### Programs

The following list includes undergraduate programs. PhD, master’s, certificate, and other professional degree programs are listed in the Graduate Catalog (http://catalog.upenn.edu/graduate/).

### A

- Accounting, BS (p. 256)
- Actuarial Mathematics, Minor (p. 152)
- Africana Studies, Minor (p. 152)
- Africana Studies: African American Studies, BA (p. 23)
- Africana Studies: African Diaspora Studies, BA (p. 23)
- Africana Studies: African Studies, BA (p. 24)
- American Public Policy, Minor (p. 153)
- American Sign Language and Deaf Studies, Minor (p. 153)
- Ancient History, BA (p. 25)
- Ancient History, Minor (p. 153)
- Anthropology, Minor (p. 154)
- Anthropology: Archaeology, BA (p. 25)
- Anthropology: Biological Anthropology, BA (p. 26)
- Anthropology: Cultural and Linguistic Anthropology, BA (p. 27)
- Anthropology: Environmental Anthropology, BA (p. 27)
- Anthropology: General Anthropology, BA (p. 28)
- Anthropology: Medical Anthropology & Global Health, BA (p. 29)
- Applied Positive Psychology, Certificate (p. 205)
- Archaeological Science, Minor (p. 154)
- Architectural History, Minor (p. 154)
- Architecture, Minor (p. 154)
- Architecture: Design, BA (p. 30)
- Architecture: Intensive Design, BA (p. 30)
- Asian American Studies, Minor (p. 155)

### B

- Behavioral Economics, BS (p. 256)
- Biochemistry, BA (p. 31)
- Bioengineering, BSE (p. 220)
- Bioethics, Minor (p. 155)
- Biology, Minor (p. 155)
- Biology: Computational Biology, BA (p. 32)
- Biology: Ecology & Evolutionary Biology, BA (p. 33)
- Biology: General Biology, BA (p. 34)
- Biology: Mathematical Biology, BA (p. 34)
- Biology: Mechanisms of Disease, BA (p. 35)
- Biology: Molecular & Cell Biology, BA (p. 36)
- Biology: Neurobiology, BA (p. 37)
- Biomedical Science, BAS (p. 221)
- Biophysics, BA (p. 37)
- Biophysics, Minor (p. 156)
- Business Analytics, BS (p. 257)
- Business Economics and Public Policy, BS (p. 259)
- Business, Energy, Environment, and Sustainability, BS (p. 261)

### C

- Chemical & Biomolecular Engineering, Minor (p. 235)
- Chemical and Biomolecular Engineering, BSE (p. 222)
- Chemistry, BA (p. 38)
- Chemistry, Minor (p. 156)
- Cinema and Media Studies, BA (p. 39)
- Cinema and Media Studies, Minor (p. 157)
- Classical Studies, Minor (p. 157)
- Classical Studies: Classical Civilizations, BA (p. 40)
- Classical Studies: Classical Languages and Literature, BA (p. 40)
- Classical Studies: Mediterranean Archaeology, BA (p. 41)
- Climate Change, Certificate (p. 206)
- Cognitive Science, Minor (p. 158)
- Cognitive Science: Cognitive Neuroscience, BA (p. 41)
- Cognitive Science: Computation and Cognition, BA (p. 42)
- Cognitive Science: Individualized, BA (p. 43)
- Cognitive Science: Language & Mind, BA (p. 44)
- Communication: Advocacy & Activism, BA (p. 44)
- Communication: Audiences & Persuasion, BA (p. 46)
- Communication: Communication & Public Service, BA (p. 47)
- Communication: Culture & Society, BA (p. 49)
- Communication: Data & Network Science, BA (p. 50)
- Communication: General Communication, BA (p. 52)
- Communication: Politics & Policy, BA (p. 53)
- Comparative Literature, Minor (p. 158)
- Comparative Literature: (Trans)national Literatures, BA (p. 54)
- Comparative Literature: Globalization, BA (p. 55)
- Comparative Literature: Theory, BA (p. 56)
- Computational Neuroscience, Minor (p. 158)
- Computer Engineering, BSE (p. 223)
- Computer Science, BAS (p. 225)
- Computer Science, BSE (p. 226)
- Computer Science, Minor (p. 235)
- Consumer Psychology, Minor (p. 159)
- Creative Studies, BAAS (p. 194)
- Creative Writing, Certificate (p. 207)
- Creative Writing, Minor (p. 160)
- Criminology, BA (p. 57)

### D

- Data Analytics and Psychological Sciences, BAAS (p. 196)
- Data Analytics and Social Sciences, BAAS (p. 197)
- Data Analytics, Certificate (p. 208)
- Data Science and Analytics, Minor (p. 160)
- Data Science, Minor (p. 236)
- Design, BA (p. 57)
- Design, Minor (p. 161)
- Digital Humanities, Minor (p. 161)
- Digital Media Design, BSE (p. 227)
- Digital Media Design, Minor (p. 236)
• Digital Strategies and Culture, Certificate (p. 209)
• Diversity, Equity and Inclusion, BS (p. 262)

E
• Earth and Environmental Science, BA (p. 58)
• East Asian Area Studies, Minor (p. 162)
• East Asian Languages and Civilizations: Chinese, Minor (p. 163)
• East Asian Languages and Civilizations: Dual Language, BA (p. 59)
• East Asian Languages and Civilizations: East Asian Area Studies, BA (p. 60)
• East Asian Languages and Civilizations: General East Asian Languages and Civilizations, BA (p. 61)
• East Asian Languages and Civilizations: Japanese, Minor (p. 163)
• East Asian Languages and Civilizations: Korean, Minor (p. 164)
• East Central European Studies, Minor (p. 164)
• Economic Policy, Minor (p. 164)
• Economics, BA (p. 61)
• Economics, Minor (p. 165)
• Electrical Engineering, BSE (p. 228)
• Electrical Engineering, Minor (p. 237)
• Energy & Sustainability, Minor (p. 237)
• Engineering Entrepreneurship, Minor (p. 238)
• English, Minor (p. 165)
• English: 18th/19th Centuries, BA (p. 62)
• English: 20th/21st Centuries, BA (p. 63)
• English: Africana Literatures & Culture, BA (p. 64)
• English: Cinema & Media Studies, BA (p. 65)
• English: Creative Writing, BA (p. 66)
• English: Drama, BA (p. 66)
• English: Gender/Sexuality, BA (p. 67)
• English: General English, BA (p. 68)
• English: Literary Theory & Cultural Studies, BA (p. 69)
• English: Literature, Journalism and Print Culture, BA (p. 70)
• English: Medieval/Renaissance, BA (p. 71)
• English: Poetry and Poetics, BA (p. 72)
• English: The Novel, BA (p. 73)
• Entrepreneurship and Innovation, BS (p. 267)
• Environmental Humanities, Minor (p. 166)
• Environmental Science, Minor (p. 167)
• Environmental Studies, Minor (p. 167)
• Environmental Studies: Environmental History and Regional Studies, BA (p. 73)
• Environmental Studies: Environmental Policy and Application, BA (p. 74)
• Environmental Studies: General Environmental Studies, BA (p. 75)
• Environmental Studies: Global Environmental Systems, BA (p. 76)
• Environmental Studies: Sustainability and Environmental Management, BA (p. 76)
• Environmental, Social, and Governance Factors for Business: Business, Energy, Environment and Sustainability, BS (p. 263)
• Environmental, Social, and Governance Factors for Business: General, BS (p. 264)
• Environmental, Social, and Governance Factors for Business: Social and Governance Factors, BS (p. 266)
• European Studies, Minor (p. 168)

F
• Finance, BS (p. 269)
• Fine Arts, BA (p. 77)
• Fine Arts, BFA (p. 198)
• Fine Arts, Minor (p. 171)
• French and Francophone Studies, BA (p. 78)
• French and Francophone Studies, Minor (p. 172)

G
• Gender, Sexuality & Women's Studies: Feminist Studies, BA (p. 79)
• Gender, Sexuality & Women's Studies: General, BA (p. 79)
• Gender, Sexuality & Women's Studies: Global Gender and Sexuality Studies, BA (p. 80)
• Gender, Sexuality & Women's Studies: Health and Disability Studies, BA (p. 81)
• Gender, Sexuality & Women's Studies: LGBTQ Studies, BA (p. 81)
• Gender, Sexuality & Women's Studies: Self Designed, BA (p. 82)
• Gender, Sexuality, and Women's Studies, Minor (p. 172)
• Geology, Minor (p. 173)
• German, BA (p. 82)
• German, Minor (p. 173)
• Global and Regional Studies, Certificate (p. 210)
• Global Health, Minor (p. 249)
• Global Medieval Studies, Minor (p. 173)
• History: Jewish History, BA (p. 95)
• History: World History, BA (p. 95)

I
• Individualized Major, BA (p. 96)
• Individualized Program, BAS (p. 229)
• Individualized, BAAS (p. 199)
• Individualized, BS (p. 271)
• International Development, Minor (p. 175)
• International Relations, BA (p. 96)
• International Relations, Minor (p. 175)
• International Studies, BA (p. 97)
• Italian Studies: Italian Culture, BA (p. 98)
• Italian Studies: Italian Culture, Minor (p. 176)
• Italian Studies: Italian Literature, BA (p. 98)
• Italian Studies: Italian Literature, Minor (p. 176)

J
• Jewish Studies, BA (p. 99)
• Jewish Studies, Minor (p. 177)
• Journalistic Writing, Minor (p. 177)

L
• Landscape Studies, Minor (p. 177)
• Latin American & Latinx Studies, BA (p. 100)
• Latin American and Latinx Studies, Minor (p. 178)
• Law and Society, Minor (p. 178)
• Leadership & Communication, Certificate (p. 211)
• Leadership and Communication, BAAS (p. 200)
• Legal Studies & Business Ethics, BS (p. 272)
• Legal Studies & History, Minor (p. 178)
• Linguistics, BA (p. 100)
• Linguistics, Minor (p. 179)
• Literature, Culture and Tradition, BAAS (p. 201)
• Logic, Information, & Computation, BA (p. 101)
• Logic, Information, & Computation, Minor (p. 179)

M
• Management: General Track, BS (p. 274)
• Management: Multinational Management Track, BS (p. 275)
• Management: Organizational Effectiveness Track, BS (p. 276)
• Management: Strategic Management Track, BS (p. 277)
• Marketing & Communication, BS (p. 278)
• Marketing & Operations Management, BS (p. 279)
• Marketing, BS (p. 280)
• Materials Science and Engineering, BSE (p. 230)
• Materials Science and Engineering, Minor (p. 239)
• Mathematical Economics, BA (p. 102)
• Mathematics, Minor (p. 180)
• Mathematics: Biological Mathematics, BA (p. 104)
• Mathematics: General Mathematics, BA (p. 105)
• Mechanical Engineering and Applied Mechanics, BSE (p. 231)
• Mechanical Engineering and Applied Mechanics, Minor (p. 240)
• Medical Sociology, Minor (p. 181)
• Modern Middle Eastern Studies, BA (p. 105)
• Modern Middle Eastern Studies, Minor (p. 181)
• Music, BA (p. 106)
• Music: Jazz and Popular Music, Minor (p. 182)
• Music: Music, Minor (p. 181)

N
• Native American and Indigenous Studies, Minor (p. 183)
• Near Eastern Languages & Civilizations: Ancient Near East, BA (p. 107)
• Near Eastern Languages & Civilizations: Ancient Near East, Minor (p. 183)
• Near Eastern Languages & Civilizations: Arabic & Hebrew Studies, BA (p. 107)
• Near Eastern Languages & Civilizations: Arabic & Hebrew Studies, Minor (p. 183)
• Near Eastern Languages & Civilizations: Arabic & Islamic Studies, BA (p. 108)
• Near Eastern Languages & Civilizations: Arabic & Islamic Studies, Minor (p. 184)
• Near Eastern Languages & Civilizations: Cultures and Societies of the Middle East and North Africa, BA (p. 109)
• Near Eastern Languages & Civilizations: Cultures and Societies of the Middle East and North Africa, Minor (p. 184)
• Near Eastern Languages & Civilizations: Hebrew & Judaica, BA (p. 109)
• Near Eastern Languages & Civilizations: Hebrew & Judaica, Minor (p. 185)
• Near Eastern Languages & Civilizations: Persian Language & Literature, BA (p. 110)
• Near Eastern Languages & Civilizations: Persian Language & Literature, Minor (p. 185)
• Networked and Social Systems Engineering, BSE (p. 232)
• Neuroscience and Health Care Management, Minor (p. 186)
• Neuroscience, BA (p. 111)
• Neuroscience, Certificate (p. 212)
• Neuroscience, Minor (p. 186)
• Nursing and Health Services Management, Minor (p. 250)
• Nursing, BSN (p. 245)
• Nutrition Science, BA (p. 112)
• Nutrition Science, BSN (p. 248)
• Nutrition, Minor (p. 251)
• Nutrition, Minor (p. 186)

O
• Operations, Information & Decisions: Decision Processes Track, BS (p. 281)
• Operations, Information & Decisions: General Track, BS (p. 282)
• Operations, Information & Decisions: Information Systems Track, BS (p. 283)
• Operations, Information & Decisions: Operations Management/Management Science Track, BS (p. 284)
P
• Philosophy, Minor (p. 187)
• Philosophy, Politics and Economics: Choice & Behavior, BA (p. 112)
• Philosophy, Politics and Economics: Distributive Justice, BA (p. 113)
• Philosophy, Politics and Economics: Globalization, BA (p. 114)
• Philosophy, Politics and Economics: Public Policy & Governance, BA (p. 115)
• Philosophy: General Philosophy, BA (p. 115)
• Philosophy: Humanistic Philosophy, BA (p. 116)
• Philosophy: Philosophy and Science, BA (p. 117)
• Philosophy: Political and Moral Philosophy, BA (p. 118)
• Physical and Life Sciences, BAAS (p. 204)
• Physics, Minor (p. 187)
• Physics: Astrophysics, BA (p. 119)
• Physics: Biological Science, BA (p. 119)
• Physics: Business & Technology, BA (p. 120)
• Physics: Chemical Principles, BA (p. 121)
• Physics: Computer Techniques, BA (p. 122)
• Physics: Physical Theory and Experimental Technique, BA (p. 123)
• Political Science, Minor (p. 187)
• Political Science: American Politics, BA (p. 124)
• Political Science: Comparative Politics, BA (p. 124)
• Political Science: General Political Science, BA (p. 125)
• Political Science: Individualized, BA (p. 126)
• Political Science: International Relations, BA (p. 127)
• Political Science: Political Economy, BA (p. 128)
• Political Science: Political Theory, BA (p. 128)
• Pre-Health Core Studies, Post-Baccalaureate Preparatory Program (p. 217)
• Pre-Health Specialized Studies, Post-Baccalaureate Preparatory Program (p. 217)
• Professional Writing, Certificate (p. 213)
• Psychoanalytic Studies, Minor (p. 188)
• Psychology, BA (p. 129)
• Psychology, Minor (p. 188)

R
• Real Estate, BS (p. 285)
• Religious Studies, BA (p. 130)
• Religious Studies, Minor (p. 189)
• Retailing, BS (p. 286)
• Romance Languages: French and Italian, BA (p. 131)

SCHOOL OF ARTS & SCIENCES

In the tradition of its eighteenth-century founders, the College of Arts and Sciences (https://www.college.upenn.edu/) regards the enduring purpose of education as the liberation of the mind from ignorance, superstition, and prejudice. From its central position in an international research university, the College invites students to explore the broad spectrum of human knowledge and takes pride in its capacity to respond to the particular intellectual needs of those who join it. The College thrives on the diversity of scholars and students whose interests it sustains and whose intellectual goals it unites.

Study of the arts and sciences provides a solid basis for advanced scientific and scholarly research, for subsequent training in the professions, and for the informed exercise of the rights and responsibilities of citizenship. The College’s goal is to help students to become knowledgeable about the world and the complexities of today’s society, aware of moral, ethical, and social issues, prepared to exercise intellectual leadership, and enlivened by the use of their mind.

The College is committed to offering a broad education that will lay a durable foundation for critical and creative thinking. We believe that students should explore fundamental approaches to the acquisition and interpretation of knowledge through introduction to substantive bodies of current thought in the natural sciences, social sciences, and humanities. Equally important, they should learn to understand and evaluate the sources and methods from which this knowledge derives. In this way they can be led to appreciate the contingency of all knowledge and to participate in the ongoing excitement of intellectual discovery that is at the heart of the College.

We challenge our students to develop the skills of analysis and communication that will enable them to perceive pattern in complexity, render reasoned judgments, make wise choices under conditions of uncertainty, and join with others in the pursuit of common endeavors. They should, for example, be able to write and speak effectively and to use another people’s language as one means of access to the diversity of contemporary and historical culture.

A student’s emerging interests and talents find expression through an organized program of study in a major field. In the specialized context of the major, students investigate the traditions and contemporary status of an established branch of knowledge. The structured study of a discipline complements the general exploration of our intellectual heritage to provide the balance of educational breadth and depth to which the College is committed.

There is no single or easy path to the benefits of liberal education. A program of study must be shaped as a student grows. But the special strengths of the University of Pennsylvania—its combination of academic and professional excellence, its diverse and interdisciplinary tradition, its active community of scholars at all levels of experience—provide a setting in which the College can dedicate itself to nurturing honest, eager, and critical minds. The College welcomes those who seek to understand, appreciate, and contribute to the achievements of the human intellect.

The College of Arts and Sciences (https://www.college.upenn.edu/) is the full-time undergraduate division of the School of Arts and Sciences (SAS), which offers the Bachelor of Arts (B.A.) degree. Other divisions include:

- The Graduate School of Arts and Sciences which offers the advanced degrees of Master of Arts (M.A.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.);
- The College of Liberal and Professional Studies (LPS) is the home of lifelong learning at the University of Pennsylvania. It offers high school, undergraduate, post-baccalaureate, graduate, summer and online studies as well as customizable professional training with courses that span across disciplines. LPS also administers the Summer Sessions.

The twenty-seven departments in SAS represent the core disciplines of the liberal arts. They individually offer thirty-two major programs. In addition, through interdepartmental collaborations, the SAS faculty offer a number of interdisciplinary majors. Around SAS are grouped the various specialized professional schools, all of them drawing extensively on the intellectual resources provided by SAS. Two of these schools, the Annenberg School for Communication and the School of Design, offer undergraduate majors for College students through special collaborative relationships with SAS.

The College aims to provide its undergraduates with a broad general education that will lay the groundwork for critical and creative thinking in all fields. Ideally the graduate of the College will be well informed about the world and confident in today’s complex technological society. He or she will be willing and able to make critical judgments and to exercise intellectual leadership. The B.A. degree thus provides a solid basis for specialized scientific and scholarly research, for education for the professions, and for the informed exercise of the rights and responsibilities of citizenship.

The University of Pennsylvania is particularly well placed to provide its students with an education that links the theoretical and the practical. Within the College and the other schools is an extraordinary range of programs. The College alone offers over fifty different major programs. The College does its best to make all of the University’s resources accessible to its students, giving them wide latitude in planning their programs of study and in deciding on their areas of specialization.

To read the history of the College of Arts and Sciences, please click here. (https://www.college.upenn.edu/college-history/)

The fundamental purpose of the University as an academic community is the pursuit of knowledge. Essential to the success of this educational mission is a commitment to the principles of academic integrity. Academic work represents not only what we have learned about a subject but also how we have learned it. Values and beliefs about academic integrity have been adopted by scholars so that others may trace our honorable footsteps, verify what we have learned, and build upon our work. Every member of the University community is responsible for upholding the highest standards of honesty at all times.

As members of the University community, students are also responsible for adhering to the principles and spirit of the Code of Academic Integrity (http://catalog.upenn.edu/pennbook/code-of-academic-integrity/). Penn believes strongly in the importance of academic integrity. Students who violate its precepts are subject to punishment through the judicial system. Ignorance of the rules is no excuse. If a student is unsure whether his or her action(s) constitute a violation of the Code of Academic Integrity, it is that student’s responsibility to consult with the instructor to clarify any ambiguity.

Curriculum

The Purpose of the Curriculum

A curriculum is often identified with a set of degree requirements: “What do I have to do to receive my degree?” But degree requirements are not
themselves sufficient to define appropriate educational goals. One might fulfill all of the College’s degree requirements and yet fail to get a good education. It would also be possible to acquire a good education but neglect to fulfill the degree requirements. Now, we certainly do want you to fulfill all of the degree requirements, and we will work with you to see that this happens. But you are not here fundamentally for the purpose of completing degree requirements. If you think of your education solely in those terms, the result will be dull and unsatisfying.

“Curriculum” comes from the Latin for “course,” in the sense in which one might speak of the course of a journey. The term denotes a means rather than an end, but it suggests better than “degree requirements” what it is to become educated. It denotes a movement from a starting point to a destination, a movement that proceeds along some path. You are not left to your own devices to figure out how to get from here to there. But neither is the path straight and narrow. You will have many choices to make as you negotiate the course of your education, but they will be informed by the experience of the faculty, who in the curriculum offer their considered advice for your educational journey.

The College’s curriculum draws you toward two distinctive goals: toward general education across the wide range of the arts and sciences and toward specialized education in a major. A commitment to holding these two—general and specialized education—together has been the genius of American higher education since the early part of the last century. We continue to believe that these two elements constitute an education best suited to enabling intelligent individuals to live humane, productive and fulfilling lives in the 21st century.

There are 3 benchmarks that every College student must meet to graduate:

**1. Requirements:**

Complete:

A. General Education Requirements (https://www.college.upenn.edu/ged/) (Foundational Approaches and Sectors)

B. Major (https://upenn-preview.courseleaf.com/undergraduate/arts-sciences/curriculum/major/) 

**2. Total courses:**

Complete the course units (c.u.) needed to earn the degree (32-36 c.u.), typically 20 courses outside the major, but no student is required to complete more than 36 courses. Please visit the individual major pages in the Catalog about the specific c.u. requirements by Major (https://upenn-preview.courseleaf.com/undergraduate/arts-sciences/curriculum/major/).

**3. 16 courses in the Arts & Sciences outside the major:**

Complete 16 c.u. in the Arts & Sciences outside of the primary major which include those courses used for general education requirements, minors, and second majors. Courses in Wharton, Nursing, Engineering (including CIS), and Design (FNAR, DSGN, ARCH) are not Arts & Sciences courses, and therefore do not count towards this 16 c.u. requirement. However, some DSGN, FNAR, CIS, NETS or STAT can be used for General Education Requirements. When that occurs, these courses can be counted toward the 16 A&S courses outside the major. Students who are pursuing dual degrees are required to complete 14 A&S courses outside of the primary Arts & Sciences major.

---

**General Education Curriculum**

The College’s General Education Curriculum for its part has two broad objectives. It seeks to develop in you some general skills or approaches to knowledge and to engage you in the intellectual work of the disciplines in a variety of fields across the arts and sciences.

In following this curriculum, you will be guided by two kinds of degree requirements corresponding to these two objectives. One deals with foundational approaches, the other with specific disciplines and fields of knowledge. Within any given course, these two—an approach and a field of study—are integral to one another. An approach is learned by practice in relation to a field of knowledge: your ability to use a foreign language is developed through learning about the culture in which the language is rooted; understanding a work of art is acquired by learning how to write about it—that is, by learning how to use words to describe, compare, question and argue about works of art and the contexts in which they were created and are appreciated; you learn how to analyze quantitative data by thinking about what data mean for our knowledge of natural or social phenomena we observe. Some courses, however, give priority to developing skills and approaches, while others give priority to the field under investigation.

The General Education component of the Curriculum is comprised of two elements. Foundational Approaches (p. 18) develop key intellectual capabilities demanded in a variety of disciplines, while Sectors of Knowledge (p. 19) allow you to tailor your own education in the arts and sciences while gaining valuable knowledge across a broad range of disciplines.

Visit the College website (https://www.college.upenn.edu/curriculum/) for more information on the College curriculum.

**Foundational Approaches**

**Writing**

Writing is the primary medium through which the quality of a student’s intellectual work will be judged. The ability to express oneself clearly and persuasively in writing is fundamental for success across all academic disciplines, and throughout one’s personal and professional life.

For these reasons, writing plays a central role within the College curriculum. Students must take a writing seminar to fulfill the College’s Writing Requirement. It is recommended that students take this course during their first year of study. Students are also encouraged to continue development of their writing skills by participating in Penn’s writing programs.

**Foreign Language**

Competence in a foreign language is essential for an educated person. Participation in the global community is predicated on the ability to understand and appreciate cultural difference, and nothing brings this more sharply into focus than the experience of learning a foreign language. The foreign language not only affords unique access to a different culture and its ways of life and thought; it also increases awareness of one’s own language and culture. For this reason, College students are required to attain a certain degree of competency.

While students often opt to satisfy the Language Requirement by continuing to study the language that they have already begun in high school or earlier, the wealth of languages that the University offers is such that many students decide to explore a new culture and area of
our globe by beginning a foreign language that they have never studied before. French, Spanish, and a few other languages are taught at the pre-collegiate level, but students are less likely to have been exposed to Arabic, Hindi or Japanese—let alone Uzbek or Hausa—and each of these languages is a mode of access to a fascinating culture and history.

Quantitative Data Analysis

In contemporary society, citizenship, work and personal decision-making all require sophisticated thinking about quantitative evidence.

Students in the College must complete a course that uses mathematical or statistical analysis of quantitative data as an important method for understanding another subject. Through such study, students learn to think critically about quantitative data and the inferences that can be drawn from these data. They also gain experience with the use of quantitative analysis to interpret empirical data and to test hypotheses.

Courses in calculus and computer science do not fulfill the requirement because these courses do not require students to analyze actual data sets with the goal of evaluating hypotheses or interpreting results. To count toward the Quantitative Data Analysis Requirement, a course must include such data analysis.

Formal Reasoning and Analysis

In contrast to Quantitative Data Analysis courses, which deal with inductive reasoning, courses designated for this requirement focus on deductive reasoning and the formal structure of human thought, including its linguistic, logical and mathematical constituents. These courses emphasize mathematical and logical thinking and reasoning about formal structures and their application to the investigation of real-world phenomena. In addition to courses in mathematics, this requirement includes courses in computer science, formal linguistics, symbolic logic and decision theory.

Cross Cultural Analysis

In our increasingly interconnected world, the Cross-Cultural Analysis Requirement aims to increase students’ knowledge and understanding of socio-cultural systems outside the United States.

College students are required to take at least one course to develop their ability to understand and interpret the cultures of peoples with histories different from their own. The focus may be on the past or the present and it should expose students to distinctive sets of values, attitudes and methods of organizing experience that may not be obtained from American cultures. This exposure to the internal dynamic of another society should lead students to understand the values and practices that define their own cultural framework.

Cultural Diversity in the U.S.

The Cultural Diversity in the U.S. Requirement complements the Cross-Cultural Analysis Requirement and aims to develop students’ knowledge of the history, dynamic cultural systems and heterogeneous populations that make up the national culture of the United States.

College students are required to take at least one course to develop the skills necessary for understanding the population and culture of the United States as it becomes increasingly diverse. Through historical inquiry, the study of cultural expressions and the analysis of social data, students will develop their ability to examine issues of diversity with a focus on race, ethnicity, gender, sexuality, class and religion. The goal is to equip graduates with the ability to become perceptive and engaged members of society.

Sectors

The sectors are intended to ensure breadth of education across the sectors or fields of knowledge, along with interdisciplinary explorations that link several fields of knowledge.

I. Society

This sector focuses on the structure and norms of contemporary human society, including their psychological and cultural dimensions.

Courses in this sector use many analytical techniques that have been developed to study contemporary society, with its complex relations between individuals and larger forms of mass participation. Some Society courses are largely devoted to the analysis of aggregate forms of human behavior (encounters, markets, civil society, nations, supranational organizations, and so on), while others may focus on the relations between individuals and their various societies. While historical materials may be studied, the primary objective of Society courses is to enable students to develop concepts and principles, test theories, and perfect tools that can be used to interpret, explain and evaluate the behavior of human beings in contemporary societies. This objective will be realized through the specific content of the various courses, but the emphasis in each course should be on developing in students a general capacity for social analysis and understanding.

II. History and Tradition

This sector focuses on studies of continuity and change in human thought, belief and action. Understanding both ancient and modern civilizations provides students with an essential perspective on contemporary life. Courses in this sector examine the histories of diverse civilizations, their cultures and forms of expression, their formal and informal belief systems and ideologies, and the record of their human actors. Students should learn to interpret primary sources, identify and discuss their core intellectual issues, understand the social contexts in which these sources were created, pose questions about their validity and ability to represent broader perspectives and utilize them when writing persuasive essays.

III. Arts & Letters

This sector encompasses the means and meaning of visual arts, literature and music, together with the criticism surrounding them.

Most courses in this sector are concerned with works of creativity—paintings, films, poetry, fiction, theatre, dance and music. They generally address a considerable breadth of material rather than an individual work or artist. The objective of Arts and Letters courses is to confront students with works of creativity; cultivate their powers of perception (visual, textual, auditory); and equip them with tools for analysis, interpretation and criticism. This objective will be realized through the specific content of the various courses, but the emphasis in each course should be on developing and strengthening in students a general capacity for understanding meaning and the ways in which it is achieved in its distinctive environment of culture and moment.

IV. Humanities & Social Science

This sector comprises courses that combine methods and approaches at work in at least two of the first three sectors.
Students will engage with diverse approaches to society, history, tradition and the arts more deeply than a single course from each domain can allow. Greater depth of experience is gained by bringing to bear several humanistic and social scientific perspectives upon a single issue or topic or by engaging directly in academically-based service or performance informed by these perspectives.

In this sector, students seek to broaden their perspective by taking a course in the humanities or social sciences that has been approved as a general education course but that cuts across two or more of sectors I, II, and III. Some courses approved for this sector will seek a more integrative approach by addressing a problem or topic from a variety of disciplinary perspectives. Others will combine disciplinary study with community service or activism, and constructively and reflectively connect the theoretical with the actual. Finally, some courses in the arts that combine creative or performance experience with reflection and grounding within a discipline may be found in this sector.

V. The Living World

This sector deals substantively with the evolution, development, structure and/or function of living systems.

Courses in this sector study the variety of approaches that are useful in understanding the diversity of living organisms, their interrelatedness, and their interactions with their environment. Analytical approaches employed range from analyses at the molecular and cellular level, to analyses of the cognitive and neural bases of behavior, to analyses of evolutionary processes and ecological systems. Students learn the methods used by contemporary natural science to study these topics, including ways in which hypotheses are developed, tested, and reformulated in light of new research findings. A full understanding of living organisms incorporates insights from approaches at many different levels.

VI. The Physical World

This sector focuses on the methodology and concepts of physical science.

Courses in this sector aim to provide insight into the content and workings of modern physical science. Some courses in this sector are part of a major, while others are designed primarily to provide an introduction to the field for non-science majors. Courses for non-science majors may include some discussion of the historical development of the subject as well as the most important conceptual notions and their mathematical expressions. All courses in this sector seek to demonstrate the generally accepted paradigm of modern science: experiment and observation suggest mathematically formulated theories, which are then tested by comparison with new experiments and observations.

All courses in this sector use a significant mathematical prerequisite (advanced high school algebra through introductory calculus) - that is, students will actually be expected to use mathematical methods and concepts to achieve an understanding of subjects in physical science.

VII. Natural Science Across Disciplines

Students will engage with diverse perspectives generated by applying the principles of the natural sciences to broader applications. Courses in this sector emphasize the interrelationships and synergies gained from bringing together different perspectives in the form of: 1) two or more distinctive scientific disciplines (not just one discipline applied to a topic from another scientific field), 2) natural science and mathematics, or 3) natural science and societal issues.

The sector includes some intermediate and advanced courses that may be of special interest to STEM majors.

The Major

The Major provides an opportunity to know a segment of human knowledge deeply, with a sufficient grasp of its modes of thinking and analysis to make your own contribution.

The College offers more than 55 majors (p. 21) across the humanities, social sciences and natural sciences, and many programs provide options for concentrating in any number of specialty areas. Visit the College website (https://www.college.upenn.edu/curriculum/) for more information on the College curriculum.

Academic Opportunities

Learning happens inside and outside of the traditional classroom.

The value of a rich liberal arts tradition extends beyond the curriculum itself to the far reaches of cutting edge research and real-world internships, community partnerships and study abroad.

• Penn is a world-class research institution where undergraduates have the opportunity to participate in the creation of knowledge.
• Students in the College integrate knowledge from a variety of specializations or dig deeply into a particular area of study.
• Through their work with local schools and organizations, students in Academically Based Community Service Courses combine classroom and community work to solve critical issues.
• Students in study abroad programs and internship experience diverse communities and real world challenges in and outside of Philadelphia.

Visit the College website (https://www.college.upenn.edu/courses-options/) for a comprehensive view of academic opportunities for College students.

Advising

College students need to choose courses, declare a major and define career goals. They will need to examine their performance in different courses, identify their skills and those they wish to develop, and decide what really matters to them. Much of this assessment they will do themselves, but faculty members, academic advisors, career counselors and peers can help.

Students in the College have a strong network of academic advisors available to assist them throughout their undergraduate careers.

• Pre-major advisors help first- and second-year students navigate their entrance into academic and intellectual life in the College beginning with the issues of incoming freshmen and continuing through the student’s exploration of a potential major.
• Peer advisors work with the pre-major advisor and are one of the first points of contact for incoming College students. They provide the perspective of an upperclass student in the College and assist first-year students in making the transition from high school to Penn
by sharing their strategies for academic success and knowledge of campus resources.

- After declaring a major, students are assigned an academic advisor affiliated with the major department or program.
- All students are welcome and encouraged to speak with assistant deans for advising in the College Office. These advisors can help students explore the many options and opportunities available to College students, and are available by appointment or on a walk-in basis throughout the year.

For more information, visit the College website (https://www.college.upenn.edu/advising/).

Policies and Procedures

The College of Arts and Sciences Policies and Procedures are intended to provide guidelines for academic conduct and planning.

- Students are subject to the policies and procedures in place for the class into which they matriculated. Class-specific Policies and Procedures manuals can be found on the College site.
- Policies and procedures are subject to change throughout the year at the discretion of the University of Pennsylvania and the College of Arts and Sciences.
- Students are encouraged to consult with an academic advisor in the College Office for further information and clarification.

For class-specific manuals and current policies, visit the College website (https://www.college.upenn.edu/policies/).

Anthropology: Archaeology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

Archaeology is the study of past societies through the excavation of material culture, from the Paleolithic into the early Historical periods. Students study excavation methods and techniques of analysis, and have opportunities to work with collections in the Penn Museum and its Center for the Analysis of Archaeological Materials (CAAM). Archaeology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Archaeology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/archaeology/

Attribute AAAR - Archaeology

Select 2 course units in Anthropology
Attribute AAAR - Archaeology; Attribute AACL - Cultural and Linguistic; Attribute AABI - Biological Anthropology; Attribute AAEA - Environmental Anthropology; Attribute AAMA - Medical Anthropology

Select 3 Anthropology or Anthropology-related courses in another department 2

Capstone Seminar
ANTH 4000 Research Seminar in Anthropology 1

Total Course Units 34

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy/).

2 For up to three of these, non-ANTH courses with anthropological content may be requested. All non-ANTH courses must be approved by the Undergraduate Program Chair.

Honors
Applicants must have a minimum GPA of 3.5 in the major and write a senior thesis.

Anthropology: Biological Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

Biological Anthropology is the study of human evolution and the biology of modern populations. Areas of study include genetics, osteology, and forensics. Students have the opportunity to work in laboratory settings, as well as in the Penn Museum's Physical Anthropology section or its Center for the Analysis of Archaelogical Materials (CAAM). Biological Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Biological Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/anthropology/

2 Up to three courses from NRSC, BIOL, HSSC and PSYC may be requested. All non-ANTH courses must be approved by the Undergraduate Program Chair.

Honors
Applicants must have a minimum GPA of 3.5 in the Major and write a senior thesis.
Anthropology: Cultural and Linguistic Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

Cultural and Linguistic Anthropology is the study of cultural, social, and semiotic variation in the modern world since the development of the ethnographic method in the late 19th century. Areas of study include comparisons of different cultural communities and their relationship to social and demographic factors, as well as communication and media. Cultural and Linguistic Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Cultural and Linguistic Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/anthropology/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

---

Anthropology: Environmental Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

Environmental Anthropology is a thematic concentration that investigates how human societies create and change geologies and climates up to a planetary scale, and the ways that anthropologists have questioned the division between cultures and nature. Students may choose to study topics from contemporary society to the impact of environmental change over long spans of time. Students have the opportunity to do original fieldwork, engage in research with the collections of the Penn Museum and the resources of the Center for the Analysis of Archaeological Materials (CAAM) and study abroad. After they fulfill the foundational course requirements in anthropology, students take three distribution electives from the four themes of Political Ecology, Science Technology and the Environment, Material Worlds, Landscapes and Archaeology, and Biology, Environment and Health.

---

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

2 Foundation courses are drawn from at least 3 of the 4 elective groups:
   • Political Ecology
   • Science, Technology, Environment
   • Material Worlds, Landscapes, Archaeology
   • Biology, Environment, and Health

3 Up to 3 of these, non-ANTH courses with anthropological content may be requested. All non-ANTH courses must be approved by the Undergraduate Program coordinator.

Honors

Applicants must have a minimum GPA of 3.5 in the Major and write a senior thesis.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Anthropology: General Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

General Anthropology majors study all four anthropology sub-fields, acquiring an introduction to the full range of anthropological research. Students are required to take courses in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, and Medical Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

---

**Anthropology: Medical Anthropology & Global Health, BA**

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or specialize in two thematic concentrations: Medical Anthropology and Environmental Anthropology.

Medical Anthropology applies anthropological methods to the study of global health, well-being, and disease. The concentration provides students with a theoretical and methodological foundation to address problems of global health inequality. Medical Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Medical Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/anthropology/
**Architecture: Intensive Design, BA**

The Intensive Major in Architecture is for students in the Design Concentration who intend to pursue a graduate professional degree in architecture. Students in the Intensive Major enroll in their senior year in the technology courses offered in the first year of the Master of Architecture Professional Degree Program. Those accepted into the School of Design's Master of Architecture Professional Degree Program are qualified to be admitted with advanced placement into the second year of the graduate program, reducing the length of study from three to two years.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

**Application requirements:** At least Sophomore Standing. Please consult with the Undergraduate Chair for other important criteria.

For more information: www.architecture.sas.upenn.edu (http://www.architecture.sas.upenn.edu)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (https://www.college.upenn.edu,double-counting-courses/).

### Honors

A minimum GPA of 3.75 in ARCH courses is required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Architecture: Design, BA**

The Major in Architecture is for students who intend to pursue a career in architecture or a related design discipline (e.g., landscape architecture, urban design, product design, etc.). The Major is a studio-based liberal arts program offering two concentrations. The Design Concentration includes a six-semester sequence of design studios and courses in the history and theory of art, architecture, and landscape architecture.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

For more information: www.architecture.sas.upenn.edu (http://www.architecture.sas.upenn.edu)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Biochemistry, BA

Contemporary biological sciences are based on principles of chemistry and physics. The importance of this relationship is the basis of the Penn Biochemistry major, which prepares students for advanced study in areas as diverse as biophysics, biotechnology, cell biology, genetic engineering, genomics, molecular biology, molecular genetics, nanotechnology, neurobiology, structural biology, systems biology, and biochemistry. The major provides the basic science background for graduate and health professional schools and for prospective science teachers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may need more course units.

For more information: https://biochemistry.sas.upenn.edu

### Honors

A minimum GPA of 3.75 in ARCH courses is required.
PHYS 0151  Principles of Physics II: Electromagnetism and Radiation       1.5
or PHYS 0171  Honors Physics II: Electromagnetism and Radiation

Research Requirement
BCHE 4597A  Biochemistry Laboratory                                    1
BCHE 4597B  Biochemistry Laboratory                                    1
Total Course Units                                                        36

1  Take before end of fourth semester. Take after CHEM 2411 Principles of Organic Chemistry I with Laboratory but BEFORE CHEM 5510 Biological Chemistry I.

Honors
Requirements: GPA of 3.2 in courses required for the major, taken at Penn, and not including BCHE 4597A & BCHE 4597B Biochemistry Laboratory.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: Computational Biology, BA

Computational and Mathematical Biology are important new areas in the biological sciences. Many areas in genetics, ecology, and evolution depend on sophisticated quantitative analyses. For example, the advent of data from the human genome project (and similar data from other species) has shown the need for computer, statistical and mathematical methods to store, retrieve and analyze massive data sets. Recognizing the growing importance of these quantitative techniques and skills, we have developed undergraduate concentrations in both Computational and Mathematical Biology. These Concentrations are designed to prepare students for the world of data-driven science.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

With permission of the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

Intermediate Biology
- BIOL 2210  Molecular Biology and Genetics
- BIOL 2410  Evolutionary Biology

Introductory Chemistry or Physics
Select one of the following: 1.5
- CHEM 1011  Introduction to General Chemistry I
- CHEM 1101  General Chemistry Laboratory I
- PHYS 0101  General Physics: Mechanics, Heat and Sound
- PHYS 0150  Principles of Physics I: Mechanics and Wave Motion
- PHYS 0170  Honors Physics I: Mechanics and Wave Motion

Introductory Math & Statistics
- MATH 1400  Calculus, Part I
- Select one of the following: 1
- BIOL 2510  Statistics for Biologists
- STAT 1020  Introductory Business Statistics
- STAT 1110  Introductory Statistics
- STAT 4310  Statistical Inference

Computer Science
- CIS 1200  Programming Languages and Techniques I
- CIS 1210  Programming Languages and Techniques II
- CIS 1600  Mathematical Foundations of Computer Science

Capstone Courses
- BIOL 4536  Introduction to Computational Biology & Biological Modeling
- BIOL 3999  Independent Study

Additional Biology Major Courses
Select 2 course units of Additional Biology Major courses
Computational Biology-Related Courses
Select 3 course units of Computational Biology-Related courses

Total Course Units                                                        36

1  You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy/).
2  Track 1 students must take one additional College credit.
Honors

Applicants must have a minimum GPA of 3.25 in the major and the thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: Ecology & Evolutionary Biology, BA

Ecology and evolutionary biology are among the most exciting and challenging fields in biology today. The Concentration in Ecology and Evolutionary Biology provides intensive training in both areas, along with essential background in the statistical and mathematical methods essential for understanding Ecological and Evolutionary research and field practices.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

Total Course Units 36

¹ You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy/).
² Students are required to present their research at the annual Symposium on Undergraduate Research in Biology (SURB) poster session, held at the end of the Spring Term.

Honors

Applicants must have a minimum GPA of 3.25 in the Major and the Thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Biology: General Biology, BA

Studies in biology can serve as preparation for graduate study in the biological sciences, graduate training in health-related professions, teaching, or employment in a laboratory or conservation-related job. The Biology Department offers courses in many areas of biology, ranging from the workings of cells and cellular components to species interactions and ecosystem function. Penn’s curriculum keeps pace with recent developments in molecular biology and the study of evolutionary processes, including proteomics, computational genomics, molecular evolution, and epigenetics. The General Biology Major allows students to explore the wide range of topics in biology, while also providing a strong foundation in core subject areas such as cell and molecular biology, genetics, physiology, and ecology and evolution.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For more information: http://www.bio.upenn.edu/undergraduate/current-students/major-requirements (http://www.bio.upenn.edu/undergraduate/current-students/major-requirements/)

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.bio.upenn.edu/sectors-policy/).
2 A third course is needed if the additional CHEM or PHYS courses total less than 2 course units.

Honors

Applicants must have a minimum GPA of 3.25 in the major and the thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: Mathematical Biology, BA

Computational and Mathematical Biology are important new areas in the biological sciences. Many areas in genetics, ecology, and evolution depend on sophisticated quantitative analyses. For example, the advent of data from the human genome project (and similar data from other species) has shown the need for computer, statistical and mathematical methods to store, retrieve and analyze massive data sets. Recognizing the growing importance of these quantitative techniques and skills, we have developed undergraduate concentrations in both Computational and Mathematical Biology. These Concentrations are designed to prepare students for the world of data-driven science.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

With permission of the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.
**For more information:** http://www.bio.upenn.edu/undergraduate/concentrations/computational-and-mathematical-biology (http://www.bio.upenn.edu/undergraduate/concentrations/computational-and-mathematical-biology/)

**Major Requirements**

**Introductory Biology**

Select one of the following tracks:

- **Track 1:**
  - BIOL 1121 Introduction to Biology - The Molecular Biology of Life
  - BIOL 1123 Introductory Molecular Biology Laboratory
  - BIOL 1124 Introductory Organismal Biology Lab

- **Track 2:**
  - BIOL 1101 Introduction to Biology A
  - BIOL 1102 Introduction to Biology B

**Intermediate Biology**

- BIOL 2210 Molecular Biology and Genetics
- BIOL 2410 Evolutionary Biology

**Introductory Chemistry or Physics**

Select one of the following:

- CHEM 1011 & CHEM 1101 Introduction to General Chemistry I and General Chemistry Laboratory I
- PHYS 0101 General Physics: Mechanics, Heat and Sound
- PHYS 0150 Principles of Physics I: Mechanics and Wave Motion
- PHYS 0170 Honors Physics I: Mechanics and Wave Motion

**Introductory Math & Statistics**

- MATH 1400 Calculus, Part I

Select one of the following:

- BIOL 2510 Statistics for Biologists
- STAT 1020 Introductory Business Statistics
- STAT 1110 Introductory Statistics
- STAT 4310 Statistical Inference

**Mathematics Requirement**

- MATH 1410 Calculus, Part II
- MATH 2400 Calculus, Part III
- MATH 3200 Computer Methods in Mathematical Science I

**Capstone Courses**

- BIOL 4536 Introduction to Computational Biology & Biological Modeling
- BIOL 3999 Independent Study

**Additional Biology Major Courses**

- Select 2 course units of Additional Biology Major courses

---

**Mathematical Biology-Related Courses**

Select 3 course units of Computational Biology-Related courses

**Total Course Units**

36

**Biology: Mechanisms of Disease, BA**

Among the most important and interesting areas of scientific investigation are the mechanisms that underlie disease. The study of this topic can be of great interest to those pursuing fundamental research, as well as to those drawn to medicine, biotechnology, law, and public health.

The introductory and intermediate level course offerings of the Biology Department provide a foundation in understanding the fundamental principles underlying the mechanisms of disease. Advanced electives are selected from the fields of Microbes and Infectious Disease, Genetic Disease, Molecular Genetics and Genomics, and Biochemistry.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

**For more information:** http://www.bio.upenn.edu/undergraduate/concentrations/mechanisms-disease (http://www.bio.upenn.edu/undergraduate/concentrations/mechanisms-disease/)

2 Students are required to present their research at the annual Symposium on Undergraduate Research in Biology (SURB) poster session, held at the end of the Spring Term.

Honors
Applicants must have a minimum GPA of 3.25 in the major and the thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: Molecular & Cell Biology, BA

The concentration in Molecular and Cell Biology explores how the techniques of molecular biology and genetics are used to understand cell function. As with the previous Molecular Biology Concentration (https://www.bio.upenn.edu/undergraduate/concentrations/molecular-biology/), this concentration allows Biology majors to focus on a molecular approach to biological problems by combining lecture and seminar coursework with training in laboratory research. The list of course electives is organized into two categories: Molecular and Cell Biology and Genetics and Genomics. Advanced Experimental Research is required for the concentration.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

With permission of the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

Honors
Applicants must have a minimum GPA of 3.25 in the major and have taken BIOL 399 Independent Study. Thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: Neurobiology, BA

Neurobiology is one of the most exciting fields within biology today. The basis of neurological disease, molecular mechanisms of brain function, and behavior are major foci of research in medicine, biotechnology, and academia. The Neurobiology Concentration provides fundamental training in brain physiology, coupled with a background in molecular genetics that is essential for understanding the molecular mechanisms of brain function at the gene and protein levels.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

Biophysics, BA

Bridging the biological sciences and the physical sciences, Biophysics is concerned with physical and chemical explanations of living processes, especially at the cellular and molecular levels. Detailed molecular descriptions are emerging for genetic elements and the mechanisms that control their propagation and expression. Biophysical studies include the investigation of protein structure, nucleic acid structure, enzyme mechanisms, the phenomena underlying cellular behavior, excitable phenomena in nerve, muscle and visual cells, and integrative neural phenomena.
The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

**Note:** Though not a requirement of the major, participation in an independent research project is strongly encouraged.

**For more information:** https://www.physics.upenn.edu/biophysics/

**Chemistry, BA**

The different disciplines of modern physical and biological sciences have much to offer each other through advances in technology. Aside from basic research, society continually generates fundamental scientific and technological challenges such as the need for new sources of energy, new synthetic and biotechnologies; new materials exhibiting unusual catalytic, metallic, or electrolytic properties; and developments in laser, computer, and communications technology. We consider these within the province of a unified field of molecular sciences, in which chemistry plays the central role.

Chemistry is concerned with the study of matter and the changes matter undergo. The chemistry program provides a basic foundation for career opportunities in chemical research and teaching, in scientific communication and information transfer, and in the health professions. Students who want to prepare for advanced study in chemistry or allied fields where research experience is advantageous should complete the chemistry honors program.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.
Those considering the Chemistry major should consult with the undergraduate chairman as soon as possible, preferably in the freshman year, especially if you have AP credit in Science and Mathematics from high school.

**Cinema and Media Studies, BA**

The Penn Cinema and Media Studies major and minor are traditional humanities programs involving the critical study of film and media history, theory, and aesthetics. Reflecting the hybrid nature of the field of Cinema and Media Studies, our faculty members are housed in departments across SAS and the university, and we cross-list courses with various departments and schools, including Africana Studies, Anthropology, Communications, East Asian Language and Civilizations, English, Fine Arts, German, History, History of Art, Near Eastern Languages and Civilizations, Romance Languages and Literatures, and Women's Studies. This truly interdisciplinary program will introduce students to the wide range of methodologies used to study film and media, and this intersection with other disciplines makes Cinema and Media Studies an ideal component of a double major.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

Classical Studies: Classical Civilizations, BA

Classical Studies encompasses the civilization of the ancient Greeks and Romans from prehistory to the Middle Ages, with emphasis on the literature, philosophy, and history of the classical Greek and Roman periods. It includes economic, political, social, and intellectual history as well as philosophy, archaeology, religion, and myth. Students may choose a track that emphasizes the study of texts in Greek and/or Latin or opt for a program of courses that do not require any knowledge of the ancient languages. The Classical Studies Department provides extensive training at the Undergraduate level and graduate training in both Classical Studies and Ancient History. We also offer a special Post-Baccalaureate Program for students who wish to continue the study of Greek and Latin but who do not yet meet the requirements of a conventional graduate program.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://www.classics.upenn.edu/

Cognitive Science: Cognitive Neuroscience, BA

Cognitive science is the empirical study of intelligent systems, including the human mind. An interdisciplinary science, it combines results from biology, computer science, linguistics, mathematics, neuroscience, philosophy and psychology to the study of language processing, perception, action, learning, concept formation, inference and other activities of the mind, with applications for information technology and the study of artificial intelligence.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

Honors

Required: A minimum overall GPA of 3.0 and 3.5 in major related courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Communication: Advocacy & Activism, BA

Communication is an interdisciplinary field that draws from the humanities, social sciences, and sciences. The undergraduate Communication program focuses on the theoretical, critical, and empirical examination of fundamental communication systems, institutions, processes, and effects. Communication majors gain deep insight into how communication shapes our individual and collective social, political, economic, and cultural lives; both historical and contemporary, local and global. Our majors learn and employ a range of theories and research methods, including quantitative approaches such as survey research, experiments, content analysis, and computational science; and qualitative approaches such as historical, textual and
discourse analysis, focus groups, and ethnographic fieldwork. In doing so, they produce scholarship that is rigorous, relevant, and multi-modal.

The major in Communication is granted by the College of Arts and Sciences, but the 14-credit major curriculum is designed, administered, and taught by the Annenberg School for Communication.

Majors may complete an optional concentration. Effective Fall 2020, Communication concentrations are as follows: Advocacy & Activism; Audiences & Persuasion; Culture & Society; Data & Network Science; and Politics & Policy. Alternatively, students may also choose to enroll in the Communication and Public Service (ComPS) program. Students interested in pursuing one of these concentrations or ComPS should make an appointment to meet with a member of the Communication Undergraduate Advising Team (https://www.asc.upenn.edu/undergraduate-program/online-advising-appointments/).

See separate details on requirements for a Communication major concentration (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/concentrations/) or the Communication and Public Service program (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/concentrations/communication-and-public-service-comps-program/).

Communication students with a concentration complete the 14-credit major curriculum, including a total of 5 courses required to complete a concentration. Of the 5 courses required to complete a concentration, 3 courses are COMM courses, and 2 courses are non-COMM elective courses. A list of approved COMM Advocacy and Activism concentration courses can be found on the Annenberg School for Communication website (https://www.asc.upenn.edu/undergraduate/courses/?term=All&faculty=All&concentration=31). Non-COMM elective courses require pre-approval from a member of the Communication Undergraduate Advising Team (https://www.asc.upenn.edu/undergraduate-program/online-advising-appointments/). Students may only complete one concentration.

In addition to concentrations, the Communication curriculum also offers opportunities for thesis research (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/communication-thesis/), i (https://www.asc.upenn.edu/academics/undergraduate-program/curriculum-and-major-requirements/independent-study/Independent study (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/independent-study/), internships (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/internship-opportunities-policies/), study abroad (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/study-abroad-transfer-credit/), and public service (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/annenberg-public-service/) (through the Communication and Public Service Program).

**Advocacy & Activism**

Courses in this Concentration focus on the intersection of communication and social justice. Through this concentration students will explore vital communication-related questions about socio-political power, protest, and progress. Courses explore media institutions and the past, present, and evolving techniques and technologies of protest and social movements. Sample courses include: Media Activism Studies; Ethnography and Media for Social Justice; Global Digital Activism; Communication, Activism, and Social Change; and Digital Inequality.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum course and GPA requirements as a condition of application to the major. Students may submit the application for the major after enrollment in the third required course. Meeting these requirements is not a guarantee of admission to the major.

The deadline for declaring the major, declaring a concentration, changing a concentration, and/or removing a concentration is the last day to add a course in the students’ final semester.

1. Completion of at least two of the following introductory core survey courses:

<table>

1. Students may count no more than one course toward both a Major and a Sector requirement. For exceptions, check the Policies Governing the Sector Requirement (https://www.college.upenn.edu/sector-policy/).
2. Visit the Annenberg School for Communication website (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/) for a list of the approved Research Method courses.
3. With department permission, COMM 3091 or COMM 4997 may be counted as one of the concentration-specific course requirements.
4. Study abroad and study away courses are normally assigned the numbers COMM 2985 or 2995. Students can complete up to 3 COMM 2985 or 2995 courses toward their COMM major.
5. Students with a 3.5 or higher cumulative GPA can elect to enroll in the yearlong 2 CU senior thesis course sequence, COMM 4797 and COMM 4997.
6. At least 2 of the 3 non-COMM elective courses must be related to the student’s concentration. 1 of the 3 non-COMM elective courses must be related to the General Communication major but is not required to be related to the student’s concentration.
7. Additional COMM courses may be substituted for non-COMM electives.
8. All non-COMM elective courses must be pre-approved by the Comm Undergraduate Studies Program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Communication: Audiences & Persuasion, BA**

**General Communication Degree Description:**

Communication is an interdisciplinary field that draws from the humanities, social sciences, and sciences. The undergraduate Communication program focuses on the theoretical, critical, and empirical examination of fundamental communication systems, institutions, processes, and effects. Communication majors gain deep insight into how communication shapes our individual and collective social, political, economic, and cultural lives; both historical and contemporary, local and global. Our majors learn and employ a range of theories and research methods, including quantitative approaches such as survey research, experiments, content analysis, and computational science; and qualitative approaches such as historical, textual and discourse analysis, focus groups, and ethnographic fieldwork. In doing so, they produce scholarship that is rigorous, relevant, and multi-modal.

The major in Communication is granted by the College of Arts and Sciences, but the 14-credit major curriculum is designed, administered, and taught by the Annenberg School for Communication.

Majors may complete an optional concentration. Effective Fall 2020, Communication concentrations are as follows: Advocacy & Activism; Audiences & Persuasion; Culture & Society; Data & Network Science; and Politics & Policy. Alternatively, students may also choose to enroll in the Communication and Public Service (ComPS) program. Students interested in pursuing one of these concentrations or ComPS should make an appointment to meet with a member of the Communication Undergraduate Advising Team (https://www.asc.upenn.edu/undergraduate-program/online-advising-appointments/).

See separate details on requirements for a Communication major concentration (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/concentrations/) or the Communication and Public Service program (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/concentrations/communication-and-public-service-comps-program/).

Communication students with a concentration complete 14-credit major curriculum, including a total of 5 courses required to complete a concentration. Of the 5 courses required to complete a concentration, 3 courses are COMM courses, and 2 courses are non-COMM elective courses. A list of approved COMM Audiences and Persuasion concentration courses can be found on the Annenberg School for Communication website (https://www.asc.upenn.edu/undergraduate/courses/?term=All&faculty=All&concentration=29). Non-COMM elective courses require pre-approval from a member of the Communication Undergraduate Advising Team (https://www.asc.upenn.edu/undergraduate-program/online-advising-appointments/). Students may only complete one concentration.

In addition to concentrations, the Communication curriculum also offers opportunities for thesis research (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/communication-thesis/), independent study (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/independent-study/), internships (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/internship-opportunities-policies/), study abroad (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/study-abroad-transfer-credit/), and public service (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/annenberg-public-service/) (through the Communication and Public Service Program).

**Audiences & Persuasion**

Courses in this concentration focus on both the social construction of audiences and the influence of interpersonal and mass mediated communication. Through this concentration students will gain an understanding of how individual and collective attitudes, opinions, information-processing, and behaviors develop, and how audiences and messages interact to create effects. Sample courses include: Social Media and Social Life; Children and Media; Advertising and Society; Communication and Persuasion; and Communication and Social Influence Laboratory.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum course and GPA requirements as a condition of application to the major. Students may submit the application for the major after enrollment in the third required course. Meeting these requirements is not a guarantee of admission to the major.
The deadline for declaring the major, declaring a concentration, changing a concentration, and/or removing a concentration is the last day to add a course in the students’ final semester.

Non-COMM elective courses require pre-approval from a member of the Communication Undergraduate Advising Team (https://www.asc.upenn.edu/undergraduate-program/online-advising-appointments/). Students may only complete one concentration.

In addition to concentrations, the Communication curriculum also offers opportunities for thesis research (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/communication-thesis/), independent study (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/independent-study/), internships (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/internship-opportunities-policies/), study abroad (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/study-abroad-transfer-credit/), and public service (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/annenberg-public-service/) (through the Communication and Public Service Program).

**Communication and Public Service**

A Communication major with a focus in Communication and Public Service (ComPS) program offers students a special program that combines individual research opportunities with hands-on experience in the public arena. Classes, seminars, internships, field experiences, and individual research projects provide students with opportunities to meet and learn from current and former officeholders, journalists, and public servants who have been leaders in government and civil society. The program is closely matched to the undergraduate Communication major, and like the Communication major, ComPS students must complete 14 courses.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum course and GPA requirements as a condition of application to the major. Students may submit the application for the major after enrollment in the third required course. Meeting these requirements is not a guarantee of admission to the major.

The deadline for declaring the major, declaring a concentration, changing a concentration, and/or removing a concentration is the last day to add a course in the students’ final semester.

1. Completion of at least two of the following introductory core survey courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Course Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 1230</td>
<td>Critical Approaches to Popular Culture</td>

---

1. Students may count no more than one course toward both a Major and a Sector requirement. For exceptions, check the Policies Governing the Sector Requirement (https://www.college.upenn.edu/sector-policy/).

2. Visit the Annenberg School for Communication website (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/) for a list of the approved Research Method courses.
The Information Technology (IT) major is designed for students interested in pursuing one of these concentrations or ComPS should make an appointment to meet with a member of the Communication Undergraduate Advising Team (https://www.asc.upenn.edu/undergraduate-program-online-advising-appointments/).

See separate details on requirements for a Communication major concentration (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/concentrations/) or the Communication and Public Service program (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/concentrations/communication-and-public-service-comps-program/).

Communication students with a concentration complete the 14-credit major curriculum, including a total of 5 courses required to complete a concentration. Of the 5 courses required to complete a concentration, 3 courses are COMM courses, and 2 courses are non-COMM elective courses. A list of approved COMM Culture and Society concentration courses can be found on the Annenberg School for Communication website (https://www.asc.upenn.edu/undergraduate/courses/?term=All&faculty=All&concentration=27). Non-COMM elective courses require pre-approval from a member of the Communication Undergraduate Advising Team (https://www.asc.upenn.edu/undergraduate-program-online-advising-appointments/). Students may only complete one concentration.

In addition to concentrations, the Communication curriculum also offers opportunities for thesis research (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/communication-thesis/), independent study (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/independent-study/), internships (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/internship-opportunities-policies/), study abroad (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/study-abroad-transfer-credit/), and public service (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/annenberg-public-service/) (through the Communication and Public Service Program).

Culture & Society

Courses in this concentration explore the complex relationships between communication and cultural practices. Through this concentration students will gain an understanding of the ways in which communication is central to the construction, maintenance, and transmission of culture, as well as to cultural resistance and change. Sample courses include: Media, Culture and Society in Contemporary China; Ritual Communication; History and Theory of Freedom of Expression; Critical Perspectives in Journalism; and Media Criticism.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum course and GPA requirements as a condition of application to the major. Students may submit the application for the major after enrollment in the third required course. Meeting these requirements is not a guarantee of admission to the major.

The deadline for declaring the major, declaring a concentration, changing a concentration, and/or removing a concentration is the last day to add a course in the students’ final semester.

Total Course Units 34

1. Students may count no more than one course toward both a Major and a Sector requirement. For exceptions, check the Policies Governing the Sector Requirement (https://www.college.upenn.edu/sector-policy/).
2. Visit the Annenberg School for Communication website (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/) for a list of the approved Research Methods courses.
3. With department permission, COMM 3091 or COMM 4997 may be counted as one of the concentration-specific course requirements.
4. Study abroad and study away courses are normally assigned the numbers COMM 2985 or 2995. Students can complete up to 3 COMM 2985 or 2995 courses toward their COMM major.
5. Students with a 3.5 or higher cumulative GPA can elect to enroll in the yearlong 2 CU senior thesis course sequence, COMM 4797 and COMM 4997.
6. At least 2 of the 3 non-COMM elective courses must be related to the student’s concentration. 1 of the 3 non-COMM elective courses must be related to the General Communication major but is not required to be related to the student’s concentration.
7. Additional COMM courses may be substituted for non-COMM electives.
8. All non-COMM elective courses must be pre-approved by the Comm Undergraduate Studies Program.

**Honors**

A thesis project is completed over two semesters during the senior year. 1 CU is earned in each semester. Students who achieve a cumulative grade point average of 3.5 or higher and earn an A- or higher on their project will graduate with honors.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Communication: Data & Network Science, BA**

**General Communication Degree Description:**

Communication is an interdisciplinary field that draws from the humanities, social sciences, and sciences. The undergraduate Communication program focuses on the theoretical, critical, and empirical examination of fundamental communication systems, institutions, processes, and effects. Communication majors gain deep insight into how communication shapes our individual and collective social, political, economic, and cultural lives; both historical and contemporary, local and global. Our majors learn and employ a range of theories and research methods, including quantitative approaches such as survey research, experiments, content analysis, and computational science; and qualitative approaches such as historical, textual and discourse analysis, focus groups, and ethnographic fieldwork. In doing so, they produce scholarship that is rigorous, relevant, and multi-modal.

The major in Communication is granted by the College of Arts and Sciences, but the 14-credit major curriculum is designed, administered, and taught by the Annenberg School for Communication. Majors may complete an optional concentration. Effective Fall 2020, Communication concentrations are as follows: Advocacy & Activism; Audiences & Persuasion; Culture & Society; Data & Network Science; and Politics & Policy. Alternatively, students may also choose to enroll in the Communication and Public Service (ComPS) program. Students interested in pursuing one of these concentrations or ComPS should should make an appointment to meet with a member of the Communication Undergraduate Advising Team (https://
www.asc.upenn.edu/undergraduate-program/online-advising-appointments/).

See separate details on requirements for a Communication major concentration (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/concentrations/) or the Communication and Public Service program (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/concentrations/communication-and-public-service-comps-program/).

Communication students with a concentration complete the 14-credit major curriculum, including a total of 5 courses required to complete a concentration. Of the 5 courses required to complete a concentration, 3 courses are COMM courses, and 2 courses are non-COMM elective courses. A list of approved COMM Data and Network Science concentration courses can be found on the Annenberg School for Communication website (https://www.asc.upenn.edu/undergraduate/courses/?term=All&faculty=All&concentration=28). Non-COMM elective courses require pre-approval from a member of the Communication Undergraduate Advising Team (https://www.asc.upenn.edu/undergraduate-program/online-advising-appointments/). Students may only complete one concentration.

In addition to concentrations, the Communication curriculum also offers opportunities for thesis research (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/communication-thesis/), independent study (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/independent-study/), internships (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/internship-opportunities/policies/), study abroad (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/study-abroad-transfer-credit/), and public service (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/annenberg-public-service/) (through the Communication and Public Service Program).

**Data & Network Science**

Courses in this concentration focus on the role and analysis of data, complex systems, and networks in digital communication. Through this concentration students will gain an understanding of the role of digital media and social networks in disseminating information and influencing the communications, attitudes, and behaviors of social groups. Students have the opportunity to learn computational social science techniques to support research in this area, including social network analysis and methods from data science (information visualization, social media collection, quantitative data, and textual analysis) using various tools and programming languages (Python and R). Sample courses include: Computational Text Analysis for Communication Research; Communication in the Networked Age; Understanding Social Networks; The Impact of the Internet, Social Media, and Information Technology on Democracy; and Social Networks and the Spread of Behavior.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum course and GPA requirements as a condition of application to the major. Students may submit the application for the major after enrollment in the third required course. Meeting these requirements is not a guarantee of admission to the major.

The deadline for declaring the major, declaring a concentration, changing a concentration, and/or removing a concentration is the last day to add a course in the students’ final semester.

Major Requirements

Introductory Core Survey Courses

Select two of the following:
The major in Communication is granted by the College of Arts and Sciences, but the 14-credit major curriculum is designed, administered, and taught by the Annenberg School for Communication.

Communication majors gain deep insight into how communication shapes our individual and collective social, political, economic, and cultural lives; both historical and contemporary, local and global. Our majors learn and employ a range of theories and research methods, including quantitative approaches such as survey research, experiments, content analysis, and computational science; and qualitative approaches such as historical, textual and discourse analysis, focus groups, and ethnographic fieldwork. In doing so, they produce scholarship that is rigorous, relevant, and multi-modal.

The undergraduate Communication concentration is open to all majors. Effective Fall 2020, Communication concentrations are as follows: Advocacy & Activism; Audiences & Persuasion; Culture & Society; Data & Network Science; and Politics & Policy. Alternatively, students may also choose to enroll in the Communication and Public Service (ComPS) program. Students interested in pursuing one of these concentrations or ComPS should make an appointment to meet with a member of the Communication Undergraduate Advising Team (https://www.asc.upenn.edu/undergraduate-program/online-advising-appointments/).

See separate details on requirements for a Communication major concentration (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/concentrations/) or the Communication and Public Service program (https://www.asc.upenn.edu/undergraduate-program/communication-major-requirements/concentrations/communication-and-public-service-comps-program/).

Communication students with a concentration complete the 14-credit major curriculum, including a total of 5 courses required to complete a concentration. Of the 5 courses required to complete a concentration, 3 courses are COMM courses, and 2 courses are non-COMM elective courses. A list of approved COMM Politics and Policy concentration courses can be found on the Annenberg School for Communication website (https://www.asc.upenn.edu/undergraduate/courses/?term=All&faculty=All&concentration=30). Non-COMM elective courses require pre-approval from a member of the Communication Undergraduate Advising Team (https://www.asc.upenn.edu/undergraduate-program/online-advising-appointments/). Students may only complete one concentration.

In addition to concentrations, the Communication curriculum also offers opportunities for thesis research (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/communication-thesis/), independent study (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/independent-study/), internships (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/internship-opportunities-polices/), study abroad (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/study-abroad-transfer-credit/), and public service (https://www.asc.upenn.edu/undergraduate-program/academic-opportunities/annenberg-public-service/) (through the Communication and Public Service Program).

**Politics & Policy**

Courses in this concentration explore communication among and between political elites and other policy influencers, the media, and citizens. Through this concentration students will gain an understanding of the attitudes, opinions, information-processing, and behavior of citizens, political elites, political institutions, and political systems.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Sample courses include: Political Communication; Political Economy of Media; Communication and the Presidency; the Hidden World of Privacy Policies; and Public Opinion and the Voice of the People.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum course and GPA requirements as a condition of application to the major. Students may submit the application for the major after enrollment in the third required course. Meeting these requirements is not a guarantee of admission to the major.

The deadline for declaring the major, declaring a concentration, changing a concentration, and/or removing a concentration is the last day to add a course in the students’ final semester.

For more information: https://www.asc.upenn.edu/academics/undergraduate-program/communication-major-requirements/ for a list of the approved Research Methods courses.

With department permission, COMM 3091 or COMM 4997 may be counted as one of the concentration-specific course requirements.

Study abroad and study away courses are normally assigned the numbers COMM 2985 or 2995. Students can complete up to 3 COMM 2985 or 2995 courses toward their COMM major.

Students with a 3.5 or higher cumulative GPA can elect to enroll in the yearlong 2 CU senior thesis course sequence, COMM 4797 and COMM 4997.

At least 2 of the 3 non-COMM elective courses must be related to the student’s concentration. 1 of the 3 non-COMM elective courses must be related to the General Communication major but is not required to be related to the student’s concentration.

Additional COMM courses may be substituted for non-COMM electives.

All non-COMM elective courses must be pre-approved by the Comm Undergraduate Studies Program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Comparative Literature: (Trans)national Literatures, BA**

The undergraduate program in Comparative Literature welcomes students interested in the study of literature from theoretical, interdisciplinary, cross-cultural, and global perspectives. The core courses train students to appreciate the variety of meanings that texts acquire in different institutional and philosophical contexts and different socio-political frameworks. There are three concentrations within the major: National and (Trans)national Literatures (four courses in each of two languages), Theory, and Globalization.

Comparative Literature is a flexible program, allowing students to take courses in a variety of departments in the College. Students with interests in more than one national literature and in fields such as philosophy and political theory, art and aesthetics, and film and music will find the requirements congenial. The program provides students with a cosmopolitan intellectual background that is increasingly in demand today.
The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

**For more information:** http://ccat.sas.upenn.edu/Complit/undergraduate.htm

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

### Criminology, BA

The major in Criminology enables students to acquire a theoretical and methodological framework for generating and assessing knowledge about crime and social control. The program draws upon disciplines from statistics to neuroscience to develop a liberal arts approach to the subject of crime.

The minimum total course units ([https://www.college.upenn.edu/credits-needed-major/](https://www.college.upenn.edu/credits-needed-major/)) for graduation in this major is 34. Double majors may entail more course units.

For more information: [http://crim.sas.upenn.edu/](http://crim.sas.upenn.edu/)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum ([https://www.college.upenn.edu/curriculum/](https://www.college.upenn.edu/curriculum/)) page.

### Design, BA

The Fine Arts department is committed to cultivating global thought leaders in the fields of Art and Design. The Major in Design addresses a need for innovative pedagogy exploring the expansive nature of contemporary design and its relationship to the humanities, the sciences, and emerging technologies. The curriculum emphasizes an integrated understanding of design that brings together different disciplinary approaches that respond to complex social, cultural, and environmental challenges. Students will acquire contemporary representation, prototyping, and fabrication skills and engage with theoretical frameworks yielding advanced research and knowledge production.

Students begin the Design Major with two required core studios that introduce fundamental design methodologies, computational literacy, technological fabrication, and the study of contemporary digital culture. Majors then select from a series of theoretical and historical seminars that contextualize and expand their understanding of design practices including data-driven, speculative, and inquiry-based design. Majors also have the freedom to select from an expansive list of art and design electives that further their interdisciplinary expertise. The Design Major culminates in a year-long design project, researched design brief, public exhibition, and panel review with leading experts in the field.

A goal for students entering the major is to develop the ability to critically and resourcefully synthesize the expansive potentialities of design. These skill sets are gained through exposure to diverse approaches to design methodologies, histories, and theories. Learning outcomes are evident in the individual and collaborative conceptual, technological, and speculative projects that emerge from the core and integrative studios. Design electives and seminars enrich, complicate, and expand disciplinary modalities, while engaging in deeper explorations of positionality within a global climate. Ultimately, the Design Major seeks to guide students through a process of learning to independently question, interpret, and analyze integrative design.

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum ([https://www.college.upenn.edu/curriculum/](https://www.college.upenn.edu/curriculum/)) page.

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement ([http://www.college.upenn.edu/sectors-policy/](http://www.college.upenn.edu/sectors-policy/)).

2 Students completing a minor elective track are exempt from the 2 course units of Criminology electives.
Core Studio Requirements

Students are encouraged to take these classes their freshman and sophomore years.

DSGN 0010 Art, Design and Digital Culture
DSGN 0020 Design 21: Design After the Digital

Integrative Design Studio Requirements

Select 3 courses:

DSGN 1020 Art of the web: Interactive Concepts for Art & Design
DSGN 1070 Graphic Design I: Creative Technologies
DSGN 2040 Environmental Animation
DSGN 2070 Graphic Design II
DSGN 2260 Pixel to Print
DSGN 2510 Biological Design
DSGN 2500 Cultures of Making
DSGN 2530 Functions for Form and Material
DSGN 2540 Interfacing Cultures: Designing for Mobile, Web and Public Media
DSGN 2570 User Experience (UX) and User Interface (UI) Design
DSGN 3050 Design Tools and Technologies

Art History and Theory Requirements

Art History- select one introductory level art history course, such as:

ARTH 1010 World Art before 1400
ARTH 1020 The Artist in History, 1400-Now
ARTH 1060 Architect and History
ARTH 3000 Undergraduate Methods Seminar

Theory- select 2 of the following:

ARCH 4110 Theory I: Geometry in Architecture
DSGN 3020 Contemporary Theories of Design
DSGN 3040 Language of Design
DSGN 3060 Futures for All: Reimagining social equality through art and technology
DSGN 3070 Feminist Technoscience: Art, Technology, & Gender
DSGN 3100 Interrogative Design: Cultural Prosthetics
URBS 2050 People and Design
VLST 1010 Eye, Mind, and Image
FNAR 3050 Critical Issues in Art
FNAR 3060 The Chinese Body and Spatial Consumption in Chinatown
FNAR 3110 Public Art and Issues of Spatial Production
FNAR 3130 Mystics & Visionaries: Arts and Other Ways of Knowing
FNAR 3160 Is This Really Happening? Performance and Contemporary Political Horizons

Design Seminar Requirements

DSGN 4020 Design Senior Seminar Project (Fall)
DSGN 4030 Design Senior Seminar Project (Spring)

Art and Design Electives

Select any combination of four FNAR and DSGN courses to fulfill this requirement

Total Course Units 34

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy/).
2. Core studio requirements may be taken as early as freshman year and in any order as long as prerequisites are met.
3. Majors must take the Senior Seminar Project in consecutive semesters of their senior year.
4. Art and Design Electives can be taken in any order as long as prerequisites are met.
5. Fine Arts and Design courses can be found on the department website (https://www.design.upenn.edu/fine-arts/undergraduate/courses/).

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Earth and Environmental Science, BA

The Earth and Environmental Science major provides graduates with a broad understanding of the physical, chemical and biological processes that operate in and on the planet and how direct and indirect methods are used to examine, quantify and understand the structure, composition, and dynamics of the Earth’s atmosphere, hydrosphere, biosphere and lithosphere. Graduates appreciate how humans and ecosystems interact with the dynamic Earth, and how human activities such as non-sustainable resource extraction have generated climate change, exacerbated natural hazards, and disrupted hydrologic and biogeochemical cycles.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 35. Double majors may entail more course units.

For more information: https://earth.sas.upenn.edu/undergraduate/majors/eesc (https://earth.sas.upenn.edu/undergraduate/majors/eesc/)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

**East Asian Languages and Civilizations: Dual Language, BA**

The undergraduate program in EALC offers language training and courses in the culture, history, literature, and archaeology of East Asia. Students will focus on two of our three language offerings to study Chinese, Japanese or Korean within the major and are welcome to take content courses about multiple countries/areas.

For more information: [https://ealc.sas.upenn.edu/undergraduate/major](https://ealc.sas.upenn.edu/undergraduate/major)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

**Major Requirements**

**Language**

---

2023-24 Catalog | Generated 08/02/23
Select 6 CU of Chinese, Japanese or Korean chosen from:
- CHIN 0100 and above, except for CHIN 0105, 0205, 0305, 0405, 0705, 0805
- KORN 0100 and above, except for KORN 0103, 0105
- JPAN 0100 and above, except for JPAN 0103, 0105

Select 6 CU in a language not already used including:
- CHIN 0100 or above, JPAN 0100 or above, or KORN 0100 or above

Content Courses
Select 2 CU 'Gateway' from the following (that correspond with languages taken above):
- EALC 0020 Introduction to Chinese Civilization
- EALC 0040 Introduction to Japanese Civilization
- EALC 0060 Introduction to Korean Civilization

Select 2 CU 'Seminars' from:
- EALC 2000-3999 with attribute AEAM

Select 2 CU 'Electives' from:
- Any EALC course and/or 1 additional CHIN, JPAN, KORN course to continue beyond those language CUs used above

At least 1 CU must be from an area not already focused on (if a student takes Chinese, then the breadth must be either Japanese or Korean and could be an overlap with Seminars)

Total Course Units 36

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

For more information: https://ealc.sas.upenn.edu/undergraduatemajor (https://ealc.sas.upenn.edu/undergraduatemajor/)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

East Asian Languages and Civilizations: East Asian Area Studies, BA

East Asian Studies focuses on East Asia as a region of the world and human experience, and provides an integrated curriculum drawing on the approaches of the social sciences and the humanities. The program requires relevant courses in areas including history, international relations, political science, sociology, legal studies, and East Asian arts and cultures, while maintaining high standards in language study.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Honors
Required: A minimum overall GPA of 3.0 and 3.5 in major related courses.
East Asian Languages and Civilizations: General East Asian Languages and Civilizations, BA

The undergraduate program in EALC offers language training and courses in the culture, history, literature, and archaeology of East Asia. Students will focus on either Chinese, Japanese or Korean language study within the major but are welcome to take content courses about multiple countries/areas.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

Economics, BA

Economics is a social science and, as such, an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; and international trade and international finance (e.g., exchange rates). The Economics Major provides training in economic principles and provides a useful background for students preparing for a career in public policy, business, or finance.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

1. LPS academic year courses ECON 0100 Introduction to Micro Economics, ECON 0200 Introductory Economics: Macro, ECON 2100 Intermediate Microeconomics, ECON 2200 Intermediate Macroeconomics, or ECON 2300 Statistics for Economists are prerequisites for the major. Students choosing this Concentration will read authors imaginatively confronting vast social changes, including Behn and Dryden; Penn and Franklin; Swift and Pope; Fielding and Burney; Brockett Brown and Radcliffe; Dickens and Eliot; Austen and Hardy; Wollstonecraft, Godwin, and the Shelles; Hawthorne, Fuller, Melville, and Stowe; Marx, Darwin, and Freud. They will read about a range of economic, political, and aesthetic changes that took place in these years — from agrarian to industrial economies, abolition to imperialism, oligarchy to universal suffrage, from "literature" as a common medium for political discussion to literature as commodity and art object. In doing so, students will read across genres and national cultures, and will read literary history alongside economic and political history.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

English: 20th/21st Centuries, BA

When we study the twentieth- and twenty-first centuries we turn the present into history. All the more ironic, then, that the period opened with the injunction to "MAKE IT NEW," to break away from tradition into a pure, laboratory world of aesthetic experiment. This "modernist revolution" was played out against calamities: a worldwide war, accelerating technological upheaval, economic depression, existential despair. Thus, James Joyce's refashioning of English conveyed the heartbeat of love and loss; Gertrude Stein pushed language to the condition of paint to express confusions in gender and national identity; Hemingway pared down prose to monosyllables to make fiction writing an ethical act. The world was a "Waste Land" — T. S. Eliot's "heap of broken images" — and literature not only told this story but enacted it. Ugly, hermetic, elitist: it was so brilliant! As the century proceeded, the disasters piled up — another world war, the Holocaust, Vietnam, such rapid shifts in technology and communication that no one could hope to adjust. And suddenly there were new voices to hear, voices whose stories had so far remained untold. By the 1970s, unprecedented quantities of literature by women and minorities were appearing in print. The wild energy of aesthetic experiment had been tethered to the project of social change, and in imaginations as rich as Toni Morrison's the triumph of art is no longer a betrayal of the human condition. This is the history we study as we continue to deal with the fallout of the twentieth century and explore our brave new millennium.

</table>

1 You will need to take one course to fulfill each sector of the Major Core, six in total. Two of these courses may double-count with your Literature Seminar Electives. Creative Writing Seminars cannot count in the Major Core.

2 The One Series seminar (TOS) cannot double-count in the Major Core. However, if you take a second TOS course, your additional TOS may count as a Literature Seminar or an Elective.

3 These Early-Period Seminars may NOT double-count in the Core.

4 These Seminar Electives may be double-counted in the Core.

5 The rest of your 13 c.u. for the English Major will be met with Electives. If none of your seminars are being double-counted in the Core, you will only need two Electives. For each double-counting course, you will need to add an Elective, for a maximum of four, to reach 13 c.u. With the approval of your Major Advisor, you may count up to two courses outside of English toward the Major. Courses in Linguistics (LING) and in Literatures not in English may count; in the case of Non-English Literatures, the courses should ideally be crosslisted ("Also offered As") with ENGL, or you may obtain the permission from your Major advisor.

6 Concentration may be comprised from the 13 c.u. of the Major, or other courses.

Honors

Applicants must have a 3.6 GPA in the major. Thesis required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
of themselves and their fellow slaves. Alongside this tradition has arisen an equally rich tradition of African literatures in English, both before and after the end of colonialism in Africa. Even prior to this however, both created a dynamic oral tradition filled with witty folk tales and haunting spirituals and work songs. The oral tradition, along with the slave narratives, and the testimonials, essays, sermons and addresses of thousands of Black men and women form the beginnings of these two traditions. Students who choose to concentrate in African American literature will not only acquire a strong understanding of these early efforts, but will also have the opportunity to study with a diverse group of scholars whose interests range from Women’s fiction and Feminist theory to African American autobiography, literature of the African diaspora, African American poetry, narrative and the poetics of hip-hop. This is a literary tradition founded to counter claims of Black intellectual inferiority. It is a tradition grounded in the belief that literacy — the ability to read and write — is fundamental to freedom. It is a tradition that has contributed enormously to the literature of the world and one that only recently began to receive the kind of recognition and criticism that it demands and requires. From the earliest narratives to the works of Nobel Laureate Toni Morrison, this concentration is a dynamic and intellectually exciting one.

English: Cinema & Media Studies, BA

Cinema Studies approaches the history of film and related media from a variety of perspectives: historical, critical, and theoretical. It examines a wide array of texts, from early silent-film-era cinema to YouTube. The advancement of media technology is of particular interest to this field, as the invention of new forms of visual and auditory storytelling necessitates new critical lenses to interpret their societal and political implications. While focused on situating media in the broader contexts of modernism, narrative theory, commercial entertainment and consumer culture, and technologies of production.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

For more information: http://www/english.upenn.edu/Undergrad/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.
In this Concentration, you only need to have a single Elective.

**Honors**

Applicants must have a 3.6 GPA in the major. Thesis required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**English: Creative Writing, BA**

The English Major with a Concentration in Creative Writing provides students with a solid grounding in literature as well as advanced study in creative writing. Penn's premier undergraduate creative writing program includes courses in poetry, fiction, nonfiction, screenwriting, playwriting, writing for children, journalistic writing, and review.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

1 You will need to take one course to fulfill each sector of the Major Core, six in total. Two of these courses may double-count with your Literature Seminar Electives. Creative Writing Seminars cannot count in the Major Core.

2 The One Series seminar (TOS) cannot double-count in the Major Core. However, if you take a second TOS course, your additional TOS may count as a Literature Seminar or an Elective.

3 You must take at least three Creative Writing Seminars.

4 You must take one Early-Period Literature Seminar, either Literature Before 1700 (AEB7) or Literature Before 1900 (AEB9). This Seminar may be double-counted in the Major Core.

5 You must take one more Literature Seminar. This may be double-counted in the Major Core.

6 Remaining number of courses to fulfill 13 credits (1-3 c.u.).

**Honors**

Applicants must have a 3.6 GPA in the major. Thesis required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**English: Drama, BA**

The Concentration in Drama and Theatre Arts is ideal for students interested in both English and Theatre Arts, since nearly all of the courses that fulfill this concentration — those with the attribute AEDR in Path@Penn — are cross-listed with that program. Students are strongly encouraged to consult the course listings for both English and for Theatre Arts (THAR) ([http://www.sas.upenn.edu/theatrearts](http://www.sas.upenn.edu/theatrearts/)) in choosing courses that engage with drama and theatre. In addition, they might consider also adding a minor in Theatre Arts, or even doing a double major in English and in Theatre Arts. Several courses that count towards the English Major’s Drama Concentration can count towards the Theatre Arts Minor (six credits) or the Theatre Arts Major (thirteen credits).

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

</table>

1. You will need to take one course to fulfill each sector of the Major Core, six in total. Two of these courses may double-count with your Literature Seminar Electives. Creative Writing Seminars cannot count in the Major Core.

2. The One Series seminar (TOS) cannot double-count in the Major Core. However, if you take a second TOS course, your additional TOS may count as a Literature Seminar or an Elective.

3. These Early-Period Seminars may NOT double-count in the Core.

4. These Seminar Electives may be double-counted in the Core.

5. The rest of your 13 c.u. for the English Major will be met with Electives. If none of your seminars are being double-counted in the Core, you will only need two Electives. For each double-counting course, you will need to add an Elective, for a maximum of four, to reach 13 c.u. With the approval of your Major Advisor, you may count up to two courses outside of English toward the Major. Courses in Linguistics (LING) and in Literatures not in English may count; in the case of Non-English Literatures, the courses should ideally be crosslisted (“Also offered As”) with ENGL, or you may obtain the permission from your Major advisor.

6. Concentration may be comprised from the 13 c.u. of the Major, or other courses.

**Honors**

Applicants must have a 3.6 GPA in the major. Thesis required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**English: Gender/Sexuality, BA**

The Concentration in Gender, Literature and Culture is designed to allow students to explore the complex effects of gender on the literary text: thus, students choosing this Concentration will not only consider the thematic implications of historically specific gender constructions, but also gender's effect on literary authorship, on textual reception, and on the development of language itself: on what *can* be said. All students in this Concentration will expose themselves to the range and richness of writing by and about women, since the history of women's writing is a complex one, filled with struggle, invention, and rebellion. Women have, for instance, not always had access to books, and it is only in the last two centuries that girls have routinely been taught to read and write. With some notable exceptions — the medieval pilgrim Margery Kempe, the Restoration dramatist Aphra Behn — women did not begin writing professionally until the eighteenth century, when rising literacy rates, changing gender roles, and enabled the emergence of a new, exceedingly popular prose form, the novel. It was then that “lady novelists” set the terms for women's writing, which has ever since been deeply concerned with asking what a woman is and what she can become. Meanwhile, while male dominance of literary production and reception had a drastic effect on the representation of women, it has also, paradoxically, sometimes rendered maleness itself obscure or invisible. Thus, this Concentration is also for students interested in the construction of male gender: courses with a focus on such matters as Elizabethan stage practices, 18th-century theories of consent, Victorian masculinity, post-colonial exploration and conquest, African American masculinities, gays and lesbians in 19th-century America and Asian American gender roles will expose students to the complex dance of both genders in literature and culture.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

**English: General English, BA**

Students majoring in English explore language, literature, and culture across the globe and in a wide array of media. From books and manuscripts to theater, film, TV, and digital media, English majors go everywhere English goes in order to cultivate their critical and expressive skills.

Our faculty are among the most decorated in the university for their excellence in teaching. English Alumni pursue careers across the full range of professions, from law and medicine to consulting and teaching. For the past two decades, our graduates have especially thrived in the worlds of advertising and social media.

The English Major consists of 13 courses, divided into a Core of 6 courses and the rest Electives. Along the way, majors must take a course in The One Series (ENGL 4500 to 4599) and four Advanced Seminars, some of which may be counted in the Core. The Major was designed to allow students flexibility and choice while ensuring a comprehensive grounding in literary history and interpretation.

In addition to the Standard Curriculum, English Majors may also choose among 12 different Concentrations, including Creative Writing, Cinema & Media Studies, as well as concentrations focused on distinct historical periods, Genres, or Critical Approaches.

For more information: [http://www.english.upenn.edu/Undergrad/](http://www.english.upenn.edu/Undergrad/)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.
English: Literary Theory & Cultural Studies, BA

One of the most dramatic changes that has occurred in English departments over the past twenty years has been the increased emphasis on “theory.” Professors and students of literature have taken up questions which might formerly have been associated with such disciplines as Linguistics, Philosophy, Psychology, Sociology, or Economics. The works of such authors as Hegel, Marx, Saussure, Freud, Sartre, de Beauvoir, Fanon, Foucault, and Derrida have come to be part of the English curriculum. This expansion and transformation of what it means to study English have created controversy from the start, and the merits and limitations of theoretical work continue to be hotly debated at Penn as elsewhere. If you are intrigued and excited by these concerns, or if you are thinking about going on to do graduate work in English, you should consider the concentration in Literary Theory and Cultural Studies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

English: Literature, Journalism and Print Culture, BA

This concentration allows students to devote focused study to the range of non-fictional literary genres whose usual purview is the world of "facts" and whose usual venue is the wide circulation newspaper or periodical. 20th-century practitioners in these genres include Ernest Hemingway, George Orwell, H.L. Mencken, Joan Didion, E. B. White, and Tom Wolfe, but their work has a long foreground. What we call journalistic writing emerged with the institution and establishment of print culture and in the periodical writings of such earlier figures as John Milton, Addison and Steele, John Boswell, Benjamin Franklin, Mark Twain, and Steven Crane. Students electing this Concentration should develop a sense of how historical changes in the material production of literature (such as the invention of the printing press, the growth of mass media, the emergence of the Internet) affect the relation between author and reader, literature and journalism, fiction and non-fiction. Given the broad nature of this Concentration, students will need to read course descriptions carefully to determine which courses include emphasis on some aspect of print culture.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

**English: Medieval/Renaissance, BA**

Students choosing this concentration follow English literature — Chaucer, Margery Kempe, Spenser, Shakespeare, and Milton — through the most volatile and dramatic phases of its development. Much of this literature was composed to be recited or performed in public, not read in lonely silence. Germanic, Scandinavian, and French invasions of Britain (culminating in the Conquest of 1066) drove Celtic culture to the margins while creating vocabularies of unmatched complexity (and poetic potential): in English, you can choose between the Holy Ghost (Germanic root) or the Holy Spirit (Latin), dark (Germanic) or obscure (Latin), pig and pork, etc. In the fourteenth century, the English countryside formed the powerhouse of the economy and poets wrote about millers, weavers (such as the Wife of Bath), and agricultural workers (Piers Plowman). Pilgrims, such as Margery Kempe, traveled freely within a European-wide Catholic culture to Rome, Gdansk, and Jerusalem. Following decades of civil war, which inspired Sir Thomas Malory to lament the passing of chivalry (Morte D’Arthur), a powerful new dynasty arose: the Tudors. Then, in the earlier sixteenth century, Henry VIII effected a revolutionary break with Roman Catholicism. Poets and playwrights took leading roles in refashioning England as a Protestant nation: Spenser adapted medieval genres of allegory and romance to celebrate not the Virgin Mary, but the Virgin Queen (Elizabeth I); medieval “mystery” or drama cycles took on Protestant themes; the great commercial theater of Marlowe and Shakespeare drew crowds and made money. Puritan activism subsequently closed the theaters; Puritans and royals eventually divided in a second civil war that led to the beheading of the King, the foundation of a Commonwealth, and the epical visions of Milton. English colonization, which had begun with invasions of Wales and Ireland, spread westward to the Americas and later became global in scope. The New World was greeted with wonder and exploited through settlement and slavery. All of this runs through the vibrant literature of this extraordinary period: a time that provides much food for thought as we proceed in this new millennium, with the United States and its corporate cultures in a position of unparalleled (and yet increasingly challenged) global dominance.

1 You will need to take one course to fulfill each sector of the Major Core, six in total. Two of these courses may double-count with your Literature Seminar Electives. Creative Writing Seminars cannot count in the Major Core.

2 The One Series seminar (TOS) cannot double-count in the Major Core. However, if you take a second TOS course, your additional TOS may count as a Literature Seminar or an Elective.

3 These Early-Period Seminars may NOT double-count in the Core.
These Seminar Electives may be double-counted in the Core.

The rest of your 13 c.u. for the English Major will be met with Electives. If none of your seminars are being double-counted in the Core, you will only need two Electives. For each double-counting course, you will need to add an Elective, for a maximum of four, to reach 13 c.u. With the approval of your Major Advisor, you may count up to two courses outside of English toward the Major. Courses in Linguistics (LING) and in Literatures not in English may count; in the case of Non-English Literatures, the courses should ideally be crosslisted ("Also offered As") with ENGL, or you may obtain the permission from your Major advisor.

Concentration may be comprised from the 13 c.u. of the Major, or other courses.

Honors
Applicants must have a 3.6 GPA in the Major. Thesis required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

English: Poetry and Poetics, BA
The Concentration in Poetry and Poetics is for students interested in the forms, theories, histories and practices of poetry. What makes a poem a poem? What are its cultural uses? Its formal and material determinants? Its relations and obligations to other kinds of speech and writing, other forms of expression and art? What notions of poet and audience inform its production and reception? All students adopting this Concentration will take English 1800: Poetry and Poetics. Additionally, all students of Poetry and Poetics will study the history of the poem in English, choosing from offerings in the 20th century and earlier. Students will find it possible to study Elizabethan love sonnets and Beat political manifestos; Augustan satire and American poetry of the natural world; Medieval songs and Native American chant; hip hop and odes. In addition, students will find many relevant offerings in departments outside English.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

**English: The Novel, BA**

The Concentration in Prose genres (i.e. The Novel) is for students interested in the forms, theories, histories, and practices of prose writing. What, for instance, makes a novel a novel? What makes a novel different from a story? A history? An allegory? A romance? What can narrative do that poetry can’t? why do we need both fiction and non-fiction? Distinctions among these and other forms of prose writing are often difficult to make, precisely because their histories and conventions are so deeply intertwined: Samuel Richardson’s novel Pamela began as a conduct book for young ladies; Bram Stoker’s Dracula is written as a series of letters and diary entries; Thomas Pynchon’s Mason-Dixon is both history and fiction at once. This Concentration aims to provide students with a means of studying how prose genres form, how they function in different historical moments, and how they evolve over time. Its focus on genre allows both critical and creative writers to explore, and also to test in practice, the protean and various possibilities of prose.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

**Environmental Studies: Environmental History and Regional Studies, BA**

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.
Students in the Environmental History and Regional Studies concentration learn a temporal and spatial perspective to the study of the Environment.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 35. Double majors may entail more course units.

This concentration is for students with a background in the Arts or Social Sciences.

Environmental Studies: General Environmental Studies, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

This is an individualized, specialized concentration designed for students who want to concentrate in an area not represented by the other concentrations. Formal proposals for this concentration must be developed and submitted for review and approved by both the EES program director and undergraduate chair before admittance into this concentration.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 35. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/earth/environmental-studies/individualized-concentration

Honors

Applicants must have a 3.25 GPA in the major and complete Senior Thesis with a B+ or above.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Environmental Studies: Global Environmental Systems, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

Students in the Global Environmental Systems concentration will focus their coursework on understanding global environmental systems.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 35. Double majors may entail more course units.

This concentration is for students who have a background in either the Natural or the Social Sciences.

#### Honors

Applicants must have a 3.25 GPA in the major and complete Senior Thesis with a B+ or above.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Environmental Studies: Sustainability and Environmental Management, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

The Sustainability and Environmental Management concentration is designed to help students understand the nature of environmental constraints which face organizations and individuals in the modern world, and to understand how these constraints can be effectively considered as part of the decision-making process in for-profit and non-profit organizations.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 35. Double majors may entail more course units.

This concentration is for students who have a background in either the Natural or the Social Sciences.

For more information: http://www.sas.upenn.edu/earth/environmental-studies/sustainability-and-environmental-management-concentration/
Fine Arts, BA

The Undergraduate Fine Arts Program combines studio practices, seminar courses, and interactions with visiting artists and professionals to provide an open intellectual framework in order to foster critical awareness and independent methods of artistic research and learning. The Fine Arts Department offers a diverse range of studio courses in the areas of animation and 3D modeling, ceramics, design, drawing and painting, photography, printmaking, sculpture, and video. The dynamic curriculum also provides students with the opportunity to thoroughly examine contemporary art, creative research, interactive design, and public art through seminar-based instruction.

A goal of the Undergraduate Fine Arts program is to facilitate an environment where the potentialities of art are considered in relation to the real life conditions of our students. Encouraged to test themselves against the rigors of divergent artistic approaches and their histories, our students develop a more complex set of skills to creatively and critically negotiate the turbulent shifts taking place globally in terms of human experiences.

The Fine Arts major is available for students in the College of Arts and Sciences and the School of Engineering, and the minor is available for undergraduate students across the university. The Fine Arts program works in conjunction with three interdisciplinary degree programs in Cinema Studies, Digital Media Design, and Visual Studies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

For more information: http://www.design.upenn.edu/fine-arts/undergraduate/program (http://www.design.upenn.edu/fine-arts/undergraduate/program/)

Honors

Applicants must have a 3.25 GPA in the major and complete Senior Thesis with a B+ or above.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
French and Francophone Studies introduces students to the full span of historical and cultural traditions from France and the French-speaking world. Languages courses - from introductory to advanced - promote linguistic fluency, building on the skills students have acquired in high school or at Penn. Upper-level seminars explore a range of topics pertaining to literature, history, visual arts, and/or the media, and they offer majors and minors the opportunity to engage in research on French and global Francophone cultures across periods into contemporary times.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

At least half of all courses for the major must be taken in the Department at Penn. ALL courses must be taken in French, with the possible exception of Major-related courses.

For more information: http://www.sas.upenn.edu/french/undergraduate/requirements-majors-and-minors-major-french-francophone-studies (http://www.sas.upenn.edu/french/undergraduate/requirements-majors-and-minors-major-french-francophone-studies/)

### Gender, Sexuality, & Women's Studies: Feminist Studies, BA

A concentration with a broad range, Feminist Studies covers topics ranging from politics to policy, to research methods and methodologies. For example, students with a concentration in Feminist Studies may be interested in focusing on how feminist policy has shaped political life in the United States, researching the ways that feminist advocacy has shaped political movements in Latin America, or examining how feminist approaches to research methods have transformed data collection in particular fields.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

**Elective Courses**

Select 4 elective courses

**Research/Capstone Requirement**

Select 1 course unit

**Total Course Units**

33

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy/).

### Honors

Students with an overall GPA of 3.4 and 3.6 or better in the major are eligible for honors.

### Concentrations

Students may select one of five concentrations:

- Feminist Studies
- Global Gender and Sexuality Studies
- Health and Disability
- LGBTQ Studies
- Self-designed

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

### Gender, Sexuality, & Women's Studies: General, BA

The Gender, Sexuality, and Women's Studies Program (GSWS) is an interdisciplinary program that provides exciting intellectual opportunities to explore the role of gender in human affairs. The program offers over 50 courses each year, many cross-listed with other departments, as well as a major, a minor, and a graduate certificate.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

**For more information:** [https://gsws.sas.upenn.edu/](https://gsws.sas.upenn.edu/)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.
Gender, Sexuality, & Women’s Studies: Global Gender and Sexuality Studies, BA

This concentration is for students interested in exploring transnational feminist and queer approaches to scholarship in a variety of fields. Recent concentrations in this area have focused on global health policy, transnational literary critique, and transnational approaches to queer studies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

For more information: https://gsws.sas.upenn.edu/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

Honors
Students with an overall GPA of 3.4 and 3.6 or better in the major are eligible for honors.

Concentrations
Students may select one of five concentrations (https://gsws.sas.upenn.edu/content/concentrations/):

- Feminist Studies
- Global Gender and Sexuality Studies
- Health and Disability
- LGBTQ Studies
- Self-designed

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Gender, Sexuality, & Women's Studies: Health and Disability Studies, BA

This concentration will be of interest to students who want to explore the intersections between history and health and the ways that disability and health are both shaped by, and experienced in, society. Courses are typically cross-listed with History and Sociology of Science, Sociology, Psychology, and English, but courses from other Departments can be approved on a case-by-case basis.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

For more information: https://gsws.sas.upenn.edu/program/undergraduate-major

Honors

Students with an overall GPA of 3.4 and 3.6 or better in the major are eligible for honors.

Concentrations

Students may select one of five concentrations (https://gsws.sas.upenn.edu/program/undergraduate-major/concentrations/):

- Feminist Studies
- Global Gender and Sexuality Studies
- Health and Disability
- LGBTQ Studies
- Self-designed

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Gender, Sexuality, & Women's Studies: LGBTQ Studies, BA

LGBTQ Studies is a growing field that includes courses offered in Departments and Schools across the University. Students may even wish to do a sub-concentration within this field, for example in the areas of queer cinema studies, queer literature, or queer design. There are also a growing number of courses offered which aim to cultivate LGBTQ literacy in the education and medical fields. The Program is also in the early stages of developing more courses in the field of Trans Studies, and courses taken in this field would count toward this concentration.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Gender, Sexuality, & Women's Studies: Self Designed, BA

This concentration could be met by taking 5 courses within a single field or department, or a combination of departments—such as Politics and Philosophy, or Sociology & Anthropology. Other concentrations might include Media and Communications, History and English, or thematic concentrations that could combine courses in a wide variety of fields such as Performance Studies, Migration Studies, Labor Studies, and so forth. Any self-designed concentration should be determined in consultation with the Associate Director of the program and subsequently approved by the Program's Curriculum Committee. Please note that the title of the self-designed concentration will not appear on transcripts.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

German, BA

The major and minor programs in the Department of Germanic Languages and Literatures provide deep understandings of language and cultures. Building from basic language competency to synthesizing significant literary works, historical context and current media and politics, the program offers a comprehensive education through engaged, active learning in a combination of core courses with a wide range of electives. Your learning experiences can be broadened and applied in study abroad as well as internship programs.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

### Health and Societies: Bioethics and Society, BA

The Health and Societies (HSOC) major examines health and medicine in social context, equipping students with the critical faculties and multidisciplinary skills that will prepare them for careers in public health, health services, and a variety of other arenas. The program is built on the foundation of three core disciplines: anthropology, history, and sociology. Methods and courses from other disciplines and fields—including epidemiology, political science, business/economics, law, environmental studies, and bioethics—supplement the core disciplines and provide majors with the variety of skills necessary to grasp the forces that have shaped our contemporary health landscapes. The Health and Societies graduate is a "multilingual" scholar and citizen, fluent in the methods and perspectives of several social science disciplines—theoretically informed but practically minded, with a global outlook and local experience.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

2 HSOC 2002 Sociological Research Methods is cross listed with SOCI 2000 Sociological Research Methods and HSOC 2202 Health of Populations is cross listed with SOCI 2220 Health of Populations.

Honors Thesis (non-course requirement QST)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Health and Societies: Health Policy & Law, BA

The Health and Societies (HSOC) major examines health and medicine in social context, equipping students with the critical faculties and multidisciplinary skills that will prepare them for careers in public health, health services, and a variety of other arenas. The program is built on the foundation of three core disciplines: anthropology, history, and sociology. Methods and courses from other disciplines and fields—including epidemiology, political science, business/economics, law, environmental studies, and bioethics—supplement the core disciplines and provide majors with the variety of skills necessary to grasp the forces that have shaped our contemporary health landscapes. The Health and Societies graduate is a “multilingual” scholar and citizen, fluent in the methods and perspectives of several social science disciplines - theoretically informed but practically minded, with a global outlook and local experience.

Honors

Applicants must have a minimum GPA of 3.6 in the major and 3.3 overall. Students should complete their capstone paper in the spring of their Junior year or Fall of their senior year and must obtain the support of a faculty advisor before applying for an Independent Study (HSOC 4980) to complete the Honors thesis.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

### Hispanic Studies, BA

The demographic, economic and political realities of the United States, the articulation of a mainstream English culture with an ever-increasing diversity of Hispanic and Latino cultures, and the ongoing forging of strong cultural and economic ties throughout the Americas, have moved Spanish out of the bounds of the category of "foreign" language and culture in the United States. Culture is the controlling category in this field; the program is orientated to the knowledge generated by new disciplines such as cultural studies, new historicism, ethics and postcolonial studies. The major in Hispanic Studies orient itself to the types of knowledge generated by new disciplines such as cultural studies, new historicism, ethics, and postcolonial studies. In order to reflect these changing realities, the Department of Romance Languages has changed the name of its Spanish concentration from "Spanish" to "Hispanic Studies."

Hence, the knowledge of Spanish culture gives students much more than the ability to communicate in the third-most-spoken language of the world. It prepares them to account for an entirely different national, continental and global reality in all its complexity.

Majors in Hispanic Studies are overwhelmingly double majors. This means that they bring to their classes a dialogic perspective that engages in the study of Hispanic cultures informed by interest in other fields such as history, government, sociology, economics, medicine, and law. The richness and depth of these interests make for lively and intellectually rewarding classroom discussions.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

All courses must be at or above the 2000 level.

1 Must be completed in the Department at Penn.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

History of Art, BA
The Major in the History of Art seeks to deepen students’ knowledge of artistic production and practice over the scope of human history, as well as to broaden awareness of the critical and interpretive aims of the discipline itself. Students develop skills in the analysis of works of art, sharpen their understanding of the social, cultural, and personal values embodied by works, and explore the relation of art history to other disciplines. The Department particularly encourages a broad geographic understanding of art production and encourages students to consider the relations and distinctions among different visual cultures.

Students are strongly advised to make an appointment each semester to discuss their progress through the major with the undergraduate chair. Majors are also encouraged to achieve an advanced level of French, German, or other languages as relevant to their subject interests. During their senior year majors may pursue independent research by writing an honors thesis and are invited to become regular participants in the department colloquium series.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

History: American History, BA

The Department of History offers a variety of courses dealing with the political, social, diplomatic, intellectual, economic, and cultural history of the Americas, Europe, Asia, and Africa, from the early medieval period to the present. The department seeks to give undergraduates both specific mastery of particular times, places, and aspects of the human condition and the critical skills to think historically about both long-term and modern phenomena, emphasizing the dynamics of change and continuity over time. The History Department at the University of Pennsylvania has a long tradition of distinction. Beginning as one of the first programs in the United States to offer doctoral study in history, the department continues to pioneer new areas of scholarship. In the last twenty years, faculty members of the departments in American, European, and World history have assumed a leading role in introducing and promoting new varieties of historical research and writing. Today, no other institution surpasses the Penn history department’s coverage of social history or equals the distinction of its faculty in that field.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

8 courses must be taken in History at the University of Pennsylvania.

History: European History, BA

The Department of History offers a variety of courses dealing with the political, social, diplomatic, intellectual, economic, and cultural history of the Americas, Europe, Asia, and Africa, from the early medieval period to the present. The department seeks to give undergraduates both specific mastery of particular times, places, and aspects of the human condition and the critical skills to think historically about both long-term and modern phenomena, emphasizing the dynamics of change and continuity over time. The History Department at the University of Pennsylvania has a long tradition of distinction. Beginning as one of the first programs in the United States to offer doctoral study in history, the department continues to pioneer new areas of scholarship. In the last twenty years, faculty members of the departments in American, European, and World history have assumed a leading role in introducing and promoting new varieties of historical research and writing. Today, no other institution surpasses the Penn history department’s coverage of social history or equals the distinction of its faculty in that field.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

8 courses must be taken in History at the University of Pennsylvania.

For more information: http://www.history.upenn.edu/undergraduate/history-major (http://www.history.upenn.edu/undergraduate/history-major/)

Individualized Major, BA

The College recognizes that there are students who find that the standard majors do not satisfy their academic goals and interests. Thus, the individualized major offers an opportunity for exceptional, creative, self motivated students to explore innovative and multidisciplinary fields of knowledge.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

Applicants must earn a minimum GPA of 3.5.

For more information: https://www.college.upenn.edu/individualized-major

Honors

International Relations, BA

International Relations addresses the ways in which governments, private groups, and individuals relate to each other in the global political and economic systems. The program provides a solid grounding in the methodologies of political science, history, and economics. The curriculum draws on the best courses relevant to world politics, offers a well-rounded liberal arts education, and helps prepare students for law or business school, Ph.D. programs, and international careers.
The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

### International Studies, BA

This major is ONLY available to students in the Huntsman Program in International Studies and Business.

The flexible design of the Huntsman curriculum allows students to graduate in four years with a Bachelor of Arts in International Studies (from the College of Arts & Sciences) and a Bachelor of Science in Economics (from Wharton). Students take business fundamentals courses in the Wharton School, and also complete coursework in the humanities and social sciences by completing the College's general education curriculum, while completing the International Studies major that includes advanced language.

International Studies is a major in the College of Arts and Sciences that is unique to the Huntsman Program; non-Huntsman students may not major in International Studies. The interdisciplinary nature of the International Studies major means that each Huntsman student is able to personalize his or her curriculum, and no two Huntsman students will have the exact same educational experience.

For more information: https://huntsman.upenn.edu/international-studies-major/

### Italian Studies: Italian Culture, BA

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

For more information: [http://www.sas.upenn.edu/italians/undergraduate/requirements](http://www.sas.upenn.edu/italians/undergraduate/requirements/)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

Jewish Studies, BA

The Jewish Studies Program provides an opportunity for students to study the Jewish experience from several perspectives including: language (Hebrew, Yiddish, and Ladino), literature in the original languages and in translation, the history and culture of the Jewish people from Biblical Israel to 21st-century America and modern Israel, the exploration of Jewish law, and the roles of gender and sex in Judaism. Students may specialize in Jewish Studies through a major or a minor, or though one of the following concentrations: Jewish History within the History Department, Hebraica/Judaica within the Department of Near Eastern Languages & Civilizations, and Judaism within the Department of Religious Studies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Latin American & Latinx Studies, BA

The Latin American and Latinx Studies (LALS) Program offers an interdisciplinary major and minor to study the history, arts, languages, cultures, societies, politics, and/or regional organizations of Latin American and Caribbean countries as well as Latinx communities and individuals in the United States. With courses offered across many departments in the School of Arts and Sciences, in study abroad programs taught throughout Latin American cities, and with academically based community service courses with Latinx organizations in the Greater Philadelphia area, the LALS major and minor afford our students a very comprehensive approach to Latin American and Latinx Studies as well as the possibility of a flexible curriculum, where students can pursue and combine their academic interests.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

Students must satisfy the Language Requirement in Spanish or Portuguese. Language courses under 2198 may not be counted.

For more information: https://lals.sas.upenn.edu/undergraduate/major-requirements/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

Linguistics, BA

The Linguistics Program is intended to acquaint students with the methods and findings of the scientific study of human language and its relationships to cognition, society, and history. It serves as a preparation for graduate training in linguistics or related areas, and as part of a rigorous general education. Linguistic training is relevant to work in anthropology, philosophy, psychology, and language and literature, as well as to careers in such fields as education, computer science, and law. Founded by Zellig Harris in 1947, the Penn Linguistics Department is the oldest modern linguistics department in the United States. We have outstanding programs in the core disciplines of syntax and phonology, as well as in sociolinguistics, semantics, discourse, historical linguistics, phonetics, and psycholinguistics. Penn is also the home of the Linguistic Data Consortium (LDC), a compiler and distributor of linguistic materials for language engineering research. The graduate group in Linguistics at the University of Pennsylvania is an interdisciplinary team of faculty from the Department of Linguistics and related departments. Our program has strong concentrations in several areas and a tradition of collaboration among its faculty.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

For more information: http://www.ling.upenn.edu/

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy/).

2 May be satisfied by any Linguistics courses or relevant courses from other departments with approval from the Undergraduate Chair.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Honors

Required: A minimum overall GPA of 3.0 and 3.5 in Major-related courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Logic, Information, & Computation, BA

Modern mathematical logic began with work by Cantor, Frege, and other mathematicians during the last three decades of the nineteenth century who were concerned with providing a sound basis for the development of mathematical analysis. In the wake of "the crisis in the foundations of mathematics" precipitated by the discovery of various logical paradoxes at the turn of the twentieth century, mathematicians and philosophers such as Hilbert and Russell intensively pursued investigations into the logical foundations of mathematics. Connections between logic and the foundations of mathematics remained an important source for scientific developments in logic through the epochal results of Gödel in 1930 and 1931, which indicated both the scope and limits of the mechanization of mathematical reasoning. The great burst of scientific activity occasioned by Gödel's results led directly to Turing's mathematical characterization of mechanical computation in terms of simple devices, now known as Turing machines. The work of Gödel, Turing, and other logicians during the 1930s laid the scientific foundations for the revolution in computer and information technology that began in the last half of the twentieth century and continues today.

The Logic, Information, and Computation Program offers students the opportunity to engage in a systematic, integrative program of study within the School of Arts and Sciences. Logic remains one of the core disciplines in investigations of information and computation. Indeed, logic is playing a major role in advances in computer security, database technology, networking, and software engineering. Moreover, logic has expanded its role within mathematics beyond foundational studies and now enjoys rich connections with areas as diverse as algebra, analysis, and combinatorics. In light of the current importance of the investigation of computation and information from both a scientific and technological point of view, the Major and Minor in Logic, Information, and Computation will provide students with a strong background to pursue computational aspects of the natural, biological, and social sciences and prepare them for careers in information technology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

Honors

Applicants must have an overall GPA of 3.0 and a GPA of 3.5 in the Major. Senior research project required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Mathematical Economics, BA

Economics is a social science and, as such, an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are the following:

- The determination of prices and quantities in various types of markets, from perfectly competitive commodity markets to highly regulated utility markets and internet auctions.
- The effects of taxes, subsidies, and regulations.
- The determination of aggregate economic activity (e.g., GDP, unemployment).
- Inflation, monetary policy, and financial intermediation.
- Economic growth and income distribution.
- International trade and international finance (e.g., exchange rates).

The Mathematical Economics Major is intended for students with a strong intellectual interest in both mathematics and economics and, in particular, for students who may pursue a graduate degree in economics. Advanced economics makes extensive use of formal mathematical models. The major introduces undergraduate students to rigorous theoretical-quantitative and empirical-quantitative approaches to the analysis of economic problems. In comparison to the Economics Major, the Mathematical Economics Major emphasizes a more formal mathematical analysis, preparing students for academic-style research in economics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

**ECON Electives**
Select 3 courses from the following disciplines:

3

### Econometrics

- ECON 2310 Econometric Methods and Models
- ECON 4310 Macro-Econometric Techniques and Applications
- ECON 4320 Micro-econometric Techniques and Applications
- ECON 4330 Econometric Machine Learning Methods and Models
- ECON 4340 Empirical Economics of Climate Change
- ECON 7300 Econometrics I: Fundamentals

### Macroeconomics

- ECON 4200 Economic Growth
- ECON 4210 Numerical Methods for Macroeconomists
- ECON 4220 Monetary and Fiscal Policies
- ECON 4230 Macro-Modeling
- ECON 4240 Money and Banking
- ECON 4520 International Finance
- ECON 4530 Topics in Development

### Microeconomics/Game Theory

- ECON 4120 Social Choice Theory
- ECON 4100 Game Theory
- ECON 4110 Economics of Family
- ECON 4120 Social Choice Theory
- ECON 4130 Market Design
- ECON 4140 Decision Making Under Uncertainty
- ECON 4150 Mathematical Economics
- ECON 4405 Economic Program Evaluation
- ECON 4410 Public Finance
- ECON 4420 Political Economy
- ECON 4430 Labor Economics
- ECON 4440 Law and Economics
- ECON 4450 Industrial Organization
- ECON 4460 Health Economics
- ECON 4470 Urban Fiscal Policy
- ECON 4480 Economics of Education
- ECON 4490 The Digital Economy
- ECON 4510 International Trade
- ECON 6110 Game Theory and Applications

### Independent Studies

- ECON 4999 Independent Study

---

At most one independent study (ECON 4999) can substitute for a 2000-level course in the major. Students wishing to enroll in an Independent Study must have their outline approved and be enrolled prior to the end of the Add Period. No Independent Studies will be accepted afterwards.

### Total Course Units

36

---

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy/).
2. Students intending to major in Mathematical Economics are encouraged to take MATH 1610 Honors Calculus and to consider MATH 2600 Honors Calculus, Part II.
3. NOTE: These MATH and ECON courses count toward the MATH and ECON electives.
4. If ECON 2300 Statistics for Economists is taken, one additional ECON or MATH course from the following: MATH 5460 Advanced Applied Probability, ECON 2310 Econometric Methods and Models, ECON 4310 Macro-Econometric Techniques and Applications, or ECON 4320 Micro-econometric Techniques and Applications.
5. LPS academic year courses require approval of Undergraduate Chair EXCEPT for ECON 0100 Introduction to Micro Economics & ECON 0200 Introductory Economics: Macro.
6. ECON 0100 Introduction to Micro Economics and ECON 0200 Introductory Economics: Macro are prerequisites for all economics courses. ECON 0100 Introduction to Micro Economics is the prerequisite for ECON 0200 Introductory Economics: Macro.
7. ECON Course Required if BEPP 1000 Introductory Economics for Business Students is taken.
8. Requires the permission of the instructor. Please contact the instructor and be prepared to share information about the ECON and MATH courses you have taken and the grades that you have obtained in these courses. Based on this information, the instructor will determine whether the course is suitable for you.

### Honors

Applicants must have a minimum GPA of 3.5 and an A- or better in 3 graduate level courses that count toward the major. Approved courses may be chosen from the list of Mathematical Economics electives:

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Mathematics: Biological Mathematics, BA

At the core of modern theoretical science, mathematics has historically provided an expressive language and a theoretical framework for advances in the physical sciences. It has since become central in the life and social sciences and in computer science. Mathematics at Penn embraces traditional core areas of mathematics and developing areas (Penn is one of the world’s leading centers in the application of logic to theoretical computer science). The goals of the major program are to assist students in acquiring both an understanding of mathematics and the ability to use it. The mathematics major provides a solid foundation for graduate study in mathematics and a background for study in economics, the biological sciences, the physical sciences, and engineering, as well as many non-traditional areas.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

Majors and prospective majors: Please email majoradvisor@math.upenn.edu. You will be assigned to one of the Math Major Advisors who will discuss your current and future plans with you. It is important that you see this advisor at least once per semester thereafter.

Below is a planning tool that is meant to help you but does not replace the web and advisor visit requirements.

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

Total Course Units  33

¹ You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy/).
² Number of elective course units will vary based on the manner in which other requirements are fulfilled. Please consult your math major adviser when choosing math electives and cognates.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Modern Middle Eastern Studies, BA

The interdisciplinary Modern Middle Eastern Studies degree is designed to allow students to specialize in the Middle East as a region of the world and human experience by combining course work using both...
social scientific and humanistic approaches, underpinned by relevant language skills. Students will work with faculty committed to supporting interdisciplinary, applied, research-oriented advanced study. The major gives students opportunities to work on problems of politics, policy, history, ideology, social thought, economic development, and international relations.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/mec/programs/mmes (https://www.sas.upenn.edu/mec/programs/mmes/)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

Honors

Candidates must have a minimum overall GPA of 3.3 and a GPA of 3.7 in the major.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Music, BA

The music major is founded on a balance in the core training between the fields of music history, ethnomusicology, theory, and composition. Through a series of requirements, you will acquire a foundation that introduces you to the sheer range of musical traditions available for study and to a series of specialist skills and tools that facilitate and deepen that study.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34.0. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/music/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

Applicants must have completed one Guided Reading course, have a G.P.A. of 3.5 or higher, and complete a research paper.  

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages & Civilizations: Ancient Near East, BA  
The major in Ancient Near East examines the languages, history, cultures, and archaeology of the Ancient Near East: from Prehistory through the early complex of civilizations in Mesopotamia, Egypt, and Levant. Because of the interdependence of language and culture an emphasis of the major is gaining facility of one or more ancient languages, alongside courses in history, religion, and archaeology.  
The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.  
For more information: https://nelc.sas.upenn.edu/undergraduate/major (https://nelc.sas.upenn.edu/undergraduate/major/)
language, alongside courses in history, literature, and cultures of the medieval and modern Middle East.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

For more information: https:// nelc.sas.upenn.edu/undergraduate/major

### Near Eastern Languages & Civilizations: Arabic & Islamic Studies, BA

Arabic and Islamic Studies focuses on languages and cultures of the wider Middle East in the context of Islamic Civilization. Because of the interdependence of language and culture, a primary emphasis is on gaining mastery of Middle Eastern languages such as Arabic, Persian, and Turkish, alongside coursework in history, religion, and culture.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

For more information: https:// nelc.sas.upenn.edu/undergraduate/major

### Honors

**Required**: A minimum overall GPA of 3.0 and a GPA of 3.5 in major related courses.
Near Eastern Languages & Civilizations: Cultures and Societies of the Middle East and North Africa, BA

NELC’s Cultures and Societies of the Middle East and North Africa is an interdisciplinary major which allows students to explore broadly the cultures, societies, religions, and literary and visual traditions of the greater Middle East. The geographical scope of this major includes: Arabia, the Levant, Mesopotamia, Iran and the Persianate world, Egypt and the Nile Valley, North Africa (including the Maghreb), and Asia Minor (including present-day Turkey). This major encourages students to develop an understanding of deep continuities through time, and close connections among the cultures of the region and adjacent areas. The major also promotes the humanistic study of Middle Eastern societies across ancient, medieval and modern periods — something that no other majors currently do — while exposing students to the current methodologies and breadth of scholarship in Near Eastern studies at Penn.

Because this concentration does not include language coursework, and does not contribute towards the University’s Language Requirement, the major consists of 12 CU. Students pursuing this major must complete the department’s foundational courses: NELC 0001 (Introduction to the Ancient Near East) and NELC 0002 (Introduction to the Middle East). Additionally, students must complete a breadth requirement consisting of one introductory to intermediate course in each of the following areas: the Ancient Middle East; Hebrew and Judaic Studies; Societies and Cultures of the Islamic World; and the Modern Middle East. To gain grounding in methodology two credits must cover literary or visual cultures and methodologies used to study them (such as NELC 0102, Reading Ancient Mesopotamia, or NELC 0700, Iranian Cinema: Gender, Politics, Religion). The remaining electives (3 CU) should consist of intermediate to advanced coursework in the student’s area of primary interest. To develop experience in researching and writing substantial analytical essays, during their senior year, students must complete a concentration paper within a NELC class in consultation with their Major Advisor.

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum page.

Near Eastern Languages & Civilizations: Hebrew & Judaica, BA

The major concentration in Hebrew and Judaica explores the development of Hebrew culture from the Biblical through Rabbinic and Medieval Periods through modern times. Because of the interrelationship between language and culture an emphasis is placed on gaining facility in the use of Hebrew language alongside courses in history, culture, literature, and religion of Judaism.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://nelc.sas.upenn.edu/undergraduate/major (https://nelc.sas.upenn.edu/undergraduate/major/)

### Neuroscience, BA

Neuroscience (formerly Biological Basis of Behavior) is an interdisciplinary program in which students explore the relationship between behavior (both human and animal) and its organic bases. The Program offers courses in virtually all areas of neuroscience ranging from cellular neurobiology to cognitive neuropsychology and integrates these basic interdisciplinary courses with basic science requirements in biology, chemistry and psychology. Students also engage in supervised research in areas as diverse as molecular neurobiology, chemical neuroanatomy, visual sciences and behavioral ecology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

Nutrition Science, BA

Jointly sponsored by the College of Arts and Sciences and the School of Nursing, the second major in Nutrition Science builds on a student’s basic science skills with a deep dive into the science of nutrition. Linkages of nutritional compounds and dietary approaches with health and disease, novel approaches to the study of nutritional impact on health, and future avenues of exploration in the field are examined. Elective courses in anthropology, biology, economics, physiology, psychology, health care, and public policy provide a rounded context for the study of nutrition science.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.nursing.upenn.edu/nutrition-major/

³ 3 course units count as 2 for this major.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Philosophy, Politics and Economics: Choice & Behavior, BA

Philosophy, Politics and Economics allows undergraduates to study a variety of comprehensive analytical frameworks that have been developed to understand and justify political and economic structures, particularly constitutional democracy and the market system. The program prepares its graduates for careers in public policy, public services, business, and law among others.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

**Philosophy: General Philosophy, BA**

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into value theory (ethics, politics, aesthetics) and theoretical philosophy (epistemology,
metaphysics, mind, and logic). The four concentrations available within the major allow students to emphasize different sets of questions.

The General Philosophy Concentration requires a balanced selection of coursework from within both practical and theoretical philosophy as well as the history of these enterprises.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

### Physics: Astrophysics, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration is particularly appropriate for students planning to attend graduate school in Astrophysics. In addition to core Physics courses, students choose from a selection of courses in Astronomy and Astrophysics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.physics.upenn.edu/

### Physics: Biological Science, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths
in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration reflects increasing contributions of physicists (including members of our faculty) to implications of Physics to Biological Sciences. Undergraduate students choosing this concentration will prepare themselves for careers in scientific research or professional Medical Physics programs that have been instituted at Penn and other universities, among other possibilities.

The proposed concentration is distinct from the existing Biophysics Major, although the two share several required courses. The Biophysics Major requires much more chemistry, making it appropriate for students interested in protein science and other topics within the well-established field of Biophysics. The Physics major with a Concentration in Biological Science targets students with interests in the emerging field of Biological Physics, where researchers directly apply physical concepts and techniques to investigate biological systems; the emphasis is on developing new insights regarding biological systems from a perspective strongly rooted in Physics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.physics.upenn.edu/

**Physics: Business & Technology, BA**

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration is particularly appropriate for students whose ultimate goal is a career in modern industry involving both technical and managerial components. A student choosing this concentration will
have a solid background in Physics, be comfortable with electronics and computers, and have some appreciation of modern business methods and economics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

**Physics: Chemical Principles, BA**

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration is particularly appropriate for students planning to enter the health professions. Such students should be aware that, although not part of the concentration requirements, laboratories in general and organic chemistry and lecture and laboratory work in biology are generally required by professional schools in the health area. The concentration may also be appropriate for other students pursuing double majors in Physics and Chemistry or Biochemistry.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

**Note:** For Biology concentration, see Biophysics track outlined below.

Political Science: American Politics, BA

Political Science explores systematic approaches to understanding politics. Students may choose to take a general approach to the subject or pursue a concentration in the sub-fields of American politics, comparative politics, international relations or political theory. In addition students may select a world region for an area studies concentration. The Political Science Department's course offerings span the discipline of political science, from American political institutions, to the politics of world regions, the emergence of a new international order, and recent and ancient political ideas. The Department's curriculum is divided into the four standard fields of American politics, comparative politics, international relations, and political theories. There are also other opportunities for study in political processes of elections and communications and public policy.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

A minimum of 9 course units in Political Science are required, of which 6 must be taken in the Political Science Department at the University of Pennsylvania (includes Washington, DC Semester). See Major Program Booklet for Transfer and AP credit restrictions.

For more information: http://www.sas.upenn.edu/polisci/content/undergraduate-program/

**Political Science: International Relations, BA**

Political Science explores systematic approaches to understanding politics. Students may choose to take a general approach to the subject or pursue a concentration in the sub-fields of American politics, comparative politics, international relations or political theory. In addition students may select a world region for an area studies concentration. The Political Science Department's course offerings span the discipline of political science, from American political institutions, to the politics of world regions, the emergence of a new international order, and recent and ancient political ideas. The Department's curriculum is divided into the four standard fields of American politics, comparative politics, international relations, and political theories. There are also other opportunities for study in political processes of elections and communications and public policy.

The minimum total course units ([https://www.college.upenn.edu/credits-needed-major/](https://www.college.upenn.edu/credits-needed-major/)) for graduation in this major is 32. Double majors may entail more course units.

A minimum of 9 course units in Political Science are required, of which 6 must be taken in the Political Science Department at the University of Pennsylvania (includes Washington, DC Semester). See Major Program Booklet for Transfer and AP credit restrictions.

---

**Psychology, BA**

Studies in psychology introduce students to contemporary understandings of how organisms perceive, learn, think and interact with one another, how they develop, how they are motivated and how, individually and as members of species, they may be compared with one another. Psychology at Penn is a diverse discipline, with topics ranging from neuroscience to psychopathology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

A minimum GPA of 2.0 is required.

6 course units of Psychology courses must be taken at the University of Pennsylvania.

For more information: https://psychology.sas.upenn.edu/penn-undergraduate-psychology (https://psychology.sas.upenn.edu/penn-undergraduate-psychology/)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

*Research Experience*
### Religious Studies, BA

Religion is a complex network of ideas and actions (ethical and ritual) that express a group’s sense of ultimate meaning of life. The academic study of religion examines how the beliefs and values of contemporary and historical cultures shape and are shaped by societal factors, long-standing traditions, and distinctive forms of literary and artistic expression.

Because of the multi-faceted nature of the subject matter, the University of Pennsylvania’s Religious Studies major program of study is open to students looking to tailor their educational experience to fit with their own personal and academic areas of interest. Each undergraduate who wishes to major in Religious Studies will meet with the Chair of the Department prior to claiming the major to discuss their desired coursework and create an individualized plan of execution.

As our core faculty shares research foci and skills in the study of material culture (art, manuscripts, archaeology, inscriptions, and other primary historical sources), we are well-suited to lead serious students in intensive research to better prepare them for graduate study which requires research and evaluation skills.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

For more information: [https://www.sas.upenn.edu/religious_studies/undergraduate/major/](https://www.sas.upenn.edu/religious_studies/undergraduate/major/)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

### Romance Languages: French and Italian, BA

The Dual Romance Languages Major allows students to pursue advanced course work across two Romance Languages: French, Spanish, and/or Italian. It is an 18-credit major, with nine advanced courses in each language. Interested students should contact the Undergraduate Coordinator or the appropriate undergraduate chairs for more information and guidance.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

Students are required to meet with the appropriate undergraduate chairs prior to beginning course work. Study Abroad courses must be pre-approved by the Undergraduate Chair to count for the major.

**For more information:** http://ccat.sas.upenn.edu/roml/

The Dual Romance Languages Major allows students to pursue advanced course work across two Romance Languages: French, Spanish, and/or Italian. It is an 18-credit major, with nine advanced courses in each language. Interested students should contact the Undergraduate Coordinator or the appropriate undergraduate chairs for more information and guidance.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

Students are required to meet with the appropriate undergraduate chairs prior to beginning course work. Study Abroad courses must be pre-approved by the Undergraduate Chair to count for the major.

For more information: http://ccat.sas.upenn.edu/roml/

The major in Russian and East European Studies provides a program of study that enables a broad multi-disciplinary and multi-cultural understanding of the languages, literatures, cultures, histories, and societies of Russia, Central and Eastern European, and the Balkan and Baltic regions. For the language requirement, students can choose any regional language offered at Penn (i.e. Bosnian/Croatian/Serbian, Hungarian, Polish, Russian, Ukrainian) or in which they can demonstrate an equivalent proficiency. In addition to linguistic flexibility, the major allows students to pursue their specific disciplinary interests through three concentrations: Language, Literature, and Culture; History, Politics, and Society; and Cinema, Arts, and Letters. Majors are encouraged to complete a summer or semester abroad to gain first-hand understanding of the communities they study and to advance their language competency. The major offers an honors option.

Knowledge of Russian and East European languages and cultures is a marketable and impressive skill, whether you are in academia, arts, law, medicine, governmental service, public interest, business, or politics. Russian and East European majors and minors land jobs in a variety of settings. They go on to work in business as financial and policy analysts for American and foreign companies. They work for NGOs, publishing houses, or the media. They teach abroad and consult in marketing, advertising, aerospace, or computer engineering. And, of course, some work as educators in universities and schools and as employees of the US government.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://ccat.sas.upenn.edu/Slavic (http://ccat.sas.upenn.edu/slavic/)

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Russian and East European Studies: Cinema, Arts and Letters, BA

Applicant must have a minimum GPA of 3.5 in the major and a GPA of 3.3 overall. Only one of the courses below needs to be taken, and it must be taken in the Department at Penn.

| Total Course Units | 32 |

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy/).
2. Students take seven REES courses* with cinema studies, art history, and literature content. 4000-level or 5000-level (or equivalent) content-based language courses may be counted towards this requirement. * Note that some REES courses (defined as those with RUSS and EEUR course numbers) are offered through Penn Language Center (PLC) (http://plc.sas.upenn.edu/)
3. Chronological, Disciplinary, and Geographical requirements must be met with concentration and free elective courses.
4. Because the language of cinema in this part of the world is deeply historical and cultural, students must take at least one broad survey course that covers the period before 1800, one that covers the period before 1900 and one that covers the period after 1900 to fulfill the Chronological Distribution requirement.

---

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy/).
2. Must be taken in the Department at Penn.
3. At least 2 course units must be taken in the Department at Penn.
Students must take at least one course with cinema studies content, one course with art history content, and one with literature content to fulfill the Disciplinary Distribution requirement.

## Honors

Applicants must have a minimum overall 3.3 and a GPA of 3.6 in the major.

**Science, Technology and Society: Global Science and Technology, BA**

Science, Technology & Society (STSC) examines the social contexts in which science and technology occur, the organizations of people and things that make up science and technology systems, and the social and cultural consequences of scientific and technological change over time. In a wide array of courses, STSC majors explore the relationship between scientific knowledge, technological innovations, technological systems, and society past and present.

This program equips students with sophisticated critical faculties, multidisciplinary skills and wide knowledge that enables our graduates to go into business, law, government, journalism, research, and education. STSC provides a foundation for citizenship in a globalizing, diversifying world with rapid technological and scientific change.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

Sociology: Applied Research and Data Analysis, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Sociologists pursue knowledge in many ways, one of which is through the examination of society through surveys, demographic data, and statistical models. In this concentration, students will become familiar with quantitative and/or qualitative methods in sociology, both with respect to how to use them in general and how they are applied for specific topics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

Sociology: Cities, Markets, and the Global Economy, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.
professionally under the large-scale mission of the College of Arts & Sciences.

Neighborhoods, cities, and metropolitan areas are communities defined by geographic, economic, legal, political, cultural, and social boundaries. This concentration allows students to advance their knowledge on the intersection of these elements, the impact they have on populations and what is considered a "market," and the resulting economic impact on a global scale.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

### Sociology: Culture and Diversity, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

This concentration investigates the aspects of human life central to its definition, origins, and development of meaning, as well as how diversity within and resulting from these aspects impacts everyday society.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

The Education and Society concentration in Sociology gives Penn undergraduates the opportunity to engage the sociological imagination as they consider pertinent issues in education; from its role in stratification and cultural reproduction to its consideration as an engine of social mobility and a marker of privilege. Through this analysis of education, students will be able to approach jobs in elementary, secondary, and postsecondary institutions with a critical understanding of the impact of these institutions on the populations they serve and don’t serve. Alternatively, students can leverage the academic training within this concentration to approach a wide array of careers related to educational policy.

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum/) page.

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

The family is one of the most important institutions in any society. It is critical to the socialization of each generation and to the stability and functioning of the larger society. Family systems vary across cultures and have changed dramatically in the United States in recent decades. Our understanding of gender plays an important role in this. This concentration enables students to study this intersection between family and gender, and the impacts it has on society through aspects such as fertility, marriage, divorce, migration, and mortality.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

Sociology: Law and Society, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Sociologists study institutions, and among the most important is the law. This concentration examines issues such as: What is deviance and how do we define it? What is the relationship between the law and other social institutions? The concentration is suitable for students with a variety of interests, but may be especially well-suited to those interested in careers in law and criminal justice.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sociology: Medical Sociology, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Conceptions of health and illness, although not uniform the world over or even in any one society, are of fundamental importance in every society. In this concentration, students focus on the following topics: How health is defined in various societies; how the ill are viewed by the well; how illness is treated; who the healers are, how they are trained, and what their position is in society, the relationships among the religion, class,
gender, and age of the ill and their healers; and when and how public health policies are inaugurated.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

What is the balance of individual self-determination and institutionalized constraint in shaping people's lives? Social institutions such as the educational system and the economy sort people and distribute rewards, but their workings are profoundly shaped by persistent inequalities of class, ethnicity, gender, age, race, and nationality. How and why do such inequalities persist? How might opportunities be more fairly distributed? What sorts of individual and collective action affect existing structures of constraint?

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

South Asia Studies, BA

South Asia Studies is an interdisciplinary field focusing on the history, languages, society, literature, and art from India, Pakistan, Bangladesh, Nepal, Sri Lanka, Afghanistan, and Bhutan. We are America’s oldest and arguably most distinguished South Asia regional studies program dealing with the past and contemporary life of one-fifth of the world’s population and teaching more languages than any other South Asian studies program in the US. Having a deep knowledge of the country set to outpace the US as the second largest economy in the world in an increasingly competitive global job market gives graduates a competitive edge over others with more generic skills. Make your home in a department where you get to know your Faculty and they know you as an individual, whether as a major or double major. You don’t have to know anything about India or be South Asian to find a home with us; just be curious!

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://www.southasia.upenn.edu/undergraduate (http://www.southasia.upenn.edu/undergraduate/)

Theatre Arts, BA

The Theatre Arts program focuses on all intellectual and creative aspects of theatre and performance studies. Our courses link academic approaches to the theatre such as the study of dramatic literature, theory, history, and criticism, to practical aspects of performance such as acting, directing, designing, devising, and playwriting. Special features of our program include faculty-directed productions, which are taught as courses for credit, and extracurricular programs such as workshops and talks with visiting artists, staged readings, and theatre outings. One special highlight of our program is the Edinburgh Project. On alternating years, majors are selected to enroll in a course that develops a performance piece that travels to the Edinburgh Festival Fringe in Scotland. The honors thesis is another special opportunity in which majors who are accomplished in both academic and production work are invited to work on honors thesis projects, which may be based on practice such as acting, directing, and design or on scholarly research.

Penn Theatre Arts graduates proceed to a wide array of successful careers, both in and out of the theatre. Our majors are well-prepared to enter professional MFA programs in acting, directing, or design, as well as doctoral programs. We also count among our alumni not only those who are successful in theatre and film as artists, producers, and business people, but also those who flourish in unrelated fields, such as medicine and law.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 33. Double majors may entail more course units.

For more information: http://theatre.sas.upenn.edu

Urban Studies, BA

Urban Studies students are interested in making a difference and connecting to real world issues. To do this well, students learn about urban history and current challenges. They come to understand how policy at the national level and global economic trends affect what we see at the local, even neighborhood level. In a broad, theoretical sense, the central intellectual frame of Urban Studies is about understanding people and place at different spatial scales. Individuals, groups, and public officials make decisions and design policy that in turn affects how people and resources are distributed in space and defines what kinds of places result. Urban Studies students take this understanding to explain the conditions of urban places and work towards creating places that foster equity, better health outcomes, environmental sustainability, and a better quality of life. In addition to urban studies coursework and coursework in a disciplinary concentration, all of our students complete an internship for credit and carry out an original research project.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 34. Double majors may entail more course units.

Urban Studies is a flexible major and requires conferring with an advisor to tailor a set of courses that fit your interests. This online worksheet is meant as a planning tool; before you will be accepted to the major, you are required to meet with an Urban Studies advisor to go over your plans and address your questions.

Visual Studies: Architecture Practice and Technology, BA

Visual Studies at the University of Pennsylvania prepares students to forge innovative connections across the disciplines that study vision and images. Students acquire a critical awareness of seeing and the problems and possibilities for investigating, thinking, and writing about seeing in the 21st century. Fundamentally interdisciplinary, the Visual Studies Program partners with the Departments of Philosophy, Psychology, History of Art, Fine Arts, and Architecture. Students may also find interest in Penn Programs such as Cinema Studies and Gender, Sexuality, and Women's Studies or outside of the School of Arts and Sciences in the Annenberg School of Communication, and the School of Engineering and Applied Science.

Sector C enables students to develop skills in the making of art ranging from the two- and three-dimensional to digital and time-based media, and includes both fine arts and architecture tracks.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major/) for graduation in this major is 36. Double majors may entail more course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Visual Studies at the University of Pennsylvania prepares students to forge innovative connections across the disciplines that study vision and images. Students acquire a critical awareness of seeing and the problems and possibilities for investigating, thinking, and writing about seeing in the 21st century. Fundamentally interdisciplinary, the Visual Studies Program partners with the Departments of Philosophy, Psychology, History of Art, Fine Arts, and Architecture. Students may also find interest in Penn Programs such as Cinema Studies and Gender, Sexuality, and Women's Studies or outside of the School of Arts and Sciences in the Annenberg School of Communications, and the School of Engineering and Applied Sciences.

In Sector A, students learn about the physiology and psychology of seeing; perception of color, movement, space, objects, and events; and issues in philosophy of vision from ancient to contemporary.

Actuarial Mathematics, Minor

Actuarial Science stands at the intersection of risk and money. Actuaries use their knowledge of mathematics and probability theory to define, analyze and solve complex business, financial, and social problems. Actuaries evaluate individual and corporate risks, and design financially sound insurance and pension plans. Graduates from the University of Pennsylvania with an Actuarial Mathematics Minor are expected to be in great demand by the insurance and banking industry.

Africana Studies, Minor

Africana Studies is an interdisciplinary field of study devoted to the critical and systematic examination of the cultural, political, social, economic, and historical experiences of African Americans, Africans, and peoples of African descent around the world. Our course of study is designed to provide students with an integrated understanding and appreciation for a new global black studies. An undergraduate degree in Africana Studies prepares students for graduate work in the humanities, social sciences, and professional schools, as well as a range of careers in teaching, business, public service, and the arts, among others.

For more information: https://africana.sas.upenn.edu/department/undergraduate

African Language courses do not count toward the Minor Requirements.

American Public Policy, Minor

The minor in American Public Policy enables undergraduates interested in American Public Policy to construct an integrated program across the University. The minor — for students who do not major or concentrate in PSCI or BEPP — requires six courses, three from each department, in addition to the course work required for their major or concentration.

American Sign Language and Deaf Studies, Minor

The ASL/Deaf Studies Program at Penn offers ASL instruction grounded in Deaf cultural experiences and perspectives for the purpose of attaining ASL proficiency for real-world applications in both coursework and future professional endeavors. The course of study for the minor in ASL and Deaf Studies is interdisciplinary, with foundations in language, content, and theory-based courses. Furthermore, as our program has long-standing and steadfast commitment to working in and with local Deaf community organizations for meaningful, mutually beneficial outcomes, we partner with local Deaf community organizations to integrate academic rigor and Deaf cultural values into our coursework. We do so with two organizations primarily, the Deaf-Hearing Communication Centre in Swarthmore, PA and Pennsylvania School for the Deaf in the Germantown section of Philadelphia. Ultimately, these collaborative relationships manifest in a research-based capstone course, Academically Based Community Service in ASL and Deaf Studies, providing opportunities for merging research with practice in a Deaf community setting.

Ancient History, Minor

Classical Studies encompasses the civilization of the ancient Greeks and Romans from prehistory to the Middle Ages, with emphasis on the literature, philosophy and history of the classical Greek and Roman periods. It includes economic, political and social and intellectual history as well as philosophy, archaeology, religion and myth. Students may choose a track that emphasizes the study of texts in Greek and/or Latin, or they may opt for a program of courses that do not require any knowledge of the ancient languages.

Anthropology, Minor

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. The Anthropology minor is a 6 credit minor, in which students are encouraged to draw from all sub-fields of the discipline.

1 No more than 4 courses from any one field (Cultural/Linguistic, Archaeology, Human Biology) can be applied to the minor.

Archaeological Science, Minor

The Minor in Archaeological Science consists of six course units. Of these six, four will be CAAM classes from introductory, intermediate and advanced levels; one must be an advanced class with an archaeological science research component (the capstone class); and one must be a class in the archaeology or culture of a relevant area.

To Declare:

Students interested in declaring a Minor in Archaeological Science should contact Dr. Marie-Claude Boileau at mboileau@upenn.edu.

For more information: https://www.penn.museum/teachers-and-students/for-penn-students/caam/minor-in-archaeological-science/

Architecture, Minor

The minor in Architecture is for students with another major who seek to gain a basic knowledge of architecture and acquire basic skills in architectural design.

For more information: www.architecture.sas.upenn.edu (http://www.architecture.sas.upenn.edu)
### Asian American Studies, Minor

Asian American Studies explores the historical and contemporary experiences of Asian immigrants and of persons of Asian ancestry in North America, and the relevance of those experiences for understanding race and ethnicity in national and global contexts. The program introduces students to the methods and concerns of a wide spectrum of disciplines: anthropology and ethnography, economics, history, law, literature, sociology and demography, political science, and urban studies, as well as creative and expository writing.

### Bioethics, Minor

The Penn Bioethics minor is designed to give students a broad overview of the methods, core content areas and central ethical questions in the field of bioethics. The Bioethics minor is an interdisciplinary program created through a collaboration of the Departments of Anthropology, History and Sociology of Science, Philosophy, Political Science, and Sociology in the College of Arts and Sciences, and Medical Ethics & Health Policy in the Perelman Medical School.

### Biology, Minor

The Biology minor introduces students to fundamental topics in the areas of cell and molecular biology, genetics, physiology, and ecology and evolution. This broad range of coursework is designed to provide students with a sufficient background to understand the basics underlying many of the current advances in the field.

Total Course Units 9

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biophysics, Minor

Bridging the biological sciences and the physical sciences, Biophysics is concerned with physical and chemical explanations of living processes, especially at the cellular and molecular levels. Detailed molecular descriptions are emerging for genetic elements and for the mechanisms that control their propagation and expression. Biophysical studies include the investigation of protein structure, nucleic acid structure, enzyme mechanisms, the phenomena underlying cellular behavior, excitable phenomena in nerve, muscle and visual cells, and integrative neural phenomena.

For more information: http://www.physics.upenn.edu/biophysics/biophpages/Minor.html

Chemistry, Minor

Chemistry is concerned with the study of matter and the changes matter can undergo. The chemistry program provides a basic foundation for career opportunities in chemical research and teaching, in scientific communication and information transfer, and in the health professions.
The chemistry minor provides an introduction to several areas of chemistry, providing exposure to both lecture and laboratory courses.

For more information: http://www.chem.upenn.edu/node/9

Cinema and Media Studies, Minor

The Penn Cinema and Media Studies major and minor are traditional humanities programs involving the critical study of film and media history, theory, and aesthetics. Reflecting the hybrid nature of the field of Cinema and Media Studies, our faculty members are housed in departments across SAS and the university, and we cross-list courses with various departments and schools, including Africana Studies, Anthropology, Communications, East Asian Language and Civilizations, English, Fine Arts, German, History, History of Art, Near Eastern Languages and Civilizations, Romance Languages, Slavic Languages and Literatures, and Women's Studies. This truly interdisciplinary program will introduce students to the wide range of methodologies used to study film and media, and this intersection with other disciplines makes Cinema and Media Studies an ideal component of a double major.
Cognitive Science, Minor

Cognitive science is the empirical study of intelligent systems, including the human mind. An interdisciplinary science, it combines results from biology, computer science, linguistics, mathematics, neuroscience, philosophy and psychology to the study of language processing, perception, action, learning, concept formation, inference and other activities of the mind, with applications for information technology and the study of artificial intelligence.

Consult with Undergraduate Chair.

Comparative Literature, Minor

The undergraduate program in Comparative Literature welcomes students interested in the study of literature from theoretical, interdisciplinary, cross-cultural, and global perspectives. The core courses train students to appreciate the variety of meanings that texts acquire in different institutional and philosophical contexts and different socio-political frameworks. There are three concentrations within the major: National and Transnational Literatures (four courses in each of two languages), Theory, and Globalization.

Comparative Literature is a flexible program, allowing students to take courses in a variety of departments in the College. Students with interests in more than one national literature and in fields such as philosophy and political theory, art and aesthetics, and film and music will find the requirements congenial. The program provides students with a cosmopolitan intellectual background that is increasingly in demand in an era of globalization.

The minor in Comparative Literature requires students to take an introductory course and a course in theory, along with an open selection of four literature and film courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Computational Neuroscience, Minor

The Neuroscience Program has established a new cross-school, interdisciplinary Minor in Computational Neuroscience, which is an emerging field involving the application of quantitative methods to the analysis of neural circuits and the brain. In brief, the Minor requires eight courses, four core classes and four electives, the latter encouraging breadth. No more than five of these courses can also be used to fulfill requirements for another major or minors.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

1 Consult with Undergraduate Chair.
### Consumer Psychology, Minor

The goal of the interschool Consumer Psychology Minor is to create a program that fosters the natural link between Psychology in the College and Marketing in Wharton. To fulfill the Minor in Consumer Psychology students must complete four courses from the Psychology Department in the College and four courses from the Marketing Department in Wharton, and the stats requirement. Both College and Wharton requirements will consist of core courses along with a set of elective courses. College students who wish to minor in Consumer Psychology must count two of the four required psychology (PSYC) courses towards only the Consumer Psychology minor (and towards no other major or minor).

- Two 0.5 course unit Electives
- One 1 course unit Elective

**Total Course Units:** 9 units

---

1 Note: Two of the four courses must count ONLY toward the CNPS minor, no other major or minor.
Creative Writing, Minor

Creative Writing is the study of writing and literature with an emphasis on cultivating students’ own approach to craft. Students can choose from a range of workshops in fiction, creative nonfiction, poetry, screenwriting, playwriting, or journalism, all of which expose them to a range of writing in the field and give them opportunities to craft their own original work. Students can minor in Creative Writing by completing four workshop courses and two courses in the study of literature.

Journalistic Writing is the study of nonfiction writing and literature with an emphasis on cultivating students’ own skills in reporting, editing, interviewing, investigative journalism, media scholarship, and writing for a range of platforms. Students can minor in Journalistic Writing by completing six workshop courses in journalism and creative nonfiction, including one required course in long-form journalism.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Data Science and Analytics, Minor

Data science is the study of methods for extracting knowledge from data, combining programming, statistical, and communication skills. The Data Science & Analytics minor is intended for students who wish to complement their major field of study with data science skills. Students will learn the foundational data and programming tools, fundamental statistical inference methods, and modern machine learning approaches – with a focus on application in the social and natural sciences. The minor consists of six courses, three of which are foundational and must fall into specific components (data and programming, statistics, machine learning) and the remaining three are electives that must have a strong link to data science. The minor is not exclusive to a single department, but rather recognizes the wide range of data science courses available in SAS and helps students organize their coursework into a focused data science minor.

Design, Minor

The Design Minor is a six-credit program available to undergraduate students in the College of Arts and Sciences, School of Engineering, Wharton and the School of Nursing. This minor introduces students to a broad range of design disciplines and methodologies with the ability to take multiple classes in one area of study.

Total Course Units 6

1 Course fulfills a College of Arts and Sciences sector requirement (Sector IV: Humanities and Social Sciences).

Digital Humanities, Minor

The Undergraduate Minor in Digital Humanities is offered by the School of Arts and Sciences at the University of Pennsylvania. It has been designed for students who want to augment their disciplinary studies in the humanities or humanistic social sciences with advanced digital research techniques and in-depth engagement with theoretical and practical questions raised by digital humanities. Students who are not majoring in humanities fields are also welcome to complete the minor.

For more information: https://pricelab.sas.upenn.edu/education/digital-humanities-minor

Tier 2

Complete at least 1 but no more than 3 of the following courses (or other qualifying classes): 1-3

- CLST 1303  The Material Past in a Digital World
- COMM 2100  Quantitative Research Methods in Communication
- FNAR 1010  Video I
- PSCI 1800  Introduction to Data Science
- SOCI 2010  Social Statistics

Tier 3

Complete at least 1 but no more than 3 Additional Courses designated as DH electives (or other qualifying classes): 1-3
Students may also fulfill the Tier 3 requirement by completing a significant digital project as part of a class that is not an officially designated DH course. Students must receive permission from the instructor early in the semester and have their project approved by the director of the minor program. One Tier 3 courses may also be a project-centered independent study.

Total Course Units 6

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

East Asian Area Studies, Minor

East Asian Area Studies focuses on East Asia as a region of the world and human experience, and provides an integrated curriculum drawing on the approaches of the social sciences and the humanities. The program requires relevant courses in areas including history, international relations, political science, sociology, legal studies, and East Asian arts and cultures, while maintaining high standards in language study.

For more information: https://ealc.sas.upenn.edu/undergraduate/minor (https://ealc.sas.upenn.edu/undergraduate/minor/)

With intensive language courses (4 course units) the Minor will require 8 course units.

## East Central European Studies, Minor

The Minor program in East Central European Studies offers students the opportunity for the interdisciplinary study of the language, history, politics, literature, and culture of Eastern and Central Europe. The minor requires a total of six courses (6 CU) beyond the language requirement (two semesters), which students can satisfy by choosing any regional language currently offered at Penn (i.e. Bosnian/Croatian/Serbian, Hungarian, Polish, Ukrainian, Yiddish), by completing language coursework through a study abroad program, or by demonstrating equivalent proficiency.

## Economic Policy, Minor

Economics is a social science and as such an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are: the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; international trade and international finance (e.g., exchange rates). Economic policy questions stand at the center of public policy debates in the U.S. and countries all around the world. The goal of the Economic Policy Minor is to provide students who are not majoring in economics with the analytical tools that are necessary to participate in and shape public policy debates. The foundation for the minor is provided by the microeconomics and macroeconomics principles courses. After having completed the principles courses, the student can choose a minimum of four elective courses, which apply the basic tools of economic analysis to specific policy questions. The completion of the Economic Policy Minor does not require university-level calculus courses.

Total Course Units 6

1 Students may substitute a 0-level for a 2000-level in the same subject area provided they fulfill the prerequisites.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

English, Minor

Students minoring in English at Penn explore language, literature, and culture across the globe and in a wide array of forms. From books and manuscripts to theater, film, TV, and digital media, English Minors go everywhere English goes in order to cultivate their critical and expressive skills.

Minors need to take six courses: one must be an upper-level Literature Seminar, one must focus on literature before 1800, and the remaining four can be any English courses.

With prior approval of the Undergraduate Chair or the Associate Director of Undergraduate Studies, students may count one literature course from another department. Note that courses in the Critical Writing Program (those coded as WRIT) do not count in the Minor.

For more information: http://www.english.upenn.edu/undergraduate/minor (http://www.english.upenn.edu/undergraduate/minor/)

Economics, Minor

Economics is a social science and as such an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are: the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; international trade and international finance (e.g., exchange rates). The Economics Minor is intended for students with a strong interest in rigorous economics who are majoring in related fields. For instance, this minor should be attractive for students who are majoring in political science or sociology, who are interested in quantitative data analysis, or students looking for an applied field that accompanies a major in mathematics.

### Environmental Humanities, Minor

The minor in Environmental Humanities allows students to explore how attitudes and perceptions, ethics and social structures, arts, cultures and language respond to and shape our environments. The program places special emphasis on arts-driven inquiry into place, integrating the methods and modes of analysis traditionally associated with the arts and humanities with those of the social and natural sciences. The minor also emphasizes public research, training students to engage with publics outside the university in the processes of environmental knowledge-making. Students will complete both a customizable public engagement requirement and a final capstone project. The minor is open to undergraduates in all disciplines.

### Environmental Science, Minor

The Environmental Science minor is designed to achieve an understanding of the breadth of contemporary environmental issues through a series of courses in environmental studies, while ensuring that each student pursue a purposeful course of study in some traditionally defined area of scholarship. Graduates of the program are trained for professions directly or indirectly involved with problems of environmental quality.

European Studies, Minor

European Studies at Penn is an interdisciplinary minor that trains students to understand European Union institutions and the history and context of their development. It supplements majors in history, political science, sociology and art history as well as in French, German, English, Spanish, Italian and Central and East European languages. It is designed to give students access to:

- The institutions of a today’s Europe—European Union, Council of Europe, European Court of Human Rights—reflecting the largest experiment in building a global system of governance in human history.
- An understanding of Europe as a historical and cultural entity and its world leadership in business, politics and culture.
- A great variety of countries, cultures and languages whose interaction with each other and with the United States is an essential part of transatlantic culture.

**Fine Arts, Minor**

The Undergraduate Fine Arts Program combines studio practices, seminar courses, and interactions with visiting artists and professionals in order to provide an open intellectual framework to foster critical awareness and independent methods of artistic research and learning. The Fine Arts Department offers a diverse range of studio courses in the areas of animation and 3D modeling, ceramics, design, drawing and painting, photography, printmaking, sculpture and video. The dynamic curriculum also provides students with the opportunity to thoroughly examine contemporary art, creative research, interactive design and public art through seminar-based instruction.

The Undergraduate Fine Arts Program offers a Fine Arts Major for students in the College of Arts and Sciences and School of Engineering, and a Fine Arts Minor for undergraduate students across the university. The Fine Arts program works in conjunction with three interdisciplinary degree programs in Cinema Studies, Digital Media Design and Visual...
French and Francophone Studies courses are available to all students at the university to take as electives in order to enhance multidisciplinary learning.

A goal of the Undergraduate Fine Arts program is to facilitate an environment where the potentialities of art are considered in relation to the real life conditions of our students. Encouraged to test themselves against the rigors of divergent artistic approaches and their histories, our students develop a more complex set of skills to creatively and critically negotiate the turbulent shifts taking place globally in terms of human experiences.

French and Francophone Studies, Minor

French and Francophone Studies introduces students to the full span of historical and cultural traditions from France and the French-speaking world. Languages courses - from introductory to advanced - promote linguistic fluency, building on the skills students have acquired in high school or at Penn. Upper-level seminars explore a range of topics pertaining to literature, history, visual arts, and/or the media, and they offer majors and minors the opportunity to engage in research on French and global Francophone cultures across periods into contemporary times.

Gender, Sexuality, and Women's Studies, Minor

The Gender, Sexuality and Women's Studies Program is an interdisciplinary program that provides exciting intellectual opportunities to explore the role of gender in human affairs. The Gender, Sexuality and Women's Studies Program offers over 50 courses each year, many cross-listed with other departments. GSWS offers a major, a minor, and a graduate certificate.

---

**German, Minor**

The major and minor programs in the Department of Germanic Languages and Literatures provide deep understandings of language and cultures. Building from basic language competency to synthesizing significant literary works, historical context and current media and politics, the program offers a comprehensive education through engaged, active learning in a combination of core courses with a wide range of electives. Your learning experiences can be broadened and applied in study abroad as well as internship programs.

For more information: [https://www.sas.upenn.edu/germanic/](https://www.sas.upenn.edu/germanic/)

---

**Geology, Minor**

The Geology minor is designed to provide the graduates with skills to determine the environmental and/or geologic events that have led to the structures and features of a location and to analyze a field site or geologic region. Areas of interest include mineralogy, petrology, volcanology, stratigraphy, economic geology and paleontology. Geology also includes subjects as varied as environmental geology, evolutionary biology, solid-state chemistry, oceanography, mineral economics and geochronology.

---

**Global Medieval Studies, Minor**

Eleven Penn departments contribute to the interdisciplinary program in Global Medieval Studies, which allows students to discover the pre-modern world together, as the root and necessary precondition to the modern. The program is broad geographically and temporally; it includes Europe, the Middle East, Asia, and Africa, and in the latter part of our period even the New World, from Late Antiquity to 1700. This was a formative historical and cultural period in a variety of civilizations, from the north-western corner of Europe, across the Mediterranean and the Middle East, and on to southern and eastern Asia, south to Africa and over the Atlantic Ocean to the New World. The program encourages students to view the world through the lens of various disciplinary and geographic perspectives and discover the interaction of diverse civilizations and religions. As the era that gave birth to contemporary nations and a time before the formation of modern geopolitical concepts, this period provides a critical space for thinking about the composite nature of contemporary identities.

The minor program in Global Medieval Studies can easily be combined with a major in a language and literature tradition, philosophy, science, international relations, or even natural sciences, to name a few. As broadly educated historians and humanists, students of Global Medieval
Hispanic Studies, Minor

The demographic, economic and political realities of the United States, the articulation of a mainstream English culture with an always increasing diversity of Hispanic and Latino cultures, and the ongoing forging of strong cultural and economic ties throughout the Americas, have moved Spanish out of the bounds of the category of “foreign” language and culture in this country. There are many instances that point to the fact that Spanish will become—de facto if not officially—a second national language and culture of the United States. Furthermore, in Europe, Spain is assuming an ever-more significant role in the affairs of the European Union. The Spanish transition to democracy in the 1970s fostered an environment of cultural, linguistic and political diversity that for half a century has served as a fascinating model for the rest of Europe, both east and west.

Hence, the knowledge of Spanish culture gives students much more than the ability to communicate in the third-most-spoken language of the world. It prepares them to account for an entirely different national, continental and global reality in all its complexity. Since culture is the controlling category in this field of studies, the major in Hispanic Studies orients itself to the types of knowledge generated by new disciplines such as cultural studies, new historicism, ethics, and postcolonial studies.

Majors in Hispanic Studies are overwhelmingly double majors. This means that they bring to their classes a dialogic perspective that engages in the study of Hispanic cultures informed by interest in other fields such as history, government, sociology, economics, medicine, and law. The richness and depth of these interests make for lively and intellectually rewarding classroom discussions.

History of Art, Minor

The Minor in the History of Art, like the Major, aims to deepen students’ knowledge of artistic production and practice over the scope of human history. A Minor program in art history may complement the student’s Major in a cognate field, or it may be unrelated to the student’s primary field instruction.

International Development, Minor

The International Development minor is intended for students who wish to complement their primary area of study with an interdisciplinary focus on complex social problems associated with international development. The minor is intended to expand a student’s chosen major by focusing on critical development issues from several different academic perspectives. Approved courses emphasize problems of development in poor countries and poorer regions of wealthier countries. The interdisciplinary nature of the minor allows students to embrace a global perspective on the processes of change and development, critically assess internal and external influences on the development process, and gain a deeper perspective on the interconnectedness of complex problems.

International Relations, Minor

International Relations addresses the ways in which governments, private groups and individuals relate to each other in the global political and economic systems. The program provides a solid grounding in the methodologies of political science, history and economics. The curriculum draws on the best courses relevant to world politics, offers a well-rounded liberal arts education and helps prepare students for law or business school, Ph.D. programs and international careers.

Italian Studies: Italian Culture, Minor

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

For more information: http://www.sas.upenn.edu/italians/

1. At least 2 of the 4 electives must be taught in Italian. At least 1 of these 2 must be at the 3000-level. No more that 2 extra-departmental Italian Studies courses taught in English may be counted towards the minor. No more than 3 courses may be taken abroad.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
consult with their academic program regarding final certifications and requirements for graduation.

Jewish Studies, Minor

The Jewish Studies Program provides an opportunity for students to study the Jewish experience from several perspectives including: language (Hebrew, Yiddish, and Ladino), literature in the original languages and in translation, the history and culture of the Jewish people from Biblical Israel to 21st-century America and modern Israel, the exploration of Jewish law, and the roles of gender and sex in Judaism. Students may specialize in Jewish Studies through a major or a minor, or through one of the following concentrations: Jewish History within the History Department, Hebraica/Judaica within the Department of Near Eastern Languages & Civilizations, and Judaism within the Department of Religious Studies.

Journalistic Writing, Minor

Creative Writing is the study of writing and literature with an emphasis on cultivating students' own approach to craft. Students can choose from a range of workshops in fiction, creative nonfiction, poetry, screenwriting, playwriting, or journalism, all of which expose them to a range of writing in the field and give them opportunities to craft their own original work. Students can minor in Creative Writing by completing six workshop courses in journalism and creative nonfiction, including one required course in long-form journalism.

Latin American and Latinx Studies, Minor

The Latin American and Latinx Studies (LALS) Program offers an interdisciplinary major and minor to study the history, arts, languages, cultures, societies, politics, and/or regional organizations of Latin American and Caribbean countries as well as Latinx communities and individuals in the United States. With courses offered across many departments in the School of Arts and Sciences, in study abroad programs taught throughout Latin American cities, and with academically based community service courses with Latinx organizations in the Greater Philadelphia area, the LALS major and minor afford our students a very comprehensive approach to Latin American and Latinx Studies as well as the possibility of a flexible curriculum, where students can pursue and combine their academic interests.

For more information: https://lals.sas.upenn.edu/undergraduate/minor-requirements/

Requirements: Language competence equal to two semesters of college study in Spanish or Portuguese.

Law and Society, Minor

The Law and Society Minor program gives students the opportunity to study and understand the law within a sociological framework, by examining both the factors that affect variations in the law, as well as how those variations affect individuals and populations differently. In addition to a theoretical foundation in Sociology, students in the minor will study issues involving the state, its relationship to other institutions such as religions, corporations, civil liberties, the organization of courts, punishment and detention, legislatures, international bodies and trade agreements (such as NAFTA and the EU), race, class and gender and discrimination, reproductive rights, LGBT rights and the legal profession in general. Although the focus of this minor will be on U.S. laws and the U.S. society, laws and societies of other countries as well as international law and the international society will be used for comparative analysis.

**Linguistics, Minor**

The Linguistics Program is intended to acquaint students with the methods and findings of the scientific study of human language and its relationships to cognition, society, and history. It serves as a preparation for graduate training in linguistics or related areas, and as part of a rigorous general education. Linguistic training is relevant to work in anthropology, philosophy, psychology, and language and literature, as well as to careers in such fields as education, computer science and law. Founded by Zellig Harris in 1947, the Penn Linguistics Department is the oldest modern linguistics department in the United States. We have outstanding programs in the core disciplines of syntax and phonology, as well as in sociolinguistics, semantics, discourse, historical linguistics, phonetics, and psycholinguistics. Penn is also the home of the Linguistic Data Consortium (LDC), a compiler and distributor of linguistic materials for language engineering research. The graduate group in Linguistics at the University of Pennsylvania is an interdisciplinary team of faculty from the Department of Linguistics and related departments. Our program has strong concentrations in several areas and a tradition of collaboration among its faculty.

**Logic, Information, & Computation, Minor**

Modern mathematical logic began with work by Cantor, Frege, and other mathematicians during the last three decades of the nineteenth century who were concerned with providing a sound basis for the development of mathematical analysis. In the wake of "the crisis in the foundations of mathematics" precipitated by the discovery of various logical paradoxes at the turn of the twentieth century, mathematicians and philosophers such as Hilbert and Russell intensively pursued investigations into the logical foundations of mathematics. Connections between logic and the foundations of mathematics remained an important source for scientific developments in logic through the epochal results of Gödel in 1930 and 1931, which indicated both the scope and limits of the mechanization of
Mathematics, Minor

At the core of modern theoretical science, mathematics has historically provided an expressive language as well and theoretical framework for advances in the physical sciences. It has since become central in the life and social sciences and computer science. Mathematics at Penn embraces traditional core areas of mathematics as well as developing areas (Penn is one of the world’s leading centers in the application of logic to theoretical computer science). The goals of the major program are to assist students in acquiring both an understanding of mathematics and an ability to use it. The mathematics major provides a solid foundation for graduate study in mathematics as well as background for study in economics, the biological sciences, the physical sciences and engineering, as well as many non-traditional areas.

Medical Sociology, Minor

The Medical Sociology minor gives students the opportunity to engage in the sociological study of medicine and the health of populations. A sociological perspective on medicine allows students to critically engage with the social and cultural framing of what is defined as “illness”; the structural factors that may contribute to those illnesses; and the interactive dynamics between healthcare providers and patients.

Students will be able to critically connect the organization of social groups with the profession of medicine, the practice of medical care, and the social factors that contribute to sickness and well-being. Students who complete this minor will have a theoretical foundation in Sociology, and a dynamic perspective on health and healthcare in the world today.

Modern Middle Eastern Studies, Minor

The interdisciplinary Modern Middle Eastern Studies degree is designed to allow students to specialize in the Middle East as a region of the world and human experience by combining course work using both social scientific and humanistic approaches, underpinned by relevant language skills. Students will work with faculty committed to supporting interdisciplinary, applied, research-oriented advanced study. The minor gives students opportunities to work on problems of politics, policy, history, ideology, social thought, economic development, and international relations.

Music: Music, Minor

There are two paths of study for the Music minor. One flexible path allows students to draw together five courses on a wide array of topics in History, Theory, and Ethnomusicology. The other path is the Interdisciplinary minor in Jazz and Popular music studies, which is intended for students who wish to integrate their interest in music in the contemporary world and in academically-based community service as a form of learning. This minor is also for music majors who wish to include knowledge of jazz and popular music performance into their degrees.

For more information: https://www.sas.upenn.edu/music/undergraduate

Native American and Indigenous Studies, Minor

The Native American and Indigenous Studies (NAIS) Initiative at Penn features an inter-disciplinary Minor that focuses on the cultures and histories of Native Americans, First Nations, and other Indigenous peoples. Students can explore a diverse range of topics, including cross-cultural historical encounters, heritage landscapes, language recovery, cultural performance, law and sovereignty, museum anthropology, archaeology, decolonizing methods, and more. Many NAIS courses are cross-listed in more than one department (e.g., Anthropology, History). NAIS Faculty often use comparative case studies of Indigenous communities in different world settings, past and present, to illuminate current issues, locally and globally.

For more information: https://nais.sas.upenn.edu/

NAIS courses must be taken for a grade (not pass/fail). Students must achieve a grade no lower than a C in each course.

1 Normally fulfilled by 2nd-year level of Arabic and Hebrew. If already proficient in one language, you must choose the other language.
2 Student must take either NELC 0001 (Introduction to the Ancient Near East) or NELC 0002 (Introduction to the Middle East) as a breadth requirement. Remaining electives must include courses on Arabic and Hebrew cultures: modern and/or medieval in history, literature and religion. NOTE: No more than one PSCI course may be taken as an elective.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Near Eastern Languages & Civilizations: Arabic & Islamic Studies, Minor

Arabic and Islamic Studies focuses on languages and cultures of the wider Middle East in the context of Islamic Civilization. Because of the interdependence of language and culture, a primary emphasis is on gaining mastery of Middle Eastern languages such as Arabic and Turkish, alongside coursework in history, religion, and culture.

For more information: https://nelc.sas.upenn.edu/undergraduate/major

1 May be fulfilled in Arabic, Persian or Turkish.
2 Minors in Arabic and Islamic Studies must take NELC 0002 (Introduction to the Middle East) as a breadth requirement. Other credits may be fulfilled in Arabic, Persian or Turkish. Arabic, Persian or Turkish culture courses to be chosen in consultation with the advisor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages & Civilizations: Cultures and Societies of the Middle East and North Africa, Minor

Like the corresponding major, the Cultures and Societies of the Middle East minor broadly explores the cultures, societies, religions, and literary traditions of the greater Middle East including Arabia, the Levant, Mesopotamia, Iran and the Persianate world, Egypt and the Nile Valley, North Africa (including the Maghreb), and Asia Minor (including present-day Turkey). It enables students to develop an understanding of deep continuities through time, and close connections among the cultures of the region and adjacent areas. The minor does not include language coursework and consists of 6 CU. Students in this minor must complete the department’s two foundational courses: NELC 0001 (Introduction to the Ancient Near East) and NELC 0002 (Introduction to the Middle East). Additionally, students must fulfill 1 CU in introductory or upper-level coursework in Ancient Middle East or Hebrew and Judaic Studies (1 CU); and Societies and Cultures of the Islamic World or the Modern Middle East (1 CU). The final 2 CU are electives in intermediate or more advanced coursework. These courses should be chosen as appropriate in consultation with the student’s minor advisor after discussing the student’s particular intellectual interests.

1. This requirement must be fulfilled in Persian.
2. Students with a minor in Persian Languages and Literature must take NELC 0002 (Introduction to the Middle East) as a breadth requirement. Remaining courses relevant to the minor should be chosen in consultation with the advisor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Neuroscience, Minor

Neuroscience (formerly Biological Basis of Behavior) is an interdisciplinary program in which students explore the relationship between behavior (both human and animal) and its organic bases. The Program offers courses in virtually all areas of neuroscience ranging from cellular neurobiology to cognitive neuropsychology and integrates these basic interdisciplinary courses with basic science requirements in biology, chemistry and psychology. Students also engaged in supervised research in areas as diverse as molecular neurobiology, chemical neuroanatomy, visual sciences and behavioral ecology.

Nutrition, Minor

Jointly sponsored by the Schools of Nursing and Arts and Sciences, the Nutrition Minor presents a broad view of the field, and illustrates the pervasiveness of nutrition-related issues in such diverse fields as anthropology, economics, folklore, history, physiology, psychology, health care and public policy.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Philosophy, Minor**

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into value theory (ethics, politics, aesthetics) and theoretical philosophy (epistemology, metaphysics, mind, and logic). The Philosophy Minor requires a Philosophy balanced selection of courses in the various fields of philosophy and its history.

**Physics, Minor**

The aim of physicists is to discover the most fundamental principles of nature. Their tools are mathematics and experiment. The physical world as we perceive it is very complex, yet the principles of physics are inherently simple. A physicist’s forte is the ability to analyze a problem, reduce its complexity, and arrive at an understanding of the underlying patterns of nature in terms of simple relationships among constituent elements. Learning to do this gives Physics minors an intellectual versatility that can serve them well in a variety of future activities ranging from research and teaching in Physics or related sciences to careers in law, the health professions, and high-technology companies.

For more information: http://www.physics.upenn.edu/undergraduate/physics-astronomy-major#minor

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Political Science, Minor**

The Political Science Department’s course offerings span the discipline of political science, from American political institutions, to the politics of world regions, the emergence of a new international order, and recent and ancient political ideas. The Department’s curriculum is divided into the four standard fields of American politics, comparative politics, international relations, and political theories. There are also other opportunities for study in political processes of elections and communications and public policy. A minor involves one introductory political science course and five political science electives.
Psychoanalytic Studies, Minor

Psychoanalytic ideas provide a coherent basis for understanding how people feel and think, and how they function as individuals and in groups. These ideas, centered on unconscious emotional processes and human relationships, continue to evolve and develop. They form a bridge across many disciplines throughout the humanities, social sciences, and some of the natural sciences. Penn is now one of very few schools in the country (and the world) to offer the exciting opportunity of a minor in Psychoanalytic Studies.

As it provides a unifying body of ideas, Psychoanalytic Studies comprises courses in many departments. The minor is designed in partnership with the Psychoanalytic Center of Philadelphia, and students who sign up for the minor also have the opportunity to meet monthly with a practicing psychoanalyst to learn about contemporary psychoanalytic theories and therapies. Students who complete six courses that count toward the minor as well as a series of meetings with a psychoanalytic mentor will receive both the minor on their transcript and a Certificate of Accomplishment from the Psychoanalytic Center of Philadelphia.

1 4 course units must be taken in PSCI Dept at U of P.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
The Religious Studies minor is a great way to gain background in the scholarly study of religion in order to supplement or enhance major studies in other fields like Jewish Studies, History, Anthropology, Art History, Psychology, Political Science, or even Nursing, Engineering, Pre-Med, Pre-Law, and Business. Students in Wharton or the College of Nursing have taken a Religious Studies minor to gain some fluency in matters of business ethics, bio-ethics, cross-cultural analysis, inter-religious affairs, and the like.

Every minor program must include six courses in at least two different religious traditions. At least two of the six courses must be taken with core Department faculty. RELS also offers many course options which can count towards College Sector requirements, which makes it easier to incorporate the RELS minor into a typical undergraduate course-load.

Russian and East European Studies: Russian Language, Literature and Culture, Minor

The Department of Slavic Languages and Literatures offers programs in Russian and, with the support of the Penn Language Center, courses in the Czech and Polish languages. The department also offers a series of courses for students who have spoken Russian at home and wish to gain literacy and/or improve their language skills or to pursue the study of Russian literature and culture in Russian. Students of Russian at Penn are invited to reside in the Russian House (which brings together students interested in daily use of the language) and encouraged to spend a semester of study abroad.

Science, Technology and Society, Minor

Science, Technology & Society (STSC) examines the social contexts in which science and technology occur, the organizations of people and things that make up science and technology systems, and the social and cultural consequences of scientific and technological change over time. In a wide array of courses, STSC majors explore the relationship between scientific knowledge, technological innovations, technological systems, and society past and present.

South Asia Studies, Minor

South Asia Studies is an interdisciplinary field focusing on the history, languages, society, literature, and art from India, Pakistan, Bangladesh, Nepal, Sri Lanka, Afghanistan, and Bhutan. We are America's oldest and arguably most distinguished South Asia regional studies program dealing with the past and contemporary life of one-fifth of the world's population and teaching more languages than any other South Asian studies program in the US. Having a deep knowledge of the country set...
to outpace the US as the second largest economy in the world in an increasingly competitive global job market gives graduates a competitive edge over others with more generic skills. You don’t have to know anything about India or be South Asian to enjoy our great, flexible minor. So ask us about it today!

Statistics and Data Science, Minor

The aim of statistical modeling is to empower effective decision making, and the field’s unique contribution is its ability to incorporate multiple levels of uncertainty in the framing of wise decisions. Over the last few years, the development of new computational tools and the unprecedented evolution of “big data” have propelled statistical modeling to new levels. Today, statistical modeling and machine learning have reached a level of impact that no large organization can afford to ignore. The information landscape is changing as it has never changed before.

For more information: https://statistics.wharton.upenn.edu/programs/undergraduate/statistics-minor/

Statistics and Data Science, Minor

This minor is for students outside of Wharton. Single-degree and dual-degree students with Wharton may pursue a statistics concentration instead.

The prerequisite may also be satisfied with 2 course units of Economic Statistics, such as ECON 2300 and 104. These students do not need to take any other introductory courses, but they must take all upper-level course from within the Statistics and Data Science Department.

Since STAT 4300 Probability is also a core course, students who complete STAT 4300 Probability and STAT 4310 Statistical Inference as an introductory sequence must complete four additional electives for the minor.

Survey Research and Data Analytics, Minor

The Survey Research and Data Analytics minor is intended for students who wish to complement their primary area of study with an interdisciplinary focus on using data and survey methods for conducting research and evaluating programs, policies, and outcomes in the social sciences.

Select 2 course units of Electives from Pre-approved courses 2

Total Course Units 6

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Theatre Arts, Minor

The Theatre Arts Program offers a six-course minor, with three courses that focus on academic approaches to the theatre, such as the study of dramatic literature, theory, history and criticism, and three that focus practical aspects of performance, such as acting, directing, designing, devising, and playwriting. English majors concentrating on drama will find courses that cross-list; a diverse group of students with a wide array of major fields of study find it possible to pursue their interest in Theatre Arts with a minor.

Urban Education, Minor

The Urban Education Minor is open to undergraduates in all disciplines, and requires seven CUs. Students choose from among three concentrations depending on interest in pursuing teaching certification or deepening one’s background in urban education policy: Elementary Education; Secondary Education; Urban Education Policy, Research, and Practice. Students in all three concentrations take three core courses. The additional four requirements vary depending on the track.

### Urban Education Policy, Research, and Practice Track
- Select 1 Urban Context course
- Select 1 Teaching and Learning course
- Select 1 ABCS course related to Urban Education
- Select 1 of the following options to complete course #7:
  - Option 1: Policy Elective course
  - Option 2: EDUC 5335
  - Option 3: Select 1 Elective course

### Elementary Education Track
- EDUC 4014 Children's Literature
- EDUC 5021 Science Methods: Project-Based Learning Approaches
  - or EDUC 5023 Social Studies in the Elementary and Middle Schools
- EDUC 5020 Literacy in Elementary/Middle Schools

### Secondary Education Track
- Select 1 Pedagogy & Curriculum (ABCS) course
- Select 1 Content Area (ABCS) course
- EDUC 6027 Teaching in the Middle and Secondary Schools: Math
  - or EDUC 6329 Teaching English/Language and Literacy in Middle and Secondary Schools
- EDUC 6057 Advanced Methods in Middle & Secondary Schools: Math

**Total Course Units:** 7

1. Taken as Senior Thesis course or an Independent Study
2. If you plan to sub-matric into the Master’s Program in Elementary Education
3. If you plan to sub-matric into the Master’s Program in Secondary Education, take any graduate course "not" listed in the Secondary Education core
4. Includes two half-days in the field
5. Includes three half-days in the field
6. Requires Fall field placement
7. Requires Spring field placement

---

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Urban Real Estate and Development, Minor

This minor, co-sponsored by Real Estate (Wharton) and Urban Studies (Arts and Sciences), is designed to enable students to combine an interest in Urban Studies and Real Estate Development. Students take a total of seven Urban Studies and Real Estate courses, in consultation with the minor advisor.

**For more information:** http://www.sas.upenn.edu/urban/students/real-estate-development-minor (http://www.sas.upenn.edu/urban/students/real-estate-development-minor/)

Prerequisite to taking any Wharton courses: ECON 0001 Introduction to Micro Economics and ECON 0002 Introductory Economics: Macro. Also, check prerequisites for Wharton courses and fulfill.

### Core Courses
- Select two of the following URBS Core courses:
  - URBS 1153 Transformations of Urban America: Making the Unequal Metropolis, 1945 to Today
  - URBS 2040 Urban Law
  - URBS 4500 Urban Redevelopment
  - HIST 1153 Transformations of Urban America: Making the Unequal Metropolis, 1945 to Today

- Select two of the following REAL Core courses:
  - REAL 2040 Real Estate Law
  - REAL 2150 Urban Real Estate Economics
  - REAL 2300 Urban Fiscal Policy

### Electives
- Select 3 course units of URBS and REAL Electives

**Total Course Units:** 7

1. Take either URBS 2040 Urban Law or REAL 2040 Real Estate Law, not both.
2. See lists of approved electives on website.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Urban Studies, Minor

The Urban Studies minor offers students an opportunity to think and learn about cities in an informed, disciplined and integrated way. The program introduces a variety of perspectives on the origins, development, and nature of cities, stressing the application of theory to practice.

Students take four Urban Studies courses, and complete an internship for an additional two CUs in this six CU minor. The internship component
allows students the opportunity to work closely with a community group, public agency, non-profit or private organization in the city.

For more information: http://www.sas.upenn.edu/urban/students/urban-studies-minor (http://www.sas.upenn.edu/urban/students/urban-studies-minor/)

Liberal and Professional Studies

The College of Liberal and Professional Studies (LPS) is the home of lifelong learning at the University of Pennsylvania. Housed within the School of Arts and Sciences, we offer high school, undergraduate, post-baccalaureate, graduate, summer and online studies as well as customizable professional training with courses that span across disciplines.

Our outstanding students—engaged, curious and driven—come to Penn from all over the world with diverse academic and professional backgrounds. Whether you want to learn English while immersed in an Ivy League institution, join the global classroom in a MOOC, spend your summer abroad or start a new career, LPS offers the very best opportunities.

No matter where you are in life, or in the world—preparing for college, living overseas, working full-time, active in the military or studying on-campus—the College of Liberal and Professional Studies opens the Ivy League to you.

For more information: https://www.sas.upenn.edu/lps/undergraduate (https://www.sas.upenn.edu/lps/undergraduate/)

- Pre-Health Specialized Studies (p. 217)

Creative Studies, BAAS

By studying the transformative creations of others in the social, cultural, and historical contexts in which they were produced, you can nurture your own creative expression and develop a deeper understanding of the creative process in action. A concentration in Creative Studies offered by Penn LPS Online combines experiential and applied humanities through the study of the creative arts, expanding your ability to critically analyze, compare, and evaluate the meanings and significance of creativity as expressed across a variety of media. In this degree concentration, you engage in individual and collaborative creative writing and explore a range of creative accomplishments in fields including literature, cinema studies, theater, and other arts.

For more information: https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-concentrations/creative-studies (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-concentrations/creative-studies/)

Curriculum

The Bachelor of Applied Arts and Sciences (BAAS) recognizes the power of an applied liberal arts education to provide students with strong communication skills, understanding of different cultures and perspectives, and the ability to apply their knowledge to nuanced, complex scenarios with insight, perspective, and empathy.

Overview of degree requirements

30 course units are required for the Bachelor of Applied Arts and Sciences degree.
Foundational requirements

The foundational requirements of the BAAS degree reflect the core competencies and values of Penn LPS Online: the skills and knowledge needed to understand and solve complex problems, the ability to communicate effectively with a wide variety of audiences and an appreciation for diverse cultures and traditions. Students can transfer a maximum of 4 course units of foundational courses from a regionally accredited institution. Our program team can also give a preliminary evaluation of transfer credits before students officially apply. Visit the Transfer Preparation & Policies (https://lpsonline.sas.upenn.edu/admissions/transfer-preparation-policies/) page for more details.

In addition to course requirements, BAAS students complete a capstone project in their degree concentration as well as an e-portfolio.

Concentrations

Just as a college major serves to focus your studies during a four-year degree, the BAAS concentrations enable students to tailor their undergraduate education to specific personal and professional goals. Concentrations progress from introductory-level courses to higher-level courses so that students develop skills and knowledge with greater complexity as they move through the curriculum. Many concentrations are interdisciplinary, to provide students with opportunities to explore their areas of interest from multiple perspectives and develop a flexible approach to solving complex problems in professional as well as academic contexts.

Electives

Electives are courses that do not apply toward your foundational or degree concentration requirements. You may choose to deepen your field of study by taking additional classes within your concentration, develop a new skill by completing all of the courses within a course block outside of your degree concentration, or discover new interests and abilities by taking individual courses that appeal to your interests. Students choose 10 electives from any of Penn LPS Online's areas of study. Transfer students can apply a maximum of 8 course units from a regionally accredited institution toward this requirement.

Senior Portfolio Requirements

Throughout the BAAS degree, students draw on their coursework to build a digital collection of materials, or Senior Portfolio. The Senior Portfolio Requirements

For other course options consult with your advisor
Portfolio is a powerful tool to ensure students are aligning their academic studies with their individual professional, personal, and academic goals. Developing the Senior Portfolio provides students with the opportunity to reflect on selected assignments and discover how they can be applied to the broader context of their current and future careers. Students can share their Senior Portfolio with prospective and current employers to provide evidence of the skills and knowledge they have developed through coursework.

BAAS degree students who are working on their Senior Portfolio and seeking to connect with other students about the process can do so on our virtual discussion boards through the Canvas Senior Portfolio website. Ask a question, answer a question, and meet other talented, career-focused students.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Data Analytics and Psychological Sciences, BAAS

The Data Analytics and Psychological Sciences concentration offers the opportunity to improve your data literacy while developing strategies that support personal, organizational, and community well-being. In this degree concentration, you learn how well-being is measured, what activities can increase human flourishing, and how to apply analytical and statistical methods to effectively interpret and communicate data.

For more information: https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-concentrations/data-analytics-and-psychological-sciences/

### Fine Arts, BFA

For nearly 100 years, the University of Pennsylvania has partnered with the Pennsylvania Academy of the Fine Arts to provide students with an unparalleled opportunity to pursue their artistic passions and intellectual pursuits in the Ivy League.

The Bachelor of Fine Arts offers self-motivated and committed students the chance to design a curriculum at the intersection of your interests. As a Penn BFA student, you have access to a broad range of more than 500 courses taught throughout the School of Arts and Sciences and more than 300 courses within the College of Liberal and Professional Studies, in more than 50 areas of study. The Bachelor of Fine Arts program prioritizes the power of personal connection—between students, teachers, and program staff.

For more information: [https://www.sas.upenn.edu/lps/undergraduate/bfa](https://www.sas.upenn.edu/lps/undergraduate/bfa)

### Curriculum

As a Bachelor of Fine Arts (BFA) student, you’ll have access to a broad range of courses taught within the College of Liberal and Professional Studies and have choices from throughout the School of Arts and Sciences. Upon acceptance into the program, you will be assigned an advisor who will help you choose your coursework.

To earn the Bachelor of Fine Arts degree at Penn, you must complete the 90-credit, three-year program at PAFA, as well as a minimum of 16 course units (CU) at Penn.

Curriculum requirements at Penn include the completion of four course units chosen from within the History of Art Department and 12 free electives chosen from throughout the School of Arts and Sciences.

Participation in the joint Bachelor of Fine Arts degree program is a unique opportunity designed with specific curricular goals. As a result, some types of courses cannot be counted toward your degree. These include:

- Other Penn courses outside the School of Arts & Sciences (the School of Engineering and Applied Sciences, the Wharton School of Business, the School of Nursing, etc.)
• Studio-based courses offered by or cross-listed with the Fine Arts department at Penn
• Courses from any other educational institution

**Minors**

As a Bachelor of Fine Arts degree student, you may wish to complete a minor chosen from within the School of Arts and Sciences offerings. The number of courses required to complete a minor varies between departments but is usually between six and eight courses. If you would like to explore the possibility of minoring, please be sure to consult with your academic advisor in the College of Liberal Arts and an advisor in your minor department of interest. Once you have declared a minor, you will have a minor advisor assigned to you, who will provide guidance with appropriate course selection to meet requirements.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Individualized, BAAS**

The Bachelor of Applied Arts and Sciences is designed to meet your unique needs—including the ability to design your own degree concentration to develop the knowledge and skills you need to fulfill your life goals and career ambitions. While most BAAS degree concentrations are interdisciplinary, combining areas of study to encourage greater complexity and flexibility as you explore your interests, the Individualized Studies concentration goes a step further. With input from your academic advisor, you can combine courses from any three certificates or course blocks for a highly personalized learning experience.

**Curriculum**

Students in the Bachelor of Applied Arts and Sciences degree will choose a concentration to tailor their undergraduate education to specific personal and professional goals. Courses within each concentration may be taken in any order, unless prerequisites are specified.

Students must complete foundational courses for the Bachelor of Applied Arts and Sciences degree. In addition, students in the Individualized Studies degree concentration can work with an academic advisor to focus their studies toward any three certificates or course blocks; complete four courses in each of your selected course blocks for a total of 12 courses (12 C.U.*). Once the plan is approved, the student’s concentration in individualized studies will be officially declared.

Declaraton of the individualized studies concentration is a two-step process.

Step 1. Work with your academic advisor to select the structure of your individualized studies concentration.

Students with applicable transfer credits can select 2 certificates/course blocks plus 1 additional Penn LPS online course for a total of 9 courses and identify up to 3 applicable transfer courses for their individualized studies concentration proposal for a total of 12 courses (12 C.U.*).

Students without applicable transfer credit will choose 3, 4-course blocks for their concentration. The proposed concentration must be significantly different than a concentration that currently exists.

Step 2. Once the individualized studies program of study is approved by your advisor, the student submits the electronic program declaration from via Path@Penn.

Take four courses from any two or three of the following course blocks:

- Applied Positive Psychology (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/applied-positive-psychology/)
- Cinema (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/cinema-studies/)
- Classics (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/classics/)
- Climate Change (https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-course-blocks/climate-change/)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Leadership and Communication, BAAS

The Leadership and Communication concentration is an exciting skills-building and career-enhancing program designed by distinguished, award-winning Ivy League academic experts and researchers in consultation with top executives and leaders from the real worlds of business, government, and the nonprofit sector.

An Ivy League degree path to effective, ethical and career-boosting leadership

Drawing expertly on the social sciences, humanities, and data sciences, each of the twelve Leadership and Communication courses is scheduled especially for working adults and taught by dedicated and experienced Penn-affiliated scholars. Each Leadership and Communication course brings you one step closer to having the intellectual understanding and professional skills needed for effective, ethical, career-boosting leadership and communication. Each course meets for eight weeks in an accelerated semester format. The curriculum is divided into four parts:

Leadership Foundations; Leading Across Sectors; Leading Positively; and Global Leadership.

For more information: https://lpsonline.sas.upenn.edu/academics/bachelors-degree/baas-concentrations/leadership-and-communication

The Bachelor of Applied Arts and Sciences (BAAS) recognizes the power of an applied liberal arts education to provide students with strong communication skills, understanding of different cultures and perspectives, and the ability to apply their knowledge to nuanced, complex scenarios with insight, perspective, and empathy.

Overview of degree requirements

30 course units are required for the Bachelor of Applied Arts and Sciences degree.

In addition to course requirements, BAAS students complete a Senior Portfolio.

Foundational requirements

The foundational requirements of the BAAS degree reflect the core competencies and values of Penn LPS Online: the skills and knowledge needed to understand and solve complex problems, the ability to communicate effectively with a wide variety of audiences and an appreciation for diverse cultures and traditions. Students can transfer a maximum of 4 course units of foundational courses from a regionally accredited institution. Our program team can also give a preliminary evaluation of transfer credits before students officially apply. Visit the Transfer Preparation & Policies (https://lpsonline.sas.upenn.edu/admissions/baas-admissions/transfer-preparation-policies/) page for more details.

Leadership Foundations

Concentrations

Just as a college major serves to focus your studies during a four-year degree, the BAAS concentrations enable students to tailor their undergraduate education to specific personal and professional goals. Concentrations progress from introductory-level courses to higher-level courses so that students develop skills and knowledge with greater complexity as they move through the curriculum. Many concentrations are interdisciplinary, to provide students with opportunities to explore their areas of interest from multiple perspectives and develop a flexible approach to solving complex problems in professional as well as academic contexts.

Students in this concentration focus their studies by completing a total of 12 courses (12 c.u.*). Transfer credits cannot be used toward any of the 12 Leadership and Communication Concentration courses. Students who pursue this concentration should begin with LEAD 1010: Leadership Theory and Practice or LEAD 3040: Professional Communication and Personal Development. Otherwise, courses may be taken in any order unless prerequisites are specified.

Please note: To be admitted to the Leadership and Communication Concentration, you must have:

- Completed two Leadership and Communication courses (LEAD 1010 plus any one of the following LEAD courses: LEAD 2020, LEAD 2030, LEAD 3150, LEAD 3200 or LEAD 3300)
- Maintained an average of B or better, and received a grade of B+ or better in at least one of those two courses

Total Course Units

Electives

Electives are courses that do not apply toward your foundational or degree concentration requirements. You may choose to deepen your field of study by taking additional classes within your concentration, develop a new skill by completing all of the courses within a course block outside of your degree concentration, or discover new interests and abilities by taking individual courses that appeal to your interests. Students choose 10 electives from any of Penn LPS Online’s areas of study. Transfer students can apply a maximum of 8 course units from a regionally accredited institution toward this requirement.

Senior Portfolio Requirements

Throughout the BAAS degree, students draw on their coursework to build a digital collection of materials, or Senior Portfolio. The Senior Portfolio is a powerful tool to ensure students are aligning their academic studies with their individual professional, personal, and academic goals. Developing the Senior Portfolio provides students with the opportunity to reflect on selected assignments and discover how they can be applied to the broader context of their current and future careers. Students can share their Senior Portfolio with prospective and current employers to provide evidence of the skills and knowledge they have developed through coursework.

BAAS degree students who are working on their Senior Portfolio and seeking to connect with other students about the process can do so on our virtual discussion boards through the Canvas Senior Portfolio website. Ask a question, answer a question, and meet other talented, career-focused students.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Literature, Culture and Tradition, BAAS

The humanities and social sciences help us to understand cultures through historical and contemporary lenses. In the Literature, Culture, and Tradition concentration, offered by Penn LPS Online, you study and analyze the worldview of different cultures, exploring cultural change and continuity over time and place. Through historical, literary, and cultural analysis of sources and artifacts, you develop research skills and learn to evaluate complex cultures and scenarios. You also apply the same analytical approaches to gain critical insights into current world challenges.

Organizational Studies, BAAS

The Organizational Studies concentration offered by Penn LPS Online provides you with the critical and interpersonal skills required to work effectively in any professional context. Through integrated and applied courses in writing, speaking, and group dynamics, you learn to identify your communication goals, understand your audience, and adapt your messaging and strategy to achieve a successful outcome. To meet the challenges of today's complex work environments, you also develop the skills to build and work effectively in diverse teams, both in physical and virtual professional environments.

Throughout the BAAS degree, students draw on their coursework to build a digital collection of materials, or Senior Portfolio. The Senior Portfolio is a powerful tool to ensure students are aligning their academic studies with their individual professional, personal, and academic goals. Developing the Senior Portfolio provides students with the opportunity to reflect on selected assignments and discover how they can be applied to the broader context of their current and future careers. Students can share their Senior Portfolio with prospective and current employers to provide evidence of the skills and knowledge they have developed through coursework.

BAAS degree students who are working on their Senior Portfolio and seeking to connect with other students about the process can do so on our virtual discussion boards through the Canvas Senior Portfolio website. Ask a question, answer a question, and meet other talented, career-focused students.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Applied Positive Psychology, Certificate**

Applied Positive Psychology is a discipline that examines the intersections of body, brain, culture, and science to develop tools and practices that enhance human flourishing and well-being. In this 4-course, 4 course unit course of study, you will be introduced to the field of positive psychology and will learn tools and practice strategies that support personal, organizational, and community well-being. The courses teach you the theoretical and empirical foundations of human flourishing, how well-being is measured, and what activities increase human flourishing in various contexts and settings.

Penn LPS Online courses in the Certificate in Applied Positive Psychology are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule ([https://lpsonline.sas.upenn.edu/academics/course-schedule/](https://lpsonline.sas.upenn.edu/academics/course-schedule/)) page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests. Courses within the Certificate in Applied Positive Psychology may be applied to our Bachelor of Applied Arts and Sciences degree, but do not count toward Penn’s Master of Applied Positive Psychology degree.

For more information: [https://lpsonline.sas.upenn.edu/academics/certificates/applied-positive-psychology](https://lpsonline.sas.upenn.edu/academics/certificates/applied-positive-psychology)

The Certificate in Applied Positive Psychology prepares you to:

- Learn the historical and empirical foundations of positive psychology and the science of well-being
- Explore key research themes (e.g., positive emotions, strengths, engagement, relationships, meaning, and accomplishment) and their relevance in personal and organizational settings
- Apply research in positive psychology by practicing strategies that influence well-being
- Investigate applications of positive psychology in different professional settings, including business, education, healthcare, and the nonprofit sector
- Learn the basics of research, measurement, and evaluation in positive psychology

**Curriculum**

It is strongly recommended that students earning the certificate first complete APOP 1000: Introduction to Positive Psychology. Certificate students who complete any four of the online courses listed below earn a Certificate in Applied Positive Psychology. Those students are
then eligible to pursue an Advanced Certificate in Applied Positive Psychology by taking two additional positive psychology courses.

### Climate Change, Certificate

Climate change represents one of the most controversial and least understood threats to human, economic and environmental well-being on a global scale. The study of climate change offers an opportunity to develop the skills and effective policies to reduce risk and better adapt to a changing environment. In this 4-course, 4 course unit certificate you gain an understanding of the Earth's climate system and how and why it has changed over time. Within the disciplines of oceanic and
atmospheric science, you focus on the mechanisms that drive climate change, both natural and the result of human actions. You also develop the communication skills to more effectively share an understanding of climate change and its relevant policy implications with a broad audience.

Penn LPS Online courses in the Certificate in Climate Change are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule/) page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/climate-change (https://lpsonline.sas.upenn.edu/academics/certificates/climate-change/)

The Certificate in Climate Change prepares you to:

- Reconstruct the history and scales of climate changes
- Learn basic atmospheric and ocean dynamics to understand fundamental climatic processes and future changes
- Examine the mechanisms that act to drive climate change
- Analyze long-term natural climate variability on a global and regional scale
- Understand the importance of natural environmental change as a benchmark against which to assess human impacts, recent climate change, and future environmental change
- Deepen insights into methods of scientific inquiry
- Refine communication skills to effectively share an understanding of climate change, with a focus on both science and policy implications

Curriculum

Students must complete CLCH 1600: Oceanography plus any three additional climate change courses from the list below to earn a Certificate in Climate Change. Although it is recommended that students take CLCH 1600: Oceanography first, students can start with any course and take them in any order.

Creative Writing, Certificate

The Certificate in Creative Writing offers an innovative, collaborative course of study for those who have always wanted to unlock their creativity. Each course is designed as a workshop in which you explore new ideas, tackle new writing tools, generate original insights and discover your own powers of expression. You create, collaboratively discuss and revise your original writing with feedback from your instructors and your peers. You also engage with a range of assigned readings and multimedia that inform and grow your innovative practice.

The Certificate in Creative Writing offers both basic and advanced workshops and appeals to students new to creative writing as well as students with writing experience who want to learn new skills. Through a series of courses in fiction, poetry, creative nonfiction, and screenwriting, the Certificate in Creative Writing focuses on creative writing as a form of critical thinking as a way to reimagine audience and as a space of innovation. Taught by professionals in the field, our courses cultivate both individual and group learning, providing an overview of the field as well as deep dives into literary genres. These courses are designed as hands-on, intensive study of the subtleties and power of language.

The Certificate in Creative Writing is a 4-course, 4 course unit program of study taught by University of Pennsylvania faculty. To earn a certificate, students complete any four courses offered, in any order. Students who complete the basic certificate may pursue an advanced certificate (6-course, 6 course unit) by adding two additional courses from the advanced course list.

Penn LPS Online courses in the Certificate in Creative Writing are offered on accelerated (8-week) and classic (11- or 12-week) schedules. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule/) page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/creative-writing (https://lpsonline.sas.upenn.edu/academics/certificates/creative-writing/)

The Certificate in Creative Writing prepares you to:

- Understand how text conveys meaning across a variety of literary genres and styles
- Explore how to use innovation, flexibility, and collaboration to cultivate a creative writing practice
- Create, revise and edit your original writing in multiple literary genres, including poetry, fiction, nonfiction, and screenwriting
Curriculum

Certificate students who complete four of the online courses listed below earn a Certificate in Creative Writing. Those students are then eligible to pursue an Advanced Certificate in Creative Writing by taking two additional courses.

The Certificate in Data Analytics is a 4-course, 4 course unit sequence designed to provide a reasonable point of entry for individuals to gain expertise in data analytics. The certificate’s four courses are scheduled at times to accommodate working adults, so you can improve your data literacy while working on your career. Courses are taught by experts and experienced practitioners, including members of the Penn faculty from the Penn Program on Opinion Research and Election Studies. You don’t need an extensive background in math, statistics, or programming to succeed in the data analytics program. The only prerequisites are a familiarity with using a computer, basic math skills, and a willingness to learn.

Data Analytics, Certificate

We live in a data-centered world, and the ability to make data-driven decisions and craft strategy informed by an effective analysis of data are key elements of successful leadership in any work environment. The Certificate in Data Analytics is a 4-course, 4 course unit sequence designed to provide a reasonable point of entry for individuals to gain expertise in data analytics. The certificate's four courses are scheduled at times to accommodate working adults, so you can improve your data literacy while working on your career. Courses are taught by experts and experienced practitioners, including members of the Penn faculty from the Penn Program on Opinion Research and Election Studies. You don’t need an extensive background in math, statistics, or programming to succeed in the data analytics program. The only prerequisites are a familiarity with using a computer, basic math skills, and a willingness to learn.
Prior to the start of the term, students in DATA 1010 are required to complete a pre-course module that takes approximately 5-8 hours. Read more about this module on the DATA 1010 course page (https://lpsonline.sas.upenn.edu/academics/courses/data-1010-introduction-data-analytics/).

Penn LPS Online courses in the Certificate in Data Analytics are offered on an accelerated (8-week) schedule. Courses in this certificate program include a weekly synchronous session. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule/) page.

Although the courses can be taken sequentially to build your expertise in data analytics, you have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/data-analytics (https://lpsonline.sas.upenn.edu/academics/certificates/data-analytics/)

The Certificate in Data Analytics prepares you to:

- Implement and interpret basic regression models
- Understand advanced predictive modeling and machine learning
- Implement and analyze surveys
- Design experiments and A/B tests to test solutions and address problems
- Develop skills in statistical programming and data analysis in R
- Apply skills and knowledge to solve real-world problems
- Visualize and communicate data clearly and persuasively

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Digital Strategies and Culture, Certificate

The Certificate in Digital Strategies and Culture will help you develop skills as a critical consumer, designer, and creator of information and multimedia content. Each online course in the certificate offers flexible approaches for using technology to reach your goals in this ever-changing world.

While technology has transformed the ways we live, work, and connect with one another, many of us are understandably ambivalent about its role in society. In some ways, technology can feel like a distraction that’s hard to contextualize within our personal and professional lives; but technological fluency can be critical for effective communication across diverse personal and professional spaces.

The Certificate in Digital Strategies and Culture is a 4-course, 4 course unit credit program of study taught by University of Pennsylvania faculty. To earn a certificate, students complete any four courses offered.

Penn LPS Online courses in the Certificate in Digital Strategies and Culture are offered on an accelerated (8-week) schedule. Courses in the online certificate program are largely asynchronous with some synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule/) page.

You have the option to enroll in individual courses without committing to the entire online certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests. Visit the Cost of Attendance (https://lpsonline.sas.upenn.edu/costs-scholarships-aid/cost-attendance/) page for course tuition and fee rates.

The Certificate in Digital Strategies and Culture prepares you to:

- Solve complex problems with innovative approaches
- Support interpersonal communication with digital platform fluency
- Develop strategies for critical participation across dynamic networks and virtual environments
- Gain skills for building and maintaining strategic partnerships with digital tools
- Design, deliver, and manage engaging content for diverse digital audiences
- Build basic visualizations of quantitative data
- Read and interpret the structure and logic of general purpose coding languages

Global and Regional Studies, Certificate

The Penn LPS Online Certificates in Global and Regional Studies require students to complete 24 CUs for a Basic Certificate and 36 CUs for an Advanced Certificate. There is no single required course, but rather several basic courses that are explicitly global in reach. With the basic courses, students are introduced to a wide variety of analytical approaches and develop conceptual frames that will help them as they take other Global Studies courses. These basic courses develop ability to consider ideas in different contexts, in different countries, in different historical moments. Supplementing the basic courses are regional studies courses that bring deeper and more sustained study of specific areas or cultures. This combination of global reach and local focus follows the development of global studies as a field of study, and adds value to more general studies. In addition, a course on Intercultural communication is part of the offerings of the certificate, helping students develop concrete skills that will support students in today’s globalized workspaces.

Curriculum

Certificate students who complete two global studies and two regional studies courses listed below earn a Certificate in Global and Regional Studies. Those students are then eligible to pursue an Advanced Certificate in Global and Regional Studies by taking two additional courses (one in global studies and one in regional studies).

Leadership & Communication, Certificate

The Certificate in Leadership and Communication at Penn LPS Online is an exciting skills-building and career-enhancing program designed by distinguished, award-winning Ivy League academic experts and researchers in consultation with top executives and leaders from the real worlds of business, government, and the nonprofit sector. Drawing expertise on the social sciences, humanities, and data sciences, each of the five Leadership and Communication courses is scheduled especially for working adults and taught by dedicated and experienced Penn-affiliated scholars. It is designed, developed and delivered through a working partnership between the leaders and staff of Penn’s College of Liberal and Professional Studies (LPS), the Robert A. Fox Leadership Program, and those of Civic Enterprises, headquartered in Washington, DC.

The Certificate in Leadership and Communication is a 5-course, 5 course unit program of study taught by University of Pennsylvania faculty. Penn LPS Online courses in the Certificate in Leadership and Communication are offered on an accelerated (8-week) schedule. Courses in this certificate program include a weekly synchronous session. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule/) page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/leadership-and-communication/

To earn the Certificate in Leadership and Communication, students must successfully complete all five courses listed below and maintain a 3.0 overall grade point average (GPA).

Neuroscience, Certificate
Understanding the intricate correlations between neural mechanisms and behavior is an important area of contemporary scientific research. The Certificate in Neuroscience is a 4-course, 4 course unit program of study that allows you to explore biological, psychological and clinical approaches to understand the nervous system as the biological basis of behavior. You apply studies in cognitive neuroscience, neurochemistry, and psychology as a basis for a better understanding of human behavior, focusing on areas including perception, memory, motivation, and emotion.

Penn LPS Online courses in the Certificate in Neuroscience are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule/) page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

The Certificate in Neuroscience prepares you to:
- Describe the structure and function of the vertebrate nervous system and its application to the neurobiology of behavior
- Understand the structures and functions of neurochemicals that are generated by and modulate the nervous system
- Examine the various roles played by the nervous and endocrine systems in controlling physiological processes and behavior, with a focus on sexual and parental behaviors, aggression, and ingestion
- Understand the form, function, and pathology of the adult nervous system in terms of antecedent development processes
- Critically evaluate research strategies and hypotheses in neuroanatomy, neurophysiology, neurochemistry, and neuropharmacology to understand psychiatric disorders from a biological perspective

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/neuroscience (https://lpsonline.sas.upenn.edu/academics/certificates/neuroscience/)

Curriculum
Certificate students and individual course takers must first complete Introduction to Neuroscience. Certificate students must complete three additional courses from the list below to earn the Certificate in Neuroscience. Students who have earned a Basic Certificate can then earn an Advanced Certificate in Neuroscience by taking an additional two NEUR courses.

Total Course Units 4

* Students who complete the basic certificate may pursue an advanced certificate by adding two additional neuroscience courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Organizational Anthropology, Certificate
Today’s workplaces are characterized by high levels of diversity. Organizational leaders who can effectively manage interpersonal relationships within complex and varied team structures are in high demand across all professional environments. The Certificate in
Organizational Anthropology at Penn LPS Online, a 4-course, credit-bearing program of study, is designed to develop your understanding of how teams, corporations and other organizations develop and reinforce culture, and how to apply this research to create stronger functioning groups. Beginning with an anthropological approach to organizational culture, you explore different theories of how culture forms and evolves in organizations and why it matters for performance. You learn strategies for influencing change in an increasingly digital workplace and getting alignment at the conversational level based on research into best practices in communication.

Penn LPS Online courses in the Certificate in Organizational Anthropology are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule/) page.

You have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/organizational-anthropology

The Certificate in Organizational Anthropology prepares you to:

- Understand current anthropological research on team, corporate, and organizational culture
- Explore the effects that modern corporations have on their surrounding environments, with attention to local, regional, national, and global effects
- Develop an understanding of theories of organizational culture, and how to apply those theories in specific professional and organizational contexts
- Examine underlying social and cultural influences on diverse teams, and learn how to apply theory to foster diversity and create inclusive cultures
- Identify the variables that underlie communication in virtual, internet-mediated spaces, and apply social science research to create strong collaborative professional relationships, even when working remotely

### Curriculum

Students must complete all four courses listed below to earn a Certificate in Organizational Anthropology.

### Professional Writing, Certificate

The Certificate in Professional Writing at Penn LPS Online gives you a scenario-based deep dive into the kinds of writing essential to business. Our courses offer a series of concepts and practical applications that provide an accelerated understanding of the subtle arts of communication, enhanced by tips to make anyone a power-writer—a master of grammar, concision, and clarity.

Whether you are in an entry-level position and want to ramp up your writing skills or are an accomplished writer ready to expand and refine your repertoire, our professional writing courses take you to the next level. We take you beyond the basics of structure and style. Our coursework emphasizes professional expertise and extensive feedback as we share and cutting-edge findings in the field of writing. Find out how to incorporate your personal or corporate brand's story into every piece of communication and discover the best ways to identify and appeal to target audiences.

The Certificate in Professional Writing is a 4-course, 4 course unit program of study taught by University of Pennsylvania faculty. To earn the certificate, it is recommended that students enroll first in the Fundamentals of Professional Writing course, followed by any additional three professional writing courses.

Penn LPS Online courses in the Certificate in Professional Writing are offered on an accelerated (8-week) schedule. Courses in the certificate program are largely asynchronous with some optional synchronous sessions to be scheduled by the instructors. For more information about specific course dates, please visit the Course Schedule (https://lpsonline.sas.upenn.edu/academics/course-schedule/) page.

You also have the option to enroll in individual courses without committing to the entire certificate, enjoying the flexibility and expertise offered by Penn LPS Online to suit your schedule and interests. Students who complete the basic certificate may pursue an advanced certificate (6-course, 6 course unit) by adding two additional courses from the advanced course list.

For more information: https://lpsonline.sas.upenn.edu/academics/certificates/professional-writing

The Certificate in Professional Writing prepares you to:

- Assess audience and purpose for communication targeted at achieving specific goals
- Analyze different audiences, scenarios, and contexts in order to shape your messaging most effectively whatever your audience
• Develop effective rhetorical strategies and skills to persuade specific audiences—personal, professional, and social—through visual, written, and multimedia communication
• Draft and revise written work for precision, clarity, and power
• Develop empathetic and analytic skills to integrate and build upon other viewpoints and perspectives
• Learn how readers, writers, and designers use complex multimedia texts incorporating language, image, sound, and gesture to produce a coherent, engaging message
• Explore how to engage the senses—visual, aural, and somatic—to convey information effectively through social media
• Understanding how to make complex information accessible to audiences through effective visualization

Curriculum

Certificate students who complete four of the online courses listed below earn a Certificate in Professional Writing. Those students are then eligible to pursue an Advanced Certificate in Professional Writing by taking two additional professional writing courses.

Science Foundations, Certificate

The physical and life sciences enable us to better understand the workings of the universe and living things. The courses in this cluster, which are designed to enhance your understanding of science, will provide you with the foundations needed for further studies in this area. The Certificate in Science Foundations at Penn LPS Online, which is for credit, is a 4-course, (4 c.u.*) online program of study. The objective of this certificate is to enable you to increase your skills as both a consumer and communicator of scientific information while at the same time honing the foundational skills required for careers in the sciences.

The goals of the Certificate in Science Foundations are to:

• Examine the basic concepts of the physical and life sciences
• Evaluate scientific materials, especially those containing quantitative information or speculations, using the scientific method
• Gain an appreciation of the ways in which the physical and life sciences intersect and interact
• Learn how to communicate scientific concepts effectively, whether it is to one's peers or to members of other communities
• Critically analyze data quantitatively using the appropriate mathematical, statistical or graphical tools

Curriculum

Students who complete the four courses listed below earn a Certificate in Science Foundations.

2023-24 Catalog | Generated 08/02/23
Social Difference, Diversity, Equity and Inclusion, Certificate

The events of 2020 have underscored the critical importance of addressing systemic racism, as well as sexism and other forms of prejudice, in every sector. Education clearly holds an important role in this endeavor. Students need to learn about the history that underpins these structural inequities, to develop the critical and analytical tools to evaluate these systems, and to gain an understanding of how to implement these tools and strategies in their own professional work and their communities. This certificate is designed to meet these urgent needs.

Students will learn how to do the following:

- contextualize and develop critical awareness of difference and bias in diverse professional environments
- grapple with difference and systemic biases that reify historical relationships to power, agency, and various forms of capital in society
- discuss race, class, sexuality, gender and the complex intersections of social difference using social justice frameworks that (1) encourage thoughtful engagement with diversity in specific organizations/communities and (2) explore paths for critical change in society at large
- engage with social difference using qualitative and quantitative analytical practices across, within, and beyond disciplines
- think critically about the ways technologies can—and often do—reinscribe historical inequities
- develop reflective practices that can inform individual and collective action

Curriculum

Certificate students who complete four of the online courses listed below earn a Certificate in Social Difference, Diversity, Equity, and Inclusion. Those students are then eligible to pursue an Advanced Certificate by taking two additional courses.

**UpSkill, Certificate**

In 2018, only 15% of executives and 13% of hiring managers express satisfaction with recent graduates’ ability to apply the skills and knowledge they learned in college to complex problems in the workplace. Furthermore, only 34% of executives and significantly fewer hiring managers (25%) say that most recent graduates have the necessary skills and knowledge to advance or be promoted. (AACU, 2018)

This applied online program (fall, spring, summer) is designed to efficiently map ivy league coursework to in-demand skillsets: assisting students as they seek their next step. Up(skill)’s competitive advantage is its laser focus on career readiness, backed with the timelessness of the liberal arts in an online, work and family friendly format.

This program is designed for anyone looking to upskill, including:
- Graduates who are looking for ways to become more competitive in the job market
- Individuals who have been recently laid off due to workforce reductions
- Workers who are looking to revise or rebrand their skillset

Students will achieve the following learning objectives:
- Develop strategies and skills to persuade specific audiences through verbal, visual, and written communication
- Practice and apply critical thinking skills in the classroom and beyond
- Explore competing schools of thought about leadership ethics
- Learn how to use quantitative and quantitative data in decision-making and problem-solving
- Analyze different audiences, scenarios, and contexts in order to shape your messaging
- Develop effective rhetorical strategies and skills to persuade specific audiences—personal, professional, and social—through visual, written, and multimedia communication
- Develop empathic and analytic skills to integrate and build upon other viewpoints and perspectives
- Identify, develop and apply distinctive leadership traits and skills
- Learn how readers, writers, and designers use complex multimedia texts incorporating language, image, sound, and gesture to produce a coherent, engaging message
- Understanding how to make complex information accessible to audiences through effective visualization.

Pre-Health Core Studies, Post-Baccalaureate Preparatory Program

Penn’s Pre-Health Post-Baccalaureate Programs are designed for driven students who want to distinguish themselves as competitive medical, dental, or veterinary school candidates. The Core Studies program is specifically for students with a limited science background. The minimum total course units for program completion is 12. Core Studies students typically take general chemistry, introductory biology, organic chemistry, physics, and biochemistry. The general chemistry, introductory biology, organic chemistry, and physics sequences consist of two semesters and includes corresponding lab courses, but an individual’s learning plan may vary based upon their past academic history. All Core Studies students may take additional courses beyond the minimum requirement with most students taking a total of 13 to 16 course units to achieve their goals. A breadth and depth of upper level science courses are available to all Core Studies students to deepen their knowledge and preparation for medical, dental, or veterinary training.

The basic science courses are time-intensive and students are strongly discouraged from maintaining employment in any capacity while enrolled in the Core Studies program. The core courses are also math-intensive and a minimum of a college level pre-calculus course is required for admission. Students may attend the Core Studies program on a full-time or part-time basis, but all program requirements are expected to be completed within two years of matriculation.

Total Course Units 13

Pre-vet and pre-dental students often require additional courses in cell biology, microbiology, physiology, and genetics as prerequisites. Pre-Health students may also apply up to 1 course unit of online Human Anatomy (ANAT) toward their program requirements.

Pre-Health Specialized Studies, Post-Baccalaureate Preparatory Program

Penn’s Pre-Health Post-Baccalaureate Programs are designed for driven students who want to distinguish themselves as competitive medical, dental, or veterinary school candidates. The Specialized Studies program is specifically for students who aim to strengthen their existing scientific foundations. The minimum total course units for program completion is 8. Specialized Studies students take advanced undergraduate course in the biological sciences such as, Advanced Cell Biology, Essentials of Molecular Biology and Genetics, Essentials
of Physiology, Pathophysiology, Histology, Immunobiology, Infectious Diseases, Neuroscience, and Human Anatomy.

Specialized Studies students may opt to complete their program on a full-time or part-time basis, but all program requirements are expected to be completed within two years of matriculation.

**Curriculum**

Specialized Studies students develop a study plan in consultation with their Academic Advisor that accounts for the student’s past academic history and addresses future academic goals. Students may elect 1 cu of online Human Anatomy to fulfill their program requirements. Students may also incorporate Core Studies courses into their plan where recommended and appropriate.

Pre-Health Specialized Studies Course options include:

Pioneers in interdisciplinary education and research. Theory linked with real-world practice. The path for students who want to shape the future.

With the pace of innovation and technological advancement accelerating ever faster, engineers hold the keys to the next generation’s routine wonders.

As an Ivy League institution — and the first university in the nation — Penn delivers a transformative experience in the classroom and laboratory, while ensuring its engineering and applied science students receive a fully rounded liberal arts education.

Penn Engineering is a pioneer in interdisciplinary education, allowing students the flexibility to craft a program that suits their individual interests, career, or graduate education plans. Both Bachelor of Science in Engineering (BSE) and Bachelor of Applied Science (BAS) degrees are offered, along with specialized dual-degree programs, an array of majors and minors, special programs, and study-abroad opportunities.

Penn Engineering students get valuable and extensive hands-on experience, conducting research and pursuing creative designs and new products alongside faculty renowned in their fields. The working relationship with faculty pervades Penn Engineering, where full-time faculty teach all core undergraduate courses, and each student has a faculty advisor.

As the global marketplace for technology grows, graduates go on to leadership roles in business, medicine, law, and academia. They leave armed with the technical knowledge, imagination, communication skills, and understanding of the social and human context of their work, all engendered with a fervor for the future nurtured at Penn Engineering.

Our undergraduate programs emphasize both theory and practice while forming intellectual linkages across a breadth of disciplines. The opportunity for hands-on research, over the four years, allows undergraduates the chance to learn about the creation of knowledge, further explore their chosen field, and thereby become collaborators in the search for knowledge. The design experience over the four years, culminating in the senior design project, challenges students to utilize their academic training and problem-solving skills in practical ways, and provides them with direct experience with real-world problems that they will encounter as practicing engineers.

Technology is transforming our times and our lives, no longer on a scale of decades but of years and even months. A successful career through such changing times requires engineering graduates endowed with skills that are applicable to widely different technologies, skills that transcend the details of any one job. Such is the result of an education that pays much more attention to the fundamental than to the trendy, to the creative more than to the routine. Engineers must also be firmly educated as responsible citizens, concerned with the impact of their work on society.

Penn Engineering is an integral partner in Penn’s initiatives to prepare students for leadership in a high-tech world. Our goal is to prepare students for leadership roles in engineering and applied science as well as in other fields, such as medicine, business, and law, for which creativity, critical quantitative thinking, effective communication skills, and a strong commitment to humane values are essential.

Mission of the School
1. The creation and dissemination of scholarly research in both basic and applied arenas to be an international center of engineering excellence and the regional catalyst for technological innovation;
2. The design and delivery of engineering education known for its rigor, breadth and relevance to prepare its students to become global leaders in technology-based fields.

Mission Statements of Bachelor of Science in Engineering Programs (ABET-accredited)

- Bioengineering (http://www.be.seas.upenn.edu/about-academics/)
- Chemical and Biomolecular Engineering (http://www.cbe.seas.upenn.edu/about-ugrad/)
- Computer Science (http://www.cis.upenn.edu/ugrad/abet.shtml/)
- Computer Engineering (http://www.seas.upenn.edu/cmpe/accreditation.php)
- Electrical Engineering (http://www.ese.upenn.edu/about-ugrad/)
- Materials Science and Engineering (http://www.mse.seas.upenn.edu/about-ugrad/accreditation.php)
- Mechanical Engineering and Applied Mechanics (http://www.me.upenn.edu/about-ug/ed/accreditation.php)
- Systems Science and Engineering (http://www.ese.upenn.edu/about-ugrad/)

Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below are examples of student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, visit: https://research.seas.upenn.edu/undergraduate-research/.

Finding a Research Mentor and Research Experiences
Students are encouraged to explore the Penn Engineering Faculty Expertise Directory (http://www.seas.upenn.edu/directory/departments.php), featuring the School’s standing faculty and which is searchable by department, research center affiliation, and research expertise keyword. Users can identify which faculty are conducting research in a specific area and contact faculty members whose research interests them.

Littlejohn Undergraduate Research Program
Thanks to a generous gift by Angus Littlejohn, the School of Engineering is able to offer Summer Research Opportunities to Penn Engineering Students. The program is open to rising sophomores, juniors and seniors.

The program intends to provide students the opportunity to get involved in hands-on engineering research under the supervision of a faculty
member. Topics of research include all areas covered by the departments in the School of Engineering and Applied Science.

**Rachleff Scholars Program**

This program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

The following BSE programs are accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org/)

- Bioengineering
- Chemical and Biomolecular Engineering
- Computer Science
- Computer Engineering
- Electrical Engineering
- Materials Science and Engineering
- Mechanical Engineering and Applied Mechanics
- Systems Science and Engineering

The BSE program in Computer Science is accredited by the Computing Accreditation Commission of ABET (http://www.abet.org/).

For more information, visit: http://www.seas.upenn.edu/undergraduate/handbook/programs/abet-accreditation.php

Each student is assigned a faculty advisor with whom they are required to meet at least twice per year. No student is permitted to register for courses in any semester without first meeting with an advisor. The only exception is the fall semester of a student’s first year. Students who take the time to prepare for these meetings generally find them beneficial and informative. Faculty advisors are the best source of information about electives within the major, research opportunities, and options for graduate study.

For more information, visit: https://ugrad.seas.upenn.edu/student-handbook/advising/.

**Curriculum**

Each major (p. 220) within the School of Engineering and Applied Science has its own curriculum. Specific curricular requirements for each major are listed by program.

However, all Engineering students must complete requirements in four specific tracks:

- math
- natural science
- core engineering courses within the chosen major
- professional electives
- social science/humanities
- free electives

A course planning guide exists for each major to assist with planning and keeping track of the requirements toward graduation.

In addition, all Engineering students must complete the following requirements.

**Writing Requirement**

Beginning with the Class of 2001, Penn Engineering has implemented a Writing Requirement. The Writing Requirement will not necessitate the completion of additional course units. Students can easily satisfy the requirement without altering the existing constraints of BAS or the BSE degrees.

Students are strongly encouraged to fulfill the Writing Requirement during the first two years of study because it becomes increasingly difficult to schedule first-year courses as one moves through the curriculum.

For more information, visit: https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/writing-requirement/.

**Engineering Ethics Requirement**

Beginning with the Class of 2017, Penn Engineering students must fulfill the Engineering Ethics requirement. The Ethics Requirement will not necessitate the completion of any additional course units in the existing BAS or the BSE degrees, as the requirement may be double-counted from the student’s SSH course requirements.

The Engineering Ethics requirement can be satisfied by taking EAS 2030 Engineering Ethics. This course may be used (double-counted) for the Social Science requirement as well. Students are strongly encouraged to take the Ethics Requirement course during the sophomore year.

For more information, visit: https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/engineering-ethics-requirement/.

**Majors**

- Bioengineering, BSE (p. 220)
- Biomedical Science, BAS (p. 221)
- Chemical and Biomolecular Engineering, BSE (p. 222)
- Computer Engineering, BSE (p. 223)
- Computer Science, BAS (p. 225)
- Computer Science, BSE (p. 226)
- Digital Media Design, BSE (p. 227)
- Electrical Engineering, BSE (p. 228)
- Individualized Program, BAS (p. 229)
- Materials Science and Engineering, BSE (p. 230)
- Mechanical Engineering and Applied Mechanics, BSE (p. 231)
- Networked and Social Systems Engineering, BSE (p. 232)
- Systems Science and Engineering, BSE (p. 233)

**Bioengineering, BSE**

Bioengineering is a multidisciplinary area where the engineering sciences interface biology, biomedical sciences, and medicine, to advance human
health. Bioengineering brings together the creation of new knowledge and understanding of biological systems through engineering analysis and experimentation, with the application of engineering design and practice principles for the development of devices, processes, methods and biotechnologies to improve medical practice and health care delivery.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/bioengineering/

1 Must include a Writing Seminar (a list of approved Writing Seminars can be found in the SEAS Undergraduate Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/writing-courses/))

Concentrations

Students may select one of eight concentrations (http://www.be.seas.upenn.edu/current-students/undergraduates/concentrations.php):

- Biomedical Data Science and Computational Medicine
- Biomedical Devices
- Biomedical Imaging and Radiation Physics
- Cellular/Tissue Engineering and Biomaterials
- Multiscale Biomechanics
- Neuroengineering
- Systems and Synthetic Biology
- Therapeutics, Drug Delivery & Nanomedicine

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biomedical Science, BAS

Interface the engineering sciences, biology, biomedical sciences, and medicine to advance human health and solve problems in medicine and the biological sciences. The Bachelor of Applied Science degree offers students breadth and flexibility and allows them to combine a technology-based degree with considerable course work in the liberal arts, communications, business or fine arts. It is designed primarily for students whose interests are not oriented toward a professional engineering career. It is a popular degree option for those preparing for careers in medicine, business, and law. Many students who are pursuing dual degree programs opt for this degree.

## Chemical and Biomolecular Engineering, BSE

Chemical Engineers apply concepts from the physical sciences (chemistry and physics) and life sciences (biochemistry and microbiology) to the design and optimization of processes for the efficient production of products ranging from fuels and chemicals to pharmaceuticals to advanced materials. Penn’s chemical engineering department provides students with both a strong foundation in engineering fundamentals and exposure to modern chemical engineering technologies. The program’s versatility allows our students to excel in diverse careers in the chemical industries, research, medicine, law, government, and education.

2. CBE Majors taking the Organic Chemistry Lab sequence to satisfy the Lab Tech Elective requirement must take CHEM 2411, CHEM 2421 (Advanced Chemistry Elective) and CHEM 2412 and CHEM 2422, the two affiliated .5 CU lab sections.
3. Must include a Writing Seminar (a list of approved Writing Seminars can be found in the SEAS Undergraduate Handbook [https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/writing-courses/])

Concentrations

Students can select one of the following concentrations:

- Energy and the Environment
- Pharmaceutics and Biotechnology
- Polymers and Soft Matter Science and Engineering

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Computer Engineering, BSE

Computer Engineering is the discipline that designs and engineers computer systems from digital circuits, through compilers and runtime systems, to networking and world-wide distributed systems. As an engineering discipline, the computer engineer must appreciate the physical aspects of computations (energy, delay, area, reliability, costs) and be able to expertly navigate the multidimensional tradeoff space associated with implementing computations. Since today’s high performance programmable computing devices mean enormous computational tasks can be performed entirely in software, the computer engineer must manage computational capabilities and functionalities which migrate between hardware and software driven by advancing
technology and these engineering tradeoffs. Recent advances in manufacturing make it economical to construct systems containing billions of components and millions of lines of code, and these systems are increasingly invaluable in life-critical and real-time systems; computer engineering is the discipline that seeks to understand how to design and manage systems of this complexity while providing adequate guarantees of safety and trustworthiness for such systems.

Total Course Units: 37

---

1. If not taken freshman year, must be replaced by another department approved engineering course.
2. If BIOL 1121, CHEM 1012, EAS 0091, MEAM 1100 or PHYS 0140 are taken, choose one natural science lab from the list: BIOL 1124, CHEM 1101, MEAM 1470, PHYS 0050 or another department approved Natural Science lab.
3. At most, two freshman-level Engineering courses may be used as a Professional Elective.
4. Must include a Writing Seminar (a list of approved Writing Seminars can be found in the SEAS Undergraduate Handbook (https://
Computer Science, BAS

Computer scientists and engineers have revolutionized society and created the computer and telecommunications industries that are so important to human life and the world's economy. As a result of this revolution, expertise in computer science is essential in many new areas, including computer and network service and consulting companies, financial institutions, health industries, natural science labs and medical research labs, and other contexts where intensive manipulation of information is important. As a result, opportunities for computer scientists and engineers have expanded greatly, both in specialized fields as well as in numerous dual-career opportunities in which computer expertise is combined with advanced degrees in business, communication, engineering, law, medicine, and science.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

1 A CIS Elective is a CIS or NETS engineering course numbered 1000 or above or ESE 3500 Embedded Systems/Microcontroller Laboratory. (Note that not all CIS/NETS courses are engineering courses, please see the SEAS Undergraduate Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/engineering-courses/).) At most one CU of 1000-level courses may be used as a CIS Elective.
3 OPTION 1: Any approved minor, or sequence of approved courses. Remaining must be Math, Natural Science or Engineering. (MINORS ARE STRONGLY ENCOURAGED)
4 OPTION 2: Any 8 CU's from Math, Natural Science or Engineering
5 Must include a Writing Seminar (a list of approved Writing Seminars can be found in the SEAS Undergraduate Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/writing-courses/))

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

</tbody>
</table>

* CIS and Technical Electives must include a course from each of the following lists:
  - Networking: NETS 1500, NETS 2120, CIS 3310, CIS 4550, CIS 5550, CIS 5505, CIS 5530
  - Databases: CIS 4500, CIS 4550, CIS 4555, CIS 5550, CIS 5450
  - Distributed Systems: NETS 2120, CIS 4410, CIS 5410, CIS 4500, CIS 5500, CIS 5505, CIS 5450
  - Machine Learning/Al: CIS 4190, CIS 5190, CIS 4210, CIS 5210, CIS 5200, CIS 5450, CIS 6200
  - Project: NETS 2120, CIS 3410, CIS 3500, CIS 4410, CIS 5410, CIS 4500, CIS 5500, CIS 5450, CIS 5505, CIS 4600, CIS 5600, CIS 5050, CIS 5530, ESE 3500

The same course can count towards multiple lists, e.g., NETS 2120 and CIS 5450 together satisfy all five lists.

A CIS Elective is a CIS or NETS engineering course at the 1000 level or above, or ESE 3500 Embedded Systems/Microcontroller Laboratory (NOTE: not all CIS/NETS courses are engineering courses; please see the SEAS Undergraduate Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/engineering-courses/)). At most, one CU of 1000-level coursework may be used as a CIS Elective.

May contain at most one CU of 1000-level courses. You may use:
  1. courses from a declared concentration (https://www.cis.upenn.edu/undergraduate/program-options/ concentrations/) and/or
  2. courses approved by the department, see the list of approved courses (https://advising.cis.upenn.edu/tech-electives/).

3. Must include a Writing Seminar (a list of approved Writing Seminars can be found in the SEAS Undergraduate Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/ writing-courses/))
Concentrations

Students may select one of seven concentrations:

- Artificial Intelligence (4 CU)
- Cognitive Science (5 CU)
- Computational Biology (6 CU)
- Computer Vision (4 CU)
- Data Science (4 CU)
- Software Foundations (4 CU)
- Systems (5 CU)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Digital Media Design, BSE

The Digital Media Design (DMD) program is an interdisciplinary major in the School of Engineering and Applied Science at Penn. As a full-fledged Bachelor of Science in Engineering (BSE) degree, it combines major coursework in computer graphics within the Computer & Information Science Department, communication theory courses from the Annenberg School and Fine Arts courses from Penn's School of Design. The program was designed for students who have an interest in computer graphics, animation, games, and the design of virtual reality environments and interactive technologies.

Electrical Engineering, BSE

Electrical engineering connects the physical world with the information world. Electrical engineers apply physics and chemistry in modern nanotechnology devices, encode and manipulate information in circuits and networks, and mathematically understand and reason with large amounts of data in real time. This makes electrical engineering one of the broadest forms of engineering, resulting in a multitude of possible careers. The societal impact of electrical engineering can be found in numerous domains, from smartphones, 5G wireless, and medical imaging to electric/driverless cars and the Internet of Things. Electrical engineering includes the engineering of electrons, magnets, photons, electro-magnetic waves, quantum states, and electro-mechanical structures. Electrically engineering systems provide communication, sensing, actuation, display, storage, conversion, control, and computation. The electrical engineering discipline includes both the design and implementation of physical realizations (devices, circuits, antennas) and the mathematical tools for optimizing the exploitation of these systems (control theory, information theory, digital logic, signal processing).

ESE 5500 Advanced Transportation Seminar
ESE 5670 Risk Analysis and Environmental Management
ESE 6050 Modern Convex Optimization
ESE 6060 Combinatorial Optimization
ESE 6150 F1/10 Autonomous Racing Cars
ESE 6180 Learning for Dynamics and Control
ESE 6190 Model Predictive Control
ESE 6500 Learning in Robotics
ESE 6740 Information Theory

One of the Advanced Electives may be an Advanced ESE elective, BE 5210 or CIS 4710 or CIS 5200

Design and Project Courses

ESE 2900 Introduction to Electrical and Systems Engineering Research Methodology and Introduction to Electrical and Systems Engineering Research and Design
& ESE 2910 Fundamentals of Solid-State Circuits
or ESE 3190 Nanofabrication of Electrical Devices
or ESE 3360 Embedded Systems/Microcontroller Laboratory
or ESE 4210 Control For Autonomous Robots
or BE 4700 Medical Devices

ESE 4500 Senior Design Project I - EE and SSE
ESE 4510 Senior Design Project II - EE and SSE

Math and Natural Science

MATH 1400 Calculus, Part I
MATH 1410 Calculus, Part II
MATH 2400 Calculus, Part III
ESE 3010 Engineering Probability
MEAM 1100 Introduction to Mechanics
or PHYS 0140 Principles of Physics I (without laboratory)
or PHYS 0150 Principles of Physics I: Mechanics and Wave Motion
or PHYS 0170 Honors Physics I: Mechanics and Wave Motion
ESE 1120 Engineering Electromagnetics (students passing the ESE E&M review module may substitute an ESE approved E&M course)

CHEM 1012 General Chemistry I
or EAS 0091 Chemistry Advanced Placement/International Baccalaureate Credit (Engineering Students Only)
or BIOL 1101 Introduction to Biology A
or BIOL 1121 Introduction to Biology - The Molecular Biology of Life

Math Elective
Math or Natural Science Elective
Natural Science Lab (if applicable)

Professional Electives
Math, Science, or Engineering Electives
Professional Elective - Select from the following:

Math, Science, or Engineering Elective
ESE 4000 Engineering Economics
EAS 5450 Engineering Entrepreneurship I
EAS 5950 Foundations of Leadership
MGMT 2370 Management of Technology
OIDD 2360 Scaling Operations in Technology Ventures: Linking Strategy and Execution

General Electives

EAS 2030 Engineering Ethics (or equivalent)
or LAW 5060 ML: Technology Law
Select 4 Social Science or Humanities courses
Select 2 Social Science or Humanities or Technology in Business & Society courses

Total Course Units 37

1 If not taken freshman year, must be replaced by another department approved engineering course.
2 If BE 4700 is taken, an additional .5 CU engineering credit is required
3 If BIOL 1121, CHEM 1012, EAS 0091, MEAM 1100 or PHYS 0140 are taken, choose one natural science lab from the list: BIOL 1124 Introductory Organismal Biology Lab, PHYS 0050 Physics Laboratory I, MEAM 1470 Introduction to Mechanics Lab, CHEM 1101 General Chemistry Laboratory I or another department approved Natural Science lab.
4 At most, two freshman-level engineering courses may be used as a Professional Elective
5 Must include a Writing Seminar (a list of approved Writing Seminars can be found in the SEAS Undergraduate Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/writing-courses/))

Concentrations

Students may select one of six concentrations:

- Data Science
- Microsystems and Nanotechnology
- Mixed-Signal and RF Integrated Circuits
- Photonics and Quantum
- Robotics
- System-on-A-Chip Design

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Individualized Program, BAS

The individualized major offers an opportunity for exceptional, creative, self-motivated students to explore innovative and multi-disciplinary fields of knowledge. The individualized major is intended to foster a closer relationship between the student and the faculty advisors.
For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/individualized/

**Individualized Program Major Requirements**

40 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook/).

Concentrations
Students may select one of four concentrations:
• Biomaterials and Biomimetics
• Electronic & Optical Devices and Sensors
• Energy and Sustainability
• Nanotechnology

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Mechanical Engineering and Applied Mechanics, BSE
Mechanical Engineering & Applied Mechanics is the study of forces, deformation, and motions of solid bodies and fluids (liquids and air), heat & energy generation and transport. Mechanical engineers are equipped with knowledge to design and develop everything you think of as a device, mechanism, or machine, including wind turbines, rocket engines, robots, 3D printers, micro-engines, nanomotors, and more. We assure safety in systems people use day to day, from transportation to appliances to medical devices.

Total Course Units  37

1  Maximum of three 1000-level courses permitted.
2  MEAM Upper Level courses include all MEAM 5000-level courses except MEAM 5990
Technical Electives include courses from the Math, Science and Engineering categories. One Technical Elective may be satisfied with advanced dual degree requirements (with approval). If following the General Concentration, one of these Technical Electives should be at the 5000-level, resulting in a total of three MEAM Upper Level courses and three Technical Electives.

Must include a Writing Seminar (a list of approved Writing Seminars can be found in the SEAS Undergraduate Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/writing-courses/)).

Concentrations

An approved list of MEAM Upper Level courses for each concentration can be found in the MEAM Undergraduate Handbook.

Networked and Social Systems Engineering, BSE

The Rajendra and Neera Singh Program in Networked and Social Systems Engineering (NETS), is the world’s first course of study to fully integrate the disciplines needed to design and analyze the complex networks that are reshaping our society. This program prepares students to shape the technologies that underpin Internet-based search and electronic commerce, financial networks, social networks, and even such exchanges as the power grid. Graduates of this program will be prepared to engineer networks that work for both end-users and investors. Other graduates may become the policy makers who are urgently needed to regulate these networks for the protection of commercial property and societal good.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/networked-social-systems-engineering/

Total Course Units 37

1 At least four courses from an approved depth area required. For the remaining courses you may use (1) courses from any approved depth area, and/or (2) courses approved by the department. In general, approved courses must be advanced courses that are rigorous/quantitative and have at least one nontrivial prerequisite. See the list of depth areas and approved courses (https://www.nets.upenn.edu/long-nets-curriculum/).

2 Must include a Writing Seminar (a list of approved Writing Seminars can be found in the SEAS Undergraduate Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/writing-courses/)).

Concentrations

Students may select one of five concentrations:

• Data Science
• Economics and Networked Markets
• Networked and Cloud Services
• Technology and Society
• Theory of Networks and Dynamics

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Systems Science and Engineering, BSE

Systems Engineers provide technical management for societalscale problems that often encompass the connections between the physical and the information world. Examples of the many cutting-edge applications include autonomous robotics, smart buildings, national power grid management, global networks, service optimization, and biological systems. Systems engineering is the set of reusable mathematics, intellectual tools, and methodologies for attacking largescale engineering problems. These common tools are adaptable for problems in different engineering domains (e.g., electrical, mechanical, biological, chemical, and computing) and help us understand, design, and manage systems that contain elements from multiple domains. Systems engineering deals with how we extract useful, abstract models from lower level systems, use these models to analyze and predict behavior, and use the analysis to control behavior and optimize/synthesize solutions. System engineering helps us understand what happens when we compose many elements, each with their own behavior, and how to design and constrain the individual elements to engineer desired behavior for the composed system.

Professional Electives

Select 3 Societal Problem Electives

General Electives

EAS 2030 Engineering Ethics (or equivalent)
or LAW 5060 ML: Technology Law
Select 4 Social Science or Humanities courses
Select 2 Social Science or Humanities or Technology in Business & Society courses

Total Course Units: 37

1 If not taken by the end of freshman year, must be replaced by another department approved Engineering course.
2 If ESE 5050 or BE 5700 or ESE 3600 is taken, an additional .5 CU engineering credit is required.
3 This category requires 10 CU, including two .5 CU Natural Science Labs. Several of the courses above are 1.5 CU and include .5 CU Natural Science Lab. If the courses selected do not total 10 CUs, you will be required to complete the additional CUs required with up to two .5 CU Natural Science Labs from the following list: BIOL 1124 Introductory Organismal Biology Lab, CHEM 1101 General Chemistry Laboratory I, MEAM 1470 Introduction to Mechanics Lab, PHYS 0050 Physics Laboratory I, PHYS 0051 Physics Laboratory II, or another department approved Natural Science Lab.
4 A complete list of approved SPA electives can be found on the ESE undergraduate programs webpage (https://www.ese.upenn.edu/undergraduate/systems-science-and-engineering-major/sse-degree-requirements/)
5 Must include a Writing Seminar (a list of approved Writing Seminars can be found in the SEAS Undergraduate Handbook (https://
Concentrations

Students may select one of three concentrations:

- Data Science and Artificial Intelligence
- Decision Science
- Robotics

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Minors

- Chemical & Biomolecular Engineering, Minor (p. 235)
- Computer Science, Minor (p. 236)
- Data Science, Minor (p. 236)
- Digital Media Design, Minor (p. 236)
- Electrical Engineering, Minor (p. 237)
- Energy & Sustainability, Minor (p. 237)
- Engineering Entrepreneurship, Minor (p. 238)
- Materials Science and Engineering, Minor (p. 239)
- Mechanical Engineering and Applied Mechanics, Minor (p. 240)
- Systems Science and Engineering, Minor (p. 240)

Chemical & Biomolecular Engineering, Minor

Chemical Engineers apply concepts from the physical sciences (chemistry and physics) and life sciences (biochemistry and microbiology) to the design and optimization of processes for the efficient production of products ranging from fuels and chemicals to pharmaceuticals to advanced materials. Penn’s chemical engineering department provides students with both a strong foundation in engineering fundamentals and exposure to modern chemical engineering technologies. The program’s versatility allows our students to excel in diverse careers in the chemical industries, research, medicine, law, government, and education.

1 CIS 1100 Introduction to Computer Programming may be included only if taken before CIS 1200 Programming Languages and Techniques I.

2 A CIS Elective is a CIS or NETS engineering course at the 1000 level or above (except CIS 1810 The Quantum and the Computer), or ESE 3500 Embedded Systems/Microcontroller Laboratory. Note: not all CIS/NETS courses are engineering courses; please see the SEAS Undergraduate Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/engineering-courses/).
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Data Science, Minor

Data Science applies core concepts in computer science, statistics and mathematics to problems in a wide variety of fields, from physical, social, biomedical, and behavioral sciences to arts and humanities. The minor targets students with strong analytical abilities and some existing programming experience, and requires courses in statistics, data-centric programming, data management, and data analysis. It also points to courses across the University that deal with data in areas of importance to Data Science.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

2 STAT 4050 & STAT 4220 are 0.5 CU courses

Digital Media Design, Minor

The DMD minor is a programming-intensive exploration into interactive computer graphics. The interested student is encouraged but not required to take Design courses (in the SEAS SSH category, for example) to gain the artistic knowledge and skills that would augment the DMD technology emphasis. Suggested relevant Design courses include DSGN 1020 Art of the web: Interactive Concepts for Art & Design and DSGN 1030 3-D Computer Modeling. The DMD minor also encourages exploration of the connections of computer graphics programming with...
human cognition and interactive experiences. Students undertake a capstone project to integrate their DMD minor with their major.

For more information: http://cg.cis.upenn.edu/dmd-minor.html

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

The DMD minor is not open to students pursuing a CSCI, CMPE, DMD, NETS or ASCS major. A student may not minor in both DMD and CSCI.  

1 CIS 1100 Introduction to Computer Programming can only be taken prior to CIS 1200 Programming Languages and Techniques I. If a student takes CIS 1200 Programming Languages and Techniques I without taking CIS 1100 Introduction to Computer Programming, no extra course needs to be substituted - the DMD minor requires only 7 CUs in this case.

2 Program approval is required for exceptions.

1 An intermediate or Advanced ESE elective can be taken with department approval.

2 Advance ESE course required. An approved list can be found on the most recent EE worksheet.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Electrical Engineering, Minor

Electrical engineering (EE) connects the physical world with the information world. Electrical engineers can apply physics and chemistry in modern nanotechnology devices, can encode and manipulate information in circuits and networks, and can mathematically understand and reason with large amounts of data in real time. Students can pursue an EE minor by completing a six courses that includes the conception, design, analysis, and implementation of devices, circuits, and signal processing.

For more information: http://www.ese.upenn.edu/current-students/undergraduates/minors.php

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

Energy & Sustainability, Minor

The minor in Energy and Sustainability provides students with broad coverage of technical and societal issues in energy and sustainability. It is designed to help students become leaders in developing technologies for a more sustainable energy future.

For more information: http://www.seas.upenn.edu/undergraduate/degrees/energy.php
SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.seas.upenn.edu/undergraduate/degrees/minors.php

Energy and Sustainability Minor (ENSU)

Students participating in the minor are expected to have taken at least one semester of intro chemistry, mathematics and physics.

Engineering Entrepreneurship, Minor

Penn Engineering offers a Minor in Engineering Entrepreneurship (EENT), complementing the core engineering disciplines. This Minor is designed for students majoring in engineering and applied science. However, it is open to all University undergraduates subject to available class space. Non-engineering students should check with their home schools to determine their eligibility to take the EENT Minor. All courses for the EENT Minor must be taken for a grade (no Pass/Fail).

For more information: https://www.seas.upenn.edu/entrepreneurship/

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

- MKTG 2410 or MKTG 7410 Entrepreneurial Marketing
- NURS 5530 Innovation & Applied Technology in Health Care
- HCMG 8670 Health Care Entrepreneurship

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Materials Science and Engineering, Minor**

The Materials Science and Engineering (MSE) program reflects the explosive growth of interest in the nano and bio sectors of engineering science and technology. MSE prepares students to use fundamental scientific principles to synthesize, manipulate, design and characterize the structural and functional properties of advanced engineering materials. The program offers students advantages seldom found in other MSE programs: the opportunity to tailor the curriculum to their own interests, guaranteed research experience and an excellent student-faculty ratio.

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

Total Course Units 6

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Mechanical Engineering and Applied Mechanics, Minor

Mechanical Engineering & Applied Mechanics (MEAM) is the study of forces, deformations and motions of solid bodies and fluids, heat generation and transport, and applications to analysis, design, and manufacture of components, machines, and systems. Students in mechanical engineering follow a program which contains basic groundwork in all aspects of mechanical engineering, but flexibility in the curriculum allows students to pursue elective programs in fields such as aeronautics, robotics, computers, electronics, automatic controls, and materials.

For more information: http://www.me.upenn.edu/prospective-students/undergraduates/majors-minors.php

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.seas.upenn.edu/undergraduate/degrees/minors.php

A minor in Mechanical Engineering and Applied Mechanics (MEAM) requires the completion of six (6) course units with a grade of "C" or better. Courses taken on a Pass/Fail basis do not count toward the MEAM minor. Only two (2) 1000 level courses are permitted.

1 All MEAM courses (except MEAM 4450 (https://catalog.upenn.edu/search/?P=MEAM%204450) Mechanical Engineering Design Projects and MEAM 4460 (https://catalog.upenn.edu/search/?P=MEAM%204460) Mechanical Engineering Design Projects) can be used.

Up to (2) approved Cognate courses can be substituted with department approval from the following list: BE 2000 Introduction to Biomechanics, BE 3300 Self-Assembly of Soft Materials, BE 5100 Biomechanics and Biotransport, CBE 4300 Introduction to Polymers, CBE 5350 Interfacial Phenomena, MSE 3300 Self-Assembly of Soft Materials, MSE 3930 Materials Selection, MSE 4050 Mechanical Properties of Macro/Nanoscale Materials, MSE 5300 Thermodynamics and Phase Equilibria.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Systems Science and Engineering, Minor

System engineering (SSE) helps us to understand what happens when we compose many elements, each with their own behavior, and helps us understand how to design and constrain the individual elements to engineer desired behavior for the composed system. Students can pursue a SSE minor by completing six courses that includes decision making, data processing and modeling, simulation, and design of systems.

For more information: http://www.ese.upenn.edu/current-students/undergraduates/minors.php
SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.seas.upenn.edu/undergraduate/degrees/minors.php

Academic Opportunities

Penn Engineering offers a number of academic opportunities for undergraduate students.

Global Opportunities

Experience in an international setting is an opportunity that Penn Engineering strongly encourages students to obtain. Spending time in another country allows students to develop their intercultural abilities, and increase their independence and confidence as they immerse themselves in a new environment – all while fulfilling their major requirements. We encourage students to explore options specific to Engineering students through the Penn Abroad Office.

Research Opportunities

Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below you can see examples of outstanding student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, including summer and additional research programs available, visit the Penn Engineering Research section (p. 219).

Dual Degrees

You may combine your BAS or BSE degree with a second degree in one of Penn’s other undergraduate schools. A Dual Degree is not to be confused with a Dual Major (http://www.seas.upenn.edu/undergraduate/handbook/programs/dual-majors.php), where a student earns two majors within Penn Engineering, or with a Second Major (http://www.seas.upenn.edu/undergraduate/degrees/two-majors.php) where an engineering student also earns a major within the College.

For more information, visit: https://ugrad.seas.upenn.edu/student-handbook/programs-options/dual-degrees-and-special-programs/.

2023-24 Catalog | Generated 08/02/23
SCHOOL OF NURSING

Penn Nursing offers a number of resources and experiences not found at most other schools, including a state-of-the-art simulation lab with mannequins that respond as patients would, classrooms with the latest hospital-based electronic medical records (EMR) technology, and clinical experiences in The Children’s Hospital of Philadelphia and the Hospital of the University of Pennsylvania, two of the nation’s best hospitals. Penn Nursing is a premier academic and research institution renowned for advancing the frontiers of nursing science and patient care. Our students learn from the thought leaders in nursing research, education, and practice who ensure Penn Nursing remain one of the top schools of nursing in the world. At Penn Nursing, students become part of the next generation of healthcare leaders, prepared to care for patients, to conduct landmark research, and to make new strides in healthcare management and health policy.

Learn more about our history: http://www.nursing.upenn.edu/about/history/

Learn more about our school leadership: http://www.nursing.upenn.edu/about/our-leadership/

Mission
Our mission is to make a significant impact on health by advancing science, promoting equity, demonstrating practice excellence, and preparing leaders in the discipline of nursing.

Vision
To be the preeminent intellectual and transformative force in improving health through nursing.

Philosophy
We want to meet the health needs of society in a global and multicultural world. To this end, we integrate scholarship, research, education, and practice to build a culture of inquiry that values intellectual curiosity and collaboration.

Scholarship and Research
We believe that the arts and sciences are the basis for nursing knowledge and scholarship. The former—nursing knowledge—defines empirical, philosophical, historical, ethical, and personal ways of knowing; the latter—scholarship—encompasses research and the integration of research into practice and health policy formation.

Penn Nursing is responsive to today’s health care influences, like evolving models of care, consumer advocacy, demographic changes, and advances in science and technology, and our faculty (https://www.nursing.upenn.edu/about/our-faculty/) are committed to pushing the boundaries of nursing science.

Education
A Penn Nursing education leads our students toward meeting their academic and professional goals. Our educational environment fosters independence, ethical behavior, critical thinking, and sensitive interactions concerning cultures and viewpoints.

All of our programs—from baccalaureate to post-doctoral—are enriched by the varied perspectives of a culturally diverse population.

The baccalaureate program (https://www.nursing.upenn.edu/academics/bachelor-of-science-in-nursing-bsn/), including traditional and second degree students, focuses on professional nursing practice across the continuum of healthcare, specifically within vulnerable populations. The curriculum reflects changes in science and technology, and emphasizes evidence-based practice and interdisciplinary collaboration.

The Master’s programs (https://www.nursing.upenn.edu/academics/master-of-science-in-nursing-msn/) focus on advanced practice nursing and administration, with an emphasis on specialty and subspecialty practice to meet our changing societal needs. Graduate nurses are prepared to creatively combine knowledge and skills, with special attention given to clinical decision-making and management.

The Doctor of Nursing Practice Degree (https://www.nursing.upenn.edu/academics/doctor-of-nursing-practice-dnp/) is dedicated to advancing the discipline of nursing through the translation and dissemination of research. Graduates build on their education and experience to become innovative health care leaders at the top of their fields, improving health around the world through policy, practice, and research.

Pre- and post-doctoral education (https://www.nursing.upenn.edu/academics/doctor-of-philosophy-in-nursing-phd/) is set up to advance nursing through research. The goal is to equip students with a foundation that allows them to make substantive contributions to nursing scholarship. Strong faculty mentorship (https://www.nursing.upenn.edu/academics/a-penn-nursing-education/mentorship/) is integral to these programs.

Practice
Nursing is an evidence-based, caring profession that improves the health and quality of life for individuals, families, and communities throughout the world; nursing practice (https://www.nursing.upenn.edu/practice/), then, is defined as the construction, application, and evaluation of knowledge and action within our field.

Nursing care must function in both autonomous and collaborative health care settings, and Penn Nursing serves as the model for caring in a global and multicultural context; here, we seek to promote health in every part of the world (https://www.nursing.upenn.edu/global-health/) by preparing nurses to be responsive to the needs of all societies. Our goals are to improve and maintain optimal health, prevent disease, enhance the quality of recovery from illness, and support patients and families as they cope with health problems.

We are proud to see our work improving patient care across the world.

Revised Mission and Philosophy approved by the School of Nursing Faculty Senate 2/3/03.

Revised Mission and Philosophy approved by the School of Nursing Faculty Senate 5/7/12.

Revised Practice statement approved by the School of Nursing Faculty Senate 4/8/13.

Revised Mission approved by the School of Nursing Faculty Senate 10/5/15.

Revisions approved by the School of Nursing Dean’s Advisory Group 7/23/2020.

The Office of Nursing Research (http://nursing.livewhale.net/research/onor/), along with our four research centers (http://nursing.livewhale.net/research/research-centers/) and partnerships across Penn, provide
students with resources and support that are virtually unparalleled in our field. Students, from undergraduates to doctoral students, have numerous opportunities to engage in research and work alongside some of the most recognized researchers in their fields.

For more information, visit: https://www.nursing.upenn.edu/research/.

Accreditation is a hallmark of educational quality, and we are proud to share our credentials on our website: http://www.nursing.upenn.edu/about/accreditation/.

Penn Nursing students benefit from a dual advising structure. All students are assigned a faculty advisor and have access to the professional staff advisors in the Office of Academic Affairs.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/accelerated/.

**Curriculum**

**Baccalaureate Program Objectives Leveled by Year**

The faculty has defined behaviors that each student must achieve before progressing to the next level. The objectives are leveled by year: level 1 references freshman year; level 2 references sophomore year, and so on. Students are encouraged to refer to these objectives at the mid-point of the semester and again at the end of the semester to actively participate in the learning and self-evaluation processes.

**End of Program. Synthesize knowledge from the humanities and the natural and social sciences as the basis for continuing personal, intellectual, social, and professional development.**

**Level 3.** Apply knowledge from the humanities and the natural and social sciences in the development of the role of nurse in patient care situations in acute care settings.

**Level 2.** Articulate the relevance of knowledge from the humanities and the natural and social sciences to the evolving role of the nurse.

**Level 1.** Demonstrate knowledge of the interrelationship of the humanities and the natural and social sciences as a basis for the development of nursing practice and as a source of personal development.

**End of Program. As a generalist, use theoretical and scientific bases for nursing to deliver nursing care to clients as individuals, families, communities, and organizations in a variety of settings at any level of wellness, illness, and risk.**

**Level 3.** Apply theoretical and scientific bases for nursing practice related to individuals and families with potential or actual health-related problems in acute care settings.

**Level 2.** Demonstrate the use of theoretical and scientific bases for nursing practice related to risk assessment and health promotion activities to individuals within selected communities and healthcare agencies.

**Level 1.** Identify theoretical and scientific bases for nursing practice.

**End of Program. Apply research findings to evaluate and improve nursing care and the healthcare system.**

**Level 3.** Appraise the relevance, quality, and applicability of research in decision making related to patient care.

**Level 2.** Discuss the research implications for various nursing practice environments.

**Level 1.** Recognize the relationship between research and nursing practice.

**End of Program. Assume responsibility for providing nursing care in a collaborative relationship with individuals and groups in a variety of settings.**

**Level 3.** Participate in providing nursing care in a collaborative relationship with individuals and families in complex healthcare settings.

**Level 2.** Participate in providing nursing care in a collaborative relationship with individuals, selected communities, and healthcare agencies.

**Level 1.** Observe the process of how nurses collaborate with individuals.

**End of Program. Participate in collaborative relationships with colleagues through referral, consultation, planning, and evaluation.**

**Level 3.** Initiate a collaborative relationship with colleagues to facilitate consultation, referrals, planning, and evaluation in a complex healthcare setting.

**Level 2.** Participate in a collaborative relationship with colleagues by consultation, planning, and evaluating selected communities and healthcare agencies.

**Level 1.** Identify various interdisciplinary roles in healthcare.

**End of Program. Demonstrate leadership and management skills through direction and support of clients and colleagues as individuals, families, communities, and organizations.**

**Level 3.** Integrate an understanding of leadership and management skills through the direction and support of colleagues, individuals, and families in acute care settings.

**Level 2.** Provide peer support and management of individual clients in selected communities and healthcare agencies.

**Level 1.** Define leadership and management skills using professional organizations as a model.

**End of Program. Participate as an agent of change in scientific, social, and political action for the advancement of research, healthcare, and policy at any level from local to international.**
Level 3. Initiate change for the advancement of research and healthcare in an acute care setting.

Level 2. Participate as an agent of change to effect modification in health promotion behavior and level of wellness in selected local communities and healthcare agencies.

Level 1. Recognize the need for change related to healthcare reform and policymaking at the national level.

End of Program. Communicate coherently, comprehensively, and systematically in written and oral forms as they pertain to nursing care, collaboration, research, and policy.

Level 3. Analyze written and oral communication patterns and recommend modification if necessary as they pertain to nursing care, collaboration, and research.

Level 2. Demonstrate therapeutic and professional oral communication with individuals, groups, and peers in selected local communities and healthcare agencies.

Level 1. Demonstrate effective written communication skills.

End of Program. Perform clinical skills appropriate to generalist nursing practice, with competence and judgment within specific settings.

Level 3. Demonstrate advanced nursing skills with competence and judgment in acute care settings.

Level 2. Demonstrate and expected level of judgment in basic nursing skills in selected communities and healthcare agencies.

Level 1. Identify components of professional nursing practice.

BSN Undergraduate Curriculum Organizing Framework and Vision

Class of 2015 and Beyond (Accelerated BSN Class of December 2014 and Beyond)

Learn more about Penn Nursing’s mission, vision, and values at https://www.nursing.upenn.edu/about/mission-and-values/.

Penn’s baccalaureate curriculum brings structure to the School’s mission, vision, and values by centering on the primacy of nursing practice situated in caring relationships that facilitate health and healing. The baccalaureate curriculum builds on this conceptualization of nursing as it moves students toward increasingly contextualized understandings of individuals, families, communities, and populations living with health and illness. It also moves students into increasingly complex situations and care environments as they experience the dynamic nature of nursing’s embeddedness in health care systems, social structures, and society.

The baccalaureate curriculum concentrates on four intersecting core themes that characterize the complex and contextual nature of nursing practice: engagement, inquiry, judgment, and voice. The competencies derived from this framework are not intended to be achieved in a sequential manner. Rather, this framework explicates competencies that are fluid, adapt to various learning experiences when presented in the curriculum, and essential to the formation of a graduate nurse’s professional identity. The application of these themes is demonstrated in the following examples:

Engagement: The student understands the relationships among:

• Caring relationships with individuals, families, and patient populations
• Collegial intra-disciplinary, interdiscipliary, and multidisciplinary collaborative relationships
• Observer and participant in policies and politics
• Situational advocacy and civic commitment to social and political change

Inquiry: The student understands the relationships among:

• Knowledge use, acquisition, and development
• Scientific ways of knowing patients and families and multidimensional and contextual ways of knowing
• Knowledge and implementation of humanistic understandings in practice and research
• Evidence-based practices and the social and political processes of practice with less clear scientific rationales
• Knowledge of how to use and manipulate technological information systems to acquire meaningful data
• Knowledge use and ongoing clinical knowledge development
• Measures of quality in clinical care environments

Judgment: The student understands the relationships among:

• Acquisition of knowledge and skill and the integration of both within relational practices with individuals, families, communities, populations, and healthcare systems
• Knowledge of individuals and families and collective knowledge about communities, populations, and systems
• Core nursing knowledge and integrated knowledge
• Situated judgment and clinical know-how

Voice: The student understands the relationships among:

• Observer, advocate, and moral agent
• Facilitation of patient and family learning and advocacy affecting social and political practices
• Informal methods of dialogue, discourse, and debate and those necessary for formal writing and publication and for joining a community of scholars
• Vision for self and the profession

Nursing Major 29.5
Total Course Units 40.5

More information including individual course requirements can be found in the BSN Handbook (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/degree-requirements/). Students who are receiving their second bachelor's degree in nursing (known as "second degree students" or "MSN/BSN students") are not required to complete the liberal arts component while at Penn. All plans of study include an 11 course unit waiver for liberal arts requirements because students who have already completed one undergraduate degree are exempt from all sector requirements, the language requirement, the writing requirement, and free electives. If you have questions regarding your plan of study or the requirements specific to your program, please reach out to the Office of Academic Affairs: http://www.nursing.upenn.edu/student-services/advising/.

**Majors**
- Nursing, BSN (p. 245)
- Nutrition Science, BSN (p. 248)

**Nursing, BSN**

Penn Nursing combines the resources and opportunities of a large university with the intimacy and personal attention of a small college. Our traditional four-year BSN is a direct-entry program for graduating high school seniors.

At Penn Nursing, you will learn from a passionate faculty (http://www.nursing.upenn.edu/about/our-faculty/) whose accomplishments are recognized worldwide. You will benefit from the academic opportunities (http://www.nursing.upenn.edu/academics/bachelor-of-science-in-nursing-bsn/) of an Ivy League university while enjoying a fun and fulfilling campus life (http://www.nursing.upenn.edu/about/our-students/student-life/). You will gain clinical experience (http://www.nursing.upenn.edu/practice/practice-partners/) in some of the nation's top hospitals, located just steps from your classrooms. And you will have the chance to participate in faculty-driven research (http://www.nursing.upenn.edu/research/), supported by state-of-the-art technology (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/learning-through-simulation/). Penn Nursing graduates are the leaders shaping the future of health care practice, policy, research, and education.

The nursing program integrates science, nursing, and liberal arts education to prepare future nurses with skills necessary for caring for diverse, complex patients, families and communities. Students are encouraged to take advantage of the many educational opportunities at Penn that intersect with the four undergraduate schools. For traditional students, clinicals begin in the spring of your sophomore year, and students have experiences in primary care, acute care, women's health, and mental health settings working with patients from newborns to older adults.

1 Sector requirements can be taken in any order. For more information on sector requirements, refer to the BSN Handbook (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/).

2 Free electives and language requirement courses may be taken pass/fail. For more detailed information on pass/fail policies, refer to the Pass/Fail section in the BSN handbook (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#pass/fail).

The Nursing Case Study can be taken during the junior or senior year (following completion of NURS 1640 Integrated Human Anatomy, Physiology & Physical Assessment II). Only one course is required from the case study group.

Students must consult with an academic advisor prior to making revisions to the plan of study to ensure that the necessary curricular requirements are being met and to prevent delays in academic progression.

The following sample Plan of Study is just one possibility for second-degree students, and individual plans depend on what prerequisites students have fulfilled prior to matriculating at Penn. This plan may not be compatible with several academic options you might choose (e.g., submatriculation, study abroad, minors, etc.). If you are interested in pursuing any of the special academic options available to you during the course of your undergraduate experience and want to know how this will alter your plan of study, please contact your faculty advisor and/or the Office of Student Services at 215-898-6687 or advisor@nursing.upenn.edu. Please note that all plans of study are subject to curricular change.

#### First Year - Fall
Nutrition Science, BSN

Our Bachelor of Science in Nutrition Science major is an interdisciplinary collaboration with Penn’s School of Arts & Sciences. You will study concepts like dietary behaviors and metabolism, as well as scientific approaches to the physiological roles of nutrients in the diet, from the cellular to human level. You will explore the role of nutrition in cancer, cardiovascular diseases, diabetes, and obesity, which together account for nearly seventy percent of global mortality. We believe that the next generation of nurse researchers and clinicians need a well-rounded background in nutrition science, social sciences, and public health, and we built this innovative program with these goals in mind.

The major consists of 14 course units: six basic science courses (such as cellular biology, anatomy and physiology, and chemistry), four fundamental nutrition science courses, and four electives. Penn Nursing BSN undergrads can add this as a second major.

For more information: https://www.nursing.upenn.edu/nutrition-major/

1. There is some flexibility as to when these courses can be taken (fall vs. spring). Please consult with an advisor about your options and course offerings.
2. See the BSN Handbook (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/) for an approved list of courses.

## Notes

1. All plans of study are subject to curricular change. Students must consult with an academic advisor prior to making revisions to the plan of study to ensure that the necessary curricular requirements are being met and to prevent delays in academic progression.
2. Clinical experiences may include evenings, weekends, and 12-hour shifts. Most clinical rotations are accessible by public transportation; however, a car may be necessary for transportation to some clinical sites.
3. Course work outside the School of Nursing is not permitted, with the exception of approved non-nursing courses for the Health Care Ethics and Health Policy requirements.
NURS 1630  Integrated Anatomy, Physiology, and Physical Assessment I  2
NURS 1640  Integrated Human Anatomy, Physiology & Physical Assessment II  2

1 See the BSN Handbook (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/degree-requirements/) for a list of approved Health Policy courses.
2 See website (https://www.nursing.upenn.edu/nutrition/nutrition-major/plan-of-study/) for list of approved elective courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Minors
- Global Health, Minor (p. 249)
- Health Communications, Minor (p. 249)
- History, Health and the Humanities, Minor (p. 250)
- Nursing and Health Services Management, Minor (p. 250)
- Nutrition, Minor (p. 251)

BSN students are also eligible to complete no more than half of an MSN minor while enrolled as an undergraduate student. For more information, visit: https://www.nursing.upenn.edu/academics/master-of-science-in-nursing-msn/minors/.

Global Health, Minor
The ever-growing threat of pandemics, terrorism, natural disasters, and climate-related challenges has sharpened the need for skilled nurses who understand the global interconnectedness of health. We need nurses who are experienced both clinically and culturally, who are ready to meet the rapidly-changing needs of patients, no matter where they live.

Available exclusively to Penn Nursing students at both the undergraduate and graduate level, our Global Health minor is an opportunity to increase your knowledge of the world and the factors that contribute to the health of populations. We take a cross-disciplinary approach to help you integrate your knowledge of nursing, culture, and diversity to more effectively engage with patients locally, nationally, and around the world.

For more information: https://www.nursing.upenn.edu/global-health-minor/

The Global Health Minor requires a total of 6 course units.

Minors

Health Communications, Minor
The Health Communication minor is a collaboration between the School of Nursing and the Annenberg School for Communication. This program
expands students’ knowledge of the communication process, theory, and behavior, and it prepares them for roles as professionals who develop cutting edge models for health behavior intervention or implement patient education and health communications programs locally, nationally, and globally.

For more information: http://www.nursing.upenn.edu/health-communications-minor/

Health Communications Minor requires a total of 6.5 course units. You must select 3 courses from Nursing and 3 courses from Communication.

Total Course Units 6.5

1 At least 1 elective course must be in the School of Nursing.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

History, Health and the Humanities, Minor

A number of universities have forged bridges between the humanities and sciences to nourish students intellectually, build self-awareness, consider social justice-related phenomena through a new lens, and help them develop empathy. The School of Nursing has launched a new minor in History, Health and the Humanities for undergraduate students. This innovative initiative provides students with the tools and perspectives to study clinical issues in ways different than the lens provided by natural or social sciences. It amplifies the humanities component of the Judgement, Inquiry, Voice, and Engagement pillars that define the "Penn Advantage." It offers formalized opportunities for writing, both reflective and analytical, beyond that available in the required nursing curriculum.

Student enrolled in this minor will be considered Bates’ Center associates and will be invited to lunches, dinners, and other events with visiting scholars and faculty.

For more information: https://www.nursing.upenn.edu/academics/bachelor-of-science-in-nursing-bsn/minors/

The History, Health and the Humanities Minor requires a total of 6 course units.

For more information contact the director of the History, Health and the Humanities minor, Cynthia Connolly PhD RN FAAN at cac1@nursing.upenn.edu.

Nursing and Health Services Management, Minor

The delivery of health care increasingly involves decisions that entail considerations beyond clinical or medical issues. With the rise of managed care in the United States, it is critical for health professionals to understand not only the clinical factors that affect patients but also the business environment in which healthcare institutions function. This program, a partnership between the School of Nursing and The Wharton School, helps students understand both the nature of the economic and managerial constraints that healthcare organizations face, and how to effectively manage these constraints to provide the best possible health care for patients.

For more information: http://www.nursing.upenn.edu/nursing-and-health-services-management-minor/

The Nursing and Health Services Management Minor requires a total of 8 course units.
**Nutrition, Minor**

Jointly sponsored by the Schools of Nursing and Arts and Sciences, the Nutrition Minor presents a broad view of the field and illustrates the pervasiveness of nutrition-related issues in such diverse fields as anthropology, economics, folklore, history, physiology, psychology, health care, and public policy.

For more information: [http://www.nursing.upenn.edu/nutrition-minor/](http://www.nursing.upenn.edu/nutrition-minor/)

The Nutrition Minor requires a total of 6 course units.

---

**Academic Opportunities**

Penn Nursing offers a wide variety of supplemental academic opportunities designed to enhance your academic experience and professional development.

For more information, visit: [http://www.nursing.upenn.edu/student-services/advising/opportunities/](http://www.nursing.upenn.edu/student-services/advising/opportunities/)

**Benjamin Franklin Scholars Program - Nursing** ([http://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program/](http://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program/))

The Benjamin Franklin Scholars (BFS) Program for Nursing ([http://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program/](http://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program/)) seeks to foster the development of the next generation of nurse achievers - scholars, leaders, and researchers - through intellectual rigor, academic excellence, and outstanding achievements. Scholars are required to complete four Benjamin Franklin Seminars - small, intensive classes in a wide range of disciplines across the liberal arts and sciences - and a Capstone Honors course in the Nursing school.

**Dual Degrees** ([http://www.nursing.upenn.edu/academics/dual-degrees/](http://www.nursing.upenn.edu/academics/dual-degrees/))

We recognize the value of interdisciplinary learning, which is why student at all levels - undergraduate, masters, and doctoral - can pursue a dual degree with other schools across campus. Our Dual Degree ([http://www.nursing.upenn.edu/academics/dual-degrees/](http://www.nursing.upenn.edu/academics/dual-degrees/)) page provides a complete listing of our approved programs.
Global Opportunities (http://www.nursing.upenn.edu/global-health/student-opportunities/)

Penn Nursing offers a variety of international experiences for students in the BSN and MSN programs, which range from short-term opportunities that focus on comparative healthcare in international contexts, to full-semester clinical experiences.

Hillman Scholars Program in Nursing Innovation (http://www.nursing.upenn.edu/accelerated-options/bsn-phd-hillman-scholars/)

The Hillman Scholars Program in Nursing Innovation (http://www.nursing.upenn.edu/accelerated-options/bsn-phd-hillman-scholars/) is an integrated BSN-to-PhD program designed to educate a new cadre of nurse scientists and leaders to develop innovative solutions in healthcare. The program is available for current Penn Nursing undergraduate students, as well as students applying to the Accelerated Second Degree BSN program.

Minors (p. 249)

Penn Nursing offers a variety of minors in such in-demand areas as global health, palliative care, health services management, and oncology. Adding a minor allows students to complement their major by diving more deeply into a specific area of inquiry.

Nutrition Major (p. 248)

Our Nutrition major (http://www.nursing.upenn.edu/nutrition-major/) is an interdisciplinary collaboration with Penn's School of Arts & Sciences. You will study concepts like dietary behaviors and metabolism, as well as scientific approaches to the physiological roles of nutrients in the diet, from the cellular to human level.

Research Opportunities (http://www.nursing.upenn.edu/research/student-research/)

Students have numerous opportunities to engage with research at Penn Nursing, whether that means participating in one of the school-supported research centers, applying for a prestigious fellowship through the Center for Undergraduate Research and Fellowships (http://www.upenn.edu/curf/) (CURF), or working one-on-one with a faculty mentor on a student-driven research project.

Submatriculation (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/submatriculation/)

One of the most popular options at Penn Nursing, submatriculation allows undergraduate students the opportunity to apply to a graduate program and begin coursework while completing the BSN degree. Students can apply to any of the MSN majors (http://www.nursing.upenn.edu/academics/) here at Penn Nursing, or to Penn Law.

School Policies

The majority of Penn Nursing policies can be found in the Policies and Procedures (p. 314) section of the Catalog.

The following additional policies apply specifically to School of Nursing students:

- Statement of Personal Attributes and Capabilities (https://www.nursing.upenn.edu/live/files/218-statement-personal-attributes-and-capabilities/)

  The curricula leading to degrees in nursing require students to engage in diverse and complex experiences directed to the practice, refinement and full acquisition of essential nursing competencies and functions. Unique combinations of cognitive, behavioral, sensory, communication, psychomotor, and communication abilities are required to perform these functions in a satisfactory manner and to consistently demonstrate these competencies. In addition to being essential to the successful completion of the requirements for the respective nursing degree, these competencies and functions are necessary to ensure the health and safety of patients, fellow students, faculty and other health care providers. This statement describes the minimum competencies and functions necessary for entrance to, continuation in, and graduation from the nursing degree programs of the School of Nursing at the University of Pennsylvania. Candidates for nursing degrees must be able to meet these minimum standards with or without reasonable accommodation.

- Student Social Media Policy (https://www.nursing.upenn.edu/live/files/217-student-social-media-policy/)

  This document serves as the official policy for student use of social media at the SON. These guidelines apply to all students creating or contributing to any kind of social media affiliated with the SON. Please check back periodically to make sure you're up to date. We trust that you will adhere to these policies. If, for any reason an incident occurs that violates the policy, we expect you to bring it to our attention immediately so we can work together toward a resolution.

- Student Substance Abuse Policy (https://www.nursing.upenn.edu/live/files/219-student-substance-abuse-policy/)

  The School of Nursing recognizes the importance of educating its students about the problems of substance abuse because this significant health risk, and in many cases, criminal matter, is unfortunately prevalent among healthcare providers. Aside from impacting upon the personal and psychological integrity of the abusers, substance abuse may significantly impact the ability of healthcare providers to administer safe, competent patient care. Recognizing that substance abuse is both a disease and a professional hazard, the School of Nursing has incorporated substance abuse topical content areas into its curriculum. The School of Nursing has likewise established this substance abuse policy. This policy impacts upon and augments the student’s ability to maintain personal and professional integrity, and facilitates the student’s success both clinically and didactically. It promotes a
healthy learning environment for the student. In the clinical setting, this policy enhances patient safety. It also fosters the development of professional nurses who are well educated about the prevalence and adverse outcomes of substance abuse.
THE WHARTON SCHOOL

Founded in 1881 as the world’s first collegiate business school, the Wharton School (https://www.wharton.upenn.edu/) of the University of Pennsylvania is shaping the future of business by incubating ideas, driving insights, and creating leaders who change the world. With a faculty of more than 235 renowned professors, Wharton has 5,000 undergraduate (https://undergrad.wharton.upenn.edu/), MBA (https://mba.wharton.upenn.edu/), executive MBA (https://executivemba.wharton.upenn.edu/), and doctoral (https://doctoral.wharton.upenn.edu/) students. Each year 13,000 professionals from around the world advance their careers through Wharton Executive Education’s (https://executiveeducation.wharton.upenn.edu/) individual, company-customized, and online programs. More than 99,000 Wharton alumni form a powerful global network of leaders who transform business every day.

For more information, visit www.wharton.upenn.edu (https://www.wharton.upenn.edu/).

The Wharton School of the University of Pennsylvania was a remarkable innovation when Joseph Wharton, a self-educated 19th-century industrialist, first proposed its establishment more than 135 years ago. Wharton believed the role of business was to advance society as a whole, creating new wealth and economic opportunity for all people. He approached the Trustees of the University of Pennsylvania in 1880 to establish a new kind of institution specifically designed to prepare leaders for business and public service. His suggestion was a radical one, but also remarkably prescient. With the admission in 1881 of the first class of students — just 13 undergraduates — Joseph Wharton and the University of Pennsylvania created a successful formula that forever changed the landscape of business and education. Now, more than 1 million students graduate each year from more than 13,000 graduate and undergraduate business programs around the world.

The Wharton School remains a leader in business education through a steadfast commitment to our founder’s vision of applying unparalleled intellectual resources to prepare young men and women for leadership in the global society. With programs on every continent, Wharton continues to educate and empower the best minds in business.

Research provides an individualized method of learning and an in-depth treatment of a topic of personal interest with input from a faculty expert. Research experience is helpful if applying for distinguished faculty member. Research assistantships (https://undergrad-inside.wharton.upenn.edu/research/assistantships/) — Learn by executing research-related tasks while working on a project for a faculty member.

• Summer programs (https://undergrad-inside.wharton.upenn.edu/research/summer-opportunities/) — Gain hands-on experience from proposal to presentation through a project commensurate with program duration.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/research/.

The University of Pennsylvania Wharton School is accredited by AACSB – the International Association for Management Education.

1916: AACSB founded initially as the Association of Collegiate Schools of Business (ACSB); constitution is adopted June 17, 1916. Founding members include the following: Columbia University • Cornell University • Dartmouth College • Harvard University • New York University • Northwestern University • Ohio State University • Tulane University • University of California, Berkeley • University of Chicago • University of Illinois • University of Nebraska • University of Pennsylvania • University of Pittsburgh • University of Texas • University of Wisconsin–Madison • Yale University

For more information, visit: http://www.aacsb.edu/.

The goal of the Wharton Undergraduate Division academic advising team is to help students make informed decisions about their educational plans and professional/life goals that are consistent with their interests, abilities, and values.

Advising by appointment, walk-in advising, and specialized advising (https://undergrad-inside.wharton.upenn.edu/advising-services/#specialized_advising) are services available in 1400 Steinberg-Hall Dietrich Hall to current Wharton undergraduate students. Professional advisors (https://undergrad-inside.wharton.upenn.edu/advising-services/), concentration advisors (https://undergrad-inside.wharton.upenn.edu/concentration-advisors/), and peer advisors (https://undergrad-inside.wharton.upenn.edu/peer-advising/) are available to assist students.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/advising-services/.

Curriculum

All Wharton single-degree undergraduate students must complete a minimum of 37 course units and meet the curricular requirements described below. Students enrolled in a coordinated dual-degree (https://undergrad-inside.wharton.upenn.edu/coordinated-dual-degree/) program should check with their program advisor to learn about their unique requirements. For a Wharton single-degree undergraduate student, the standard course load is 4 to 5 CUs per semester (see a sample course sequence (https://undergrad-inside.wharton.upenn.edu/sample-curriculum/)).

The requirements of the Wharton single-degree curriculum are delineated on the academic planning worksheet (https://undergrad-inside.wharton.upenn.edu/download/academic-planning-worksheet-2017/?wpdmdl=3785). Details about these requirements are available via the links below. Students are encouraged to see an academic advisor (https://undergrad-inside.wharton.upenn.edu/advising-services/) for any questions about the requirements of their academic program.
First-Year Foundations
Economics (https://undergrad-inside.wharton.upenn.edu/econ/)
1 required course unit: BEPP 1000

Math (https://undergrad-inside.wharton.upenn.edu/requirements/math/)
Select 1 of the following: MATH 1070 or MATH 1400

Writing (https://undergrad-inside.wharton.upenn.edu/requirements/writing/)
1 required course unit: Critical Writing Seminar

Business
Leadership Journey (https://undergrad-inside.wharton.upenn.edu/leadership-journey/)
3 required courses: WH 1010, WH 2010, MGMT 3010
1 senior capstone (https://undergrad-inside.wharton.upenn.edu/senior-capstone/) course or project

Business Fundamentals (https://undergrad-inside.wharton.upenn.edu/business-fundamentals/)
11 required courses: ACCT 1010, ACCT 1020, BEPP 2500, STAT 1010, STAT 1020, FNCE 1000, FNCE 1010, LGST 1000 or LGST 1010, MGMT 1010, MKTG 1010, OIDD 1010

1 required course unit

Technology, Innovation, and Analytics (https://undergrad-inside.wharton.upenn.edu/technology-innovation-analytics/)
1 required course unit

Business Breadth (https://undergrad-inside.wharton.upenn.edu/business-breadth/)
3 required course units

Concentration (Business Depth) (https://undergrad-inside.wharton.upenn.edu/concentrations/)
4 required course units

Liberal Arts & Sciences
Foreign Language Requirement (https://undergrad-inside.wharton.upenn.edu/foreign-language-requirement/)
7 required course units

- Humanities
  - At least 1 course unit
- Natural Science, Math, and Engineering

Unrestricted
Electives (https://undergrad-inside.wharton.upenn.edu/unrestricted-electives/)
5 required course units

Concentrations
All students graduate from Wharton with a Bachelor of Science in Economics; however, each student is required to choose a concentration, which consists of four upper-level courses that explore a particular area of business in depth.

- Accounting, BS (p. 256)
- Behavioral Economics, BS (p. 256)
- Business Analytics, BS (p. 257)
- Business Economics and Public Policy, BS (p. 259)
- Business, Energy, Environment, and Sustainability, BS (p. 261)
- Diversity, Equity and Inclusion, BS (p. 262)
- Entrepreneurship and Innovation, BS (p. 267)
- Environmental, Social, and Governance Factors for Business
  - Business, Energy, Environment and Sustainability, BS (p. 263)
  - General, BS (p. 264)
  - Social and Governance Factors, BS (p. 266)
- Finance, BS (p. 269)
- Health Care Management and Policy, BS (p. 270)
- Individualized, BS (p. 271)
- Legal Studies & Business Ethics, BS (p. 272)
- Management
  - General Track, BS (p. 274)
  - Multinational Management Track, BS (p. 275)
  - Organizational Effectiveness Track, BS (p. 276)
  - Strategic Management Track, BS (p. 277)
- Marketing & Communication, BS (p. 278)
- Marketing & Operations Management, BS (p. 279)
- Marketing, BS (p. 280)
- Operations, Information & Decisions
  - Decision Processes Track, BS (p. 281)
  - General Track, BS (p. 282)
  - Information Systems Track, BS (p. 283)
  - Operations Management/Management Science Track, BS (p. 284)
- Real Estate, BS (p. 285)
- Retailing, BS (p. 286)
- Social Impact & Responsibility, BS (p. 288)
- Statistics and Data Science, BS (p. 288)
Accounting, BS

Although strong quantitative skills and attention to detail are important qualities for an accounting concentration, students need to acquire other skills as well. Many students find the accounting concentration to be useful preparation for careers in consulting, investment banking, general management, public accounting, and securities analysis.

Behavioral Economics, BS

This new collaborative field, behavioral economics, has provided an understanding of how people's decisions deviate from "optimal" choices and the consequences of such deviations for consumers, managers, firms, and policy. This joint concentration between the Operations, Information, and Decisions Department and the Business Economics and Public Policy Department explores the behavioral aspects of economics and decision making.

This concentration provides students with the opportunity to develop an understanding of (a) the rational actor model, (b) modifications to that model that reflect the psychology of human behavior, and (c) implications of those modifications for decision-makers, markets, and public policy.

For more information: https://bepp.wharton.upenn.edu/programs/undergraduate/program-information1/behavioral-economics/

¹ For students who take ECON 0100 Introduction to Micro Economics and ECON 0200 Introductory Economics: Macro in place of BEPP 1000 Introductory Economics for Business Students of these courses can be slotted for BEPP 1000 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

² Two can double-count as Humanities; Natural Science, Math & Engineering; Social Science; or Flex Gen Ed.

**Business Analytics, BS**

The Business Analytics joint concentration between the OID and STAT departments is designed to build deep competency in the skills needed to implement and oversee data-driven business decisions, including (i) collecting, managing, and describing datasets, (ii) forming inferences and predictions from data, and (iii) making optimal and robust decisions. Business analytics makes extensive use of statistical analysis, and the applications of business analytics span all functional areas.

Students choosing the Business Analytics concentration are ideally suited for the growing set of careers broadly defined under the header of “data science” with responsibilities for managing and analyzing data. In addition, the concentration provides an excellent complement to students who choose to focus on one of the functional areas of business (e.g., accounting, finance, marketing, operations).

For more information: [https://oid.wharton.upenn.edu/programs/undergraduate/business-analytics-joint-concentration/](https://oid.wharton.upenn.edu/programs/undergraduate/business-analytics-joint-concentration/)

---

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Business Economics and Public Policy, BS
The Business Economics and Public Policy concentration offers a wide range of courses for students interested in the role of economics in business, competition and public policy. Our courses specialize in market structure and competition, insurance and risk management, behavioral economics, energy, public finance, business & international politics, and business and development. A concentration in Business Economics and Public Policy is vital for students planning a career in consulting, the public sector, industries with a high social impact factor, and anyone with a general interest in how economics interacts with law, policy, and politics.

1 At least two of the electives need to be BEPP courses and could include the remaining two BEPP Fundamentals. Additional course substitutions require the approval of the BEPP department’s undergraduate advisor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

¹ For students who take ECON 0100 Introduction to Micro Economics and ECON 0200 Introductory Economics for Business Students of these courses can be slotted for BEPP 1000 on the worksheet. The second course may be used to fulfill a General Education Division or Unrestricted Elective requirement.

² Two can double-count as Humanities; Natural Science, Math & Engineering; Social Science; or Flex Gen Ed.
Business, Energy, Environment, and Sustainability, BS

The Undergraduate Concentration in Business, Energy, Environment, & Sustainability is designed to provide in-depth foundations for those interested in the complex relationships between business and the natural environment, management of environmental risks, and the business and economics of energy. As global energy markets grow and change rapidly and environmental challenges rise, there is a strong need for a new generation of expert business leaders who understand the rapidly evolving trends in business models, technology, regulation, and financing. Students choosing this concentration are therefore ideally suited for the ever-expanding set of careers in energy companies, clean-tech investing, energy banking, consulting, the non-profit world, and the government. Students will gain insight into these challenges through an inter-disciplinary approach. This concentration, which is housed in the Legal Studies and Business Ethics Department, includes relevant course offerings by departments including Business Economics and Public Policy, Finance, Legal Studies and Business Ethics, Management, Marketing, and Operations Information and Decisions. Up to one credit unit of coursework on business, energy, and the environment can be credited toward this concentration from the School of Arts and Sciences, the School of Engineering and Applied Science, the School of Design, among other programs, as specified below. Because this concentration is housed in the Legal Studies and Business Ethics Department, courses offered by Legal Studies and Business Ethics cannot be used toward the Business Breadth requirement.

The Undergraduate Concentration in Business, Energy, Environment, & Business requires four course units. At least three course units must be from the list of Wharton courses above. Up to one course unit may be from the following list of pre-approved non-Wharton courses (with prior approval of the Director of the Concentration)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Course Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CBE 5050</td>

</tbody>
</table>

If a student believes that a course is missing from this list, they may petition the Director of the Concentration to add the course to the list prior to the start of the semester in which the course will be taken, or at the latest, within the first two weeks of the semester. Requests after a course has been completed will not be granted. The request should include a copy of the syllabus for the course and a brief statement as to why the course should be added. Courses that are likely to be approved are non-Wharton courses in which the primary focus is on topics relating to energy, environment, and sustainability, such as those listed here: https://kleinmanenergy.upenn.edu/energy-courses (https://kleinmanenergy.upenn.edu/energy-courses/).

2023-24 Catalog | Generated 08/02/23
Diversity, Equity and Inclusion, BS

4.0 credit units are required beyond the Wharton core for the DEI concentration.

Students must take at least 1.5 credit units from the following foundational courses. The semester or quarter in which each class will tentatively be offered during the 2022-2023 academic year is shown in parentheses for planning purposes. Please consult the undergraduate course schedule (https://mgmt.wharton.upenn.edu/programs/undergraduate/course-schedule/) to confirm:

For more information: https://mgmt.wharton.upenn.edu/programs/undergraduate/dei-concentration/
Environmental, Social, and Governance Factors for Business: Business, Energy, Environment and Sustainability, BS

The Concentration/Major in Environmental, Social, and Governance Factors for Business (ESGB) is designed to provide in-depth foundations for those interested in the complex relationships between business and the natural environment and business and society more broadly, including management of environmental, social, and governance risks and opportunities, the business and economics of energy, and the ways in which firms incorporate ESG factors into their governance. There is a strong need for a new generation of expert business leaders who understand the rapidly evolving trends in business models, technology, regulation, and financing with implications for the environment and society as a whole. Students choosing the ESGB Concentration/Major are therefore ideally suited for the ever-expanding set of careers in many fields. Relevant courses are offered by departments including Accounting, Business Economics and Public Policy, Finance, Legal Studies and Business Ethics, Management, Marketing, and Operations Information and Decisions. This Concentration/Major is jointly administered by the Business, Economics and Public Policy Department, the Legal Studies and Business Ethics Department, and the Management Department. The Faculty Advisors to this Concentration/Major are Professors Arthur van Benthem (BEPP), Vit Henisz (MGMT) and Sarah Light (LGST). Questions regarding this Concentration/Major should be directed in the first instance to Sarah Jane McAffrey.

For more information: https://esg.wharton.upenn.edu/students/esg-concentration/

Environmental, Social, and Governance Factors for Business - Business, Energy, Environment and Sustainability Track

Undergraduate Students must take four credit units from the following list of courses:

<table>

1 For students who take ECON 0100 Introduction to Micro Economics and ECON 0200 Introductory Economics: Macro in place of BEPP 1000 Introductory Economics for Business Students of these courses can be slotted for BEPP 1000 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2 Two can double-count as Humanities; Natural Science, Math & Engineering; Social Science; or Flex Gen Ed.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Environmental, Social, and Governance Factors for Business: General, BS

The Concentration/Major in Environmental, Social, and Governance Factors for Business (ESGB) is designed to provide in-depth foundations for those interested in the complex relationships between business and the natural environment and business and society more broadly, including management of environmental, social, and governance risks and opportunities, the business and economics of energy, and the ways in which firms incorporate ESG factors into their governance. There is a strong need for a new generation of expert business leaders who understand the rapidly evolving trends in business models, technology, regulation, and financing with implications for the environment and society as a whole. Students choosing the ESGB Concentration/Major are therefore ideally suited for the ever-expanding set of careers in many fields. Relevant courses are offered by departments including Accounting, Business Economics and Public Policy, Finance, Legal Studies and Business Ethics, Management, Marketing, and Operations Information and Decisions. This Concentration/Major is jointly administered by the Business, Economics and Public Policy Department, the Legal Studies and Business Ethics Department, and the Management Department.
The Faculty Advisors to this Concentration/Major are Professors Arthur van Benthem (BEPP), Vit Henisz (MGMT) and Sarah Light (LGST). Questions regarding this Concentration/Major should be directed in the first instance to Sarah Jane McAffrey.

Entrepreneurship and Innovation, BS

The Entrepreneurship and Innovation concentration provides a cross-departmental set of skills, analytical tools, perspectives, and experiences to prepare students for careers as autonomous entrepreneurs, family-business entrepreneurs, or entrepreneurs in corporate settings. Whether a student wants to start a business while in school, join an emerging business, or set the groundwork to launch a new firm later in a career, the concentration prepares students for all of these exciting options by examining both entrepreneurial innovation and its surrounding ecosystem. Entrepreneurial skills and thinking are actively sought by more competitive and profitable growing businesses. The special strength of this program is that it combines theory with practice, providing students the opportunity to test the theories, models, and strategies learned in the classroom by creating real business plans,
working on other field projects, and gaining access and insight from leaders in the entrepreneurial business community.

The Entrepreneurship and Innovation concentration and related co-curricular activities are supported in part by the Goergen Entrepreneurial Management Program at the Wharton School's Venture Lab.

1. Students in the M&T Program must substitute MGMT 2370 in place of MGMT 2300 and MGMT 2670.
2. A minimum of one course unit must address 'Entrepreneurial Activity Within Organizations' and a minimum of one course unit must address 'Ecosystem Surrounding the Organization.' Courses that address both perspectives may be applied to either category, but not both.
3. Only one of MGMT 21400 and MGMT 2370 may be included in the major. Management and Technology students cannot take MGMT 2140.
4. Only one of MKTG 2210 and MKTG 2620 may be included in the major. Only one of MKTG 2270 and MKTG 2700 may be included in the major. Permission from the undergraduate advisor Allison Elias (eliasal@wharton.upenn.edu) is required to substitute a related course. Only 1.0 CU out of the four total CU may be allotted to the aggregate of Global Modular Courses, Global Virtual Courses, Advanced Study Projects, Independent Study Projects, and/or Research Theses.

1. For students who take ECON 0100 Introduction to Microeconomics and ECON 0200 Introductory Economics: Macro in place of BEPP 1000 Introductory Economics for Business Students of these courses can be slotted for BEPP 1000 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2. Two can double-count as Humanities; Natural Science, Math & Engineering; Social Science; or Flex Gen Ed.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Finance, BS

The finance concentration develops the skills necessary to work at a high level of expertise in all areas of finance, including:

- Asset management and Financial markets
- Investment banking in a global context
- The financial management of commercial and industrial enterprises as well as financial institutions;
- The financial aspects of venture capital, mergers and acquisitions; and global management consulting.

Concentrating in finance also equips students for careers in law and the public sector.

Health Care Management and Policy, BS

The concentration in health care management and policy focuses on the management, financing, and economics of the health care sector. Students learn about health care markets and factors that significantly influence decision making both at the policy level and at the level of the firm or organization. The health care sector includes government agencies, non-profit institutions, major private corporations, medical practices and partnerships, and many small and early-stage health care service and product firms.

This concentration prepares students for careers as managers in health care companies or health care service firms such as consulting, banking or health care IT companies, or government agencies. Students planning careers in the health professions such as medicine, nursing, or dentistry have found the concentration very useful in understanding the context in which they will be working.

---

**Individualized, BS**

Students have the option to design an individualized concentration if they cannot find a standard concentration that aligns with their interests. An individualized concentration consists of four CUs that are united by a common theme. An established concentration may also be tailored, with approval from the concentration advisor, to specific student interests by replacing a required course with one not on the list of courses that traditionally defines the concentration.

Students should note that (1) at least three of the courses must be business courses, and (2) a faculty member from the Wharton academic department most closely associated with the individualized concentration must sign off on the proposal.

Individualized concentration proposals are considered by the Undergraduate Division Petitions Committee. Students who wish to pursue an individualized concentration should complete the following steps on this website (https://undergrad-inside.wharton.upenn.edu/concentrations/individualized/).
For more information: https://undergrad-inside.wharton.upenn.edu/concentrations/individualized/

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Legal Studies & Business Ethics, BS**

The Legal Studies and Business Ethics Concentration focuses on the social values, moral concerns, and legal considerations that are essential aspects of business decision making in our global market system. The courses students take in this program help them explore how responsible business leaders can engage ethically and effectively with diverse cultures, corporate stakeholders, government regulators, and legal systems. Of special value to students seeking to broaden their business education, this concentration will help them acquire essential, non-quantitative reasoning skills that are required when leaders face difficult choices under conditions of empirical uncertainty and/or moral ambiguity – a frequent occurrence in fast-moving market economies.

Students pursuing this concentration will gain a number of analytic skills, including:

- Identifying moral and legal issues hidden within complex, culturally rich fact patterns
- Reasoning from moral principles to specific ethical and legal conclusions
- Reasoning by analogy between like cases and situations
- Arguing from authoritative rules and precedents to specific, logically consistent recommendations for action

Note: Only 1.0 cu out of the four total cu may be allotted to the aggregate of Global Modular Courses, Global Virtual Courses, Advanced Study Projects, Independent Study Projects, Financial Literacy Community Project, and/or Research Theses.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Management: Multinational Management Track, BS

The specialization in Multinational Management provides students with the toolkit to understand how global economic, political, and social forces influence the competitive environment of the firm. Topics include international trade, foreign investment and acquisitions, stakeholder engagement, political risk, foreign market entry, global teams, and global strategy. Students will learn how to evaluate the international environment and to operate in an increasingly complex global business landscape that shapes a variety of industries (e.g., consulting, financial services, real estate, social enterprise) and functions (e.g., strategic, technological, general or project management, business development, communications or marketing) at companies both large and small.

Management: Organizational Effectiveness Track, BS

A concentration in management prepares students to take on major managerial challenges and responsibilities in private, public, and nonprofit organizations. Students can pursue a general management concentration or choose from specialized tracks in strategic management, multinational management, organizational effectiveness, and entrepreneurship and innovation.

For more information: https://mgmt.wharton.upenn.edu/programs/undergraduate/management-specializations/organizational-effectiveness/

Two can double-count as Humanities; Natural Science, Math & Engineering; Social Science; or Flex Gen Ed.

Management: Strategic Management Track, BS

The specialization in Strategic Management prepares students who are interested in competitive and corporate strategy. A deeper understanding of strategy is useful for those who want to help companies with their strategies (e.g., through consulting), need to understand the strategies of companies (e.g., to make decisions of whether to invest in certain companies), and want to create new organizations and need to develop a strategy that would provide them with a competitive advantage in the market place.

1 For students who take ECON 0100 Introduction to Micro Economics and ECON 0200 Introductory Economics: Macro in place of BEPP 1000 Introductory Economics for Business Students of these
Marketing & Communication, BS

Marketing professionals must understand the communication process and the most effective methods of conveying information, regardless of whether they intend to focus on advertising, the development of web-based initiatives, or the conduct of market research. Students in this dual concentration will augment their understanding of the core concepts taught in their marketing courses and be better prepared for employment or graduate study. The dual concentration in marketing and communication allows Wharton students concentrating in marketing to take four courses in the Annenberg School of Communication and have this cluster of courses recognized on their transcript as a second concentration.

Students who wish to pursue a second concentration in communication must first declare a primary concentration in marketing. The concentration in communication may not be used as a primary or sole concentration.

For more information: https://undergrad-inside.wharton.upenn.edu/concentrations/mkcm/

Marketing & Operations Management, BS

The Marketing and Operations Management joint concentration emphasizes the importance of partnership between marketing and operations for new product development (NPD) in light of the fact that NPD is a critical company effort highly dependent on internal innovation processes. Given the complexity of these processes, the insights provided by cross-disciplinary collaboration can be particularly beneficial in many efforts, including:

- Creativity-based new product development
- Innovation in service manufacturing and new service development
- Customer response to next-generation products
- The use of conjoint analysis in engineering designs
- Platform-owner market entry
- Design-intensive innovation

Marketing, BS

Students pursuing a concentration in marketing acquire a solid grounding in applying the basic disciplines (e.g., psychology, economics, statistics) essential for understanding consumer and organizational buying patterns and developing successful marketing strategies. They also gain practical experience applying these concepts and methods via half-semester mini-courses (e.g., new product development, advertising, retailing). Many students with a marketing concentration have gone on to work in brand management, advertising, sales, marketing research, consulting, and entrepreneurial ventures.

1. This is a PhD course. Students need instructor permission and a permit from the department to enroll.
2. MKTG 2540 and MKTG 2880 cannot both be taken for credit.
3. MKTG 2270 and MKTG 2700 cannot both be taken for credit.
4. Special Topics and Experimental courses: Subject to approval of department concentration advisor.
5. MKTG 2240 and MKTG 2650 cannot both be taken for credit.
6. MKTG 2370 replaced Special Topics course MKTG 3510. MKTG 2370 and MKTG 3510 cannot both be taken for credit.

### Operations, Information & Decisions: Decision Processes Track, BS

The Decision Processes (DP) track establishes rigorous scientific foundations for describing, predicting, and improving the processes through which individuals and groups collect data and information, form judgments, and make decisions. This program examines descriptive theories and empirical research on human behavior that identify systematic biases in judgment and heuristics, or rules of thumb, that individuals and groups use to cope with complex decision-making and negotiations environments. It also examines the ways in which individuals and groups can make better decisions given their biases and information-processing limitations.

1 For students who take ECON 0100 Introduction to Micro Economics and ECON 0200 Introductory Economics: Macro in place of BEPP 1000 Introductory Economics for Business Students of these courses can be slotted for BEPP 1000 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2 Two can double-count as Humanities; Natural Science, Math & Engineering; Social Science; or Flex Gen Ed.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Operations, Information & Decisions: General Track, BS

Computer-based management systems and analytic approaches to decision making are increasingly vital to effective management in a range of industries across public and private sectors. As organizations develop and implement sophisticated decision-support systems, they increase the demand for managers who have the expertise to understand, create, and profitably exploit rapidly developing management technology. There is also a growing demand for skilled professionals who can effectively manage the operations encompassing the manufacturing and distribution of products and services.

The Operations, Information and Decisions curriculum prepares students to meet these challenges by providing a rigorous foundation of coursework across different but complementary disciplines, including decision processes, information systems, and operations management/management science.

**Operations, Information & Decisions: Information Systems Track, BS**

The Information Systems track is designed to provide the necessary understanding of both technical and business issues relating to information systems. The program is ideal for students interested in managing information technology, either as a technologist, a general manager, or a consultant in technology-intensive industries. The program also provides a good supplement to engineering or other technologically-sophisticated students who wish to obtain greater exposure to managerial issues or students in finance or management who wish to better understand the role of technology in their core disciplines.

Total Course Units 37

1. For students who take ECON 0100 Introduction to Micro Economics and ECON 0200 Introductory Economics: Macro in place of BEPP 1000 Introductory Economics for Business Students of these courses can be slotted for BEPP 1000 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2. Two can double-count as Humanities; Natural Science, Math & Engineering; Social Science; or Flex Gen Ed.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2023 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Real Estate, BS

The real estate concentration consists of one required course (REAL 2090: Real Estate Investment: Analysis and Financing) and three electives. While the required course focuses on real estate finance, the electives allow students to explore a variety of issues related to real estate. These include real estate development, the legal aspects of real estate investment and financing, and the relationship between government policy and real estate development.

For more information: [https://real-estate.wharton.upenn.edu/programs/undergraduate/undergraduate-concentration/](https://real-estate.wharton.upenn.edu/programs/undergraduate/undergraduate-concentration/)

Retailing, BS

The secondary concentration in retailing provides an interdisciplinary overview of the retailing industry, combining courses in core retailing skills with industry-relevant electives from Wharton and the College of Arts & Sciences.

Social Impact & Responsibility, BS

The social impact & responsibility (SIR) concentration seeks to examine the question: “How should business enterprises and business thinking be engaged to improve society in areas not always associated with business?” SIR is an interdisciplinary field that encourages students to approach their core courses and primary concentration courses from a socially oriented perspective.

For more information: lgst.wharton.upenn.edu

Social Impact & Responsibility Concentration

Statistics and Data Science, BS

A key challenge facing managers is the interpretation of the vast amount of data generated by computing systems. As these data do not directly answer important business questions, managers must use data...
analysis and statistics to interpret them. Statistics and Data Science courses develop the skills and insights required to make effective use of quantitative methods, select and apply techniques, and communicate statistical results. All courses provide skills that augment substantive managerial abilities, along with exposure to computer software that implements key techniques.

Minors

For Wharton Students

Students who wish to study a subject of interest in greater depth may choose to pursue a minor. Minors generally require six to eight courses in a particular field of study. A carefully planned program of study allows a Wharton student to complete a minor within the Wharton curriculum, capitalizing on potential overlap with General Education and Unrestricted Elective requirements. Students are encouraged to begin planning as early as possible to ensure the minor can be completed in a timely manner and without taking extra courses.

Wharton students have the option of pursuing either a departmental minor or a University Minor (https://undergrad-inside.wharton.upenn.edu/university-minors/).

For Non-Wharton Students

• Statistics and Data Science, Minor (p. 191)

Academic Opportunities

In addition to a variety of global opportunities (https://undergrad-inside.wharton.upenn.edu/global-opportunities/), Wharton students can pursue interdisciplinary studies through coordinated dual-

2023-24 Catalog | Generated 08/02/23
Academic Opportunities

degree programs (https://undergrad-inside.wharton.upenn.edu/coordinated-dual-degree/), dual degrees (https://undergrad-inside.wharton.upenn.edu/dual-degree/), and minors (https://undergrad-inside.wharton.upenn.edu/minors/). Students also can accelerate their graduate pursuits while satisfying their undergraduate degree requirements through submatriculation (https://undergrad-inside.wharton.upenn.edu/submatriculation/).

Students at Wharton can enrich their academic experience through independent study (https://undergrad-inside.wharton.upenn.edu/independent-study/) or the Wharton Industry Exploration Program (https://undergrad-inside.wharton.upenn.edu/wiep/), which provides the opportunity to study different business sectors in Los Angeles and New York. Opportunities like the Wharton Research Scholars (https://undergrad-inside.wharton.upenn.edu/wrs/) only further enhance the academic experience at Wharton.

For more information, visit: undergrad-inside.wharton.upenn.edu/academic-opportunities (https://undergrad-inside.wharton.upenn.edu/academic-opportunities/).
INTERDISCIPLINARY STUDIES

Interdisciplinary opportunities at Penn allow students to explore their academic interests and discover new ways of integrating knowledge.

Dual Degree

Undergraduates can receive two Bachelor's Degrees by completing the requirements for any two of the four undergraduate schools at the same time. A dual degree program has no prescribed course of study, and the student does not have to choose to participate prior to matriculation.

The application process for a dual degree varies among the undergraduate schools. Contact the advising office (p. 300) for the school to which you are applying for details on how to submit an application.

Coordinated Dual Degree Programs (p. 292)

Penn's specialized dual degree programs offer students the opportunity to pursue an integrated curriculum jointly offered by two schools within the University. Program participants graduate from Penn with two degrees.

University Minors (p. 294)

In addition to minors completed within one school, several interdisciplinary minors combine coursework from the four undergraduate schools.

Coordinated Submatriculation Programs (p. 293)

Penn offers students many opportunities to begin a graduate program while completing an undergraduate degree. Students may apply for admission as submatriculants to a variety of the University's graduate and professional areas of study. Submatriculation programs exist in the four undergraduate schools and in several of Penn's graduate schools.

Featured Interdisciplinary Programs

Penn offers a number of opportunities for students to pursue an integrated curriculum jointly offered by two or more schools within the University, and graduate with a single degree. Examples of such programs include:

Digital Media Design

The Digital Media Design (DMD) program is an interdisciplinary major in the School of Engineering and Applied Science at Penn. As a full-fledged Bachelors in Engineering and Science (BSE) degree, it combines major coursework in computer graphics within the Computer & Information Science Department with Fine Arts courses from Penn's School of Design. The program is designed for students who have an interest in the computer programming, mathematics, and design behind computer graphics, animation, games, virtual reality environments, and interactive technologies.

View Program Requirements (p. 227)

For more information, visit: http://cg.cis.upenn.edu/dmd_program.html.

Integrated Studies Program

The Integrated Studies Program (ISP) (https://isp.sas.upenn.edu/) is the first-year curriculum for Benjamin Franklin Scholars pursuing degrees in the College of Arts and Sciences.

Deeply rooted in the liberal arts tradition of acquiring and applying expansive knowledge, this residential academic program invites highly-motivated students to examine complex themes through the integration of multiple academic disciplines and methodologies.

Students are guided through the semester by some of Penn's leading faculty. By investigating the same ideas under three distinct lenses, drawing simultaneously from the humanities, social sciences and sciences, students sharpen their focus on the similarities—and differences—between the disciplines' habits of mind.

Moelis Advance Access Program

The Moelis Advance Access Program is a deferred admission program that gives Penn undergraduates a guaranteed pathway to the Wharton MBA while they pursue work experience. Moelis Fellows access Wharton resources and network during their deferment period and can be considered for a $10,000 fellowship per year during the 2-year full-time MBA program. Beginning in 2018, the program will accept a highly selective cohort of Penn seniors whose academic and career interests expand traditional notions of business education. The program was established with a $10 million gift from Ken Moelis, W'80, WG'81, and Julie Taffet Moelis, W'81. The program is open to all Penn undergraduates, beginning with the Class of 2018, who aspire to set the stage early for their advanced education and highly successful careers. Seniors in the College of Arts and Sciences, School of Engineering and Applied Science, School of Nursing, the Wharton School, and all coordinated dual degrees may apply.

For more information, visit: https://mba.wharton.upenn.edu/moelis-advance-access-program/.

Networked & Social Systems Engineering

The Rajendra and Neera Singh Program in Networked and Social Systems Engineering (NETS), formerly called Market and Social Systems Engineering (MKSE), is the world's first course of study to fully integrate the disciplines needed to design and analyze the complex networks reshaping our society. This program prepares students to shape the technologies that underpin Internet-based search and electronic commerce, financial networks, social networks, and even such exchanges as the power grid. Graduates of this program will be prepared to engineer networks that work for both end-users and investors. Other graduates may become the policy-makers urgently needed to regulate these networks for the protection of commercial property and societal good.

View Program Requirements (p. 232)

For more information, visit: http://www.nets.upenn.edu/.

Nutrition

The Nutrition Science major is an interdisciplinary collaboration between the School of Nursing and the School of Arts & Sciences, and it builds on a student’s basic science skills with a deep dive into the science of nutrition. Linkages of nutritional compounds and dietary approaches with health and disease, novel approaches to the study of nutritional impact on health, and future avenues of exploration in the field are examined. Elective courses in anthropology, biology, economics, physiology,
psychology, health care, and public policy provide a rounded context for the study of nutrition science.

View Program Requirements (p. 248)

For more information, visit: https://www.nursing.upenn.edu/nutrition-major/

Penn offers many opportunities for interdisciplinary study in global contexts. Here are some of the opportunities available to undergraduates.

Penn offers the opportunity to study more than 40 languages at the Penn Language Center. (p. 303) For more information, visit Foreign Language Study Opportunities (p. 303).

School-based Global Opportunities

• College of Arts and Sciences (http://www.college.upenn.edu/study-abroad/)

• Other SAS Centers (https://www.sas.upenn.edu/departments/)

Coordinated Dual Degree Programs

Penn's specialized dual degree programs offer students the opportunity to pursue an integrated curriculum jointly offered by two schools within the University. Program participants graduate from Penn with two degrees.

Computer and Cognitive Science

School of Arts & Sciences/School of Engineering & Applied Science

Bachelor of Science in Engineering (BSE)/BAS and Bachelor of Arts (BA)

This program combines studies in computer science and engineering with linguistics, mathematics, philosophy, or psychology, and students receive a BSE or BAS degree from Penn Engineering and Bachelor of Arts from the College of Arts and Sciences. Requirements for the program are guided by the degree sought (BAS or BSE) and include 12-16 course units in Linguistics, Mathematics, Philosophy, or Psychology and 4 course units in a Foreign Language.

For more information, visit: http://www.cis.upenn.edu/current-students/undergraduate/dual.php.

Huntsman Program in International Studies and Business

School of Arts & Sciences/The Wharton School

BA in International Studies/BS in Economics

This innovative four-year joint degree program between the School of Arts and Sciences and the Wharton School combines a business education, liberal arts, and advanced language training in one of eleven languages of focus. It prepares students for global leadership in career paths around the world in diverse areas such as consulting, finance, medicine, politics, diplomacy, the non-profit sector, and entrepreneurship. Students must apply to the program when they apply to Penn; they cannot transfer into the program. Admission is highly competitive.

For more information, visit: http://huntsman.upenn.edu/.

Jerome Fisher Program in Management & Technology

School of Engineering & Applied Science/The Wharton School

BAS/BSE and BS in Economics

The Jerome Fisher Program in Management & Technology (M&T) is sponsored jointly by the School of Engineering and the Wharton School. The impetus for this joint-degree program came from the Board of Overseers of the School of Engineering and Applied Science. The Board of Overseers, a distinguished group of corporate executives and academicians, emphasized that an understanding of the engineering and technology fundamentals is as essential to the background of future leaders in business and industry as a sound knowledge of management principles. They pointed to the growing need for people who can bridge the management and technical disciplines.

Undergraduate students enrolled in the M&T Program pursue degrees from both schools concurrently, creating a truly interdisciplinary learning experience. This combination enables students not only to understand
engineering and business concepts but also the integration of the two and how this intersection distinctively shapes our world. M&T students pursue a Bachelor of Science in Economics from the Wharton School and either a Bachelor of Science in Engineering (BSE) or a Bachelor of Applied Science in Engineering (BAS) from Penn Engineering. The curriculum includes two special M&T linking courses that allow for added interdisciplinary learning opportunities. The common goal for all M&T students is the mastery of the technical and managerial skills necessary to define and solve problems in today’s complex technological society. The structure of the joint-degree program gives each student considerable flexibility in meeting this goal. Particular attention is directed to the importance and processes of innovation in our technology-based industries.

For more information, visit: http://www.upenn.edu/fisher/.

**Nursing and Health Care Management Program (NHCM)**
**School of Nursing/The Wharton School**
Bachelor of Science in Economics/Bachelor of Science in Nursing (BSN)

Nurses with excellent clinical and administrative skills are in higher demand than ever. Our Nursing and Health Care Management Program (NHCM) gives you the chance to combine two of Penn’s greatest assets: Penn Nursing and The Wharton School. In the NHCM program, you’ll study simultaneously in both schools and graduate with a Bachelor of Science in Nursing and a Bachelor of Science in Economics. Your work will include science and clinical courses along with general education courses in the Arts and Sciences. We designed the curriculum to boost expertise in patient care and deepen your knowledge of how to manage the way that care is delivered. We also use a multidisciplinary approach that integrates nursing, business, and liberal arts. Students enrolled in the program have advisors at both Nursing and Wharton and complete this integrated academic and clinical program in five years.

For more information, visit: http://www.nursing.upenn.edu/nhcm/.

**Roy and Diana Vagelos Program in Life Sciences and Management (LSM)**
**School of Arts & Sciences/The Wharton School**
Bachelor of Arts (BA)/Bachelor of Science in Economics

On the surface, bioscience and business may seem like unrelated fields. But if the full benefits of science are to be realized, discoveries made at the laboratory bench must be taken to market and made accessible to society at large—a process that demands great skill both scientifically and managerially. Given the pace of recent advances in bioscience and biotechnology, never before has the need been so great for decision makers who can understand and advance scientific innovations as well as manage and promote them. It is with this in mind that the University of Pennsylvania launched the Vagelos Life Sciences & Management (LSM) program.

LSM is an undergraduate dual-degree program administered jointly between Penn’s College of Arts & Sciences and the Wharton School. Each year, the program enrolls approximately 25 exceptional students and offers them the opportunity to pursue an interdisciplinary curriculum combining bioscience and business, leading to the completion of two degrees: a Bachelor of Arts in a life science major and a Bachelor of Science in Economics. To ensure that every student learns how to apply their knowledge, the program provides the means for them to find two required, paid internships, one centered in scientific research and the other in business or public policy. Completion of the LSM program is an ideal starting point for students intent on careers in the life sciences sector by preparing them for advanced training, and we anticipate they will then go on to pursue through MD, PhD, MBA, JD, and/or other graduate programs. LSM is suited to students with interests in health care; biomedical, agricultural, and environmental research and development; public policy; and the financial and strategic management of life science organizations.

For more information, visit: https://lsm.upenn.edu/.

**Vagelos Integrated Program in Energy Research (VIPER)**
**School of Arts & Sciences/School of Engineering & Applied Science**

**BA/BSE**

The Vagelos Integrated Program in Energy Research (VIPER) enrolls talented, prepared, and motivated students interested in energy science and engineering. VIPER students receive instruction and state-of-the-art research experiences, enabling them to pursue advanced degrees in these fields and establish high-caliber research careers as innovators in the discovery and development of sustainable ways to harness, convert, and use energy. Candidates for the program apply as they seek admission to the University. A joint program of Penn’s School of Arts and Sciences (SAS) and the School of Engineering and Applied Science (SEAS), VIPER leads to dual Bachelor of Arts (BA) and Bachelor of Science in Engineering (BSE) degrees by combining majors from each school. Possible combinations include: Physics and Astronomy, Chemistry, Biology, or Mathematics from SAS and Chemical and Biomolecular Engineering, Electrical Engineering, Materials Science and Engineering, or Mechanical Engineering and Applied Mechanics from SEAS. Some students may also apply for a master’s degree through a fifth year of study.

For more information, visit: https://www.viper.upenn.edu.

**Coordinated Submatriculation Programs**

The University offers a number of coordinated, interdisciplinary submatriculation programs to undergraduate students.

For more information about submatriculation, click here (p. 310).

**BA/JD Program in Arts & Sciences and Law**

This rigorous program offers an opportunity for highly qualified and motivated students to apply to Penn Law School during what is generally the first semester of a student’s junior year (between 16 and 23.99 course units). If accepted, the student will submatriculate into the J.D. program in their senior year. Applicants must be committed to the study of law in its theoretical and practical aspects.

For more information, visit: https://www.college.upenn.edu/submatriculation (https://www.college.upenn.edu/submatriculation/).
Bio-Dental Program

Bio-Dental submatriculation is a seven-year joint program of the College and Penn’s School of Dental Medicine for students who will major in Biology and wish to enroll in the Dental School during their senior year in the College. Students must apply to the program when they apply to Penn, and applicants will be notified of their conditional acceptance into the program when they are notified of their admission to Penn. Full acceptance into the program is made after the student’s junior year and is based on academic performance during those three years and meeting the admissions standards of the Dental School.

For more information, visit: https://www.bio.upenn.edu/undergraduate/submatriculation/bio-dental-program (https://www.bio.upenn.edu/undergraduate/submatriculation/bio-dental-program/).

BSN/JD Program

Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in the JD program (https://www.law.upenn.edu/academics/degrees.php) at Penn Law School while still undergraduates. The current climate of healthcare litigation and malpractice suits is well suited for professionals who combine nursing education and experience with legal expertise. A background in both nursing and law gives students a powerful and marketable skillset and prepares them to make an impact on the medical and legal professions. To submatriculate into Penn Law, students should take the LSAT and apply (https://www.law.upenn.edu/admissions/jd/) during their junior year. If a student is admitted, they will begin taking courses at the law school during their fourth year, completing both the BSN and JD degrees in six years instead of the usual seven.

For more information, visit: https://www.nursing.upenn.edu/live/files/56-submatriculation-law (https://www.nursing.upenn.edu/live/files/56-submatriculation-law/).

Penn Engineering/Penn Law Program

Penn’s Law School offers an opportunity for qualified juniors in Penn Engineering to apply early to the Law School and submatriculate into the JD program beginning their fourth year. The program is designed as a 3-year + 3-year accelerated program for highly qualified undergraduates either in the Bachelor of Applied Science (BAS) or Bachelor of Science in Engineering (BSE) degree programs.

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/submatriculation-law.php.

Roy and Diana Vagelos Program in Molecular Life Sciences

Ambitious and highly motivated students interested in the molecular view of life should consider the Vagelos Scholars Program in Molecular Life Sciences. Students begin as first-year students and major in two sciences or submatriculate for a Master of Science degree in the standard four years. Students in this program plan to pursue scientific research careers. Scholars are invited from the admitted pool of high school seniors at the beginning of April at the discretion of the faculty director and the admissions committee.

For more information, visit: http://www.sas.upenn.edu/biochem/vspmls.html.

Wharton Law School Submatriculation Program

During the junior year, qualified Wharton undergraduate students may apply for admission to the Penn Law School and submatriculate into the Juris Doctor (JD) program. In this 3-year + 3-year accelerated program, the student’s fourth year of study is spent entirely at the Law School completing the first-year law curriculum. The remaining undergraduate and/or graduate degree requirements are then completed in the student’s fifth and sixth years of study.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

University Minors

In addition to minors completed within one school, several interdisciplinary minors combine coursework from the four undergraduate schools.

Actuarial Mathematics

School of Arts & Sciences/The Wharton School

Actuarial Science stands at the intersection of risk and money. Actuaries use their knowledge of mathematics and probability theory to define, analyze, and solve complex business, financial, and social problems. Actuaries evaluate individual and corporate risks and design financially sound insurance and pension plans. Graduates from the University of Pennsylvania with an Actuarial Mathematics Minor are expected to be in great demand by the insurance and banking industry.

View Program Requirements (p. 152)

American Public Policy

School of Arts & Sciences/The Wharton School

This program enables undergraduates interested in American public policy to construct an integrated program between the School of Arts and Sciences and the Wharton School.

View Program Requirements (p. 153)

For more information, visit: https://bepp.wharton.upenn.edu/programs/undergraduate/program-information1/american-public-policy-minor/ (https://bepp.wharton.upenn.edu/programs/undergraduate/program-information1/american-public-policy-minor/).

Neuroscience and Health Services Management

School of Arts & Sciences/The Wharton School

The Neuroscience Program and the Health Care Management Department of the Wharton School have jointly sponsored this effort. The objective is to provide students with exposure to two related areas: study in neuroscience and behavioral biology as a leading example of the bioscience enterprise, and health services management as the environment in which science innovation must be developed and managed. The minor consists of eight courses, four from the Neuroscience Program and four from Wharton. Students must earn a minimum grade of C- in courses taken to fulfill the minor requirements.
Students must have a minimum of 3 courses that they count towards the minor and not towards any other major of minor.

View Program Requirements (http://catalog.upenn.edu/undergraduate/programs/health-care-management-minor/)

For more information, visit: https://neuroscience.sas.upenn.edu/studying-neuroscience/requirements/bbb-and-health-services-management-minor (https://neuroscience.sas.upenn.edu/studying-neuroscience/requirements/bbb-and-health-services-management-minor/)

**Consumer Psychology**

**School of Arts & Sciences/The Wharton School**

The goal of the interschool Consumer Psychology Minor is to create a program that fosters the natural link between Psychology in the College and Marketing in Wharton. To fulfill the minor, students must complete four courses from the Psychology Department in the College, four courses from the Marketing Department in Wharton, and the stats requirement. Both College and Wharton requirements will consist of core courses along with a set of elective courses. College students who wish to minor in Consumer Psychology must count two of the four required psychology (PSYC) courses towards only the Consumer Psychology minor (and towards no other major or minor).

View Program Requirements (p. 159)

For more information, visit: https://psychology.sas.upenn.edu/more-information-minors (https://psychology.sas.upenn.edu/more-information-minors/).

**Legal Studies & History**

**School of Arts & Sciences/The Wharton School**

The University of Pennsylvania's Wharton School and the College of Arts and Sciences are pleased to offer a unique program of study for undergraduate students that enables them to explore multiple perspectives on law as an inter-school supplement to their major field of study.

View Program Requirements (p. 178)

For more information, visit: https://lgst.wharton.upenn.edu/minor-in-legal-studies-and-history/.

**Nutrition**

**School of Arts & Sciences/School of Nursing**

Jointly sponsored by the Schools of Nursing and Arts and Sciences, the Nutrition Minor presents a broad view of the field, and illustrates the pervasiveness of nutrition-related issues in such diverse fields as anthropology, economics, folklore, history, physiology, psychology, health care, and public policy.

View Program Requirements (p. 251)

For more information, visit: http://www.nursing.upenn.edu/nutrition-minor/.

**Sustainability and Environmental Management**

**School of Arts & Sciences/School of Engineering & Applied Science/The Wharton School**

The Sustainability and Environmental Management Minor is focused on sustainability and designed to help students understand the nature of environmental constraints that face organizations and individuals in the modern world, and to understand how these constraints can be effectively considered as part of the decision-making process in for-profit and non-profit organizations.

View Program Requirements (p. 192)

**Urban Education**

**School of Arts & Sciences/Graduate School of Education**

The crisis in American education continues to confound major sectors of American life. National attention has engaged various constituencies - non-profit business organizations; local, state and federal governments; teachers' unions; and universities - in trying to understand and improve public education. At Penn, students and faculty have become deeply involved in local schools through community service, research, teaching, and coursework. In response to student interest in community and education issues, the College of Arts and Sciences and the Graduate School of Education sponsor an interdisciplinary minor in Urban Education. This seven-course undergraduate minor offers students a unique opportunity to bridge learning between the classroom and community, and it features:

- Academically-based community service in local schools
- Deeper understanding of the complex factors affecting urban education
- Field-based research in an area of interest
- Hands-on opportunity to investigate a career in education
- Credit toward Pennsylvania teacher certification requirements

This minor is open to undergraduates in all disciplines. Students choose from among three concentrations depending on interest in pursuing teaching certification or deepening one's background in urban education policy. Elementary Education; Secondary Education; Urban Education Policy, Research, and Practice.
View Program Requirements (p. 192)

For more information, visit: http://www.sas.upenn.edu/urban/students/urban-education-minor.

**Urban Real Estate and Development**  
**School of Arts & Sciences/The Wharton School**

This minor, co-sponsored by Real Estate (Wharton) and Urban Studies (Arts and Sciences), is designed to enable students to combine an interest in Urban Studies and Real Estate Development. Students take a total of seven Urban Studies and Real Estate courses, in consultation with the minor advisor.

View Program Requirements (p. 193)

For more information, visit: http://www.sas.upenn.edu/urban/students/real-estate-development-minor.
ACADEMIC RESOURCES

Penn offers a wide variety of resources, offices, and programs for undergraduate students to support them in all aspects of their Penn experience. The following list highlights some of the most commonly used resources and areas of interest relating to academics and educational opportunities. For more information about campus resources available to students, visit the Division of the Vice Provost for University Life (http://www.vpul.upenn.edu/).

Academic Calendar

Notes:

Graduate and professional programs may follow their own calendars; check the website for each School or program.

Rosh Hashanah, Yom Kippur, the first two days of Passover and Good Friday are religious holidays that affect large numbers of University community members and that fall during the academic year. View the University’s policy regarding these and other holidays (http://catalog.upenn.edu/pennbook/secular-religious-holidays/).

The University’s Three-Year Academic Calendar is subject to change. In the event that changes are made, the latest, most up-to-date version will be posted to the Almanac’s website (https://almanac.upenn.edu/penn-academic-calendar/).

Advising

Each school has their own advising office with a network of academic advisors available to assist students. The structure of the advising varies by school; you can find the links to your school's advising office below.

### School of Arts and Sciences

College students need to choose courses, declare a major and define career goals. They will need to examine their performance in different courses, identify their skills and those they wish to develop, and decide what really matters to them. Much of this assessment they will do themselves, but faculty members, academic advisors, career counselors and peers can help.

Students in the College have a strong network of academic advisors available to assist them throughout their undergraduate careers.

- Pre-major advisors help first- and second-year students navigate their entrance into academic and intellectual life in the College beginning with the issues of incoming freshmen and continuing through the student's exploration of a potential major.
- Peer advisors work with the pre-major advisor and are one of the first points of contact for incoming College students. They provide the perspective of an upperclass student in the College and assist first-year students in making the transition from high school to Penn by sharing their strategies for academic success and knowledge of campus resources.
- After declaring a major, students are assigned an academic advisor affiliated with the major department or program.
- All students are welcome and encouraged to speak with assistant deans for advising in the College Office. These advisors can help students explore the many options and opportunities available to College students, and are available by appointment or on a walk-in basis throughout the year.

For more information, visit the College website (https://www.college.upenn.edu/advising/).

### School of Engineering and Applied Science

Each student is assigned a faculty advisor with whom they are required to meet at least twice per year. No student is permitted to register for classes in any semester without first meeting with an advisor. The only exception is the fall semester of a student's first year. Students who take the time to prepare for these meetings generally find them beneficial and informative. Faculty advisors are the best source of information about electives within the major, research opportunities, and options for graduate study.

For more information, visit: https://ugrad.seas.upenn.edu/student-handbook/advising/.

### School of Nursing

Penn Nursing students benefit from a dual advising structure. All students are assigned a faculty advisor and have access to the professional staff advisors in the Office of Academic Affairs.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/accelerated/.

### The Wharton School

The goal of the Wharton Undergraduate Division academic advising team is to help students make informed decisions about their educational plans and professional/life goals that are consistent with their interests, abilities, and values.

Advising by appointment, walk-in advising, and specialized advising (https://undergrad-inside.wharton.upenn.edu/advising-services/#specialized_advising) are services available in 1400 Steinberg-Hall Dietrich Hall to current Wharton undergraduate students.

Professional advisors (https://undergrad-inside.wharton.upenn.edu/advising-services/), concentration advisors (https://undergrad-inside.wharton.upenn.edu/concentration-advisors/), and peer advisors
Fellowships provide funding for a wide range of activities: evaluate applications and select applicants to endorse. CURF also supports and manages selection committees consisting of leading Penn faculty that fellowship recipients, and individual advising. CURF's Fellowships Team educates Penn students and alumni about possible application through information sessions, conversations with fellowships and assists potential applicants in creating their strongest application. CURF aims to demystify these opportunities to help students determine the most appropriate awards for which to apply.

Career Services

Career Services helps students define their career goals and learn how to achieve them. The office helps students and alumni obtain postgraduate and internship positions as well as graduate and professional school admission through advising sessions, workshops, alumni networks, and a variety of online resources. Career Services also establishes and promotes contact between Penn students and employers and graduate/professional schools through career fairs, information sessions, interviewing schedules, and our robust Handshake platform where thousands of job and internship positions are posted each year.

For more information, visit https://careerservices.upenn.edu.

Community Engagement

The Barbara and Edward Netter Center for Community Partnerships (https://www.nettercenter.upenn.edu) is Penn's central administrative office for community partnership programs, including academically based community service, direct traditional service, and community development.

Penn's hub for civic engagement, Civic House (https://civichouse.upenn.edu) supports student service and advocacy groups while providing resources, information, and meeting space for service-oriented efforts throughout campus and beyond.

The Robert A. Fox Leadership Program (https://foxleadership.upenn.edu) prepares students for present and future leadership through hands-on experience, service, course work, and mentorship from successful leaders.

Enrollment & Degree Verification

The University Registrar's office provides verification of dates a student attended Penn and degrees awarded by the Schools of the University. Details concerning Academic Certification may be found on the University Registrar web page (https://srfs.upenn.edu/student-records/enrollment-degree-verification/).

Fellowships and Prizes

The Center for Undergraduate Research and Fellowships (CURF) (https://www.curf.upenn.edu) serves as the University of Pennsylvania’s information clearinghouse and primary support office for Penn students and alumni considering applying for major grants and fellowships.

CURF’s Fellowships Team educates Penn students and alumni about fellowships and assists potential applicants in creating their strongest possible application through information sessions, conversations with fellowship recipients, and individual advising. CURF also supports and manages selection committees consisting of leading Penn faculty that evaluate applications and select applicants to endorse.

Fellowships provide funding for a wide range of activities:
- full tuition, fees, and a living stipend to earn a graduate degree abroad
- undergraduate or graduate study in the US
- teaching English abroad
- internships abroad
- social engagement projects in the US or abroad

For more information, visit https://undergrad-inside.wharton.upenn.edu/peer-advising/.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/advising-services/.

School-based Awards

In addition to departmental awards, there are a variety of awards available to undergraduate students within a particular school.

College of Arts and Sciences
- Abraham D. Cohn Prize
- Charles W. Burr Book Prize
- College Alumni Society 250th Commemoration Award
- Phi Beta Kappa Awards (https://www.college.upenn.edu/pbk/)
- Vagelos Challenge Award (https://www.college.upenn.edu/honors/)

For more information, visit: https://www.college.upenn.edu/honors (https://www.college.upenn.edu/honors/).

School of Engineering and Applied Science

Departmental Awards
- Bioengineering
- Chemical and Biomolecular Engineering
- Computer and Information Science
- Electrical and Systems Engineering
- Materials Science and Engineering
- Mechanical Engineering and Applied Mechanics

Awards From Additional Sources
- From the Moore School
  - John Grist Brainerd Award
  - Stuart Eichert, Jr. Memorial Prize
  - Atwater Kent Prize in Electrical Engineering
The University of Pennsylvania grants numerous undergraduate awards to outstanding graduating seniors, in addition to some sophomores and juniors. Eligibility and criteria vary by award.

President's Engagement Prizes (https://www.curf.upenn.edu/presidents-engagement-prizes/)
Competitively awarded on an annual basis, the President's Engagement Prizes empower Penn seniors to design and undertake local, national or global engagement projects during the first year after they graduate.

President's Innovation Prize (https://www.curf.upenn.edu/presidents-innovation-prize/)
Unique at both Penn and across higher education, the President’s Innovation Prize underscores the University’s considerable commitment to encouraging students to put their knowledge to work for the betterment of humankind.

Senior Awards
The University of Pennsylvania grants numerous undergraduate awards to outstanding graduating seniors, in addition to some sophomores and juniors. Eligibility and criteria vary by award.

The Senior Honor Awards (Spoon, Bowl, Cane and Spade for those who identify as men; Hotell, Harnwell, Goddard and Brownlee Awards for those who identify as women) (http://www.vpul.upenn.edu/osa/seniors.php)
Nominees must be members in good academic standing who have actively contributed to campus life through activities and leadership. All nominees are placed on a ballot (one for men, one for women) which is distributed to a committee of staff members and the Senior Class Board. This committee votes and narrows the candidate pool to 15 men and 15 women, who are then voted upon by the entire Senior Class. The top 4 men and 4 women receive the awards on Ivy Day.

Granted to graduating students of color who demonstrate leadership, advance diversity at Penn through student activities or community service, and exemplify excellence.

The James Howard Weiss Memorial Award and The Penn Student Agencies Award (http://www.vpul.upenn.edu/osa/seniors.php)
Both awards recognize distinguished academic achievement (minimum G.P.A. of 3.7) and significant leadership in undergraduate activities by members of the senior class. A committee of students, faculty and staff makes the final selection from the list of candidates. Ideally, nominees should be the most outstanding members of group (1) above.

The Sol Feinstone Undergraduate Awards (http://www.dolphin.upenn.edu/osla/feinstone.html)
These awards may be presented to a sophomore, junior or senior who has contributed to "orderly and constructive social and educational change within or outside the University community." Past recipients have included the undergraduate who established the first mental health student group in the nation; the creators of a Saturday African-centered enrichment program for local children; the organizers of a pre-orientation leadership program for first-year students; and the founder of the first and the only youth-led LGBT statewide organization in the nation. Finalists are chosen by the same committee as in (2) above. (Keep in mind the fact that there must be a specific contribution, not just a list of activities.)
Some schools have foreign language requirements. Information about language methodology in accordance with the National Standards of language education and pedagogy training language instructors to both undergraduate and graduate students and is a leader in the field. The Penn Language Center offers over 40 world languages per semester.

For more information, visit: http://www.vpul.upenn.edu/osa/seniors.php.

Financial Aid

The Office of Student Registration and Financial Services (SRFS) provides solutions to students' concerns and encompasses the offices of the University Registrar and Student Financial Services.

- Information about Paying for a Penn Education (http://www.srfs.upenn.edu/paying/)
- Information about Applying for Financial Aid (http://www.srfs.upenn.edu/finaid/)
- Information about Loans (http://www.srfs.upenn.edu/loans/)
- Information about Billing and Payment (http://www.srfs.upenn.edu/billing/)

Undergraduate Cost of Attendance

The cost of attendance represents the cost of attending Penn for an academic year, and includes both direct costs that appear on a student's bill such as tuition, fees, housing, and dining, and indirect costs that are not billed by Penn, such as books and supplies, transportation, and an allowance for personal expenses. Students should consider their cost of attendance as their budget for each academic year. Penn also uses the cost of attendance to help determine a student's eligibility for financial aid.

View the 2023-2024 Cost of Attendance: http://www.srfs.upenn.edu/paying/cost-of-attendance.htm

Foreign Language Study Opportunities

The Penn Language Center offers over 40 world languages per semester to both undergraduate and graduate students and is a leader in the field of language education and pedagogy training language instructors in language methodology in accordance with the National Standards.

Penn Language Center: plc.sas.upenn.edu (http://plc.sas.upenn.edu/)

Some schools have foreign language requirements. Information about requirements and options for foreign language study varies by school:

- College of Arts and Sciences (https://www.college.upenn.edu/language-writing-speaking/)
- School of Engineering and Applied Science does not have a language requirement.
- School of Nursing (https://www.nursing.upenn.edu/live/files/247-language-requirementpdf/)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/requirements-2017/foreign-language-requirement/)

The Penn Language Center maintains a list of languages (http://plc.sas.upenn.edu/languages/) offered at Penn:

- Afrikaans (http://plc.sas.upenn.edu/node/2538/)
- American Sign Language (http://plc.sas.upenn.edu/asl/)
- Amharic (http://plc.sas.upenn.edu/amharic/)

Global Programs

Each year approximately 3,000 Penn students participate in a global experience as part of their academic career at Penn. Of these students, about 1,000 engage in a global opportunity through the office of Penn Abroad.

Penn Abroad (https://global.upenn.edu/pennabroad/), a division of Penn Global (https://global.upenn.edu/), manages a variety of global programs including:

- Semester Abroad (https://global.upenn.edu/pennabroad/semester/) allows undergraduate students to spend a semester or academic year abroad and earn Penn credit.
- Penn Global Seminars (https://global.upenn.edu/pennabroad/pgs/) are intensive semester-long seminars with short-term international travel components.
- Global Research & Internship Program (https://global.upenn.edu/pennabroad/grip/) placements allow students to go abroad for 8 to 12 weeks over the summer to pursue research or an internship, with funding awarded to all accepted students.
- Virtual Internships Abroad (https://global.upenn.edu/pennabroad/ via/) offers students professional work experience with global employers in a highly flexible and customizable virtual format.

In addition to the opportunities made available by Penn Abroad, other global opportunities for Penn undergraduate students exist across campus. These include:

- Penn Summer Abroad (http://www.sas.upenn.edu/summer/programs/abroad/) – offers faculty-led undergraduate courses offered in the summer through the School of Arts and Sciences to a range of international destinations each year.
- Wharton International Program (https://undergrad-inside.wharton.upenn.edu/wip/) – provides short term international business courses at three global locations each year.
- Penn Nursing Short Term & Independent Programs (https://www.nursing.upenn.edu/global-health/student-opportunities/short-term/) – provides students with a number of elective courses that can be taken abroad, including some clinical elective opportunities.
- Penn Engineering (https://global.upenn.edu/pennabroad/pennengineering/) – provides a range of programs for undergraduate Engineering students Study Abroad, International Summer Research, and Service Learning Opportunities in partnership with Penn Abroad.

Students are encouraged to speak to their department and home school about additional study abroad opportunities that may exist.

Information for Athletes

Penn Athletics (http://www.pennathletics.com) offers a number of programs to support student-athletes academically:

Student Athlete Development Center (http://www.pennathletics.com/page/student-athlete-development-center/)

Academic Resources (http://www.pennathletics.com/page/academic-resources/)

Student-Athlete Academic Achievement Program

The Student-Athlete Academic Achievement Program is designed to provide student-athletes with supplemental study and tutoring opportunities, as well as to foster academic interaction with fellow student-athletes. During the academic year, students have access to reserved rooms for scheduled study time, and individualized and group tutoring sessions. In addition, workshops are conducted to offer strategies for succeeding at Penn.

For more information, visit http://www.pennathletics.com/page/student-athlete-academic-achievement-program (http://www.pennathletics.com/page/student-athlete-academic-achievement-program/).

Information for First-Generation, Lower Income Students

Penn offers a generous program of need-based financial aid (https://srfs.upenn.edu/financial-aid/) and a strong commitment to ensuring access to a Penn education for qualified students from all social and economic backgrounds.

Penn First Plus (P1P) provides a hub of resources, programs, and support for undergraduate students who are the first in their families to attend college and/or have lower-to-modest financial means. P1P collaborates with academic programs, individual faculty members, and student services and centers across the University to make more accessible and inclusive the many opportunities provided by a Penn education. These efforts include supplemental funding support for emergencies and opportunities; individualized advising and advocacy for students; scholarly and professional development programs; inclusivity workshops and resources for faculty and staff; and initiatives to make more transparent the resources available to support academic and personal success at Penn (however a student might want to define success for themselves). We work closely with the leaders of our eleven student organizations to cultivate community.

The Shleifer Family Penn First Plus Center is located on the garden level of College Hall, and can be accessed behind the statue of Dr. Pepper on Penn Commons/Perelman Quadrangle. Our staff are available during regular university operating hours to assist with questions of navigating the Penn experience. We also have study rooms, lounge space, meeting areas, free printing, and more. Our academic counseling team members in the College Achievement Program can be found in suite 240 of Hamilton Village (220 South 40th St.). For more information, please visit the P1P website (https://pennfirstplus.upenn.edu/).

Information for International Students

Penn's International Student and Scholar Services (ISSS) (https://global.upenn.edu/issss/) provides immigration benefits assistance and integration initiatives for the international community at Penn. ISSS works with international students through all stages of their journey at Penn, providing guidance every step of the way.

ISSS provides support to students in many different areas. Some examples include:

- Preparing students for arrival to the U.S.
- Helping get adjusted to life in Philadelphia
• Advising on maintaining status, travel, and immigration guidelines
• Providing integration opportunities such as social events, cultural trips and leadership roles
• Assisting with employment authorization before internships or jobs
• Assigned advisors and central online portal for requests and forms via the iPenn system (https://www.ipenn.oip.upenn.edu/)

Find out more information for:
• New Students (https://global.upenn.edu/isss/new/)
• Current Students (https://global.upenn.edu/isss/students/)
• Beyond Immigration (https://global.upenn.edu/isss/beyond-immigration/)

Click the iPenn logo to see your assigned advisor and make requests with eforms.

Learning Resources

Center for Programs in Contemporary Writing (http://www.writing.upenn.edu/)
The Center for Programs in Contemporary Writing (http://www.writing.upenn.edu/) (CPCW) brings together all of Penn’s writing programs, entities, and projects to form a collaborative whole. The Center presents writing courses, workshops and a reading circle. In addition, it offers students an opportunity to perform their writing or to become involved as a tutor, mentor or editorial apprentice.

College Houses and Academic Services (http://www.collegehouses.upenn.edu/)
The eleven College Houses bring together undergraduates, faculty, staff, and graduate students to form vibrant residential communities within the larger context of our renowned urban campus, right in the heart of historic Philadelphia.

Each House has a Faculty Director, one or more Fellows, a House Dean, a House Coordinator, a plentiful staff of student Residential Advisors (RAs) and Graduate Associates (GAs), student Information Technology Advisors (ITAs), and many student managers in key positions.

Open to all Penn students, House tutoring sessions in math, chemistry, and economics are free and require no advance sign-up. For more information on tutoring within the Houses, visit: http://www.collegehouses.upenn.edu/life/tutoring (http://www.collegehouses.upenn.edu/life/tutoring/).

Communication within the Curriculum (https://cwic.sas.upenn.edu/)
Communication Within the Curriculum (CWIC)'s undergraduate speaking advisors help students develop their public speaking skills through workshops and one-on-one advising sessions during walk-in hours. CWIC also offers two critical speaking seminars and a number of affiliate courses.

Penn College Achievement Program (PENNCAP) (https://penncap.vpse.upenn.edu/)
The Penn College Achievement Program (https://penncap.vpse.upenn.edu/) works closely with a diverse group of students, many from lower-income and/or first-generation (http://www.vpul.upenn.edu/Low-IncomeFirst-GenerationStudents/) backgrounds, to support their success at Penn. Among the many services offered are laptop and textbook loans, summer tuition grants, tutoring and advising.

Tutoring Center (http://www.vpul.upenn.edu/tutoring/)
The Tutoring Center (http://www.vpul.upenn.edu/tutoring/) offers Penn undergraduates a wide variety of free, accessible, and convenient options to supplement their academic experience.

Weingarten Learning Resources Center (http://www.vpul.upenn.edu/lrc/)
The Weingarten Center provides academic support services and programs for undergraduate, graduate, and professional students at the University of Pennsylvania through its two offices. The services and programs of both offices are free and confidential.

Office of Learning Resources (http://www.vpul.upenn.edu/lrc/)
The Office of Learning Resources (http://www.vpul.upenn.edu/lrc/) staff provide a wide range of programming and professional consultation services in university-relevant skills such as reading, writing, study strategies, and time management.

Student Disabilities Services (https://wlrc.vpul.upenn.edu/sds/)
Student Disabilities Services (https://wlrc.vpul.upenn.edu/sds/) staff work closely with students who self-identify with disabilities in order to ensure equal access to all University programs, activities and services.

Libraries

The Penn Libraries provides support and resources for teaching, research, and learning through 14 individual libraries, vast physical and digital collections, personal consultations, workshops, and other services.

The Libraries’ print and digital collections include more than 7 million books and other items, including journals, databases, streaming video, musical scores, and more, with materials in more than 400 languages.

Our website (https://www.library.upenn.edu/) is the gateway to these collections and to other library resources and services available to Penn students. Learn the basics in our Quick Start Guide (https://www.library.upenn.edu/help-with/quick-start-guide/), search Franklin (https://franklin.library.upenn.edu/), our online catalog, and learn more about all that the Libraries has to offer.

Visit and Study

Each of the Penn Libraries locations has unique resources available to students, whether they are studying dentistry, design, or anything in
between. See all locations and hours (https://www.library.upenn.edu/about/locations/).

The Libraries offers spaces for students to work, study, create, and collaborate, featuring:

- Designated areas for quiet study
- Reservable rooms and booths for group study
- Computers, monitors, and other technology
- Different kinds of seating, lighting, and software to suit individual needs

Research

To get help with research, students can submit questions online or make an appointment for in-person assistance.

Librarians are available on live chat (https://www.library.upenn.edu/chat/) from Monday to Friday from 9am to 5pm and for video consultations (https://libcal.library.upenn.edu/appointments/) by appointment. You can also send us a question (https://faq.library.upenn.edu/ask/) any time and we'll respond in 24 hours or less.

Need guidance related to a particular subject? From Accounting to Philosophy to Veterinary Sciences, one of our subject specialists (https://www.library.upenn.edu/people/subject-specialists/) can provide customized assistance, or browse online Research Guides (https://guides.library.upenn.edu/hometabs/) by subject.

Workshops

Penn Libraries workshops (https://guides.library.upenn.edu/workshops/) are hosted throughout the academic year. Workshops are designed to offer a deeper dive into resources and services and equip students with the skills they need to make the most of their academic experience.

Canvas

Canvas is the learning management system used by most schools and courses at the University of Pennsylvania. A valid PennKey is required to log in to the system.

- Log in to Canvas (https://canvas.upenn.edu/)
- Find more information and get assistance (https://infocanvas.upenn.edu/guides/canvas-for-students/)

Quaker Consortium

University of Pennsylvania students have a unique opportunity to study at Bryn Mawr, Haverford, or Swarthmore Colleges during the fall and spring terms of the academic year.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/quaker-consortium/)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/quaker-consortium/)

Registrar's Office

The Office of the University Registrar (https://srfs.upenn.edu/registrar/) supports teaching and learning at the University of Pennsylvania by maintaining the integrity of academic policies and the student information system. We are the stewards of Penn's student records from application to degree conferral in perpetuity.

We provide the following services to Students, Faculty, Alumni, Parents, Staff and many other constituents across our campus:

- Support Students and Departments during Registration
- Reserve Classrooms for Courses and Academic Events
- Schedule Final Exams
- Record and Report Enrollment and Final Grades
- Certify Attendance
- Manage Veterans Affairs Educational Benefits
- Issue Transcripts (https://srfs.upenn.edu/student-records/transcripts/)
- Verify Graduation and Degrees (https://srfs.upenn.edu/student-records/enrollment-degree-verification/)

A transcript is a representation of a student’s academic record while at the University of Pennsylvania.

Official transcripts are ordered through the Office of the University Registrar website (https://srfs.upenn.edu/student-records/transcripts/). Unofficial transcripts are available at anytime, online for students and alumni class of 1988 or later via the Penn In Touch portal (https://pennintouch.apps.upenn.edu/pennInTouch/jsp/fast2.do?1=2&access=student&bhcp=1).

The University Registrar’s office provides verification of dates a student attended Penn and degrees awarded by the Schools of the University. Details concerning Academic Certification may be found on the University Registrar web page (https://srfs.upenn.edu/student-records/enrollment-degree-verification/).

In accordance with Title 38 US Code 3679 subsection (e), the University of Pennsylvania adopts the following additional provisions for any students using U.S. Department of Veteran Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. The University will not:

- Prevent the student’s enrollment;
- Assess a late penalty fee to the student;
- Require student secure alternative or additional funding;
- Deny their access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Provide Chapter 33 Certificate of Eligibility (or its equivalent) or for Chapter 31, VA VR&E’s contract with the school on VA Form 28-1905 by the first day of class.
- Chapter 33 students can register at the VA Regional Office to use E-Benefits to get the equivalent of a Chapter 33 Certificate of Eligibility. Chapter 31 student cannot get a completed VA Form
Research
As one of the world’s leading research universities, Penn has a broad array of faculty conducting cutting-edge research in all disciplines. Undergraduates may get involved in research via a number of routes, including research-intensive courses, a variety of summer programs, and independent projects with a faculty mentor.

The Center for Undergraduate Research and Fellowships (https://www.curf.upenn.edu/research/) is a resource for all undergraduates interested in getting involved in research opportunities both on campus and around the world. CURF helps Penn undergraduates become involved in research by helping them identify resources, narrow their search, and shape their initial inquiries so they can find appropriate faculty mentors and research funding.

- Penn Undergraduate Research Mentoring Program (PURM) (https://www.curf.upenn.edu/content/penn-undergraduate-research-mentoring-program/)
- Research Opportunity Directory (https://www.curf.upenn.edu/research-opportunity-directory/)
- Research Grants (https://www.curf.upenn.edu/research/funding-opportunities/)
- Summer Humanities Internship Program (SHIP) (https://www.curf.upenn.edu/summer-humanities-internships/)

College of Arts and Sciences
Research reinforces and instills mastery of academic skills: how to formulate a question or hypothesis, how to gather evidence, and how to answer that question or test that hypothesis.

One of the major advantages of being an undergraduate at a research university is the wide variety of opportunities available for scholarship. Research in the College encompasses a range of activities. In some disciplines, such as English, philosophy and history, students read original works, or the primary literature, and look for new connections and interpretations of these writings. In areas such as anthropology or history of art, students study artifacts, works of art or ancient languages, gaining insights on earlier civilizations and the lives of those who contributed to them. Some students do research in biology, chemistry or psychology, seeking insights on genetic coding, molecular structure or animal behaviors.

Sometimes, students may receive College credit for research activities and scholarship, or receive work-study funds or stipends from faculty grants.

For more information, visit: https://www.college.upenn.edu/research/.

School of Engineering and Applied Science
Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below are examples of student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, visit: https://research.seas.upenn.edu/undergraduate-research/.

Finding a Research Mentor and Research Experiences
Students are encouraged to explore the Penn Engineering Faculty Expertise Directory (http://www.seas.upenn.edu/directory/departments.php), featuring the School’s standing faculty and which is searchable by department, research center affiliation, and research expertise keyword. Users can identify which faculty are conducting research in a specific area and contact faculty members whose research interests them.

Littlejohn Undergraduate Research Program
Thanks to a generous gift by Angus Littlejohn, the School of Engineering is able to offer Summer Research Opportunities to Penn Engineering Students. The program is open to rising sophomores, juniors and seniors.

The program intends to provide students the opportunity to get involved in hands-on engineering research under the supervision of a faculty member. Topics of research include all areas covered by the departments in the School of Engineering and Applied Science.

Rachleff Scholars Program
This program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

School of Nursing
The Office of Nursing Research (http://nursing.livewhale.net/research/onn/), along with our four research centers (http://nursing.livewhale.net/research/research-centers/) and partnerships across Penn, provide students with resources and support that are virtually unparalleled in our field. Students, from undergraduates to doctoral students, have numerous opportunities to engage in research and work alongside some of the most recognized researchers in their fields.

For more information, visit: https://www.nursing.upenn.edu/research/.

The Wharton School
Research provides an individualized method of learning and an in-depth treatment of a topic of personal interest with input from a faculty expert. Research experience is helpful if applying for distinguished international fellowships and is important if going on to graduate studies in an analytical discipline. Research skills are useful for decision-making in the private and public sectors and are required in academic positions.
Below you can find a variety of research opportunities and scholarship programs.

- Courses (https://undergrad-inside.wharton.upenn.edu/research/courses/)—Create "tools" in a research-methods course.
- Research assistantships (https://undergrad-inside.wharton.upenn.edu/research/assistantships/)—Learn by executing research-related tasks while working on a project for a faculty member.
- Summer programs (https://undergrad-inside.wharton.upenn.edu/research/summer-opportunities/)—Gain hands-on experience from proposal to presentation through a project commensurate with program duration.
- Scholars programs (https://undergrad-inside.wharton.upenn.edu/scholars-programs/)—Gain hands-on, in-depth experience from proposal to presentation via a senior thesis and other activities.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/research/.

University Policies

- Guidelines for Research in the Community (http://catalog.upenn.edu/pennbook/guidelines-research-community/)
- Guidelines for Student Protection in Sponsored Research Projects (http://catalog.upenn.edu/pennbook/protection-sponsored-research/)
- Policy on Undergraduate Students, High School Students and Non-affiliates Participating in Research in Penn Research Facilities (http://catalog.upenn.edu/pennbook/undergraduates-in-research/)
- Procedures Regarding Misconduct in Research for Nonfaculty members of the Research Community (http://catalog.upenn.edu/pennbook/misconduct-non-faculty/)

Scholars Programs

The following programs are available to all undergraduate students.

Benjamin Franklin Scholars

The Benjamin Franklin Scholars (https://www.curf.upenn.edu/bfs/) (BFS) program is one of Penn’s most distinctive undergraduate communities. Each year we welcome a group of extraordinary incoming students, who are committed to the transformative power of ideas.

Benjamin Franklin Scholars are selected based on their interest in, and demonstrated capacity for, a deep engagement in the liberal arts and sciences, both as ends in themselves and as engines of change in the world. By offering unique courses, and the guidance of extraordinary faculty and advisors, we encourage our students to pursue, in the spirit of Franklin himself, our guiding principles of breadth, curiosity, and a tinkering habit of mind.

BFS is a home for students who seek the advantages of wide-ranging knowledge, whatever particular educational path they choose. We look for spirited, independent people who find their own passions and are predisposed to explore their own ideas, wherever they might lead. We welcome restless minds who are not content just to appreciate great ideas as abstractions up on a shelf, but who see them as transformative: changing minds and so changing the world. We are a community of students and faculty who find value in the saying of the great classical writer Plutarch, whom Franklin himself claims to have “read abundantly,” that a truly great education is a kind of playing with fire.

BFS welcomes students in all the undergraduate schools: the College, Engineering, Wharton, and Nursing. Parts of the program, including admissions, work a bit differently in the different schools. For all our scholars, though, the BFS experience includes support for unpaid or underpaid internships, a presentation of research to the BFS community, and our Seminars, which engage a breadth of intellectually challenging topics, without requiring extensive prerequisites, both inside and outside of students’ major fields of study.

University Scholars

The University Scholars program (https://www.curf.upenn.edu/university-scholars/) provides undergraduates with mentored opportunities for innovation, conversation, and collaboration within and across the disciplinary boundaries of their curiosity-based inquiries.

Through these opportunities, students develop the ability to conduct consequential independent research projects; to communicate their work’s premises, approaches, outcomes, and implications to both expert and non-expert audiences; and to participate in and contribute to professional settings within and beyond their specific fields of interest.

UScholars is premised on a definition of “research” in its broadest sense, which enables students to explore meaningful intellectual questions in all areas of study at Penn; to satisfy their curiosity through rigorous, evidence-based investigative methodologies; and to think critically about how their work is contextualized within broader scholarship as well as within the wider world.

UScholars

- supports long-term, in-depth, original, independent, passion-driven undergraduate research;
- cultivates diversity, including across subject areas, methodologies, and faculty and student participants; and
- advances cross-disciplinarity, including the ability of students working within their own respective areas of burgeoning expertise to communicate and collaborate with others within and beyond their own disciplines.

Civic Scholars

Penn Civic Scholars (http://www.vpul.upenn.edu/civichouse/civicscholars/) is a unique program providing undergraduates with a sustained four-year experience in civic engagement and scholarship. The program culminates in certification upon graduation and designation as a Civic Scholar on the student’s transcript.

The Civic Scholars program is based on a few basic principles:

- Civic engagement and academic work are mutually reinforcing.
- Meaningful and sustained involvement in community affairs while at Penn is the base for life-long civic commitments and contributions.
- Undergraduates can conduct significant applied social and public policy research through a multi-year preparatory process.
- Forming a community of dedicated students and faculty will encourage distinctive civic service and scholarship.
SNF Paideia Fellows Program

The SNF Paideia Fellows Program (http://snfpaideia.upenn.edu/) provides a select group of Penn undergraduates the opportunity to integrate wellness, service, citizenship, and dialogue through a structured combination of academic courses, co-curricular events, and hands-on leadership experiences. Students from any of the four undergraduate schools can apply to the SNF Paideia Fellows program in the spring of their first year. SNF Paideia Fellows participate in the program for three years, sophomore through senior year.

The SNF Paideia Fellowship supports students’ ability to integrate their public roles as community members into their academic, personal, and professional lives in healthy, sustainable, and fulfilling ways. The program organizes and highlights curricular and co-curricular experiences where students can acquire the tools necessary for effectively contributing to the local, national, and global communities of which they are a part. It also provides opportunities for students to practice robust and respectful civil dialogue with others across a wide range of political, social, and cultural differences.

SNF Paideia Fellows:

• enroll in a sophomore year and junior year seminar designed to build skills and community among the Fellows;
• take (3) Paideia designated courses focusing on relevant aspects of dialogue across differences, public service, and personal and social wellness; and
• complete a Senior Capstone project that integrates a Fellow’s major with civic dialogue, service, and/or wellness.

The following programs are available to students in a particular school.

College of Arts and Sciences

Integrated Studies Program

The Integrated Studies Program (ISP) (https://isp.sas.upenn.edu/) is the first-year curriculum for Benjamin Franklin Scholars pursuing degrees in the College of Arts and Sciences.

Deeply rooted in the liberal arts tradition of acquiring and applying expansive knowledge, this residential academic program invites highly-motivated students to examine complex themes through the integration of multiple academic disciplines and methodologies.

Students are guided through the semester by some of Penn’s leading faculty. By investigating the same ideas under three distinct lenses, drawing simultaneously from the humanities, social sciences and sciences, students sharpen their focus on the similarities—and differences—between the disciplines’ habits of mind.

School of Engineering and Applied Science

Rachleff Scholars

The School Of Engineering and Applied Science is pleased to announce the Rachleff Scholars Program (https://www.seas.upenn.edu/undergraduate/research/rachleff-scholars.php). The Program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

SNF Paideia Fellows Program

The SNF Paideia Fellows Program (http://snfpaideia.upenn.edu/) provides a select group of Penn undergraduates the opportunity to integrate wellness, service, citizenship, and dialogue through a structured combination of academic courses, co-curricular events, and hands-on leadership experiences. Students from any of the four undergraduate schools can apply to the SNF Paideia Fellows program in the spring of their first year. SNF Paideia Fellows participate in the program for three years, sophomore through senior year.

The SNF Paideia Fellowship supports students’ ability to integrate their public roles as community members into their academic, personal, and professional lives in healthy, sustainable, and fulfilling ways. College of Arts and Sciences

Integrated Studies Program

The Integrated Studies Program (ISP) (https://isp.sas.upenn.edu/) is the first-year curriculum for Benjamin Franklin Scholars pursuing degrees in the College of Arts and Sciences.

Deeply rooted in the liberal arts tradition of acquiring and applying expansive knowledge, this residential academic program invites highly-motivated students to examine complex themes through the integration of multiple academic disciplines and methodologies.

Students are guided through the semester by some of Penn’s leading faculty. By investigating the same ideas under three distinct lenses, drawing simultaneously from the humanities, social sciences and sciences, students sharpen their focus on the similarities—and differences—between the disciplines’ habits of mind.

School of Engineering and Applied Science

Rachleff Scholars

The School Of Engineering and Applied Science is pleased to announce the Rachleff Scholars Program (https://www.seas.upenn.edu/undergraduate/research/rachleff-scholars.php). The Program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

The Rachleff Scholars Program is open to rising sophomores with at least a 3.4 Cumulative GPA and strong interests in engineering research. Each student accepted into the Rachleff Program is required to complete work in three separate areas: summer research experience, honors coursework, and scholarly community activities.

School of Nursing

Benjamin Franklin Scholar - Nursing

As a Benjamin Franklin Scholar - Nursing (https://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program/), you will engage in an intensive academic experience, along with peers in the College of Arts and Sciences, the Wharton School and in the School of Engineering and Applied Science, to complete the undergraduate Nursing major with an intensive liberal arts component. In addition to a variety of campus-wide programs as part of BFS, you will be able to enroll in BFS Seminars – courses taught by expert faculty from across campus in a variety of topics.

The Wharton School

Joseph Wharton Scholars

Founded in 1988, the Joseph Wharton Scholars (https://undergrad-inside.wharton.upenn.edu/jws/) program is designed to emphasize the importance of scholarly research and the liberal arts and sciences within the framework of a business education. Students in the program are required to take scholars courses both in Wharton and outside of Wharton (in the College of Arts & Sciences, Nursing, and/or Engineering), engage in a significant research project, and participate in a variety of academic, career-oriented, and social activities.

The JWS program is the Wharton component of the Penn-wide Benjamin Franklin Scholars (https://undergrad-inside.wharton.upenn.edu/bfs/) program, through which students gain access to BFS Seminars. In addition to the course requirements (https://undergrad-inside.wharton.upenn.edu/jws/), students must maintain a minimum 3.4 GPA.

Public Policy Research Scholars

The Public Policy Research Scholars (PPRS) (https://undergrad-inside.wharton.upenn.edu/pprs/) offers a unique opportunity for students to study and explore public policy.

PPRS is an interdisciplinary certificate program intended for undergraduates with a background in economics, who want to explore the impact of U.S. public policy on the domestic economy.

The PPRS program is not a major. Instead, it offers a supplemental course of study, focusing on the quantitative analysis of public policy at the federal level, that can be pursued alongside any major, in any of Penn's undergraduate schools. Beyond the curriculum, students also are required to do at least one public policy summer internship, for which they will receive funding from the Penn Wharton Public Policy Initiative. They also will have opportunities to assist with faculty-led policy research on campus. Through PPRS, we aim to create a tight-knit cohort of undergraduates from across the University who are committed to gaining the skills and experience necessary to critically assess U.S. public policy, as well as to prepare for graduate study and career opportunities in the field.

The core skills at the heart of PPRS include:
- Economic and political analysis of public policy, for assessing why, how, and with what degree of success the government designs and implements policy.
- Statistical thinking and quantitative analysis of economic data.
- Knowledge of the policymaking process.
- The application of theoretical and quantitative tools to practical, real-life policy questions.

Students that complete the program will have the designation "Public Policy Research Scholar" noted as an honor on their transcripts and will receive a certificate upon graduation.

**Wharton Research Scholars**

Wharton Research Scholars ([https://undergrad-inside.wharton.upenn.edu/wrs/](https://undergrad-inside.wharton.upenn.edu/wrs/)) is an intensive one-year research program for a select group of students who are interested in conducting research under the supervision of some of Wharton's preeminent faculty members. As part of the program, participants complete an honors thesis.

Students apply to work on a specific project they propose in consultation with a Wharton faculty member who agrees to act as their faculty mentor. Students are allowed to have more than one faculty mentor provided at least one is a member of the Wharton faculty.

Throughout the year, students convene to discuss progress, strategies, and challenges within their projects. This interaction fosters a strong scholarly community where students can learn from each other's experience. The research scholars also meet regularly with their faculty mentors who advise the students throughout the year. The program culminates with final presentations and publication of research papers on the University of Pennsylvania Libraries' ScholarlyCommons ([http://repository.upenn.edu/wharton_research_scholars/](http://repository.upenn.edu/wharton_research_scholars/)).

**Submatriculation**

Penn offers students many opportunities to begin a graduate program while completing an undergraduate degree. Students may apply for admission as submatriculants to a variety of the University's graduate and professional areas of study. Submatriculation programs exist in the four undergraduate schools and in several of Penn's graduate schools.

Application for admission as a submatriculant is made within the regular deadlines and processes for application to the graduate program of interest, usually during the student's junior year. Prior to applying for admission as a submatriculant, a student should meet with an academic advisor in both the undergraduate school and in the intended graduate program.

Policies, options, and procedures for submatriculation vary depending on a student's undergraduate school:

- College of Arts and Sciences ([https://www.college.upenn.edu/submatriculation/](https://www.college.upenn.edu/submatriculation/))
- School of Engineering and Applied Science ([http://www.seas.upenn.edu/undergraduate/degrees/submatriculation.php](http://www.seas.upenn.edu/undergraduate/degrees/submatriculation.php))
- School of Nursing ([https://www.nursing.upenn.edu/academics/a-penn-nursing-education/submatriculation/](https://www.nursing.upenn.edu/academics/a-penn-nursing-education/submatriculation/))

For more information about interdisciplinary submatriculation opportunities, click here (p. 293).

**School of Arts and Sciences**

For a list of School of Arts and Sciences departments that consider submatriculation applications, visit: [https://www.college.upenn.edu/submatriculation/](https://www.college.upenn.edu/submatriculation/).

In addition to submatriculating within a department, College undergraduate students are also eligible for the following specialized submatriculation programs:

**BA/JD Program in Arts & Sciences and Law**

This rigorous program offers an opportunity for highly qualified and motivated College students to apply to Penn Law School during what is generally the first semester of a student's junior year (between 16 and 23.99 course units). If accepted, the student will submatriculate into the J.D. program in their senior year. Applicants must be committed to the study of law in its theoretical and practical aspects.

For more information, visit: [https://www.college.upenn.edu/submatriculation/](https://www.college.upenn.edu/submatriculation/).

**Bio-Dental Program**

Bio-Dental submatriculation is a seven-year joint program of the College and Penn's School of Dental Medicine for students who will major in Biology and who wish to enroll in the Dental School during their senior year in the College. Application to the program must be made at the time of application to Penn. Applicants will be notified of their conditional acceptance into the program when they are notified of their admission to Penn. Full acceptance into the program is made after the student's senior year and is based on academic performance during those three years and meeting the admissions standards of the Dental School.

For more information, visit: [https://www.bio.upenn.edu/undergraduate/submatriculation/accelerated-dental-program](https://www.bio.upenn.edu/undergraduate/submatriculation/accelerated-dental-program/).

**Roy and Diana Vagelos Program in Molecular Life Sciences**

Ambitious and highly motivated students interested in the molecular view of life should consider the Vagelos Scholars Program in Molecular Life Sciences. Students begin as first-year students and major in two sciences or submatriculate for a Master of Science degree in the standard four years. Students in this program plan to pursue scientific research careers. Scholars are invited from the admitted pool of high school seniors at the beginning of April at the discretion of the faculty director and the admissions committee.

For more information, visit: [http://www.sas.upenn.edu/biochem/vspmls.html](http://www.sas.upenn.edu/biochem/vspmls.html).

**School of Engineering and Applied Sciences**

- Submatriculation is only available to students entering Fall 2017 and earlier.
- Both BSE and BAS degree students in Penn Engineering may apply for submatriculation into engineering master's programs. (Note that
Engineering students are not permitted to submatriculate into the Master of Computer and Information Technology (MCIT) program.

- Qualified undergraduates in Penn's other schools may apply to submatriculate into any of the Penn Engineering master's degree programs, subject to their home school’s rules and regulations.

For more information, visit https://catalog.upenn.edu/undergraduate/academic-resources/submatriculation/visit https://ugrad.seas.upenn.edu/student-handbook/programs-options/submatriculation-engineering/.

In addition to submatriculating within a department, Engineering undergraduate students are also eligible for the following specialized submatriculation program:

**Penn Engineering/Penn Law Program**

Penn’s Law School offers an opportunity for qualified juniors in Penn Engineering to apply early to the Law School and submatriculate into the JD program beginning their fourth year. The program is designed as a 3-year + 3-year accelerated program for highly qualified Engineering undergraduates either in the Bachelor of Applied Science (BAS) or Bachelor of Science in Engineering (BSE) degree programs.

For more information, visit: https://ugrad.seas.upenn.edu/student-handbook/programs-options/submatriculation-law/.

**Accelerated Masters**

- Accelerated Masters is only available to students entering Fall 2018 and later.
- Both BSE and BAS degree students in Penn Engineering may apply for accelerated master’s into engineering master’s programs. (Note that Engineering students are not permitted to submatriculate into the Master of Computer and Information Technology (MCIT) program.)
- Qualified undergraduates in Penn’s other schools may apply for the accelerated master’s program in any of the Penn Engineering master’s degree programs, subject to their home school’s rules and regulations.

**School of Nursing**

Nursing undergraduate students are eligible for the following specialized submatriculation programs:

**BSN/JD Program**

Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in the JD program (https://www.law.upenn.edu/academics/degrees.php) at Penn Law School while still undergraduates. The current climate of healthcare litigation and malpractice suits is well suited for professionals who combine nursing education and experience with legal expertise. A background in both nursing and law gives students a powerful and marketable skillset, and prepares students to make an impact on the medical and legal professions.

To submatriculate into Penn Law, students should take the LSAT and apply (https://www.law.upenn.edu/admissions/jd/) during their junior year. If a student is admitted, they will begin taking courses at the law school during their fourth year, completing both the BSN and JD degrees in six years, instead of the usual seven.

For more information, visit https://www.nursing.upenn.edu/live/files/56-submatriculation-law (https://www.nursing.upenn.edu/live/files/56-submatriculation-law/).

**BSN/MSN Program**

The demand for nurses with MSN degrees is higher than ever. Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in one of Penn Nursing’s MSN Programs (https://www.nursing.upenn.edu/academics/master-of-science-in-nursing-msn/) while still undergraduates. Students are encouraged to apply (https://www.applyweb.com/upenn/) as early as their junior year. If accepted, students will begin to take master’s level coursework, earning credit toward both degrees.

For more information, visit: https://www.nursing.upenn.edu/academics/a-penn-nursing-education/submatriculation/.

**The Wharton School**

Wharton undergraduate students are eligible for the following specialized submatriculation programs:

**Wharton Law School Submatriculation Program**

During the junior year, qualified Wharton undergraduate students may apply for admission to the Penn Law School and submatriculate into the Juris Doctor (JD) program. In this 3-year + 3-year accelerated program, the student’s fourth year of study is spent entirely at the Law School completing the first-year law curriculum. The remaining undergraduate and/or graduate degree requirements are then completed in the student’s fifth and sixth years of study.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

**Wharton MBA Submatriculation Program**

Qualified juniors in the Wharton Undergraduate Program may apply for early entry (submatriculation) into the Wharton Master of Business Administration (MBA) Program. In this 3-year + 2-year accelerated program, students’ fourth and fifth years of study are spent entirely as part of the MBA Program. The program is designed to attract academically talented undergraduates with well-defined career goals and significant work experience. Students apply in the junior year.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

**Wharton PhD Submatriculation Program**

The goal of the program is to allow selected Wharton undergraduates the opportunity to submatriculate into one of Wharton’s Ph.D. programs directly from the undergraduate program.

For more information, visit https://doctoral-inside.wharton.upenn.edu/submatriculation/.

**Penn Summer**

Penn Summer (https://summer.sas.upenn.edu/) offers current Penn students, alumni, high school, and visiting students the opportunity to dive into hundreds of exciting subjects and get ahead in their academic pursuits.
Current and Incoming Penn Students
Residential undergraduates can choose to enroll in on-campus and online courses; no additional application is necessary, and all Penn Summer courses earn academic credit. Incoming first-year students and undergraduates can learn more about how to enroll on the Penn Summer website (https://summer.sas.upenn.edu/programs/summer-sessions/enrollment/).

Current Penn students are encouraged to take advantage of advising resources during the summer term via their home school academic advisor. Before enrolling in courses, students should consult with their academic advisor (p. 300) regarding their intended coursework to ensure adequate degree progress.

Visiting Students, High-School students, International Students and Alumni
Visiting students are invited to take classes through one of our many programs (https://summer.sas.upenn.edu/programs/abroad/).

Penn Summer Abroad
Students can earn Penn credit as they experience culture in another country with Penn Summer Abroad (http://www.sas.upenn.edu/summer/programs/abroad/). Students travel with Penn faculty and other undergraduates with accommodations and excursions planned for them, enjoying the flexibility of a short-term commitment and making the most of their summer break.

For the most current Penn Summer Abroad information, visit: http://www.sas.upenn.edu/summer/programs/abroad (http://www.sas.upenn.edu/summer/programs/abroad/).

Transcripts
A transcript is a representation of a student’s academic record while at the University of Pennsylvania.

Official transcripts are ordered through the Office of the University Registrar website (https://srfs.upenn.edu/student-records/transcripts/). Unofficial transcripts are available at anytime, online for students and alumni class of 1988 or later via the Penn in Touch portal (https://pennintouch.apps.upenn.edu/pennInTouch/jsp/fast2.do?1=2&access=student&bhcp=1).

Wellness
There are a wide variety of resources available to support students at Penn. Some of the most commonly used resources are listed below.

Wellness at Penn (https://www.wellnessatpenn.com/)
The Wellness at Penn initiative provides support, resources, and practical tools for wellness across the Penn community. It affirms wellness as a core priority and necessary driver of life on campus; and it offers a wide range of opportunities to reflect and engage on issues of wellness, stress, mental health, resilience, happiness, personal and academic goals, and the meaning of success.

Counseling and Psychological Services (CAPS) (http://www.vpul.upenn.edu/caps/)
215-898-7021 (Nights and weekends, ask for CAPS counselor on call.)

Counseling and Psychological Services (CAPS) provides professional psychological and psychiatric services to undergraduate, graduate, and professional students who need support in fulfilling their academic, social, and personal objectives. Along with health and wellness partners throughout the Penn community, CAPS directly supports student mental health through counseling, crisis management, consultation, education and outreach, and training.

Division of Public Safety (https://www.publicsafety.upenn.edu/)

A central source for information about police, fire, and emergency services, security services, including walking escorts, and special victim services. Public safety also manages the University’s extensive electronic security infrastructure.

Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds/)
(215) 573-9235; TDD: (215) 746-6320

The Office of Student Disabilities Services (SDS), part of the Weingarten Learning Resources Center (http://www.vpul.upenn.edu/lrc/), provides comprehensive, professional services and programs for students who self-identify with disabilities to ensure equal academic opportunities and participation in University-sponsored programs. Professional staff evaluate current documentation, determine individual students’ eligibility according to program guidelines, and determine reasonable accommodations for all qualified students with documented disabilities on a case-by-case basis, including academic adjustments, e-text, accessible campus housing, and transportation and parking. SDS also coordinates auxiliary aids and services such as sign language interpreters and Computer Aided Realtime Translation (CART) reporters, as well as the loan of equipment and assistive technologies.

Student Health Service (http://www.vpul.upenn.edu/shs/)
215-746-3535

Student Health Service is a state-of-the-art primary care center dedicated to the health and well-being of Penn students. Student Health provides accessible, cost-effective, culturally-sensitive, and student-focused healthcare, including care for acute and chronic health problems, preventive health services, and health and wellness education. The Health Service works in close collaboration with our partners in the University Life Division, and with our colleagues in the University of Pennsylvania Health System (http://www.pennmedicine.org/) to help ensure the health and wellness of the campus community.

2023-24 Catalog | Generated 08/02/23
Student Intervention Services (http://www.vpul.upenn.edu/intervention.php)
215-898-6081
Penn Student Intervention Services (SIS) assists the University community in handling emergencies or critical incidents involving the welfare and safety of students.

Office of the Chaplain (https://chaplain.upenn.edu/)
215-898-8456
The staff of the Office of the Chaplain (https://chaplain.upenn.edu/about-us/staff/) is available to students, faculty and staff for pastoral support, guidance, or informal advising and counseling. The Chaplain, an ordained clergy person, participates in campus ceremonies such as Convocation, Baccalaureate and Commencement and also officiates at weddings (https://chaplain.upenn.edu/about-us/weddings-blessings/) and campus memorial services. The office serves and supports a wide range of student organizations (https://chaplain.upenn.edu/student-organizations/), fellowships and religious communities on our campus. They also develop programming designed to improve interfaith understanding and build meaningful, collaborative relationships across religious difference.

Campus Health (http://www.vpul.upenn.edu/shs/campushealth/)
Part of Student Health Service, Campus Health (http://www.vpul.upenn.edu/shs/campushealth/) seeks to empower the Penn community to Live Well through advocacy, education, and action. Campus Health staff focus on a wide variety of healthy living topics including sleep, hygiene, stress reduction, nutrition, exercise, tobacco-free lifestyles and bike safety. Key initiatives include annual flu immunization clinics, which vaccinate more than 2,000 people, and yearlong sexual wellness education through events such as “Sex Camp” and “Sex Jeopardy.”

Alcohol and Other Drug Program Initiatives (http://www.vpul.upenn.edu/alcohol/)
The Office of Alcohol and Other Drug Program Initiatives oversees critical areas of health and wellness that can challenge the academic success of Penn students. The office comprises alcohol policy initiatives, violence prevention, data collection, strategic project management, and (in a collaboration with Student Intervention Services (http://www.vpul.upenn.edu/intervention.php)) proactive crisis management.
POLICIES AND PROCEDURES

The following policies and procedures relate to undergraduate academics at Penn, and are organized by topic.

Most academic policies and procedures at Penn are school-based. University policies (http://catalog.upenn.edu/pennbook/) are also often administered through the schools. Students should consult with their school or program academic advisors (p. 300) with questions or for help in understanding academic policies and procedures.

- Course and Exam-Related Policies (p. 314)
- Grade and GPA-Related Policies (p. 317)
- Graduation Policies (p. 318)
- Leaves of Absence (p. 319)
- Residency Requirement (p. 319)
- Transfer Policies (p. 320)

Course and Exam-Related Policies

Students should consult with their academic advisors (p. 300) about course and course-related policies and procedures.

- Add/Drop Period (p. 314)
- Auditing (p. 314)
- Class Attendance (p. 314)
- Course Load (p. 314)
- Course Numbering & Academic Credit (p. 314)
- External Exam Credit (p. 315)
- Independent Study (p. 315)
- Liberal and Professional Studies Course Credit (p. 315)
- Part Time Status (p. 316)
- Petitions (p. 316)
- Policy on Common Midterm Examinations (p. 316)
- Retaking Courses (p. 316)
- Rules Governing Final Examinations (p. 316)
- Withdrawing From A Course (p. 317)

Add/Drop Period

Add/drop deadlines for each semester can be found in the Academic Calendar (p. 297).

Students should consult with their advisors before dropping below a defined number of course units (generally 4), which may have adverse consequences.

Some courses may have different add/drop policies; students should consult with their school's advising office for further details.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/course-selection/)

Auditing

Undergraduate students cannot officially audit courses; however, subject to the approval of the instructor, students may be permitted to sit in on some courses without registering. These courses will not appear on students' records. Not all departments or schools allow this type of informal audit.

Class Attendance

Policies regarding class attendance vary by school and instructor.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/attendance/)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#attendance)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/attendance/)

Course Load

Policies regarding minimum and maximum course loads vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/course-load/)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#course%20load)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/course-load/)

Course Numbering & Academic Credit

Course Numbering

Courses are designated with a subject code and course number. The number assigned to a course generally denotes its level and may also indicate a course type.

- 0001-3999 Undergraduate courses
- 4000-4999 Mixed courses primarily for Undergraduate students
- 5000-5999 Mixed courses primarily for Graduate students
- 6000-9899 Graduate courses
- 9900-9999 Graduate individual study (thesis/dissertation) courses

Academic Credit at Penn
All of Penn's undergraduate programs and many of its graduate and professional programs use course units (CUs) as a general measure of academic work and progress toward a degree. Penn's use of CUs conforms to the practices of peer institutions that use a similar system of academic credit including Brown, Duke, Harvard, Princeton, and Yale. A CU is a general measure of academic work over a period of time, typically a term (semester or summer).

The Schools of Law, Dental Medicine, and Veterinary Medicine do not use CUs. The Law School uses credit hours in a way that is consistent with law schools in the United States. The Schools of Dental Medicine and Veterinary Medicine uses credit hours in ways that are consistent with professional education in those fields of study.

Definition of a Course Unit

A course unit (CU) is a general measure of academic work over a period of time, typically a term (semester or summer). A CU (or a fraction of a CU) represents different types of academic work across different types of academic programs and is the basic unit of progress toward a degree. One CU is usually converted to a four-semester-hour course. A degree from one of Penn's undergraduate programs requires the completion of 32 to 40 (or more) course units. Graduate and professional degrees vary in the number of years of study and the number of CUs required.

Assignment of Academic Credit

The course unit (CU) value of a course determined by the faculty reflects their judgment regarding the expected work of a student completing that course. Factors that may be considered when assigning academic credit for a course include scheduled class time, expected time outside of class, the difficulty and range of materials covered, and the mastery of specific knowledge through written reports, exams, and other evaluations.

The assignment of academic credit for a course is formally approved by the curriculum committee (or similar body) of the school when a course is first proposed. It is reviewed formally by the faculty of a program, department, or school through periodic program reviews or curriculum revisions. Additionally, it is reviewed by the faculty of a program, department, or school informally as part of ongoing assessments of curriculum and teaching effectiveness.

Transfer Credit

At the University of Pennsylvania, faculty in individual departments and schools make decisions about awarding credit for external courses (courses taken at a college or university other than Penn). Each school has policies and procedures for evaluating and awarding external credit. Judging both course content and student work, faculty determine whether external courses are equivalent to courses offered through their own departments and thus what credit, if any, to award. In awarding credit at Penn for external courses, faculty also determine how those credits may be used (e.g., whether they satisfy general education requirements or requirements in a major).

Undergraduate schools use a web-based, password protected application called the External Course Approval Tool, or (http://www.college.upenn.edu/xcat/) XCAT (http://www.college.upenn.edu/xcat/). When academic credit is awarded for courses taken at other institutions, typically courses worth 3, 4, or 5 semester hours or worth 5 quarter hours are awarded one course unit (CU) at Penn.

External Exam Credit

The University of Pennsylvania may award credit or advanced course standing to students who have taken Advanced Placement (AP), International Baccalaureate (IB), or other internationally-recognized examinations. Scores warranting University credit vary by department.

Penn Admissions External Exam Credit Policy (http://www.admissions.upenn.edu/apply/freshman-admission/externalexamcredit/) (for prospective students)

School specific policies:

• College of Arts and Sciences (https://www.college.upenn.edu/placement/)
• School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/handbook/policy/advanced-placement.php)
• School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#AP%20Policies)
• The Wharton School (https://undergrad-inside.wharton.upenn.edu/apib-credit/)

Independent Study

Independent study allows students to pursue academic interests not available in regularly offered courses.

Students should approach their academic or departmental advisor to explore the possibility of pursuing independent study.

Further information about independent study procedures is available by school.

• College of Arts and Sciences (https://www.college.upenn.edu/research/)
• School of Nursing (http://www.nursing.upenn.edu/live/files/157-independent-study-form-ipdf/)
• The Wharton School (https://undergrad-inside.wharton.upenn.edu/independent-study/)

Liberal and Professional Studies Course Credit

The College of Liberal and Professional Studies (LPS) (http://www.sas.upenn.edu/lps/) is a division of the School of Arts and Sciences. LPS administers programs for adult, professional, and part-time students and offers late-afternoon, evening, and Saturday courses at the undergraduate, post-baccalaureate, and graduate levels. Traditional undergraduate students are eligible to take LPS courses. A certain number of spaces may be reserved for LPS students until the first week of classes, and some classes have restricted enrollments for LPS students only. Students should direct questions about enrollment policies and permits for specific LPS classes to LPS (http://www.sas.upenn.edu/lps/).
Part Time Status

Traditional undergraduate students are generally expected to maintain full-time status. Students should consult with their school advising office for further details. Students who are enrolled either half-time or less than half-time are considered to be part-time students.

Please note that dropping to part-time status may affect other considerations, such as visa status, athletic eligibility, financial aid, and/or insurance coverage.

More information for specific populations of students can be found below:

- International Students: https://global.upenn.edu/isss/rcl
- Athletes: https://catalog.upenn.edu/pennbook/intercollegiate-athletics

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/part-time-policy/)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#course%20load)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/part-time-status/)

Petitions

Students who believe a special circumstance might warrant an exemption from a school policy and/or requirement may submit a petition. Petitions are subject to review by a school-based committee. Students should first consult with their academic advisor.

For petitions regarding course registration deadlines, see the Guidelines for Student Petitions Regarding Course Registration Deadlines (http://catalog.upenn.edu/pennbook/student-petitions/).

Policies and procedures regarding petitions vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/petitions/)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#petition)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/petitions/)

Policy on Common Midterm Examinations

Instructors teaching a course with multiple sections who plan to schedule a common midterm examination outside the class’s regular meeting time must notify students of this event during the first week of the semester and be prepared to offer one or more make-up examinations to accommodate any student who is enrolled in a course that meets at the time of the common examination.

Students enrolled in a course that conflicts with the time of a common midterm examination must notify the instructor administering the common midterm examination of the conflict by the end of the course selection (add) period. Students may not be required to miss their regularly scheduled class.

(Source: Almanac – April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html))

Retaking Courses

Policies governing retaking a course vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/retaking-courses/)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#a)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/retaking-courses/)

Rules Governing Final Examinations

1. No instructor may hold a final examination nor require the submission of a take-home final exam except during the period in which final examinations are scheduled. When necessary, exceptions to this policy may be granted for postponed examinations (see 3 and 4 below). No final examinations may be scheduled during the last week of classes or on reading days.

2. No student may be required to take more than two final examinations on any calendar day during the period in which final examinations are scheduled. If more than two are scheduled, the student may postpone the middle exam. If a take-home final exam is due on a day when two final examinations are scheduled, the take-home exam shall be postponed by one day.

3. Examinations that are postponed because of conflicts with other examinations, or because more than two examinations are scheduled in the same day, may be taken at another time during the final examinations period if the faculty member and student can agree on that time. Otherwise, they must be taken during the official period for postponed examinations.

4. Examinations that are postponed because of illness, a death in the family, for religious observance, or some other unusual event may be taken only during the official periods: the first week of the spring and fall semesters. Students must obtain permission from their Dean’s office to take a postponed exam. Instructors in all courses must
be willing to offer a make-up examination to all students who are
excused from the final examination.
5. No instructor may change the time or date of a final exam without
permission from the appropriate Dean.
6. No instructor may increase the time allowed for a final exam beyond
the scheduled two hours without permission from the appropriate
Dean.
7. No classes or required class activities may be held during the reading
period.
8. The first examination of the day begins at 9 a.m. and the last
examination concludes by 8 p.m. There will be one hour between
exam time blocks.
9. All students must be allowed to see their final examination. Exams
should be available as soon as possible after being graded with
access ensured for a period of at least one regular semester after
the exam has been given. To help protect student privacy, a student
should have access only to his or her own exam and not the exams of
other students. Therefore, for example, it is not permissible to leave
student exams (or grades or papers) in publicly accessible areas.
10. Students may not be asked for their Social Security Numbers.
    Instructors may not publicly display a student’s Penn ID or any
    portion of the Social Security Number, nor use names, initials, or
    any personally identifiable information to post grades. Even when
    an identifier is masked or absent, grades may not be posted in
    alphabetical order, to protect student privacy.
11. Final exams for College of Liberal and Professional Studies (LPS)
courses must be given on the regular class meeting night during the
week of final examinations. No change in scheduling is permitted
without unanimous consent of all students in the class and the
director of LPS. LPS final exams may not be administered during the
last week of class or on a reading day.

In all matters relating to final exams, students with questions should first
consult with their Dean’s offices. Faculty wishing to seek exceptions to
the rules also should consult with their Dean’s offices. Finally, the Council
of Undergraduate Deans and Student Committee on Undergraduate
Education (SCUE) urge instructors to see that all examinations are
actively proctored.

(Source: Almanac, April 17, 2018, Volume 64, No. 31 (https://
almanac.upenn.edu/volume-64-number-31/#of-record-rules-governing-
final-examinations))

**Withdrawing From a Course**

Students may withdraw from a course through the end of the tenth
full week of the semester, with the permission of the instructor, and
should consult the Academic Calendar (p. 297) for the official withdrawal
deadline for each semester.

Summer courses and part-of-term courses have different deadlines.
Consult with an academic advisor for more information.

Withdrawal procedures vary by school:

- **College of Arts and Sciences** (https://www.college.upenn.edu/
  withdrawal/)
- **School of Engineering and Applied Science** (https://
  www.seas.upenn.edu/undergraduate/handbook/policy/withdraw-
course.php)
- **School of Nursing** (http://www.nursing.upenn.edu/student-services/
  resources/handbooks-forms-policies/bsn-handbook/courses-exam-
  related-policies/#withdraw)
- **The Wharton School** (https://undergrad-inside.wharton.upenn.edu/
  withdrawing/)

**Grade and GPA-Related Policies**

Students should consult with their academic advisors (p. 300) about
grading and GPA-related policies and procedures.

- **Academic Standing** (p. 317)
- **Dean’s List** (p. 317)
- **Grade Grievance Process** (p. 318)
- **Grades** (p. 318)
- **Incomplete Grades** (p. 318)
- **Pass/Fail** (p. 318)

**Academic Standing**

The University of Pennsylvania expects students to maintain a minimum
level of academic performance or risk being placed on Academic
Probation. The requirements for good academic standing vary by school;
students enrolled in more than one undergraduate school are subject to
the academic standing policies of both schools.

The requirements for good academic standing are:

- **College of Arts and Sciences** (https://www.college.upenn.edu/
  academic-standing/)
- **School of Engineering and Applied Science** (http://
  www.seas.upenn.edu/undergraduate/handbook/policy/academic-
  performance.php)
- **School of Nursing** (http://www.nursing.upenn.edu/student-services/
  resources/handbooks-forms-policies/bsn-handbook/academic-
  regulations/#Academic%20Standing)
- **The Wharton School** (https://undergrad-inside.wharton.upenn.edu/
  academic-standing/)

**Dean’s List**

Effective July 1, 2023, the University of Pennsylvania no longer awards
the Dean’s List citation.

Prior to July 1, 2023, the Dean’s List citation appeared on the transcript
and was awarded annually to any student who achieved a combined GPA
of 3.7 for the fall and spring semesters, provided that during those two
semesters, the student:

- Completed 6 or more credit units for letter grades
- Received no grades lower than C
- Completed all courses on time with no Incompletes, NRs, or GRs

A student who received a sanction of probation or greater for a violation
of the Code of Academic Integrity, the Code of Student Conduct, or
the Sexual Violence, Relationship Violence, and Stalking Policy was
not eligible for Dean’s List in the academic year in which the violation
occurred. The Dean’s List citation will be removed from the transcript
if the finding occurs after this honor has been posted or if the violation
occurs during the summer term following the academic year in which this
honor was awarded.

2023-24 Catalog | Generated 08/02/23
Grade Grievance Process

Students who wish to have a course grade reviewed must first attempt to resolve the issue with the course instructor. For detailed policies and procedures, students should refer to the policies of the school in which the course was taken.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/grade-review-policy/)
- School of Engineering and Applied Science
  - Students are advised to discuss the grading discrepancy/grievance directly with the course director/instructor. If the student is not satisfied with the conclusion of that meeting, the student can proceed to speak with the department chairperson about the grievance.
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/grievance-policy/)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/grade-grievance/)

Grades

The grade point average (GPA) is calculated at the end of every term based on the following grading scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
</tbody>
</table>

*There is no D-.

Policies regarding grades vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/credits-grades-policy/)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/handbook/policy/grades.php)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#grading%20policy)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/grades/)

Incomplete Grades

The decision to grant an Incomplete is solely that of the instructor teaching the course. Students should request Incompletes rarely if at all; it is far better to plan ahead and use advising and academic support resources to ensure that coursework is finished on time. There are a number of consequences of requesting an Incomplete, and unfinished coursework may result in an F grade or delay of graduation. Generally, students with one Incomplete must finish the work by the fifth week of the next semester.

Specific procedures and policies regarding incomplete grades vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/incompletes/)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#incompletes)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/incomplete/)

Pass/Fail

Students may be eligible to take certain courses pass/fail. Policies regarding pass/fail options vary by school and course.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/pass-fail/)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#pass/fail)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/pas-fail/)

Graduation Policies

Students should consult with their academic advisors (p. 300) about graduation requirements, Latin honors, and the procedures for applying for graduation and participating in graduation ceremonies.

- Graduation Honors (p. 319)
- Graduation Requirements (p. 319)
- Maximum Time to Complete a Degree (p. 319)
Graduation Honors

In recognition of distinguished academic achievement and high standards of academic integrity, the University of Pennsylvania awards Latin honors to undergraduate students based on the cumulative GPA on their transcripts at the time of graduation:

- **Summa Cum Laude**: 3.80 or higher
- **Magna Cum Laude**: 3.60 or higher, but less than 3.80
- **Cum Laude**: 3.40 or higher, but less than 3.60

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Latin honors. Notation of Graduation Honors will be removed from the transcript if the finding occurs after this honor has been posted.

(Source: Almanac, April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html), updated May 3, 2016, Volume 62, No. 33 (http://www.upenn.edu/almanac/volumes/v62/n33/changes-to-policies.html))

Graduation Requirements

Students are responsible for fulfilling all the requirements of their curriculum as determined by their school in order to graduate.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/graduation-policies/)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/handbook/policy/course-requirements.php)
  - Students must complete all courses within their major, as addressed individually by each department.
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/graduation-academic-honors/#graduation%20requirements)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/degree-requirements/)

Maximum Time to Complete a Degree

Some schools set a maximum period within which students must complete their degree. Students with questions should contact their school advising office.

School specific policies:

- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#completion)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/sunset-policy/)

Leaves of Absence

Students take time away from their studies for a wide variety of reasons, including to:

- Work on a political campaign
- Manage a medical concern
- Fulfill a family obligation
- Pursue career-related opportunities
- Complete career-related opportunities
- Take a break

Students typically take a leave for a full academic year. Individual circumstances may require more or less time; the length of the leave is determined by the school. Students on leave should remain in contact with their advisor and update them about plan changes. The return from leave process supports students in a successful re-entry to academic life at Penn. When preparing to return, students must consult their school advising office to develop a plan that includes connection with appropriate resources.

While interrupting one’s studies to take time away may seem intimidating, a leave is a means to the successful completion of a degree, not a barrier to graduating. Students considering a leave should take time to think carefully about their goals for the time away and for when they return. Speaking with an academic advisor is an important first step. Students should also consult others important to their decision-making process, such as family members or, if the student intends to address health concerns during the time away, their healthcare provider(s). Your school advising office will help you connect with other campus resources as you prepare to take a leave of absence, such as Student Financial Services, Housing, and International Student and Scholar Services.

Procedures for requesting a leave vary by school.

School specific policies:

- School of Arts and Sciences (https://www.college.upenn.edu/leave-of-absence/)
- School of Nursing (https://www.nursing.upenn.edu/live/files/216-leave-of-absence-policy/)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/leave/)

Residency Requirement

Residency requirement policies vary by school.

School specific policies:

- School of Arts and Sciences (https://www.college.upenn.edu/residency-requirement/)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#residency)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/transfer-residency/)
Transfer Policies

Students should consult their academic advisors (p. 300) about transferring within Penn or receiving credit for academic experiences at other universities. Students who are intending to transfer to another institution should speak with officials at their new institution.

When students receive credit for courses or other types of academic work done elsewhere, it is referred to as equivalent credit. Some of these credits will be the result of coursework taken before matriculation at Penn, but it is also possible to do a limited number of courses “away” after matriculation.

Credit earned before the student matriculates at Penn is referred to as Transfer Credit (p. 320). Credit earned at another institution while the student is enrolled at Penn (post-matriculation) is referred to as Credit Away (p. 320).

Policies regarding the types and amount of equivalent credit allowed vary by school.

Students who wish to apply for an internal transfer between any of the four undergraduate schools should meet with an advisor in their home school and an advisor from the school they wish to enter. Applicants should be prepared to discuss why the curriculum of the school to which they are applying for transfer is a good fit for their academic interests and goals. Students applying for internal transfer must be in good academic standing in their home school and should have no NR's, GR's, or I's on their record.

External transfers admitted to any of Penn's undergraduate schools or divisions are not eligible to transfer again within the University.

Specific policies and procedures for transferring internally vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/credits-grades-policy/)
- School of Nursing (https://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/leaves-transfers-and-withdraw/)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/itdd/)

These policies govern the transfer of credits taken before a student is officially enrolled at the University of Pennsylvania.

Penn Admissions Policy: http://www.admissions.upenn.edu/apply/transfer-admission/transfer-of-credits(http://www.admissions.upenn.edu/apply/transfer-admission/transfer-of-credits/)

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/credits-grades-policy/)
Academic Foundations (ACFD)

ACFD 6000 Scholarship and Personal Development I
In this course, faculty participants will develop and expand upon high-level personal competencies foundational to success in faculty appointments. Focus will be on self-assessments, strategic career planning, fostering personal and professional relationships, and scholarly productivity. Prerequisite: Faculty interested in enrolling in ACFD 6000, Scholarship and Personal Development I, will first need to be admitted to the Academic Foundations Certificate program. Program prerequisites include (but are not limited to) a current, full time faculty appointment at an accredited university. Participation in this program requires prior approval from faculty chair/chief as appropriate.

0.5 Course Units

ACFD 6010 Scholarship and Personal Development II
In this course, faculty participants will develop and expand upon high-level personal competencies foundational to success in faculty appointments. Focus will be on core competencies of advanced time and team management techniques, effective allocation of research resources, and strategies for funding. Prerequisite: Faculty interested in enrolling in ACFD 6010, Scholarship and Personal Development II, will first need to be admitted to the Academic Foundations Certificate program and complete ACFD 6000, Scholarship and Personal Development I. Overall program prerequisites include (but are not limited to) a current, full time faculty appointment at an accredited university. Participation in this program requires prior approval from faculty chair/chief as appropriate.
Prerequisite: ACFD 6000

0.5 Course Units

ACFD 6020 Scholarship and Personal Development III
In this course, faculty participants will develop and expand upon high-level personal competencies foundational to success in faculty appointments. Focus will be on interpersonal skills critical to negotiation and crucial conversations, and strategic career planning. Prerequisite: Faculty interested in enrolling in ACFD 6020, Scholarship and Personal Development III will first need to be admitted to the Academic Foundations Certificate program, and complete ACFD 6000, Scholarship and Professional Development I, and ACFD 6010, Scholarship and Personal Development II. Program prerequisites include (but are not limited to) a current, full time faculty appointment at an accredited university. Participation in this program requires prior approval from faculty chair/chief as appropriate.
Prerequisite: ACFD 6000 AND ACFD 6010

0.5 Course Units

ACFD 6030 Scholarship and Personal Development IV
In this course, faculty participants will develop and expand upon high-level personal competencies foundational to success in faculty appointments. Focus will be on communication skills critical for networking, and delivering impactful talks. Prerequisite: Faculty interested in enrolling in ACFD 6030, Scholarship and Personal Development IV, will first need to be admitted to the Academic Foundations Certificate program and complete ACFD 6000, Scholarship and Personal Development I; ACFD 6010, Scholarship and Personal Development II; and ACFD 6020, Scholarship and Personal Development III. Overall program prerequisites include (but are not limited to) a current, full time faculty appointment at an accredited university. Participation in this program requires prior approval from faculty chair/chief as appropriate.
Prerequisite: ACFD 6000 AND ACFD 6010 AND ACFD 6020

0.5 Course Units

ACFD 6999 Independent Study in Academic Foundations
This course is reserved for students in the Academic Foundations Certificate to complete an independent study with a predetermined faculty member. The topics will be determined in coordination with that faculty. Consultation with ACFD program and faculty is required before registration. The option to complete an independent study requires approval from academic advisor and Director of the ACFD program.

0.5-1 Course Unit

Accounting (ACCT)

ACCT 1010 Accounting and Financial Reporting
This course is an introduction to the basic concepts and standards underlying financial accounting systems. Several important concepts will be studied in detail, including: revenue recognition, inventory, long-lived assets, present value, and long term liabilities. The course emphasizes the construction of the basic financial accounting statements - the income statement, balance sheet, and cash flow statement - as well as their interpretation.

Fall or Spring

1 Course Unit

ACCT 1020 Strategic Cost Analysis
Strategic Cost Analysis is the process of analyzing and managing costs in order to improve the strategic position of the business. This goal can be accomplished by having a thorough understanding of which activities and costs support an organization's strategic position and which activities and costs either weaken it or have no impact. Subsequent cost management efforts can then focus on reducing or limiting expenditures on activities that add little or no strategic value, while increasing expenditures on activities that support the strategic position of the organization. Performance can then be evaluated to ensure that the chosen actions are taken, and that these actions are yielding improved strategic performance. Throughout the course, a strategic cost analysis and management framework will be applied across functions and organizations to highlight the cost analysis and performance evaluation methods available to forecast financial performance and improve strategic position.

Fall, Spring, and Summer Terms

1 Course Unit
ACCT 2110 Tax Policy and Practice in the Philadelphia Community
The academic component of the course will focus on several areas: (1) The Color of Money: Black Banks and the Racial Wealth Gap. Students will read this book throughout the semester to support their understanding of the community that they will be serving. (2) Statutory tax system. Students will learn about the tax system as it relates to individuals and sole proprietors. The VITA training covers general tax preparation, with a specific focus on tax credits available to VITA-eligible taxpayers and the use of VITA software. In addition, one session of the course will include a guest lecture/discussion by Professor Jennifer Blouin. She will focus on statutory tax issues related to organizational form choice for self-employed and gig economy workers, which is an important statutory issue in low-income communities. (3) Social policy debate. Tax policy, including deductions, subsidies and credits, are one tool that lawmakers can use to get more cash in the hands of individuals and families, especially for low-income groups. Students will consider the effectiveness and usefulness of tax policies relative to other tools that the government has available. There are three guest lecturers for the sessions on tax policy: Wharton Professors Alex Rees-Jones and Kent Smetters, and Professor Amy Beth Castro from SP2. (4) Working with people. Volunteering with VITA requires students to work with people from a low-income community on the sensitive issue of personal finances. Students will learn to discuss sensitive financial issues with lower-income adults (including many seniors) through readings and in-class discussions, and by reflecting on their real-life experiences in the local community. This skill is important in a variety of roles such as healthcare (physicians and nurses), business (e.g., the HR function), and education. The community service part of the course is volunteering with VITA, which is the IRS’s “Volunteer Income Tax Assistance” program. Following training, students will perform tax services for the West Philadelphia community during the 2023 tax season. The course will meet once a week in three-hour sessions for 8-9 weeks during the Spring semester. Students are expected to be in the field performing service throughout a significant portion of the semester. As described on the IRS website, the VITA program has operated for over 50 years. Volunteers offer free tax help to people who need assistance in preparing their own tax returns, including: • People who generally make $58,000 or less • Persons with disabilities; and • Limited English-speaking taxpayers. Spring
Also Offered As: BEPP 2110
1 Course Unit

ACCT 2120 Financial Measurement and Disclosure
This course builds on the knowledge you obtained in your introductory financial accounting course. This is an intermediate level course on financial reporting which covers more complicated transactions than those found in ACCT 1010. We will cover major valuation and financial reporting topics on all three major sections of the balance sheet—assets, liabilities, and equity—along with their consequences for net income and cash flows. Case studies and illustrative examples from the financial press will be used to increase your familiarity with actual firms’ financial statements and to emphasize the effect of financial accounting rules on the information presented in financial statements. After completing this course, you will have obtained many of the tools necessary to both prepare and analyze financial statements and accounting information provided by firms. You will acquire an understanding of both the “how” of accounting procedures and the underlying reasons “why” these practices are adopted. These skills are essential for pursuing a broad range of professions in accounting and finance.
Fall
Prerequisite: ACCT 1010
1 Course Unit

ACCT 2420 Accounting and Business Analysis
In the course, students learn how to analyze firms’ financial statements and disclosures to determine how a firm’s particular accounting choices reflect the underlying economics of the firm. As a result, the course strengthens students’ ability to use financial statements as part of an overall assessment of the firm’s strategy and valuation. The course is especially useful for anyone interested in working on the buy or sell side. The course provides both a framework for and the tools necessary to analyze financial statements. At the conceptual level, it emphasizes that preparers and users of financial statements have different objectives and incentives. At the same time, the course is applied and stresses the use of actual financial statements. For example, students learn how to detect when firms are managing earnings and/or balance sheets. It draws heavily on real business problems and uses cases to illustrate the application of the techniques and tools. If ACCT 2420 is not offered in a given year, Undergraduate students can take ACCT 7420. Please submit a permission request through Path@Penn.edu.
Fall or Spring
Mutually Exclusive: ACCT 7420
Prerequisite: ACCT 1010
1 Course Unit

ACCT 2430 Accounting for Mergers, Acquisitions, and Complex Financial Structures
Since ACCT 2430 will not be cross listed with ACCT 7430 in the Fall 2021 semester, students interested in ACCT 2430 will need to be permitted into ACCT 7430. All prerequisites need to be completed in order to receive a permit. Please submit a permission request through Path@Penn.edu. Undergraduate students will be notified in August regarding a permit. Also this class will follow the MBA calendar. The objective of this course is to discuss and understand the accounting that underlies merger, acquisition, and investment activities among firms that result in complex financial structures. Key topics include the purchase accounting method for acquisitions, the equity method for investments, the preparation and interpretation of consolidated financial statements, tax implications of mergers and acquisitions, and earnings-per-share considerations, the accounting implications of intercompany transactions and non-domestic investments, etc.
Fall or Spring
Mutually Exclusive: ACCT 7430
Prerequisite: ACCT 1010 AND (ACCT 2120 OR ACCT 2420)
1 Course Unit
ACCT 2640 Climate and Financial Markets
Climate change might be the defining challenge of our times, with a wide range of effects on financial markets and the broader economy. At the same time, financial markets play an important role in financing the transition to a net-zero economy. This role, however, is shaped by the information that is available to market participants. In this course, we examine how climate risks—both physical and regulatory—affect firms, financial markets (including carbon and renewable-energy certificate markets), and markets for energy and real estate. We examine the role that firms’ disclosures and third-party information sources play. As climate change is high on the agenda of almost every company and government, this course will be valuable both for students with the ambition to pursue a career centered around sustainability and those who want to gain a better understanding of how climate issues affect more traditional roles in the financial sector, consulting, or non-profits. The starting point for this course is that financial market participants increasingly realize that climate change represents an important investment risk. One central concern focuses on transition risks, and in particular on the effects that regulatory responses to climate change have on the business models of carbon-intensive energy companies. We discuss how concerns about various climate risks influence the way investors allocate their capital and exercise their oversight of firms. We start with the price impacts of climate risks in equity, debt and real estate markets, including the role played by shareholder activism and engagement, divestment and portfolio alignment. Next, we study carbon markets with a focus on pricing and discuss strategies to hedge climate risks through financial instruments such as carbon or renewable-energy credits and derivative contracts. We then explore how different firms in the global energy sector—ranging from oil & gas to renewable energy to electric utilities—have responded to climate-related pressures from their investors and other stakeholders. Because outsiders’ reactions depend on the information that they have, we investigate the impact of ESG reporting on financial markets and on the choices that managers make. Here, we also discuss the costs and benefits of regulating ESG reporting and the impact of greenwashing. We pay special attention to the impact of climate risk and reporting on decisions inside organizations, such as spin-offs, hedging, catastrophe insurance, and the structure of executive-compensation contracts. Further topics include life-cycle emissions and the social cost of carbon.
Spring
Also Offered As: BEPP 2640
Mutually Exclusive: BEPP 7640
Prerequisite: ACCT 1010 AND BEPP 2500
0.5 Course Units

ACCT 2700 Forensic Analytics
Recent trends in Big Data and predictive analytics are revolutionizing the way stakeholders analyze financial data. This course teaches students the hands-on skills necessary to manipulate large-scale financial databases and build predictive models useful for strategic and investment decisions. The course will cover three applications of predictive analytics: (i) forecasting future earnings, (ii) predicting accounting fraud, and (iii) detecting insider trading. The course will draw on cutting-edge academic research in each area; introduce students to the basic SQL coding skills necessary to manipulate Big Data and conduct meaningful analyses; and leverage the datasets and computing power of Wharton Research Data Services. The course is organized as a hybrid of a traditional seminar course and a computer science course. The first few classes of each unit will cover the conceptual material and source material related to each topic. The later classes in each unit will cover the technical material and programming skills needed to manipulate the respective datasets, estimate predication models, and backtest algorithms.
Spring
Prerequisite: ACCT 1010 AND STAT 1020
1 Course Unit

ACCT 2970 Taxes and Business Strategy
The objective of this course is to develop a framework for understanding how taxes affect business decisions. The key themes of the framework - all parties, all taxes and all costs - are applied to decision contexts such as investments, compensation, organizational form, and mergers and acquisitions. The ultimate goal is to provide a new approach to thinking about taxes that will be valuable even as laws and governments change. If ACCT 2970 is not offered in a given year, Undergraduate students interested in ACCT 2970 will need to submit a permission through Path@Penn.edu. All prerequisites need to be completed in order to receive a permit. Also this class will follow the MBA calendar.
Spring
Also Offered As: FNCE 2970
Prerequisite: ACCT 1010 AND FNCE 1010
1 Course Unit

ACCT 3990 Independent Study
Intensive reading and study with some research under the direction of a faculty member. Approval from one of the departmental advisers must be obtained before registration. Also a 3.4 average in major related subjects required.
Fall or Spring
0.5-1 Course Unit
ACCT 6110 Fundamentals of Financial Accounting
The objective of this course is to provide an understanding of financial accounting fundamentals for prospective consumers of corporate financial information, such as managers, stockholders, financial analysts, and creditors. The course focuses on understanding how economic events like corporate investments, financing transactions and operating activities are recorded in the three main financial statements (i.e., the income statement, balance sheet, and statement of cash flows). Along the way, students will develop the technical skills needed to analyze corporate financial statements and disclosures for use in financial analysis, and to interpret how accounting standards and managerial incentives affect the financial reporting process. This course is recommended for students who want a more in-depth overview of the financial accounting required for understanding firm performance and potential future risks through analysis of reported financial information, such as students intending to go into security analysis and investment banking.

Fall or Spring
1 Course Unit

ACCT 6130 Fundamentals of Financial and Managerial Accounting
This course provides an introduction to both financial and managerial accounting, and emphasizes the analysis and evaluation of accounting information as part of the managerial processes of planning, decision-making, and control. A large aspect of the course covers the fundamentals of financial accounting. The objective is to provide a basic overview of financial accounting, including basic accounting concepts and principles, as well as the structure of the income statement, balance sheet, and statement of cash flows. The course also introduces elements of managerial accounting and emphasizes the development and use of accounting information for internal decisions. Topics include cost behavior and analysis, product and service costing, and relevant costs for internal decision-making. This course is recommended for students who will be using accounting information for managing manufacturing and service operations, controlling costs, and making strategic decisions, as well as those going into general consulting or thinking of starting their own businesses.

Fall or Spring
1 Course Unit

ACCT 7060 Cost Management
This course covers managerial accounting and cost management practices that can be strategically applied across the various functions of a business organization to improve organizational performance. The course emphasizes the methods available to measure and evaluate costs for decision-making and performance evaluation purposes. It reviews a number of cost management issues relating to the design and implementation of strategic, marketing, value analysis, and other management models in modern firms; and identifies major contemporary issues in managerial accounting and financial decision-making. A variety of case studies in different industries and decision contexts are used to examine the application of these concepts.

Fall or Spring
Prerequisite: ACCT 6110 OR ACCT 6130
0.5 Course Units

ACCT 7420 Financial Reporting and Business Analysis
This intensive one-semester course focuses on how to extract and interpret information in financial statements. The course adopts a user perspective of accounting by illustrating several specific accounting issues in a decision context.

Fall or Spring
Mutually Exclusive: ACCT 2420
Prerequisite: ACCT 6110 OR ACCT 6130
0.5-1 Course Unit

ACCT 7430 Accounting for Mergers, Acquisitions and Complex Financial Structures
This class studies how complex financial structures account for their activities. Primary emphasis is on the application of purchase accounting for mergers and acquisitions, the equity method for investments, and preparing and interpreting consolidated financial statements. Other topics covered include translations and remeasurements for nondomestic investments, and earnings per share calculations for complex financial structures. Tax considerations and acquisition strategies are of only peripheral interest in this class, and students who are concerned primarily with those topics are advised to seek a different elective.

Fall
Mutually Exclusive: ACCT 2430
Prerequisite: ACCT 6110 OR ACCT 6130
1 Course Unit

ACCT 7470 Financial Disclosure Analytics
This course focuses on the analysis of financial communications between corporate managers and outsiders, including the required financial statements, voluntary disclosures, and interactions with investors, analysts, and the media. The course draws on the findings of recent academic research to discuss a number of techniques that outsiders can use to detect potential bias or aggressiveness in financial reporting. FORMAT: Case discussions and lectures. Comprehensive final exam, group project, case write-ups, and class participation.

Fall or Spring
Mutually Exclusive: ACCT 7471

ACCT 8970 Taxes and Business Strategy
The objective of this course is to develop a framework for understanding how taxes affect business decisions. Traditional finance and strategy courses do not consider the role of taxes. Similarly, traditional tax courses often ignore the richness of the decision context in which tax factors operate. The key themes of the framework - all parties, all taxes and all costs - are applied to decision contexts such as investments, compensation, organizational form, regulated industries, financial instruments, tax-sheltered investments, mergers and acquisitions, multinational, and multistate. The ultimate goal is to provide a new approach to thinking about taxes (and all forms of government intervention) that will be valuable even as laws and governments change.

1 Course Unit

Africana Studies (AFRC)
AFRC 0008 Sociology of the Black Community
This course explores a broad set of issues defining important aspects of the Black/African American experience. In addition to the "usual suspects" (e.g., race, socioeconomic status, poverty, gender, and group culture), we also think about matters of health and well-being, the family, education, and identity in Black/African American communities. Our goal is to gain a deeper sociological understanding and appreciation of the diverse and ever-changing life experiences of Blacks/African Americans.
Spring
Also Offered As: SOCI 0100
1 Course Unit

AFRC 0010 Homelessness & Urban Inequality
This first-year seminar examines the homelessness problem from a variety of scientific and policy perspectives. Contemporary homelessness differs significantly from related conditions of destitute poverty during other eras of our nation's history. Advocates, researchers and policymakers have all played key roles in defining the current problem, measuring its prevalence, and designing interventions to reduce it. The first section of this course examines the definitional and measurement issues, and how they affect our understanding of the scale and composition of the problem. Explanations for homelessness have also been varied, and the second part of the course focuses on examining the merits of some of those explanations, and in particular, the role of the affordable housing crisis. The third section of the course focuses on the dynamics of homelessness, combining evidence from ethnographic studies of how people become homeless and experience homelessness, with quantitative research on the patterns of entry and exit from the condition. The final section of the course turns to the approaches taken by policymakers and advocates to address the problem, and considers the efficacy and quandaries associated with various policy strategies. The course concludes by contemplating the future of homelessness research and public policy.
Fall
Also Offered As: SOCI 2940, URBS 0010

AFRC 0012 Study of an African American Author
This course introduces students to literary study through the works of a major African American author. Reading an individual author across an entire career offers students the rare opportunity to examine works from several critical perspectives in a single course. How do our author's works help us to understand literary and cultural history? And how might we understand our author's legacy through performance, tributes, adaptations, or sequels? Exposing students to a range of approaches and assignments, this course is an ideal introduction to literary study. See the English Department's website at www.english.upenn.edu for a description of the current offerings.

This first-year seminar analyzes the politics of "crime in the streets" and "crime in the suites." Key topics
Fall or Spring
Also Offered As: PSCI 0013
1 Course Unit

AFRC 0015 Race and Identity: Coming of Age in 20th Century America
In this First-Year Seminar, we will use coming-of-age autobiographies to explore some of the most significant historical developments of the 20th century. By coming of age I mean autobiographies in which the author focuses primarily on the periods of childhood and adolescence into young adulthood. We will read books by people who lived during segregation in the South, the Great Depression, Japanese Internment during World War II, and the Civil Rights Movement of the 1960s. We will consider many issues, including: race, racism, immigration, religion, social class, and gender. We will contemplate questions about identity, family, honesty, and memory. As we read each book we will examine an individual life in a particular place and time, and we will move out beyond the confines of a person, family, or town to explore the broader historical moment in which the individual lived. To make this deeper contextualization possible, the course is divided into segments that will allow us to study the historical context of the autobiography as well as engage in focused discussion of the texts themselves.
Fall
1 Course Unit

AFRC 0030 First-Year Seminar: Africa in World History
This seminar examines Africa's connections—economic, political, intellectual and cultural—with the wider world from ancient times to the 21st century, drawing on a diverse sample of historical sources. It also explores Africa's place in the imaginations of outsiders, from ancient Greeks to modern-day development "experts." Whether you know a lot or almost nothing about the continent, the course will get you to rethink your stereotypes and to question your assumptions about the importance of Africa in world history. First-year students only.
Fall or Spring
Also Offered As: HIST 0030
1 Course Unit

AFRC 0083 First-Year Seminar: First Chocolate
This seminar is a first-year seminar where students explore the phenomenon of chocolate. Students are introduced to the history of chocolate, its cultural significance, and its role in various societies around the world. They also participate in discussions and activities related to chocolate-making and eating.
Fall
1 Course Unit
AFRC 0081 Decolonizing French Food
Wine and cheese, baguettes and croissants, multiple courses and fresh ingredients straight from the market—these are the internationally recognized hallmarks of French food. Yet, even as the practices surrounding the mythical French table have been deemed worthy of a place on UNESCO’s World Heritage List since 2010, culinary traditions in France remain persistently rooted in legacies of colonialism that are invisible to many. In order to “decolonize” French food, this seminar turns to art, literature, and film, as well as archival documents such as advertisements, maps, and cookbooks. In what ways do writers and filmmakers use food to interrogate the human, environmental, and cultural toll that French colonialism has taken on the world? How do their references to food demonstrate the complex cultural creations, exchanges, and asymmetries that have arisen from legacies of colonialism? We will interpret artworks, read literature (in English or in translation), and watch films (subtitled in English) that span the twentieth and twenty-first centuries by authors and directors from across the Francosphere—from Haiti, Guadeloupe, and Martinique in the Caribbean; to Mauritius in the Indian Ocean; from the Vietnamese diaspora in France, Canada, and the United States; to North, Central, and West Africa. Just as food can be examined from many angles, our discussions will focus on art, literature, and film, but also take into account perspectives from the fields of history, anthropology, and environmental studies. Moreover, we will employ the theoretical tools supplied by food studies, feminist and gender studies, critical race studies, and postcolonial studies.

Also Offered As: HIST 0350
1 Course Unit

AFRC 0400 Colonial Latin America
The year 1492 was pivotal in the history of the world. It precipitated huge population movements within the Americas and across the Atlantic - a majority of them involuntary as in the case of indigenous and African people who were kidnapped and enslaved. It led to cataclysmic cultural upheavals, including the formation of new cultures in spaces inhabited by people of African, European and indigenous descent. This course explores the processes of destruction and creation in the region known today as Latin America in the period 1400 - 1800. Class readings are primary sources and provide opportunities to learn methods of source analysis in contexts marked by radically asymmetrical power relationships.

AFRC 0496 Malagasy (Elementary II/Intermediate II): Language in a Cultural Context
Combining the Elementary II and Intermediate II levels of Malagasy, this class will create a communicative language environment where students will explore the language and culture of Madagascar. The course offers a unique opportunity for students to deepen their understanding of an island that has remained largely isolated from the rest of the world while fulfilling a language requirement. Emphasis will be placed on exposing students to Malagasy culture through speaking, reading, writing and listening, and students will be expected to use the target language in class as much as possible. At the end of the semester, students will travel to become fully immersed in the Malagasy language and to deepen their understanding of the history, environment, and unique culture of Madagascar. Students who are interested in taking this seminar must complete Malagasy Elementary I or Malagasy Intermediate I in the preceding fall. Malagasy Elementary I is available to all students.

AFRC 0521 Benjamin Franklin Seminar: 18th-Century Slavery and Abolition
This course examines how the slave trade was understood, justified, contested, and represented in British literature. See the English Department’s website at www.english.upenn.edu for a description of the current offerings.
Also Offered As: ENGL 0521
1 Course Unit
AFRC 1000 Introduction to Sociology
Sociology provides a unique way to look at human behavior and social interaction. Sociology is the systematic study of the groups and societies in which people live. In this introductory course, we analyze how social structures and cultures are created, maintained, and changed, and how they affect the lives of individuals. We will consider what theory and research can tell us about our social world.

1 Course Unit

AFRC 1001 Introduction to Africana Studies
The term Africana emerged in public discourse amid the social, political, and cultural turbulence of the 1960s. The roots of the field, however, are much older, easily reaching back to oral histories and writings during the early days of the Trans-Atlantic African slave trade. The underpinnings of the field continued to grow in the works of enslaved Africans, abolitionists and social critics of the nineteenth century, and evolved in the twentieth century by black writers, journalists, activists, and educators as the sought to document African descended people's lives. Collectively, their work established Africana Studies as a discipline, epistemological standpoint and political practice dedicated to understanding the multiple trajectories and experiences of black people in the world throughout history. As an ever-transforming field of study, this course will examine the genealogy, major discourses, and future trajectory of Africana Studies. Using primary sources such as maps and letters, as well as literature and performance, our study of Africana will begin with continental Africa, move across the Atlantic during the middle passage and travel from the coasts of Bahia in the 18th century to the streets of Baltimore in the 21st century. The course is constructed around major themes in Black intellectual thought including: retentions and transferal, diaspora, black power, meanings of blackness, uplift and nationalism. While attending to narratives and theories that concern African descended people in the United States, the course is uniquely designed with a focus on gender and provides context for the African diasporic experience in the Caribbean and Latin America.
1 Course Unit

AFRC 1002 Introduction to Africa
This course provides an introduction to the study of Africa in all its diversity and complexity. Our focus is cultural, geographical, and historical: we will seek to understand Africa's current place in the world political and economic order and learn about the various social and physical factors that have influenced the historical trajectory of the continent. We study the cultural formations and empires that emerged in Africa before European colonial invasion and then how colonialism reshaped those sociocultural forms. We'll learn about the unique kinds of kinship and religion in precolonial Africa and the changes brought about by the spread of Islam and Christianity. Finally, we'll take a close look at contemporary issues such as ethnic violence, migration, popular culture and poverty, and we'll debate the various approaches to understanding those issues.

1 Course Unit

AFRC 1019 Visions of America: Plural Nations, Places and Ideals
This course will introduce students to a more hemispheric understanding of the American experience, through the writings of many authors from the New World, including the United States, on what it means to be an American. Students will read texts from many genres including but not limited to poetry, film, prose, political speeches and autobiography, to come to terms with histories of native Americans, African-Americans, Latinos, and whites in the United States, as well as peoples of South America and the Caribbean. In the process students will become familiar with scholarship across the social sciences and humanities that consider issues of race, culture, nation, freedom and inequality in the Americas, and how racial slavery and the Afro-American hemispheric experience has informed multiple American visions.
Fall
1 Course Unit

AFRC 1060 Race and Ethnic Relations
The course will focus on race and ethnicity in the United States. We begin with a brief history of racial categorization and immigration to the U.S. The course continues by examining a number of topics including racial and ethnic identity, interracial and interethnic friendships and marriage, racial attitudes, mass media images, residential segregation, educational stratification, and labor market outcomes. The course will include discussions of African Americans, Whites, Hispanics, Asian Americans and multiracials.

Also Offered As: RELS 1100
1 Course Unit
AFRC 1115 American Race: A Philadelphia Story (SNF Paideia Program Course)
This course proposes an examination of race with a two-pronged approach: one that broadly links the study of race in the United States with a multi-disciplinary approach and also simultaneously situates specific conversations within the immediate location of Philadelphia, home to the University. The broad historical examination advances key concepts of race and racialization, explores key theoretical methodologies, and highlights major scholarly works. For example, students will engage with the study of race through Africana Studies, Asian American Studies, Urban Studies and through Latin American & Latinx Studies. Readings and methodologies will introduce students to critical issues in education, in literature, in sociology, and with methods in oral history, archival work, and ethnography. Most importantly, this extensive approach highlights the impact of race across multiple communities including Black Americans, immigrant populations, and communities that are marginalized to emphasize connections, relationships, and shared solidarity. Students are intellectually pushed to see the linkages and the impacts of racism across and among all Americans historically and presently. As each theme is introduced a direct example from Philadelphia will be discussed. The combination of the national discourse on race, with an intimate perspective from the City of Philadelphia, engages students both intellectually and civically. The course will be led by Fariha Khan and Fernando Chang-Muy but guest instructors with varied disciplinary backgrounds and guest speakers from local community organizations. Each instructor not only brings specific disciplinary expertise, but also varied community engagement experience.

AFRC 1119 History of American Law to 1877
This course is designed to explore major themes and events in early American legal history. Because of the richness of the subject matter and the wealth of sources available, we will be selective in our focus. The course will emphasize several core areas of legal development that run throughout colonial and early national history: 1) the state: including topics such as war and other military or police action, insurrection, revolution, regulation, courts, economic policy, and public health; 2) labor: including race and racially-based slavery, varied forms of servitude and labor coercion, household labor, industrialization, unionization, and market development; 3) property: including property in persons, land, and business, and the role of lawyers in promoting the creation of wealth; 4) private spaces: including family, individual rights, sexuality, gender, and private relations of authority; 5) constitutionalism: various methods of setting norms (rules, principles, values) that create, structure, and define the limits of government power and authority in colonial/imperial, state, and national contexts; 6) democracy and belonging: including questions of citizenship, voting rights, and participation in public life. By placing primary sources within historical context, the course will expose students to the ways that legal change has affected the course of American history and contemporary life. The course will be conducted primarily in lecture format, but I invite student questions and participation. In the end, the central aim of this course is to acquaint students with a keen sense of the ways that law has operated to liberate, constrain, and organize Americans. Ideally, students will come away with sharper critical thinking and reading skills, as well. *This course is a core requirement for the Legal Studies and History Minor (LSHM).*

Also Offered As: HIST 1121
1 Course Unit
AFRC 1122 Witches, Rebels, and Prophets: People on the Margins in Early America
This course explores the lost worlds of witches, sexual offenders, rebellious enslaved people, rebellious colonists, and Native American leaders from the seventeenth to the nineteenth centuries. Using the life stories of unusual individuals from the past, we try to make sense of their contentious relationships with their societies. By following the careers of the troublemakers, the criminals, the rebels, and other non-conformists, we also learn about the foundations of social order and the impulse to reform that rocked American society during the nineteenth century. The lives of these unique “movers and shakers” help us to understand the issues that Americans debated in the years leading up to the Civil War.
Fall
Also Offered As: GSWS 1122, HIST 1122

1 Course Unit

AFRC 1131 Discrimination: Sexual and Racial Conflict
This course is concerned with the structure, the causes and correlates, and the government policies to alleviate discrimination by race and gender in the United States. The central focus of the course is on employment differences by race and gender and the extent to which they arise from labor market discrimination versus other causes, although racial discrimination in housing is also considered. After a comprehensive overview of the structures of labor and housing markets and of nondiscriminatory reasons (that is, the cumulative effects of past discrimination and/or experiences) for the existence of group differentials in employment, wages and residential locations, various theories of the sources of current discrimination are reviewed and evaluated. Actual government policies and alternatives policies are evaluated in light of both the empirical evidence on group differences and the alternative theories of discrimination.

Also Offered As: GSWS 1130, SOCI 1130
1 Course Unit

AFRC 1151 Race, Space and Place in American History
This course provides with a historical introduction to America’s racial and ethnic groupings by examining the social, spatial and historical forces that have defined these groups. Weekly lectures and readings trace American racial formations, identities and experiences from the age of Columbus to the present day. Following the work of historians and geographers who emphasize the importance of space and place in constructions of racial and ethnic identity, most of the class readings chart the evolution of such identities within specific regions or communities. Early readings illuminate the origins of categories such as “white,” black, “Native American” and “Asian” by exploring the colonial encounters in which these identities first took shape; while later readings trace how these identities have been maintained and/or changed over time. Less a product of racial attitudes than of economic and political interests, early American conceptions of race first took shape amidst contests over land and labor that pitted European immigrants against the indigenous peoples of North America, and ultimately led to the development of racial slavery. Colonial legal distinctions between Christians and Heathens were supplanted by legislation that defined people by race and ethnicity. Over time these distinctions were reinforced by a variety of other forces. Distinctive from place to place, America’s racial and ethnic groupings have been shaped and reshaped by regional economies such as the slave South, political initiatives such as Indian Removal and Chinese Exclusion Acts, a changing national immigration policy, and sexual and social intermixture and assimilation. Course readings will examine the links between race, region, labor, law, immigration, politics, sexuality and the construction and character of racialized spaces and places in America.
Also Offered As: HIST 1151
1 Course Unit

AFRC 1160 Caribbean Culture and Politics
This course offers anthropological perspectives on the Caribbean as a geo-political and socio-cultural region, and on contemporary Caribbean diaspora cultures. We will examine how the region’s long and diverse colonial history has structured relationships between race, ethnicity, class, gender and power, as well as how people have challenged these structures. As a region in which there have been massive transplantations of peoples and their cultures from Africa, Asia, and Europe, and upon which the United States has exerted considerable influence, we will question the processes by which the meeting and mixing of peoples and cultures has occurred. Course readings include material on the political economy of slavery and the plantation system, family and community life, religious beliefs and practices, gender roles and ideologies, popular culture, and the differing ways national, ethnic, and racial identities are expressed on the islands and throughout the Caribbean diaspora.

AFRC 1169 History of American Law Since 1877
This course introduces students to major themes in U.S. legal history from 1877 to the present. Topics include (but are not limited to) citizenship and immigration, federalism, public regulation of economic activity, lawyers and the legal profession, criminalization, social welfare provision, and rights-claiming. Prominent through-lines include the relationship between law and politics; the struggles of marginalized groups for recognition and inclusion; and shifting, competing understandings of liberty, equality, and justice. Judicial decisions figure prominently in this course, but so, too, do other sources of law, including statutes, administrative decisions, and provisions of the U.S. Constitution. Students will leave this course with a better grasp of how the U.S. legal system operates and how it has channeled power, resources, and opportunity over time. *This course fulfills a core requirement for the Legal Studies and History Minor.*
Spring
Also Offered As: HIST 1169
1 Course Unit

AFRC 1172 Bodies, Race and Rights: Sex and Citizenship in Modern American History
What did it mean to be a man or woman in the post-Civil War United States? Was being a man the same as being a citizen? If African-American men were to be fully embraced as both men and citizens in the aftermath of slavery, where did that leave women, white and black? Why did a nation built on immigration become so hostile to certain groups of immigrants during this period? In this course, we consider how the meanings and experiences of womanhood, manhood, citizenship, and equality before the law changed from the period immediately after the Civil War until the present day. We look at political battles over the meaning of citizenship, the use of terror to subdue African Americans politically and economically, and the fears of white Americans that they would lose their political and economic dominance to immigrant groups they deemed irreconcilably different from themselves. We also consider the repercussions of these conflicts for medical, legal, and economic efforts to regulate the bodies of women, children, poor people, immigrants, working class laborers, military men, and African Americans. Throughout the course, we will follow the state’s changing use of racial, sexual, and economic categories to assess the bodily and intellectual capacities of different groups of citizens. We will also note some of the popular cultural expressions of manhood, womanhood, and citizenship. The lectures and reading assignments are organized around a series of historical problems, dynamic leaders, and controversies that illuminate these issues.

1 Course Unit

AFRC 1187 The History of Women and Men of African Descent at the University of Penn
The history of the women and men of African Descent who have studied, taught, researched, and worked at the University of Pennsylvania provides a powerful window into the complex history of Blacks not only in America but throughout the Diaspora. This class will unpack, uncover, and present this history through close studies of texts and archived records on and at the university, as well as through first hand accounts by alumni and past and present faculty and staff members. These stories of the trials and triumphs of individuals on and around this campus demonstrate the amazing and absurd experience that Blacks have endured both at Penn and globally. Emphasis will be placed on the research process with the intent of creating a democratic classroom where all are students and all are instructors. Students will become familiar with archival historical research (and historical criticism) as well as with ethnographic research. Far more than just a survey of historical moments on campus and in the community, students will meet face to face with those who have lived and are presently living history and they will be faced with the challenge of discerning the most effective ways of documenting, protecting, and representing that history for future generations of Penn students.

1 Course Unit
AFRC 1201 Divinities, Diviners and Divinations: Religions of the African Diaspora
This undergraduate course is designed to provide students with a broad introduction to major themes within African Diasporic Religions. This is an interdisciplinary course. We will be drawing upon various theoretical methods, i.e. historical, ethnographical, and autobiographical. Additionally, we will be examining visual media to understand the presence and value of African Diasporic Religions in the 20th/21st century. Special attention will be given to Vodou, Santeria, and Candomble in the Americas. Thematically, we will work through concepts of the diaspora; memory, myth and authenticity; ritual and material practices; borders, migration, gender and sexuality, religious commodities and exchange. As we traverse through these various religious traditions, it is through the readings, lectures, invited speakers, films and class discussions that we will develop a complex understanding of integrative religious worldviews that impacts every aspect of life: family structure, gender relations, education, health, economics, politics, arts, and so on. It is with the hopes that we can apprehend how these traditions are indeed an American Religion.
Fall or Spring
Also Offered As: GSWS 1202, HIST 0867
1 Course Unit

AFRC 1202 Spirit possession in Caribbean Religions
This course is designed to provide students with a broad introduction to possession experiences in Caribbean Religions. Through historical, ethnographic, autobiographical, literary and visual texts this course examines complex, gendered practices within the possession process, the vibrant spiritual energy that sustains communal connections during religious ceremonies, and the transnational imaginations that animate Caribbean religious practices in the Americas. Special attention will be given to Santeria, Candomble, Vodou, Myal, Palo Monte, and Revival Zion in the Americas. Possession is a process through which gender and sexuality can be performed, contesting national and regional discourses of sexuality, gender, and race in the Caribbean. Thematically, we will work through concepts of memory, community, adornment, ritual, borders, and the senses. We will investigate religious ritual practices to understand various religious worldviews that shape communities' religious and social lives.

AFRC 1206 American Constitutional Law II
This course examines American constitutional development from the eve of WWI through the second Obama administration. Topics include the growth of the New Deal and a Great Society regulatory and redistributive state, struggles for equal rights for racial and ethnic minorities, women and GLBT Americans, contests over freedoms of religion and expression, criminal justice issues, the Reagan Revolution and the revival of federalism and property rights, and issues of national security powers after September 11, 2001.
Also Offered As: PSCI 1206
1 Course Unit

AFRC 1210 Literatures of Jazz
That modernism is steeped as much in the rituals of race as of innovation is most evident in the emergence of the music we have come to know as jazz, which results from collaborations and confrontations taking place both across and within the color line. In this course we will look at jazz and the literary representations it engendered in order to understand modern American culture. We will explore a dizzying variety of forms, including autobiography and album liner notes, biography, poetry, fiction, and cinema. We'll examine how race, gender, and class influenced the development of jazz music, and then will use jazz music to develop critical approaches to literary form. Students are not required to have a critical understanding of music. Class will involve visits from musicians and critics, as well as field trips to some of Philadelphia's most vibrant jazz venues. See the English Department's website at www.english.upenn.edu for a description of the current offerings.

1 Course Unit

AFRC 1370 African Environmental History
This new course will explore multiple dimensions of Africa's environmental history, drawing upon literature in the natural sciences, social sciences, and the humanities. It is one component of a pilot project supported by Penn Global and directed by the instructor on "Local Histories of Climate Change in the Horn of Africa", though we will cover topics and case studies from the entire continent. The course takes an historical perspective on environmental change in Africa, with an eye to engaging current debates on climate change and its impact on contemporary urban and rural communities. Students will read and discuss key works on the African environment, conduct their own literature reviews on selected topics, and prepare case studies of communities which have been impacted by severe climate events in the past half-century. The format combines lectures and seminar-style discussions, and we will draw upon the expertise of guest lecturers in a variety of disciplines which have contributed to the study of environmental change.

AFRC 1475 History of Brazil: Slavery, Inequality, Development
In the past decade, Brazil has emerged a leading global power. As the world's fifth-largest country, by size and population, and the ninth-largest by GDP, Brazil exerts tremendous influence on international politics and the global economy, seen in its position as an emerging BRIC nation and a regional heavyweight in South America. Brazil is often in the news for its strides in social welfare, leading investments in the Global South, as host of the World Cup and Olympics, and, most recently, for its political instability. It is also a nation of deep contradictions, in which myth of racial democracy -- the longstanding creed that Brazilian society has escaped racial discrimination -- functions alongside pervasive social inequality, state violence, political corruption, and an unforgiving penal system. This course examines six centuries of Brazilian history. It highlights the interplay between global events -- colonialism, slavery and emancipation, capitalism, and democratization -- and the local geographies, popular cultures, and social movements that have shaped this multi-ethnic and expansive nation. In particular, the readings will highlight Brazil's place in Latin America and the Lusophone World, as well as the ways in which Brazil stands as a counterpoint to the United States, especially in terms of the legacy of slavery and race relation. In this lecture, we will also follow the current political and economic crises unfolding in Brazil, at a moment when it has become all the more important to evaluate just how South America's largest nation has shaped and been shaped by global events.

AFRC 1500 World Musics and Cultures
This course examines how we as consumers in the "Western" world engage with musical difference largely through the products of the global entertainment industry. We examine music cultures in contact in a variety of ways-- particularly as traditions in transformation. Students gain an understanding of traditional music as live, meaningful person-to-person music making, by examining the music in its original site of production, and then considering its transformation once it is removed, and recontextualized in a variety of ways. The purpose of the course is to enable students to become informed and critical consumers of "World Music" by telling a series of stories about particular recordings made with, or using the music of, peoples culturally and geographically distant from the US. Students come to understand that not all music downloads containing music from unfamiliar places are the same, and that particular recordings may be embedded in intriguing and controversial narratives of production and consumption. At the very least, students should emerge from the class with a clear understanding that the production, distribution, and consumption of world music is rarely a neutral process. Fulfills College Cross Cultural Foundational Requirement.

Also Offered As: ANTH 1500, MUSC 1500
1 Course Unit
AFRC 1510 Music of Africa
African Contemporary Music: North, South, East, and West. Come to know contemporary Africa through the sounds of its music: from South African kwela, jazz, marabi, and kwai to Zimbabwean chimurenga; Central African soukous and pygmy pop; West African Fuji, and North African rai and hophop. Through reading and listening to live performance, audio and video recordings, we will examine the music of Africa and its intersections with politics, history, gender, and religion in the colonial and post colonial era. (Formerly Music 053). Fulfills College Cross Cultural Foundational Requirement.

AFRC 1600 North Africa: History, Culture, Society
This interdisciplinary seminar aims to introduce students to the countries of North Africa, with a focus on the Maghreb and Libya (1830-present). It does so while examining the region’s close economic and cultural connections to sub-Saharan Africa, Europe, and the Middle East. Readings will include histories, political analyses, anthropological studies, and novels, and will cover a wide range of topics such as colonial and postcolonial experiences, developments in Islamic thought and practice, and labor migration. This class is intended for juniors, seniors, and graduate students.

AFRC 1625 Era of Revolutions in the Atlantic World
This class examines the global ramifications of the era of Atlantic revolutions from the 1770s through the 1820s. With a particular focus on French Saint Domingue and Latin America, it provides an overview of key events and individuals from the period. Along the way, it assesses the impact of the American and French revolutions on the breakdown of colonial regimes across the Americas. Slavery and the transatlantic slave trade were seriously challenged in places such as Haiti, and the class investigates the appropriation and circulation of revolutionary ideas by enslaved people and other subaltern groups.

AFRC 1700 The African Diaspora: Global Dimensions
This class examines the cultural and social ramifications of the African diaspora on a global level. It is divided into two major sections. The first section provides the historical background to the African diaspora by focusing on the forced migration of Africans to Spanish and Portuguese colonies in the Americas. We will then delve into the black experience in French and British colonial spaces. In this section, we will also endeavor to move beyond the Atlantic-centric paradigm in studies of the African diaspora by examining free and unfree migrations of African people across the Indian Ocean to places as far away as India and the Philippines. The second half of the class devotes significant attention to the historical legacy of slavery and colonialism in places like Brazil, Cuba and the United States. In this section, we will discuss such issues as race relations, the struggle for civil rights for African-descent people as well as the emergence and the implementation of affirmative action policies in places like Brazil and the US.

AFRC 1780 Faculty-Student Collaborative Action Seminar in Urban University-Community Rlt
This seminar helps students develop their capacity to solve strategic, real-world problems by working collaboratively in the classroom, on campus, and in the West Philadelphia community. Students develop proposals that demonstrate how a Penn undergraduate education might better empower students to produce, not simply "consume," societally-useful knowledge, as well as to function as caring, contributing citizens of a democratic society. Their proposals help contribute to the improvement of education on campus and in the community, as well as to the improvement of university-community relations. Additionally, students provide college access support at Paul Robeson High School for one hour each week.

AFRC 2010 Social Statistics
This course offers a basic introduction to the application/interpretation of statistical analysis in sociology. Upon completion, you should be familiar with a variety of basic statistical techniques that allow examination of interesting social questions. We begin by learning to describe the characteristics of groups, followed by a discussion of how to examine and generalize about relationships between the characteristics of groups. Emphasis is placed on the understanding/interpretation of statistics used to describe and make generalizations about group characteristics. In addition to hand calculations, you will also become familiar with using PCs to run statistical tests.

AFRC 2210 Race and the Media
This course considers the theory and practice of minority representation in the public domain: film, theater, television, music, advertising and museums. How has "minority" been defined - who is included and why? How have notions of "minority" status been constructed in our public languages and what may be the impact of those images on both minority and non-minority populations? Our focus will be on representation and how it may work to marginalize or empower members of minority populations. While we will concentrate primarily on ethnic minorities, we will also consider how these same issues might affect sexual minorities. Our discussions will be supplemented by film and video examples. While the course will be theoretically situated in communication, it will consider how the perspectives of anthropology, feminism, and literary and ethnic studies have affected our understanding of public representations.

Also Offered As: ENGL 2210
1 Course Unit

AFRC 2219 Social Inequalities: Caste and Race
This course introduces students to two systems of inequity, caste in South Asia, particularly in India, and race in the United States. It's main objective is to demonstrate how these modes of inequity, sometimes dismissed as outdated or irrelevant, continue to shape social and state institutions like family, law, and bureaucracy. The course will explore sociological literature on caste and race and examine how these systems existed in a range of historical contexts. It will examine how certain groups were recipients of economic, political, and social privilege, and how these groups othered communities such as Afro-Americans in the United States and Dalits in India. We will consider how privileged groups continue to represent modern institutions like state and law that fail to protect disadvantaged communities in both India and the United States. The course will also explore how privileged communities employ the tool of gendered violence of different kinds like physical violence against men and sexual violence against women of Afro-American communities and Dalit communities to maintain forms of social power and control. The final unit of the course will deal with the emerging and imagined solidarities between Afro-American social and political movements in the United States and Dalit movements in India.
Also Offered As: GSWS 2219, SAST 2219, SOCI 2970

AFRC 2220 African Women's Lives: Past and Present
Restoring women to African history is a worthy goal, but easier said than done. The course examines scholarship over the past forty years that brings to light previously overlooked contributions African women have made to political struggle, religious change, culture preservation, and economic development from pre-colonial times to present. The course addresses basic questions about changing women's roles and human rights controversies associated with African women within the wider cultural and historical contexts in which their lives are lived. It also raises fundamental questions about sources, methodology, and representation, including the value of African women's oral and written narrative and cinema production as avenues to insider perspectives on African women's lives.

1 Course Unit

AFRC 2232 Africa in India and Arabia
Africa has interwoven linkages for centuries with the Arabian Peninsula, and India, politically, historically, geographically, and culturally. These linkages were represented in continuous migrations of peoples, the circulation of goods and ideas, and the interaction with foreign forces. The ancient world of Africa, Arabia, and India had served as an epicenter of the global economy in the pre-modern world. As such, it gave rise to trading networks and political empires. The eastern and southern shores of Africa are both the recipients and the transmitters of cultural and political icons. The existence of many islands that separate Africa from India and Arabia stand as hybrid cultures that are influenced by forces from different continents. Political and cultural relations between African regions, India, and Arabia are evident with the presence of African-descent populations in these places, as well as the prevalence of cultural practices of African origin. Signs of interaction between these three regions are also apparent in several archeological sites and in the expansion that allowed the populations in these areas to share strategies during their independence movements to thwart western political hegemony. With the current advanced forms of globalization, this region is moving more towards economic and political cooperation and addressing the transnational natural and man-made threats. The objectives of this course are to achieve the followings: • Explore the geographic and historical interconnectedness between Africa, the Arabian Peninsula, and India. • Examine the history of the different forces that have shaped the cultural landscape of the African shores with reference to India and the Arabian Peninsula. • Examine the political, economic, and cultural interconnections between Africa, Arabia, and India and the impact of Europe's colonial expansion. • Explore the historical concept of globalization and the challenges of inter-disciplinary study and research in the study of Africa and its neighbors.

1 Course Unit

AFRC 2238 Modalities of Black Freedom and Escape: Ships
The course circulates around ships and boats. The course combines methods from environmental humanities, visual arts and history to consider multi-modal practices of black freedom and escape. From free black sailors in the eighteenth century Caribbean Sea, to twentieth and twenty-first century West African fishing boats, notions of Haitian “boat people,” Parliament Funkadelic’s mothership, and sinking boats with Somali and Ethiopian migrants off Yemen’s coast, ships have been and remain technologies of containment and freedom for communities of African descent. In the face of environmental vulnerabilities and the reality of water ways as systems of sustenance and imminent death, this course asks: how do black people use the ship and the process and practice of shipping as vessels for freedom, escape, and as a site to experiment with futures? Using the city of Philadelphia and the Schuykill and Delaware rivers as our primary site of interrogation, the course attends to the threats that black people experience following natural disaster (New Orleans, Haiti, Puerto Rico) and everyday engagement with the local and global state structures regarding water (Flint, MI). In this context, we also look to shipping as a site to theorize and account for black innovation, meanings of (non-)sovereignty, and alternative futures.

1 Course Unit
AFRC 2240 Law and Social Change
Beginning with discussion of various perspectives on social change and law, this course then examines in detail the interdependent relationship between changes in legal and societal institutions. Emphasis will be placed on (1) how and when law can be an instrument for social change, and (2) how and when social change can cause legal change. In the assessment of this relationship, emphasis will be on the laws of the United States. However, laws of other countries and international law relevant to civil liberties, economic, social and political progress will be studied. Throughout the course, discussions will include legal controversies relevant to social change such as issues of race, gender and the law. Other issues relevant to State-Building and development will discussed. A comparative framework will be used in the analysis of this interdependent relationship between law and social change.

AFRC 2245 Dancing the African Diaspora
This seminar/studio course introduces students to theories, debates, and critical frameworks in African Diaspora Dance Studies. It asks: What role does dance play throughout the African diaspora? What makes a dance 'black'? How do conceptualizations of gender and sexuality inform our reading of dancing bodies? Using African diaspora, critical dance, performance, and black feminist frameworks, we will examine the history, politics, and aesthetics of "black dance". Through a keywords format, we'll construct both a vocabulary: a body of words used to describe a phenomena, and a grammar: a body of rules that lay bare the operations between terms. This course recognizes the fluidity of meaning between words depending on the context, geography, and circumstance of their evocation. Our key terms will allow us to examine a number of dancers, choreographers, companies, and movement practices. Moving across an African diasporic map, this course explores the politics of black choreography, and the political significance of black bodies in motion.
1 Course Unit

AFRC 2250 African Languages and Culture
The aim of the course is to provide an overall perspective on African languages and linguistics. No background in linguistics is necessary. Students will be introduced to theoretical linguistics-its concepts, theories, ways of argumentation, data collection, data analysis, and data interpretation. The focus will be on the languages and linguistics of Africa to provide you with the knowledge and skills required to handle the language and language-related issues typical of African conditions. We will cover topics related to formal linguistics (phonology/phonetics, morphology, syntax, and semantics), aspects of pragmatics as well as the general socio-linguistic character of African countries. We will also cover language in context, language and culture, borrowing, multilingualism, and cross-cultural communication in Africa.

AFRC 2302 Sustainable Entrepreneurship
This course is designed to introduce students to the multiple methods of engaging African entrepreneurship, public service and philanthropy. Alongside a thorough review of both popular and independent activist media, students will be trained to use accessible technology to participate in international communications networks. "Big ideas," will be translated into succinct artistic statements. We will look intimately at the architecture of David Adjaye, Adjaye Associates; the initiatives of Majora Carter for Sustainable South Bronx and Majora Carter Group; the philanthropic equity of Vista Equity Partners and C.E.O. Robert Smith, and the political work of Mayor Ras Baraka, City of Newark among other examples from the public and private sector throughout the African Diaspora. Prior to the development of our own app ideas, we will focus on the urban market advertising strategies of majority companies that are lauded for their sustainable initiatives including Nike, Hewlett-Packard and Apple. We will also use as secondary resources macro approaches to sustainability from the United Nations Foundation. This course makes an argument for inclusion of race, class and gender equity in the evolving definition of sustainability. Our argument, consistent with the growth of so many of these professionals inside of and clearly influenced by hip-hop culture, is that they are best prepared, culturally, to "make something out of nothing."

AFRC 2321 War and Peace in Africa
The end of colonial rule was the springboard for the start of cold wars in various regions of Africa. Where peace could not be maintained violence erupted. Even where secession has been attained, as in the new country of South Sudan, the threat of civil war lingers. While domestic politics have led to the rise of armed conflicts and civil wars in many African countries, the external factors should also not be ignored. Important in all current conflicts is the concern to international peace and security. Overall this course will: (1) investigate the general nature of armed conflicts in Africa (2) provide in-depth analysis of the underlying factors (3) and discuss the regional and the international responses to these conflicts and their implications. Special emphasis will be placed upon African conflicts and civil wars in: great Lakes area, Mali, Nigeria, Senegal, Sudan, Somalia, South Sudan, and Uganda.
Fall or Spring
1 Course Unit
AFRC 2324 Dress and Fashion in Africa
Throughout Africa, social and cultural identities of ethnicity, gender, generation, rank and status were conveyed in a range of personal ornamentation that reflects the variation of African cultures. The meaning of one particular item of clothing can transform completely when moved across time and space. As one of many forms of expressive culture, dress shape and give forms to social bodies. In the study of dress and fashion, we could note two distinct broad approaches, the historical and the anthropological. While the former focuses on fashion as a western system that shifted across time and space, and linked with capitalism and western modernity; the latter approach defines dress as an assemblage of modification the body. The Africanist proponents of this anthropological approach insisted that fashion is not a dress system specific to the west and not tied with the rise of capitalism. This course will focus on studying the history of African dress by discussing the forces that have impacted and influenced it overtime, such as socio-economic, colonialism, religion, aesthetics, politics, globalization, and popular culture. The course will also discuss the significance of the different contexts that impacted the choices of what constitute an appropriate attire for distinct situations. African dress in this context is not a fixed relic from the past, but a live cultural item that is influenced by the surrounding forces.

AFRC 2325 August Wilson and Beyond
"The people need to know the story. See how they fit into it. See what part they play." - August Wilson, King Hedley II If you want to get to know community members from West Philadelphia, collaborate deeply with classmates, gain deeper and more nuanced understandings of African American history and culture, engage in a wide range of learning methods, and explore some of the most treasured plays in the American theatre, then this is the course for you. No previous experience required, just curiosity and willingness to engage. In this intergenerational seminar, Penn students together with older community members read groundbreaking playwright August Wilson’s American Century Cycle: ten plays that form an iconic picture of African American traditions, traumas, and triumphs through the decades, nearly all told through the lens of Pittsburgh’s Hill District neighborhood. (Two of Wilson’s plays are receiving fresh attention with recent acclaimed film versions: Fences with Denzel Washington and Viola Davis; Ma Rainey’s Black Bottom with Davis and Chadwick Boseman.) Class participants develop relationships with one other while exploring the history and culture that shaped these powerful plays. As an Academically Based Community Service (ABCS) course, the class plans and hosts events for a multigenerational, West Philadelphia-focused audience with community partners West Philadelphia Cultural Alliance / Paul Robeson House & Museum, and Theatre in the X. Class members come to a deeper understanding of Black life in Philadelphia through stories community members share in oral history interviews. These stories form the basis for an original performance the class creates, presented at an end-of-semester gathering. Wilson’s plays provide the bridge between class members from various generations and backgrounds. The group embodies collaborative service through the art and connection-building conversations it offers to the community.

AFRC 2350 Migration and Refugees in African History
This seminar will examine the experiences of recent African emigrants and refugees within and from the continent Africa from a historical and comparative perspective. We will look at the relations of overseas Africans with both their home and host societies, drawing on some of the extensive comparative literature on immigration, ethnic diasporas, and transnationalism. Other topics include reasons for leaving Africa, patterns of economic and educational adaptation abroad, changes in gender and generational roles, issues of cultural, religious, and political identity, and the impact of international immigration policies. Students will have the opportunity to conduct focused research on specific African communities in Philadelphia or elsewhere in North America, Europe, or the Middle East. We will employ a variety of sources and methodologies from different disciplines—including newspapers, government and NGOs, literature and film, and diaspora internet sites—to explore the lives, aspirations, and perceptions of Africans abroad. History Majors may complete the research requirement if their paper is based on primary sources. Students not seeking credit for the research requirement may write papers drawing on secondary sources exclusively. Class will consist of a combination of lectures (including several by invited guests), discussions, video screenings, and presentations by students of their research in progress.

1 Course Unit

AFRC 2401 Indians, Pirates, Rebels and Runaways: Unofficial Histories of the Colonial Caribbean
This seminar considers the early history of the colonial Caribbean, not from the perspective of European colonizing powers but rather from “below.” Beginning with European-indigenous contact in the fifteenth century, and ending with the massive slave revolt that became the Haitian Revolution (1791-1804), we will focus on the different ways in which indigenous, African, European and creole men and women experienced European colonization in the Caribbean, as agents, victims and resisters of imperial projects. Each week or so, we will examine the experiences of a different social group and their treatment by historians, as well as anthropologists, archaeologists, sociologists, and novelists. Along the way, we will pay special attention to the question of primary sources: how can we recover the perspectives of people who rarely left their own accounts? How can we use documents and material objects—many of which were produced by colonial officials and elites—to access the experiences of the indigenous, the enslaved, and the poor? We will have some help approaching these questions from the knowledgeable staff at the Penn Museum, the Kislak Center for Special Collections, Rare Books and Manuscripts, and the Van Pelt Library.

1 Course Unit
AFRC 2402 The Haitian Revolution
In August 1791, enslaved Africans on the northern plain of Saint Domingue (colonial Haiti) rose up in a coordinated attack against their French colonial masters, launching the initial revolt in what would come to be known as the Haitian Revolution. In the years that followed, their actions forced the abolition of racial discrimination and slavery throughout the French Empire. When Napoleon Bonaparte threatened to return slavery to Saint Domingue, they waged a war for independence, declaring Haiti the world’s first “Black Republic” in 1804. This seminar will examine some of the major themes and debates surrounding Haiti’s colonial and revolutionary history. We will begin by considering the colonial paradox: France’s leading role in the intellectual movement called the “Enlightenment” coincided with its ascent as a slaveholding colonial power. The seminar will also explore parallels and points of connection between the revolutionary movements in France and Saint Domingue: how did increasingly radical ideas in France shape events in the Caribbean? Likewise, how did west African traditions and political ideologies influence insurgents and their leaders? And how, in turn, did revolution in the Caribbean impact the revolution in France? Finally, we will ask how the Haitian Revolution influenced ideas about liberty, sovereignty and freedom throughout the Atlantic World. We will read a combination of primary and secondary materials each week. A final research paper will be required of all students.

1 Course Unit

AFRC 2430 Race, Science & Justice
What is the role of the life and social sciences in shaping our understanding of race? How has racial stratification influenced scientists and how have scientists constructed racial difference and helped to maintain or contest racial inequities? How have these racial theories shaped the production of scientific knowledge and the way we think about human bodies, diversity, and commonality—and what are the consequences for justice in our society? This course draws on an interdisciplinary body of biological and social scientific literature to explore critically the connections between race, science, and justice in the United States, including scientific theories of racial inequality, from the eighteenth century to the genomic age. After investigating varying concepts of race, as well as their uses in eugenics, criminology, anthropology, sociology, neuroscience, medicine, and public health, we will focus on the recent expansion of genomic research and technologies that treat race as a biological category that can be identified at the molecular level, including race-specific pharmaceuticals, commercial ancestry testing, and racial profiling with DNA forensics. We will discuss the significance of scientific investigations of racial difference for advancing racial justice in the United States.

AFRC 2709 Pan-Africanism in Global Perspective
This course covers the history of Pan-Africanism from its early inception in the nineteenth century to the present. Pan-Africanism has sparked political struggles and provided a powerful catalyst to artistic endeavors across the globe. The class focuses on the early critiques of the transatlantic slave trade, tracing the development of a unifying sociopolitical movement and the struggle for identity among Africans and African descendants in the diaspora. C. L. R. James posits that people of African descent, no matter where they might live, are linked through ancestral ties to Africa and as victims of structural and historical racism in the West. The class will not only engage with the classics of Pan-Africanism but also explore the movement’s influence through the arts (music, movies, and literature) and politics. To stress Pan-Africanism’s global ramifications, the class pays significant attention to the movement’s impact on Africa and Latin America.
Also Offered As: HIST 2709, LALS 2709
1 Course Unit
AFRC 2740 Facing America
This course explores the visual history of race in the United States as both self-fashioning and cultural mythology by examining the ways that conceptions of Native American, Latino, and Asian identity, alongside ideas of Blackness and Whiteness, have combined to create the various cultural ideologies of class, gender, and sexuality that remain evident in historical visual and material culture. We also investigate the ways that these creations have subsequently helped to launch new visual entertainments, including museum spectacles, blackface minstrelsy, and early film, from the colonial period through the 1940s.

Also Offered As: ARTH 2740, CIMS 2740, LALS 2740
Mutually Exclusive: ARTH 6740
1 Course Unit

AFRC 2760 African American Life and Culture in Slavery
This course will examine the lives of enslaved African Americans in the United States, both in the North and the South. We will engage historiographical debates, and tackle questions that have long concerned historians. For example, if slaves were wrenched from families and traded, could they sustain family relationships? If slaves worked from sun-up until sun-down, how could they create music? We will engage with primary and secondary sources to expand our understandings of values, cultural practices, and daily life among enslaved people. Topics will include: literacy, family, labor, food, music and dance, hair and clothing, religion, material culture, resistance, and memories of slavery. Several disciplines including History, Archaeology, Literature, and Music, will help us in our explorations. Written, oral, and artistic texts for the course will provide us with rich sources for exploring the nuances of slave life, and students will have opportunities to delve deeply into topics that are of particular interest to them.
Not Offered Every Year
Also Offered As: HIST 0710
1 Course Unit

AFRC 2762 Everyday Life in Africa
This course will explore the different dimensions of everyday life in Africa. Everyday life has been described by Agnes Heller (1978) as “the secret yeast of history.” What constitutes this “yeast of history” in contemporary Africa? In exploring everyday life, we will examine the existing (in)capacities in the structures of state and society in Africa for human well-being in relation to the differences between political life (bios) and bare life (zoe). The course engages with the everyday life in terms of how social, economic, and political lives are constituted and the implications of this process for whether Africans live well or not, how they die, and their struggles for alternative lives. With (ethnographic) accounts and perspectives from different countries in Africa, the course focuses deeply on how to understand and explain the conditions under which everyday social needs and economic necessities are turned into political/existential struggles as well as the conditions under which political exigencies can transform into economic, social and bodily fatalities. The overarching questions that will animate this course include these: What are the prevalent conditions of everyday life in Africa? What and who determines (in)eligibility regarding the everyday tools of good life and human survival? How are these determinations related to the differential distribution of potential and/or actual injury, harm, and damage to human life and the conditions of its survival? What can ethnographic insight contribute to our understanding of everydayness in Africa? The roles of sexualities, gender, generation, humor, identities, racism, hate, memory, memorial, transactions, etc., in the construction, reconstruction, and deconstruction of daily life – and death – in the continent will be examined. Audio-visual materials will be used to analyze important themes about quotidian life in Africa.

AFRC 2850 Modern Art in Africa and Europe
The history of modern art is closely tied to and largely unfolds from the history of Western Imperialism. While the technologies made possible by colonial resource extraction produced new ways of looking, modern conceptions of the nation and how to represent it, developed in dialogue with racialized notions of the other. This course focuses on encounters between the cultures of Africa and Europe, from 1880 to 1960, and on the artistic practices that emerged on both continents as a result. Topics of special interest will include racial difference and the ramifications of colonialism, colonial masquerade, post-colonial monuments and memorials, the African influence on Dada and surrealism, Negritude and interwar Paris, colonial arts education, and the South African built environment under and after Apartheid.

AFRC 2852 The Black Arts Movement: Theatre and Performance
This course examines the Theatre and Performance practices of the Black Arts Movement from the mid-1960s to mid-1970s. The Black Arts Movement (BAM) emerges in New York, New Jersey, Chicago, Los Angeles, San Francisco, and Philadelphia among other locations, as a cultural component of the Black Power Movement, and its legacy continues to this day. BAM artists, poets, playwrights, musicians, dancers, producers, directors, and teachers, shared a goal to develop an alternative theatre based in Africanist and Black aesthetics combining poetry, music, and dance in a non-linear fashion allowing stories to emerge through alternative and abstract structures that are activist in nature. We will ground our examination of the period in a growing global black consciousness, as well as the relationship between black aesthetics and self-determination. The course will explore a breadth of mid twentieth century Black experimental theatre ranging from Jean Genet’s The Blacks and Imamu Amiri Baraka’s Black Arts Repertory Theater and School, to Ntozake Shange’s Choreopoems, and the performance poetry Jayne Cortez. The course culminates in the work of present-day performance artists that have taken up and evolved the form. The course is designed to incorporate theory and practice through play and poetry readings, movement investigations, student presentations of Theatre/Performance Artists, and viewing performances either virtually or in person. Students will develop either a choreopoem of their own or curate an imagined Black Arts Movement theatre festival or season.

Also Offered As: ENGL 2850, THAR 2850
1 Course Unit

AFRC 2860 Modern Art: Picasso to Pollock
Early twentieth-century art in Europe is marked by a number of exciting transformations. This period witnessed the rise of abstraction in painting and sculpture, as well as the inventions of collage, photomontage, constructed sculpture, the ready made and found object, and performance art. Encounters with the arts of Africa, Oceania and other traditions unfamiliar in the West spurred innovations in media, technique, and subject matter. Artists began to respond to the challenge of photography, to organize themselves into movements, and in some cases, to challenge the norms of art through “anti-art.” A new gallery system replaced traditional forms of exhibiting and selling art, and artists took on new roles as publicists, manifesto writers, and exhibition organizers. This course examines these developments, with attention to formal innovations as well as cultural and political contexts.

AFRC 2870 Religion and Society in Africa
In recent decades, many African countries have perennially ranked very high among the most religious. This course serves as an introduction to major forms of religiosity in sub-Saharan Africa. Emphasis will be devoted to the indigenous religious traditions, Christianity and Islam, as they are practiced on the continent. We will examine how these religious traditions intersect with various aspects of life on the continent. The aim of this class is to help students to better understand various aspects of African cultures by dismantling stereotypes and assumptions that have long characterized the study of religions in Africa. The readings and lectures are will be drawn from historical and a few anthropological, and literary sources.

Also Offered As: HIST 0837, RELS 2870
1 Course Unit

AFRC 2903 Exhibiting Black Bodies
This course concerns the exhibiting of Black Bodies in Museums and gallery spaces. We will trace the evolution of public history from the “Cabinets of Curiosity” in 18th and 19th Century Europe, through to the current institutional confirmation of the vindications traditions represented by Museu Afro Brasil (Sao Paulo, Brazil), National Museum of African American History and Culture (Washington, D.C.), and the Museum of Black Civilization (Dakar, Senegal). We will give particular attention to “why these representations at these times in these places?” In the process of addressing these questions we will give voice to the figures who conceived the curatorial content from those with the colonial mentality, to those with the abolitionist and nationalist and Pan-African visions.

Also Offered As: SOCI 2903
1 Course Unit

AFRC 3051 Housing, Race, and Community in the United States
One’s home is the first site of self-identity, socialization, and notions of citizenship. In the United States, neighborhoods are the basic units of political organization, educational options, and familial wealth. This course explores the intersections between race and housing in the United States with a specific focus on the experiences of African-Americans in urban centers. The intersectional housing experiences of Asian, Latinx, first-generation immigrants, Arab, and indigenous communities will also be analyzed. This course represents both a timely and nuanced opportunity to address housing as a focal point of existing racial tensions and deepening socio-economic inequalities in the U.S. Increasingly, housing has become a contested subject, with heated debates concerning its status as a human, and potentially constitutional, right. Students will explore urban governance values, the commodification of urban landscapes, and the institutional dimensions of race in the United States. Students will develop a critical understanding of the underlying structural causation for the issues faced by minority populations seeking adequate, affordable, and safe housing in the U.S. Prior knowledge of urban planning, housing, or social policy is not necessary for this course. Students will finish the course equipped with a broad knowledge base of associated development topics including globalization, commodification, and social justice.

1 Course Unit

AFRC 3174 Free State Slavery and Bound Labor Research Seminar
This seminar invites students to do original research into the stories of Black refugees – including escaped, kidnapped, sojourning, and other temporary or permanent residents of Pennsylvania. Their stories unfolded through contentious freedom suits, daring escapes on the Underground Railroad, newspaper wars, gun fights and thuggery, treason cases, and more. We have assembled an archive of statutes, legal cases, testimony, judicial and administrative decisions, newspaper stories, images, memoirs, maps, and more to help students get started with their research. In addition, students will have opportunities to pursue additional research at the Historical Society of Pennsylvania, a co-sponsor of this course. Many of these materials have never been the subject of sustained study or placed in their historical context. Students will choose their topics in consultation with the professors and will produce research reports in written or digital or cinematic formats. Students are expected to contribute to the course website, a platform that will be available to the public as well as to the Penn community, and we aim to provide new information and venues for research. The course therefore will involve considerations of how best to convey what we learn, as well as explorations of historical methods and collaborating archives.

This seminar focuses on art of the African continent. It is open to undergraduates only. Not Offered Every Year
Also Offered As: ARTH 3180
1 Course Unit
AFRC 3230 Demography of Race
This course will examine demographic and statistical methods used to capture the impact of racial stratification in society. This course covers the skills and insights used by demographers and social statisticians in the study of racial data. A key challenge facing researchers is the interpretation of the vast amount of racial data generated by society. As these data do not directly answer important social questions, data analysis and statistics must be used to interpret them. The course will examine the logic used to communicate statistical results from racial data in various societies. We will question the scientific claims of social science methodology by extending the critical perspective to biases that may underlie research methods. We will discuss good and bad practices within the context of the historical developments of the methods.
Also Offered As: SOCI 3230
1 Course Unit

AFRC 3251 Writing for Children
A creative writing workshop devoted to the art and practice of writing for children. Students can expect to read texts by a variety of practitioners of the genre, complete regular writing assignments, and workshop writing by their peers. To learn more about this course, visit the Creative Writing Program at https://creative.writing.upenn.edu.

AFRC 3336 Africa and the Indian Ocean World
The Indian Ocean region represents an area with interwoven centuries of interactions, politically, historically, geographically and culturally. This area has witnessed continuous migrations of peoples, the circulation of goods and ideas, and the interaction with foreign forces. The Indian Ocean world has served as an epicenter of global economy in pre-modern world and as such, it gave rise to trading networks and political empires. As part of the Indian Ocean World, the eastern and southern shores of Africa are both the recipients and the transmitters of cultural and political icon. The existence of many islands that separate Africa from Asia stand as hybrid cultures that are influenced by forces from different continents. Political and cultural relations between African regions and the rest of the Indian Ocean world are evident with the prevalence of African-descent populations in these places, as well as the prevalent of cultural practices of African origin. Signs of interaction between the Indian Ocean world and the African shores are apparent in several archeological sites, as well as in the cultural practices of religion, language, architecture and modes of dress. The European colonial expansion, has allowed the populations in the Indian Ocean world to share strategies during their independence movements to thwart western political hegemony. With the current advanced forms of globalization, this region is moving more towards economic and political cooperation and in addressing the transnational natural and man-made threats.
Spring
1 Course Unit
AFRC 3340 Feminist Ethnography
This course will investigate the relationships among women, gender, sexuality, and anthropological research. We will begin by exploring the trajectory of research interest in women and gender, drawing first from the early work on gender and sex by anthropologists like Margaret Mead and Ruth Benedict; moving through the 1970s and 1980s arguments about gender, culture, and political economy; arriving at more current concerns with gender, race, sexuality, and empire. For the rest of the semester, we will critically read contemporary ethnographies addressing pressing issues such as nationalism, militarism, neoliberalism and fundamentalism. Throughout, we will investigate what it means not only to "write women's worlds", but also to analyze broader socio-cultural, political, and economic processes through a gendered lens. We will, finally, address the various ways feminist anthropology fundamentally challenged the discipline's epistemological certainties, as well as how it continues to transform our understanding of the foundations of the modern world.
Not Offered Every Year

AFRC 3350 Religion and Colonial Rule in Africa
This course is designed to introduce students to the religious experiences of Africans and to the politics of culture. We will examine how traditional African religious ideas and practices interacted with Christianity and Islam. We will look specifically at religious expressions among the Yoruba, Southern African independent churches and millenarist movements, and the variety of Muslim organizations that developed during the colonial era. The purpose of this course is threefold. First, to develop in students an awareness of the wide range of meanings of conversion and people's motives in creating and adhering to religious institutions; Second, to examine the political, cultural, and psychological dimensions in the expansion of religious social movements; And third, to investigate the role of religion as counterculture and instrument of resistance to European hegemony. Topics include: Mau Mau and Maji Maji movements in Kenya and Tanzania, Chimurenga in Mozambique, Watchtower churches in Southern Africa, anti-colonial Jihads in Sudan and Somalia and mystical Muslim orders in Senegal.
Fall or Spring
Also Offered As: HIST 3350
1 Course Unit

AFRC 3351 Africa and the Mid-East
This seminar will explore the historical relationship between these two regions from the early modern age to the present. We will examine the history of trade, particularly the slave trade, and its cultural and political legacy. We will compare the experiences of European imperialism—how the scramble for Africa dovetailed with the last decades of the Ottoman Empire—with an eye to how this shaped nationalist movements in both regions. The course will also explore the decades of independence with a special eye towards pan-Africanism and pan-Arabism. We will also study the ramifications of the Arab-Israeli conflict on the relationship between African and Middle-Eastern countries, from Uganda to Ethiopia, from OPEC to Darfur. The course will pay close attention to migrations through the regions, whether forced or economic or religious. Whenever possible we will explore, through film and literature, how people in Africa and the Middle East see their connections, and their differences.
Fall or Spring
Also Offered As: HIST 3351, NELC 3550

AFRC 3386 Digital Blackness
#BlackLivesMatter, #SayHerName, #ICantBreathe, #IfIDieInPoliceCustody, #BlackOutDay are just some of the many hashtags that Black people have created and use on social media to protest police brutality and proclaim their full humanity within the context of Blackness. Over the past three decades, Black people have created and utilized social media, along with other digital platforms, media, and tools to reconfigure the terms and terrain of debates and discussions on what it means to be Black in the United States and the larger world. This course is an interdisciplinary investigation into the relationship between historical and contemporary cultural, social and political expressions of Blackness and what might be called the "Digital," the use of computers and computerized technologies, including the internet, to construct the world around us. More specifically, lectures, readings, and class discussions will help students deconstruct the cultural, political economy, and social construction of Blackness in the Digital in an effort to uncover the ways that race more broadly and Blackness more narrowly influences and shapes Black people's present social status and struggles for social justice. Accordingly, the course fosters a critical understanding of Blackness within the "Digital" and provides students with theoretical and practical apparatuses to analyze and develop new constructions of race and freedom using technology.
Fall, Spring, and Summer Terms

AFRC 3408 Global Blackface, Minstrelsy and Passing
Global Blackface, Minstrelsy and Passing is an undergraduate seminar that will explore the performance of blackface across the world. We will look at the practice of "blacking up" in theater, opera, vaudeville and film through the Middle East, Africa, Europe, India, the Caribbean and put these historical practices in dialogue with British and American blackface performance. We will also look at how performers enlisted themselves or were hired for minstrelsy shows and how these translated around the world. The seminar will also explore the concept of passing, and whether it is just a matter of skin color, but also of language. This is a cultural history course that will also investigate constructions of blackness and whiteness around the world.
Also Offered As: HIST 3709
1 Course Unit
AFRC 3450 Studies in African-American Music
This course explores aspects of the origins, style development, aesthetic philosophies, historiography, and contemporary conventions of African-American musical traditions. Topics covered include: the music of West and Central Africa, the music of colonial America, 19th century church and dance music, minstrelsy, music of the Harlem Renaissance, jazz, blues, gospel, hip-hop, and film music. Special attention is given to the ways that black music produces "meaning" and to how the social energy circulating within black music articulates myriad issues about American identity at specific historical moments. The course will also engage other expressive art forms from visual and literary sources in order to better position music making into the larger framework of African American aesthetics. (Formerly Music 146).

1 Course Unit

AFRC 3452 "Black Spiritual Journeys: Modern African American Religious Memoir"
This seminar presents African Americans who have created religious and spiritual lives amid the variety of possibilities for religious belonging in the second half of the twentieth century and the early twenty-first century. By engaging an emerging canon of memoirs, we will take seriously the writings of Black spiritual gurus, theologians, hip hop philosophers, religious laity, activists, LGBTQ clergy, religious minorities, and scholars of religion as foundational for considering contemporary religious authority through popular and/or institutional forms of African American religious leadership. Themes of spiritual formation and religious belonging as a process—healing, self-making, writing, growing up, renouncing, dreaming, and liberating—characterize the religious journeys of the African American writers, thinkers, and leaders whose works we will examine. Each weekly session will also incorporate relevant audiovisual religious media, including online exhibits, documentary films, recorded sermons, tv series, performance art, and music.

Also Offered As: HIST 0816
1 Course Unit

AFRC 3460 The Blackness of Rock: Revisiting Histories of Race, Gender, and Genre
This course explores the history of rock music by focusing specifically on the innovations and contributions of black musicians. The course will address itself to the legacies of race records, the uninterrupted appropriation of black sounds by white artists (think Elvis), and the further complications introduced by the British Invasion, all while focusing on individual artists such as Fats Domino, Big Mama Thornton, Bo Diddley, Chuck Berry, Sister Rosetta Tharpe, and Jimi Hendrix. The course will highlight and offer hands-on explorations of the innovations brought to rock music by these black artists. And, because the guitar is such an iconic instrument in rock, the course also will introduce students, through a series of labs, to the gear that makes these sounds possible. Understanding how amplifiers, effects pedals, and guitars interact and produce radically divergent sounds depending on how they are set up will offer insights into the artistry of these early rock musicians. Understanding the circuits, and how using (and abusing) them in particular ways is part of the materiality of rock’s sound, will help shed light on the extent to which creative engagement with technology determined particular sonic pathways within the genre (distortion, overdrive, fuzz, feedback, etc.). And, these innovations literally shaped the future of rock, providing a foundation of sound and style and a particular relationship to gear that extends into the present. The final unit of the course will explore the racial politics, gender dynamics, and industry structures that have buried the black histories of rock and sidelined women’s crucial contributions to the genre, contributing to rock’s framing and marketing as a (mostly) male, white genre. The course will also ask how black musicians who perform rock today, such as Tosin Abasi, Lenny Kravitz, Brittany Howard of the Alabama Shakes, Bad Brains, Big Joanie, and Living Colour, among many others, negotiate these politics, these silenced histories, these industry barriers, and these audience expectations?

1 Course Unit

AFRC 3500 American Slavery and the Law
In this course, we will work both chronologically and thematically to examine laws, constitutional provisions, and local and federal court decisions that established, regulated, and perpetuated slavery in the American colonies and states. We will concern ourselves both with change over time in the construction and application of the law, and the persistence of the desire to control and sublimate enslaved people. Our work will include engagement with secondary sources as well as immersion in the actual legal documents. Students will spend some time working with Mississippi murder cases from the 19th century. They will decipher and transcribe handwritten trial transcripts, and will historicize and analyze the cases with attention to procedural due process as well as what the testimony can tell us about the social history of the counties in which the murders occurred. The course will end with an examination of Black Codes that southern states enacted when slavery ended.
Spring
Also Offered As: HIST 0814
1 Course Unit
AFRC 3510 Love, Anger, Madness: History and Silences in Modern Haiti
On the stage of modern world history, Haiti plays the unique role as both the exceptionally victorious and tragic character. This course interrogates archival documents, oral histories, historical texts, and prose created within the nation and her diaspora in order to establish a nuanced image of the projection of Haiti's modern history. Using two classic Haitian texts, Marie Vieux-Chauvet's Love, Anger, Madness (1968) and Michel-Rolph Trouillot's Silencing the Past: Power and the Production of History (1995), this course examines how, why, and to what end Haiti's history and popular narratives about the country have served to construct and dismantle global movements, popular culture, and meanings of race, gender, and citizenship in the Americas. In our historical examination, we will question some of the iconic representations of Haiti through literature that deepen the affective historical profile of Haiti with interrogations of culture, sexuality, political, and media performance. Students will become familiar with the post-colonial history of Haiti and the region, meanings of race, and the production of history. The course is a research and historical methods seminar. Students will conduct archival research and write narratives from primary source material. This course qualifies as a "methods" course for Africana Studies undergraduate majors and minors.

AFRC 3515 Race, Rights and Rebellion
This course provides an in-depth examination of theories of race and different kinds of social struggles for freedom around the globe. We will critically engage the latest scholarship from a variety of scholars and social movement actors. From anti-slavery revolts to struggles for independence to anti-apartheid movements, this course will emphasize how racialized peoples have employed notions of rights and societal resources grounded in cultural differences. Though much of the readings will highlight the experiences of African descendant peoples in Africa and its diaspora, the course will also explore the intersections of Black struggles with social movements organized by indigenous peoples in the Americas. Students will also have the unique experience of accessing readings primarily written by primarily Black scholars, some of whom have participated as key actors in the social movements they describe. Key concepts include power, resistance, subaltern, hegemony, identity politics, consciousness, and intellectual activism. The course will be organized around the following objectives: 1. To explore a range of contemporary theoretical perspectives and methodological approaches to the study of social movements; 2. To focus on the relationship between race, gender, class, culture, and politics in the African diaspora; 3. To study the historical development of organized struggles, social protests, uprisings, revolutions, insurgencies, and rebellions; 4. To examine the political agency of African descendant peoples in the global struggle for liberation and citizenship.

AFRC 3540 Art, Medicine, & Magic: Bodily Remedies
In this activity-centric course, you will explore art, medicine, and magic as entangled approaches for healing human bodies across time, space, and societies. At first glance, artists, doctors, and religious leaders may seem to address questions about bodies and healing in very different ways. Yet, in practice, art, magic, and medicine have been in deep conversation with one another for millennia. 4,000 years ago in Mesopotamia, medical doctors were professionals who had offices, hospital beds, and pharmacological and surgical equipment expertise, but they often worked hand in hand with divers and exorcists. In rural Haiti today, Haitian Vodou priestesses collect herbs, craft sculptures, and sing as they clean wounds and disperse antibiotics within the course of a single "remed" (remedy). In the United States, megachurches send thousands of doctors on evangelical medical missions each year, while in Colombia, contemporary artists are called on to assuage profound social trauma related to decades of military conflict. Examples like these show that art, magic, and medical practice have long been entangled technologies; sometimes working together, sometimes at odds with one another, these practices have always been in dialog about what "healing" is and how it can be achieved. Attending to these entanglements this course asks "what does healing look like and feel like - in what ways do humans transform affliction?" Together, we will investigate how everyday bodily experiences of "wellbeing" and "illness" are configured through art, magic, and medical practices across human communities, shaping how people understand and manage disorders from COVID-19 to schizophrenia, from ancestral trauma to breast cancer. Throughout the course, you will use ethnographic case studies & in-class activities to work through three aspects of the core class question: 1) how do art, magic, and medicine work in communities? 2) how are they experienced in communities (who has access to what kind of healing and who doesn't have access; who can be a healer and who can't be; what should and does healing/sickness feel like?) 3) how do they approach inequalities? (e.g. how and why are illnesses unequally distributed; what illnesses matter more (and less) than others; which communities should be saved (and which sacrificed). Not Offered Every Year

AFRC 3550 Accordions of the New World
This course focuses on the musical genres and styles (both traditional and popular) that have grown up around the accordion in the New World. We will begin our explorations in Nova Scotia and move toward the Midwest, travelling through the polka belt. From there, our investigation turns toward Louisiana and Texas — toward zydeco, Cajun, and Tex-Mex music. We will then work our way through Central and South America, considering norteno, cumbia, vallenato, tango, chamame, and forro. Our journey will conclude in the Caribbean, where we will spend some time thinking about merengue and rake-n-scape music. Throughout the semester, the musical case studies will be matched by readings and film that afford ample opportunity to think about the ways that music is bound up in ethnicity, identity, and class. We will also have occasion to think about the accordion as a multiply meaningful instrument that continues to be incorporated into debates over cultural politics and mobilized as part of strategies of representation through the New World. (Formerly Music 157).

AFRC 3561 Fighting the Dispossession of black bodies - The Brazilian
Black activism from slavery to the present
The objective of this seminar is to provide to the students an overview
of the history of black activism in Brazil. We will examine several forms
of racial conflict, focusing on the afro-Brazilian ways of organization. We
will explore the main periods and organizations of black activism, such
as the abolitionism, the Brazilian Black Front, the Experimental Black
Theater, the Black Unified Movement and the Quilombolas' movement.
Through this exploration, the classes will investigate the relationship
between black organizations, black thinkers and the circulation of black
ideas across Americas, Africa, and Europe. We will also examine how
the Brazilian black movement has elaborated values of democracy and
equality, handling notions of class, race and nationality.

AFRC 3570 Caribbean Music and Diaspora
This course considers Caribbean musics within a broad and historical
framework. Caribbean musical practices are explored by illustrating the
many ways that aesthetics, ritual, communication, religion, and social
structure are embodied in and contested through performance. These
initial inquiries open onto an investigation of a range of theoretical
concepts that become particularly pertinent in Caribbean contexts—
concepts such as post-colonialism, migration, ethnicity, hybridity,
syncretism, and globalization. Each of these concepts, moreover, will be
explored with a view toward understanding its connections to the central
analytical paradigm of the course—diaspora. Throughout the course, we
will listen to many different styles and repertories of music ranging from
calypso to junkanoo, from rumba to merengue, and from dance hall to
zouk. We will then work to understand them not only in relation to the
readings that frame our discussions but also in relation to our own North-
American contexts of music consumption and production. (Formerly
Music 258).

AFRC 3665 Fables from the Flesh: Black feminist movement and the
embodied archive
Drawing inspiration from Harge's multiform fable project FLY | DROWN
and Audre Lorde's conception of biomythography, students will trace
their interiority to realize and imagine how personal histories, ancestral
inheritance, and metaphysics live/move through the body. We will
translate and transform stories of the flesh into a series of compositional
modalities—which may include text, movement, performance, sound,
and installation—to create lexicons that honor subjectivity as form. Informed
by surrender, refusal, imagination, and self-sovereignty; we will situate our
embodied archives as vessels for fable writing, create and correct myths
through movement, and expand our relationship to memory, time, space,
and illegibility. Throughout the course, we will turn to Black feminist
literary and performance works employing fable, myth, and ancestral
legacies including but not limited to: Toni Morrison's Beloved, Aretha
Franklin's gospel music, Jaamil Olawale Kosoko's Chameleon, and a close
reading of Harge's FLY | DROWN. The room will be grounded in practices
of Black fellowship, moving between study group, kickback, ceremony,
cypher, and incubator. We will oscillate between these formats depending
on the needs of the course and the cohort.

AFRC 3700 Abolitionism: A Global History
This class develops a transnational and global approach to the rise of
abolitionism in the nineteenth century. In a comparative framework, the
class traces the rise of abolitionism in Europe, the Americas, Africa, and
Asia, examining the suppression of the transatlantic slave trade, the rise
of colonialism in Africa, and the growth of forced labor in the wake of
transatlantic slave trade. We will deal with key debates in the literature
of African, Atlantic and Global histories, including the causes and
motivations of abolitionism, the relationship between the suppression
of the slave trade and the growth of forced labor in Africa, the historical
ties between abolitionism and the early stages of colonialism in Africa,
the flow of indentured laborers from Asia to the Americas in the wake of
the slave trade. This class is primarily geared towards the production of
a research paper. *Depending on the research paper topic, History Majors
and Minors can use this course to fulfill the US, Europe, Latin America or
Africa requirement.*

AFRC 3770 Black Speculative Futures
Why do black cultural producers turn to the speculative? What, in turn, is speculative about blackness? These questions frame this seminar’s exploration of how black artists, theorists, and activists imagine different futures, often in the service of critiquing power asymmetries and creating radical transformation in the present. We will explore how the speculative works differently across black literature, visual culture and performance. Additionally, inspired by the multi-disciplinary work that we encounter in the course, we will experiment with crafting our own embodied speculative art in order to better understand its function as both art practice and politics. The course will be divided between discussions centered on close reading of primary and secondary material and creative writing/movement exploration (no previous movement experience necessary). Occasional guest lectures with visiting artists will provide additional fodder for our critical and creative work.

AFRC 3804 Sighting Black Girlhood
The COVID-19 pandemic exposed the deep inequities of our social systems, and protests against police killings drew broader attention to anti-Black state violence worldwide, yet the gendered dimensions of these problems are not always fully understood. While many in the public have come to recognize the suffering of Black boys and men as acute and eventual, Black girls’ suffering has remained largely invisible, a slow confluence of violence that too often go unaddressed. As one way to bring the issues facing Black girls globally to public attention, and to celebrate and support Black girls, this course will provide a background for understanding the challenges faced by Black girls in Philadelphia, Jamaica, and South Africa. We will frame these challenges historically and geopolitically, drawing attention to the issues that contribute to the invisibility of the ordinary Black girl in diverse sites, as well as the resources that will begin to address them. This course also aims to equip students to understand the relationships between research and creative work, and to see artistic production as a catalyst for community-building and critical thinking and action. Toward this end, we will work with a number of partners in Philadelphia, including the Colored Girls Museum and Black Lives Matter-Philly. Because this course is part of a broader project, we will travel as a class to Jamaica during the summer of 2022 and students will participate in a range of projects there, working with partners in the arts, community engagement, and legal advocacy. The question motivating our project is: What are the personal, psychic, spiritual, and economic costs and benefits associated with Black girls fully exercising their humanity?

AFRC 3930 Cinema and Civil Rights
This undergraduate seminar will examine key moments in the history of civil rights through a cinematic lens. Over the course of the semester, we will explore how filmmakers have depicted the lives, aspirations, and struggles of those who have struggled for equal rights; how different dilemmas have intersected with each other; what aesthetic strategies have been adopted to represent freedom and the denial of it; and how effective cinematic efforts to contribute to increased freedom have been as well as what criteria we use to evaluate success or failure in the first place. Each week, we will watch a film and read a series of texts that will be drawn from a variety of arenas, including histories of civil rights; civil rights pamphlets and speeches; filmmaker interviews; film and media theory; memoirs; and theories of race, gender and sexuality.
Course requirements: mutual respect; completion of all readings and screenings; participation in class discussion; weekly online responses; a final project that can be a research paper, film, art project, or community-based initiative.

AFRC 3931 The History of Foreign Aid and Intervention in Africa
This course examines the history, politics, and significance of foreign aid to Africa since the late 19th century. While we do not typically think about the European colonial period in Africa in terms of ‘foreign aid,’ that era introduced ideas and institutions which formed the foundations for modern aid policies and practices. So we start there and move forward into more contemporary times. In addition to examining the objectives behind foreign assistance and the intentions of donors and recipients, we will look at some of the consequences (intended or unintended) of various forms of foreign aid to Africa over the past century. While not designed to be a comprehensive history of development theory, of African economics, or of international aid organizations, the course will touch on all of these topics. Previous course work on Africa is strongly advised.
Fall or Spring

1 Course Unit
AFRC 3932 Participatory Community Media, 1970-Present
What would it mean to understand the history of American cinema through the lens of participatory community media, collectively-made films made by and for specific communities to address personal, social and political needs using a range of affordable technologies and platforms, including 16mm film, Portapak, video, cable access television, satellite, digital video, mobile phones, social media, and drones? What methodologies do participatory community media makers employ, and how might those methods challenge and transform the methods used for cinema and media scholarship? How would such an approach to filmmaking challenge our understanding of terms like “authorship,” “amateur,” “exhibition,” “distribution,” “venue,” “completion,” “criticism,” “documentary,” “performance,” “narrative,” “community,” and “success”? How might we understand these U.S.-based works within a more expansive set of transnational conversations about the transformational capacities of collective media practices? This course will address these and other questions through a deep engagement with the films that make up the national traveling exhibition curated by Louis Massiah and Patricia R. Zimmerman, We Tell: Fifty Years of Participatory Community Media, which foregrounds six major themes: Body Publics (public health and sexualities); Collaborative Knowledges (intergenerational dialogue); Environments of Race and Place (immigration, migration, and racial identities unique to specific environments); States of Violence (war and the American criminal justice system); Turf (gentrification, homelessness, housing, and urban space); and Wages of Work (job opportunities, occupations, wages, unemployment, and underemployment). As part of that engagement, we will study the history of a series of Community Media Centers from around the U.S., including Philadelphia’s own Scribe Video Center, founded in 1982 by Louis Massiah, this course’s co-instructor. This is an undergraduate seminar, but it also available to graduate students in the form of group-guided independent studies. The course requirements include: weekly screenings, readings, and seminar discussions with class members and visiting practitioners, and completing both short assignments and a longer research paper.

AFRC 4000 Blacks in American Film and Television
This course is an examination and analysis of the changing images and achievements of African Americans in motion pictures and television. The first half of the course focuses on African-American film images from the early years of D.W. Griffith’s “renegade bucks” in The Birth of a Nation (1915); to the comic servants played by Steppin Fetchit, Hattie McDaniel, and others during the Depression era; to the post-World War II New Negro heroes and heroines of Pinky (1949) and The Defiant Ones (1958); to the rise of the new movement of African American directors such as Spike Lee (Do the Right Thing), Julie Dash (Daughters of the Dust), Charles Burnett, (To Sleep With Anger) and John Singleton (Boyz ‘N the Hood). The second half explores television images from the early sitcoms “Amos ‘n Andy” and “Beulah” to the “Cosby Show,” “Fresh Prince of Bel Air,” and “Martin.” Foremost this course will examine Black stereotypes in American films and television—and the manner in which those stereotypes have reflected national attitudes and outlooks during various historical periods. The in-class screenings and discussions will include such films as Show Boat (1936), the independently produced “race movies” of the 1930s and 1940s, Cabin in the Sky (1943), The Defiant Ones (1958), Imitation of Life (the 1959 remake) & Super Fly (1972).

1 Course Unit

AFRC 4327 Fashioning the Black Body
The fundamental query underlying this course is what is the relationship between dress, adornment, and corporeal figuring and race, specifically blackness? This course will draw upon a number of disciplines and fields including history, performance theory, cultural studies, gender studies, and queer studies to examine how blackness is fashioned, and refashioned within the United States and globally. Throughout the course we will investigate how not only race--but attendant issues of gender, sexuality and citizenship have all been constructed and contested through dress. Finally, we will explore what new and more nuanced insights might fashion, dress, adornment, and corporeal figuring offer us for understanding black subjectivities more broadly.

Not Offered Every Year
1 Course Unit

AFRC 4387 Black Feminist Approaches to History and Memory
Topics vary: Black Feminist Approaches to History & Memory - The term black feminism emerged in public discourse amid the social, political, and cultural turbulence of the 1960s. The roots of black feminism, however, are much older, easily reaching back to the work of black women abolitionists and social critics of the nineteenth century. The concept continued to grow and evolve in the work of twentieth century black women writers, journalists, activists, and educators as they sought to document black women's lives. Collectively, their work established black feminism as a political practice dedicated to the equality of all people.

More recently, black feminism has been deployed as a tool for theoretical and scholarly analysis that is characterized by an understanding that race, class, gender, and sexuality are inextricably interconnected. Using materials such as slave narratives, social criticism, and archival sources, this course will explore the theoretical and practical applications of black feminist thought in nineteenth and twentieth century North American culture and politics. In particular, we will consider the symbols and practices (storytelling, myth-making, art, archival research) that black women use to document lives. We will ask: how do these methods of documentation inform our understanding of the past and the production of historical knowledge? How can we understand black feminism as both theory and practice? And what are the implications of black feminist approaches for current research and scholarship? We will give particular attention to concepts such as gender, race, memory, the archive, and embodied knowledge to complicate our understanding of historical documentation, epistemology, and authenticity. The course material will include scholarship by Harriet Jacobs, Audre Lorde, Saidiya Hartman, Hazel Carby, Hershini Young, Evelyn Brooks Higginbotham, Toni Morrison, and others. (Image: From In Praise of Shadows, Kara Walker (2009). See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.

Also Offered As: ARTH 4400
1 Course Unit

AFRC 4404 Black Geographies and the Meaning of Land Rights
This course will interweave issues of land dispossession and land rights, both in Africa and in the Americas, with endogenous concepts and practices of space and place. Specifically, this course will trace the concept of property, as developed among Europeans and European descendants, and explore how this concept interacted with the formation of the concept of race in order to established forms of social control and domination. The first part of this course will focus on Africa generally using Kenya as a case study. The material will cover the impact of colonialism and its legacy on land rights after independence. This first part will also explore contemporary forms of land dispossession happening through international land investments, often termed land grabs. The second part of the course will turn to the experiences of African descendants in the Americas. Using a few case studies, this section will examine different countries, histories, and rural and urban areas to unravel how different types of control over land interact with social relationships and specifically with the formation of race and racism. In both sections, we will also look at forms of resistance and resilience as local populations demand not only access to and control over land, but also impose their own ideologies of what it means to occupy space. By the end of this course, students should be able to more fully articulate the significance of control over land as it impacts and affects social relationships and specifically how it relates to the formation and continuation of inequalities along racial lines. Students will apply the concepts learned throughout the course to their own independent research done on an area in Philadelphia or Pennsylvania.

1 Course Unit

AFRC 4406 Existence in Black
Racial, colonial, and other political formations have encumbered Black existence since at least the fifteenth-century. Black experiences of and reflections on these matters have been the subject of existential writings and artistic expressions ranging from the blues to reggae, fiction and non-fiction. Reading some of these texts alongside canonical texts in European existential philosophy, this class will examine how issues of freedom self, alienation, finitude, absurdity, race, and gender shape and are shaped by the global Black experience. Since Black aliveness is literally critical to Black existential philosophy, we shall also engage questions of Black flourishing amidst the potential for pessimism and nihilism.

Spring
Also Offered As: HIST 0873, PHIL 4515
1 Course Unit
AFRC 4431 Mobilizing Decolonial Arts and Practice in the Black Atlantic and Beyond
This course will define CHOICE by looking at the transnational linkages connecting artistic, cultural is related to African, African American, or other curatorial, personal, and political choices. An overarching question of the course will be "how do artists, activist, curators, and communities, question, select, translate, and disseminate the information needed to incite large-scale movements and global change and how can we, as a class, do the same through our own choices?" Students will examine the significance of theories arising from museum studies, curatorial studies, global social justice movements, as well as dance and diaspora studies. As a way of emphasizing the perspectives, political practices, the political engagement of marginalized groups, and the work of activists in the global south, this class will explore rituals, performances, and visual and expressive cultures. Looking closely at altar-making practices, ritual performances, religious coalitions, and resistant narratives, we will learn how artists, activists, and communities seek economic gain, resist oppression, express political opinions, and create tenable lives in difficult situations. The class is divided into sections including: Geographies, Bodies, Spaces, Words, Futures so that students can begin to deconstruct the colonial frameworks that structure their thinking in these areas. The assignments of the class will also afford students opportunities to learn from the work of local curators, activists, artists, exhibitions, and initiatives, including those at the Penn Museum, The Philadelphia Museum of Art, and Philadelphia Assembled.

1 Course Unit

AFRC 4800 Liberation and Ownership
Who is going to own what we all have a part of creating? The history of the Americas, and of all peoples everywhere, is an evolving answer to the question of ownership. Ownership is about: the ties that bind and those that separate; production, participation, and control; the creation of community and the imposition of hierarchies—racial, sexual, and others; dreams of possessing and the burdens of debt and ecological despoliation; dependency and the slave yearning to breathe free. Of all the issues relevant to democracy, oppression, injustice, and inequality, ownership is arguably the most important and least understood. Utilizing a variety of disciplinary perspectives—with a particular emphasis on radical and critical theories of liberation, and by focusing on particular global sites and processes of capitalism, students will assess and refine their views regarding ownership and liberation in light of their own social, political, religious, aesthetic, and ethical commitments.

Also Offered As: URBS 4800
1 Course Unit
AFRC 4880 Topics: Culture, Sexuality and Global Health

What does it mean to claim that “Homosexuality is un-African”? This course explores the linked histories of race, nation, gender and sexuality in Africa such that an ideological claim invokes, yet effaces. The polemics that produce statements like this play out through the disciplinary tensions that exist between African and sexuality/queer studies. These tensions have as much to do with the role played by the relation between sexuality and race within cultures of European colonization, as they have with the role of gender and sexuality within postcolonial power relations in Africa. Such antagonisms are sustained through the marginalization of gender and sexuality perspectives within postcolonial scholarship on Africa, as well as the bracketing of African perspectives in queer and feminist studies. This course will deconstruct these impasses by exploring scholarship at the margins of each area of study. Students will be encouraged to ask questions about how issues of race, ethnicity, nation, gender and sexuality are produced as suppressed presences in a range of texts, films and other materials. The course will include readings from postcolonial, gender, sexuality and African studies, anthropology, history, literary studies and Marxism, giving students a grounding in historical and contemporary perspectives at the intersection of African, queer and feminist studies.

AFRC 4920 The Inclusive City: Participatory Design at Taller Puertorriqueno

The Inclusive City: Participatory Design at Taller Puertorriqueno seminar will provide students in and beyond the Architecture department with the opportunity to learn from and with Taller Puertorriqueno about community, spacemaking, and memorialization in the built environment. Students will learn about a neighborhood and engage in collaborative participatory design, engaging primary sources in the Taller archives, and working on a collaborative design project. Starting from a general (region-urban) to particular (neighborhood) methodology research on site across several categories, and engaging primary sources in the Taller archives, the students will generate relational territorial cartographies and mappings, allowing them to develop a master architectural plan that includes urban strategies, as well as dynamic processes of community development. As a truly interdisciplinary course, students will utilize design concepts, historical methods, and ethnoracial lenses of analysis to collaborate with Taller Puertorriqueno to develop targeted architectural solutions that align with the organization’s programmatic goals.

AFRC 5020 Brujas and Blackness: Transnational Feminist Perspectives of AfroLatinidad

Blackness and brujería are taboo topics within Latinx communities; both typically connote negative imagery and are actively avoided. Recently, the bruja identity has been reclaimed by many AfroLatinx women who see it as an outward expression of their AfroLatinidad and source of personal empowerment. Lara (2005) describes this as a bruja positionality – “the re-membering, revising, and constructing of knowledge as well as participation in other forms of social change...built on healing the internalized desconocimientos that demonize la Bruja and the transgressive spirituality and sexuality that she represents” (p. 13). Latinx spiritual practices such as espiritismo, Santeria, Palo Monte, among others, will become avenues through which will explore key themes in Black/Latina/Chicana feminisms, including the politics of representation, stigmatization, multiple forms of state and interpersonal violence, intersecting forms of oppression, economic justice, reproductive justice, queerness/sexiuaty/lesbianism, and strategies of empowerment and resistance. Through a variety of course materials – academic articles, personal reflections, performance, and art – we will critically examine the construction of Afro-indigenous feminist identities within the contexts of Latin America and the diaspora.

AFRC 5030 Race in Latin America

In this course, we will examine historical, scholarly and community narratives about race and racialized communities in Latin America. Course texts and discussions will center Black and Indigenous histories and contemporary identities across the region. Our journey this semester will span from the pre-Columbian era to the present day, and will cover multiple Latin American geographies: the Caribbean, Central America, and South America. While we will focus most closely on the Spanish-speaking populations, we will also incorporate texts and discussion about populations speaking other languages in the region (Portuguese, French, Quechua, Kreyól, and English, for example). Finally, the diasporas of Latin America, particularly in the United States, will also figure in the discussions as sites of Latin American convergence, community and interaction in which race functions in various ways. As such, we will engage with a wide range of texts including books, articles (scholarly and popular), video, primary sources, and interviews.

AFRC 5060 Existence in Black

Racial, colonial, and other political formations have encumbered Black existence since at least the fifteenth-century. Black experiences of and reflections on these matters have been the subject of existential writings and artistic expressions ranging from the blues to reggae, fiction and non-fiction. Reading some of these texts alongside canonical texts in European existential philosophy, this class will examine how issues of freedom, self, alienation, finitude, absurdity, race, and gender shape and are shaped by the global Black experience. Since Black aliveness is literally critical to Black existential philosophy, we shall also engage questions of Black flourishing amidst the potential for pessimism and nihilism.

AFRC 5140 Africa and the Indian Ocean
The Indian Ocean region represents an area with interwoven centuries of interactions, politically, historically, geographically and culturally. This area has witnessed continuous migrations of peoples, the circulation of goods and ideas, and the interaction with foreign forces. The Indian Ocean world has served as an epicenter of global economy in pre-modern world and as such, it gave rise to trading networks and political empires. As part of the Indian Ocean World, the eastern and southern shores of Africa are both the recipients and the transmitters of cultural and political icons. The existence of many islands that separate Africa from Asia stand as hybrid cultures that are influenced by forces from different continents. Political and cultural relations between African regions and the rest of the Indian Ocean world are evident with the presence of African-descent populations in these places, as well as the prevalent of cultural practices of African origin. Signs of interaction between the Indian Ocean world and the African shores are apparent in several archeological sites, as well as in the cultural practices of religion, language, architecture and modes of dress. The European colonial expansion, has allowed the populations in the Indian Ocean world to share strategies during their independence movements to thwart western political hegemony. With the current advanced forms of globalization, this region is moving more towards economic and political cooperation and in addressing the transnational natural and man-made threats.

AFRC 5240 Inequality & Race Policy
There is little question that inequality along the lines of race and ethnicity remain a constant problem in American society. And over time, the federal government has implemented several policy initiatives to address these inequities. However, less well understood is the success of these federal policies or the process in which they emerge from government as a viable solution. This course will provide an overview of the link between federal government action and changes in minority inequality. We will analyze several issue spaces that cover health, crime and incarceration, social policy and equal rights, education, welfare, and economics. We will take a multi-method approach to exploring the success of federal policies by conducting historical assessments and statistical analysis. Advanced undergraduates are welcome to take the course with permission.

AFRC 5300 Black Performance Theory
In his 1995 documentary Black Is, Black Ain't Marlon Riggs traces a black cultural tradition while simultaneously destabilizing the very notion of blackness itself. He testifies that: Black is black, and black is blue. Black is bright. Black can do you in. In Riggs’s configuration, black is a color, black is a feeling, black is a sound, black is materiality, and black is a life sentence. In an effort to raise critical questions around blackness, performance, race, and feeling, this course follows in the tradition of Riggs’s work. In other words, this graduate level course examines the notion of blackness through theorizations of performance. It pursues the following questions: What is blackness? How is blackness embodied, felt, heard, represented, and seen through performance? How is black performance political? Discussions and written work will interrogate the slipperiness of, desire for, and policing of blackness in order to trouble conceptions of race as a biological essence. Organized by keywords in the field of Black Performance Theory - and exploring varying performance forms (the play, the dance, the film, the photograph, the performance of everyday life, the television program, the exhibit, and even the tweet) - This course foregrounds the micro-politics through which black racialized subjects are shaped in the realm of culture. Performances will be consulted each meeting which we will use to interpret and complicate the day’s readings. In examining blackness through a number of performance mediums, we will consider the politics of black creative labor and the processes of racialization produced through black bodies.  

Fall 1 Course Unit

AFRC 5310 Mobilizing Decolonial Arts and Practice in the Black Atlantic and Beyond
This course will define CHOICE by looking at the transnational linkages connecting artistic narratives related to African, African American, or other curatorial, personal, and political choices. An overarching question of the course will be “how do artists, activist, curators, and communities, question, select, translate, and disseminate the information needed to incite large-scale movements and global change and how can we, as a class, do the same through our own choices?” Students will examine the significance of theories arising from museum studies, curatorial studies, global social justice movements, as well as dance and diaspora studies. As a way of emphasizing the perspectives, artistic practices, the political engagement of marginalized groups, and the work of activists in the global south, this class will explore rituals, performances, and visual and expressive cultures. Looking closely at altar-making practices, ritual performances, religious coalitions, and resistant narratives, we will learn how artists, activists, and communities seek economic gain, resist oppression, express political opinions, and create tenable lives in difficult situations. The class is divided into sections including: Geographies, Bodies, Spaces, Words, Futures so that students can begin to deconstruct the colonial frameworks that structure their thinking in these areas. The assignments of the class will also afford students opportunities to learn from the work of local curators, activists, artists, exhibitions, and initiatives, including those at the Penn Museum, The Philadelphia Museum of Art, and Philadelphia Assembled.  

Spring 1 Course Unit

AFRC 5330 Sociology of Race and Ethnicity
Race and ethnicity are, above all, both converge as system of ideas by which men and women imagine the human body and their relationships within society. In this course we will question the concept of race and ethnicity and their place in modern society (1500 - 2020). While the course reviews the pre-1500 literature our focus will be on the last 500 years. This course reviews the research that has contributed to the ideas about ethnicity and race in human society. The review covers the discourse on race in political propaganda, religious doctrine, philosophy, history, biology and other human sciences.

AFRC 5420 Archiving Jazz: Visualia And Materiality In The Phila Jazz Community 1945-2019
This seminar will be organized around three distinct pathways. First, it will serve as an introduction to Jazz Studies and thus be attentive to the ways that jazz music has sparked an interdisciplinary conversation that is wide-ranging and ongoing. Second, we will be partnering with the African American Museum of Philadelphia to consider jazz within the realm of visual art. In light of efforts to map the “black interior,” how have visual artists (e.g. painters, sculptors, filmmakers, and photographers) sought to represent jazz? Third, we will endeavor to develop partnerships with the Philadelphia (and beyond) jazz community, especially as it pertains to creating and sustaining an archive that serves as way to understand jazz as an instrument of placemaking and also as a vehicle for jazz musicians to take ownership of their narratives. The seminar will meet at the African American Museum of Philadelphia and be taught with members of the Museum staff. The course will culminate with a virtual exhibit of visual works and archival materials centering on Philadelphia’s jazz community and (if funding is available) a free concert to be held at AAMP. Undergraduates are welcome to register for the course with permission of the instructor.

AFRC 5500 Critical Ethnography
This graduate course introduces students to theories, practices, and critiques of critical ethnography. Ethnography – an approach to the study of culture which anthropologist James Clifford described as a process that “translates experiences into text” – will have our full attention. This process of translation, although seemingly straightforward, requires layers of interpretation, selection, and the imposition of a viewpoint or politics. While ethnography is often narrowly conceived of as a methodology, this course considers ethnography as a mode of inquiry, as a philosophy, as an ongoing question and performance. We wrestle with notions of "the self" and "the other" at the intersection of imbicated cultural and performance worlds. Together we'll ask: How is ethnography both critical and performative? What is the relationship between theory and method? How can we evaluate ethnographic work? And finally, what kinds of ethnographers do we want to be? This course considers a range of ethnographic examples in order to analyze both the craft and the stakes of "translating experiences into text.”

AFRC 5573 Psychoeducational Interactions with Black Males
The founder(s) of this course wondered, in an overtly and covertly racist society: "What if we engaged practitioners, educators and researchers in training (social work, policy, criminal justice, counseling, education, health care, etc.) to develop a more empathic imagination and reflection of the Black male before they encounter them in practice?" Core tenets underlying this class are that racial oppression exists, matters, is ubiquitous and pernicious and that those most affected are ignorant of this reality. Students will learn how to help the Black boys and men they engage to identify and challenge the effects of racial oppression on their academic, occupational, relational and cultural well-being, and to promote post-traumatic growth.

AFRC 5600 Creating Black Sacred Cultures: Readings in African American Religious History
This graduate seminar entertains the history of African American cultural production primarily in the twentieth century through foundational and emerging works in the field. This seminar focuses on African American religious history, with a focus on the material, visual, auditory, and literary religious constructions of everyday worlds, lives, and professions. Our readings attend to intersectional dimensions of African American religious life, highlighting the connections of race, gender identity, sexual orientation, class, alternative religious identities, and region. A focus on Black cultural production and its producers enriches African American religious history. Seminar participants will engage the theoretical concerns and methodological approaches that illuminate the ways that Black women and men capture and (re)shape the meaning of their worlds in a variety of domestic, professional, social, and political settings. The seminar’s primary aims are to help participants define interests within the field to pursue further study, to consider potential areas of research, and to aid preparation for doctoral examinations.

AFRC 6020 Stereotype Threat, Impostor Phenomenon, and African Americans
This course critically examines stereotype threat and impostor phenomenon as they relate to African Americans. Both stereotype threat and impostor phenomenon negatively affect African Americans. The apprehension experienced by African Americans that they might behave in a manner that confirms an existing negative cultural stereotype is stereotype threat, which usually results in reduced effectiveness in African Americans’ performance. Stereotype threat is linked with impostor phenomenon. Impostor phenomenon is an internal experience of intellectual phoniness in authentically talented individuals, in which they doubt their accomplishments and fear being exposed as a fraud. While stereotype threat relies on broad generalization, the impostor phenomenon describes feelings of personal inadequacy, especially in high-achieving African Americans. This course will explore the evolving meanings connected to both stereotype threat and impostor phenomenon in relation to African Americans.

This course concerns the exhibiting of Black Bodies in Museums and gallery spaces. We will trace the evolution of public history from the “Cabinets of Curiosity” in 18th and 19th Century Europe, through to the current institutional confirmation of the vindications traditions represented by Museu Afro Brasil (Sao Paulo, Brazil), National Museum of African American History and Culture (Washington, D.C.), and the Museum of Black Civilization (Dakar, Senegal). We will give particular attention to “why these representations at these times in these places?” In the process of addressing these questions we will give voice to the figures who conceived the curatorial content from those with the colonial mentality, to those with the abolitionist and nationalist and Pan-African visions.
Fall or Spring
Also Offered As: SOCI 6600
1 Course Unit

AFRC 6240 Race, Poverty, & Place
In recent years, long-disinvested cities have become the site of renewed investment, population growth, and economic development in a phenomenon often described as gentrification. Nonetheless, socioeconomic inequality between races, ethnicities, genders, and places within the larger metropolitan area continue to persist, suggesting that a rising tide does not raise all boats. Planners must grapple with these issues of inequality and inequity, particularly the implementation of plans and policies that may in theory provide benefits to all, but in practice continue to accumulate benefits for a select few. This course examines the construction of race, the making of a place, and the persistence of poverty in racialized places in the city. This course will engage in a critical discussion of the aforementioned themes, such that the normative notions of race, capitalism, urbanism, gender, power, and space are upended to privilege more marginalized perspectives of these processes.

AFRC 6550 Black Political Thought: Difference And Community
This course is designed to familiarize graduate students with some of the key texts and debates in Africana Studies concerning the relationship between racial slavery, modernity and politics. Beginning with the Haitian Revolution, much of black political thought (thinking and doing politics) has advocated group solidarity and cohesion in the face of often overwhelming conditions of servitude, enslavement and coercion within the political economy of slavery and the moral economy of white supremacy. Ideas and practices of freedom however, articulated by political actors and intellectuals alike, have been as varied as the routes to freedom itself. Thus, ideas and practices of liberty, citizenship and political community within many African and Afro-descendant communities have revealed multiple, often competing forms of political imagination. The multiple and varied forms of political imagination, represented in the writings of thinkers like Eric Williams, Richard Wright, Carole Boyce Davies and others, complicates any understanding of black political thought as having a single origin, genealogy or objective. Students will engage these and other authors in an effort to track black political thought’s consonance and dissonance with Western feminisms, Marxism, nationalism and related phenomena and ideologies of the 20th and now 21st century.

1 Course Unit

AFRC 6552 The State, Civil Society, and Democracy in Africa
This course examines the nature and dynamics of the state and civil society in Africa and how these determine the career of democracy, democratization and democratic rule in the continent. It considers different accounts of the state in Africa (or the African state), civil society and democracy in elaborating an informed understanding of the political, economic and social processes in the continent. How does the nature of the state in Africa account for the nature of the civil society and vice versa? How can the career of democracy in the continent illuminate our understanding of the nature of state-society relations? How robust is the relationship between civil society and the state? How can we account for the relationships among civil society, the state and democratic institutions and processes? What are the local, regional, and global forces that nurture and/or hinder democratic practices, including electoral democracy? These questions are confronted in light of their implications for, and complex interactions with, different social formations, institutions, groups, and social practices including gender, ethnicity, nationalism, race, religion, social protest, political institutions, economic formations, etc., etc.

AFRC 6560 Politics and Social Movements in Contemporary Afro-Latin America
Over the past two decades there has been an explosion of research into Afro-Latin American populations in South America and the Caribbean. During this period a generation of scholars who were largely unsatisfied with the research methods and normative agendas of many scholars, activists and politicians of prior eras began to pose distinct research questions and methodological approaches to various subject matter. Afro-Latin identification and identity (as both separate from and entangled with national identity) is a major theme in the new literature. Race, racism and inequality, Afro-Latin involvement in social movements, political parties and other forms of political articulation have also been prominent themes. In previous eras, scholars largely emphasized various iterations of purportedly racial and ostensibly cultural mixture such as Mestizaje and Democracia Racial to explain why race and racism did not play a prominent role in social and political mobilization. Contemporary sociologists and anthropologists, however, have found ways to identify attitudes, behaviors, demographic and socio-economic indicators that belie imagery and ideologies of social and political equality achieved through miscegenation (cultural and physical) in Latin America.

AFRC 6665 Fables from the Flesh: Black feminist movement and the embodied archive
Drawing inspiration from Harge’s multiform fable project FLY | DROWN and Audre Lorde’s conception of biomythography, students will trace their interiority to realize and imagine how personal histories, ancestral inheritance, and metaphysics live/move through the body. We will translate and transform stories of the flesh into a series of compositional modalities—which may include text, movement, performance, sound, and installation—to create lexicons that honor subjectivity as form. Informed by surrender, refusal, imagination, and self-sovereignty, we will situate our embodied archives as vessels for fable writing, create and correct myths through movement, and expand our relationship to memory, time, space, and illegibility. Throughout the course, we will turn to Black feminist literary and performance works employing fable, myth, and ancestral legacies including but not limited to: Toni Morrison’s Beloved, Aretha Franklin’s gospel music, Jaamil Olawale Kosoko’s Chameleon, and a close reading of Harge’s FLY | DROWN. The room will be grounded in practices of Black fellowship, moving between study group, kickback, ceremony, cypher, and incubator. We will oscillate between these formats depending on the needs of the course and the cohort.

1 Course Unit
AFRC 6740 Facing America
This course explores the visual history of race in the United States as both self-fashioning and cultural mythology by examining the ways that conceptions of Native American, Latino, and Asian identity, alongside ideas of Blackness and Whiteness, have combined to create the various cultural ideologies of class, gender, and sexuality that remain evident in historical visual and material culture. We also investigate the ways that these creations have subsequently helped to launch new visual entertainments, including museum spectacles, blackface minstrelsy, and early film, from the colonial period through the 1940s.

AFRC 6750 Old Egyptian
This course is an introduction to the language of the Egyptian Old Kingdom. The grammar of the period will be introduced during the early part of the semester, using Ededl’s ALTAGYPTISCHE GRAMMATIK as the basic reference. Other grammatical studies to be utilized will include works by Allen, Baer, Polotsky, Satzinger, Gilula, Doret, and Silverman. The majority of time in the course will be devoted to reading varied textual material: the unpublished inscriptions in the tomb of the Old Kingdom official Kapure–on view in the collection of the University Museum; several autobiographical inscriptions as recorded by Sethe in URKUNDEN I; and a letter in hieratic (Baer, ZAS 93, 1966, 1-9).

AFRC 6770 Black Speculative Futures
Why do black cultural producers turn to the speculative? What, in turn, is speculative about blackness? These questions frame this seminar’s exploration of how black artists, theorists, and activists imagine different futures, often in the service of critiquing power asymmetries and creating radical transformation in the present. We will explore how the speculative works differently across black literature, visual culture and performance. Additionally, inspired by the multi-disciplinary work that we encounter in the course, we will experiment with crafting our own embodied speculative art in order to better understand its function as both art practice and politics. The course will be divided between discussions centered on close reading of primary and secondary material and creative writing/movement exploration (no previous movement experience necessary). Occasional guest lectures with visiting artists will provide additional fodder for our critical and creative work.

Also Offered As: ANTH 6770, ENGL 6770
1 Course Unit

AFRC 6781 African American Art
This course surveys the most important and interesting art produced in the United States (or by American artists living abroad) up through the 1950s. This period encompasses the history of both early and modern art in the U.S., from its first appearances to its rise to prominence and institutionalization. While tracking this history, the course examines art’s relation to historical processes of modernization (industrialization, the development of transportation and communications, the spread of corporate organization in business, urbanization, technological development, the rise of mass media and mass markets, etc.) and to the economic polarization, social fragmentation, political conflict, and the cultural changes these developments entailed. In these circumstances, art is drawn simultaneously toward truth and fraud, realism and artifice, science and spirituality, commodification and ephemerality, nationalism and cosmopolitanism, individualism and collectivity, the past and the future, professionalization and popularity, celebrating modern life and criticizing it.

AFRC 6804 Sighting Black Girlhood
The COVID-19 pandemic exposed the deep inequities of our social systems, and protests against police killings drew broader attention to anti-Black state violence worldwide, yet the gendered dimensions of these problems are not always fully understood. While many in the public have come to recognize the suffering of Black boys and men as acute and eventful, Black girls’ suffering has remained largely invisible, a slow confluence of violence that too often go unaddressed. As one way to bring the issues facing Black girls globally to public attention, and to celebrate and support Black girls, this course will provide a background for understanding the challenges faced by Black girls in Philadelphia, Jamaica, and South Africa. We will frame these challenges historically and geopolitically, drawing attention to the issues that contribute to the invisibility of the ordinary Black girl in diverse sites, as well as the resources that will begin to address them. This course also aims to equip students to understand the relationships between research and creative work, and to see artistic production as a catalyst for community-building and critical thinking and action. Toward this end, we will work with a number of partners in Philadelphia, including the Colored Girls Museum and Black Lives Matter-Philly. Because this course is part of a broader project, we will travel as a class to Jamaica during the summer of 2022 and students will participate in a range of projects there, working with partners in the arts, community engagement, and legal advocacy. The question motivating our project is: What are the personal, psychic, spiritual, and economic costs and benefits associated with Black girls fully exercising their humanity?

Mutually Exclusive: ANTH 3804
1 Course Unit
AFRC 6850 Modern Art in Africa and Europe
The history of modern art is closely tied to and largely unfolds from the history of Western Imperialism. While the technologies made possible by colonial resource extraction produced new ways of looking, modern conceptions of the self and how to represent it developed in dialogue with racialized notions of the other. This course focuses on encounters between the cultures of Africa and Europe, from 1880 to 1960, and on the visual practices that emerged on both continents as a result. Topics of special interest will include racial difference and the birth of photography, colonial masquerade, impressionism, symbols of power in royal arts, cubism, mass marketing and colonial self-fashioning, West African studio photography, world’s fairs and the Musée de l’Homme, Dada and surrealism, Negritude and interwar Paris, anti-aesthetics, colonial arts education, National art schools in the age of African independence, humanism and South African photography under Apartheid.

Also Offered As: ARTH 6850
1 Course Unit

AFRC 6910 Transatlantic Black Feminisms in Francophone Literatures
This course explores the evolution of representations of the Black femme body in French and francophone imaginaries, tracing a chronological arc that begins with early colonial imagery and ends with the rise of a 2018 movement spearheaded by a collective of Black comediennes, denouncing exclusionary practices in the French entertainment industry. We will first focus on the male gaze — European, Caribbean and African — and the way it constructed the Black femme body, to better understand how Black female authors undermine, resist, parody, or continue to bear the weight of these early images when they take control of their own representation. While our primary readings will be authored by French-writing women, including Mayotte Capacia (Martinique), Marie Vieux-Chauvet (Haiti), Maryse Condé (Guadeloupe), Mariama Bâ (Senegal) and Marie Ndiaye (France), our theoretical foundation will include anglophone thinkers, such as bell hooks, Audre Lorde, Saidiya Hartman, and others. Readings and discussions will be in English.

1 Course Unit

AFRC 6971 Afro-Latin America
In-depth analysis of the black experience in Latin America and the Spanish, French and English-speaking Caribbean, since slavery to the present. The course opens with a general examination of the existence of Afro-descendants in the Americas, through the study of fundamental historical, political and sociocultural processes. This panoramic view provides the basic tools for the scrutiny of a broad selection of literary, musical, visual, performance, and cinematic works, which leads to the comprehension of the different ethical-aesthetic strategies used to express the Afro-diasporic experience. Essential concepts such as negritude, creolite, and mestizaje, as well as the most relevant theories on identity and identification in Latin America and the Caribbean, will be thoroughly examined, in articulation with the interpretation of artistic works. Power, nationalism, citizenship, violence, religious beliefs, family and community structures, migration, motherhood and fatherhood, national and gender identities, eroticism, and sexuality are some of the main issues discussed in this seminar.

AFRC 7100 Political Economy and Social History of Africa and the African Diaspora
This course provides the opportunity for students to investigate the relationship between the emergence of African peoples as historical subjects and their location within specific geopolitical and economic circumstances. Topics vary.
Two Term Class, Student must enter first term; credit given after both terms are complete
Also Offered As: PSCI 7290
1 Course Unit

AFRC 7200 Graduate Prospectus and Grant-Writing Seminar
This course is intended to help students to write a strong dissertation proposal/prospectus. A proposal is a detailed plan for a long journey of conceptualization, research, and writing that will lead to the first major, independent scholarly contribution. Students will work closely with advisors, peers, and the professor in the course, to develop the questions, methodological approaches, and theoretical perspectives that will guide their research and writing. At the end of the semester, each student will have completed a proposal, and will be ready to defend it.
Fall or Spring

AFRC 7230 Multicultural Issues in Education
This course examines critical issues, problems, and perspectives in multicultural education. Intended to focus on access to literacy and educational opportunity, the course will engage class members in discussions around a variety of topics in educational practice, research, and policy. Specifically, the course will (1) review theoretical frameworks in multicultural education, (2) analyze the issues of race, racism, and culture in historical and contemporary perspective, and (3) identify obstacles to participation in the educational process by diverse cultural and ethnic groups. Students will be required to complete field experiences and classroom activities that enable them to reflect on their own belief systems, practices, and educational experiences.

Also Offered As: MUSC 7400
1 Course Unit

AFRC 7708 Black Classicisms
This course will explore heterogeneous responses to ancient Greek and Roman Classics in the literature, art, and political thought of Africa and the Black Diaspora, ranging from the late eighteenth century to the present day and encompassing Africa, the Caribbean, and North America. We will analyze how African and black diasporic writers, artists, and thinkers have engaged with and re-imagined Greco-Roman Classics, both to expose and critique discourses of racism, imperialism, and colonialism, and as a source of radical self-expression. Throughout, we will consider the reciprocal dynamic by which dialogues with ancient Greek and Roman classics contribute to the polyphony of black texts and these same texts write back to and signify on the Greek and Roman Classics, diversifying the horizon of expectation for their future interpretation.

Writers and artists whose work we will examine include Romare Bearden; Dionne Brand; Gwendolyn Brooks; Aimé Césaire; Austin Clarke; Anna Julia Cooper; Rita Dove; W.E.B. Du Bois; Ralph Ellison; Athol Fugard; John Kani; and Winston Ntshona; C.L.R. James; June Jordan; Toni Morrison; Julia Cooper; Rita Dove; W.E.B. Du Bois; Ralph Ellison; Athol Fugard; John Kani; and Winston Ntshona; C.L.R. James; June Jordan; Toni Morrison; Athol Fugard, John Kani, and Winston Ntshona; C.L.R. James; June Jordan; and Richard Wright. We will study these writers in the context of national and transnational histories and networks and in dialogue with relevant theoretical debates. Work for assessment will include a 15-page research paper and the preparation of a teaching syllabus for a course on an aspect of Black Classical Receptions.

1 Course Unit

AFRC 7910 African Film and Media Pedagogy
This graduate seminar offers an intensive, critical, and collaborative study of contemporary African film and media production. The past three decades have seen an unprecedented shift in the African media landscape. Not only has the wide availability of satellite media across the continent made international film and television programming part of African popular culture, but moreover the growing film industries within the continent, most notably Nollywood, have altered how Africans are carving an image of themselves on the big and small screens. In partnership with local, regional, and international film and media centers, we will study a range of films--features, shorts, documentaries, and television shows--paying close attention to the means and sites of production as well as the formal qualities that distinguish these works. Many of the films we will analyze will stand out both for their exceptional aesthetic quality as well as their remarkable ability to confront pressing political and social themes. But we will also think about trash: what counts as trashy media, and for whom? Who watches it, where, and why? Other questions we will ask include: What particular indigenous modes of storytelling do African films employ? What categories begin to emerge under the umbrella category of "African film and media" and where do diasporan film and media practitioners and critics fit in this landscape? How are these films tackling some of the urgent questions of our times, including migration and globalization; ethnic, political, and economic polarization; gender and sexuality; and massive urbanization and industrialization sweeping Africa and other parts of the Global South? What role do festivals in various countries play in shaping media production and distribution? How important is the concept of authorship in this context? And how do these films challenge the dominant Western trope of Africa as a spectacle, instead offering novel ways of picturing everyday African experiences that we rarely glimpse in Western media? To explore these questions, we will visit multiple sites of film production, distribution, exhibition, and education, including Scribe Video Center in Philadelphia, Sankofa Films in Washington, D.C., and the College of Performing and Visual Art at Addis Ababa University in Ethiopia. Location and knowledge production are inextricably connected, and by considering African media production from these multiple sites, and collaborating with multiple stakeholders, this course offers a directly engaged pedagogy of the complex artistic, cultural, social, and political dynamics of African audiovisual creation. The travel component of this course entails a day trip to Washington, D.C. during the semester (tentative date: April 2, 2020) and a week-long trip to Addis Ababa at the end of the spring term (students applying for this course should be prepared to travel to Addis Ababa May 30, 2020-June 7, 2020). All expenses for travel, accommodation, and food will be covered, but students will need to hold a passport. Ultimately, this course aims to use film and media production to intervene in a larger discourse on how Africa is figured in the global humanities, not as an absent or passive actor but one actively engaged in producing art and humanistic knowledge that has much to teach us and the world. Admission to the course will be by permission only and students are required to submit a short statement of interest (max. 250 words) to dagw@english.upenn.edu and redkaren@sas.upenn.edu. Students must be prepared to travel to Addis Ababa and Washington D.C. as described in the syllabus, and must hold a passport.

1 Course Unit
AFRC 7920 Study of a Genre: The Manifesto
If ubiquity confers significance, the manifesto is a major literary form, and yet it has been relatively marginalized in genre studies, where attention to the manifesto has been largely devoted to anthologies. In this seminar we will focus on the manifesto as a genre by exploring its histories, rhetorics, definitions and reception from a Black Studies framework. Associated with politics, art, literature, pedagogy, film, and new technologies, the manifesto involves the taking of an engaged position that is tied to the moment of its enunciation. The manifesto's individual or collective authors seek to provoke radical change through critique and the modeling of new ways of being through language and images. Included on the syllabus will be anticolonial, anti-racist, feminist, LGBTQ manifestos of the 18th through 21st centuries from throughout the Black world. In addition to leading class discussion, students will be responsible for a seminar paper or a final project to be developed in consultation with the instructor.

American Sign Language (ASLD)

ASLD 0100 American Sign Language I
Introduction to American Sign Language (ASL). Introduces ASL in a contextualized and conversational manner. Course includes receptive and expressive readiness activities, sign vocabulary and grammar, and an introduction to important topics and people within Deaf communities and Deaf culture.
Fall or Spring
1 Course Unit

ASLD 0200 American Sign Language II
Increased communication skill in American Sign Language (ASL). Expressive and receptive abilities are expanded upon via a contextualized and conversational manner. Important topics to Deaf communities and Deaf culture are continued within online and in-class discussion.
Fall or Spring
Prerequisite: ASLD 0100
1 Course Unit

ASLD 0300 American Sign Language III
American Sign Language (ASL) at the Intermediate I level. Expressive and receptive abilities are expanded upon via a contextualized and conversational manner, including, but not limited to, narrative production. Important topics to Deaf communities and Deaf culture are continued within online and in-class discussion.
Fall or Spring
Prerequisite: ASLD 0200
1 Course Unit

ASLD 0340 American Sign Language III/IV
Expanded instruction of American Sign Language (ASL) on the Intermediate I and II levels. Includes receptive and expressive readiness activities, sign vocabulary and grammar growth, fingerspelling practice and narrative skills. Topics on Deaf cultural are also included in the course readings and discussions. Increases the emphasis on more abstract and challenging conversational and narrative range.
Not Offered Every Year
Prerequisite: ASLD 0200
2 Course Units

ASLD 0400 American Sign Language IV
American Sign Language (ASL) at the Intermediate II level. Expressive and receptive abilities are expanded upon via a contextualized and conversational manner, including, but not limited to, narrative production. Important topics to Deaf communities and Deaf culture are continued within online and in-class discussion.
Fall or Spring
Prerequisite: ASLD 0300
1 Course Unit
ASLD 1030 Advanced ASL and Deaf History
This is an advanced ASL course in which students expand their conversational and narrative range. While receptive readiness activities continue to be an important part of the class, the emphasis moves toward honing expressive sign skills through narrative presentation and ASL-only class discussions. The first half of the course centers on fact-sharing strategies and describing cultural norms while the second half focuses on American Deaf history and the forces that shape its culture. Topics covered in the second half of the course use textual readings, films, class lectures and discussions, and other outside resources to understand the past, present, and possible future trajectories of American Deaf people.
Fall, odd numbered years only
Prerequisite: ASLD 0400
1 Course Unit

ASLD 1031 Deaf Literature, Performance, Art, and Film
This course is an advanced/conversational ASL course that explores several key topics related to Deaf culture and the Deaf experience(s) influence on literature (both written and signed), theatre, fine and visual arts, and film—both Deaf and hearing directed and acted. Using only ASL in class, students learn about various perspectives and approaches to each of the themes and topics of the course. Some questions to explore and answer in this course will be: What is Deaf Literature? The Deaf Lens: What is it? How is it different from a hearing perspective on film? How is Deafness expressed differently in each of the arts discussed in this course? Analysis and discussion will come from readings as well as viewings of various types of Deaf arts.
Spring
Prerequisite: ASLD 0400
1 Course Unit

ASLD 1032 Deaf Culture
This course is an advanced/conversational ASL course that explores several key topics related to Deaf Culture. Using only ASL in class, students will read and discuss books, articles, and films related to the following topics: What is Deaf Culture?; The History of the Deaf American; Deaf Identities; Communication Debates and Language Deprivation; Technology and Deaf Culture; Deaf Art; Deaf Space; and Deaf Families, Deaf-Hearing Families. Ultimately, students will work collaboratively on a final project that benefits local Deaf community members. Completion of at least the fourth semester of ASL (or the equivalent ASL experience with permission from the instructor) is required to take this course.
Spring
1 Course Unit

ASLD 1034 ASL/Deaf Studies - ABCS
This Academically Based Community Service course is intended to be the final course in the ASL/Deaf Studies course sequence. Students will work with a Deaf community partner to learn about the organization and work on a mutually agreed on research project. Students will also have course meetings on a weekly basis with discussions and activities centering on reflection of community experiences through linguistic as well as cultural lenses. Ongoing reflections and discussions—formal and informal—on Deaf cultural/theoretical topics drawing from readings as well as community experiences will be integral to the course experience.
Fall
Prerequisite: ASLD 1032
1 Course Unit

ASLD 1039 Disability Rights and Oppression: Experiences within Global Deaf Communities
This course explores the linguistic and social statuses of global Deaf communities as a framework for understanding the Italian Deaf community’s quest for national recognition of their sign language (LIS) and their continued efforts toward parity with hearing people. Topics to be explored include the following: an overview of the cultural model of being deaf; the social and historical underpinnings of deaf people’s oppression and marginalization by hearing people; social construction of deafness as disability and Deaf-as-asset (Deaf-Gain); sign language as a human right; and language policy and practice as it relates to deaf people’s access to or restriction from learning a sign language as a first language. We will use first-hand accounts via text and film to elucidate a variety of global deaf perspectives. Travel to Italy will bring the theoretical topics discussed in the semester to life via the following experiential activities: academic and social interactions with Italian Deaf community members; visits to sites important to Italian Deaf people and their history; intensive beginner LIS instruction to facilitate direct conversation with Italian Deaf community members. No previous sign language experience is required to take this course.
Spring
1 Course Unit

ASLD 2047 Structure of American Sign Language
This course covers the linguistic structure of American Sign Language (ASL), including its phonology (articulatory features, phonological constraints, nonmanuals), morphology (morphological constraints, compounds, incorporation, borrowing), and syntax (syntactic categories, basic phrase structure, common sentence types). Also discussed are the topics of classifiers and deixis. In keeping with the comparative perspective of linguistic theory, parallels and differences between ASL and other (primarily spoken) languages are pointed out where appropriate. Historical and sociolinguistic issues are addressed where they are relevant to elucidating linguistic structure. Though the course focuses on ASL, it necessarily touches on issues concerning sign languages more generally, notably the possible effects of modality (sign vs. speech) on linguistic structure and the implications of the signed modality for general linguistics. Although the course does not presuppose knowledge of ASL, it does require acquaintance with basic concepts of linguistics.
Not Offered Every Year
Also Offered As: LING 2047
Prerequisite: LING 0001
1 Course Unit

ASLD 5999 Independent study in ASL/Studies for Special Purposes
This independent study is designed for students pursuing a practical inquiry into ASL/Deaf Studies. Prior consultation with and permission from the department is required.
Not Offered Every Year
0.5 Course Units

**Amharic (AMHR)**

**AMHR 0100 Elementary Amharic I**
The Elementary Amharic I course can be taken to fulfill a language requirement, or for linguistic preparation to do research on Ethiopia/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Amharic. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content.

1 Course Unit

**AMHR 0200 Elementary Amharic II**
Continuation of Elementary Amharic I. Amharic belongs to the southern branch of Hemeto-Semitic languages, which is also referred to as "Afrasian." Amharic is the official language of Ethiopia and is spoken by 14 million native Amharas and by approximately 18 million of the other groups in Ethiopia. This course continues to introduce basic grammar, vocabulary, and the reading and writing of Amharic to new speakers.

Spring
Prerequisite: AMHR 0100
1 Course Unit

**AMHR 0300 Intermediate Amharic I**
This course will engage students in interpersonal and interpretive activities to enable them to satisfy most work requirements with language usage that is often, but not always, acceptable and effective. They will be able to handle with confidence, but not with facility, most normal, high-frequency social conversational situations including extensive, but casual conversations about current events, as well as work, family, and autobiographical information. Students can get the gist of most everyday conversations but has some difficulty understanding native speakers in situations that require specialized or sophisticated knowledge. Students will show considerable ability to communicate effectively on topics relating to particular interests and special fields of competence. Often, they will show a high degree of fluency and ease of speech, yet when under tension or pressure, the ability to use the language effectively may deteriorate. Comprehension of normal native speech is typically nearly complete. Typically, students with this proficiency level can participate in most social, formal, and informal interactions, but limitations either in range of contexts, types of tasks or level of accuracy hinder effectiveness.

Fall
1 Course Unit

**AMHR 0400 Intermediate Amharic II**
Continuation of AMHR 0300: Intermediate Amharic I; Level 2+ (Limited Working Proficiency, Plus)

Spring
1 Course Unit

**AMHR 1100 Advanced Amharic**
An advanced Amharic course that will further sharpen the students’ knowledge of the Amharic language and the culture of the Amharas. The learners communicative skills will be further developed through listening, speaking, reading and writing. There will also be discussions on cultural and political issues.

Fall or Spring
1 Course Unit

**AMHR 1300 Amharic Language and Culture**
Students will engage in interpersonal and interpretive communicative modes of language use to satisfy professional needs in a wide range of sophisticated and demanding tasks. While students will be able to demonstrate obvious strengths, they may exhibit some hesitancy, uncertainty, effort or errors which limit the range of language-use tasks that can be reliably performed. Occasional patterned errors may occur in low frequency and highly-complex structures. Typically, there will be particular strength in fluency and one or more, but not all, of the following: breadth of lexicon, structural precision, discourse competence in a wide range of contexts and tasks often matching a native speaker’s strategic and organizational abilities and expectations.

Fall or Spring
1 Course Unit

**Anatomy (ANAT)**

**ANAT 5050 Structural Adaptations to Function**
Veterinary gross anatomy course. The basic principles of mammalian and avian anatomy are studied in a veterinary context. The laboratory periods are given to the dissection of the dog, cat, horse, various ruminants, various laboratory animals, chicken and fish. Prerequisite: Permission of instructor in Veterinary School

Fall
2 Course Units

**ANAT 5120 Human Anatomy: Cardiovascular, Respiratory, Digestive, and Musculoskeletal Systems**
This human anatomy course will cover anatomy, embryology, histology, and imaging of the cardiovascular system; respiratory system; digestive system; and musculoskeletal system, including the limbs, vertebral column, and back. This course is open to LPS Post-Baccalaureate students only. Please contact Kimberly Halscheid (battilo@upenn.edu) if you have question. Cardiovascular and Respiratory Systems. The objectives are to: 1) define and discuss the structures that participate in the process of respiration; 2) compare and contrast structures situated in the chest (thorax and mediastinum); 3) describe anatomic differences of the right versus the left lung, structures in each lung, and how each lung functions; 4) summarize the anatomic differences in the atria and ventricles of the heart and how these chambers contract, resulting in the opening and closing of the atrioventricular and semilunar valves; 5) compare and contrast the histology of the heart, bronchi, bronchioles, and lung alveoli; 6) analyze and identify anatomic structures in plain films and/or other imaging modalities; and 7) discuss the embryology of the heart and lungs, including fetal and postnatal circulation and common congenital heart malformations.

0.5 Course Units
ANAT 5130 Human Anatomy: Cardiovascular and Respiratory Systems
This 0.5 CU human anatomy course will cover anatomy, embryology, histology, and imaging of the cardiovascular and respiratory systems. The objectives are to: 1) define and discuss the structures that participate in the process of respiration; 2) compare and contrast structures situated in the opening and closing of the atroventricular and semilunar valves; 3) compare and contrast the histology of the heart, bronchi, bronchioles, and lung alveoli; 6) analyze and identify anatomic structures in plain films and/or other imaging modalities; and 7) discuss the embryology of the heart and lungs, including fetal and postnatal circulation and common congenital heart malformations. This course is open to LPS Post-Baccalaureate students only. Please contact Kimberly Halscheid (battilo@upenn.edu) if you have questions.
0.5 Course Units

ANAT 5140 Human Anatomy: Digestive System
This 0.5 CU human anatomy course will cover anatomy, embryology, histology, and imaging of the digestive system. The objectives are to: 1) define the embryological basis for the formation of the gastrointestinal tract; 2) define and discuss the anatomic structures that make up the digestive system, including the mouth, larynx, esophagus, stomach, small intestine, large intestine, liver, and biliary tract; 3) compare and contrast the arterial blood supply and the functional and histologic differences in various parts of the gastrointestinal tract; and 4) analyze and identify anatomic structures in plain films and/or other imaging modalities. This course is open to LPS Post-Baccalaureate students only. Please contact Kimberly Halscheid (battilo@upenn.edu) if you have questions.
0.5 Course Units

ANAT 5150 Human Anatomy: Musculoskeletal System
This 1.0 CU human anatomy course will cover anatomy, embryology, histology, and imaging of the musculoskeletal system, including the limbs, vertebral column, and back. The objectives are to: 1) discuss the anatomic structures that make up the major parts of the musculoskeletal system, which are the vertebral column and back, upper limbs, and lower limbs; 2) identify the blood supply, innervation, and musculature of the upper limbs, including the shoulder, elbow, wrist, and hand; 3) identify the blood supply, innervation, and musculature of the lower limbs, including the hip, knee, ankle, and foot; 4) define the components of the nervous system that affect the musculoskeletal system, limbs, vertebral column, and back and discuss nerve lesions; 5) discuss how herniated disks, fractures of the upper and lower limbs, and impingement of nerve roots can result in musculoskeletal abnormalities, and 6) analyze and identify anatomic structures in plain films and/or other imaging modalities. Please contact Kimberly Halscheid (battilo@upenn.edu) if you have questions. Students who have completed ANAT 5120 are NOT eligible for this course.
1 Course Unit

ANAT 5160 Human Anatomy: Endocrine and Reproductive Systems
This 0.5 CU human anatomy course will cover anatomy, embryology, histology, and imaging of the endocrine and reproductive systems. The objectives are to: 1) define mechanisms of hormonal signaling; 2) describe the anatomic relationships and gross structure of major endocrine and reproductive organs, including the hypothalamus, pituitary glands, thyroid gland, parathyroid glands, pancreas, adrenal glands, gonads, breasts, and male and female reproductive systems; 3) characterize the microscopic anatomy of major endocrine and reproductive organs; 5) assess the regulation of major hormonal axes and intuit pathophysiologic effects of hormonal dysregulation; 6) explain the effects of significant hormones on their respective target tissues; 7) trace the embryologic origins of the endocrine and reproductive organs, including the pharyngeal apparatus. This course is open to LPS Post-Baccalaureate students only. Please contact Kimberly Halscheid (battilo@upenn.edu) if you have questions.
0.5 Course Units

ANAT 5170 Anatomy of the Head and Neck: Cranial Nerves and Their Distribution
This 0.5 CU human anatomy course will cover anatomy, embryology, histology, and imaging of the head and neck with emphasis on the cranial nerves and their distribution. The objectives are to: 1) identify major bone and cartilage components of the neck and skull and how they develop; 2) describe sources of innervation to face, CN V and VII; 3) name cranial nerve innervations of extraocular muscles of the eyes; 4) name major elements that make up naso-, oro-, and laryngeal pharynx; 5) name the cranial nerves involved in swallowing; 6) identify the signs and symptoms of lesions of each of the cranial nerves; and 7) identify structures on CT and plain film imaging of head and neck. This course is open to LPS Post-Baccalaureate students only. Please contact Kimberly Halscheid (battilo@upenn.edu) if you have questions. This course is open to LPS Post-Baccalaureate students only. Please contact Kimberly Halscheid (battilo@upenn.edu) if you have questions.
0.5 Course Units
ANAT 5180 Brain and Spinal Cord: Longitudinal Neural Pathways
This course, covering the anatomy, development, and cytology of the central nervous system, including a detailed examination of the functional and clinical neuroanatomy of the spinal cord, prepares students to: - Compare and contrast the differences in how the neural tube and neural crest develop, and list their postnatal derivatives. - Describe the malformations that result in open versus closed neural tube defects, including the ability to distinguish the different forms of spina bifida. - List the major excitatory and inhibitory neurotransmitters used by neurons in the central and peripheral nervous system. - Compare the functions of Schwann cells and Oligodendrocytes in forming myelin and the differences in autoimmune diseases (MS and Guillain Barre) associated with each. - Recall the basic anatomy of the spinal cord including the vertebral level where the cord end and meninges end, what makes up the conus medullaris and cauda equina, and which cord segments innervate the upper and lower limbs. - Contrast the two divisions of the ANS in terms of locations of pre and post ganglionic neuron cell bodies, neurotransmitters utilized and receptors that they bind to. - Describe the names and locations of the two neurons that generate voluntary versus reflex contractions of skeletal muscle, and be able to draw and label a cord section with these neurons. - Recall the differences between the myotatic and inverse myotatic reflexes. - Describe how these two sensory systems utilize three neurons to process sensory information. - Draw out the three neurons that are components of the DC/ML System and label the modalities of their dorsal roots, their course and sites of termination. - Draw out the three neurons that are components of the Anterolateral System and label the modalities of their dorsal roots, their course and sites of termination. - Summarize the major signs and symptoms of the 7 common spinal cord diseases and clinical conditions including Polio, Tabes dorsalis, ALS, Subacute Combined Degeneration, Syringomyelia, Anterior cord syndrome, Brown Sequard Syndrome
1 Course Unit

ANAT 5190 Brain and Spinal Cord: Motor and Sensory Functional Systems
This course, covering the anatomy of the central nervous system, including a detailed examination of the functional and clinical neuroanatomy of the brainstem, cerebellum, diencephalon, visual system, auditory system and cerebral cortex, prepares students to: - Describe the brainstem connectional anatomy that permits the right side of the cerebellum to promote fine-tuning of skeletal muscles on the right side of the body. - Recall how cerebellar lesions cause tremor with movement and how hemisphere lesions of the cerebellum differ from vermis lesions. - Identify which lesions result in dysmetria, disdiadochokinesis, and gait ataxia. - Describe the major components of the Direct and Indirect Basal Ganglia Pathways, the neurotransmitters that they use and their roles in initiating movement or suppressing unwanted movement. - Contrast the signs and symptoms of those with a direct (Parkinson's) and indirect (Huntington's) basal ganglia disease and how each causes different forms of resting tremors. - Name the 4 major tracts that traverse the brainstem and the signs and symptoms if each is lesioned. - Discuss how motor and sensory nuclei of brainstem cranial nerves are organized into functional longitudinal columns in the brainstem and note how this organization correlates with the entry and exit points of cranial nerves. - Distinguish the gaze malfunctions that result from lesions to the Frontal Eye Field, PPRF, and MLF. - Trace the path of a visual stimulus from the nasal and temporal parts of the retina to the cuneus and temporal gyrus of visual cortex. - Draw out the different visual field deficits and the causes evident in lesions to the optic nerve, optic chiasm, optic tract, optic radiations and visual cortex. - Describe the three components of the ear and how the organ of Corti transduces mechanical energy into generator potentials. - Distinguish between the lesion sites and causes of a sensorineural versus a conductive hearing loss and how one uses the Weber and Rinne tests to determine the nature of the hearing loss. - Differentiate the major nuclei of the thalamus and their functions. - Describe the different embryonic origins of the pituitary and the nuclei in the hypothalamus that control or contribute to the functional activity of each pituitary component. - Name the lobes that make up the cortex and distinguish the vascular territories of the anterior, middle and posterior cerebral arteries. - Describe how the dominant hemisphere differs functionally from the non dominant hemisphere. - List four different lesion sites in the dominant hemisphere that result in an aphasia and list the signs and symptoms of that aphasia. -
1 Course Unit

Ancient History (ANCH)

ANCH 0020 Travel and Ethnography
In this class we will read a broad selection of travel narratives, from Herodotus to Ibn Battuta and from the Jesuit Relations describing New France up to the 20th century writers such as Lawrence Durrell, Robyn Davidson and Rory Stewart. Our focus will be on exploring how travel and travel writing create exotic cultures. The journey also becomes a discovery of self by an encounter with the Other. In the process, entire worlds of wonder open up for the viewer. How material is selected for recording reflects the priorities, anxieties and worldview of the writer, reflecting travel's ability to focus our attention and stimulate thoughtful reflection.

ANCH 0100 Introduction to the Ancient Near East
The great pyramids and mysterious mummies of Egypt, the fabled Tower of Babel, and the laws of the Babylonian king Hammurabi are some of the things that might come to mind when you think of the ancient Near East. Yet these are only a very few of the many fascinating — and at time perplexing — aspects of civilizations that flourished there c. 3300-300 BCE. This is where writing first developed, where people thought that the gods wrote down what would happen in the future on the lungs and livers of sacrificed sheep, and where people knew how to determine the length of hypotenuse a thousand years before the Greek Pythagoras was born. During this course, we will learn more about these other matters and discover their place in the cultures and civilizations of that area. This is an interdisciplinary survey of the history, society and culture of the ancient Near East, in particular Egypt and Mesopotamia, utilizing extensive readings from ancient texts in translation (including the Epic of Gilgamesh, "one of the great masterpieces of world literature"), but also making use of archaeological and art historical materials. The goal of the course is to gain an appreciation of the various societies of the time, to understand some of their great achievements, to become acquainted with some of the fascinating individuals of the time (such as Hatshepsut, "the women pharaoh," and Akhenaten, "the heretic king"), and to appreciate the rich heritage that they have left us.

1 Course Unit

ANCH 0101 Ancient Greece
The Greeks enjoy a special place in the construction of western culture and identity, and yet many of us have only the vaguest notion of what their culture was like. A few Greek myths at bedtime when we are kids, maybe a Greek tragedy like Sophokles' Oidipous when we are at school: these are often the only contact we have with the world of the ancient Mediterranean. The story of the Greeks, however, deserves a wider and more intimate audience, because so much of what we esteem in our own culture derives from them: democracy, epic poetry, lyric poetry, tragedy, history writing, philosophy, aesthetic taste, all of these and many other features of cultural life enter the West from Greece. The oracle of Apollo at Delphi had inscribed over the temple, "Know Thyself." For us, that also means knowing the Greeks. We will cover the period from the Late Bronze Age, c. 1500 BC, down to the time of Alexander the Great, concentrating on the two hundred year interval from 600-400 BC.

Fall

1 Course Unit

ANCH 0102 Ancient Rome
At its furthest extent during the second century CE, the Roman Empire was truly a "world empire", stretching from northern Britain to North Africa and Egypt, encompassing the whole of Asia Minor, and bordering the Danube in its route from the Black Forest region of Germany to the Black Sea. But in its earliest history it comprised a few small hamlets on a collection of hills adjacent to the Tiber river in central Italy. Over a period of nearly 1500 years, the Roman state transformed from a mythical Kingdom to a Republic dominated by a heterogeneous, competitive aristocracy to an Empire ruled, at least notionally, by one man. It developed complex legal and administrative structures, supported a sophisticated and highly successful military machine, and sustained elaborate systems of economic production and exchange. It was, above all, a society characterized both by a willingness to include newly conquered peoples in the project of empire, and by fundamental, deep-seated practices of social exclusion and domination. This course focuses in particular upon the history of the Roman state between the fifth century BCE and the third century CE, exploring its religious and cultural practices, political, social and economic structures. It also scrutinizes the fundamental tensions and enduring conflicts that characterized this society throughout this 800-year period.

ANCH 1100 Ancient Mediterranean Empires
What constituted an empire in antiquity and how was imperialism legitimized? Which measures were used to maintain and organize imperial power? How did foreign rule affect the daily life of people all over the Mediterranean? In this course we will discuss and compare ancient empires from Achaemenid Persia to Alexander the Great and the Hellenistic kingdoms of his successors to the emergence of Rome as one of the most influential empires in world history. Topics that will be discussed include ancient ideas and concepts of imperial rule, patterns of political, economic and cultural power and their interrelations as well as imperial crises and local resistance. All texts will be discussed in translation. There are no prerequisites.

Fall

ANCH 1102 The Decline and Fall of the Roman Empire?
The Roman Empire, teetering under the weight of its bureaucracy, oppressed by the demands of its soldiers, weakened by wave after wave of barbarian invasions, and, with the rise of Christianity, confronted by its own immorality, finally fell when the last Roman emperor, Romulus Augustulus, was sent into exile in 476 CE. That, at least, is one version of the story. In truth, there are many stories that can be told of the period between the apogee of the Roman empire in the 2nd c. AD and the rise of Christianity and Islam and origins of the so-called Barbarian Kingdoms in the 7th and 8th centuries AD. This course will explore this period of 600 years, using methodologies from history, archaeology, social science and the sciences to understand the complex problem of empire and its evolutions. No previous knowledge of ancient or medieval history required.

Also Offered As: CLST 1102
1 Course Unit
ANCH 1103 Ancient Iranian Empires
Iran - as a landmass and a political entity - was central to the ancient world in a variety of ways. Ancient Iranian Empires were of central importance to - and centrally located in - the ancient world. It was the successor kingdom to the Assyrians and Babylonians; the power against which Greece and Rome defined themselves; and the crucible in which various communities and models of rule developed. This course offers a survey of the history of the ancient Persianate world, focusing in particular on the political and imperial entities that rose to power, the cultural, political, mercantile, and other contacts they shared with their neighbors to the East and West, and the communities and religious groups that arose and flourished within their lands. Ancient Iranian empires rivaled the Greek and Roman Empires to their West, and the central and eastern Asian Empires to their east, and the ongoing history of diplomacy, cultural contact, and war between these regions was formative to each and to the ancient world as a whole. Iran was home to and similarly formative for a variety of religions, including Zoroastrianism, Judaism, Christianity, Manichaeanism, and Islam, and a central question Ancient Iranian political powers sought to address was how to negotiate and address the variety of populations under their control. The course will conclude by studying how, rather than a simplistic story of decline, the strategies, policies, institutions, and memory of the Iranian Empires continued to shape early Islam, medieval imagination, and modern political regimes.  
Also Offered As: NELC 2040, RELS 2040
1 Course Unit

ANCH 1202 The Ancient Economy
This class presents an introduction to economies before economics, a study of economic activity in the Greco-Roman world. Ancient Greece and Rome have been called some of the first "global" economies - they engaged in long-distance trade, introduced the first coinage systems, and built and manufactured at large scales. At the same time, they remained agrarian societies, with majority peasant populations, high levels of inequality and social systems that often placed social capital ahead of profit. Using textual sources, archaeology and techniques from the natural and social sciences, this class will not only look at basic elements of economic activity in the ancient world - demographics, trade, monetization, industry - but also ask critical questions about how - or if - modern economic methods can be applied to the distant past. No previous knowledge of the ancient world or economics is necessary. 
Fall or Spring

1 Course Unit

ANCH 1203 Myths and Religions of the Ancient World
This course will survey the religions of the ancient Middle East, situating each in its historical and socio-cultural context and focusing on the key issues of concern to humanity: creation, birth, the place of humans in the order of the universe, death, and destruction. The course will cover not only the better-known cultures from the area, such as Egypt and Mesopotamia, but also some lesser-known traditions, such as those of the Hittites, or of the ancient Mediterranean town of Ugarit. Religion will not be viewed merely as a separate, sealed-off element of the ancient societies, but rather as an element in various cultural contexts, for example, the relationship between religion and magic and the role of religion in politics will be recurring topics in the survey. Background readings for the lectures will be drawn not only from the modern scholarly literature, but also from the words of the ancients themselves in the form of their myths, rituals, and liturgies.

ANCH 1205 Race and Ethnicity in the Ancient World
Modern political and artistic movements often appeal to an ancient past in order to construct their own social and racial identities. But how did ancient peoples understand themselves and others? How should we understand race and ethnicity in the ancient past? And how are perceptions of the past used today to construct or dismantle structures of power? This course explores both ancient and modern representations of race and ethnicity in antiquity. We will investigate both how ancient peoples around or near the Mediterranean (e.g. Greeks, Romans, Egyptians, Persians, and Nubians) understood difference and also how modern eras have appropriated ancient identities. Our dialogues will include ancient ethnographies, literature, and visual arts as well as modern theories and media, with an emphasis on active learning and collaboration. Students will be encouraged to produce both analytical and creative responses to our materials.

ANCH 1206 Citizenship, Belonging and Exclusion in the Roman World
What did it mean to be a citizen in the Roman world? What did citizens do in order to support their claims to belong in the civic community? Conversely, what about those members of the community who were judged not to belong? What limitations acted upon them, and what were the terms of their exclusion? This course will begin by exploring practices of citizenship in the Roman Republic and Empire: voting, serving in the military, running for office, and so on. It will then examine the experiences of those who, for some reason, were excluded from one or more of these roles. Fundamentally, our question is: “To what extent was Roman society diverse and inclusive?” No prior knowledge of Roman History is required. 
Texts will be discussed in translation.

1 Course Unit

ANCH 1207 Greek Parties, Speech, and Identity
The ancient Greek symposium existed as a stylized elite drinking party from the Archaic period until the end of the Roman Empire a millennium later, inspiring many works of literature and philosophical debates. Conversation and correct behavior were key at these parties to form social bonds and indicate one’s belonging to Greek elite society while simultaneously excluding certain demographics from the group. In this course we will learn about the ancient Greek world through the institution of the symposium and will complicate our understanding of the ancient world by putting it in dialog with our modern cultural expectations. We will read from a selection of authors in translation including Plato, Plutarch, and Athenaeus, focusing on the conversational and presentational aspects of the texts. Students will also develop personalized techniques for public speaking and will practice several varieties of public speaking inspired by the symposium. This course is a CWIC Critical Speaking Seminar, in which most of the course grade will be based on oral assignments. No prior experience with the ancient world or with public speaking is required.

1 Course Unit

ANCH 3102 The Rise and Decline of Macedonia
In this course, we will study the rise and development of Macedonia from a tiny kingdom on the northern fringes of the Greek world to one of the major powers of the region and beyond. Regarded by the Greeks as an at least semi-barbarian culture on the periphery, Macedonia became the dominant power in the Greek world during the fourth century BC and its king Alexander the Great set out to conquer the world. After his death, Macedonia was one of the Hellenistic kingdoms competing for power and influence in the Mediterranean until it finally came under Roman control. Topics that will be discussed include questions of ethnicity and identity, Macedonian kingship, culture and society (including the role of women) and the role of Macedonian traditions in the Hellenistic era in general. Special emphasis will therefore be laid on critical reading and interpretation of ancient literary texts, documentary evidence and archaeological material. that will be discussed include questions of ethnicity and identity, Macedonian kingship, culture and society (including the role of women) and the role of Macedonian traditions in the Hellenistic era in general.

ANCH 3103 The Hellenistic and Roman Near East
In this course we will study the history of the Hellenistic and Roman period from a Near Eastern perspective. From the conquests of Alexander the Great to the end of Roman rule in late antiquity, this region was the scene of conflicts, but also of peaceful and fruitful interactions between Greeks, Romans, Egyptians, Jews, Syrians, Arabs and many other societies. What was the impact of Greek and Roman rule and how did the peoples of the region react to these fundamental changes? On the other hand, how did they influence the culture and worldview of their conquerors? We will use historical texts, documents and archaeological evidence to discuss these political, cultural and religious encounters that made the Near East to a key region of Greco-Roman history. All texts will be discussed in translation. No prerequisites, although it would be useful to have some background in Hellenistic and/or Roman history.
Also Offered As: CLST 3103, NELC 3060
1 Course Unit

ANCH 3104 Greek World After Alexander the Great
This class is designed as a detailed investigation of the world created by Alexander the Great. We will cover the three hundred year period known as the Hellenistic Age from the career of Alexander the Great (354-323 BC) until the defeat of Antony and Cleopatra at the Battle of Actium (31 BC). This was a period during which the world of the Greeks underwent extraordinary and far-reaching changes, as Greek culture was established as far afield as northwestern India, central Asia and Egypt. In the same period kingdoms controlled by Alexanders's Successors used Greek culture to define their rule, establishing a Greek culture of the elite in regions which previously had been dominated by the Persians. As Greek and non-Greek worlds collided, a new interpretation of Greek culture emerged, giving rise, among other things, to universities and professional schools, state subsidized health care, triumphalist architecture, the heroization of the noble savage, coinage with royal portraits, the deification of men and a multitude of other social, artistic and political forms familiar to us. It was an age of radical change, dislocation, as Greek populations colonized regions previously unknown to them.

ANCH 3201 Disasters in the Ancient Mediterranean World
Natural disasters occupy a powerful place in our imagination. Stories of floods, plagues, earthquakes and storms excite and horrify us, and communities mobilize their resources quickly in response to these events. In the ancient Mediterranean world, natural disasters could take on potent meaning, indicating the anger or disfavor of the gods, acting as warnings against certain courses of action, or confirmations of individuals' fears or suspicions about the world in which they lived. In this course, we will explore the evidence for some disasters in the ancient Mediterranean world, the ways in which contemporaries reacted to those disasters and interpreted their causes. This project is, of necessity, multidisciplinary, involving textual, archaeological, geological, and comparative materials and drawing on methodologies from history, political and archaeological science, and the emerging field of disaster studies. In the process, we will gain an appreciation of the social structures of communities in the period, the thought-world in which they operated, and the challenges and opportunities that attend a project of this sort. No prior knowledge of Ancient History is required, although it would be useful to have taken an introductory survey course such as ANCH 0100, ANCH 0101, or ANCH 0102. Texts will be discussed in translation.

ANCH 3203 Power and Peril: The Paradox of Monarchy among Ancient Greeks, Romans, and Jews
We imagine ancient Greece and Rome as the cradles of democracy and republicanism, early Judea as a pious theocracy, but monarchy was the most common and prevalent form of government in antiquity (and the premodern world in general). In this class, we will take a special look at kinship among the Jews, Greeks, and Romans to assess and discuss similarities, differences, and mutual influences. In all these cultures, the king was a polarizing figure in reality and in conception. On the one hand, some revered the monarch as ideal leader, and monarchy provided the language with which to describe and even imagine the very gods. On the other, monarchs were widely reviled in both theory and practice, from the Greek tyrants to biblical Saul. The Emperor Augustus loudly denied his own affinity to the office of king, even as he ruled alone and was revered as a god. In other words, kings stood both for the ideal and the worst form of government. This class confronts the paradox of monarchical rule and will, through the lens of the king, explore ideas of god, government, human frailty, and utopianism.

ANCH 3204 Lies My Ancient History Teacher Told Me
The neat, comforting narratives that we construct of the histories of ancient Greece and Rome cover up a collection of controversies and debates that continue to rage in contemporary scholarship. Can we use the Homeric epics as sources of early Greek history? Who was responsible for the Peloponnesian War? How can we best explain Rome’s acquisition of empire? How new was the political revolution of Augustus? What were the main reasons for the rise of Christianity? In this course, we will explore these and other controversies, focusing on both modern scholarship and the ancient sources. All texts will be discussed in translation. No prior knowledge of Ancient History is required, although it would be useful to have taken ANCH 0101 and/or ANCH 0102.

ANCH 3206 Jewish Diaspora in the Roman Empire
Under the Roman Empire, Jewish communities developed and flourished especially in the cities of the Eastern Mediterranean, in Egypt, Syria, Asia Minor, Greece, Northern Africa, and Italy proper. In many of these cities, the Jews formed a considerable part of the population; they influenced the cultural, social, and political communal life and developed an identity that was distinctively different from that in Judea. In this seminar, we will trace Jewish life in the Diaspora under Roman rule. How did Jews and non-Jews interact? What was the legal status of Jewish communities under the Roman Empire? What caused conflicts and how were they solved? What can the history of Jewish Diaspora communities tell us about minorities in the Roman Empire in general? We will use literary texts, inscriptions, papyri, and archaeological material to answer these questions and many more.
Also Offered As: CLST 3206, JWST 3206
1 Course Unit
ANCH 3207 Cleopatra
Cleopatra VII (70/69 30 BCE) is one of the most famous women in world history. She has been remembered, admired, and reproached as a power-hungry Hellenistic queen, as the last pharaoh of Egypt, as a self-confident female ruler, and as the vicious seductress of Julius Caesar and Mark Antony. Her supposedly extravagant lifestyle, her political schemes, but also her integrity in choosing suicide over submission have inspired poets, artists, and historians from her own time to the modern world. In this seminar, we will take a closer look at some of the common perceptions and stereotypes that have shaped the image of Cleopatra for more than 2000 years. The main focus, however, will be on the historical queen, her biography, and the political and cultural contexts of her life. We will use ancient literary texts, papyri, inscriptions, coins, and archaeological evidence to analyze Cleopatra’s rise to power, how she presented herself to her subjects, and how she was perceived by others, as well as her role in the tumultuous events that led to the end of the Hellenistic period and the rise of imperial Rome under the rule of Augustus. No prerequisites, but some background in Hellenistic and/or Roman history will be helpful.

1 Course Unit

ANCH 3209 Foreigners in Rome
According to the stories the Romans told about the origins of their city, Rome began as a community of immigrants. As a growing metropolis and, eventually, the center of an empire, the city remained a magnet for people from other parts of the Empire and beyond. Foreigners came to the city as merchants and travelers, they settled here seeking a different and better life, pursuing a career, or escaping hardships in their home communities. Others were brought to Rome against their will, as prisoners or slaves. In this seminar, we will explore the different communities of foreigners and immigrants that shaped Rome. How and why did they move to the city? How did they experience their new home? How did they adapt to life in Rome and how, in turn, did they influence what we define as “Roman” today? Finally, what can the legal, social, political, and social status of immigrants tell us about Roman society in general? To answer these questions (and more), we will look at a wide array of primary sources, including literary texts, inscriptions, and material culture.

1 Course Unit

ANCH 3210 Classicism in the Black Atlantic, 1776-1968
During the eighteenth century, Britain, France, and the other imperial powers embraced the classical aesthetic to broadcast their genealogical connections with ancient Greece and Rome. As they expanded across the Atlantic, they brought with them an aesthetic of white marble, symmetry, restraint, and cultivated ‘taste’ that served to aestheticize the dependence of the imperial system on enslaved labor. This course explores how freed slaves and their descendants negotiated with the ideology of classicism during the long battle for civil rights in the Atlantic world. Beginning with the work of Phillis Wheatley, Olaudah Equiano, Ignatius Sancho, and Ottobah Cugoano, we will investigate how participants in the world of what Paul Gilroy called “the Black Atlantic” embraced, questioned, or rejected the classical aesthetic up to the final collapse of the colonial system in the late 1960s. Along the way, we will ask important questions including: who ‘owns’ ancient Greece and Rome? Can an aesthetic be inherently political? And was the Black classicism of the 18th-20th centuries effective in fulfilling an agenda of liberation?

ANCH 3202 Writing History in Greece and Rome
What constituted history in ancient Greece and Rome? What claims to knowledge did history make, and how did these differ from other forms of knowledge? How did historians envision their task, and how did they go about performing it? We will read the works of the major Greek and Roman historians in translation in an attempt to answer those questions. Other issues to consider include the origins and development of historical writing, the place of history within the ancient literary tradition, and the similarities and differences between the ancient and modern practice of history.

ANCH 5800 MLA Proseminar: Ancient Economies
This class presents an introduction to economies before economics, a study of economic activity in the Greco-Roman world. Ancient Greece and Rome have been called some of the first “global” economies - they engaged in long-distance trade, introduced the first coinage systems, and built and manufactured at large scales. At the same time, they remained agrarian societies, with majority peasant populations, high levels of inequality and social systems that often placed social capital ahead of profit. Using textual sources, archaeology and techniques from the natural and social sciences, this class will not only look at basic elements of economic activity in the ancient world - demographics, trade, monetization, industry - but also ask critical questions about how - or if - modern economic methods can be applied to the distant past. No previous knowledge of the ancient world or economics is necessary.

ANCH 6080 Worlds of Late Antiquity
The period between the third and eighth centuries - from the Tetrarchy led by Diocletian to the rise of Umayyad Caliphate - is characteristically regarded as a period of ferment and change, whether that be on the still-influential model of Decline and Fall first proposed by Edward Gibbon in the eighteenth century or the somewhat less deterministic account of transformation favored by Peter Brown in the late twentieth. These narratives tend to emphasize the large-scale processes that played out over these centuries, such as the florescence and fragmentation of two world empires; the emergence of two highly influential monotheistic religions of the book; and the codification of legal systems that continue to dominate contemporary practices and theories of law. Equally, what characterizes these centuries is the particular granularity and character of the textual and archaeological evidence that exists for the functioning of this world at the micro-scale, as against the periods that preceded and followed. This course traces the social, economic, cultural, and religious institutions and processes that make this period distinctive, explores the nature of the evidence for those institutions and processes, and exposes to scrutiny the assumptions and preconceptions that underpin the scholarly narratives that have been constructed about them.

ANCH 6101 Problems in Greek History
This course will explore some of the pressing and problematic scholarly debates in the historiography of the Greek archaic and classical periods.
Not Offered Every Year
1 Course Unit

ANCH 6102 Problems in Hellenistic History
This course will explore seminal trends and debates that have shaped modern inquiries in the period between the campaigns of Alexander and the Battle of Actium. The purpose of the seminar is to gain familiarity with the field of Hellenistic studies broadly defined as well as specific approaches. Special emphasis will be laid on the debate of whether terms such as "Hellenism" or "Hellenization" adequately describe the complex political, social, and cultural dynamics of the period and the new frameworks of interaction, confluence, and power structures that shaped it.

ANCH 7203 Ancient Economies
Scholars have long debated the nature of the ancient economy, the terms in which it can best be approached, and the decision-making processes that underpinned economic behavior in antiquity. In particular, controversy has surrounded the extent to which the economies of Greco-Roman antiquity can be modeled using contemporary tools of analysis. In recent scholarship, many of the tenets laid down by Moses Finley in his The Ancient Economy have been re-evaluated, with the result that the field is currently in a state of intellectual ferment. It is the purpose of this course to explore the terms in which contemporary debates over ancient economic systems are formulated, with reference to a variety of societies and periods, from the palace economies of the Mycenaean period to the system of taxation introduced in the early fourth century by the emperor Diocletian and his colleagues in the Tetrarchy.

ANCH 7204 Provincial Perspectives
Most of the primary sources available to us are commonly taken to reflect the ideology, concepts, and realities of Roman imperial rule through the lenses of the central power. However, a number of sources provide insights into how provincials and imperial subjects perceived the empire and their own status within its political, cultural, and social frameworks. In this seminar, we will focus on how ethnic, religious, cultural, and regional identities were developed, maintained, adapted, and interpreted within and in reaction to the empire in concept and reality. Historiographical and auto-ethnographic works, orations, philosophical, and religious texts reflect different attitudes towards the imperial center, ranging from open hostility and frustrated acceptance to praise and identification. Texts to be discussed include canonical works (Polybius, Dionysius of Halicarnassus, Second Sophistic) as well as lesser-known texts and authors. Special emphasis will be laid on scholarly approaches, including concepts of identity, hybridization and cultural change, the dynamics of imperial integration, and the (de-)construction of modern narratives of Romanization.

ANCH 7205 Greek Sanctuaries
Sanctuaries remain an important focal point for the study of Greek religion. Both as sites for worship, dedication, oracular activity and other cult activity and as sites for the mediation of elite and state competition sanctuaries are, along with the polis, the most essential structuring institutions of Greek life. This seminar takes a selection of larger and smaller extra-urban sanctuaries and examines their growth, articulation and function.

1 Course Unit
ANCH 7208 Biographical Approaches to Antiquity
Biographical approaches, long used and despised as a genre reducing history to the actions of a few protagonists, have gained prominence again in recent scholarship. Instead of focusing the historical analysis on the usual suspects (from emperors to canonical authors), more recent applications of biographical approaches have deliberately decentered the narrative, employed the perspective of those whose position has been marginalized, and revealed influences and patterns that otherwise would remain unnoticed. This course will explore the potential, variations, and pitfalls of approaches that focus on individuals, from biographies that follow a traditional format yet have shaped the field of ancient studies to microhistory and prosopographical studies. Using examples from the late Hellenistic to the High Imperial Period, we will discuss methodologies to reconstruct an individual life despite the general scarcity of sources, how such an approach can transform our understanding of the respective cultural, political, and social circumstances, and what insights into the broader historical processes such a focus offers or obscures. Graduate-level Latin and Greek required as pre-requisite for course.

ANCH 7209 Fragmentary Historians
This is research seminar in which students will be expected to prepare translations of and commentaries on a wide range of lesser-known and fragmentary historians of the Hellenistic and Imperial periods, ranging from Duris of Samos to Dexippos of Athens. Students will use the model of Jacoby's Die Fragmente der Griechischen Historiker for the presentation of their work and will report on the major genres of later Greek historiography: ethnography, regional history, universal history, genealogy and horography. The semester will consist of three units. In the first part, the emphasis will be on acquiring familiarity with and confidence in working with Jacoby's brilliant but idiosyncratic masterwork. Students will be assigned short entries from FGrH in order to practice translation, writing commentaries and mastering the format of the genre. In addition, students will be reading a wide range of contemporary historians on the general subject of Greek historiography and will be expected to acquire a broad grasp of the development of Greek history writing in the Hellenistic and Imperial periods. Topics to be discussed will include the development of Universal histories, geographic and perihegetic literature, local histories, genealogy, mythography and Greek writing by non-Greeks. In the second unit we will work on longer entries in Jacoby. Each student will have responsibility for an historian for whom we have approximately 20-30 pages of testimonia and fragments. Each week each student will present a portion of the overall FGrH entry and will receive comments and help from the other seminar participants. Students will be free to choose which historian they wish to work on and will be encouraged to find authors whose interests intersect with the students' proposed course of research. In the third unit the entire seminar will work collaboratively on a single, lengthy entry in Brill's New Jacoby. Each student will be assigned a portion of the text and commentary and will produce a segment of approximately eight pages of translation and commentary.

ANCH 7310 Ancient Greek Colonies
This seminar examines the archaeology of Greek colonization from the Late Bronze Age to ca. 500 B.C. These colonies were highly diverse in their motivations, physical settings, and political and social structures, as well as in their relationships with mother cities and the new worlds they inhabited. Emphasis is placed on the colonial experience as a cross-cultural and negotiated process; several streams of the changing theoretical and conceptual approaches to Greek colonization are explored. In addition to archaeological and epigraphic evidence, literary and historical traditions are examined. Colonies from the southern Balkan peninsula, Black Sea, Ionia, northern Africa, and Magna Graecia will be the focus of reading and reports. Seminar meetings will consist of oral reports and discussion of these reports and other topics. Depending on the number of participants, each person will be responsible for two or three reports of approximately 30-45 minutes length. Accompanying the oral report will be a PowerPoint document (in most cases), a synopsis/summary of one to two pages, and a bibliography. These will all be posted on the course Canvas site. No later than one week before an oral presentation, the presenter will identify one or two key readings for all to read, in consultation with the instructor. These will be posted, in PDF format, on the Canvas site. One or more visits to the Penn Museum may be built into the course.

ANCH 7403 Borderlines: Art and Artifact in the Roman Empire
What made art and artifacts 'Roman', or not, in a Roman world? 'Roman provincial art' is an active scholarly category. This seminar reframes it, to test productive models to understand visual culture outside the empire's Italian heartland from the Late Republic into Late Antiquity, in the Roman polity's interactions with many peoples in situations of diaspora, colonization, hegemony, conflict, economic exchange, and religious interaction. As 'Rome' expanded, cultural relations across many borderlines - social, ethnic, territorial - potentially became cultural politics. A traditional topic for that has been Roman interaction with Greek culture. This seminar extends that range, while tackling 'Hellenization', as we reflect on models of 'Romanization', globalization and identity formation within the Empire's boundaries in its provinces and client kingdoms, and also at its frontier zones. Various disciplines apply: art history, archaeology, history, and more. Case studies, evolved with students, may range from Britain to Iran, northern Africa to the Black Sea in space and, in time, from interactions with the Hellenistic East and West and with Iron Age Europe, to the age of Germanic, Sasanian and Umayyad conquests of Roman terrain, ca 3rd c. CE. The market in art and artifact, the nature and status of makers, and conditions of patronage and viewing are key considerations. Private and public objects, images, architecture and urbanism, and landscapes can all concern us, as we try out disciplinary approaches that take in eg cultural appropriation, translation and hybridity, creolization, discrepant experience, object agency, and communities of taste and style. 'Ethnicity' is a loaded concept in ancient Mediterranean studies, as is 'race,' our course must engage those, and the ways in which things and styles have been made to serve those terms. And who owns, is heir to, the cultural legacies we look at, and how to name them, are problems that tangle with current national identity formation, and academic and museum practice. Our own Museum's holdings can make topics. Students are welcome to bring in interests in language and text cultures, in disciplines outside art history and archaeology, and in other world cultures and epochs.

**ANEL 7200 The Land of Sumer: Writing, Language, and Culture**
This self-contained course sets the Sumerian language, writing system and use of writing in their social and historical context. The aim is to provide students of ancient history and culture from diverse disciplines with a good grounding in Sumerian culture, familiarity with the Sumerian language and cuneiform writing system and the requisite knowledge for critical assessment of published translations and of the secondary literature. The course is organized as two threads, culture on the one hand and language on the other. The two threads are united by taking examples in the language exercises, vocabulary assignments, etc., as far as possible from the domain of the week’s cultural topics. The net effect is to examine the culture both through contemporary secondary literature and through direct contact with elementary primary texts of relevance to the various topics of discussion. The language component of the course will be carried out in a combination of transliteration and cuneiform, with an expectation that all students will gain familiarity with at least the core 80 syllabic signs, and about 100 additional logographic signs.

**Anthropology (ANTH)**

**ANTH 0002 The City in South Asia**
This interdisciplinary social science course examines key topics, themes, and analytic methods in the study of South Asia by focusing on significant South Asian cities. With one-fifth of the world’s population, South Asia and its urban centers are playing an increasingly important role in recent global economic transformations, resulting in fundamental changes within both the subcontinent and the larger world. Drawing primarily on ethnographic studies of South Asia in the context of rapid historical change, the course also incorporates research drawn from urban studies, architecture, political science, and history, as well as fiction and film. Topics include globalization and new economic dynamics in South Asia; the formation of a new urban middle class; consumption and consumer culture; urban political formations, democratic institutions, and practices; criminality & the underworld; population growth, changes in the built environment, and demographic shifts; everyday life in South Asia and ethnic, cultural, and linguistic identities, differences, and violence in South Asia's urban environments. This is an introductory level course appropriate for students with no background in South Asia or for those seeking to better understand South Asia's urban environments in the context of recent globalization and rapid historical changes. No prerequisites. Fulfills College sector requirement in Society and foundational approach in Cross-Cultural Analysis.

ANTH 0020 Anthropology, Race, and the Making of the Modern World
Anthropology as a field is the study of human beings - past, present, and future. It asks questions about what it means to be human, and whether there are universal aspects to human existence. What do we share and how do we differ? What is "natural" and what is "cultural"? What is the relationship between the past and the present? This course is designed to investigate the ways anthropology, as a discipline, emerged in conjunction with European (and later, American) imperialism, the trans-Atlantic slave trade, and the will to know and categorize difference across the world. We will probe the relationships between anthropology and modern race-making by investigating how anthropologists have studied key institutions and systems that structure human life: family and kinship, inequality and hierarchy, race and ethnicity, ritual and symbolic systems, gender and sexuality, reciprocity and exchange, and globalization and social change. The course fundamentally probes how the material and ideological constellations of any given moment shape the questions we ask and the knowledge we produce about human
Fall
1 Course Unit

ANTH 0030 Human Origins, Evolution and Diversity
How did humans evolve? When did humans start to walk on two legs? How are humans related to non-human primates? This course focuses on the scientific study of human evolution describing the emergence, development, and diversification of our species, Homo sapiens. As a starting point, we discuss the conceptual framework of evolutionary theory as well as basic genetics and heredity as they relate to human morphological, physiological, and genetic variation. We then examine what studies of nonhuman primates (monkeys and apes) can reveal about our own evolutionary past, reviewing the behavioral and ecological diversity seen among living primates. We conclude the course examining the "hard" evidence of human evolution - the fossil and material culture record of human history from our earliest primate ancestors to the emergence of modern Homo sapiens - and also explore the new insights into modern human origins and dispersal provided by genetic studies. We will further examine the nature of human biological variation and discuss the history of scientific racism in physical anthropology. As part of this course, you will have the opportunity, during recitations, to conduct hands-on exercises collecting and analyzing behavioral, morphological, and genetic data on both humans and nonhuman primates and work with the Department of Anthropology's extensive collection of fossil casts.

1 Course Unit

ANTH 0040 The Modern World and Its Cultural Background
An introduction to the diversity of cultures in the world. This course is divided into two parts. The first briefly examines different models of understanding human diversity: ethnicities, religions, languages, political forms, economic structures, cultures, and "civilizations". Students will learn to think about the world as an interconnected whole, and know the significance of culture on a global scale. The second part is an introduction to area studies, in which we undertake a survey of the different regions of the world. We conduct the survey paying attention to the different aspects of human diversities, which we examine in the first part of this course. Students will acquire a greater appreciation and understanding of cultural differences in the more comprehensive social context.
Spring
1 Course Unit

ANTH 0050 Great Transformations
This course explores the history and archaeology of the last 20,000 years from the development of agriculture to the industrial revolution. Why did people across the world abandon foraging for farming? How and why did cities and states develop? Why did societies succeed or fail? How have humans transformed themselves and the natural world, including the landscape and the climate? We will explore the methods that archaeologists use to consider these questions and analyze evidence for social and economic change from the Middle East, the Americas, Asia, Africa, Australia and Europe. In addition, students will have a chance to conduct hands-on exercises with artifacts from the Penn Museum during practicums.
Spring
1 Course Unit

ANTH 0058 Doing Research: First-Year Seminar
This interdisciplinary course introduces students to qualitative research methods and frameworks in the social sciences and humanities. The goals of the semester will be for each student to develop their own research proposal for a specific project that they could imagine pursuing over the summer or later in their undergraduate career, and to develop a web-based exhibit of one Penn-based research collection of interest. Students will be introduced to a range of textual, archival and media collections and databases available at Penn, with particular attention to South Asia and other specific regions of interest to course participants. The class will visit the Penn Museum object collections and archives, the Art library, the Kislak Center for Rare Books and Manuscripts, Film Archives, and other special collections on campus, and meet with a representative from the Center for Undergraduate Research Funding (CURF). Students will learn how to frame an effective research question, situate it in relation to existing research, select the most appropriate methods for addressing the question, and develop an effective research plan. Each week students will be introduced to a new set of frameworks for analysis, see specific examples of their application drawn from anthropological, historical, and related scholarship and have opportunities to practice applying and evaluating the strengths and weaknesses of specific methodological tools. Students will also have the opportunity to identify sources of funding for summer research projects and prepare applications for these opportunities as part of the course. The course is ideal as an introduction to both the excellent libraries and research collections housed at Penn, and to a wide range of intellectual frameworks for engaging with these collections - a great way to kick off your undergraduate experience at Penn!

1 Course Unit
Sugar and Spices. Tea and Coffee. Opium and Cocaine. Hop aboard the Indian Ocean dhows, Chinese junks, Dutch schooners, and British and American clipper ships that made possible the rise of global capitalism, new colonial relationships, and the intensified forms of cultural change. How have the desires to possess and consume particular commodities shaped cultures and the course of modern history? This class introduces students to the cultural history of the modern world through an interdisciplinary analysis of connections between East and West, South and North. Following the circulation of commodities and the development of modern capitalism, the course examines the impact of global exchange on interactions and relationships between regions, nations, cultures, and peoples and the influences on cultural practices and meanings. The role of slavery and labor migrations, colonial and imperial relations, and struggles for economic and political independence are also considered. From the role of spices in the formation of European joint stock companies circa 1600 to the contemporary cocaine trade, the course's use of both original primary sources and secondary readings written by historians and anthropologists will enable particular attention to the ways that global trade has impacted social, cultural, and political formations and practices throughout the world.

ANTH 0103 Origin and Culture of Cities
The UN estimates that 2.9 of the world’s 6.1 billion people live in cities and that this percentage is rapidly increasing in many parts of the world. This course examines urban life and urban problems by providing anthropological perspectives on this distinctive form of human association and land use. First we will examine the "origin" of cities, focusing on several of the places where cities first developed, including Mesopotamia and the Valley of Mexico. We will then investigate the internal structure of non-industrial cities by looking at case studies from around the world and from connections between the cities of the past and the city in which we live and work today.
Fall
Also Offered As: NELC 0003, URBS 0003
1 Course Unit

ANTH 0105 Ancient Civilizations of the World
This course explores the archaeology (material culture) of early complex societies or civilizations in Egypt, Mesopotamia, and the Aegean. According to the traditional paradigm, civilization first emerged during the fourth millennium BCE in Egypt and Mesopotamia. In the Mediterranean, state-level societies first appeared in Crete and mainland Greece in the early second millennium BCE. This course investigates how and why these civilizations developed, as well as their appearance and structure in the early historic (or literate) phases of their existence. A comparative perspective will illustrate what these early civilizations have in common and the ways in which they are unique. This course will consist largely of lectures which will outline classic archaeological and anthropological theories on state formation, before turning to examine the available archaeological (and textual) data on emerging complexity in Egypt, Mesopotamia, and the Aegean. This course does not presuppose any knowledge of archaeology or ancient languages; the instructor will provide any background necessary. Because this is a course on material culture, some of the class periods will be spent at the Penn Museum of Archaeology and Anthropology. These will consist of a guided tour of a relevant gallery, as well as a hands-on object-based lab with archaeological materials selected by the instructor.
Spring, odd numbered years only

1 Course Unit

ANTH 0111 Archaeology & The Bible
Archaeology and the Bible is a chronological survey of the long span of human occupation in the land of the Bible, known by the names of the modern nation-states and political entities that occupy the area, as well as various short hands such as Levant and Syria-Palestine, from ca. 10,000 BCE, when humans first began to farm and herd animals through the time of the Divided Monarchy of Israel and Judah. While archaeology has moved beyond a primary concern with illuminating the Bible, NELC 155 will investigate the broader import of archaeological discoveries for our understanding of ancient Israel and its neighbors.

ANTH 0120 Globalization And Its Historical Significance
This course sets the current state of globalization in historical perspective. It applies the concepts of anthropology, history, political economy and sociology to the study of globalization. We focus on a series of questions not only about what is happening, but about the growing awareness of it and the consequences of this increasing awareness. In answering these questions we draw on a variety of case studies, from historical examples of early globalization (e.g. The Atlantic and Indian Ocean Worlds, global flows of conspicuous commodities such as sugar, coffee, and tea, the rise and transformations of early capitalism), to issues facing our current globalized world (e.g. mass-mediatization and multilingualism, border regimes and international migration, planetary urbanization). The body of the course deals with particular dimensions of globalization, reviewing both the early and recent history of each. The overall approach is historical and comparative, setting globalization on the larger stage of the economic, political and cultural development of various parts of the modern world. The course is taught by anthropologists who draw from economic, linguistic, sociocultural, archaeological, and historical perspectives, offering the opportunity to compare and contrast distinct disciplinary approaches. It seeks to develop a general social-science-based theoretical understanding of the various historical dimensions of globalization: economic, political, social and cultural.

ANTH 0184 Food and Culture
This course is designed to survey the complex ways that food and food-related activities are woven into human behavior. We will examine foodways from an anthropological perspective by examining the biological, cultural, and historic contexts of our food production, preparation, presentation, and consumption. We will consider aspects of "food and culture" at several critical junctions of human history and address contemporary issues related to food, health, identity, and society.
Spring, even numbered years only
1 Course Unit

ANTH 0330 Language, Society, and the Human Experience
Anthropology is the study of what it means to be human across space and time. In this introductory course, we explore how language is at the heart of what it means to be human, examining the constituting role of language in the human experience in societies across the globe. We address a number of questions: How is being a speaker being a member of a society? How do ways of speaking about the world shape ways of experiencing the world? What is linguistic diversity and why is it important? How does one's identity emerge through one's way of speaking? How are large-scale forces like globalization shaping languages and fashions of speaking around the world? Throughout, we explore how language reflects and shapes the ways in which human beings navigate the flux of everyday life.

ANTH 0630 Behind the Iron Curtain
This first-year seminar provides an introduction to the histories, cultures, and societies of Central and Eastern Europe, including Poland, the Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Albania, and the successor states of Yugoslavia. Through a selection of articles and essays written by anthropologists and sociologists and based on their extended fieldwork in the region, students will explore both the ethnographic method and the experience of everyday life during and after the communist era. Topics will include: popular music under socialism, food and wine, environmental concerns, the status of Muslim minorities, socialist aesthetics, public memory and cultures of commemoration, privatization, advertising, women's rights, gender and sexuality, emergent nationalisms, and the rise of income inequality and homelessness. All readings and assignments in English.

ANTH 0905 Water in the Middle East Throughout History
Water scarcity is one of most important problems facing much of the Middle East and North Africa today. These are arid regions, but human and natural systems have interacted to determine relative water scarcity and abundance at different times and places. This course examines the distribution of water resources throughout the Middle East and the archaeology and anthropology of water exploitation and management over the last 9000 years, looking at continuities and changes through time. Students will learn to make basic digital maps representing Middle Eastern hydro-geography and arguments about modern and historic water resources in the region. The class will cooperatively play an "irrigation management game" designed to familiarize personnel involved in the operation of irrigation schemes with the logistical and social issues involved in water management. We will engage with a variety of media, including academic readings, popular journalism, films, satellite imagery, and digital maps, in our quest to explore whether or not the past can inform present efforts to better manage modern water resources.
The course is structured in units focused on each of the major hydro-environmental zones of the Middle East: the river valleys of Mesopotamia, Egypt, and the Levant, the internal basins of western Central Asia and the Levant, the deserts of Arabia and North Africa, highland zones in Yemen and Iran, and coastal marsh areas along the Persian Gulf. We will examine irrigation systems, water supply systems, and ways of life surrounding water sources known from ethnographic studies, history, and archaeological excavations. These data will allow us to engage with debates in Middle Eastern anthropology, including those concerning the relationship between water and political power, the environment in which the world’s earliest cities arose, and the relevance of “lessons of the past” for present and potential future water crises and “water wars.” In our final weeks, we will discuss archaeology and historical anthropology’s contribution to conceptions of water “sustainability” and examine attempts to revive traditional/ancient technologies and attitudes about water.

1 Course Unit
ANTH 0930 Latinx Environmental Justice
This course explores the involvement of the Latinx environmental justice movement since the 1960s. It addresses theories and concepts of environmental racism and environmental justice, underscoring how Latinx have challenged, expanded, and contributed to the environmental justice discourse. In this course, students will explore national case studies of environmental and racial injustice as they bear on Latinx communities both in rural areas and in urban barrios throughout the United States. The course will analyze these case studies through the lens of Latinx artistic and literary texts (essays, paintings, short stories, documentaries, and short films) as they provide a unique historic and multicultural perspective of the Latinx experience with environmental injustice and of how Latinxs imagine alternative transitions and responses to environmental marginalization. In addition, the works of Latinx artists and writers will serve as case studies to deconstruct racial stereotypes of Latinxs as uninterested in environmental issues, shedding light on how they share a broad engagement with environmental ideas. The case studies analyzed in this course emphasize race and class differences between farmworkers and urban barrio residents and how they affect their respective struggles. The unit on farmworkers will focus on workplace health issues such as toxic chemicals and collective bargaining contracts. The unit on urban barrios will focus on gentrification, affordable housing, and toxic substances in the home. We will also review current and past programs that have been organized to address the aforementioned problems. This is an Academically Based Community Service Course (ABCS course) through which students will learn from and provide support to a Latinx-serving organization in the City of Philadelphia on preventing exposure to hazardous substances, thus bridging the information gap on environmental justice issues in the Latinx community in Philadelphia. Information dissemination and education efforts will be conducted by collaborating with Esperanza Academy Charter School in Philadelphia to implement lessons on preventing exposure to hazardous substances. Studying environmental justice and pairing it with community service will heighten students’ awareness of the complexities of culture, race, gender, and class while providing them with an invaluable experience of cross-cultural understanding.

ANTH 1040 Sex and Human Nature
Within an evolutionary framework, the course examines genetic, physiological, ecological, social and behavioral aspects of sex in humans. After providing the basic principles of evolutionary biology, the course delves into the development of sexual anatomy and physiology. Among the subjects to be explored are sex determination, the nature of orgasms, and the sexual development of females and males from birth to adulthood. The role of ecology and social life in shaping human mating patterns is also evaluated using ethnographic and cross-cultural materials from a variety of human cultures. In particular, the course examines why humans marry or pair bond, whether there is a biological basis of love, which biological and psychological factors produce jealousy. Finally, the course explores topics relevant to human sexuality today, such as the "hook-up culture", contraception and abortion, sex work, sexual transmitted diseases, and the ethical and legal dimensions of human sexuality.

ANTH 1104 On the Stage and in the Streets: An Introduction to Performance Studies
What do Hamilton, RuPaul’s Drag Race, political protest, TikTok Ratatouille, and Queen Elizabeth’s funeral have in common? They all compose repertoires of performance. From artistic performances in theatres, galleries, and concert halls to an individual’s comportment in everyday life, to sporting events, celebrations, courtroom proceedings, performance studies explores what happens when embodied activities are repeatable and given to be seen. In this course we ask: what is performance? How do we describe, analyze, and interpret it? What do theatre and everyday life have in common? How does performance legitimize or challenge the exercise of power? How has social media shifted our understanding of the relationship of our daily lives to performance? How does culture shape what is considered to be performance and how it functions? What isn’t performance? Throughout the semester students will apply key readings in performance theory to case studies drawn from global repertoires of contemporary and historical performance. In addition to analyzing artistic performances, we will also consider sporting events, celebrations, political events, and the performance of everyday life. We will attend to the challenges provoked by performance’s embodied, ephemeral, affective, effective, relational, and contingent aspects. Coursework will include discussion posts, class facilitation, and the opportunity to choose between a research paper or creative project for the final assessment.

ANTH 1120 Sacred Stuff: Religious Bodies, Places, and Objects
Does religion start with what’s in our heads? Or are religious commitments made, shaped and strengthened by the people, places, and things around us? This course will explore how religion happens in the material world. We'll start with classical and contemporary theories on the relationship of religion to stuff. We'll then consider examples of how religion is animated not just by texts, but through interactions with objects, spaces, bodies, monuments, color, design, architecture, and film. We'll ask how these material expressions of religion move beyond private faith and connect religion to politics and identity.

1 Course Unit

ANTH 1140 Migration and Borders
We live in an interconnected world of ever-intensifying flows of people, goods, and ideas. Rather than giving rise to a "borderless world," however, these flows have instead led to the proliferation and elaboration of borders on a planetary scale. This introductory course explores this paradox, evaluating the links between migration and borders in different contexts across the globe. We ask a number of related questions: What is migration? What is a border? What is the relationship between migration and borders? How might anthropology - the study of what it means to be human - shed light on this relationship? In so doing, we explore a number of case studies from archaeological, biological, cultural, and linguistic perspectives to better understand migration and borders as conjoined anthropological phenomena.

1 Course Unit

ANTH 1151 Madness and Mental Health in East Asian Worlds
Madness, however conceived, can trouble the limits of our worlds. Since COVID-19, questions of mental health have resurfaced with a sense of urgency, as many faced unprecedented changes in collective and intimate life. This course explores madness and mental health in East Asian worlds, across geographies, histories, social-political transformations, and racialized imaginations. How do East Asian therapeutics approach madness, through and beyond the concepts of psychiatry, neuroscience, or even ‘mental health'? What happens when Euro-American diagnostic categories and treatments travel to East Asia as part of missionary and empire-building projects? Bringing together readings in medical and psychological anthropology, as well as history, literature, psychoanalysis, and transcultural psychiatry, we will explore themes such as: shifting concepts of madness in Chinese, Korean, and Japanese medical and spiritual cures, colonial legacies of 'culture-bound syndromes,' and race as a site of psychic struggle in Asian American diasporas.
Also Offered As: ASAM 1620
1 Course Unit

ANTH 1160 Caribbean Culture and Politics
This course offers anthropological perspectives on the Caribbean as a geo-political and socio-cultural region, and on contemporary Caribbean diaspora cultures. We will examine how the region's long and diverse colonial history has structured relationships between race, ethnicity, class, gender and power, as well as how people have challenged these structures. As a region in which there have been massive transplantations of peoples and their cultures from Africa, Asia, and Europe, and upon which the United States has exerted considerable influence, we will question the processes by which the meeting and mixing of peoples and cultures has occurred. Course readings include material on the political economy of slavery and the plantation system, family and community life, religious beliefs and practices, gender roles and ideologies, popular culture, and the differing ways national, ethnic, and racial identities are expressed on the islands and throughout the Caribbean diaspora.

1 Course Unit

ANTH 1169 Merchants, Saints, Slaves and Sojourners: the Worlds of the Indian Ocean
Do oceans serve to divide and demarcate distinct cultures and regions? Or do they facilitate exchange, connection and cosmopolitanism? This course will explore the manner in which the Indian Ocean has played both roles throughout history, and how the nature of those divisions and connections has changed over time from the ancient to the modern world. We will reconstruct the intertwined mercantile, religious and kinship networks that spanned the Indian Ocean world, across the Middle East, East Africa, South Asia, Southeast Asia and China, illuminating the histories of Hinduism, Buddhism and Islam, while also considering the role of successive imperial political formations, from Rome to Britain. Throughout the semester we will seek to understand the Indian Ocean through the people who lived and worked in its milieu - from consuls and military commanders, to traders, brokers, sailors, prisoners and slaves. Course materials will draw on a variety of disciplines (anthropology, archaeology, material culture, religious studies) to construct the cultural, economic, and environmental history of the Indian Ocean.

ANTH 1171 Devotion’s New Market: Religion, Economics, and the City
This graduate and undergraduate level course introduces students to the new forms of devotion as circulated in various urban centers in South Asia with a focus on growing market economy and urbanization. This course will particularly discuss case studies of how different modes of Hinduism, Islam, Christianity and other minor religions operate in an urbanized middle-class and educated communities. We will read theoretical and ethnographical works of contemporary research in religious studies and anthropology that deal with the questions of modernity, reformism and economic developmentalism. Throughout the semester, we focus on 1) how does religious forms such as sainthood practices, private and public rituals, narrative modes and everyday life evolve in the background of growing politics of development; 2) we discuss the tensions between classical notions of devotion and their new transformations in the city life, and finally 3) theoretically, we analyze concepts such as reformism, fundamentalism, recent discourses on identity politics and gender implications as connected to urban religious life. ANTH 1219 Archaeology in the City of Brotherly Love
This course introduces the archaeology of Philadelphia and the surrounding area through guided visits to local prehistoric and historic sites, accompanied by readings, discussions, and guest lectures. This is an experiential course, in that students will explore local archaeological sites, both well known and rarely discussed, in person. Moving beyond the histories of places like Eastern State Penitentiary, the President’s House, or Sycamore Mills, students will engage with social scientific analysis of the material culture and landscape features that remain in the archaeological record. This course is open to all undergraduates, no previous archaeological experience is required. The course will be held Fridays from 10am - 5pm including travel time to the sites and back to the Penn Museum, transportation provided by the university. Enrollment is limited so permission of the instructor is required. Course may be repeated for credit.
Spring
1 Course Unit

ANTH 1303 The Material Past in a Digital World
The material remains of the human past - objects and spaces - provide tangible evidence of past people’s lives. Today’s information technologies improve our ability to document, study, and present these materials. But what does it mean to deal with material evidence in a virtual context? In this class, students will learn basic digital methods for studying the past while working with objects, including those in the collections of the Penn Museum. This class will teach relational database design and 3D object modeling. As we learn about acquiring and managing data, we will gain valuable experience in the evaluation and use of digital tools. The digital humanities are a platform both for learning the basic digital literacy students need to succeed in today’s world and for discussing the human consequences of these new technologies and data. We will discuss information technology’s impact on the study and presentation of the past, including topics such as public participation in archaeological projects, educational technologies in museum galleries, and the issues raised by digitizing and disseminating historic texts and objects. Finally, we will touch on technology’s role in the preservation of the past in today’s turbulent world. No prior technical experience is required, but we hope students will share an enthusiasm for the past.
Also Offered As: ARTH 0127, CLST 1303, HIST 0871
1 Course Unit
ANTH 1310 Small Business Anthropology
With a focus on minority-owned small businesses in the City of Philadelphia, this class will introduce students to the work of anthropologists who have made their careers in the business world using the tools they acquired through training in anthropology. By bringing anthropological perspectives into the workplace, business anthropologists seek to promote well-being for employees and owners, as well as consumers and the communities in which businesses operate. The class will also introduce students to Philadelphia from the point of view of minority owned small businesses. One of the two class days each week will focus on business anthropology as a profession and include readings on organizational culture, design anthropology, and the role of anthropologists in marketing and advertising, as well as in globalization processes and entrepreneurship. The second of the two days each week will focus on the city of Philadelphia and the role of small businesses within it. We will study the spatial layout of the city, the kinds of small businesses that are operative within the city and where they are located, the relationship of business to ethnicity, gentrification and its impact on small business, and the role of government and community groups in relationship to small businesses and their owners and employees. As part of the class, students will engage in guided research on specific small businesses, with the aim of developing an ethnographic understanding of the experiences of owners and employees, the opportunities they have seized upon and the problems they have confronted. We hope in the course of the semester to provide an ethnographic profile of a sampling of small businesses from different industries, which can in turn contribute to understanding larger social and cultural patterns within Philadelphia. Through a class blog or other means, we hope as well to contribute to the ability of minority small business owners to voice their experiences, as well as their fears and hopes for the future, to members of the University community and beyond.

ANTH 1340 Making the Natural World: An Introduction to Political Ecology
What are the limits of nature? When do natural systems become human or socio-natural systems? In this course, we examine the human construction of nature both conceptually, through ideas about environment, ecosystem, organism, and ecology; and materially, through trajectories of direct action and in on the landscape. Beginning with a consideration of foundational concepts in human ecology, we will discuss current problems and approaches, centering on political ecology. Readings and case studies are drawn from human-environmental contexts in Oceania, South Asia, Southeast Asia, Sub-Saharan Africa, Latin America, Europe, and North America. We will also consider topics including a) the relationship between indigenous and technocratic knowledge and resource governance, b) environmental movements themselves as objects of ethnographic study; c) justice and sustainability as environmental goals; d) inequality, displacement and violence as environmental problems; and e) fair trade and food security or sovereignty.
Fall
1 Course Unit

ANTH 1410 Museums, Monuments, and Social Justice
Monuments, museums, and heritage are all critical parts of the world that we have created and are shaped by. These institutions and sites often claim to represent our past, who we imagine ourselves to be today, and how we might define our futures. We often rely on museums and monuments to frame history and history's relationship to our current social and cultural systems. However, in recent years, social, racial, and economic justice movements have pushed us to rethink the function of monuments, museums, and heritage. In particular, these social movements have helped us understand how racism, sexism, and colonialism are responsible for the creation of monuments and museums. This course examines the echoes and continuities of colonial representations in museums and monuments. In addition, we will examine how new ways of commemorating and representing the past can result in a new vision for our future. By visiting a variety of local monuments and sites and by engaging in conversations about accountability and social justice, this course will challenge us to rethink the tangible and intangible ways that we weave the past into the present for the creation of the future.

ANTH 1430 Explorations in Human Biology
This course is an exploration of human biology from a biocultural and evolutionary perspective. The class will provide you with a better understanding of what it means to be human, how humans came to exhibit such a wide range variation, and what biological anthropology can contribute to your understanding of the world. In this class students will learn to integrate the theory and methods used in human biology research through lectures, assignments, and lab sessions. This course will explore topics including human genetics, growth and development, nutrition, disease, and reproduction. We will also use the course as an opportunity to introduce you to the important contributions of biological anthropologists to the study of race, inequality, sex and gender, and health among others.
Spring
1 Course Unit
ANTH 1440 Liquid Histories and Floating Archives
Climate change transforms the natural and built environments, and it is re-shaping how we understand, make sense, and care for our past. Climate changes history. This course explores the Anthropocene, the age when humans are remaking earth's systems, from an on-water perspective. In on-line dialogue and video conferences with research teams in port cities on four continents, this undergraduate course focuses on Philadelphia as one case study of how rising waters are transfiguring urban history, as well as its present and future. Students projects take them into the archives at the Independence Seaport Museum and at Bartram's Garden. Field trips by boat on the Schuylkill and Delaware Rivers and on land to the Port of Philadelphia and to the John Heinz National Wildlife Refuge invite transhistorical dialogues about how colonial and then industrial-era energy and port infrastructure transformed the region's vast tidal marshlands wetlands. Excursions also help document how extreme rain events, storms, and rising waters are re-making the built environment, redrawing lines that had demarcated land from water. In dialogue with one another and invited guest artists, writers, and landscape architects, students final projects consider how our waters might themselves be read and investigated as archives. What do rising seas subsume and hold? Whose stories do they tell? What floats to the surface?

ANTH 1480 Food and Fire: Archaeology in the Laboratory
This course will let students explore the essential heritage of human technology through archaeology. People have been transforming their environment from the first use of fire for cooking. Since then, humans have adapted to the world they created using the resources around them. We use artifacts to understand how the archaeological record can be used to trace breakthroughs such as breaking stone and bone, baking bread, weaving cloth and firing pottery and metals. The seminar will meet in the Penn Museum's Center for the Analysis of Archaeological Materials. Students will become familiar with the Museum's collections and the scientific methods used to study different materials. Class sessions will include discussions, guest presentations, museum field trips, and hands-on experience in the laboratory.

ANTH 1490 Introduction to Native American and Indigenous Studies
This course offers a broad introduction to evolving scholarship in the combined fields of Native American Studies and Indigenous Studies worldwide. Students will examine the various ways that Indigenous peoples and academic researchers are currently engaging with Indigenous knowledges, while also exploring the lingering impacts of settler colonialism and the influence of decolonizing methodologies. Students will gain foundational understandings of the cross-disciplinary nature of Native American and Indigenous Studies (NAIS), by studying theoretical interpretations of Indigenous peoples in academic and historical contexts, and by examining practical approaches to Indigenous research in diverse worldwide settings. Students will approach topics from a variety of disciplinary traditions, utilizing historical texts, ethnological studies, oral literature, material culture, and modern media, including websites and databases produced by and for Indigenous communities. Readings will include the work of researchers who bridge the disciplines of anthropology, history, folklore, art, law, science, etc. Students will watch a selection of films by Indigenous filmmakers, and attend lectures by a selection of Indigenous guest speakers. NAIS faculty advisors from various schools at Penn (e.g., School of Arts and Sciences, Education, Law, Nursing) will also present several guest lectures to highlight their unique experiences and research projects with Indigenous communities. Special case studies will focus on: new directions in collaborative research; issues in museum representation and repatriation; heritage site protection and Indigenous archaeology; legal interventions and protections for Indigenous rights; and innovative projects in language restoration and cultural recovery.

1 Course Unit

ANTH 1500 World Musics and Cultures
This course examines how we as consumers in the "Western" world engage with musical difference largely through the products of the global entertainment industry. We examine music cultures in contact in a variety of ways—particularly as traditions in transformation. Students gain an understanding of traditional music as live, meaningful person-to-person music making, by examining the music in its original site of production, and then considering its transformation once it is removed, and recontextualized in a variety of ways. The purpose of the course is to enable students to become informed and critical consumers of "World Music" by telling a series of stories about particular recordings made with, or using the music of, peoples culturally and geographically distant from the US. Students come to understand that not all music downloads containing music from unfamiliar places are the same, and that particular recordings may be embedded in intriguing and controversial narratives of production and consumption. At the very least, students should emerge from the class with a clear understanding that the production, distribution, and consumption of world music is rarely a neutral process. Fulfills College Cross Cultural Foundational Requirement.

Also Offered As: AFRC 1500, MUSC 1500
1 Course Unit
ANTH 1533 Music in Troubled Places
In this class, we go beyond the headlines to discuss the history and cultures of peoples who have had to endure terrible suffering, particularly through ethnic conflict and civil war. We will focus on a curious phenomenon: populations typically defined as separate from one another (e.g., Israelis and Palestinians) often have a history of shared or related cultural practices, of which music is a prime example. We will survey a number of current and recent conflict zones and use music as a way to deepen our understanding of the identities and relationships between the peoples involved through a consideration of my own fieldwork in Sri Lanka. Querying the very definitions of music, trouble, and place, the course then broadens out to consider how musicians have been affected by and/or responded to important global problems like slavery, sexual violence, climate change, and other ecological disasters, like Hurricane Katrina. Regions to be considered in our lectures and/or readings include: Afghanistan, Iraq, Syria (including Kurdish musics), Israel-Palestine, Sri Lanka, the Maldives, Myanmar/Burma, Uganda, Sierra Leone, North and South Korea, the Marshall Islands, Cambodia, Mexico, and the United States.

ANTH 1610 Humans and the Earth System: How it Works, How We Got Here, and How to Save Our Planet
As our planet's climate changes, it is imperative to understand the basic structures of the earth system and our connections to these, past, present, and future. The goal of this course is to help students develop an integrated understanding of climate change, linking the fundamental science - from the microscopic to the global scale - to human actions and possible futures. This course brings together approaches from environmental science, social sciences, history, and policy. Beyond providing basic climate and environmental literacy, we will also explore current and projected impacts of change, including changes to human life and biodiversity as well as other physical and biological systems. The course is divided into three units: 1. Science: what are the chemical and physical drivers of our changing climate, and what are the biological, health and environmental implications so far. 2. Impacts: how human activity has affected environments and climate so far and how climate change is currently impacting society, nature, agriculture, health, cities, and the most vulnerable communities. 3. Solutions: the roles of policy, business, agriculture, planning, and personal choices. The course is open to undergraduate students of all disciplines. While the reading and weekly assignments will be specific to the module, students may define a capstone project that reflects their academic interests.

ANTH 1630 Witchcraft and Possession
This course explores world witchcraft and possession from the persecutions of the early seventeenth century through the rise of Wicca in the twentieth century. The mere mention of these terms, or of such close cousins as demonology, sorcery, exorcism, magic, and the witches Sabbath, raises clear ethnographic and historical challenges. How can the analysis of witchcraft-- including beliefs, patterns of accusation, the general social position of victims, the intensity and timing of witch hunts, and its relation to religious practice, law, language, gender, social marginalization, and property--lead us to a more humane understanding of belief and action? Films such as The Exorcist, The Blair Witch Project, The Crucible, and Three Sovereigns for Sarah will focus discussion.

ANTH 1670 Population and Public Health in Eastern Europe
Since the collapse of communism in 1989 in Eastern Europe (and 1991 in the Soviet Union), many of the countries in the region have experienced public health crises and demographic catastrophe. Below replacement fertility rates and massive out migration have decimated the populations of these countries even as populations age and place unsustainable strains on pension systems and medical services. The demographic collapse has also been accompanied by falling male life expectancy and the rise of alcoholism, depression, domestic violence, and suicide. The economic exigencies of the transition from communism to capitalism dismantled welfare states at the exact moment when health services were most needed, leaving charities and nongovernmental organization to try to fill in the gaps. Through a combination of readings from the fields of epidemiology, demography, and medical anthropology, this course examines the public health implications of poverty and social dislocation in post-communist states. All readings and assignments are in English.
Also Offered As: REES 1670, SOCI 2950
1 Course Unit

ANTH 1688 Sex and Socialism
This seminar examines classic and current scholarship and literature on gender and sexuality in contemporary Eastern Europe, and examines the dialogue and interchange of ideas between East and West. Although the scholarly and creative works will primarily investigate the changing status of women during the last three decades, the course will also look at changing constructions of masculinity and LGBT movements and communities in the former communist bloc. Topics will include: the woman question before 1989; gender and emerging nationalisms; visual representations in television and film; social movements; work; romance and intimacy; spirituality; and investigations into the constructed concepts of "freedom" and "human rights."

1 Course Unit
ANTH 1900 Pastoral Nomadism in the Past and Present
Pastoral nomadism is a "third way" of human subsistence separate from farming and foraging. It is a sustainable human adaptation to grassland and arid environments practiced through particular technologies and domesticated animals. This course begins by examining the human ecology and social organization that emerge from mobile ways of life, drawing on modern, ethnographic, and archaeological examples of pastoral nomadic groups in the Middle East and Central Asia. Academic readings and ethnographic films will form the basis of discussions about several larger themes, including: the origins of pastoral nomadism and horse riding; the development of dairy-based foods and human adaptations allowing the digestion of lactose; the historical relationship between mobile groups of pastoralists and territorial states; popular perceptions of nomads in various forms of historical and modern media; and the influence of ideas about nomads on modern senses of heritage and nationalism in the Middle East and Central Asia.

1 Course Unit

ANTH 1905 GIS for the Digital Humanities and Social Sciences
This course introduces students to theory and methodology of the geospatial humanities and social sciences, understood broadly as the application of Geographical Information Systems (GIS) and spatial analysis techniques to the study of social and cultural patterns in the past and present. By engaging with spatial theory, spatial analysis case studies, and technical methodologies, students will develop an understanding of the questions driving, and tools available for, humanistic and social science research projects that explore change over space and time. We will use ESRI's ArcGIS software to visualize, analyze, and integrate historical, anthropological, and environmental data. Techniques will be introduced through the discussion of case studies and through demonstration of software skills. During supervised laboratory sessions, the various techniques and analyses covered will be applied to sample data and also to data from a region/topic chosen by the student.

ANTH 1925 Who Owns the Past? Archaeology and Politics in the Middle East
This course explores the role of cultural heritage and archaeological discoveries in the politics of the Middle East from the nineteenth century to the recent aftermath of the Arab Spring. We will explore how modern Middle East populations relate to their pasts and how archaeology and cultural heritage have been employed to support particular political and social agendas, including colonialism, nationalism, imperialism, and the construction of ethnic-religious identities. Although it was first introduced to the Middle East as a colonial enterprise by European powers, archaeology became a pivotal tool for local populations of the Middle East to construct new histories and identities during the post-World War I period of intensive nation-building after the dissolution of the Ottoman Empire. To understand this process, we will first look at the nineteenth-century establishment of archaeology by institutions like the Penn Museum. Then we will move on to individual case studies in Turkey, Iraq, Egypt, Israel/Palestine, Iran, and the republics of former Soviet Transcaucasia to look at the role of archaeology and cultural heritage in the formation of these countries as modern nation-states with a shared identity among citizens. We will conclude with an examination of the recent impact of the Islamic State on material heritage in Syria and Iraq, the changing attitudes of Middle Eastern countries toward foreign museums, and the role of UNESCO in defining Middle Eastern sites of world heritage. The course will also include field trips to the Penn Museum.

ANTH 2020 Language, Migration, Diaspora
Centering on the relation between language, migration, and diaspora, this course uses linguistic anthropological approaches to understand how the 'very big' is reflected in the 'very small.' We will approach language use as a process that unfolds in the microclimate of everyday interaction, but whose effects extend to and shape large-scale social processes. We will ask a number of interrelated questions: How does language use shape global phenomena like transnationalism and diasporic populations? How do globalizing forces impact and shape language structure and use? How are mobility and (im)migration enabled or constrained through everyday communicative interaction? We begin by exploring the ideologies inherent in everyday speech, evaluating how language is linked to social identities like class, race, gender, and sexuality, and to social personae like 'the migrant,' 'the refugee,' 'the foreigner,' or to the 'diasporic subject' more generally. We then explore the cultural politics of languages in and across nation-states, attending to their uses and values in unprecedented global flows of information, goods, and people.

ANTH 2024 Dress and Fashion in Africa
Throughout Africa, social and cultural identities of ethnicity, gender, generation, rank and status were conveyed in a range of personal ornamentation that reflects the variation of African cultures. The meaning of one particular item of clothing can transform completely when moved across time and space. As one of many forms of expressive culture, dress shape and give forms to social bodies. In the study of dress and fashion, we could note two distinct broad approaches, the historical and the anthropological. While the former focuses on fashion as a western system that shifted across time and space, and linked with capitalism and western modernity; the latter approach defines dress as an assemblage of modification the body. The Africanist proponents of this anthropological approach insisted that fashion is not a dress system specific to the west and not tied with the rise of capitalism. This course will focus on studying the history of African dress by discussing the forces that have impacted and influenced it overtime, such as socio-economic, colonialism, religion, aesthetics, politics, globalization, and popular culture. The course will also discuss the significance of the different contexts that impacted the choices of what constitute an appropriate attire for distinct situations. African dress in this context is not a fixed relic from the past, but a live cultural item that is influenced by the surrounding forces.

ANTH 2060 Cultures of Science and Technology
Science and technology figure centrally in the economic, political, and socio-cultural changes that impact our worlds. Happenings in the life sciences, including the discovery of new genes, pathways, and processes, are redrawing concepts of the body and human nature and refiguring social and political relations. The seminar starts from the premise that scientific facts are made, not things existing a priori in the world and that are merely picked up by researchers and consumed by lay audiences. Likewise, technologies are created through a process of intense negotiation between producers and their sophisticated users. Focusing on the biosciences, we explore the production of science and technology and how they 1) affect individuals, self-identities, subjectivity, kinship, and social relationships; 2) have interacted with or reinforced political programs, racial classifications, unequal access to knowledge, and patterns of social injustice; 3) inform contemporary institutional structures, strategies of governance, and policies of citizenship.
We will combine methods and perspectives from social and cultural anthropology, and the social studies of science and technology, and will draw from historical case studies, contemporary ethnographies of science, scientific and medical journals, documentary films and media reports.

1 Course Unit

ANTH 2080 Anthropology of Futurity
How should we think about the future amid worlds on edge? What is an inevitable versus a contingent course of events? What role do humans and non-humans, machines, animals, and plants play as agents of futurity in the context of the Anthropocene? This seminar explores these pressing questions, linking multiple sources of knowledge production—biological, medical, ecological, engineering, economic, and anthropological—with manifestations of the future. It starts with the basic premise that futures are made, molded by competing material, economic, and creative desires and possibilities, and not foreordained. Innovating futures also entails unexpected ethical and technical entanglements that current forms of knowledge cannot always anticipate. Drawing from readings in anthropology, the social studies of science and technology, Indigenous studies, as well as from engineering, AI, and scientific journals and films, we explore tensions between knowledge and uncertainty on the one hand, and ethics and innovation on the other. With these tensions in mind, we consider the myriad of agents whose role will be vital to shaping planetary futures—as well as how alternative futures, especially among communities confronting systemic inequalities and colonial and race-based injustices, are imagined and realized. From the climate crises to the ongoing pandemics, militarization, and mass migrations that have torn apart social fabrics, we will learn to become ‘technologists of the future’—that is, individuals and collectives with the tools to realize more inclusive, flourishing, and just futurities.

ANTH 2070 Primate Behavior and Ecology
This course explores the behavior of wild primates and the ecological models that attempt to explain the evolution of these behaviors. The evolution and taxonomy of primates will be reviewed, followed by a brief history of wild primate studies. We will then explore primate behavior through theoretical frameworks ranging from socioecological theory to sexual selection. Topics discussed include, but are not limited to, socioecology, aggression, kinship, cooperation, reproductive strategies, cognition, and conservation. Those enrolled in the graduate section (ANTH 6070) will have additional responsibilities assigned.

ANTH 2109 Adivasis/Indigenous Peoples & British Colonialism in India

Modern Western colonialism impacted the world in many ways. However, each country and community has had a different encounter and experience with colonialism. For the Adivasis (indigenous peoples) of India, it was catastrophic and marked a new phase in their history. The pre-colonial symbolizes a period of freedom in the hills and forest, whereas the colonial era symbolizes state coercion, eviction from land and the end of free movement in the forest. The proposed course discusses Adivasis’ encounters with the British colonial state. The course examines Indian history from the perspectives of Adivasis and contrasts these with dominant paradigms of Indian history. In this way, the course allows students to understand India from a different perspective. Under British colonialism, the diverse ethnic self-governing communities were imagined as primitive, uncivilized, barbaric, violent, backward and childlike people. The course discusses how such constructions impacted Adivasi social life and development. It traces how the expansion of the colonial state in forests and hills put an end to self-rule and induced massive migration from the plains of India and asks how Adivasi areas were integrated into the colonial economy. How did the colonial state use revenue and forest policies and regulations to bring these areas under its control? How did commercialization of agriculture and forest conservation work to further marginalize Adivasis? The course also examines how Adivasi knowledge of cultivation and forest conservation were viewed by the colonial state and asks why the colonial state encouraged caste-Hindu peasant migration into Adivasi areas. Finally, it traces the ways that colonial intervention has resulted in a series of contestations, acts of resistance, and insurgencies by Adivasi groups? Tracing forms of Adivasi resistance, the course puts these into conversation with intellectual history, emphasizing the role of rumours, myths, and orality, which provided the basis for the new insurgent consciousness that spread throughout Adivasi communities. Adivasi resistance movements have been documented and analyzed by colonial rulers and anthropologists. Colonial discourses were successful in criminalizing Adivasi politics. Ironically, many colonial-era discourses concerning Adivasis have been perpetuated within the post-colonial academy. The anti-colonial struggles of Adivasis were constructed as sporadic, spontaneous, unorganized and apolitical. The inauguration of the Subaltern Studies Project has reversed such arguments and attempted to provide ideological integrity to Adivasi politics. Students will be introduced to important literature on Adivasi anti-colonial insurgent consciousness and will be encouraged to think critically about the concepts and theories of subaltern politics. Assigned readings include texts by James Scott, Ranajit Guha, David Arnold, David Hardiman, Ajay Skaria, Dhanagare, Ramachandra Guha, Biswamoy Pati, Alpa Shah, Crispin Bates, Jangkhomang Guite and Bhangya Bhukya. One aim of the course is to sensitize the students to how the political and cultural mobilizations by subalterns have contributed to the shaping of democracy.

ANTH 2110 Religion and Ecology

This class will introduce the overlaps between religion and ecology. Rather than assuming that there is a necessary positive or negative relationship between religion and ecology, we will look at how these relationships have materialized in complicated ways at different moments in history. We’ll consider perspectives and case studies from a range of different moments in history. We’ll consider perspectives and case studies from a range of different traditions, with a special attention paid to the genesis of the field of Religion and Ecology in critiques of Christian attitudes toward the environment in the 1960s and 1970s.

ANTH 2120 Animals and Religion

Religion is full of animals—lions and lambs, monkeys and elephants, buffalo and snakes, even mythical beings. The identity of the human being is explained, in many traditions, by contrast with the identity of other species. We know who we are because we know who they are, or do we? This course interrogates—through an exploration of sacred texts, art, film, and museum artifacts—the tension present in many traditions between an anthropocentric prioritization of the human being and religious resources that encourage a valuing of other animal species. We’ll explore the way animals function both as religious objects and as religious subjects across diverse traditions, asking how human-animal relationships have shaped religion and how religion has shaped the way we think about and interact with other animals. We’ll ask how religion has engaged with animals over time and across global cultures, understanding them as symbols, messengers, and manifestations of the divine; as material for ritual and sacrifice; as kin and subordinates; as food and as filth; as helpmeets and as tempters. How have these perspectives shaped animal ethics, influencing the treatment, use, and consumption of animals and their bodies? Finally, we’ll ask what it means that we ourselves are evolved animals. How does our own animality factor into the practice of human religion? Is our religious capacity part of what sets us apart from other animals or is religiosity a trait we might expect to find in other species? To what extent is religion a function of the animal?

ANTH 2145 Reading Maya Culture: Decipherment and a New Window into the Ancient Americas

The past three decades have seen a revolution in the study of the Ancient Americas, one with far-reaching implications for how we understand indigenous society and culture on this continent. This course will take us on a journey of academic discovery—encompassing language, art, and materiality—that explains how the decipherment of a major writing system has revealed a previously hidden world. The Maya are one of the most distinctive and best-known of Mesoamerican peoples, who live today, as they did in ancient times, in the Yucatan Peninsula and a region that spans modern southern Mexico, the whole of Guatemala and Belize, and the westernmost fringes of Honduras and El Salvador. From as early as 1000 BCE they were erecting major architecture and flourished for twenty-five more centuries before the invasion of Europeans brought their independence to an end in the sixteenth century CE. Within their elaborate urban spaces, the Maya erected large stone monuments inscribed with imagery and hieroglyphic texts—most of them commissioned in the Classic Period that reaches from 150-900 CE—although the script is also found on many smaller and more intimate objects. For the first century of research these texts proved all but unintelligible, as faulty assumptions and lack of adequate sources left a deep pessimism that they could ever be understood. But beginning in the 1980s major progress in "cracking the code" took place and today we can read almost all inscriptions to some extent, a decent number in their entirety. This course will teach practical skills that allow students with no previous background to read Maya inscriptions and gain access to the history, politics, religious beliefs, and practical material culture they describe. The fabulous design of the hieroglyphs, that at first seem so impenetrable, will be broken-down to reveal not only language but an iconographic system that reveals much about the ancient Maya aesthetics and visual culture.

ANTH 2150 The Ancient Maya: Integrating Material, Text, and Image

Ancient Maya studies is one of the most dynamic and innovative fields in world archaeology today. Emerging as a true historical archaeology only in the past three decades, the decipherment of Maya script now provides a powerful complement and counterpoint to both traditional excavation data and new remote sensing technologies. Equally, the reading of images, and their interaction with texts and artifacts, forms a vital part of our interest in the broader humanistic concerns of worldview and the transcendent—where our primary interest lies in gaining access to past mentalities. This course will provide a comprehensive introduction into current knowledge of the Ancient Maya, with a recurring methodological focus on how different types of evidence are integrated to assemble a persuasive "portrait of the past.” This scope of this process is unique in the ancient Americas, since only the Maya offer us the opportunity to read their own descriptions of the world two millennia or more in the past. Geographically, we will be looking at the greater Yucatan Peninsula, which today covers parts of southeastern Mexico, the whole of Guatemala and Belize, and the western extremities of Honduras and El Salvador. Since archaic times (before 1200 BCE) this has been occupied by speakers of the Mayan language group, and millions of people identified as Maya by that means continue to do so today (despite popular notions to the contrary, they have never "disappeared`). No prior knowledge of archaeology or art history is necessary. The course structure is one 3-hour session per week, consisting of a lecture followed by group discussion in seminar-style. Additionally, in Week 6 there will be a virtual tour of the new Mexico and Central American Gallery at Penn Museum. This will introduce the class to the issues of disseminating scholarship and building narratives that are accessible to the wider public.

1 Course Unit

ANTH 2154 Performing History

This seminar concentrates on the ways that various peoples in the world make their history by means other than relying on written texts alone. Over the course of the semester, we therefore may be examining such different public events and civic rituals as parades, political and religious processions, local historical pageants, carnivals, historic preservation, museums, military reenactments, and history theme parks. The emphasis in each of these forms, places, and semiotic processes will be on their identity and function as key performances that transform consciousness, shift individuals alternately into both actors and spectators, reframe the everyday as the metaphysical, and intensify the status of cultural values in the histories they present to view. Course requirements: a seminar paper, the topic of which you will discuss with me no later than week five of the course; and a working annotated bibliography and statement of your paper’s main thesis. I will say more about these assignments as they approach.

ANTH 2221 Material World in Archaeological Science
By focusing on the scientific analysis of inorganic archaeological materials, this course will explore processes of creation in the past. Class will take place in the Center for the Analysis of Archaeological Materials (CAAM) and will be team taught in three modules: analysis of lithics, analysis of ceramics and analysis of metals. Each module will combine laboratory and classroom exercises to give students hands-on experience with archaeological materials. We will examine how the transformation of materials into objects provides key information about past human behaviors and the socio-economic contexts of production, distribution, exchange and use. Discussion topics will include invention and adoption of new technologies, change and innovation, use of fire, and craft specialization.

ANTH 2307 Contemporary Native Americans
This course examines the social and political lives of contemporary Native American Indians in the United States and Canada. Topics include: Indigenous identity; homelands and natural resources; popular culture and media; Indigenous arts and cultural expression; museum representations; athletics; gender relations; tribal recognition and sovereignty; and resistance movements. We will consider the origins of federal programs and legislation that have become essential to the protection of Native American freedoms. Students can expect to gain an appreciation of the complexity and cultural diversity of Native communities and tribal nations and insights into their interactions with other cultures over time.

ANTH 2308 Ethnohistory of the Native Northeast
Ethnohistory is a multi-disciplinary form of ethnographic study and documentary research that employs both anthropological and historical approaches. This course examines the foundations of the ethnohistorical method as a means to interpret cross-cultural colonial interactions and conflicts, and to better understand the complex histories of Native American Indian peoples from Pennsylvania and northward and eastward. Students will develop skills and strategies for interpreting and contextualizing primary and secondary source materials, oral traditions, colonial records, historical maps, and material culture. Hands-on study will include visits to local archives and historical sites to view relevant documents and landscapes.
Not Offered Every Year
1 Course Unit

ANTH 2317 The Politics of Matter and the Matter of Politics
What is nature? What is culture? What kinds of practices and actors constitute what we call science? Who and what constitute the sphere we refer to as politics? A number of theoretical developments in cultural anthropology, political theory, critical geography, and feminist science studies have problematized the modernist ontological divide between Nature and Culture and a whole series of binary oppositions (such as objects/subjects, matter/form, bio/geo) that follow from it. Taking inspiration from this literature and placing it in conversation with Native and Indigenous scholarship and a series of contemporary socio-environmental struggles occurring in Latin America and beyond, this course will discuss the conceptual-methodological tools that concern with politics of matter has generated. The epistemic and political implications of these tools go beyond their analytical usefulness as innovative devices to expand novel phenomena. They complicate well-established fields of inquiry, such as political ecology and economy, environmental studies, ethics, social justice, and modern politics; and, indeed, the singular ontology that these fields may inadvertently and explicitly sustain. We will explore how it is that things, stuff, matter, ‘nature’ came to fall outside modern politics as such, and the kinds of ethico-political repercussions that problematizing this division may produce.

ANTH 2327 Dispossession and Territorial Recovery Among Indigenous Peoples in South America
This seminar will focus on contemporary dynamics of dispossession, territorial claims and territorial recovery involving indigenous peoples in South America. Drawing on cases from different countries (particularly from Brazil, Argentina, Chile, Bolivia and Colombia), we will examine, in historical perspective, processes of territorial dispossession, socio-environmental conflicts, collective action, and struggles for territorial recovery and recognition set against the policies of settler colonial nation-states and economic activities that tend to evict people from their lands. More specifically, we will focus on actions carried out by indigenous peoples and movements to fight territorial dispossession, recover and protect their lands. Particular attention will be paid to the period marked by the growing visibility of the indigenous movements in South America, from 1970s to the present. The perspectives and strategies of indigenous peoples and movements regarding their territorial rights and projects of living well will be considered within the broader framework of identity, ethnicity and land issues. In that sense, the course will draw connections to the actions carried out by landless peasants and other groups. By devoting our attention to different contexts through the region, we will be able both to understand specific situations and identify underlying dynamics.

2023-24 Catalog | Generated 08/02/23
ANTH 2329 Psychoanalytic and Anthropological Perspectives on Childhood
How do people become who they are, both similar to others and uniquely individual? How might these similarities and differences be shaped by childhood experiences in family, community, and societies around the world? How do children develop emotionally? Morally? What features of human development, expression of emotions, and relational patterns are universal for our species? What features are not universal? And what is and is not known about these questions? In this course, we will consider these and many other questions. We will read about and discuss complex and dynamic interactions between culture and individual psychology, and between nature and nurture from birth to adulthood. We will carefully examine various phases of human development as described by psychoanalysts and anthropologists. The course includes anthropologic and psychoanalytic readings and videotapes, as well as literature, fairy tales, and mythologies from cultures around the world. The instructors are both psychoanalysts, one a psychiatrist and one a pediatrician. The course counts towards the Psychoanalytic Studies (PSYS) Minor.

1 Course Unit

ANTH 2330 Origins of Art / Origins of Writing
Each of the earliest systems of writing had intimate and enduring ties to pictorial traditions. This seminar addresses the fundamental relationship between texts and visual imagery in the Mesopotamian, Egyptian, Chinese, and Maya traditions. The class will take a comparative approach to examine the parallel development of scripts and images, extending from their earliest beginnings to their on-going lives as mature systems. As the individual scripts became more capable of representing speech, the subject matter, composition, and function of images changed, and one goal of this class is to identify these processes. Emphasis will be put on seeing text and image as collaborative and interactive constructions, in which parts of a single message can be encoded and presented in different ways. The class will make extensive use of the collections and the curatorial expertise of the Penn Museum.

ANTH 2332 Medicine and the Language of Pain
Pain can be a particularly complex and morally charged object of biomedicine. The interiority of pain—the deeply private nature of pain experience—complicates its communication. Pain, particularly its chronic form, defies purely biological explanation, troubling fundamental biomedical distinctions between mind and body, subject and object. And decisions about analgesia are fraught, as doctors and patients pursue relief from pain amidst a widespread epidemic of opiate abuse that infuses their interaction with concerns about addiction, drug seeking, culpability, and responsibility. This seminar seeks to shed light on these issues by using concepts from linguistic and medical anthropology to explore how we experience, think about, and talk about pain. As an interdisciplinary endeavor, the course is of relevance not only to anthropology but also to medical sociology, medical ethics, public health, health policy, and science and technology studies.

1 Course Unit

ANTH 2338 Modalities of Black Freedom and Escape: Ships
The course circulates around ships and boats. The course combines methods from environmental humanities, visual arts and history to consider multi-modal practices of black freedom and escape. From free black sailors in the eighteenth century Caribbean Sea, to twentieth and twenty-first century West African fishing boats, notions of Haitian “boat people,” Parliament Funkadelic’s mothership, and sinking boats with Somali and Ethiopian migrants off Yemen’s coast, ships have been and remain technologies of containment and freedom for communities of African descent. In the face of environmental vulnerabilities and the reality of water ways as systems of sustenance and imminent death, this course asks: how do black people use the ship and the process and practice of shipping as vessels for freedom, escape, and as a site to experiment with futures? Using the city of Philadelphia and the Schuykill and Delaware rivers as our primary site of interrogation, the course attends to the threats that black people experience following natural disaster (New Orleans, Haiti, Puerto Rico) and everyday engagement with the local and global state structures regarding water (Flint, MI). In this context, we also look to shipping as a site to theorize and account for black innovation, meanings of (non-)sovereignty, and alternative futures.

ANTH 2340 Pharmaceuticals and Global Health
In some parts of the world, spending on pharmaceuticals is astronomical. In others, people do not have access to basic or life-saving drugs. Individuals struggle to afford medications; whole populations are neglected, considered too poor to constitute profitable markets for the development and distribution of necessary drugs. This seminar analyzes the dynamics of the burgeoning international pharmaceutical trade and the global inequalities that emerge from and are reinforced by market-driven medicine. Questions about who will be treated and who will not filter through every phase of pharmaceutical production—from preclinical research to human testing, marketing, distribution, prescription, and consumption. Whether considering how the pharmaceutical industry shapes popular understandings of mental illness in North America and Great Britain, how Brazil has created a model of HIV/AIDS prevention and treatment program, or how the urban poor in Delhi understand and access healthcare, the seminar draws on anthropological case studies to illuminate the roles of corporations, governments, non-governmental organizations, and individuals in relation to global pharmaceuticals. As we analyze each case and gain familiarity with ethnographic methods, we will ask how individual and group health is shaped by new medical technologies and their evolving regulatory regimes and markets. The course familiarizes students with critical debates on globalization and with local responses to globalizing processes; and it contributes to ethical and political debates on the development and access to new medical technologies.

ANTH 2450 Environment in India: Nature, Culture, & Conservation in the Western Ghats
India, one of the world’s most populous countries, also ranks as one of the most important centers of biodiversity, conservation, and environmental movements. Despite pervasive scholarly and popular narratives of inevitable ecological damage associated with population growth, human land use has, at times, enhanced biodiversity, preserved existing environments, and created new ones. In this course, students will examine long-term human and natural histories from a number of perspectives to develop more accurate, historically-informed understandings of how India’s natural spaces have developed and how the spaces can be best sustained. During the travel component, students will visit India and work with local partners who are actively engaged in protecting human livelihoods, reducing human-wildlife conflict, and conserving biodiversity in the Western Ghat Mountains, a biodiversity hotspot.

1 Course Unit

ANTH 2460 Molecular Anthropology
In this course, we will explore the molecular revolution in biological anthropology. In particular, we will examine how molecular data can be used to illuminate anthropological question concerning human origins, evolution and biological variation. Some of the specific topics to be covered in this course are the phylogenetic relationships among primates, kinship in apes and monkeys, the hominoid trichotomy, modern human origins and migrations, Neanderthal and Denisovan admixture with modern humans, biogeogenetics of skin color, and physiological, phenotypic and disease adaptations.
Not Offered Every Year
1 Course Unit

ANTH 2490 Evolutionary Medicine
Evolutionary medicine is the application of modern evolutionary theory to studies of health and disease in humans. In taking this approach, the course will explore the role that disease played in human evolution. We will examine both infectious and non-infectious diseases, and assess the way in which populations and disease organisms have co-evolved. Related issues to be examined are the nature of the virulence and pathogenicity of infectious agents, and their efforts to subvert the immune system’s responses to infection. We will also explore the evolved responses that enable individuals to protect, heal and recuperate themselves from infections and injuries, such as fever and sickness behavior, and the fitness enhancing aspects of these processes. Finally, we will study how past adaptations of early humans to their environments now affects modern humans, who have very different diets, life expectancy, activity patterns, and hygiene than their ancestors.
Not Offered Every Year
1 Course Unit

ANTH 2515 Race, Rights and Rebellion
This course provides an in-depth examination of theories of race and different kinds of social struggles for freedom around the globe. We will critically engage the latest scholarship from a variety of scholars and social movement actors. From anti-slavery revolts to struggles for independence to anti-apartheid movements, this course will emphasize how racialized peoples have employed notions of rights and societal resources grounded in cultural differences. Though much of the readings will highlight the experiences of African descendant peoples in Africa and its diaspora, the course will also explore the intersections of Black struggles with social movements organized by indigenous peoples in the Americas. Students will also have the unique experience of accessing readings primarily written by primarily Black scholars, some of whom have participated as key actors in the social movements they describe. Key concepts include power, resistance, subaltern, hegemony, identity politics, consciousness, and intellectual activism. The course will be organized around the following objectives: 1. To explore a range of contemporary theoretical perspectives and methodological approaches to the study of social movements; 2. To focus on the relationship between race, gender, class, culture, and politics in the African diaspora; 3. To study the historical development of organized struggles, social protests, uprisings, revolutions, insurgencies, and rebellions; 4. To examine the political agency of African descendant peoples in the global struggle for liberation and citizenship.

1 Course Unit

ANTH 2570 Caribbean Music and Diaspora
This course considers Caribbean musics within a broad and historical framework. Caribbean musical practices are explored by illustrating the many ways that aesthetics, ritual, communication, religion, and social structure are embodied in and contested through performance. These initial inquiries open onto an investigation of a range of theoretical concepts that become particularly pertinent in Caribbean contexts—concepts such as post-colonialism, migration, ethnicity, hybridity, syncretism, and globalization. Each of these concepts, moreover, will be explored with a view toward understanding its connections to the central analytical paradigm of the course—diaspora. Throughout the course, we will listen to many different styles and repertories of music ranging from calpso to junkanoo, from rumba to merengue, and from dance hall to zouk. We will then work to understand them not only in relation to the readings that frame our discussions but also in relation to our own North-American contexts of music consumption and production. (Formerly Music 258).

Also Offered As: AFRC 3570, LALS 3570, MUSC 3570
1 Course Unit

ANTH 2590 Nutritional Anthropology
The course is an introduction to nutritional anthropology, an area of anthropology concerned with human nutrition and food systems in social, cultural and historical contexts. On the one hand, nutritional anthropologists study the significance of the food quest in terms of survival and health. On the other hand, they also know that people eat food for a variety of reasons that may have little, if anything, to do with nutrition, health, or survival. While the availability of food is dependent upon the physical environment, food production systems, and economic resources, food choice and the strategies human groups employ to gain access to and distribute food are deeply embedded in specific cultural patterns, social relationships, and political and economic systems. Thus, nutritional anthropology represents the interface between anthropology and the nutritional sciences, and as such, can provide powerful insights into the interactions of social and biological factors in the context of the nutritional health of individuals and populations. Because food and nutrition are quintessential biocultural issues, the course takes a biocultural approach drawing on perspectives from biological, socio-cultural and political-economic anthropology. Course content will include: a discussion of approaches to nutritional anthropology; basics of human nutrition; food systems, food behaviors and ideas; methods of dietary and nutritional assessment; and a series of case studies addressing causes and consequences to nutritional problems across the world.

ANTH 2730 Global Health: Anthropological Perspectives
In some parts of the world spending on pharmaceuticals is astronomical. In others, people struggle for survival amid new and reemerging epidemics and have little or no access to basic or life-saving therapies. Treatments for infectious diseases that disproportionately affect the world’s poor remain under-researched and global health disparities are increasing. This interdisciplinary seminar integrates perspectives from the social sciences and the biomedical sciences to explore 1) the development and global flows of medical technologies; 2) how the health of individuals and groups is affected by medical technologies, public policy, and the forces of globalization as each of these impacts local worlds. The seminar is structured to allow us to examine specific case material from around the world (Haiti, South Africa, Brazil, Russia, China, India, for example), and to address the ways in which social, political-economic, and technological factors -- which are increasingly global in nature -- influence basic biological mechanisms and disease outcomes and distribution. As we analyze each case and gain familiarity with ethnographic methods, we will ask how more effective interventions can be formulated. The course draws from historical and ethnographic accounts, medical journals, ethical analyses, and films, and familiarizes students with critical debates on globalization and with local responses to globalizing processes.

1 Course Unit
ANTH 2762 Everyday Life in Africa
This course will explore the different dimensions of everyday life in Africa. Everyday life has been described by Agnes Heller (1978) as "the secret yeast of history." What constitutes this "yeast of history" in contemporary Africa? In exploring everyday life, we will examine the existing (in)capacities in the structures of state and society in Africa for human well-being in relation to the differences between political life (bios) and bare life (zoe). The course engages with the everyday life in terms of how social, economic, and political lives are constituted and the implications of this process for whether Africans live well or not, how they die, and their struggles for alternative lives. With (ethnographic) accounts and perspectives from different countries in Africa, the course focuses deeply on how to understand and explain the conditions under which everyday social needs and economic necessities are turned into political/existential struggles as well as the conditions under which political exigencies can transform into economic, social and bodily fatalities. The overarching questions that will animate this course include these: What are the prevalent conditions of everyday life in Africa? What and who determines (in)eligibility regarding the everyday tools of good life and human survival? How are these determinations related to the differential distribution of potential and/or actual injury, harm, and damage to human life and the conditions of its survival? What can ethnographic insight contribute to our understanding of everydayness in Africa? The roles of sexualities, gender, generation, humor, identities, racism, hate, memory, memorial, transactions, etc., in the construction, reconstruction, and deconstruction of daily life – and death – in the continent will be examined. Audio-visual materials will be used to analyze important themes about quotidian life in Africa.

Also Offered As: AFRC 2762, SOCI 2905
1 Course Unit

ANTH 2790 Theorizing the Role of Affect in Society and Culture
Affect has held a prominent place in social theory, including the role of fear in Hobbes’s formulation of the origins of civil society, respect (for the sacred) in Durkheim’s theory of religion, and guilt in Freud’s understanding of civilization. Can such formulations be brought into conversation with the biological understandings of human beings from Darwin up to recent developments in affective neuroscience? This reading and discussion-based seminar focuses on such questions. We explore the terrain of social, cultural, and psychoanalytic theory in light of conceptualizations growing out of the biological side of anthropology. We trace social and cultural theorization through the twentieth developments, including A.R. Radcliffe-Brown on joking and lamentation, Frantz Fanon on hate and guilt in race relations, Clifford Geertz on long-lasting moods and motivations, and others. We also explore twenty-first century developments in affect theory within anthropology and adjacent disciplines, including works by Lauren Berlant and Kathleen Stewart. During the course of the semester, students will write short reading response papers, and lead class discussions based on their responses. They will also work on and submit a final term paper based on their exploration of some aspect of the literature in which they are especially interested.

1 Course Unit

ANTH 2840 World Heritage in Global Conflict
Heritage is always political. Such a statement might refer to the everyday politics of local stakeholder interests on one end of the spectrum, or the volatile politics of destruction and erasure of heritage during conflict, on the other. If heritage is always political then one might expect that the workings of World Heritage might be especially fraught given the international dimension. In particular, the intergovernmental system of UNESCO World Heritage must navigate the inherent tension between state sovereignty and nationalist interests and the wider concerns of a universal regime. The World Heritage List has almost 1200 properties has many such contentious examples, including sites in Iraq, Mali, Syria, Crimea, Palestine, Armenia and Cambodia. As an organization UNESCO was born of war with an explicit mission to end global conflict and help the world rebuild materially and morally yet has found its own history increasingly entwined with that of international politics and violence. Fall or Spring
Also Offered As: CLST 3319, NELC 2920
1 Course Unit

ANTH 2840 World Heritage in Global Conflict
This course examines the futures of urbanization in most of the world. With cities in “developing” countries set to absorb 95% of urban population growth in the next generation, the course explores the plans, spaces and social experiences of this dramatic urban century. How do proliferating urban populations sustain themselves in the cities of Latin America, Africa and Asia? What kinds of social and political claims do these populations make more just and sustainable cities? The course investigates the ongoing experiences in urban planning, infrastructure development and environmental governance in cities of the Global South. In so doing, it imagines new forms of citizenship, development and sustainability that are currently unfolding in these cities of the future.

Also Offered As: URBS 2940
1 Course Unit

ANTH 2970 Nature Culture Environmentalism
Water wars, deforestation, climate change. Amidst many uncertain crises, in this course we will explore the emergent relationship between people and the environment in different parts of the world. How do people access the resources they need to live? How, when and for whom does ‘nature’ come to matter? Why does it matter? And what analytical tools we might use to think, mitigate and adapt to the effects of climate change? Drawing together classical anthropological texts and some of the emergent debates in the field of climate studies and environmental justice, in this class we focus on the social-ecological processes through which different groups of humans imagine, produce and inhabit anthropogenic environments.
Fall
Also Offered As: SAST 2970, URBS 2970
1 Course Unit
ANTH 2978 Just Futures Seminar II: Health and Healing in Abiayala (the Americas)
Health and Healing in Abiayala (the Americas) will introduce students to ecosocial notions of health, colonialism's contributions to ill-health, and decolonial action as healing action. Part one of the course introduces general concepts of body, health, and illness in biomedical models. It then pivots to the relational and ecosocial practices of body, health, and wellbeing among many First Peoples of the Abiayala, highlighting “radical relationality.” For many First Peoples, community includes humans, plants, animals, ancestors, and earth beings (such as the land, mountains, rivers, and lakes) that are materially, socially, and spiritually interdependent. These beings work together to maintain a “shared body” through practices of reciprocal care. Part two of the course examines how the shared body has been and is threatened by the colonization of Indigenous lands and bodies through (e.g.) land dispossession, pollution, extractive industry, lack of access to quality education and medical care, forced sterilization, forced removal of children, exploitative economic relations, and political violence. The third part of the course will follow how First Peoples of Abiayala are healing from the physical, social, and spiritual wounds of colonialism through decolonial action. First Peoples are creating their own healing centers and ecological protection agencies, engaging in Land Back movements, in legal and direct-action processes to protect the shared body from extractive industry, and reproductive justice movements. Healing is future oriented, powering the “radical resurgence” of First Peoples. Some questions addressed in this class include, where does the body begin and end? What constitutes personhood? How does continuing colonization affected indigenous peoples’ health—and that of all peoples? How do indigenous peoples use ancestral knowledges, relation ethics, and local ecologies to help heal historic and contemporary wounds to power their futures? Is there a political dimension to healing? How do autonomy and self-determination figure into healing and wellbeing? Not Offered Every Year

1 Course Unit

ANTH 3015 The Maya in Mesoamerica: The Development of Ancient Maya Culture within its Broader Regional Context
This class offers both an introduction and examination of Ancient Maya culture and society reflecting the major new finds offered by recent research. Fusing archaeology, epigraphy (the decipherment of Maya writing), art history, and ethnography, with the emerging technologies of LiDAR, speleothem, and isotopic analyses, “The Maya in Mesoamerica” explores the development of a vibrant, distinctive, and visually rich society, and how it fits into the wider history of a Mesoamerican region stretching from Mexico to Nicaragua. Including Maya inscriptions, we will be interested not only in etic historical studies in the present day but the emic voice of the only ancient American people to leave us a copious body of literature. Not Offered Every Year
1 Course Unit

ANTH 3022 Bodies of Water: Conflicts and Collaborations around Wetlands and Watersheds
In less than half a decade, the idea that “nature” possesses inalienable rights akin to human rights has gone from a strictly theoretical concept to the basis of policy changes in several countries and U.S. municipalities. This seminar will introduce students to current legal, political, ethical, and practical debates about the implementation and impacts of granting “rights to nature” in these different contexts with a particular focus on the rights associated with bodies of water. We will begin by examining how the Community Environmental Legal Defense Fund (CELDF) supported citizens of Tamaqua, Pennsylvania to write the world's first local "rights of nature" ordinance. We will then go on to compare the politics of "rights of nature" cases in Ecuador, New Zealand, India, and Colombia paying special attention to the cases of rivers. We will focus on the ways biocentric constitutional moves may transform concepts and understandings of environmental justice and socio-environmental conflicts. In particular, how the recognition of "nature" as a victim of war may transform understandings of violence, and hence, approaches to constructing peace and engaging and reparative and restorative practices within the larger framework of planetary and community efforts to mitigate climate change, deforestation, and the degradation of watersheds and wetlands. Lastly, we will explore the possibilities and tensions between community decision-making, the "rights of nature," and national level policies regarding the intensification of extractive activities and questions of territorial ordinance as they relate to multiple bodies of water. Not Offered Every Year
Also Offered As: LALS 3022
1 Course Unit

ANTH 3030 Research Methods in Cultural Anthropology
This undergraduate seminar is about how ethnographers do research. It introduces fundamental concepts and techniques - research design, participant observation, interviews, questionnaires, field notes, archives, data collection and analysis. It also addresses ethical and legal issues- cultural protocols, intellectual property rights, collaborative anthropology, and institutional review boards. Students will conduct original ethnographic research in partnership with the Netter Center. Not Offered Every Year
1 Course Unit

ANTH 3045 Oil to Diamonds: The Political Economy of Natural Resources in Africa
This course examines the ways in which the processes of the extraction, refining, sale and use of natural resources — including oil and diamond — in Africa produce complex regional and global dynamics. We explore how values are placed on resources, how such values, the regimes of valuation, commodification and the social formations that are (re)produced by these regimes lead to cooperation and conflict in the contemporary African state, including in the relationships of resource-rich African countries with global powers. Specific cases will be examined against the backdrop of theoretical insights to encourage comparative analyses beyond Africa. Some audio-visual materials will be used to enhance the understanding of the political economy and sociality of natural resources.
Fall
Also Offered As: AFRC 4500, PSCI 4130, SOCI 2904
Mutually Exclusive: AFRC 5700
1 Course Unit
ANTH 3050 Anthropology and Policy: History, Theory, Practice
From the inception of the discipline, anthropologists have applied their ethnographic and theoretical knowledge to policy issues concerning the alleviation of practical human problems. This approach has not only benefited peoples in need but it has also enriched the discipline, providing anthropologists with the opportunity to develop new theories and methodologies from a problem-centered approach. The class will examine the connection between anthropology and policy, theory and practice (or ‘praxis’), research and application. We will study these connections by reading about historical and current projects. As an ABCS course, students will also volunteer in a volunteer organization of their choice in the Philadelphia area, conduct anthropological research on the organization, and suggest ways that the anthropological approach might support the efforts of the organization.
Not Offered Every Year
1 Course Unit

ANTH 3052 An Anthropological Approach to Bioethics
Bioethics and anthropology have a complicated relationship. Though the two disciplines have long studied overlapping topics, the contribution of anthropological work to bioethical discussions and associated health policy interventions has been limited. This course will investigate whether and how anthropology can contribute to ethics and characterize the unique perspective that the discipline adds to bioethics topics. We will begin by carrying out an anthropology of bioethics, exploring how bioethics developed as a field with a specific philosophical and political orientation and a particular conception of which issues in health, illness, and medicine are worthy of attention as ethical problems. Next, we will clarify how anthropology can contribute to bioethical theory and debate by considering decades-old, ongoing debates about the relevance of (descriptive) social scientific findings to the development of (prescriptive) bioethics frameworks. Finally, we will apply an anthropological lens to bioethical problems. We will use anthropology's global, ethnographic orientation to explore a series of classic bioethics topics (e.g., the rights of research subjects, the allocation of medical resources, the uses and ramifications of genetic testing, the withdrawal of life-sustaining care), examining how anthropologists’ conclusions about these topics might differ from bioethicists’, why, and with what ramifications.

Also Offered As: ANCH 0100, ANCH 0101, or ANCH 0102
1 Course Unit

ANTH 3090 Psychoanalysis and Anthropology
This course will introduce students to the rich literature that has grown up around the encounter between psychoanalysis and anthropology, from totem and taboo, to studies of the Oedipus complex, child-rearing practices, ritual symbolism, mythology, and dreams. The class will also look to the future, endeavoring to examine as well such issues as the role of computers (are they self objects?) and the internet (including such online games as "Second Life"), dreams in space alien abduction narratives, sexuality in advertising, political psychology, and other contemporary issues. This course counts towards the Psychoanalytic Studies (PSYS) Minor.
Not Offered Every Year
1 Course Unit

ANTH 3101 Disasters in the Ancient Mediterranean World
Natural disasters occupy a powerful place in our imagination. Stories of floods, earthquakes, and storms excite and horrify us, and communities mobilize their resources quickly in response to these events. In the ancient Mediterranean world, natural disasters could take on potent meaning, indicating the anger or disfavor of the gods, acting as warnings against certain courses of action, or confirmations of individuals’ fears or suspicions about the world in which they lived. In this course, we explore the evidence for some disasters in the ancient Mediterranean world, the ways in which contemporaries reacted to those disasters and interpreted their causes. This project is, of necessity, multidisciplinary, involving textual, archaeological, geological, and comparative materials and drawing on methodologies from history, political and archaeological science, and the emerging field of disaster studies. In the process, we will gain an appreciation of the social structures of communities in the period, the thought-world in which they operated, and the challenges and opportunities that attend a project of this sort. No prior knowledge of Ancient History is required, although it would be useful to have taken an introductory survey course such as ANCH 0100.
Also Offered As: ANCH 3201, CLST 3201
1 Course Unit

ANTH 3110 Transdisciplinary Environmental Humanities
Emergent transdisciplinary fields, such as the environmental and medical humanities, reflect a growing awareness that responses to contemporary environmental dilemmas require the collaborative work of not only diverse scientists, medical practitioners, and engineers, but also more expansive publics, including artists, urban and rural communities, social scientists, and legal fields. This course is inspired by the need to attend to environmental challenges, and their health, justice, and knowledge production implications, as inherently social concerns. The class is co-taught by faculty from the School of Arts and Sciences and the School of Medicine, and will address the challenges and possibilities of working across disciplinary boundaries, building collaborative affiliations, and negotiating frictions between diverse methodologies and epistemological approaches. Dr. Kristina Lyons from the Department of Anthropology brings years of experience collaborating with scientists, small farmers, indigenous communities, lawyers, and judges in Colombia and Chile on watershed restoration projects, soil degradation, toxicity, and the implementation of socio-ecological justice. Dr. Marilyn Howarth is a medical doctor from the Center of Excellence in Environmental Toxicology of the School of Medicine and has experience engaging the public, legislators and regulators around environmental health issues affecting the quality of air, water, soil and consumer products. Through their different lenses, they will foster interdisciplinary environmental collaboration and scholarship by engaging students in discussions and research that bring together the arts and sciences regarding issues of urban air pollution, soil remediation, deforestation, and water contamination, among other environmental health problems. This class offers a unique opportunity for students from engineering, natural and social sciences, humanities, and the arts to learn to converse and collaborate around pressing socio-environmental and public health issues.
Spring
Also Offered As: LALS 3110
1 Course Unit
ANTH 3130 Gender, Capitalism, and Environment
What is “the economy,” and how is “it” gendered? How is access to land, resources, and livelihood options mediated by hierarchies of gender that are co-constituted with race, class, age, and ability? How are gender equality, economic justice, and environmental interrelated?
This course grapples with these and other foundational questions concerning the ways that gender, economy, and environment are intimately linked. Using case studies from around the world, we will consider Marxist-feminist, ecofeminist, political ecology, queer, critical race, and postcolonial approaches to understanding how abstract economic processes are materialized in social relations and in human-environment interactions. From women peasant farmer’s online practices in Myanmar to land-grabs and contemporary witch-hunting in African countries, together we will engage with the material histories, politics, and power relations shaping the uneven distribution of wealth and resources among gendered populations - and how different social groups are mobilizing to contest these gender, economic, and environmental inequalities together. In addition to our core questions, this course asks: How is capitalism itself gendered, and with what effects? What is considered productive work, and how are categories of worker gendered? Why are women overrepresented as peasant farmers in global south countries? How and why is climate change gendered? How and why are solutions to climate change and other environmental problems gendered? What are the gendered benefits and costs of sustainable development, and who bears them? Most of these questions lack clear answers, but by the end of the semester you will be able to give compelling oral and written explanations in response to each. Using a diverse array of texts - including film, podcasts, poetry, and peer-reviewed academic literature - this course will equip students with tools to thoughtfully and ethically engage with academic, activist, policy, and development spaces that are concerned with the intersection of gender, economy, and the environment.
Also Offered As: GSWS 3130
1 Course Unit

ANTH 3137 Environmental (In)Equalities
This seminar focuses on the interrelations of equity, justice, and environmental crisis. Beginning with a discussion of the emergence of climate justice as a critical term in international negotiations, we will consider several dimensions of substantive and historical inequality and the framing of justice as an environmental right as they arise from these settings. Broadening the discussion to include a larger framework of environmental issues in relation to inequality, the course will draw on considerations of geographies of vulnerability, exploitation as inhabited risk, and ecological debt in relation to “natural disaster” or environmental crisis. Moving from an historical account of structural inequalities in socio-natural systems to contemporary environmental politics, we will then discuss the disjuncture in environmental movements and aspirations between the global south and north, and particularly, how justice and equity figure into environmentalism(s) on a global basis. Finally, we discuss emerging frameworks including Just Transition movements, ecological sovereignty and rights discourses, and flourishing and capabilities approaches.
Not Offered Every Year
Mutually Exclusive: ANTH 5137
1 Course Unit

ANTH 3180 Anthropology and Praxis
This course focuses on real world community problems, engaged scholarship, and the evaluation of actively-running Penn programs intended to improve social conditions in West Philadelphia. Two trends emerge in public interest social science that students will explore through research and evaluation: 1.) merging problem solving with theory and analysis in the interest of change motivated by a commitment to social justice, racial harmony, equality, and human rights; and 2.) engaging in public debate on human issues to make the research results accessible to a broad audience. As part of the course, students will learn the foundations of anthropology, social theory, and evaluation as they work with qualitative and quantitative data while conducting an evaluation based on community and partner need. Students will gain direct experience conducting evaluation research as a collaborative process and have an opportunity to engage in academically-based community service with a focus on social change.
Not Offered Every Year
Mutually Exclusive: ANTH 6180
1 Course Unit

ANTH 3215 Archaeology of Animals
This course introduces the study of animal bones from archaeological sites. Faunal analysis is an interdisciplinary science which draws methods from archaeology, biology, and paleontology. Bones, shells, and other remains yield evidence for the use of animals by humans, and evidence for the biology of animals and for past environments. The course will focus on research approaches to important transitions in human-animal relationships: the development of human hunting and fishing, animal domestication, early pastoralism, and the emergence of market economies in animal products. Class presentations will include lectures and discussion concerning research design and archaeological case material, with additional videos, sidework with field and laboratory equipment, and supervised work identifying and describing archaeological materials from the University Museum’s collections. This class is taught in the Zooarchaeology Laboratory of the Center for the Analysis of Archaeological Materials.
Not Offered Every Year
Mutually Exclusive: ANTH 5215
1 Course Unit

ANTH 3219 Mining Archaeology
In ancient times, materials such as stone and metals were used to produce artifacts including pigments, jewelry, tools, and weapons. This course is designed to introduce students to research on the early exploitation of mineral resources. Which techniques were used to access and process raw materials in antiquity? Which archaeological methods can be used to investigate these features and artifacts? The course will provide worldwide examples through time, ranging from Stone Age flint mining, Iron Age rock salt mining to Medieval silver mining. Ethnographic studies and hands-on activities will contribute to our understanding of mining in archaeology, and artifacts from the Museum’s collections will undergo scientific analysis in the Center for the Analysis of Archaeological Materials.
Spring
Also Offered As: CLST 3314, NELC 4950
Mutually Exclusive: ANTH 5219
1 Course Unit
ANTH 3221 Surface Archaeology
Non-invasive and non-destructive methods make up an ever-greater proportion of archaeological investigations, for both intellectual and practical reasons. These methods comprise collection of data from the surface (pedestrian surface survey, geophysical prospection, geoarchaeology) and from above-ground platforms (drones, aircraft, balloons, kites, satellites), using a variety of sensors from human perception to multispectral scanning devices. The data acquired from these methods complement the contextual information drawn from traditional excavation, but also allow the archaeologist to address diverse research questions at a scale much greater than the excavated site. Aspiring archaeologists should have a good working knowledge of surface archaeological methods. In this course, we will delve deeply into these methods, and read and analyze case studies to expose strengths and weaknesses and to identify best practices. Students will have the opportunity for hands-on training in the Philadelphia area or elsewhere.
Not Offered Every Year
Also Offered As: CLST 3321
Mutually Exclusive: CLST 5321
1 Course Unit

ANTH 3230 Forensic Anthropology
This course will investigate and discuss the various techniques of analysis that biological anthropologists can apply to forensic cases. Topics include human osteology, the recovery of bodies, the analysis of life history, the reconstruction of causes of death, and various case studies where anthropologists have contributed significantly to solving forensic cases. Discussions will include the limitations of forensic anthropology and the application of DNA recovery to skeletal/mummified materials.
Not Offered Every Year
Also Offered As: CRIM 2230
1 Course Unit

ANTH 3235 The Past Preserved: Conservation In Archaeology
This course explores the scientific conservation of cultural materials from archaeological contexts. It is intended to familiarize students with the basics of artifact conservation but is not intended to train them as conservators. The course will cover how various materials interact with their deposit environments; general techniques for on-site conservation triage and retrieval of delicate materials; what factors need to be considered in planning for artifact conservation; and related topics. Students should expect to gain a thorough understanding of the role of conservation in archaeology and how the two fields interact.

Mutually Exclusive: ANTH 5235
1 Course Unit

ANTH 3240 Plants and Society
Interactions between humans and the living landscape around us have played - and continue to play - a fundamental role in shaping our worldview. This course is designed to introduce students to the diverse ways in which humans interact with plants. We will focus on the integration of ethnographic information and archaeological case studies in order to understand the range of interactions between humans and plants, as well as how plants and people have profoundly changed one another. Topics will include the origins of agriculture; cooking and plant processing; human health and the world of ethnomedicine; and poisonous and psychoactive plants. We will examine ancient plant material firsthand at the Center for the Analysis of Archaeological Materials (CAAM) and will handle botanical ecofacts from the Penn Museum's collections. Students will also carry out a substantial research project focused on an archaeological culture and plant species of their own interest.
Not Offered Every Year
Also Offered As: CLST 3316
Mutually Exclusive: ANTH 5240
1 Course Unit

ANTH 3244 Introduction to the Human Skeleton
An introduction to the anatomy and biology of the human skeleton. Laboratory work will be supplemented by lectures and demonstrations on the development structure, function, and evolution of the human skeleton.
Not Offered Every Year
Mutually Exclusive: ANTH 5244
1 Course Unit

ANTH 3307 Intro to Digital Archaeology
Students in this course will be exposed to the broad spectrum of digital approaches in archaeology with an emphasis on fieldwork, through a survey of current literature and applied learning opportunities that focus on African American mortuary landscapes of greater Philadelphia. As an Academically Based Community Service (ABCS) course, we will work with stakeholders from cemetery companies, historic preservation advocacy groups, and members of the African Methodist Episcopal Church to collect data from three field sites. We will then use these data to reconstruct the original plans, untangle site taphonomy, and assess our results for each site. Our results will be examined within the broader constellation of threatened and lost African American burial grounds and our interpretations will be shared with community stakeholders using digital storytelling techniques. This course can count toward the minor in Digital Humanities, minor in Archaeological Science and the Graduate Certificate in Archaeological Science.
Also Offered As: CLST 3307, NELC 3950
Mutually Exclusive: CLST 5620
1 Course Unit
ANTH 3310 Historical Ecology
The relationship between the human beings and the environment is complex, dynamic, and contentious. Historical ecology addresses this relationship over the long term through the physical signatures and patterns of past human activity that are embedded in landscape. In some preindustrial cases, humans caused environmental degradation and societal collapse. In other situations, people transformed, created, and managed resources for sustainable lifeways over centuries and increased biodiversity. This seminar will examine the Myth of the Ecologically Noble Savage, the Myth of the Pristine Environment, domestication of landscape, biocultural diversity, the alliance between native peoples and Green Politics, and the contribution of past societies to appropriate technology, sustainable development, and biodiversity through the historical, ethnographic, and archaeological record.
Not Offered Every Year
1 Course Unit

ANTH 3328 Performing Culture, Native American Arts
This course analyzes cultural performances as sites for the formation, expression, and transmission of social identity. Students will read ethnographies, critiques, and reports of performance genres including ritual, theater, music, dance, art, and spoken word, with a particular focus on Native American and Indigenous arts and expressions. Topics include: expressive culture as survivance; debates around authenticity and invented traditions; public identity and sexuality; political resistance; the effects of globalization; transnationalism and hybridity; cultural appropriation; and the transformation of folk performances in the wake of modern media.
Fall or Spring
1 Course Unit

ANTH 3340 Feminist Ethnography
This course will investigate the relationships among women, gender, sexuality, and anthropological research. We will begin by exploring the trajectory of research interest in women and gender, drawing first from the early work on gender and sex by anthropologists like Margaret Mead and Ruth Benedict; moving through the 1970s and 1980s arguments about gender, culture, and political economy; arriving at more current concerns with gender, race, sexuality, and empire. For the rest of the semester, we will critically read contemporary ethnographies addressing pressing issues such as nationalism, militarism, neoliberalism and fundamentalism. Throughout, we will investigate what it means not only to “write women’s worlds”, but also to analyze broader socio-cultural, political, and economic processes through a gendered lens. We will, finally, address the various ways feminist anthropology fundamentally challenged the discipline’s epistemological certainties, as well as how it continues to transform our understanding of the foundations of the modern world.

Also Offered As: AFRC 3340, GSWS 3340
1 Course Unit

ANTH 3360 The Peopling of the Americas
The peopling of the Americas is a question that has intrigued scholars and laymen for over 500 years. The origin of Native Americans was also a seminal issue during the emergence of American Anthropology as a discipline at the turn of the 20th century, with research on this topic animating current studies of ethnohistory, indigenous archeology, post-colonialism and repatriation. The proposed course will review the scholarship dedicated to describing this long history from an interdisciplinary perspective. It will explore their roots in the expansion of modern humans into Eurasia, evaluate the new archeological and genetic research that has fundamentally altered our understanding of the migration history and diversity of indigenous peoples in the American continents, and examine issues of identity, ethnicity and cultural heritage in contemporary Native populations that extend from this knowledge. The course will further draw on the instructor’s fieldwork experience working with indigenous communities in Alaska, Canada, the Lower 48, Mexico and the Caribbean, as well as native Siberians in Russia, where the cultural and biological roots of ancestral Native American populations lie.
Not Offered Every Year
Also Offered As: LALS 3360
1 Course Unit

ANTH 3368 Anthropology of Museums
This course examines museums as sites where issues of Indigenous identity, memory, place and power intersect. Museums have long been engaged in the selective preservation, representation, and contextualization of Indigenous objects, cultures, and histories. We will examine antiquarian impulses that inspired the collecting of curiosities, scientific studies that drove the collection of biological specimens, and nationalist ideals that shaped monuments to house imperialist memories. Museums are now sites for complex, often contentious discourse around Indigenous collections. Students will review histories of local and national collecting processes, with a particular focus on Native American collections and concerns. We will also consider how Indigenous curators and new kinds of museums have developed innovative displays and interpretations.
1 Course Unit

ANTH 3376 Ethnographic Approaches to Urban Athletics and Human Movement
Rooted in the rubric of public interest social science, the course focuses on bridging theory and practice motivated by a commitment to social justice through original ethnographic research. In particular, this course will focus on kinesiology and the anthropology of sports and well-being through intense analysis of the Young Quakers Community Athletics (YQCA) program, a collaboration between the Netter Center for Community Partnerships and Penn Athletics. In guest lecturers from multiple disciplines will help to round out the course. The core learning objective is to bring a broad range of specialized expertise to foster a holistic examination of a complex institutional partnership intended to promote positive social transformation and improved human health and well-being.
1 Course Unit
ANTH 3390 Imagining Environmental Justice
Advanced seminar in Environmental Humanities centered around issues of international environmental justice. Sustained engagement with Indigenous North American, African American, Palestinian, and South African imaginary traditions will highlight diverse ways of relating to land, water and nonhuman animals challenge that challenge capitalist and colonial logics of extraction. See the English Department’s website at www.english.upenn.edu for a description of the current offerings.

Mutually Exclusive: ANTH 5407
1 Course Unit

ANTH 3420 Dispossessions in the Americas: The Loss and Recovery of Indigenous Lands, Bodies, and Heritage
Settler colonialism in the Americas is both material and ideological, rooted in dispossession that are traceable to historical conquest, yet marked in the present. To rectify dispossession is to look both backwards and forwards, to repair material losses and to attend to the values and ideologies that hybridize our present. This course delves into case histories of Indigenous, Latinx, Afro-descendant, and other marginalized populations who have been dispossessed of territory, natural resources, freedom, political rights, and cultural heritage. Our primary goals are the following: first, we seek to document specific territorial, embodied, and heritage dispossession through the mechanisms of deceit, disease, and warfare (both broadly and specifically); second, we aspire to outline and identify models and processes that promote recovery and restorative justice. Faculty from several departments and programs (anthropology, history, Latin American studies, Native American studies, gender studies, etc.) will present guest lectures highlighting their critical studies of archaeological, museological, artistic, and other processes of dispossession and recovery. Their case studies include: counter-mapping techniques for identifying indigenous lands; mapping the movements of bodies and objects among museums; tracking trends in heritage loss and recovery; etc. Students will learn about useful resources and initiatives for decolonizing, and will gain experience in understanding dispossession of the past, while applying restorative methodologies in the present.
Fall, odd numbered years only
1 Course Unit

ANTH 3424 Political Ecologies of the City
Cities have been centres of aspiration for much of human history. They have provided a limited yet critical locus for social mobility, both in political and economic terms. As large agglomerations of political and economic power, urban residents have also consumed growing proportions of the earths mineral, food and water resources from the national (and international) body. The contradictory aspects of urban aspiration frame this course. Drawing on the frameworks of political ecology, in this course we think through the cities of the global south to understand how cities are made. To do this, we will first focus on the construction on the liberal city and how it has been occupied, both formally and informally, by urban subjects in most of the world. Next, we will learn about projects through which natural resources have been directed to and through the city. Finally we will conclude with a particular attention to how urban resources are claimed by marginalized migrants, and the particular sorts of governance institutions these practices engender.

Also Offered As: URBS 3424
Mutually Exclusive: ANTH 5424
1 Course Unit

ANTH 3429 Anthropology of the Environment
This seminar draws from social scientific and scientific literatures to explore current themes in the anthropology of the environment. We will investigate the links between climate change science and social science, and the ways in which anthropologists can contribute via in-depth fieldwork methodology and long engagement in issues of society-environment interactions. We will also explore how potential environmental, social, and biological impacts of global warming on the future are being assessed through conceptual paradigms linked to risk, probability, scenario forecasting, tipping points, planetary boundaries, and extinction.
Mutually Exclusive: ANTH 5429
1 Course Unit

ANTH 3444 Human Growth and Development
In this course we will examine key issues and the processes involved in human growth and development. By their very nature, growth and development are biocultural processes that require an integrated analysis of social construction and biological phenomena. As such, we will incorporate insight from evolutionary theory, ecology, developmental biology, psychology, human biology, and cultural anthropology in our study of growth and development. Such an integrated perspective will help students to see that development is not just a biological unfolding from birth through adolescence and adulthood. Rather, development is best understood as process that is deeply intertwined with the environment within which the organism develops. Additionally, we will apply these biocultural and socio-ecological insights to emerging health challenges associated with various developmental stages. The study of human growth and development is useful to all students in biological, health-related, and social sciences. Course enrollment is restricted to juniors, seniors, and graduate students only.
Not Offered Every Year
Mutually Exclusive: ANTH 5444
1 Course Unit
ANTH 3447 From Puberty to Parenting: The Evolutionary Context of Reproduction
This course explores the processes that influence reproduction in human populations. We adopt an evolutionary perspective to examine the factors that have shaped human reproductive physiology and contribute to variation in reproductive parameters between populations. To place human reproduction in a broad evolutionary context, we will consider similarities and differences between humans and other apes in how ecology shapes reproduction. The biology of puberty, pregnancy, hormonal changes across the lifespan, the cessation of reproduction, the impact of parenting behavior on the biology of offspring and parents themselves, and the influence of sex and gender diversity on reproduction will be discussed. Both the ecological and sociocultural factors that influence the steps in the reproductive process will be considered.

ANTH 3451 Historical Archaeology
Archaeology of the Modern World from the Columbian voyage (1492) to the 20th century. Topics such as the rise of early modern Europe, European exploration and colonization, African American Archaeology, Asian American Archaeology, the rise of colonial society, contact with native peoples, the Industrial Revolution, and the archaeology of the 20th century will be covered.
Not Offered Every Year
1 Course Unit

ANTH 3454 Quantitative Analysis of Anthropological Data
This course is designed to provide students with a basic understanding of how to work with and present quantitative data. Topics include graphical display of numerical data, probability, sampling, descriptive and inferential statistics (parametric and non-parametric two-and three group tests, regression and correlation). Using examples drawn from the social sciences and anthropology, the focus is on teaching the logic behind quantitative arguments and statistical tests, rather than on the mathematical formulas, making the course especially relevant for students who do not have a strong background in mathematics. This course fulfills the Colleges Quantitative Data Analysis requirement.
Fall or Spring
Mutually Exclusive: ANTH 5454
1 Course Unit

ANTH 3470 Anthropology of Corporations
Modern business corporations can be characterized as having their own internal cultures, more or less distinct from one another. They also exist within encompassing cultures and cultural flows. At the same time, corporations are producers and disseminators, and thus have effects on their surrounding environments, effects that extend from the local to the global. This course examines modern corporations from these three perspectives through theoretical and ethnographic readings, guest speakers from the corporate world, and independent research conducted by the students. Course requirements include student presentations of their research and readings; one or more take-home exams; and a final research paper.
Fall or Spring
1 Course Unit

ANTH 3480 Colonialism and its Legacies
In this course we explore the history and long-term consequences of European colonial expansion, with a primary focus on Eurasia and the British Empire, though we will range further afield as needed. Rather than attempting a comprehensive historical overview, we will use a series of case studies to illustrate changing understandings of colonialism and associated processes, including anti-colonial movements, decolonization, postcoloniality, and the enduring effects of colonialism in the present. This is a seminar-style course.
Not Offered Every Year
1 Course Unit

ANTH 3520 Music, Religion, Ritual in South and Southeast Asia.
What role does music play in articulating religious identities and spaces? What is the importance of ritual musics as they persist and change in the modern world? How does music reflect and articulate religious ways of thinking and acting? In this course, we explore these and other questions about the interrelations between music, religion, and ritual in South and Southeast Asia. Focusing on India, Sri Lanka, Malaysia, and Indonesia, the course emphasizes musics from Hindu, Buddhist, Muslim and Christian traditions; nevertheless, it draws widely to touch upon sacred musics in Pakistan, Nepal, Burma, Thailand, Vietnam, and among some indigenous peoples in the region. Throughout, we explore ontologies of sound; sonic occurrences in religious structures, public processions, and pilgrimage sites; the construction of religion and ritual as ideas forged through colonial encounter and modern scholarship on religion; the politics of sacred sounds in today’s public spaces and contemporary media, such as television and online; and the surprising fluidity between popular and sacred musical genres.

Also Offered As: MUSC 3520
1 Course Unit
ANTH 3540 Art, Medicine, & Magic: Bodily Remedies
In this activity-centric course, you will explore art, medicine, and magic as entangled approaches for healing human bodies across time, space, and societies. At first glance, artists, doctors, and religious leaders may seem to address questions about bodies and healing in very different ways. Yet, in practice, art, magic, and medicine have been in deep conversation with one another for millennia. 4,000 years ago in Mesopotamia, medical doctors were professional men who had offices, hospital beds, and pharmacological and surgical equipment expertise, but they often worked hand in hand with diviners and exorcists. In rural Haiti today, Haitian Vodou priestesses collect herbs, craft sculptures, and sing as they clean wounds and dispense antibiotics within the course of a single "remed" (remedy). In the United States, megachurches send thousands of doctors on evangelical medical missions each year, while in Colombia, contemporary artists are called on to assuage profound social trauma related to decades of military conflict. Examples like these show that art, magic, and medical practice have long been entangled technologies; sometimes working together, sometimes at odds with one another, these practices have always been in dialogue about what "healing" is and how it can be achieved. Attending to these entanglements this course asks "what does healing look like and feel like - in what ways do humans transform affliction?" Together, we will investigate how everyday bodily experiences of "wellbeing" and "illness" are configured through art, magic, and medical practices across human communities, shaping how people understand and manage disorders from COVID-19 to schizophrenia, from ancestral trauma to breast cancer. Throughout the course, you will use ethnographic case studies & in-class activities to work through three aspects of the core class question: 1) how do art, magic, and medicine work in communities? 2) how are they experienced in communities (who has access to what kind of healing and who doesn’t have access; who can be a healer and who can’t be; what should and does healing/sickness feel like?) 3) how do they approach inequalities? (e.g. how and why are illnesses unequally distributed; what illnesses matter more (and less) than others; which communities should be saved (and which sacrificed). Not Offered Every Year
Also Offered As: AFRC 3540
1 Course Unit

ANTH 3664 Documentary Ethnography for Museum of Exhibition practices
This course will investigate research modalities that center around documentary storytelling in the museum context. During the semester, we will examine research strategies that collaborate with curatorial experts. This class will utilize cinematic techniques that investigate cultural narratives revolving around cultural heritage sites, rituals and ceremonies, artifacts, materials and living traditions. Students will engage Solomon's process of her creation of the new digital and in-gallery content that will reframe the Metropolitan Museum's African art galleries. This semester will culminate in students creating their own short film content that will screen publicly in the gallery at the end of the semester.

1 Course Unit

ANTH 3665 Fables from the Flesh: Black feminist movement and the embodied archive
Drawing inspiration from Harge's multiform fable project FLY | DROWN and Audre Lorde's conception of biomythography, students will trace their interiority to realize and imagine how personal histories, ancestral inheritance, and metaphysics live/move through the body. We will translate and transform stories of the flesh into a series of compositional modalities—which may include text, movement, performance, sound, and installation—to create lexicons that honor subjectivity as form. Informed by surrender, refusal, imagination, and self-sovereignty; we will situate our embodied archives as vessels for fable writing, create and correct myths through movement, and expand our relationship to memory, time, space, and illegibility. Throughout the course, we will turn to Black feminist literary and performance works employing fable, myth, and ancestral legacies including but not limited to: Toni Morrison's Beloved, Aretha Franklin's gospel music, Jaamil Olawale Kosoko's Chameleon, and a close reading of Harge's FLY | DROWN. The room will be grounded in practices of Black fellowship, moving between study group, kickback, ceremony, cypher, and incubator. We will oscillate between these formats depending on the needs of the course and the cohort.

Also Offered As: AFRC 3665, GSWS 3665
1 Course Unit

ANTH 3690 Language and Identity
If language lies at the heart of what it means to be human, then our everyday linguistic and communicative practices lie at the heart of our communal and individual identities. This seminar examines the relationship between 'language' and 'identity,' while also unsettling our preconceived notions about these sociocultural phenomena. We explore a number of interrelated questions: What does what we say (and how we say it) say about who we are? Is it true an individual can 'choose' their identity, and if so, how and why? What is the 'self' and how is it expressed through movement, and expand our relationship to memory, time, space, and illegibility. Throughout the course, we will turn to Black feminist literary and performance works employing fable, myth, and ancestral legacies including but not limited to: Toni Morrison's Beloved, Aretha Franklin's gospel music, Jaamil Olawale Kosoko's Chameleon, and a close reading of Harge's FLY | DROWN. The room will be grounded in practices of Black fellowship, moving between study group, kickback, ceremony, cypher, and incubator. We will oscillate between these formats depending on the needs of the course and the cohort.
Fall, odd numbered years only
1 Course Unit
ANTH 3766 Cultures of Surveillance
Developments in digital technology have generated urgent political discussions about the pervasive role of surveillance in our everyday life, from the mundane to the exceptional. But surveillance has a much longer history. In this course, students will learn to think and write critically about the historical, socio-cultural, and political dynamics that define surveillance today. This course asks: how can we historicize what we call surveillance to understand its political and social implications beyond what appears in the document caches of the NSA or on a Black Mirror episode? What role does identity and identification play in surveillance? How do surveillance and computational technologies produce racializing effects? Students will apply course concepts to technologies of daily use, such as self-tracking devices like fitbits or identity documents, and reflect on debates surrounding race, policing, imperialism, and privacy. Through primary source materials, films, podcasts, and key texts, we will engage in a cross-cultural exploration of the multi-faceted phenomena of surveillance technology. Through regular writing assignments, such as surveillancediaries, students will analyze and articulate how they understand surveillance to operate in various domains of everyday life. In this course, students will: (1) Apply course concepts to their lived experience, from securitized architecture to search engines, in order to understand how surveillance operates in everyday life; (2) Analyze how historical context has shaped the current configuration of securitization and surveillance on a global scale; (3) Use ethnographic approaches to study the interaction between individuals, their social relations, and technologies of surveillance.

ANTH 3770 Black Speculative Futures
Why do black cultural producers turn to the speculative? What, in turn, is speculative about blackness? These questions frame this seminar’s exploration of how black artists, theorists, and activists imagine different futures, often in the service of critiquing power asymmetries and creating radical transformation in the present. We will explore how the speculative works differently across black literature, visual culture and performance. Additionally, inspired by the multi-disciplinary work that we encounter in the course, we will experiment with crafting our own embodied speculative art in order to better understand its function as both art practice and politics. The course will be divided between discussions centered on close reading of primary and secondary material and creative writing/movement exploration (no previous movement experience necessary). Occasional guest lectures with visiting artists will provide additional fodder for our critical and creative work.

Also Offered As: AFRC 3770, FNAR 3770
1 Course Unit

ANTH 3780 The Biology of Inequality
What is a more important predictor of how long you will live, the genes you inherit from your parents or the zip code where you were raised? In this class, we will try to answer this question and others regarding the origins of social disparities in health in the US. The course will also consider the broader global context, and ask why the US spends so much money on health care, but lags behind many nations in key indicators of population health. We will examine how social stratification by race/ethnicity, national origin, sexual orientation, education, and neighborhood quality shapes our biology and the health status of individuals, families, and populations; and, conversely, how health itself can be a fundamental determinant of key social outcomes such as educational achievement. This class takes a biocultural perspective seeking to understand how social inequalities interact with human biology, especially nutrition, health, and physiological stress. The course begins by reviewing perspectives on various forms of inequality and the ways inequalities become embodied as biology (including a review of biological systems and processes), and introduces several overlapping biocultural models that have emerged from anthropology and public health. A series of readings and case studies follow that link some aspect of human biology (nutrition, health, reproduction, psychosocial stress) to poverty and inequalities, and try to present both quantitative and qualitative aspects of these linkages, as well as how inequalities and poor health reinforce and reproduce each other. In order to be successful, this class requires engagement, participation, and discussion.
Not Offered Every Year
1 Course Unit

ANTH 3804 Sighting Black Girlhood
The COVID-19 pandemic exposed the deep inequities of our social systems, and protests against police killings drew broader attention to anti-Black state violence worldwide, yet the gendered dimensions of these problems are not always fully understood. While many in the public have come to recognize the suffering of Black boys and men as acute and eventful, Black girls’ suffering has remained largely invisible, a slow confluence of violences that too often go unaddressed. As one way to bring the issues facing Black girls globally to public attention, and to celebrate and support Black girls, this course will provide a background for understanding the challenges faced by Black girls in Philadelphia, Jamaica, and South Africa. We will frame these challenges historically and geopolitically, drawing attention to the issues that contribute to the invisibility of the ordinary Black girl in diverse sites, as well as the resources that will begin to address them. This course also aims to equip students to understand the relationships between research and creative work, and to see artistic production as a catalyst for community-building and critical thinking and action. Toward this end, we will work with a number of partners in Philadelphia, including the Colored Girls Museum and Black Lives Matter-Philly. Because this course is part of a broader project, we will travel as a class to Jamaica during the summer of 2022 and students will participate in a range of projects there, working with partners in the arts, community engagement, and legal advocacy. The question motivating our project is: What are the personal, psychic, spiritual, and economic costs and benefits associated with Black girls fully exercising their humanity?

ANTH 3820 Writing, Society & Power: How Pre-Modern Scripts Shaped Societies and Political Action
The written word, expressed in a range of different visual media and materials, envelops us today in ways as ubiquitous as it is largely unexamined as a cultural artifact. This course examines the power of writing through societies other than our own, examining a range of ancient scripts from two linked perspectives. It looks at them first as semiotic systems with specific origins and structures, and then moves to the purposes to which they were put. The overriding focus here is not writing as prosaic tool, but how it was used to create and sustain social and political power. Preferred prerequisite: previous class in social studies and humanities
Not Offered Every Year
1 Course Unit

ANTH 3910 Multi-Modal Ethnography: Anthropology Beyond Text
What does the digital age mean for humanistic, social scientific, and professional inquiry and practice? How do non-text based formats—such as film, dance and other kinds of performance, creative writing, and soundscapes—transform both the processes and products of research? How do they inform and transform our disciplines, and what might this mean for the communities with which we work? This advanced undergraduate seminar will address these (and other related) questions. Taught by the invited Fellows from the Center for Experimental Ethnography, this course will take shape differently each semester according to the Fellow’s area of expertise and practice. Students will be encouraged to explore alternative formats of representation that move beyond text while still being grounded in ethnographic research, and they will develop skills in relevant media. https://www.sas.upenn.edu/anthropology/courses/topics-courses
Fall or Spring
1 Course Unit

ANTH 3930 Latinx Environmental Justice
This course explores the involvement of the Latinx environmental justice movement since the 1960s. It addresses theories and concepts of environmental racism and environmental justice, underscoring how Latinx have challenged, expanded, and contributed to the environmental justice discourse. In this course, students will explore national case studies of environmental and racial injustice as they bear on Latinx communities both in rural areas and in urban barrios throughout the United States. The course will analyze these case studies through the lens of Latinx artistic and literary texts (essays, paintings, short stories, documentaries, and short films) as they provide a unique historic and multicultural perspective of the Latinx experience with environmental injustice and of how Latinxs imagine alternative transitions and responses to environmental marginalization. In addition, the works of Latinx artists and writers will serve as case studies to deconstruct racial stereotypes of Latinx as unconcerned about environmental issues, shedding light on how they share a broad engagement with environmental ideas. The case studies analyzed in this course emphasize race and class differences between farmworkers and urban barrio residents and how they affect their respective struggles. The unit on farmworkers will focus on workplace health issues such as toxic chemicals and collective bargaining contracts. The unit on urban barrios will focus on gentrification, affordable housing, and toxic substances in the home. We will also review current and past programs that have been organized to address the aforementioned problems. This is an Academically Based Community Service Course (ABCS course) through which students will learn from and provide support to a Latinx-serving organization in the City of Philadelphia on preventing exposure to hazardous substances, thus bridging the information gap on environmental justice issues in the Latinx community in Philadelphia. Information dissemination and education efforts will be conducted by collaborating with Esperanza Academy Charter School in Philadelphia to implement lessons on preventing exposure to hazardous substances. Studying environmental justice and pairing it with community service will heighten students’ awareness of the complexities of culture, race, gender, and class while providing them with an invaluable experience of cross-cultural understanding.

1 Course Unit
ANTH 5024 Mesopotamia 2200-1600 BCE
This seminar style class will focus on two canonical periods of Mesopotamian history from 2100-1600 BCE. It is structured to examine fundamental institutions of kingship, religion, economy, law and literature. Practices well established in Sumer by the end of the third millennium evolved during the first half of the second millennium BCE when Amorite speaking peoples assume central roles in Mesopotamian institutions. The class will be structured around case studies engaging key monuments of art, architecture and literature. It will be team-taught by Prof. Pittman, focusing on material remains and visual arts and by Prof. Steve Tinney who brings expertise to the rich cuneiform textual traditions.
Also Offered As: AAMW 5020, ARTH 5240, NELC 5020
1 Course Unit

ANTH 5026 Material & Methods in Mediterranean Archaeology
This course is intended to provide an introduction to archaeological methods and theory in a Mediterranean context, focusing on the contemporary landscape. The class will cover work with museum collections (focusing on the holdings of the Penn Museum), field work and laboratory analysis in order to give students a diverse toolkit that they can later employ in their own original research. Each week, invited lecturers will address the class on different aspects of archaeological methodology in their own research, emphasizing specific themes that will be highlighted in readings and subsequent discussion. The course is divided into three sections: Method and Theory in Mediterranean Archaeology; Museum collections; and Decolonizing Mediterranean Archaeology. The course is designed for new AAMW graduate students, though other graduate students or advanced undergraduate students may participate with the permission of the instructor.
Fall
Also Offered As: AAMW 5260, CLST 6300
1 Course Unit

ANTH 5080 Conservation of Archaeological Sites and Landscapes
This seminar will address the history, theories, principles, and practices of the preservation and interpretation of archaeological sites and landscapes. The course will draw from a wide range of published material and experiences representing both national and international contexts. Topics will include site and landscape documentation and recording; site formation and degradation; intervention strategies including interpretation and display, legislation, policy, and contemporary issues of descendent community ownership and global heritage. Depending on the site, students will study specific issues leading toward the critique or development of a conservation and management program in accordance with guidelines established by ICOMOS/ ICAHM and other official agencies.
Fall or Spring
Also Offered As: HSPV 7470
1 Course Unit

ANTH 5100 Ethics, Archaeology, and Cultural Heritage
This seminar will explore some of the most important issues that are now a central part of archaeological, anthropological and historical research throughout the world. The identification and control of cultural heritage is a central part of the framework for research within other communities. Issues for this course will also include cultural identity, human rights, repatriation, colonialism, working with communities and many other topics. Field research today must be based upon a new series of ethical standards that will be discussed and examined within this class. Major topics include: cultural heritage - definitions and constructs, cosmopolitanism and collecting, archaeology and looting, cultural heritage preservation, museums - universal and national, museum acquisition policies, cultural identity, international conventions (including underwater issues), national laws of ownership, community-based development, cultural tourism, development models, and human rights.

Also Offered As: LALS 5110
1 Course Unit

ANTH 5137 Environmental (In)Equalities
This seminar focuses on the interrelations of equity, justice, and environmental crisis. Beginning with a discussion of the emergence of climate justice as a critical term in international negotiations, we will consider several dimensions of substantive and historical inequality and the framing of justice as an environmental right as they arise from these settings. Broadening the discussion to include a larger framework of environmental issues in relation to inequality, the course will draw on considerations of geographies of vulnerability, environments as inhabited risk, and ecological debt in relation to “natural disaster” or environmental crisis. Moving from an historical account of structural inequalities in socio-natural systems to contemporary environmental politics, we will then discuss the disjuncture in environmental movements and aspirations between the global south and north, and particularly, how justice and equity figure into environmentalism(s) on a global basis. Finally, we discuss emerging frameworks including Just Transition movements, ecological sovereignty and rights discourses, and flourishing and capabilities approaches.
Mutually Exclusive: ANTH 3137
1 Course Unit

ANTH 5211 Petrography of Cultural Materials
Introduction to thin-section petrography of stone and ceramic archaeological materials. Using polarized light microscopy, the first half of this course will cover the basics of mineralogy and the petrography of igneous, metamorphic and sedimentary rocks. The second half will focus on the petrographic description of ceramic materials, mainly pottery, with emphasis on the interpretation of provenance and technology. As part of this course, students will characterize and analyze archaeological samples from various collections. Prior knowledge of geology is not required.
Not Offered Every Year

1 Course Unit
ANTH 5215 Archaeology of Animals
This course introduces the study of animal bones from archaeological sites. Faunal analysis is an interdisciplinary science which draws methods from archaeology, biology, and paleontology. Bones, shells, and other remains yield evidence for the use of animals by humans, and evidence for the biology of animals and for past environments. The course will focus on research approaches to important transitions in human-animal relationships: the development of human hunting and fishing, animal domestication, early pastoralism, and the emergence of market economies in animal products. Class presentations will include lectures and discussion concerning research design and archaeological case material, with additional videos, sidework with field and laboratory equipment, and supervised work identifying and describing archaeological materials from the University Museum’s collections. This class is taught in the Zooarchaeology Laboratory of the Center for the Analysis of Archaeological Materials.
Not Offered Every Year
Mutually Exclusive: ANTH 3215
1 Course Unit

ANTH 5219 Mining Archaeology
In ancient times, materials such as stone and metals were used to produce artifacts including pigments, jewelry, tools, and weapons. This course is designed to introduce students to research on the early exploitation of mineral resources. Which techniques were used to access and process raw materials in antiquity? Which archaeological methods can be used to investigate these features and artifacts? The course will provide worldwide examples through time, ranging from Stone Age flint mining, Iron Age rock salt mining to Medieval silver mining. Ethnographic studies and hands-on activities will contribute to our understanding of mining in archaeology, and artifacts from the Museum’s collections will undergo scientific analysis in the Center for the Analysis of Archaeological Materials.

ANTH 5220 Intro to Digital Archaeology
Students in this course will be exposed to the broad spectrum of digital approaches in archaeology with an emphasis on fieldwork, through a survey of current literature and applied learning opportunities that focus on African American mortuary landscapes of greater Philadelphia. As an Academically Based Community Service (ABCS) course, we will work with stakeholders from cemetery companies, historic preservation advocacy groups, and members of the African Methodist Episcopal Church to collect data from three field sites. We will then use these data to reconstruct the original plans, untangle site taphonomy, and assess our results for each site. Our results will be examined within the broader constellation of threatened and lost African American burial grounds and our interpretations will be shared with community stakeholders using digital storytelling techniques. This course can count toward the minor in Digital Humanities, minor in Archaeological Science and the Graduate Certificate in Archaeological Science.

Mutually Exclusive: CLST 3307
1 Course Unit

ANTH 5221 Material World in Archaeological Science
By focusing on the scientific analysis of inorganic archaeological materials, this course will explore processes of creation in the past. Class will take place in the Center for the Analysis of Archaeological Materials (CAAM) and will be team taught in three modules: analysis of lithics, analysis of ceramics and analysis of metals. Each module will combine laboratory and classroom exercises to give students hands-on experience with archaeological materials. We will examine how the transformation of materials into objects provides key information about past human behaviors and the socio-economic contexts of production, distribution, exchange and use. Discussion topics will include invention and adoption of new technologies, change and innovation, use of fire, and craft specialization.

1 Course Unit

ANTH 5230 Archaeobotany Seminar
In this course we will approach the relationship between plants and people from archaeological and anthropological perspectives in order to investigate diverse plant consumption, use, and management strategies. Topics will include: archaeological formation processes, archaeobotanical sampling and recovery, lab sorting and identification, quantification methods, and archaeobotany as a means of preserving cultural heritage. Students will learn both field procedures and laboratory methods of archaeobotany through a series of hands-on activities and lab-based experiments. The final research project will involve an original in-depth analysis and interpretation of archaeobotanical specimens. By the end of the course, students will feel comfortable reading and evaluating archaeobotanical literature and will have a solid understanding of how archaeobotanists interpret human activities of the past.

1 Course Unit

ANTH 5231 Surface Archaeology
Non-invasive and non-destructive methods make up an ever-greater proportion of archaeological investigations, for both intellectual and practical reasons. These methods comprise collection of data from the surface (pedestrian surface survey, geophysical prospection, geoastronomy) and from above-ground platforms (drones, aircraft, balloons, kites, satellites), using a variety of sensors from human perception to multispectral scanning devices. The data acquired from these methods complement the contextual information drawn from traditional excavation, but also allow the archaeologist to address diverse research questions at a scale much greater than the excavated site. Aspiring archaeologists should have a good working knowledge of surface archaeological methods. In this course, we will delve deeply into these methods, and read and analyze case studies to expose strengths and weaknesses and to identify best practices. Students will have the opportunity for hands-on training in the Philadelphia area or elsewhere.
Not Offered Every Year
Also Offered As: AAMW 5239, CLST 5321
1 Course Unit
ANTH 5235 The Past Preserved: Conservation In Archaeology
This course explores the scientific conservation of cultural materials from archaeological contexts. It is intended to familiarize students with the basics of artifact conservation but is not intended to train them as conservators. The course will cover how various materials interact with their deposit environments; general techniques for on-site conservation triage and retrieval of delicate materials; what factors need to be considered in planning for artifact conservation; and related topics. Students should expect to gain a thorough understanding of the role of conservation in archaeology and how the two fields interact.

ANTH 5239 Adivasis/Indigenous Peoples & British Colonialism in India
Modern Western colonialism impacted the world in many ways. However, each country and community has had a different encounter and experience with colonialism. For the Adivasis (indigenous peoples) of India, it was catastrophic and marked a new phase in their history. The pre-colonial symbolizes a period of freedom in the hills and forest, whereas the colonial era symbolizes state coercion, eviction from land and the end of free movement in the forest. The proposed course discusses Adivasis’ encounters with the British colonial state. The course examines Indian history from the perspectives of Adivasis and contrasts these with dominant paradigms of Indian history. In this way, the course allows students to understand India from a different perspective. Under British colonialism, the diverse ethnic self-governing communities were imagined as primitive, uncivilized, barbaric, violent, backward and childlike people. The course discusses how such constructions impacted Adivasi social life and development. It traces how the expansion of the colonial state in forests and hills put an end to self-rule and induced massive migration from the plains of India and asks how Adivasi areas were integrated into the colonial economy. How did the colonial state use revenue and forest policies and regulations to bring these areas under its control? How did commercialization of agriculture and forest conservation work to further marginalize Adivasis? The course also examines how Adivasi knowledge of cultivation and forest conservation were viewed by the colonial state and asks why the colonial state encouraged caste-Hindu peasant migration into Adivasi areas. Finally, it traces the ways that colonial intervention has resulted in a series of contestations, acts of resistance, and insurgencies by Adivasi groups? Tracing forms of Adivasi resistance, the course puts these into conversation with intellectual history, emphasizing the role of rumours, myths, and orality, which provided the basis for the new insurgent consciousness that spread throughout Adivasi communities. Adivasi resistance movements have been documented and analyzed by colonial rulers and anthropologists. Colonial discourses were successful in criminalizing Adivasi politics. Ironically, many colonial-era discourses concerning Adivasis have been perpetuated within the post-colonial academy. The anti-colonial struggles of Adivasis were constructed as sporadic, spontaneous, unorganized and apolitical. The inauguration of the Subaltern Studies Project has reversed such arguments and attempted to provide ideological integrity to Adivasi politics. Students will be introduced to important literature on Adivasi anti-colonial insurgent consciousness and will be encouraged to think critically about the concepts and theories of subaltern politics. Assigned readings include texts by James Scott, Ranajit Guha, David Arnold, David Hardiman, Ajay Skaria, Dhanagare, Ramachandra Guha, Biswamoy Pati, Alpa Shah, Crispin Bates, Jangkhomang Guite and Bhangya Bhukya. One aim of the course is to sensitize the students to how the political and cultural mobilizations by subalterns have contributed to the shaping of democracy. Course Requirements: Short writing responses to readings In-class presentations on readings Midterm short essay Final research paper based on primary and secondary sources. (No exams) Instructor’s Objectives: 1. Students will understand indigenous perspectives on Indian culture and history 2. Students will be able to situate indigenous movements in relation to Subaltern Studies, dominant schools of historiography, and colonial and postcolonial ethnography 3. Students will be able to analyze primary sources and identify different schools of thought within secondary literature 4. Students will be able to analyze the impact of colonial practices and discourses on indigenous cultures, histories and practices, and the forms of resistance that indigenous groups have utilized

ANTH 5240 Plants and Society
Interactions between humans and the living landscape around us have played - and continue to play - a fundamental role in shaping our worldview. This course is designed to introduce students to the diverse ways in which humans interact with plants. We will focus on the integration of ethnographic information and archaeological case studies in order to understand the range of interactions between humans and plants, as well as how plants and people have profoundly changed one another. Topics will include the origins of agriculture; cooking and plant processing; human health and the world of ethnomedicine; and poisonous and psychoactive plants. We will examine ancient plant material firsthand at the Center for the Analysis of Archaeological Materials (CAAM) and will handle botanical ecofacts from the Penn Museum's collections. Students will also carry out a substantial research project focused on an archaeological culture and plant species of their own interest.

ANTH 5244 Introduction to the Human Skeleton
An introduction to the anatomy and biology of the human skeleton. Laboratory work will be supplemented by lectures and demonstrations on the development structure, function, and evolution of the human skeleton.
Not Offered Every Year
Mutually Exclusive: ANTH 3244
1 Course Unit

ANTH 5267 Living World in Archaeological Science
By focusing on the scientific analysis of archaeological remains, this course will explore life and death in the past. It takes place in the Center for the Analysis of Archaeological Materials (CAAM) and is team taught in three modules: human skeletal analysis, analysis of animal remains, and analysis of plant remains. Each module will combine laboratory and classroom exercises to give students hands-on experience with archaeological materials. We will examine how organic materials provide key information about past environments, human behavior, and cultural change through discussions of topics such as health and disease, inequality, and food.

ANTH 5320 Medical Anthropology in the Anthropocene
Ongoing climate crises, militarization, racial injustice, and mass migration have torn apart social fabrics and have further exposed the unequal structures of power that have defined health, how it is realized, and for whom. The massive human toll of COVID-19 and demands for reparations from communities around the world confront health institutions and expose their colonial, scientific, and epistemic underpinnings. From colonial histories of medicine to movements to decolonize global and planetary health, this seminar charts how anthropological and trans-disciplinary forms of research can help shift knowledge claims about injury and vulnerability away from hegemonic centers to frontline communities. This shift implies tracking the lived aspects of health both in and beyond clinical spaces and into multiple environments (from low-wage work to toxic exposures and militarized zones) that perpetuate human/nonhuman vulnerabilities and unequal exposures to disease. As we consider multi-faceted efforts (including traditions of mutual aid and care, de-occupation and, more recently, abolition medicine) to reverse such trends, we probe innovations, forms of resistance, and ethical and political potentials unleashed by diverse justice struggles, and through which diverse planetary futures are imagined and realized.

ANTH 5360 The Peopling of the Americas
The peopling of the Americas is a question that has intrigued scholars and laymen for over 500 years. The origin of Native Americans was also a seminal issue during the emergence of American Anthropology as a discipline at the turn of the 20th century, with research on this topic animating current studies of ethnohistory, indigenous archeology, post-colonialism and repatriation. The proposed course will review the scholarship dedicated to describing this long history from an interdisciplinary perspective. It will explore their roots in the expansion of modern humans into Eurasia, evaluate the new archeological and genetic research that has fundamentally altered our understanding of the migration history and diversity of indigenous peoples in the American continents, and examine issues of identity, ethnicity and cultural heritage in contemporary Native populations that extend from this knowledge. The course will further draw on the instructor's fieldwork experience working with indigenous communities in Alaska, Canada, the Lower 48, Mexico and the Caribbean, as well as native Siberians in Russia, where the cultural and biological roots of ancestral Native American populations lie.

ANTH 5410 Critical Engagements with Science(s) and Justice(s)
This course places science studies in conversation with counterforensic and ethnographic methodologies, decolonial and feminist approaches, data and environmental justice, critical race and disability studies, and conflict medicine, among other topics. We will be looking at the ways that the arts, natural and social sciences, and community-oriented research agendas come together, and what tensions and possibilities these emergent alliances, intersectional modes of thinking, and practical collaborations may produce. This class offers a unique opportunity for graduate students from engineering, the medical school, natural and social sciences, humanities, and the arts to learn to converse and collaborate around pressing socio-environmental and public health issues. Emergent transdisciplinary fields, such as the environmental and medical humanities, reflect a growing awareness that responses to the environmental and public health dilemmas being faced require the collaborative work of not only diverse scientists, but also more expansive publics, including artists, urban and rural communities, and their relationships with nonhumans and materialities. Aspirations for justice and the possibilities for evidence making require translation across different practices, temporalities and scales; negotiations with the forces of extractive economic structures; and endurance within racist and colonial legacies as well as situations of everyday militarization and social and armed conflict. Throughout the course we will collectively explore moments of newly shared insight, mutual incomprehension, and partial connection between disparate actors and potentially unlikely allies. The idea is not for us to necessarily give up our disciplinary orientations, but rather to learn how to approach shared matters of concern without canceling out our differences and the generative agonisms they produce.

ANTH 5424 Political Ecologies of the City
Cities have been centres of aspiration for much of human history. They have provided a limited yet critical locus for social mobility, both in political and economic terms. As large agglomerations of political and economic power, urban residents have also consumed growing proportions of the earth's mineral, food and water resources from the national (and international) body. The contradictory aspects of urban aspiration frame this course. Drawing on the frameworks of political ecology, in this course we think through the cities of the global south to understand how cities are made. To do this, we will first focus on the construction on the liberal city and how it has been occupied, both formally and informally, by urban subjects in most of the world. Next, we will learn about projects through which natural resources have been directed to and through the city. Finally we will conclude with a particular attention to how urban resources are claimed by marginalized migrants, and the particular sorts of governance institutions these practices engender.

ANTH 5429 Anthropology of the Environment
This seminar draws from social scientific and scientific literatures to explore current themes in the anthropology of the environment. We will investigate the links between climate change science and social science, and the ways in which anthropologists can contribute via in-depth fieldwork methodology and long engagement in issues of society-environment interactions. We will also explore how potential environmental, social, and biological impacts of global warming on the future are being assessed through conceptual paradigms linked to risk, probability, scenario forecasting, tipping points, planetary boundaries, and extinction.
Mutually Exclusive: ANTH 3429
1 Course Unit

ANTH 5433 Andean Archaeology
Consideration of the culture history of the native peoples of the Andean area, with emphasis on the pre-conquest archaeology of the Central-Andean region.

Mutually Exclusive: ANTH 3433
1 Course Unit

ANTH 5440 Public Environmental Humanities
This broadly interdisciplinary course is designed for Graduate and Undergraduate Fellows in the Penn Program in Environmental Humanities (PPEH) who hail from departments across Arts and Sciences as well as other schools at the university. The course is also open to others with permission of the instructors. Work in environmental humanities by necessity spans academic disciplines. By design, it can also address and engage publics beyond traditional academic settings. This seminar, with limited enrollment, explores best practices in public environmental humanities. Students receive close mentoring to develop and execute cross-disciplinary, public engagement projects on the environment. In spring 2018, participants have the opportunity to participate in PPEH's public engagement projects on urban waters and environmental data. These ongoing projects document the variety of uses that Philadelphians make of federal climate and environmental data, in and beyond city government; they also shine light on climate and environmental challenges our city faces and the kinds of data we need to address them. Working with five community partners across Philadelphia, including the City's Office of Sustainability, students in this course will develop data use stories and surface the specific environmental questions neighborhoods have and the kinds of data they find useful. The course hosts guest speakers and research partners from related public engagement projects across the planet; community, neighborhood, open data, and open science advocates; and project partners in government in the City of Philadelphia and Commonwealth of Pennsylvania. Course assignments include: * 2 short-form essays (course blog posts); * a 12-hour research stay (conducted over multiple visits) with a community course partner to canvas data uses and desires; * authorship of 3 multimedia data stories; * co-organization and participation in a city-wide data storytelling event on May 2, 2018.

1 Course Unit
ANTH 5444 Human Growth and Development
In this course we will examine key issues and the processes involved in human growth and development. By their very nature, growth and development are biocultural processes that require an integrated analysis of social construction and biological phenomena. As such, we will incorporate insight from evolutionary theory, ecology, developmental biology, psychology, human biology, and cultural anthropology in our study of growth and development. Such an integrated perspective will help students to see that development is not just a biological unfolding from birth through adolescence and adulthood. Rather, development is best understood as a process that is deeply intertwined with the environment within which the organism develops. Additionally, we will apply these biocultural and socio-ecological insights to emerging health challenges associated with various developmental stages. The study of human growth and development is useful to all students in biological, health-related, and social sciences. Course enrollment is restricted to juniors, seniors, and graduate students only.

ANTH 5447 From Puberty to Parenting: The Evolutionary Context of Reproduction
This course explores the processes that influence reproduction in human populations. We adopt an evolutionary perspective to examine the factors that have shaped human reproductive physiology and contribute to variation in reproductive parameters between populations. To place human reproduction in a broad evolutionary context, we will consider similarities and differences between humans and other apes in how ecology shapes reproduction. The biology of puberty, pregnancy, hormonal changes across the lifespan, the cessation of reproduction, the impact of parenting behavior on the biology of offspring and parents themselves, and the influence of sex and gender diversity on reproduction will be discussed. Both the ecological and sociocultural factors that influence the steps in the reproductive process will be considered.

ANTH 5451 Historical Archaeology
Archaeology of the Modern World from the Columbian voyage (1492) to the 20th century. Topics such as the rise of early modern Europe, European exploration and colonization, African American Archaeology, Asian American Archaeology, the rise of colonial society, contact with native peoples, the Industrial Revolution, and the archaeology of the 20th century will be covered.
Not Offered Every Year
1 Course Unit

ANTH 5454 Quantitative Analysis of Anthropological Data
This course is designed to provide students with a basic understanding of how to work with and present quantitative data. Topics include graphical display of numerical data, probability, sampling, descriptive and inferential statistics (parametric and non-parametric two-and three group tests, regression and correlation). Using examples drawn from the social sciences and anthropology, the focus is on teaching the logic behind quantitative arguments and statistical tests, rather than on the mathematical formulas, making the course especially relevant for students who do not have a strong background in mathematics. This course fulfills the Colleges Quantitative Data Analysis requirement.
Fall or Spring
Mutually Exclusive: ANTH 3454
1 Course Unit

ANTH 5460 Global Citizenship
This course examines the possibilities and limitations of conceiving of and realizing citizenship on a global scale. Readings, guest lecturers, and discussions will focus on dilemmas associated with addressing issues that transcend national boundaries. In particular, the course compares global/local dynamics that emerge across different types of improvement efforts focusing on distinctive institutions and social domains, including: educational development; human rights; humanitarian aid; free trade; micro-finance initiatives; and the global environmental movement. The course has two objectives: to explore research and theoretical work related to global citizenship, social engagement, and international development; and to discuss ethical and practical issues that emerge in the local contexts where development initiatives are implemented.
Spring
Also Offered As: EDUC 5431, URBS 5460
1 Course Unit

ANTH 5467 Community Youth Filmmaking
This course focuses on how the filmmaking medium and process can provide a means for engaging youth in ethnographically grounded civic action projects where they learn about, reflect on, and communicate to others about their issues in their schools and communities. Students receive advanced training in film and video for social change. A project-based service-learning course, students collaborate with Philadelphia high school students and community groups to make films and videos that encourage creative self-expression and represent issues important to youth, schools, and local communities. Stories and themes on emotional well-being, safety, health, environmental issues, racism and social justice are particularly encouraged. A central thread throughout is to assess and reflect upon the strengths (and weaknesses) of contemporary film (digital, online) in fostering debate, discussion and catalyzing community action and social change. The filmmaking medium and process itself is explored as a means to engage and interact with communities. This course provides a grounding in theories, concepts, methods and practices of community engagement derived from Community Participatory Video, Youth Participatory Action Research (YPAR) and Ethnographic methods. For the very first time, Penn students will be trained to operate a state-of-the-art TV studio at PSTV (Philadelphia Schools TV). At the end of the semester approved films will be screened with an accompanying panel discussion at an event at the School District of Philadelphia (SDP). These films will also be broadcast on Comcast Philadelphia's PSTV Channel 52 and webcast via the district's website and YouTube channel. This is an ABCS course, and students will produce short ethnographic films with students in Philadelphia high schools as part of a partnership project with the School District of Philadelphia. EDUC 5466 Ethnographic Filmmaking (or equivalent) is a pre-requisite or permission of instructor.
