policy Brief is a persuasive paper in which students must define an issue in international educational development, critique existing policies based on strong evaluative criteria, or review literature on the topic where policies are not in place. Premised on foundations in policy analysis, the brief should conclude with a set of possible solutions or policy recommendations to address the issue.

**IEDP Summer Field Internship**

All eligible students must complete an approved 12 week, international internship in an education and development oriented organization (typically in the summer), where there are productive work opportunities, and where interns have the skills that match the position openings. Domestic placements may be considered for those who request it.

Both quantitative and qualitative courses prepare students in the practical and theoretical implications of collecting, interpreting, analyzing and presenting data on the human condition broadly (and education/learning in particular).
Candidates for the M.S.Ed. degree must demonstrate knowledge of the field of education beyond the area of specialization. Students must complete one approved graduate level (500 and above) GSE course outside the student’s area of specialization, earning a grade of “B” or better. In IEDP, the requirement must meet the additional following criteria/conditions: The chief focus should not be on international, global or development contexts. Students should confer with their faculty advisor for further guidance.

Electives must be graduate level and taken for a letter grade. Students should determine elective courses in conference with their faculty advisors to ensure they align with the Planned Program of Study. With faculty advisor approval, electives may potentially be taken in International Educational Development (IEDP), other GSE programs, or from graduate programs across the university.

Thematic courses reflect a student’s unique, self-identified specialization within the field, and may be based on: region of the world; topic or issue; or practical application. Students are encouraged to discuss this ‘specialization’ with their faculty advisors.

IEDP students must have completed EDUC 695 Proseminar in International Educational Development and EDUC 514 Education in Developing Countries prior to placement, and be in good academic standing both in the program and in GSE as prerequisites to placement in a field site.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Learning Sciences & Technologies, MSEd

The M.S.Ed. in Learning Sciences and Technologies lays the foundation for graduates to pursue fulfilling and creative careers as educators, researchers, and developers of next-generation curricula, technology-enriched learning environments, and instructional programs. The Learning Sciences and Technologies M.S.Ed. is designed for students who wish to investigate at an advanced level the interdisciplinary connections between learning environments (both online and offline), design issues, and educational concerns. Students enjoy individualized courses of study in a small, community-oriented cohort of students. The curriculum gives students the knowledge, skills, and techniques needed to assess, design, and implement programs in learning settings that range from after-school opportunities to corporate professional development.

Total Course Units 10

Other Requirements
Internship requirement: Supported by EDUC 696 In/formal Learning Experience Internship; includes internship work as outlined in Internship Contract.

Master’s Paper/Capstone Experience: Supported by EDUC 668 Master’s Paper Seminar

1 The MSEd degree requires a minimum of 10 CUs. All courses counted towards the degree must be at the 500 level or above. No transfer credits are accepted. Other program requirements include successful completion of the internship program and the Master’s Paper. All students must take at least 3 CUs to be considered full-time. Part-time students enroll in 1 to 2 CUs per semester.

2 The 545 course number is used to denote an experimental course offered for the first time, and several sections of 545 may be offered in a single semester.

3 Candidates for the M.S.Ed. degree must demonstrate knowledge of the field of education beyond the area of specialization. This requirement is met by satisfying the distribution requirement. To meet the distribution requirement, students must complete one approved graduate level (500 and above) GSE course outside the student’s area of specialization, earning a grade of “B” or better. Students should check with their program manager for a list of courses approved to fulfill the distribution requirement. Further requirements regarding these courses may be specified by each division.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Medical Education, MSEd

The University of Pennsylvania Med Ed Master of Education degree program is a unique collaboration between physician educators and education experts who have come together to provide a comprehensive, innovative curriculum designed specifically for physicians and other healthcare professionals. The program offers leaders in medical education the opportunity to receive master-level training in the delivery of innovative, evidence-based education programs based on sound educational scholarship and the latest technologies. The format is designed to accommodate professionals from a broad geographic area, pairing brief, on-site intensives with flexible, distance learning. This program is brought to you by the University of Pennsylvania Graduate School of Education. It is directed, designed and led in collaboration.

**Penn Chief Learning Officer, EdD**

The PennCLO Executive Doctoral Program prepares the Chief Learning Officer (CLO) and other senior-level executives for success in their roles as learning and talent development leaders. Developing an organization's talent is a critical component of its success. Learning leaders who are committed to human capital development within organizations must use evidence-based practice to create and oversee leadership development, learning, and managerial initiatives. The program provides a rigorous academic environment where members build the skills necessary to ensure successful learning outcomes that will align with the organization's strategy.

Required Milestones:

**Qualifications Evaluation (Also known as Program Candidacy)**

The purpose of program candidacy is to provide rigorous review and feedback to Ed.D. students regarding their academic progress within the first two years of study. Program candidacy is a prerequisite to doctoral candidacy.

**Preliminary Examinations (Also known as Doctoral Candidacy)**

The preliminary examination is a test of knowledge in the candidate's area of specialization. The examination requires students to demonstrate knowledge and reasoning in the key content areas in their specialization.
as specified by the academic division. The format of the examination varies from program to program, but must include at least six hours of examination, at least three hours of which must be written.

**Oral Proposal**

All doctoral candidates must present their dissertation proposals orally and in person to the dissertation committee.

**Final Defense of the Dissertation**

The final dissertation defense is approximately two hours in length and is based upon the candidate’s dissertation.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Professional Counseling, MPhilEd**

The M.Phil.Ed. in Professional Counseling functions as the second year of our Professional Counseling Programs, following the M.S.Ed. in Counseling and Mental Health Services. The M.Phil.Ed. prepares students to become Certified School Counselors and/or Licensed Professional Counselors (LPCs). The M.Phil.Ed. in Professional Counseling program emphasizes supervised counseling and clinical skills development for addressing the emotional and behavioral health challenges facing individuals and groups in a wide range of settings, including schools, neighborhoods, and larger communities. This program involves a year of advanced study in the mastery of professional counseling, clinical assessment, and consultation services immediately following completion of the one-year Counseling and Mental Health Services (CMHS) M.S.Ed. program. Graduates of the program can either launch their careers as licensed professional counselors after completing post-graduate requirements or go on to pursue doctoral studies.

1 School Counseling Certification Track Requirement students must take EDUC 553 Foundations of Education for Diverse Learners as 1 of the 2 electives.

**Required Milestones**

**Comprehensive Examination (or Portfolio or Thesis)**

Master’s degree candidates must demonstrate thorough knowledge of the field of specialization by passing a comprehensive examination in their area of study. The examination/portfolio/thesis serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork. Comprehensive formats vary.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Quantitative Methods, MPhilEd**

The M.Phil.Ed. in Quantitative Methods is designed for professionals who have already earned a relevant master’s degree and wish to advance their mastery of scale development and assessment, design of randomized field trials and quasi-experiments, multivariate statistical analysis as applied in education, surveys, and the production of high-quality evidence for decision-making in public and organizational policy. In addition to developing expertise in advanced methods of research, students are required to take distribution courses in fields such as early childhood, reading, science education, education in developed and developing countries, dropout and risk prevention, etc. The curriculum integrates research methods with policy content. Research experience is an integral part of the curriculum. Graduates are prepared to design, apply and interpret measures of attitude, behavior, and other social science, education and related phenomena; to validate, scale and equate such measures; to plan and conduct controlled field experiments; to apply and interpret advanced univariate and multivariate statistics; to evaluate programs and policies through quantitative studies; and to disseminate and interpret results for understanding and policy development.

For more information: https://www.gse.upenn.edu/qm/mphiled

**Distribution Requirement**
Select 1 Distribution Requirement course 1

**Electives**
Select 3 electives 2

**Total Course Units**  16

1 To meet the distribution requirement, students must complete one approved graduate level (500 or above) GSE course outside the student’s area of specialization, earning a grade of “B” or better.

2 Students are required to take three elective courses. These courses can be taken at other Penn schools with permission from the advisor and the school in question. The student must also earn a grade of “B” or better.

**Comprehensive Examination**
Master’s degree candidates must demonstrate thorough knowledge of the field of specialization by passing a general examination in their area of study. The general examination serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Reading/Writing/Literacy, Certificate**
As part of the MSEd program in Reading/Writing/Literacy, many students earn certification as Reading Specialists. If you already have a Master’s degree in a relevant field in Education or a minimum of eight courses in Education with grades of A or B, you are eligible for a six-course sequence resulting in certification as a Reading Specialist.

For more information: https://www.gse.upenn.edu/lcie

**Curriculum**
6 courses for Reading Specialist Certification if student holds initial certification.
7 courses for Reading Specialist Certification if student does NOT hold initial certification.

2 Fieldwork RWL (May be waived if student is certified with one year teaching experience)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Reading/Writing/Literacy, EdD**
The Ed.D. in RWL features a strong commitment to educational practice and preparing practitioner-scholars. Ed.D. applicants are required to hold a master’s degree and are expected to have experience in educational practice. This Ed.D. program trains practitioner-scholars for positions involving the practice of education in schools, school districts, colleges and universities, government agencies, foundations, entrepreneurial ventures, and consulting organizations. Students construct individual programs of study with their advisor to suit their interests, combining core courses with additional coursework in research methodology and electives. The program emphasizes the interrelationships and integration of theory, research, policy, and practice.

For more information: https://www.gse.upenn.edu/rwl/edd

**Curriculum**
20.0 CU’s are required for the EdD.
8.0 CU’s can be transferred in to the program.

Required Milestones
Qualifications Evaluation (Also known as Program Candidacy)
The purpose of program candidacy is to provide rigorous review and feedback to Ed.D. students regarding their academic progress within the first two years of study. Program candidacy is a prerequisite to doctoral candidacy.

Preliminary Examinations (Also known as Doctoral Candidacy)
The preliminary examination is a test of knowledge in the candidate's area of specialization. The examination requires students to demonstrate knowledge and reasoning in the key content areas in their specialization as specified by the academic division. The format of the examination varies from program to program, but must include at least six hours of examination, at least three hours of which must be written.

Oral Proposal
All doctoral candidates must present their dissertation proposals orally and in person to the dissertation committee.

Final Defense of the Dissertation
The final dissertation defense is approximately two hours in length and is based upon the candidate's dissertation.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Reading/Writing/Literacy, MSEd

Students in this interdisciplinary program study literacy and language from sociopolitical, cultural, psychological, historical, and linguistic perspectives. The M.S.Ed. in Reading/Writing/Literacy program prepares students as practitioners, researchers, and policy makers in educational settings that include K-12 schools, colleges and universities, community-based literacy programs, educational publishing, and government programs. Four principles guide the program:

1. Literacy and language are studied from the sociopolitical, cultural, psychological, historical, linguistic, and literary perspectives;
2. The program is inquiry-based, intended to raise questions about the relationships among theory, research, policy, and practice while encouraging students to build their own theories of research and practice;
3. It focuses on diversity and on urban settings and the contexts of different schools, communities, families, and cultures; and
4. The program is committed to educational change, recognizing that educational institutions are sites in which to work for social justice, equity, and transformation.

For more information: https://www.gse.upenn.edu/rwl/rwl/msed

Curriculum

A total of 11 course units are required for the RWL MSEd.

A total of 11 course units are required for RWL MSEd + Reading Specialist Certification if student is certified in Elem or Sec certification with at least 1 year of teaching experience (student teaching not applicable)

A total of 12 course units are required for RWL MSEd + Reading Specialist Certification if student does not hold Elem or Sec certification or is certified without at least 1 year of teaching experience (student teaching not applicable)

Portfolio

Master's degree candidates must demonstrate thorough knowledge of the field of specialization by completing a portfolio in their area of study. The portfolio serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork.

1. Required for RWL MSEd + Reading Specialist Certification students
2. The course selection should be outside RWL but within GSE
3. Candidates for the M.S.Ed. degree must demonstrate knowledge of the field of education beyond the area of specialization. This requirement is met by satisfying the distribution requirement. To meet the distribution requirement, students must complete one approved graduate level (500 and above) GSE course outside the student's area of specialization, earning a grade of "B" or better. Students should check with their program manager for a list of courses approved to fulfill the distribution requirement. Further requirements regarding these courses may be specified by each division.

2019-20 Catalog | Generated 10/18/19
Electives must be 500 level or above and taken for a letter grade (no pass/fail) to be included towards the MSEd degree. Non-GSE courses must be approved by your advisor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

School Leadership, Certificate

The Principal Certification-Only Track is for public/charter school administrators and educators who already hold a Master’s degree and are seeking eligibility for Principal Certification. Over its five courses, this track provides a 360-hour internship, focused class topics, and practitioner assignments relevant to the public/charter school environment.

Required Milestone:
Master’s degree candidates must demonstrate thorough knowledge of the field of specialization by passing a comprehensive examination in their area of study. The examination/portfolio/thesis serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork. Comprehensive formats vary.

1 The School Leadership Program is unable to provide immigration sponsorship for international students.
2 To be admitted into this track, students must have several years professional experience in a school setting. Most often our students’ school experience comes from teaching in a classroom but special to the Independent School Track is the ability for those in admissions or development roles at private schools to participate in the program without having had prior classroom experience.
3 To be admitted into this track, students must either have at least three years teaching experience or two years teaching experience and be in a teaching position while completing the program.

School and Mental Health Counseling, MSEd

The Executive Program in School and Mental Health Counseling, M.S.Ed. is designed for working professionals embarking on careers as either school or mental health counselors. The program is organized around two tracks: Mental Health Counseling Licensure and School Counseling Certification and Mental Health Counseling Licensure. Using an executive-learning format, students can earn their degrees while maintaining full-time employment by attending courses that meet for one week of intensive study each summer and one weekend per month during two academic years. The cohort-model program results in students who work closely with their peers through a sequentially structured curriculum of courses and field training. Supervised field experiences are integral to the program. This program starts in the Summer term.

Statistics, Measurement, Assessment, and Research Technology, MSED
The M.S.Ed. in Statistics, Measurement, Assessment, and Research Technology (SMART) program is designed to prepare individuals for work in research and assessment organizations, public institutions, and government agencies focused on education, psychology, and related human services fields. The program provides understanding and skills in data collection, management, and processing; measurement theory and test construction; survey design; design and execution of randomized controlled experiments and quasi-experiments; assessment strategies; and statistical analysis and reporting in education. Graduates of the SMART program go on to become researchers and statistical analysts in organizations such as school districts, government agencies, research centers, educational testing companies, and educational research institutes.

For more information: https://www.gse.upenn.edu/qm/smart

Curriculum
10 CUs are required for the Statistics, Measurement, Assessment, and Research Technology (SMART) MSED Program.

Distribution Requirement 1
Select 1 Distribution course (Fall, Spring, or Summer) 1

Elective Courses 2
Select 2 elective courses (Fall, Spring, or Summer) 2

Total Course Units 10

1 Candidates for the MSED degree must demonstrate knowledge of the field of education beyond the area of specialization. This requirement is met by satisfying the distribution requirement. To meet the distribution requirement students must complete one approved graduate level (500 or above) GSE course outside the academic division in which they are enrolled, earning a grade of 'B' or better.

2 Students are required to take two elective courses. These courses can be taken at other Penn schools with permission from the advisor and the school in question. The student must also earn a grade of 'B' or better.

Comprehensive Examination
Toward the end of completion of course requirements, master’s students are required to pass a general examination in the core content of SMART.

Graduation
Anticipated graduation under this plan can be either May, August, or December.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Teaching English to Speakers of Other Languages, M.S.Ed

The M.S.Ed. in Teaching English to Speakers of Other Languages (TESOL), housed within the Educational Linguistics Division, provides a foundation in the practical, theoretical, and professional aspects of the field of language education with a focus on English language teaching. The M.S.Ed. in TESOL prepares students to teach English in settings where English is a second, foreign, or international language. The program emphasizes the many roles and functions of English language education in the political, social, and academic climate of today’s globalized world. TESOL’s course of study combines the theoretical and practical aspects of the field while emphasizing the motivations and needs of immigrants who settle in English-speaking nations, international scholars and professionals, and students in countries where English is a second or foreign language. In-depth study and field-based practice prepare students to identify and analyze learner needs, design tailored language curricula, and use a variety of evidence-based teaching and assessment practices.

Required Milestone:

Master’s degree candidates must demonstrate thorough knowledge of the field of specialization by passing a comprehensive examination in their area of study. The examination/portfolio/thesis serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork. Comprehensive formats vary.

1 Two courses may be transferred into the program (as electives ONLY) with the approval of ELX faculty.

2 Full-time registration is 3 CUs. Students must reach and maintain a 3.5 cumulative GPA after the completion of the first fall semester in order to register for 4 CUs in subsequent semesters.

3 Students must earn a grade of B- or higher in core courses. See the TESOL Handbook for more information.

4 Students may teach any language at their EDUC 528 TESOL Practice Teaching field site.

5 Depending on prior academic and teaching experience, students may seek faculty permission to waive EDUC 542 TESOL Classroom Fundamentals and EDUC 679 Reading, Writing, and Critical Thinking for Applied Linguistics. If waived, those courses are replaced with electives.

6 Candidates for the M.S.Ed. degree must demonstrate knowledge of the field of education beyond the area of specialization. This requirement is met by satisfying the distribution requirement. To meet the distribution requirement, students must complete one approved graduate level (500 and above) GSE course outside the student’s area of specialization, earning a grade of “B” or better. Students should check with their program manager for a list of courses approved to fulfill the distribution requirement. Further requirements regarding these courses may be specified by each division.

7 Students must teach English at their EDUC 563 TESOL Seminar field site.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Teaching, Learning, and Leadership, M.S.Ed

Focused primarily on K-12 populations, the M.S.Ed. in Teaching, Learning, and Leadership is designed for individuals who wish to work in educational and leadership capacities both in and outside of formal classroom settings. Students choose one of two areas of informal specialization: Teaching and Learning, or Educational Leadership. Students enjoy individualized courses of study in a small, community-oriented cohort. Our two-semester internship program, paired with our Internship Seminar, gives students an in-depth understanding of how learning occurs in out-of-school environments. Graduates work in schools, school administrations, after-school programs, museum settings, and educational non-profits.

Other Requirements
Internship requirement: Supported by EDUC 696 Informal Learning Experience Internship; includes internship work as outlined in Internship Contract.

Master’s Paper/Capstone Experience: Supported by EDUC 668 Master’s Paper Seminar

1 The MSEd degree requires a minimum of 10 CUs. All courses counted towards the degree must be at the 500 level or above. No transfer credits are accepted. Other program requirements include successful completion of the internship program and the Master’s Paper. All students must take at least 3 CUs to be considered full-time. Part-time students enroll in 1 to 2 CUs per semester.

2 Taught by TLL-affiliated faculty

3 The 545 course number is used to denote an experimental course offered for the first time, and several sections of 545 may be offered in a single semester.

4 Candidates for the M.S.Ed. degree must demonstrate knowledge of the field of education beyond the area of specialization. This requirement is met by satisfying the distribution requirement. To meet the distribution requirement, students must complete one approved graduate level (500 and above) GSE course outside the student’s area of specialization, earning a grade of “B” or better. Students should check with their program manager for a list of courses approved to fulfill the distribution requirement. Further requirements regarding these courses may be specified by each division.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Teaching, Learning, and Teacher Education, EdD

The Ed.D. in Teaching, Learning, and Teacher Education program has a strong commitment to educational practice and preparing scholar-practitioners. The program is designed to draw together course work, research apprenticeship, and other professional academic activities to build a complete professional program that is tailored to students’ interests and needs. Students devise an individualized program of study based on their research interests and in consultation with their advisor. Graduates serve as researchers and teacher educators in universities and colleges, curriculum developers and evaluators in educational agencies, curriculum specialists in school districts and state departments of education, and instructional leaders and classroom teachers in K-12 schools.

For more information: https://www.gse.upenn.edu/tll/tlte/edd

Curriculum

The program requires a minimum of 12 course units beyond the master’s degree.

Required Milestones
Qualifications Evaluation (Also known as Program Candidacy)
The purpose of program candidacy is to provide rigorous review and feedback to Ed.D. students regarding their academic progress within the first two years of study. Program candidacy is a prerequisite to doctoral candidacy.

Preliminary Examinations (Also known as Doctoral Candidacy)
The preliminary examination is a test of knowledge in the candidate’s area of specialization. The examination requires students to demonstrate knowledge and reasoning in the key content areas in their specialization as specified by the academic division. The format of the examination varies from program to program, but must include at least six hours of examination, at least three hours of which must be written.

Oral Proposal
All doctoral candidates must present their dissertation proposals orally and in person to the dissertation committee.
Final Defense of the Dissertation
The final dissertation defense is approximately two hours in length and is based upon the candidate’s dissertation.

1 Chosen in consultation with the advisor.
2 Electives may be taken outside of GSE with advisor approval.
3 A non-credit bearing Research Apprenticeship Course is required from second semester of first year forward in the Professional Experiences Strand.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Urban Teaching Residency, MSEd
Urban Teaching Residency Program (UTRP)
The Urban Teaching Residency program provides solid academic training and professional mentoring necessary to create effective urban educators. The curriculum is set around four core principles: unwavering focus on children; teacher inquiry and reflection; broad understanding of education and commitment to equity and social justice. The program began as a partnership of Penn GSE, the Pennsylvania Department of Education, and the Teach For America Greater Philadelphia Region.

To meet the needs of people working full time, the Urban Teaching Residency program is an executive-style format program with a hybrid of online and in-person coursework.

Our program offers two tracks. One with Pennsylvania certification (Every Teacher Certified, or ETC) and one without (Urban Professionals Program, or UPP).

Every Teacher Certified Options:
1. M.S.Ed. in Urban Education with PA Instructional I certification (https://utrp.gse.upenn.edu/program/certification)
   • The M.S.Ed. in Urban Education with recommendation for the Instructional Level I Certification allows you to work towards a Pennsylvania teaching certification while simultaneously completing coursework required to earn a master’s degree in education.

2. M.S.Ed. in Urban Education with dual certification in PA Instructional I and special education (https://utrp.gse.upenn.edu/program/certification)
   • The M.S.Ed. in Urban Education with recommendation for the Instructional Level I Certification and K-12 Special Education Certification allows you to work towards a PA content-area certification and certification in Special Education in two years. You must opt into this track by the first semester of your first year.

3. Certification Only – General Education or Special Education
   • General Education Certification Only is for students who are entering the program through one of our educational and school partners.

4. Special Education Certification Only is for teachers who are already certified in a general education track.

Urban Professionals Program track
M.S.Ed. in Urban Education
The M.S.Ed in Urban Education is designed for teachers, researchers, educators, and community advocates who are interested in the distinct needs of children and families in high-needs contexts. It explores issues related to equity, access, institutional and school-level policy, as well as the needs of children living in poverty. Drawing from critical and sociocultural perspectives, the M.S.Ed in Urban Education considers how communities, schools, and policy intersect to impact families in high-needs schools.

For more information: https://utrp.gse.upenn.edu/

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Every Teacher Certified (ETC) M.S.Ed. with Certification
Certification tracks are assigned based on the content area and grade level placement in which you work in your school. Our program ensures that your coursework and mentoring aligns with requirements for earning teaching certification.

General Education Tracks:
• Pre-K-4th grade
• Middle Years with concentration in
  • Mathematics
  • Science
  • English
• Secondary Mathematics
• Secondary English
• Secondary General Science
• Secondary Physics
• Secondary Biology
• Secondary Chemistry
• Secondary World Languages

Required Milestone

Comprehensive Examination (or Portfolio or Thesis)
Master's degree candidates must demonstrate thorough knowledge of the field of specialization by passing a comprehensive examination in their area of study. The examination/portfolio/thesis serves an educational and evaluative purpose through which students are expected to review and integrate what they have learned in their coursework and fieldwork. Comprehensive formats vary.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Every Teacher Certified (ETC) M.S.Ed. with Dual Certification
M.S.Ed. in Urban Education with dual certification in PA Instructional I and Special Education (https://utrp.gse.upenn.edu/program/certification)

Certification tracks are assigned based on the content area and grade level placement in which you work in your school. Our program ensures that your coursework and mentoring aligns with requirements for earning teaching certification.

General Education Tracks

Special Education (Dual) Certification
Along with a general education certification, individuals working in special education classrooms may have the opportunity to earn either a Pre-K-8th or a 7th-12th grade special education certification through our dual certification program. A stand-alone special education certification is not an option in the State of Pennsylvania.

Dual certification requires completion of one of the General Education certification tracks above combined with either:
- Elementary Special Education (Pre-K-8th grade)
- Secondary Special Education (7th-12th grade)

Teachers who have earned PA certification and wish to add the special education certification can enroll in the Special Education Certification only track, which is a 5-course, 1-year hybrid model.

*VAST LIFE is a program through the Urban Teaching Residency Program designed to provide students ages 14-21 the opportunity to have community based experiences, transitional assessments and lessons,
and cultural events in the great city of Philadelphia customized for them by graduate students who are seeking Masters of Education and Special Education Certification in the Commonwealth.

1 Consult with Program for choices.

Required Milestone

### Urban Teaching Apprenticeship, M.S.Ed.
**Urban Teaching Apprenticeship Program (UTAP) M.S.Ed.**

UTAP features a 10-month teaching apprenticeship that provides authentic experiences teaching at the side of experienced classroom mentors. Apprentices have over 800 hours of field time (more than twice the student teaching experience of the average program) to develop research-based practices.

The UTAP apprenticeship begins in the summer. Apprentices work in youth-serving summer programs located in the neighborhood where they will teach in the fall. Once schools begin, an experienced mentor shares the classroom with the apprentice, guiding their emerging teaching practice. Apprentices also receive support from Penn Mentors who visit the classroom one day per week, and provide feedback to ensure development of targeted teaching skills and dispositions learned during course work.

When our alumni seek employment after graduation, they already have a full year of teaching experience on their resume.

For more information: [https://www.gse.upenn.edu/tll/utep](https://www.gse.upenn.edu/tll/utep)

### Purposeful Mentorship

The mentored field experiences are the core of the Urban Teaching Apprenticeship Programs. Carefully selected PreK-12 school settings and classrooms serve as learning sites for apprentices.
Cohort Model
The program is cohort based: all apprentices begin and move through the program together, sharing classes and experiences in their schools.

Inquiry & Practitioner Research Skills
An inquiry stance is modeled and encouraged; teachers see themselves not only as consumers of research but generators of it, using their own classrooms as sites for ongoing research and self-reflection. In the program, apprentices conduct research in their classrooms and complete a capstone project.

Developing Digital Fluency
Apprentices learn how to develop a webpage (https://utap.gse.upenn.edu/about/research), use blogs to critically communicate their experiences in schools, and publish original teacher research to their webpage. In addition to participating in an eight-session module on integrating technology into their lessons and classroom, apprentices engage in the use of video to intensively study their own practice as a way to extend reflective self-inquiry and learning.

Advocacy and Leadership: Equity in Education
The Master of Science in Education degree and the urban teaching apprenticeship prepare alumni to take on leadership roles, particularly those that position them as advocates for all students.

Full Year Apprenticeship
Our students begin apprenticing in a Philadelphia public or charter school on the first day of the school year. Unlike traditional student teaching models, our apprentices experience nearly an entire year in the classroom.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Urban Teaching Apprenticeship M.S.Ed. in Elementary Education with PA Grades PreK-4 Certification
The UTAP PreK-4 certification program of study is comprised of fieldwork, courses, and academic/career workshops within its thematic five-term school year, spanning 10-months. A total of 11 course units are required for graduation.

Apprentice-teachers learn how to address the needs and nuances of the whole child. Our program provides a robust foundation in the four core content areas: Math, Literacy, Science and Social Studies, from the position that high-quality content instruction is key.

A total of 11 course units are required for graduation.

Program of Study

Term i: Summer

<table>

<tr>
<th>Code</th>
<th>Title</th>
<th>Course Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 523</td>
<td>Social Studies in the Elementary and Middle Schools</td>
<td></td>
</tr>
</tbody>
</table>

Fieldwork
Field placement in the summer takes place in public libraries, where apprentice teachers will be able to implement small-group teaching tasks learned in their Math, Literacy and Maker-Space courses. Apprentices are in libraries for half-days, Monday - Wednesday each week and spend Fridays at community site-visits bi-weekly. Summer placements are a total of approximately 40 hours of fieldwork.

Term ii & iii: FALL

<table>

<td>EDUC 521</td>
<td>Science Methods: Project-Based Learning Approaches</td>
<td></td>
</tr>
<tr>
<td>EDUC 531</td>
<td>Mathematics in the Elementary and Middle Schools</td>
<td></td>
</tr>
</tbody>
</table>

Fieldwork
During the fall, apprentices are in their placements for two whole days and two half-days. Apprentices will begin their placement as small-group instructor, transitioning to whole-group facilitation by the beginning of Term III. Fall placements total approximately 330 hours of fieldwork.

Term iv & v: SPRING (January - beginning of March)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Course Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 555</td>
<td>Advanced Field Seminar (Elementary &amp; Secondary Education)</td>
<td></td>
</tr>
</tbody>
</table>

Fieldwork
During early spring (January - beginning of March), apprentices are in their placements for five whole days. Apprentices are expected to facilitate whole-group lessons regularly, including a “two-week takeover” during which apprentices become the lead teacher for the entire two weeks. Early spring placements are a total of approximately 280 hours of fieldwork.

During late spring (beginning of March - early May), apprentices are at their placement for five whole days. Apprentices are expected to facilitate whole-group lessons regularly. Late spring placements are a total of approximately 245 hours of fieldwork.

Comprehensive Portfolio
To culminate Term V, students complete the design a web-based Inquiry Portfolio that expands on their Term III inquiry question and highlights their two-week takeover from their Term IV social action project. Evidence
of performance assessments, with commentary, appears in the final portfolios.

**Specializations**

In response to the growing need for teachers who can address the needs of specific types of schools and students, UTAP offers the opportunity to begin work in specialty areas. These specialties require additional coursework during the first year of teaching.

**Language Diversity/Program Specialist in ESL:** Apprentices work as student teachers in partner schools with ESL, bilingual, and dual language students and programs. Currently UTAP seeks apprentices who speak Spanish and Mandarin for bilingual classrooms. Apprentices seeking ESL program specialist certification need not be bilingual.

**Special Education:** During the apprenticeship year, apprentices in this specialty serve part of their time with students who have Individualized Education Plans (IEPs). Upon completion of the apprenticeship year, candidates will complete coursework for the specialization for the special education certificate Pennsylvania PreK-4.

**Pennsylvania Secondary Education Certification**

Upon successful completion of all components of the Urban Teaching Apprenticeship Program (required coursework and student teaching apprenticeships), including obtaining clearances and completing prerequisite coursework, students receive faculty recommendation for instructional 1 certification, which is awarded by the Pennsylvania Department of Education. PDE requires that all applicants for instructional 1 certification be either U.S. citizens or permanent residents who are willing to submit a form indicating intention of applying for U.S. citizenship.

All applicants for the secondary education certificate must have completed a minimum of two English courses (one a writing course and one a British or American literature course) and two math courses. In addition, a number of courses related to the certification subject are required. Upon admission, we work with students to determine if they need additional courses to satisfy these certification requirements.

While we offer faculty recommendation for Pennsylvania certification, many of our students obtain Pennsylvania certification and then move to other states or countries. There is a **NASDTEC Interstate Agreement** to facilitate movement by teachers among states. We recommend, therefore, that students obtain Pennsylvania certification even if they plan to teach in other states.

**Urban Teaching Apprenticeship M.S.Ed. in Middle Level Education with PA Grades 4-8 Certification – Student-Centered Teaching in Urban Contexts**

The UTAP 4-8 certification program attends to these complexities through its program of study within its thematic, five-term school year, spanning 10 months and culminating with a master's degree in education and faculty recommendation for instructional 1 certification in a middle years content area.

Apprentice teachers apply coursework theory and engagement with students during their year long fieldwork experience. Apprentice teachers engage in mentored teaching in the K-8 grade range, in public or public charter schools based on their certification area. When possible, these are schools that are developing rich environments that support design thinking, such as maker-spaces, STEM classrooms, and robotics clubs.

As with our other programs, field opportunities extend across the full 10 months of our program, offering apprentices up to 800 hours of experience, in contrast to many programs where student teaching occurs over as little as 12 weeks. Our program immerses the apprentices in the teaching environment, spending more than 850 hours by the end of the 10 month program.

A total of 12 course units are required for graduation.

**Program of Study**

**Term I: SUMMER**

<table>
<thead>
<tr>

**Term III Inquiry Portfolio**

Term III portfolio organization includes sections on the inquiry question, lesson plans, feedback from instructors and videos of lessons, observational feedback and self reflection. Although it is expected that apprentices have an answer to their inquiry question by the end of Term III, the aim is to build a foundation of reflective practice.

**Fieldwork**

During the fall, apprentices are at their placement for two whole days and two half-days per week. Apprentices are expected to begin their placement as small-group instructor, transitioning to whole group teaching by the beginning of Term III. Fall placements total approximately 330 hours.
TERMS IV & V: SPRING

<table>
<thead>
<tr>
<th>Code</th>

<td></td>
<td></td>
</tr>
</tbody>
</table>

Courses
- Integrating Arts Modules
- Core Methods Modules
- 1 UTAP EDUC 545 course selected by program
- EDUC 555 Advanced Field Seminar (Elementary & Secondary Education)
- EDUC 555 Advanced Field Seminar (Elementary & Secondary Education)

Fieldwork
During early spring (January - early March), apprentices attend their placements for five whole days and are expected to facilitate whole group lessons regularly, including a two week takeover, during which they are the lead teacher for the entire time. Early spring placements total 280 hours.

During late spring (beginning of March - early May), apprentices are in their placements for five whole days, facilitating group lessons regularly. Late spring placements total 245 hours.

Comprehensive Portfolio
Culminating in Term V, students design a web-based inquiry portfolio infusing their Term III inquiry question and featuring the Term IV social action project. Evidence of performance assessments, with commentary, will appear in the final portfolio.

Specializations
In response to the growing need for teachers who are able to address the needs of specific types of schools and students, UTAP offers the opportunity to begin work in specialty areas. These specialties require additional coursework during the first year of teaching.

Language Diversity/Program Specialist in ESL: Apprentices work as student teachers in partner schools with ESL, bilingual, and dual language students and programs. Currently UTAP seeks apprentices who speak Spanish and Mandarin for bilingual classrooms. Apprentices seeking ESL program specialist certification need not be bilingual.

Special Education: During the apprenticeship year, apprentices in this specialty serve part of their time with students who have Individualized Education Plans (IEPs). Upon completion of the apprenticeship year, candidates will complete coursework for the specialization for the special education certificate.

Pennsylvania Grades 4-8 Certification
Upon successful completion of all components of the Urban Teaching Apprenticeship Program (required coursework and student teaching apprenticeships), including obtaining clearances and completing prerequisite coursework, students receive faculty recommendation for instructional 1 certification, which is awarded by the Pennsylvania Department of Education. PDE requires that all applicants for instructional 1 certification be either U.S. citizens or permanent residents who are willing to submit a form indicating intention of applying for U.S. citizenship.

All applicants for the middle level certificate must have completed a minimum of two English courses (one a writing course and one a British or American literature course) and two math courses. In addition, a number of courses related to the certification subject are required. Upon admission, we work with students to determine if they need additional courses to satisfy these certification requirements.

While we offer faculty recommendation for Pennsylvania certification, many of our students obtain Pennsylvania certification and then move to other states or countries. There is a NASDTEC Interstate Agreement to facilitate movement by teachers among states. We recommend, therefore, that students obtain Pennsylvania certification even if they plan to teach in other states.

Urban Teaching Apprenticeship M.S.Ed. in Secondary Education with PA Grades 7-12 Certification
In the Secondary Education program, coursework and intensive field experiences build on content expertise and support the development of pedagogical content knowledge.

Through the secondary education program, teachers are recommended for certification in English, math, social studies, and the sciences. Depending on your certification area, you will be placed in the STEM Inquiry concentration or the Active Learning in the Humanities concentration. Both concentrations are designed to unite apprentices’ passion for their content areas with best-practices in problem-based, student-centered pedagogies.

A total of 11 course units are required for graduation.

Courses
- EDUC 515 Field Seminar (Elementary & Secondary Education)
- 2 EDUC 554 courses selected by program
- EDUC 557 Developmental Theories: Applications with Adolescents
- EDUC 627 Teaching in the Middle and Secondary Schools (Social Studies Methods)
**Fall Fieldwork**

All teaching apprentices are assigned to a full-year placement in a Philadelphia public school that serves grades 7-12. As student-teaching apprentices, students spend mornings in their placement schools or conducting cross-visits to other schools. They take courses in the late afternoon. At the end of the term, apprentices develop a question about student-centered learning that arises from their practice in the field.

**Spring Fieldwork**

Teaching apprentices take full responsibility for teaching in their high school classrooms for five full days per week, while finishing up their remaining courses and completing their Inquiry Portfolios.

**Dual and Additional Certifications**

Teaching apprentices can take advantage of opportunities to dual certify in several areas of expertise.

**Dual certifications**

If teaching apprentices demonstrate, through transcript review, content background in multiple areas of study, they can opt to seek recommendation in 2 content areas (i.e. Math and Science; English and History, etc.). Apprentices will serve as student teachers in classes in both content areas during fieldwork and take both content methods courses.

**Additional Certifications after Graduation**

Additionally, in response to the growing demand for teachers who are able to address the needs of specific types of schools and students, UTAP offers the opportunity to further specialize in one of these areas shown below.

**Language Diversity/Program Specialist in ESL**

Apprentices work as student teachers in partner schools with ESL, bilingual, and dual language students and programs. Currently UTAP seeks apprentices who speak Spanish and Mandarin for bilingual classrooms. Apprentices seeking ESL program specialist certification need not be bilingual. This program leads to a Pennsylvania program specialist certificate and requires additional coursework during the first year of teaching.

**Special Education**

During the apprenticeship year, students in this specialty serve part of their time with students who have Individualized Education Plans (IEPs). This program leads to Pennsylvania instructional certification in special education and requires additional coursework during the first year of teaching.

**Pennsylvania Secondary Education Certification**

Upon successful completion of all components of the Urban Teaching Apprenticeship Program (required coursework and student teaching apprenticeships), including obtaining clearances and completing prerequisite coursework, students receive faculty recommendation for instructional 1 certification, which is awarded by the Pennsylvania Department of Education. PDE requires that all applicants for instructional 1 certification be either U.S. citizens or permanent residents who are willing to submit a form indicating intention of applying for U.S. citizenship.

All applicants for the secondary education certificate must have completed a minimum of two English courses (one a writing course and one a British or American literature course) and two math courses. In addition, a number of courses related to the certification subject are required. Upon admission, we work with students to determine if they need additional courses to satisfy these certification requirements.

While we offer faculty recommendation for Pennsylvania certification, many of our students obtain Pennsylvania certification and then move to other states or countries. There is a NASDTEC Interstate Agreement to facilitate movement by teachers among states. We recommend, therefore, that students obtain Pennsylvania certification even if they plan to teach in other states.

**Education Opportunities for Undergraduates**

Penn undergraduates have multiple ways to engage with Penn GSE.

1. Take a course
2. Add a minor
3. Submatriculate into a graduate program

**Courses**

Many Penn GSE courses are open to undergraduates and value their participation. Among the courses we recommend as a first step at Penn GSE are the following:

**Minor(s)**

**Urban Education Minor**

A collaboration between Penn GSE’s Urban Teacher Apprenticeship Program (UTAP), Urban Studies, and the Netter Center for Community Service, offers undergraduates a more focused, goal-directed approach to the study of education.

Three concentrations meet the academic requirements for Pennsylvania certification. An additional semester of student teaching with supervision and field seminar complete those requirements. The three concentrations are PreK-4, Grades 4-8 with content specialty, and Grades 7-12 in one content area.
The fourth concentration is called Policy, Research, and Practice, and is a more academic approach to understanding urban education. This minor is much more flexible and can be molded around student interests while respecting particular categories of courses. Many students who wish to teach elect this broad base approach to learning about urban education and then submatriculate into an M.S.Ed. program through UTAP.

Submatriculation
Undergraduate students at Penn, Haverford, Bryn Mawr and Swarthmore Colleges (a group of colleges and universities know as the Quaker Consortium) may apply to submatriculate into the Urban Teaching Apprenticeship Program M.S.Ed. programs during their senior year. Undergraduates who are admitted into the submatriculation program may take up two courses that will count toward both their undergraduate degree and the Urban Teaching Apprenticeship Program M.S.Ed.

Students wishing to submatriculate usually apply in their junior year of undergraduate study. Once they graduate from their undergraduate institution, they are automatically admitted into the M.S.Ed. degree program in elementary, middle level, or secondary education, with advanced standing. Further information about this option can be found here (http://www.gse.upenn.edu/submatriculation).

Law School
The hallmarks of the Penn Law experience are a cross-disciplinary, globally-focused legal education taught by our preeminent faculty. Students enjoy a vibrant and collegial community in which graduates are prepared to navigate an increasingly complex world as leaders and influential decision-makers. Our faculty, a renowned group of scholars in every major area of law, defines Penn Law’s intellectual vitality. More than half of the standing faculty hold advanced degrees beyond the JD, and nearly 50 percent have secondary appointments or affiliations with other departments at the University. Penn Law faculty members’ accessibility and engagement with students create a dynamic learning environment, and the school’s distinctive reputation as a small, supportive, and rigorous place for the study of law attracts some of the nation’s most competitive students. Unique among top law schools, our students truly own their educational experiences, actively contributing to a collaborative and supportive environment where they learn to solve problems while developing critical professional skills.

For more information, visit https://www.law.upenn.edu/.

Mission
At Penn Law, we believe that the next generation of lawyers will be those who are not just superbly trained in law, but also have training in related fields — such as business, communications, health, technology, international studies, social work, and education — that complement and enhance their legal expertise.

Our faculty are leaders in law and other cutting-edge disciplines, and our integrative curriculum reflects our commitment to the pursuit of cross-disciplinary learning.

In addition, our position as an essential part of the University of Pennsylvania, one of the world’s leading premier research universities, allows our students to enrich their cross-disciplinary legal education by enrolling in graduate level courses at one of our sister schools or pursuing a joint degree or certificate of study.

Penn Law’s academic programs are fully integrated with the professional and graduate schools on campus, providing students with an unparalleled opportunity to prepare for careers that engage virtually every major issue facing our society.

For more information: https://www.law.upenn.edu/

Integrative Curriculum
Our integrative curriculum ensures that students have an uniquely interdisciplinary experience - without ever leaving the Law School. However, the Law School’s partnerships with its world-class sister schools offer opportunities to build even deeper inroads in complementary fields by enrolling in graduate level courses or pursuing a Joint Degree and/or Certificate of Study. As part of the University of Pennsylvania, one of the world’s preeminent research institutions, Penn Law is the only top law school with as many elite professional schools and departments as proximate to each other on campus and as intellectually connected and seamlessly integrated into the curriculum.

For more information: https://www.law.upenn.edu/crossdisciplinary/curriculum.php

Faculty
Approximately 70 percent of faculty members hold degrees beyond the JD, and nearly half hold secondary appointments or affiliations with other Penn professional schools, departments, or centers.

Accordingly, Penn Law students experience an extraordinary faculty whose depth and breadth of intellectual interests and scholarly achievements are matched by their commitment to teaching excellence. Diverse in philosophy, approach and background, Penn Law faculty members create a vibrant and welcoming intellectual community.

A low student-to-faculty ratio and an open-door policy permit students to work directly with faculty members on projects at the heart of their varied scholarly and career interests.

Philadelphia’s central location between New York City and Washington, D.C. also enables us to attract top governmental leaders, members of the judiciary, practicing attorneys, and business leaders as adjuncts and lecturers to supplement our core curriculum and present a variety of special lectures and symposia.

For more information: https://www.law.upenn.edu/faculty/

Public Service
Public service has always been an essential feature of legal education at Penn Law. Our school was among the first institutions to require all students to complete 70 hours of public service before graduation. In 2000 Penn Law was the first school to ever receive the ABA’s Pro Bono Publica Award.

The Toll Public Interest Center (TPIC) is the hub of public service at Penn Law. TPIC oversees the Penn Law pro bono program, facilitating a wide array of pro bono and public service opportunities that focus on impactful service, personal enrichment, and professional skill development.

For more information: https://www.law.upenn.edu/publicservice/
Programs

Professional and Other Degree Programs

- Law, JD (p. 331)
- Law, LLCM (p. 329)
- Law, LLM (p. 329)
- Law, ML (p. 329)
- Law, SJD (p. 330)

Law, LLCM

The LLCM (Masters in Comparative Law) program is a one-year course of advanced study for students who have already earned their LLM degree.

While many LLCM students come from the population of Penn Law LLM alumni, applicants from other LLM programs are welcomed.

Like Penn Law LLM students, LLCM students design their own curriculum and are eligible to enroll in the Wharton Business and Law Certificate, a program designed for Penn Law graduate students taught by Wharton faculty.

Where appropriate, LLCM students are also eligible to participate in clinical programs focusing on Entrepreneurship, Intellectual Property and Technology, International Human Rights and Immigration, and Mediation.

They may also choose to participate in one of several academic journals, including the Journal of International Law and the Asian Law Review.

For more information: https://www.law.upenn.edu/admissions/grad/llcm.php

Curriculum

General Requirements

In order to receive the LLCM degree, a candidate must complete at least 16 semester hours, earned in at least three courses per semester, over two semesters. Credits earned in the LLM program cannot be counted toward the LLCM degree.

Aside from the above requirements, the LLCM degree is meant to be flexible. LLCM students build their own curriculum; most choose to deepen their understanding by concentrating on a specific area of law and are encouraged to complete a substantial piece of writing in that area.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Law, LLM

The program is a one-year, full-time course of study in advanced legal topics designed primarily for lawyers trained outside the United States. Students select courses from an extensive curriculum of specialized courses and seminars at Penn Law. Penn Law grants a generalized LLM that allows each student to design his or her own curriculum and, in doing so, may choose to focus on a particular topic. LLM students take courses alongside upper level JD students and are on campus for ten months including a five week summer program.

Penn Law LLM students are also eligible to enroll in the Wharton Business and Law Certificate, a custom designed program for Penn Law LLM students taught by Wharton faculty and industry experts selected for their teaching skills, subject expertise and ability to offer applied concepts and examples to participants. All LLM students may participate in this program which runs concurrently with the LLM program.

LLM students may also have the opportunity to enroll in clinical programs focusing on Entrepreneurship, Intellectual Property and Technology, International Human Rights and Immigration, and Mediation and to participate in academic journals including the Journal of International Law and Asian Law Review.

For more information: https://www.law.upenn.edu/admissions/grad/LLM.php
Bar Association regulations do not permit the application of ML classes toward a JD degree.

For more information: https://www.law.upenn.edu/admissions/master-in-law/

Curriculum
Eight courses are required to complete the Master in Law degree:

- 3 required ML foundational courses
- 1 elective ML foundational course
- 1 elective course from the JD curriculum (excluding 1L required courses)
- 3 electives from either the JD curriculum or the ML curriculum

Coursework may be completed on a full-time or part-time basis. Members of the Penn community may take one or more ML courses as stand-alone courses before or without enrolling in the ML degree program. Note that a maximum of two ML courses taken prior to matriculation in the ML program may be applied toward the ML degree if request is made and approval is given by the ML program.

Electives
Select 1 course from JD curriculum

Select 3 courses from either JD or ML curricula

1 Excluding 1L required courses.
2 ML offerings, designed for non-lawyers, are listed with the subject code LAWM.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Law, SJD
Penn Law's Doctor of the Science of Law (SJD) program advances legal scholarship by producing graduates who have made significant contributions to their chosen area of study and who are prepared to become leaders in the international academic community.

The SJD is the highest law degree offered by the University of Pennsylvania. All applicants must have already earned an LLM, JD, or equivalent degree from Penn Law or another comparable institution.

For more information: https://www.law.upenn.edu/admissions/grad/sjd.php

Curriculum
The SJD is an advanced law degree requiring the written submission and oral defense of a major piece of independent research that makes an original and substantive contribution to legal scholarship ("the dissertation"). An LLM thesis may be incorporated into the doctoral dissertation, if appropriate.

Completion of the SJD ordinarily will be within three years following admission to the program, although the SJD candidate may petition for an extension. The Graduate Programs Committee, with the approval of a student's dissertation committee, may grant extensions to students in good standing.

First Year Requirements
All SJD students are required to spend the first full academic year of their SJD program in residence at the Law School. During the first year, students are expected to:

- Secure the consent of a faculty member from among Penn Law's standing faculty to serve as an advisor. The advisor will also serve as the chair of the student's dissertation committee;
- Complete and submit to their advisor a revised research proposal and a bibliography that substantially builds on the initial proposal submitted with the student's application;
- Complete a specially designated course or seminar offered annually for SJD students; and
- Complete a one-semester course in their area of specialization chosen from among those offered to upper level JD students.

In addition, first year SJD students may apply to serve as legal writing fellows who assist LLM students. SJD students who are accepted to be legal writing fellows typically receive a small stipend.

Second Year Requirements
If the faculty advisor approves the proposal, during the second year the student is expected to:

- Submit a dissertation outline to their advisor;
- Assemble their full dissertation committee, which must consist of three members, two of whom (including the chair) must be members of Penn Law's standing faculty. The third dissertation committee member may, in appropriate cases, be selected from outside the Law School. Determinations regarding the inclusion of a committee member from outside the Law School shall be made by the student's advisor in consultation with the Deputy Dean for International Affairs.

Third Year Requirements
If the faculty advisor approves the outline, during the third year the student is expected to:
• Submit a draft dissertation to their committee (target deadline – October 1);
• Submit a completed dissertation to their committee (target deadline – February 15);
• Orally defend their dissertation before the dissertation committee.

Dissertation Requirements
Dissertations must make an original and substantial contribution to legal scholarship. This requirement is ordinarily satisfied by work equivalent in scale and quality to a book, extended monograph, or series of scholarly articles reflecting intensive and creative research with respect to a specific topic, problem, or area of law. The work, both in content and form, must be of publishable quality.

The oral defense of the dissertation occurs after the members of the dissertation committee determine that the dissertation substantially satisfies the requirements of the program.

Following a successful dissertation defense, an SJD candidate must submit three copies of their dissertation to the Executive Director for Graduate Programs for placement in Biddle Law Library.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Law, JD
Penn Law offers a full-time program leading to the JD, the first professional degree in Law. Applicants have completed their undergraduate degrees and, oftentimes, advanced degrees in a broad array of disciplines; many have work experience prior to attending law school. On occasion, Penn Law has admitted international students who hold a law degree from outside the United States but who want to earn a JD degree in the United States. Penn Law also accepts a select group of Penn undergraduates who submatriculate, combining their bachelor’s degrees and their JDs.

Penn Law’s program of legal education, combining its rich, interdisciplinary curriculum, varied co-curricular activities, and pro bono responsibilities, prepares its students for admission to the bar and to serve as effective, ethical, and responsible members of the legal profession. Each student will be able to do the following:

• Demonstrate a core knowledge and understanding of substantive and procedural law in a number of different subject areas;
• Engage in legal analysis and reasoning, conduct efficient and effective legal research, apply problem solving skills, and present findings, analyses, and recommendations efficiently and effectively in both written and oral communication;
• Work collaboratively;
• Demonstrate an understanding of the interdisciplinary nature of law and the contributions and benefits to legal analysis and problem solving that other disciplines can make;
• Exercise proper professional judgment and fulfill ethical responsibilities to clients, the profession, and society in general; and
• Utilize a range of professional skills that facilitate active, competent and ethical participation in the legal profession.

For more information: https://www.law.upenn.edu/admissions/jd/

Curriculum
JD candidates are required to complete the following:

• 86 semester hours during 6 semesters in law school residence
  • No more than 22 semester hours may be earned in co-curricular activities
  • One course in Professional Responsibility
  • 6 or more semester hours of experiential learning
  • Pro Bono Requirement
  • A scholarly research and writing project

The First Year (1L)
Penn Law’s first-year curriculum comprises five semester-long required core courses and two spring-term electives, as well as a year-long Legal Practice Skills course.

The Second and Third Years (2L & 3L)
Across the second and third years, course selection is entirely elective and students have a wide range – between 80 to 100 courses, seminars, clinics, and externships per semester – from which to choose.

Students may receive up to 12 semester hours toward their JD graduation requirements for graduate-level courses taken in other departments at Penn upon establishing that these courses will contribute to their legal educations.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Perelman School of Medicine

The University of Pennsylvania is the oldest and one of the finest medical schools in the United States. Penn is rich in tradition and heritage and at the same time consistently at the forefront of new developments and innovations in medical education and research. Since its founding in 1765 the School has been a strong presence in the community and prides itself on educating the leaders of tomorrow in patient care, biomedical research, and medical education.

At Penn academic excellence, as well as compassion for the patients we are privileged to serve, are stressed. Skillful compassion is truly a hallmark of the Penn learning experience. The Perelman School of Medicine at the University of Pennsylvania consistently ranks among the top five in US News and World Report’s rankings of research-oriented medical schools.

As the nation’s first medical school and home to the first teaching hospital, the Perelman School of Medicine has a long tradition of academic excellence and scientific discovery. Building on this tradition, our innovative, interdisciplinary research programs continue today to pave the way for a future of new paradigms in cutting-edge science. As an internationally renowned community of scientists and physicians, we are dedicated to both advancing knowledge and fostering a culture of excellence in training the next generation of scientific leaders. Our faculty are at the forefront of the biomedical revolution, and we are committed to sustaining a vibrant intellectual environment, with the ultimate goal of translating ground-breaking discoveries into medical therapies that will eradicate disease and improve health care around the world.

Our mission is to advance knowledge and improve health through research, patient care, and the education of trainees in an inclusive culture that embraces diversity, fosters innovation, stimulates critical thinking, supports lifelong learning, and sustains our legacy of excellence.

For more information, visit: https://www.med.upenn.edu/psom/overview.html.

Biomedical Graduate Studies

Overview

Biomedical Graduate Studies was established in 1985 and serves as the academic home within the University of Pennsylvania for nearly 800 students pursuing a PhD in the basic biomedical sciences, including approximately 150 students pursuing a coordinated MD/PhD or VMD/PhD degree program. BGS provides training and administration through seven graduate groups, some of which have distinct sub-specialty areas. The Perelman School of Medicine is the home school for BGS, and approximately 500 PSOM faculty members participate in BGS as course directors, research mentors, program leaders, and in other educational roles. Another 150 BGS faculty members have primary academic appointments in the other associated health schools (Veterinary, Dental, or Nursing) or in Arts & Sciences, Engineering & Applied Science, or Wharton. BGS faculty members also include researchers based in associated institutes, including the Wistar Institute and the National Institutes of Health. Consequently, BGS students have the opportunity to learn about virtually any area of modern biomedical research.

For more information, visit http://www.med.upenn.edu/bgs/.

Mission

The mission of Biomedical Graduate Studies is to provide each student with a broad-based foundation in a core academic discipline, flexible, interdisciplinary options for scientific and career development; and rigorous research training. Each graduate group has its own academic mission, leadership, and staff, but there is often significant overlap among the groups in respect to faculty membership, courses offered, policies, and procedures. BGS students are admitted with a full-funded fellowship for the duration of their training and may participate in a variety of optional certificate programs and student-run affinity groups for the exploration of academic and professional development interests.

To date, roughly 2500 students have obtained a PhD in BGS. Virtually all BGS graduates are employed in fields that make use of their PhD training. The majority of BGS alumni engage in a postdoctoral research period, after which 39% conduct research in academia, 22% conduct research in industry, 8% are engaged primarily in post-secondary teaching, 8% are in communications, and the remainder are based in a variety of related fields, including consulting, policy, patent law, and grants management.

Master's & Certificate Programs

Overview

The Perelman School of Medicine Master's & Certificate Programs (MaC) leverages the strengths of Penn Medicine, a world-renowned academic medical center, to train the next generation of researchers and professionals who will contribute to the integrated health care system. MaC includes twelve professional master’s degrees and eleven certificate programs, totaling approximately 500 students. These programs prepare students for careers in health care practice, research, and patient care.

Each MaC program is independently managed by interdisciplinary faculty and staff. The MaC Program Office enables its programs to pursue their goals within the university environment through academic administrative support and collaborations amongst programs and between schools in the university.

For more information, visit https://www.med.upenn.edu/psom/masters.html

Mission

The mission of the Perelman School of Medicine (PSOM) Master’s & Certificate Programs (MaC) is to contribute to the integrated health care system by preparing students for careers in health care practice, research, and patient care. Each program embodies its own academic mission and contributes to PSOM’s mission to advance knowledge and improve health through research, patient care, and the education of trainees in an inclusive culture that embraces diversity, fosters innovation, stimulates critical thinking, supports lifelong learning, and sustains our legacy of excellence.

As the nation’s first medical school and home to the first teaching hospital, the Perelman School of Medicine (PSOM) enjoys a long tradition of academic excellence and scientific discovery.

The PSOM Learning for Life program is a four-year multidisciplinary curriculum comprising six modules organized around three themes: the science of medicine, the technology and practice of medicine, and professionalism and humanism. The curriculum emphasizes self-directed lifelong learning and small-group instruction. The Henry A. Jordan Medical Education Center itself plays a prominent role in the training of future physicians and scientists; it is among the first medical
education spaces in the nation physically integrated into active clinical and research facilities.

PSOM medical students can choose from approximately 150 electives and have one and a half years to explore the possibilities. PSOM also offers extensive MD+ options, including eight master’s degrees and 10 certificates available through its various schools. Penn’s 12 schools share a single contiguous campus, providing exceptional opportunities for student to engage interprofessionally.

For more information: https://www.med.upenn.edu/student/

Research
As the nation’s first medical school and home to the first teaching hospital, the Perelman School of Medicine has a long tradition of academic excellence and scientific discovery. Building on this tradition, our innovative, interdisciplinary research programs continue today to pave the way for a future of new paradigms in cutting-edge science. As an internationally renowned community of scientists and physicians, we are dedicated to both advancing knowledge and fostering a culture of excellence in training the next generation of scientific leaders. Our faculty are at the forefront of the biomedical revolution, and we are committed to sustaining a vibrant intellectual environment, with the ultimate goal of translating ground-breaking discoveries into medical therapies that will eradicate disease and improve health care around the world.

The School’s research enterprise incorporates all areas of contemporary biomedical investigation, with the advantage of being unified on a single campus. The School is comprised of 28 basic and clinical departments, with over 2,500 faculty members and more than 2,500 students and trainees. In fiscal year 2018, the School received $814 million in support of its research activities from extramural sponsors, including $424.8 million from the National Institutes of Health, ranking fifth in the nation among all academic medical institutions.

Faculty at the Perelman School of Medicine work across disciplines to expand the frontiers of scientific knowledge while translating significant breakthroughs into tangible health benefits to improve the lives of patients. Within its diverse, interdisciplinary network of expertise, resources, and exceptional faculty, staff and trainees, the Perelman School of Medicine epitomizes collaborative research across departments and schools, as exemplified by our centers and institutes. These include the Abramson Cancer Center, one of 49 Comprehensive Cancer Centers in the country approved and designated by the National Cancer Institute. The Penn Cardiovascular Institute, the Penn Center for AIDS Research, the Institute for Diabetes, Obesity, and Metabolism, the Mahoney Institute for Neurosciences, the Center for Orphan Disease Research and Therapy, the Institute for Translational Medicine and Therapeutics, the Penn Institute for Biomedical Informatics and the Penn Epigenetics Institute. The specific initiatives of these and other centers, institutes and departments are outlined within this website, along with our exceptional biomedical core facilities and research training programs.

For more information, visit: https://www.med.upenn.edu/research/welcome.html.

Inclusion and Diversity
Lasting commitment is born of genuine appreciation for that which we aspire to be. Penn Medicine’s commitment to inclusion and diversity is more than words echoing our evolving society; it is a commitment backed by actions that are the foundation of our eminence, core values, and the strategic priorities that drive how we discover, educate, and serve the world.

Our efforts are aimed at supporting the many innovative programs underway, as well as exploring new opportunities to embrace diversity and broaden access to people of all ethnicities, historical traditions and economic backgrounds, genders, religions and disabilities, and respecting sexual orientation and veteran status.

Cell and Molecular Biology: Cancer Biology, PhD

Cell and Molecular Biology

The Cell and Molecular Biology Graduate Group (CAMB) is an interdisciplinary graduate program, providing rigorous training in modern cell and molecular biology, preparing students for leadership careers in biomedical research. Within this integrated program are six discipline areas: Cancer Biology, Cell Biology, Physiology, and Metabolism; Developmental, Stem Cell and Regenerative Biology; Gene Therapy and Vaccines; Genetics and Epigenetics; and Microbiology, Virology and Parasitology. Program faculty include more than 300 scientists representing 35 departments from the Perelman School of Medicine, the Schools of Arts and Sciences, Dental Medicine, and Veterinary Medicine, Children’s Hospital of Philadelphia, the Wistar Institute and Fox Chase Cancer Center. The research efforts of these scientists are diverse in their focus, experimental system, methodology, and represent the leading edge of basic and translational biomedical science.

Students from colleges and universities around the nation and the world are enrolled in the program, selecting one discipline area based on their scientific interests, yet have access to the full breadth of curricular and research opportunities provided by this large and diverse program. Our students participate in core courses in cell and molecular biology, specialized coursework in one or more discipline areas, and original hypothesis-driven thesis research. Upon completion of the PhD, they pursue successful research careers at top academic institutions, in the biotech and pharmaceutical industries, and in other biomedicine-related career paths.

For more information: http://www.med.upenn.edu/camb/

Cancer Biology

The Program in Cancer Biology provides students an opportunity to undertake concentrated study of the basic biological processes that underlie the control of cell growth and metabolism, and how such processes are disrupted during the initiation and progression of cancer. The program stresses the importance of fundamental genetic and molecular pathways regulating cell proliferation, differentiation, movement, and survival. Program faculty conduct research in oncogenesis, tumor suppressor genes, cell cycle control, apoptosis, tumor virology, angiogenesis, cell migration/metastasis, and cancer immunology, cancer genetics and epidemiology. Students present in a research-in-progress seminar series and attend participate in the Abramson Family Cancer Research Institute seminar series.

Cell Biology, Physiology, and Metabolism
Modern cell biology is a dynamic discipline that integrates multiple fields, including molecular biology, biochemistry, biophysics, microbiology, physiology, developmental biology, cytology and genetics. Cell biologists investigate the basic structural and functional units of life: cells that compose all living organisms. Once reliant primarily on microscopic methods, cell biologists now take advantage of cutting edge methods in ultrastructure, biochemistry, genetics and molecular biology, and utilize a diverse range of model organisms. Program faculty conduct research in cellular metabolism; cell motility, the cytoskeleton, and muscle physiology; intracellular trafficking and organelle function; membrane transport; and signal transduction and cell cycle regulation.

Cell and Molecular Biology: Developmental, Stem Cell, and Regenerative Biology, PhD

Cell and Molecular Biology

The Cell and Molecular Biology Graduate Group (CAMB) is an interdisciplinary graduate program, providing rigorous training in modern cell and molecular biology, preparing students for leadership careers in biomedical research. Within this integrated program are six discipline areas: Cancer Biology, Cell Biology, Physiology, and Metabolism; Developmental, Stem Cell and Regenerative Biology; Gene Therapy and Vaccines; Genetics and Epigenetics; and Microbiology, Virology and Parasitology. Program faculty include more than 300 scientists representing 35 departments from the Perelman School of Medicine, the Schools of Arts and Sciences, Dental Medicine, and Veterinary Medicine, Children's Hospital of Philadelphia, the Wistar Institute and Fox Chase Cancer Center. The research efforts of these scientists are diverse in their focus, experimental system, methodology, and represent the leading edge of basic and translational biomedical science.

Students from colleges and universities around the nation and the world are enrolled in the program, selecting one discipline area based on their scientific interests, yet have access to the full breadth of curricular and research opportunities provided by this large and diverse program. Our students participate in core courses in cell and molecular biology, specialized coursework in one or more discipline areas, and original hypothesis-driven thesis research. Upon completion of the PhD, they pursue successful research careers at top academic institutions, in the biotech and pharmaceutical industries, and in other biomedicine-related career paths.

For more information: http://www.med.upenn.edu/camb/

Developmental, Stem Cell, and Regenerative Biology

Students within Developmental, Stem Cell, and Regenerative Biology address key questions in developmental biology, stem cell/niche interactions, and regenerative biology. The central focus that unites these areas is the compelling drive to understand how tissues are first formed, how they are maintained, and how they can be repaired. Students participate in interdisciplinary training in gametogenesis; embryonic and fetal development; nervous system development and its wiring; the genesis of tissues and organ systems as well as their homeostasis, metabolism and repair; with goal of understanding the basic biology of these processes, as well as their role in disease. Complementing these areas is work on natural and induced Embryonic Stem Cells to understand disease processes in vitro in order to develop cell replacement strategies for therapy. In conducting their research students utilize all tools of the modern genomic era and a wide variety of experimental model systems.

Upon completion of the PhD, they pursue successful research careers at top academic institutions, in the biotech and pharmaceutical industries, and in other biomedicine-related career paths.

For more information: http://www.med.upenn.edu/camb/

Gene Therapy and Vaccines

The Gene Therapy and Vaccines Program focuses on the use of animal and human gene transfer for therapeutic purposes and for vaccination. Program faculty conduct research in basic cell biology, molecular biology, developmental biology, molecular physiology, virology and immunology. While the goals of the research are disease-based with the objective of developing prophylactic and therapeutic applications, student training focuses on a basic understanding of disease pathobiology and achieving efficient and effective gene transfer in humans. Students contribute to research of cystic fibrosis, hemophilia, lysosomal storage disease, inherited blindness, cancer, cardiovascular diseases, and immunologic and infectious diseases. Study of vaccines for prophylactic, as well as therapeutic applications are emphasized. Students participate in month research seminar series, as well as present in a bi-weekly research in progress seminar.

Genetics and Epigenetics

The Program in Genetics and Epigenetics provides students an opportunity to undertake concentrated study in the areas of model organism genetics, human genetics, transcriptional and post-transcriptional gene regulation, epigenetics, genomics and bioinformatics. Program faculty include members of the Genetics Department, Epigenetics Program, and other basic science and clinical departments at Penn, The Children’s Hospital of Philadelphia, and the Wistar Institute. Students also have the opportunity to undertake training in the application of computational and modeling approaches in genetics, epigenetics and genomics.

Cell and Molecular Biology: Microbiology, Virology, and Parasitology, PhD

Cell and Molecular Biology

The Cell and Molecular Biology Graduate Group (CAMB) is an interdisciplinary graduate program, providing rigorous training in modern cell and molecular biology, preparing students for leadership careers in biomedical research. Within this integrated program are six discipline areas: Cancer Biology (https://upenn-curr.courseleaf.com/graduate/programs/cell-molecular-biology-cancer-biology-phd); Cell Biology, Physiology, and Metabolism (https://upenn-curr.courseleaf.com/graduate/programs/cell-molecular-biology-cell-biology-physiology-metabolism-phd); Developmental, Stem Cell and Regenerative Biology (https://upenn-curr.courseleaf.com/graduate/programs/cell-molecular-biology-developmental-stem-cell-regenerative-biology-phd); Gene Therapy and Vaccines (https://upenn-curr.courseleaf.com/graduate/programs/cell-molecular-biology-gene-therapy-vaccines-phd); Genetics and Epigenetics (https://upenn-curr.courseleaf.com/graduate/programs/cell-molecular-biology-genetics-epigenetics-phd); and Microbiology, Virology and Parasitology (https://upenn-curr.courseleaf.com/graduate/programs/cell-molecular-biology-microbiology-virology-parasitology-phd). Program faculty include more than 300 scientists representing 35 departments from the Perelman School of Medicine, the Schools of Arts and Sciences, Dental Medicine, and Veterinary Medicine, Children's Hospital of Philadelphia, the Wistar Institute and Fox Chase Cancer Center. The research efforts of these scientists are diverse in their focus, experimental system, methodology, and represent the leading edge of basic and translational biomedical science.

Students from colleges and universities around the nation and the world are enrolled in the program, selecting one discipline area based on their scientific interests, yet have access to the full breadth of curricular and research opportunities provided by this large and diverse program. Our students participate in core courses in cell and molecular biology, specialized coursework in one or more discipline areas, and original hypothesis-driven thesis research. Upon completion of the PhD, they pursue successful research careers at top academic institutions, in the biotech and pharmaceutical industries, and in other biomedicine-related career paths.

For more information: http://www.med.upenn.edu/camb/mvp.shtml

Microbiology, Virology, and Parasitology

The Program in Microbiology, Virology, and Parasitology provides students an opportunity to undertake concentrated study in the molecular and cellular biology of viral and bacterial pathogenesis and parasitology. Program faculty conduct research in a broad range of disciplines, including Bacteriology, Emerging Infectious Diseases, Immune Response, Microbial Genomics and Evolution, Parasitology, Tumor Virology, Virology, and Host Microbiome. Viruses, parasites, prions, and bacteria are a major cause of human morbidity and mortality. Disease resulting from HIV, malaria, and tuberculosis are becoming more prevalent. The threat of emerging infectious diseases, such as Zika and West Nile viruses, and bioterrorism also calls for increased research in the area of microbiology. Students study human pathogens, as well as their interplay with host resident microbial populations, learning much about normal cell biology, molecular biology, and immunology, as well as developing strategies for the prevention and treatment of infectious diseases.

Epidemiology and Biostatistics: Biostatistics, MS

The goal of the MS program is to train students in the basic theory and applications of statistical methods, as applied to problems in the biomedical sciences. The program typically consists of two years of full-time study, including the preparation of a Master’s thesis. Requirements include courses in probability, mathematical statistics, and statistical methods including linear models, longitudinal data analysis, survival analysis, statistical computing, and applied data analysis.

Epidemiology and Biostatistics: Biostatistics, PhD

The PhD program in biostatistics is designed to prepare students to be independent researchers in the development of statistical methodologies and in the appropriate and innovative application of these methodologies to biomedical research problems. In the first five semesters of the program, students complete a series of courses in both theory and applied methodology, engage in individually mentored research experiences, explore statistical collaboration, and complete the qualifications examination. Within this period, students also identify a dissertation research problem and an advisor and present a research proposal as part of the candidacy examination. Students typically defend their dissertations and graduate within five years of matriculation.

1. Students should take BSTA 699 Lab Rotation if mentor is not yet selected or BSTA 899 Pre-Dissertation Research if mentor has been selected.
Epidemiology and Biostatistics: Epidemiology, PhD

The mission of the PhD program in Epidemiology is to train independent researchers in the development and application of epidemiologic methods and to prepare them for positions as scientific leaders in academia and industry. The PhD is a research degree; it indicates the highest attainable level of scholarship, and a commitment to a research career. The PhD does not represent merely the accumulation of course credits, but rather the development and completion of a well-designed and conscientious program of scientific investigation that makes a unique contribution to the field of epidemiology.

Genomics and Computational Biology, PhD

Genomics and computational biology are now at the center of biomedical research. These disciplines take a holistic approach to ask about the origins, functions, and interactions of whole systems, using both experimental and theoretical work. Therefore, these studies require knowledge, skills, and, most importantly, synthesis and integration of biology, computer science, mathematics, statistics, and engineering.

This synthesis and integration requires a new generation of scientists that thrives in cross-disciplinary research. This can include molecular, cellular, and organismal biology (including genetics), mathematics, statistics, chemistry, and engineering. The goal of the GCB program is to train students who are experts in one or more of these disciplines and well versed in the others. We provide a comprehensive training program in Genomics and Computational Biology that gives students a broad foundation in the biological and quantitative sciences along with practical experience in computational and experimental genomics. The knowledge gained in this program will serve students in their careers as technology progresses.

1 Students who place out of EPID 526 and EPID 527 should take EPID 600.
2 Students should take EPID 699 Lab Rotation if a mentor is not yet selected or EPID 899 Pre-dissertation Research if a mentor has been selected.
Recognizing the need to create an environment where researchers could be adequately trained in the multifaceted aspects of immunobiology, Penn became the first medical school to establish a separate degree-granting PhD program in Immunology. The faculty of the Immunology Graduate Group (IGG) are drawn from across the University of Pennsylvania and the University of Pennsylvania Health System, encompassing a broad spectrum of research interests; the IGG has also established a partnership with the National Institutes of Health in Bethesda, MD. The partnership brings to the IGG the extraordinary resources and scientific expertise present at the NIH, one of the largest and most renowned biomedical research centers in the world. Students have the opportunity to interact with NIH faculty in a variety of ways, including conducting a lab rotation or thesis work at the NIH.

At present, there are approximately 80 faculty members in Penn's Immunology Graduate Group, encompassing a broad spectrum of research studies. Faculty research includes studies on the development and regulation of the immune system, host-pathogen interactions, the fundamental molecular and cellular biology of the immune system, structural studies of immunologically relevant molecules and translational immunology. Research results are being utilized in both experimental models and clinical trials attempting to fight diseases.

## NeuroCore, PhD

Neuroscience is a collaborative and interdisciplinary PhD program that provides training for careers in neuroscience research, teaching and more. Our training program is designed to provide a strong foundation of neuroscience knowledge while at the same time taking into account each student’s strengths, needs and career goals.

Virtually all aspects of traditional neuroscience are reflected in the research programs of the 160 faculty members who participate in NGG training, including computational, systems, cellular and molecular, developmental, behavioral, and cognitive neuroscience, along with the neurobiology of disease. NGG faculty members represent 30 academic departments in the schools of Arts and Sciences, Engineering and Applied Science, Wharton Business, Veterinary Medicine, Dental Medicine, and Nursing, as well as the Perelman School of Medicine.

Pharmacology, PhD

Pharmacological sciences represent an extremely large field of modern science, intertwined with many other biomedical disciplines: cancer and cardiovascular pharmacology, cell signaling, neuropharmacology, pharmacogenetics, pharmacological chemistry, environmental health sciences, and targeted therapeutics. Core courses include Cell Biology, Fundamentals in Pharmacology, Human Physiology, and Medical Pharmacology. Electives are chosen by the student to suit their interests. Pharmacology students may rotate in labs doing very different types of research, to enrich their background and allow un hurried, instructed selection of direction of their future thesis research.

Bioethics, MBE

The Master of Bioethics (MBE) is an interdisciplinary degree offered by the Department of Medical Ethics & Health Policy. The MBE degree program gives students broad exposure to the full range of topics and issues in contemporary bioethics, drawing on the expertise of distinguished faculty and visiting fellows.

The program admits highly accomplished professionals who work in the bioethics-related fields of medicine, nursing, law, dentistry, social work, genetic counseling, regulatory affairs, public policy, veterinary medicine, and industry, as well as outstanding students in other professional degree programs at the University of Pennsylvania.

The MBE is designed for the following audiences:

- Mid-career and senior health care professionals, including lawyers, physicians, nurses, health care administrators, pharmaceutical employees, social workers, those working in public policy or regulatory affairs, dentists, veterinarians, research associates, other allied health professionals, and other practitioners and teachers who wish to expand their area of competency to include bioethics;
- Students already enrolled or admitted to a Penn graduate or professional degree program, such as medicine, law, nursing, or a PhD program, who want to combine bioethics with their primary training;
- Post-baccalaureate students with a special interest in the field who plan further graduate study in law, medicine, humanities, or social sciences. This degree is not sufficient training for job placement

For more information: http://medicalethicshealthpolicy.med.upenn.edu/master-of-bioethics

Curriculum

The MBE requires the completion of 9 course units.

### Biomedical Informatics, MBMI

The Master of Science in Biomedical Informatics (MBMI) program seeks to provide state-of-the-art graduate-level educational and training opportunities in biomedical informatics (BMI), adhering to the best practices as established by national competency standards, to create the next generation of biomedical informatics and practitioners.

For more information: [https://www.med.upenn.edu/mbmi/curriculum-overview.html](https://www.med.upenn.edu/mbmi/curriculum-overview.html)

### Curriculum

The MBMI program requires students to complete 10 course units, including required courses, electives, and a capstone project. In addition, students must complete the online HIPAA and CITI training modules required of all PSOM students. MBMI students are also expected to participate in the annual Informatics Day, organized by the Institute for Biomedical Informatics.

The MBMI course sequence is flexible, allowing students to pursue required courses and electives at their own pace, provided they complete all requirements within 4 years of matriculation. A typical student might complete the program in two years.

### Clinical Epidemiology, MSCE

The MSCE is an intensive program for accomplished medical professionals who seek to further their skills as academic investigators. Applicants who possess an advanced degree in medicine, nursing or another health field learn to design controlled epidemiological studies and acquire biostatistical skills that relate directly to their research interests. With close guidance from a primary mentor and a mentorship team, students will gain the ability to hone precise research questions and pursue reliable, complex answers.

For more information: [https://www.cceb.med.upenn.edu/master-science-clinical-epidemiology-msce](https://www.cceb.med.upenn.edu/master-science-clinical-epidemiology-msce)

### Curriculum

The MSCE degree is comprised of 14 course units consisting of required core courses, electives, and mentored thesis credits. MSCE students generally register for two course units per term. It is expected that all students receive a B- or better in each of the courses being applied to the MSCE degree.

### Non-Academic Requirements

- HIPAA Training
- CITI Training
- CCEB Seminars (25)
- Bioethics/RCR Training
- IRB Approval and/or Exemption

| Total Course Units | 14 |

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Additional electives may be taken in place of two thesis credits, provided the student’s thesis is progressing on schedule and their mentor has approved of the plan. All students are required to complete a minimum of three course units of EPID 900.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Biomedical Informatics, Certificate**

The IBI Certificate in Biomedical Informatics is a four-course sequence for non-informatics professionals designed to build the informatics community at Penn and to train informatics-literate clinicians and researchers who will have a broad understanding of the field of biomedical informatics.

Students in the Certificate in Biomedical Informatics Program can expect to obtain a working knowledge of biomedical informatics, its history, the current landscape, and future directions of the field. The four courses in this program also form the core of the Master of Biomedical Informatics (MBMI) program, so certificate students can expect to interact with a variety of students with diverse interests in informatics.

Certificate students who wish to expand their biomedical informatics skills in a degree program may apply to the MBMI program and, if accepted, may transfer credit from the certificate program to meet the requirements of the Master’s program.

For more information: [https://www.med.upenn.edu/mbmi/certificate.html](https://www.med.upenn.edu/mbmi/certificate.html)

**Curriculum**

This certificate requires the completion of four course units.

The certificate curriculum is designed to:

- Provide exposure to the field to those working in biomedical practice or research who would like to be “informatics aware”
- Build a community of those who can collaborate with informaticians and health information technology personnel
- Provide those with an interest in informatics opportunities to learn more about the field

Additionally, each course include hands-on experience in an active learning environment to increase skills and reinforce knowledge, such as:

- Informatics journal club to build critical appraisal skills
- Programming exercises
- Database development and manipulation assignments
- Practice in proposal writing and oral presentation for informatics projects

**Additional program requirements**

- Collaborative Institutional Training Initiative online training in Responsible Conduct of Research
- Human Subject Research Training
- Participation in the annual Informatics Day Symposium

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Clinical Ethics Mediation, Certificate**

This certificate option is only available to students who are enrolled in or have completed the Master of Bioethics program.

The Department of Medical Ethics & Health Policy now offers the Penn MBE Clinical Ethics Mediation Certificate. This Certificate can be added to the Master of Bioethics degree, offering students (and alumni) the opportunity to receive additional clinical ethics mediation training right here at Penn.

Students interested in pursuing the combined MBE/Clinical Ethics Certificate will complete an application for the certificate program, in addition to the MBE application. This additional application can be completed at the time of the original MBE application, or once the student is already admitted to the MBE program. Students will be granted admission based on professional goals related to clinical ethics. Prior experience in clinical ethics is not a required admissions criterion.

Students may complete the MBE and the Certificate concurrently, graduating both with the MBE and the Certificate in the same semester. Alternatively, a student can graduate with the MBE and then complete and be awarded the Certificate at a later date. All students who do not complete both at the same time are encouraged to work with the MBE office to create a plan for completion. Students who graduate before completing all of the Certificate requirements will have at most 2 years to complete the remaining coursework. MBE alumni who have not done any coursework toward the Certificate will have up to 5 years after receiving their MBE degree to apply for the Penn MBE Clinical Ethics Mediation Certificate.

For more information: [http://medicaledicethicshealthpolicy.med.upenn.edu/master-of-bioethics/certificate-in-clinical-ethics-mediation](http://medicaledicethicshealthpolicy.med.upenn.edu/master-of-bioethics/certificate-in-clinical-ethics-mediation)

**Curriculum**

The Certificate requires the completion of 12 course units: the 9 course units required for the MBE degree, and then an additional 3 additional course units for the Certificate.

   BIOE 545  Mediation Intensive I
   BIOE 546  Mediation Intensive II
   BIOE 547  Mediation Intensive III
   BIOE 548  Mediation Intensive IV
Total Course Units 12

¹ Each of the Mediation Intensive courses consists of 4 days of intensive practical training in mediation. To receive credit, students must also complete a 10-15 page writing requirement, due at the end of the semester in which the mediation course is being taken.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Genetic Counseling, MSGC**

The MSGC program provides a comprehensive educational environment for future genetic counselors that balances the importance of patient-focused care, scientific knowledge, research, and innovative technology. With an outstanding faculty and access to clinical opportunities at some of the nation’s premier healthcare facilities, the program prepares students to be successful genetic counseling professionals in the rapidly evolving field of genetics.

Preparing to become a genetic counselor involves education in three areas: laboratory and clinical medicine, counseling, and research. Students in the University of Pennsylvania’s MSGC program will develop a comprehensive understanding of the complex clinical management of patients with genetic conditions as well as the options for diagnostic testing. Coursework in counseling helps students cultivate the knowledge and skills to address the needs of patients, families, community advocacy groups and other health professionals. The program has a strong emphasis on clinical, translational, and implementation research. Graduates will gain both the research and writing skills necessary to develop and publish literature relevant to the profession.

The curriculum covers advanced genetics, genetic testing technologies, clinical medicine and genetics, counseling techniques, case management, psychosocial assessment, principles of medical ethics and public health, patient advocacy, research design and professionalism. Many courses will have Penn and CHOP genetic counselors as course coordinators and lecturers.

The Arcadia University Master of Science in Genetic Counseling has transferred sponsorship, faculty, and curriculum to the University of Pennsylvania and will now be known as the University of Pennsylvania Master of Science in Genetic Counseling. The Arcadia University Master of Science in Genetic Counseling program is fully accredited by the Accreditation Council for Genetic Counseling (ACGC) through 2024. The program meets the requirements of the ACGC for curriculum content, clinical experience, and overall program design. Graduates of the program are qualified to sit for the certification examination offered by the ABGC and to apply for state licensure. The overall pass rate on the ABGC certification exam is 95% for students in our last five graduating classes. Transfer of this accreditation to the University of Pennsylvania has been approved by the ACGC.

For more information: https://www.med.upenn.edu/geneticcounseling/

**Curriculum**

The program requires the completion of 14 required course units as well as clinical internships, genetic counseling rounds, professional development seminars, advocacy experiences, and an approved research master’s thesis. Successful completion of each course requires a grade of B- or higher.

The core curriculum will provide the foundation necessary to prepare students for the ever-changing practice of clinical genetics and satisfies the requirements set forth by the ACGC that allow program graduates to sit for the ABGC certification examination.

Medical Ethics, MSME

The Master of Science in Medical Ethics (MSME) provides rigorous methodological and conceptual training in bioethics for postdoctoral scholars who aim to become academic bioethicists competing for and conducting externally funded empirical research. Although there are many bioethics-related masters-level graduate programs in the United States, none of these programs is designed to train physician-scientists or other scholars aspiring to empirically oriented bioethics faculty positions in academic medical centers and universities. Penn’s MSME program fills this important need.

For more information: http://medicalethicshealthpolicy.med.upenn.edu/education-master-of-science-in-medical-ethics

Curriculum

Students complete 14.0 course units and must do so with a GPA of 3.0 or higher. Additionally, students must achieve a grade of B- or better in each course and must produce scholarly papers that are accepted for publication.

Health Care Innovation, MHCI

The University of Pennsylvania’s Master of Health Care Innovation is an online degree program that aims to develop current and future leaders in health care innovation through top-tier, engaging education. The interdisciplinary curriculum is taught by Penn faculty experts in the fields of health policy, operations management, behavioral economics, and innovation methodology. Students in this degree are mid-career health professionals who learn how to improve health care delivery.

For more information: https://www.med.upenn.edu/ethics-and-policy-online/master-of-health-care-innovation

Curriculum

Students in the Master of Health Care Innovation are required to complete 11 course units of coursework and must maintain a GPA of 3.0 to remain in good academic standing with the program.

HIPAA Compliance

All students at the Perelman School of Medicine are required to complete online HIPAA training once a year and must have completed either HIPAA
initial training or a HIPAA Refresher within the past 11 months to be eligible to graduate.

**Health Care Innovation Seminar Attendance**

These in-person seminars are held on Penn's campus annually in August. Students are required to attend. At the seminar, students attend faculty lectures, orientation sessions, interactive workshops, networking events, and capstone sessions.

**Health Policy Research, MSHP**

The MSHP is a two year training program that leads to a Master of Science degree. This program is based out of the University of Pennsylvania, Perelman School of Medicine in close collaboration with the Leonard Davis Institute (LDI) and the Department of Health Care Systems at the Wharton School. Building upon the trans-disciplinary nature of LDI, this program is also closely affiliated with the Annenberg School for Communication and the School of Social Policy and Practice--two schools in the University of Pennsylvania with growing interest in and commitment to the fields of health services research and health policy. The MSHP also benefits from LDI’s strong connections to multiple other schools at Penn, including the School of Arts and Sciences, the School of Nursing and the Law School.

The primary goal of the Master of Science in Health Policy Research training program is to train outstanding investigators in health services and policy research. Students completing the MSHP are well situated to pursue careers in academia, non-profit organizations and health policy.

Tailored educational experiences enable students to engage effectively with community partners, policy makers, and other interested stakeholders. Through mentored research students learn to plan and execute policy-relevant, patient-centered research using a variety of different methodologies including qualitative, cross-sectional, simulation, quasi-experimental, and experimental study designs. Finally, the educational experience is deepened with a two year career development lecture series that introduces students to skills essential to careers more generally, including applying for grant funding, managing a research team, negotiating a job, communicating research findings, creating a national reputation and other skills that are just as important to career success as skills in research methods.

For more information: https://mshp.med.upenn.edu/about-penn-mshp

**Curriculum**

Students complete 12.0 course units of coursework and must achieve a B- or better in each course and maintain an overall GPA of 3.0 or better. Students who are CHIPS Fellows may complete an optional, additional course unit when pursuing the QI Capstone.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Health Policy Research: Health Care Quality & Safety, Certificate**

The Certificate in Health Care Quality and Safety is designed to provide individuals with a broad introduction and practical skills related to the field, with the goal of training health care professionals that are proficient and capable of leading quality and safety efforts in their area of clinical interest. Through a four course sequence that includes a mentored capstone QI project, students will gain a foundation in the history, methods, tools, and applications of quality improvement and patient safety in healthcare.
Curriculum

This certificate requires the completion of four course units, including a capstone/thesis requirement. Students must achieve a B- or better in each course.

Medical Physics, Certificate

Penn's Certificate in Medical Physics offers a career pathway for individuals who have already earned a PhD in physics or a related field (e.g., engineering, computer science or physical chemistry) and a physics minor. The program is fully accredited by the Commission on Accreditation of Medical Physics Education Programs (CAMPEP). As such, the program prepares students to enter a CAMPEP-accredited residency program in medical physics, which provides students with the clinical experience required for certification by the American Board of Radiology.

The Certificate program successfully prepares students to compete for residency positions. Students will have the opportunity to shadow a qualified medical physicist on an elective basis throughout their time in the program at the University of Pennsylvania or at one of Penn's hospital affiliates.

For more information: https://www.med.upenn.edu/mpp/cmp.html

Curriculum

A total of six course units is required over two semesters.

The Certificate in Medical Physics provides students with a curriculum based on the recommendations of AAPM report #197S, which outlines the ideal training for a post-graduate education in medical physics. The coursework includes radiological physics, radiation protection, medical imaging, medical ethics/government regulation, anatomy and physiology, radiobiology, and the physics of radiation therapy.

Medical Physics, MMP

Penn's Master of Medical Physics (MMP) degree prepares students to bridge physics and clinical medicine, overseeing clinical applications of radiation and creating the cutting-edge medical technologies of tomorrow. The program is fully accredited by the Commission on Accreditation of Medical Physics Education Programs (CAMPEP). Full-time students can complete the MMP program in two years. In the second year, clinical rotations place students in the University of Pennsylvania Health System. During the program, students gain the clinical experience necessary to apply for residencies and move into clinical practice as well as research experience should students desire to pursue a PhD degree.

Students also have the opportunity to do part-time clinical work in the University of Pennsylvania Health System to gain relevant clinical experience while earning an hourly wage. The program can typically be completed full-time in two academic years and one summer session. Part-time study is possible.

For more information: https://www.med.upenn.edu/mpp/msmp/

Curriculum

A total of 15 course units is required, including a thesis. Students complete a faculty-mentored, applied research project of their own design, culminating in a paper and presentation.

## Public Health, MPH

The MPH Program prepares students for leadership by integrating research, education, and service learning in population health problems. The program's aim is to educate professionals from diverse disciplines in the core areas that define public health. Its ultimate goal is to ensure that Penn students and faculty can have the maximum positive impact upon current and future public health problems. Penn's Environmental Health Track offers a curriculum designed specifically for applicants to the interdisciplinary Master of Public Health Program who are interested in mastering skills in identifying, investigating, ameliorating, and communicating about environmental health risks. Key strengths of this track include the MPH Program's ability to provide mentored Capstone experiences, especially focused on the urban environment and communities with an aging industrial infrastructure, such as Philadelphia and its many surrounding areas.

For more information: [http://www.cphi.upenn.edu/mph/about-mph.html](http://www.cphi.upenn.edu/mph/about-mph.html)

---

## Curriculum

Students must complete 14 course units of coursework and a minimum of 125 hours of fieldwork. Students must maintain a GPA of 3.0 or better and must achieve a B- or higher in each course to receive credit toward the degree.

Regulatory Affairs, MRA

The objective of the Master of Regulatory Affairs (MRA) degree program is to produce a cadre of highly trained and sophisticated practice professionals adept in the skills necessary to maximize compliance and minimize risk in the development of FDA regulated products. Students will learn both the foundation and application of science-based clinical investigation and the corresponding regulation. The program is designed to meet these objectives through didactic course work and an experiential capstone project.

For more information: http://www.itmat.upenn.edu/mra.html

Curriculum

Students must complete 10 course units and achieve a B- or higher for all course work counted toward the degree.

Regulatory Science, MRS

The primary objective of the Master of Regulatory Science degree program is to produce a cadre of highly trained and sophisticated investigators adept in the skills necessary to become leaders in the field of regulatory science.

The Master of Regulatory Science provides trainees with in-depth instruction in the fundamental skills, methodology, and principles necessary to become a well-trained investigator positioned for a future career as a successful academic researcher.

For more information: http://www.itmat.upenn.edu/msrs/

Curriculum

Students complete 12 course units with a GPA of 3.0 or better and no lower than a B- in any given course. Students must defend their thesis in order to fulfill the requirements for graduation.

Translational Research, MSTR

The Master of Science in Translational Research (MSTR) provides students with in-depth instruction in the fundamental skills, methodology and principles necessary to become a well-trained translational investigator. The program is designed to meet this objective through the provision of didactic course work, a formal mentorship program, laboratory training, a professional development core, and specific ongoing guidance with hands-on exposure to protocol and grant development. The MSTR is housed within the Institute for Translational Medicine and Therapeutics (ITMAT) which supports research at the interface of basic and clinical research focusing on developing new and safer therapeutics.

The MSTR is designed to facilitate training and research particularly from proof of concept in cellular and animal model systems across the translational divide to proof of concept and dose selection in humans. Student projects and career goals align across this continuum. Students

2019-20 Catalog | Generated 10/18/19
enroll in a core set of courses and also choose an academic pathway to concentrate in a specific area of translational science.

Concentrations

- Discovery: For students who are elucidating the basic pathophysiological etiology and/or process of disease. Projects may be proof of concept in cell or animal models or human samples.

- Translational Therapeutics and Regulatory Science: For students who are testing discoveries for preclinical and/or clinical effect. Projects may be first in humans, phase 1, or assessing the safety, efficacy, quality, and performance of regulated products.

- Entrepreneurial Science: For students who aim to navigate both business and academic environments as you conduct research and consider commercialization opportunities.

- Bioinformatics/Biomedical Informatics: For students who are adopting informatics methodologies to develop and test their own hypotheses.

For more information: http://www.itmat.upenn.edu/mtr/

Curriculum

Students must complete 12 course units and achieve a B- or higher in each course for the degree.

Translational Research: Entrepreneurial Science, Certificate

Penn offers three certificates in Translational Research: the Certificate in Translational Science, the Certificate in Entrepreneurial Science, or the Certificate in Regulatory Science. The Certificate in Entrepreneurial Science focuses on the translation of biomedical research into innovative solutions and the development of approaches to commercialization.

The certificate can be finished in one year and must be completed within two years.

For more information: http://www.itmat.upenn.edu/certificate/

Curriculum

The certificate requires the completion of 4 course units with a passing grade of B- or better.

The certificate requires a one-year engagement in clinical and translational research. This will take the form of a new research project or as a translational arm to research currently being conducted. Prospective
students will identify a mentor and define the research project at the time of application.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Doctor of Medicine, MD

As the nation’s first medical school and home to the first teaching hospital, the Perelman School of Medicine (PSOM) enjoys a long tradition of academic excellence and scientific discovery.

The PSOM Learning for Life program is a four-year multidisciplinary curriculum comprising six modules organized around three themes: the science of medicine, the technology and practice of medicine, and professionalism and humanism. The curriculum emphasizes self-directed lifelong learning and small-group instruction. The Henry A. Jordan Medical Education Center itself plays a prominent role in the training of future physicians and scientists; it is among the first medical education spaces in the nation physically integrated into active clinical and research facilities.

PSOM medical students can choose from approximately 150 electives and have one and a half years to explore the possibilities. PSOM also offers extensive MD+ options, including eight master’s degrees and 10 certificates available through its various schools. Penn’s 12 schools share a single contiguous campus, providing exceptional opportunities for student to engage interprofessionally.

For more information: https://www.med.upenn.edu/student/

School of Arts & Sciences

The University of Pennsylvania School of Arts and Sciences forms the foundation of the scholarly excellence that has established Penn as one of the world’s leading research universities. We teach students across all 12 Penn schools, and our academic departments span the reach from anthropology and biology to sociology and South Asian studies.

Members of the Penn Arts & Sciences faculty are leaders in creating new knowledge in their disciplines and are engaged in nearly every area of interdisciplinary innovation. They are regularly recognized with academia’s highest honors, including membership in prestigious societies like the National Academy of Sciences, the American Association for the Advancement of Science, the American Academy of Arts and Sciences, and the American Philosophical Society, as well as significant prizes such as MacArthur and Guggenheim Fellowships.

The educational experience offered by Penn Arts & Sciences is likewise recognized for its excellence. The School’s three educational divisions fulfill different missions, united by a broader commitment to providing our students with an unrivaled education in the liberal arts. The College of Arts and Sciences is the academic home of the majority of Penn undergraduates and provides 60 percent of the courses taken by students in Penn’s undergraduate professional schools. The Graduate Division offers doctoral training to over 1,300 candidates in more than 30 graduate programs. And the College of Liberal and Professional Studies provides a range of educational opportunities for lifelong learners and working professionals.

• Mesopotamian Civilization, MA (p. 386)
The past twenty years have witnessed two dominant but opposing approaches to the study of the interconnections between Africa and the African Diaspora. Both seek to provide alternatives to traditional models of Africana Studies. The Afrocentric model has tended to focus on historical Africa, particularly the great civilizations of the African past. It has given little attention to the Diaspora, except to those aspects of black culture that reflect a continuum or retention of elements of certain African (specifically West African) cultures. The second model may best be described as a Black Atlantic approach; it has given little attention to the African continent, but has focused on persons of African descent throughout the Western world. This approach is especially concerned with identity formation, hybridity, syncretism, and creolization. Our pedagogical focus neither romanticizes nor ignores historical and contemporary Africa. It seeks to break current conceptualizations of the African Diaspora that only consider West Africa, Europe, North America, the Caribbean, and Brazil. While these areas will continue to be important, we hope to expand an understanding of Diaspora that includes all of Spanish speaking Latin America, East Africa, Asia, and the South Pacific as well.

This program insists that African peoples, as they have moved into different geopolitical circumstances, have developed and maintained a plurality of political strategies which cut across (but are also influenced by) a variety of religious, national, and cultural boundaries. By working to complicate and particularize what we know as “African identity,” we hope to re-imagine the ways that African and African descendant peoples have worked to establish and maintain a coherent set of cultural and symbolic practices.

Our approach is in conversation with disciplines in the humanities and social sciences, but differs from them in the conceptualization of an interdisciplinary methodology. In other words, while we encourage in-depth knowledge of and training in traditional disciplines, one of the major intellectual goals of the program is the development of an interdisciplinary method and vocabulary for the study of the interconnections between Africa and peoples of African descent around the globe.

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Curriculum

The total course units required for graduation is 14.

Three Track Approach

The three tracks of concentration in African Studies, African American Studies, or Diaspora Studies will allow students to select both a topical and an area studies sub-field. Hence, for example, a student who wishes to study public policy can do so while focusing attention on the experiences of African peoples in specific locations in the United States, South America, Africa, or the Caribbean. Prospective students must identify which track they will pursue during the first year of study; however, double track concentrations are welcomed and encouraged.

Second Tier Courses

Select two course units in methodology from the following: 2

- Ethnographic Methods
- Quantitative Methods
- Methods course specific to an existing graduate group
Program Milestones

- Complete the Core Program
- Pass an examination in a language of library research by October of the second year (for students pursuing research in a language other than English)
- Complete 14 course units (includes five Core and two Second-Tier Courses)
- Complete two years introduction to an African language (for students who select the African Studies track)
- Complete a 30-book exam by the end of the second year (for PhD students only)
- Pass the Final Oral Examination, based on a draft proposal for doctoral research and written statements on four related fields of specialization (two major and two minor)
- Submit a Dissertation that is acceptable to both the graduate group and the Graduate Council of the Faculties

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Ancient History, PhD

The Graduate Group in Ancient History is an interdisciplinary, cross-departmental program that encompasses the study of the ancient history of the Near East and the Mediterranean Basin, from the origins of civilization in the fertile river basins of the Tigris and the Euphrates to the rise of Islam and the emergence of the so-called barbarian successor kingdoms.

The expertise and interests of members of the group are diverse and heterogeneous. What unites us is the enterprise of building historical narratives from the fragmentary and diffuse textual and material evidence available to us. Students admitted to the Graduate Group in Ancient History will receive training in the political, intellectual, cultural, socio-economic, and religious history of at least two discrete ancient societies as part of their preparation for the degree of Doctor of Philosophy.

In addition to coursework, candidates are expected to participate in seminars, act as Teaching Assistants and/or teach their own classes. In order to progress to dissertation stage, students must, in addition to passing their 20 courses, fulfill the following examination requirements: Modern Languages Examination, Qualifying Examination & the Preliminary Examination. Following completion of three years of coursework and all examinations, a student will be advanced to dissertation stage.

Anthropology: Archaeology, PhD

The emphasis in the Graduate Program is on training candidates for the degree of Doctor of Philosophy. This degree certifies that, in addition to having a sound knowledge of anthropology as a whole, the holder has been trained to do independent research at a professional level of competence in at least one of the major sub-disciplines of anthropology: archaeology, cultural anthropology, physical anthropology, or linguistic anthropology.

Applied Mathematics and Computational Science, MA

Advanced mathematics is continually finding new applications in natural science, biology, engineering, medicine, and social sciences, and these fields are providing new directions for the development of mathematics itself. The graduate group in Applied Mathematics and Computational Science takes a very broad view of mathematics and its applications in our mission to train mathematical scientists for careers in academia, research and industry. In addition to providing a rigorous conceptual foundation for the application of mathematics, our diverse faculty gives AMCS students the opportunity to work in a "wet lab" environment where mathematics is actually being applied to real world problems. The AMCS graduate groups offer a full program of study in mathematics and its applications, offering both doctoral (Ph.D.) and masters (A.M.) degrees.

The Masters of Arts program in AMCS is intended for students who wish to go into professional careers in Applied Mathematics, Data Science, Mathematical Finance, or wish to obtain sufficient background in Applied Mathematics to be a strong candidate for a doctoral program in Applied Mathematics, Mathematics, Statistics, Financial Mathematics, etc.

Art and Archaeology of the Mediterranean World, MA

The Interdepartmental Graduate Group in Art and Archaeology of the Mediterranean World (AAMW) offers a terminal M.A. program in Mediterranean Archaeology. This program is designed to deliver intensive intellectual and practical training in a range of skills in archaeology to students wishing to be immersed in the study of the visual and/or material culture of the Mediterranean, broadly defined – including, for example, the ancient Near and Middle East and extending from the third millennium BCE to the Late Antique, early Byzantine, and early Islamic periods. The program also aims to facilitate student engagement with the University of Pennsylvania Museum of Archaeology and Anthropology (aka "Penn Museum"). Upon receiving their M.A., Penn graduates will be well positioned to gain admission to prestigious Ph.D. departments in the US and overseas; others might seek curatorial positions in national and local museums, teaching positions in secondary schools, or supervisory positions in CRM firms. Faculty closely mentor and work with M.A. students to achieve the students’ goals and to prepare them for their desired career path.

The M.A. Program is a terminal degree program lasting two years. During this time students have full access to Penn’s outstanding faculty and resources such as the Penn Museum, as well as all of the courses sponsored by AAMW and other programs and departments at Penn, and those offered at neighboring universities with which Penn has reciprocal arrangements. Students admitted to the Mediterranean Archaeology M.A. program should not expect to receive admission after the M.A. into the AAMW Ph.D. program. Students admitted to the M.A. program normally do not receive financial aid from the University of Pennsylvania,
although they may of course apply for outside awards to support their graduate study.

1. Competency in one ancient language, relevant to the student’s preferred cultural focus (Greek, Latin, Akkadian, etc.), to be determined in consultation with the student’s advisor. Competency is measured by an examination or by taking at least one course in that language at the 400 (advanced undergraduate/graduate) level or above with a final grade of “B” or better.

2. Competency in one modern foreign language of international scholarship, typically German or French; this language will be determined in consultation with the student’s advisor. Competency is measured by an examination or by passing one of Penn’s summer academic reading courses after the first year.

3. All students are expected to participate in an archaeological fieldwork project during the summer after the first year. This fieldwork would normally take place in the Mediterranean (broadly defined), though exceptions might be made. The requirement to engage in fieldwork during the summer after the first year might also be waived for students with substantial prior archaeological field experience. Students can expect to bear the cost of the fieldwork.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Art and Archaeology of the Mediterranean World, PhD**

The Graduate Group in the Art and Archaeology of the Mediterranean World trains students for careers in the art and archaeology of Classical and Near Eastern Civilizations. Drawing on the vast resources of the University of Pennsylvania Museum of Archaeology and Anthropology, AAMW incorporates fieldwork, museum internships, and university instruction into a flexible interdisciplinary program leading to the M.A. and Ph.D. All students accepted into the program are fully funded for a period of at least five years.

1. Graduate students are expected to devote the majority of summers to archaeological fieldwork, or laboratory or museum work if appropriate.

2. Graduate students serve as Teaching Assistants during the four semesters of their second and third years in the program.

3. Consult the AAMW website (http://www.sas.upenn.edu/aamw) for details on required languages and how the requirements may be fulfilled.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Biology, PhD**

The Biology Graduate Program represents many areas of biology, and interactions with a diverse group of colleagues provide opportunities to broaden every student’s thinking and make connections between different fields and scientific approaches. Areas of research include microbiology, cell biology, development, physiology, neuroscience, animal behavior, plant biology, genetics, computational biology, evolution, ecology and biodiversity.

Each entering graduate student has the freedom to pursue topics ranging from the behavior of molecules to that of cells, organisms, genomes, and ecosystems. We encourage students to get broad exposure through lab rotations with any faculty member in the Biology Graduate Group. As students focus on more specific research interests, they tailor
their graduate education accordingly, choosing courses from different departments and schools at Penn as appropriate.

Students complete most of their course work and lab rotations in the first year and then start their thesis research in the second year while completing their teaching requirement and preparing for their candidacy exams. Students are then fully focused on thesis research by the end of the second year. Students still have the option of taking additional courses in advanced years in order to enhance their graduate research.

Chemistry, PhD

The Graduate Program is designed for students who wish to earn a Ph.D. in Chemistry while undertaking cutting edge research. The program provides students with the necessary theoretical background and hands-on training to become independent and highly successful scientists. Graduate students achieve mastery of advanced chemistry topics through courses in different subdisciplines.

Graduate students conduct research in the fields of bioinorganic chemistry, bioorganic chemistry, chemical biology, biophysical chemistry, bioinformatics, materials science, laser chemistry, health related chemistry, structural and dynamical studies of biological systems, X-ray scattering/diffraction, NMR spectroscopy, applications of computing and computer graphics, as well as investigations of chemical communication and hormone-receptor interactions.

For more information: https://www.chem.upenn.edu/content/phd-program

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Curriculum

Twenty course units are required for graduation.

The PhD program requirements consist of:

- A minimum of six course units of lecture courses (usually completed in the first academic year)
- Chemical Information Course
- Lab Rotations (Biological and Biophysical students only)
- Teaching Requirement (Students must TA for two semesters)
- Second Year Candidacy Exam
- Annual Dissertation Committee Meetings
- Public Defense
- Written Dissertation
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Classical Studies, PhD

The Graduate Group in Classical Studies trains students in the languages, literatures, and history of the ancient Greek and Roman world. Students are encouraged to combine this work with the investigation of such related fields as Art History and Archaeology, Comparative Literature and Literary Theory, Linguistics, Medieval Studies, Philosophy, Religious Studies, and Women’s Studies.

Penn offers superb resources for the study of classical antiquity. We have a world-class faculty, who specialize in a wide range of sub-fields within the discipline, and who take seriously the responsibility of training graduate students for careers in and beyond academia.

All candidates for the Ph.D. are required to teach for at least two semesters under the supervision of the Graduate Group. In practice, students normally teach four semesters, during the second and third years of the program.

All candidates for the Ph.D. must take a series of exams including Modern Language Examinations, the Qualifications Evaluation Examination in Greek and Latin translation, and the Preliminary Examination on the literary history of Greece and Rome, along with special topics chosen by the student. The dissertation is normally completed by the end of the student’s fifth year in the program.

For more information: http://www.classics.upenn.edu/graduate/graduate-program-classical-studies

Comparative Literature, PhD

The Ph.D. Program in Comparative Literature covers the study of narrative, poetry, representation and cultural history. The Program enables students to engage rigorously with critical theory. We draw our faculty from many disciplines: the languages and literary histories of Europe, the Americas, the Middle East, East Asia, and South Asia: history, art history, religion; anthropology; folklore; political science; Africana studies; Jewish studies; Gender and Sexuality studies; sociology; communications.

We provide a structured and challenging program in which graduate students can combine the careful study of a particular literary tradition with interests in other languages and disciplinary approaches. The broad interests that our students bring to their projects include the history of philosophy, film and media studies, technology and the history of science, and area studies. Students work in varied historical periods, from antiquity and the Middle Ages to the postmodern, and in diverse language fields.

Comparative Literature at Penn has a dynamic intellectual community. Our signature event is our public colloquium series, Theorizing, which is organized primarily by the graduate students. Our students and faculty are active participants in the many interdisciplinary lecture and seminar series at Penn, including the Medieval-Renaissance Seminar, the History of Material Texts Seminar, the Wolf Humanities Center, the Latitudes Seminar, and several student reading groups.

Sample Plan of Study

The total course units required for graduation is 20.
Penn's unique interdisciplinary program combines solid academic learning at one of the nation's top research universities with practical knowledge that can enhance careers in research and in criminal justice-related policy and practice settings. Students also gain knowledge of the criminal justice system through meeting weekly with guest visitors who work in the justice system. Students work under a faculty member on a semester-long crime analysis project, using their analytical and research skills, to address a specific crime problem. Students present their final masters' projects during a poster session at Penn's Criminology Day in April, through an oral defense of their project, and as a written research article.

Criminology, PhD

Penn's highly interdisciplinary Ph.D. in criminology combines the traditional concerns of criminologists with concepts, theories, and empirical research from a wide variety of academic disciplines. The program seeks to produce scholars of unusual breadth who can work creatively in academic or policy settings.

Working closely with faculty, students are encouraged to design their own curriculum and begin research very early in their graduate education. That curriculum will include several core courses taken in the first and second year. These include two courses in criminological theory, two courses in criminal justice policy, and two semesters of graduate level statistics.

For more information: http://crim.sas.upenn.edu/graduate

View the University’s Academic Requirements for PhD Degrees (p. 1745).

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

A student who enters the Ph.D. program with a Bachelors degree will usually take 3 course units in each semester in their first two years and must complete all course requirements by the end of their third year. All students must take 3 CUs in each semester to remain registered as full-time students.

After having completed the substantive, class-based course requirements, they normally fulfill remaining CUs by registering for CRIM 999 Independent Study and Research. They will also have passed the Candidacy Examination by the end of their second year. Students who enter with a Master's degree or other transfer credit may satisfy the formal course requirements more quickly. However, the Graduate Group Chair in conjunction with the student’s research supervisor has the flexibility to establish the optimal requirements for students.

The customary maximum load for a Ph.D. student is four course units each semester; exceptions for a fifth course unit may be made in extraordinary cases upon approval of the Graduate Dean. The Graduate Group may establish examination requirements in addition to the University's standards.

Demography, PhD

Penn Demography trains independent researchers who are prepared to fill leading roles in social demography and population analysis at a variety of organizations and are well versed in the growth, structure, health and well-being of human populations. Graduates have a firm grasp of both the substance and methods of study in the core areas of demography and population sciences (mortality, fertility, migration, population aging, and demographic — economic interrelations) from both a domestic and international perspective.

The Graduate Group in Demography is responsible for training students through course work and supervised research. The Graduate Group in Demography is composed of faculty members with backgrounds in demography, sociology, economics, anthropology, nursing, and medicine.

For more information: http://demog.pop.upenn.edu/

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Required Courses

### Demography Electives

Select four independent study or other demography courses: 4 units

### Electives

Select eight course units: 8 units

Total Course Units: 20 units

### Program Milestones

- Satisfactory completion of 20 course units
- Satisfactory completion of a first year research paper
- Satisfactory completion of a second year research paper
- Satisfactory completion of the MA Exam administered in May in the end of the student's first year in the program
- Satisfactory completion of the PhD Examination administered in May in the end of the student's second year in the program
- Successfully complete a dissertation on an approved topic. To remain in good standing students should establish a dissertation committee and defend their dissertation proposal before the beginning of their fourth year in the program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

### Earth and Environmental Science, PhD

The mission of the Graduate Group of the Department Earth and Environmental Science is to produce independent, well-rounded scientists that are exceptionally competent in their area of specialization and capable of understanding, solving, and communicating complex and interdisciplinary scientific issues.

The graduate group guides research leading to Doctoral degrees in the range of fields that encompass our research interests:

- Biogeochemistry (terrestrial and ocean)
- Environmental Geology
- Geophysics
- Paleobiology
- Surficial processes

For more information: [http://www.sas.upenn.edu/earth/graduate/doc]ar-doctoral-programs

East Asian Languages and Civilizations, MA

The Graduate Group in EALC administers a Masters of Arts degree in the humanistic study of East Asia: China, Japan, Korea, and Mongolia. The degree is both an entry point into higher-level graduate study and preparation for careers in teaching, administration, and the public and private sector. This degree is extremely valuable to students who plan to seek employment in East Asia. The program offers flexibility for students who desire to combine this degree with another Master of Arts at Penn or who would like to pursue the degree on a part-time basis. The Master's in EALC focuses on humanistic disciplines such as literature, history, philosophy, religion, art, and archaeology of East Asia. We encourage training in the more rigorous classical forms of Chinese, Japanese, Korean, and Mongolian in addition to communicative proficiency in modern forms of these languages.

East Asian Languages and Civilizations, PhD

The cross-disciplinary Ph.D. program in East Asian Languages and Civilizations is designed to train graduate students who can teach and conduct independent research in a variety of humanistic disciplines using Chinese, Japanese, Korean, or Mongolian, or occasionally other languages of East Asia. Our region is defined roughly as China, Japan, Korea, Mongolia, and Inner Asia. Before completion of the degree, each student is required to:

1. master the requisite linguistic tools and research methods;
2. demonstrate a comprehensive knowledge of the history and culture of his or her area of expertise;
3. gain an in-depth expertise in one or more period and/or subject areas;
4. attain the necessary level of training in his or her humanistic discipline.

Economics, PhD

The graduate economics program at Penn is a Ph.D. program administered by the Graduate Group in Economics, which consists of the faculty of the Department of Economics, and some of its secondary appointments in the Wharton School and the School of Arts and Sciences. A master's program in Economics is not offered at the University of Pennsylvania.

The program trains students to conduct outstanding research in economics. All major areas of economics are covered, with particular strengths in theoretical and empirical microeconomics, and in modern macroeconomics. Graduates of the program obtain positions at leading universities, research institutions, and government agencies around the world.

Students in this program first acquire a thorough knowledge of economic theory and econometric methods before they begin their own research. They meet a series of requirements during their first years in the program, and thereafter devote most of their time to the writing of a dissertation. The median length of time required for completion is 5.25 years (however both shorter and longer periods are possible). Almost all students are supported by combinations of fellowships, research assistantships, and teaching assistantships during at least their first five years of study.
Required Courses
A minimum of 16 course units are required. A minimum of 12 course units must be taken at the University of Pennsylvania.

By the end of the 3rd year in residence, students must have passed four 700-level econ courses (excluding 701-706 and 7x9, the workshops) with a grade of A- or higher. Credits must total 16 before going on dissertation status.

English, MA
The Department offers full-time M.A. and Ph.D. programs. Comprehensive in their range of specializations, these programs are intellectually dynamic and rigorous. Our M.A. program offers students a solid foundation in the professional study of literature and culture, and our Ph.D. program prepares students for full participation in the profession as scholars and teachers of English and American literature, broadly conceived. Over seventy graduate students enjoy close interaction with thirty-eight internationally renowned faculty members in the Department who teach and publish on a large number of historical periods, theoretical areas, and methodological approaches.

Our Department culture reflects our commitment to fostering an inclusive environment that is at once challenging and supportive. We recognize that success in our profession requires more than taking courses, passing exams, writing a dissertation, attending conferences, and publishing articles; it also involves the recognition that we produce new knowledge collectively. Accordingly, we consider our graduate students full members of the Department and encourage everyone to take an active role in the intellectual and social community of the Department as well as other programs and departments across campus.

1. Each student must take courses that fulfill six distribution requirements:
   1. One course pre-1700
   2. One course 1700-1900
   3. One course post-1900
   4. One course on literature of the Americas
   5. One course on literature outside the Americas
   6. One course in Minority literature (racial, ethnic, gender, sexuality)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**German Languages and Literatures, PhD**

The Department of Germanic Languages and Literatures at Penn takes a forward-looking perspective on developments in the field. In contrast to many Ph.D. programs in German, we provide a solid grounding in the entire German literary tradition. At the same time, we vigorously pursue interdisciplinary study informed by the latest methodological and theoretical movements, and provide state-of-the-art pedagogical training and instruction.

Our Department has particular strengths in gender and sexuality, intermediality, history of the material text, German-Jewish studies, translation theory, cinema studies, environmental humanities, and pedagogy. Our students are trained with an eye to their career objectives. All of our students receive a full five-year Benjamin Franklin Fellowship package, which includes guaranteed summer funding and significant mentored teaching experience.

All candidates must complete 20 course units by the end of year 3. Our curriculum toward a Ph.D. in Germanic Languages and Literatures details steps on the five-year path to degree. By the end of spring term of year 3, students shall have completed a successful prospectus meeting with their dissertation committee. In years 4 and 5, students work on the dissertation. Students teach in years 2 and 3, although they may choose to gain additional teaching experience. Students are encouraged to spend at least one year (typically year 4) at an academic setting in a German-speaking country.

History and Sociology of Science, PhD

The Department of History and Sociology of Science at Penn offers a distinctive Ph.D. program focusing on the social, historical, and cultural study of science, medicine, technology, and the environment. Our faculty and student interests span the early modern period to contemporary times, covering regions from around the globe. The city of Philadelphia offers a vibrant range of scholarly resources, including world-class archives, museums, libraries, universities, and learned societies. The Department has trained some of the most successful scholars practicing in the field today; in addition to faculty positions, many of our graduates also go on to successful careers in public history, publishing, policy, and consulting. Our Department is known for its intellectual rigor, innovative scholarship, and strong sense of camaraderie.

<th>Course Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Requirement</td>
<td>HSSC 505</td>
<td>Seminar in the History and Sociology of Science</td>
</tr>
</tbody>
</table>

Subfield Requirements

Select three seminars in at least two of the following major subfields:

- Science
- Technology
- Medicine

Other Requirements

Research Seminar

Pre-1850 Developments Seminar

1. Students shall take 4 anchor courses in 5 periods. The five periods are:
   - medieval (to roughly 1450)
   - early modern (to roughly 1789)
   - the long 18th century (roughly 1648#1806)
   - the long 19th century (roughly 1789#1914)
   - the long 20th century (roughly 1871#today)

1. Should take in the Fall semester of Year 1.
2. Must receive an A- or higher.
3. Or a research paper dealing with the period before 1850 even if written for a course that includes materials from a later period.

Program Milestones

- Successful passing of the formal Second Year Evaluation (as required by the University).
- Demonstration of proficiency in two languages, a requirement that must be met before the Orals Examination may be scheduled;
- Successful passing of the Orals Examination (usually by the end of your third year), demonstrating mastery of the literature in three special sub-fields, each jointly worked out by the student with a faculty member;
- A dissertation proposal approved by a student’s adviser within six weeks of passing the Orals;
- At least two years (4 semesters, or 4 courses) of mentored teaching experience.
History of Art, MA

The History of Art Department offers a Master of Arts degree for students wishing to deepen their knowledge of art and the critical methods employed in the study of art.

Upon receiving their M.A., Penn graduates have gone on to hold curatorial positions in national and local museums, auction houses, and galleries. Students have also used their M.A. as a stepping stone to Ph.D. programs, receiving admission to many prestigious Ph.D. departments in the US and overseas. Faculty closely mentor and work with M.A. students to achieve the students' goals and to prepare them for their desired career path.

The M.A. Program is a terminal degree program lasting two years. Students admitted for the M.A. do not automatically receive admission after the M.A. into the Ph.D. program; students wishing to continue must apply to the Ph.D. program. Students admitted for the M.A. normally do not receive University Fellowships, although they may apply for outside awards to support their graduate study.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

History, MA

The Graduate Program in History at the University of Pennsylvania has a long tradition of distinction. Beginning as one of the first programs in the United States to offer doctoral study in history, (the first Ph.D. in History was conferred in 1891); the Department continues to pioneer new areas of scholarship. In the last twenty years, faculty members of the departments in American, European, and World History have assumed a leading role in their fields. Today, few departments in the country match Penn’s Department of History in coverage and depth across the entire range of history from medieval times to the present.

For more information: [http://www.history.upenn.edu/graduate/program-guidelines](http://www.history.upenn.edu/graduate/program-guidelines)

View the University’s Academic Requirements for Research Master’s Programs (p. 1750).

**Curriculum**

A minimum of 8 course units are required for graduation.

Faculty work closely with Ph.D. students to outline an appropriate course of study and mentor students while preparing them for assistantships, curatorial internships, and other career orientations.

For more information: [http://www.sas.upenn.edu/arthistory/graduate/phd](http://www.sas.upenn.edu/arthistory/graduate/phd)

View the University’s Academic Requirements for Ph.D Degrees (p. 1745).

Program Milestones

- Language and Technical Competency Requirement
- Field Requirements
- Teaching Requirement

Linguistics, MA

The Master's degree provides a grounding in the core areas of linguistic theory, supplemented by courses chosen according to the student’s specific interests. The Graduate Group in Linguistics does not provide fellowships for pursuit of a master's degree, so students must bring funding from another source.

Applications are considered only from applicants who demonstrate the appropriate academic background as well as interests that match the research pursued at Penn, which can be determined by investigating the current work of the faculty and students. Please consult with the graduate chair before submitting an MA application to ensure that you fit these requirements.

For more information: https://www.ling.upenn.edu/graduate/masters

View the University's Academic Requirements for Research Master's Programs (p. 1750).

In addition to successful completion of course work, other requirements include

- A thesis written under the supervision of a faculty committee. The thesis can be based on previous coursework. The committee consists
of at least two faculty members, the adviser and a reader, who both must also be members of the graduate group.

- An oral examination based on the thesis. This consists of a private meeting with the committee, during which the student answers questions on the content of the thesis.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Linguistics, PhD**

The Ph.D. program in Linguistics at Penn embraces a wide range of theoretical specializations and methodologies. What unites them is a commitment to careful and explicit formal analysis of the human capacity for learning and using language.

The core of our program is the formal generative tradition, but we encourage the cross-fertilization that results from the confrontation of empirical and theoretical perspectives on language structure. By our close collaboration with other programs (such as computer science and psychology) we promote an awareness of the broad view of language that interdisciplinary study induces. In addition to broad training, students are offered and expected to master the methods and results of their chosen areas of concentration in linguistics as a prerequisite to fruitful engagement in dialogue with others, both within and outside the program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Mathematics, MPhil**

The Master of Philosophy in mathematics is a terminal professional degree that is designed for students who want to go beyond the usual masters degree. Entering students should have previously completed either an undergraduate or a regular masters program in mathematics. The degree is typically earned one or two years after beginning to take courses that go beyond the regular master of arts degree.

Students who already have a regular masters degree take six additional graduate courses numbered 600 or above to earn an M.Phil. degree.

Students who enter the program with just an undergraduate degree will fulfill the usual masters course requirements plus an additional six (for a total of 14 courses). Students in this program also need to pass the Masters Preliminary Exam and an oral exam in one area of mathematics, and to submit and defend an M.Phil. thesis (which is somewhat longer and more in depth than a thesis in the usual masters program).

For more information: [https://www.math.upenn.edu/graduate](https://www.math.upenn.edu/graduate)

View the University’s Academic Requirements for Research Master’s Programs (p. 1750).

¹ At least four courses must be taken in the Penn Math Department.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Mathematics, MA**

The Masters of Arts program in mathematics is intended for students who wish to go into professional careers in mathematics, and who have a background corresponding to an undergraduate mathematics major.

Students in the masters program take at least eight graduate mathematical courses numbered 500 and above, including at least one each in algebra, analysis, and geometry-topology. The other courses can be in either pure or applied mathematics, and some can be taken in other departments. There is also a requirement to pass the Masters Preliminary Exam and to submit and defend a masters thesis.

The masters degree can also be earned by Penn Math Ph.D. students, on the way to their Ph.D. In addition, Penn Ph.D. students in allied fields of study can also apply to enter the masters program in mathematics, which can allow them to earn both degrees simultaneously.

For more information: [https://www.math.upenn.edu/graduate](https://www.math.upenn.edu/graduate)
View the University’s Academic Requirements for Research Master’s Programs (p. 1750).

**Curriculum**

At least four courses must be taken in the Penn Mathematics Department. Among these courses, every student must take at least a semester of graduate courses in each of algebra, analysis and geometry-topology.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Bridge to Ph.D. Program**

The Bridge to Ph.D is a master’s program in mathematics offered by the University of Pennsylvania. The goal of this program is to increase the number of Ph.D's awarded in mathematics at Penn to members of groups that are traditionally underrepresented. This program is different than conventional master's programs as students will be fully funded and prepared for direct entry into a PhD program.

For more information, visit http://bridge.math.upenn.edu.

**Mathematics, PhD**

The Department of Mathematics of the University of Pennsylvania offers a full Graduate Program in Mathematics, conferring the degrees of Master of Arts (A.M.), Master of Philosophy (M.Phil.), and Doctor of Philosophy (Ph.D.). The educational aim of this program is to provide well-rounded mathematical training for a career of research and teaching in mathematics, as well as for other careers which use advanced mathematics in a substantial way. Students are offered the possibility of a dual Ph.D. degree in Mathematics and a Masters degree in other subjects, including physics and computer science.

This program covers a variety of areas, including analysis, geometry-topology, algebra, mathematical physics, combinatorics, logic, and probability. See our Graduate Mathematics Page and our Math Department home page for detailed information about other aspects of this program and of the Penn Math Department as a whole, including its colloquia, seminars and lecture series, and the research interests of the faculty.

Full time Ph.D. students receive financial support for five years, at least two of which are in the form of a fellowship.

In addition, Penn offers an interdisciplinary graduate program in Applied Mathematics and Computational Science (p. 363), for which there is separate application process.

For more information: https://www.math.upenn.edu/graduate/

**Music: Ethnomusicology, PhD**

Ethnomusicology at Penn reflects the interdisciplinary nature of the field, combining approaches from anthropology, musicology, folklore, literary theory, religious studies, linguistics, critical theory, and gender studies in order to interrogate the webs of meaning within which music resonates. Faculty are pursuing research centrally concerned with diaspora, music and trauma, jazz in world perspective, post-coloniality, tourism and mobility studies, sound studies, applied ethnomusicology, and popular music studies. Areas of expertise for our faculty encompass the Americas, Western Europe, Africa, and the Indian Ocean.

The Department of Music at the University of Pennsylvania offers Ph.D programs in three other fields of study besides Ethnomusicology: Musicology, Theory, and Composition. The goal of the graduate program is not to entrench these disciplinary distinctions, but rather to seek out productive and innovative means of placing them in dialogue with each other. This orientation toward holding all of the sub-disciplines in view is reflected in the graduate curriculum as well as in the multiple colloquium series that animate departmental life. The curriculum is designed with flexibility in mind—designed specifically to offer students the freedom to craft a path of study that best addresses the research needs and methodological concerns of their particular dissertation projects. It
The Department of Music at the University of Pennsylvania offers Ph.D. programs in three other fields of study besides Musicology: Composition, Theory, and Ethnomusicology. The goal of the graduate program is not to entrench these disciplinary distinctions, but rather to seek out productive and innovative means of placing them in dialogue with each other. This orientation toward holding all of the sub-disciplines in view is reflected in the graduate curriculum as well as in the multiple colloquium series that animate departmental life. The curriculum is designed with flexibility in mind—designed specifically to offer students the freedom to craft a path of study that best addresses the research needs and methodological concerns of their particular dissertation projects. It combines the wide range of courses offered by the world-class faculty in the music department with the possibility of enrolling in seminars in other Penn departments and taking classes at consortium schools such as Princeton, Yale, and Columbia. Our colloquium series provides another means of engaging in both disciplinary and interdisciplinary conversations. In addition, workshops, public performances, and working papers presented by graduate students, post-doctoral fellows and faculty offer a wide range of perspectives on musical practice and scholarship, focusing variously on public lives in music, current research, craft and compositional issues.

### Music: History of Music, PhD

The graduate program in the History of Music at the University of Pennsylvania serves students who intend to conduct cutting-edge research, produce high-quality scholarship, and develop teaching and professional skills in order to pursue academic positions in music studies; it also serves those who want to consider career opportunities beyond academia in both music and non-music domains.

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Music: Musical Composition, PhD

The Ph.D. program in Composition stresses training in the craft of composition, contemporary repertory, and theory and analysis. Instruction in composition comprises much of the course requirement; such instruction takes the form of private lessons. Participation in the concert life of the department and attendance at Composers’ Forum events complement that instruction. Students are assigned to particular composition instructors for composition lessons by the Director of Graduate Studies on the advice of the composition faculty. Composition instructors are assigned on a rotating basis to assure that all students are exposed to a variety of approaches and have the opportunity to work with each member of the composition faculty during the period of coursework.

The Department of Music at the University of Pennsylvania offers Ph.D. programs in three other fields of study besides Composition: Musicology, Theory, and Ethnomusicology. The goal of the graduate program is not to entrench these disciplinary distinctions, but rather to seek out productive and innovative means of placing them in dialogue with each other. This orientation toward holding all of the sub-disciplines in view is reflected in the graduate curriculum as well as in the multiple colloquium series that animate departmental life. The curriculum is designed with flexibility in mind—designed specifically to offer students the freedom to craft a path of study that best addresses the research needs and methodological concerns of their particular dissertation projects. It combines the wide range of courses offered by the world-class faculty in the music department with the possibility of enrolling in seminars in other Penn departments and taking classes at consortium schools such as Princeton, Yale, and Columbia. Our colloquium series provides another means of engaging in both disciplinary and interdisciplinary conversations. In addition, workshops, public performances, and working papers presented by graduate students, post-doctoral fellows and faculty offer a wide range of perspectives on musical practice and scholarship, focusing variously on public lives in music, current research, craft and compositional issues.

Music: Theory of Music, PhD

Music Theory at Penn focuses on continental philosophy and criticism, listening and ethics, the history of theory in modernity, the anthropology of the senses, aesthetics and politics, sound art, urban sound, sound media and technologies, and technics. The program displaces the typical focus on how music is constituted, whether at the level of universal system or particular work, towards the ways in which listening is constituted in various practices and structures of thought.

The Department of Music at the University of Pennsylvania offers Ph.D. programs in three other fields of study besides Theory: Ethnomusicology, Musicology, and Composition. The goal of the graduate program is not to entrench these disciplinary distinctions, but rather to seek out productive and innovative means of placing them in dialogue with each other. This orientation toward holding all of the sub-disciplines in view is reflected in the graduate curriculum as well as in the multiple colloquium series that animate departmental life. The curriculum is designed with flexibility in mind—designed specifically to offer students the freedom to craft a path of study that best addresses the research needs and methodological concerns of their particular dissertation projects. It combines the wide range of courses offered by the world-class faculty in the music department with the possibility of enrolling in seminars in other Penn departments and taking classes at consortium schools such as Princeton, Yale, and Columbia. Total Course Units 20

Courses may be within or outside the Music department.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages and Civilizations: Middle Eastern Literatures and Societies, MA

In addition to the MA degree awarded within the PhD program, NELC offers an independent (terminal) MA degree in Middle Eastern Literatures and Societies. NELC’s graduate program in Middle Eastern Literatures and Societies offers advanced study of the languages, literatures, and societies of the Near and Middle East, including aspects of Islamic civilization, in modern and pre-modern settings.

Students admitted to the MA program are assigned a faculty advisor to guide their studies. Courses, selected in consultation with the advisor, will normally be completed in three semesters. All students, regardless of their concentration, must master at least one of the languages in which the primary sources of NELC’s subfields are written. Standards vary by subfield.

For more information: http://www.sas.upenn.edu/nelc/grad_programs/maProcedures.html

View the University’s Academic Requirements for Research Master’s Programs (p. 1750).

Curriculum

A minimum of 12 course units are required for graduation.

- Coursework
- Reading proficiency examination in one modern language of scholarly research
- MA Final Exams (three)
  - One exam on mastery of a language in which primary sources are written
  - Two exams selected from two of the following three groups:
Near Eastern Languages and Civilizations: Middle Eastern Literatures and Societies, PhD

NELC’s PhD program in Middle Eastern Literatures and Societies offers advanced study of the languages, literatures and societies of Islamic civilizations, and also Islamic history and thought in their Near Eastern context, in modern and pre-modern settings.

Students in the Middle Eastern Literatures and Societies program are expected to command Arabic or Persian as a primary research language and another (usually Arabic, Persian, Turkish, or Hebrew) as a secondary research language, as well as the general history and culture of the region. The specific distribution of courses varies by a student’s interests and specialization. Students are expected to work out the broad outlines of their programs in consultation with their faculty advisor when they begin their studies.

View the department’s PhD general procedures (https://www.sas.upenn.edu/nelc/grad_programs/phdProcedures.html).

For more information: https://www.sas.upenn.edu/nelc/grad_programs/grad_programs.html

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Curriculum

A total of 20 course units is required for graduation.

Coursework

- Four courses in Arabic or Persian language beyond the Advanced Intermediate level
- Two course units in the secondary research language
- Four courses in Islamics (history & religion)
- Two courses in Arabic or Persian literature
- Three courses in Arabic or Persian literature and Islamics (history or thought) at the 600 level or above
- Two course units at the second-year/Intermediate level in the minor language
- Three elective courses to be chosen in conjunction with the major advisor

Other Program Milestones

In addition to the above-described required coursework, PhD students are responsible for two (2) European language reading exams, candidacy exams, and qualifying exams before preparing a dissertation proposal.

Secondary Field in Middle Eastern Literatures and Societies

PhD students from other programs who wish to take a secondary field in Middle Eastern Literatures and Societies must demonstrate a thorough knowledge of modern standard Arabic or modern Persian equivalent to proficiency at the Advanced Intermediate level.

During Candidacy Exams, students taking a secondary field will be examined in two subjects:

1. Arabic or Persian language and literature (history and criticism, based on sources in European languages)
2. Islamics: the history of the Middle East in the Islamic era, and the institutions of Islam

Sample Plan of Study

Students in the PhD program are required to take 20 course units. The coursework component is normally three years in length, but with the potential for transfer credit for other graduate courses within the field. Students entering the PhD program will be assigned a faculty advisor who will supervise the student’s program until the Candidacy Examinations in the 4th year of study have been completed.

Near Eastern Languages and Civilizations: Biblical Studies, MA

In addition to the MA awarded within the PhD program, NELC offers an independent (terminal) MA degree in Biblical Studies, which is one of the tracks in NELC's graduate program in Hebrew and Judaic Studies. This track offers advanced study of the languages and philology of the Hebrew Bible as well as the history and archaeology of ancient Israel in its Near Eastern context.

Students admitted to the MA program are assigned a faculty advisor to guide their studies. Courses, selected in consultation with the advisor, will normally be completed in three semesters. All students, regardless of their concentration, must master at least one of the languages in which the primary sources of NELC's subfields are written. Standards vary by subfield.

For more information: http://www.sas.upenn.edu/nelc/grad_programs/maProcedures.html

View the University's Academic Requirements for Research Master's Programs (p. 1750).

Curriculum

A minimum of 12 course units are required for graduation.

• Coursework
• Reading proficiency examination in one modern language of scholarly research
• MA Final Exams (no more than four exams, with at least one being a language exam)
• Thesis or two research papers

Some MA students apply for NELC's PhD program. However, admission to the MA program or successful completion of the MA does not provide a guarantee of admission to the PhD program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages and Civilizations: Biblical Studies, PhD

NELC's PhD track in Biblical Studies, a part of NELC's Hebrew and Judaic Studies program, offers advanced study of the languages and philology of the Hebrew Bible as well as the history and archaeology of ancient Israel in its Near Eastern context.

At the heart of NELC's Hebrew Bible/Old Testament track are texts composed over a period extending from the early Iron Age to the Hellenistic-Roman period. The goal of this PhD track is to prepare students to research and teach these texts, in both the historical contexts in which they were originally composed, and as they have been understood in later historical periods. Drawing on faculty in NELC, the Jewish Studies Program, and other departments, the Biblical Studies program takes an interdisciplinary approach to biblical literature that involves the study of language, literature, history, archaeology, and other fields. This program can be tailored for individual students with different interests.

View the department’s PhD general procedures (https://www.sas.upenn.edu/nelc/grad_programs/phdProcedures.html).

For more information: https://www.sas.upenn.edu/nelc/grad_programs/grad_programs.html

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Curriculum

A total of 20 course units is required for graduation.

PhD students in Biblical Studies must acquire proficiency in the following areas:

Primary Field
• Hebrew and Aramaic of the Biblical period
• Biblical Literature
• History, geography, and archaeology of Israel in the Biblical period in their ancient Near Eastern context
• Culture, social, and political institutions and history of Israelite religion in the Biblical period in their ancient Near Eastern context

Ancillary Fields
• A secondary field in either Cuneiform Studies (Akkadian) or Egyptology, and comparative studies relating the secondary field to Biblical Israel, or a secondary field in Biblical Archaeology.
• Hebrew epigraphy, Northwest Semitic languages, elementary Arabic, and comparative Semitics; Greek adequate for use of the Septuagint; post-Biblical literature and exegesis

Other Program Milestones
In addition to the above-described required coursework, PhD students are responsible for two (2) European language reading exams, candidacy exams, and qualifying exams before preparing a dissertation proposal.

Secondary Field in Biblical Studies

Graduate students from other programs who wish to take a secondary field in Biblical studies must complete the following requirements:
• Four (4) graduate-level courses in Biblical Hebrew texts; ability to sight-translate uncomplicated texts
• Biblical literature: familiarity with the content of the Bible, distinctive features of its main genres, and important literary-critical issues
• History and culture of ancient Israel
• Comparative studies relating Biblical Israel to the student’s Primary Field

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sample Plan of Study

Students in the PhD program are required to take 20 course units. The coursework component is normally three years in length, but with the potential for transfer credit for other graduate courses within the field. Students entering the PhD program will be assigned a faculty advisor who will supervise the student’s program until the Candidacy Examinations in the 4th year of study have been completed.

Near Eastern Languages and Civilizations: Classical and Medieval Hebrew Literature, MA

In addition to the MA awarded within the PhD program, NELC offers an independent (terminal) MA degree in Hebrew Literature and Jewish Tradition, which is one of the tracks in NELC’s graduate program in Hebrew and Judaic Studies. Students may specialize in either Post-Biblical Jewish History and Culture or Modern Hebrew Literature. These tracks offer advanced study in Hebrew literature and language and Jewish tradition, culture, and thought in their Near Eastern and/or Western contexts, in modern and pre-modern settings.

Students admitted to the MA program are assigned a faculty advisor to guide their studies. Courses, selected in consultation with the advisor, will normally be completed in three semesters. All students, regardless of their concentration, must master at least one of the languages in which the primary sources of NELC’s subfields are written. Standards vary by subfield.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages and Civilizations: Classical and Medieval Hebrew Literature, PhD

NELC’s graduate program in Hebrew and Judaic Studies includes two tracks within Hebrew Literature and Jewish Tradition: (1) Post-Biblical Jewish History and Culture and (2) Modern Hebrew Literature.
These tracks offer advanced study of Hebrew literature and language and Jewish culture and thought in their Near Eastern and/or Western contexts, in modern and pre-modern settings.

Students in the Hebrew Literature and Jewish Tradition program are expected to command Hebrew as a primary research language and another (usually Arabic, Greek or Yiddish) as a secondary research language. The specific distribution of courses varies by a student’s interests and specialization. Students are expected to work out the broad outlines of their programs in consultation with their faculty advisor when they begin their studies.

View the department’s PhD general procedures (https://www.sas.upenn.edu/nelc/grad_programs/phdProcedures.html).

For more information: https://www.sas.upenn.edu/nelc/grad_programs/grad_programs.html

View the University’s Academic Requirements for PhD Degrees (p. 1745).

**Curriculum**

A total of 20 course units are required for graduation.

**Post-Biblical Jewish History and Culture**

Penn’s PhD Program in Post Biblical Jewish History and Culture is designed to train students to engage in teaching and in original research that pertains to the cultural developments and products of Jewish life from the seventh through the sixteenth centuries, in communities of Mesopotamia, Christian Europe and the Islamicate world. The program of study will be tailored to the needs and interests of each student, and will engage a range of NELC and Penn faculty members. All programs of study will involve the exploration of Jewish historical and cultural phenomena within the diachronic context of the Jewish past, and the synchronic context of the broader regional culture. Students will be expected to acquire proficiency in this historically and geographically broad field, for the purposes of undergraduate instruction, and scholarly expertise in the narrower research field that is chosen.

- **Primary Proficiencies**
  - Philological competence
  - The Jewish Bookshelf
  - Historical and Contextual Competence
  - Methodological Tool Kit and State of the Field

- **Ancillary Proficiencies**
  - Familiarity with the foundational corpora of rabbinic Judaism, ability to read with comprehension, and to locate passages in the Hebrew Bible, Babylonian and Palestinian Talmud, Midrashic literature of the classical period, and Jewish Liturgy

**Modern Hebrew Literature**

The program of study in Modern Hebrew Literature encompasses texts composed from the end of the 18th century to the present day, from wherever they have been written, e.g. Israel, the broader Middle East, Europe, and North America. It is designed to allow students to pursue study, research, and eventually teaching by means of an approach to the field that is textually and linguistically rigorous, consciously interdisciplinary, and responsive to the individual interests of students. Although grounded in Near Eastern and Jewish Studies, our program also engages in dialogue with World Literature, Comparative Literature, History, Slavic and Germanic Studies, Religious Studies, and more.

- Linguistic and Textual Mastery
- Method
- Context

**Secondary Field**

All students are expected to develop proficiency in one of the following four secondary fields:

- Continuity of Hebrew Literature
- Bible
- Rabbinics
- Liturgy and Medieval Literature

**Other Program Milestones**

In addition to the above-described required coursework, PhD students are responsible for two (2) European language reading exams, candidacy exams, and qualifying exams before preparing a dissertation proposal.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Sample Plan of Study**

Students in the PhD program are required to take 20 course units. The coursework component is normally three years in length, but with the potential for transfer credit for other graduate courses within the field. Students entering the PhD program will be assigned a faculty advisor who will supervise the student’s program until the Candidacy Examinations in the 4th year of study have been completed.

Near Eastern Languages and Civilizations: Egyptology, MA

In addition to the MA awarded within the PhD program, NELC offers an independent (terminal) MA degree in Egyptology. NELC’s graduate program in Egyptology offers advanced study of the languages and civilizations of ancient Egypt.

Students admitted to the MA program are assigned a faculty advisor to guide their studies. Courses, selected in consultation with the advisor, will normally be completed in three semesters. All students, regardless of their concentration, must master at least one of the languages in which the primary sources of NELC’s subfields are written. Standards vary by subfield.

For more information: http://www.sas.upenn.edu/nelc/grad_programs/maProcedures.html

View the University’s Academic Requirements for Research Master’s Programs (p. 1750).

Curriculum

A minimum of 12 course units are required for graduation.

- Coursework
- Reading proficiency examination in one modern language of scholarly research
- MA Final Exams (no more than four exams, with at least one being a language exam)
- Thesis or two research papers

Some MA students apply for NELC’s PhD program. However, admission to the MA program or successful completion of the MA does not provide a guarantee of admission to the PhD program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages and Civilizations: Egyptology, PhD

NELC’s graduate program in Egyptology offers advanced study of the languages and civilizations of ancient Egypt.

View the department’s PhD general procedures (https://www.sas.upenn.edu/nelc/grad_programs/phdProcedures.html).

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Curriculum

A total of 20 course units are required for graduation.

Language and Literature Concentration

- Primary Field
  - Ancient Egyptian language and literature (at least 8 courses)
  - History, culture, art and archaeology of Ancient Egypt (at least 6 courses)
- Secondary Field
  - Language of chosen secondary field of concentration (at least 4 courses)
  - History, culture, art and archaeology (at least 2 courses)

Archaeology Concentration

- Primary Field
  - Archaeology, art, history, and culture of Ancient Egypt (at least 7 courses)
  - History of ancient Egypt (at least 2 courses)
  - Language of ancient Egypt (at least 4 courses)
- Secondary Field
  - Art, Archaeology, history, culture, and anthropology (at least 6 courses)
  - Archaeological interpretation and techniques (at least 1 course)

Other Program Milestones

In addition to the above-described required coursework, PhD students are responsible for two (2) European language reading exams, candidacy exams, and qualifying exams before preparing a dissertation proposal.

Secondary Field in Egyptology

Graduate students in other programs (such as Mesopotamian Civilizations or Biblical Studies) who take a secondary field in Egyptology must take at least four courses in Egyptian language (Middle Egyptian and another significant phase) and two in history and culture.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

- History of ancient Egypt (at least 2 courses)

Sample Plan of Study

Students in the PhD program are required to take 20 course units. The coursework component is normally three years in length, but with

### Curriculum

A minimum of 12 course units are required for graduation.

- Coursework
- Reading proficiency examination in one modern language of scholarly research
- MA Final Exams (no more than four exams, with at least one being a language exam)
- Thesis or two research papers

Some MA students apply for NELC’s PhD program. However, admission to the MA program or successful completion of the MA does not provide a guarantee of admission to the PhD program.

### Near Eastern Languages and Civilizations: Mesopotamian Civilization, PhD

NELC’s PhD program in Mesopotamian Civilizations offers advanced study of the languages and philology of ancient Mesopotamia as well as the history and archaeology of that region in its Near Eastern context.

Students in the Mesopotamian Civilization program may specialize in either Archaeology and Art History or History, Language and Literature, but all students are expected to command a primary and secondary ancient language, as well as the general history and culture of the region. The specific distribution of courses varies by specialization. Students are expected to work out the broad outlines of their programs in consultation with their faculty advisor when they begin their studies.

View the department’s PhD general procedures (https://www.sas.upenn.edu/nelc/grad_programs/phdProcedures.html).

**For more information:** [https://www.sas.upenn.edu/nelc/grad_programs/grad_programs.html](https://www.sas.upenn.edu/nelc/grad_programs/grad_programs.html)

### Curriculum

A total of 20 course units are required for graduation.

### Near Eastern Languages and Civilizations: Mesopotamian Civilization, MA

In addition to the MA awarded within the PhD program, NELC offers an independent (terminal) MA degree in Mesopotamian Civilizations. NELC’s graduate program in Mesopotamian Civilizations offers advanced study of the languages and philology of ancient Mesopotamia as well as the history and archaeology of that region in its Near Eastern context.
Primary Field
- Specialization in History, Language, and Literature
  - Languages
  - History
  - Art and archaeology
- Specialization in Archaeology and Art History
  - Languages and Literatures
  - History
  - Archaeology and Art History

Other Program Milestones
In addition to the above-described required coursework, PhD students are responsible for two (2) European language reading exams, candidacy exams, and qualifying exams before preparing a dissertation proposal.

Secondary Field
Students concentrating in other NELC programs such as Biblical Studies or Egyptology may acquire secondary field competence in Mesopotamian Civilization with six courses. The distribution of the courses ought to reflect the student’s focus on history, language and literature or archaeology. Students in history, language and literature must take at least two art or archaeology courses and students in archaeology and art history must complete at least one introductory language sequence.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sample Plan of Study
Students in the PhD program are required to take 20 course units. The coursework component is normally three years in length, but with the potential for transfer credit for other graduate courses within the field. Students entering the PhD program will be assigned a faculty advisor who will supervise the student’s program until the Candidacy Examinations in the 4th year of study have been completed.

Philosophy, PhD
The Penn Philosophy Department has a long and distinguished history. Philosophy has been taught at the University since 1755, and Penn was among the first universities in the country to offer the PhD degree in Philosophy, in 1882. The Department has always prized breadth, and its members are prepared to supervise advanced research in metaphysics and epistemology, philosophy of mind, philosophy of science, logic, philosophy of language, ethics, social and political philosophy, philosophy of law, and the history of philosophy.

The Ph.D. program includes coursework, a teaching requirement, a preliminary examination, and the preparation and defense of a dissertation. Required coursework includes two courses in contemporary epistemology and metaphysics (including philosophy of science, mind, language, and mathematics); two courses in value theory (ethics, political or legal philosophy, aesthetics); three courses in history of philosophy, and a logic requirement.

Physics and Astronomy, PhD

The University of Pennsylvania Department of Physics and Astronomy is a world-leading institution that generally is regarded as among the very best places for graduate students to obtain a PhD. Graduate students at Penn combine a short term of coursework with independent, original research that forms the basis of their dissertation and typically their first publications. A rich program of seminars and colloquia by invited speakers from across the world supplements what students learn in classes and during their research activities.

Primary research areas include outstanding theoretical and experimental work in both hard and soft condensed matter physics, often done in conjunction with other schools and departments at Penn, with some laboratories located in Penn’s Singh Center for Nanotechnology and the Laboratory for Research into the Structure of Matter. Biophysics at Penn is also divided amongst advanced theoretical work and hands-on laboratory work, and encompasses both complex networking theories and some of the exotic optics of biological systems.

Our Astrophysics and Cosmology groups explore the structure and evolution of the Universe, perform searches for exoplanets, and study galaxy formation. Efforts in cosmology include theoretical models for the acceleration of the Universe and the properties of dark matter, observations of the structure of the Universe and studies of dark matter using gravitational lensing with the Dark Energy Survey and eventually the Large-aperture Synoptic Survey Telescope, and studies of the cosmic microwave background with telescopes in places like the Chilean Andes and the South Pole. Our effort in nuclear and particle physics also spans both fundamental theoretical work such as string theory, as well as experimental work at the Large Hadron Collider at CERN and various neutrino experiments across the world. Collider efforts include studies of the recently-discovered Higgs boson as well as searches for supersymmetry, and our neutrino work includes searches for Majorana neutrinos and CP violation in neutrino oscillations.

Our experimental nuclear and particle physics effort makes extensive use of Penn’s world-class instrumentation group, giving students the ability to explore creative new ideas in both hardware and in their data analysis work.

Electives
Select an additional 15 course units 1

Total Course Units 20

1 One course must be outside the student’s field of specialization. Up to 11 course units can come from independent research or reading courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Political Science, PhD

The Graduate Program in Political Science at the University of Pennsylvania reflects the methodological diversity of the discipline. The department has significant strengths in each of the four major subfields in the discipline: American Politics, Comparative Politics, International Relations, and Political Theory.

Courses in each of the four substantive fields clarify important intellectual and conceptual issues and help students learn how to formulate an original research project. Courses in both quantitative and qualitative research methods provide students with cutting-edge tools they can use to conduct their research.

The Ph.D. program includes course work, a teaching requirement, a second-year paper, a preliminary examination, and the preparation and defense of a dissertation. Candidates completing the Ph.D. degree typically pursue careers in academia, government service, and the private sector.

For more information: http://www.sas.upenn.edu/polisci/content/graduate-program

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Required Courses
A total of 15 course units are required for graduation.
Research Skills Requirement

• PSCI 692 Advanced Statistical Analysis or a comparable course with the approval of the graduate group chairperson

Two Exam Fields

• Students must select 2 exam fields from among the 4 major subfields of the discipline (American Politics, Comparative Politics, International Relations, and Political Theory). They must take at least 3 classes in each of those fields prior to their qualifying exam.

Third Thematic Field

• All students must complete a third field by taking three classes around a unifying substantive theme.

Students may select the remaining 5 courses in consultation with their advisor and/or the graduate group chairperson.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Psychology, PhD

Graduate study in Psychology at Penn emphasizes scholarship and research accomplishment. The first-year program is divided between courses that introduce various areas of psychology and a focused research experience. A deep involvement in research continues throughout the graduate program, and is supplemented by participation in seminars, teaching, and general intellectual give-and-take. Students are admitted into the graduate program as a whole, not into specific subfields. Students and faculty are free to define their fields of interest. A high level of interaction between students and faculty helps generate both a shared set of interests in the theoretical, historical, and philosophical foundations of psychology and active collaboration in research projects.

The Graduate Group in Psychology is highly distinguished and represents a broad range of work in psychology and includes an APA-approved clinical program. Two regular faculty and two emeritus professors are members of the National Academy of Sciences, and three regular faculty are Fellows of the American Academy of Arts and Sciences. The Department also includes past presidents of the American Psychological Association, the Society for Judgment and Decision Making, and of the Linguistics Society of America.

Many other faculty, graduate students, and former students have received national awards for excellence in research and teaching. We have strong connections with other disciplines at the University. Our members play pivotal roles in two of the most important interdisciplinary areas on campus, the cognitive sciences and the neurosciences, both of which have been fostered by the Department as a matter of policy.

For more information: http://psychology.sas.upenn.edu/graduate

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Clinical Program Requirements

The clinical training program, nested in the Department, is intended to prepare students for research/academic careers in Clinical Psychology, Psychopathology, or Personality. Clinical training (in assessment, diagnosis and psychotherapy) is seen as an integral part of the education of highly qualified, creative clinical scientists. Nevertheless, the principal goal of Penn clinical students is to become expert psychologists, not simply expert clinicians, and the program is designed to support that goal. Our program is a member of the Academy of Psychological Clinical Science, a coalition of doctoral training programs that emphasize the scientific basis of clinical psychology and is accredited by the Psychological Clinical Science Accreditation System. Our membership in the Academy indicates our commitment to empirical research as the basis of theory, assessment, and intervention, and our PCSAS accreditation attests to our success in training clinical students. The program is also accredited by the American Psychological Association.

Religious Studies, PhD

The graduate program in Religious Studies at the University of Pennsylvania offers unique research opportunities for students to become first class scholars, teachers and expositors in the field. Our program is situated within one of the largest and finest research universities in the country, easily accessible to other research centers along the eastern seaboard. At the same time, the Department of Religious Studies provides students with a great deal of individual attention from faculty members, and the opportunity to interact with students from diverse subfields.

Within this context of extensive resources and personalized guidance, each student works with an advisor to design his or her own course of study. The structure of the PhD program currently consists of six core full time faculty members, and a graduate group comprised of faculty across the University of Pennsylvania campus whose research and teaching significantly involves the study of religion and who actively participate in the training of graduate students in Religious Studies.

The typical doctoral program in Religious Studies is funded over a five-year period, over which students are expected to engage in coursework, complete teaching assistantships, and attend the graduate colloquium. Requirements for the program include a minimum of two languages, qualifying examinations, preliminary examinations (with an oral examination component), and an oral dissertation defense.

Graduate students in Religious Studies have the benefit of a wealth of resources unrivalled by any major research university. In addition to possessing one of the best research libraries in the world, Penn is also home to the University of Pennsylvania Museum of Archaeology and Anthropology, the oldest institution of its kind in the United States. Within the city of Philadelphia an independent research library specializing in American history and culture from the 17th through the 19th centuries.

1 Must be approved by Director of Graduate Studies.

Religious Studies, PhD

The University of Pennsylvania’s Graduate Program in French Studies offers a five-year Ph.D. program. All students admitted to the program are awarded full financial support through the University’s Benjamin Franklin Fellowships, including summer funding for the first three years.

The overarching goal of the program is to train students for productive scholarship and for effective college or university teaching. We have an outstanding faculty committed to scholarly excellence and we have an impressive record in placing candidates on the job market.

In addition to our faculty having interest in a broad range of centuries, individual expertise include science studies, popular culture, film noir, fashion, travel writing, poetry, anthropology, gender, postcolonial studies, cultural history, narratology, and history of the book. Students are encouraged to incorporate new critical approaches into their dissertation topics.

Interdisciplinary study is encouraged through participation in the wide range of seminars, lectures, and colloquia sponsored by the various Graduate Groups and affiliated research institutes and centers at Penn. Students may complement their studies by taking up to four courses outside the French section. Graduate students in French and Francophone Studies may also participate in The Penn Humanities Forum which also provides a venue for doctoral students to interact with colleagues from across the disciplines.
For more information: https://www.sas.upenn.edu/french/graduate

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Requirements
The Ph.D. program in French and Francophone Studies is planned as a five-year sequence. Requirements for the Ph.D. include:

- A total of twenty (20) graduate courses including:
  - FREN 500 Proseminar: Reading for the M.A. Exam will be taken for credit during the spring semester of the student's first year.
  - ROML 690 Language Teaching and Learning: This course in Applied Linguistics and Language Teaching will be audited in the fall semester of the second year and will be taken for credit during the spring semester of that year after the student has completed one semester of teaching.
  - FREN 850 Field Statement: Followed by preparation of Field Statement in the summer of the 2nd year, students present and discuss their Field Statement in fall of the third year.
  - FREN 851 Dissertation Proposal: The student will register for this course during the spring of the third year, and will complete the Dissertation Proposal/Prospectus during the following fall (7th semester).

- M.A. Examination— an oral and written examination based on the Master’s Reading List will be given at the conclusion of the spring semester of the student’s first year.

- Qualifying Evaluation— In order to be admitted to candidacy for the Ph.D. degree, students must successfully pass a qualifying evaluation. At the beginning of the second year, the faculty will evaluate all aspects of the student’s performance during his or her first year in the program.

- Foreign Language Requirement— a translation exam in one foreign language appropriate to the student’s prospective field of specialization.

- Ph.D. Examination— the Ph.D. exam consists of an oral and written part and will be taken in May of the third year (or the 6th semester), upon the completion of course work.

- Field Statement— during summer after second year, student will work with their advisor to prepare a Field Statement on their prospective areas of specialization to be presented in the fall semester of the third year.

- Dissertation Proposal— Students will begin work for an eventual dissertation topic to be completed during the summer after the student’s third year.

- Dissertation Defense— a public, oral presentation of the dissertation will take place during the semester in which the student will graduate.

1 Students who enter the program with previous graduate work may be eligible to transfer some credits toward the Ph.D.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Romance Languages: Hispanic Studies, PhD

The Graduate Program in Hispanic Studies, a five-year Ph.D. program within the Department of Romance Languages, offers a rigorous professional formation in academic research, writing, and pedagogy. The program prepares students in a range of critical and methodological approaches to the study of literature, culture, and theory in Spain and Latin America. Students may complement their areas of specialization with course work in a second Romance language or in other disciplines such as Comparative Literature, English, History, and Philosophy.

Interdisciplinary study is also invited through participation in the many lectures and colloquia sponsored by the various Graduate Groups and affiliated research institutes and centers at Penn. All graduate students teach undergraduate courses in Spanish language and Hispanic culture, for which they attend extensive teacher training seminars and

2019-20 Catalog | Generated 10/18/19
workshops. Faculty members are committed to enhancing graduate students’ preparation for professional life through annual seminars on professional concerns and through comprehensive job placement support. The Department of Romance Languages publishes The Hispanic Review, and graduate students in Hispanic Studies may serve as editorial assistants to the journal.

For more information: https://www.sas.upenn.edu/hispanic-portuguese-studies/graduate

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Requirements

The Ph.D. program in Spanish is planned as a five-year sequence. Requirements for the Ph.D. include:

- A total of **twenty (20) graduate courses**, including:
  - A course in Literary Theory
  - SPAN 606 Pedagogy Across the Spanish Curriculum
  - SPAN 800 Field Exam (Comprehensive Exam preparation)
  - A Qualifying Evaluation—In order to be admitted to candidacy for the Ph.D. degree, students must pass successfully a qualifying evaluation. At the beginning of a student’s second year, the faculty will evaluate all aspects of the student’s performance during his or her first year in the program.
  - Foreign Language Requirements—translation exams in two (2) foreign languages appropriate to the student’s prospective field of specialization.
  - Comprehensive Exams—an oral exam in the fall of the third year and a written exam in the spring semester of the third year.
  - Dissertation Proposal—following successful fulfillment of the Ph.D. Comprehensive Examinations, the candidate will shape a dissertation project and writing schedule by September 15th of their fourth year.
  - Dissertation—the presentation of a dissertation is the final requirement for the Ph.D.
  - Dissertation Defense—a public, oral presentation of the dissertation will take place during the semester in which the student will graduate.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Romance Languages: Italian Studies, PhD

The Graduate Program in Italian Studies in the Department of Romance Languages at the University of Pennsylvania offers students a range of curricular options that provide a broad academic base in Italian literature, film, cultural studies, and critical theory, as well as the most current pedagogical theory and practice. Students are encouraged to shape a curriculum that will prepare them in a primary period of interest as well as a secondary focal area. Students may complement their studies with up to four courses outside the Italian Studies section—for example, in another Romance language, Comparative Literature, English, and History. Certificate programs in the areas of Women’s Studies, Cinema Studies and Urban Studies, for example, are also available. Interdisciplinary study is encouraged through participation in the wide range of seminars, lectures, and colloquia sponsored by the various Graduate Groups and affiliated research institutes and centers at Penn, including the Center for Italian Studies and at the many cultural institutions in the Philadelphia area.

Great resources are available to the graduate students in Italian, including the world-renowned Kislak Center for Special Collections, Rare Books and Manuscripts. The Program in Italian Studies collaborates actively with the Kislak Center to provide students with hands on experience with rare material in conjunction with classes, talks, conferences, and book exhibits. Additionally, individual dissertation research abroad is
encouraged and summer research funding is available competitively through the Salvatori Fund or other sources.

Finally, the Center for Italian Studies coordinates scholarly activities among faculty and students across the humanities, organizing research groups, visiting lectures, film screenings and major academic conferences.

For more information: http://www.sas.upenn.edu/italians/graduate/

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Requirements

The Ph.D. program in Italian is planned as a five-year sequence. Requirements for the Ph.D. include:

- A total of seventeen (17) graduate courses to be distributed as follows:
  - A Literary Theory course (usually in the second year)
  - ITAL 691 Italian Teaching & Learning (Italian Teaching & Learning and Second Language Development [SLD]) in the spring semester of the second year
  - ITAL 800 Exam Preparation (Exam Preparation), in which students will enroll during the spring semester of the third year for the purposes of beginning preparation for the Ph.D. exam.
  - A minimum of 11 electives in Italian
  - Up to 3 courses outside Italian in another field pertinent to the student’s area of specialization.

- A Qualifying Evaluation—in order to be admitted to candidacy for the Ph.D. degree, students must pass successfully a qualifying evaluation. At the beginning of a student’s second year, the faculty will evaluate all aspects of the student’s performance during his or her first year in the program.

- Foreign Language Requirement—a translation exam in two foreign languages appropriate to the student’s prospective field of specialization.

- Ph.D. Examination—a three-part written examination and an oral exam taken at the end of the third year or beginning of the fourth year.

- Dissertation Proposal—following successful fulfillment of the Ph.D. Examination, the candidate will shape a dissertation project and writing schedule.

- Dissertation—the presentation of a dissertation is the final requirement for the Ph.D.

Dissertation Defense—a public, oral presentation of the dissertation will take place during the semester in which the student will graduate.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sociology, PhD

Graduate work at the University of Pennsylvania is conducted through graduate groups formed according to different areas of study. These groups administer programs leading to the AM and PhD degrees. Those seeking a graduate degree in Sociology should apply to the Graduate Group in Sociology. Sociology students earn their MA on the way to the PhD. There is no terminal Master's degree program.

It is possible to earn a joint Ph.D. in Sociology and another discipline by being admitted to and satisfying the requirements of two Ph.D. programs and writing a single dissertation. Currently, students are enrolled in joint degrees with Demography, Education, Communications, and Africana Studies. Students seeking a joint Ph.D. combining Sociology with another program must be admitted in that program (as well as Sociology); admittance to the second program may occur after admission to the Sociology program.

For more information: http://sociology.sas.upenn.edu/graduate_resources

View the University’s Academic Requirements for PhD Degrees (p. 1745).

Required Courses

A minimum of 20 course units are required. A minimum of 12 course units must be taken at the University of Pennsylvania.
The Department of South Asia Studies (SAST) offers PhD and MA degrees, attracting exceptional students from around the world. Candidates for the MA develop a broad knowledge of disciplines relevant to the study of South Asia and competency in a South Asian language at an Intermediate-High level equivalent to a minimum of two years of study.

If students elect to write a Master's Thesis they must produce a piece of original research that includes sources in a South Asian language.

For more information: http://www.southasia.upenn.edu/

View the University's Academic Requirements for Research Master's Programs (p. 1750).

**Required Courses**

A minimum of 12 course units are required.

</tr>
</tbody>
</table>

1. At least six content courses (not including language courses and independent studies) must be taken with six different Standing Faculty of the South Asia Studies department.
2. Candidates who demonstrate Advanced knowledge of a South Asian language may be excused from taking additional language courses. The course units may then be reallocated to electives. In no case will exemption from further language study result in a reduction of the total number of 12 course units required for the degree.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**South Asia Regional Studies, PhD**

South Asia Studies is an interdisciplinary field focusing on the history, languages, society, literature, and art from India, Pakistan, Bangladesh, Nepal, Sri Lanka, Afghanistan, and Bhutan. America's oldest and most distinguished South Asia program, faculty work in multiple disciplines and offer study in nearly 15 South Asian languages.

The Department of South Asia Studies (SAST) offers PhD and MA degrees, attracting exceptional students from around the world. Candidates for the PhD develop a deep familiarity with the history, methodology, and practice of a chosen discipline relevant to the study of South Asia, and a broad knowledge of allied disciplines. Additionally, our PhD candidates will show a demonstrable proficiency in at least two relevant research languages as detailed in the department requirements.

In addition to the completion of coursework and language requirements, PhD candidates are expected to act as Teaching Assistants and/or teach their own classes. PhD candidates, through the course of their time in the department, are expected to make two presentations to the South
Asia Colloquium and to successfully pass their Qualifying and Candidacy Exams.

For more information: http://www.southasia.upenn.edu

View the University’s Academic Requirements for PhD Degrees (p. 1745).

**Curriculum**

A minimum of 20 course units are required at the 400 level or above. A minimum of 12 course units must be taken at the University of Pennsylvania.

**Graduate Division of Arts and Sciences**

Graduate education at Penn has a long and distinguished history, beginning with Penn’s first Ph.D. program in 1870. The origins of graduate education in the School of Arts and Sciences can be traced to the establishment of the graduate faculty in 1881 and the awarding of the first Ph.D. in 1889.

Today the Graduate Division of Arts and Sciences is one of nine graduate schools. This SAS Graduate Division, along with the Undergraduate College (http://www.college.upenn.edu) and the Division of Professional and Liberal Education (https://www.sas.upenn.edu/degrees-and-programs/lifelong-learning), comprise the School of Arts and Sciences (https://www.sas.upenn.edu/?), the largest of the University’s twelve schools (http://www.upenn.edu/programs).

The Graduate Division of the School of Arts and Sciences currently includes over thirty graduate groups and offers the degrees of Master of Arts (A.M.), Master of Science (M.S), Master of Philosophy (M.Phil.),
and Doctor of Philosophy (Ph.D.). The Office of the Graduate Division, located at 3401 Walnut Street, Suite 322A, is the administrative unit which oversees such matters as admissions, records, funding.

The Graduate Division also oversees degree and graduation for all Ph.D. and Master’s students in the nine research-degree granting schools at the University.

**Contact procedures:**

- Students should contact the Office of the Graduate Division of Arts and Sciences (https://www.sas.upenn.edu/graduate-division/contact) directly to submit applications for admission to one of the graduate programs, to turn in dissertations and Master’s theses, and to make arrangements for the graduation ceremony.

- Graduate groups (https://www.sas.upenn.edu/graduate-division/programs/graduate-groups) are the best initial contact not only for information about program content, but also for assistance with problems related to funding, grades, fulfillment of degree requirements, leaves, and transfers.

- If the event of an academic grievance, The Academic Grievance policy (https://www.sas.upenn.edu/graduate-division/resources/academic-grievance-procedure) describes the procedures in place for currently enrolled students and former students within 3 years after leaving the University.

- Students are directed to the Office of Student Financial Services (http://www.sfs.upenn.edu) for information on loans and to pay late fees, microfilm and copyright fees for the dissertation.

Our goal is to train future scholars, teachers, thinkers and social leaders, through the rigors of graduate education. Our doctoral programs aim at developing lifelong skills in pedagogy, critical and analytical thinking, from the humanities, social sciences and natural sciences.

Interdisciplinary nature of our programs encourages our students to engage in a flexible array of coursework and mentorship within the School of Arts and Sciences and in other schools at the university. Our students enjoy the flexibility of pursuing dual and joint degrees in SAS and across schools.

This is a part of our investment in excellence through diversity not only in scholarship but also through cultural, social and political experiences at the university.

The University of Pennsylvania Graduate Division of Arts and Sciences in partnership with the Biomedical Graduate Studies participates in the Leadership Alliance Summer Research Early Identification Program (SR–EIP). The Leadership Alliance is an academic consortium of 32 institutions of higher learning, including leading research and teaching college and universities. The mission of the Leadership Alliance is to develop underrepresented students into outstanding leaders and role models in academia, business and the public sector.

This program offers undergraduates interested in pursuing a PhD the opportunity to work for eight to ten weeks under the guidance of a faculty or research mentor at participating Alliance institutions. The SR–EIP is principally designed to encourage students from groups traditionally underrepresented in the social sciences and humanities including students who identify as African Americans, Hispanic Americans, Native Americans (including Alaska Natives) and US Pacific Islanders, to consider research careers in the academic, public, or private sectors.

For more information, visit https://www.sas.upenn.edu/graduate-division/programs/summer-research-early-identification-program.

The Graduate Division of Arts and Sciences has three different courses available to dissertation students while studying abroad or participating in an internship. These GAS courses allow the student to remain registered during the research and writing stages of the dissertation. A student conducting dissertation research abroad in a given semester is eligible to register for Dissertation Research Abroad status. Students who must complete an internship as a part of their degree requirement or those awarded the opportunity to conduct research through specific programs to further their research interest may request to register for GAS 993 or GAS 994.

The Graduate Division of Arts and Sciences covers the tuition for students registered for GAS 996, GAS 993 or GAS 994 in years 2 through 8 of the Ph.D. program. Students are responsible for the reduced general fee while registered for any of the SAS courses listed below regardless of their year in the program.

- GAS 996 Dissertation Abroad Status
- GAS 993 Academic Internship
- GAS 994 Clinical Psychology

Students may not be enrolled in GAS registration in the term in which they file for a degree (alternate master’s or Ph.D.). That is, students must be in enrolled in courses or regular dissertation registration in the term in which a degree is earned. Students in the Graduate Division of Arts and Sciences can register for a maximum of 4 semesters of Dissertation Research Abroad (GAS 996), External Internship (GAS 993) and Clinical Internship (GAS 994) over the course of their PhD career in GAS. Tuition will not be charged, but the General Fee will be billed at the reduced rate. The General Fee cannot be waived for any reason. Students are responsible for the reduced general fee and health insurance. The health insurance may be waived, but it is the student's responsibility to initiate the request and follow through with Student Health.

**Liberal and Professional Studies**

The College of Liberal and Professional Studies (LPS) is the home of lifelong learning at the University of Pennsylvania. Housed within the School of Arts and Sciences, offering high school, undergraduate, post-baccalaureate, graduate, summer and online studies as well as customizable professional training with courses that span across disciplines.

LPS students—engaged, curious and driven—come to Penn from all over the world with diverse academic and professional backgrounds. Whether to learn English while immersed in an Ivy League institution, join the global classroom in a MOOC, spend summer abroad or start a new career, LPS offers the very best opportunities.

No matter where a person is in life, or in the world—preparing for college, living overseas, working full-time, active in the military or studying on-campus—the College of Liberal and Professional Studies opens the Ivy League experience.

The eight professional master’s programs at LPS unite rigorous academics, hands-on practice, and individualized advising and support at one of the world’s top research universities. LPS focuses on career aspirations and connects students with the knowledge, experience and networks needed to make them those aspirations a reality.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Politics, Certificate

The Certificate in Politics is designed to provide students with the foundational knowledge and practical skills to effectively navigate complex and diverse political environments. Students who have completed this certificate have gone on to manage political campaigns, run for office, work at the intersection of the public and private sectors, and lead local, state, and federal government organizations.

For more information: https://www.fels.upenn.edu/certificate/certificate-politics
For more information: https://www.fels.upenn.edu/certificates/certificate-politics

Curriculum
The Certificate in Politics requires 4 course units, including 2 course units of foundational courses and 2 course units of electives chosen from the list below.

Course Information

11-1021 General and Operations Managers
11-1031 Legislators
11-2013 Public Relations and Fundraising Managers
11-9030 Education Administrators
11-9151 Social and Community Service Managers

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Public Finance, Certificate

The Certificate in Public Finance allows students to learn how to promote economic growth at the community, organizational, and policy levels, while also gaining fundamental competencies of effective financial management needed to work in public finance. Elective coursework focuses on advancing equity and inclusion in development, and how to use data and analysis to make informed financial decisions.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Social, Cognitive, & Affective Neuroscience, Certificate

The Graduate Certificate in Social, Cognitive and Affective Neuroscience (SCAN) program enables graduate students and professionals preparing for a wide range of careers to work knowledgeably with neuroscience. Our program's aim is to supplement your education if you have expertise in areas other than neuroscience, enabling you to incorporate some of the...
concepts and methods of neuroscience into your work. The curriculum focuses on the aspects of neuroscience that have the most direct application to the understanding of human behavior, specifically social, cognitive and affective neuroscience.

For more information: https://neuroethics.upenn.edu/scan/

Curriculum

Apply neuroscience to your field of interest

Penn’s Graduate Certificate in Social, Cognitive and Affective Neuroscience (SCAN) is a four-course program that can be completed in one to two years. The required courses provide a strong grasp of neuroscience for non-neuroscientists, emphasizing those aspects of the field that are most relevant to understanding human behavior. The curriculum is composed of two foundational requirements and two electives.

Students meet individually with the program directors in September of their first year to discuss their goals and possible elective courses. To fulfill the requirements of the SCAN certificate, students are expected to earn a B or higher in every course.

</tr>
</tbody>
</table>

Elective Courses

The remaining two courses are intended to strengthen your mastery of specific areas of neuroscience and its relation to your fields of interest. Electives are organized into three categories, shown below. For these electives, students may take two Advanced Neuroscience courses or one course from any of these three categories: Advanced Neuroscience, Neuroscience & Society, Bridging. Approved electives for the upcoming semester can also be viewed below.

### Liberal Arts Individualized, MLA

Students in the Master of Liberal Arts (MLA) degree program have the rare opportunity to develop their own concentration in the liberal arts from courses across the University. As an MLA student, you design an individualized curriculum of nine graduate-level courses that center on a particular theme that interests you, culminating in an individual capstone project. The capstone is a large-scale academic project of your own choosing, created with the guidance of your professors and advisors. Previous capstones include memoirs, poetry cycles, and research papers. The process of developing your capstone both tests and celebrates your education at Penn, and can be used to demonstrate the value of your time here to employers or graduate schools.

**For more information:** [https://www.sas.upenn.edu/lps/graduate/mla](https://www.sas.upenn.edu/lps/graduate/mla)

### Curriculum

#### Individualized curriculum

The range of courses you can take means that you can construct a plan of study at the precise nexus of your interests, or sample several different fields before settling on an ongoing focus. The process itself of curating your own curriculum is one of the most valuable aspects of the MLA program. In doing so, you learn how to listen to your own instincts and curiosities, as well as strategically direct your own development as a person and as an academic or professional in your field.

During the process of choosing your courses, you’ll be supported by the Program Director and our administrative staff. We take an intensive student-by-student approach, offering the open conversation and long-term advising relationships that you need to help you create your MLA path.

#### MLA course requirements and Proseminars

Your Master of Liberal Arts degree curriculum consists of nine graduate-level courses. At least seven of these courses must be taken in the School of Arts and Sciences. MLA students are not limited to enrollment in MLA program courses. As long as permits are not required, you can take any graduate-level course in the College of Liberal and Professional Studies and the School of Arts and Sciences, as well as schools throughout the University, such as the Annenberg School for Communication, the Graduate School of Education, and the School of Social Policy & Practice.

Of the nine courses in your individualized curriculum, one to three of them must be MLA Proseminars. A Proseminar is a small, intensive class that asks you to integrate research, writing, discussion and other methods of inquiry. The small class size fosters thoughtful conversation and debate and provides a powerful environment for intellectual growth. We offer multiple Proseminars each semester, and the topics change every semester as well.

#### MLA certificates

While earning your Master of Liberal Arts degree, you have the opportunity to earn a certificate in one of several subject areas, including Latin American Studies, Urban Studies, Cinema Studies, and more. Each certificate program consists of an interdisciplinary set of classes, which was chosen by faculty members to help students explore and master a given topic. Please visit the certificate page ([https://www.sas.upenn.edu/lps/graduate/mla/certificates](https://www.sas.upenn.edu/lps/graduate/mla/certificates)) to learn more.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Other program requirements and opportunities

Students meet individually with the program directors in September of their first year to discuss their goals and possible elective courses. To fulfill the requirements of the SCAN certificate, students are expected to earn a B or higher in every course. In addition to the four courses, it is a requirement to attend the annual half-day retreat ([https://neuroethics.upenn.edu/scan/retreat](https://neuroethics.upenn.edu/scan/retreat)) while enrolled in the program.

The SCAN program makes study space available near the required course classrooms, with textbooks on reserve. Students may propose local neuroscientists as SCAN-sponsored lunch guests for informal conversation in this same area.

### Prerequisites

There are no course prerequisites required to apply to the SCAN program. However, some of the elective courses that can be taken to fulfill the SCAN course sequence do have prerequisites. Some requirements are waived for SCAN students via a permit issued by the Department of Psychology. **All permits for SCAN students are submitted at the end of the application period. At that time, you receive notification that you can register for the course.**

Please e-mail us ([penn-scan@sas.upenn.edu](mailto:penn-scan@sas.upenn.edu)) if you have any questions about prerequisites and course registration.

### Bridging

This category includes courses in the student’s home field or a closely related field that includes substantial neuroscience material. The availability of bridging courses varies by program and by year, and course eligibility depends on the syllabus used in a given year. Courses are approved on a case-by-case basis by the Advisory Board after reviewing the course syllabus.

1 MKTG 850 Special Topics - Consumer Neuroscience and MKTG 737 Introduction to Brain Science for Business must be taken together for one credit.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Applied Positive Psychology, MAPP

Rapidly becoming one of psychology’s most transformative fields, positive psychology is the scientific study of the strengths that enable humans and organizations to flourish. The Master of Applied Positive Psychology (MAPP) program at the University of Pennsylvania was the first in the world to offer a degree in this rigorous field of study. Dr. Martin E.P. Seligman, founder of the discipline of positive psychology, along with leading researchers and practitioners educate students at the cutting edge of the field. The MAPP curriculum is designed to educate you in the history, theory and research methods of positive psychology, as well as its application in professional settings.

For more information: https://www.sas.upenn.edu/lps/graduate/mapp

Curriculum

The program consists of nine courses, completed in one year of full-time study during consecutive fall, spring and summer semesters.

• During the fall semester, you will begin the program with courses that focus on the science, research and theoretical underpinnings of positive psychology, giving students a strong foundation to build on throughout the remainder of the program.

• The spring semester courses offer content to help you learn how to apply positive psychology in various professional settings, including creating a plan for positive interventions in a real organization.

• The capstone project, which is completed during the summer semester, allows you to integrate what you’ve learned throughout the program, and apply it in the professional or research domain most significant to you. It often serves as a stepping stone to the application of positive psychology in a particular professional domain or to further research in a specific area.

Capstone

The capstone project is a distinguishing feature of the Master of Applied Positive Psychology program, blending academic and professional experiences and serving as the culmination of your work in the program. Through the capstone project, you will explore, in depth, the theories and practical applications you’ve learned in the program, to advance the field of positive psychology itself. If you are interested in exploring more capstones, you can visit Penn’s Scholarly Commons website to browse project abstracts (http://repository.upenn.edu/mapp_capstones) or download full projects (http://repository.upenn.edu/mapp_capstone).

The capstone is completed during the summer semester and has no on-site course requirements. You will conduct this project work independently, with your advisor’s ongoing guidance, in a setting that is significant to you and most relevant to your future professional goals.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Behavioral and Decision Sciences, MBDS

Penn’s Master of Behavioral and Decision Sciences (MBDS) is informed by contemporary theories and research methods of behavioral economics, decision sciences, network analysis and public policy. Our program equips students with theoretical and practical tools to address a variety of real-life problems, putting you ahead of the curve in a growing field of study. The interdisciplinary degree prepares you to understand how individuals and groups make decisions, and how to affect those decisions. Our world-renowned faculty and researchers are also leading practitioners in their fields. With their expertise, you are guided to apply what you learn to real-life problems in areas such as social and public policy, law, education, business and medicine.

For more information: https://www.sas.upenn.edu/lps/graduate/mbds

Curriculum

Curriculum structure

To fulfill the requirements for this degree program, you must complete nine courses including a capstone research project. You can finish the coursework in one full-time academic year, using the summer to complete the capstone research project, or at a part-time flexible pace.

During your studies, you establish a theoretical, methodological and quantitative foundation in the field with a common core covering behavioral economics, psychology, social norms and public policy. You learn to model how individuals and groups make decisions, the behavioral and neural foundations of decision-making, and have the opportunity to design lab and field experiments to test your hypotheses. You are taught to create and analyze computational models of social emergence, and use network analysis to understand how behavior can spread or dissolve.

You may select a concentration in an area such as social science, public health, neuroscience, education, or social and public policy. Students interested in real-world applications can work with faculty members who employ their research in fields like social and public policy, education, law, business and medicine.

Our interdisciplinary curriculum allows students to take elective classes from:

• The School of Arts and Sciences (https://www.sas.upenn.edu/frd/departments)
• The School of Social Policy & Practice (https://www.sp2.upenn.edu)
• The Wharton School (https://www.wharton.upenn.edu)
Required courses

All students are expected to take five core classes, three elective courses and one dedicated capstone research project to earn the nine course units required for the Master of Behavioral and Decision Sciences.

Total Course Units 9

1 If you take more than one course from the Quantitative core, it will serve as an elective course.

Electives and concentrations

The goal of the Master of Behavioral and Decision Sciences is to equip students with practical tools for applications and a focused academic portfolio. You can select three courses from disciplines and schools across the University in relation to your academic and professional goals. An advisor from the program works with you one-on-one to craft a successful curriculum.

Elective concentrations include:

- Public health
- Psychology/Neuroscience
- Education policy
- Social and public policy
- Economics/Neuroeconomics
- Sociology/Networks
- Computational systems

Prerequisites

The program has two prerequisite courses:

1. introductory statistics and
2. microeconomics/game theory

For students who lack sufficient background in one or all areas, the prerequisite courses are offered through the College of Liberal and Professional Studies during the summer prior to the start of the program in the fall term.

Capstone experience

The final capstone research project for the Master of Behavioral and Decision Sciences is an independent study experience. Throughout the process, you connect with faculty members in your area of concentration to determine appropriate final projects or ways to participate in applying research, such as completing an internship or conducting fieldwork.

The capstone schedule allows for incremental deadlines and feedback from professors. The requirement for the capstone is a final project that contributes to your future career path. The paper is expected to:

- Present a position that is unique, original and directly applies to your experience
- Use primary sources or apply to a primary organization/agency
- Conform to the style and format of excellent academic writing
- Analyze empirical research data that is collected by you or that has already been collected
- Allow you to demonstrate the competencies gained in the master’s program

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Chemical Sciences, MCS

Your future in chemistry starts at Penn. Whether you're currently a chemistry professional or seeking to enter the field, Penn's rigorous Master of Chemical Sciences (MCS) prepares you to take advantage of the myriad career possibilities available in the chemical sciences. Our program equips you with theoretical and technical expertise in biological chemistry, inorganic chemistry, organic chemistry, physical chemistry, environmental chemistry and materials.

For more information: https://www.sas.upenn.edu/lps/graduate/mcs

Curriculum

The Master of Chemical Sciences degree is designed to give you a well-rounded, mechanistic foundation in a blend of chemistry topics. To that end, the curriculum is structured with a combination of core concentration courses and electives, which allow you to focus on topics best suited to your interests and goals.

Our program may be completed full time in two years. Students can also enroll part time. Our advisors are dedicated to offering each student a tailored academic plan that meets the needs of both full-time and part-time students. For example, if you are currently in the industry, you may complete the research component of the degree while at work. If you are considering part-time enrollment or would like to discuss our customizable options, please contact the Associate Director (https://www.sas.upenn.edu/lps/graduate/mcs/contact), Dr. Ana-Rita Mayol directly to learn more.

As a new student in the Master of Chemical Sciences program, you will complete a week-long new student orientation, a placement test, and meet with your academic advisor to review your previous experiences.
and your future goals. Based on this discussion, you will create an individualized academic schedule.

The Master of Chemical Sciences requires the minimum completion of 10 course units (CU) as follows:

<table>
<thead>

**Total Course Units**

10

### Pro-Seminar course

The Pro-Seminar will review fundamental concepts regarding research design, the scientific method and professional skills, and scientific communication. The course will also familiarize students with techniques for searching scientific databases and with the basis of ethical conduct in science. (MCS 540, 1 CU)

### Concentration courses

The concentration courses (https://www.sas.upenn.edu/lps/graduate/mcs/curriculum/concentration-courses) allow you to develop specific expertise and also signify your mastery of a field to potential employers.

The number of elective courses you take will depend upon the requirements for your area of concentration, and upon the curriculum that you plan with your academic advisor. These concentration courses allow you to acquire the skills and the critical perspective necessary to master a chemical sciences subdiscipline, and will help prepare you to pursue the final capstone project (below).

You may choose from the following six chemical sciences concentrations:

- Biological Chemistry (https://www.sas.upenn.edu/lps/graduate/mcs/curriculum/concentration-courses/#bio)
- Inorganic Chemistry (https://www.sas.upenn.edu/lps/graduate/mcs/curriculum/concentration-courses/#Inorganic)
- Organic Chemistry (https://www.sas.upenn.edu/lps/graduate/mcs/curriculum/concentration-courses/#Organic)
- Physical Chemistry (https://www.sas.upenn.edu/lps/graduate/mcs/curriculum/concentration-courses/#Physical)
- Environmental Chemistry (https://www.sas.upenn.edu/lps/graduate/mcs/curriculum/concentration-courses/#Environmental)
- Materials (https://www.sas.upenn.edu/lps/graduate/mcs/curriculum/concentration-courses/#Materials)

### Independent Studies

The optional Independent Studies course will be offered each fall and spring semester, giving you an opportunity to participate in one of the research projects being conducted in one of our chemistry laboratories. During the study, you will also learn analytical skills relevant to your capstone research project and career goals. You can participate in the Independent Studies course during your first year in the program as a one-course unit elective course option. The Independent Studies course is available in the fall, spring and summer terms. (MCS 599, 1 CU maximum)

### Capstone project

The capstone project is a distinguishing feature of the Master of Chemical Sciences program, blending academic and professional experiences and serving as the culmination of your work in the program. You will develop a project drawing from your learning in and outside of the classroom to demonstrate mastery of an area in the chemical sciences.

The subject of this project is related to your professional concentration and may be selected to complement or further develop a work-related interest. It’s an opportunity to showcase your specialization and your unique perspective within the field.

Your capstone component may be a Penn laboratory research project (https://www.sas.upenn.edu/lps/graduate/mcs/curriculum/advising), an off-campus laboratory research project (https://www.sas.upenn.edu/lps/graduate/mcs/research-partners-and-opportunities) or a literature-based review project. All components will require a completed scientific report. It is expected that the capstone project will take an average of six to ten months to complete. Most students are expected to start at the end of the first academic year in the summer and conclude at the end of fall semester of the second year. Depending on the capstone option selected, students may begin to work on the capstone as early as the spring semester of their first year in the program.

All capstone project proposals must be pre-approved by your committee composed of a concentration advisor and/or research supervisor, Master of Chemical Sciences Program Director and a secondary reader. If necessary, nondisclosure agreements will be signed by students securing projects with private companies. Additionally, students from private industry may be able to complete a defined capstone project at their current place of employment. All capstone projects culminate in a final written report, to be graded by the student's concentration advisor who is a member of the standing faculty or staff instructor in the Chemistry Department.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Government Administration (Exec), MPA

The Fels Executive MPA is the innovative, practitioner-focused Fels MPA degree, designed and delivered by a team of Penn faculty members, resident scholars, and adjunct instructors to meet the needs of mid-career professionals seeking to advance in or enter the public sector. The on-site, online hybrid format of the program offers Executive MPA students the opportunity to complete an Ivy League degree and establish a valuable network, while still working full time in and beyond the Philadelphia region.

Government Administration (FT), MPA
The one-year, full-time Master of Public Administration (MPA) degree at the Fels Institute of Government provides the concepts and skills students need to become the public managers and leaders of tomorrow. Driven by our three-pronged approach of context, analysis, and practice, the Fels MPA program admits a small and selective class of students who work closely with Penn faculty and leading policy practitioners to translate their classroom experiences into real-world results.

For more information: https://www.fels.upenn.edu/academics/mpa

International, MPA
The University of Pennsylvania’s International Master of Public Administration (I-MPA) is an innovative graduate degree for high-achieving students who are fluent in English and proficient in Mandarin. Our one-year program is anchored in the social and behavioral sciences and provides a skills-based, career-enhancing curriculum that focuses on comparative public administration, global leadership and public-private problem-solving. Individually tailored educational experiences further enhance your ability to confront today’s global challenges and work collaboratively across borders and sectors—in government, public service, NGOs, commerce and more. The program provides case-based learning addressing international, national and local level governance and leadership, problems and solutions.

For more information: https://www.sas.upenn.edu/lps/graduate/impa

Curriculum
The International Master of Public Administration is an interdisciplinary and experiential graduate program with a focus on social and behavioral sciences. Students take foundational and developmental courses in a cohort—which gives you the opportunity to create a strong bond with your peers and work closely with professors in smaller class settings. You also choose two electives from an approved list of courses in the School of Arts and Sciences where you learn with the greater Penn community and expand your network. In order to complete the degree, you must complete 10 course units (c.u.)

Organizational Dynamics, MPhil

The Master of Philosophy (MPhil) in Organizational Dynamics is an advanced graduate degree designed for individuals who want to demonstrate applied scholarship beyond a master’s degree but who are not ready to, or may not wish to, apply for a doctoral program. The Master of Philosophy in Organizational Dynamics can serve as an important step in future PhD study preparation or simply as a way to deepen engagement with the topics studied in a previous master’s degree.

For more information: https://www.sas.upenn.edu/lps/graduate/dynamics/mphil

Curriculum

You will work closely with an academic advisor to design a Master of Philosophy degree curriculum suited precisely to your interests and goals. You may also select from the five concentrations (https://www.sas.upenn.edu/lps/graduate/dynamics/curriculum/concentrations-certificates) available to the Master of Science in Organizational Dynamics students.

Master of Philosophy degree requirements

If you already hold a Master of Science in Organizational Dynamics degree from the University of Pennsylvania, the Master of Philosophy in Organizational Dynamics requires completion of six course units and a Master of Philosophy capstone paper or project. For master's degree holders from another program at the University of Pennsylvania, determination of the required number of courses will be based on the nature of the previously completed degree and coursework.

If you completed an equivalent graduate degree from another institution, the Master of Philosophy in Organizational Dynamics requires completion of eight course units and a Master of Philosophy capstone paper or project.

Master of Philosophy capstone

You will choose a member of the Organizational Dynamics faculty to work with as your capstone paper or project advisor. The role of your capstone advisor is to provide mentoring, help you define the scope and content of your paper or project and to read and evaluate your final work.

The format for the capstone may vary. It may be a professional portfolio of competencies acquired; professional/organizational applied research; an evaluation or synthesis of a topic of interest; or another approach selected with your advisor.

Examples of Organizational Dynamics capstone projects completed by program alumni are available on the Scholarly Commons (http://repository.upenn.edu/organizational_dynamics) website within the Penn Online Digital Library.

We encourage you to contact the program director (https://www.sas.upenn.edu/lps/graduate/dynamics/contact) to schedule an appointment to review your current research and explore your options for pursuing a Master of Philosophy in Organizational Dynamics.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

1 Academic credit (PDF) (http://www.upenn.edu/registrar/pdf_main/Course-Credit-Information.pdf) is defined by the University of Pennsylvania as a course unit (CU). A course unit (CU) is a general measure of academic work over a period of time, typically a term (semester or summer). A CU (or a fraction of a CU) represents different types of academic work across different types of academic programs and is the basic unit of progress toward a degree. One CU is usually converted to a four-semester-hour course.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
consult with their academic program regarding final certifications and requirements for graduation.

Organizational Dynamics, MSOD

The Master of Science in Organizational Dynamics (MSOD) is designed to develop your intellectual perspective on today’s complex work environment. Our program allows you to explore the practical applications you need to thrive and create positive change within your professional environment. The degree fuses research-based knowledge rooted in the arts and sciences with practical applications. This approach examines the subtleties of human behavior within existing systems, addresses multi-dimensional challenges and transforms organizational culture.

For more information: https://www.sas.upenn.edu/lps/graduate/dynamics

Curriculum

The Master of Science in Organizational Dynamics program provides you with the knowledge-base you need to understand and address complex organizational issues — and allows you to take a deeper dive into the concentration areas of your choice. Throughout your studies, you will work with an academic advisor to help you create a curriculum suited precisely to your interests.

As a Master of Science in Organizational Dynamics student, you will complete 12 course units (CU)¹ that balance core learning with individual exploration. Your course of study includes the following elements: (You can read about each curricular element in further detail below.)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Course Units</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Foundations courses (4 CU)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Methods of Diagnosis and Evaluation (1 CU)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Applications (4 CU)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Elective courses (2 CU)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Capstone project (1 CU)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Total Course Units (12 CU)</td>
<td></td>
</tr>
</tbody>
</table>

Foundations courses (4 CU)

Courses in the Foundations category are coded “F” and are drawn from two clusters: Organizational Structure and Function and Organizations in Historical and Cultural Context. Foundation courses give you and your fellow students the common language upon which to build your studies and knowledge, and prepare you for the deeper immersion in topics that you will study in your Application courses.

Methods of Diagnosis and Evaluation courses (1 CU)

Diagnosis and Evaluation courses are coded “DE” and concern the methods for the measurement, diagnosis, analysis, synthesis and/or evaluation of organizations and their activities. These courses provide you with multiple approaches to diagnosing complex issues within your organization as well as the tools and frameworks to organize your response to these difficult issues.

Applications courses (4 CU)

Courses in the Applications category are coded “A” and are drawn from three clusters: Organizations and Communications; Organizational Development and Change; and Organizational Leadership and Management. Applications courses will give you the opportunity to further explore the issues and topics you encountered in your Foundations and Diagnosis and Evaluation courses. From social media to sustainability to organizational politics, Application courses provide a closer look at the elements important to any organization.

Elective courses (2 CU)

Electives can be courses from within Organizational Dynamics or from another graduate degree program at Penn.

Note that some courses are coded as fulfilling more than one category. Each course can count only once in fulfilling a degree requirement. For example, if a course is a Foundation (F) and an Application (A), a student may only count this course toward either the Foundations requirement or the Applications requirement, but not towards both requirements.

Capstone project (1 CU)

The capstone project is a distinguishing feature of the Master of Science in Organizational Dynamics program. The project blends academic and professional experiences and serves as the culmination of your work in the program. You will design a project that draws upon your learning in and outside the classroom to identify and explore a focusing question in your area of professional and academic interest. For our students, the capstone experience serves as a career catalyst, whether they intend to change directions or advance on their current path.

Students working on their capstone project enroll in the capstone course. During the course, students have opportunities to discuss their capstone progress, successes and challenges with the course professors and with their classmates. The capstone course professor will describe capstone requirements and formats, facilitate peer feedback and will provide general guidance and support during the selection and writing of the capstone.

You will work with your capstone course professors to select a topic for your capstone project, which will be tailored to your professional and intellectual goals. Once you’ve done so, you will seek out a capstone committee that consists of a faculty advisor and a faculty reader, both of whom are selected to participate on the committee based on their expertise as it relates to the chosen capstone topic.

The capstone projects vary widely; however, all projects demonstrate students’ ability to:

- Make an argument
- Describe or summarize a position that is unique, original or which directly applies to the student
- Use primary sources or ones that apply to a primary organization as much as possible
- Apply competencies gained from the courses completed in the Organizational Dynamics program

Examples of Organizational Dynamics capstone projects completed by program alumni are available on the Scholarly Commons (http://repository.upenn.edu/organizational_dynamics) website within the Penn Online Digital Library.

¹ Note that some courses are coded as fulfilling more than one category. Each course can count only once in fulfilling a degree requirement. For example, if a course is a Foundation (F) and an Application (A), a student may only count this course toward either the Foundations requirement or the Applications requirement, but not towards both requirements.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Individualized, MPhil

The Master of Philosophy in Liberal Arts (MPhil) is an advanced interdisciplinary graduate degree designed for individuals with a passion for academic pursuits. Only six graduate-level courses are required to earn the MPhil, including one that serves an Independent Study for your thesis project. Available on a full- or part-time basis, you elect the courses most relevant to your interests, and based on your schedule. The Master of Philosophy in Liberal Arts can serve as an important step to future PhD studies, or as a way to deepen engagement with the topics that challenge and excite you.

For more information: https://www.sas.upenn.edu/lps/graduate/mla/mphil

Curriculum

Individualized curriculum

If you already hold a master’s, you can earn an additional graduate degree by completing just six additional courses. Your MPhil program includes five courses (up to four in a single discipline) and an independent study dedicated to completing the final thesis project. We strongly encourage MPhil candidates to take advantage of the many disciplines and departments available across the University during their course selection process.

Independent Study

When you join the MPhil program, you select an advisory committee of two members of Penn’s acclaimed faculty. It is likely that you will work with professors from your coursework or with faculty who are performing research in your area of interest. The advisory committee helps you establish guidelines for your thesis and approves the written project as part of your successful completion of the Master of Philosophy in Liberal Arts degree. The rigorous MPhil thesis exemplifies dedication to your chosen field and serves as an ideal tool for demonstrating the quality of your research and writing skills to employers, PhD programs, and peers.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Applied Geosciences, MSAG

This program provides both theoretical and technical expertise in geochemistry, geophysics, hydrogeology and engineering geology and includes essential project management skills, necessary for leadership in environmental remediation and pollution prevention. The program also facilitates preparation for professional licensure. This degree prepares students to take on a range of pressing environmental problems including approaches to mitigating soil and water contamination, solving waste disposal challenges and responding to human-induced natural disasters such as landslides and floods.

For more information: https://www.sas.upenn.edu/lps/graduate/msag/curriculum

Curriculum

The Master of Science in Applied Geosciences (MSAG) degree is structured to give students a well-rounded grounding in applied scientific knowledge, as well as project management and leadership skills necessary to effectively put that knowledge into action in the field. To that end, the curriculum is structured with a combination of foundation courses and concentration electives, which allow students to focus on topics best suited to their interests and goals.

The MSAG requires the completion of 12 course units (CU) as follows:

<table>

1 Academic credit (PDF) (http://www.upenn.edu/registrar/pdf_main/Course-Credit-Information.pdf) is defined by the University of Pennsylvania as a course unit (c.u.). A course unit (c.u.) is a general measure of academic work over a period of time, typically a term (semester or summer). A c.u. (or a fraction of a c.u.) represents different types of academic work across different types of academic programs and is the basic unit of progress toward a degree. One c.u. is usually converted to a four-semester-hour course.
All students must complete one course from each of the five foundation areas.

**Professional Concentration Courses (3 CU)**
Students choose three elective courses within their area of professional concentration. These concentration courses allow students to acquire the skills and the critical perspective necessary to master an applied geosciences sub discipline, and will help prepare students to pursue the final Project Design.

Students choose from the following concentrations:

- Engineering Geology (https://www.sas.upenn.edu/lps/graduate/msag/curriculum/engineering-geology)
- Hydrogeology (https://www.sas.upenn.edu/lps/graduate/msag/curriculum/hydrogeology)
- Environmental Geology (https://www.sas.upenn.edu/lps/graduate/msag/curriculum/environmental-geology)

**Individualized Professional Concentration Option**
Occasionally a student’s interests do not fit within one of the three Master of Science in Applied Geosciences concentrations. In this case, they may develop an individualized concentration under the supervision of a faculty adviser. The proposed individualized concentration must be approved by the Program Director and the Faculty Committee.

**Project Design Seminar (1 CU)**
The Project Design is the culmination of the Master of Science in Applied Geosciences program, blending academic and professional experiences and serving to emphasize the skills and knowledge developed in the program. Students design a project drawing from their learning in and outside the classroom to demonstrate mastery of their concentration area.

**Certifications and Licensure**
Coursework in the program provides the academic depth needed for licensure as a Professional Geologist (PG) in the Commonwealth of Pennsylvania. In addition, students who complete the degree may shorten their “professional geological work” requirement from five years to four.

The program subsidizes and streamlines certification programs like OSHA’s Hazardous Waste Operations and Emergency Response Standard (HAZWOPER).

**Field Opportunities**
Experiences in the field, such as class trips and site visits, are critical components of the curriculum. Students will have the opportunity to participate in research projects being conducted by members of the Department of Earth & Environmental Science. These projects will provide experience working with geoscience professionals in the field, and will involve training in the use of relevant instrumentation, as well as data collection and analysis techniques.

**Time Frame**
Master of Science in Applied Geosciences students may enroll on either a part-time or a full-time basis. Time to graduation will vary depending on how many classes are taken each semester and whether summer classes are taken. Full-time students can complete the program in two years, taking three or four classes per semester. Part-time students typically complete their work in three years, taking one or two classes per semester. Individuals working full time are advised to take no more than two courses per term.

**Environmental Studies, MES**
The Masters of Environmental Studies (MES) program offers a rigorous academic grounding in environmental science and exceptional opportunities to conduct research in the field. In addition, students gain the professional networks and individualized professional development needed to excel in the environmental field, whether as a researcher, policy advocate, teacher or business executive.

**For more information:** https://www.sas.upenn.edu/lps/graduate/mes/curriculum

**Curriculum**
The Master of Environmental Studies program provides the knowledge base needed to understand complex environmental issues—and allows the flexibility to develop unique expertise and professional experience in a chosen field. With the help of a dedicated academic adviser, a curriculum suited precisely to the student’s goals is developed.

Students will complete 12 course units (CU) that reflect a balance between disciplinary focus and interdisciplinary knowledge. The course of study includes the following elements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Course Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVS 601</td>
<td>Proseminar: Contemporary Issues in Environmental Studies</td>
<td>1</td>
</tr>
<tr>
<td>ENVS 699</td>
<td>Masters of Environmental Studies Capstone Seminar</td>
<td>1</td>
</tr>
<tr>
<td>Research Methods course</td>
<td></td>
<td>1</td>

<tr>
<td>Foundation courses</td>
<td></td>
<td>4</td>
</tr>
<tr>
<td>Professional concentration courses</td>
<td></td>
<td>5</td>
</tr>
<tr>
<td>Total Course Units</td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>

**Research Methods Course (1 CU)**
The research methods course prepares students to ask, and confidently answer, the innovative questions they will pose in their capstone project. The requirement can be fulfilled by taking a methodology course that provides students with the data gathering and analysis skills they will use to begin their research projects.

**Foundation Courses (4 CU)**
Foundation courses help broaden students’ knowledge in areas outside of their chosen concentration, and complement their chosen field. For example, if they are studying sustainability, their foundation course credits are an opportunity to learn about environmental law and policy, or become versed in business, which will be necessary while working in the sustainability sector. Foundation courses allow students to make connections between different sectors and offer the opportunity to discover unexpected synergies and resonances in fields beyond their own. Students choose courses from broad areas such as:

- Environmental Chemistry
- Environmental Biology
- Environmental Geology
- Environmental Law
environment.

and graduate dental students in the highest quality clinical and research School of Dental Medicine two courses per term. Individuals working full time are advised to take no more than complete their work in three years, taking one or two classes per semester. Part-time students typically are taken. Full-time students can complete the program in two years, time or full-time basis. Time to graduation will vary depending on how classroom to demonstrate mastery of their concentration area.

Students design a project drawing from their learning in and outside the curriculum/advocacy/environmental-policy)

Environmental Resilience and Adaptation (https://www.sas.upenn.edu/lps/graduate/mes/curriculum/advocacy/environmental-resilience-adaptation)

Environmental Sustainability (https://www.sas.upenn.edu/lps/graduate/mes/curriculum/environmental-sustainability)

Resource Management (https://www.sas.upenn.edu/lps/graduate/mes/curriculum/resource-management)

Urban Environment (https://www.sas.upenn.edu/lps/graduate/mes/curriculum/urban-environment)

If the student's professional aspirations are not reflected in one of the above concentrations, they can develop an Individualized concentration in conjunction with their academic adviser and with the approval of the Faculty Advisory Committee.

Capstone Seminar (1 CU)
The capstone project is the culmination of the Master of Environmental Studies program, blending academic and professional experiences and serving to emphasize the skills and knowledge developed in the program. Students design a project drawing from their learning in and outside the classroom to demonstrate mastery of their concentration area.

Time Frame
Master of Environmental Studies students may enroll on either a part-time or full-time basis. Time to graduation will vary depending on how many classes are taken each semester and whether summer classes are taken. Full-time students can complete the program in two years, taking three or four classes per semester. Part-time students typically complete their work in three years, taking one or two classes per semester. Individuals working full time are advised to take no more than two courses per term.

School of Dental Medicine
The mission of the School of Dental Medicine is to educate predoctoral and graduate dental students in the highest quality clinical and research environment.

The school’s core values are consistent with the Penn Compact 2020:

- Inclusion: We value diversity and respect for all
- Innovation: We expand knowledge through cutting edge research; We use the latest technology and evidence based practices in teaching and clinical care
- Impact: We provide high quality comprehensive dental care in all clinics; We make a difference in educational, research and clinical outreach initiatives locally and globally

The School of Dental Medicine advances oral health by educating clinical dentists and fostering leaders in research, education, clinical care and service both locally and globally. Faculty and students strive toward eminence by increasing access to oral health care and professional education, integrating knowledge across disciplines, and engaging with our local, national, and global communities by continued innovation and research.

The School of Dental Medicine excels in discovering new knowledge in fundamental biology and dental medicine and disseminates this knowledge through discovery-oriented methodologies enhanced by the latest technologies. The School excels in instruction, research, and patient care in dental medicine and inspires, demands, and thrives on the need to continuously improve the quality of programs, produce future leaders, and be the best in all of its pursuits.

The School of Dental Medicine's activities in research, teaching, and clinical care promote lifelong learning relevant to a dynamic society and a rapidly expanding, multidisciplinary body of knowledge. The School of Dental Medicine is committed to share this knowledge through a comprehensive range of service activities with the local, national and global communities.

The School of Dental Medicine community values the diversity of its constituents and supports free expression, reasoned discourse, and diversity in ideas. The School of Dental Medicine fosters the growth of humane values and the highest ethical standards among students, faculty, and staff, and values its professional and community affiliations throughout the world.

For more information: https://www.dental.upenn.edu/about-us/mission-statement-vision/

History
The School of Dental Medicine is among the oldest university-affiliated dental institutions in the nation. Its historic ties trace back to the Philadelphia College of Dental Surgery, established in 1852. In 1856, the faculty of the Philadelphia College of Dental Surgery formed the Pennsylvania College of Dental Surgery when the former closed, and in 1878, the Pennsylvania College of Dental Surgery Dean, Dr. Charles J. Essig, was asked to join the University of Pennsylvania, founding the School of Dental Medicine as the Dental Department of the University of Pennsylvania. He would serve as the School's first Dean from 1878-1883. The Pennsylvania College of Dental Surgery would eventually merge with the University of Pennsylvania in 1909.

The School’s first facilities were housed in Medical Hall (now Claudia Cohen Hall). The following year it moved into its own building, Dental Hall, which was designed and constructed for its particular needs.

In 1897, Thomas W. Evans, a Philadelphia native, who became the dentist to the courts of Europe during France’s Second Empire and confidant of Napoleon III, left his estate to create and maintain a dental school
that would be "second to none." Evans' generosity made possible the construction of the Evans Building (officially called the Thomas W. Evans Museum and Dental Institute) which opened in 1915, the best-equipped dental building in the nation at that time. His boldness and spirit of leadership have continued to guide the School throughout its history of expansion and innovation both in curriculum and in clinical and scientific facilities.

Throughout its history, Penn Dental Medicine has grown in size and has consistently been at the forefront of dramatic changes that have characterized the profession of dentistry during that time. Nevertheless, Penn Dental Medicine has remained faithful to its original mission: "to prepare students for qualification for dental practice, to provide graduate training for qualified practitioners and to create the opportunity and facilities for scientific research in dentistry."

Since its founding, the dental education program has maintained its leadership role in dental education and research by preparing distinguished graduates capable of functioning in the many roles the profession demands: scientist, diagnostician, clinician, artist, engineer, teacher, and business manager. The School is committed to offering an education that advances both the art and science of dentistry, and prepares its students for leadership in the profession.

For more information: https://www.dental.upenn.edu/about-us/history/

Research

The School of Dental Medicine has a rich history as a research intensive institution and continues to be an international leader in the generation of new knowledge and treatment modalities to improve oral health.

As members of one of the world's leading biomedical research communities, faculty from Penn Dental Medicine actively pursue interdisciplinary collaborations to advance the practice of dentistry. The University of Pennsylvania has top-ranked Schools in each of the health professions—Dental Medicine, Medicine, Nursing and Veterinary Medicine—located on a single, contiguous campus, as well as renowned Departments in Materials Sciences and Bioengineering (School of Engineering) and the basic sciences (School of Arts & Sciences). Interdisciplinary scholarship and translational research are hallmarks of the University and significantly enhance Penn Dental Medicine's research enterprise.

Penn Dental Medicine places a high priority on research as it is a central component of excellence in instruction and patient care. With its own basic science faculty (unusual among dental schools nationwide), the School's research enterprise is broad and encompasses many areas of contemporary biomedical investigation with emphasis on both basic and clinical scientific research.

Research within the School focuses on the structures and functions of tissues and fluids and microbial flora in the oral cavity. Investigations range from oral microbiology and virology, inflammation and immunity, tooth development, mucosal disease, salivary gland disease, orofacial pain and the use of analgesics and sedatives, to the cellular biology of connective tissues and bone, the application of state-of-the-art dental materials, the causes and effects of periodontal disease, the oral delivery of protein drugs, and the relationship between mesenchymal stem cells and orofacial diseases at the molecule and cellular levels. Collectively, Penn Dental Medicine's research enterprise spans scientific disciplines to translate new knowledge into clinical therapies that expand our understanding of oral diseases and advance patient care.

For more information: https://www.dental.upenn.edu/research/research-overview/

Diversity & Inclusion

The School of Dental Medicine welcomes students and faculty from very diverse backgrounds and from all over the world. Diversity is one of our core values, and as such, it is our mission to ensure that our students learn in an environment that respects diverse traditions and experiences. Our goal is to provide a welcoming and supportive community that allows our faculty, students, and staff to achieve. Our commitment to diversity is reflected in the Penn Dental Medicine Statement on Diversity (https://www.dental.upenn.edu/student-life/diversity-and-inclusion/policy-on-diversity), our Affirmative Action Report (https://www.dental.upenn.edu/wp-content/uploads/2019/02/PDM-Affirmative-Action-Report-Update-2018.pdf), our support programs for students and faculty, our curriculum, and the makeup of our student body.

- The Office of Diversity and Inclusion (https://www.dental.upenn.edu/student-life/diversity-and-inclusion/office-of-diversity-and-inclusion) oversees student support and mentorship programs and recruitment and retention initiatives that help to build diversity within Penn Dental Medicine's academic community and foster a culture of inclusion, mutual trust, and respect.
- The Office of Faculty Advancement and Diversity (https://www.dental.upenn.edu/admissions-academics/office-of-faculty-advancement-and-diversity) supports faculty development, recommends proactive strategies for increasing faculty diversity, and offers programs that enhance the climate and quality of academic life.
- Engaging in local and global communities is at the heart of the vibrant diversity that defines the Penn campus and is an integral part of the curriculum as well. Through the School's Division of Community Oral Health (https://www.dental.upenn.edu/departments/division-of-community-oral-health), students and faculty provide much-needed oral health services to the community, while connecting with diverse segments of the public and coming to understand the impact of social, cultural, and economic forces on oral health care. These academically based service-learning programs (https://www.dental.upenn.edu/admissions-academics/dmd-program/community-outreach-service-learning) provide students and faculty with the framework to complete community-based activities as an essential, required component of the curriculum. And through international externships, students expand their perspective of dental education and oral health care delivery in different cultures throughout the world.
- The Penn Dental Medicine student body includes students from throughout the country and around world — see class profiles (https://www.dental.upenn.edu/student-life/profiles) of recent DMD classes and the many countries of origin among the foreign-trained dentists in our Program for Advanced Standing Students (PASS).

For more information: https://www.dental.upenn.edu/student-life/diversity-and-inclusion/

Community Outreach

Being engaged in the surrounding community and striving to make it a better place is a key piece of Penn's mission and educational goals. Through the School's varied outreach and service-learning programs, Penn Dental Medicine students provide much-needed oral health services to the community, while broadening their understanding of public health issues. These academically based service-learning programs provide...
students and faculty with the framework to complete community-based activities as an essential, required component of academic course work. In total, students log approximately 16,000 service hours each year in both required and elective community experiences and the honors program.

This integral part of the curriculum takes students outside of the School’s clinics and campus to connect with diverse segments of the public and come to understand the impact of social, cultural, and economic forces on oral health care. The service learning programs are also an innovative and sustainable model for increasing access to care within the community and provides dental students and faculty with multiple opportunities to work with community partners in existing service programs where oral health education and services can be readily implemented. The required nature of students’ activities ensures that all students receive a consistent level of mentored community activities, and provides a consistent presence in oral health programs organized with agency partners in the community.

For more information: https://www.dental.upenn.edu/admissions-academics/dmd-program/community-outreach-service-learning/

Programs

Doctoral Programs

• Doctor of Dental Medicine, DMD (p. 411)
• Doctor of Science in Dentistry, DScD (p. 412)
• Program for Advanced Standing Students, DMD (p. 414)

Certificate Programs

• Endodontics, Certificate (p. 415)
• Oral and Maxillofacial Surgery, Certificate (p. 417)
• Oral Medicine, Certificate (p. 416)
• Orthodontics and Periodontics, Certificate (p. 419)
• Orthodontics, Certificate (p. 418)
• Pedodontics, Certificate (p. 422)
• Periodontics, Certificate (p. 421)
• Perioprosthetics, Certificate (p. 420)
• Prosthodontics, Certificate & Oral Biology, MSOB (p. 423)

Doctor of Dental Medicine, DMD

The four-year DMD program and curriculum at Penn Dental Medicine not only reflects a strong commitment to developing knowledge and skills in both oral science and oral health care, but also offers the flexibility for students to tailor their education to their interests. As one of 12 schools within the larger urban campus of the University of Pennsylvania, Penn Dental Medicine is uniquely positioned to provide a depth of opportunities for interdisciplinary study across other professional disciplines. Here, students find an education that builds excellence in dental medicine by encouraging individual interests and strengths to flourish and grow.

For more information: https://www.dental.upenn.edu/academic_programs_admissions/dmd_program

Curriculum

First Year

The first year of the curriculum introduces students to the concepts of human biology as they pertain to medicine in general and to dental medicine in particular. The curriculum reflects an emphasis on integration of scientific information by grouping courses into integrative course streams rather than discipline specific courses. This includes studies relating to the principles of oral disease prevention, patient management, and physical examination. A major segment of the curriculum focuses on the structure and function of oral tissues and contiguous structures. During this time, students will also begin an integrated preclinical course in restorative dentistry combining several disciplines (e.g., dental anatomy and occlusion, operative dentistry and dental materials), including extensive use of the School’s Virtual Reality Laboratory. Clinical experiences begin upon entry into the DMD program and increase with each succeeding year. In the first year, students begin clinical rotations in oral medicine, periodontics, health promotion, radiology, and hospital dentistry. Additionally, students will assist upperclassmen on the clinic floor as part of the DRAUT first year course.

Second Year

The second-year curriculum is applied to understanding the pathology of the oral cavity and the principles of diagnosis and treatment. The curriculum includes fundamental courses in pathology (an integration of general and oral pathology), pharmacology, and principles of medicine. The preclinical restorative dentistry course is a continuation of the program offered in the first year and focuses on prosthetic therapy; it also includes additional rotations in the Virtual Reality Laboratory. Other didactic, laboratory, and clinical experiences are initiated in anesthesia and pain control, community health, endodontics, orthodontics, and periodontics. A course entitled “Introduction to Clinical Dentistry” is offered in the second year; the purpose is to facilitate the transition from the classroom to the clinic by allowing students to observe and practice
the provision of services in various clinical departments. Beginning in October, afternoons are set aside for courses in the Selectives Program.

<td>The highly respected research environment at the School of Dental Medicine and throughout the University of Pennsylvania provides a valuable opportunity for students applying to the School’s graduate dental education programs to combine their specialty training with advanced research and academic opportunities through a Doctor of Science in Dentistry (DScD) degree. The DScD will prepare students to</td>
<td></td>
</tr>
</tbody>
</table>
successfully enter the field of academic dentistry for careers as clinical or basic science researchers.

The program combines the research and clinical strengths of the School, drawing faculty mentors from throughout the clinical and basic science departments. With the goal of providing the opportunity to pursue research across disciplines, students also have the option to work with researchers from the School of Dental Medicine, School of Engineering and Applied Sciences (https://www.seas.upenn.edu), School of Medicine (https://www.med.upenn.edu), School of Nursing (https://www.nursing.upenn.edu), and School of Veterinary Medicine (https://www.vet.upenn.edu) of the University of Pennsylvania. Both rigorous clinical and research experiences are central to the DScD program and students devote from 40% to 80% of their time in each year of the program to research; clinical training also occurs in each year of the program to ensure maintenance of clinical skills throughout.

The DScD program is open to students with a DMD/DDS degree or equivalent who are pursuing advanced training in the School's Periodontics (https://www.dental.upenn.edu/admissions-academics/graduate-dental-education-programs/periodontic-program), Endodontics (https://www.dental.upenn.edu/admissions-academics/graduate-dental-education-programs/endodontic-program), Orthodontics (https://www.dental.upenn.edu/admissions-academics/graduate-dental-education-programs/orthodontic-program), Periodontics/Prosthesis (https://www.dental.upenn.edu/admissions-academics/graduate-dental-education-programs/periodontal-prothesis-program), or Oral Medicine (https://www.dental.upenn.edu/admissions-academics/graduate-dental-education-programs/oral-medicine-program) postgraduate programs. Candidates concurrently complete their clinical specialty training and DScD degree, engaging in an intensive research program that culminates in a thesis and oral defense. The program is also open to individuals who have completed their clinical specialty training, but are interested in obtaining a DScD degree; students in this track complete all of the didactic courses and research requirements but do not directly participate in clinical care. Those interested in applying to the DScD program should indicate so on their application to a clinical specialty program. If the applicant already has a certificate in a clinical specialty, he or she can apply directly to the DScD program.

For more information: https://www.dental.upenn.edu/admissions-academics/graduate-dental-education-programs/doctor-of-science-in-dentistry/

Curriculum

**DScD with Postgraduate Certificate Program**

The Doctor of Science in Dentistry (DScD) program is tailored to meet CODA requirements for each clinical specialty. For Endodontics (https://www.dental.upenn.edu/academic_programs_admissions/graduate_dental_education_programs/endodontic_residency_program), Orthodontics (https://www.dental.upenn.edu/academic_programs_admissions/graduate_dental_education_programs/orthodontic_residency_program), Oral Medicine (https://www.dental.upenn.edu/academic_programs_admissions/graduate_dental_education_programs/oral_medicine_residency_program), and Pediatric Dentistry (https://www.dental.upenn.edu/academic_programs_admissions/graduate_dental_education_programs/pediatric_dentistry_residency_program) postgraduate programs it is 5 years, for Periodontics (https://www.dental.upenn.edu/academic_programs_admissions/graduate_dental_education_programs/periodontic_residency_program) 5.5 years and for Periodontic/Prosthesis (https://www.dental.upenn.edu/admissions-academics/graduate-dental-education-programs/periodontal-prothesis-program) 6 years. Clinical, didactic, and research aspects of the program are integrated so that in all years students experience both clinical and research training. In years one and two, there is greater focus on clinical training, while in later years there is greater focus on research training with clinical activities continuing in all years. All courses taken as part of clinical training are credited toward the DScD degree. In addition, three didactic courses from Penn's Biomedical Graduate Studies program related to the research topic are required and typically taken in years two through four. Each student will write a K08 or K23 grant award; the application becomes the basis of a qualifying exam for the program. Only US citizens/green card holders will actually submit their K08 or K23 proposal to the NIH. This represents important training in grant writing as well as training in writing a scientific paper for publication, both of which are important aspects of academic success. NOTE: Acceptance into the specialty certificate program does not guarantee acceptance into the DScD program.

**DScD without Postgraduate Certificate Program**

Students who have completed clinical specialty training at an accredited institution are eligible to apply for the Doctor of Science in Dentistry (DScD) program without certificate. This program is 4 years in length. Students in this program are associated with a clinical specialty and will take all didactic courses in the specialty as well as a dissertation project but will not receive clinical training. In addition, the student will take three didactic courses from Penn’s Biomedical Graduate Studies program related to the research topic, typically taken in years 2-4. The didactic, research and dissertation components for this program are the same as those for the combined DScD/Certificate program.

**General Requirements**

All DScD students must complete the Core Graduate Dental Education courses, as well as three didactic courses from Biomedical Graduate Studies and a dissertation. Additional requirements depend on the track and clinical specialty.

Program for Advanced Standing Students, DMD

The Program for Advanced Standing Students (PASS) is designed for graduates of foreign dental schools who want to practice dentistry in the United States. Most states require a degree from a dental school accredited by the American Dental Association (ADA) before granting licensure. To prepare non-U.S. trained dentists, Penn Dental Medicine offers a two-and-a-half year program which leads to a DMD degree. Successful completion of the program allows foreign-trained dentists to take licensing exams in any state. PASS students are expected to successfully complete all competencies required in the 4-year program.

For more information: https://www.dental.upenn.edu/admissions-academics/program-for-advanced-standing-students/

Curriculum

Upon matriculation in January, PASS students will join the second year DMD class by participating in all ongoing preclinical and laboratory courses. PASS students will NOT be required to take any second year basic science courses but instead will participate in an additional, specially designed preclinical laboratory/seminar program.

Third- and Fourth-Year Dental Curriculum

Following the successful completion of the second year, students will be fully integrated into the class where they take part in all academic and clinical experiences in the third and fourth years of dental school. This includes participation in externships abroad or in the U.S. and the Selectives course offerings to customize a student's educational experience. No special or separate teaching is conducted for the PASS program students. Please refer to the DMD curriculum for a complete description of the third- and fourth-year curriculum. Students participate in a modern health care delivery system which simulates general practice. In addition, they rotate through the specialty departments and work under the preceptorship of master clinicians.

Third Year

Students begin to function as dental practitioners during their third year. Didactic courses provide a deeper and more sophisticated foundation of knowledge in the clinical disciplines. However, the bulk of the third year is spent providing general patient care in a variety of settings. This includes assignments to Primary Care Units in the general clinic and rotations in various specialty clinics. In addition, students provide patient screenings and education in community-based dental health programs at schools, health fairs, geriatric centers, and homes for disabled persons. Third-year students also participate in the Selectives Program.

Fourth Year

The fourth-year curriculum continues to expand the intellectual and clinical experiences of students, including a two-week hospital externship. Students continue to attend PCU clinical seminars in which they present clinical cases where the integration of knowledge, skills, and values is emphasized. Coursework is designed to augment the basic knowledge in the first three years. By graduation, students will have demonstrated the competence, confidence, and maturity to qualify as safe, beginning independent general dental practitioners.

Selectives

The Penn Dental Medicine’s Selectives Program enhances the predoctoral curriculum by allowing students to individualize their education to reflect their own professional interests. Selectives are offered from October to
June each year, and includes didactic, clinical, community dental health service, and research opportunities. Many Selectives occur in small group seminars or individualized settings that promote close student-faculty interactions.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Endodontics, Certificate**

The University of Pennsylvania School of Dental Medicine has the unique honor of being the birthplace of modern Endodontics with Dr. Louis Grossman, the father of modern Endodontics, having established the Penn Dental Medicine Endodontic program.

The Endodontic program is designed to provide postgraduate students with advanced training in Endodontics, and upon its successful completion, students are eligible for the specialty Board of Endodontics. The highly respected research environment at Penn Dental Medicine and throughout the University of Pennsylvania provides a valuable opportunity for students applying to residency programs to combine their specialty training with advanced research and academic opportunities.

In addition to the core basic science courses required for all postgraduate students, the Endodontic Department arranges further basic science courses related to the specialty. Clinical seminars, planned reading seminars, and an extensive guest lecture series are also part of the educational experience.

**Additional Program Options**

Penn Dental Medicine also offers a Master of Science in Oral Biology (MSOB) and a Doctor of Science in Dentistry (DScD) that can be earned concurrent with a specialty certificate, preparing students to successfully enter the field of academic dentistry while also becoming skilled clinicians in specialty care. Through the MSOB and DScD programs, students are encouraged to pursue their individual research interests with projects that can span the diverse disciplines and research labs within Penn Dental Medicine’s basic and clinical sciences and across the University.

**Program Timelines**

- Academic Track
  - MSOB and Certificate: 3 years
  - DScD and Certificate: 5 years
- Clinical Certificate Track
  - Certificate only: 2 years

**Curriculum**

All Dental Medicine certificate students share a common core of required courses throughout the first year. In addition, students complete additional courses specific to their particular program.

**Program Requirements (Certificate Only)**

- Core Graduate Dental Education Courses (Year 1 only)
- Program Specific Courses (Years 1 and 2 Didactic & Clinical)
- Literature Review (Years 1 and 2)
- Case Presentations (Years 1 and 2)
- Program Seminars (Years 1 and 2)
- Clinical Rotations (Years 1 and 2)

**Master of Science in Oral Biology**

The School of Dental Medicine also offers a Master of Science in Oral Biology (MSOB). Enrollment in the MSOB program is limited to individuals concurrently registered in one of the postgraduate specialty training (certificate) programs. Candidates receive the MSOB degree after completion of both their specialty training and the Master’s curriculum, which consists of didactic, seminar, and research practicum courses. The MSOB program is comprised of two tracks designed for outstanding students who are interested in either integrating research or structured evidence-based learning into their post-graduate education.

Depending on the track selected, research activities or a systematic literature review form the core of the MSOB program. Students are expected to participate in a clinical or basic science research project of sufficient scope and intensity or a formally structured and critically evaluated literature review focused on an important oral health-related research or clinical question. A thesis composed of an in-depth review of the relevant literature along with a manuscript reporting the results...
of the research or a systematic review is required for graduation for the research and evidence-based learning tracks respectively.

Oral Medicine, Certificate

The Oral Medicine Residency Program at Penn Dental Medicine began training qualified practitioners in the early 1960's, many of whom have gone on to become program directors at other institutions both in the United States and abroad, examiners on the Board of the American Academy of Oral Medicine, and internationally respected researchers and leaders in the field of Oral Medicine.

The objective of this program is to train a thoroughly qualified clinician and educator in the field of Oral Medicine. In addition to extensive clinical experience, there is a didactic curriculum that runs throughout the program. Opportunities for students to explore particular areas of interest in the field of Oral Medicine are encouraged.

Additional Program Options

Penn Dental Medicine also offers a Master of Science in Oral Biology (MSOB) and a Doctor of Science in Dentistry (DScD) that can be earned concurrent with a specialty certificate, preparing students to successfully enter the field of academic dentistry while also becoming skilled clinicians in specialty care. Through the MSOB and DScD programs, students are encouraged to pursue their individual research interests with projects that can span the diverse disciplines and research labs within Penn Dental Medicine's basic and clinical sciences and across the University.

### Oral and Maxillofacial Surgery, Certificate

The graduate program in Oral and Maxillofacial Surgery includes the awarding of a medical degree from the University of Pennsylvania School of Medicine, two years of general surgery, and 30 months of clinical rotations in oral and maxillofacial surgery. This dual-degree track is carefully designed to provide a comprehensive approach to both the medical school and residency components of the program. The program is accredited by the Commission on Dental Accreditation. Candidates who complete the program are eligible for examination by the American Board of Oral and Maxillofacial Surgeons.

The hallmark of Penn's medical school is based on an innovative and highly acclaimed curriculum, which fuses basic and clinical sciences. This, coupled with core clinical clerkships, allows the oral and maxillofacial surgery resident to receive a medical education without compromise. The medical school rotations also meet mandatory residency requirements.

Candidates of the oral and maxillofacial surgery program are responsible for two and one-half years of medical school tuition. Rotations in Oral and Maxillofacial Surgery are scheduled at the following affiliated hospitals to provide an extremely broad and diverse clinical experience:

- The Hospital of the University of Pennsylvania
- Presbyterian Medical Center of Philadelphia
- Veterans Administration Hospital
- Children's Hospital of Philadelphia
- Pennsylvania Hospital
- University of Pennsylvania School of Dental Medicine

### Program Timeline

Duration of program: 6 years

For more information: [https://www.dental.upenn.edu/academic_programs_admissions/graduate_dental_education_programs/oral_and_maxillofacial_surgery_residencymd_program](https://www.dental.upenn.edu/academic_programs_admissions/graduate_dental_education_programs/oral_and_maxillofacial_surgery_residencymd_program)

### Seminars

- OMFS Lectures (weekly)
- Journal Club/Morbidity & Mortality Conference (monthly)
- Center for Human Appearance Conference (monthly)
- Oral Pathology (monthly)
• Multidisciplinary Trauma Conference
• Delaware Valley Society of Oral & Maxillofacial Surgery Seminar

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2019 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Orthodontics, Certificate

The postgraduate program in Orthodontics integrates basic science and clinical Orthodontics in a comprehensive curriculum, designed to develop clinically proficient specialists who possess a scholarly insight into Orthodontic theory as it relates to patient care. While the basic science courses build upon residents’ predoctoral knowledge of oral biology and related areas, the major part of the program consists of clinical education and training.
