2018-19 University Catalog

Welcome to the University of Pennsylvania Catalog

This Catalog provides detailed information for current and prospective students about traditional undergraduate, PhD, and research master’s programs at Penn as well as important academic policies and resources. It also provides information about courses at all levels of study. Future Catalogs will provide additional information about professional and non-traditional undergraduate programs.

Students interested in non-credit and continuing education may visit this webpage (http://www.upenn.edu/programs/lifelong).

This Catalog is intended to provide general information about the University of Pennsylvania and is accurate as of May 2018. The University reserves the right to change, modify, or correct any information contained herein without prior notice, at any time.

Programs

The following list includes traditional undergraduate programs, PhD, research master’s, professional, and other degree programs are listed in the Graduate Catalog (p. 265).

A

- Accounting, BS (p. 207)
- Actuarial Mathematics, Minor (p. 138)
- Actuarial Science, BS (p. 208)
- Africana Studies, Minor (p. 138)
- Africana Studies: African American Studies, BA (p. 24)
- Africana Studies: African Diaspora Studies, BA (p. 130)
- Africana Studies: African Studies, BA (p. 131)
- American Public Policy, Minor (p. 139)
- American Sign Language and Deaf Studies, Minor (p. 139)
- Ancient History, BA (p. 25)
- Ancient History, Minor (p. 139)
- Anthropology, Minor (p. 140)
- Anthropology, Archaeology, BA (p. 25)
- Anthropology: Cultural and Linguistic Anthropology, BA (p. 26)
- Anthropology: General Anthropology, BA (p. 27)
- Anthropology: Human Biology, BA (p. 26)
- Anthropology: Medical Anthropology & Global Health, BA (p. 28)
- Archaeological Science, Minor (p. 140)
- Architectural History, Minor (p. 140)
- Architecture, Minor (p. 140)
- Architecture: Design (Intensive), BA (p. 28)
- Architecture: Design, BA (p. 29)
- Architecture: History and Theory, BA (p. 29)
- Asian American Studies, Minor (p. 141)

B

- Behavioral Economics, BS (p. 209)
- Biochemistry, BA (p. 30)
- Bioengineering, BSE (p. 172)
- Bioethics, Minor (p. 141)
- Biological Basis of Behavior, BA (p. 30)
- Biological Basis of Behavior, Minor (p. 141)
- Biology, Minor (p. 142)
- Biology, Computational Biology, BA (p. 31)
- Biology, Ecology & Evolutionary Biology, BA (p. 32)
- Biology, General Biology, BA (p. 33)
- Biology, Mathematical Biology, BA (p. 34)
- Biology, Mechanisms of Disease, BA (p. 34)
- Biology, Molecular & Cell Biology, BA (p. 35)
- Biology, Neurobiology, BA (p. 36)
- Biomedical Science, BS (p. 173)
- Biophysics, BA (p. 37)
- Biophysics, Minor (p. 142)
- Business Analytics, BS (p. 210)
- Business Economics and Public Policy, BS (p. 211)

C

- Chemical and Biomolecular Engineering, BSE (p. 174)
- Chemical and Biomolecular Engineering, Minor (p. 193)
- Chemistry, BA (p. 37)
- Chemistry, Minor (p. 143)
- Cinema and Media Studies, BA (p. 38)
- Cinema and Media Studies, Minor (p. 143)
- Classical Studies, Minor (p. 143)
- Classical Studies: Classical Civilizations, BA (p. 39)
- Classical Studies: Classical Languages and Literature, BA (p. 39)
- Classical Studies: Mediterranean Archaeology, BA (p. 40)
- Cognitive Science, Minor (p. 144)
- Cognitive Science: Cognitive Neuroscience, BA (p. 40)
- Cognitive Science: Computation and Cognition, BA (p. 41)
- Cognitive Science: Individualized, BA (p. 42)
- Cognitive Science: Language & Mind, BA (p. 43)
- Communication: Communication & Public Service, BA (p. 43)
- Communication: General Communication, BA (p. 44)
- Comparative Literature, Minor (p. 144)
- Comparative Literature: (Trans)national Literatures, BA (p. 131)
- Comparative Literature: Globalization, BA (p. 45)
- Comparative Literature: Theory, BA (p. 132)
- Computational Biology, BAS (p. 175)
- Computational Neuroscience, Minor (p. 145)
- Computer and Cognitive Science, BAS (p. 177)
- Computer Engineering, BSE (p. 178)
- Computer Science, BAS (p. 180)
- Computer Science, BSE (p. 179)
- Computer Science, Minor (p. 189)
- Consumer Psychology, Minor (p. 145)
- Creative Writing, Minor (p. 145)
- Criminology, BA (p. 46)

D

- Data Science, Minor (p. 193)
- Design, Minor (p. 146)
- Digital Humanities, Minor (p. 146)
- Digital Media Design, BSE (p. 182)
- Digital Media Design, Minor (p. 192)
- Dutch (Netherlandic), Minor (p. 146)
E

- Earth Science: Environmental Science, BA (p. 47)
- Earth Science: Geology, BA (p. 48)
- Earth Science: Paleobiology, BA (p. 48)
- East Asian Area Studies, Minor (p. 147)
- East Asian Languages and Civilizations: Chinese and Japanese, BA (p. 49)
- East Asian Languages and Civilizations: Chinese, BA (p. 50)
- East Asian Languages and Civilizations: Chinese, Minor (p. 167)
- East Asian Languages and Civilizations: East Asian Area Studies, BA (p. 133)
- East Asian Languages and Civilizations: Japanese, BA (p. 51)
- East Asian Languages and Civilizations: Japanese, Minor (p. 167)
- East Asian Languages and Civilizations: Korean, BA (p. 130)
- East Asian Languages and Civilizations: Korean, Minor (p. 167)
- East Central European Studies, Minor (p. 147)
- Economic Policy, Minor (p. 147)
- Economics, BA (p. 51)
- Economics, Minor (p. 148)
- Electrical Engineering, BSE (p. 182)
- Electrical Engineering, Minor (p. 191)
- Energy & Sustainability, Minor (p. 189)
- Engineering Entrepreneurship, Minor (p. 190)
- English, BA (p. 148)
- English: 18th/19th Centuries, BA (p. 52)
- English: 20th/21st Centuries, BA (p. 53)
- English: Africana Literatures & Culture, BA (p. 53)
- English: American Literature & Culture, BA (p. 54)
- English: Celtic Literature & Culture, BA (p. 55)
- English: Cinema & Media Studies, BA (p. 55)
- English: Colonial & Postcolonial, BA (p. 56)
- English: Creative Writing, BA (p. 57)
- English: Drama, BA (p. 57)
- English: Gender/Sexuality, BA (p. 58)
- English: General English, BA (p. 58)
- English: Historical, BA (p. 59)
- English: Individualized, BA (p. 59)
- English: Law and Literature, BA (p. 60)
- English: Literary Theory & Cultural Studies, BA (p. 61)
- English: Literature, Journalism and Print Culture, BA (p. 61)
- English: Medieval/Renaissance, BA (p. 62)
- English: Poetry and Poetics, BA (p. 63)
- English: The Novel, BA (p. 63)
- Environmental Policy & Management, BS (p. 212)
- Environmental Science, Minor (p. 169)
- Environmental Studies, Minor (p. 149)
- Environmental Studies: Environmental History and Regional Studies, BA (p. 64)
- Environmental Studies: Environmental Policy and Application, BA (p. 65)
- Environmental Studies: General Environmental Studies, BA (p. 65)
- Environmental Studies: Global Environmental Systems, BA (p. 66)
- Environmental Studies: Sustainability and Environmental Management, BA (p. 67)
- European Studies, Minor (p. 149)

F

- Finance, BS (p. 213)
- Fine Arts, BA (p. 67)
- Fine Arts, Minor (p. 149)
- French and Francophone Studies, BA (p. 68)
- French and Francophone Studies, Minor (p. 150)

G

- Gender, Sexuality & Women's Studies, BA (p. 69)
- Gender, Sexuality, and Women's Studies, Minor (p. 150)
- Geology, Minor (p. 151)
- German, BA (p. 69)
- German, Minor (p. 151)
- Global Analysis, BS (p. 214)
- Global Health, Minor (p. 202)
- Global Medieval Studies, Minor (p. 168)

H

- Health and Societies: Bioethics & Society, BA (p. 70)
- Health and Societies: Disease & Society, BA (p. 71)
- Health and Societies: Environment & Health, BA (p. 71)
- Health and Societies: Gender & Health, BA (p. 72)
- Health and Societies: Global Health, BA (p. 73)
- Health and Societies: Health Care Markets & Finance, BA (p. 73)
- Health and Societies: Health Policy & Law, BA (p. 74)
- Health and Societies: History of Medicine, BA (p. 75)
- Health and Societies: Public Health, BA (p. 75)
- Health Care Management and Policy, BS (p. 215)
- Health Care Management, Minor (p. 151)
- Health Communications, Minor (p. 203)
- Hispanic Studies, BA (p. 76)
- Hispanic Studies, Minor (p. 152)
- History and Legal Studies, Minor (p. 152)
- History of Art, BA (p. 77)
- History of Art, Minor (p. 165)
- History, Health and the Humanities, Minor (p. 203)
- History, Minor (p. 153)
- History: American History, BA (p. 77)
- History: Diplomatic History, BA (p. 78)
- History: Economic History, BA (p. 79)
- History: European History, BA (p. 80)
- History: Gender History, BA (p. 80)
- History: General History, BA (p. 81)
- History: Intellectual History, BA (p. 82)
- History: Jewish History, BA (p. 82)
- History: World History, BA (p. 83)

I

- Individualized Major, BA (p. 84)
• Individualized Program, BAS (p. 184)
• Individualized, BS (p. 216)
• International Development, Minor (p. 153)
• International Relations, BA (p. 84)
• International Relations, Minor (p. 153)
• Italian Studies: Italian Culture, BA (p. 85)
• Italian Studies: Italian Culture, Minor (p. 166)
• Italian Studies: Italian Literature, BA (p. 85)
• Italian Studies: Italian Literature, Minor (p. 154)

J
• Jewish Studies, BA (p. 86)
• Jewish Studies, Minor (p. 154)
• Journalistic Writing, Minor (p. 154)

L
• Landscape Studies, Minor (p. 155)
• Latin American & Latino Studies, BA (p. 86)
• Latin American and Latino Studies, Minor (p. 155)
• Law and Society, Minor (p. 155)
• Legal Studies & Business Ethics, BS (p. 217)
• Linguistics, BA (p. 87)
• Linguistics, Minor (p. 156)
• Logic, Information, & Computation, BA (p. 87)
• Logic, Information, and Computation, Minor (p. 156)

M
• Management: Entrepreneurship and Innovation Track, BS (p. 218)
• Management: General Track, BS (p. 219)
• Management: Multinational Management Track, BS (p. 220)
• Management: Organizational Effectiveness Track, BS (p. 221)
• Management: Strategic Management Track, BS (p. 222)
• Managing E-Commerce, BS (p. 223)
• Marketing & Communication, BS (p. 224)
• Marketing & Operations Management, BS (p. 225)
• Marketing, BS (p. 226)
• Material Science & Engineering, Minor (p. 191)
• Materials Science and Engineering, BSE (p. 184)
• Mathematical Economics, BA (p. 88)
• Mathematics, Minor (p. 157)
• Mathematics: Biological Mathematics, BA (p. 89)
• Mathematics: General Mathematics, BA (p. 91)
• Mechanical Engineering and Applied Mechanics, BSE (p. 185)
• Mechanical Engineering and Applied Mechanics, Minor (p. 190)
• Medical Sociology, Minor (p. 157)
• Modern Middle Eastern Studies, BA (p. 91)
• Modern Middle Eastern Studies, Minor (p. 158)
• Music, BA (p. 92)
• Music: Jazz and Popular Music, Minor (p. 158)
• Music: Music, Minor (p. 158)

N
• Nanotechnology Minor (p. 192)
• Native American and Indigenous Studies, Minor (p. 159)
• Near Eastern Languages & Civilizations: Ancient Near East, BA (p. 92)
• Near Eastern Languages & Civilizations: Ancient Near East, Minor (p. 159)
• Near Eastern Languages & Civilizations: Arabic & Hebrew Studies, BA (p. 93)
• Near Eastern Languages & Civilizations: Arabic & Hebrew Studies, Minor (p. 166)
• Near Eastern Languages & Civilizations: Arabic & Islamic Studies, BA (p. 93)
• Near Eastern Languages & Civilizations: Arabic & Islamic Studies, Minor (p. 159)
• Near Eastern Languages & Civilizations: Hebrew & Judaica, BA (p. 94)
• Near Eastern Languages & Civilizations: Hebrew & Judaica, Minor (p. 166)
• Near Eastern Languages & Civilizations: Persian Language & Literature, BA (p. 134)
• Near Eastern Languages & Civilizations: Persian Language & Literature, Minor (p. 169)
• Networked and Social Systems Engineering, BSE (p. 186)
• Nursing and Health Services Management, Minor (p. 203)
• Nursing, BSN (p. 198)
• Nutrition Science, BA (p. 136)
• Nutrition, BSN (p. 201)
• Nutrition, Minor (p. 159)
• Nutrition, Minor (p. 204)

O
• Operations, Information & Decisions: Decision Processes Track, BS (p. 228)
• Operations, Information & Decisions: General Track, BS (p. 229)
• Operations, Information & Decisions: Information Systems Track, BS (p. 230)
• Operations, Information & Decisions: Operations Management/Management Science Track, BS (p. 230)

P
• Philosophy, Minor (p. 160)
• Philosophy, Politics and Economics: Choice & Behavior, BA (p. 95)
• Philosophy, Politics and Economics: Distributive Justice, BA (p. 95)
• Philosophy, Politics and Economics: Ethics & Professions, BA (p. 96)
• Philosophy, Politics and Economics: Globalization, BA (p. 97)
• Philosophy, Politics and Economics: Public Policy & Governance, BA (p. 97)
• Philosophy: General Philosophy, BA (p. 98)
• Philosophy: Humanistic Philosophy, BA (p. 99)
• Philosophy: Philosophy and Science, BA (p. 99)
• Philosophy: Political and Moral Philosophy, BA (p. 100)
- Physics, Minor (p. 160)
- Physics: Astrophysics, BA (p. 101)
- Physics: Biological Science, BA (p. 102)
- Physics: Business & Technology, BA (p. 103)
- Physics: Chemical Principles, BA (p. 103)
- Physics: Computer Techniques, BA (p. 104)
- Physics: Physical Theory and Experimental Technique, BA (p. 105)
- Political Science, Minor (p. 161)
- Political Science: American Politics, BA (p. 106)
- Political Science: Comparative Politics, BA (p. 106)
- Political Science: General Political Science, BA (p. 107)
- Political Science: Individualized, BA (p. 108)
- Political Science: International Relations, BA (p. 109)
- Political Science: Political Economy, BA (p. 109)
- Political Science: Political Theory, BA (p. 110)
- Psychoanalytic Studies, Minor (p. 161)
- Psychology, BA (p. 111)
- Psychology, Minor (p. 161)
- Sociology: Quantitative Methods, BA (p. 119)
- Sociology: Sociology of Culture, BA (p. 120)
- Sociology: Sociology of Families and Populations, BA (p. 121)
- Sociology: Sociology of Health and Medicine, BA (p. 121)
- Sociology: Structures of Opportunity and Inequality, BA (p. 122)
- Sociology: Urban Sociology, BA (p. 123)
- South Asia Studies, BA (p. 124)
- South Asia Studies, Minor (p. 163)
- Statistics, BS (p. 234)
- Statistics, Minor (p. 235)
- Survey Research and Data Analytics, Minor (p. 164)
- Sustainability and Environmental Management, Minor (p. 164)
- Systems Science and Engineering, BSE (p. 187)
- Systems Science and Engineering, Minor (p. 191)

T
- Theatre Arts, BA (p. 124)
- Theatre Arts, Minor (p. 164)

U
- Urban Education, Minor (p. 168)
- Urban Real Estate and Development, Minor (p. 165)
- Urban Studies, BA (p. 125)
- Urban Studies, Minor (p. 165)

V
- Visual Studies: Architecture Practice and Technology, BA (p. 126)
- Visual Studies: Art and Culture of Seeing, BA (p. 126)
- Visual Studies: Art, Practice and Technology, BA (p. 128)
- Visual Studies: Philosophy and Science of Seeing, BA (p. 129)

School of Arts & Sciences

In the tradition of its eighteenth-century founders, the College of Arts and Sciences (https://www.college.upenn.edu) regards the enduring purpose of education as the liberation of the mind from ignorance, superstition, and prejudice. From its central position in an international research university, the College invites students to explore the broad spectrum of human knowledge and takes pride in its capacity to respond to the particular intellectual needs of those who join it. The College thrives on the diversity of scholars and students whose interests it sustains and whose intellectual goals it unites.

Study of the arts and sciences provides a solid basis for advanced scientific and scholarly research, for subsequent training in the professions, and for the informed exercise of the rights and responsibilities of citizenship. The College’s goal is to help students to become knowledgeable about the world and the complexities of today’s society, aware of moral, ethical, and social issues, prepared to exercise intellectual leadership, and enlivened by the use of their mind.

The College is committed to offering a broad education that will lay a durable foundation for critical and creative thinking. We believe that students should explore fundamental approaches to the acquisition and interpretation of knowledge through introduction to substantive bodies of current thought in the natural sciences, social sciences, and humanities. Equally important, they should learn to understand and evaluate the
souces and methods from which this knowledge derives. In this way they can be led to appreciate the contingency of all knowledge and to participate in the ongoing excitement of intellectual discovery that is at the heart of the College.

We challenge our students to develop the skills of analysis and communication that will enable them to perceive pattern in complexity, render reasoned judgments, make wise choices under conditions of uncertainty, and join with others in the pursuit of common endeavors. They should, for example, be able to write and speak effectively and to use another people's language as one means of access to the diversity of contemporary and historical culture.

A student's emerging interests and talents find expression through an organized program of study in a major field. In the specialized context of the major, students investigate the traditions and contemporary status of an established branch of knowledge. The structured study of a discipline complements the general exploration of our intellectual heritage to provide the balance of educational breadth and depth to which the College is committed.

There is no single or easy path to the benefits of liberal education. A program of study must be shaped as a student grows. But the special strengths of the University of Pennsylvania—its combination of academic and professional excellence, its diverse and interdisciplinary tradition, its active community of scholars at all levels of experience—provide a setting in which the College can dedicate itself to nurturing honest, eager, and critical minds. The College welcomes those who seek to understand, appreciate, and contribute to the achievements of the human intellect.

The College of Arts and Sciences (https://www.college.upenn.edu) is the full-time undergraduate division of the School of Arts and Sciences (SAS), which offers the Bachelor of Arts (B.A.) degree. Other divisions include:

- The Graduate School of Arts and Sciences which offers the advanced degrees of Master of Arts (M.A.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.);
- The College of Liberal and Professional Studies (LPS) is the home of lifelong learning at the University of Pennsylvania. It offers high school, undergraduate, post-baccalaureate, graduate, summer and online studies as well as customizable professional training with courses that span across disciplines. LPS also administers the Summer Sessions.

The twenty-seven departments in SAS represent the core disciplines of the liberal arts. They individually offer thirty-two major programs. In addition, through interdepartmental collaborations, the SAS Faculty offer a number of interdisciplinary majors. Around SAS are grouped the various specialized professional schools, all of them drawing extensively on the intellectual resources provided by SAS. Two of these schools, the Annenberg School for Communication and the School of Design, offer undergraduate majors for College students through special collaborative relationships with SAS.

The College aims to provide its undergraduates with a broad general education that will lay the groundwork for critical and creative thinking in all fields. Ideally the graduate of the College will be well informed about the world and confident in today's complex technological society.

He or she will be willing and able to make critical judgments and to exercise intellectual leadership. The B.A. degree thus provides a solid basis for specialized scientific and scholarly research, for education for the professions, and for the informed exercise of the rights and responsibilities of citizenship.

The University of Pennsylvania is particularly well placed to provide its students with an education that links the theoretical and the practical. Within the College and the other schools is an extraordinary range of programs. The College alone offers over fifty different major programs. The College does its best to make all of the University's resources accessible to its students, giving them wide latitude in planning their programs of study and in deciding on their areas of specialization.

In 1739, the noted evangelist George Whitefield preached to thousands of Philadelphians. His sermons were so impressive that, one year later, a "House of Public Worship" and "Charity School" were established at Fourth and Arch Streets for the religious education of young men. Whitefield supported the idea of forming a "Negro School," but it was never implemented due to lack of support. The "Charity School" was not officially opened until 1749, when Benjamin Franklin and twenty-one leading citizens of Philadelphia founded an "Academy." By 1755, the academy had come to be known as the "College, Academy and Charitable School of Philadelphia in Pennsylvania." The first commencement took place on May 17, 1757, and graduated a class of seven.

Alumni of the College of Philadelphia were instrumental in the development of the nation and played vital roles in the American Revolution. Twenty-one members of the Continental Congress were graduates of the College; nine signers of the Declaration of Independence were either trustees or alumni; and eleven signers of the Constitution were associated with the College. In 1779, Pennsylvania's state legislature decided that the College was a hotbed of loyalty and tried to abrogate its charter. The provost and trustees of the College refused to be unseated. This forced the legislature to transfer the assets and property to a new board of trustees of a "University of the State of Pennsylvania." After a ten-year legal battle, the College was allowed to reopen its doors in its old buildings. Meanwhile, the University continued down the block on Fifth and Chestnut Streets. This situation continued until 1791, when the two merged to form what we now know as the University of Pennsylvania, the first university in the United States.

During Benjamin Franklin's forty years on the board of trustees, his idea of combining practical and traditional education guided the curriculum of the University. Thanks to Franklin, Penn went beyond the traditional classical education and diversified into the sciences, mathematics, history, logic and philosophy. Franklin indicated his philosophy of education when, in establishing the University, he said, "As to their Studies, it would be well if they could be taught every Thing that is useful. . . . Regard being held to the several Professions for which they are intended." This emphasis on the practical aspects of education distinguished the University of Pennsylvania from other colleges and universities of the era. The tradition has continued. For example, the first medical school (1765), the first law classes (1850) and the first business school (1881) in America were founded here.

The University arrived at its present location by twice moving west. In 1802, it moved from Fourth and Arch Streets into a mansion on Ninth and Chestnut Streets built for, but never occupied by, the President of the United States. It moved again in 1872 to a ten-acre spot of land located across the Schuylkill River that was purchased for $80,000. That plot of land was in a section called Bloxely Township, a semi-rural area known mostly for its alms house and the Hamilton Grange, a farm.

The Pennsylvania courts ruled in 1877 that the University should provide scholarships to young men and "instruction to female students so far as may be convenient and practicable in the University building." Therefore, in 1878, the Towne Scientific School and the Music Department responded by admitting nine women into their programs. In 1879 George
Whitefield's dream of a "Negro School" was realized when Penn admitted one black student to the College, one to the Dental School and one to the Medical School. The Law School was the first major division of the University to admit women to its courses as degree candidates. The College of Liberal Arts for Women was established in 1933 to provide women with a liberal arts education instead of one designed specifically for teachers. The College for Women merged with the College of Arts and Sciences in 1974, thus forming our modern-day School of Arts and Sciences, which includes the Graduate School, the College of Liberal and Professional Studies and the College of Arts and Sciences.

The College is the largest of the undergraduate schools, enrolling 6,000 of the University's 10,000 undergraduates, and it teaches all of Penn's undergraduates. The study of the arts and sciences provides students with critical perspectives on their world and with the fundamental intellectual skills necessary for engaging it. As Franklin recognized, professional education relies on the sustenance provided by the arts and sciences and could not exist without them. The School of Arts and Sciences remains the heart and the soul of the modern University.

The fundamental purpose of the University as an academic community is the pursuit of knowledge. Essential to the success of this educational mission is a commitment to the principles of academic integrity. Academic work represents not only what we have learned about a subject but also how we have learned it. Values and beliefs about academic integrity have been adopted by scholars so that others may trace our honorable footsteps, verify what we have learned, and build upon our work. Every member of the University community is responsible for upholding the highest standards of honesty at all times.

As members of the University community, students are also responsible for adhering to the principles and spirit of the Code of Academic Integrity (p. 1510). Penn believes strongly in the importance of academic integrity. Students who violate its precepts are subject to punishment through the judicial system. Ignorance of the rules is no excuse. If a student is unsure whether his or her action(s) constitute a violation of the Code of Academic Integrity, it is that student's responsibility to consult with the instructor to clarify any ambiguity.

Curriculum

The Purpose of the Curriculum

A curriculum is often identified with a set of degree requirements: "What do I have to do to receive my degree?" But degree requirements are not themselves sufficient to define appropriate educational goals. One might fulfill all of the College's degree requirements and yet fail to get a good education. It would also be possible to acquire a good education but neglect to fulfill the degree requirements. Now, we certainly do want you to fulfill all of the degree requirements, and we will work with you to see that this happens. But you are not here fundamentally for the purpose of completing degree requirements. If you think of your education solely in those terms, the result will be dull and unsatisfying.

"Curriculum" comes from the Latin for "course," in the sense in which one might speak of the course of a journey. The term denotes a means rather than an end, but it suggests better than "degree requirements" what it is to become educated. It denotes a movement from a starting point to a destination, a movement that proceeds along some path. You are not left to your own devices to figure out how to get from here to there. But neither is the path straight and narrow. You will have many choices to make as you negotiate the course of your education, but they will be informed by the experience of the faculty, who in the curriculum offer their considered advice for your educational journey.

The College's curriculum draws you toward two distinctive goals: toward general education across the wide range of the arts and sciences and toward specialized education in a major. A commitment to holding these two—general and specialized education—together has been the genius of American higher education since the early part of the last century. We continue to believe that these two elements constitute an education best suited to enabling intelligent individuals to live humane, productive and fulfilling lives in the 21st century.

The College of Arts and Sciences curriculum (https://www.college.upenn.edu/curriculum) provides you with an academic framework for becoming an educated and successful citizen of the 21st century. Its flexible structure is designed to inspire curiosity and frame opportunities while drawing you toward two distinct goals: general education across the wide range of the arts and sciences and specialized education in a major. With help from academic advisors, you will select from a variety of courses to fulfill each element of the curriculum. You may also choose to expand your academic experience beyond the classroom through options like research or study abroad.

The elements of the College Curriculum are:

- The General Education Curriculum (p. 19)
- The Major (p. 21)
- Free Electives (p. 21)

Visit the College website (https://www.college.upenn.edu/curriculum-policy) for policies governing the College Curriculum.

General Education Curriculum

The College's General Education Curriculum for its part has two broad objectives. It seeks to develop in you some general skills or approaches to knowledge and to engage you in the intellectual work of the disciplines in a variety of fields across the arts and sciences.

In following this curriculum, you will be guided by two kinds of degree requirements corresponding to these two objectives. One deals with foundational approaches, the other with specific disciplines and fields of knowledge. Within any given course, these two— an approach and a field of study—are integral to one another. An approach is learned by practice in relation to a field of knowledge: your ability to use a foreign language is developed through learning about the culture in which the language is rooted; understanding a work of art is acquired by learning how to write about it—that is, by learning how to use words to describe, compare, question and argue about works of art and the contexts in which they were created and are appreciated; you learn how to analyze quantitative data by thinking about what data mean for our knowledge of natural or social phenomena we observe. Some courses, however, give priority to developing skills and approaches, while others give priority to the field under investigation.

The General Education component of the Curriculum is comprised of two elements. Foundational Approaches (p. 20) develop key intellectual capabilities demanded in a variety of disciplines, while Sectors of Knowledge (p. 20) allow you to tailor your own education in the arts and sciences while gaining valuable knowledge across a broad range of disciplines.
visit the College website (https://www.college.upenn.edu/curriculum) for more information on the College curriculum.

**Foundational Approaches**

**Writing**

Writing is the primary medium through which the quality of a student's intellectual work will be judged. The ability to express oneself clearly and persuasively in writing is fundamental for success across all academic disciplines, and throughout one's personal and professional life.

For these reasons, writing plays a central role within the College curriculum. Students must take a writing seminar to fulfill the College's Writing Requirement. It is recommended that students take this course during their first year of study. Students are also encouraged to continue development of their writing skills by participating in Penn's writing programs.

**Foreign Language**

Competence in a foreign language is essential for an educated person. Participation in the global community is predicated on the ability to understand and appreciate cultural difference, and nothing brings this more sharply into focus than the experience of learning a foreign language. The foreign language not only affords unique access to a different culture and its ways of life and thought; it also increases awareness of one's own language and culture. For this reason, College students are required to attain a certain degree of competency.

While students often opt to satisfy the Language Requirement by continuing to study the language that they have already begun in high school or earlier, the wealth of languages that the University offers is such that many students decide to explore a new culture and area of our globe by beginning a foreign language that they have never studied before. French, Spanish, and a few other languages are taught at the pre-collegiate level, but students are less likely to have been exposed to Arabic, Hindi or Japanese—let alone Uzbek or Hausa—and each of these languages is a mode of access to a fascinating culture and history.

**Quantitative Data Analysis**

In contemporary society, citizenship, work and personal decision-making all require sophisticated thinking about quantitative evidence.

Students in the College must complete a course that uses mathematical or statistical analysis of quantitative data as an important method for understanding another subject. Through such study, students learn to think critically about quantitative data and the inferences that can be drawn from these data. They also gain experience with the use of quantitative analysis to interpret empirical data and to test hypotheses.

Courses in calculus and computer science do not fulfill the requirement because these courses do not require students to analyze actual data sets with the goal of evaluating hypotheses or interpreting results. To count toward the Quantitative Data Analysis Requirement, a course must include such data analysis.

**Formal Reasoning and Analysis**

In contrast to Quantitative Data Analysis courses, which deal with inductive reasoning, courses designated for this requirement focus on deductive reasoning and the formal structure of human thought, including its linguistic, logical and mathematical constituents. These courses emphasize mathematical and logical thinking and reasoning about formal structures and their application to the investigation of real-world phenomena. In addition to courses in mathematics, this requirement includes courses in computer science, formal linguistics, symbolic logic and decision theory.

**Cross Cultural Analysis**

In our increasingly interconnected world, the Cross-Cultural Analysis Requirement aims to increase students' knowledge and understanding of socio-cultural systems outside the United States.

College students are required to take at least one course to develop their ability to understand and interpret the cultures of peoples with histories different from their own. The focus may be on the past or the present and it should expose students to distinctive sets of values, attitudes and methods of organizing experience that may not be obtained from American cultures. This exposure to the internal dynamic of another society should lead students to understand the values and practices that define their own cultural framework.

**Cultural Diversity in the U.S.**

The Cultural Diversity in the U.S. Requirement complements the Cross-Cultural Analysis Requirement and aims to develop students' knowledge of the history, dynamic cultural systems and heterogeneous populations that make up the national culture of the United States.

College students are required to take at least one course to develop the skills necessary for understanding the population and culture of the United States as it becomes increasingly diverse. Through historical inquiry, the study of cultural expressions and the analysis of social data, students will develop their ability to examine issues of diversity with a focus on race, ethnicity, gender, sexuality, class and religion. The goal is to equip graduates with the ability to become perceptive and engaged members of society.

**Sectors**

The sectors are intended to ensure breadth of education across the sectors or fields of knowledge, along with interdisciplinary explorations that link several fields of knowledge.

I. **Society**

This sector focuses on the structure and norms of contemporary human society, including their psychological and cultural dimensions.

Courses in this sector use many analytical techniques that have been developed to study contemporary society, with its complex relations between individuals and larger forms of mass participation. Some Society courses are largely devoted to the analysis of aggregate forms of human behavior (encounters, markets, civil society, nations, supranational organizations, and so on), while others may focus on the relations between individuals and their various societies. While historical materials may be studied, the primary objective of Society courses is to enable students to develop concepts and principles, test theories, and perfect tools that can be used to interpret, explain and evaluate the behavior of human beings in contemporary societies. This objective will be realized through the specific content of the various courses, but the emphasis in each course should be on developing in students a general capacity for social analysis and understanding.
II. History and Tradition

This sector focuses on studies of continuity and change in human thought, belief and action. Understanding both ancient and modern civilizations provides students with an essential perspective on contemporary life. Courses in this sector examine the histories of diverse civilizations, their cultures and forms of expression, their formal and informal belief systems and ideologies, and the record of their human actors. Students should learn to interpret primary sources, identify and discuss their core intellectual issues, understand the social contexts in which these sources were created, pose questions about their validity and ability to represent broader perspectives and utilize them when writing persuasive essays.

III. Arts & Letters

This sector encompasses the means and meaning of visual arts, literature and music, together with the criticism surrounding them.

Most courses in this sector are concerned with works of creativity—paintings, films, poetry, fiction, theatre, dance and music. They generally address a considerable breadth of material rather than an individual work or artist. The objective of Arts and Letters courses is to confront students with works of creativity; cultivate their powers of perception (visual, textual, auditory); and equip them with tools for analysis, interpretation and criticism. This objective will be realized through the specific content of the various courses, but the emphasis in each course should be on developing and strengthening in students a general capacity for understanding meaning and the ways in which it is achieved in its distinctive environment of culture and moment.

IV. Humanities & Social Science

This sector comprises courses that combine methods and approaches at work in at least two of the first three sectors.

Students will engage with diverse approaches to society, history, tradition and the arts more deeply than a single course from each domain can allow. Greater depth of experience is gained by bringing to bear several humanistic and social scientific perspectives upon a single issue or topic or by engaging directly in academically-based service or performance informed by these perspectives.

In this sector, students seek to broaden their perspective by taking a course in the humanities or social sciences that has been approved as a general education course but that cuts across two or more of sectors I, II, or III. Some courses approved for this sector will seek a more integrative approach by addressing a problem or topic from a variety of disciplinary perspectives. Others will combine disciplinary study with community service or activism, and constructively and reflectively connect the theoretical with the actual. Finally, some courses in the arts that combine creative or performance experience with reflection and grounding within a discipline may be found in this sector.

V. The Living World

This sector deals substantively with the evolution, development, structure and/or function of living systems.

Courses in this sector study the variety of approaches that are useful in understanding the diversity of living organisms, their interrelatedness, and their interactions with their environment. Analytical approaches employed range from analyses at the molecular and cellular level, to analyses of the cognitive and neural bases of behavior, to analyses of evolutionary processes and ecological systems. Students learn the methods used by contemporary natural science to study these topics, including ways in which hypotheses are developed, tested, and reformulated in light of new research findings. A full understanding of living organisms incorporates insights from approaches at many different levels.

VI. The Physical World

This sector focuses on the methodology and concepts of physical science.

Courses in this sector aim to provide insight into the content and workings of modern physical science. Some courses in this sector are part of a major, while others are designed primarily to provide an introduction to the field for non-science majors. Courses for non-science majors may include some discussion of the historical development of the subject as well as the most important conceptual notions and their mathematical expressions. All courses in this sector seek to demonstrate the generally accepted paradigm of modern science: experiment and observation suggest mathematically formulated theories, which are then tested by comparison with new experiments and observations.

All courses in this sector use a significant mathematical prerequisite (advanced high school algebra through introductory calculus) - that is, students will actually be expected to use mathematical methods and concepts to achieve an understanding of subjects in physical science.

VII. Natural Sciences & Mathematics

Students should engage with the diverse approaches to the natural sciences and mathematics more deeply than a single course from the physical and life sciences would allow. Greater depth of experience can be accomplished by either greater focus on one area, study in a related area, bringing various scientific perspectives to bear upon a single issue or topic, or engaging directly in academically-based activities informed by these perspectives.

In this sector, students broaden their perspective by taking a course in the natural sciences or mathematics that has been approved as a General Education course and that cuts across the two sectors. Other courses approved for this sector will seek a more integrative approach by addressing a problem or topic from a variety of disciplinary perspectives. Still others will combine disciplinary study with community service or activism, constructively and reflectively connecting the theoretical with the actual.

The Major

The Major provides an opportunity to know a segment of human knowledge deeply, with a sufficient grasp of its modes of thinking and analysis to make your own contribution.

The College offers more than 55 majors (p. 22) across the humanities, social sciences and natural sciences, and many programs provide options for concentrating in any number of specialty areas.

Visit the College website (https://www.college.upenn.edu/curriculum) for more information on the College curriculum.

Free Electives

In addition to these structural elements, the curriculum provides space in your studies for a number of Free Electives. These give you the freedom to pursue interests that may lie outside your major and that extend
beyond those addressed in the General Education Curriculum. Take a
course in a field that you have not otherwise encountered. Use one or
more Free Electives to explore further a subject introduced in a sector
course or learn about a subject that sheds light on your major.

Visit the College website (https://www.college.upenn.edu/curriculum) for
more information on the College curriculum.

**Academic Opportunities**

**Learning happens inside and outside of the traditional classroom.**

The value of a rich liberal arts tradition extends beyond the curriculum
itself to the far reaches of cutting edge research and real-world
internships, community partnerships and study abroad.

- Penn is a world-class research institution where undergraduates have
  the opportunity to participate in the creation of knowledge.
- Students in the College integrate knowledge from a variety of
  specializations or dig deeply into a particular area of study.
- Through their work with local schools and organizations, students in
  Academically Based Community Service Courses combine classroom
  and community work to solve critical issues.
- Students in study abroad programs and internship experience
  diverse communities and real world challenges in and outside of
  Philadelphia.

Visit the College website (https://www.college.upenn.edu/courses-
options) for a comprehensive view of academic opportunities for College
students.

**Advising**

College students need to choose courses, declare a major and define
career goals. They will need to examine their performance in different
courses, identify their skills and those they wish to develop, and decide
what really matters to them. Much of this assessment they will do
themselves, but faculty members, academic advisors, career counselors
and peers can help.

Students in the College have a strong network of academic advisors
available to assist them throughout their undergraduate careers.

- Pre-major advisors help first- and second-year students navigate their
  entrance into academic and intellectual life in the College beginning
  with the issues of incoming freshmen and continuing through the
  student’s exploration of a potential major.
- Peer advisors work with the pre-major advisor and are one of the
  first points of contact for incoming College students. They provide
  the perspective of an upperclass student in the College and assist
  first-year students in making the transition from high school to Penn
  by sharing their strategies for academic success and knowledge of
  campus resources.
- After declaring a major, students are assigned an academic advisor
  affiliated with the major department or program.
- All students are welcome and encouraged to speak with assistant
  deans for advising in the College Office. These advisors can help
  students explore the many options and opportunities available to
  College students, and are available by appointment or on a walk-in
  basis throughout the year.

For more information, visit the College website (https://
www.college.upenn.edu/advising).

**Policies and Procedures**

The College of Arts and Sciences Policies and Procedures are intended to
provide guidelines for academic conduct and planning.

- Students are subject to the policies and procedures in place for
  the class into which they matriculated. Class-specific Policies and
  Procedures manuals can be found on the College site.
- Policies and procedures are subject to change throughout the year
  at the discretion of the University of Pennsylvania and the College of
  Arts and Sciences.
- Students are encouraged to consult with an academic advisor in the
  College Office for further information and clarification.

For class-specific manuals and current policies, visit the College website
(https://www.college.upenn.edu/policies).

Africana Studies: African American Studies, BA

Africana Studies is an interdisciplinary field of study devoted to the critical and systematic examination of the cultural, political, social, economic, and historical experiences of African Americans, Africans, and peoples of African descent around the world. Our course of study is designed to provide students with an integrated understanding and appreciation for a new global black studies. An undergraduate degree in Africana Studies prepares students for graduate work in the humanities, social sciences, and professional schools, as well as a range of careers in teaching, business, public service, and the arts, among others.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

African Language courses do not count toward the Major Requirements.

For more information: https://africana.sas.upenn.edu/undergraduate

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Ancient History, BA

The major in Ancient History coordinates a curriculum encompassing the whole of the ancient history of the Near East and the Mediterranean Basin.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

For more information: https://www.classics.upenn.edu/majoring-and-minoring/major-ancient-history

Anthropology: Archaeology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or Medical Anthropology.

Archaeology is the study of past societies through the excavation of material culture, from the Paleolithic into the early Historical periods. Students study excavation methods and techniques of analysis, and have opportunities to work with collections in the Penn Museum and its Center for the Analysis of Archaeological Materials (CAAM). Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Archaeology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/archaeology/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 For up to three of these, non-ANTH courses with anthropological content may be requested. All non-ANTH courses must be approved by the Undergraduate Program Coordinator.

Honors

Applicants must have a minimum GPA of 3.5 in the major and write a senior thesis.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Anthropology: Human Biology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or Medical Anthropology.

Biological Anthropology is the study of human evolution and the biology of modern populations. Areas of study include genetics, osteology, and forensics. Students have the opportunity to work in laboratory settings, as well as in the Penn Museum’s Physical Anthropology section or its Center for the Analysis of Archaeological Materials (CAAM). Biological Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Biological Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

2 Up to three courses from BIBB, BIOL, HSSC and PSYC may be requested. All non-ANTH courses must be approved by the Undergraduate Program Coordinator.

Honors

Applicants must have a minimum GPA of 3.5 in the Major and write a senior thesis.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Anthropology: Cultural and Linguistic Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or Medical Anthropology.
Cultural and Linguistic Anthropology is the study of cultural, social, and semiotic variation in the modern world since the development of the ethnographic method in the late 19th century. Areas of study include comparisons of different cultural communities and their relationship to social and demographic factors, as well as communication and media. Cultural and Linguistic Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Cultural and Linguistic Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/anthropology/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

### Anthropology: General Anthropology, BA

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or Medical Anthropology.

General Anthropology majors study all four anthropology sub-fields, acquiring an introduction to the full range of anthropological research. Students are required to take courses in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, and Medical Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/anthropology/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

**Anthropology: Medical Anthropology & Global Health, BA**

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. Anthropology is an interdisciplinary 14 credit major that intersects with programs and departments across the University. Students may major in anthropology as a whole (General Anthropology), or choose to concentrate in Biological Anthropology, Archaeology, Cultural and Linguistic Anthropology, or Medical Anthropology.

Medical Anthropology applies anthropological methods to the study of global health, well-being, and disease. The concentration provides students with a theoretical and methodological foundation to address problems of global health inequality. Medical Anthropology majors take introductory courses in all sub-fields of Anthropology, and complete the remainder of their coursework primarily in Medical Anthropology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/anthropology/

**Architecture: Design (Intensive), BA**

The Intensive Major in Architecture is for students in the Design Concentration who intend to pursue a graduate professional degree in architecture. Students in the Intensive Major enroll in their senior year in the technology courses offered in the first year of the Master of Architecture Professional Degree Program. Those accepted into the School of Design's Master of Architecture Professional Degree Program are qualified to be admitted with advanced placement into the second year of the graduate program, reducing the length of study from three to two years.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

**Application requirements:** At least Sophomore Standing. Please consult with the Undergraduate Chair for other important criteria.

For more information: www.architecture.sas.upenn.edu

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Architecture: Design, BA

The Major in Architecture is for students who intend to pursue a career in architecture or a related design discipline (e.g., landscape architecture, urban design, product design, etc.). The Major is a studio-based liberal arts program offering two concentrations. The Design Concentration includes a six-semester sequence of design studios and courses in the history and theory of art, architecture, and landscape architecture.

The minimum total course units (https://wwwcollege.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

2018-19 Catalog | Generated 02/28/19
Biochemistry, BA

Contemporary biological sciences are based on principles of chemistry and physics. The importance of this relationship is the basis of the Penn biochemistry major, which prepares students for advanced study in areas as diverse as biophysics, biotechnology, cell biology, genetic engineering, genomics, molecular biology, molecular genetics, nanotechnology, neurobiology, structural biology, systems biology, and biochemistry. It provides the basic science background for graduate and health professional schools and for prospective science teachers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/biochem/biochem.html

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Honors

Requirements: GPA of 3.2 in courses required for the major, taken at Penn, and not including BCHE 404 Biochemistry Laboratory.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biological Basis of Behavior, BA

Biological Basis of Behavior is an interdisciplinary program in which students explore the relationship between behavior (both human and animal) and its organic bases. The Program offers courses in virtually all areas of neuroscience ranging from cellular neurobiology to cognitive neuropsychology and integrates these basic interdisciplinary courses with basic science requirements in biology, chemistry and psychology. Students also engaged in supervised research in areas as diverse as molecular neurobiology, chemical neuroanatomy, visual sciences and behavioral ecology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/bbb/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.
Biology: Computational Biology, BA

Computational and Mathematical Biology are important new areas in the biological sciences. Many areas in genetics, ecology, and evolution depend on sophisticated quantitative analyses. For example, the advent of data from the human genome project (and similar data from other species) has shown the need for computer, statistical and mathematical methods to store, retrieve, and analyze massive data sets. Recognizing the growing importance of these quantitative techniques and skills, we have developed undergraduate concentrations in both Computational and Mathematical Biology. These Concentrations are designed to prepare students for the world of data-driven science.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entitle more course units.

With permission of the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For more information: http://www.bio.upenn.edu/undergraduate/concentrations/computational-and-mathematical-biology

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/courriculum) page.

**Biology: Ecology & Evolutionary Biology, BA**

Ecology and evolutionary biology are among the most exciting and challenging fields in biology today. The Concentration in Ecology and Evolutionary Biology provides intensive training in both areas, along with essential background in the statistical and mathematical methods essential for understanding Ecological and Evolutionary research and field practices.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

BIOL 399 Independent Study 1

Thesis

SURB 2

Total Course Units 36

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2. Students are required to present their research at the annual Symposium on Undergraduate Research in Biology (SURB) poster session, held at the end of the Spring Term.

**Honors**

Applicants must have a minimum GPA of 3.25 in the Major and the Thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Biology: General Biology, BA**

Studies in biology can serve as preparation for graduate study in the biological sciences, graduate training in health-related professions, teaching, or employment in a laboratory or conservation-related job. The Biology Department offers courses in many areas of biology, ranging from the workings of cells and cellular components to species interactions and ecosystem function. Penn’s curriculum keeps pace with recent developments in molecular biology and the study of evolutionary processes, including proteomics, computational genomics, molecular evolution, and epigenetics. The General Biology Major allows students to explore the wide range of topics in Biology, while also providing a strong foundation in core subject areas such as cell and molecular biology, genetics, physiology, and ecology and evolution.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For more information: http://www.bio.upenn.edu/undergraduate/current-students/major-requirements

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

**Additional Chemistry and/or Physics Requirement**

Select 2 course units of additional Chemistry and/or Physics 2

**Calculus/Statistics Requirement**

Select 2 course units of Calculus/Statistics

**Intermediate Level Biology Courses**

Select one of the following Tracks:

- Track 1: Select four courses from four different groups (4 course units):
- Track 2: Select three courses from three different groups (3 course units):

**Group 1:**

- BIOL 204 Biochemistry
- or BIOL 205 Cell Biology

**Group 2:**

- BIOL 221 Molecular Biology and Genetics

**Group 3:**

- BIOL 215 Vertebrate Physiology
- BIOL 231 The Evolution of Animal Behavior
- BIOL 251 Molecular and Cellular Neurobiology

**Group 4:**

- BIOL 230 Evolutionary Biology
- BIOL 240 Ecology From individuals to ecosystems

**Additional Biology/Biology-Related Requirement**

Select 4 course units of Biology (Two of them may be Biology related courses) 4

Total Course Units 36

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2. A third course is needed if the additional CHEM or PHYS courses total less than 2 course units.

**Honors**

Applicants must have a minimum GPA of 3.25 in the major and the thesis must be approved by the departmental honors committee.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: Mathematical Biology, BA

Computational and Mathematical Biology are important new areas in the biological sciences. Many areas in genetics, ecology, and evolution depend on sophisticated quantitative analyses. For example, the advent of data from the human genome project (and similar data from other species) has shown the need for computer, statistical and mathematical methods to store, retrieve and analyze massive data sets. Recognizing the growing importance of these quantitative techniques and skills, we have developed undergraduate concentrations in both Computational and Mathematical Biology. These Concentrations are designed to prepare students for the world of data-driven science.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

With permission of the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

Honors

Applicants must have a minimum GPA of 3.25 in the major and the thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: Mechanisms of Disease, BA

Among the most important and interesting areas of scientific investigation are the mechanisms that underlie disease. The study of this topic can be of great interest to those pursuing fundamental research, as well as to those drawn to medicine, biotechnology, law, and public health. The introductory and intermediate level course offerings of the Biology Department provide a foundation in understanding the fundamental principles underlying the mechanisms of disease. Advanced electives are selected from the fields of Microbes and Infectious Disease, Genetic Disease, Molecular Genetics and Genomics, and Biochemistry.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.
With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

---

**Biology: Molecular & Cell Biology, BA**

The concentration in Molecular and Cell Biology explores how the techniques of molecular biology and genetics are used to understand cell function. As with the previous Molecular Biology Concentration (https://www.bio.upenn.edu/undergraduate/concentrations/molecular-biology), this concentration allows Biology majors to focus on a molecular approach to biological problems by combining lecture and seminar coursework with training in laboratory research. The list of course electives is organized into two categories: Molecular and Cell Biology and Genetics and Genomics. Advanced Experimental Research is required for the concentration.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

With permission of the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For more information: http://www.bio.upenn.edu/undergraduate/concentrations/molecular-and-cell-biology

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Total Course Units  36

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://wwwcollege.upenn.edu/sectors-policy).

2 Students in Track 2 need only 4 electives.

Honors
Applicants must have a minimum GPA of 3.25 in the major and have taken BIOL 399 Independent Study. Thesis must be approved by the departmental honors committee.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biology: Neurobiology, BA

Neurobiology is one of the most exciting fields within biology today. The basis of neurological disease, molecular mechanisms of brain function, and behavior are major foci of research in medicine, biotechnology, and academia. The Neurobiology Concentration provides fundamental training in brain physiology, coupled with a background in molecular genetics that is essential for understanding the molecular mechanisms of brain function at the gene and protein levels.

The minimum total course units (https://wwwcollege.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

With permission from the Undergraduate Chair, two course units away or LPS courses may count toward the Biology major. This limit does not apply to Study Abroad.

For more information: http://www.bio.upenn.edu/undergraduate/concentrations/neurobiology

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://wwwcollege.upenn.edu/curriculum) page.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Biophysics, BA

Bridging the biological sciences and the physical sciences, Biophysics is concerned with physical and chemical explanations of living processes, especially at the cellular and molecular levels. Detailed molecular descriptions are emerging for genetic elements and the mechanisms that control their propagation and expression. Biophysical studies include the investigation of protein structure, nucleic acid structure, enzyme mechanisms, the phenomena underlying cellular behavior, excitable phenomena in nerve, muscle and visual cells, and integrative neural phenomena.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

**Note:** Though not a requirement of the major, participation in an independent research project is strongly encouraged.

**For more information:** http://www.sas.upenn.edu/biophysics/

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

**Honors**

 Applicant must have a minimum GPA of 3.3 in the major. Thesis required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Chemistry, BA**

The different disciplines of modern physical and biological sciences have much to offer each other through advances in technology. Aside from basic research, society continually generates fundamental scientific and technological challenges such as the need for new sources of energy, new synthetic and biotechnologies; new materials exhibiting unusual catalytic, metallic, or electrolytic properties; and developments in laser, computer, and communications technology. We consider these within the province of a unified field of molecular sciences, in which chemistry plays the central role.
Chemistry is concerned with the study of matter and the changes matter can undergo. The chemistry program provides a basic foundation for career opportunities in chemical research and teaching, in scientific communication and information transfer, and in the health professions. Students who want to prepare for advanced study in chemistry or allied fields where research experience is advantageous should complete the chemistry honors program.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Those considering the Chemistry major should consult with the undergraduate chairman as soon as possible, preferably in the freshman year, especially if you have AP credit in Science and Mathematics from high school.

**Cinema and Media Studies, BA**

The Penn Cinema and Media Studies major and minor are traditional humanities programs involving the critical study of film and media history, theory, and aesthetics. Reflecting the hybrid nature of the field of Cinema and Media Studies, our faculty members are housed in departments across SAS and the university, and we cross-list courses with various departments and schools, including Africana Studies, Anthropology, Communications, East Asian Language and Civilizations, English, Fine Arts, German, History, History of Art, Near Eastern Languages and Civilizations, Romance Languages, Slavic Languages and Literatures, and Women's Studies. This truly interdisciplinary program will introduce students to the wide range of methodologies used to study film and media, and this intersection with other disciplines makes Cinema and Media Studies an ideal component of a double major.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

**Classical Studies: Classical Civilizations, BA**

Classical Studies encompasses the civilization of the ancient Greeks and Romans from prehistory to the Middle Ages, with emphasis on the literature, philosophy, and history of the classical Greek and Roman periods. It includes economic, political, social, and intellectual history as well as philosophy, archaeology, religion, and myth. Students may choose a track that emphasizes the study of texts in Greek and/or Latin or opt for a program of courses that do not require any knowledge of the ancient languages. The Classical Studies Department provides extensive training at the Undergraduate level and graduate training in both Classical Studies and Ancient History. We also offer a special Post-Baccalaureate Program for students who wish to continue the study of Greek and Latin but who do not yet meet the requirements of a conventional graduate program.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Communication: Communication & Public Service, BA

A Communication major with a concentration in Communication and Public Service (ComPS) offers students a special program that combines individual research opportunities with hands-on experience in the public arena. Classes, seminars, internships, field experiences, and individual research projects provide students with opportunities to meet and learn from current and former officeholders, journalists, and public servants who have been leaders in government and civil society. The program is closely matched to the undergraduate Communication major, and like the Communication major, ComPS students must complete 14 courses.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum requirements as a condition of application to the major. Meeting these prerequisites is NOT a guarantee of admission to the major:

1. Completion of at least two of the following introductory courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Course Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 125</td>
<td>Introduction to Communication Behavior</td>
<td>1</td>
</tr>
<tr>
<td>COMM 130</td>
<td>Media Industries and Society</td>
<td>1</td>
</tr>
<tr>
<td>COMM 123</td>
<td>Critical Approaches to Popular Culture</td>
<td>1</td>
</tr>
</tbody>
</table>

2. Completion of a third Communication course.
3. Cumulative GPA at time of application should be at least 2.0.
For more information: https://www.asc.upenn.edu/communication-and-public-service

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Total Course Units 34

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2. Course not used for the Core may count toward the Intermediate requirement.

4. Approved methods courses may be found here (https://www.asc.upenn.edu/academics/undergraduate-program/course-requirements).

5. Intermediate Level Courses are those courses numbered between 100 and 299.

6. Upper level courses are those numbered 300 through 499.

7. Must be approved by the Director of Student Services.

**Honors**

A capstone thesis project is completed over two semesters during the senior year. Students choose the topic of the capstone thesis from a range of public policy or public service issues. During the year they work with a thesis advisor and are enrolled in a seminar to complete their project. A credit is earned in both semesters. Students who achieve a cumulative grade point average of 3.5 or higher and earn an A- or higher on their project will graduate with honors.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Communication: General Communication, BA**

The Communication Program, housed at Penn’s Annenberg School for Communication, offers a dynamic environment where students and faculty explore a wide range of communication-centered questions using a variety of methods and theories from the humanities and social sciences. Undergraduates (who major in Communication through the School of Arts and Sciences) explore how messages are created and adapted to audiences and examine the implications of those messages for individuals and society.

Areas of concentration include critical, cultural, and historical media studies; research on children, family, and media; health communication; the media business; and political communication. The curriculum also offers opportunities for independent study, internship experience, study abroad, and putting communication to work in the service of community (through the Communication and Public Service Program).

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Students must meet the following minimum requirements prior to acceptance into the major.

1. Completion of at least two of the following introductory courses:

<table>
<thead>
<tr>
<th>Code</th>

<td>Media Industries and Society</td>
<td>1</td>
</tr>
<tr>
<td>COMM 123</td>
<td>Critical Approaches to Popular Culture</td>
<td>1</td>
</tr>
</tbody>
</table>

2. Completion of a third Communication course.

3. Cumulative GPA of 2.0 or higher in all University of Pennsylvania courses.

### Comparative Literature: Globalization, BA

The undergraduate program in Comparative Literature welcomes students interested in the study of literature from theoretical, interdisciplinary, cross-cultural, and global perspectives. The core courses train students to appreciate the variety of meanings that texts acquire in different institutional and philosophical contexts and different sociopolitical frameworks. There are three concentrations within the major: National and Transnational Literatures (four courses in each of two languages), Theory, and Globalization.

Comparative Literature is a flexible program, allowing students to take courses in a variety of departments in the College. Students with interests in more than one national literature and in fields such as philosophy and political theory, art and aesthetics, and film and music will find the requirements congenial. The program provides students with a cosmopolitan intellectual background that is increasingly in demand today.
The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: http://ccat.sas.upenn.edu/Complut/undergraduate.htm

Earth Science: Environmental Science, BA

The Earth Science major provides graduates with a broad understanding of the physical and chemical processes that operate in and on the planet and how direct and indirect methods are used to examine and understand the structure, composition, and dynamics of the Earth. Graduates appreciate how humans and ecosystems interact with the dynamic Earth, and they have an in-depth knowledge of the atmosphere and climate change, the rock cycle, natural hazards, and the hydrologic and biogeochemical cycles. Additionally, they understand how to measure and use the structure, sequence, and properties of rocks, sediments, and fossils to reconstruct events in Earth’s history and identify potential natural hazards or earth resources.

The Environmental Science concentration within the Earth Science major integrates geology, biology, chemistry, and physics in an effort to have students undertake a scientific study of the environment and the effects of humans on Earth systems.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/earth/earth-science/environmental-science-concentration

Earth Science: Paleobiology, BA

The Earth Science major provides graduates with a broad understanding of the physical and chemical processes that operate in and on the planet and how direct and indirect methods are used to examine and understand the structure, composition, and dynamics of the Earth. Graduates appreciate how humans and ecosystems interact with the dynamic Earth, and they have an in-depth knowledge of the atmosphere and climate change, the rock cycle, natural hazards, and the hydrologic and biogeochemical cycles. Additionally, they understand how to measure and use the structure, sequence, and properties of rocks, sediments, and fossils to reconstruct events in Earth’s history and identify potential natural hazards or earth resources.

Students in the Paleobiology concentration learn how the biological and physical conditions in deep time shaped the current conditions on Earth. Paleobiologists use image analysis and evolutionary theory to deduce the patterns of change in the biosphere.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.
For more information: http://www.sas.upenn.edu/earth/earth-science/paleobiology-concentration

### East Asian Languages and Civilizations: Chinese and Japanese, BA

The undergraduate program in EALC offers language training and courses in the culture, history, literature, and archaeology of East Asia. The graduate program in EALC deals with two major areas, China and Japan (a graduate program in Korean is planned for the future), and all of its programs focus mainly upon language, philology, and the study of civilization and culture. Each provides training for the Ph.D. and A.M. degrees.

The minimum total course units (https://wwwcollege.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/ealc/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Economics, BA

Economics is a social science and, as such, an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; and international trade and international finance (e.g., exchange rates). The Economics Major provides training in economic principles and provides a useful background for students preparing for a career in public policy, business, or finance.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Total Course Units 32

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro are prerequisites for all economics courses. ECON 001 Introduction to Micro Economics is the prerequisite for ECON 002 Introductory Economics: Macro.

3 ECON Course Required if ECON 010 Introduction to Economics for Business is taken.

4 ECON 101 Intermediate Microeconomics is a prerequisite for all 200-level economics courses & ECON 102 Intermediate Macroeconomics for many.

5 ECON Course required if STAT 430 Probability or STAT 430 Probability/STAT 431 Statistical Inference are taken.

**Honors**

Applicants must have a minimum GPA of 3.5 in Economics.

---

### English: 18th/19th Centuries, BA

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical "core," majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

For more information: http://www.english.upenn.edu/Undergrad/

Total Course Units 33

¹ You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

² For up to three sectors, a seminar may be double-counted in the core.

³ Take additional 3 course units if Seminars 1, 2 and 3 are double-counted in core.

⁴ Concentration may be comprised from the 13 course units of the major, or other courses.

### Honors

Applicants must have a 3.6 GPA in the major. Thesis required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

### English: American Literature & Culture, BA

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical "core," majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

For more information: http://www/english.upenn.edu/Undergrad/

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2 For up to three sectors, a seminar may be double-counted in the core.
3 Take additional 3 course units if Seminars 1, 2 and 3 are double-counted in core.
4 Concentration may be comprised from the 13 course units of the major, or other courses.

**Honors**

Applicants must have a 3.6 GPA in the major. Thesis required.

---

**English: General English, BA**

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical "core," majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

For more information: http://www.english.upenn.edu/Undergrad/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Concentration Requirements
Select 4 course units of The Novel and Prose Genre courses with 2 course units 200-level seminar or higher.  

Total Course Units 33

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 For up to three sectors, a seminar may be double-counted in the core.

3 Take additional 3 course units if Seminars 1, 2 and 3 are double-counted in core.

4 Concentration may be comprised from the 13 course units of the major, or other courses.

Honors
Applicants must have a 3.6 GPA in the Major. Thesis required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Environmental Studies: Environmental History and Regional Studies, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interaction, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

Students in the Environmental History and Regional Studies concentration learn a temporal and spatial perspective to the study of the Environment.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

This concentration is for students with a background in the Arts or Social Sciences.

For more information: http://www.sas.upenn.edu/earth/environmental-studies/environmental-history-regional-studies-concentration

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Environmental Studies: Environmental Policy and Application, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

Students in the Environmental Policy and Application concentration acquire a background in the social and management aspects of environmental problems.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

This concentration is for students who have a second major in a Natural Science.

For more information: http://www.sas.upenn.edu/earth/environmental-studies/environmental-policy-application-concentration

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Environmental Studies: General Environmental Studies, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

This is an individualized, specialized concentration designed for students who want to concentrate in an area not represented by the other concentrations. Formal proposals for this concentration must be developed and submitted for review and approved by both the EES program director and undergraduate chair before admittance into this concentration.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/earth/environmental-studies/individualized-concentration

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.
Environmental Studies: Global Environmental Systems, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

Students in the Global Environmental Systems concentration will focus their coursework on understanding global environmental systems.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

This concentration is for students who have a background in either the Natural or the Social Sciences.

For more information: http://www.sas.upenn.edu/earth/environmental-studies/global-environmental-systems-concentration

Environmental Studies: Sustainability and Environmental Management, BA

The Environmental Studies major provides graduates with the necessary skills to contribute to society and effectively work on challenging problems that face humanity. Students acquire knowledge in environmental economics, environmental health, sustainability, renewable resources, and environmental management. In addition, they have an in-depth understanding of the human-environment interconnection, knowledge of international and domestic environmental issues, and are well-versed in environmental policies and how these policies are set and changed.

The Sustainability and Environmental Management concentration is designed to help students understand the nature of environmental constraints which face organizations and individuals in the modern world, and to understand how these constraints can be effectively considered as part of the decision-making process in for-profit and non-profit organizations.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35. Double majors may entail more course units.

This concentration is for students who have a background in either the Natural or the Social Sciences.

Fine Arts, BA

The Undergraduate Fine Arts Program combines studio practices, seminar courses, and interactions with visiting artists and professionals to provide an open intellectual framework in order to foster critical awareness and independent methods of artistic research and learning. The Fine Arts Department offers a diverse range of studio courses in the areas of animation and 3D modeling, ceramics, design, drawing and painting, photography, printmaking, sculpture, and video. The dynamic
curriculum also provides students with the opportunity to thoroughly examine contemporary art, creative research, interactive design, and public art through seminar-based instruction.

A goal of the Undergraduate Fine Arts program is to facilitate an environment where the potentialities of art are considered in relation to the real life conditions of our students. Encouraged to test themselves against the rigors of divergent artistic approaches and their histories, our students develop a more complex set of skills to creatively and critically negotiate the turbulent shifts taking place globally in terms of human experiences.

The Fine Arts major is available for students in the College of Arts and Sciences and the School of Engineering, and the minor is available for undergraduate students across the university. The Fine Arts program works in conjunction with three interdisciplinary degree programs in Cinema Studies, Digital Media Design, and Visual Studies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://www.design.upenn.edu/fine-arts/undergraduate/program

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

### French and Francophone Studies, BA

French and Francophone Studies introduces students to the full span of historical and cultural traditions from France and the French-speaking world. Languages courses - from introductory to advanced - promote linguistic fluency, building on the skills students have acquired in high school or at Penn. Upper-level seminars explore a range of topics pertaining to literature, history, visual arts, and/or the media, and they offer majors and minors the opportunity to engage in research on French and global Francophone cultures across periods into contemporary times.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

At least half of all courses for the major must be taken in the Department at Penn. ALL courses must be taken in French, with the possible exception of Major-related courses.

For more information: http://www.sas.upenn.edu/french/undergraduate/requirements-majors-and-minors/major-french-francophone-studies

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

German, BA
The major and minor programs in the Department of Germanic Languages and Literatures provide deep understandings of language and cultures. Building from basic language competency to synthesizing significant literary works, historical context and current media and politics, the program offers a comprehensive education through engaged, active learning in a combination of core courses with a wide range of electives. Your learning experiences can be broadened and applied in study abroad as well as internship programs.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32.5. Double majors may entail more course units.

Health and Societies: Bioethics & Society, BA

The Health and Societies (HSOC) major examines health and medicine in social context, equipping students with the critical faculties and multidisciplinary skills that will prepare them for careers in public health, health services, and a variety of other arenas. The program is built on the foundation of three core disciplines: anthropology, history, and sociology. Methods and courses from other disciplines and fields—including epidemiology, political science, business/economics, law, environmental studies, and bioethics—supplement the core disciplines and provide majors with the variety of skills necessary to grasp the forces that have shaped our contemporary health landscapes. The Health and Societies graduate is a “multilingual” scholar and citizen, fluent in the methods and perspectives of several social science disciplines— theoretically informed but practically minded, with a global outlook and local experience.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://hss.sas.upenn.edu/undergraduate/health-societies-major

Health and Societies: Environment & Health, BA

The Health and Societies (HSOC) major examines health and medicine in social context, equipping students with the critical faculties and multidisciplinary skills that will prepare them for careers in public health, health services, and a variety of other areas. The program is built on the foundation of three core disciplines: anthropology, history, and sociology. Methods and courses from other disciplines and fields—including epidemiology, political science, business/economics, law, environmental studies, and bioethics—supplement the core disciplines and provide majors with the variety of skills necessary to grasp the forces that have shaped our contemporary health landscapes. The Health and Societies graduate is a "multilingual" scholar and citizen, fluent in the methods and perspectives of several social science disciplines - theoretically informed but practically minded, with a global outlook and local experience.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Hispanic Studies, BA

The demographic, economic and political realities of the United States, the articulation of a mainstream English culture with an ever-increasing diversity of Hispanic and Latino cultures, and the ongoing forging of strong cultural and economic ties throughout the Americas, have moved Spanish out of the bounds of the category of "foreign" language and culture in the United States. Culture is the controlling category in this field; the program is orientated to the knowledge generated by new disciplines such as cultural studies, new historicism, ethics and postcolonial studies. The major in Hispanic Studies orients itself to the types of knowledge generated by new disciplines such as cultural studies, new historicism, ethics, and postcolonial studies. In order to reflect these changing realities, the Department of Romance Languages has changed the name of its Spanish concentration from "Spanish" to "Hispanic Studies."

Hence, the knowledge of Spanish culture gives students much more than the ability to communicate in the third-most-spoken language of the world. It prepares them to account for an entirely different national, continental and global reality in all its complexity.

Majors in Hispanic Studies are overwhelmingly double majors. This means that they bring to their classes a dialogic perspective that engages in the study of Hispanic cultures informed by interest in other fields such as history, government, sociology, economics, medicine, and law. The richness and depth of these interests make for lively and intellectually rewarding classroom discussions.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

All courses must be at or above the 200 level.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

History of Art, BA

The Major in the History of Art seeks to deepen students’ knowledge of artistic production and practice over the scope of human history, as well as to broaden awareness of the critical and interpretive aims of the discipline itself. Students develop skills in the analysis of works of art, sharpen their understanding of the social, cultural, and personal values embodied by works, and explore the relation of art history to other disciplines. The Department particularly encourages a broad geographic understanding of art production and encourages students to consider the relations and distinctions among different visual cultures.

Students are strongly advised to make an appointment each semester to discuss their progress through the major with the undergraduate chair. Majors are also encouraged to achieve an advanced level of French, German, or other languages as relevant to their subject interests. During their senior year majors may pursue independent research by writing an honors thesis and are invited to become regular participants in the department colloquium series.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

History: American History, BA

The Department of History offers a variety of courses dealing with the political, social, diplomatic, intellectual, economic, and cultural history of the Americas, Europe, Asia, and Africa, from the early medieval period to the present. The department seeks to give undergraduates both specific mastery of particular times, places, and aspects of the human condition and the critical skills to think historically about both long-term and modern phenomena, emphasizing the dynamics of change and continuity
over time. The History Department at the University of Pennsylvania has a long tradition of distinction. Beginning as one of the first programs in the United States to offer doctoral study in history, the department continues to pioneer new areas of scholarship. In the last twenty years, faculty members of the departments in American, European, and World history have assumed a leading role in introducing and promoting new varieties of historical research and writing. Today, no other institution surpasses the Penn history department’s coverage of social history or equals the distinction of its faculty in that field.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

8 courses must be taken in History at the University of Pennsylvania.

Today, no other institution surpasses the Penn history department's coverage of social history or equals the distinction of its faculty in that field.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

8 courses must be taken in History at the University of Pennsylvania.

For more information: http://www.history.upenn.edu/undergraduate/history-major

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Individualized Major, BA

The College recognizes that there are students who find that the standard majors do not satisfy their academic goals and interests. Thus, the individualized major offers an opportunity for exceptional, creative, self motivated students to explore innovative and multidisciplinary fields of knowledge.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Applicants must earn a minimum GPA of 3.5.

International Relations, BA

International Relations addresses the ways in which governments, private groups, and individuals relate to each other in the global political and economic systems. The program provides a solid grounding in the methodologies of political science, history, and economics. The curriculum draws on the best courses relevant to world politics, offers a well-rounded liberal arts education, and helps prepare students for law or business school, Ph.D. programs, and international careers.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

**Italian Studies: Italian Culture, BA**

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

For more information: http://www.sas.upenn.edu/italians/undergraduate/requirements

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Jewish Studies, BA
The Jewish Studies Program provides an opportunity for students to study the Jewish experience from several perspectives including: language (Hebrew, Yiddish, and Ladino), literature in the original languages and in translation, the history and culture of the Jewish people from Biblical Israel to 21 st-century America and modern Israel, the exploration of Jewish law, and the roles of gender and sex in Judaism. Students may specialize in Jewish Studies through a major or a minor, or through one of the following concentrations: Jewish History within the History Department, Hebraica Judaica within the Department of Near Eastern Languages & Civilizations, and Judaism within the Department of Religious Studies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Latin American & Latino Studies, BA
The Latin American and Latino Studies (LALS) Program offers an interdisciplinary major and minor to study the history, arts, languages, cultures, societies, politics, and/or regional organizations of Latin American and Caribbean countries as well as Latino communities and individuals in the United States. With courses offered across many departments in the School of Arts and Sciences, in study abroad programs taught throughout Latin American cities, and with academically based community service courses with Latino organizations in the Greater Philadelphia area, the LALS major and minor afford our students a very comprehensive approach to Latin American and Latino Studies as well as the possibility of a flexible curriculum, where students can pursue and combine their academic interests.
The minimum total course units for graduation in this major is 32. Double majors may entail more course units.

Students must satisfy the Language Requirement in Spanish or Portuguese. Language courses under 219 may not be counted.

Linguistics, BA

The Linguistics Program is intended to acquaint students with the methods and findings of the scientific study of human language and its relationships to cognition, society, and history. It serves as a preparation for graduate training in linguistics or related areas, and as part of a rigorous general education. Linguistic training is relevant to work in anthropology, philosophy, psychology, and language and literature, as well as to careers in such fields as education, computer science, and law. Founded by Zellig Harris in 1947, the Penn Linguistics Department is the oldest modern linguistics department in the United States. We have outstanding programs in the core disciplines of syntax and phonology, as well as in sociolinguistics, semantics, discourse, historical linguistics, phonetics, and psycholinguistics. Penn is also the home of the Linguistic Data Consortium (LDC), a compiler and distributor of linguistic materials for language engineering research. The graduate group in Linguistics at the University of Pennsylvania is an interdisciplinary team of faculty from the Department of Linguistics and related departments. Our program has strong concentrations in several areas and a tradition of collaboration among its faculty.

The minimum total course units for graduation in this major is 34. Double majors may entail more course units.

Honors

Required: A minimum overall GPA of 3.0 and 3.5 in Major-related courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Logic, Information, & Computation, BA

Modern mathematical logic began with work by Cantor, Frege, and other mathematicians during the last three decades of the nineteenth century who were concerned with providing a sound basis for the development of mathematical analysis. In the wake of "the crisis in the foundations of mathematics" precipitated by the discovery of various logical paradoxes...
at the turn of the twentieth century, mathematicians and philosophers such as Hilbert and Russell intensively pursued investigations into the logical foundations of mathematics. Connections between logic and the foundations of mathematics remained an important source for scientific developments in logic through the epochal results of Gödel in 1930 and 1931, which indicated both the scope and limits of the mechanization of mathematical reasoning. The great burst of scientific activity occasioned by Gödel’s results led directly to Turing’s mathematical characterization of mechanical computation in terms of simple devices, now known as Turing machines. The work of Gödel, Turing, and other logicians during the 1930s laid the scientific foundations for the revolution in computer and information technology that began in the last half of the twentieth century and continues today.

The Logic, Information, and Computation Program offers students the opportunity to engage in a systematic, integrative program of study within the School of Arts and Sciences. Logic remains one of the core disciplines in investigations of information and computation. Indeed, logic is playing a major role in advances in computer security, database technology, networking, and software engineering. Moreover, logic has expanded its role within mathematics beyond foundational studies and now enjoys rich connections with areas as diverse as algebra, analysis, and combinatorics. In light of the current importance of the investigation of computation and information from both a scientific and technological point of view, the Major and Minor in Logic, Information, and Computation will provide students with a strong background to pursue computational aspects of the natural, biological, and social sciences and prepare them for careers in information technology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Total Course Units 36

¹ You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

² Check: http://logic.sas.upenn.edu for for pre-approved courses.

**Honors**

Applicants must have an overall GPA of 3.0 and a GPA of 3.5 in the Major. Senior research project required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Mathematical Economics, BA**

Economics is a social science and, as such, an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics studied in economics are the following:

- The determination of prices and quantities in various types of markets, from perfectly competitive commodity markets to highly regulated utility markets and internet auctions.
- The effects of taxes, subsidies, and regulations.
- The determination of aggregate economic activity (e.g., GDP, unemployment).
- Inflation, monetary policy, and financial intermediation.
- Economic growth and income distribution.
- International trade and international finance (e.g., exchange rates).

The Mathematical Economics Major is intended for students with a strong intellectual interest in both mathematics and economics and, in particular, for students who may pursue a graduate degree in economics. Advanced economics makes extensive use of formal mathematical models. The major introduces undergraduate students to rigorous
theoretical-quantitative and empirical-quantitative approaches to the analysis of economic problems. In comparison to the Economics Major, the Mathematical Economics Major emphasizes a more formal mathematical analysis, preparing students for academic-style research in economics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

For more information: http://economics.sas.upenn.edu/undergraduate-program/mathematical-economics-major

1. You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).
2. Students intending to major in Mathematical Economics are encouraged to take MATH 116 Honors Calculus and to consider MATH 260 Honors Calculus, Part II.
3. NOTE: These MATH and ECON courses count toward the MATH and ECON electives.
4. If ECON 103 Statistics for Economists is taken, one additional ECON or MATH course from the following: MATH 546 Advanced Probability, MATH 547 Stochastic Processes, ECON 104 Econometrics, ECON 221 Econometric Forecasting, or ECON 222 Advanced Econometric Techniques and Applications.
5. LPS academic year courses require approval of Undergraduate Chair EXCEPT for ECON 001 Introduction to Micro Economics & ECON 002 Introductory Economics: Macro.
6. ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro are prerequisites for all economics courses. ECON 001 Introduction to Micro Economics is the prerequisite for ECON 002 Introductory Economics: Macro.
7. ECON Course Required if ECON 010 Introduction to Economics for Business is taken.

**Honors**

Applicants must have a minimum GPA of 3.5 and an A- or better in 3 graduate level courses:

**Mathematics: Biological Mathematics, BA**

At the core of modern theoretical science, mathematics has historically provided an expressive language and a theoretical framework for advances in the physical sciences. It has since become central in the life and social sciences and in computer science. Mathematics at Penn embraces traditional core areas of mathematics and developing areas (Penn is one of the world's leading centers in the application of logic to theoretical computer science). The goals of the major program are to assist students in acquiring both an understanding of mathematics and the ability to use it. The mathematics major provides a solid foundation for graduate study in mathematics and a background for study in economics, the biological sciences, the physical sciences, and engineering, as well as many non-traditional areas.
The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Majors and prospective majors: Please email majoradvisor@math.upenn.edu. You will be assigned to one of the Math Major Advisors who will discuss your current and future plans with you. It is important that you see this advisor at least once per semester thereafter.

Below is a planning tool that is meant to help you but does not replace the web and advisor visit requirements.

Modern Middle Eastern Studies, BA

The interdisciplinary Modern Middle Eastern Studies degree is designed to allow students to specialize in the Middle East as a region of the world and human experience by combining course work using both social scientific and humanistic approaches, underpinned by relevant language skills. Students will work with faculty committed to supporting interdisciplinary, applied, research-oriented advanced study. The major gives students opportunities to work on problems of politics, policy, history, ideology, social thought, economic development, and international relations.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

Honors
Candidates must have a minimum overall GPA of 3.3 and a GPA of 3.7 in the major.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Music, BA

The music major is founded on a balance in the core training between the fields of music history, ethnomusicology, theory, and composition. Through a series of requirements, you will acquire a foundation that introduces you to the sheer range of musical traditions available for study and to a series of specialist skills and tools that facilitate and deepen that study.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 35.5. Double majors may entail more course units.

Near Eastern Languages & Civilizations: Ancient Near East, BA

The major in Ancient Near East examines the languages, history, cultures, and archaeology of the Ancient Near East: from Prehistory through the early complex of civilizations in Mesopotamia, Egypt, and Levant. Because of the interdependence of language and culture an emphasis of the major is gaining facility of one or more ancient languages, alongside courses in history, religion, and archaeology.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Near Eastern Languages & Civilizations: Arabic & Islamic Studies, BA

Arabic and Islamic Studies focuses on languages and cultures of the wider Middle East in the context of Islamic Civilization. Because of the interdependence of language and culture, a primary emphasis is on gaining mastery of Middle Eastern languages such as Arabic, Persian, and Turkish, alongside coursework in history, religion, and culture.
The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

**Near Eastern Languages & Civilizations: Hebrew & Judaica, BA**

The major concentration in Hebrew and Judaica explores the development of Hebrew culture from the Biblical through Rabbinic and Medieval Periods through modern times. Because of the interrelationship between language and culture an emphasis is placed on gaining facility in the use of Hebrew language alongside courses in history, culture, literature, and religion of Judaism.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Philosophy, Politics and Economics: Choice & Behavior, BA

Philosophy, Politics and Economics allows undergraduates to study a variety of comprehensive analytical frameworks that have been developed to understand and justify political and economic structures, particularly constitutional democracy and the market system. The program prepares its graduates for careers in public policy, public services, business, and law among others.

The minimum total course units (https://www.college.upenn.edu/credits-neededar-major) for graduation in this major is 36. Double majors may entail more course units.

Philosophy: General Philosophy, BA

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The four concentrations available within the major allow students to emphasize different sets of questions.

The General Philosophy Concentration requires a balanced selection of coursework from within both practical and theoretical philosophy as well as the history of these enterprises.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

### Philosophy: Humanistic Philosophy, BA

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical ethics, politics, aesthetics and theoretical (epistemology, metaphysics, mind, and logic). The four concentrations available within the major allow students to emphasize different sets of questions.

The Humanistic Philosophy Concentration emphasizes practical philosophy and its history; it pairs philosophy courses with courses in one or more humanistic disciplines.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

**Required:** 8 course units in Philosophy and 8 course units in Humanities and/or Political Science (Non-Philosophy courses need permission of the Undergraduate Chair).

**Philosophy: Political and Moral Philosophy, BA**

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The four concentrations available within the major allow students to emphasize different sets of questions.

The new Political and Moral Philosophy Concentration emphasizes the philosophical treatment of normative questions. Its coursework focuses on questions about ethics, morality, politics, and law.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Physics: Astrophysics, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration is particularly appropriate for students planning to attend graduate school in Astrophysics. In addition to core Physics courses, students choose from a selection of courses in Astronomy and Astrophysics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Physics: Biological Science, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration reflects increasing contributions of physicists (including members of our faculty) to implications of Physics to Biological Sciences. Undergraduate students choosing this concentration will prepare themselves for careers in scientific research or professional Medical Physics programs that have been instituted at Penn and other universities, among other possibilities.

The proposed concentration is distinct from the existing Biophysics Major, although the two share several required courses. The Biophysics Major requires much more chemistry, making it appropriate for students interested in protein science and other topics within the well-established field of Biophysics. The Physics major with a Concentration in Biological Science targets students with interests in the emerging field of Biological Physics, where researchers directly apply physical concepts and techniques to investigate biological systems; the emphasis is on developing new insights regarding biological systems from a perspective strongly rooted in Physics.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Physics: Chemical Principles, BA

Physics and astronomy are fundamental sciences aimed at discovering the basic principles that govern our universe. Physicists study the interplay between space, time, matter, and energy. Complex behavior in nature is explained in terms of elementary relations between constituent elements and the forces that bind them, over distances ranging from subatomic to cosmic scale. Astronomy encompasses the entire physical universe beyond the earth: the solar system, stars, galaxies, galaxy clusters and superclusters, quasars, and the large-scale structure of the universe. The basic tools in physics and astronomy are mathematics and experimental investigation and observation of the world around us.

At Penn, the curriculum for undergraduate Physics majors, which includes extensive laboratory experience, is based on faculty strengths in Condensed Matter Physics, Elementary Particle Physics, and Astrophysics. Undergraduate teaching is linked to faculty research efforts in these areas, and participation by undergraduates in research is strongly encouraged.

This concentration is particularly appropriate for students planning to enter the health professions. Such students should be aware that, although not part of the concentration requirements, laboratories in general and organic chemistry and lecture and laboratory work in biology are generally required by professional schools in the health area. The concentration may also be appropriate for other students pursuing double majors in Physics and Chemistry or Biochemistry.
The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

**Note:** For Biology concentration, see Biophysics track outlined below.

**For more information:** http://www.physics.upenn.edu/

Political Science: American Politics, BA

Political Science explores systematic approaches to understanding politics. Students may choose to take a general approach to the subject or pursue a concentration in the sub-fields of American politics, comparative politics, international relations or political theory. In addition students may select a world region for an area studies concentration.

The Political Science Department’s course offerings span the discipline of political science, from American political institutions, to the politics of world regions, the emergence of a new international order, and recent and ancient political ideas. The Department’s curriculum is divided into the four standard fields of American politics, comparative politics, international relations, and political theories. There are also other opportunities for study in political processes of elections and communications and public policy.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

A minimum of 9 course units in Political Science are required, of which 6 must be taken in the Political Science Department at the University of Pennsylvania (includes Washington, DC Semester). See Major Program Booklet for Transfer and AP credit restrictions.

### Political Science: General Political Science, BA

Political Science explores systematic approaches to understanding politics. Students may choose to take a general approach to the subject or pursue a concentration in the sub-fields of American politics, comparative politics, international relations or political theory. In addition students may select a world region for an area studies concentration. The Political Science Department’s course offerings span the discipline of political science, from American political institutions, to the politics of world regions, the emergence of a new international order, and recent and ancient political ideas. The Department’s curriculum is divided into the four standard fields of American politics, comparative politics, international relations, and political theories. There are also other opportunities for study in political processes of elections and communications and public policy.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

A minimum of 9 course units in Political Science is required, of which 6 must be taken in the Political Science Department at the University of Pennsylvania (includes Washington, DC Semester). See Major Program Booklet for Transfer and AP credit restrictions.

Psychology, BA

Studies in psychology introduce students to contemporary understandings of how organisms perceive, learn, think and interact with one another, how they develop, how they are motivated and how, individually and as members of species, they may be compared with one another. Psychology at Penn is a diverse discipline, with topics ranging from neuroscience to psychopathology.

### Religious Studies, BA

Religion is a complex network of ideas and actions (ethical and ritual) that express a group's sense of ultimate meaning of life. The academic study of religion examines how the beliefs and values of contemporary and historical cultures shape and are shaped by societal factors, long-standing traditions, and distinctive forms of literary and artistic expression.

Because of the multi-faceted nature of the subject matter, the University of Pennsylvania's Religious Studies major program of study is open to students looking to tailor their educational experience to fit with their own personal and academic areas of interest. Each undergraduate who wishes to major in Religious Studies will meet with the Chair of the Department prior to claiming the major to discuss their desired coursework and create a individualized plan of execution.

As our core faculty shares research foci and skills in the study of material culture (art, manuscripts, archaeology, inscriptions, and other primary historical sources), we are well-suited to lead serious students in intensive research to better prepare them for graduate study which requires research and evaluation skills.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/religious_studies/undergraduate-major

### Romance Languages: French and Italian, BA

The Dual Romance Languages Major allows students to pursue advanced course work across two Romance Languages: French, Spanish, and/or Italian. It is an 18-credit major, with nine advanced courses in each language. Interested students should contact the Undergraduate Coordinator or the appropriate undergraduate chairs for more information and guidance.
The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Students are required to meet with the appropriate undergraduate chairs prior to beginning course work. Study Abroad courses must be pre-approved by the Undergraduate Chair to count for the major.

For more information: http://ccat.sas.upenn.edu/roml/

Romance Languages: French and Spanish, BA

The Dual Romance Languages Major allows students to pursue advanced course work across two Romance Languages: French, Spanish, and/or Italian. It is an 18-credit major with nine advanced courses in each language. Interested students should contact the Undergraduate Coordinator or the appropriate undergraduate chairs for more information and guidance.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

Students are required to meet with the appropriate undergraduate chairs prior to beginning course work. Study Abroad courses must be pre-approved by the Undergraduate Chair to count for the major.

For more information: http://ccat.sas.upenn.edu/roml/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Science, Technology and Society: Biotechnology & Biomedicine, BA

Science, Technology & Society (STSC) examines the social contexts in which science and technology occur; the organizations of people and things that make up science and technology systems, and the social and cultural consequences of scientific and technological change over time. In a wide array of courses, STSC majors explore the relationship between scientific knowledge, technological innovations, technological systems, and society past and present.

This program equips students with sophisticated critical faculties, multidisciplinary skills, and wide knowledge that enables our graduates to go into business, law, government, journalism, research, and education. STSC provides a foundation for citizenship in a globalizing, diversifying world with rapid technological and scientific change.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sociology: Global and International Studies, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

In this concentration, students examine a variety of global and international issues such as immigration, urbanism, demographic change, world health, and the persistence of social inequality.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

For more information: https://sociology.sas.upenn.edu/global_international_studies

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

2 Students are encouraged to take some courses outside of their concentration.

Sociology: Law and Society, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Sociologists study institutions, and among the most important is the law. This concentration examines issues such as: What is deviance and how do we define it? What is the relationship between the law and other
social institutions? The concentration is suitable for students with a variety of interests, but may be especially well-suited to those interested in careers in law and criminal justice.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

## Sociology: Quantitative Methods, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Sociologists pursue knowledge in many ways, one of which is through the examination of society through surveys, demographic data, and statistical models. In this concentration, students will become familiar with quantitative methods in sociology, both with respect to how to use them in general (e.g., Introduction to Demographic Methods) and how they are used for specific topics (e.g., Health of Populations).

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

Sociology: Sociology of Culture, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

The sociology of culture investigates an aspect of human life that is central to its definition: the origins and development of meaning - religious, moral, normative, aesthetic, cognitive - and how they are expressed in and serve to shape human conduct. Processes of cultural innovation and cultural stability are examined in various social institutions and settings of American, Middle Eastern, European, and Asian societies.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be taken in Sociology.

Sociology: Sociology of Families and Populations, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

The family is one of the most important institutions in any society, and it is critical to the socialization of each generation and the stability and functioning of the larger society. Family systems vary across cultures and have changed dramatically in the United States in recent decades. Understanding the causes and consequences of such variation is a central focus of social research. Family change is reflected in demographic patterns through its impact on fertility, marriage, divorce, migration, and mortality. Population processes also respond to technological factors, economic change and social policy. The study of population patterns provides an opportunity to investigate quantitatively the interactions between large social aggregates and the behavior of individuals.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

Sociology: Sociology of Health and Medicine, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Conceptions of health and illness, although not uniform the world over or even in any one society, are of fundamental importance in every society. In this concentration, students focus on the following topics: How health is defined in various societies; how the ill are viewed by the well; how illness is treated; who the healers are, how they are trained, and what their position is in society; the relationships among the religion, class,
gender, and age of the ill and their healers; and when and how public health policies are inaugurated.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

### Sociology: Structures of Opportunity and Inequality, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

What is the balance of individual self-determination and institutionalized constraint in shaping people's lives? Social institutions such as the educational system and the economy sort people and distribute rewards, but their workings are profoundly shaped by persistent inequalities of class, ethnicity, gender, age, race, and nationality. How and why do such inequalities persist? How might opportunities be more fairly distributed? What sorts of individual and collective action affect existing structures of constraint?

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

Sociology: Urban Sociology, BA

The Sociology major helps students identify and explain patterns of social life and human behavior by emphasizing how large-scale social phenomena (such as class, race, and gender inequality) affect the everyday experiences of individuals and vice versa. The major prepares students for a career in a variety of fields such as law, medicine and healthcare, marketing, education, scholarly and applied social research, social work, demography, journalism, and media, management in the public and private sectors, administration, and government. The program offers comprehensive advising and significant research and independent study opportunities. Our program is dedicated to nurturing a strong community of scholars, helping them grow academically and professionally under the large-scale mission of the College of Arts & Sciences.

Neighborhoods, cities, and metropolitan areas are communities defined by geographic, economic, legal, political, cultural, and social boundaries. The characteristics distinguishing urban areas that affect social interactions include density of concentration of residents and firms–relative homogeneity in ethnicity, class, education, language, and income of neighbors; shared representations, such as sports teams; common meeting places and facilities, such as churches, schools, clubs, restaurants, and businesses; and facilities of communication and transportation. How does the configuration of urban areas affect opportunities for employment, education, health, and safety? What shapes the interactions within and across neighborhoods? Why are jobs suburbanizing? Why are neighborhoods and schools segregated by race, ethnicity, and income?

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

A minimum of 11 course units must be in Sociology.

South Asia Studies, BA

South Asia Studies is an interdisciplinary field focusing on the history, languages, society, literature, and art from India, Pakistan, Bangladesh, Nepal, Sri Lanka, Afghanistan, and Bhutan. We are America’s oldest and arguably most distinguished South Asia regional studies program dealing with the past and contemporary life of one-fifth of the world’s population and teaching more languages than any other South Asian studies program in the US. Having a deep knowledge of the country set to outpace the US as the second largest economy in the world in an increasingly competitive global job market gives graduates a competitive edge over others with more generic skills. Make your home in a department where you get to know your Faculty and they know you as an individual, whether as a major or double major. You don’t have to know anything about India or be South Asian to find a home with us; just be curious!

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

Theatre Arts, BA

The Theatre Arts program focuses on all intellectual and creative aspects of theatre and performance studies. Our courses link academic approaches to the theatre such as the study of dramatic literature, theory, history, and criticism, to practical aspects of performance such as acting, directing, designing, devising, and playwriting. Special features of our program include faculty-directed productions, which are taught as courses for credit, and extracurricular programs such as workshops and talks with visiting artists, staged readings, and theatre outings. One special highlight of our program is the Edinburgh Project. On alternating years, majors are selected to enroll in a course that develops a performance piece that travels to the Edinburgh Festival Fringe in Scotland. The honors thesis is another special opportunity in which majors who are accomplished in both academic and production work are invited to work on honors thesis projects, which may be based on practice such as acting, directing, and design or on scholarly research.

Penn Theatre Arts graduates proceed to a wide array of successful careers, both in and out of the theatre. Our majors are well-prepared to enter professional MFA programs in acting, directing, or design, as well as doctoral programs. We also count among our alumni not only those who are successful in theatre and film as artists, producers, and business people, but also those who flourish in unrelated fields, such as medicine and law.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 33. Double majors may entail more course units.

Urban Studies, BA

Urban Studies students are interested in making a difference and connecting to real world issues. To do this well, students learn about urban history and current challenges. They come to understand how policy at the national level and global economic trends affect what we see at the local, even neighborhood level. In a broad, theoretical sense, the central intellectual frame of Urban Studies is about understanding people and place at different spatial scales. Individuals, groups, and public officials make decisions and design policy that in turn affects how people and resources are distributed in space and defines what kinds of places result. Urban Studies students take this understanding to explain the conditions of urban places and work towards creating places that foster equity, better health outcomes, environmental sustainability, and a better quality of life. In addition to urban studies coursework and coursework in a disciplinary concentration, all of our students complete an internship for credit and carry out an original research project.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Urban Studies is a flexible major and requires conferring with an advisor to tailor a set of courses that fit your interests. This online worksheet is meant as a planning tool; before you will be accepted to the major, you are required to meet with an Urban Studies advisor to go over your plans and address your questions.

Major Requirements

Introduction to Urban Research
URBS 200 Urban Research Methods 1
Fieldwork Seminar
URBS 300 Fieldwork Seminar 2
Senior Seminar
URBS 400 Senior Seminar 1
The Discipline Cluster
Select 3 course units of Discipline Cluster courses in a particular department or program 3

Urban Studies Themes
Select 1 course unit in History of Cities 1
Select 1 course unit in Comparative and Theoretical Dimensions 1
Select 1 course unit in The Built Environment 1
Select 1 course unit in Urban Economics / Finance 1
Select 1 course unit in Public Policy / Government 1
Select 2 additional course units in any theme 2
Total Course Units 34

2 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

Honors
Honors Requirement. A minimum grade of A- in URBS 400 Senior Seminar.

Visual Studies: Architecture Practice and Technology, BA

Visual Studies at the University of Pennsylvania prepares students to forge innovative connections across the disciplines that study vision and images. Students acquire a critical awareness of seeing and the problems and possibilities for investigating, thinking, and writing about seeing in the 21st century. Fundamentally interdisciplinary, the Visual Studies Program partners with the Departments of Philosophy, Psychology, History of Art, Fine Arts, and Architecture. Students may also find interest in Penn Programs such as Cinema Studies and Gender, Sexuality, and Women's Studies or outside of the School of Arts and Sciences in the Annenberg School of Communication, and the School of Engineering and Applied Science.

Sector C enables students to develop skills in the making of art ranging from the two- and three-dimensional to digital and time-based media, and includes both fine arts and architecture tracks.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 36. Double majors may entail more course units.

For more information: https://www.sas.upenn.edu/visual-studies

East Asian Languages and Civilizations: Korean, BA

The undergraduate program in EALC offers language training and courses in the culture, history, literature, and archaeology of East Asia. The graduate program in EALC deals with two major areas, China and Japan (a graduate program in Korean is planned for the future), and all of its programs focus mainly upon language, philology, and the study of civilization and culture. Each provides training for the Ph.D. and A.M. degrees.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

Africana Studies: African Diaspora Studies, BA

Africana Studies is an interdisciplinary field of study devoted to the critical and systematic examination of the cultural, political, social, economic, and historical experiences of African Americans, Africans, and peoples of African descent around the world. Our course of study is designed to provide students with an integrated understanding and appreciation for a new global black studies. An undergraduate degree in Africana Studies prepares students for graduate work in the humanities, social sciences, and professional schools, as well as a range of careers in teaching, business, public service, and the arts, among others.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

African Language courses do not count toward the Major Requirements.

African Studies: African Studies, BA
African Studies is an interdisciplinary field of study devoted to the critical and systematic examination of the cultural, political, social, economic, and historical experiences of African Americans, Africans, and peoples of African descent around the world. Our course of study is designed to provide students with an integrated understanding and appreciation for a new global black studies. An undergraduate degree in African Studies prepares students for graduate work in the humanities, social sciences, and professional schools, as well as a range of careers in teaching, business, public service, and the arts, among others.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

African Language courses do not count toward the Major Requirements.

Comparative Literature: (Trans)national Literatures, BA
The undergraduate program in Comparative Literature welcomes students interested in the study of literature from theoretical, interdisciplinary, cross-cultural, and global perspectives. The core courses train students to appreciate the variety of meanings that texts acquire in different institutional and philosophical contexts and different socio-political frameworks. There are three concentrations within the major: National and Transnational Literatures (four courses in each of two languages), Theory, and Globalization.

**Russian and East European Studies: Language, Literature and Culture, BA**

The major in Russian and East European Studies provides a program of study that enables a broad multi-disciplinary and multi-cultural understanding of the languages, literatures, cultures, histories, and societies of Russia, Central and Eastern Europe, and the Balkan and Baltic regions. For the language requirement, students can choose any regional language offered at Penn (e.g. Bosnian/Croatian/Serbian, Hungarian, Polish, Russian, Ukrainian) or in which they can demonstrate an equivalent proficiency. In addition to linguistic flexibility, the major allows students to pursue their specific disciplinary interests through three concentrations: Language, Literature, and Culture; History, Politics, and Society; and Cinema, Arts, and Letters. Majors are encouraged to complete a summer or semester abroad to gain first-hand understanding of the communities they study and to advance their language competency. The major offers an honors option.

Knowledge of Russian and East European languages and cultures is a marketable and impressive skill, whether you are in academia, arts, law, medicine, governmental service, public interest, business, or politics. Russian and East European majors and minors land jobs in a variety of settings. They go on to work in business as financial and policy analysts for American and foreign companies. They work for NGOs, publishing houses, or the media. They teach abroad and consult in marketing, advertising, aerospace, or computer engineering. And, of course, some work as educators in universities and schools and as employees of the US government.

The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 32. Double majors may entail more course units.

**Nutrition Science, BA**

Jointly sponsored by the College of Arts and Sciences and the School of Nursing, the second major in Nutrition Science builds on a student's basic science skills with a deep dive into the science of nutrition. Linkages of nutritional compounds and dietary approaches with health and disease, novel approaches to the study of nutritional impact on health, and future avenues of exploration in the field are examined. Elective courses in anthropology, biology, economics, physiology, psychology, health care, and public policy provide a rounded context for the study of nutrition science.
The minimum total course units (https://www.college.upenn.edu/credits-needed-major) for graduation in this major is 34. Double majors may entail more course units.

For more information: https://www.nursing.upenn.edu/nutrition-major/

For information about the General Education requirements, please visit the College of Arts & Sciences Curriculum (https://www.college.upenn.edu/curriculum) page.

Total Course Units 34

1 You may count no more than one course toward both a Major and a Sector requirement. For Exceptions, check the Policy Statement (http://www.college.upenn.edu/sectors-policy).

2 BIOL 123 Introductory Molecular Biology Laboratory must be concurrent with BIOL 121 Introduction to Biology - The Molecular Biology of Life.

3 3 course units count as 2 for this major.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Minors

- Actuarial Mathematics, Minor (p. 138)
- Africana Studies, Minor (p. 138)
- American Public Policy, Minor (p. 139)
- American Sign Language and Deaf Studies, Minor (p. 139)
- Ancient History, Minor (p. 139)
- Anthropology, Minor (p. 140)

Actuarial Mathematics, Minor

Actuarial Science stands at the intersection of risk and money. Actuaries use their knowledge of mathematics and probability theory to define, analyze and solve complex business, financial and social problems. Actuaries evaluate individual and corporate risks, and design financially sound insurance and pension plans. Graduates from the University of Pennsylvania with an Actuarial Mathematics Minor are expected to be in great demand by the insurance and banking industry.

Africana Studies, Minor

Africana Studies is an interdisciplinary field of study devoted to the critical and systematic examination of the cultural, political, social, economic, and historical experiences of African Americans, Africans, and peoples of African descent around the world. Our course of study is designed to provide students with an integrated understanding and appreciation for a new global black studies. An undergraduate degree in Africana Studies prepares students for graduate work in the humanities, social sciences, and professional schools, as well as a range of careers in teaching, business, public service, and the arts, among others.

For more information: https://africana.sas.upenn.edu/department/undergraduate

African Language courses do not count toward the Minor Requirements.

Total Course Units: 6

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**American Public Policy, Minor**

The minor in American Public Policy enables undergraduates interested in American Public Policy to construct an integrated program across the University. The minor — for students who do not major or concentrate in PSCI or BEPP — requires six courses, three from each department, in addition to the course work required for their major or concentration.

**American Sign Language and Deaf Studies, Minor**

The ASL/Deaf Studies Program at Penn offers ASL instruction grounded in Deaf cultural experiences and perspectives for the purpose of attaining ASL proficiency for real-world applications in both coursework and future professional endeavors. The course of study for the minor in ASL and Deaf Studies is interdisciplinary, with foundations in language, content, and theory-based courses. Furthermore, as our program has long-standing and steadfast commitment to working in and with local Deaf community organizations for meaningful, mutually beneficial outcomes, we partner with local Deaf community organizations to integrate academic rigor and Deaf cultural values into our coursework. We do so with two organizations primarily, the Deaf-Hearing Communication Centre in Swarthmore, PA and Pennsylvania School for the Deaf in the Germantown section of Philadelphia. Ultimately, these collaborative relationships manifest in a research-based capstone course, Academically Based Community Service in ASL and Deaf Studies, providing opportunities for merging research with practice in a Deaf community setting.

**Ancient History, Minor**

Classical Studies encompasses the civilization of the ancient Greeks and Romans from prehistory to the Middle Ages, with emphasis on the literature, philosophy and history of the classical Greek and Roman periods. It includes economic, political and social and intellectual history as well as philosophy, archaeology, religion and myth. Students may choose a track that emphasizes the study of texts in Greek and/or Latin, or they may opt for a program of courses that do not require any knowledge of the ancient languages.

## Anthropology, Minor

Anthropology is the global social science. It is the study of the human condition everywhere; its cultural, linguistic, and biological diversity; and how it evolved and developed from the prehistoric past into the globalizing present. The Anthropology minor is a 6 credit minor, in which students are encouraged to draw from all sub-fields of the discipline.

1 No more than 4 courses from any one field (Cultural/Linguistic, Archaeology, Human Biology) can be applied to the minor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

## Archaeological Science, Minor

The Minor in Archaeological Science consists of six course units. Of these six, four will be CAAM classes from introductory, intermediate and advanced levels; one must be an advanced class with an archaeological science research component (the capstone class); and one must be a class in the archaeology or culture of a relevant area.

**To Declare:**

Students interested in declaring a Minor in Archaeological Science should contact Dr. Marie Claude Boileau at mboileau@upenn.edu.

**For more information:** https://www.penn.museum/teachers-and-students/for-penn-students/caam/minor-in-archaeological-science

**Asian American Studies, Minor**

Asian American Studies explores the historical and contemporary experiences of Asian immigrants and of persons of Asian ancestry in North America, and the relevance of those experiences for understanding race and ethnicity in national and global contexts. The program introduces students to the methods and concerns of a wide spectrum of disciplines: anthropology and ethnography, economics, history, law, literature, sociology and demography, political science, and urban studies, as well as creative and expository writing.

consult with their academic program regarding final certifications and requirements for graduation.

## Biology, Minor

The Biology minor introduces students to fundamental topics in the areas of cell and molecular biology, genetics, physiology, and ecology and evolution. This broad range of coursework is designed to provide students with a sufficient background to understand the basics underlying many of the current advances in the field.

**For more information:** [https://www.bio.upenn.edu/undergraduate/current-students/minor/requirements](https://www.bio.upenn.edu/undergraduate/current-students/minor/requirements)

## Biophysics, Minor

Bridging the biological sciences and the physical sciences, Biophysics is concerned with physical and chemical explanations of living processes, especially at the cellular and molecular levels. Detailed molecular descriptions are emerging for genetic elements and for the mechanisms that control their propagation and expression. Biophysical studies include the investigation of protein structure, nucleic acid structure, enzyme mechanisms, the phenomena underlying cellular behavior, excitable phenomena in nerve, muscle and visual cells, and integrative neural phenomena.

Cinema and Media Studies, Minor

The Penn Cinema and Media Studies major and minor are traditional humanities programs involving the critical study of film and media history, theory, and aesthetics. Reflecting the hybrid nature of the field of Cinema and Media Studies, our faculty members are housed in departments across SAS and the university, and we cross-list courses with various departments and schools, including Africana Studies, Anthropology, Communications, East Asian Language and Civilizations, English, Fine Arts, German, History, History of Art, Near Eastern Languages and Civilizations, Romance Languages, Slavic Languages and Literatures, and Women’s Studies. This truly interdisciplinary program will introduce students to the wide range of methodologies used to study film and media, and this intersection with other disciplines makes Cinema and Media Studies an ideal component of a double major.

Electives

Select 1 course unit of Non-American Cinema

Select 3 course units of Elective (Production & Craft of Cinema maximum 2 course units)

Total Course Units: 7

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Classical Studies, Minor

Classical Studies encompasses the civilization of the ancient Greeks and Romans from prehistory to the Middle Ages, with emphasis on the literature, philosophy and history of the classical Greek and Roman periods. It includes economic, political and social and intellectual history as well as philosophy, archaeology, religion and myth. Students may choose a track that emphasizes the study of texts in Greek and/or Latin, or they may opt for a program of courses that do not require any knowledge of the ancient languages. The Classical Studies Department provides extensive training at the Undergraduate level as well as graduate training in both Classical Studies and Ancient History.

Cognitive Science, Minor

Cognitive science is the empirical study of intelligent systems, including the human mind. An interdisciplinary science, it combines results from biology, computer science, linguistics, mathematics, neuroscience, philosophy and psychology to the study of language processing, perception, action, learning, concept formation, inference and other activities of the mind, with applications for information technology and the study of artificial intelligence.

¹ Consult with Undergraduate Chair.

Comparative Literature, Minor

The undergraduate program in Comparative Literature welcomes students interested in the study of literature from theoretical, interdisciplinary, cross-cultural, and global perspectives. The core courses train students to appreciate the variety of meanings that texts acquire in different institutional and philosophical contexts and different socio-political frameworks. There are three concentrations within the major: National and Transnational Literatures (four courses in each of two languages), Theory, and Globalization.

Comparative Literature is a flexible program, allowing students to take courses in a variety of departments in the College. Students with interests in more than one national literature and in fields such as philosophy and political theory, art and aesthetics, and film and music will find the requirements congenial. The program provides students with a cosmopolitan intellectual background that is increasingly in demand in an era of globalization.

The minor in Comparative Literature requires students to take an introductory course and a course in theory, along with an open selection of four literature and film courses.

Computational Neuroscience, Minor

The BBB Program has established a new cross-school inter-disciplinary Minor in Computational Neuroscience, which is an emerging field involving the application of quantitative methods to the analysis of neural circuits and the brain. In brief, the Minor requires eight courses, four core classes and four electives, the latter encouraging breadth. No more than five of these courses can also be used to fulfill requirements for another major or minors.

Consumer Psychology, Minor

The goal of the interschool Consumer Psychology Minor is to create a program that fosters the natural link between Psychology in the College and Marketing in Wharton. To fulfill the Minor in Consumer Psychology students must complete four courses from the Psychology Department in the College and four courses from the Marketing Department in Wharton, and the stats requirement. Both College and Wharton requirements will consist of core courses along with a set of elective courses. College students who wish to minor in Consumer Psychology must count two of the four required psychology (PSYC) courses towards only the Consumer Psychology minor (and towards no other major or minor).

Total Course Units: 9

Note: Two of the four courses must count ONLY toward the CNPS minor, no other major or minor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Creative Writing, Minor

Creative Writing is the study of writing and literature with an emphasis on cultivating students' own approach to craft. Students can choose from a range of workshops in fiction, creative nonfiction, poetry, screenwriting, playwriting, or journalism, all of which expose them to a range of writing in the field and give them opportunities to craft their own original work.
Students can minor in Creative Writing by completing four workshop courses and two courses in the study of literature.

Journalistic Writing is the study of nonfiction writing and literature with an emphasis on cultivating students’ own skills in reporting, editing, interviewing, investigative journalism, media scholarship, and writing for a range of platforms. Students can minor in Journalistic Writing by completing six workshop courses in journalism and creative nonfiction, including one required course in long-form journalism.

### Digital Humanities, Minor

The Undergraduate Minor in Digital Humanities is offered by the School of Arts and Sciences at the University of Pennsylvania. It has been designed for students who want to augment their disciplinary studies in the humanities or humanistic social sciences with advanced digital research techniques and in-depth engagement with theoretical and practical questions raised by digital humanities. Students who are not majoring in humanities fields are also welcome to complete the minor.

For more information: https://pricelab.sas.upenn.edu/education/digital-humanities-minor

---

### Dutch (Netherlandic), Minor

The Dutch-speaking Low Countries (the Netherlands and part of Belgium) are a unique cultural community of about 22 million speakers in North-
Western Europe. The names of famous Dutch artists readily come to mind: Rembrandt, Rubens, Breughel, Van Eyck, Mondriaan, as do some of the cities where they lived: Amsterdam, Brussels, Leyden, Maastricht. But artists do not flourish in a vacuum. Each of these artists assumes a cultural, political, economic, and historical context that is worthy of study in its own right. The resources in Dutch Studies at Penn offer students and faculty the ability to learn more about:

- The Dutch Economy
- The Dutch Language
- The Netherlands and Belgium During the Nazi Occupation
- The Literature and Culture of the Dutch Colonial Period

For more information: https://www.sas.upenn.edu/germanic/languages/dutch

Intensive Summer study in Zeist or Gent can also count toward Minor requirements.

## East Central European Studies, Minor

The Minor program in East Central European Studies offers students the opportunity for the interdisciplinary study of the language, history, politics, literature, and culture of Eastern and Central Europe. The minor requires a total of six courses (6 c.u.) beyond the language requirement (two semesters), which students can satisfy by choosing any regional language currently offered at Penn (i.e. Bosnian/Croatian/Serbian, Hungarian, Polish, Ukrainian, Yiddish), by completing language coursework through a study abroad program, or by demonstrating equivalent proficiency.

---

## East Asian Area Studies, Minor

East Asian Area Studies focuses on East Asia as a region of the world and human experience, and provides an integrated curriculum drawing on the approaches of the social sciences and the humanities. The program requires relevant courses in areas including history, international relations, political science, sociology, legal studies, and East Asian arts and cultures, while maintaining high standards in language study.

For more information: https://ceas.sas.upenn.edu/undergraduate/secondary-undergraduate-page

With intensive language courses (4 course units) the Minor will require 8 course units.

---

## Economic Policy, Minor

Economics is a social science and as such an important component of the liberal arts curriculum. At the core of economics are theories of how individuals, firms, and other organizations make choices and interact, taking into account constraints on their behaviors. Among the topics

---

University of Pennsylvania
studied in economics are: the determination of prices and quantities in various types of markets (from perfectly competitive commodity markets to highly regulated utility markets and internet auctions); the effects of taxes, subsidies, and regulations; the determination of aggregate economic activity (e.g., GDP, unemployment); inflation, monetary policy, and financial intermediation; economic growth and income distribution; international trade and international finance (e.g., exchange rates). Economic policy questions stand at the center of public policy debates in the U.S. and countries all around the world. The goal of the Economic Policy Minor is to provide students who are not majoring in economics with the analytical tools that are necessary to participate in and shape public policy debates. The foundation for the minor is provided by the microeconomics and macroeconomics principles courses. After having completed the principles courses, the student can choose a minimum of four elective courses, which apply the basic tools of economic analysis to specific policy questions. The completion of the Economic Policy Minor does not require university-level calculus courses.

For more information: http://economics.sas.upenn.edu/undergraduate-program/economic-policy-minor

Total Course Units: 6

1. It is highly recommended that students take ECON 030 Public Policy Analysis as one of the electives.
2. Students may substitute a 0-level for a 200-level in the same subject area provided they fulfill the prerequisites.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### English, Minor

Students deciding to pursue English at Penn study language, literature, literary history and theories of literary production in a thirteen-course major of flexible design. While completing the language and literature requirement and the five required courses in the literary historical “core,” majors also pursue their own special literary interests in six-course concentrations of their own choosing. English offers more than twenty distinct concentrations, including several options for creative writers.

Environmental Studies, Minor

The Environmental Studies minor is designed to achieve an understanding of the breadth of contemporary environmental issues through a series of courses in environmental studies, while ensuring that each student pursue a purposeful course of study in some traditionally defined area of scholarship. Graduates of the program are trained for professions directly or indirectly involved with problems of environmental quality.

European Studies, Minor

European Studies at Penn is an interdisciplinary minor and an ideal addition to the study of many disciplines in the humanities and social sciences. It supplements majors in history, political science, sociology and art history as well as in French, German, English, Spanish, Italian and Slavic languages. It is designed to give students access to:

- An understanding of Europe as a historical and cultural entity and its world leadership in business, politics and culture.

- A great variety of countries, cultures and languages whose interaction with each other and with the United States is an essential part of transatlantic culture.
- The institutions of a new Europe—European Union, Council of Europe, European Court of Human Rights—reflecting the largest experiment in building a global system of governance in human history.

Fine Arts, Minor

The Undergraduate Fine Arts Program combines studio practices, seminar courses, and interactions with visiting artists and professionals in order to provide an open intellectual framework to foster critical awareness and independent methods of artistic research and learning. The Fine Arts Department offers a diverse range of studio courses in the areas of animation and 3D modeling, ceramics, design, drawing and painting, photography, printmaking, sculpture and video. The dynamic curriculum also provides students with the opportunity to thoroughly examine contemporary art, creative research, interactive design and public art through seminar-based instruction.

The Undergraduate Fine Arts Program offers a Fine Arts Major for students in the College of Arts and Sciences and School of Engineering, and a Fine Arts Minor for undergraduate students across the university.
The Fine Arts program works in conjunction with three interdisciplinary degree programs in Cinema Studies, Digital Media Design and Visual Studies. Fine Arts courses are available to all students at the university to take as electives in order to enhance multidisciplinary learning.

A goal of the Undergraduate Fine Arts program is to facilitate an environment where the potentialities of art are considered in relation to the real life conditions of our students. Encouraged to test themselves against the rigors of divergent artistic approaches and their histories, our students develop a more complex set of skills to creatively and critically negotiate the turbulent shifts taking place globally in terms of human experiences.

French and Francophone Studies, Minor

French and Francophone Studies introduces students to the full span of historical and cultural traditions from France and the French-speaking world. Languages courses—from introductory to advanced—promote linguistic fluency, building on the skills students have acquired in high school or at Penn. Upper-level seminars explore a range of topics pertaining to literature, history, visual arts, and/or the media, and they offer majors and minors the opportunity to engage in research on French and global Francophone cultures across periods into contemporary times.

Geology, Minor

The Geology minor is designed to provide the graduates with skills to determine the environmental and/or geologic events that have led to the structures and features of a location and to analyze a field site or geologic region. Areas of interest include mineralogy, petrology, volcanology, stratigraphy, economic geology and paleontology. Geology also includes subjects as varied as environmental geology, evolutionary biology, solid-state chemistry, oceanography, mineral economics and geochronology.

German, Minor

The major and minor programs in the Department of Germanic Languages and Literatures provide deep understandings of language and cultures. Building from basic language competency to synthesizing significant literary works, historical context and current media and politics, the program offers a comprehensive education through engaged, active learning in a combination of core courses with a wide range of electives. Your learning experiences can be broadened and applied in study abroad as well as internship programs.

Health Care Management, Minor

The Biological Basis of Behavior Program and the Health Care Management Department of the Wharton School have jointly sponsored this effort. The objective is to provide students with exposure to two related areas: study in neuroscience and behavioral biology, as a leading example of the bioscience enterprise, and health services management, as the environment in which science innovation must be developed and managed.

The minor consists of eight courses, four from the Biological Basis of Behavior Program and four from Wharton. Students must earn a minimum grade of C- in courses taken to fulfill the minor requirements. Students must have a minimum of 3 courses that they count towards the minor and not towards any other major of minor.

Hispanic Studies, Minor

The demographic, economic and political realities of the United States, the articulation of a mainstream English culture with an always increasing diversity of Hispanic and Latino cultures, and the ongoing forging of strong cultural and economic ties throughout the Americas, have moved Spanish out of the bounds of the category of "foreign" language and culture in this country. There are many instances that point to the fact that Spanish will become de facto if not officially—a second national language and culture of the United States. Furthermore, in Europe, Spain is assuming an ever-more significant role in the affairs of the European Union. The Spanish transition to democracy in the 1970s fostered an environment of cultural, linguistic and political diversity that for half a century has served as a fascinating model for the rest of Europe, both east and west.

Hence, the knowledge of Spanish culture gives students much more than the ability to communicate in the third-most spoken language of the world. It prepares them to account for an entirely different national, continental and global reality in all its complexity. Since culture is the controlling category in this field of studies, the major in Hispanic Studies orient itself to the types of knowledge generated by new disciplines such as cultural studies, new historicism, ethics, and postcolonial studies.

Majors in Hispanic Studies are overwhelmingly double majors. This means that they bring to their classes a dialogic perspective that engages in the study of Hispanic cultures informed by interest in other fields such as history, government, sociology, economics, medicine, and law. The richness and depth of these interests make for lively and intellectually rewarding classroom discussions.

International Development, Minor

The International Development minor is intended for students who wish to complement their primary area of study with an interdisciplinary focus on complex social problems associated with international development. The minor is intended to expand a student's chosen major by focusing on critical development issues from several different academic perspectives. Approved courses emphasize problems of development in poor countries and poorer regions of wealthier countries. The interdisciplinary nature of the minor allows students to embrace a global perspective on the processes of change and development, critically assess internal and external influences on the development process, and gain a deeper perspective on the interconnectedness of complex problems.

International Relations, Minor

International Relations addresses the ways in which governments, private groups and individuals relate to each other in the global political and economic systems. The program provides a solid grounding in the methodologies of political science, history and economics. The curriculum draws on the best courses relevant to world politics, offers a well-rounded liberal arts education and helps prepare students for law or business school, Ph.D. programs and international careers.

Italian Studies: Italian Literature, Minor

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

For more information: http://www.sas.upenn.edu/italians/

Jewish Studies, Minor

The Jewish Studies Program provides an opportunity for students to study the Jewish experience from several perspectives including: language (Hebrew, Yiddish, and Ladino), literature in the original languages and in translation, the history and culture of the Jewish people from Biblical Israel to 21st-century America and modern Israel, the exploration of Jewish law, and the roles of gender and sex in Judaism. Students may specialize in Jewish Studies through a major or a minor, or through one of the following concentrations: Jewish History within the History Department, Hebraica/Judaica within the Department of Near Eastern Languages & Civilizations, and Judaism within the Department of Religious Studies.

For more information: http://ccat.sas.upenn.edu/jwst/undergraduate

Journalistic Writing, Minor

Creative Writing is the study of writing and literature with an emphasis on cultivating students’ own approach to craft. Students can choose from a range of workshops in fiction, creative nonfiction, poetry, screenwriting, playwriting, or journalism, all of which expose them to a range of writing in the field and give them opportunities to craft their own original work. Students can minor in Creative Writing by completing four workshop courses and two courses in the study of literature.
Journalistic Writing is the study of nonfiction writing and literature with an emphasis on cultivating students’ own skills in reporting, editing, interviewing, investigative journalism, media scholarship, and writing for a range of platforms. Students can minor in Journalistic Writing by completing six workshop courses in journalism and creative nonfiction, including one required course in long-form journalism.

### Latin American and Latino Studies, Minor

The Latin American and Latino Studies (LALS) Program offers an interdisciplinary major and minor to study the history, arts, languages, cultures, societies, politics, and/or regional organizations of Latin American and Caribbean countries as well as Latino communities and individuals in the United States. With courses offered across many departments in the School of Arts and Sciences, in study abroad programs taught throughout Latin American cities, and with academically based community service courses with Latino organizations in the Greater Philadelphia area, the LALS major and minor afford our students a very comprehensive approach to Latin American and Latino Studies as well as the possibility of a flexible curriculum, where students can pursue and combine their academic interests.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Landscape Studies, Minor

The Landscape Studies Minor focuses on the role of the landscape in the cultural imagination, on its legibility as a representation of political, social, artistic, and environmental values; and on its potential to reflect and change our ideas about relationships between the natural world and society.

### Law and Society, Minor

The Law and Society Minor program gives students the opportunity to study and understand the law within a sociological framework, by examining both the factors that affect variations in the law, as well as how those variations affect individuals and populations differently. In addition to a theoretical foundation in Sociology, students in the minor will study issues involving the state, its relationship to other institutions such as religions, corporations, civil liberties, the organization of courts, punishment and detention, legislatures, international bodies and trade agreements (such as NAFTA and the EU), race, class and gender and discrimination, reproductive rights, LGBT rights and the legal profession in general. Although the focus of this minor will be on U.S. laws and the U.S. society, laws and societies of other countries as well as international law and the international society will be used for comparative analysis.

The minor prepares students interested in the broad aspects of legal regulations and social organization. It is for students who are interested in graduate studies in law, applied community organizations, or business.

Linguistics, Minor

The Linguistics Program is intended to acquaint students with the methods and findings of the scientific study of human language and its relationships to cognition, society, and history. It serves as a preparation for graduate training in linguistics or related areas, and as part of a rigorous general education. Linguistic training is relevant to work in anthropology, philosophy, psychology, and language and literature, as well as to careers in such fields as education, computer science and law. Founded by Zellig Harris in 1947, the Penn Linguistics Department is the oldest modern linguistics department in the United States. We have outstanding programs in the core disciplines of syntax and phonology, as well as in sociolinguistics, semantics, discourse, historical linguistics, phonetics, and psycholinguistics. Penn is also the home of the Linguistic Data Consortium (LDC), a compiler and distributor of linguistic materials for language engineering research. The graduate group in Linguistics at the University of Pennsylvania is an interdisciplinary team of faculty from the Department of Linguistics and related departments. Our program has strong concentrations in several areas and a tradition of collaboration among its faculty.

Total Course Units: 6

1 Must be taken in the Linguistics Dept. at Penn. Please consult with the Undergraduate Chair for selection of courses to match interests.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Logic, Information, and Computation, Minor

Modern mathematical logic began with work by Cantor, Frege, and other mathematicians during the last three decades of the nineteenth century who were concerned with providing a sound basis for the development of mathematical analysis. In the wake of "the crisis in the foundations of mathematics" precipitated by the discovery of various logical paradoxes at the turn of the twentieth century, mathematicians and philosophers such as Hilbert and Russell intensively pursued investigations into the logical foundations of mathematics. Connections between logic and the foundations of mathematics remained an important source for scientific developments in logic through the epochal results of Gödel in 1930 and 1931, which indicated both the scope and limits of the mechanization of mathematical reasoning. The great burst of scientific activity occasioned by Gödel's results led directly to Turing's mathematical characterization of mechanical computation in terms of simple devices, now known as Turing machines. The work of Gödel, Turing, and other logicians during the 1930s laid the scientific foundations for the revolution in computer and information technology that began in the last half of the twentieth century and continues today.

The Logic, Information, and Computation Program offers students the opportunity to engage in a systematic, integrative program of study within the School of Arts and Sciences. Logic remains one of the core disciplines in investigations of information and computation. Indeed, logic is playing a major role in advances in computer security, database technology, networking, and software engineering. Moreover, logic has expanded its role within mathematics beyond foundational studies and now enjoys rich connections with areas as diverse as algebra, analysis, and combinatorics. In light of the current importance of the investigation of computation and information from both a scientific and technological point of view, the Major and Minor in Logic, Information, and Computation will provide students with a strong background to pursue computational aspects of the natural, biological, and social sciences and prepare them for careers in information technology.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Mathematics, Minor

At the core of modern theoretical science, mathematics has historically provided an expressive language as well and theoretical framework for advances in the physical sciences. It has since become central in the life and social sciences and computer science. Mathematics at Penn embraces traditional core areas of mathematics as well as developing areas (Penn is one of the world's leading centers in the application of logic to theoretical computer science). The goals of the major program are to assist students in acquiring both an understanding of mathematics and an ability to use it. The mathematics major provides a solid foundation for graduate study in mathematics as well as background for study in economics, the biological sciences, the physical sciences and engineering, as well as many non-traditional areas.

Medical Sociology, Minor

The Medical Sociology minor gives students the opportunity to engage in the sociological study of medicine and the health of populations. A sociological perspective on medicine allows students to critically engage with the social and cultural framing of what is defined as “illness”; the structural factors that may contribute to those illnesses; and the interactive dynamics between healthcare providers and patients.

Students will be able to critically connect the organization of social groups with the profession of medicine, the practice of medical care, and the social factors that contribute to sickness and well-being. Students who complete this minor will have a theoretical foundation in Sociology, and a dynamic perspective on health and healthcare in the world today.

For more information: https://sociology.sas.upenn.edu/medicalsociologyminor

- Bioethics and Medical Sociology minors cannot double count more than 1 course unit.
- HSCD majors and Medical Sociology minors cannot double count more than 1 course unit.

Modern Middle Eastern Studies, Minor

The interdisciplinary Modern Middle Eastern Studies degree is designed to allow students to specialize in the Middle East as a region of the world and human experience by combining course work using both social scientific and humanistic approaches, underpinned by relevant language skills. Students will work with faculty committed to supporting interdisciplinary, applied, research-oriented advanced study. The minor gives students opportunities to work on problems of politics, policy, history, ideology, social thought, economic development, and international relations.

Music: Jazz and Popular Music, Minor

There are two paths of study for the Music minor. One flexible path allows students to draw together five courses on a wide array of topics in History, Theory, and Ethnomusicology. The other path is the Interdisciplinary minor in Jazz and Popular Music studies, which is intended for students who wish to integrate their interest in music in the contemporary world and in academically-based community service as a form of learning. This minor is also for music majors who wish to include knowledge of jazz and popular music performance into their degrees.

1. Only 1 course unit of performance coursework may be used toward minor electives. Consult with the Minor advisor.
2. If MUSC 007 Ensemble Performance (0.5 course unit) is chosen as an elective, additional semesters are required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Native American and Indigenous Studies, Minor

The Native American and Indigenous Studies (NAIS) Initiative at Penn features an inter-disciplinary Minor that focuses on the cultures and histories of Native Americans, First Nations, and other Indigenous peoples. Students can explore a diverse range of topics, including cross-cultural historical encounters, heritage landscapes, language recovery, cultural performance, law and sovereignty, museum anthropology, archaeology, decolonizing methods, and more. Many NAIS courses are cross-listed in more than one department (e.g., Anthropology, History, Religion). NAIS Faculty often use comparative case studies of Indigenous communities in different world settings, past and present, to illuminate current issues, locally and globally.

For more information: https://nais.sas.upenn.edu/

NAIS courses must be taken for a grade (not pass/fail). Students must achieve a grade no lower than a C in each course.

Near Eastern Languages & Civilizations: Arabic & Islamic Studies, Minor

Arabic and Islamic Studies focuses on languages and cultures of the wider Middle East in the context of Islamic Civilization. Because of the interdependence of language and culture, a primary emphasis is on gaining mastery of Middle Eastern languages such as Arabic and Turkish, alongside coursework in history, religion, and culture.

1 May be fulfilled in Arabic, Persian or Turkish.
2 May be fulfilled in Arabic, Persian or Turkish. Arabic, Persian or Turkish culture courses to be chosen in consultation with the advisor.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Nutrition, Minor

Jointly sponsored by the Schools of Nursing and Arts and Sciences, the Nutrition Minor presents a broad view of the field, and illustrates the pervasiveness of nutrition-related issues in such diverse fields as anthropology, economics, folklore, history, physiology, psychology, health care and public policy.

For more information: https://www.nursing.upenn.edu/nutrition-minor/
Philosophy, Minor

Philosophy seeks to illuminate fundamental aspects of the world, of our relation to and knowledge of the world, and of our own nature as rational, purposive, and social beings. The study of philosophy aims at an appreciation of the ways this enterprise has been, is, and might be approached. It also provides a vantage point for reflecting on the nature and achievement of other disciplines, such as science, the arts, and the humanities. Philosophical topics can be divided roughly into practical (ethics, politics, aesthetics) and theoretical (epistemology, metaphysics, mind, and logic). The Philosophy Minor requires a Philosophy balanced selection of courses in the various fields of philosophy and its history.

Physics, Minor

The aim of physicists is to discover the most fundamental principles of nature. Their tools are mathematics and experiment. The physical world as we perceive it is very complex, yet the principles of physics are inherently simple. A physicist’s forte is the ability to analyze a problem, reduce its complexity, and arrive at an understanding of the underlying patterns of nature in terms of simple relationships among constituent elements. Learning to do this gives Physics minors an intellectual versatility that can serve them well in a variety of future activities ranging from research and teaching in Physics or related sciences to careers in law, the health professions, and high-technology companies.

For more information: http://www.physics.upenn.edu/undergraduate/physics-astronomy-major/minor

Total 6 courses (not course units but courses). No more than two (2) courses can be at the 100 (introductory) level.

**Political Science, Minor**

The Political Science Department’s course offerings span the discipline of political science, from American political institutions, to the politics of world regions, the emergence of a new international order, and recent and ancient political ideas. The Department’s curriculum is divided into the four standard fields of American politics, comparative politics, international relations, and political theories. There are also other opportunities for study in political processes of elections and communications and public policy. A minor involves one introductory political science course and five political science electives.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Psychoanalytic Studies, Minor**

Psychoanalytic ideas provide a coherent basis for understanding how people feel and think, and how they function as individuals and in groups. These ideas, centered on unconscious emotional processes and human relationships, continue to evolve and develop. They form a bridge across many disciplines throughout the humanities, social sciences, and some of the natural sciences. Penn is now one of very few schools in the country (and the world) to offer the exciting opportunity of a minor in Psychoanalytic Studies.

As it provides a unifying body of ideas, Psychoanalytic Studies comprises courses in many departments. The minor is designed in partnership with the Psychoanalytic Center of Philadelphia, and students who sign up for the minor also have the opportunity to meet monthly with a practicing psychoanalyst to learn about contemporary psychoanalytic theories and therapies. Students who complete six courses that count toward the minor as well as a series of meetings with a psychoanalytic mentor will receive both the minor on their transcript and a Certificate of Accomplishment from the Psychoanalytic Center of Philadelphia.

Religious Studies, Minor

The Religious Studies minor is a great way to gain background in the scholarly study of religion in order to supplement or enhance major studies in other fields like Jewish Studies, History, Anthropology, Art History, Psychology, Political Science, or even Nursing, Engineering, Pre-Med, Pre-Law, and Business. Students in Wharton or the College of Nursing have taken a Religious Studies minor to gain some fluency in matters of business ethics, bio-ethics, cross-cultural analysis, inter-religious affairs, and the like.

Every minor program must include six courses in at least two different religious traditions. At least two of the six courses must be taken with core Department faculty. Students wishing to focus on an individualized topic may work out a program with the Undergraduate Chair. RELS also offers many course options which can count towards College Sector requirements, which makes it easier to incorporate the RELS minor into a typical undergraduate course load.

Russian and East European Studies: Russian Culture and History, Minor

The Department of Slavic Languages and Literatures offers programs in Russian and, with the support of the Penn Language Center, courses in the Czech and Polish languages. The department also offers a series of courses for students who have spoken Russian at home and wish to gain literacy and/or improve their language skills or to pursue the study of Russian literature and culture in Russian. Students of Russian at Penn are invited to reside in the Russian House (which brings together students interested in daily use of the language) and encouraged to spend a semester of study abroad.

Science, Technology and Society, Minor

Science, Technology & Society (STSC) examines the social contexts in which science and technology occur, the organizations of people and things that make up science and technology systems, and the social and cultural consequences of scientific and technological change over time. In a wide array of courses, STSC majors explore the relationship between scientific knowledge, technological innovations, technological systems, and society past and present.

South Asia Studies, Minor

South Asia Studies is an interdisciplinary field focusing on the history, languages, society, literature, and art from India, Pakistan, Bangladesh, Nepal, Sri Lanka, Afghanistan, and Bhutan. We are America's oldest and arguably most distinguished South Asia regional studies program dealing with the past and contemporary life of one-fifth of the world's population and teaching more languages than any other South Asian studies program in the US. Having a deep knowledge of the country set to outpace the US as the second largest economy in the world in an increasingly competitive global job market gives graduates a competitive edge over others with more generic skills. You don’t have to know...
anything about India or be South Asian to enjoy our great, flexible minor. So ask us about it today!

Theatre Arts, Minor

The Theatre Arts Program offers a six-course minor, with three courses that focus on academic approaches to the theatre, such as the study of dramatic literature, theory, history and criticism, and three that focus practical aspects of performance, such as acting, directing, designing, devising, and playwriting. English majors concentrating on drama will find courses that cross-list; a diverse group of students with a wide array of major fields of study find it possible to pursue their interest in Theatre Arts with a minor.
**Urban Real Estate and Development, Minor**

This minor, co-sponsored by Real Estate (Wharton) and Urban Studies (Arts and Sciences), is designed to enable students to combine an interest in Urban Studies and Real Estate Development. Students take a total of seven Urban Studies and Real Estate courses, in consultation with the minor advisor.

For more information: [http://www.sas.upenn.edu/urban/students/real-estate-development-minor](http://www.sas.upenn.edu/urban/students/real-estate-development-minor)

Prequisite to taking any Wharton courses: ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro. Also, check prerequisites for Wharton courses and fulfill.

1. Can be an Urban Studies course or an approved Urban related course.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**History of Art, Minor**

The Minor in the History of Art, like the Major, aims to deepen students’ knowledge of artistic production and practice over the scope of human history. A Minor program in art history may complement the student’s Major in a cognate field, or it may be unrelated to the student’s primary field instruction.

For more information: [http://www.sas.upenn.edu/arthistory/undergraduate/minor](http://www.sas.upenn.edu/arthistory/undergraduate/minor)
Near Eastern Languages & Civilizations: Hebrew & Judaica, Minor

This concentration explores Hebrew culture from the Biblical through the Rabbinic and Medieval periods, and into modern times. Emphasis is on gaining facility in use of Hebrew language alongside courses in history, religion, literature and culture.

For more information: http://www.sas.upenn.edu/nelc/undergrad_programs/nelc_minor.html

Near Eastern Languages & Civilizations: Arabic & Hebrew Studies, Minor

This minor explores the inter-relationships between Arabic and Hebrew cultures within the modern and/or medieval periods. Emphasis is placed on language facility in Arabic and/or Hebrew, alongside courses in history, religion, literature and culture.

For more information: http://www.sas.upenn.edu/nelc/undergrad_programs/nelc_minor.html

Italian Studies: Italian Culture, Minor

The Italian Studies section of the Romance Languages Department offers programs in language, literature, film, linguistics, cultural studies and civilization for students with or without a background in Italian. At the core of this program is the study of the Italian language, understood both in the narrow sense of verbal communication, but also in the larger sense of textual messages: literary, cinematic, historical, art-historical, and mass-cultural.

For more information: http://www.sas.upenn.edu/italians/
East Asian Languages and Civilizations: Chinese, Minor

All students minoring in the Department of East Asian Languages and Civilizations must fulfill a set of Basic Requirements. These requirements are to be met within one of three linguistic and cultural concentrations:

- Chinese Studies
- Japanese Studies
- Korean Studies

In addition to the Basic Requirements, there are further requirements specific to each concentration.

Global Medieval Studies, Minor

Eleven Penn departments contribute to the interdisciplinary program in Global Medieval Studies, which allows students to discover the pre-modern world together, as the root and necessary precondition to the modern. The program is broad geographically and temporally; it includes Europe, the Middle East, Asia, and Africa, and in the latter part of our period even the New World, from Late Antiquity to 1700. This was a formative historical and cultural period in a variety of civilizations, from the north-western corner of Europe, across the Mediterranean and the Middle East, and on to southern and eastern Asia, south to Africa and over the Atlantic Ocean to the New World. The program encourages students to view the world through the lens of various disciplinary and geographic perspectives and discover the interaction of diverse civilizations and religions. As the era that gave birth to contemporary nations and a time before the formation of modern geopolitical concepts, this period provides a critical space for thinking about the composite nature of contemporary identities.

The minor program in Global Medieval Studies can easily be combined with a major in a language and literature tradition, philosophy, science, international relations, or even natural sciences, to name a few. As broadly educated historians and humanists, students of Global Medieval Studies can go on to a variety of occupations or continue their education in a range of graduate programs or professional schools.

Urban Education, Minor

The Urban Education Minor is open to undergraduates in all disciplines, and requires seven CU's. Students choose from among three concentrations depending on interest in pursuing teaching certification or deepening one's background in urban education policy: Elementary Education; Secondary Education; Urban Education Policy, Research, and Practice. Students in all three concentrations take three core courses. The additional four requirements vary depending on the track.

Environmental Science, Minor

The Environmental Science minor is designed to achieve an understanding of the breadth of contemporary environmental issues through a series of courses in environmental studies, while ensuring that each student pursue a purposeful course of study in some traditionally defined area of scholarship. Graduates of the program are trained for professions directly or indirectly involved with problems of environmental quality.

School of Engineering and Applied Science

Penn School of Engineering is unlike any other. Traditionally untraditional. Pioneers in interdisciplinary education and research. Theory linked with real-world practice. The path for students who want to shape the future.
With the pace of innovation and technological advancement accelerating ever faster, engineers hold the keys to the next generation’s routine wonders.

As an Ivy League institution — and the first university in the nation — Penn delivers a transformative experience in the classroom and laboratory, while ensuring its engineering and applied science students receive a fully rounded liberal arts education.

Penn Engineering is a pioneer in interdisciplinary education, allowing students the flexibility to craft a program that suits their individual interests, career, or graduate education plans. Both Bachelor of Science in Engineering (BSE) and Bachelor of Applied Science (BAS) degrees are offered, along with specialized dual-degree programs, an array of majors and minors, special programs, and study-abroad opportunities.

Penn Engineering students get valuable and extensive hands-on experience, conducting research and pursuing creative designs and new products alongside faculty renowned in their fields. The working relationship with faculty pervades Penn Engineering, where full-time faculty teach all core undergraduate courses, and each student has a faculty advisor.

As the global marketplace for technology grows, graduates go on to leadership roles in business, medicine, law, and academia. They leave armed with the technical knowledge, imagination, communication skills, and understanding of the social and human context of their work, all engendered with a fervor for the future nurtured at Penn Engineering.

Learn more about our history: http://www.seas.upenn.edu/about-seas/history.php.

Learn more about our school leadership: http://www.seas.upenn.edu/about-seas/dean-staff.php.

Two key elements distinguish the Penn Engineering experience from that provided by many other institutions: Exceptional academic programs, and practical design and research experience.

Our undergraduate programs emphasize both theory and practice while forming intellectual linkages across a breadth of disciplines. The opportunity for hands-on research, over the four years, allows undergraduates the chance to learn about the creation of knowledge, further explore their chosen field, and thereby become collaborators in the search for knowledge. The design experience over the four years, culminating in the senior design project, challenges students to utilize their academic training and problem-solving skills in practical ways, and provides them with direct experience with real-world problems that they will encounter as practicing engineers.

Technology is transforming our times and our lives, no longer on a scale of decades but of years and even months. A successful career through such changing times requires engineering graduates endowed with skills that are applicable to widely different technologies, skills that transcend the details of any one job. Such is the result of an education that pays much more attention to the fundamental than to the trendy, to the creative more than to the routine. Engineers must also be firmly educated as responsible citizens, concerned with the impact of their work on society.

Penn Engineering is an integral partner in Penn’s initiatives to prepare students for leadership in a high-tech world. Our goal is to prepare students for leadership roles in engineering and applied science as well as in other fields, such as medicine, business, and law, for which creativity, critical quantitative thinking, effective communication skills, and a strong commitment to humane values are essential.

**Mission of the School**

1. The creation and dissemination of scholarly research in both basic and applied arenas to be an international center of engineering excellence and the regional catalyst for technological innovation;

2. The design and delivery of engineering education known for its rigor, breadth and relevance to prepare its students to become global leaders in technology-based fields.

**Mission Statements of Bachelor of Science in Engineering Programs (ABET-accredited)**

- Bioengineering (http://www.be.seas.upenn.edu/about-academics)
- Chemical and Biomolecular Engineering (http://www.cbe.seas.upenn.edu/about-ugrad)
- Computer Science (http://www.cis.upenn.edu/ugrad/abet.shtml)
- Computer Engineering (http://www.seas.upenn.edu/cmpe/accreditation.php)
- Electrical Engineering (http://www.eee.upenn.edu/about-ugrad)
- Materials Science and Engineering (http://www.mse.seas.upenn.edu/about-ugrad/accreditation.php)
- Systems Science and Engineering (http://www.eee.upenn.edu/about-ugrad)

Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below are examples of student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, visit: http://www.seas.upenn.edu/undergraduate/research/index.php.

**Finding a Research Mentor and Research Experiences**

Students are encouraged to explore the Penn Engineering Faculty Expertise Directory (http://www.seas.upenn.edu/directory/departments.php), featuring the School’s standing faculty and is searchable by department, research center affiliation, and research expertise keyword. Users can identify which faculty are conducting research in a specific area and contact faculty members whose research interests them.

The Engineering Dean’s Advisory Board (EDAB) puts together a guide for fellow students that gives step-by-step instructions and tips on how to secure research positions as an undergraduate.

For Bioengineering majors, the Penn student chapter of the Biomedical Engineering Society (BMES) has assembled its own student guide on starting up research.

**Summer Undergraduate Research in Engineering (SURE)**

Penn Engineering’s world-acclaimed faculty, along with state-of-the-art research laboratories and highly interdisciplinary curricula, offers summer research opportunities for talented undergraduates who seek hands-on research experience. From robotics and computer animation, nanotechnology, genomics and biotechnology, Penn’s centers and
institutes are at the forefront of research on multiple scientific and technological frontiers.

**International Summer Undergraduate Research in Engineering (SURE)**

Opportunities for undergraduates are available during the summer to spend eight to 12 weeks on a research internship in one of Penn Engineering’s partner institutions abroad.

**Littlejohn Undergraduate Research Program**

Thanks to a generous gift by Angus Littlejohn, the School of Engineering is able to offer Summer Research Opportunities to Penn Engineering Students. The program is open to rising sophomores, juniors and seniors.

The program intends to provide students the opportunity to get involved in hands-on engineering research under the supervision of a faculty member. Topics of research include all areas covered by the departments in the School of Engineering and Applied Science. Students will receive a stipend of $4,500 for a 10 week period.

**Rachleff Scholars Program**

This program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

The following BSE programs are accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

- Bioengineering (http://www.be.seas.upenn.edu/about-academics)
- Chemical and Biomolecular Engineering (http://www.cbe.seas.upenn.edu/about-academics)
- Computer Science (http://www.cis.upenn.edu/ugrad/abet.shtml)
- Computer Engineering (http://www.seas.upenn.edu/cmpe/accreditation.php)
- Electrical Engineering (http://www.ece.upenn.edu/about-ugrad)
- Materials Science and Engineering (http://wwwmse.seas.upenn.edu/about-ugrad/accreditation.php)
- Mechanical Engineering and Applied Mechanics (http://www.me.upenn.edu/about-ug/ed/accreditation.php)
- Systems Science and Engineering (http://www.ece.upenn.edu/about-ugrad)

The BSE program in Computer Science is accredited by the Computing Accreditation Commission of ABET (http://www.abet.org).

For more information, visit: http://www.seas.upenn.edu/undergraduate/handbook/programs/abet-accreditation.php.

Each student is assigned a faculty advisor with whom they are required to meet at least twice per year. No student is permitted to register for classes in any semester without first meeting with an advisor and a review of their Permission to Register form (https://www.seas.upenn.edu/undergraduate/pdf/ug-advisor-signoff.pdf). Students who take the time to prepare for these meetings generally find them beneficial and informative. Faculty advisors are the best source of information about electives within the major, research opportunities, and options for graduate study.

For more information, visit: https://www.seas.upenn.edu/undergraduate/advising/.

**Curriculum**

Each major (p. 171) within the School of Engineering and Applied Science has its own curriculum. Specific curricular requirements for each major are listed by program.

However, all Engineering students must complete requirements in four specific tracks:

- core engineering courses within the chosen major
- professional electives
- social science/humanities (http://www.seas.upenn.edu/undergraduate/handbook/courses/ssh-requirements.php) and free electives (http://www.seas.upenn.edu/undergraduate/handbook/courses/free-elective.php)

A course planning guide exists for each major to assist with planning and keeping track of the requirements toward graduation.

In addition, all Engineering students must complete the following requirements.

**Writing Requirement**

Beginning with the Class of 2001, Penn Engineering has implemented a Writing Requirement. The Writing Requirement will not necessitate the completion of additional course units. Students can easily satisfy the requirement without altering the existing constraints of BAS or the BSE degrees.

Students are strongly encouraged to fulfill the Writing Requirement during the first two years of study because it becomes increasingly difficult to schedule first-year courses as one moves through the curriculum.

For more information, visit: http://www.seas.upenn.edu/undergraduate/handbook/courses/writing-requirement.php.

**Engineering Ethics Requirement**

Beginning with the Class of 2017, Penn Engineering students must fulfill the Engineering Ethics requirement. The Ethics Requirement will not necessitate the completion of any additional course units in the existing BAS or the BSE degrees, as the requirement may be double-counted from the student’s SSH course requirements.

The Engineering Ethics requirement can be satisfied by taking EAS 203 Engineering Ethics. This course may be used (double-counted) for the Social Science requirement as well. **Students are strongly encouraged to take the Ethics Requirement course during the sophomore year.**

For more information, visit: http://www.seas.upenn.edu/undergraduate/handbook/courses/ethics-requirement.php.

**Majors**

- Bioengineering, BSE (p. 172)
- Biomedical Science, BAS (p. 173)
Bioengineering, BSE

Bioengineering is a multidisciplinary area where the engineering sciences interface biology, biomedical sciences, and medicine, to advance human health. Bioengineering brings together the creation of new knowledge and understanding of biological systems through engineering analysis and experimentation, with the application of engineering design and practice principles for the development of devices, processes, methods and biotechnologies to improve medical practice and health care delivery.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/bioengineering/

Bioengineering (BE) Major Requirements

40.5 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook/).

Free Elective
Select 3 free elective courses  3

Total Course Units  40.5

1 ENM 375 Biological Data Science I: Fundamentals of Biostatistics is recommended.
2 If PHYS 150 Principles of Physics I: Mechanics and Wave Motion or PHYS 170 Honors Physics I: Mechanics and Wave Motion & PHYS 151 Principles of Physics II: Electromagnetism and Radiation or PHYS 171 Honors Physics II: Electromagnetism and Radiation taken then only 1 course unit technical elective required.
3 The Social Science & Humanities Depth, Writing & Ethics Requirements can be satisfied with the 7 total course units.

Concentrations
Students may select one of eight concentrations (http://www.be.seas.upenn.edu/current-students/undergraduates/concentrations.php):

- Biomedical Data Science and Computational Medicine
- Biomedical Devices
- Cellular/Tissue Engineering and Biomaterials
- Biomedical Imaging and Radiation Physics
- Systems and Synthetic Biology
- Neuroengineering
- Multiscale Biomechanics
- Therapeutics, Drug Delivery & Nanomedicine

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Biomedical Science, BAS

Interface the engineering sciences, biology, biomedical sciences, and medicine to advance human health and solve problems in medicine and the biological sciences. The Bachelor of Applied Science degree offers students breadth and flexibility and allows them to combine a technology-based degree with considerable coursework in the liberal arts, communications, business or fine arts. It is designed primarily for students whose interests are not oriented toward a professional engineering career. It is a popular degree option for those preparing for careers in medicine, business, and law. Many students who are pursuing dual degree programs opt for this degree.

For more information: http://www.be.seas.upenn.edu/prospective-students/undergraduates/program-bse-bas.php

Biomedical Science (ASBS) Major Requirements

40.5 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook).

Chemical and Biomolecular Engineering, BSE

Chemical Engineers apply concepts from the physical sciences (chemistry and physics) and life sciences (biochemistry and microbiology) to the design and optimization of processes for the efficient production of products ranging from fuels and chemicals to pharmaceuticals to advanced materials. Penn’s chemical engineering department provides students with both a strong foundation in engineering fundamentals and exposure to modern chemical engineering technologies. The program’s versatility allows our students to excel in diverse careers in the chemical industries, research, medicine, law, government, and education.

- Pharmaceutics and Biotechnology
- Polymer Science and Engineering
- Nanotechnology
- Environmental Engineering

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Computational Biology, BAS

The BAS in Computational Biology is an interdisciplinary area that crosses between the biological sciences, math, and computer science. More specifically, it requires that students augment a basic computer science curriculum with courses in biology, chemistry, genetics and statistics. The program is intended to train students in key areas of Computational Biology and is also designed so that a student may focus on those areas of biology in which he or she wishes to specialize. A broad background in computer science, from programming to algorithms to database systems, is also required. This program has a year-long capstone course in computational biology that is co-taught by faculty in computer science, biology and genetics. The development of Computational Biology has been influenced by various factors. One main influence derives from the need to solve problems associated with the assimilation, storage, retrieval and analysis of data arising from the Human Genome Project and similar projects that involve massive data sets containing bibliographic information, DNA sequence information and testing methods and results. The analysis of such data involves the development and use of complex information modeling techniques, languages, visualization techniques, and computational methods. The second broad area of biology in which computational methods have for some time been used is in evolution and ecology. Many evolutionary processes when viewed from the genetic point of view involve equations of such complexity that ordinary algebraic and calculus methods are simply insufficient to solve them, and numerical methods entailing the use of a computer are necessary. The construction of phylogenetic trees of evolution has for a long time been carried out by computational as opposed to mathematical methods. Many ecological processes similarly involve such complexities that computer methods offer the only way forward. Computational Biology is a field of current interest and is essential to train computer scientists with enough knowledge of biology to be able to understand the problems and computational opportunities in this domain. Employment opportunities are excellent at major pharmaceutical companies, biotech companies and research labs.

¹ Must be upper level CBE course, 300 or higher, or ENM 510 Foundations of Engineering Mathematics - I, ENM 511 Foundations of Engineering Mathematics - II.

² One less Technical Elective required if PHYS 150 Principles of Physics I: Mechanics and Wave Motion/PHYS 151 Principles of Physics II: Electromagnetism and Radiation taken.

³ CBE 150 Introduction to Biotechnology recommended.

⁴ The Social Science & Humanities Depth and Writing requirements can be satisfied with the 7 total course units.
## Computational Biology (ASCB) Major Requirements

40 course units are required. Read more about the Undergraduate Student Handbook (http://www.seas.upenn.edu/undergraduate/handbook).

- PHYS 280 | Physical Models of Biological Systems | 1 |  |
- PHYS 585 | Theoretical and Computational Neuroscience | 1 |  |
- MATH 420 | Ordinary Differential Equations | 1 |  |
- MATH 425 | Partial Differential Equations | 1 |  |
 STAT 433  Stochastic Processes

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Computer and Cognitive Science, BAS

The BAS in Computer and Cognitive Science through the School of Engineering and Applied Science combines the application of theoretical insights from Computer Science, Linguistics, Neuroscience, Philosophy, and Psychology to the formal study of intelligence, perception, reasoning, and other properties of mind, and their application in the service of Information Technology. The degree combines a form grounding in relevant aspects of Computer Science, from programming to algorithms to artificial intelligence, with a concentration in specific courses from the contingent disciplines. The non-computer science courses have been selected for formal rigor and scientific relevance. The degree prepares students for a wide variety of careers in a number of distinct academic, industrial, and professional arenas relating to psychology, philosophy and linguistics. In particular, these careers pertain to the impact of knowledge and information technology on the professions, including those in Media and Communications, Software Development, and Education (among many others), in which a broad background in computer science must be combined with a deep understanding of the human mind. The BAS in Computer and Cognitive Science is intended to address the need for properly trained computer scientists who have sufficient understanding of these other disciplines to be able to solve the many open problems in applications, research, and development that must be addressed if we are to realize the full potential of information processing technologies in these domains. Employment opportunities for students going through such a program are excellent at major information technology companies, software houses, and research labs, as well as in the standard career structures in the areas identified above.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Computer Engineering, BSE**

Computer Engineering is the discipline that designs and engineers computer systems from digital circuits, through compilers and runtime systems, to networking and world-wide distributed systems. As an engineering discipline, the computer engineer must appreciate the physical aspects of computations (energy, delay, area, reliability, costs) and be able to expertly navigate the multidimensional tradeoff space associated with implementing computations. Since today’s high performance programmable computing devices mean enormous computational tasks can be performed entirely in software, the computer engineer must manage computational capabilities and functionalities which migrate between hardware and software driven by advancing technology and these engineering tradeoffs. Recent advances in manufacturing make it economical to construct systems containing billions of components and millions of lines of code, and these systems are increasingly invaluable in life-critical and real-time systems; computer engineering is the discipline that seeks to understand how to design and manage systems of this complexity while providing adequate guarantees of safety and trustworthiness for such systems.

1 One approved Natural Science Lab (.5 cu) is required. Satisfied with
PHYS 150 Principles of Physics I: Mechanics and Wave Motion,
PHYS 170 Honors Physics I: Mechanics and Wave Motion, MEAM 147
Introduction to Mechanics Lab, BIOL 101 Introduction to Biology A,
BIOL 121 Introduction to Biology - The Molecular Biology of Life or
CHEM 053 General Chemistry Laboratory I

2 A limit of two freshman-level Engineering courses may be used as a
Technical Elective.

3 The Social Science & Humanities Depth, Writing & Ethics
   Requirements can be satisfied with the 7 total course units.

---

Computer Science, BSE

Computer scientists and engineers have revolutionized society and
created the computer and telecommunications industries that are
so important to human life and the world’s economy. As a result of
this revolution, expertise in computer science is essential in many
new areas, including computer and network service and consulting
companies, financial institutions, health industries, natural science
labs and medical research labs, and other contexts where intensive
manipulation of information is important. As a result, opportunities
for computer scientists and engineers have expanded greatly, both
in specialized fields as well as in numerous dual-career opportunities
in which computer expertise is combined with advanced degrees in
business, communication, engineering, law, medicine, and science.

1 A CIS elective is a CIS or NETS engineering course. The SEAS handbook defines all CIS and NETS classes numbered 1xx5xx as engineering courses, with the following exceptions that cannot be used: CIS 100, 101, 106, 125, 160, 261. ESE 350 Embedded Systems / Microcontroller Laboratory can also be used to satisfy the CIS elective requirement. Please note: Students may count at most 1 cu of 1xx credit as a CIS elective.

2 For CSCI Majors, Natural Science may also include the following Cognitive Science Courses: LING 250 Introduction to Syntax, PSYC 111 Perception, (these courses cannot be used by CSCI majors in the SSH category).

3 One year of laboratory course work is required which can be used as one of the 4 course units. One way to satisfy this requirement is by taking PHYS 150 Principles of Physics I: Mechanics and Wave Motion and PHYS 151 Principles of Physics II: Electromagnetism and Radiation.

4 Two of the six must be Engineering courses.

5 The Social Science & Humanities Depth, Writing and Ethics requirements can be satisfied with the 7 total course units.

---

**Technical Electives**

*(Department Approval Required)*

Two Engineering courses required. Remaining course can be from:

- Option 1: Any approved minor or minor equiv; or a sequence of approved courses.
- Option 2: Any Math, Natural Science, or Engineering, or the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

**Computer Science, BAS**

Computer scientists and engineers have revolutionized society and created the computer and telecommunications industries that are so important to human life and the world's economy. As a result of this revolution, expertise in computer science is essential in many new areas, including computer and network service and consulting companies, financial institutions, health industries, natural science labs and medical research labs, and other contexts where intensive manipulation of information is important. As a result, opportunities for computer scientists and engineers have expanded greatly, both in specialized fields as well as in numerous dual-career opportunities in which computer expertise is combined with advanced degrees in business, communication, engineering, law, medicine, and science.

Total Course Units \(40\)  

1 A CIS elective is a CIS or NETS engineering course. The SEAS handbook defines all CIS and NETS classes numbered 1xx-5xx as engineering courses, with the following exceptions that cannot be used: CIS 105 Computational Data Exploration, CIS 106 Visualizing the Past, CIS 125 Technology and Policy, CIS 160 Mathematical Foundations of Computer Science, CIS 261 Discrete Probability, Stochastic Processes, and Statistical Inference, CIS 262 Automata, Computability, and Complexity. ESE 350 Embedded Systems/Microcontroller Laboratory can also be used to satisfy the CIS elective requirement. Please note: Students may count at most 1 cu of 1xx credit as a CIS Elective.  

3 Science labs are not required. Labs taken can be used as Natural Science credit.  

4 For ASCS Majors, Nat Sci may also include the following Cog Sci Courses:  
- LING 250 Introduction to Syntax  
- LING 230 Sound Structure of Language  
- LING 520 Phonetics I  
- LING 530 Phonology I  
- LING 531 Phonology II  
- LING 550 Syntax I  
- LING 551 Syntax II  
- LING 603 Topics in Phonology  
- LING 630 Seminar in Morphology  
- PHIL 426 Philosophy of Psychology  
- PSYC 109 Introduction to Brain and Behavior  
- PSYC 111 Perception  
- PSYC 151 Language and Thought  
- PSYC 235 Psychology of Language, PSYC 253 Judgment and Decisions  

5 OPTION 1: Any approved minor, or sequence of approved courses. Remaining must be Math, Nat Sci or Engineering. (MINORS ARE STRONGLY ENCOURAGED)  

6 OPTION 2: Any 8 CU’s from Math, Nat Sci, Engineering, or from the following specified Tech Electives: LING 106 Introduction to Formal Linguistics, PHIL 231 Epistemology, OIDD 220 Introduction to Operations Management, OIDD 321 Introduction to Management Science, OIDD 325 Computer Simulation Models  

7 The Social Science & Humanities Depth, Writing & Ethics Requirement can be satisfied with the 7 total course units.  

Concentration  
Department approval is required.  

- Option 1: Any approved minor, or sequence of approved courses. Remaining must be Math, Natural Science or Engineering. (Minors are strongly encouraged.)  

- Option 2: Any 8 course units from Math, Natural Science, Engineering, or from the following specified tech electives:

Digital Media Design, BSE

The Digital Media Design (DMD) program is an interdisciplinary major in the School of Engineering and Applied Science at Penn. As a full-fledged Bachelor's in Engineering and Science (BSE) degree, it combines major coursework in computer graphics within the Computer & Information Science Department, Communication theory courses from the Annenberg School and Fine Arts courses from Penn's School of Design. The program was designed for students who have an interest in computer graphics, animation, games, and the design of virtual reality environments and interactive technologies. The Digital Media Design Program was established in response to what we perceived as a growing rift within the computer graphics and animation industry.

Total Course Units 40

1 Select courses from offerings in the following categories: COMM; FNAR, CIMS, THAR, MKTG, EDUC (Advisor approval is required).

2 The Social Science & Humanities Depth, Writing & Ethics Requirement can be satisfied with the 7 total course units.

3 Approval is required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Electrical Engineering, BSE

Electrical engineering connects the physical world with the information world. Electrical engineers apply physics and chemistry in modern nanotechnology devices, encode and manipulate information in circuits and networks, and mathematically understand and reason with large amounts of data in real time. This makes electrical engineering one of the broadest forms of engineering, resulting in a multitude of possible careers. The societal impact of electrical engineering can be found in numerous domains, from smartphones, 5G wireless, and medical imaging to electric/driverless cars and the Internet of Things. Electrical engineering includes the engineering of electronics, magnets, photons, electromagnetic waves, quantum states, and electro-mechanical structures. Electrically engineering systems provide communication, sensing, actuation, display, storage, conversion, control, and computation.
The electrical engineering discipline includes both the design and implementation of physical realizations (devices, circuits, antennas) and the mathematical tools for optimizing the exploitation of these systems (control theory, information theory, digital logic, signal processing).

Individualized Program, BAS

The individualized major offers an opportunity for exceptional, creative, self-motivated students to explore innovative and multi-disciplinary fields of knowledge. The individualized major is intended to foster a closer relationship between the student and the faculty advisors.

For more information: https://www.seas.upenn.edu/prospective-students/undergrad/majors/individualized/

Materials Science and Engineering, BSE

The Materials Science and Engineering (MSE) program reflects the explosive growth of interest in the nano and bio sectors of engineering science and technology. MSE prepares students to use fundamental scientific principles to synthesize, manipulate, design and characterize the structural and functional properties of advanced engineering materials. The program offers students advantages seldom found in other MSE programs: the opportunity to tailor the curriculum to their own interests, guaranteed research experience and an excellent student-faculty ratio.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Mechanical Engineering and Applied Mechanics, BSE**

Mechanical Engineering & Applied Mechanics (MEAM) is the study of forces, deformations and motions of solid bodies and fluids, heat generation and transport, and applications to analysis, design, and manufacture of components, machines, and systems. Students in mechanical engineering follow a program which contains basic
groundwork in all aspects of mechanical engineering, but flexibility in the
curriculum allows students to pursue elective programs in fields such as
aeronautics, robotics, computers, electronics, automatic controls, and
materials.

For more information: https://www.seas.upenn.edu/prospective-
students/undergrad/majors/mechanical-engineering-and-applied-
mechanics/

Total Course Units 40

1 MEAM 147 Introduction to Mechanics Lab lab is required if MEAM 110 Introduction to Mechanics is taken.
2 A max of (3) 100 level courses permitted.
Other Programming Courses such as CIS 110 Introduction to
Computer Programming, or CIS 120 Programming Languages and
Techniques I may be substituted for ENGR 105 Introduction to
Scientific Computing.
MEAM Upper Level courses include: MEAM 405 Mechanical Properties of Macro/Nanoscale Materials, MEAM 410, MEAM 454,
MEAM 455 Continuum Biomechanics, and all MEAM 500 level courses.
Professional Electives include courses from the Math, Science and Engineering categories. Up to two Professional Electives may be
satisfied with advanced dual degree requirements (with approval).
3 The Social Science & Humanities Depth and Writing Requirement can be satisfied with the 7 total course units.

The degree and major requirements displayed are intended as a guide
for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and
requirements for graduation.

Networked and Social Systems
Engineering, BSE

The Rajendra and Neera Singh Program in Networked and Social Systems Engineering (NETS), formerly called Market and Social Systems
Engineering (MKSE), is the world’s first course of study to fully integrate
the disciplines needed to design and analyze the complex networks that
are reshaping our society. This program prepares students to shape
the technologies that underpin Internet-based search and electronic
commerce, financial networks, social networks, and even such exchanges
as the power grid. Graduates of this program will be prepared to engineer
networks that work for both end-users and investors. Other graduates
may become the policy-makers who are urgently needed to regulate these
networks for the protection of commercial property and societal good.

For more information: https://www.seas.upenn.edu/prospective-
students/undergrad/majors/networked-social-systems-engineering/

Networked and Social Systems
Engineering (NETS) Major Requirements

40 course units are required. Read more about the Undergraduate
Student Handbook (http://www.seas.upenn.edu/undergraduate/
handbook).

2018-19 Catalog | Generated 02/28/19
Approval of the advisor and undergrad chair required. At least 3 course units required from an approved Depth area of choice available on the NETS website, plus 3 additional courses from any Depth Area and/or CIS, ESE, CMPE, OIDD, MATH, STAT, ECON.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Systems Science and Engineering, BSE

Systems Engineers provide technical management for societal-scale problems that often encompass the connections between the physical and the information world. Examples of the many cutting-edge applications include autonomous robotics, smart buildings, national power grid management, global networks, service optimization, and biological systems. Systems engineering is the set of reusable mathematics, intellectual tools, and methodology for attacking large-scale engineering problems. These common tools are adaptable for problems in different engineering domains (e.g., electrical, mechanical, biological, chemical, and computing) and help us understand, design, and manage systems that contain elements from multiple domains. Systems engineering deals with how we extract useful, abstract models from lower level systems, use these models to analyze and predict behavior, and use the analysis to control behavior and optimize/synthesize solutions.

System engineering helps us understand what happens when we compose many elements, each with their own behavior, and how to design and constrain the individual elements to engineer desired behavior for the composed system.

For more information: [https://www.seas.upenn.edu/prospective-students/undergrad/majors/systems-science-and-engineering/](https://www.seas.upenn.edu/prospective-students/undergrad/majors/systems-science-and-engineering/)

• Systems Science and Engineering, Minor (p. 191)

Computer Science, Minor

Computer scientists and engineers have revolutionized society and created the computer and telecommunications industries that are so important to human life and the world’s economy. As a result of this revolution, expertise in computer science is essential in many new areas, including computer and network service and consulting companies, financial institutions, health industries, natural science labs and medical research labs, and other contexts where intensive manipulation of information is important. As a result, opportunities for computer scientists and engineers have expanded greatly, both in specialized fields as well as in numerous dual-career opportunities in which computer expertise is combined with advanced degrees in business, communication, engineering, law, medicine, and science.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: http://www.seas.upenn.edu/undergraduate/degrees/minor-energy.php

Energy and Sustainability Minor (ENSU)

Students participating in the minor are expected to have taken at least one semester of intro chemistry, mathematics and physics.

1. Of the two CBE courses, CBE 231 Thermodynamics of Fluids is preferred.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Engineering Entrepreneurship, Minor**

Penn Engineering offers a Minor in Engineering Entrepreneurship (EENT), complementing the core engineering disciplines. This Minor is designed for students majoring in engineering and applied science. However, it is open to all University undergraduates subject to available class space. Non-engineering students should check with their home schools to determine their eligibility to take the EENT Minor. All courses for the EENT Minor must be taken for a grade (no Pass/Fail).

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

**Mechanical Engineering and Applied Mechanics, Minor**

Mechanical Engineering & Applied Mechanics (MEAM) is the study of forces, deformations and motions of solid bodies and fluids, heat generation and transport, and applications to analysis, design, and manufacture of components, machines, and systems. Students in mechanical engineering follow a program which contains basic groundwork in all aspects of mechanical engineering, but flexibility in the curriculum allows students to pursue elective programs in fields such as aeronautics, robotics, computers, electronics, automatic controls, and materials.

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

2018-19 Catalog | Generated 02/28/19
Completion of 6 course units with a grade of "C" or better. No pass/fail permitted. All MEAM courses (except MEAM 445 Mechanical Engineering Design Projects and MEAM 446 Mechanical Engineering Design Projects) can be used. Only (2) 100 level courses are permitted. Up to (2) approved Cognate courses can be substituted with department approval from the following list: BE 200 Introduction to Biomechanics, BE 330 Self Assembly of Soft Materials, BE 510 Biomechanics and Biotransport, CBE 430 Polymers and Biomaterials, CBE 535 Interfacial Phenomena, MSE 330 Self Assembly of Soft Materials, MSE 393 Materials Selection, MSE 405 Mechanical Behavior of Macro/Nanoscale Materials, MSE 530 Thermodynamics and Phase Equilibria.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

**Systems Science and Engineering, Minor**

System engineering (SSE) helps us to understand what happens when we compose many elements, each with their own behavior, and helps us understand how to design and constrain the individual elements to engineer desired behavior for the composed system. Students can pursue a SSE minor by completing six courses that includes decision making, data processing and modeling, simulation, and design of systems.

---

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

For more information: [http://www.ee.upenn.edu/current-students/undergraduates/minors.php](http://www.ee.upenn.edu/current-students/undergraduates/minors.php)

---

**Material Science & Engineering, Minor (CSCI)**

The Materials Science and Engineering (MSE) program reflects the explosive growth of interest in the nano and bio sectors of engineering science and technology. MSE prepares students to use fundamental scientific principles to synthesize, manipulate, design and characterize the structural and functional properties of advanced engineering materials. The program offers students advantages seldom found in other MSE programs: the opportunity to tailor the curriculum to their own interests, guaranteed research experience and an excellent student-faculty ratio.

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

¹ An intermediate or Advanced ESE elective can be taken with department approval.
² Advance ESE course required. An approved list can be found on the most recent EE worksheet.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Digital Media Design, Minor

The DMD minor is a programming-intensive exploration into interactive computer graphics. The interested student is encouraged but not required to take courses in Fine Arts (in the SEAS SSH category, for example) to gain the artistic knowledge and skills that would augment the DMD technology emphasis. Suggested relevant Fine Arts courses include Digital Design Foundations and 3D Modeling. The DMD minor also encourages exploration of the connections of computer graphics programming with human cognition and interactive experiences. A capstone EAS499 Integrative Project is required to link the DMD minor with the student's major.

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

¹ CIS 110 Introduction to Computer Programming must be taken prior to CIS 120 Programming Languages and Techniques I.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Nanotechnology, Minor

Nanotechnology is an interdisciplinary field that underpins next generation energy, communications, and health care solutions. The Nanotechnology minor provides the foundation to contribute to these advances. The program is accessible to engineering and physical science students.

**SEAS Second Major or Minor Option**

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Chemical and Biomolecular Engineering, Minor

Chemical Engineers apply concepts from the physical sciences (chemistry and physics) and life sciences (biochemistry and microbiology) to the design and optimization of processes for the efficient production of products ranging from fuels and chemicals to pharmaceuticals to advanced materials. Penn’s chemical engineering department provides students with both a strong foundation in engineering fundamentals and exposure to modern chemical engineering technologies. The program’s versatility allows our students to excel in diverse careers in the chemical industries, research, medicine, law, government, and education.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

Select 6 CBE Courses 1

Total Course Units 6

1 The Minor in Chemical and Biomolecular Engineering consists of six engineering courses in CBE selected with the approval of the Undergraduate Curriculum Chair.

Data Science, Minor

Data Science applies core concepts in computer science, statistics and mathematics to problems in a wide variety of fields, from physical, social, biomedical, and behavioral sciences to arts and humanities. The minor targets students with strong analytical abilities and some existing programming experience, and requires courses in statistics, data-centric programming, data management, and data analysis. It also points to courses across the University that deal with data in areas of importance to Data Science.

SEAS Second Major or Minor Option

Students interested in a second major (College students only) or minor with SEAS are required to meet with the Undergraduate Curriculum Chair from the major/minor department you wish to declare to discuss requirements and obtain approval on the Second Major or Minor form. The approved form must be returned to the SEAS Research and Academic Services Office, 109 Towne Building.

# Academic Opportunities

Penn Engineering offers a number of academic opportunities for undergraduate students.

# Global Opportunities

Experience in an international setting is an opportunity that Penn Engineering strongly encourages students to obtain. Spending time in another country allows students to develop their intercultural abilities, and increase their independence and confidence as they immerse themselves in a new environment—all while fulfilling their major requirements. Students can study abroad for a semester or a year, take part in a Global Service Learning project, enroll in a Global Immersion Course, or complete a summer internship.

Opportunities include:

- Study Abroad
- Global Service Learning
- Global Immersion

For more information, visit: [http://www.seas.upenn.edu/undergraduate/degrees/study-abroad.php](http://www.seas.upenn.edu/undergraduate/degrees/study-abroad.php).

# Research Opportunities

Our extraordinary faculty-to-student ratio provides great opportunities for undergraduate students to work in state-of-the-art research laboratories during the academic year and in the summer. Below you can see examples of outstanding student research, along with helpful information to guide undergraduates toward finding research positions at Penn Engineering.

For more information, including summer and additional research programs available, visit the Penn Engineering Research section (p. 170).

# Submatriculation

Penn undergraduates may begin an engineering master’s program while still completing their undergraduate program via the submatriculation application procedure.

For more information, visit the Submatriculation section (p. 255).
Dual Degrees

You may combine your BAS or BSE degree with a second degree in one of Penn's other undergraduate schools. A Dual Degree is not to be confused with a Dual Major (http://www.seas.upenn.edu/undergraduate/ handbook/programs/dual-majors.php), where a student earns two majors within Penn Engineering, or with a Second Major (http://www.seas.upenn.edu/undergraduate/degrees/two-majors.php) where an engineering student also earns a major within the College.

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/dual-degrees.php.

School of Nursing

Penn Nursing offers a number of resources and experiences not found at most other schools, including a state-of-the-art simulation lab with mannequins that respond as patients would, classrooms with the latest hospital-based electronic medical records (EMR) technology, and clinical experiences in the Children's Hospital of Philadelphia and the Hospital of the University of Pennsylvania, two of the nation's best hospitals. Penn Nursing is a premier academic and research institution renowned for advancing the frontiers of nursing science and patient care. Our students learn from the thought leaders in nursing research, education, and practice who ensure Penn Nursing remain one of the top schools of nursing in the world. At Penn Nursing, students become part of the next generation of healthcare leaders, prepared to care for patients, to conduct landmark research, and to make new strides in healthcare management and health policy.

Learn more about our history: http://www.nursing.upenn.edu/about/history/

Learn more about our school leadership: http://www.nursing.upenn.edu/about/our-leadership/

Mission

The mission of the University of Pennsylvania School of Nursing is to make a significant impact on health by advancing science, promoting equity, demonstrating practice excellence, and preparing leaders in the discipline of nursing.

Philosophy

The mission of the School of Nursing is aimed at meeting the health needs of society in a global and multicultural world. To this end, scholarship, research, education, and practice are integrated to create a culture of inquiry that values intellectual curiosity and diversity, and where faculty, clinicians, staff, and students thrive and learn from one another.

Scholarship and Research

We believe that integrating the arts and sciences is the basis for nursing knowledge and the framework for nursing practice and scholarship. Nursing knowledge encompasses empirical, philosophical, historical, ethical, and personal ways of knowing and is fundamental to the advancement of professional practice. Scholarship encompasses more than research, but also the integration of research into practice and health policy formation and the advancement and dissemination of nursing knowledge. Research is integral in every educational program and strengthened by participating in and contributing to the rich scholarly environment of the University and across national and international health policy organizations.

Nursing is scientifically based and carried out autonomously, as well as interdependently. The focus is development, dissemination, and utilization of knowledge about nursing actions that promote positive changes in patients, systems of care, and the larger society. Nurses collaborate with individuals, families, groups, communities, and other professions to achieve health and well-being for all people.

The School of Nursing is responsive to numerous influences that shape health care, including evolving models of care, consumer advocacy, demographic changes, and advances in science and technology. The faculty are committed to a scholarly agenda that pushes the boundaries of nursing science, in turn influencing education and shaping policy and practice.

Education

Education at the University of Pennsylvania facilitates the intellectual, personal and social development of students as they identify and attain academic and professional goals. Our educational environment fosters independence, ethical behavior, creative and critical thinking, increased breadth of knowledge, and sensitive interactions concerning cultures and viewpoints.

Programs, from baccalaureate to post-doctoral and lifelong learning, are enriched by the varied needs and perspectives of a culturally diverse population, as well as pressing needs for nursing leaders in a rapidly changing world. These leaders will be the clinical experts, health policy shapers, and nursing scholars of the future.

The baccalaureate program, including traditional and second degree students, focuses on professional nursing practice across the continuum of health care, with particular emphasis on vulnerable populations. The curriculum is dynamic and includes leadership skills, interdisciplinary collaboration, and content and clinical experiences that emphasize evidence-based practice. The curriculum also reflects changes in science and technology.

The Master’s programs focus on advanced practice nursing and administration, with an emphasis on specialty and subspecialty practice in concert with changing societal needs. Graduate nurses are prepared for advanced practice that creatively combines knowledge and skills in critical thinking and expert interventions across the lifespan. Special attention is given to clinical decision-making and management skills, as well as methods of evaluation of quality and cost of care.

Pre- and post-doctoral education is dedicated to advancing the discipline of nursing through research. The goal is to equip students with a foundation in nursing and a field of concentration to make substantive contributions to scholarship. Strong faculty mentorship is integral to the development of a critical cadre of future researchers, academicians, and leaders, nationally and internationally.

Practice

The primary goal of nursing practice is to optimize care and outcomes for patients and their family members. The practice of nursing is the foundation for informing educational pedagogies and for the generation of discipline-specific research. Practice is defined as the diverse and varied construction, application, and evaluation of knowledge and the action within the discipline of nursing, particularly for the recipients of nursing care. We believe it is the responsibility of academic nursing to
serve as the fulcrum of modeling the intentional integration of education, research, and clinical care to improve the delivery of quality health services.

Nursing is an evidence-based, caring profession that improves the health and quality of life for individuals, families, and communities throughout the world. Nursing possesses a unique body of knowledge that guides its practice in both autonomous and collaborative health care settings. Penn Nursing serves as the model for nurses who care for society's needs in a global and multicultural context. Thus at Penn, we seek to promote health and alleviate suffering in every part of the world by preparing nurses to be responsive to the health-related issues and preferences, values, and needs of all societies. Our goals are to improve and maintain optimal health, prevent disease, enhance the quality of recovery from illness, and support patients and families to cope with acute and chronic health problems. Penn Nursing serves as a model to direct the advancement of the translation of evidence-based knowledge toward culturally competent models of care.

Revised Mission and Philosophy approved by the School of Nursing Faculty Senate 2/3/03.

Revised Mission and Philosophy approved by the School of Nursing Faculty Senate 5/7/12.

Revised Practice statement approved by the School of Nursing Faculty Senate 4/8/13.

Revised Mission approved by the School of Nursing Faculty Senate 10/5/15.

The Office of Nursing Research (http://nursing.livewhale.net/research/), along with our four research centers (http://nursing.livewhale.net/research/research-centers) and partnerships across Penn, provide students with resources and support that are virtually unparalleled in our field. Students, from undergraduates to doctoral students, have numerous opportunities to engage in research and work alongside some of the most recognized researchers in their fields.

For more information, visit https://www.nursing.upenn.edu/research/.

Accreditation is a hallmark of educational quality, and we are proud to share our credentials on our website: http://www.nursing.upenn.edu/about/accreditation/.

Penn Nursing students benefit from a dual advising structure. All students are assigned a faculty advisor and have access to the professional staff advisors in the Office of Student Affairs.

For more information, visit http://www.nursing.upenn.edu/student-services/advising/accelerated/.

Curriculum

Baccalaureate Program Objectives Leveled by Year

The faculty has defined behaviors that each student must achieve before progressing to the next level. The objectives are leveled by year: level 1 references freshman year; level 2 references sophomore year; and so on. Students are encouraged to refer to these objectives at the midpoint of the semester and again at the end of the semester to actively participate in the learning and self-evaluation processes.

End of Program. Synthesize knowledge from the humanities and the natural and social sciences as the basis for continuing personal, intellectual, social, and professional development.

Level 3. Apply knowledge from the humanities and the natural and social sciences in the development of the role of nurse in patient care situations in acute care settings.

Level 2. Articulate the relevance of knowledge from the humanities and the natural and social sciences to the evolving role of the nurse.

Level 1. Demonstrate knowledge of the interrelationship of the humanities and the natural and social sciences as a basis for the development of nursing practice and as a source of personal development.

End of Program. As a generalist, use theoretical and scientific bases for nursing to deliver nursing care to clients as individuals, families, communities, and organizations in a variety of settings at any level of wellness, illness, and risk.

Level 3. Apply theoretical and scientific bases for nursing practice related to individuals and families with potential or actual health-related problems in acute care settings.

Level 2. Demonstrate the use of theoretical and scientific bases for nursing practice related to risk assessment and health promotion activities to individuals within selected communities and healthcare agencies.

Level 1. Identify theoretical and scientific bases for nursing practice.

End of Program. Apply research findings to evaluate and improve nursing care and the healthcare system.

Level 3. Appraise the relevance, quality, and applicability of research in decision making related to patient care.

Level 2. Discuss the research implications for various nursing practice environments.

Level 1. Recognize the relationship between research and nursing practice.

End of Program. Assume responsibility for providing nursing care in a collaborative relationship with individuals and groups in a variety of settings.

Level 3. Participate in providing nursing care in a collaborative relationship with individuals and families in complex healthcare settings.

Level 2. Participate in providing nursing care in a collaborative relationship with individuals, selected communities, and healthcare agencies.

Level 1. Observe the process of how nurses collaborate with individuals.

End of Program. Participate in collaborative relationships with colleagues through referral, consultation, planning, and evaluation.
Level 1. Identify components of professional nursing practice.

BSN Undergraduate Curriculum Organizing Framework and Vision
Class of 2015 and Beyond (Accelerated BSN Class of December 2014 and Beyond)

Our Mission
Penn Nursing is committed to teach the art and science of nursing and to create opportunities for service, practice, leadership, and research. This is achieved through talented faculty, internationally recognized scholarship, respect for the diversity of our own community (of faculty, staff, and students), and a commitment to individualizing the pedagogical and material resources necessary for success.

Our Vision
Penn baccalaureate nursing graduates are broadly educated and socially engaged. They demonstrate the capacity for clinical expertise, leadership at the bedside and around the globe, and translating the science of the profession into practice. Our graduates have matured in the intellectual and social environment of both the University and the School of Nursing. This environment is built upon the values of civic engagement, critical inquiry, interdisciplinary knowledge, and the integration of research and practice. It has prepared our graduates to create and realize their own vision and ambition for themselves and their profession.

Our Values
- Respect for the diversity of individuals and their ideas
- Dedication to rigorous clinical inquiry as the basis of clinical judgment
- Commitment to collaboration with individuals, families, communities, and colleagues
- Responsible and engaged advocacy
- Recognition of the intersections of history, social context, culture, and economics in shaping a global society that seeks equity and access for all
- Respect for nursing science and its substantive contribution to health care
- Organizing Framework - One University, One School, One Curriculum

Penn’s baccalaureate curriculum brings structure to the School’s mission, vision, and values by centering on the primacy of nursing practice situated in caring relationships that facilitate health and healing. The baccalaureate curriculum builds on this conceptualization of nursing as it moves students toward increasingly contextualized understandings of individuals, families, communities, and populations living with health and illness. It also moves students into increasingly complex situations and care environments as they experience the dynamic nature of nursing’s embeddedness in health care systems, social structures, and society.

The baccalaureate curriculum concentrates on four intersecting core themes that characterize the complex and contextual nature of nursing practice: engagement, inquiry, judgment, and voice. The competencies derived from this framework are not intended to be achieved in a sequential manner. Rather, this framework explicates competencies that are fluid, adapt to various learning experiences when presented in the curriculum, and essential to the formation of a graduate nurse’s professional identity. The application of these themes is demonstrated in the following examples:
Engagement: The student understands the relationships among:

- Caring relationships with individuals, families, and patient populations
- Collegial intra-disciplinary, interdisciplinary, and multidisciplinary collaborative relationships
- Observer and participant in policies and politics
- Situational advocacy and civic commitment to social and political change

Inquiry: The student understands the relationships among:

- Knowledge use, acquisition, and development
- Scientific ways of knowing patients and families and multi-dimensional and contextual ways of knowing
- Knowledge and implementation of humanistic understandings in practice and research
- Evidence-based practices and the social and political processes of practice with less clear scientific rationales
- Knowledge of how to use and manipulate technological information systems to acquire meaningful data
- Knowledge use and ongoing clinical knowledge development
- Measures of quality in clinical care environments

Judgment: The student understands the relationships among:

- Acquisition of knowledge and skill and the integration of both within relational practices with individuals, families, communities, populations, and healthcare systems
- Knowledge of individuals and families and collective knowledge about communities, populations, and systems
- Core nursing knowledge and integrated knowledge
- Situated judgment and clinical know-how

Voice: The student understands the relationships among:

- Observer, advocate, and moral agent
- Facilitation of patient and family learning and advocacy affecting social and political practices
- Informal methods of dialogue, discourse, and debate and those necessary for formal writing and publication and for joining a community of scholars
- Vision for self and the profession

### Nursing Major

<table>
<thead>
<tr>
<th>Course Units</th>
<th>29.5</th>
</tr>
</thead>
</table>

More information including individual course requirements can be found in the BSN Handbook (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook-degree-requirements), (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook-degree-requirements)

Students who are receiving their second bachelor’s degree in nursing (known as “second degree students” or “BSN/MSN students”) are not required to complete the liberal arts component while at Penn. All plans of study include an 11 c.u. waiver for liberal arts requirements because students who have already completed one undergraduate degree are exempt from all sector requirements, the language requirement, the writing requirement, and free electives. If you have questions regarding your plan of study or the requirements specific to your program, please reach out to the Office of Academic Affairs: http://www.nursing.upenn.edu/student-services/advising/.

### Majors

- Nursing, BSN (p. 198)
- Nutrition, BSN (p. 201)

### Nursing, BSN

Penn Nursing combines the resources and opportunities of a large university with the intimacy and personal attention of a small college. Our traditional four-year BSN is a direct entry program for graduating high school seniors.

At Penn Nursing, you will learn from a passionate faculty (http://www.nursing.upenn.edu/about/our-faculty) whose accomplishments are recognized worldwide. You will benefit from the academic opportunities (http://www.nursing.upenn.edu/academics/bachelor-of-science-in-nursing-bsn) of an Ivy League university while enjoying a fun and fulfilling campus life (http://www.nursing.upenn.edu/about/our-students/student-life). You will gain clinical experience (http://www.nursing.upenn.edu/practice/practice-partners) in some of the nation’s top hospitals, located just steps from your classrooms. And you will have the chance to participate in faculty-driven research (http://www.nursing.upenn.edu/research), supported by state-of-the-art technology (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/learning-through-simulation). Penn Nursing graduates are the leaders shaping the future of health care practice, policy, research, and education.

The nursing program begins in your freshman year with a combination of science, nursing, and liberal arts courses, and students are encouraged to take advantage of our flexible curriculum and take courses offered within Penn’s four undergraduate schools. Clinicals begin in the spring of your sophomore year, and students will have experiences in primary care, acute care, women’s health, and mental health settings working with patients from newborns to older adults.

1 Sector requirements can be taken in any order. For more information on sector requirements, refer to p.26 of the BSN Handbook (http://www.nursing.upenn.edu/student-services/resources/handbook-forms/policies/bsn-handbook).

2 Free electives and language requirement courses may be taken pass/fail. For more detailed information on pass/fail policies, refer to the Pass/Fail section in the BSN handbook (http://www.nursing.upenn.edu/student-services/resources/handbook-forms/policies/bsn-handbook/courses-exam-related-policies/#passfail).

3 Check with your advisor for additional approved Health Policy courses.

4 Check with your advisor for additional approved Health Care Ethics courses.

The Nursing Case Study can be taken during the junior or senior year (following completion of NURS 164 Integrated Human Anatomy, Physiology & Physical Assessment II). Only one course is required from the case study group. The Nursing Elective can be taken earlier in the plan of study depending upon the course selected.

Students must consult with an academic advisor prior to making revisions to the plan of study to ensure that the necessary curricular requirements are being met and to prevent delays in academic progression.

The following sample Plan of Study is just one possibility for second-degree students, and individual plans depend on what prerequisites students have fulfilled prior to matriculating at Penn. This plan may not be compatible with several academic options you might choose (e.g., submatriculation, study abroad, minors, etc.). If you are interested in pursuing any of the special academic options available to you during the course of your undergraduate experience and want to know how this will alter your plan of study, please contact your faculty advisor and/or the Office of Student Services at 215-898-6687 or advisor@nursing.upenn.edu. Please note that all plans of study are subject to curricular change.

1. There is some flexibility as to when these courses can be taken (fall vs. spring). Please consult with an advisor about your options and course offerings.

2. See the BSN Handbook (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook) for an approved list of courses.

**Notes**

1. All plans of study are subject to curricular change. Students must consult with an academic advisor prior to making revisions to the plan of study to ensure that the necessary curricular requirements are being met and to prevent delays in academic progression.

2. Clinical experiences may include evenings, weekends, and 12 hour shifts. Most clinical rotations are accessible by public transportation; however a car may be necessary for transportation to some clinical sites.

3. Course work outside the School of Nursing is not permitted, with the exception of approved non-nursing courses for the Health Care Ethics and Health Policy requirements.

4. 5.5 course units is the maximum course load for undergraduate nursing students. Students who wish to exceed this limit must seek approval from the Office of Student Services prior to the advance registration period for the semester in question. If approved, the Office of Student Services will increase the maximum course load accordingly in Penn in Touch.

**Nutrition, BSN**

Our Bachelor of Science in Nutrition major is an interdisciplinary collaboration with Penn’s School of Arts & Sciences. You will study concepts like dietary behaviors and metabolism, as well as scientific approaches to the physiological roles of nutrients in the diet, from the cellular to human level. You will explore the role of nutrition in cancer, cardiovascular diseases, diabetes, and obesity, which together account for nearly seventy percent of global mortality. We believe that the next generation of nurse researchers and clinicians need a well-rounded background in nutrition science, social sciences, and public health, and we built this innovative program with these goals in mind.

The major consists of 14 course units: six basic science courses (such as cellular biology, anatomy and physiology, and chemistry), four fundamental nutrition science courses, and four electives. Penn Nursing BSN undergrads can add this as a second major.

**For more information:** [https://www.nursing.upenn.edu/nutrition-major/](https://www.nursing.upenn.edu/nutrition-major/)

Minors

- Global Health, Minor (p. 202)
- Health Communications, Minor (p. 203)
- History, Health and the Humanities, Minor (p. 203)
- Nursing and Health Services Management, Minor (p. 203)
- Nutrition, Minor (p. 204)

BSN students are also eligible to complete no more than half of an MSN minor while enrolled as an undergraduate student. For more information, visit: https://www.nursing.upenn.edu/academics/master-of-science-in-nursing-msn/minors/.

Global Health, Minor

This minor offers students the option to focus their studies on the domestic or international level. Opportunities are provided via clinical experiences, and students gain advanced multicultural knowledge and skills. It is our goal that graduates will rise to professional leadership roles, serving as catalysts to disseminate new research and clinical skills as they work among diverse social and cultural groups.

For more information: https://www.nursing.upenn.edu/global-health-minor/.

The Global Health Minor requires a total of 6 course units.

Health Communications, Minor

The Health Communication minor is a collaboration between the School of Nursing and the Annenberg School for Communication. This program expands students' knowledge of the communication process, theory, and behavior; and it prepares them for roles as professionals who develop cutting edge models for health behavior intervention or implement patient education and health communications programs locally, nationally, and globally.

For more information: http://www.nursing.upenn.edu/health-communications-minor/

The Health Communications Minor requires a total of 6 course units.

1 See the website (http://www.nursing.upenn.edu/health-communications-minor/plan-of-study) for a list of approved elective courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

History, Health and the Humanities, Minor

A number of universities have forged bridges between the humanities and sciences to nourish students intellectually, build self-awareness, consider social justice-related phenomena through a new lens, and help them develop empathy. The School of Nursing has launched a new minor in History, Health and the Humanities for undergraduate students. This innovative initiative provides students with the tools and perspectives to study clinical issues in ways different than the lens provided by natural or social sciences. It amplifies the humanities component of the Judgement, Inquiry, Voice, and Engagement pillars that define the "Penn Advantage." It offers formalized opportunities for writing, both reflective and analytical, beyond that available in the required nursing curriculum.

Student enrolled in this minor will be considered Bates’ Center associates and will be invited to lunches, dinners, and other events with visiting scholars and faculty.

For more information: https://www.nursing.upenn.edu/academics/bachelor-of-science-in-nursing-bsn/minors/

The History, Health and the Humanities Minor requires a total of 6 course units.

For more information contact the director of the History, Health and the Humanities minor, Cynthia Connolly PhD RN FAAN at cac1@nursing.upenn.edu.

¹ See the website (http://www.nursing.upenn.edu/nursing-and-health-services-management-minor/plans-of-study) for a list of approved elective courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Nutrition, Minor

Jointly sponsored by the Schools of Nursing and Arts and Sciences, the Nutrition Minor presents a broad view of the field and illustrates the pervasiveness of nutrition-related issues in such diverse fields as anthropology, economics, folklore, history, physiology, psychology, health care, and public policy.

For more information: http://www.nursing.upenn.edu/nutrition-minor/

The Nutrition Minor requires a total of 6 course units.

Academic Opportunities

Penn Nursing offers a wide variety of supplemental academic opportunities designed to enhance your academic experience and professional development.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/opportunities/.

Benjamin Franklin Scholars Program - Nursing (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program)

The Benjamin Franklin Scholars (BFS) Program for Nursing (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program) seeks to foster the development of the next generation of nurse achievers - scholars, leaders, and researchers - through intellectual rigor, academic excellence, and outstanding achievements. Scholars are required to complete four Benjamin Franklin Seminars - small, intensive classes in a wide range of disciplines across the liberal arts and sciences - and a Capstone Honors course in the Nursing school.

Dual Degrees (http://www.nursing.upenn.edu/academics/dual-degrees)

We recognize the value of interdisciplinary learning, which is why student at all levels - undergraduate, masters, and doctoral - can pursue a dual degree with other schools across campus. Our Dual Degree (http://www.nursing.upenn.edu/academics/dual-degrees) page provides a complete listing of our approved programs.

Global Opportunities (http://www.nursing.upenn.edu/global-health/student-opportunities)

Penn Nursing offers a variety of international experiences for students in the BSN and MSN programs, which range from short term opportunities that focus on comparative healthcare in international contexts, to full-semester clinical experiences.

Hillman Scholars Program in Nursing Innovation (http://www.nursing.upenn.edu/academics/accelerated-options/bsn-phd-hillman-scholars)

The Hillman Scholars Program in Nursing Innovation (http://www.nursing.upenn.edu/academics/accelerated-options/bsn-phd-hillman-scholars) is an integrated BSN-to-PhD program designed to educate a new cadre of nurse scientists and leaders to develop
innovative solutions in healthcare. The program is available for current Penn Nursing undergraduate students, as well as students applying to the Accelerated Second Degree BSN program.

Minors (p. 202)

Penn Nursing offers a variety of minors in such in-demand areas as global health, palliative care, health services management, and oncology. Adding a minor allows students to complement their major by diving more deeply into a specific area of inquiry.

Nutrition Major (p. 201)

Our Nutrition major (http://www.nursing.upenn.edu/nutrition-major) is an interdisciplinary collaboration with Penn’s School of Arts & Sciences. You will study concepts like dietary behaviors and metabolism, as well as scientific approaches to the physiological roles of nutrients in the diet, from the cellular to human level.

Research Opportunities (http://www.nursing.upenn.edu/research/student-research)

Students have numerous opportunities to engage with research at Penn Nursing, whether that means participating in one of the school-supported research centers, applying for a prestigious fellowship through the Center for Undergraduate Research and Fellowships (http://www.upenn.edu/curf) (CURF), or working one-on-one with a faculty mentor on a student-driven research project.

Submatriculation (http://www.nursing.upenn.edu/academics/a-penn-nursing-education/submatriculation)

One of the most popular options at Penn Nursing, submatriculation allows undergraduate students the opportunity to apply to a graduate program and begin coursework while completing the BSN degree. Students can apply to any of the MSN / DNP majors (http://www.nursing.upenn.edu/academics) here at Penn Nursing, or to Penn Law.

School Policies

The majority of Penn Nursing policies can be found in the Policies and Procedures (p. 258) section of the Catalog.

The following additional policies apply specifically to School of Nursing students:

- Statement of Personal Attributes and Capabilities (https://www.nursing.upenn.edu/live/files/218-statement-personal-attributes-and-capabilities)

The curricula leading to degrees in nursing require students to engage in diverse and complex experiences directed to the practice, refinement and full acquisition of essential nursing competencies and functions. Unique combinations of cognitive, behavioral, sensory, communication, psychomotor, and communication abilities are required to perform these functions in a satisfactory manner and to consistently demonstrate these competencies. In addition to being essential to the successful completion of the requirements for the respective nursing degree, these competencies and functions are necessary to ensure the health and safety of patients, fellow students, faculty and other health care providers. This statement describes the minimum competencies and functions necessary for entrance to, continuation in, and graduation from the nursing degree programs of the School of Nursing at the University of Pennsylvania. Candidates for nursing degrees must be able to meet these minimum standards with or without reasonable accommodation.

This document serves as the official policy for student use of social media at the SON. These guidelines apply to all students creating or contributing to any kind of social media affiliated with the SON. Please check back periodically to make sure you’re up to date. We trust that you will adhere to these policies. If, for any reason an incident occurs that violates the policy, we expect you to bring it to our attention immediately so we can work together toward a resolution.

The School of Nursing recognizes the importance of educating its students about the problems of substance abuse because this significant health risk, and in many cases, criminal matter, is unfortunately prevalent among healthcare providers. Aside from impacting upon the personal and psychological integrity of the abusers, substance abuse may significantly impact the ability of healthcare providers to administer safe, competent patient care. Recognizing that substance abuse is both a disease and a professional hazard, the School of Nursing has incorporated substance abuse topical content areas into its curriculum. The School of Nursing has likewise established this substance abuse policy. This policy impacts upon and augments the student’s ability to maintain personal and professional integrity, and facilitates the student’s success both clinically and didactically. It promotes a healthy learning environment for the student. In the clinical setting, this policy enhances patient safety. It also fosters the development of professional nurses who are well educated about the prevalence and adverse outcomes of substance abuse.

The Wharton School

Founded in 1881 as the first collegiate business school, the Wharton School (https://www.wharton.upenn.edu) of the University of Pennsylvania is recognized globally for intellectual leadership and ongoing innovation across every major discipline of business education. With a broad global community and one of the most published business school faculties, Wharton creates economic and social value around the world. The School has 5,000 undergraduate (https://undergrad.wharton.upenn.edu), executive MBA (https://executivemba.wharton.upenn.edu), and doctoral (https://doctoral.wharton.upenn.edu) students; more than 9,000 participants in executive education (http://executiveeducation.wharton.upenn.edu) programs annually and a powerful alumni network (https://alumni.wharton.upenn.edu) of 96,000 graduates.

Learn more about our history: www.wharton.upenn.edu/about-wharton
Learn more about our school leadership: www.wharton.upenn.edu/senior-leadership

The Wharton School of the University of Pennsylvania was a remarkable innovation when Joseph Wharton, a self-educated 19th-century industrialist, first proposed its establishment more than 135 years ago.

Wharton believed the role of business was to advance society as a whole, creating new wealth and economic opportunity for all people. He approached the Trustees of the University of Pennsylvania in 1880 to establish a new kind of institution specifically designed to prepare leaders for business and public service.

His suggestion was a radical one, but also remarkably prescient. With the admission in 1881 of the first class of students — just 13 undergraduates — Joseph Wharton and the University of Pennsylvania created a successful formula that forever changed the landscape of business and education. Now, more than 1 million students graduate each year from more than 13,000 graduate and undergraduate business programs around the world.

The Wharton School remains a leader in business education through a steadfast commitment to our founder’s vision of applying unparalleled intellectual resources to prepare young men and women for leadership in the global society. With programs on every continent, Wharton continues to educate and empower the best minds in business.

Research provides an individualized method of learning and an in-depth treatment of a topic of personal interest with input from a faculty expert. Research experience is helpful if applying for distinguished international fellowships and is important if going on to graduate studies in an analytical discipline. Research skills are useful for decision-making in the private and public sectors and are required in academic positions.

Below you can find a variety of research opportunities and scholarship programs.

- Courses (https://undergrad-inside.wharton.upenn.edu/research/courses)—Create “tools” in a research-methods course.
- Research assistantships (https://undergrad-inside.wharton.upenn.edu/research/assistantships)—Learn by executing research-related tasks while working on a project for a faculty member.
- Summer programs (https://undergrad-inside.wharton.upenn.edu/research/summer-programs)—Gain hands-on experience from proposal to presentation through a project commensurate with program duration.
- Scholars programs (https://undergrad-inside.wharton.upenn.edu/scholars-programs)—Gain hands-on, in-depth experience from proposal to presentation via a senior thesis and other activities.
- Wharton PhD Submatriculation Program (http://doctoral-inside.wharton.upenn.edu/submatriculation)—Submatriculate into a PhD program in Accounting, Finance, Health Care Systems, Insurance and Risk Management, Management, Marketing, Operations and Information Management, Business and Public Policy, or Statistics.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/research/.

The University of Pennsylvania Wharton School is accredited by AACSB – the International Association for Management Education.

1916: AACSB founded initially as the Association of Collegiate Schools of Business (ACSB); constitution is adopted June 17, 1916. Founding members include the following: Columbia University • Cornell University • Dartmouth College • Harvard University • New York University • Northwestern University • Ohio State University • Tulane University • University of California, Berkeley • University of Chicago • University of Illinois • University of Nebraska • University of Pennsylvania • University of Pittsburgh • University of Texas • University of Wisconsin-Madison • Yale University

For more information, visit: http://www.aacsb.edu/.

The goal of the Wharton Undergraduate Division academic advising team is to help students make informed decisions about their educational plans and professional life goals that are consistent with their interests, abilities, and values.

Advising by appointment, walk-in advising, and specialized advising (https://undergrad-inside.wharton.upenn.edu/advising-services/#specialized_advising) are services available in G95 Huntsman Hall to current Wharton undergraduate students.

Professional advisors (https://undergrad-inside.wharton.upenn.edu/advising-services), concentration advisors (https://undergrad-inside.wharton.upenn.edu/concentration-advisors), and peer advising fellows (https://undergrad-inside.wharton.upenn.edu/peer-advising) are available to assist students.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/advising-services/.

Curriculum

All Wharton single-degree undergraduate students must complete a minimum of 37 course units and meet the curriculum requirements described below. Students enrolled in a coordinated dual-degree (https://undergrad-inside.wharton.upenn.edu/coordinate-dual-degree) program should check with their program advisor to learn about their unique requirements. For a Wharton single-degree undergraduate student, the standard course load is 4 to 5 CUs per semester (see a sample course sequence (https://undergrad-inside.wharton.upenn.edu/sample-curriculum-2017)).

The requirements of the Wharton single-degree curriculum are delineated on the academic planning worksheet (https://undergrad-inside.wharton.upenn.edu/download/academic-planning-worksheet-2017?wpdmdl=3785). Details about these requirements are available via the links below.

Students are encouraged to see an academic advisor (https://undergrad-inside.wharton.upenn.edu/advising-services) for any questions about the requirements of their academic program.

First-Year Foundations

Economics (https://undergrad-inside.wharton.upenn.edu/requirements-2017/econ-010) 1 required course: ECON 010

Math (https://undergrad-inside.wharton.upenn.edu/requirements/math) Select 1 of the following: MATH 104 or MATH 110
Writing (https://undergrad-inside.wharton.upenn.edu/requirements/writing)
1 required course: Critical Writing Seminar

Business
3 required courses: WH 101, WH 201, WH 301
1 senior capstone course or project

11 required courses: ACCT 101, ACCT 102, BEPP 250, STAT 101, STAT 102, FNCE 100, FNCE 101, LGST 100 or LGST 101, MGMT 101, MKTG 101, OIDD 101

1 required course unit

General Education Distribution (https://undergrad-inside.wharton.upenn.edu/requirements-2017/general-education-distribution)
6 required course units with at least 1 course unit in each of the following categories:
- Humanities
- Natural Science, Math, and Engineering
- Social Science

Unrestricted Electives (https://undergrad-inside.wharton.upenn.edu/requirements-2017/unrestricted-electives)
5 required course units

Concentrations
All students graduate from Wharton with a Bachelor of Science in Economics; however, each student is required to choose a concentration, which consists of four upper-level courses that explore a particular area of business in depth.

- Accounting, BS (p. 207)
- Actuarial Science, BS (p. 208)
- Behavioral Economics, BS (p. 209)
- Business Analytics, BS (p. 210)
- Business Economics and Public Policy, BS (p. 211)
- Environmental Policy & Management, BS (p. 212)
- Finance, BS (p. 213)
- Global Analysis, BS (p. 214)
- Health Care Management and Policy, BS (p. 215)
- Individualized, BS (p. 216)
- Legal Studies & Business Ethics, BS (p. 217)
- Management
  - Entrepreneurship and Innovation Track, BS (p. 218)
  - General Track, BS (p. 219)
  - Multinational Management Track, BS (p. 220)
  - Organizational Effectiveness Track, BS (p. 221)
  - Strategic Management Track, BS (p. 222)
- Managing E-Commerce, BS (p. 223)
- Marketing & Communication, BS (p. 224)
- Marketing & Operations Management, BS (p. 225)
- Marketing, BS (p. 226)
- Operations, Information & Decisions
  - Decision Processes Track, BS (p. 228)
  - General Track, BS (p. 229)
  - Information Systems Track, BS (p. 230)
  - Operations Management/Management Science Track, BS (p. 230)
- Real Estate, BS (p. 231)
- Retailing, BS (p. 232)
- Social Impact & Responsibility, BS (p. 233)
- Statistics, BS (p. 234)

Accounting, BS
Although strong quantitative skills and attention to detail are important qualities for an accounting concentration, students need to acquire other skills as well. Many students find the accounting concentration to be useful preparation for careers in consulting, investment banking, general management, public accounting, and securities analysis.

General Education Distribution

Select 6 courses with at least 1 course unit in each of the following categories:

- Humanities
- Natural Science, Math & Engineering
- Social Science
- Cross-Cultural Perspectives
  Select 3 courses 2
- Unrestricted Electives
  Select five courses

Total Course Units 33

1. For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

2. Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Actuarial Science, BS

Actuarial science stands at the intersection of risk and money. Actuaries are experts in evaluating the likelihood and financial consequences of future events, designing creative ways to reduce the cost of undesirable events, and decreasing the impact of tragic events that do occur. They are in great demand by insurance companies, consulting firms, and financial institutions.

This concentration provides an intriguing blend of mathematics and business management for students with a strong mathematics aptitude. Ideally, students graduating from Wharton with an actuarial science concentration will be prepared to pass or will have passed many of the professional examinations given by the Society of Actuaries or the Casualty Actuarial Society.

For more information: https://statistics.wharton.upenn.edu/programs/actuarialprogram/

### Behavioral Economics, BS

This new collaborative field, behavioral economics, has provided an understanding of how people’s decisions deviate from “optimal” choices and the consequences of such deviations for consumers, managers, firms, and policy. This joint concentration between the Operations, Information, and Decisions Department and the Business Economics and Public Policy Department explores the behavioral aspects of economics and decision making.

This concentration provides students with the opportunity to develop an understanding of (a) the rational actor model (b) modifications to that model that reflect the psychology of human behavior, and (c) implications of those modifications for decision-makers, markets, and public policy.

For more information: https://bepp.wharton.upenn.edu/programs/undergraduate/program-information1/behavioral-economics/

Business Analytics, BS

The Business Analytics joint concentration between the OID and STAT departments is designed to build deep competency in the skills needed to implement and oversee data-driven business decisions, including (i) collecting, managing, and describing datasets, (ii) forming inferences and predictions from data, and (iii) making optimal and robust decisions. Business analytics makes extensive use of statistical analysis, and the applications of business analytics span all functional areas.

Students choosing the Business Analytics concentration are ideally suited for the growing set of careers broadly defined under the header of “data science” with responsibilities for managing and analyzing data. In addition, the concentration provides an excellent complement to students who choose to focus on one of the functional areas of business (e.g., accounting, finance, marketing, operations).

**Business Economics and Public Policy, BS**

The Business Economics and Public Policy concentration offers a wide range of courses for students interested in the role of economics in business, competition and public policy. Our courses specialize in market structure and competition, insurance and risk management, behavioral economics, energy, public finance, business & international politics, and business and development. A concentration in Business Economics and Public Policy is vital for students planning a career in consulting, the public sector, industries with a high social impact factor, and anyone with a general interest in how economics interacts with law, policy, and politics.

Environmental Policy & Management, BS

The concentration in environmental policy and management examines the relationship between business and the natural environment, including human health and safety as well as addressing a range of policy issues. This concentration provides an in-depth foundation for those interested in pursuing careers in the growing environmental sector of the economy, whether in private business, government, or environmental consulting. It takes an interdisciplinary approach, drawing on faculty and courses from several Wharton departments.

Students are encouraged to pursue additional coursework on environmental and technological risks in parallel with the Wharton program through the School of Arts and Sciences and the School of Engineering and Applied Science.

For more information: [https://igel.wharton.upenn.edu/education/wharton-undergrad-concentration/](https://igel.wharton.upenn.edu/education/wharton-undergrad-concentration/)

Finance, BS

The finance concentration develops the skills necessary to work at a high level of expertise in all areas of finance, including:

- Asset management
- Commercial and investment banking in an international context
- The financial management ("treasury function") of commercial and industrial enterprises and of financial institutions
- The financial aspects of venture capital, mergers, and acquisitions
- Most aspects of management consulting in both domestic and international sectors

Concentrating in finance also equips students well for careers in law and government in addition to the private sector.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
This concentration prepares students for careers as managers in health care companies or health care service firms such as consulting, banking or health care IT companies, or government agencies. Students planning careers in the health professions such as medicine, nursing, or dentistry have found the concentration very useful in understanding the context in which they will be working.

### Health Care Management and Policy, BS

The concentration in health care management and policy focuses on the management, financing, and economics of the health care sector. Students learn about health care markets and factors that significantly influence decision making both at the policy level and at the level of the firm or organization. The health care sector includes government agencies, non-profit institutions, major private corporations, medical practices and partnerships, and many small and early-stage health care service and product firms.

The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.
2 Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Individualized, BS

Students have the option to design an individualized concentration if they cannot find a standard concentration that aligns with their interests. An individualized concentration consists of four CUs that are united by a common theme. An established concentration may also be tailored, with approval from the concentration advisor, to specific student interests by replacing a required course with one not on the list of courses that traditionally defines the concentration.

Students should note that (1) at least three of the courses must be business courses, and (2) a faculty member from the Wharton academic department most closely associated with the individualized concentration must sign off on the proposal.

Individualized concentration proposals are considered by the Undergraduate Division Petitions Committee. Students who wish to pursue an individualized concentration should complete the following steps:

1. Consult with an academic adviser in the Undergraduate Division to discuss your proposal prior to submission.
2. Fill out the Individualized Concentration Proposal form.
3. Submit the completed form to the front desk in the Wharton Undergraduate Division (G95 Huntsman Hall).

For more information: http://undergrad.wharton.upenn.edu/academics/

Legal Studies & Business Ethics, BS

The Legal Studies and Business Ethics Concentration focuses on the social values, moral concerns, and legal considerations that are essential aspects of business decision making in our global market system. The courses students take in this program help them explore how responsible business leaders can engage ethically and effectively with diverse cultures, corporate stakeholders, government regulators, and legal systems. Of special value to students seeking to broaden their business education, this concentration will help them acquire essential, non-quantitative reasoning skills that are required when leaders face difficult choices under conditions of empirical uncertainty and/or moral ambiguity—an frequent occurrence in fast-moving market economies.

Students pursuing this concentration will gain a number of analytic skills, including:

- Identifying moral and legal issues hidden within complex, culturally rich fact patterns
- Reasoning from moral principles to specific ethical and legal conclusions
- Reasoning by analogy between like cases and situations
- Arguing from authoritative rules and precedents to specific, logically consistent recommendations for action

¹ For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.  

² Two can double-count as General Education Distribution courses.  

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
1 MGMT 235 is open to M&T students only.
2 Students may petition to substitute other courses toward the requirements of the major. Such requests will be expected to demonstrate that the student is pursuing a coherent plan of entrepreneurship and innovation studies at Wharton. Petitions should be sent in writing to the Entrepreneurship and Innovation academic advisor, Nellie Gaynor at nelliebk@wharton.upenn.edu. Other courses cannot exceed 1.0 cu equivalent of Wharton coursework. Only 1 cu of Independent Study Project or Advanced Student Project including Global Modular Courses or MKTG890, Global Consulting Practicum, can be counted toward the major and must have approval by the department.

Management: Multinational Management Track, BS

The specialization in Multinational Management provides students with the toolkit to understand how global economic, political, and social forces influence the competitive environment of the firm. Topics include international trade, foreign investment and acquisitions, stakeholder engagement, political risk, foreign market entry, global teams, and global strategy. Students will learn how to evaluate the international environment and to operate in an increasingly complex global business landscape that shapes a variety of industries (e.g., consulting, financial services, real estate, social enterprise) and functions (e.g., strategic, technological, general or project management, business development, communications or marketing) at companies both large and small.

1 For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Management: Organizational Effectiveness Track, BS

A concentration in management prepares students to take on major managerial challenges and responsibilities in private, public, and nonprofit organizations. Students can pursue a general management concentration or choose from specialized tracks in strategic management, multinational management, organizational effectiveness, and entrepreneurship and innovation.

For more information: https://mgmt.wharton.upenn.edu/programs/undergraduate/management-specializations/organizational-effectiveness/

Management: Strategic Management Track, BS

The specialization in Strategic Management prepares students who are interested in competitive and corporate strategy. A deeper understanding of strategy is useful for those who want to help companies with their strategies (e.g., through consulting), need to understand the strategies of companies (e.g., to make decisions of whether to invest in certain companies), and want to create new organizations and need to develop a strategy that would provide them with a competitive advantage in the market place.

**Managing E-Commerce, BS**

The secondary concentration in electronic commerce is intended to complement primary concentrations by providing students with an additional capability to understand, analyze, and participate in electronic commerce and electronic business activities in new and established firms. To pursue the concentration in electronic commerce, students must have also declared a primary concentration.

For more information: https://undergrad-inside.wharton.upenn.edu/concentrations/ecom/

Marketing & Communication, BS

Marketing professionals must understand the communication process and the most effective methods of conveying information, regardless of whether they intend to focus on advertising, the development of web-based initiatives, or the conduct of market research. Students in this dual concentration will augment their understanding of the core concepts taught in their marketing courses and be better prepared for employment or graduate study. The dual concentration in marketing and communication allows Wharton students concentrating in marketing to take four courses in the Annenberg School of Communication and have this cluster of courses recognized on their transcript as a second concentration.

Students who wish to pursue a second concentration in communication must first declare a primary concentration in marketing. The concentration in communication may not be used as a primary or sole concentration.

For more information: https://undergrad-inside.wharton.upenn.edu/concentrations/mkcm/

The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.
2. Two can double-count as General Education Distribution courses.

---

**Marketing & Operations Management, BS**

The Marketing and Operations Management joint concentration emphasizes the importance of partnership between marketing and operations for new product development (NPD) in light of the fact that NPD is a critical company effort highly dependent on internal innovation processes. Given the complexity of these processes, the insights provided by cross-disciplinary collaboration can be particularly beneficial in many efforts, including:

- Creativity-based new product development
- Innovation in service manufacturing and new service development
- Customer response to next-generation products
- The use of conjoint analysis in engineering designs
- Platform-owner market entry
- Design-intensive innovation

**For more information:** [https://marketing.wharton.upenn.edu/programs/undergraduate/marketing-and-operations-management-joint-concentration/](https://marketing.wharton.upenn.edu/programs/undergraduate/marketing-and-operations-management-joint-concentration/)

¹ For students who take ECON 001 Introduction to Micro Economics and ECON 002 Introductory Economics: Macro in place of ECON 010 Introduction to Economics for Business of these courses can be slotted for ECON 010 on the worksheet. The second course may be used to fulfill a General Education Distribution or Unrestricted Elective requirement.

² Two can double-count as General Education Distribution courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Marketing, BS

Students pursuing a concentration in marketing acquire a solid grounding in applying the basic disciplines (e.g., psychology, economics, statistics) essential for understanding consumer and organizational buying patterns and developing successful marketing strategies. They also gain practical experience applying these concepts and methods via half-semester mini-courses (e.g., new product development, advertising, retailing). Many students with a marketing concentration have gone on to work in brand management, advertising, sales, marketing research, consulting, and entrepreneurial ventures.

Operations, Information & Decisions: Decision Processes Track, BS

The Decision Processes (DP) track establishes rigorous scientific foundations for describing, predicting, and improving the processes through which individuals and groups collect data and information, form judgments, and make decisions. This program examines descriptive theories and empirical research on human behavior that identify systematic biases in judgment and heuristics, or rules of thumb, that individuals and groups use to cope with complex decision-making and negotiations environments. It also examines the ways in which individuals and groups can make better decisions given their biases and information-processing limitations.

Operations, Information & Decisions: General Track, BS

Computer-based management systems and analytic approaches to decision making are increasingly vital to effective management in a range of industries across public and private sectors. As organizations develop and implement sophisticated decision-support systems, they increase the demand for managers who have the expertise to understand, create, and profitably exploit rapidly developing management technology. There is also a growing demand for skilled professionals who can effectively manage the operations encompassing the manufacturing and distribution of products and services.

The Operations and Information Management curriculum prepares students to meet these challenges by providing a rigorous foundation of coursework across different but complementary disciplines, including decision processes, information systems, and operations management/management science.

Operations, Information & Decisions: Information Systems Track, BS

The Information Systems track is designed to provide the necessary understanding of both technical and business issues relating to information systems. The program is ideal for students interested in managing information technology, either as a technologist, a general manager, or a consultant in technology-intensive industries. The program also provides a good supplement to engineering or other technologically-sophisticated students who wish to obtain greater exposure to managerial issues or students in finance or management who wish to better understand the role of technology in their core disciplines.

Operations, Information & Decisions: Operations Management/Management Science Track, BS

The Operations Management / Management Science track addresses central issues necessary to understand production and service operations in today's global economy. This program provides a rigorous foundation for immediate careers in consulting and analytic strategy support for companies, as well as future graduate studies in economics and business. The courses allow students to build a fundamental understanding of the tradeoffs to consider when managing the development of products and services, as well as the operations used to produce them and fulfill customer requirements.

The need to effectively manage the production of goods and services has also sparked the development of a number of useful mathematical tools. Besides their direct application to operational problems, these management science techniques have been broadly applied to a...
wide variety of other economic activities, from the pricing of financial instruments to decisions concerning markdown policies in retailing.

Real Estate, BS

The real estate concentration consists of one required course (REAL 209: Real Estate Investment: Analysis and Financing) and three electives. While the required course focuses on real estate finance, the electives allow students to explore a variety of issues related to real estate. These include real estate development, the legal aspects of real estate investment and financing, and the relationship between government policy and real estate development.

Social Impact & Responsibility, BS
The social impact & responsibility (SIR) concentration seeks to examine the question: “How should business enterprises and business thinking be engaged to improve society in areas not always associated with business?” SIR is an interdisciplinary field that encourages students to approach their core courses and primary concentration courses from a socially oriented perspective.

For more information: lgst.wharton.upenn.edu

**Statistics, BS**

A key challenge facing managers is the interpretation of the vast amount of data generated by computing systems. As these data do not directly answer important business questions, managers must use data analysis and statistics to interpret them. Statistics courses develop the skills and insights required to make effective use of quantitative methods, select and apply techniques, and communicate statistical results. All courses provide skills that augment substantive managerial abilities, along with exposure to computer software that implements key techniques.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Minors

For Wharton Students

Students who wish to study a subject of interest in greater depth may choose to pursue a minor. Minors generally require six to eight courses in a particular field of study. A carefully planned program of study allows a Wharton student to complete a minor within the Wharton curriculum, capitalizing on potential overlap with General Education, Non-Business Elective, and Unrestricted Elective requirements. Students are encouraged to begin planning as early as possible to ensure the minor can be completed in a timely manner and without taking extra courses.

Wharton students have the option of pursuing either a departmental minor or a University Minor (https://undergradinside.wharton.upenn.edu/undergraduate/wharton-minors).

For Non-Wharton Students

- Statistics, Minor (p. 235)

Statistics, Minor

The aim of statistical modeling is to empower effective decision making, and the field's unique contribution is its ability to incorporate multiple levels of uncertainty in the framing of wise decisions. Over the last few years, the development of new computational tools and the unprecedented evolution of "big data" have propelled statistical modeling to new levels. Today, statistical modeling and machine learning have reached a level of impact that no large organization can afford to ignore. The information landscape is changing as it has never changed before.

Students interested in this minor must have the prior approval of the Statistics Undergraduate Program Director to develop a curriculum for the minor that is appropriate for their interests. Wharton students are not eligible for this minor.

For more information: https://statistics.wharton.upenn.edu/programs/undergraduate/statistics-minor/

Statistics, Minor

This minor is for students outside of Wharton. Single-degree and dual-degree students with Wharton may pursue a statistics concentration instead.
Academic Opportunities

Students at Wharton have many on-campus curricular opportunities to enrich their academic experience. As a Wharton student, you can pursue specialized interdisciplinary studies through four different coordinated dual-degree programs (p. 238). If the coordinated dual-degree programs do not meet your needs, you can pursue a dual degree (p. 237) with the College of Arts and Sciences, the School of Engineering and Applied Science or the School of Nursing. In addition to undergraduate degree options, submatriculation programs (p. 255) offer Wharton students the chance to accelerate their graduate pursuits while satisfying their undergraduate curriculum.

Academic opportunities are also available for single-degree Wharton students. Minors (p. 235) allow students to explore a topic of interest in-depth, while independent study (p. 259) options encourage students to tailor their academic experience to their intellectual interests. Additional opportunities like the Wharton Field Challenge (https://undergrad-inside.wharton.upenn.edu/field-challenge) and the Quaker Consortium (https://undergrad-inside.wharton.upenn.edu/quaker-consortium) only further enrich the academic experience at Wharton. Take time to learn more about all the academic opportunities available to you!

For more information, visit: https://undergrad-inside.wharton.upenn.edu/academic-opportunities/.

Wharton Industry Exploration Program (https://undergrad-inside.wharton.upenn.edu/wiep)

These short-term, half-credit courses focus on various industries and cities and take place during school breaks.

Wharton International Programs (https://undergrad-inside.wharton.upenn.edu/wip)

WIP (WH 298) is a short-term international business course that is fully escorted by the Wharton Undergraduate Division. The program gives undergraduate students an amazing global opportunity featuring business site visits, lectures at our partner schools, cultural excursions, and networking opportunities with undergraduate students and business contacts from the destination countries.

In addition to learning about another country's business environment and culture, students earn 0.5 course units that can be used towards business breadth or elective credits. Three WIP courses are offered each year.

Senior Capstone (https://undergrad-inside.wharton.upenn.edu/senior-capstone)

The Wharton Senior Capstone (WH 398) is a for-credit, interactive business simulation that provides Wharton seniors with the opportunity to draw on their business knowledge—finance, management, marketing, leadership, and social responsibility—while formulating and executing business strategy in a competitive, team-based environment.

Utilizing real-time problem solving within a dynamic simulation environment, teams design and implement strategic plans, integrate feedback from the consequences of those decisions, and interact with other teams to create shareholder and social value.

Wharton Research Scholars (https://undergrad-inside.wharton.upenn.edu/wrs)

Wharton Research Scholars is an intensive one-year research program for a select group of students who are interested in conducting research under the supervision of some of Wharton's preeminent faculty members. As part of the program, participants complete an honors thesis.

Students apply to work on a specific project they propose in consultation with a Wharton faculty member who agrees to act as their faculty mentor. Students are allowed to have more than one faculty mentor provided at least one is a member of the Wharton faculty.

Throughout the year, students convene to discuss progress, strategies, and challenges within their projects. This interaction fosters a strong scholarly community where students can learn from each other's experience. The research scholars also meet regularly with their faculty mentors who advise the students throughout the year. The program culminates with final presentations and publication of research papers.
on the University of Pennsylvania Libraries’ ScholarlyCommons (http://repository.upenn.edu/wharton_research_scholars).

Interdisciplinary Studies
Interdisciplinary opportunities at Penn allow students to explore their academic interests and discover new ways of integrating knowledge.

Dual Degree
Undergraduates can receive two Bachelor’s Degrees by completing the requirements for any two of the four undergraduate schools at the same time. A dual degree program has no prescribed course of study, and the student does not have to choose to participate prior to matriculation.

The application process for a dual degree varies among the undergraduate schools. Contact the advising office (p. 245) for the school to which you are applying for details on how to submit an application.

Coordinated Dual Degree Programs (p. 238)
Penn’s specialized dual degree programs offer students the opportunity to pursue an integrated curriculum jointly offered by two schools within the University. Program participants graduate from Penn with two degrees.

University Minors (p. 240)
In addition to minors completed within one school, several interdisciplinary minors combine coursework from the four undergraduate schools.

Coordinated Submatriculation Programs (p. 239)
Penn offers students many opportunities to begin a graduate program while completing an undergraduate degree. Students may apply for admission as submatriculants to a variety of the University’s graduate and professional areas of study. Submatriculation programs exist in the four undergraduate schools and in several of Penn’s graduate schools.

Featured Interdisciplinary Programs
Penn offers a number of opportunities for students to pursue an integrated curriculum jointly offered by two or more schools within the University, and graduate with a single degree. Examples of such programs include:

Digital Media Design
The Digital Media Design (DMD) program is an interdisciplinary major in the School of Engineering and Applied Science at Penn. As a full-fledged Bachelor’s degree, it combines major coursework in computer graphics with the Information Science Department with Fine Arts courses from Penn’s School of Design. The program is designed for students who have an interest in the computer programming, mathematics, and design behind computer graphics, animation, games, virtual reality environments, and interactive technologies.

View Program Requirements (p. 182)

For more information, visit: http://cg.cis.upenn.edu/dmd_program.html.

Integrated Studies Program
The Integrated Studies Program (ISP) (https://www.college.upenn.edu/integrated-studies) is the freshman curriculum for Benjamin Franklin Scholars pursuing degrees in the College of Arts and Sciences. Deeply rooted in the liberal arts tradition of acquiring and applying expansive knowledge, this residential academic program invites highly-motivated students to examine complex themes through the integration of multiple academic disciplines and methodologies. Students are guided through the semester by some of Penn’s leading faculty. By investigating the same ideas under three distinct lenses, drawing simultaneously from the humanities, social sciences, and sciences, students sharpen their focus on the similarities—and differences—between the disciplines’ habits of mind.

For more information, visit: https://www.college.upenn.edu/integrated-studies/.

Moelis Advance Access Program
The Moelis Advance Access Program is a deferred admission program that gives Penn undergraduates a guaranteed pathway to the Wharton MBA while they pursue work experience. Moelis Fellows access Wharton resources and network during their deferment period and can be considered for a $10,000 fellowship per year during the 2-year full-time MBA program. Beginning in 2018, the program will accept a highly selective cohort of Penn seniors whose academic and career interests expand traditional notions of business education. The program was established with a $10 million gift from Ken Moelis, W’80, WG’81, and Julie Taffet Moelis, W’81. The program is open to all Penn undergraduates, beginning with the Class of 2018, who aspire to set the stage early for their advanced education and highly successful careers. Seniors in the College of Arts and Sciences, School of Engineering and Applied Science, School of Nursing, the Wharton School, and all coordinated dual degrees may apply.

For more information, visit: https://mba.wharton.upenn.edu/moelis-advance-access-program/.

Networked & Social Systems Engineering
The Rajendra and Neera Singh Program in Networked and Social Systems Engineering (NETS), formerly called Market and Social Systems Engineering (MKSE), is the world’s first course of study to fully integrate the disciplines needed to design and analyze the complex networks reshaping our society. This program prepares students to shape the technologies that underpin Internet-based search and electronic commerce, financial networks, social networks, and even such exchanges as the power grid. Graduates of this program will be prepared to engineer networks that work for both end-users and investors. Other graduates may become the policy-makers urgently needed to regulate these networks for the protection of commercial property and societal good.

View Program Requirements (p. 186)

For more information, visit: http://www.nets.upenn.edu/.

Nutrition
The Nutrition major is an interdisciplinary collaboration between the School of Nursing and the School of Arts & Sciences, and it builds on a student’s basic science skills with a deep dive into the science of nutrition. Linkages of nutritional compounds and dietary approaches with health and disease, novel approaches to the study of nutritional impact...
Coordinated Dual Degree Programs
Penn’s specialized dual degree programs offer students the opportunity to pursue an integrated curriculum jointly offered by two schools within the University. Program participants graduate from Penn with two degrees.

Computer and Cognitive Science
School of Arts & Sciences/School of Engineering & Applied Science
Bachelor of Science in Engineering (BSE)/BAS and Bachelor of Arts (BA)
This program combines studies in computer science and engineering with linguistics, mathematics, philosophy, or psychology, and students receive a BSE or BAS degree from Penn Engineering and Bachelor of Arts from the College of Arts and Sciences. Requirements for the program are guided by the degree sought (BAS or BSE) and include 12-16 course units in Linguistics, Mathematics, Philosophy, or Psychology and 4 course units in a Foreign Language.
For more information, visit: http://www.cis.upenn.edu/current-students/undergraduate/dual.php.

Huntsman Program in International Studies and Business
School of Arts & Sciences/The Wharton School
BA in International Studies/BS in Economics
This innovative four-year joint degree program between the School of Arts and Sciences and the Wharton School combines a business education, liberal arts, and advanced language training in one of eleven languages of focus. It prepares students for global leadership in career paths around the world in diverse areas such as consulting, finance, medicine, politics, diplomacy, the non-profit sector, and entrepreneurship. Students must apply to the program when they apply to Penn; they cannot transfer into the program. Admission is highly competitive.
For more information, visit: http://huntsman.upenn.edu/.

Jerome Fisher Program in Management & Technology
School of Engineering & Applied Science/The Wharton School
BAS/BSE and BS in Economics
The Jerome Fisher Program in Management & Technology (M&T) is sponsored jointly by the School of Engineering and the Wharton School. The impetus for this joint-degree program came from the Board of Overseers of the School of Engineering and Applied Science. The Board of Overseers, a distinguished group of corporate executives and academicians, emphasized that an understanding of the engineering and technology fundamentals is as essential to the background of future leaders in business and industry as a sound knowledge of management principles. They pointed to the growing need for people who can bridge the management and technical disciplines.
Undergraduate students enrolled in the M&T Program pursue degrees from both schools concurrently, creating a truly interdisciplinary learning experience. This combination enables students not only to understand
engineering and business concepts but also the integration of the two and how this intersection distinctively shapes our world. M&T students pursue a Bachelor of Science in Economics from the Wharton School and either a Bachelor of Science in Engineering (BSE) or a Bachelor of Applied Science in Engineering (BAS) from Penn Engineering. The curriculum includes two special M&T linking courses that allow for added interdisciplinary learning opportunities. The common goal for all M&T students is the mastery of the technical and managerial skills necessary to define and solve problems in today's complex technological society. The structure of the joint-degree program gives each student considerable flexibility in meeting this goal. Particular attention is directed to the importance and processes of innovation in our technology-based industries.

For more information, visit: http://www.upenn.edu/fisher/.

Nursing and Health Care Management Program (NHCM) School of Nursing/The Wharton School
Bachelor of Science in Economics/Bachelor of Science in Nursing (BSN)

Nurses with excellent clinical and administrative skills are in higher demand than ever. Our Nursing and Health Care Management Program (NHCM) gives you the chance to combine two of Penn's greatest assets: Penn Nursing and The Wharton School. In the NHCM program, you'll study simultaneously in both schools and graduate with a Bachelor of Science in Nursing and a Bachelor of Science in Economics. Your work will include science and clinical courses along with general education courses in the Arts and Sciences. We designed the curriculum to boost expertise in patient care and deepen your knowledge of how to manage the way that care is delivered. We also use a multidisciplinary approach that integrates nursing, business, and liberal arts. Students enrolled in the program have advisors at both Nursing and Wharton and complete this integrated academic and clinical program in five years.

For more information, visit: http://www.nursing.upenn.edu/nhcm/.

Roy and Diana Vagelos Program in Life Sciences and Management (LSM) School of Arts & Sciences/The Wharton School
Bachelor of Arts (BA)/Bachelor of Science in Economics

On the surface, bioscience and business may seem like unrelated fields. But if the full benefits of science are to be realized, discoveries made at the laboratory bench must be taken to market and made accessible to society at large—a process that demands great skill both scientifically and managerially. Given the pace of recent advances in bioscience and biotechnology, never before has the need been so great for decision makers who can understand and advance scientific innovations as well as manage and promote them. It is with this in mind that the University of Pennsylvania launched the Vagelos Life Sciences & Management (LSM) program.

LSM is an undergraduate dual-degree program administered jointly between Penn's College of Arts & Sciences and the Wharton School. Each year, the program enrolls approximately 25 exceptional students and offers them the opportunity to pursue an interdisciplinary curriculum combining bioscience and business, leading to the completion of two degrees: a Bachelor of Arts in life science major and a Bachelor of Science in Economics. To ensure that every student learns how to apply their knowledge, the program provides the means for them to find two required, paid internships, one centered in scientific research and the other in business or public policy. Completion of the LSM program is an ideal starting point for students intent on careers in the life sciences sector by preparing them for advanced training, and we anticipate they will then go on to pursue through MD, PhD, MBA, JD, and/or other graduate programs. LSM is suited to students with interests in health care; biomedical, agricultural, and environmental research and development; public policy; and the financial and strategic management of life science organizations.

For more information, visit: https://lsm.upenn.edu/.

Vagelos Integrated Program in Energy Research (VIPER) School of Arts & Sciences/School of Engineering & Applied Science BA/BSE

The Vagelos Integrated Program in Energy Research (VIPER) enrolls talented, prepared, and motivated students interested in energy science and engineering. VIPER students receive instruction and state-of-the-art research experiences, enabling them to pursue advanced degrees in these fields and establish high-caliber research careers as innovators in the discovery and development of sustainable ways to harness, convert, and use energy. Candidates for the program apply as they seek admission to the University. A joint program of Penn's School of Arts and Sciences (SAS) and the School of Engineering and Applied Science (SEAS), VIPER leads to dual Bachelor of Arts (BA) and Bachelor of Science in Engineering (BSE) degrees by combining majors from each school. Possible combinations include: Physics and Astronomy, Chemistry, Biology, or Mathematics from SAS and Chemical and Biomolecular Engineering, Electrical Engineering, Materials Science and Engineering, or Mechanical Engineering and Applied Mechanics from SEAS. Some students may also apply for a master's degree through a fifth year of study.

For more information, visit: https://www.viper.upenn.edu.

Coordinated Submatriculation Programs

The University offers a number of coordinated, interdisciplinary submatriculation programs to undergraduate students.

For more information about submatriculation, click here (p. 255).

BA/JD Program in Arts & Sciences and Law

This rigorous program offers an opportunity for highly qualified and motivated students to apply to Penn Law School during what is generally the first semester of a student's junior year (between 16 and 23.99 c.u.). If accepted, the student will submatriculate into the J.D. program in their senior year. Applicants must be committed to the study of law in its theoretical and practical aspects.

For more information, visit: https://www.college.upenn.edu/submatriculation.
Bio-Dental Program

Bio-Dental submatriculation is a seven-year joint program of the College and Penn’s School of Dental Medicine for students who will major in Biology and wish to enroll in the Dental School during their senior year in the College. Students must apply to the program when they apply to Penn, and applicants will be notified of their conditional acceptance into the program when they are notified of their admission to Penn. Full acceptance into the program is made after the student’s junior year and is based on academic performance during those three years and meeting the admissions standards of the Dental School.

For more information, visit: http://www.bio.upenn.edu/https%3A/%252Fwww.bio.upenn.edu/accelerated-dental-program.

BSN/JD Program

Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in the JD program (https://www.law.upenn.edu/academics/degrees.php) at Penn Law School while still undergraduates. The current climate of healthcare litigation and malpractice suits is well suited for professionals who combine nursing education and experience with legal expertise. A background in both nursing and law gives students a powerful and marketable skillset and prepares them to make an impact on the medical and legal professions. To submatriculate into Penn Law, students should take the LSAT and apply (https://www.law.upenn.edu/admissions/jd) during their junior year. If a student is admitted, they will begin taking courses at the law school during their fourth year, completing both the BSN and JD degrees in six years instead of the usual seven.

For more information, visit: https://www.nursing.upenn.edu/live/files/56-submatriculation-law2015.

Penn Engineering/Penn Law Program

Penn’s Law School offers an opportunity for qualified juniors in Penn Engineering to apply early to the Law School and submatriculate into the JD program beginning their fourth year. The program is designed as a 3-year + 3-year accelerated program for highly qualified Engineering undergraduates either in the Bachelor of Applied Science (BAS) or Bachelor of Science in Engineering (BSE) degree programs.

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/submatriculation-law.php.

Roy and Diana Vagelos Program in Molecular Life Sciences

Ambitious and highly motivated students interested in the molecular view of life should consider the Vagelos Scholars Program in Molecular Life Sciences. Students begin as freshmen and major in two sciences or submatriculate for a Master of Science degree in the standard four years. Students in this program plan to pursue scientific research careers. Scholars are invited from the admitted pool of high school seniors at the beginning of April at the discretion of the faculty director and the admissions committee.

For more information, visit: http://www.sas.upenn.edu/biochem/vs_tls.html.

Wharton Law School Submatriculation Program

During the junior year, qualified Wharton undergraduate students may apply for admission to the Penn Law School and submatriculate into the Juris Doctor (JD) program. In this 3-year + 3-year accelerated program, the student’s fourth year of study is spent entirely at the Law School completing the first-year law curriculum. The remaining undergraduate and/or graduate degree requirements are then completed in the student’s fifth and sixth years of study.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

University Minors

In addition to minors completed within one school, several interdisciplinary minors combine coursework from the four undergraduate schools.

Actuarial Mathematics

School of Arts & Sciences/The Wharton School

Actuarial Science stands at the intersection of risk and money. Actuaries use their knowledge of mathematics and probability theory to define, analyze, and solve complex business, financial, and social problems. Actuaries evaluate individual and corporate risks and design financially sound insurance and pension plans. Graduates from the University of Pennsylvania with an Actuarial Mathematics Minor are expected to be in great demand by the insurance and banking industry.

View Program Requirements (p. 138)

For more information, visit: https://www.math.upenn.edu/undergraduate/math-majors-and-minors/minor-actuarial-mathematics.

American Public Policy

School of Arts & Sciences/The Wharton School

This program enables undergraduates interested in American public policy to construct an integrated program between the School of Arts and Sciences and the Wharton School.

View Program Requirements (p. 139)

For more information, visit: https://bepp.wharton.upenn.edu/programs/undergraduate/program-information1/american-public-policy-minor/.

Biological Basis of Behavior and Health Services Management

School of Arts & Sciences/The Wharton School

The Biological Basis of Behavior Program and the Health Care Management Department of the Wharton School have jointly sponsored this effort. The objective is to provide students with exposure to two related areas: study in neuroscience and behavioral biology as a leading example of the bioscience enterprise, and health services management as the environment in which science innovation must be developed and managed. The minor consists of eight courses, four from the Biological Basis of Behavior Program and four from Wharton. Students must earn a minimum grade of C- in courses taken to fulfill the minor requirements.
Students must have a minimum of 3 courses that they count towards the minor and not towards any other major of minor.

View Program Requirements (p. 151)

For more information, visit: https://www.sas.upenn.edu/bbb/requirements/bbbhsmmminor.

**Consumer Psychology**  
**School of Arts & Sciences/The Wharton School**

The goal of the interschool Consumer Psychology Minor is to create a program that fosters the natural link between Psychology in the College and Marketing in Wharton. To fulfill the minor, students must complete four courses from the Psychology Department in the College, four courses from the Marketing Department in Wharton, and the stats requirement. Both College and Wharton requirements will consist of core courses along with a set of elective courses. College students who wish to pursue the Consumer Psychology must complete two of the four required psychology (PSYC) courses towards only the Consumer Psychology minor (and towards no other major or minor).

View Program Requirements (p. 145)

For more information, visit: https://psychology.sas.upenn.edu/more-information-minors.

**Nursing and Health Services Management**  
**School of Nursing/The Wharton School**

Increasingly, the delivery of health care involves decisions that entail considerations beyond clinical or medical issues. With the rise of managed care in the United States, it is critical for health professionals to understand not only the clinical factors that affect patients but also the business environment in which healthcare institutions function. This program, a partnership between the School of Nursing and The Wharton School, helps students understand both the nature of the economic and managerial constraints that healthcare organizations face, as well as how these constraints can be effectively managed to provide the best possible health care for patients.

View Program Requirements (p. 203)

For more information, visit: http://www.nursing.upenn.edu/nursing-and-health-services-management-minor/.

**Nutrition**  
**School of Arts & Sciences/School of Nursing**

Jointly sponsored by the Schools of Nursing and Arts and Sciences, the Nutrition Minor presents a broad view of the field, and illustrates the pervasiveness of nutrition-related issues in such diverse fields as anthropology, economics, folklore, history, physiology, psychology, health care, and public policy.

View Program Requirements (p. 204)

For more information, visit: http://www.nursing.upenn.edu/nutrition-minor/.

**Sustainability and Environmental Management**  
**School of Arts & Sciences/School of Engineering & Applied Science/The Wharton School**

The Sustainability and Environmental Management Minor is focused on sustainability and designed to help students understand the nature of environmental constraints that face organizations and individuals in the modern world, and to understand how these constraints can be effectively considered as part of the decision-making process in for-profit and non-profit organizations.

View Program Requirements (p. 164)

For more information, visit: https://www.sas.upenn.edu/earth/minors/sustainability-and-environmental-management-minor.

**Urban Education**  
**School of Arts & Sciences/Graduate School of Education**

The crisis in American education continues to confound major sectors of American life. National attention has engaged various constituencies: non-profit business organizations; local, state and federal governments; teachers’ unions; and universities - in trying to understand and improve public education. At Penn, students and faculty have become deeply involved in local schools through community service, research, teaching, and coursework. In response to student interest in community and education issues, the College of Arts and Sciences and the Graduate School of Education sponsor an interdisciplinary minor in Urban Education. This seven-course undergraduate minor offers students a unique opportunity to bridge learning between the classroom and community, and it features:

- Academically-based community service in local schools
- Deeper understanding of the complex factors affecting urban education
- Field-based research in an area of interest
- Hands-on opportunity to investigate a career in education
- Credit toward Pennsylvania teacher certification requirements

This minor is open to undergraduates in all disciplines. Students choose from among three concentrations depending on interest in pursuing teaching certification or deepening one’s background in urban education policy: Elementary Education; Secondary Education; Urban Education Policy, Research, and Practice.

View Program Requirements (p. 168)

For more information, visit: http://www.sas.upenn.edu/urban/students/urban-education-minor.

**Urban Real Estate and Development**  
**School of Arts & Sciences/The Wharton School**

This minor, co-sponsored by Real Estate (Wharton) and Urban Studies (Arts and Sciences), is designed to enable students to combine an interest in Urban Studies and Real Estate Development. Students take a total of seven Urban Studies and Real Estate courses, in consultation with the minor advisor.

View Program Requirements (p. 165)
For more information, visit: http://www.sas.upenn.edu/urban/students/real-estate-development-minor.

Academic Resources

Penn offers a wide variety of resources, offices, and programs for undergraduate students to support them in all aspects of their Penn experience. The following list highlights some of the most commonly used resources and areas of interest relating to academics and educational opportunities. For more information about campus resources available to students, visit the Division of the Vice Provost for University Life (http://www.vpul.upenn.edu).

- Academic Calendar (p. 242)
- Advising (p. 245)
- Career Services (p. 246)
- Community Engagement (p. 246)
- Enrollment & Degree Verification (p. 246)
- Fellowships and Prizes (p. 246)
- Financial Aid (p. 248)
- Foreign Language Study Opportunities (p. 248)
- Global Programs (p. 249)
- Information for Athletes (p. 249)
- Information for First-Generation, Low Income Students (p. 249)
- Information for International Students (p. 250)
- Learning Resources (p. 250)
- Libraries (p. 251)

- Registrar’s Office (p. 251)
- Research (p. 251)
- Scholars Programs (p. 253)
- Submatriculation (p. 255)
- Summer Sessions (p. 256)
- Transcripts (p. 256)
- Wellness (p. 256)

Academic Calendar

Notes:

Graduate and professional programs follow their own calendars with different registration/drop deadlines, which are typically available on the website of the school or program. The College of Liberal and Professional Studies may have different registration/drop deadlines. Please visit the LPS website, www.sas.upenn.edu/lps/, for more information.

Rosh Hashanah, Yom Kippur, the first two days of Passover and Good Friday are religious holidays that affect large numbers of University community members and that fall during the academic year. View the University’s policy regarding these and other holidays (p. 1559).

The University’s Three-Year Academic Calendar is subject to change. In the event that changes are made, the latest, most up-to-date version will be posted to the Almanac’s website (https://almanac.upenn.edu/penn-academic-calendar).

Session II & 11-Week Session classes begin on Friday, August 6, updated May 8, 2018.

**Advising**

Each school has their own advising office with a network of academic advisors available to assist students. The structure of the advising varies by school; you can find the links to your school's advising office below.

**School of Arts and Sciences**

College students need to choose courses, declare a major and define career goals. They will need to examine their performance in different courses, identify their skills and those they wish to develop, and decide what really matters to them. Much of this assessment they will do themselves, but faculty members, academic advisors, career counselors and peers can help.

Students in the College have a strong network of academic advisors available to assist them throughout their undergraduate careers.

- Pre-major advisors help first- and second-year students navigate their entrance into academic and intellectual life in the College beginning with the issues of incoming freshmen and continuing through the student's exploration of a potential major.
- Peer advisors work with the pre-major advisor and are one of the first points of contact for incoming College students. They provide the perspective of an upperclass student in the College and assist first-year students in making the transition from high school to Penn by sharing their strategies for academic success and knowledge of campus resources.
- After declaring a major, students are assigned an academic advisor affiliated with the major department or program.
- All students are welcome and encouraged to speak with assistant deans for advising in the College Office. These advisors can help students explore the many options and opportunities available to College students, and are available by appointment or on a walk-in basis throughout the year.

For more information, visit the College website (https://www.college.upenn.edu/advising).

**School of Engineering and Applied Science**

Each student is assigned a faculty advisor with whom they are required to meet at least twice per year. No student is permitted to register for classes in any semester without first meeting with an advisor and a review of their Permission to Register form (https://www.seas.upenn.edu/undergraduate/pdf/ug-advisor-signoff.pdf). Students who take the time to prepare for these meetings generally find them beneficial and informative. Faculty advisors are the best source of information about electives within the major, research opportunities, and options for graduate study.

For more information, visit: https://www.seas.upenn.edu/undergraduate/advising/.
School of Nursing
Penn Nursing students benefit from a dual advising structure. All students are assigned a faculty advisor and have access to the professional staff advisors in the Office of Student Affairs.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/accelerated/.

The Wharton School
The goal of the Wharton Undergraduate Division academic advising team is to help students make informed decisions about their educational plans and professional/life goals that are consistent with their interests, abilities, and values.

Advising by appointment, walk-in advising, and specialized advising (https://undergrad-inside.wharton.upenn.edu/advising-services/#specialized_advising) are services available in 695 Huntsman Hall to current Wharton undergraduate students.

Professional advisors (https://undergrad-inside.wharton.upenn.edu/advising-services), concentration advisors (https://undergrad-inside.wharton.upenn.edu/concentration-advisors), and peer advising fellows (https://undergrad-inside.wharton.upenn.edu/peer-advising) are available to assist students.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/advising-services/.

Career Services
Career Services helps students define their career goals and learn how to achieve them. The office helps students and alumni obtain permanent and short term career-related employment and graduate and professional school admission through counseling sessions, workshops, alumni networks, a large career resource library and on-line information. Career Services also establishes and promotes contact between employers, graduate/professional schools, and the University; and hosts employer interviews through the on-campus recruiting program.

- Career Services Contacts for Undergraduates (http://www.vpul.upenn.edu/careerservices/undergrad/connectwithus.php)
- Undergraduate Career Workshops and Events (http://www.vpul.upenn.edu/careerservices/undergrad/events.php)
- Information about Graduate School Study (http://www.vpul.upenn.edu/careerservices/gradprof)

For more information, visit: http://www.vpul.upenn.edu/careerservices/.

Community Engagement
The Barbara and Edward Netter Center for Community Partnerships (https://www.nettercenter.upenn.edu) is Penn's central administrative office for community partnership programs, including academically based community service, direct traditional service, and community development.

Penn's hub for civic engagement, Civic House (http://www.admissions.upenn.edu/academics/civic-house) supports student service and advocacy groups while providing resources, information, and meeting space for service-oriented efforts throughout campus and beyond.

The Robert A. Fox Leadership Program (http://www.admissions.upenn.edu/academics/fox-leadership-program) prepares students for present and future leadership through hands-on experience, service, course work, and mentorship from successful leaders.

Enrollment & Degree Verification
The University Registrar's office provides verification of dates a student attended Penn and degrees awarded by the Schools of the University. Details concerning Academic Certification may be found on the University Registrar web page (http://www.upenn.edu/registrar/student-services/academic-certification.html).

Fellowships and Prizes
The Center for Undergraduate Research and Fellowships (CURF) (https://www.curf.upenn.edu) serves as the University of Pennsylvania's information clearinghouse and primary support office for Penn students and alumni considering applying for major grants and fellowships.

CURF's Fellowships Team educates Penn students and alumni about fellowships and assists potential applicants in creating their strongest possible application through information sessions, conversations with fellowship recipients, and individual advising. CURF also supports and manages selection committees consisting of leading Penn faculty that evaluate applications and select applicants to endorse.

Fellowships provide funding for a wide range of activities:
- full tuition, fees, and a living stipend to earn a graduate degree abroad
- undergraduate or graduate study in the US
- conducting a research project abroad
- teaching English abroad
- internships abroad
- social engagement projects in the US or abroad

CURF aims to demystify these opportunities to help students determine the most appropriate awards for which to apply.

School-based Awards
In addition to departmental awards, there are a variety of awards available to undergraduate students within a particular school.

College of Arts and Sciences
• Abraham D. Cohn Prize
• Charles W. Burr Book Prize
• College Alumni Society 250th Commemoration Award
• Phi Beta Kappa Awards (https://www.college.upenn.edu/pbk)
• Vagelos Challenge Award (https://www.college.upenn.edu/honors)

For more information, visit: https://www.college.upenn.edu/honors.

School of Engineering and Applied Science

Undergraduate Awards
• C. N. Wegwandt Award (Student Choice Award)

Departmental Awards
• Bioengineering
• Chemical and Biomolecular Engineering
• Computer and Information Science
• Electrical and Systems Engineering
• Materials Science and Engineering
• Mechanical Engineering and Applied Mechanics

Awards From Additional Sources
• From the Moore School
  • John Grist Brainerd Award
  • Stuart Eichert, Jr. Memorial Prize
  • Atwater Kent Prize in Electrical Engineering
  • Walter Korn Award
  • Moore School Council Owilda Award

• From Advancing Women in Engineering
  • Jaros Baum and Bolles Award

• From the Undergraduate Affairs Committee
  • Penn Engineering Exceptional Service Award
  • Manfred Altman Memorial Award
  • Ben and Bertha Gomberg Kirsch Prize (Applied Science Prize)
  • Engineering Alumni Society E. Stuart Eichert, Jr. Award
  • Engineers' Club of Philadelphia Young Engineer Award
  • Albert P. Godsho Engineering Prize
  • Wolf-Hallac Award
  • Hugo Otto Wolf Memorial Prize

• Management and Technology Awards
  • Management and Technology Scholarship Award
  • Michele Huber and Brian D. Giles Memorial Award
  • Naren Udayagiri Scholarship Award

For more information, visit: http://www.seas.upenn.edu/undergraduate/student-life/awards.php.

School of Nursing
• Claire M. Fagin Award
• Dean’s Award
• Dorothy Mereness Award
• Ellen D. Baer Award
• Jeanne Frances Hopkins Award
• Mary D. Naylor Undergraduate Research Award
• Norma Lang Award
• Penn Nursing Alumni Student Award
• Sigma Theta Tau Award
• Theresa I. Lynch Award

For more information, visit: http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/graduation-academic-honors/#SON%20Awards.

The Wharton School
• Beverly Virany Memorial Prize
• Class of 1975 Management Award
• Dean’s Awards (https://undergrad-inside.wharton.upenn.edu/deans-awards)
  • The Dean’s Award for Excellence
  • The Dean’s Award for Innovation
  • The Dean’s Award for Service to the Wharton School
  • The Dean’s Award for Service to the University of Pennsylvania and the Philadelphia Community

• Delta Sigma Pi Scholarship Key
• Financial Executives Institute Award
• Herbert S. Steuer Memorial Prize
• John J. Holahan Memorial Prize
• Louis Rudolph Accounting Award
• William D. Gordon Award
• Vice Dean’s Award for Service

University Prizes
The following academic prizes are awarded at the University level:

President’s Engagement Prizes (https://www.curf.upenn.edu/presidents-engagement-prizes)
Competitively awarded on an annual basis, the President's Engagement Prizes empower Penn seniors to design and undertake local, national or global engagement projects during the first year after they graduate.

President’s Innovation Prize (https://www.curf.upenn.edu/presidents-innovation-prize)
Unique at both Penn and across higher education, the President’s Innovation Prize underscores the University's considerable commitment to encouraging students to put their knowledge to work for the betterment of humankind.

Senior Awards
The University of Pennsylvania grants numerous undergraduate awards to outstanding graduating seniors, in addition to some sophomores and juniors. Eligibility and criteria vary by award.
The Senior Honor Awards (Spoon, Bowl, Cane and Spade for those who identify as men; Hottel, Hamwell, Goddard and Brownlee Awards for those who identify as women) (http://www.vpul.upenn.edu/osa/seniors.php)

Nominees must be members in good academic standing who have actively contributed to campus life through activities and leadership. All nominees are placed on a ballot (one for men, one for women) which is distributed to a committee of staff members and the Senior Class Board. This committee votes and narrows the candidate pool to 15 men and 15 women, who are then voted upon by the entire Senior Class. The top 4 men and 4 women receive the awards on Ivy Day.

Grants to graduating students of color who demonstrate leadership, advance diversity at Penn through student activities or community service, and exemplify excellence.

The James Howard Weiss Memorial Award and The Penn Student Agencies Award (http://www.vpul.upenn.edu/osa/seniors.php)

Both awards recognize distinguished academic achievement (minimum G.P.A. of 3.7) and significant leadership in undergraduate activities by members of the senior class. A committee of students, faculty and staff makes the final selection from the list of candidates. Ideally, nominees should be the most outstanding members of group (1) above.

The Sol Feinstone Undergraduate Awards (http://www.dolphin.upenn.edu/oslaf/feinstone.html)

These awards may be presented to a sophomore, junior or senior who has contributed to "orderly and constructive social and educational change within or outside the University community." Past recipients have included the undergraduate who established the first mental health student group in the nation; the creators of a Saturday African-centered enrichment program for local children; the organizers of a pre-orientation leadership program for first-year students; and the founder of the first and the only youth-led LGBT statewide organization in the nation. Finalists are chosen by the same committee as in (2) above. (Keep in mind the fact that there must be a specific contribution, not just a list of activities).

Student Award of Merit (http://www.dolphin.upenn.edu/oslaf/alumni.html)

This award, sponsored by Penn Alumni, is presented to members of the Senior Class on the May graduation roster in recognition of their service to the University of Pennsylvania, which, in combination with other activities/endevors, strengthens and enhances the University.

The selection committee recognizes that University service takes many different forms, including but not limited to academic, co-curricular, athletic, and community service. Alumni relations and/or advancement experience is not required. Applicants are asked to use the brief essay portion of this application to describe the nature of their contributions to the Penn community and provide meaningful examples of the same. This award will be given to no fewer than one and no more than five members of the senior class. A committee comprised of alumni makes the final selection from the list of candidates. There is no minimum G.P.A. requirement.

For more information, visit: http://www.vpul.upenn.edu/osa/seniors.php.

Financial Aid

The Office of Student Registration and Financial Services (SRFS) provides solutions to students' concerns and encompasses the offices of the University Registrar and Student Financial Services.

- Information about Paying for a Penn Education (http://www.sfs.upenn.edu/paying)
- Information about Applying for Financial Aid (http://www.sfs.upenn.edu/finaid)
- Information about Loans (http://www.sfs.upenn.edu/loans)
- Information about Billing and Payment (http://www.sfs.upenn.edu/billing)

Undergraduate Cost of Attendance

The cost of attendance represents the cost of attending Penn for an academic year, and includes both direct costs that appear on a student's bill such as tuition, fees, housing and dining, and indirect costs that are not billed by Penn, such as books and supplies, transportation, and an allowance for personal expenses. Students should consider their cost of attendance as their budget for each academic year. Penn also uses the cost of attendance to help determine a student's eligibility for financial aid.

View the 2018-2019 Cost of Attendance: http://www.sfs.upenn.edu/paying/cost-of-attendance.htm

Foreign Language Study Opportunities

The Penn Language Center offers over 40 world languages per semester to both undergraduate and graduate students and is a leader in the field of language education and pedagogy training language instructors in language methodology in accordance with the National Standards.

Penn Language Center: plc.sas.upenn.edu

Some schools have foreign language requirements. Information about requirements and options for foreign language study varies by school:

- College of Arts and Sciences (https://www.college.upenn.edu/language-writing-speaking)
- School of Nursing (https://www.nursing.upenn.edu/live/files/247-language-requirement2016pdf)

The Penn Language Center maintains a list of languages (http://plc.sas.upenn.edu/languages) offered at Penn:

- Afrikaans (http://plc.sas.upenn.edu/node/2538)
- American Sign Language (http://plc.sas.upenn.edu/asl)
- Amharic (http://plc.sas.upenn.edu/amharic)

In addition, Penn Abroad also runs:
• Penn Global Seminars (https://global.upenn.edu/global-seminars) - Intensive semester-long seminars with short-term travel components.
• Global Internship Program (GIP) (https://global.upenn.edu/pennabroad/gip) – The opportunity to intern or conduct research abroad for 8 to 12 weeks over the summer with funding awarded for all accepted students. Students can apply for one of the over 200 pre-approved placements or receive funding for internships secured independently.

Other global opportunities for Penn undergraduate students exist across campus, including:
• Penn Summer Abroad (http://www.sas.upenn.edu/summer/programs/abroad) – offers faculty-led undergraduate courses offered in the summer through the School of Arts and Sciences to a range of international destinations each year.
• Wharton International Program (https://undergrad-inside.wharton.upenn.edu/wip) – provides short term international business courses at three global locations each year.
• Penn Nursing Short Term & Independent Programs (https://www.nursing.upenn.edu/globalhealth/student-opportunities/short-term) – provides students with a number of elective courses that can be taken abroad, including some clinical elective opportunities.
• Penn Engineering (http://www.seas.upenn.edu/community/international-opps.php) – provides a range of programs for undergraduate Engineering students including Summer Study Abroad, International Summer Research and Service Learning Opportunities.

Students are encouraged to speak to their department and home school about additional study abroad opportunities that may exist.

Information for Athletes

Penn Athletics (http://www.pennathletics.com) offers a number of programs to support student-athletes academically.

Student Athlete Development Center (http://www.pennathletics.com/page/student-athlete-development-center)

Academic Resources (http://www.pennathletics.com/page/academic-resources)

Student-Athlete Academic Achievement Program

The Student-Athlete Academic Achievement Program is designed to provide student-athletes with supplemental study and tutoring opportunities, as well as to foster academic interaction with fellow student-athletes. During the academic year, students have access to reserved rooms for scheduled study time, and individualized and group tutoring sessions. In addition, workshops are conducted to offer strategies for succeeding at Penn.

For more information, visit http://www.pennathletics.com/page/student-athlete-academic-achievement-program.

Information for First-Generation, Low Income Students

Penn offers a generous program of need-based financial aid (http://www.sfs.upenn.edu/paying) and a strong commitment to increase
access for qualified students from all economic backgrounds (http://www.sfs.upenn.edu/finaid/penn-finaid-initiative.html). There are a number of resources to support First Generation Low Income Students.

Penn’s First-Generation, Low-Income (FGLI) Program (http://www.vpul.upenn.edu/gic/FGLIProgram.php) is housed at the Greenfield Intercultural Center (http://www.vpul.upenn.edu/gic) (GIC), part of the Division of the Vice Provost for University Life (http://www.vpul.upenn.edu).

This program provides a supportive and inclusive learning environment for scholars from low-income backgrounds who are the first in their families to attend college. The FGLI program also welcomes all students who identify as first-generation for any of the multitude of ways this identity can be defined contextually. The staff address students’ academic, personal, and social transition needs while facilitating community-building and a sense of belonging at Penn. In collaboration with departments across campus, the FGLI program provides advising and coaching along with leadership development opportunities and experiences. The FGLI program welcomes all students who can benefit from this highly-personal engagement, and staff members are eager to celebrate these scholars and work with them to build on their talents as they navigate Penn.

The program works in collaboration with Penn First, a student organization that strives to be a community and support network for students who identify as first-generation college students and/or come from low-socioeconomic backgrounds. For more information about Penn First, visit: http://www.vpul.upenn.edu/gic/pennfirst.php.

In addition to the FGLI program, Penn offers additional resources and supports that may be helpful for low-income or first-generation students. For more information, visit: http://www.vpul.upenn.edu/Low-IncomeFirst-GenerationStudents.

**Information for International Students**

Penn’s International Student and Scholar Services (ISSS) (https://global.upenn.edu/issss) provides immigration benefits assistance and integration initiatives for the international community at Penn. ISSS works with international students through all stages of their journey at Penn, providing guidance every step of the way.

ISSS provides support to students in many different areas. Some examples include:

- Preparing students for arrival to the U.S.
- Helping get adjusted to life in Philadelphia
- Advising on maintaining status, travel, and immigration guidelines
- Providing integration opportunities such as social events, cultural trips and leadership roles
- Assisting with employment authorization before internships or jobs
- Assigned advisors and central online portal for requests and forms via the iPenn system (https://www.i Penn.oip.upenn.edu)

Find out more information for:

- New Students (https://global.upenn.edu/issss/new)
- Current Students (https://global.upenn.edu/issss/students)

- Beyond Immigration (https://global.upenn.edu/issss/beyond-immigration)

Click the iPenn logo to see your assigned advisor and make requests with eforms.

**Learning Resources**

**Center for Programs in Contemporary Writing (http://www.writing.upenn.edu)**

The Center for Programs in Contemporary Writing (http://www.writing.upenn.edu) (CPCW) brings together all of Penn’s writing programs, entities, and projects to form a collaborative whole. The Center presents writing courses, workshops and a reading circle. In addition, it offers students an opportunity to perform their writing or to become involved as a tutor, mentor or editorial apprentice.

**College Houses and Academic Services (http://www.collegehouses.upenn.edu)**

The eleven College Houses bring together undergraduates, faculty, staff, and graduate students to form vibrant residential communities within the larger context of our renowned urban campus, right in the heart of historic Philadelphia.

Each House has a Faculty Director, one or more Fellows, a House Dean, a House Coordinator, a plentiful staff of student Residential Advisors (RAs) and Graduate Associates (GAs), student Information Technology Advisors (ITAs), and many student managers in key positions.

Open to all Penn students, House tutoring sessions in math, chemistry, and economics are free and require no advance sign-up. For more information on tutoring within the Houses, visit: http://www.collegehouses.upenn.edu/life/tutoring.

**Communication within the Curriculum (http://www.sas.upenn.edu/cwic)**

Communication Within the Curriculum (CWIC’s) (http://www.sas.upenn.edu/cwic) undergraduate speaking advisors help students develop their public speaking skills through workshops and one-on-one advising sessions during walk-in hours. CWIC also offers two critical speaking seminars and a number of affiliate courses.

**Penn College Achievement Program (PENNCAP) (http://www.vpul.upenn.edu/eap/penncap)**

The Penn College Achievement Program (http://www.vpul.upenn.edu/eap/penncap) works closely with a diverse group of students, many from low-income and/or first-generation (http://www.vpul.upenn.edu/Low-IncomeFirst-GenerationStudents) backgrounds, to support their success at Penn. Among the many services offered are laptop and textbook loans, summer tuition grants, tutoring and advising.

**SCUE Preceptorials (http://preceptorials.org/news)**

Preceptorials are short, small, non-credit seminars generated by students and led by distinguished faculty, outstanding graduate students, lauded
external educators and exceptional undergraduate students. The program is designed to foster an interactive and educative environment that values learning for learning’s sake. To that end, there are no grades or tests. Preceptorials are not graded, so that students are given the opportunity to have a guided learning experience outside the traditional setting of a classroom. Most Preceptorials emphasize a hands on approach to learning, and meet once over the course of the semester.

Tutoring Center (http://www.vpul.upenn.edu/tutoring)
The Tutoring Center (http://www.vpul.upenn.edu/tutoring) offers Penn undergraduates a wide variety of free, accessible, and convenient options to supplement their academic experience.

Weingarten Learning Resources Center (http://www.vpul.upenn.edu/lrc)
The Weingarten Center provides academic support services and programs for undergraduate, graduate, and professional students at the University of Pennsylvania through its two offices. The services and programs of both offices are free and confidential.

Office of Learning Resources (http://www.vpul.upenn.edu/lrc/lr)
The Office of Learning Resources (http://www.vpul.upenn.edu/lrc/lr) staff provide a wide range of programming and professional consultation services in university-relevant skills such as reading, writing, study strategies, and time management.

Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds)
Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds) staff work closely with students who self-identify with disabilities in order to ensure equal access to all University programs, activities and services.

Libraries
Penn has a large and service-oriented library system. The combined 15 libraries on campus contain over 4,500,000 volumes, subscribe to more than 33,000 serials, and offer a rapidly growing set of electronic services which can be accessed from home or office, as well as in the libraries.

- Locations and hours (http://www.library.upenn.edu/locations)

Research
- For Research Guides by subject, visit: https://guides.library.upenn.edu/hometabs.
- To get help with research, students can submit questions online (http://faq.library.upenn.edu/ask) or make an appointment for in-person assistance (http://faq.library.upenn.edu/widget_standalone.php?la_widget_id=3206).

Canvas
Canvas is the online learning management system used at Penn. A valid PennKey is required to login to the system.

- To login to Canvas, visit: https://canvas.upenn.edu.
- For help with Canvas, visit: http://guides.library.upenn.edu/canvas_students.

Quaker Consortium
University of Pennsylvania students have a unique opportunity to study at Bryn Mawr, Haverford, or Swarthmore Colleges during the fall and spring terms of the academic year.

School specific policies:
- College of Arts and Sciences (https://www.college.upenn.edu/quaker-consortium)
- The Wharton School (https://undergrad.inside.wharton.upenn.edu/quaker-consortium)

Registrar's Office
The Office of the University Registrar (http://www.upenn.edu/registrar) supports teaching and learning at the University of Pennsylvania by maintaining the integrity of academic policies and the student information system. We are the stewards of Penn’s student records from application to degree conferal in perpetuity.

We provide the following services to Students, Faculty, Alumni, Parents, Staff and many other constituents across our campus:

- Support Students and Departments during Registration
- Reserve Classrooms for Courses and Academic Events
- Schedule Final Exams
- Record and Report Enrollment and Final Grades
- Certify Attendance
- Manage Veterans Affairs Educational Benefits
- Issue Transcripts
- Verify Graduation and Degrees

A transcript is a representation of a student’s academic record while at the University of Pennsylvania.

The University Registrar’s office provides verification of dates a student attended Penn and degrees awarded by the Schools of the University. Details concerning Academic Certification may be found on the University Registrar web page (http://www.upenn.edu/registrar/student-services/academic-certification.html).

Research
As one of the world’s leading research universities, Penn has a broad array of faculty conducting cutting-edge research in all disciplines. There
are many routes into research involvement for undergraduates, including
research-intensive courses, independent study with a faculty member,
and summer programs of varying types and foci.

The Center for Undergraduate Research and Fellowships (https://
www.curf.upenn.edu/research) is a resource for undergraduates in all
traditional programs who are interested in getting involved in research
opportunities around campus and around the world. CURF helps Penn
undergraduates become involved in research by helping you identify
resources, narrow your search, and shape your initial inquiries so you can
find appropriate faculty mentors and research funding.

- Penn Undergraduate Research Mentoring Program (https://
  www.curf.upenn.edu/content/penn-undergraduate-research-
  mentoring-program)
- Research Opportunity Directory (https://www.curf.upenn.edu/
  research-opportunity-directory)
- Research Grants (https://www.curf.upenn.edu/research/funding-
  opportunities)
- Summer Humanities Research Internships (https://
  www.curf.upenn.edu/summer-humanities-internships)

College of Arts and Sciences

Research reinforces and instills mastery of academic skills: how to
formulate a question or hypothesis, how to gather evidence, and how to
answer that question or test that hypothesis.

One of the major advantages of being an undergraduate at a research
university is the wide variety of opportunities available for scholarship.
Research in the College encompasses a range of activities. In some
disciplines, such as English, philosophy and history, students read
original works, or the primary literature, and look for new connections and
interpretations of these writings. In areas such as anthropology or history
of art, students study artifacts, works of art or ancient languages, gaining
insights on earlier civilizations and the lives of those who contributed to
them. Some students do research in biology, chemistry or psychology,
seeking insights on genetic coding, molecular structure or animal
behaviors.

Sometimes, students may receive College credit for research activities
and scholarship, or receive work-study funds or stipends from faculty
grants.

For more information, visit: https://www.college.upenn.edu/research/.

School of Engineering and Applied
Science

Our extraordinary faculty-to-student ratio provides great opportunities for
undergraduate students to work in state-of-the-art research laboratories
during the academic year and in the summer. Below are examples of
student research, along with helpful information to guide undergraduates
toward finding research positions at Penn Engineering.

For more information, visit: http://www.seas.upenn.edu/undergraduate/
research/index.php.

Finding a Research Mentor and Research Experiences

Students are encouraged to explore the Penn Engineering Faculty
Expertise Directory (http://www.seas.upenn.edu/directory/
deptments.php), featuring the School’s standing faculty and is
searchable by department, research center affiliation, and research
expertise keyword. Users can identify which faculty are conducting
research in a specific area and contact faculty members whose research
interests them.

The Engineering Dean’s Advisory Board (EDAB) puts together a guide for
fellow students that gives step-by-step instructions and tips on how to
secure research positions as an undergraduate.

For Bioengineering majors, the Penn student chapter of the Biomedical
Engineering Society (BMES) has assembled its own student guide on
starting up research.

Summer Undergraduate Research in Engineering (SURE)

Penn Engineering’s world-acclaimed faculty, along with state-of-the-
art research laboratories and highly interdisciplinary curricula, offers
summer research opportunities for talented undergraduates who seek
hands-on research experience. From robotics and computer animation,
nanotechnology, genomics and biotechnology, Penn’s centers and
institutes are at the forefront of research on multiple scientific and
 technological frontiers.

International Summer Undergraduate Research in
Engineering (iSURE)

Opportunities for undergraduates are available during the summer
to spend eight to 12 weeks on a research internship in one of Penn
Engineering’s partner institutions abroad.

Littlejohn Undergraduate Research Program

Thanks to a generous gift by Angus Littlejohn, the School of Engineering
is able to offer Summer Research Opportunities to Penn Engineering
Students. The program is open to rising sophomores, juniors and
seniors.

The program intends to provide students the opportunity to get involved
in hands-on engineering research under the supervision of a faculty
member. Topics of research include all areas covered by the departments
in the School of Engineering and Applied Science. Students will receive a
stipend of $4,500 for a 10 week period.

Rachleff Scholars Program

This program offers Penn Engineering undergraduates the opportunity
to gain valuable research experiences with standing faculty and to
participate in a community of peers who share a common interest in
research and scholarly inquiry.

School of Nursing

The Office of Nursing Research (http://nursing.livewhole.net/research/
on), along with our four research centers (http://nursing.livewhole.net/
research/research-centers) and partnerships across Penn, provide
students with resources and support that are virtually unparalleled in
our field. Students, from undergraduates to doctoral students, have
numerous opportunities to engage in research and work alongside some
of the most recognized researchers in their fields.

For more information, visit: https://www.nursing.upenn.edu/research/.

The Wharton School

Research provides an individualized method of learning and an in-
depth treatment of a topic of personal interest with input from a faculty
expert. Research experience is helpful if applying for distinguished
international fellowships and is important if going on to graduate studies.
in an analytical discipline. Research skills are useful for decision-making in the private and public sectors and are required in academic positions. Below you can find a variety of research opportunities and scholarship programs.

- Courses (https://undergrad-inside.wharton.upenn.edu/research/courses)—Create "tools" in a research-methods course.
- Research assistantships (https://undergrad-inside.wharton.upenn.edu/research/assistantships)—Learn by executing research-related tasks while working on a project for a faculty member.
- Summer programs (https://undergrad-inside.wharton.upenn.edu/research/summer-programs)—Gain hands-on experience from proposal to presentation through a project commensurate with program duration.
- Scholars programs (https://undergrad-inside.wharton.upenn.edu/scholars-programs)—Gain hands-on, in-depth experience from proposal to presentation via a senior thesis and other activities.
- Wharton PhD Submatriculation Program (http://doctoral-inside.wharton.upenn.edu/submatriculation)—Submatriculate into a PhD program in Accounting, Finance, Health Care Systems, Insurance and Risk Management, Management, Marketing, Operations and Information Management, Business and Public Policy, or Statistics.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/research/

**University Policies**

- Guidelines for Research in the Community (p. 1530)
- Guidelines for Student Protection in Sponsored Research Projects (p. 1530)
- Policy on Undergraduate Students, High School Students and Non-affiliates Participating in Research in Penn Research Facilities (p. 1559)
- Procedures Regarding Misconduct in Research for Nonfaculty members of the Research Community (p. 1565)

**Scholars Programs**

The following programs are available to all undergraduate students.

**Benjamin Franklin Scholars**

The Benjamin Franklin Scholars (https://www.curp.upenn.edu/bfs) are one of Penn's most distinctive undergraduate communities.

Each year we welcome a group of extraordinary incoming students, committed to the transformative power of ideas. Benjamin Franklin Scholars are selected based on their interest in, and demonstrated capacity for, a deep engagement in the liberal arts and sciences, both as ends in themselves and as engines of change in the world. With unique course offerings, and under the guidance of extraordinary faculty and advisors, we encourage our students to pursue, in the spirit of Franklin himself, our guiding principles of breadth, curiosity, and a tinkering habit of mind.

We are a home for students who seek the advantages of wide-ranging knowledge, whatever particular educational path they choose. We look for spirited, independent people who find their own passions and are predisposed to explore their own ideas, wherever they might lead. We welcome restless minds who are not content just to appreciate great ideas as abstractions up on a shelf, but who see them as transformative; changing minds and so changing the world. We are a community of students and faculty who find value in the saying of the great classical writer Plutarch, from whom Franklin himself claims to have "read abundantly" and see a truly great education as a kind of playing with fire.

BFS welcomes students in all the undergraduate schools: The College, Engineering, Wharton, and Nursing. Parts of the program, including admissions, work a bit differently in the different schools. For all our scholars, the BFS experience includes opportunities for overseas internships, a presentation of research to the BFS community, and our Seminars — a set of enriching opportunities to work on challenging topics, without requiring extensive prerequisites, both inside and outside of their major fields of study.

**University Scholars**

The University Scholars program (https://www.curp.upenn.edu/university-scholars) provides an exceptional academic environment for intellectually dynamic students who have already demonstrated their commitment and dedication to research.

Through mentoring, research funding and scholarly events the program encourages and supports students to make the most of their undergraduate years, not only with in-depth research, but also by making an early start in graduate and professional courses, ranging widely or in some cases focusing narrowly on their curricular choices.

The focus of the University Scholars program is undergraduate research. In order to aid students in doing creative and in-depth research, the University Scholars has a fund with which to help students defray research expenses. Funding is meant to cover the expense of the research itself; this most often pertains to room and board costs over the summer months. Occasionally, students’ research will take them away from Penn. In those instances, the University Scholars program may be able to fund travel expenses as well.

**Civic Scholars**

Penn Civic Scholars (http://www.vpul.upenn.edu/civichouse/civicscholars) is a unique program providing undergraduates with a sustained four-year experience in civic engagement and scholarship. The program culminates in certification upon graduation and designation as a Civic Scholar on the student’s transcript.

The Civic Scholars program is based on a few basic principles:

- Civic engagement and academic work are mutually reinforcing.
- Meaningful and sustained involvement in community affairs while at Penn is the base for lifelong civic commitments and contributions.
- Undergraduates can conduct significant applied social and public policy research through a multi-year preparatory process.
- Forming a community of dedicated students and faculty will encourage distinctive civic service and scholarship.

The following programs are available to students in a particular school.

**College of Arts and Sciences**

**Integrated Studies Program**

The Integrated Studies Program (ISP) (https://www.college.upenn.edu/integrated-studies) is the freshman curriculum for Benjamin Franklin Scholars pursuing degrees in the College of Arts and Sciences.
Deeply rooted in the liberal arts tradition of acquiring and applying expansive knowledge, this residential academic program invites highly-motivated students to examine complex themes through the integration of multiple academic disciplines and methodologies.

Students are guided through the semester by some of Penn’s leading faculty. By investigating the same ideas under three distinct lenses, drawing simultaneously from the humanities, social sciences and sciences, students sharpen their focus on the similarities—and differences—between the disciplines’ habits of mind.

School of Engineering and Applied Science
Rachleff Scholars
The School Of Engineering and Applied Science is pleased to announce the Rachleff Scholars Program (https://www.seas.upenn.edu/undergraduate/research/rachleff-scholars.php). The Program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

The Rachleff Scholars Program is open to rising sophomores with at least a 3.4 Cumulative GPA and strong interests in engineering research. Each student accepted into the Rachleff Program is required to complete work in three separate areas: summer research experience, honors coursework, and scholarly community activities.

School of Nursing
Benjamin Franklin Scholar - Nursing
As a Benjamin Franklin Scholar - Nursing (https://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program), you will engage in an intensive academic experience, along with peers in the College of Arts and Sciences, the Wharton School and in the School of Engineering and Applied Science, to complete the undergraduate Nursing major with an intensive liberal arts component. In addition to a variety of campus-wide programs as part of BFS, you will be able to enroll in the justly famed BFS Seminars – course taught by expert faculty from across campus in a variety of topics.

The Wharton School
Joseph Wharton Scholars
Founded in 1988, the Joseph Wharton Scholars (https://undergrad-inside.wharton.upenn.edu/jws) program is designed to emphasize the importance of scholarly research and the liberal arts and sciences within the framework of a business education. Students in the program are required to take scholars courses both in Wharton and outside of Wharton (in the College of Arts & Sciences, Nursing, and/or Engineering), engage in a significant research project, and participate in a variety of academic, career-oriented, and social activities.

The JWS program is the Wharton component of the Penn-wide Benjamin Franklin Scholars (https://undergrad-inside.wharton.upenn.edu/bfs) program, through which students gain access to BFS Seminars. In addition to the course requirements, students must maintain a minimum 3.4 GPA.

Joseph Wharton Scholar students must take three non-Wharton BFS Seminars as well as four Wharton honors courses (which may include Wharton BFS Seminars). The Wharton courses include honors sections of BEPP 250, FNCE 100, FNCE 101, MKTG 101, MKTG/STAT 476, STAT 430, STAT 431, WH 399; and the Wharton BFS Seminars: LGST 101, LGST 210, and LGST 215. All JWS students must take WH 50x – Evaluating Evidence as one of their four honors classes in Wharton.

Public Policy Research Scholars
The Public Policy Research Scholars (PPRS) (https://publicpolicy.wharton.upenn.edu/or-students/public-policy-research-scholars) offers a unique opportunity for students to study and explore public policy.

PPRS is an interdisciplinary certificate program intended for undergraduates with a background in economics, who want to explore the impact of U.S. public policy on the domestic economy.

The PPRS program is not a major. Instead, it offers a supplemental course of study, focusing on the quantitative analysis of public policy at the federal level, that can be pursued alongside any major, in any of Penn’s undergraduate schools. Beyond the curriculum, students also are required to do at least one public policy summer internship, for which they will receive funding from the Penn Wharton Public Policy Initiative. They also will have opportunities to assist with faculty-led policy research on campus. Through PPRS, we aim to create a tight-knit cohort of undergraduates from across the University who are committed to gaining the skills and experience necessary to critically assess U.S. public policy, as well as to prepare for graduate study and career opportunities in the field.

The core skills at the heart of PPRS include:

- Economic and political analysis of public policy, for assessing why, how, and with what degree of success the government designs and implements policy.
- Statistical thinking and quantitative analysis of economic data.
- Knowledge of the policymaking process.
- The application of theoretical and quantitative tools to practical, real-life policy questions.

Students that complete the program will have the designation “Public Policy Research Scholar” noted as an honor on their transcripts and will receive a certificate upon graduation.

Wharton Research Scholars
Wharton Research Scholars (https://undergrad-inside.wharton.upenn.edu/wrs) is an intensive one-year research program for a select group of students who are interested in conducting research under the supervision of some of Wharton’s preeminent faculty members. As part of the program, participants complete an honors thesis.

Students apply to work on a specific project they propose in consultation with a Wharton faculty member who agrees to act as their faculty mentor. Students are allowed to have more than one faculty mentor provided at least one is a member of the Wharton faculty.

Throughout the year, students convene to discuss progress, strategies, and challenges within their projects. This interaction fosters a strong scholarly community where students can learn from each other’s experience. The research scholars also meet regularly with their faculty mentors who advise the students throughout the year. The program culminates with final presentations and publication of research papers on the University of Pennsylvania Libraries’ Scholarly Commons (http://repository.upenn.edu/wharton_research_scholars).
Submatriculation

Penn offers students many opportunities to begin a graduate program while completing an undergraduate degree. Students may apply for admission as submatriculants to a variety of the University’s graduate and professional areas of study. Submatriculation programs exist in the four undergraduate schools and in several of Penn's graduate schools.

Application for admission as a submatriculant is made within the regular deadlines and processes for application to the graduate program of interest, usually during the student's junior year. Prior to applying for admission as a submatriculant, a student should meet with an academic advisor in both the undergraduate school and in the intended graduate program.

Policies, options, and procedures for submatriculation vary depending on a student’s undergraduate school:

- College of Arts and Sciences (https://wwwcollege.upenn.edu/submatriculation)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/degrees/submatriculation.php)
- School of Nursing (https://www.nursing.upenn.edu/academics/a-penn-nursing-education/submatriculation)
- The Wharton School (https://undergrad-wharton.upenn.edu/submatriculation)

For more information about interdisciplinary submatriculation opportunities, click here (p. 239).

School of Arts and Sciences

For a list of School of Arts and Sciences departments that consider submatriculation applications, visit: https://wwwcollege.upenn.edu/submatriculation/.

In addition to submatriculating within a department, College undergraduate students are also eligible for the following specialized submatriculation programs:

BA/JD Program in Arts & Sciences and Law

This rigorous program offers an opportunity for highly qualified and motivated College students to apply to Penn Law School during what is generally the first semester of a student’s junior year (between 16 and 23.99 c.u.). If accepted, the student will submatriculate into the J.D. program in their senior year. Applicants must be committed to the study of law in its theoretical and practical aspects.

For more information, visit: https://wwwcollege.upenn.edu/submatriculation.

Bio-Dental Program

Bio-Dental submatriculation is a seven-year joint program of the College and Penn’s School of Dental Medicine for students who will major in Biology and who wish to enroll in the Dental School during their senior year in the College. Application to the program must be made at the time of application to Penn. Applicants will be notified of their conditional acceptance into the program when they are notified of their admission to Penn. Full acceptance into the program is made after the student’s junior year and is based on academic performance during those three years and meeting the admissions standards of the Dental School.

For more information, visit: http://www.bio.upenn.edu/https%3A/\%252Fwww.bio.upenn.edu/accelerated-dental-program.

Roy and Diana Vagelos Program in Molecular Life Sciences

Ambitious and highly motivated students interested in the molecular view of life should consider the Vagelos Scholars Program in Molecular Life Sciences. Students begin as freshmen and major in two sciences or submatriculate for a Master of Science degree in the standard four years. Students in this program plan to pursue scientific research careers. Scholars are invited from the admitted pool of high school seniors at the beginning of April at the discretion of the faculty director and the admissions committee.

For more information, visit: http://www.sas.upenn.edu/biochem/vspmls.html.

School of Engineering and Applied Sciences

- Both BSE and BAS degree students in Penn Engineering may apply for submatriculation into engineering master’s programs. (Note that Engineering students are not permitted to submatriculate into the Master of Computer and Information Technology (MCIT) program.)
- Qualified undergraduates in Penn’s other schools may apply to submatriculate into any of the Penn Engineering master’s degree programs, subject to their home school’s rules and regulations.

In addition to submatriculating within a department, Engineering undergraduate students are also eligible for the following specialized submatriculation program:

Penn Engineering/Penn Law Program

Penn’s Law School offers an opportunity for qualified juniors in Penn Engineering to apply early to the Law School and submatriculate into the JD program beginning their fourth year. The program is designed as a 3-year + 3-year accelerated program for highly qualified Engineering undergraduates either in the Bachelor of Applied Science (BAS) or Bachelor of Science in Engineering (BSE) degree programs.

For more information, visit: http://www.seas.upenn.edu/undergraduate/degrees/submatriculation-law.php.

School of Nursing

Nursing undergraduate students are eligible for the following specialized submatriculation programs:

BSN/JD Program

Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in the JD program (https://www.law.upenn.edu/academics/degrees.php) at Penn Law School while still undergraduates. The current climate of healthcare litigation and malpractice suits is well suited for professionals who combine nursing education and experience with legal expertise. A background in both nursing and law gives students a powerful and marketable skillset, and prepares students to make an impact on the medical and legal professions.

To submatriculate into Penn Law, students should take the LSAT and apply (https://www.law.upenn.edu/admissions/jd) during their junior year. If a student is admitted, they will begin taking courses at the law
school during their fourth year, completing both the BSN and JD degrees in six years, instead of the usual seven.

For more information, visit https://www.nursing.upenn.edu/live/files/56-submatriculation-law2015.

**BSN/MSN Program**
The demand for nurses with MSN degrees is higher than ever. Submatriculation allows students in traditional and accelerated BSN programs to formally enroll in one of Penn Nursing’s MSN Programs (https://www.nursing.upenn.edu/academics/master-of-science-in-nursing-msn) while still undergraduates. Students are encouraged to apply (https://www.applyweb.com/upenn) as early as their junior year. If accepted, students will begin to take master’s level coursework, earning credit toward both degrees.

For more information, visit: https://www.nursing.upenn.edu/live/files/55-submatriculation-msn2016.

**The Wharton School**
Wharton undergraduate students are eligible for the following specialized submatriculation programs:

**Wharton Law School Submatriculation Program**
During the junior year, qualified Wharton undergraduate students may apply for admission to the Penn Law School and submatriculate into the Juris Doctor (JD) program. In this 3-year + 3-year accelerated program, the student’s fourth year of study is spent entirely at the Law School completing the first-year law curriculum. The remaining undergraduate and/or graduate degree requirements are then completed in the student’s fifth and sixth years of study.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

**Wharton MBA Submatriculation Program**
Qualified juniors in the Wharton undergraduate Program may apply for early entry (submatriculation) into the Wharton Master of Business Administration (MBA) Program. In this 3-year + 2-year accelerated program, students’ fourth and fifth years of study are spent entirely as part of the MBA Program. The program is designed to attract academically talented undergraduates with well-defined career goals and significant work experience. Students apply in the junior year.

For more information, visit: https://undergrad-inside.wharton.upenn.edu/submatriculation/.

**Wharton PhD Submatriculation Program**
The goal of the program is to allow selected Wharton undergraduates the opportunity to submatriculate into one of Wharton’s Ph.D. programs directly from the undergraduate program.

For more information, visit: https://doctoral-inside.wharton.upenn.edu/submatriculation/.

**Summer Sessions**
Penn Summer (http://www.sas.upenn.edu/summer) offers a wide variety of summer programs to current Penn students, with more than 300 classes available during the day or evening.

Current Penn students are encouraged to take advantage of advising resources during the summer term in the same manner as during the fall and spring. Before enrolling in summer courses, students should consult with their academic advisor (p. 245) regarding their intended coursework to ensure adequate degree progress.

**Penn Summer On-Campus**
There are three academic sessions during Penn Summer On-Campus (http://www.sas.upenn.edu/summer/programs/on-campus), and more than 300 courses are offered from academic departments across the university. Flexible day and evening classes are offered to fit students’ schedule and needs.

For more information, visit: http://www.sas.upenn.edu/summer/programs/on-campus.

**Penn Summer Online**
Not going to be in Philadelphia this summer? Consider taking one of Penn’s Summer Online (http://www.sas.upenn.edu/summer/programs/online) courses. Online courses allow students to earn credit as they participate in real-time with their Penn instructor and peers while having 24/7 access to their virtual learning materials.

For more information, visit: http://www.sas.upenn.edu/summer/programs/online.

**Penn Summer Abroad**
Students can earn Penn credit as they experience culture in another country with Penn Summer Abroad (http://www.sas.upenn.edu/summer/programs/abroad). Students travel with Penn faculty and other undergraduates with accommodations and excursions planned for them, enjoying the flexibility of a short-term commitment and make the most of their summer break.

For more information, visit: http://www.sas.upenn.edu/summer/programs/abroad.

**Transcripts**
A transcript is a representation of a student’s academic record while at the University of Pennsylvania.

Official transcripts are ordered through the Office of the University Registrar website (http://www.upenn.edu/registrar/student-services/transcripts.html). Unofficial transcripts are available at anytime, online for students and alumni class of 1988 or later via the Penn in Touch portal (https://weblogin.pennkey.upenn.edu/login?factor=UPENN.EDU,UPENN.EDU-PORTAL&cosign-isc-seo-portal_prodn-d8612f4e8939蓬勃笔触https://pennintouch.apps.upenn.edu/pennInTouch/jsp/fast2.do).

**Wellness**
There are a wide variety of resources available to support students at Penn. Some of the most commonly used resources are listed below.

**Wellness at Penn** (https://www.wellnessatpenn.com)
The Wellness at Penn initiative provides support, resources, and practical tools for wellness across the Penn community. It affirms wellness as a core priority and necessary driver of life on campus; and it offers a wide range of opportunities to reflect and engage on issues of wellness, stress,
mental health, resilience, happiness, personal and academic goals, and the meaning of success.

Peer Community Wellness Guide (https://static1.squarespace.com/static/5a430cd51b27d357e661824/t/5a432e0bc830257df7b8df49/151435213961/NEW-Wellness+Guide-Aug11.pdf)
The Penn Peer Community Wellness Guide was developed by Penn Wellness, the Penn Undergraduate Health Coalition, the Vice Provost for University Life, and the Undergraduate Assembly.

Counseling and Psychological Services (CAPS) (http://www.vpul.upenn.edu/caps)
215-898-7021 (Nights and weekends, ask for CAPS counselor on call.)

Counseling and Psychological Services (CAPS) provides professional psychological and psychiatric services to undergraduate, graduate, and professional students who need support in fulfilling their academic, social, and personal objectives. Along with health and wellness partners throughout the Penn community, CAPS directly supports student mental health through counseling, crisis management, consultation, education and outreach, and training.

Division of Public Safety (https://www.publicsafety.upenn.edu)

A central source for information about police, fire, and emergency services, security services, including walking escorts, and special victim services. Public safety also manages the University's extensive electronic security infrastructure.

Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds)
(215) 573-9235; TDD: (215) 746-6320

The Office of Student Disabilities Services (SDS), part of the Weingarten Learning Resources Center (http://www.vpul.upenn.edu/lrc), provides comprehensive, professional services and programs for students who self-identify with disabilities to ensure equal academic opportunities and participation in University-sponsored programs. Professional staff evaluate current documentation, determine individual students' eligibility according to program guidelines, and determine reasonable accommodations for all qualified students with documented disabilities on a case-by-case basis, including academic adjustments, e-text, accessible campus housing, and transportation and parking. SDS also coordinates auxiliary aids and services such as sign language interpreters and Computer Aided Realtime Translation (CART) reporters, as well as the loan of equipment and assistive technologies.

Student Health Service (http://www.vpul.upenn.edu/shs)
215-746-3535

Student Health Service is a state-of-the-art primary care center dedicated to the health and well-being of Penn students. Student Health provides accessible, cost-effective, culturally-sensitive, and student-focused care, including care for acute and chronic health problems, preventive health services, and health and wellness education. The Health Service works in close collaboration with our partners in the University Life Division, and with our colleagues in the University of Pennsylvania Health System (http://www.pennmedicine.org) to help ensure the health and wellness of the campus community.

Student Intervention Services (http://www.vpul.upenn.edu/intervention.php)
215-898-6081

Penn Student Intervention Services (SIS) assists the University community in handling emergencies or critical incidents involving the welfare and safety of students.

Office of the Chaplain (https://chaplain.upenn.edu)
215-898-8456

The staff of the Office of the Chaplain (https://chaplain.upenn.edu/about-us/staff) is available to students, faculty and staff for pastoral support, guidance, or informal advising and counseling. The Chaplain, an ordained clergy person, participates in campus ceremonies such as Convocation, Baccalaureate and Commencement and also officiates at weddings (https://chaplain.upenn.edu/about-us/weddings-blessings) and campus memorial services. The office serves and supports a wide range of student organizations (https://chaplain.upenn.edu/student-organizations), fellowships and religious communities on our campus. They also develop programming designed to improve interfaith understanding and build meaningful, collaborative relationships across religious difference.

Campus Health (http://www.vpul.upenn.edu/shs/campushealth)

Part of Student Health Service, Campus Health (http://www.vpul.upenn.edu/shs/campushealth) seeks to empower the Penn community to Live Well through advocacy, education, and action. Campus Health staff focus on a wide variety of healthy living topics including sleep, hygiene, stress reduction, nutrition, exercise, tobacco-free lifestyles and bike safety. Key initiatives include annual flu immunization clinics, which vaccinate more than 2,000 people, and yearlong sexual wellness education through events such as "Sex Camp" and "Sex Jeopardy."

Alcohol and Other Drug Program Initiatives (http://www.vpul.upenn.edu/alcohol)

The Office of Alcohol and Other Drug Program Initiatives oversees critical areas of health and wellness that can challenge the academic success of Penn students. The office comprises alcohol policy initiatives, violence prevention, data collection, strategic project management,
and (in a collaboration with Student Intervention Services (http://www.vpul.upenn.edu/intervention.php)) proactive crisis management.

Policies and Procedures

The following policies and procedures relate to undergraduate academics at Penn, and are organized by topic.

Most academic policies and procedures at Penn are school-related. University policies (p. 1479) are also often administered through the schools. Students should consult with their school or program academic advisors (p. 245) with questions or for help in understanding academic policies and procedures.

- Course and Exam-Related Policies (p. 258)
- Grade and GPA-Related Policies (p. 261)
- Graduation Policies (p. 262)
- Leaves of Absence (p. 263)
- Residency Requirement (p. 263)
- Transfer Policies (p. 263)

Course and Exam-Related Policies

Students should consult with their academic advisors (p. 245) about course and course-related policies and procedures.

- Add/Drop Period (p. 258)
- Auditing (p. 258)
- Class Attendance (p. 258)
- Course Load (p. 258)
- Course Numbering & Academic Credit (p. 258)
- External Exam Credit (p. 259)
- Independent Study (p. 259)
- Liberal and Professional Studies Course Credit (p. 259)
- Part Time Status (p. 260)
- Petitions (p. 260)
- Policy on Common Midterm Examinations (p. 260)
- Retaking Courses (p. 260)
- Rules Governing Final Examinations (p. 260)
- Withdrawing From a Course (p. 261)

Add/Drop Period

Courses may be added only during the first two weeks of each semester; course may be dropped through the fifth week of the semester. Students should consult with their advisors before dropping below a defined number of course units (generally 4), which may have adverse consequences.

Some courses may have different add/drop policies; students should consult with their school's advising office for further details.

Add/drop deadlines for each semester can be found in the Academic Calendar (p. 242).

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/registration-process)

Auditing

Undergraduate students cannot officially audit courses; however, subject to the approval of the instructor, students may be permitted to sit in on some courses without registering. These courses will not appear on students' records. Not all departments or schools allow this type of informal audit.

Class Attendance

Policies regarding class attendance vary by school and instructor.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/attendance)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#attendance)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/attendance)

Course Load

Policies regarding minimum and maximum course loads vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/course-load)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#course%20load)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/course-load)

Course Numbering & Academic Credit

Course Numbering

Courses are designated with a subject code and course number. The number assigned to a course generally denotes its level and may also indicate a course type.

- 1-399 Undergraduate courses
- 400-499 Mixed courses primarily for Undergraduate students
- 500-999 Mixed courses primarily for Graduate students
• 600-989 Graduate courses
• 990-999 Graduate individual study (thesis/dissertation) courses

Academic Credit at Penn

All of Penn's undergraduate programs and many of its graduate and professional programs use course units (CUs) as a general measure of academic work and progress toward a degree. Penn's use of CUs conforms to the practices of peer institutions that use a similar system of academic credit including Brown, Duke, Harvard, Princeton, and Yale. A CU is a general measure of academic work over a period of time, typically a term (semester or summer).

The Schools of Law, Dental Medicine, and Veterinary Medicine do not use CUs. The Law School uses credit hours in a way that is consistent with law schools in the United States. The Schools of Dental Medicine and Veterinary Medicine use credit hours in ways that are consistent with professional education in those fields of study.

Definition of a Course Unit

A course unit (CU) is a general measure of academic work over a period of time, typically a term (semester or summer). A CU (or a fraction of a CU) represents different types of academic work across different types of academic programs and is the basic unit of progress toward a degree. One CU is usually converted to a four-semester-hour course. A degree from one of Penn's undergraduate programs requires the completion of 32 to 40 (or more) course units. Graduate and professional degrees vary in the number of years of study and the number of CUs required.

Assignment of Academic Credit

The course unit (CU) value of a course determined by the faculty reflects their judgment regarding the expected work of a student completing that course. Factors that may be considered when assigning academic credit for a course include scheduled class time, expected time outside of class, the difficulty and range of materials covered, and the mastery of specific knowledge through written reports, exams, and other evaluations.

The assignment of academic credit for a course is formally approved by the curriculum committee (or similar body) of the school when a course is first proposed. It is reviewed formally by the faculty of a program, department, or school through periodic program reviews or curriculum revisions. Additionally, it is reviewed by the faculty of a program, department, or school informally as part of ongoing assessments of curriculum and teaching effectiveness.

Transfer Credit

At the University of Pennsylvania, faculty in individual departments and schools make decisions about awarding credit for external courses (courses taken at a college or university other than Penn). Each school has policies and procedures for evaluating and awarding external credit. Judging both course content and student work, faculty determine whether external courses are equivalent to courses offered through their own departments and thus what credit, if any, to award. In awarding credit at Penn for external courses, faculty also determine how those credits may be used (e.g., whether they satisfy general education requirements or requirements in a major).

Undergraduate schools use a web-based, password protected application called the External Course Approval Tool, or (http://www.college.upenn.edu/xcat) XCAT (http://www.college.upenn.edu/xcat). When academic credit is awarded for courses taken at other institutions, typically courses worth 3, 4, or 5 semester hours or worth 5 quarter hours are awarded one course unit (CU) at Penn.

External Exam Credit

The University of Pennsylvania may award credit or advanced course standing to students who have taken Advanced Placement (AP), International Baccalaureate (IB), or other internationally-recognized examinations. Scores warranting University credit vary by department.

Penn Admissions External Exam Credit Policy (http://www.admissions.upenn.edu/app/appliance/externalexamcredit) (for prospective students)

School specific policies:

• College of Arts and Sciences (https://www.college.upenn.edu/placement)
• School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/handbook/policy/advanced-placement.php)
• School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms/policies/bsn-handbook/courses-exam-related-policies/#AP%20Policies)
• The Wharton School (https://undergradinside.wharton.upenn.edu/apib-credit)

Independent Study

Independent study allows students to pursue academic interests not available in regularly offered courses.

Students should approach their academic or departmental advisor to explore the possibility of pursuing independent study.

Further information about independent study procedures is available by school.

• College of Arts and Sciences (https://www.college.upenn.edu/research)
• School of Engineering and Applied Science (https://www.seas.upenn.edu/undergraduate/pdf/ug-appl-for-indep-study.pdf)
• School of Nursing (http://www.nursing.upenn.edu/live/files/157-independent-study-form.pdf)
• The Wharton School (https://undergradinside.wharton.upenn.edu/independent-study)

Liberal and Professional Studies Course Credit

The College of Liberal and Professional Studies (LPS) (http://www.sas.upenn.edu/lps) is a division of the School of Arts and Sciences. LPS administers programs for adult, professional, and part-time students and offers late-afternoon, evening, and Saturday courses at the undergraduate, post-baccalaureate, and graduate levels. Traditional undergraduate students are eligible to take LPS courses. A certain number of spaces may be reserved for LPS students until the first week of classes, and some classes have restricted enrollments for LPS students only. Students should direct questions about enrollment policies and permits for specific LPS classes to LPS (http://www.sas.upenn.edu/lps).
Part Time Status

Traditional undergraduate students are generally expected to maintain full-time status. Students should consult with their school advising office for further details.

Please note that dropping to part-time status may affect other considerations, such as visa status, athletic eligibility, financial aid, and/or insurance coverage.

School specific policies:
- College of Arts and Sciences (https://www.college.upenn.edu/parttime-policy)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#course%20load)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/part-time-status)

Petitions

Students who believe a special circumstance might warrant an exemption from a school policy and/or requirement may submit a petition. Petitions are subject to review by a school-based committee. Students should first consult with their academic advisor.

Policies and procedures regarding petitions vary by school.

School specific policies:
- College of Arts and Sciences (https://www.college.upenn.edu/petitions)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#petition)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/petitions)

Policy on Common Midterm Examinations

Instructors teaching a course with multiple sections who plan to schedule a common midterm examination outside the class’s regular meeting time must notify students of this event during the first week of the semester and be prepared to offer one or more make-up examinations to accommodate any student who is enrolled in a course that meets at the time of the common examination.

Students enrolled in a course that conflicts with the time of a common midterm examination must notify the instructor administering the common midterm examination of the conflict by the end of the course selection (add) period. Students may not be required to miss their regularly scheduled class.

(Source: Almanac – April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html))

Retaking Courses

Policies governing retaking a course vary by school.

School specific policies:
- College of Arts and Sciences (https://www.college.upenn.edu/retaking-courses)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#a)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/retaking-courses)

Rules Governing Final Examinations

1. No instructor may hold a final examination nor require the submission of a take-home final exam except during the period in which final examinations are scheduled. When necessary, exceptions to this policy may be granted for postponed examinations (see 3 and 4 below). No final examinations may be scheduled during the last week of classes or on reading days.

2. No student may be required to take more than two final examinations on any calendar day during the period in which final examinations are scheduled. If more than two are scheduled, the student may postpone the middle exam. If a take-home final exam is due on a day when two final examinations are scheduled, the take-home exam shall be postponed by one day.

3. Examinations that are postponed because of conflicts with other examinations, or because more than two examinations are scheduled in the same day, may be taken at another time during the final examinations period if the faculty member and student can agree on that time. Otherwise, they must be taken during the official period for postponed examinations.

4. Examinations that are postponed because of illness, a death in the family, for religious observance, or some other unusual event may be taken only during the official periods: the first week of the spring and fall semesters. Students must obtain permission from their Dean’s office to take a postponed exam. Instructors in all courses must be willing to offer a make-up examination to all students who are excused from the final examination.

5. No instructor may change the time or date of a final exam without permission from the appropriate Dean.

6. No instructor may increase the time allowed for a final exam beyond the scheduled two hours without permission from the appropriate Dean.

7. No classes or required class activities may be held during the reading period.

8. The first examination of the day begins at 9 a.m. and the last examination concludes by 8 p.m. There will be one hour between exam time blocks.

9. All students must be allowed to see their final examination. Exams should be available as soon as possible after being graded with access ensured for a period of at least one regular semester after
the exam has been given. To help protect student privacy, a student should have access only to his or her own exam and not the exams of other students. Therefore, for example, it is not permissible to leave student exams (or grades or papers) in publicly accessible areas.

10. Students may not be asked for their Social Security Numbers. Instructors may not publicly display a student's Penn ID or any portion of the Social Security Number, nor use names, initials, or any personally identifiable information to post grades. Even when an identifier is masked or absent, grades may not be posted in alphabetical order, to protect student privacy.

11. Final exams for College of Liberal and Professional Studies (LPS) courses must be given on the regular class meeting night during the week of final examinations. No change in scheduling is permitted without unanimous consent of all students in the class and the director of LPS. LPS final exams may not be administered during the last week of class or on a reading day.

In all matters relating to final exams, students with questions should first consult with their Dean’s offices. Faculty wishing to seek exceptions to the rules also should consult with their Dean’s offices. Finally, the Council of Undergraduate Deans and Student Committee on Undergraduate Education (SCUE) urge instructors to see that all examinations are actively proctored.

(Source: Almanac, April 17, 2018, Volume 64, No. 31 (https://almanac.upenn.edu/volume-64-number-31/#of-record-rules-governing-final-examinations))

**Withdrawing From a Course**

Students may withdraw from a course through the end of the tenth full week of the semester, with the permission of the instructor, and should consult the Academic Calendar (p. 242) for the official withdrawal deadline for each semester.

Summer courses and part-of-term courses have different deadlines. Consult with an academic advisor for more information.

Withdrawal procedures vary by school:

- College of Arts and Sciences (https://www.college.upenn.edu/withdrawal)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks/forms-policies/bsn-handbook/courses-exam-related-policies/#withdrawal)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/withdraw)

**Grade and GPA-Related Policies**

Students should consult with their academic advisors (p. 245) about grading and GPA-related policies and procedures.

- Academic Standing (p. 261)
- Dean’s List (p. 261)
- Grade Grievance Process (p. 261)
- Grades (p. 262)
- Incomplete Grades (p. 262)
- Pass/Fail (p. 262)

**Academic Standing**

The University of Pennsylvania expects students to maintain a minimum level of academic performance or risk being placed on Academic Probation. The requirements for good academic standing vary by school; students enrolled in more than one undergraduate school are subject to the academic standing policies of both schools.

The requirements for good academic standing are:

- College of Arts and Sciences (https://www.college.upenn.edu/academic-standing)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks/forms-policies/bsn-handbook/policy/academic-regulations/#academic%20Standing)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/academic-standing)

**Dean’s List**

The Dean’s List citation appears on the transcript and is awarded annually to any student who achieves a combined GPA of 3.7 for the fall and spring semesters, provided that during those two semesters, he or she has:

- Completed 6 or more credit units for letter grades
- Received no grades lower than C
- Completed all courses on time with no Incompletes, NRs, or GRs

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Dean’s List in the academic year in which the violation occurred. The Dean’s List citation will be removed from the transcript if the finding occurs after this honor has been posted or if the violation occurs during the summer term following the academic year in which this honor was awarded.

(Source: Almanac — April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html), updated May 3, 2016, Volume 62, No. 33 (http://www.upenn.edu/almanac/volumes/v62/n33/changes-to-policies.html))

**Grade Grievance Process**

Students who wish to have a course grade reviewed must first attempt to resolve the issue with the course instructor. For detailed policies and procedures, students should refer to the policies of the school in which the course was taken.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/grade-review-policy)
- School of Engineering and Applied Science
  - Students are advised to discuss the grading discrepancy/grievance directly with the course director/instructor. If the
student is not satisfied with the conclusion of that meeting, the student can proceed to speak with the department chairperson about the grievance.

- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/grievance-policy)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/grade-grievance)

**Grades**

The grade point average (GPA) is calculated at the end of every term based on the following grading scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
</tbody>
</table>

*There is no D-.

Policies regarding grades vary by school.

**School specific policies:**

- College of Arts and Sciences (https://www.college.upenn.edu/credits-grades-policy)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/handbook/policy/grades.php)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#grading%20policy)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/grades)

**Incomplete Grades**

The decision to grant an Incomplete is solely that of the instructor teaching the course. Students should request Incompletes rarely if at all; it is far better to plan ahead and use advising and academic support resources to ensure that coursework is finished on time. There are a number of consequences of requesting an Incomplete, and unfinished coursework may result in a F grade or delay of graduation. Generally, students with one Incomplete must finish the work by the fifth week of the next semester.

Specific procedures and policies regarding incomplete grades vary by school.

**School specific policies:**

- College of Arts and Sciences (https://www.college.upenn.edu/incompletes)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#incompletes)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/incomplete)

**Pass/Fail**

Students may be eligible to take certain courses pass/fail. Policies regarding pass/fail options vary by school and course.

**School specific policies:**

- College of Arts and Sciences (https://www.college.upenn.edu/pass-fail)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/courses-exam-related-policies/#pass/fail)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/pass-fail)

**Graduation Policies**

Students should consult with their academic advisors (p. 245) about graduation requirements, Latin honors, and the procedures for applying for graduation and participating in graduation ceremonies.

- Graduation Honors (p. 262)
- Graduation Requirements (p. 263)
- Maximum Time to Complete a Degree (p. 263)

**Graduation Honors**

In recognition of distinguished academic achievement and high standards of academic integrity, the University of Pennsylvania awards Latin honors to undergraduate students based on the cumulative GPA on their transcripts at the time of graduation:

- **Summa Cum Laude**: 3.80 or higher
- **Magna Cum Laude**: 3.60 or higher, but less than 3.80
- **Cum Laude**: 3.40 or higher, but less than 3.60

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Latin honors. Notation of Graduation Honors will be removed from the transcript if the finding occurs after this honor has been posted.

(Source: Almanac, April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html), updated May 3, 2016, Volume 62, No. 33 (http://www.upenn.edu/almanac/volumes/v62/n33/changes-to-policies.html))
Graduation Requirements

Students are responsible for fulfilling all the requirements of their curriculum as determined by their school in order to graduate.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/graduation-policies)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/undergraduate/handbook/policy/course-requirements.php)
  - Students must complete all courses within their major, as addressed individually by each department.
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/graduation-academic-honors/#graduation%20requirements)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/degree-requirements)

Maximum Time to Complete a Degree

Some schools set a maximum period within which students must complete their degree. Students with questions should contact their school advising office.

School specific policies:

- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#completion)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/sunset-policy)

Leaves of Absence

Students take time away from their studies for a wide variety of reasons, including to:

- Work on a political campaign
- Manage a medical concern
- Fulfill a family obligation
- Pursue career-related opportunities
- Complete military service
- Take a break

Students typically take a leave for a full academic year. Individual circumstances may require more or less time; the length of the leave is determined by the school. Students on leave should remain in contact with their advisor and update them about plan changes. The return from leave process supports students in a successful re-entry to academic life at Penn. When preparing to return, students must consult their school advising office to develop a plan that includes connection with appropriate resources.

While interrupting one’s studies to take time away may seem intimidating, a leave is a means to the successful completion of a degree, not a barrier to graduating. Students considering a leave should take time to think carefully about their goals for the time away and for when they return.

Speaking with an academic advisor is an important first step. Students should also consult others important to their decision-making process, such as family members or, if the student intends to address health concerns during the time away, their healthcare provider(s). Your school advising office will help you connect with other campus resources as you prepare to take a leave of absence, such as Student Financial Services, Housing, and International Student and Scholar Services.

Procedures for requesting a leave vary by school.

School specific policies

- School of Arts and Sciences (https://www.college.upenn.edu/leave-of-absence)
- School of Nursing (https://www.nursing.upenn.edu/live/files/216-leave-of-absence-policy)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/leave)

Residency Requirement

Residency requirement policies vary by school.

School specific policies:

- School of Arts and Sciences (https://www.college.upenn.edu/residency-requirement)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/bsn-handbook/academic-regulations/#residency)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/transfer-residency)

Transfer Policies

Students should consult their academic advisors (p. 245) about transferring within Penn or receiving credit for academic experiences at other universities. Students who are intending to transfer to another institution should speak with officials at their new institution.

When students receive credit for courses or other types of academic work done elsewhere, it is referred to as equivalent credit. Some of these credits will be the result of coursework taken before matriculation at Penn, but it is also possible to do a limited number of courses “away” after matriculation.

Credit earned before the student matriculates at Penn is referred to as Transfer Credit (p. 264). Credit earned at another institution while the student is enrolled at Penn (post-matriculation) is referred to as Credit Away (p. 264).

Policies regarding the types and amount of equivalent credit allowed vary by school.

Students who wish to apply for an internal transfer between any of the four undergraduate schools should meet with an advisor in their home school and an advisor from the school they wish to enter. Applicants
should be prepared to discuss why the curriculum of the school to which they are applying for transfer is a good fit for their academic interests and goals. Students applying for internal transfer must be in good academic standing in their home school and should have no NR’s, GR’s, or F’s on their record.

External transfers admitted to any of Penn’s undergraduate schools or divisions are not eligible to transfer again within the University.

Specific policies and procedures for transferring internally vary by school.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/transfer-within-university)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks/forms-policies/bsn-handbook/leaves-transfers-and-withdraw)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/itdd)

These policies govern the transfer of credits taken before a student is officially enrolled at the University of Pennsylvania.

Penn Admissions Policy: http://www.admissions.upenn.edu/apply/transfer-admission/transfer-of-credits

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/credits-grades-policy)
- School of Nursing (https://www.nursing.upenn.edu/student-services/registration/transfer-credit)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/transfers/transfer-credits)

These policies govern credits earned at another institution while enrolled at the University of Pennsylvania.

School specific policies:

- College of Arts and Sciences (https://www.college.upenn.edu/credits-grades-policy)
- School of Nursing (https://www.nursing.upenn.edu/student-services/registration/transfer-credit)
- The Wharton School (https://undergrad-inside.wharton.upenn.edu/transfer-credits)
GRADUATE CATALOG

PhD and Research Master's Programs

This Catalog provides detailed information for current and prospective students about PhD and research master's programs at Penn as well as important academic policies and resources for graduate students. It also provides information about courses at all levels of study.

This Catalog is intended to provide general information about the University of Pennsylvania and is accurate as of May 2018. The University reserves the right to change, modify, or correct any information contained herein without prior notice, at any time.

Feedback? Email catalog@lists.upenn.edu

Programs

The following list includes PhD and research master's programs. Professional and other degree programs are listed by school in the Graduate Catalog (p. 265).

A

- Accounting, PhD (p. 338)
- Africana Studies, PhD (p. 287)
- Ancient History, PhD (p. 288)
- Anthropology: Archaeology, PhD (p. 289)
- Anthropology: Cultural, PhD (p. 290)
- Anthropology: Linguistic, PhD (p. 290)
- Anthropology: Medical, PhD (p. 291)
- Anthropology: Physical, PhD (p. 291)
- Applied Economics, PhD (p. 339)
- Applied Mathematics and Computational Science, MA (p. 292)
- Applied Mathematics and Computational Science, PhD (p. 292)
- Architecture, MS (p. 326)
- Architecture, PhD (p. 326)
- Art and Archaeology of the Mediterranean World, MA (p. 293)
- Art and Archaeology of the Mediterranean World, PhD (p. 294)

B

- Biochemistry and Molecular Biophysics, PhD (p. 274)
- Bioengineering, PhD (p. 328)
- Biology, PhD (p. 294)

C

- Cell and Molecular Biology, Cancer Biology, PhD (p. 274)
- Cell and Molecular Biology: Cell Biology, Physiology, and Metabolism, PhD (p. 275)
- Cell and Molecular Biology: Developmental, Stem Cell, and Regenerative Biology, PhD (p. 276)
- Cell and Molecular Biology: Gene Therapy and Vaccines, PhD (p. 277)
- Cell and Molecular Biology: Genetics and Epigenetics, PhD (p. 278)
- Cell and Molecular Biology: Microbiology, Virology, and Parasitology, PhD (p. 279)
- Chemical and Biomolecular Engineering, PhD (p. 329)
- Chemistry, PhD (p. 295)
- City Planning, PhD (p. 327)
- Classical Studies, PhD (p. 295)
- Communication, PhD (p. 267)
- Comparative Literature, PhD (p. 296)
- Computer and Information Science, PhD (p. 330)
- Criminology, MS (p. 297)
- Criminology, PhD (p. 297)

D

- Demography, PhD (p. 298)

E

- Earth and Environmental Science, PhD (p. 298)
- East Asian Languages and Civilizations, MA (p. 299)
- East Asian Languages and Civilizations, PhD (p. 299)
- Economics, PhD (p. 300)
- Education Policy, PhD (p. 268)
- Education, Culture, and Society, PhD (p. 269)
- Educational Linguistics, PhD (p. 269)
- Electrical and Systems Engineering, PhD (p. 331)
- English, MA (p. 301)
- English, PhD (p. 301)
- Epidemiology and Biostatistics: Biostatistics, MS (p. 280)
- Epidemiology and Biostatistics: Biostatistics, PhD (p. 281)
- Epidemiology and Biostatistics: Epidemiology, PhD (p. 282)
- Ethics and Legal Studies, PhD (p. 340)

F

- Finance, PhD (p. 341)

G

- Genomics and Computational Biology, PhD (p. 283)
- German Languages and Literatures, PhD (p. 302)

H

- Health Care Management & Economics, PhD (p. 342)
- Higher Education, PhD (p. 270)
- History and Sociology of Science, PhD (p. 303)
- History of Art, MA (p. 303)
- History of Art, PhD (p. 304)
- History, MA (p. 304)
- History, PhD (p. 304)

I

- Immunology, PhD (p. 284)
- Interdisciplinary Studies in Human Development, PhD (p. 271)

L

- Linguistics, MA (p. 305)
- Linguistics, PhD (p. 305)
M
• Management, PhD (p. 342)
• Marketing, PhD (p. 344)
• Material Science and Engineering, PhD (p. 331)
• Mathematics, M.Phil (p. 306)
• Mathematics, MA (p. 306)
• Mathematics, PhD (p. 306)
• Mechanical Engineering and Applied Mechanics, PhD (p. 332)
• Music: Ethnomusicology, PhD (p. 307)
• Music: History of Music, PhD (p. 308)
• Music: Musical Composition, PhD (p. 309)
• Music: Theory of Music, PhD (p. 309)

N
• Near Eastern Languages and Civilizations: Arabic and Islamic Studies, MA (p. 310)
• Near Eastern Languages and Civilizations: Arabic and Islamic Studies, PhD (p. 310)
• Near Eastern Languages and Civilizations: Biblical Studies, MA (p. 311)
• Near Eastern Languages and Civilizations: Biblical Studies, PhD (p. 312)
• Near Eastern Languages and Civilizations: Classical and Medieval Hebrew Literature, MA (p. 313)
• Near Eastern Languages and Civilizations: Classical and Medieval Hebrew Literature, PhD (p. 313)
• Near Eastern Languages and Civilizations: Egyptology and Archaeology, MA (p. 314)
• Near Eastern Languages and Civilizations: Egyptology, PhD (p. 315)
• Near Eastern Languages and Civilizations: Mesopotamian Civilization, MA (p. 316)
• Near Eastern Languages and Civilizations: Mesopotamian Civilization, PhD (p. 316)
• Neuroscience, PhD (p. 284)
• Nursing, PhD (p. 334)

O
• Operations, Information and Decisions, PhD (p. 346)

P
• Pharmacology, PhD (p. 286)
• Philosophy, PhD (p. 317)
• Physics and Astronomy, PhD (p. 317)
• Political Science, PhD (p. 318)
• Psychology, PhD (p. 318)

Q
• Quantitative Methods, PhD (p. 271)

Annenberg School for Communication
Home to 22 full-time faculty members (https://www.asc.upenn.edu/people/faculty?faculty-type=28&field_research_area_target_id=All&name=), more than 80 doctoral students (https://www.asc.upenn.edu/people/students/graduate-students), more than 20 postdoctoral fellows (https://www.asc.upenn.edu/people/faculty?faculty-type=104), 70 research and support staff (https://www.asc.upenn.edu/people/staff), and 16 research centers (https://www.asc.upenn.edu/research/research-centers) and programs, the Annenberg School is the nation’s premiere doctoral program in Communication.

As the smallest of 12 schools at Penn, it is a close-knit and supportive environment for innovative scholarship. The school hosts a variety of academic events (https://www.asc.upenn.edu/news-events/events) every year, including the Elihu Katz Colloquium Series; the Annenberg and Gerbner Lectures, and numerous other lectures, master classes, workshops, conferences, and symposia.

In addition to bringing some of the world’s top scholars to Annenberg as visiting scholars and guest lecturers, the school provides generous funding to encourage our graduate students to present their research at national and international communication conferences (https://www.asc.upenn.edu/news-events/news/highlights-ands-awards-66th-international-communication-association-annual) and travel globally for their dissertation research (https://www.asc.upenn.edu/news-events/news/student-profile-eleanor-marchant), making the school a stepping off point to the world of global scholarship.

For more information, visit https://www.asc.upenn.edu/.

In 1958, publisher, diplomat, and philanthropist Walter Annenberg founded the Annenberg School for Communication at the University of Pennsylvania with these words:

“Every human advancement or reversal can be understood through communication. The right to free communication carries with it responsibility to respect the dignity of others — and this must be recognized as irreversible. Educating students to effectively communicate this message and to be of service to all people is the enduring mission of this school.”

Over the ensuing years the Annenberg School has remained true to the mission articulated by Ambassador Annenberg, while responding to changes in both the nature of communication as a social process
and in Communication as a discipline and an interdisciplinary field of study. Today, we advance our mission through four central goals:

- Producing and disseminating cutting-edge scholarly research designed to advance our theoretical and empirical understanding of the role of communication in public and private life.
- Producing and disseminating high-quality applied research designed to advance the public’s understanding and effective use of communication, and policy-makers’ ability to create a media environment that fosters the personal and collective development of its citizens.
- Educating Ph.D. graduate students in the theories, substance, and methods of communication research and placing them in leading academic and professional positions in the field.
- Providing a first-class liberal arts education to undergraduates, designed to help them become better consumers and producers of public information, strengthen their understanding of the role of communication in their personal, professional and civic lives, and prepare them for private and public-sector leadership positions in communication-related and other fields.

The Annenberg School stands at the forefront of basic and applied empirical research on the institutions, processes, nature, and consequences of communication. This research is based on theories, methods, and knowledge emerging from our own discipline as well as other disciplines such as communications in the humanities, social sciences and sciences. Many Annenberg faculty members are jointly appointed or hold secondary faculty positions in other schools and departments at Penn. Annenberg faculty and students regularly collaborate with each other and with faculty, researchers, and students from Penn’s other distinguished schools and centers.

The result of this interdisciplinary research network is a faculty and student body with the theoretical, methodological and substantive breadth, depth, and agility to produce cutting-edge research on the most pressing communication-centered issues of the twenty-first century.

We invite you to learn more about Annenberg’s core research areas, our research centers, labs and working groups, and our grant-related research projects.

Research Areas (https://www.asc.upenn.edu/research/research-areas)

Annenberg faculty, students, and staff have particular expertise in several intersecting and evolving research areas.

For more information: https://www.asc.upenn.edu/research/research-areas

Research Centers (https://www.asc.upenn.edu/research/research-centers)

Collaborative research is common at the Annenberg School, often taking place through our established centers and labs, as well as through a variety of more informal research working groups.

For more information: https://www.asc.upenn.edu/research/research-centers

Programs

PhD and Research Master’s Programs

- Communication, PhD (p. 267)

Communication, PhD

Annenberg is interdisciplinary by design. Members of the faculty and students come from a wide range of backgrounds, including Communication, Psychology, Political Science, Sociology, Anthropology, History, and Law. Students are also encouraged to supplement their Communication courses with those offered through one of Penn’s 11 other distinguished schools. The result is a vibrant intellectual experience that trains students to apply and adapt diverse theories and methods to the cutting-edge communication issues of the twenty-first century.

All doctoral students are fully funded for up to five years, including tuition and fees, health care, teaching and research fellowships, and dissertation research fellowships. All students also receive yearly research and travel funds, allowing them to develop their research and present it at major national and international conferences. In addition to formal classes, students are able to work with faculty on grant- and center-supported projects, attend and participate in frequent colloquia and workshops, and engage in research and learning opportunities around the globe — all designed to enhance their intellectual growth and professional training.

Annenberg alumni go on to productive and fulfilling careers in academia as well as in research-oriented private and public-sector institutions.

The Annenberg Ph.D. program represents a five-year commitment. In addition to satisfactory completion of the core courses, all students are required to take a noncredit proseminar as well as introductory classes in research methods and statistics. In order to progress to dissertation stage, candidates must complete the following milestones, Qualifications Evaluation, Comprehensive Exams, & Dissertation Proposal and Oral Defense.

All Ph.D. students must take at least one separate class with each of at least five different members of the ASC standing faculty. The intent of this is to foster students’ knowledge of a diverse range of approaches to communication.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sample Plan of Study
A typical course plan for a student entering the program without a Master’s degree includes these components:

- Seven semesters of courses, typically three courses per semester
- Three required classes:
  - COMM 500 Proseminar
  - COMM 522 Introduction to Communication Research
  - Approved statistics course
- A Qualifications Evaluation (see below) at the end of semester 4
- A dissertation proposal defense in semester 8
- Dissertation research in semesters 8 through 10
- Dissertation defense and graduation at the end of semester 10

Program Milestones

- Qualifications Evaluation (QE) is a review conducted to ensure doctoral students have the requisite skills, creativity, initiative, and plans to successfully complete their degree, including their dissertation. The QE must be completed at the end of the semester during which the student accumulates 12 classes (at least eight of which must be acquired at Penn) toward the degree, but no earlier than the end of the first year.
- Comprehensive Exams: In order to advance to candidacy, become eligible to defend the dissertation proposal and to receive a dissertation research fellowship (DRF), students must successfully pass a comprehensive examination. These exam cover theory, methods and research in the student’s field of expertise.
- Dissertation Proposal and Oral Defense: Before becoming eligible for a dissertation research fellowship and beginning work on the dissertation, the student must submit and defend a proposal for dissertation research to his or her Dissertation Committee. The proposal is a full statement of the research problem, including its theoretical rationale and methodology.

Graduate School of Education
The University of Pennsylvania Graduate School of Education is one of the nation’s premier education schools. At Penn GSE, students and faculty enjoy an Ivy League environment that supports both practical knowledge building and high-quality research. Our alumni are recognized as some of the world’s most influential education leaders, and our distinguished professors are pioneers in their fields.

A world-class school of education in a dynamic Ivy League setting, Penn GSE is a national leader in education research and preparing talented educators. With 40 tenured and tenure-track faculty and just under 1,300 students, Penn GSE is a small school with remarkable scholarly productivity and influence.

Master’s Programs
Penn GSE also offers over 20 Master’s programs. For full details on these programs, please visit http://www.gse.upenn.edu/academics#by-degree.

Education Policy, PhD

Students in the Education Policy Ph.D. program pursue an individualized program of study that reflects their specific interests in education policy at the local, state, national, or international levels.

The Education Policy Ph.D. program equips graduates with the knowledge and methodological tools to use, understand, and conduct research on the pressing educational issues of the day. Students pursue an individualized program of study that reflects their specific interests, and are required to write a significant qualifying paper and complete a dissertation on an issue in education. At the heart of the Ph.D. program is the research apprenticeship, where students work on research projects alongside faculty members. Doctoral students are matched with Education Policy faculty members whose research interests align with their own. Our program prepares students for a variety of careers, including faculty positions at institutions of higher education, and policy research positions at research firms, nonprofit organizations, and government agencies.

Total Course Units 16

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Education, Culture, and Society, PhD

Rooted in the social sciences and humanities, the doctoral program in Education, Culture, and Society focuses on the historical, political, philosophical and sociocultural foundations of education.

The Education, Culture, and Society Ph.D. program provides a rigorous theoretical and methodological framework for the study of education, focusing on social, cultural, political, and normative dimensions. Following a rich academic curriculum centered in social theory and qualitative research methods, the program invites students to interrogate and contribute to scholarship on the social and cultural contexts of learning, both inside and outside of schools. Most students supplement their educational studies with significant coursework in other disciplines of their choosing, including anthropology, sociology, history, urban studies, philosophy, and linguistics. Students may be eligible to pursue a joint Ph.D. degree with anthropology, sociology, Africana studies, history, or political science.

For more information: http://www.gse.upenn.edu/ecs/phd

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Required Courses

The total course units required for graduation is 16, in addition to whatever advisor and student agree for individualized program of study, doctoral exams; and an acceptable dissertation. A minimum of 10 courses must be taken at Penn’s Graduate School of Education; a maximum of 6 courses can be transferred from another institution. Your advisor will assist you in choosing the most appropriate course for your area of specialization. All courses counted toward the degree must be level 500 or higher.

Core Foundation Courses
EDUC 727 Education, Culture and Society 1

Theory Courses 1
Select two Theory courses 2

Research Methods 2
Select two Qualitative courses, at least one of which must be advanced 2

Select one Quantitative course 1

Electives
Select 10 course units 10

Total Course Units 16

1 Theory courses are centrally concerned with preparing students to draw on, understand and contrast theoretical frameworks within the context of seminal scholarly figures and traditions. They may focus on single frameworks, or compare across multiple ones; they may be either historical or contemporary. These courses may be in GSE, or taken in other schools. Students are encouraged to discuss options with their faculty advisors.

2 Methods courses prepare students in both the practical and theoretical implications of collecting, interpreting, analyzing and presenting data on the human condition broadly (and education/learning in particular). These courses may be in GSE, or taken in other schools.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Educational Linguistics, PhD

The Educational Linguistics Ph.D. enables students to pursue research on language learning, teaching language, and the role of language in teaching and learning.

The Educational Linguistics, Ph.D. program is rooted in the view that language must be examined within the cultural contexts and social situations in which it occurs. Faculty and students are involved in generating research on language and learning in areas such as:
• Bilingualism, biliteracy, and bilingual education
• Multilingual language planning and policy
• Linguistic, cognitive, and sociocultural aspects of (language) learning, and (second) language acquisition/socialization
• Educational and social consequences of ethnic and linguistic diversity
• Local/global perspectives on English language teaching policy and practice in K-12 and higher education
• Multimodal discourse in social and institutional settings
• Language revitalization

For more information: http://www.gse.upenn.edu/elk/phd

View the University’s Academic Requirements for PhD Degrees (p. 1484).

The total course units required for graduation is 20. If approved by your advisor, 8 CUs may be transferred into the program; normally these will be electives. Core courses may not be transferred in. The requirements include 5 core courses, 3 research courses, 3 linguistics courses, and your choice of elective courses agreed upon with your advisor.

Research Methods

Select one Quantitative Methods course 1
Select one Qualitative Methods course 1
Select one Advanced Quantitative OR Qualitative Methods course 1

Linguistics

Select one course from the Linguistics Dept in one of the following core areas: Phonetics, Phonology Morphology, Syntax, Semantics, Pragmatics
Select two additional courses, which may be from the Linguistics Dept., Anthropology Dept., or other relevant linguistics course

Electives

Select nine course units

Total Course Units 20

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Higher Education, PhD

The Ph.D. in Higher Education (HE) is a highly individualized program that prepares students for an academic career in the field of higher education. Through coursework, research assistantships, and working closely with their academic advisors, students in the Ph.D. in Higher Education program develop the skills they need to conduct primary research in higher education. These skills include understanding research design and the analysis of both qualitative and quantitative data. This program is highly individualized and students work closely with their academic advisor to draw from courses from the division and from other areas on campus that relate to their area of inquiry. Ph.D. students develop a planned program of study in consultation with their academic advisor.

For more information: http://www.gse.upenn.edu/hed/phd

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Select two additional courses, which may be from the Linguistics Dept., Anthropology Dept., or other relevant linguistics course

Electives

Select nine course units

Total Course Units 20

1 The Quantitative Methods and Methods requirements are defined by the advisor. The courses that are used to fulfill these requirements will NOT be allowed to double count to meet other doctoral course requirements.

Transfer credit

GSE will, under certain conditions, accept equivalent credit toward the degree. Up to 8 graduate level CUs taken at GSE, Penn, or another institution, may count toward the PhD degree.

Transfer credit is not automatically accepted or applied toward the doctoral degree. Students should consult their academic advisor and the GSE website for the policies governing the application for transfer credit in their first semester of coursework at GSE. Students who are not awarded a full 8 CUs of transfer credit should consult their academic advisor for the appropriate elective coursework to fulfill the coursework required for the PhD degree program. Please consult the GSE website for the proper forms and procedures.

Methods Course

All HE doctoral students are required to take 2 methods courses either within GSE or another school at Penn. One of these courses must be a statistics course. Students should consult their academic advisor regarding the appropriate methods courses for their program of study. Methods courses filled at GSE outside of the HE Division will also fulfill GSE’s distribution requirement.

Electives courses

Electives may be taken at any school at Penn, although the majority of HE students fulfill their electives within the division. Courses must be at the 500 level or above and students must consult their academic
advisor before enrolling in any course outside of GSE. Students without a master’s degree in HE may be required to fulfill some of their electives with required coursework from the HE MSEd program.

**Cognate**

All HE PhD students are required to fill a cognate in another discipline at the University. Students should consult their academic advisor regarding their cognate interests and the appropriate courses for their program of study.

Students may not register for more than 4 independent studies over the course of their program. Information regarding program candidacy, doctoral preliminary examination, forming a dissertation committee, holding an oral proposal hearing and scheduling a final defense can be found on the GSE website (http://www.gse.upenn.edu/phd).

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Interdisciplinary Studies in Human Development, PhD**

The doctoral program in Interdisciplinary Studies in Human Development, (ISHD) provides a strong interdisciplinary foundation in developmental theory and research, and prepares students for faculty positions in academia, and careers in research.

The ISHD Ph.D. program combines the study of social, emotional, cognitive, and physical aspects of human development considered within cultural contexts and relevant to social policies. Penn GSE’s commitment to urban education as well as its West Philadelphia setting offers students the opportunity to create a specialized program of study that leads to an enriched understanding of the diverse perspectives of human development across the lifespan. Students create an individualized program of study in close consultation with an academic advisor. Students are encouraged to take an interdisciplinary approach to human development and may take courses in other schools and departments at Penn.

For more information: http://www.gse.upenn.edu/aphd/ishd/phd

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Quantitative Methods, PhD**

The Ph.D. program in Quantitative Methods is designed to prepare students for faculty positions at universities and important responsibilities at research and assessment organizations. Graduates will be prepared to design first rate empirical research and data analyses and to contribute to development of new research methodologies.

Doctoral degree studies include advanced graduate coursework, a research apprenticeship, a Ph.D. Candidacy Examination, and the completion of a doctoral dissertation that represents an independent and significant contribution to knowledge. The research apprenticeship provides students with an opportunity to collaborate with a faculty sponsor on an ongoing basis and to participate in field research leading to a dissertation.

Students who apply directly to the doctoral-level study program following a baccalaureate degree will enroll in the core courses described for M.S.Ed. degree in SMART and the more advanced courses for the Ph.D. degree. This will include the development of independent empirical research projects.

For more information: http://www.gse.upenn.edu/qm/phd

View the University’s Academic Requirements for PhD Degrees (p. 1484).

The Ph.D. degree program in Quantitative Methods requires a minimum of 20 course units or relevant courses and advanced degree accomplishments. A maximum of eight (8) credits from other institutions may be taken into account in reducing this basic requirement where appropriate.
EDUC 777 Structural Equations Modeling (Spring)  1
EDUC 880 Complex, Multilevel, and Longitudinal Research Models (Fall)  1
EDUC 871 Randomized Trials and Experiments (Spring)  1

Total Course Units  20

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Reading, Writing, Literacy, PhD**

The Ph.D. in Reading/Writing/Literacy program prepares scholar-practitioners for positions in research universities and other educational organizations with a primary mission related to furthering knowledge in literacy and literacy education.

Students focus on developing their understanding and expertise in particular aspects of the field (e.g., teacher education, pedagogy and curriculum, leadership, policy, urban education, multicultural education, adult and community based literacy in and out of school, literacy in international contexts, etc.) and in learning to conduct research on critical issues and problems in literacy. Students are encouraged to develop one or more areas of concentration. Students choose electives from across the divisions in GSE and from other departments in the university.

**Teaching, Learning and Teacher Education, PhD**

The Ph.D. and Ed.D. programs in Teaching, Learning, and Teacher Education prepare graduates to serve as researchers and teacher educators in universities and colleges, curriculum developers and evaluators in educational agencies, curriculum specialists in school districts and state departments of education, and instructional leaders and classroom teachers in K-12 schools.

Coursework and research experiences address a range of practice-based and theoretical problems in schools and community settings from sociopolitical, cultural, philosophical, psychological, and historical perspectives. Taking an interdisciplinary stance, faculty and students explore issues of equity, social justice and educational change in a range of formal and informal educational settings. Through their programs of study, students select focal areas such as teaching and learning, research and practice in teacher education, mathematics or science education, and the study of urban education and urban contexts. Applicants interested in the focal area of literacy are encouraged to consider the doctoral program in Reading/Writing/Literacy.

**Other Experiences**

Complete seminars, research projects, and similar conceptualization/content work in the Conceptualization/Content Strand.

Complete work in the Investigation/Inquiry Strand that is divided into Research Apprenticeship and Practicum work, and Dissertation Work. These Experiences can induce seminars, research projects and similar 1/1 work.

A Research Apprenticeship Course is required from second semester of first year forward.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Perelman School of Medicine**

**Biomedical Graduate Studies**

Biomedical Graduate Studies was established in 1985 and serves as the academic home within the University of Pennsylvania for nearly 800 students pursuing a PhD in the basic biomedical sciences, including approximately 150 students pursuing a coordinated dual MD/PhD or VMD/PhD degree program. BGS provides training and administration through seven graduate groups, some of which have distinct subspecialty areas. The Perelman School of Medicine is the home school for BGS, and approximately 500 PSOM faculty members participate in BGS as course directors, research mentors, program leaders, and in other educational roles. Another 150 BGS faculty members have primary academic appointments in the other associated health schools (Veterinary, Dental, or Nursing) or in Arts & Sciences, Engineering & Applied Science, or Wharton. BGS faculty members also include researchers based in associated institutes, including the Wistar Institute and the National Institutes of Health. Consequently, BGS students have the opportunity to learn about virtually any area of modern biomedical research.

For more information, visit http://www.med.upenn.edu/bgs/.

**Mission**

The mission of Biomedical Graduate Studies is to provide each student with a broad-based foundation in a core academic discipline; flexible, interdisciplinary options for scientific and career development; and rigorous research training. Each graduate group has its own academic mission, leadership, and staff, but there is often significant overlap among the groups in respect to faculty membership, courses offered, policies, and procedures. BGS students are admitted with a full-funded fellowship for the duration of their training and may participate in a variety of optional certificate programs and student-run affinity groups for the exploration of academic and professional development interests. To date, roughly 2500 students have obtained a PhD in BGS. Virtually all BGS graduates are employed in fields that make use of their PhD training. The majority of BGS alumni engage in a postdoctoral research period, after which 39% conduct research in academia, 22% conduct research in industry, 8% are engaged primarily in post-secondary teaching, 8% are in communications, and the remainder are based in a variety of related fields, including consulting, policy, patent law, and grants management.

**Biochemistry and Molecular Biophysics, PhD**

The Graduate Group in Biochemistry and Molecular Biophysics (BMB) is devoted to the education and training of doctoral students in quantitative, mechanistic and molecular frontiers of biochemistry and biophysics, broadly conceived. The goal is to produce the next generation of scientists, scholars, educators and leaders in biomedical sciences.

To achieve this goal, BMB starts with a strong relationship with the Department of Biochemistry and Biophysics, combined with a world class, diverse faculty of over 90 members from four institutions, the University of Pennsylvania, the Wistar Institute, and the Children’s Hospital of Philadelphia. Within the University of Pennsylvania, BMB draws on faculty from the schools of Medicine, Arts and Sciences, Engineering, Dental Medicine, and Veterinary Medicine.

BMB offers interdisciplinary training based on a rigorous core curriculum, combined with laboratory rotations, independent studies, and candidacy exam preparation that provides immersive training in laboratory and research skills to equip the students for their independent dissertation research.

**Cell and Molecular Biology: Cancer Biology, PhD**

**Cell and Molecular Biology**

The Cell and Molecular Biology Graduate Group (CAMB) is an interdisciplinary graduate program, providing rigorous training in modern cell and molecular biology, preparing students for leadership careers in biomedical research. Within this integrated program are six discipline areas: Cancer Biology (p. 274); Cell Biology, Physiology,
and Metabolism (p. 275); Developmental, Stem Cell and Regenerative Biology (p. 276); Gene Therapy and Vaccines (p. 277); Genetics and Epigenetics (p. 278); and Microbiology, Virology and Parasitology (p. 279). Program faculty include more than 300 scientists representing 35 departments from the Perelman School of Medicine, the Schools of Arts and Sciences, Dental Medicine, and Veterinary Medicine, Children's Hospital of Philadelphia, the Wistar Institute and Fox Chase Cancer Center. The research efforts of these scientists are diverse in their focus, experimental system, methodology, and represent the leading edge of basic and translational biomedical science.

Students from colleges and universities around the nation and the world are enrolled in the program, selecting one discipline area based on their scientific interests, yet have access to the full breadth of curricular and research opportunities provided by this large and diverse program. Our students participate in core courses in cell and molecular biology, specialized coursework in one or more discipline areas, and original hypothesis-driven thesis research. Upon completion of the PhD, they pursue successful research careers at top academic institutions, in the biotech and pharmaceutical industries, and in other biomedicine-related career paths.

For more information: http://www.med.upenn.edu/camb/

**Cancer Biology**

The Program in Cancer Biology provides students an opportunity to undertake concentrated study of the basic biological processes that underlie the control of cell growth and metabolism, and how such processes are disrupted during the initiation and progression of cancer. The program stresses the importance of fundamental genetic and molecular pathways regulating cell proliferation, differentiation, movement, and survival. Program faculty conduct research in oncogenesis, tumor suppressor genes, cell cycle control, apoptosis, tumor virology, angiogenesis, cell migration/metastasis, and cancer immunology, cancer genetics and epidemiology. Students present in a research-in-progress seminar series and attend participate in the Abramson Family Cancer Research Institute seminar series.

For more information: http://www.med.upenn.edu/camb/

**Cell Biology, Physiology, and Metabolism**

Modern cell biology is a dynamic discipline that integrates multiple fields, including molecular biology, biochemistry, biophysics, microbiology, physiology, developmental biology, cytology and genetics. Cell biologists investigate the basic structural and functional units of life: cells that compose all living organisms. Once reliant primarily on microscopic methods, cell biologists now take advantage of cutting edge methods in ultrastructure, biochemistry, genetics and molecular biology, and utilize a diverse range of model organisms. Program faculty conduct research in cellular metabolism; cell motility, the cytoskeleton, and muscle physiology; intracellular trafficking and organelle function; membrane transport, and signal transduction and cell cycle regulation.

**Cell and Molecular Biology: Developmental, Stem Cell, and Regenerative Biology, PhD**

**Cell and Molecular Biology**

The Cell and Molecular Biology Graduate Group (CAMB) is an interdisciplinary graduate program, providing rigorous training in modern cell and molecular biology, preparing students for leadership careers in biomedical research. Within this integrated program are six discipline areas: Cancer Biology (p. 274); Cell Biology, Physiology, and Metabolism (p. 275); Developmental, Stem Cell and Regenerative Biology (p. 276); Gene Therapy and Vaccines (p. 277); Genetics and Epigenetics (p. 278); and Microbiology, Virology and Parasitology (p. 279). Program faculty include more than 300 scientists representing 35 departments from the Perelman School of Medicine, the Schools of

1 Or other statistics course with approval of the Graduate Group.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Arts and Sciences, Dental Medicine, and Veterinary Medicine, Children’s Hospital of Philadelphia, the Wistar Institute and Fox Chase Cancer Center. The research efforts of these scientists are diverse in their focus, experimental system, methodology, and represent the leading edge of basic and translational biomedical science.

Students from colleges and universities around the nation and the world are enrolled in the program, selecting one discipline area based on their scientific interests, yet have access to the full breadth of curricular and research opportunities provided by this large and diverse program. Our students participate in core courses in cell and molecular biology, specialized coursework in one or more discipline areas, and original hypothesis-driven thesis research. Upon completion of the PhD, they pursue successful research careers at top academic institutions, in the biotech and pharmaceutical industries, and in other biomedicine-related career paths.

For more information: http://www.med.upenn.edu/camb/

### Developmental, Stem Cell, and Regenerative Biology

Students within Developmental, Stem Cell, and Regenerative Biology address key questions in developmental biology, stem cell/ niche interactions, and regenerative biology. The central focus that unites these areas is the compelling drive to understand how tissues are first formed, how they are maintained, and how they can be repaired. Students participate in interdisciplinary training in gametogenesis; embryonic and fetal development; nervous system development and its wiring; the genesis of tissues and organ systems as well as their homeostasis, metabolism and repair; with goal of understanding the basic biology of these processes, as well as their role in disease. Complementing these areas is work on natural and induced Embryonic Stem Cells to understand disease processes in vitro in order to develop cell replacement strategies for therapy. In conducting their research students utilize all tools of the modern genomic era and a wide variety of experimental model systems.

### Cell and Molecular Biology: Gene Therapy and Vaccines, PhD

#### Cell and Molecular Biology

The Cell and Molecular Biology Graduate Group (CAMB) is an interdisciplinary graduate program, providing rigorous training in modern cell and molecular biology, preparing students for leadership careers in biomedical research. Within this integrated program are six discipline areas: Cancer Biology (p. 274); Cell Biology, Physiology, and Metabolism (p. 275); Developmental, Stem Cell and Regenerative Biology (p. 276); Gene Therapy and Vaccines (p. 277); Genetics and Epigenetics (p. 278); and Microbiology, Virology and Parasitology (p. 279). Program faculty include more than 300 scientists representing
35 departments from the Perelman School of Medicine, the Schools of Arts and Sciences, Dental Medicine, and Veterinary Medicine, Children's Hospital of Philadelphia, the Wistar Institute and Fox Chase Cancer Center. The research efforts of these scientists are diverse in their focus, experimental system, methodology, and represent the leading edge of basic and translational biomedical science.

Students from colleges and universities around the nation and the world are enrolled in the program, selecting one discipline area based on their scientific interests, yet have access to the full breadth of curricular and research opportunities provided by this large and diverse program. Our students participate in core courses in cell and molecular biology, specialized coursework in one or more discipline areas, and original hypothesis-driven thesis research. Upon completion of the PhD, they pursue successful research careers at top academic institutions, in the biotech and pharmaceutical industries, and in other biomedicine-related career paths.

For more information: http://www.med.upenn.edu/camb/

Gene Therapy and Vaccines

The Gene Therapy and Vaccines Program focuses on the use of animal and human gene transfer for therapeutic purposes and for vaccination. Program faculty conduct research in basic cell biology, molecular biology, developmental biology, molecular physiology, virology and immunology. While the goals of the research are disease-based with the objective of developing prophylactic and therapeutic applications, student training focuses on a basic understanding of disease pathobiology and achieving efficient and effective gene transfer in humans. Students contribute to research of cystic fibrosis, hemophilia, lysosomal storage disease, inherited blindness, cancer, cardiovascular diseases, and immunologic and infectious diseases. Study of vaccines for prophylactic, as well as therapeutic applications are emphasized. Students participate in research seminar series, as well as present in a bi-weekly research in progress seminar.

Microbiology, Virology, and Parasitology

The Program in Microbiology, Virology, and Parasitology provides students an opportunity to undertake concentrated study in the molecular and cellular biology of viral and bacterial pathogenesis and parasitology. Program faculty conduct research in a broad range of disciplines, including Bacteriology, Emerging Infectious Diseases, Immune Response, Microbial Genomics and Evolution, Parasitology, Tumor Virology, Virology, and Host Microbiome. Viruses, parasites, prions, and bacteria are a major cause of human morbidity and mortality. Disease resulting from HIV, malaria, and tuberculosis are becoming more prevalent. The threat of emerging infectious diseases, such as Zika and West Nile viruses, and bioterrorism also calls for increased research in the area of microbiology. Students study human pathogens, as well as their interplay with host resident microbial populations, learning much about normal cell biology, molecular biology, and immunology, as well as developing strategies for the prevention and treatment of infectious diseases.

### Epidemiology and Biostatistics: Biostatistics, MS

The goal of the MS program is to train students in the basic theory and applications of statistical methods, as applied to problems in the biomedical sciences. The program typically consists of two years of full-time study, including the preparation of a Master’s thesis. Requirements include courses in probability, mathematical statistics, and statistical methods including linear models, longitudinal data analysis, survival analysis, statistical computing, and applied data analysis.

Epidemiology and Biostatistics: Biostatistics, PhD

The PhD program in biostatistics is designed to prepare students to be independent researchers in the development of statistical methodologies and in the appropriate and innovative application of these methodologies to biomedical research problems. In the first five semesters of the program, students complete a series of courses in both theory and applied methodology, engage in individually mentored research experiences, explore statistical collaboration, and complete the qualifications examination. Within this period, students also identify a dissertation research problem and an advisor and present a research proposal as part of the candidacy examination. Students typically defend their dissertations and graduate within five years of matriculation.

**Elective**
¹ Students should take BSTA 699 Lab Rotation if mentor is not yet selected or BSTA 899 Pre-Dissertation Research if mentor has been selected.

**Epidemiology and Biostatistics: Epidemiology, PhD**

The mission of the PhD program in Epidemiology is to train independent researchers in the development and application of epidemiologic methods and to prepare them for positions as scientific leaders in academia and industry. The PhD is a research degree; it indicates the highest attainable level of scholarship, and a commitment to a research career. The PhD does not represent merely the accumulation of course credits, but rather the development and completion of a well-designed and conscientious program of scientific investigation that makes a unique contribution to the field of epidemiology.

### Genomics and Computational Biology, PhD

Genomics and computational biology are now at the center of biomedical research. These disciplines take a holistic approach to ask about the origins, functions, and interactions of whole systems, using both experimental and theoretical work. Therefore, these studies require knowledge, skills, and, most importantly, synthesis and integration of biology, computer science, mathematics, statistics, and engineering.

This synthesis and integration requires a new generation of scientists that thrives in cross-disciplinary research. This can include molecular, cellular, and organismal biology (including genetics), mathematics, statistics, chemistry, and engineering. The goal of the GCB program is to train students that are experts in one or more of these disciplines and well versed in the others. We provide a comprehensive training program in Genomics and Computational Biology that gives students a broad foundation in the biological and quantitative sciences along with practical experience in computational and experimental genomics. The knowledge gained in this program will serve students in their careers as technology progresses.

**For more information:** [https://www.med.upenn.edu/gcb/index.shtml](https://www.med.upenn.edu/gcb/index.shtml)

View the University’s Academic Requirements for PhD Degrees (p. 1484).
**Immunology, PhD**

Recognizing the need to create an environment where researchers could be adequately trained in the multifaceted aspects of immunobiology, Penn became the first medical school to establish a separate degree-granting PhD program in Immunology. The faculty of the Immunology Graduate Group (IGG) are drawn from across the University of Pennsylvania and the University of Pennsylvania Health System, encompassing a broad spectrum of research interests; the IGG has also established a partnership with the National Institutes of Health in Bethesda, MD. The partnership brings to the IGG the extraordinary resources and scientific expertise present at the NIH, one of the largest and most renowned biomedical research centers in the world. Students have the opportunity to interact with NIH faculty in a variety of ways, including conducting a lab rotation or thesis work at the NIH.

At present, there are approximately 80 faculty members in Penn’s Immunology Graduate Group, encompassing a broad spectrum of research studies. Faculty research includes studies on the development and regulation of the immune system, host-pathogen interactions, the fundamental molecular and cellular biology of the immune system, structural studies of immunologically relevant molecules and translational immunology. Research results are being utilized in both experimental models and clinical trials attempting to fight diseases.

### Neuroscience, PhD

Neuroscience is a collaborative and interdisciplinary PhD program that provides training for careers in neuroscience research, teaching and more. Our training program is designed to provide a strong foundation of neuroscience knowledge while at the same time taking into account each student’s strengths, needs and career goals.

Virtually all aspects of traditional neuroscience are reflected in the research programs of the 160 faculty members who participate in NGG training, including computational, systems, cellular and molecular, developmental, behavioral, and cognitive neuroscience, along with the neurobiology of disease. NGG faculty members represent 30 academic departments in the schools of Arts and Sciences, Engineering and Applied Science, Wharton Business, Veterinary Medicine, Dental Medicine, and Nursing, as well as the Perelman School of Medicine.

Pharmacology, PhD

Pharmacological sciences represent an extremely large field of modern science, intertwined with many other biomedical disciplines: cancer and cardiovascular pharmacology, cell signaling, neuropharmacology, pharmacogenetics, pharmacological chemistry, environmental health sciences, and targeted therapeutics. Core courses include Cell Biology, Fundamentals in Pharmacology, Human Physiology, and Medical Pharmacology. Electives are chosen by the student to suit their interests. Pharmacology students may rotate in labs doing very different types of research, to enrich their background and allow un rushed, instructed selection of direction of their future thesis research.

2018-19 Catalog | Generated 02/28/19
School of Arts & Sciences

Graduate Division of Arts and Sciences

Graduate education at Penn has a long and distinguished history, beginning with Penn's first Ph.D. program in 1870. The origins of graduate education in the School of Arts and Sciences can be traced to the establishment of the graduate faculty in 1881 and the awarding of the first Ph.D. in 1889.

Today the Graduate Division of Arts and Sciences is one of nine graduate schools. This SAS Graduate Division, along with the Undergraduate College (http://www.college.upenn.edu) and the Division of Professional and Liberal Education (https://www.sas.upenn.edu/degrees-and-programs/lifelong-learning), comprise the School of Arts and Sciences (https://www.sas.upenn.edu/), the largest of the University's twelve schools (http://www.upenn.edu/programs).

The Graduate Division of the School of Arts and Sciences currently includes over thirty graduate groups and offers the degrees of Master of Arts (A.M.), Master of Science (M.S), Master of Philosophy (M.Phil), and Doctor of Philosophy (Ph.D). The Office of the Graduate Division, located at 3401 Walnut Street, Suite 322A, is the administrative unit which oversees such matters as admissions, records, funding.

The Graduate Division also oversees degree and graduation for all Ph.D. and Master’s students in the nine research-degree granting schools at the University.

Contact procedures:

- Students should contact the Office of the Graduate Division of Arts and Sciences (https://www.sas.upenn.edu/graduate-division/contact) directly to submit applications for admission to one of the graduate programs, to turn in dissertations and Master’s theses, and to make arrangements for the graduation ceremony.

- Graduate groups (https://www.sas.upenn.edu/graduate-division/programs/graduate-groups) are the best initial contact not only for information about program content, but also for assistance with problems related to funding, grades, fulfillment of degree requirements, leaves, and transfers.

- If the event of an academic grievance, The Academic Grievance policy (https://www.sas.upenn.edu/graduate-division/resources/academic-grievance-procedure) describes the procedures in place for currently enrolled students and former students within 3 years after leaving the University.

- Students are directed to the Office of Student Financial Services (http://www.sfs.upenn.edu) for information on loans and to pay late fees, microfilm and copyright fees for the dissertation.

Graduate Division of Arts and Sciences

Mission Statement

Our goal is to train future scholars, teachers, thinkers and social leaders, through the rigors of graduate education. Our doctoral programs aim at developing lifelong skills in pedagogy, critical and analytical thinking, from the humanities, social sciences and natural sciences.

Interdisciplinary nature of our programs encourages our students to engage in a flexible array of coursework and mentorship within the School of Arts and Sciences and in other schools at the university. Our students enjoy the flexibility of pursing dual and joint degrees in SAS and across schools.

This is a part of our investment in excellence through diversity not only in scholarship but also through cultural, social and political experiences at the university.

Graduate Division of Arts and Sciences

Leadership Alliance

The University of Pennsylvania Graduate Division of Arts and Sciences in partnership with the Biomedical Graduate Studies participates in the Leadership Alliance Summer Research Early Identification Program (SR–EIP). The Leadership Alliance is an academic consortium of 32 institutions of higher learning, including leading research and teaching college and universities. The mission of the Leadership Alliance is to develop underrepresented students into outstanding leaders and role models in academia, business and the public sector.

This program offers undergraduates interested in pursuing a PhD the opportunity to work for eight to ten weeks under the guidance of a faculty or research mentor at participating Alliance institutions. The SR–EIP is principally designed to encourage students from groups traditionally underrepresented in the social sciences and humanities including students who identify as African Americans, Hispanic Americans, Native Americans (including Alaska Natives) and US Pacific Islanders, to consider research careers in the academic, public, or private sectors.

For more information, visit https://www.sas.upenn.edu/graduate-division/programs/summer-research-early-identification-program.

Special Academic Registration in GAS

The Graduate Division of Arts and Sciences has three different courses available to dissertation students while studying abroad or participating in an internship. These GAS courses allow the student to remain registered during the research and writing stages of the dissertation. A student conducting dissertation research abroad in a given semester is eligible to register for Dissertation Research Abroad status. Students who must complete an internship as a part of their degree requirement or those awarded the opportunity to conduct research through specific programs to further their research interest may request to register for GAS 993 or GAS 994.

The Graduate Division of Arts and Sciences covers the tuition for students registered for GAS 996, GAS 993 or GAS 994 in years 2 through 8 of the Ph.D. program. Students are responsible for the reduced general fee while registered for any of the SAS courses listed below regardless of their year in the program.

- GAS 996 Dissertation Abroad Status
- GAS 993 Academic Internship
- GAS 994 Clinical Psychology

Students may not be enrolled in GAS registration in the term in which they file for a degree (alternate master’s or Ph.D.). That is, students must be in enrolled in courses or regular dissertation registration in the term in which a degree is earned. Students in the Graduate Division of Arts and Sciences can register for a maximum of 4 semesters of Dissertati

Africana Studies, PhD

The past twenty years have witnessed two dominant but opposing approaches to the study of the interconnections between Africa and the African Diaspora. Both seek to provide alternatives to traditional models of Africana Studies. The Afrocentric model has tended to focus on historical Africa, particularly the great civilizations of the African...
past. It has given little attention to the Diaspora, except to those aspects of black culture that reflect a continuum or retention of elements of certain African (specifically West African) cultures. The second model may best be described as a Black Atlantic approach; it has given little attention to the African continent, but has focused on persons of African descent throughout the Western world. This approach is especially concerned with identity formation, hybridity, syncretism, and creolization. Our pedagogical focus neither romanticizes nor ignores historical and contemporary Africa. It seeks to break current conceptualizations of the African Diaspora that only consider West Africa, Europe, North America, the Caribbean, and Brazil. While these areas will continue to be important, we hope to expand an understanding of Diaspora that includes all of Spanish speaking Latin America, East Africa, Asia, and the South Pacific as well.

This program insists that African peoples, as they have moved into different geopolitical circumstances, have developed and maintained a plurality of political strategies which cut across (but are also influenced by) a variety of religious, national, and cultural boundaries. By working to complicate and particularize what we know as "African identity," we hope to re-imagine the ways that African and African descendant peoples have worked to establish and maintain a coherent set of cultural and symbolic practices.

Our approach is in conversation with disciplines in the humanities and social sciences, but differs from them in the conceptualization of an interdisciplinary methodology. In other words, while we encourage in-depth knowledge of and training in traditional disciplines, one of the major intellectual goals of the program is the development of an interdisciplinary method and vocabulary for the study of the interconnections between Africa and peoples of African descent around the globe.

For more information: https://africana.sas.upenn.edu/department/graduate/phd-program

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Curriculum
The total course units required for graduation is 14.

Three Track Approach
The three tracks of concentration in African Studies, African American Studies, or Diaspora Studies will allow students to select both a topical and an area studies sub-field. Hence, for example, a student who wishes to study public policy can do so while focusing attention on the experiences of African peoples in specific locations in the United States, South America, Africa, or the Caribbean. Prospective students must identify which track they will pursue during the first year of study; however, double track concentrations are welcomed and encouraged.

AFRC 710 Political Economy and Social History of Africa and the African Diaspora

Second Tier Courses
Select two course units in methodology from the following:

- Ethnographic Methods
- Quantitative Methods
- Methods course specific to an existing graduate group

Program Milestones
- Complete the Core Program
- Pass an examination in a language of library research by October of the second year (for students pursuing research in a language other than English)
- Complete 14 course units (includes five Core and two Second-Tier Courses)
- Complete two years introduction to an African language (for students who select the African Studies track)
- Complete a 30-book exam by the end of the second year (for PhD students only)
- Pass the Final Oral Examination, based on a draft proposal for doctoral research and written statements on four related fields of specialization (two major and two minor)
- Submit a Dissertation that is acceptable to both the graduate group and the Graduate Council of the Faculties

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Ancient History, PhD
The Graduate Group in Ancient History is an interdisciplinary, cross-departmental program that encompasses the study of the ancient history of the Near East and the Mediterranean Basin, from the origins of civilization in the fertile river basins of the Tigris and the Euphrates to the rise of Islam and the emergence of the so-called barbarian successor kingdoms.

The expertise and interests of members of the group are diverse and heterogeneous. What unites us is the enterprise of building historical narratives from the fragmentary and diffuse textual and material evidence available to us. Students admitted to the Graduate Group in Ancient History will receive training in the political, intellectual, cultural, socio-economic, and religious history of at least two discrete ancient societies as part of their preparation for the degree of Doctor of Philosophy.

In addition to course work, candidates are expected to participate in seminars, act as Teaching Assistants and/or teach their own classes. In order to progress to dissertation stage, students must, in addition to passing their 20 courses, fulfill the following examination requirements: Modern Languages Examination, Qualifying Examination & the Preliminary Examination. Following completion of three years of coursework and all examinations, a student will be advanced to dissertation stage.

Applied Mathematics and Computational Science, PhD

Advanced mathematics is continually finding new applications in natural science, biology, engineering, medicine, and social sciences, and these fields are providing new directions for the development of mathematics itself. The graduate group in Applied Mathematics and Computational Science takes a very broad view of mathematics and its applications in our mission to train mathematical scientists for careers in academia, research and industry.

In addition to providing a rigorous conceptual foundation for the application of mathematics, our diverse faculty gives AMCS students the opportunity to work in a "wet lab" environment where mathematics is actually being applied to real world problems. The AMCS graduate groups...
offer a full program of study in mathematics and its applications, offering both doctoral (Ph.D) and masters (A.M.) degrees.

Art and Archaeology of the Mediterranean World, MA

The Interdepartmental Graduate Group in Art and Archaeology of the Mediterranean World (AAMW) offers a terminal M.A. program in Mediterranean Archaeology. This program is designed to deliver intensive intellectual and practical training in a range of skills in archaeology to students wishing to be immersed in the study of the visual and/or material culture of the Mediterranean, broadly defined — including, for example, the ancient Near and Middle East and extending from the third millennium BCE to the Late Antique, early Byzantine, and early Islamic periods. The program also aims to facilitate student engagement with the University of Pennsylvania Museum of Archaeology and Anthropology (aka “Penn Museum”). Upon receiving their M.A., Penn graduates will be well positioned to gain admission to prestigious Ph.D. departments in the US and overseas; others might seek curatorial positions in national and local museums, teaching positions in secondary schools, or supervisory positions in CRM firms. Faculty closely mentor and work with M.A. students to achieve the students’ goals and to prepare them for their desired career path.

The M.A. Program is a terminal degree program lasting two years. During this time students have full access to Penn’s outstanding faculty and resources such as the Penn Museum, as well as all of the courses offered by AAMW and other programs and departments at Penn, and those offered at neighboring universities with which Penn has reciprocal arrangements. Students admitted to the Mediterranean Archaeology M.A. program should not expect to receive admission after the M.A. into the AAMW Ph.D. program. Students admitted to the M.A. program normally do not receive financial aid from the University of Pennsylvania, although they may of course apply for outside awards to support their graduate study.

¹ Competency in one ancient language, relevant to the student’s preferred cultural focus (Greek, Latin, Akkadian, etc.), to be determined in consultation with the student’s advisor. Competency is measured by an examination or by taking at least one course in that language at the 400 (advanced undergraduate/graduate) level or above with a final grade of “B” or better.

² Competency in one modern foreign language of international scholarship, typically German or French; this language will be determined in consultation with the student’s advisor. Competency is measured by an examination or by passing one of Penn’s summer academic reading courses after the first year.

³ All students are expected to participate in an archaeological fieldwork project during the summer after the first year. This fieldwork would normally take place in the Mediterranean (broadly defined), though exceptions might be made. The requirement to engage in fieldwork during the summer after the first year might also be waived for students with substantial prior archaeological field experience. Students can expect to bear the cost of the fieldwork.
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Art and Archaeology of the Mediterranean World, PhD

The Graduate Group in the Art and Archaeology of the Mediterranean World trains students for careers in the art and archaeology of Classical and Near Eastern Civilizations. Drawing on the vast resources of the University of Pennsylvania Museum of Archaeology and Anthropology, AAMW incorporates fieldwork, museum internships, and university instruction into a flexible interdisciplinary program leading to the M.A. and Ph.D. All students accepted into the program are fully funded for a period of at least five years.

For more information: http://www.sas.upenn.edu/aamw/

View the University's Academic Requirements for PhD Degrees (p. 1484).

Curriculum

The total course units required for graduation is 20. A minimum of 12 course units must be taken at the University of Pennsylvania.

1. Graduate students are expected to devote the majority of summers to archaeological fieldwork, or laboratory or museum work if appropriate.
2. Graduate students serve as Teaching Assistants during the four semesters of their second and third years in the program.
3. Consult the AAMW website (http://www.sas.upenn.edu/aamw) for details on required languages and how the requirements may be fulfilled.

Biology, PhD

The Biology Graduate Program represents many areas of biology, and interactions with a diverse group of colleagues provide opportunities to broaden every student's thinking and make connections between different fields and scientific approaches. Areas of research include microbiology, cell biology, development, physiology, neuroscience, animal behavior, plant biology, genetics, computational biology, evolution, ecology and biodiversity.

Each entering graduate student has the freedom to pursue topics ranging from the behavior of molecules to that of cells, organisms, genomes, and ecosystems. We encourage students to get broad exposure through lab rotations with any faculty member in the Biology Graduate Group. As students focus on more specific research interests, they tailor their graduate education accordingly, choosing courses from different departments and schools at Penn as appropriate.

Students complete most of their course work and lab rotations in the first year and then start their thesis research in the second year while completing their teaching requirement and preparing for their candidacy exams. Students are then fully focused on thesis research by the end of the second year. Students still have the option of taking additional courses in advanced years in order to enhance their graduate research.

**Chemistry, PhD**

The Graduate Program is designed for students who wish to earn a Ph.D. in Chemistry while undertaking cutting edge research. The program provides students with the necessary theoretical background and hands-on training to become independent and highly successful scientists. Graduate students achieve mastery of advanced chemistry topics through courses in different subdisciplines.

Graduate students conduct research in the fields of bioinorganic chemistry, bioorganic chemistry, chemical biology, biophysical chemistry, bioinformatics, materials science, laser chemistry, health related chemistry, structural and dynamical studies of biological systems, X-ray scattering/diffraction, NMR spectroscopy, applications of computing and computer graphics, as well as investigations of chemical communication and hormone receptor interactions.

**For more information:** https://www.chem.upenn.edu/content/phd-program

### Classical Studies, PhD

The Graduate Group in Classical Studies trains students in the languages, literatures, and history of the Greek and Roman Classical world. Students are encouraged to combine this work with the investigation of such related fields as Art History and Archaeology, Comparative Literature and Literary Theory, Linguistics, Medieval Studies, Philosophy, Religious Studies, and Women’s Studies.

Penn offers superb resources for the study of classical antiquity. We have a world-class faculty, who specialize in a wide range of sub-fields.
within the discipline, and who take seriously the responsibility of training
graduate students for careers in and beyond academia.

All candidates for the Ph.D are required to teach for at least two
semesters under the supervision of the Graduate Group. In practice,
students normally teach four semesters, during the second and third
years of the program.

All candidates for the Ph.D must take a series of exams including Modern
Language Examinations, the Qualifications Examination in Greek and Latin translation, and the Preliminary Examination on
the literary history of Greece and Rome, along with special topics chosen
by the student. The dissertation is normally completed by the end of the
student's fifth year in the program.

Comparative Literature, PhD
The Ph.D. Program in Comparative Literature covers the study of
narrative, poetry, representation and cultural history. The Program
enables students to engage rigorously with critical theory. We draw our
faculty from many disciplines: the languages and literary histories of
Europe, the Americas, the Middle East, East Asia, and South Asia: history,
art history, religion, ethnology, folklore, political science, Africana
studies; Jewish studies; Gender and Sexuality studies; sociology;
communications.

We provide a structured and challenging program in which graduate
students can combine the careful study of a particular literary tradition
with interests in other languages and disciplinary approaches. The broad
interests that our students bring to their projects include the history of
philosophy, film and media studies, technology and the history of
science, and area studies. Students work in varied historical periods, from
antiquity and the Middle Ages to the postmodern, and in diverse language
fields.

Comparative Literature at Penn has a dynamic intellectual community.
Our signature event is our public colloquium series, Theorizing, which is
organized primarily by the graduate students. Our students and faculty
are active participants in the many interdisciplinary lecture and seminar
series at Penn, including the Medieval Renaissance Seminar, the History
of Material Texts Seminar, the Wolf Humanities Center, the Latitudes
Seminar, and several student reading groups.

For more information: http://ccat.sas.upenn.edu/Complit/graduate.htm

View the University’s Academic Requirements for PhD Degrees (p. 1484).
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Criminology, MS**

Penn’s unique Master of Science in criminology program aims to shape criminal justice “change agents,” preparing students to spend their career applying criminological research in public and non-profit domestic and international organizations. It is also designed for those research-oriented students who are preparing themselves for graduate or professional education at leading research universities.

Penn’s unique interdisciplinary program combines solid academic training at one of the nation’s top research universities with practical knowledge that can enhance careers in research and in criminal justice-related policy and practice settings. Students also gain knowledge of the criminal justice system through meeting weekly with guest visitors who work in the justice system. Students work under a faculty member on a semester-long crime analysis project, using their analytical and research skills, to address a specific crime problem. Students present their final masters’ projects during a poster session at Penn’s Criminology Day in April, through an oral defense of their project, and as a written research article.

For more information: [http://crim.sas.upenn.edu/graduate/master-science-criminology](http://crim.sas.upenn.edu/graduate/master-science-criminology)

View the University’s Academic Requirements for Research Master’s Programs (p. 1490).

**Electives**

1 CRIM 604 is a required year-long, one unit course. Students will receive the 1 unit credit in the spring semester.

**Criminology, PhD**

Penn’s highly interdisciplinary Ph.D. in criminology combines the traditional concerns of criminologists with concepts, theories, and empirical research from a wide variety of academic disciplines. The program seeks to produce scholars of unusual breadth who can work creatively in academic or policy settings.

Working closely with faculty, students are encouraged to design their own curriculum and begin research very early in their graduate education. That curriculum will include several core courses taken in the first and second year. These include two courses in criminological theory, two courses in criminal justice policy, and two semesters of graduate level statistics.

For more information: [http://crim.sas.upenn.edu/graduate](http://crim.sas.upenn.edu/graduate)

View the University’s Academic Requirements for PhD Degrees (p. 1484).

A minimum of 9 course units are required.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

A student who enters the Ph.D. program with a Bachelors degree will usually take 3 course units in each semester in their first two years and must complete all course requirements by the end of their third year. All students must take 3 CU’s in each semester to remain registered as full-time students.
After having completed the substantive, class-based course requirements, they normally fulfill remaining CUs by registering for CRM 999 Independent Study and Research. They will also have passed the Candidacy Examination by the end of their second year. Students who enter with a Master’s degree or other transfer credit may satisfy the formal course requirements more quickly. However, the Graduate Group Chair in conjunction with the student’s research supervisor has the flexibility to establish the optimal requirements for students.

The customary maximum load for a Ph.D. student is four course units each semester; exceptions for a fifth course unit may be made in extraordinary cases upon approval of the Graduate Dean. The Graduate Group may establish examination requirements in addition to the University’s standards.

### Demography, PhD

Penn Demography trains independent researchers who are prepared to fill leading roles in social demography and population analysis at a variety of organizations and are well versed in the growth, structure, health and well-being of human populations. Graduates have a firm grasp of both the substance and methods of study in the core areas of demography and population sciences (mortality, fertility, migration, population aging, and demographic — economic interrelations) from both a domestic and international perspective.

The Graduate Group in Demography is responsible for training students through course work and supervised research. The Graduate Group in Demography is composed of faculty members with backgrounds in demography, sociology, economics, anthropology, nursing, and medicine.

For more information: [http://demog.pop.upenn.edu/](http://demog.pop.upenn.edu/)

View the University’s Academic Requirements for PhD Degrees (p. 1484).

### Required Courses

### Electives

Select eight course units | 8 |

**Total Course Units** | 20 |

### Program Milestones

- Satisfactory completion of 20 course units
- Satisfactory completion of a first year research paper
- Satisfactory completion of a second year research paper
- Satisfactory completion of the MA Exam administered in May in the end of the student’s first year in the program
- Satisfactory completion of the PhD Examination administered in May in the end of the student’s second year in the program
- Successfully complete a dissertation on an approved topic. To remain in good standing students should establish a dissertation committee and defend their dissertation proposal before the beginning of their fourth year in the program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Earth and Environmental Science, PhD

The mission of the Graduate Group of the Department Earth and Environmental Science is to produce independent, well-rounded scientists...
that are exceptionally competent in their area of specialization and capable of understanding, solving, and communicating complex and interdisciplinary scientific issues.

The graduate group guides research leading to Doctoral degrees in the range of fields that encompass our research interests:

- Biogeochemistry (terrestrial and ocean)
- Environmental Geology
- Geophysics
- Paleobiology
- Surficial processes

Dissertation Research and Defense

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**East Asian Languages and Civilizations, MA**

The Graduate Group in EALC administers a Masters of Arts degree in the humanistic study of East Asia: China, Japan, Korea, and Mongolia. The degree is both an entry point into higher-level graduate study and preparation for careers in teaching, administration, and the public and private sector. This degree is extremely valuable to students who plan to seek employment in East Asia. The program offers flexibility for students who desire to combine this degree with another Master of Arts at Penn or who would like to pursue the degree on a part-time basis. The Master’s in EALC focuses on humanistic disciplines such as literature, history, philosophy, religion, art, and archaeology of East Asia. We encourage training in the more rigorous classical forms of Chinese, Japanese, Korean, and Mongolian in addition to communicative proficiency in modern forms of these languages.

**East Asian Languages and Civilizations, PhD**

The cross-disciplinary Ph.D. program in East Asian Languages and Civilizations is designed to train graduate students who can teach and conduct independent research in a variety of humanistic disciplines...
using Chinese, Japanese, Korean, or Mongolian, or occasionally other languages of East Asia. Our region is defined roughly as China, Japan, Korea, Mongolia, and Inner Asia. Before completion of the degree, each student is required to:

1. master the requisite linguistic tools and research methods;
2. demonstrate a comprehensive knowledge of the history and culture of his or her area of expertise;
3. gain an in-depth expertise in one or more period and/or subject areas; and
4. attain the necessary level of training in his or her humanistic discipline.

For more information: https://www.sas.upenn.edu/ealc/phd-degree

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Economics, PhD
The graduate economics program at Penn is a Ph.D. program administered by the Graduate Group in Economics, which consists of the faculty of the Department of Economics, and some of its secondary appointments in the Wharton School and the School of Arts and Sciences. A master’s program in Economics is not offered at the University of Pennsylvania.

The program trains students to conduct outstanding research in economics. All major areas of economics are covered, with particular strengths in theoretical and empirical microeconomics, and in modern macroeconomics. Graduates of the program obtain positions at leading universities, research institutions, and government agencies around the world.

Students in this program first acquire a thorough knowledge of economic theory and econometric methods before they begin their own research. They meet a series of requirements during their first years in the program, and thereafter devote most of their time to the writing of a dissertation. The median length of time required for completion is 5.25 years. Almost all students are supported by combinations of fellowships, research assistantships, and teaching assistantships during at least their first five years of study.

For more information: http://economics.sas.upenn.edu/graduate-program

English, MA
The Department offers full-time M.A. and Ph.D. programs. Comprehensive in their range of specializations, these programs are intellectually dynamic and rigorous. Our M.A. program offers students a solid foundation in the professional study of literature and culture, and our Ph.D. program prepares students for full participation in the profession as scholars and teachers of English and American literature, broadly conceived. Over seventy graduate students enjoy close interaction with thirty-eight internationally renowned faculty members in the Department who teach and publish on a large number of historical periods, theoretical areas, and methodological approaches.

Our Department culture reflects our commitment to fostering an inclusive environment that is at once challenging and supportive. We recognize that success in our profession requires more than taking courses, passing exams, writing a dissertation, attending conferences, and publishing articles; it also involves the recognition that we produce new knowledge collectively. Accordingly, we consider our graduate students full members of the Department and encourage everyone to take an active role in the intellectual and social community of the Department as well as other programs and departments across campus.

**German Languages and Literatures, PhD**

The Department of Germanic Languages and Literatures at Penn takes a forward-looking perspective on developments in the field. In contrast to many Ph.D. programs in German, we provide a solid grounding in the entire German literary tradition. At the same time, we vigorously pursue interdisciplinary study informed by the latest methodological and theoretical movements, and provide state-of-the-art pedagogical training and instruction.

Our Department has particular strengths in gender and sexuality, intermediality, history of the material text, German-Jewish studies, translation theory, cinema studies, environmental humanities, and pedagogy. Our students are trained with an eye to their career objectives. All of our students receive a full five-year Benjamin Franklin Fellowship package, which includes guaranteed summer funding and significant mentored teaching experience.

All candidates must complete 20 course units by the end of year 3. Our curriculum toward a Ph.D. in Germanic Languages and Literatures details steps on the five-year path to degree. By the end of spring term of year 3, students shall have completed a successful prospectus meeting with their dissertation committee. In years 4 and 5, students work on the dissertation. Students teach in years 2 and 3, although they may choose to gain additional teaching experience. Students are encouraged to spend at least one year (typically year 4) at an academic setting in a German-speaking country.

**For more information:** [http://www.sas.upenn.edu/germanic/graduate](http://www.sas.upenn.edu/germanic/graduate)

#### Year 1

**Fall**

- Anchor Course
- Literary theory course
- Select 2 electives

**Spring**

- Anchor Course
- Pedagogy Seminar
- Stylistics and Methods
- Select 1 elective
- Qualifying Paper
- Oral Exam

#### Year 2

**Fall**

- Anchor Course
- Select 1 elective
- Pedagogy Roundtable
- Research Workshop

**Spring**

- Anchor Course
- Select 1 elective
- Pedagogy Roundtable
- Research Workshop
- 50-book exam

#### Year 3

**Fall**

- Select 2 electives
- Research Workshop
- Conference planning
- Field Exam

**Spring**

- Select 1 elective
- Research Workshop
- Conference Planning
- Portfolio Assessment
- Prospectus tutorial
- Dissertation Prospectus

#### Years 4 and 5

- Dissertation
1. Students shall take 4 anchor courses in 5 periods. The five periods are:
   - medieval (to roughly 1450)
   - early modern (to roughly 1789)
   - the long 18th century (roughly 1648-1806)
   - the long 19th century (roughly 1789-1914)
   - the long 20th century (roughly 1871-today)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**History and Sociology of Science, PhD**

The Department of History and Sociology of Science at Penn offers a distinctive Ph.D. program focusing on the social, historical, and cultural study of science, medicine, technology, and the environment. Our faculty and student interests span the early modern period to contemporary times, covering regions from around the globe. The city of Philadelphia offers a vibrant range of scholarly resources, including world-class archives, museums, libraries, universities, and learned societies. The Department has trained some of the most successful scholars practicing in the field today; in addition to faculty positions, many of our graduates also go on to successful careers in public history, publishing, policy, and consulting. Our Department is known for its intellectual rigor, innovative scholarship, and strong sense of camaraderie.

For more information: http://hss.sas.upenn.edu/graduate/phd-program

View the University’s Academic Requirements for PhD Degrees (p. 1484).

**Required Courses**

A minimum of 18 course units are required, 14 of which must be HSSC courses.

<table>

</tr>
<tr>
<td>Pre-1850 Developments Seminar</td>
</tr>
</tbody>
</table>

1. Should take in the Fall semester of Year 1.
2. Must receive an A- or higher.
3. Or a research paper dealing with the period before 1850 even if written for a course that includes materials from a later period.

**Program Milestones**

- Successful passing of the formal Second Year Evaluation (as required by the University).
- Demonstration of proficiency in two languages, a requirement that must be met before the Orals Examination may be scheduled;
- Successful passing of the Orals Examination (usually by the end of your third year), demonstrating mastery of the literature in three special sub-fields, each jointly worked out by the student with a faculty member;
- A dissertation proposal approved by a student’s adviser within six weeks of passing the Orals;
- At least two years (4 semesters, or 4 courses) of mentored teaching experience.
- A dissertation, submitted to and accepted and approved by the student’s dissertation committee, usually consisting of three members of the faculty, in accordance with University regulations.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**History of Art, MA**

The History of Art Department offers a Master of Arts degree for students wishing to deepen their knowledge of art and the critical methods employed in the study of art.

Upon receiving their M.A., Penn graduates have gone on to hold curatorial positions in national and local museums, auction houses, and galleries. Students have also used their M.A. as a stepping stone to Ph.D. programs, receiving admission to many prestigious Ph.D. departments in the US and overseas. Faculty closely mentor and work with M.A. students to achieve the students’ goals and to prepare them for their desired career path.

The M.A. Program is a terminal degree program lasting two years. Students admitted for the M.A. do not automatically receive admission after the M.A. into the Ph.D. program; students wishing to continue must apply to the Ph.D. program. Students admitted for the M.A. normally do not receive University Fellowships, although they may apply for outside awards to support their graduate study.

History of Art, PhD

The doctoral program at the University of Pennsylvania provides students with broad training in the history of art and its critical approaches, yet also focused training in their selected fields. Students completing the Ph.D. are well prepared for teaching positions at the university and college level and for curatorial positions in museums and galleries. Faculty work closely with Ph.D. students to outline an appropriate course of study and mentor students while preparing them for assistantships, curatorial internships, and other career orientations.

History, PhD

The Graduate Program in History at the University of Pennsylvania has a long tradition of distinction. Beginning as one of the first programs in the United States to offer doctoral study in history, (the first Ph.D. in History was conferred in 1891); the Department continues to pioneer new areas of scholarship. In the last twenty years, faculty members of the departments in American, European, and World History have assumed a leading role in their fields. Today, few departments in the country match Penn’s Department of History in coverage and depth across the entire range of history from medieval times to the present.

Linguistics, MA

The Master’s degree provides a grounding in the core areas of linguistic theory, supplemented by courses chosen according to the student’s specific interests. The Graduate Group in Linguistics does not provide fellowships for pursuit of a master’s degree, so students must bring funding from another source.

Applications are considered only from applicants who demonstrate the appropriate academic background as well as interests that match the research pursued at Penn, which can be determined by investigating the current work of the faculty and students. Please consult with the graduate chair before submitting an MA application to ensure that you fit these requirements.

For more information: https://www.ling.upenn.edu/graduate/ma

View the University’s Academic Requirements for Research Master’s Programs (p. 1490).

Curriculum

The total course units required for graduation is 11. A minimum of 8 course units must be taken at the University of Pennsylvania.

Electives
Select 7 course units in consultation with a faculty advisor. 7

Total Course Units
11

In addition to successful completion of course work, other requirements include

- A thesis written under the supervision of a faculty committee. The thesis can be based on previous coursework. The committee consists of at least two faculty members, the adviser and a reader, who both must also be members of the graduate group.
- An oral examination based on the thesis. This consists of a private meeting with the committee, during which the student answers questions on the content of the thesis.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Linguistics, PhD

The Ph.D. program in Linguistics at Penn embraces a wide range of theoretical specializations and methodologies. What unites them is a commitment to careful and explicit formal analysis of the human capacity for learning and using language.

The core of our program is the formal generative tradition, but we encourage the cross-fertilization that results from the confrontation of empirical and theoretical perspectives on language structure. By our close collaboration with other programs (such as computer science and psychology) we promote an awareness of the broad view of language that interdisciplinary study induces. In addition to broad training, students are offered and expected to master the methods and results of their chosen areas of concentration in linguistics as a prerequisite to fruitful engagement in dialogue with others, both within and outside the program.

Mathematics, M.Phil

The Master of Philosophy in mathematics is a terminal professional degree that is designed for students who want to go beyond the usual masters degree. Entering students should have previously completed either an undergraduate or a regular masters program in mathematics. The degree is typically earned one or two years after beginning to take courses that go beyond the regular master of arts degree.

Students who already have a regular masters degree take six additional graduate courses numbered 600 or above to earn an M.Phil. degree. Students who enter the program with just an undergraduate degree will fulfill the usual masters course requirements plus an additional six (for a total of 14 courses). Students in this program also need to pass the Masters Preliminary Exam and an oral exam in one area of mathematics, and to submit and defend an M.Phil. thesis (which is somewhat longer and more in depth than a thesis in the usual masters program).

Mathematics, PhD

The Department of Mathematics of the University of Pennsylvania offers a full Graduate Program in Mathematics, conferring the degrees of Master of Arts (A.M.), Master of Philosophy (M.Phil.), and Doctor of Philosophy (Ph.D.). The educational aim of this program is to provide well-rounded mathematical training for a career of research and teaching in mathematics, as well as for other careers which use advanced mathematics in a substantial way. Students are offered the possibility of a dual Ph.D. degree in Mathematics and a Masters degree in other subjects, including physics and computer science.

This program covers a variety of areas, including analysis, geometry-topology, algebra, mathematical physics, combinatorics, logic, and probability. See our Graduate Mathematics Page and our Math Department home page for detailed information about other aspects of
this program and of the Penn Math Department as a whole, including its
colloquia, seminars and lecture series, and the research interests of the
faculty.

Full time Ph.D. students receive financial support for five years, at least
two of which are in the form of a fellowship.

In addition, Penn offers an interdisciplinary graduate program in Applied
Mathematics and Computational Science (p. 292), for which there is
separate application process.

Music: Ethnomusicology, PhD

Ethnomusicology at Penn reflects the interdisciplinary nature of the field, combining approaches from anthropology, musicology, folklore, literary
theory, religious studies, linguistics, critical theory, and gender studies in
order to interrogate the webs of meaning within which music resonates.
Faculty are pursuing research centrally concerned with diaspora, jazz in
world perspective, post-coloniality, tourism and mobility studies, applied
ethnomusicology, and popular music studies. Areas of expertise for our
county encompass the Americas, Western Europe, Africa, and the Indian
Ocean. Ethnomusicology seminars are often extended into practical,
fieldwork-based projects in West Philadelphia—initiatives supported by
the University's Netter Center for Community Partnerships (projects have
included exploring gospel music in several West Philadelphia churches
and documentary fieldwork in a West Philadelphia mosque).

The Department of Music at the University of Pennsylvania offers
Ph.D. programs in three other fields of study besides Ethnomusicology.
Musicology, Theory, and Composition. The goal of the graduate program is
to enunciate these disciplinary distinctions, but rather to seek out
productive and innovative means of placing them in dialogue with each other.
This orientation toward holding all of the sub-disciplines in view is
reflected in the graduate curriculum as well as in the multiple colloquium
series that animate departmental life. The curriculum is designed with
flexibility in mind—designed specifically to offer students the freedom
to craft a path of study that best addresses the research needs and
methodological concerns of their particular dissertation projects. It
combines the wide range of courses offered by the world-class faculty in
the music department with the possibility of enrolling in seminars in
other Penn departments and taking classes at consortium schools such as Princeton, Yale, and Columbia. Our colloquium series provides
another means of engaging in both disciplinary and interdisciplinary
colleagues. In addition, workshops, public performances, and working
papers presented by graduate students, post-doctoral fellows and faculty
offer a wide range of perspectives on musical practice and scholarship,
nothing variously on public lives in music, current research, craft and
compositional issues.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Music: History of Music, PhD**

The graduate program in the History of Music at the University of Pennsylvania serves students who intend to conduct cutting-edge research, produce high-quality scholarship, and develop teaching and professional skills in order to pursue academic positions in music studies; it also serves those who want to consider career opportunities beyond academia in both music and non-music domains.

The Department of Music at the University of Pennsylvania offers Ph.D. programs in three other fields of study besides Musicology, Composition, Theory, and Ethnomusicology. The goal of the graduate program is not to entrench these disciplinary distinctions, but rather to seek out productive and innovative means of placing them in dialogue with each other. This orientation toward holding all of the sub-disciplines in view is reflected in the graduate curriculum as well as in the multiple colloquium series that animate departmental life. The curriculum is designed with flexibility in mind—designed specifically to offer students the freedom to craft a path of study that best addresses the research needs and methodological concerns of their particular dissertation projects. It combines the wide range of courses offered by the world-class faculty in the music department with the possibility of enrolling in seminars in other Penn departments and taking classes at consortium schools such as Princeton, Yale, and Columbia. Our colloquium series provides another means of engaging in both disciplinary and interdisciplinary conversations. In addition, workshops, public performances, and working papers presented by graduate students, post-doctoral fellows and faculty offer a wide range of perspectives on musical practice and scholarship, focusing variously on public lives in music, current research, craft and compositional issues.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Music: Musical Composition, PhD

The Ph.D. program in Composition stresses training in the craft of composition, contemporary repertory, and theory and analysis. Instruction in composition comprises much of the course requirement; such instruction takes the form of private lessons. Participation in the concert life of the department and attendance at Composers’ Forum events complement that instruction. Students are assigned to particular instructors for composition lessons by the Director of Graduate Studies on the advice of the composition faculty. Composition instructors are assigned on a rotating basis to assure that all students are exposed to a variety of approaches and have the opportunity to work with each member of the composition faculty during the period of coursework.

The Department of Music at the University of Pennsylvania offers Ph.D. programs in three other fields of study besides Composition: Musicology, Theory, and Ethnomusicology. The goal of the graduate program is not to entrench these disciplinary distinctions, but rather to seek out productive and innovative means of placing them in dialogue with each other. This orientation toward holding all of the sub-disciplines in view is reflected in the graduate curriculum as well as in the multiple colloquium series that animate departmental life. The curriculum is designed with flexibility in mind—designed specifically to offer students the freedom to craft a path of study that best addresses the research needs and methodological concerns of their particular dissertation projects. It combines the wide range of courses offered by the world-class faculty in the music department with the possibility of enrolling in seminars in other Penn departments and taking classes at consortium schools such as Princeton, Yale, and Columbia. Our colloquium series provides another means of engaging in both disciplinary and interdisciplinary conversations. In addition, workshops, public performances, and working papers presented by graduate students, post-doctoral fellows and faculty offer a wide range of perspectives on musical practice and scholarship, focusing variously on public lives in music, current research, craft and compositional issues.

Music: Theory of Music, PhD

Music Theory at Penn focuses on continental philosophy and criticism, listening and ethics, the history of theory in modernity, the anthropology of the senses, aesthetics and politics, sound art, urban sound, sound media and technologies, and techniques. The program displaces the typical focus on how music is constituted, whether at the level of universal system or particular work, towards the ways in which listening is constituted in various practices and structures of thought.

The Department of Music at the University of Pennsylvania offers Ph.D. programs in three other fields of study besides Theory: Ethnomusicology, Musicology, and Composition. The goal of the graduate program is not to entrench these disciplinary distinctions, but rather to seek out productive and innovative means of placing them in dialogue with each other. This orientation toward holding all of the sub-disciplines in view is reflected in the graduate curriculum as well as in the multiple colloquium series that animate departmental life. The curriculum is designed with flexibility in mind—designed specifically to offer students the freedom to craft a path of study that best addresses the research needs and methodological concerns of their particular dissertation projects. It combines the wide range of courses offered by the world-class faculty in the music department with the possibility of enrolling in seminars in other Penn departments and taking classes at consortium schools such as Princeton, Yale, and Columbia. Our colloquium series provides another means of engaging in both disciplinary and interdisciplinary conversations. In addition, workshops, public performances, and working papers presented by graduate students, post-doctoral fellows and faculty offer a wide range of perspectives on musical practice and scholarship, focusing variously on public lives in music, current research, craft and compositional issues.

**Curriculum**

A minimum of 12 course units are required for graduation.

- Coursework
- Reading proficiency examination in one modern language of scholarly research
- MA Final Exams (three)
  - One exam on mastery of a language in which primary sources are written
  - Two exams selected from two of the following three groups:
    - Group 1: Pre-modern Arabic Literature and Modern Arabic Literature
    - Group 2: Pre-modern Middle East history and Modern Middle East history
    - Group 3: Islamic thought
- Thesis or two research papers

Some MA students apply for NELC’s PhD program. However, admission to the MA program or successful completion of the MA does not provide a guarantee of admission to the PhD program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Near Eastern Languages and Civilizations: Arabic and Islamic Studies, PhD**

NELC’s PhD program in Arabic and Islamic Studies offers advanced study of the languages, literatures and societies of Islamic civilizations, and also Islamic history and thought in their Near Eastern context, in modern and pre-modern settings.

Students in the Arabic and Islamic Studies program are expected to command Arabic as a primary research language and another (usually Persian, Turkish, or Hebrew) as a secondary research language, as well as the general history and culture of the region. The specific distribution of courses varies by a student’s interests and specialization. Students are expected to work out the broad outlines of their programs in consultation with their faculty advisor when they begin their studies.

View the department’s PhD general procedures (https://www.sas.upenn.edu/nelc/grad_programs/phdProcedures.html).

For more information: https://www.sas.upenn.edu/nelc/grad_programs/grad_programs.html

View the University’s Academic Requirements for PhD Degrees (p. 1484).
Curriculum
A total of 20 course units is required for graduation.

Coursework
- Four courses in Arabic language beyond the Advanced Intermediate level
- Two course units in the secondary research language
- Four courses in Islamics (history & religion)
- Two courses in Arabic literature
- Three courses in Arabic literature and Islamics (history or thought) at the 600 level or above
- Two course units at the second-year/Intermediate level in the minor language
- Three elective courses to be chosen in conjunction with the major advisor

Other Program Milestones
In addition to the above-described required coursework, PhD students are responsible for two (2) European language reading exams, candidacy exams, and qualifying exams before preparing a dissertation proposal.

Secondary Field in Arabic and Islamic Studies
PhD students from other programs who wish to take a secondary field in Arabic and Islamic Studies must demonstrate a thorough knowledge of modern standard Arabic equivalent to proficiency in Advanced Intermediate Arabic.

During Candidacy Exams, students taking a secondary field will be examined in two subjects:

1. Arabic language and literature (history and criticism, based on sources in European languages)
2. Islamics: the history of the Middle East in the Islamic era, and the institutions of Islam

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sample Plan of Study
Students in the PhD program are required to take 20 course units. The coursework component is normally three years in length, but with the potential for transfer credit for other graduate courses within the field. Students entering the PhD program will be assigned a faculty advisor who will supervise the student’s program until the Candidacy Examinations in the 4th year of study have been completed.

Near Eastern Languages and Civilizations: Biblical Studies, MA
In addition to the MA awarded within the PhD program, NELC offers an independent (terminal) MA degree in Biblical Studies, which is one of the tracks in NELC’s graduate program in Hebrew and Judaic Studies. This track offers advanced study of the languages and philology of the Hebrew Bible as well as the history and archaeology of ancient Israel in its Near Eastern context.

Students admitted to the MA program are assigned a faculty advisor to guide their studies. Courses, selected in consultation with the advisor, will normally be completed in three semesters. All students, regardless of their concentration, must master at least one of the languages in which the primary sources of NELC’s subfields are written. Standards vary by subfield.

For more information: http://www.sas.upenn.edu/nlc/grad_programs/maProcedures.html

View the University’s Academic Requirements for Research Master’s Programs (p. 1490).
Curriculum

A minimum of 12 course units are required for graduation.

- Coursework
- Reading proficiency examination in one modern language of scholarly research
- MA Final Exams (no more than four exams, with at least one being a language exam)
- Thesis or two research papers

Some MA students apply for NELC’s PhD program. However, admission to the MA program or successful completion of the MA does not provide a guarantee of admission to the PhD program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages and Civilizations: Biblical Studies, PhD

NELC’s PhD track in Biblical Studies, a part of NELC’s Hebrew and Judaic Studies program, offers advanced study of the languages and philology of the Hebrew Bible as well as the history and archaeology of ancient Israel in its Near Eastern context.

At the heart of NELC’s Hebrew Bible/Old Testament track are texts composed over a period extending from the early Iron Age to the Hellenistic-Roman period. The goal of this PhD track is to prepare students to research and teach these texts, in both the historical contexts in which they were originally composed, and as they have been understood in later historical periods. Drawing on faculty in NELC, the Jewish Studies Program, and other departments, the Biblical Studies program takes an interdisciplinary approach to biblical literature that involves the study of language, literature, history, archaeology, and other fields. This program can be tailored for individual students with different interests.

View the department’s PhD general procedures (https://www.sas.upenn.edu/nelc/grad_programs/phdProcedures.html).

For more information: https://www.sas.upenn.edu/nelc/grad_programs/grad_programs.html

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Curriculum

A total of 20 course units is required for graduation.

PhD students in Biblical Studies must acquire proficiency in the following areas:

Primary Field
- Hebrew and Aramaic of the Biblical period
- Biblical Literature
- History, geography, and archaeology of Israel in the Biblical period in their ancient Near Eastern context

- Culture, social, and political institutions and history of Israelite religion in the Biblical period in their ancient Near Eastern context

Ancillary Fields
- A secondary field in either Cuneiform Studies (Akkadian) or Egyptology, and comparative studies relating the secondary field to Biblical Israel, or a secondary field in Biblical Archaeology.
- Hebrew epigraphy, Northwest Semitic languages, elementary Arabic, and comparative Semitics; Greek adequate for use of the Septuagint; post-Biblical literature and exegesis

Other Program Milestones

In addition to the above-described required coursework, PhD students are responsible for two (2) European language reading exams, candidacy exams, and qualifying exams before preparing a dissertation proposal.

Secondary Field in Biblical Studies

Graduate students from other programs who wish to take a secondary field in Biblical studies must complete the following requirements:

- Four (4) graduate-level courses in Biblical Hebrew texts; ability to sight-translate uncomplicated texts
- Biblical literature: familiarity with the content of the Bible, distinctive features of its main genres, and important literary-critical issues
- History and culture of ancient Israel
- Comparative studies relating Biblical Israel to the student’s Primary Field

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages and Civilizations: Classical and Medieval Hebrew Literature, MA

In addition to the MA awarded within the PhD program, NELC offers an independent (terminal) MA degree in Hebrew Literature and Jewish Tradition, which is one of the tracks in NELC’s graduate program in Hebrew and Judaic Studies. Students may specialize in either Post-Biblical Jewish History and Culture or Modern Hebrew Literature. These tracks offer advanced study in Hebrew literature and language and Jewish tradition, culture, and thought in their Near Eastern and/or Western contexts, in modern and pre-modern settings.

Students admitted to the MA program are assigned a faculty advisor to guide their studies. Courses, selected in consultation with the advisor, will normally be completed in three semesters. All students, regardless of their concentration, must master at least one of the languages in which the primary sources of NELC’s subfields are written. Standards vary by subfield.

Curriculum

A minimum of 12 course units are required for graduation.

- Coursework
- Reading proficiency examination in one modern language of scholarly research
- MA Final Exams (no more than four exams, with at least one being a language exam)

- Thesis or two research papers

Some MA students apply for NELC’s PhD program. However, admission to the MA program or successful completion of the MA does not provide a guarantee of admission to the PhD program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages and Civilizations: Classical and Medieval Hebrew Literature, PhD

NELC’s graduate program in Hebrew and Judaic Studies includes two tracks within Hebrew Literature and Jewish Tradition: (1) Post-Biblical Jewish History and Culture and (2) Modern Hebrew Literature.

These tracks offer advanced study of Hebrew literature and language and Jewish culture and thought in their Near Eastern and/or Western contexts, in modern and pre-modern settings.

Students in the Hebrew Literature and Jewish Tradition program are expected to command Hebrew as a primary research language and another (usually Arabic, Greek or Yiddish) as a secondary research language. The specific distribution of courses varies by a student’s interests and specialization. Students are expected to work out the broad outlines of their programs in consultation with their faculty advisor when they begin their studies.

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Curriculum

A total of 20 course units are required for graduation.

Post-Biblical Jewish History and Culture
Penn’s PhD Program in Post Biblical Jewish History and Culture is designed to train students to engage in teaching and in original research that pertains to the cultural developments and products of Jewish life from the seventh through the sixteenth centuries, in communities of Mesopotamia, Christian Europe and the Islamicate world. The program of study will be tailored to the needs and interests of each student, and will engage a range of NELC and Penn faculty members. All programs of study will involve the exploration of Jewish historical and cultural phenomena within the diachronic context of the Jewish past, and the synchronic context of the broader regional culture. Students will be expected to acquire proficiency in this historically and geographically broad field, for the purposes of undergraduate instruction, and scholarly expertise in the narrower research field that is chosen.

- Primary Proficiencies
  - Philological competence
  - The Jewish Bookshelf
  - Historical and Contextual Competence
• Methodological Tool Kit and State of the Field
• Ancillary Proficiencies
  • Familiarity with the foundational corpora of rabbinic Judaism, ability to read with comprehension, and to locate passages in the Hebrew Bible, Babylonian and Palestinian Talmud, Midrashic literature of the classical period, and Jewish Liturgy

Modern Hebrew Literature
The program of study in Modern Hebrew Literature encompasses texts composed from the end of the 18th century to the present day, from wherever they have been written, e.g., Israel, the broader Middle East, Europe, and North America. It is designed to allow students to pursue study, research, and eventually teaching by means of an approach to the field that is textually and linguistically rigorous, consciously interdisciplinary, and responsive to the individual interests of students. Although grounded in Near Eastern and Jewish Studies, our program also engages in dialogue with World Literature, Comparative Literature, History, Slavic and Germanic Studies, Religious Studies, and more.

• Linguistic and Textual Mastery
• Method
• Context

Secondary Field
All students are expected to develop proficiency in one of the following four secondary fields:

• Continuity of Hebrew Literature
• Bible
• Rabbinics
• Liturgy and Medieval Literature

Other Program Milestones
In addition to the above-described required coursework, PhD students are responsible for two (2) European language reading exams, candidacy exams, and qualifying exams before preparing a dissertation proposal.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sample Plan of Study
Students in the PhD program are required to take 20 course units. The coursework component is normally three years in length, but with the potential for transfer credit for other graduate courses within the field. Students entering the PhD program will be assigned a faculty advisor who will supervise the student's program until the Candidacy Examinations in the 4th year of study have been completed.

Near Eastern Languages and Civilizations: Egyptology and Archaeology, MA

In addition to the MA awarded within the PhD program, NELC offers an independent (terminal) MA degree in Egyptology. NELC's graduate program in Egyptology offers advanced study of the languages and civilizations of ancient Egypt.

Students admitted to the MA program are assigned a faculty advisor to guide their studies. Courses, selected in consultation with the advisor, will normally be completed in three semesters. All students, regardless of their concentration, must master at least one of the languages in which the primary sources of NELC's subfields are written. Standards vary by subfield.

For more information: http://www.sas.upenn.edu/nelc/grad_programs/maProcedures.html

View the University's Academic Requirements for Research Master's Programs (p. 1490).
Curriculum

A minimum of 12 course units are required for graduation.

- Coursework
- Reading proficiency examination in one modern language of scholarly research
- MA Final Exams (no more than four exams, with at least one being a language exam)
- Thesis or two research papers

Some MA students apply for NELC’s PhD program. However, admission to the MA program or successful completion of the MA does not provide a guarantee of admission to the PhD program.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Near Eastern Languages and Civilizations: Egyptology, PhD

NELC’s graduate program in Egyptology offers advanced study of the languages and civilizations of ancient Egypt.

View the department’s PhD general procedures (https://www.sas.upenn.edu/nelc/grad_programs/phdProcedures.html).

For more information: https://www.sas.upenn.edu/nelc/grad_programs/grad_programs.html

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Curriculum

A total of 20 course units are required for graduation.

Language and Literature Concentration

- Primary Field
  - Ancient Egyptian language and literature (at least 8 courses)
  - History, culture, art and archaeology of Ancient Egypt (at least 6 courses)

- Secondary Field
  - Language of chosen secondary field of concentration (at least 4 courses)
  - History, culture, art and archaeology (at least 2 courses)

Archaeology Concentration

- Primary Field
  - Archaeology, art, history, and culture of Ancient Egypt (at least 7 courses)
  - History of ancient Egypt (at least 2 courses)
  - Language of ancient Egypt (at least 4 courses)

- Secondary Field
  - Art, Archaeology, history, culture, and anthropology (at least 6 courses)
  - Archaeological interpretation and techniques (at least 1 course)

Other Program Milestones

In addition to the above-described required coursework, PhD students are responsible for two (2) European language reading exams, candidacy exams, and qualifying exams before preparing a dissertation proposal.

Secondary Field in Egyptology

Graduate students in other programs (such as Mesopotamian Civilizations or Biblical Studies) who take a secondary field in Egyptology must take at least four courses in Egyptian language (Middle Egyptian and another significant phase) and two in history and culture.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

- History of ancient Egypt (at least 2 courses)

Sample Plan of Study

Near Eastern Languages and Civilizations: Mesopotamian Civilization, MA

In addition to the MA awarded within the PhD program, NELC offers an independent (terminal) MA degree in Mesopotamian Civilizations. NELC's graduate program in Mesopotamian Civilizations offers advanced study of the languages and philology of ancient Mesopotamia as well as the history and archaeology of that region in its Near Eastern context.

Students admitted to the MA program are assigned a faculty advisor to guide their studies. Courses, selected in consultation with the advisor, will normally be completed in three semesters. All students, regardless of their concentration, must master at least one of the languages in which the primary sources of NELC's subfields are written. Standards vary by subfield.

For more information: http://www.sas.upenn.edu/nelc/grad_programs/maProcedures.html

View the University's Academic Requirements for Research Master's Programs (p. 1490).

Curriculum

A minimum of 12 course units are required for graduation.

- Coursework
  - Reading proficiency examination in one modern language of scholarly research
  - MA Final Exams (no more than four exams, with at least one being a language exam)
  - Thesis or two research papers

Some MA students apply for NELC's PhD program. However, admission to the MA program or successful completion of the MA does not provide a guarantee of admission to the PhD program.

Near Eastern Languages and Civilizations: Mesopotamian Civilization, PhD

NELC's PhD program in Mesopotamian Civilizations offers advanced study of the languages and philology of ancient Mesopotamia as well as the history and archaeology of that region in its Near Eastern context.

Students in the Mesopotamian Civilization program may specialize in either Archaeology and Art History or History, Language, and Literature, but all students are expected to command a primary and secondary ancient language, as well as the general history and culture of the region. The specific distribution of courses varies by specialization. Students are expected to work out the broad outlines of their programs in consultation with their faculty advisor when they begin their studies.

View the department's PhD general procedures (https://www.sas.upenn.edu/nelc/grad_programs/phdProcedures.html).

For more information: https://www.sas.upenn.edu/nelc/grad_programs/grad_programs.html

View the University's Academic Requirements for PhD Degrees (p. 1484).

Curriculum

A total of 20 course units are required for graduation.

Primary Field

- Specialization in History, Language, and Literature
  - Languages
  - History
  - Art and archaeology

- Specialization in Archaeology and Art History
  - Languages and Literatures
  - History
  - Archaeology and Art History

Other Program Milestones

In addition to the above-described required course work, PhD students are responsible for two (2) European language reading exams, candidacy exams, and qualifying exams before preparing a dissertation proposal.

Secondary Field

Students concentrating in other NELC programs such as Biblical Studies or Egyptology may acquire secondary field competence in Mesopotamian Civilization with six courses. The distribution of the courses ought to reflect the student's focus on history, language and literature or archaeology. Students in history, language and literature must take at least two art or archaeology courses and students in archaeology and art history must complete at least one introductory language sequence.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
Sample Plan of Study

Students in the PhD program are required to take 20 course units. The coursework component is normally three years in length, but with the potential for transfer credit for other graduate courses within the field. Students entering the PhD program will be assigned a faculty advisor who will supervise the student's program until the Candidacy Examinations in the 4th year of study have been completed.

Philosophy, PhD

The Penn Philosophy Department has a long and distinguished history. Philosophy has been taught at the University since 1755, and Penn was among the first universities in the country to offer the PhD degree in Philosophy, in 1882. The Department has always prized breadth, and its members are prepared to supervise advanced research in metaphysics and epistemology, philosophy of mind, philosophy of science, logic, philosophy of language, ethics, social and political philosophy, philosophy of law, and the history of philosophy.

The Ph.D. program includes course work, a teaching requirement, a preliminary examination, and the preparation and defense of a dissertation. Required coursework includes two courses in contemporary epistemology and metaphysics (including philosophy of science, mind, language, and mathematics); two courses in value theory (ethics, political or legal philosophy, aesthetics); three courses in history of philosophy, and a logic requirement.

For more information: http://philosophy.sas.upenn.edu/graduate

View the University's Academic Requirements for PhD Degrees (p. 1484).

Required Courses

The total course units required for graduation is 20.

1 Must include one course in ancient and one course in early modern through Kant.
2 One course unit must be a regularly offered Philosophy course.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Physics and Astronomy, PhD

The University of Pennsylvania Department of Physics and Astronomy is a world-leading institution that generally is regarded as among the very best places for graduate students to obtain a PhD. Graduate students at Penn combine a short term of coursework with independent, original research that forms the basis of their dissertation and typically their first publications. A rich program of seminars and colloquia by invited
speakers from across the world supplements what students learn in classes and during their research activities.

Primary research areas include outstanding theoretical and experimental work in both hard and soft condensed matter physics, often done in conjunction with other schools and departments at Penn, with some laboratories located in Penn’s Singh Center for Nanotechnology and the Laboratory for Research into the Structure of Matter. Biophysics at Penn is also divided amongst advanced theoretical work and hands-on laboratory work, and encompasses both complex networking theories and some of the exotic optics of biological systems.

Our Astrophysics and Cosmology groups explore the structure and evolution of the Universe, perform searches for exoplanets, and study galaxy formation. Efforts in cosmology include theoretical models for the acceleration of the Universe and the properties of dark matter, observations of the structure of the Universe and studies of dark matter using gravitational lensing with the Dark Energy Survey and eventually the Large-aperture Synoptic Survey Telescope, and studies of the cosmic microwave background with telescopes in places like the Chilean Andes and the South Pole. Our effort in nuclear and particle physics also spans both fundamental theoretical work such as string theory, as well as experimental work at the Large Hadron Collider at CERN and various neutrino experiments across the world. Collider efforts include studies of the recently-discovered Higgs boson as well as searches for supersymmetry, and our neutrino work includes searches for Majorana neutrinos and CP violation in neutrino oscillations.

Our experimental nuclear and particle physics effort makes extensive use of Penn’s world-class instrumentation group, giving students the ability to explore creative new ideas in both hardware and in their data analysis work.

Electives

Select an additional 15 course units ¹ 15

Total Course Units 20

¹ One course must be outside the student's field of specialization. Up to 11 course units can come from independent research or reading courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Political Science, PhD

The Graduate Program in Political Science at the University of Pennsylvania reflects the methodological diversity of the discipline. The department has significant strengths in each of the four major subfields of the discipline: American Politics, Comparative Politics, International Relations, and Political Theory.

Courses in each of the four substantive fields clarify important intellectual and conceptual issues and help students learn how to formulate an original research project. Courses in both quantitative and qualitative research methods provide students with cutting-edge tools they can use to conduct their research.

The Ph.D. program includes course work, a teaching requirement, a second-year paper, a preliminary examination, and the preparation and defense of a dissertation. Candidates completing the Ph.D. degree typically pursue careers in academia, government service, and the private sector.

For more information: http://www.sas.upenn.edu/polisci/content/graduate-program

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Required Courses

A total of 15 course units are required for graduation.

Research Skills Requirement

- PSCI 692 Advanced Statistical Analysis or a comparable course with the approval of the graduate group chairperson

Two Exam Fields

- Students must select 2 exam fields from among the 4 major subfields of the discipline (American Politics, Comparative Politics, International Relations, and Political Theory). They must take at least 3 classes in each of those fields prior to their qualifying exam.

Third Thematic Field

- All students must complete a third field by taking three classes around a unifying substantive theme.

Students may select the remaining 5 courses in consultation with their advisor and/or the graduate group chairperson.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Psychology, PhD

Graduate study in Psychology at Penn emphasizes scholarship and research accomplishment. The first-year program is divided between courses that introduce various areas of psychology and a focused research experience. A deep involvement in research continues throughout the graduate program, and is supplemented by participation in seminars, teaching, and general intellectual give-and-take. Students are admitted into the graduate program as a whole, not into specific subfields. Students and faculty are free to define their fields of interest. A high level of interaction between students and faculty helps
generate both a shared set of interests in the theoretical, historical, and philosophical foundations of psychology and active collaboration in research projects.

The Graduate Group in Psychology is highly distinguished and represents a broad range of work in psychology and includes an APA-approved clinical program. Two regular faculty and two emeritus professors are members of the National Academy of Sciences, and three regular faculty are Fellows of the American Academy of Arts and Sciences. The Department also includes past presidents of the American Psychological Association, the Society for Judgment and Decision Making, and of the Linguistics Society of America.

Many other faculty, graduate students, and former students have received national awards for excellence in research and teaching. We have strong connections with other disciplines at the University. Our members play pivotal roles in two of the most important interdisciplinary areas on campus, the cognitive sciences and the neurosciences, both of which have been fostered by the Department as a matter of policy.

1 By the end of Year 2, you must have taken one in each of the following areas: The Mind, The Brain, The Individual & The Group.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Clinical Program Requirements
The clinical training program, nested in the Department, is intended to prepare students for research/academic careers in Clinical Psychology. Psychopathology, or Personality. Clinical training (in assessment, diagnosis and psychotherapy) is seen as an integral part of the education of highly qualified, created clinical scientists. Nevertheless, the principal goal of Penn clinical students is to become expert psychologists, not simply expert clinicians, and the program is designed to support that goal. Our program is a member of the Academy of Psychological Clinical Science, a coalition of doctoral training programs that emphasize the scientific basis of clinical psychology and is accredited by the Psychological Clinical Science Accreditation System. Our membership in the Academy indicates our commitment to empirical research as the basis of theory, assessment, and intervention, and our PCSAS accreditation attests to our success in training clinical students. The program is also accredited by the American Psychological Association.

Religious Studies, PhD
The graduate program in Religious Studies at the University of Pennsylvania offers unique research opportunities for students to become first class scholars, teachers and expositors in the field. Our program is situated within one of the largest and finest research universities in the country, easily accessible to other research centers.
along the eastern seaboard. At the same time, the Department of Religious Studies provides students with a great deal of individual attention from faculty members, and the opportunity to interact with students from diverse subfields.

Within this context of extensive resources and personalized guidance, each student works with an advisor to design his or her own course of study. The structure of the PhD program currently consists of six core full time faculty members, and a graduate group comprised of faculty across the University of Pennsylvania campus whose research and teaching significantly involves the study of religion and who actively participate in the training of graduate students in Religious Studies.

The typical doctoral program in Religious Studies is funded over a five year period, over which students are expected to engage in coursework, complete teaching assistantships, and attend the graduate colloquium. Requirements for the program include a minimum of two languages, qualifying examinations, preliminary examinations (with an oral examination component), and an oral dissertation defense.

Graduate students in Religious Studies have the benefit of a wealth of resources unrivalled by any major research university. In addition to possessing one of the best research libraries in the world, Penn is also home to the University of Pennsylvania Museum of Archaeology and Anthropology, the oldest institution of its kind in the United States. Within the city of Philadelphia, research centers include The Library Company of Philadelphia an independent research library specializing in American history and culture from the 17th through the 19th centuries.

---

**Romance Languages: French and Francophone Studies, PhD**

The University of Pennsylvania’s Graduate Program in French Studies offers a five-year Ph.D. program. All students admitted to the program are awarded full financial support through the University’s Benjamin Franklin Fellowships, including summer funding for the first three years. The overarching goal of the program is to train students for productive scholarship and for effective college or university teaching. We have an outstanding faculty committed to scholarly excellence and we have an impressive record in placing candidates on the job market.

In addition to our faculty having interest in a broad range of centuries, individual expertise include science studies, popular culture, film noir, fashion, travel writing, poetry, anthropology, gender, postcolonial studies, cultural history, narratology, and history of the book. Students are encouraged to incorporate new critical approaches into their dissertation topics.

Interdisciplinary study is encouraged through participation in the wide range of seminars, lectures, and colloquia sponsored by the various Graduate Groups and affiliated research institutes and centers at Penn. Students may complement their studies by taking up to four courses outside the French section. Graduate students in French and Francophone Studies may also participate in The Penn Humanities Forum which also provides a venue for doctoral students to interact with colleagues from across the disciplines.

For more information: https://www.sas.upenn.edu/french/graduate

View the University’s Academic Requirements for PhD Degrees (p. 1484).

**Requirements**

The Ph.D. program in French and Francophone Studies is planned as a five-year sequence. Requirements for the Ph.D. include:

- A total of twenty (20) graduate courses including:
  - FREN 500 Proseminar: Reading for the M.A. Exam will be taken for credit during the spring semester of the student’s first year.
  - ROML 690 Language Teaching and Learning: This course in Applied Linguistics and Language Teaching will be audited in the fall semester of the second year and will be taken for credit during the spring semester of that year after the student has completed one semester of teaching.
  - FREN 850 Field Statement: Followed by preparation of Field Statement in the summer of the 2nd year, students present and discuss their Field Statement in fall of the third year.
  - FREN 851 Dissertation Proposal: The student will register for this course during the spring of the third year, and will complete the Dissertation Proposal/Prospectus during the following fall (7th semester).

- M.A. Examination— an oral and written examination based on the Master’s Reading List will be given at the conclusion of the spring semester of the student’s first year.

- Qualifying Evaluation—In order to be admitted to candidacy for the Ph.D. degree, students must successfully pass a qualifying evaluation. At the beginning of the second year, the faculty will
evaluate all aspects of the student’s performance during his or her first year in the program.

- **Foreign Language Requirement**—a translation exam in one foreign language appropriate to the student’s prospective field of specialization.

- **Ph.D. Examination**—the Ph.D. exam consists of an oral and written part and will be taken in May of the third year (or the 6th semester), upon the completion of course work.

- **Field Statement**—during summer after second year, student will work with their advisor to prepare a Field Statement on their prospective areas of specialization to be presented in the fall semester of the third year.

- **Dissertation Proposal**—Students will begin work for an eventual dissertation topic to be completed during the summer after the student’s third year.

- **Dissertation Defense**—a public, oral presentation of the dissertation will take place during the semester in which the student will graduate.

1 Students who enter the program with previous graduate work may be eligible to transfer some credits toward the Ph.D.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

During these two years, which should be devoted to dissertation research and writing, the student will be registered as “ABD” under course number 995. A written calendar for completion of the thesis work over this two-year period is to be sketched out by the student under the direction of advisor/committee, updated periodically, and kept on file for progress reviews.

Dissertation Completion and Defense by spring of Year 5.

### Romance Languages: Hispanic Studies, PhD

The Graduate Program in Hispanic Studies, a five-year Ph.D. program within the Department of Romance Languages, offers a rigorous professional formation in academic research, writing, and pedagogy. The program prepares students in a range of critical and methodological approaches to the study of literature, culture, and theory in Spain and Latin America. Students may complement their areas of specialization with course work in a second Romance language or in other disciplines such as Comparative Literature, English, History, and Philosophy.

Interdisciplinary study is also invited through participation in the many lectures and colloquia sponsored by the various Graduate Groups and affiliated research institutes and centers at Penn. All graduate students teach undergraduate courses in Spanish language and Hispanic culture, for which they attend extensive teacher training seminars and workshops. Faculty members are committed to enhancing graduate students’ preparation for professional life through annual seminars on professional concerns and through comprehensive job placement support. The Department of Romance Languages publishes The Hispanic Review, and graduate students in Hispanic Studies may serve as editorial assistants to the journal.

For more information: https://www.sas.upenn.edu/hispanic-portuguese-studies/graduate

View the University’s Academic Requirements for PhD Degrees (p. 1484).

### Requirements

The Ph.D. program in Spanish is planned as a five-year sequence. Requirements for the Ph.D. include:

- A total of **twenty (20) graduate courses**, including:
  - A course in Literary Theory
  - SPAN 606 Pedagogy Across the Spanish Curriculum
  - SPAN 800 Field Exam (Comprehensive Exam preparation)

- A **Qualifying Evaluation**—In order to be admitted to candidacy for the Ph.D. degree, students must pass successfully a qualifying evaluation. At the beginning of a student’s second year, the faculty will evaluate all aspects of the student’s performance during his or her first year in the program.

- **Foreign Language Requirements**—translation exams in two (2) foreign languages appropriate to the student’s prospective field of specialization.

- **Comprehensive Exams**—an oral exam in the fall of the third year and a written exam in the spring semester of the third year.
• **Dissertation Proposal**—following successful fulfillment of the Ph.D. Comprehensive Examinations, the candidate will shape a dissertation project and writing schedule by September 15th of their fourth year.

• **Dissertation**—the presentation of a dissertation is the final requirement for the Ph.D.

**Dissertation Defense**—a public, oral presentation of the dissertation will take place during the semester in which the student will graduate.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Romance Languages: Italian Studies, PhD**

The Graduate Program in Italian Studies in the Department of Romance Languages at the University of Pennsylvania offers students a range of curricular options that provide a broad academic base in Italian literature, film, cultural studies, and critical theory, as well as the most current pedagogical theory and practice. Students are encouraged to shape a curriculum that will prepare them in a primary period of interest as well as a secondary focal area. Students may complement their studies with up to four courses outside the Italian Studies section—for example, in another Romance Language, Comparative Literature, English, and History. Certificate programs in the areas of Women's Studies, Cinema Studies and Urban Studies, for example, are also available. Interdisciplinary study is encouraged through participation in the wide range of seminars, lectures, and colloquia sponsored by the various Graduate Groups and affiliated research institutes and centers at Penn, including the Center for Italian Studies and at the many cultural institutions in the Philadelphia area.

Great resources are available to the graduate students in Italian, including the world-renowned Kislak Center for Special Collections, Rare Books and Manuscripts. The Program in Italian Studies collaborates actively with the Kislak Center to provide students with hands on experience with rare material in conjunction with classes, talks, conferences, and book exhibits. Additionally, individual dissertation research abroad is encouraged and summer research funding is available competitively through the Salvatori Fund or other sources.

Finally, the Center for Italian Studies coordinates scholarly activities among faculty and students across the humanities, organizing research groups, visiting lectures, film screenings and major academic conferences.

For more information: [http://www.sas.upenn.edu/italians/graduate/](http://www.sas.upenn.edu/italians/graduate/)

View the University’s Academic Requirements for PhD Degrees (p. 1484).

### Requirements

The Ph.D. program in Italian is planned as a five-year sequence. Requirements for the Ph.D. include:

- A total of **twenty (20) graduate courses** to be distributed as follows:
  - A Literary Theory course (usually in the second year)
  - ITAL 691 Italian Teaching & Learning (Italian Teaching & Learning and Second Language Development [SLD]) in the spring semester of the second year
  - ITAL 800 Exam Preparation (Exam Preparation), in which students will enroll during the spring semester of the third year for the purposes of beginning preparation for the Ph.D. exam.
  - A minimum of 13 electives in Italian literature
  - Up to 4 courses outside Italian, in Italian Studies, in another Romance Language, or in another field pertinent to the student’s area of specialization.

- A **Qualifying Evaluation**—in order to be admitted to candidacy for the Ph.D. degree, students must pass successfully a qualifying evaluation. At the beginning of a student’s second year, the faculty
will evaluate all aspects of the student's performance during his or her first year in the program.

- **Foreign Language Requirement**—a translation exam in two foreign languages appropriate to the student's prospective field of specialization.

- **Ph.D. Examination**—A three-part written examination and an oral exam taken at the end of the third year or beginning of the fourth year.

- **Dissertation Proposal**—following successful fulfillment of the Ph.D. Examination, the candidate will shape a dissertation project and writing schedule.

- **Dissertation**—the presentation of a dissertation is the final requirement for the Ph.D.

Dissertation Defense—a public, oral presentation of the dissertation will take place during the semester in which the student will graduate.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Sociology, PhD

Graduate work at the University of Pennsylvania is conducted through graduate groups formed according to different areas of study. These groups administer programs leading to the AM and PhD degrees. Those seeking a graduate degree in Sociology should apply to the Graduate Group in Sociology. Sociology students earn their MA on the way to the PhD. There is no terminal Master's degree program.

It is possible to earn a joint Ph.D. in Sociology and another discipline by being admitted to and satisfying the requirements of two Ph.D. programs and writing a single dissertation. Currently, students are enrolled in joint degrees with Demography, Education, Communications, and Africana Studies. Students seeking a joint Ph.D. combining Sociology with another program must be admitted in that program (as well as Sociology); admittance to the second program may occur after admission to the Sociology program.

For more information: [http://sociology.sas.upenn.edu/graduate_resources](http://sociology.sas.upenn.edu/graduate_resources)

View the University's Academic Requirements for PhD Degrees (p. 1484).

### Required Courses

A minimum of 20 course units are required. A minimum of 12 course units must be taken at the University of Pennsylvania.

Second Year Paper/MA Thesis

Teaching Requirement
South Asia Regional Studies, MA

South Asia Studies is an interdisciplinary field focusing on the history, languages, society, literature, and art from India, Pakistan, Bangladesh, Nepal, Sri Lanka, Afghanistan, and Bhutan. America’s oldest and most distinguished South Asia program, faculty work in multiple disciplines and offer study in nearly 15 South Asian languages.

The Department of South Asia Studies (SAST) offers PhD and MA degrees, attracting exceptional students from around the world. Candidates for the MA develop a broad knowledge of disciplines relevant to the study of South Asia and competency in a South Asian language at an Intermediate-High level equivalent to a minimum of two years of study.

If students elect to write a Master’s Thesis they must produce a piece of original research that includes sources in South Asian languages.

For more information: http://www.southasia.upenn.edu

View the University’s Academic Requirements for Research Master’s Programs (p. 1490).

Required Courses

A minimum of 12 course units are required.

<table>

</tr>
</tbody>
</table>

Total Course Units 12

1 At least six content courses (not including language courses and independent studies) must be taken with six different Standing Faculty of the South Asia Studies department in the first two years.

2 Candidates who demonstrate Advanced knowledge of a South Asian language may be excused from taking additional language courses. The course units may then be reallocated to electives. In no case will exemption from further language study result in a reduction of the total number of 12 course units required for the degree.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

South Asia Regional Studies, PhD

South Asia Studies is an interdisciplinary field focusing on the history, languages, society, literature, and art from India, Pakistan, Bangladesh, Nepal, Sri Lanka, Afghanistan, and Bhutan. America’s oldest and most distinguished South Asia program, faculty work in multiple disciplines and offer study in nearly 15 South Asian languages.

The Department of South Asia Studies (SAST) offers PhD and MA degrees, attracting exceptional students from around the world. Candidates for the PhD develop a deep familiarity with the history, methodology, and practice of a chosen discipline relevant to the study of South Asia, and a broad knowledge of allied disciplines. Additionally, our PhD candidates will show a demonstrable proficiency in at least two relevant research languages as detailed in the department requirements.

In addition to the completion of coursework and language requirements, PhD candidates are expected to act as Teaching Assistants and/or teach their own classes. PhD candidates, through the course of their time in the department, are expected to make two presentations to the South Asia Colloquium and to successfully pass their Qualifying and Candidacy Exams.

For more information: http://www.southasia.upenn.edu

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Curriculum

A minimum of 20 course units are required at the 400 level or above. A minimum of 12 course units must be taken at the University of Pennsylvania.

#### Year 1

**Complete at least one language requirement**

**Fall**

- Select 4 courses

**Spring**

- Select 4 courses

**Summer**

- Language study (depending on prior language competencies)

#### Year 2

**Complete remaining language requirements**

**Fall**

- Select 3 courses
  - Teaching Assistantship

**Spring**

- Select 3 courses
  - Teaching Assistantship
  - Dissertation proposal writing and grant writing
  - PhD Qualifying Exam
  - Application for PhD Candidacy

**Summer**

- Preliminary PhD research
- Language study (if necessary)
- First PhD research grant applications are due

#### Year 3

*Optional one-year abroad language study as needed*

**Fall**

- Select 3 courses
  - Teaching Assistantship
  - Complete PhD research grant applications
  - Bibliography preparation for PhD Candidacy Exams

**Spring**

- Select 3 courses
  - Teaching Assistantship
  - Reading for PhD Candidacy Exams

PhD Candidacy Exams

**Summer**

**Years 4 and Beyond**

Dissertation research and writing

1 May register for Exam Prep in lieu of one course.

### School of Design

As a diverse community of scholars and practitioners, the School is committed to advancing the public good—both locally and globally—through art, design, planning and preservation. With 3 research degrees, 9 professional degrees and 14 certificate programs offered, PennDesign graduate programs are consistently ranked among the top 10 in the nation, and serve as a platform for groundbreaking research as well as community engagement.

Learn more about our school leadership and the PennDesign student experience: [https://www.design.upenn.edu/about](https://www.design.upenn.edu/about).

### Mission

PennDesign prepares students to address complex sociocultural and environmental issues through thoughtful inquiry, creative expression, and innovation. As a diverse community of scholars and practitioners, we are committed to advancing the public good—both locally and globally—through art, design, planning, and preservation.

### History

Although the School of Design dates its founding from 1890, architecture courses were first offered at the University of Pennsylvania in 1869, making Penn’s architecture program the second oldest in the United States. In 1921, the Department of Architecture joined with the Department of Music and Fine Arts to create an independent undergraduate School of Fine Arts modeled on the French École des Beaux Arts. In 1958, the School was renamed the Graduate School of Fine Arts, reflecting the shift to graduate degree offerings in architecture, city and regional planning, landscape architecture and fine arts. In the 1980s, a program in historic preservation was added. To more accurately capture the School’s sphere of influence, it was renamed the School of Design in 2003. Today, with a standing faculty of 43, approximately 160 lecturers and associate faculty, and more than 700 students, the School prepares students to address complex socio cultural and environmental issues through thoughtful inquiry, creative expression and innovation.

### Programs

#### PhD and Research Master's Programs

Architecture, MS
The Master of Science degree, first offered in 1984, is intended for individuals with an undergraduate professional degree in architecture who wish to pursue a self-directed program of study at the advanced level. It enables students to gain a greater understanding of the relationship between the discipline and the profession. A total of ten approved courses are required, including one course in Architectural Theory and an individually directed selection of electives from the Master of Architecture program, and a qualifying exam. This degree is normally completed in one calendar year. Applicants must hold a bachelor’s degree in architecture.

For more information: https://www.design.upenn.edu/architecture/graduate/master-science-architecture

View the University’s Academic Requirements for Research Master’s Programs (p. 1490).

Curriculum
A total of 10 course units are required.

Architecture, PhD
The Ph.D. Program in Architecture, created in 1964, is the oldest in the country and is widely regarded as preeminent in the fields of theory, technology and representation. Its goal is to produce a body of graduates who will act as a reflective leader to the architectural profession, providing an historical and/or theoretical context for current practice.

The Doctor of Philosophy in Architecture is for the person who wishes to make a significant scholarly contribution to the discipline of architecture. Requirements for the degree include twenty approved courses, the
passing of two language exams, a qualifying examination, a preliminary examination, teaching experience, a dissertation and a final defense. Course work from previous Master’s degrees is taken into consideration when deciding the number of courses required for the Ph.D. degree. Students with a Master’s degree from Penn may be granted up to 12 course units transfer credit, those with a Master’s degree from another institution may be granted up to 8 towards their Ph.D. requirement.

**Program Milestones**

- 2 language exams
- 2 semesters as a teaching assistant
- Qualifying Examination
- Preliminary Examination
- Dissertation and Final Defense

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**City Planning, PhD**

The University of Pennsylvania is an intellectually stimulating environment in which to study the serious problems that face our metropolitan areas today and the broad spectrum of responses to meet those challenges. Students enrolled in the City and Regional Planning Ph.D. program have easy access to a broad, multi-disciplinary faculty and all the resources of a first-rate urban research university.

The Ph.D. program in City and Regional Planning (CPLN), governed by the Graduate Group in City and Regional Planning, is one of the oldest in the country, dating back to the 1950s. Penn’s faculty has guided more than 300 students through their graduate studies to the completion of the degree and aided them in assuming positions of leadership in both academia and the profession throughout the United States and across the world.

Penn’s Ph.D. program in city and regional planning has a straightforward objective: to train thought-leaders and exceptional scholars. To this end, the Graduate Group aims to ensure acquisition of strong research and communication skills. It is also committed to cultivating enduring faculty/student mentoring relationships and collegial networking among a students’ peers, including other Ph.D. students in urban-focused disciplines.

For more information: https://www.design.upenn.edu/city-regional-planning/phd/about

View the University’s Academic Requirements for PhD Degrees (p. 1484).

**Curriculum**

**Coursework**

A total of 20 course units are required.

The Graduate Group in City and Regional Planning does not designate a formal list of required courses other than the Doctoral Seminar and research methods, but allows students to work with the Graduate Group Chair and their principal advisor to develop a study plan consistent with their research and future teaching interests.

**Additional Requirements**

Additional elements of the program include:

- Preparatory Requirements (Writing and Presentation and Scholarly Preparation)
- Qualifying/Candidacy Examinations
- Dissertation
The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

School of Engineering and Applied Science

Penn’s School of Engineering is unlike any other. Traditionally untraditional. Pioneers in interdisciplinary education and research. Theory linked with real-world practice. The path for students who want to shape the future. With the pace of innovation and technological advancement accelerating ever faster, engineers hold the keys to the next generation’s routine wonders.

For more information, visit http://www.seas.upenn.edu/.

Mission and Philosophy

Penn Engineering seeks an optimal balance between the creation and integration of knowledge through scholarly research, entrepreneurship and innovation in translating the products of our research into practice, and the dissemination of knowledge to our students on the Penn campus and beyond. Accordingly, our mission has two facets:

• The creation, integration and dissemination of knowledge in both the fundamentals and their application in order to be an international center of engineering excellence and a catalyst for technological innovation; and
• The design and delivery of an engineering education known for its rigor, breadth and relevance to prepare students to become global leaders in technology-based fields.

The doctoral program is the hallmark of Penn Engineering’s educational programs. Attracting, educating and mentoring outstanding doctoral students are priorities of the school. Penn Engineering doctoral graduates should be educated, trained and mentored for leadership positions, not only in academia, but also in industry and government. The education that we provide our doctoral candidates must embrace the challenges of the 21st century. The barrier to entry in the field of engineering is being lowered, and some technologies are becoming commoditized, even as new disruptive technologies are being developed. The gap between industry research and development and academic research is narrowing. It is important to strike the right balance between training in basic, curiosity-driven research while ensuring that our students are able to innovate and become leaders in today’s quickly evolving disciplines.

Research

Our interdisciplinary research centers and institutes span across all departments in Penn Engineering and foster collaborations across different schools throughout the University. The physical connectivity of engineering buildings and the proximity to each of the other schools enables exciting collaborations with faculty, students and postdocs.

Research at Penn is constantly pushing back the frontiers of science and using innovative methods of thinking to approach problems and find solutions across many fields. If it hasn’t yet been solved, chances are someone at Penn Engineering is working to come up with the solution.

Bioengineering, PhD

The first doctorate degree in bioengineering in the nation was awarded at Penn in 1953, and since that time, Penn Bioengineering has been an integral academic program linking faculty from the engineering, medical, and arts and sciences schools on a single centrally-located campus. Penn Bioengineering provides students with a flexible curriculum and a world-class research environment. Students are given the opportunity to work in a collaborative culture that includes multiple generations of leaders in academia, government, and industry. The careful process of matching students with faculty based on their research interests begins with first-year lab rotations, which gives students an opportunity to begin their dissertation research in their first semester.
For more information: http://www.be.seas.upenn.edu/prospective-students/doctoral/index.php

View the University's Academic Requirements for PhD Degrees (p. 1484).

Required Courses

Students are required to take at least 9 graduate level courses and 2 seminars.

Biomedical Science

- Select courses in cell biology and/or systems physiology.
- Courses chosen in consultation with advisor.

Bioengineering Fundamentals

- Select three BE or Engineering courses devoted to analytical methods, modeling, experimental methods and data analysis which focus on the student concentration.
- Courses will be chosen in consultation with the advisor.

Research Discipline Electives

- Select two courses chosen in consultation with advisor

Mathematics

- Select two courses from the recommended list

Bioengineering Research Rotation

- Select a minimum of two seminars, usually in the first year.

A list of courses that students have taken recently to fulfill this requirement (http://www.be.seas.upenn.edu/current-students/masters/documents/16BiologicalScienceCourses.pdf) can be found on the Bioengineering website.

1 Suggested courses include:
- ENM 502 Numerical Methods and Modeling
- ENM 510 Foundations of Engineering Mathematics - I
- ENM 511 Foundations of Engineering Mathematics - II
- BE 510 Bioinformatics
- Additional math course recommendations (http://www.be.seas.upenn.edu/current-students/masters/documents/16MathCourses.pdf) can be found on the Bioengineering website.

Spring

- BE 699 Bioengineering Seminar
- Biomedical Science or BE Fundamentals Course
- BE Fundamentals Course

Summer

- Qualification Evaluation

Second Year

Fall

- BE 999 Thesis/Dissertation Research
- Math Elective
- Biomedical Science or BE Fundamentals Course

Spring

- BE 699 Bioengineering Seminar
- BE 999 Thesis/Dissertation Research
- BE Fundamentals Course

Bioengineering Elective

Third Year and Beyond

- BE Fundamentals Course
- Dissertation Proposal
- Final Exam and Dissertation Defense

1 Selected in consultation with the research advisor.
2 Qualifications Evaluation will be completed during the Summer or Early Fall.
3 The Dissertation Proposal is required by the end of the Fall semester in the Third Year.

Chemical and Biomolecular Engineering, PhD

The Ph.D. in Chemical and Biomolecular Engineering is primarily a research-oriented degree for students showing exceptional promise for original contributions to the theory and practice of chemical and biomolecular engineering. The degree is a virtual requirement for those planning to teach chemical and biomolecular engineering, as well as for those planning on a research career. Doctoral candidates are expected to show superior capability for independent work and study.

For more information: http://www.cbe.seas.upenn.edu/prospective-students/doctoral/index.php

View the University's Academic Requirements for PhD Degrees (p. 1484).

Required Courses

Students are required to take a minimum of 10 graduate level courses, including the six required core courses.

1 Two courses can be waived for students entering with a Master's degree. Advisor and Graduate Chair approval is required for non-CIS courses.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Electrical and Systems Engineering, PhD**

The ESE PhD program is designed to provide sufficient structure to help you build a strong foundation and to have sufficient flexibility to accommodate the direction of your creativity. You will collaborate closely with your faculty advisor on the direction of your research and develop skills needed to perform independent research and teaching in an exciting, intellectual environment. Current concentration areas are circuits and computer engineering, nanodevices and nanosystems, and information and decision systems. ESE research is focused on the development and application of systems theory to the design of physical, biological, and socio-technical artifacts that improve the human condition.

For more information: [http://www.ee.upenn.edu/current-students/doctoral/index.php](http://www.ee.upenn.edu/current-students/doctoral/index.php)

View the University’s Academic Requirements for PhD Degrees (p. 1484).

**Course Requirements**

ESE Doctoral students must complete a required series of 20 course units (CUs) of graduate-level courses and research units. A minimum of 10 CUs must be graduate level courses. The remaining 10 CUs are composed of Research Units (ESE 999 Thesis/Dissertation Research) and may include up to two Independent Study (ESE 899 Independent Study for PhD credit) units.

10 CUs of Coursework: these graduate level courses are organized by depth, breadth, critical thinking and elective categories.

The student must discuss with their advisor the courses that would best suit each of these categories for their specific PhD career at Penn. Course plans for ESE PhDs are very individualized and must be approved by their Faculty Advisor.

- **Depth Requirement:** At least five graduate-level courses in areas supporting the research of the Ph.D. student.
- **Breadth Requirement:** At least two graduate-level courses which are distinct from the major research area. The courses may be thematically linked in a 500-600 sequence or may represent two 500 level courses both distinct from the major research area. Independent Studies cannot be used in this category.

**Critical Thinking Requirement:** At least two graduate-level courses satisfying formal analytical reasoning. Courses that satisfy this requirement include graduate courses in Mathematics, Engineering Mathematics, Statistics, or Discrete Mathematics and the following Physics courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Course Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 516</td>
<td>Electromagnetic Phenomena</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 518</td>
<td>Introduction to Condensed Matter Physics</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 529 &amp; PHYS 530</td>
<td>Modern Optics and Modern Optical Physics and Spectroscopy</td>
<td>2</td>
</tr>
<tr>
<td>PHYS 531</td>
<td>Quantum Mechanics I</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 532</td>
<td>Quantum Mechanics II</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 611</td>
<td>Statistical Mechanics</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 612</td>
<td>Advanced Statistical Mechanics</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 661</td>
<td>Solid State Theory I</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 662</td>
<td>Solid State Theory II</td>
<td>1</td>
</tr>
</tbody>
</table>

Courses from other departments may be used provided they have a clear focus on mathematical reasoning and techniques and have been pre-approved. Independent studies cannot be used in this category.

- **Electives:** Any remaining courses approved by your faculty advisor may fulfill this category.
- **10 CUs of Research:** Students may use up to two Independent Study units (ESE 899) to fulfill this requirement. Independent Study units are not required. Additional Research Units (999) may be taken in order to maintain a full-time status (see below). Students who have completed their course work will register for 3 CUs of Research Units per semester to maintain full-time status.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

**Material Science and Engineering, PhD**

While the field of materials science has evolved from materials formed from metals, ceramics, polymers and their various composites, in recent years there has been increasing focus on creating novel nanostructured materials, for instance by taking inspiration from nature. The new fields of nanotechnology and biomaterials are providing materials scientists with an entirely new palette of molecular, organic, biological and inorganic building blocks to design and assemble nano-engineered materials with unique functionalities. The research and academic programs in MSE at Penn Engineering reflect these exciting new developments and our goal is to provide students enrolling in our programs with a broad and multidisciplinary training so that they can be part of this materials revolution and contribute to solve some 21st century challenges.

For more information: [http://www.mse.seas.upenn.edu/current-students/masters/doctoral-degree.php](http://www.mse.seas.upenn.edu/current-students/masters/doctoral-degree.php)

View the University’s Academic Requirements for PhD Degrees (p. 1484).
Required Courses

Students are required to take at least 10 graduate level courses, including courses outside of their research area to gain a broader understanding of materials science and engineering. Doctoral students with a Master’s degree may transfer up to eight credits as course units to the Ph.D. program upon the approval of the Graduate Group Chair. However, a maximum of five transferred courses count toward the 10 courses required for the Ph.D. program.

Electives

Select three approved non-core courses 1
Select one Research Credit course
Select three additional Graduate Level courses 2

1 Non-core courses may be selected from offerings within MSE and other departments in SEAS, as well as the physical, biological, and mathematical sciences.
2 Courses must be at the 500 level or greater.

The Qualifying Examination will be held at the end of May after the second semester.

Mechanical Engineering and Applied Mechanics, PhD

The PhD program is a dynamic, hands-on and research-focused degree program. Overseen by the Graduate Group in Mechanical Engineering and Applied Mechanics, students interact closely with faculty to pursue a degree tailored to their research interests. Each student’s course of study is selected with the help of his or her advisor and is approved by the Graduate Group Chair. Dissertation research is guided by a faculty research advisor and a small committee of faculty with interests and competence in areas related to the dissertation.

The Ph.D. requirements include the completion of a minimum of 10 course units of graduate level coursework beyond the undergraduate program with a grade-point average of at least 3.0, satisfactory performance in the Ph.D.-related exams, presentation of a departmental seminar, completion of the teaching practicum, and the submission and successful defense of an original and significant dissertation. The milestones in the PhD program are noted in the PhD Handbook.

For more information: http://www.me.upenn.edu/prospective-students/doctoral/degree-overview.php

View the University’s Academic Requirements for PhD Degrees (p. 1484).

2018-19 Catalog | Generated 02/28/19
• Responsible Conduct of Research in Engineering workshop in the first year (EAS 900 Responsible Conduct for Research in Engineering)

• Three semesters of Teaching Practicum (MEAM 895 Teaching Practicum; normally taken in 3rd, 4th and 5th semesters)

• Six semesters of the MEAM Seminar (MEAM 699 MEAM Seminar)

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

School of Nursing

Penn Nursing offers a number of resources and experiences not found at most other schools, including a state-of-the-art simulation lab with mannequins that respond as patients would, classrooms with the latest hospital-based electronic medical records (EMR) technology, and clinical experiences in The Children's Hospital of Philadelphia and the Hospital of the University of Pennsylvania, two of the nation's best hospitals. Penn Nursing is a premier academic and research institution renowned for advancing the frontiers of nursing science and patient care. Our students learn from the thought leaders in nursing research, education, and practice who ensure Penn Nursing remain one of the top schools of nursing in the world. At Penn Nursing, students become part of the next generation of healthcare leaders, prepared to care for patients, to conduct landmark research, and to make new strides in healthcare management and health policy.

Learn more about our history: http://www.nursing.upenn.edu/about/history/

Learn more about our school leadership: http://www.nursing.upenn.edu/about/our-leadership/

Mission

The mission of the University of Pennsylvania School of Nursing is to make a significant impact on health by advancing science, promoting equity, demonstrating practice excellence, and preparing leaders in the discipline of nursing.

Philosophy

The mission of the School of Nursing is aimed at meeting the health needs of society in a global and multicultural world. To this end, scholarship, research, education, and practice are integrated to create a culture of inquiry that values intellectual curiosity and diversity, and where faculty, clinicians, staff, and students thrive and learn from one another.

Scholarship and Research

We believe that integrating the arts and sciences is the basis for nursing knowledge and the framework for nursing practice and scholarship. Nursing knowledge encompasses empirical, philosophical, historical, ethical, and personal ways of knowing and is fundamental to the advancement of professional practice. Scholarship encompasses more than research, but also the integration of research into practice and health policy formation and the advancement and dissemination of nursing knowledge. Research is integral in every educational program and strengthened by participating in and contributing to the rich scholarly environment of the University and across national and international health policy organizations.

Nursing is scientifically based and carried out autonomously, as well as interdependently. The focus is development, dissemination, and utilization of knowledge about nursing actions that promote positive changes in patients, systems of care, and the larger society. Nurses collaborate with individuals, families, groups, communities, and other professions to achieve health and well-being for all people.

The School of Nursing is responsive to numerous influences that shape health care, including evolving models of care, consumer advocacy, demographic changes, and advances in science and technology. The faculty are committed to a scholarly agenda that pushes the boundaries of nursing science, in turn influencing education and shaping policy and practice.

Education

Education at the University of Pennsylvania facilitates the intellectual, personal and social development of students as they identify and attain academic and professional goals. Our educational environment fosters independence, ethical behavior, creative and critical thinking, increased breadth of knowledge, and sensitive interactions concerning cultures and viewpoints.

Programs, from baccalaureate to post-doctoral and lifelong learning, are enriched by the varied needs and perspectives of a culturally diverse population, as well as pressing needs for nursing leaders in a rapidly changing world. These leaders will be the clinical experts, health policy shapers, and nursing scholars of the future.

The baccalaureate program, including traditional and second degree students, focuses on professional nursing practice across the continuum of health care, with particular emphasis on vulnerable populations. The curriculum is dynamic and includes leadership skills, interdisciplinary collaboration, and content and clinical experiences that emphasize evidence-based practice. The curriculum also reflects changes in science and technology.

The Master’s programs focus on advanced practice nursing and administration, with an emphasis on specialty and subspecialty practice in concert with changing societal needs. Graduate nurses are prepared for advanced practice that creatively combines knowledge and skills in critical thinking and expert interventions across the lifespan. Special attention is given to clinical decision-making and management skills, as well as methods of evaluation of quality and cost of care.

Pre- and post-doctoral education is dedicated to advancing the discipline of nursing through research. The goal is to equip students with a foundation in nursing and a field of concentration to make substantive contributions to scholarship. Strong faculty mentorship is integral to the development of a critical cadre of future researchers, academicians, and leaders, nationally and internationally.

Practice

The primary goal of nursing practice is to optimize care and outcomes for patients and their family members. The practice of nursing is the foundation for informing educational pedagogies and for the generation of discipline-specific research. Practice is defined as the diverse and varied construction, application, and evaluation of knowledge and the action within the discipline of nursing, particularly for the recipients of nursing care. We believe it is the responsibility of academic nursing to
serve as the fulcrum of modeling the intentional integration of education, research, and clinical care to improve the delivery of quality health services.

Nursing is an evidence-based, caring profession that improves the health and quality of life for individuals, families, and communities throughout the world. Nursing possesses a unique body of knowledge that guides its practice in both autonomous and collaborative health care settings. Penn Nursing serves as the model for nurses who care for society’s needs in a global and multicultural context. Thus at Penn, we seek to promote health and alleviate suffering in every part of the world by preparing nurses to be responsive to the health-related issues and preferences, values, and needs of all societies. Our goals are to improve and maintain optimal health, prevent disease, enhance the quality of recovery from illness, and support patients and families to cope with acute and chronic health problems. Penn Nursing serves as a model to direct the advancement of the translation of evidence-based knowledge toward culturally competent models of care.

Revised Mission and Philosophy approved by the School of Nursing Faculty Senate 2/3/03.

Revised Mission and Philosophy approved by the School of Nursing Faculty Senate 5/7/12.

Revised Practice statement approved by the School of Nursing Faculty Senate 4/8/13.

Revised Mission approved by the School of Nursing Faculty Senate 10/5/15.

The Office of Nursing Research (http://nursing.livewhale.net/research/), along with our four research centers (http://nursing.livewhale.net/research/research-centers/) and partnerships across Penn, provide students with resources and support that are virtually unparalleled in our field. Students, from undergraduates to doctoral students, have numerous opportunities to engage in research and work alongside some of the most recognized researchers in their fields.

For more information, visit: https://www.nursing.upenn.edu/research/.

Accreditation is a hallmark of educational quality, and we are proud to share our credentials on our website: http://www.nursing.upenn.edu/about/accreditation/.

Penn Nursing students benefit from a dual advising structure. All students are assigned a faculty advisor and have access to the professional staff advisors in the Office of Student Affairs.

For more information, visit: http://www.nursing.upenn.edu/student-services/advising/accelerated/.

Nursing, PhD

The mission of the doctoral program of the University of Pennsylvania School of Nursing is to develop scholars of the discipline of Nursing capable of building a program of research that advances nursing knowledge and contributes to the health of individuals, families, and communities.

Graduates of this program will serve as leaders at the forefront of nursing research and its translation into practice locally, nationally, and globally. These nurse scientists will create new knowledge and be informed by a nursing perspective to enhance health and to develop and test innovations to improve outcomes of healthcare, with a priority on populations at greatest need.

The foundation of program success is the substantive match between the student and the faculty advisor. The educational experience focuses on the processes of exploring and examining substantive bodies of knowledge. The researcher’s development is fostered through exposure to an array of philosophic and methodological aspects of nursing and related basic and applied disciplines.

Our full-time PhD students are fully funded for the first three years, which includes a living stipend and covers tuition, fees, and health insurance.
For more information: https://www.nursing.upenn.edu/academics/doctor-of-philosophy-in-nursing-phd/

View the University's Academic Requirements for PhD Degrees (p. 1484).

Curriculum
A total of 22 course units are required for graduation. Students who have completed a related Masters degree prior to starting the PhD program will be awarded 8 course units of transfer credit toward the degree requirements.

Full-time students will take three to four courses each fall and spring semester. Most students complete their coursework within three to four years and then will be on dissertation status until the final dissertation defense.

Program Milestones
- Qualifying Examination/MS-General Examination
- Candidacy Examination
- Dissertation Status
- Dissertation Defense

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Sample Plan of Study
Students who enter the PhD program with a master’s degree receive a 8 course unit waiver toward the 22 course unit requirement. Students will take 3-4 courses per semester for the first two to three years before moving into the dissertation phase of the program.

School of Social Policy & Practice
The University of Pennsylvania School of Social Policy & Practice, formerly Penn Social Work, is noted for its commitment to social justice and to educating students that will take an active role in the struggle against oppression. The School has articulated a social philosophy that shapes the educational programs it offers, the research it undertakes, and the leadership it provides to the profession. This statement of social philosophy – Penn Approach (http://www.sp2.upenn.edu/degree-programs/master-of-social-work/overview/the-penn-approach) – is first and foremost an evolving philosophy. It reflects the faculty’s commitment to introduce students to a variety of perspectives related to social work practice, nonprofit leadership, social policy, research, racism, and oppression, and the nature of human behavior in the social environment.

The Penn Approach to the education of future social workers includes at least two major perspectives:

- a clear understanding and respect for the past and a realistic interpretation of current professional issues;
- a vision of the future that reflects a commitment to social change based on the values and philosophy of the School.

The School offers a curriculum that integrates the development of practice skills with research, the study of specific social problems and social policies, theories and methods of social change, knowledge about human relationships, and individual and societal responses to institutional racism and other "isms."

The University of Pennsylvania School of Social Policy & Practice is educating tomorrow's leaders to confront societal problems in a time of diminishing resources, to provide leadership to non-profit organizations, to design and facilitate real-world solutions while fostering meaningful societal change. Students can also learn about the integration of innovative technology to enhance the delivery of social services, research on welfare to work initiatives, faith-based services, and other groundbreaking faculty research.

Learn more about SP2's history: https://www.sp2.upenn.edu/about/sp2-history/

Vision
The passionate pursuit of social innovation, impact, and justice.

Mission
The School of Social Policy & Practice contributes to the advancement of more effective, efficient, and humane human services through education, research, and civic engagement. In pursuit of this mission, our theory-based masters and doctoral programs in social work, social welfare, nonprofit leadership, and social policy encourage students to
think and work across disciplinary lines and cultures as well as across national and international boundaries. The pursuit of social justice is at the heart of the School’s knowledge-building activities. Our innovative educational and research programs reinforce our vision of active student engagement in their own learning as well as that of social agencies and larger social collectivities organized at the local, national, and international levels.

Diversity & Inclusion
Throughout its history, the School of Social Policy & Practice (SP2) at the University of Pennsylvania has been committed to understanding and embracing diversity in its countless forms. With our Master of Social Work (MSW) program (http://www.sp2.upenn.edu/degree-programs/master-of-social-work), the first program of its kind to organize its curriculum around the construct of institutional racism, two other expanding and ambitious masters programs (in Social Policy (http://www.sp2.upenn.edu/degree-programs/ms-in-social-policy) and Nonprofit Leadership (http://www.sp2.upenn.edu/degree-programs/ms-in-nonprofit-leadership)) that organically complement and extend our MSW offering, and two exciting doctoral programs (a clinical Doctorate in Social Work (http://www.sp2.upenn.edu/degree-programs/doctorate-in-clinical-social-work) and a PhD in Social Welfare (http://www.sp2.upenn.edu/degree-programs/phd-in-social-welfare)) that produce some of the most sought-after thought leaders in our fields, SP2’s mission is to think critically, thoroughly, and holistically about the many factors that impact people’s everyday lives and life chances.

As SP2 has evolved, so too has the understanding of diversity that grounds and enriches its work. Our historic commitment to racial and economic justice has in recent years intersected in vital ways with emerging commitments individuals and communities marginalized along other axes of oppression. Individuals and organizations across SP2 have mobilized to create curricular, interpersonal, and structural space for the consideration of LGBTQ+ needs and experiences and the elevation of LGBTQ+ voices both within and beyond the School. This understanding and this commitment is about striving to consciously honor the complex and multifaceted experiences of self and community that shape our lives together.

SP2 strives to be a space of principled inclusivity, valuing differences of opinion and attempting to foster an institutional environment where we all think openly, honestly, reflectively, and deeply about the questions and concerns that both unite and divide us. For our faculty, students, and staff, diversity is a multifaceted and intersectional concept that includes careful treatment of questions about how differences linked to race, sexuality, gender identity, religion, ideology, mental illness, ethnicity, class, age, and so much more systematically privilege some and marginalize others. The issues that we grapple with—from homelessness and racism to prisoner re-entry and poverty, from responsible philanthropy and economic mobility to aging and child welfare—are some of the biggest in the academy and in society, and many seem intractable. But we also recognize that we have the best chance of doing justice to these social issues by embodying a truly diverse and inclusive space from which we can attempt to re-imagine our social world.

Promoting social justice and working against forces of oppression have been central to SP2’s efforts since the founding of the MSW program over a century ago; they ground our work to this day, challenging us all—faculty and students, alumni, staff, and community—to grow together into new knowledge and to grapple with ever-evolving examples of injustice and inequity. Understanding, respecting, and celebrating diversity is essential to SP2’s educational mission and values, and we are committed to helping students learn how to have difficult conversations, listening without pre-judgement, and addressing social problems from diverse perspectives. It is a commitment that we take seriously and one that we hope to nurture in our students as they become empowered to work for a more just, equitable, and compassionate world.

For more information: https://www.sp2.upenn.edu/about/diversity-inclusion/

Faculty & Research
The SP2 faculty upholds Penn’s commitment to engage locally and globally. Internationally regarded for producing cutting-edge research, our distinguished scholars, practitioners, and policy advisors bring a broad range of real-world expertise and interdisciplinary focus to the classroom setting. The research of the SP2 faculty is transforming policy and shaping best-practices on international, federal, and local levels. The faculty’s important research and activism stretch across the social sciences and the humanities in ways that link nuanced methodological inquiries and important research questions to attempts at real-world problem-solving.

SP2 faculty members are readily available to students. They are inspirational instructors and supportive mentors and advisors, helping students to approach problems in innovative and creative ways.

Course Units 4.5

Total Course Units 20

¹ A minimum of four course units of pre-program credits will be granted to applicants with an appropriate master’s degree in social work or a related profession or allied discipline.

² At least four of the elective courses in the advanced curriculum must be taken in departments and units of the University other than the School of Social Policy & Practice. Students are encouraged to use electives to develop content and methodological expertise in their area of research. These courses must relate to the substantive content that students select for their individualized program of study, and must be listed by the University as at or above the 500 level. In some cases, students are allowed to take graduate-level courses at other universities. The student’s advisor will guide the student in the selection of elective courses.

The Wharton School

In 1881, American entrepreneur and industrialist Joseph Wharton established the world’s first collegiate school of business at the University of Pennsylvania.
Wharton's pioneering vision was to produce graduates who would become "pillars of the state, whether in private or in public life." The Wharton School maintains a long tradition of educating visionary business leaders in academia, business, government, and not-for-profit organizations.

Today, Wharton has expanded the scope of this vision to become the most comprehensive source of business knowledge in the world — with over 225 faculty members, 95,000 alumni, 5,000 students across 10 academic departments, 20 research centers, and more than 9,000 executive education participants annually.

Learn more about our history: https://www.wharton.upenn.edu/about-wharton/

Learn more about our school leadership: https://www.wharton.upenn.edu/senior-leadership/

Mission and Philosophy

Founded in 1881 as the first collegiate business school, the Wharton School (https://www.wharton.upenn.edu) of the University of Pennsylvania is recognized globally for intellectual leadership and ongoing innovation across every major discipline of business education. With a broad global community and one of the most published business school faculties, Wharton creates economic and social value around the world. The School has 5,000 undergraduate (https://undergrad.wharton.upenn.edu), MBA (https://mba.wharton.upenn.edu), executive MBA (https://executivemba.wharton.upenn.edu), and doctoral (https://doctoral.wharton.upenn.edu) students; more than 9,000 participants in executive education (http://executiveeducation.wharton.upenn.edu) programs annually and a powerful alumni network (https://alumni.wharton.upenn.edu) of 95,000 graduates.

Wharton Doctoral Programs train students to become academic thought leaders. As leading research scholars, students will develop the ideas that advance academic knowledge and generate innovations in business theory and practice. Students will work closely with Wharton faculty to learn the practice of rigorous research and use the unparalleled resources of the School and University to define their impact as a scholar.

Research Environment

Wharton is part of the University of Pennsylvania, an R1 research institution with deep commitment and broad resources to support student and faculty research.

Research That Matters

Our faculty will tell you that producing high-quality research is critical to your success. It's the core of the doctoral experience and academic life. The best way to understand what our students do is to browse their research on each program of study site (https://doctoral.wharton.upenn.edu/programs-of-study), learn about the awards and honors (https://doctoral.wharton.upenn.edu/student-awards) they receive, and read about their career placements (https://doctoral.wharton.upenn.edu/career-placement) at top universities and institutions.

Centers for Knowledge

Through Wharton’s 10 departments (https://www.wharton.upenn.edu/departments) and 20 research centers and initiatives (https://www.wharton.upenn.edu/research-centers), students have access to faculty within a deep and broad environment that fosters their intellectual growth. As students’ ideas take shape and even change, they can build on their foundational knowledge base with areas such as entrepreneurship and leadership to health care economics and business ethics.

Explore Wharton Faculty (https://doctoral.wharton.upenn.edu/faculty)

Cross-Disciplinary Research

The faculty's diverse research agendas encourage students to follow new ideas that go across boundaries — not just at Wharton but also at Penn's other globally renowned graduate and professional schools. At Penn, students find unparalleled opportunities to work with leading faculty in such disciplines as law, engineering, medicine, economics, sociology, psychology, and mathematics.

Diversity and Inclusion

The Wharton Doctoral Programs is committed to the belief that a diverse range of perspectives is essential to fostering breadth of thought and knowledge. The environment is meant to provide equal opportunity and equal treatment for all students, regardless of age, gender, race, ethnicity, national origin, religion, sexual orientation, disability, and marital or parental status. We take seriously our responsibility to promote responsible conduct by all students and to make institutional arrangements that create an environment of tolerance and that supports participation and advancement by individuals from diverse backgrounds.

- Applied Economics, PhD (p. 339)
- Ethics and Legal Studies, PhD (p. 340)
- Finance, PhD (p. 341)
- Health Care Management & Economics, PhD (p. 342)
- Management, PhD (p. 342)
- Marketing, PhD (p. 344)
- Operations, Information and Decisions, PhD (p. 346)
- Statistics, PhD (p. 347)

Professional and Other Degree Programs

- MBA program (http://mba-inside.wharton.upenn.edu)

Accounting, PhD

The Accounting PhD program trains students to do rigorous research in accounting, a specialized area of financial economics. The program is highly analytical and quantitative. We look for strong undergraduate preparation in microeconomics and mathematics, while some prior accounting or finance training at the undergraduate or graduate level is an advantage. Institutional understanding of how accounting information is used by capital market participants and/or within firms is useful and best obtained through relevant work experience, but is not required of applicants.

Close working relationships with faculty members provide an excellent learning experience while at Wharton and can continue throughout the student's career. Our program provides students with opportunities to interact with faculty and get started on relevant research early in the
program. Required research elements include the first-year research assistantship and the first and second year summer research papers.

For more information: https://doctoral.wharton.upenn.edu/programs-of-study/accounting/

### Sample Plan of Study

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

---

1 A one-year graduate level sequence in Econometrics/Statistics is required. Accounting PhD students are encouraged to take STAT 515/516. Students may, with the approval of the Accounting PhD coordinator, satisfy this requirement with ECON 705/706. In extraordinary cases, with approval of the Accounting PhD coordinator, a student may satisfy the Econometrics/Statistics requirement with other course sequences.

---

### Applied Economics, PhD

Combining the faculties of the departments of Real Estate and Business Economics & Public Policy, Wharton’s Applied Economics program leverages the breadth and depth of its faculty to prepare students for careers doing frontier theoretical and empirical research. Students can focus on a variety of areas including Behavioral Economics, Development Economics, Energy and Environmental Economics, Industrial Organization, Market Design, Public Economics, Risk Management, and Urban Economics and Real Estate. Students may also develop an inter-disciplinary focus by taking courses and working with...
faculty in some of the other departments at Wharton such as Finance, Health Care Management, Management, and Marketing.

For more information: https://doctoral.wharton.upenn.edu/programs-of-study/applied-economics/

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Required Courses
The course of study for the Ph.D. in Applied Economics requires the completion of 15 graduate course units. The common core consists of 3 theory courses and 3 statistics/econometrics courses. Students are also expected to master two field areas by passing two courses in each (total of 4 courses units). The remaining course units necessary to achieve 15 are split between the mandatory graduate student research seminars and other electives.

</tbody>
</table>

Core Requirements

Select one of the following:

- ECON 702 Macroeconomic Theory I
- ECON 704 Macroeconomic Theory II
- FNCE 924 Intertemporal Macroeconomics and Finance

Electives

Select three additional electives

1. Students may also take STAT 921, STAT 520, and STAT 521.
2. Taken in the Spring and Fall of years 2 and 3 for 0.5 cu each

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Ethics and Legal Studies, PhD

The Ethics & Legal Studies Doctoral Program at Wharton focuses on the study of ethics and law in business. It is designed to prepare graduates for careers in university teaching and research at leading business schools, law schools, and other programs. Faculty and student interests range over topics including international business ethics and human rights, corporate governance, social impact, environmental law and policy, securities, normative political theory, negotiations, and corporate criminal law.

For more information: https://lgst.wharton.upenn.edu/programs/phd/

View the University’s Academic Requirements for PhD Degrees (p. 1484).

Required Courses
The course of study for the Ph.D. requires the completion of sixteen graduate course units, including courses in statistics. Some graduate-level credit from courses at other universities may transfer to Wharton.

MGMT 900  Economic Foundations of Management  1
Ethical Theory  2

Major Disciplinary Cluster
Select five courses in one of the following disciplines:  5
  Management
  Law
  Philosophy

Additional Coursework
Select two additional courses  2
Total Course Units  16

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

Finance, PhD

The department prepares students for careers in research and teaching at the world’s leading academic institutions, focusing on Asset Pricing and Portfolio Management, Corporate Finance, International Finance, Financial Institutions and Macroeconomics.

Wharton’s Finance faculty, widely recognized as the finest in the world, has been at the forefront of several areas of research. For example, members of the faculty have led modern innovations in theories of portfolio choice and savings behavior, which have significantly impacted the asset pricing techniques used by researchers, practitioners, and policymakers. Another example is the contribution by faculty members to the analysis of financial institutions and markets, which is fundamental to our understanding of the trade-offs between economic systems and their implications for financial fragility and crises.

Faculty research, both empirical and theoretical, includes such areas as:

- Structure of financial markets
- Formation and behavior of financial asset prices
- Banking and monetary systems
- Corporate control and capital structure
- Saving and capital formation
- International financial markets

2018-19 Catalog | Generated 02/28/19
Health Care Management & Economics, PhD

The program combines intensive training in health care management and economics coupled with advanced training in a traditional business discipline.

Our program provides thought leadership and policy development in the following areas of distinction:

- Value of technology and innovation
- Health insurance design and reform
- Design and impact of incentives in numerous health industry contexts
- Competition and collaboration across the value chain
- The broad interprofessional/multidisciplinary work of the Leonard Davis Institute of Health Economics

What is doctoral work like? Our students are individuals who bring a strong background in microeconomic theory, an advanced teaching of econometric and statistical techniques, a comprehensive analysis of both health economics and health care services research, and grounding in management strategy theory and research. The doctoral program complements the course work with numerous opportunities to collaborate with faculty members in research projects exploring a wide variety of topics in the health economics and management fields.

For more information: https://doctoral.wharton.upenn.edu/health-care-management-economics/

View the University’s Academic Requirements for PhD Degrees (p. 1484).

- Admission to Candidacy
- Formulation of Research Topic

**Fourth Year and Beyond**

- Continued Research
- Oral Examination
- Dissertation

**Management, PhD**

Wharton’s Management program prepares students to apply rigorous social science disciplinary theory and research methods to the demands of current management and leadership challenges in the public and private sectors. Our faculty has a broad range of interests ranging from
the behavior of individuals, teams and groups to organizational strategy of multinational firms. Major areas of faculty research currently include:

- new venture formation, growth, and corporate entrepreneurship;
- human resources and competitiveness;
- emotions, identity, creativity and motivation;
- political and social influence strategies;
- technology and practice adoption, diffusion, and transfer within and across organizations;
- organizational learning and adaptation;
- and the strategic management of complementary resources and capabilities within an organization, alliance, network or ecosystems.

Each student draws on the faculty’s diverse expertise and varied interests to develop a program uniquely suited to his or her interests frequently spanning the formal specializations noted above. The program encourages students to gain research experience by working closely with multiple faculty on a variety of projects beginning with a research assistantship assignment in the first year with the hope of entering the job market in year 4 or 5 with multiple research papers in the publication pipeline.

Marketing, PhD

The Wharton doctoral program offers students an unmatched interdisciplinary environment within which to generate creative ideas and hypotheses and to develop the analytic skills to evaluate them.

Faculty members are active in diverse research areas that connect to initiatives and centers both within Wharton more broadly, and other departments within the university.

For more information: https://marketing.wharton.upenn.edu/program-requirements/

For more information about the Joint Doctoral Degree in Marketing and Psychology: https://marketing.wharton.upenn.edu/joint-doctoral-degree-in-marketing-and-psychology/

Fourth Year

**MKTG 995** Dissertation
**Continued Research**
**Oral Examination**

* The exact sequence can vary from student to student. For example, students may select different economics and statistics sequences to best meet their personal needs.

**Operations, Information and Decisions, PhD**

What Wharton's program in Operations, Information and Decisions emphasizes research on real management problems and maintains a balance between theory and implementation. The faculty trains scholars in decision making, information and operations/operations research.

Our faculty leads in the development and application of an innovative blend of analytical and empirical approaches to important problems facing the private and public sectors, including:

- supply chain management;
- service delivery systems;
- product development and innovation processes;
- decision support systems;
- information-based strategy;
- systems development and implementation;
- risk and environmental management; and
- behavioral approaches to individual and managerial decision making.

Our PhD program provides a unique mix of behavioral, economic, statistical and analytical training to its students, and its strength is reflected in our students' record of placement and achievement.

**3 Areas of Specialization**

**Decision Making (DM)**

What factors influence human judgment and decision-making? Why and when are people prone to judgement errors and biases? What kinds of interventions will help people make better decisions, or improve human welfare? Our interdisciplinary Decision-Making PhD program focuses on training students to conduct and publish academic research that helps to answer these important questions. Along the way, students receive rigorous quantitative/statistical training, and acquire a deep understanding of the literature on judgment and decision-making, significant exposure to the fields of psychology, economics, organizational behavior, and marketing.

**Information Systems (IS)**

The IS track covers a broad range of research interests. Students interested in information and decision technology (IDT) focuses on the analytical and information technology-based methods for managing complex organizations. Those interested in information strategy and economics (ISE) focus on understanding the strategic aspects of information and information management.

**Operations Management / Operations Research (OM / OR)**

OM/OR focuses on the processes that define an organization's outputs, as well as the methods commonly used to analyze these processes.

Students specializing in OM are interested in a wide range of functions and organizational types, including operations strategy, product design, process design, technology management, capacity planning, inventory control, supply chain management and service system planning.

Students interested in OR focus more on the application of mathematical models to these areas.

### Statistics, PhD

Wharton's PhD program in Statistics provides the foundational education that allows students to engage both cutting-edge theory and applied problems. These include problems from a wide variety of fields within Wharton, such as finance, marketing, and public policy, as well as fields across the rest of the University such as biostatistics within the Medical School and computer science within the Engineering School.

Major areas of departmental research include:

- analysis of observational studies;
- Bayesian inference, bioinformatics;
- decision theory;
- game theory;
- high dimensional inference;
- information theory;
- machine learning;
- model selection;
- nonparametric function estimation; and
- time series analysis.

Students typically have a strong undergraduate background in mathematics. Knowledge of linear algebra and advanced calculus is required, and experience with real analysis is helpful. Although some exposure to undergraduate probability and statistics is expected, skills in mathematics and computer science are more important. Graduates of the department typically take positions in academia, government, financial services, and biopharmaceutical industries.

For more information: https://statistics.wharton.upenn.edu/programs/phd/curriculum/

View the University's Academic Requirements for PhD Degrees (p. 1484).

The total course units required for graduation is 13.

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2018 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.

### Academic Resources

Penn offers a wide variety of resources, offices, and programs for graduate students to support them in all aspects of their Penn experience. The following list highlights some of the most commonly used resources and areas of interest relating to academics and educational opportunities.
• Academic Calendar (p. 348)
• Advising & Mentoring PhD Students (p. 351)
• Career Services (p. 357)
• Doctoral Dissertation Manual (p. 357)
• Ethics and Original Research Handbook (p. 357)
• Exchange Scholar Program (p. 358)
• Fontaine Society (p. 358)
• Graduate Student Center (p. 358)
• Graduation (p. 358)
• Guide To Thriving at Penn (p. 360)
• Information for International Students (p. 360)
• Information for Students with Children (p. 360)
• Learning Resources (p. 361)
• Libraries (p. 361)
• Master’s Thesis Style Guide (p. 361)
• Wellness (p. 362)

Academic Calendar

Notes:

Graduate and professional programs follow their own calendars with different registration/drop deadlines, which are typically available on the website of the school or program. The College of Liberal and Professional Studies may have different registration/drop deadlines. Please visit the LPS website, www.sas.upenn.edu/lps/, for more information.

Rosh Hashanah, Yom Kippur, the first two days of Passover and Good Friday are religious holidays that affect large numbers of University community members and that fall during the academic year. View the University’s policy regarding these and other holidays (p. 1559).

The University’s Three-Year Academic Calendar is subject to change. In the event that changes are made, the latest, most up-to-date version will be posted to the Almanac’s website (https://almanac.upenn.edu/penn-academic-calendar).

Advising & Mentoring PhD Students
Guidelines for Students, Faculty and Administrators at the University of Pennsylvania

Table of Contents
- Introduction (p. 351)
- Choosing a Dissertation Advisor (p. 352)
- Expectations, Provision of Structure, and Timelines (p. 353)
- The Dissertation Committee (p. 353)
- Open Access Publication of Dissertations (p. 353)
- Expectations & Responsibilities of the Student, Advisor and Graduate Group (p. 353)
- Conflict Resolution (p. 355)
- Seeking Support & Reporting Concerns (p. 355)
- Appendix A: Skill Building and Career Development (p. 356)
- Appendix B: Policies, Rules & Resources (p. 357)

Introduction
This publication is being distributed to graduate students and faculty members throughout the University of Pennsylvania. It is intended to provide graduate students, faculty, and graduate groups with guidelines that promote good mentoring relationships between faculty advisors and graduate students. And by clarifying expectations and responsibilities, we hope to reduce frustration and conflicts, which should foster more productive research experiences for our doctoral students.

While models of mentoring relationships can vary across graduate programs at the University of Pennsylvania, there are general guidelines, policies, and approaches that apply everywhere. These guidelines provide students with direction on choosing an advisor, establishing a dissertation committee and maintaining productive working relationships. Students and faculty can find information about their respective roles and responsibilities in this important relationship as well as advice on conflict resolution and links to important policies.

This publication, based on one produced at the University of Toronto, is intended to promote conversations between faculty and students regarding their mutual expectations. While it focuses almost exclusively on the dissertation stage, recent studies indicate that good advising and mentoring that begin early in the student's career facilitates expeditious degree completion. Generally, each graduate program will provide a program-specific handbook detailing course and examination requirements, regulations, procedures and expectations of both students and faculty from matriculation through graduation. Our hope is that this publication will support that effort and can serve as a starting point for further action.

Beth Winkelstein, Vice Provost for Education and The Council of Graduate Deans

Sections of this publication are based on “Graduate Supervision Guidelines for Students, Faculty and Administrators” (2002) produced by the School of Graduate Studies at the University of Toronto. We are grateful for their willingness to allow us to use and revise this work.
Comments on this publication may be directed to the Vice Provost for
Education at provost.ed@upenn.edu.

University of Pennsylvania
Spring 2018

Choosing a Dissertation Advisor

Introduction

While some graduate groups may assign an advisor to a student upon admission to the program, in many graduate groups the responsibility for finding a dissertation advisor rests with the student. The choice of a faculty member who will supervise the dissertation work required to fulfill degree requirements is one of the most critical decisions a graduate student will make. A student will spend several years working with the faculty member of choice, and that choice will significantly affect the direction of the student’s career. Choosing a dissertation advisor, therefore, is an extremely important decision for doctoral students, although it is not immutable, as will be discussed later.

A student undertaking dissertation work needs an advisor who will be not only academically competent in a particular area but also willing to act as the student’s advocate when necessary. It is important that the student be able to work and communicate effectively with the advisor and not feel overwhelmed or intimidated in the relationship. Dissertation work can be lonely and isolating. Each student requires the guidance of someone who will stimulate thought, who has sufficient interest in the student’s topic to produce new insights jointly, and who will challenge the student to think in a novel manner about the research.

Obtaining Information on Potential Advisors

Students who are responsible for finding their own advisor should be familiar with the University rules (p. 1484) about who can advise dissertation research and serve on the dissertation committee. Several resources and strategies can help students identify an appropriate faculty advisor, as follows.

The graduate group website or handbook is a valuable source of information on potential advisors. Many graduate groups have developed websites that profile affiliated faculty members, including their areas of research, recent publications, and other academic activities. Literature searches can provide further information on the publications and preferred journals of particular faculty members. The graduate group chair can also provide valuable advice on potential advisors and can help students to become familiar with any specific graduate group policies on supervision.

Students can get to know potential advisors by taking a course, doing a lab rotation, acting as a teaching assistant, and/or attending seminars and other presentations by the faculty member.

Graduate students working with the potential advisor are an invaluable source of information. Students who are currently working or have worked with a particular advisor can be asked about their experience with that advisor and about the advisor’s expectations and working methods. Getting to know these students is also useful because with anyone choosing to work with a faculty advisor would likely have close, future interactions with their students. Talking to multiple students is always encouraged given the possibly strong and differing opinions one might hear.

Students should make an appointment to see potential advisors. Meeting a potential advisor is an essential step in determining whether a faculty member would be a good fit in terms of mentoring and interpersonal style and research interests. The following is a list of issues that might be covered in such a meeting:

- How many graduate students do you advise? (Students may not want to pick a faculty member who has too many students already.)
- Typically, how often do you meet with your students?
- Typically, how much time do you expect students to take to complete their dissertation?
- How will we agree upon my research topic?
- Are there sufficient funds available for the research project?
- What will be the sources of my stipend/funding? What are ways you can provide assistance for finding additional funding if/when my stipend expires?
- What level of independence is expected of your graduate students?
- Is there any specific knowledge I need to have before starting to work with you?
- Will I have the opportunity to attend conferences? Publish papers? Present work at colloquia? Are there funds available for me to do so?
- Are you planning a sabbatical leave soon? If so, what arrangements for continued supervision will be made during your absence?
- What opportunities would I have in this area of research when I graduate?
- How do you typically assist students on the job market?
- Will guidelines be drawn up for working together?
- How will I receive feedback on my progress?

These questions are designed to help the student and the potential advisor determine whether a good match exists. Where appropriate, the student may also want to ask about the order of authorship on publications and intellectual property issues.

The choice of a dissertation advisor is a decision to be made with a great deal of care and consideration. Discussion of the topics listed above will also give faculty members a sense of what students expect in terms of meetings, feedback, turn-around time on submitted work, etc. Taking time to explore these issues should result in a productive relationship for both student and advisor that culminates in a piece of original research, completed within a reasonable time period.

Changing Advisors

There may be situations in which a student must change advisors. Some situations are beyond the student’s control; for example, when an advisor leaves the university or otherwise becomes unavailable. In other situations, the student may want to choose a different advisor; for example if the focus of the research project changes to something outside of the current advisor’s expertise, or if works styles do not mesh well.

In these latter situations, students should understand that while there can be risks in changing advisors, it usually can be negotiated in a positive manner. Students deciding to pursue this option should be sure to consult the graduate group for any specific policies and procedures that apply to changing advisors, and be sure to ascertain if funding may change under a new advisor. Students should always be professional.
and respectful in interactions with the current advisor and potential new advisor, and be certain that another member of the faculty is willing to add them as a new advisee before discussing a change with the current advisor. Students should focus discussions on interests and goals and not on negative incidents or difficulties. The potential new advisor, as well as leaders or other members of the graduate group, may have advice regarding how to broach this change with the current advisor.

**Expectations, Provision of Structure, and Timelines**

The provision of structure by dissertation advisors is crucial at all stages of a graduate student’s work, but is particularly important during the initial phase of dissertation work. It is essential that advisors and students have a shared set of expectations. Each needs to understand the constraints that operate on the other and the effects that these may have on the mentoring relationship. Good advisors make their expectations clear to students on issues such as the need for regular meetings, mastery of methodological skills, conference publications and conference presentations, timelines for degree completion, etc. Once these expectations are clearly outlined, it is much easier to develop a positive, productive relationship.

The following are suggested topics to cover in initial discussions between student and advisor:

- Frequency of contact.
- Preferred communication method (e.g., e-mail, phone calls, Skype, in person).
- Timelines for each stage of the research, including publications and conference presentations.
- Type and frequency of feedback expected.
- Whether students work in the graduate group or at home/library.
- Hours of work.
- Nature of any directed reading program.
- Monitoring, evaluation, and reporting of progress.
- Additional training, fieldwork requirements.
- Any authorship/collaboration or intellectual property issues.
- The establishment and membership of the dissertation committee.

**The Dissertation Committee**

The academic experience is greatly enhanced if faculty members other than the direct advisor are readily and formally available for consultation and discussion with the graduate student. To provide this element of supervision, a dissertation committee should be in place for the Ph.D. student early in the dissertation stage. The graduate group is responsible for monitoring the progress of the student through the dissertation committee, as follows:

- A dissertation committee should consist of at least three faculty members (including at least two members of the graduate group). While some graduate groups require all members of the dissertation committee be members of the graduate group or affiliated department, others encourage/require appointment of a faculty member from another department, to encourage an interdisciplinary perspective. Be sure to review the policy about the composition of dissertation committee (p. 1484) as you are building your committee.

- It is required that the dissertation committee meet with the student, as a committee, at least once per year to assess the student’s progress in the program and to provide advice on future work.
- The committee submits a written report to the graduate group chair, at least once per year, detailing its observations of the student’s progress and its recommendations.
- The student must be given the opportunity to respond to the committee’s report/recommendation and to append a response to the committee’s report.
- Copies of the report shall be given to the student and filed with the graduate group office.

The Graduate Group is responsible for recording the membership of the dissertation committee in the Student Information System (SIS). The graduate division office at the home school will monitor compliance with this requirement through SIS reports and an annual audit of the official student file.

**Open Access Publication of Dissertations**

The culmination of the research project will be a dissertation. All Penn PhD dissertations are published by ProQuest and a hard copy is placed in the Penn Library once the student graduates. Penn also requires open access publication of dissertations in the institutional repository, Scholarly Commons (http://repository.upenn.edu/etd.html). Open access publication provides a much wider audience, can help to market ideas to potential employers, and can help make plagiarism or theft much easier to detect. The open access dissertation will be available via the internet, including full text searching through search engines like Google. The same legal and copyright protections pertain to open access publication as to traditional hardcopy publication.

In cases where papers are in press, patents are pending, or where there are other intellectual property concerns, it may be beneficial to delay publication (commonly referred to as an "embargo"). Students should discuss with the advisor whether a delay in publication is necessary or advisable. If the student and advisor agree that it will be advantageous to embargo the dissertation, embargo preferences can be entered when submitting the dissertation using ETD Administrator. Note that different embargo options are available for traditional publishing (in ProQuest: 6 months, 1 year, 2 years) and open access (in Scholarly Commons: 3 years initially). A request for a three-year delay in open access publication through Penn’s Scholarly Commons will be granted automatically when requested. Requests for additional delays – which must be made in advance of the embargo expiring – require approval by the Graduate Group Chair and in some cases the school’s Graduate Dean or Associate Dean for Graduate Studies.

**Expectations & Responsibilities of the Student, Advisor and Graduate Group**

**Responsibilities of the Student**

Good mentoring practice entails responsibilities not only of the advisor but also of the student. When a student enters a doctoral program, that student commits time and energy necessary for research leading to a dissertation that makes a substantial and original contribution to knowledge. It is the responsibility of the student to conform to University
and program requirements and procedures. Although it is the duty of the advisor to be reasonably available for consultation, the primary responsibility for keeping in touch rests with the student. The student’s responsibilities include the following:

- Becoming familiar with, and adhering to, the rules, policies, and procedures in place in the graduate group, home school, and the University as outlined in available resources such as graduate group student handbooks/web sites and the University’s policies (p. 1484). Of particular importance are rules around Academic Integrity.
- Knowing and following the rules and policies of the graduate group and the University. Adhering to all deadlines and policies regarding registration, leaves of absence, limitations on time and recertification, dissertation submission and graduation (p. 1484).
- Selecting and planning an original research topic that can be successfully completed within the expected time frame for the degree program; in some cases, this will be done in consultation with the thesis advisor.
- Preparing a research plan and timetable in consultation with the advisor as a basis for the program of study, including any proposed fieldwork.
- Learning and adhering to responsible conduct of research standards for your field. Acquiring the necessary health and safety skills for undertaking the proposed research.
- Meeting with the advisor when requested and reporting regularly on progress and results.
- Establishing a dissertation committee, with the assistance of the advisor early in the dissertation stage, as required by the graduate group.
- Keeping advisors informed on how they can be contacted and informing them of any significant changes that may affect the progress of the research.
- Maintaining good records of each stage of the research.
- Be a good citizen of the research group, laboratory, department, or other entity that requires cooperation from its members (e.g., lab chores).
- When necessary, planning to seek additional funding as needed well in advance.
- Thinking critically about career trajectory and mindfully pursuing opportunities to support career goals, for example, through teaching, publishing, presenting, externships, etc. (See Appendix A: Skill Building for more information.)

Responsibilities of the Faculty Advisor

Within the context of their role as advisors, a faculty member’s primary task is to guide and inspire his or her students to reach their scholarly potential. At the same time, each advisor must try to ensure that each student is in compliance with the rules and regulations of the University. The advisor should promote conditions conducive to a student’s research and intellectual growth and provide appropriate guidance on the progress of the research and the standards expected.

Good mentoring practice includes the following:

- Guiding the student in the selection and planning of an original research topic that can be successfully completed within the expected time frame for the degree program.
- Establishing with the student a realistic timetable for completion of various phases of the program.
- Being accessible to give advice and provide feedback, while also establishing for the student a realistic timeline for receiving feedback. Feedback should be professional and constructive and provide concrete guidance for improvement.
- Ensuring that students have an understanding of the relevant theories and the methodological and technical skills necessary for the research, including provision of information through an ethical review process where applicable. Ensuring that students adhere to responsible conduct of research standards for your field.
- Establishing with the student a dissertation committee early-on in the dissertation stage (e.g., after the qualifying exam) and ensuring that the committee meets with the student at least once a year, as a committee, and provides an annual written report of the student’s progress.
- Making arrangements to ensure continuity of supervision during leaves or an extended period of absence.
- Encouraging participation in graduate group seminars and colloquia.
- Encouraging and assisting students to attend and present work at local, national, or international conferences and to publish their work in appropriate journals.
- Advising on matters of career options, job market, preparation of the CV, and strategies for launching a career in research.
- Contributing to the student’s professional development through letters of reference and general advice.
- Advising the student on seeking additional funding, as needed.
- Ensuring that the research environment is safe, equitable, and free from harassment and discrimination.
- Avoiding personal or business relationships that may constitute a conflict of interest.
- Being sensitive to academic needs and concerns that may arise for international students, students from underrepresented groups, students with disabilities, and/or students with family responsibilities.
- Communicating in a timely manner if the student’s academic performance is not meeting expectations, providing an outline for what actions need to be taken in order to return to academic good standing, and a timeline for doing so. While dealing with inadequate academic performance can be difficult, it is in no one’s best interests to prolong a program of study if success is unlikely.
- Serving as an advocate for the student.

Students sometimes experience personal difficulties. These can include family difficulties, problems in personal relationships, cultural adjustments, financial pressures, medical issues, and problems associated with employment. The importance of these various problems should not be under-emphasized. Advisors should not act in a counseling capacity with their students, nor should they intrude into the personal lives of their students with unwanted advice. However, advisors should try to ensure that their relationships with students are such that students will be comfortable telling advisors that they are having significant personal difficulties. Sometimes a timetable can be rearranged or a referral made to appropriate campus resources (http://www.gsc.upenn.edu/resources).

Responsibilities of the Graduate Group

The graduate group chair, the graduate group coordinator, and other support staff play key roles in the lives of graduate students. The graduate group must endeavor to create an environment within which scholarly work by graduate students can flourish, and problems can be
resolved in an effective manner. Students should take the time to get to
know the graduate group administrators. In this way, students can stay
current with regulations and graduate group activities and events.

Responsibilities of the graduate group include the following:

- Producing a handbook/brochure/web site that outlines program
  requirements, regulations and procedures, financial support and
  information on faculty members and their area of research/expertise.
  If requirements change, past versions of the information should be
  maintained for students admitted under the previous requirements.
- Having procedures in place to facilitate the search for an advisor and
  to allow a change in advisor in the unlikely event that this becomes
  necessary.
- Establishing an effective communication system with graduate
  students (i.e., mailboxes and/or e-mail lists) and workspace, where
  possible.
- Providing orientation sessions for both new and continuing students.
  Information conveyed in these sessions should include: overview
  of program policies and requirements, areas of faculty expertise
  for research supervision, expected performance and timelines for
  completion of degree requirements, intellectual property policies,
  publication and authorship issues, scholarship/funding information,
  information on policies regarding the proper conduct of research,
  sexual harassment, safety and workplace regulations, and procedures
  for complaints and appeals.
- Providing responsible conduct of research training as appropriate for
  your field.
- Ensuring that the student’s dissertation committee meets University
  guidelines (p. 1484) and that the membership is documented in the
  student’s official file.
- Ensuring that the committee meets once a year and that an annual
  written progress report is filed in the official student file at the
  graduate group office.
- Providing a mechanism for resolving problems, which may arise
  between graduate students, advisors and/or members of the
  dissertation committee.
- Establishing a graduate group appeals process to review formal
  complaints from students.
- Ensuring a safe, equitable and fair working environment for students
  and informing them of all relevant safety and work regulations.
- Being sensitive to academic needs and concerns that may arise
  for international students, students from underrepresented
  groups, students with disabilities, and/or students with family
  responsibilities.
- Disbursing financial support in a fair and equitable manner that is
  consistent with the graduate group’s funding policy.
- Being knowledgeable about University resources (http://
  www.gsc.upenn.edu/resources) in place to support students, and
  making referrals when appropriate.

Conflict Resolution

If a dispute or concern arises between a graduate student and advisor
with respect to the mentoring relationship, the student and advisor
should try first to resolve any difficulties amicably between themselves.
If informal discussion does not resolve the problem, there are several
avenues to pursue within the graduate group: in most cases, the
graduate group chair should be consulted first. If the graduate group
chair is unable to find a satisfactory solution, advice may be sought
from the relevant associate dean of the student’s school or from the
University Ombuds (http://www.upenn.edu/ombudsman), which is a
confidential, off-the-record resource that can help the student or the
advisor explore options, identify resources, manage expectations,
and express frustrations. Additionally, the University Ombuds (http://
www.upenn.edu/ombudsman) offers informal mediation services
provided by a professionally trained and certified mediator.

If all else fails, and if the nature of the issue is academic, a student may
pursue a formal academic appeal by contacting the Office of the Vice
Provost for Education (https://provost.upenn.edu/education).

Here are some further considerations related to conflict resolution:

- All conflict is not necessarily to be avoided. Conflict can result
  in creative solutions and when the conflict involves ideas, it can
  advance knowledge.
- There is a significant power differential in the student/advisor
  relationship, but the very nature of the relationship and the academic
  enterprise requires that ideas and assumptions may be challenged.
- Expectations should be clear and commonly understood on both
  sides; put them in writing, if necessary.
- Conflict should be handled early; it is easier to handle smaller issues
  as they arise, and sometimes options for resolution may diminish
  over time.
- The Office of Student Conduct’s conflict resolution program
  (https://www.osc.upenn.edu/mediation-conflict-resolution-
  mediation) provides conflict coaching, mediation, and workshops on
  communication and conflict resolution skills.
- Not all conflict can be resolved informally. If you have tried your best
  but you have not resolved the issue, follow the recommended route to
  a more formal resolution.

Seeking Support & Reporting
Concerns

Academic Concerns

Students who believe that their Graduate Group is not following
recommended academic guidelines or University requirements (for
example, annual dissertation committee meetings) should discuss their
concerns first with the Graduate Group Chair. If the Graduate Group
Chair is involved in the issue, or is unable to resolve the issue, students
should next discuss the concern with the Graduate Dean in their school.
Students who do not find resolution here should bring the concern to
the University’s Vice Provost for Education at provost-ed@upenn.edu.
Students uncomfortable with this process at any stage are encouraged
to bring their concerns to the Director of the Graduate Student Center
(http://www.gsc.upenn.edu) for advice and support.

Concerns Regarding Unfair Treatment,
Bias, Harassment, or any Form of Violence
Sorting Through Options

Recognizing that issues of bias, harassment and/or violence can be
particularly sensitive, Penn provides several Confidential Campus
Resources that can help students sort through options and decide
whether and how to make a formal report. These include:

- African-American Resource Center (http://www.upenn.edu/aarc)
• Counseling and Psychological Services (http://www.vpul.upenn.edu/caps)
• Lesbian Gay Bisexual Transgender Center (http://www.vpul.upenn.edu/lgbtc)
• Office of the Chaplain (https://chaplain.upenn.edu)
• The Office of the Ombuds (http://upenn.ombuds)
• Office of Penn Violence Prevention and Education (https://www.vpul.upenn.edu/pvp)
• Penn Women's Center (http://www.vpul.upenn.edu/pwc)
• Special Services Department, Division of Public Safety (https://www.publicsafety.upenn.edu/about/special-services)
• Student Health Service (http://www.vpul.upenn.edu/shs)

Reporting
Students wishing to lodge an official complaint of discrimination, harassment and/or retaliation can pursue either formal mediation or a formal complaint of discrimination, harassment and/or retaliation through the Office of Affirmative Action and Equal Opportunity Programs (http://www.upenn.edu/affirm-action). Affirmative Action maintains a Complaint of Discrimination, Harassment and/or Retaliation Form (http://www.upenn.edu/affirm-action/docs/resolcomplaint.pdf).

215-P-COMPLY (https://secure.ethicspoint.com/domain/media/en/gui/22868) is Penn’s confidential reporting and help line. As a member of the Penn community, you are encouraged to raise questions and concerns, particularly if you suspect violations of policies or legal requirements. To report a student engaged in misconduct, contact the Office of Student Conduct (https://www.osc.upenn.edu), which is responsible for matters of student discipline. Penn Violence Prevention (https://www.vpul.upenn.edu/pvp/gethelp) provides support and information about options for reporting sexual violence, relationship violence, or stalking.

Appendix A - Skill Building and Career Development

PhD students will find that their academic research experience – as well as their strength on the job market – can be enhanced if they focus on developing important skills such as writing, teaching and management throughout their doctoral studies. Students may also want to explore careers outside of the professoriate. The University provides many services to help with these endeavors; all of the services outlined here are free to students at Penn.

Develop Writing Skills

Good writing skills and habits are essential to a student’s success. Help with planning and writing academic papers is available from many places at Penn. The Graduate Student Center (http://www.gsc.upenn.edu) sponsors the “Navigating the Dissertation” workshop series and an intense “Dissertation Boot Camp” (http://www.gsc.upenn.edu/navdiss/bootcamp.php)."

The Office of Learning Resources (http://www.vpul.upenn.edu/lor/lr/) provides help in skills such as academic reading, writing, study strategies, and time management. This academic support is provided through a varied menu of services and programs, some specifically for graduate students and for international students.

The Marks Family Writing Center (http://writing.upenn.edu/critical/writing_center) provides graduate students with feedback on seminar papers, proposals, manuscripts, and other texts, working on anything from conceptualizing to polishing a final draft, including how to plan and stage writing work.

Develop Teaching Skills

The Center for Teaching & Learning (http://wwwctl.upenn.edu/programs-and-services/graduate-students) prepares graduate students to serve as TAs and/or to teach their own classes at Penn. In addition, CTL has a number of programs and services to help graduate students as they go on the job market and imagine themselves as future faculty.

The CTL Teaching Certificate (http://www ctl.upenn.edu/ctl-teaching-certificate) provides doctoral students with support for improving their teaching as well as recognition for their commitment to developing as teachers. The CTL Teaching Certificate also offers a structure through which interested graduate students can prepare themselves to become faculty in the future. The certificate is noted on the student’s transcript, as a statement from the University of Pennsylvania that a graduate student has pursued advanced training in teaching.

Develop Leadership and Management Skills

There are many opportunities on campus to develop leadership and management skills. PhD students can benefit from holding leadership roles in their school governments or GAPSA (http://www.gapsa.upenn.edu) or other graduate student organizations (http://www.gsc.upenn.edu/resources/gradgroups.php). PhD students can also volunteer to serve on University committees (http://www.gapsa.upenn.edu/university-committee-seats).

There are also paid positions on campus (http://www.gsc.upenn.edu/resources/#resourcecontent) which can provide management and leadership experiences. Examples include fellow positions at the Graduate Student Center (http://www.gsc.upenn.edu), graduate associate positions in College Houses & Academic Services (http://www.collegehouses.upenn.edu/join/ga), and advising positions at the Weingarten Learning Resource Center (http://www.vpul.upenn.edu/lrc/k/).

A session with an advisor in Career Services (http://www.vpul.upenn.edu/careerservices/gradstud/phdpostdoc.php) can help students identify other important skills and opportunities to develop them.

For Students Considering Careers Beyond Academia

The reality is that your faculty advisor is probably not well-equipped to help you explore careers outside of the professoriate. However, there are many other helpful resources at Penn to assist. Set up an appointment with a graduate student/postdoc career advisor at Career Services (http://www.vpul.upenn.edu/careerservices/gradstud/phdpostdoc.php) where you can get guidance and resources specifically for PhD students exploring their many career options. In addition, you can tap into the vast network of PhD alumni who work in a variety of fields through QuakerNet (https://quakernet-idp.upenn.edu/discovery/?entityID=https%3A%2F%2Fquakernet-idp.upenn.edu%2Fsp&retum=https%3A%2F%2Fquakernet-idp.upenn.edu%2FShbooleth.sso%2FLogin%2FSAMLDS%2D1%26target%3Dss%2523Amen%2523A21c92f0073f5163ec21b1). There are also many ways to research career paths taken by Penn alumni using LinkedIn (https://www.linkedin.com/school/university-of-pennsylvania/alumni). If you are looking for the best ways to take full advantage of these online tools,
then call 215-898-7530 to set up a time to speak with career advisors who are specialized in working with PhD students at any stage of the career exploration and career development process. PhD students can begin the process of exploring relevant career paths by reading the Carpe Careers blog (https://www.insidehighered.com/career-advice/carpe-careers) on the Inside Higher Ed website, written by PhD/postdoc career advisors from a wide range of academic institutions, and setting up free accounts with the following online tools:

- The Versatile PhD (https://www.vpul.upenn.edu/secure/careerservices/pennkey/esub.php) (for all academic disciplines)
- myIDP (http://myidp.sciencecareers.org) (for PhD students in STEM fields)
- Imagine PhD (https://www.imaginephd.com) (for PhD students in humanities and Social Sciences)
- BGS Career Development (https://bgscareerdevelopment.com) (for PhD students in biomedical fields)

**Appendix B - Policies, Rules & Resources**

**Academic Policies**

- Academic Rules for PhD Programs (p. 1484)
- Code of Academic Integrity (p. 1510)
- Fairness of Authorship Credit in Collaborative Faculty-Student Publications for PhD, AM, and MS Students (p. 1519)
- Patent and Tangible Research Property (p. 1539) See section 2.1.4 Student Inventions
- Ethics & Original Research (p. 357)
- Dissertation Manual (p. 357)

**Conduct Policies**

- Code of Student Conduct (p. 1511)
- Sexual Violence, Relationship Violence and Stalking Policy (p. 1575)
- Sexual Harassment Policy (p. 1573)
- Alcohol and Other Drug Policy (p. 1491)
- Student Grievance Procedures (p. 1583)

**Resources for student success**

Penn provides many resources to help students thrive in graduate school. And we recognize that student overall wellness can fall within several dimensions including academic, emotional, physical, spiritual, and financial. The University offers a wide range of resources (http://www.gsc.upenn.edu/thrive) designed to support these many dimensions of wellness.

**Career Services**

Career Services provides support and resources for PhD and master’s degree students. Career Advisors are happy to work with students on all aspects of their career exploration and planning at any time during their academic programs, and there are many career-relevant steps that students can take in their first years. With access to the student/employer engagement platform called “Handshake (https://www.vpul.upenn.edu/careerservices/handshake)”, students can search for jobs and internships across industries, search and register for upcoming career workshops/programs, career fairs, and employer information sessions, and schedule 1-on-1 or group appointments with advisors at Career Services. Graduate students are encouraged to set up a time to meet with a career advisor to get any of their career questions answered, or to discuss the types of questions they should be asking in order to maximize their career readiness by the time of their graduation. All career appointments and walk-ins are entirely confidential.

For more information, visit https://www.vpul.upenn.edu/careerservices/gradstud/index.php.

**Doctoral Dissertation Manual**

Writing and submitting your dissertation are among the final steps leading to the award of the PhD degree. At the University of Pennsylvania, a student presents and defends the dissertation publicly, and then, with the approval of the dissertation committee and graduate group chair, submits the final manuscript for publication. Finally, the PhD degree is awarded to the candidate upon the recommendation of the Graduate Council of the Faculties.

A bound copy of the dissertation is shelved in the University Library, where it is available through Interlibrary Loan. A digital copy is included in the ProQuest/UMI database, accessible online to subscribers and libraries.

Beginning December 2015, Penn will require open access publication of dissertations (https://provost.upenn.edu/policies/pennbook/2013/02/13/academic-rules-for-phds-and-research-master-s-degrees/#publication). Open access publication provides a much wider audience for you, can help to market your ideas to potential employers, and can help make plagiarism or theft much easier to detect.

The open access dissertation, published in the University’s institutional repository, ScholarlyCommons, (http://repository.upenn.edu) will be available via the Internet, including full text searching through search engines like Google. The same legal and copyright protections pertain to open access publication as to traditional hardcopy publication. The University permits delay of traditional and open access publication as necessary. See Delay of Publication, below.

Dissertations must be submitted in digital format through ProQuest’s ETD Administrator module. Follow the instructions in Submitting Your Dissertation, and should further questions arise, consult the Graduation Coordinators at the Graduate Division of Arts and Sciences, Suite 322A, 3401 Walnut Street/6228; phone 215-898-7444; email: gas-degree@sas.upenn.edu. The Graduate Division of Arts and Sciences serves as the administrative clearinghouse for final deposit of all Penn PhD dissertations.

**Ethics and Original Research Handbook**

To ensure that all Penn students understand the high academic standards of the University, the Ethics & Original Research Handbook is available to guide you as you approach the research and writing tasks that your courses and dissertation will demand of you. This handbook outlines important information you will need to know about correctly acknowledging your sources when you write a report, research paper, critical essay, or position paper. It also provides guidelines for collaboration on assignments.
Exchange Scholar Program

The Exchange Scholar Program allows Penn Ph.D. students to apply to study for a semester or an academic year at one of twelve other participating institutions.

Please check with your graduate group about graduate group policies regarding the Exchange Scholar program.

Consortium for Exchange Scholar Program for Ph.D. Students:
- University of California at Berkeley
- Brown University
- University of Chicago
- Columbia University
- Cornell University
- Harvard University
- Massachusetts Institute of Technology
- University of Pennsylvania
- Princeton University
- Rutgers University
- Stanford University
- Yale University

First year doctoral students and master’s students may not participate in the program.

Fontaine Society

Fontaine Fellowships support the education of the most underrepresented groups in PhD education.

In 1970 an endowment was established posthumously in honor of Dr. William Fontaine, Professor of Philosophy, the first African-American appointed to the Standing Faculty at the University of Pennsylvania. From its inception, the endowment, known as the “Fontaine Fellowship” has been used to advance the University’s goals related to diversity. Originally restricted to students from groups “traditionally and historically underrepresented” in higher education – specifically U.S. African American, Native American, and Hispanic students – diversity is now more broadly defined, and may include, for example, first-generation college students who are from low-income families, or students whose backgrounds are most underrepresented in a specific discipline or field.

Fontaine funding, in combination with other resources, is used by the schools to recruit a diverse class of PhD students. Fontaine Fellows receive graduate financial aid that is identical to all other funded students in their respective doctoral programs. In addition, the Fontaine Society provides members with opportunities to come together throughout the year to support one another’s academic progress and enhance the University campus as a whole, through their contributions to the scholarly community.

For more information, visit http://www.upenn.edu/provost/graduate_admissions/community/fontaine_society/about.

Graduate Student Center

The Graduate Student Center was established in 2001 to meet the unique needs of graduate and professional students at Penn. The Grad Center empowers graduate and professional students to participate in a graduate community at Penn, and creates academic, social, intercultural and professional development programs.

The Center provides graduate and professional students with a centrally-located home that includes a lounge, free coffee and tea, a cafe, and meeting/study space. We encourage you to learn more about our activities (http://www.gsc.upenn.edu/activities), facilities (http://www.gsc.upenn.edu/facilities), and resources (http://www.gsc.upenn.edu/resources); from New Student Orientation to graduation, the Graduate Center is a supportive, fun space that brings together the wide range of graduate and professional students at Penn.

Grants to help defray the cost of insurance for PhD Students

The University created two grant programs for PhD students to help offset the cost of health insurance and dental insurance. These grants are funded by the Office of the Provost and administered by the Graduate Student Center and the Office of Student Registration and Financial Services.

For more information, visit http://www.gsc.upenn.edu/resources/grants/

Graduation

Applying for Graduation

The Graduate Division of the School of Arts and Sciences (https://www.sas.upenn.edu/graduate) oversees the review of all non-professional doctoral dissertations and Master’s theses for the University. Consequently, degree candidates not just in the Graduate School of Arts and Sciences, but for all academic graduate degrees in all nine of the university’s graduate schools must apply (https://fission.sas.upenn.edu/sso/gas/degree/app-start.php) to this office when planning to graduate in any given term.

For more information: https://www.sas.upenn.edu/graduate-division/resources/graduation-and-beyond

Graduation Calendar

Revised April 12, 2018

For PhD, AM, MS, and professional degrees in SAS and SEAS

August 2017

GAS begins accepting dissertations Thursday, June 1.

<table>

Guide To Thriving at Penn

Penn provides many resources to help you thrive in graduate school, and we recognize that your overall wellness can fall within several dimensions including emotional, physical, social, spiritual, and financial. The University offers a wide range of resources designed to support these many dimensions of your wellness. Learn more about them at: http://www.gsc.upenn.edu/resources/.

In addition, the University’s HELP Line 215-898-HELP (4357) is a 24-hour-a-day phone number for members of the Penn community who are seeking time sensitive help in navigating Penn’s resources for health and wellness.

Information for International Students

Penn’s International Student and Scholar Services (ISSS) (https://global.upenn.edu/iss) provides immigration benefits assistance and integration initiatives for the international community at Penn. ISSS works with international students through all stages of their journey at Penn, providing guidance every step of the way.

ISSS provides support to students in many different areas. Some examples include:

- Preparing students for arrival to the U.S.
- Helping get adjusted to life in Philadelphia
- Advising on maintaining status, travel, and immigration guidelines
- Providing integration opportunities such as social events, cultural trips and leadership roles
- Assisting with employment authorization before internships or jobs

- Assigned advisors and central online portal for requests and forms via the iPenn system (https://www.ipenn.oip.upenn.edu)

Find out more information for:

- New Students (https://global.upenn.edu/iss/new)
- Current Students (https://global.upenn.edu/iss/students)
- Beyond Immigration (https://global.upenn.edu/issbeyond-immigration)

Click the iPenn logo to see your assigned advisor and make requests with eforms.

English Language Programs (https://www.elp.upenn.edu)

The English Language Programs (ELP) was established in the 1960s. For over half a century, we have offered courses in English as a Second Language as well as dynamic cultural experiences.

The ELP is a top English language program with a CEA-accredited Intensive Program. We offer open-enrollment programs in Academic, Business, and General English as well as provide programs to matriculated Penn students in areas such as business, dentistry, and law. We offer teacher training, cross-cultural training, and testing. Custom programs and consulting services are available for foundations, multinational corporations, universities, and government agencies.

Information for Students with Children

Family Resource Center

Penn’s Family Resource Center is a hub for information, resources, childcare benefits, activities and advocacy for students and post-docs with children. The Family Center provides a forum for student parents to connect and develop supportive networks, and offers a welcoming and family-friendly environment for Penn students, post-docs, caregivers, and children.

The Family Center facility includes a large common room and a family reading room complete with toys, games, books, stuffed animals, and two private lactation rooms equipped with Symphony breast pumps. Children visiting the Family Center must be supervised by parents or caregivers at all times. Students and post-docs who wish to use the Family Center should first review the Family Center Guidelines and must complete our Parental Release & Consent Form (http://www.familycenter.upenn.edu/join.php).

Visit the Family Center website for more information about activities, benefits, and resources for students with children: http://www.familycenter.upenn.edu

Resources

- Campus Lactation Rooms
- PhD Grant Program
- PhD Family Leave Policies
Learning Resources

Weingarten Learning Resources Center (http://www.vpul.upenn.edu/lrc)
The Weingarten Center provides academic support services and programs for undergraduate, graduate, and professional students at the University of Pennsylvania through its two offices. The services and programs of both offices are free and confidential.

Office of Learning Resources (http://www.vpul.upenn.edu/lrc/lor)
The Office of Learning Resources (http://www.vpul.upenn.edu/lrc/lor) staff provide a wide range of programming and professional consultation services in university-relevant skills such as reading, writing, study strategies, and time management.

Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds)
Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds) staff work closely with students who self-identify with disabilities in order to ensure equal access to all University programs, activities and services.

Weigle Information Commons (WIC) (http://commons.library.upenn.edu)
WIC in Van Pelt Library supports students at the individual and course level. Students can receive assistance with writing, speaking, and study skills (http://commons.library.upenn.edu/student-support/student-assistance-services) at WIC, in addition to learning software and hardware (http://commons.library.upenn.edu/hardware-software) through workshops and online tutorials. High-tech study spaces, equipment, and specialized printers are available as well.

Libraries
Penn has a large and service-oriented library system. The combined 15 libraries on campus contain over 4,500,000 volumes, subscribe to more than 33,000 serials, and offer a rapidly growing set of electronic services which can be accessed from home or office, as well as in the libraries.

- Locations and hours (http://www.library.upenn.edu/locations)

Research
- For Research Guides by subject, visit: https://guides.library.upenn.edu/hometabs.
- To get help with research, students can submit questions online (http://faq.library.upenn.edu/ask) or make an appointment for in-person assistance (http://faq.library.upenn.edu/widget_standalone.php?fa_widget_id=3206).

Canvas
Canvas is the online learning management system used at Penn. A valid PennKey is required to login to the system.

- To login to Canvas, visit: https://canvas.upenn.edu.
- For help with Canvas, visit: http://guides.library.upenn.edu/canvas_students.

Weigle Information Commons (WIC) (http://commons.library.upenn.edu)
WIC in Van Pelt Library supports students at the individual and course level. Students can receive assistance with writing, speaking, and study skills (http://commons.library.upenn.edu/student-support/student-assistance-services) at WIC, in addition to learning software and hardware (http://commons.library.upenn.edu/hardware-software) through workshops and online tutorials. High-tech study spaces, equipment, and specialized printers are available as well.

Master’s Thesis Style Guide

University Style Guide for Masters Theses

Paper Requirements
Two hard copies of the approved thesis must be submitted in separate, appropriate sized boxes or sealable envelopes to the

Graduation Coordinator
Graduate Division of Arts and Sciences
3401 Walnut Street
Suite 322A/622B

Engineering students must submit the approved thesis to the
Office of Academic Programs
School of Engineering
111 Towne Building

The thesis must be printed single-sided on acid-free white paper, 20 lb. (or heavier stock), 8 ½ x 11 inches in size. Copier paper is fine.

Font, Spacing, and Margin Requirements
Any non-italic font 10-12 points in size should be used. Headings may be larger. For enhanced screen readability, use Arial (10pt), Courier New (10pt), Georgia (11pt), Times New Roman (12 pt), or Verdana (10pt) font. For footnotes, figures, citations, charts and graphs, a font of 8 point or larger should be used. Italic type may be used for quotations, words in a foreign language, occasional emphasis, or book titles.

For the sake of readability, it is recommended that the text of the dissertation be double-spaced (except for footnotes, long quoted passages, and lists of tables and figures, which are single-spaced). If desired, authors may choose to single-space the abstract and/or thesis manuscript.

Allow one and one-half inches for the left margin and one inch for all other margins. All text, including page numbers, must fit within these margins.

Organization of the Manuscript
Pages must appear in the following order:

- Title Page
- Dedication (optional)
- Acknowledgment (optional)
- Abstract (optional)
- Table of Contents (mandatory for theses 50 pages or longer)
- List of Tables (optional)
Wellness

There are a wide variety of resources available to support students at Penn. Some of the most commonly used resources are listed below.

Wellness at Penn (https://www.wellnessatpenn.com)

The Wellness at Penn initiative provides support, resources, and practical tools for wellness across the Penn community. It affirms wellness as a core priority and necessary driver of life on campus; and it offers a wide range of opportunities to reflect and engage on issues of wellness, stress, mental health, resilience, happiness, personal and academic goals, and the meaning of success.

Peer Community Wellness Guide (https://static1.squarespace.com/static/5a430cd518b27d357e661824/t/5a432e0bc830257df7b8df49/1514352139961/NEW-Wellness+Guide-Aug11.pdf)

The Penn Peer Community Wellness Guide (https://static1.squarespace.com/static/5a430cd518b27d357e661824/t/5a432e0bc830257df7b8df49/1514352139961/NEW-Wellness+Guide-Aug11.pdf) was developed by Penn Wellness, the Penn Undergraduate Health Coalition, the Vice Provost for University Life, and the Undergraduate Assembly.

Counseling and Psychological Services (CAPS) (http://www.vpul.upenn.edu/caps)

215-898-7021 (Nights and weekends, ask for CAPS counselor on call.)

Counseling and Psychological Services (CAPS) provides professional psychological and psychiatric services to undergraduate, graduate, and professional students who need support in fulfilling their academic, social, and personal objectives. Along with health and wellness partners throughout the Penn community, CAPS directly supports student mental health through counseling, crisis management, consultation, education and outreach, and training.

Division of Public Safety (https://www.publicsafety.upenn.edu)

A central source for information about police, fire, and emergency services, security services, including walking escorts, and special victim services. Public safety also manages the University’s extensive electronic security infrastructure.

Student Disabilities Services (http://www.vpul.upenn.edu/lrc/sds)

(215) 573-9235; TDD (215) 746-6320

The Office of Student Disabilities Services (SDS), part of the Weingarten Learning Resources Center (http://www.vpul.upenn.edu/lrc), provides comprehensive, professional services and programs for students who self-identify with disabilities to ensure equal academic opportunities and participation in University-sponsored programs. Professional
staff evaluate current documentation, determine individual students’ eligibility according to program guidelines, and determine reasonable accommodations for all qualified students with documented disabilities on a case-by-case basis, including academic adjustments, e-text, accessible campus housing, and transportation and parking. SDS also coordinates auxiliary aids and services such as sign language interpreters and Computer Aided Realtime Translation (CART) reporters, as well as the loan of equipment and assistive technologies.

Student Health Service (http://www.vpul.upenn.edu/shs)
215-746-3535

Student Health Service is a state-of-the-art primary care center dedicated to the health and well-being of Penn students. Student Health provides accessible, cost-effective, culturally-sensitive, and student-focused healthcare, including care for acute and chronic health problems, preventive health services, and health and wellness education. The Health Service works in close collaboration with our partners in the University Life Division, and with our colleagues in the University of Pennsylvania Health System (http://www.pennmedicine.org) to help ensure the health and wellness of the campus community.

Student Intervention Services (http://www.vpul.upenn.edu/intervention.php)
215-898-6081

Penn Student Intervention Services (SIS) assists the University community in handling emergencies or critical incidents involving the welfare and safety of students.

Office of the Chaplain (https://chaplain.upenn.edu)
215-898-8456

The staff of the Office of the Chaplain (https://chaplain.upenn.edu/about-us/staff) is available to students, faculty and staff for pastoral support, guidance, or informal advising and counseling. The Chaplain, an ordained clergy person, participates in campus ceremonies such as Convocation, Baccalaureate and Commencement and also officiates at weddings (https://chaplain.upenn.edu/about-us/weddings-blessings)and campus memorial services. The office serves and supports a wide range of student organizations (https://chaplain.upenn.edu/student-organizations), fellowships and religious communities on our campus. They also develop programming designed to improve interfaith understanding and build meaningful, collaborative relationships across religious difference.

Campus Health (http://www.vpul.upenn.edu/shs/campushealth)

Part of Student Health Service, Campus Health (http://www.vpul.upenn.edu/shs/campushealth) seeks to empower the Penn community to Live Well through advocacy, education, and action. Campus Health staff focus on a wide variety of healthy living topics including sleep, hygiene, stress reduction, nutrition, exercise, tobacco-free lifestyles and bike safety. Key initiatives include annual flu immunization clinics, which vaccinate more than 2,000 people, and yearlong sexual wellness education through events such as “Sex Camp” and “Sex Jeopardy.”

Alcohol and Other Drug Program Initiatives (http://www.vpul.upenn.edu/alcohol)
The Office of Alcohol and Other Drug Program Initiatives oversees critical areas of health and wellness that can challenge the academic success of Penn students. The office comprises alcohol policy initiatives, violence prevention, data collection, strategic project management, and (in a collaboration with Student Intervention Services (http://www.vpul.upenn.edu/intervention.php)) proactive crisis management.

Policies and Procedures

The following policies and procedures relate to graduate academics at Penn, and are organized by topic.

Most academic policies and procedures at Penn are school-based. University policies (p. 1479) are also often administered through the schools. Students should consult with their school or graduate group with questions or for help in understanding academic policies and procedures.

Academic Rules
- Academic Rules for PhD Programs (p. 1484)
- Academic Rules for Research Master’s Programs (p. 1490)

Course and Exam Related Policies
- Academic Good Standing and Academic Withdrawal (p. 364)
- Course Numbering & Academic Credit (p. 258)
- Rules Governing Final Examinations (p. 1572)
- Policy on Secular and Religious Holidays (p. 1559)

Leaves of Absence and Withdrawals
- Academic Good Standing and Academic Withdrawal (p. 364)
- Leaves of Absence (p. 364)

Teaching
- Consensual Sexual Relations Between Faculty and Students (p. 1515)
- Evaluation and Certification of the English Fluency of Undergraduate Instructional Personnel (p. 1517)
- Guide to Graduate Student Appointments (http://wwwfinance.upenn.edu/comptroller/tax/appointments.shtml)

Research
- Fairness of Authorship Credit in Collaborative Faculty-Student Publications for PhD, AM, and MS Students (p. 1519)
- Guidelines for Research in the Community (p. 1530)
- Guidelines for Student Protection in Sponsored Research Projects (p. 1530)
- Patent and Tangible Research Property Policies and Procedures (p. 1539)
- Policy Regarding Human Subject Research in the Sociobehavioral Sciences (p. 1561)
Academic Good Standing and Academic Withdrawal

The minimum standard for satisfactory work for the Graduate Faculties is a B average in each academic year, but the graduate group may set additional requirements that determine advancement; these requirements may require a student to withdraw despite a satisfactory grade average, if the quality of the student’s work is not at a level that predicts successful degree completion.

Students whose grades are not meeting minimum requirements or who are not satisfactorily meeting other graduate group requirements will receive a communication at the end of the academic term or year regarding their academic probation, along with an outline for what actions need to be taken in order to return to academic good standing and a timeline for doing so. Students receiving such a communication are responsible for working with their advisor and/or graduate group chair to improve academic performance. Students who do not return to academic good standing within the time frame outlined may be withdrawn by the graduate group.

School specific policies:

- Annenberg School for Communication (https://www.asc.upenn.edu/academics/graduate-program/annenberg-school-policies/normal-progress-PhD-program)
- School of Arts and Sciences
- Graduate School of Education (http://gse.upenn.edu/pdf/students/Student_Handbook_16-17.pdf)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/graduate-handbook/g-academic-requirements.php)
- Perelman School of Medicine (Biomedical Graduate Studies) (https://webdev.med.upenn.edu/contribute/bgs/documents/ExpectationsforStudents2017forAugustMatric.pdf)
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/phd-handbook/academic-regulations)
- School of Social Policy & Practice (https://www.sp2.upenn.edu/resources/phd-student-handbook/academics/#GradesAndAcademicSta)
- The Wharton School

Leaves of Absence

Continuous registration as a graduate student is required unless a formal leave of absence is granted by your school. Graduate students request leaves for a wide variety of reasons, including:

- Medical Leave to manage a medical concern.
- Family Leave for the birth or adoption of a child, child care, or care of an immediate family member (spouse, domestic partner, child, or parent) with a serious health condition. Family Leave includes library access, and stops the clock on academic requirements, including service requirements, for the duration of the leave.
- Military Leave to complete military service, which stops the clock on academic requirements, including service requirements, for the duration of the leave.
- Personal Leave to work on a political campaign, pursue career-related opportunities, or other reasons.

Students typically take a leave for one or two semesters. Individual circumstances may require more or less time; the maximum length of time is set by the school. Students considering a leave should consult their graduate group first. When preparing to take a leave, graduate students should connect with appropriate campus resources, such as Student Financial Services, Student Health Services, Counseling & Psychological Services, International Student & Scholar Services, and Grad Housing.

In some cases, graduate students on leave and not registering for courses may still utilize the Library, with the permission of their graduate group.

Graduate students should remain in contact with their faculty advisor while on leave. Your school may add additional requirements for your return. When preparing to return, students must consult their graduate group to develop a plan that includes connection with appropriate resources.

Procedures for requesting New Parent Accommodation and/or Family Leave (p. 1484) are governed by University policy (p. 1484).

Procedures for requesting other kinds of leave vary by school.

School specific policies:

- Annenberg School for Communication (https://www.asc.upenn.edu/academics/graduate-program/annenberg-school-policies/funding-and-financial-policies)
- School of Arts and Sciences (https://www.sas.upenn.edu/graduate-division/resources/leave-absence)
- Graduate School of Education (http://www.gse.upenn.edu/policies/absence)
- School of Engineering and Applied Science (http://www.seas.upenn.edu/graduate-handbook/g-academic.php)
- Perelman School of Medicine (Biomedical Graduate Studies (http://www.med.upenn.edu/bgs/LOAPolicy.shtml))
- School of Nursing (http://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/phd-handbook/courses-registration/#loa)
- School of Social Policy & Practice (https://www.sp2.upenn.edu/resources/phd-student-handbook/student-information/#LeaveofAbsence)
PROGRAMS A-Z

The following list includes traditional undergraduate, PhD, and research master’s programs.

Professional and other degree programs are listed by school in the Graduate Catalog (p. 265).

A

- Accounting, BS (p. 207)
- Accounting, PhD (p. 338)
- Actuarial Mathematics, Minor (p. 138)
- Actuarial Science, BS (p. 208)
- Africana Studies, Minor (p. 138)
- Africana Studies, PhD (p. 287)
- Africana Studies: African American Studies, BA (p. 24)
- Africana Studies: African Diaspora Studies, BA (p. 130)
- Africana Studies: African Studies, BA (p. 131)
- American Public Policy, Minor (p. 139)
- American Sign Language and Deaf Studies, Minor (p. 139)
- Ancient History, BA (p. 25)
- Ancient History, Minor (p. 139)
- Ancient History, PhD (p. 288)
- Anthropology, Minor (p. 140)
- Anthropology: Archaeology, BA (p. 25)
- Anthropology: Archaeology, PhD (p. 289)
- Anthropology: Cultural and Linguistic Anthropology, BA (p. 26)
- Anthropology: Cultural, PhD (p. 290)
- Anthropology: General Anthropology, BA (p. 27)
- Anthropology: Human Biology, BA (p. 26)
- Anthropology: Linguistic, PhD (p. 290)
- Anthropology: Medical Anthropology & Global Health, BA (p. 28)
- Anthropology: Medical, PhD (p. 291)
- Anthropology: Physical, PhD (p. 291)
- Applied Economics, PhD (p. 339)
- Applied Mathematics and Computational Science, MA (p. 292)
- Applied Mathematics and Computational Science, PhD (p. 292)
- Archaeological Science, Minor (p. 140)
- Architectural History, Minor (p. 140)
- Architecture, Minor (p. 140)
- Architecture, MS (p. 326)
- Architecture, PhD (p. 326)
- Architecture: Design (Intensive), BA (p. 28)
- Architecture: Design, BA (p. 29)
- Architecture: History and Theory, BA (p. 29)
- Art and Archaeology of the Mediterranean World, MA (p. 293)
- Art and Archaeology of the Mediterranean World, PhD (p. 294)
- Asian American Studies, Minor (p. 141)

B

- Behavioral Economics, BS (p. 209)
- Biochemistry and Molecular Biophysics, PhD (p. 274)
- Biochemistry, BA (p. 30)
- Bioengineering, BSE (p. 172)
- Bioengineering, PhD (p. 328)
- Bioethics, Minor (p. 141)
- Biological Basis of Behavior, BA (p. 30)
- Biological Basis of Behavior, Minor (p. 141)
- Biology, Minor (p. 142)
- Biology, PhD (p. 294)
- Biology: Computational Biology, BA (p. 31)
- Biology: Ecology & Evolutionary Biology, BA (p. 32)
- Biology: General Biology, BA (p. 33)
- Biology: Mathematical Biology, BA (p. 34)
- Biology: Mechanisms of Disease, BA (p. 34)
- Biology: Molecular & Cell Biology, BA (p. 35)
- Biology: Neurobiology, BA (p. 36)
- Biomedical Science, BAS (p. 173)
- Biophysics, BA (p. 37)
- Biophysics, Minor (p. 142)
- Business Analytics, BS (p. 210)
- Business Economics and Public Policy, BS (p. 211)
- Cell and Molecular Biology: Cancer Biology, PhD (p. 274)
- Cell and Molecular Biology: Cell Biology, Physiology, and Metabolism, PhD (p. 275)
- Cell and Molecular Biology: Developmental, Stem Cell, and Regenerative Biology, PhD (p. 276)
- Cell and Molecular Biology: Gene Therapy and Vaccines, PhD (p. 277)
- Cell and Molecular Biology: Genetics and Epigenetics, PhD (p. 278)
- Cell and Molecular Biology: Microbiology, Virology, and Parasitology, PhD (p. 279)
- Chemical and Biomolecular Engineering, BSE (p. 174)
- Chemical and Biomolecular Engineering, Minor (p. 193)
- Chemical and Biomolecular Engineering, PhD (p. 329)
- Chemistry, BA (p. 37)
- Chemistry, Minor (p. 143)
- Chemistry, PhD (p. 295)
- Cinema and Media Studies, BA (p. 38)
- Cinema and Media Studies, Minor (p. 143)
- City Planning, PhD (p. 327)
- Classical Studies, Minor (p. 143)
- Classical Studies, PhD (p. 295)
- Classical Studies: Classical Civilizations, BA (p. 39)
- Classical Studies: Classical Languages and Literature, BA (p. 39)
- Classical Studies: Mediterranean Archaeology, BA (p. 40)
- Cognitive Science, Minor (p. 144)
- Cognitive Science: Cognitive Neuroscience, BA (p. 40)
- Cognitive Science: Computation and Cognition, BA (p. 41)
- Cognitive Science: Individualized, BA (p. 42)
- Cognitive Science: Language & Mind, BA (p. 43)
- Communication, PhD (p. 267)
- Communication: Communication & Public Service, BA (p. 43)
- Communication: General Communication, BA (p. 44)
- Comparative Literature, Minor (p. 144)
• Comparative Literature, PhD (p. 296)
• Comparative Literature: Transnational Literatures, BA (p. 131)
• Comparative Literature: Globalization, BA (p. 45)
• Comparative Literature: Theory, BA (p. 132)
• Computational Biology, BAS (p. 175)
• Computational Neuroscience, Minor (p. 145)
• Computer and Cognitive Science, BAS (p. 177)
• Computer and Information Science, PhD (p. 330)
• Computer Engineering, BSE (p. 178)
• Computer Science, BAS (p. 180)
• Computer Science, BSE (p. 179)
• Computer Science, Minor (p. 189)
• Consumer Psychology, Minor (p. 145)
• Creative Writing, Minor (p. 145)
• Criminology, BA (p. 46)
• Criminology, MS (p. 297)
• Criminology, PhD (p. 297)

D
• Data Science, Minor (p. 193)
• Demography, PhD (p. 298)
• Design, Minor (p. 146)
• Digital Humanities, Minor (p. 146)
• Digital Media Design, BSE (p. 182)
• Digital Media Design, Minor (p. 192)
• Dutch (Netherlands), Minor (p. 146)

E
• Earth and Environmental Science, PhD (p. 298)
• Earth Science: Environmental Science, BA (p. 47)
• Earth Science: Geology, BA (p. 48)
• Earth Science: Paleobiology, BA (p. 48)
• East Asian Area Studies, Minor (p. 147)
• East Asian Languages and Civilizations, MA (p. 299)
• East Asian Languages and Civilizations, PhD (p. 299)
• East Asian Languages and Civilizations: Chinese and Japanese, BA (p. 49)
• East Asian Languages and Civilizations: Chinese, BA (p. 50)
• East Asian Languages and Civilizations: Chinese, Minor (p. 167)
• East Asian Languages and Civilizations: East Asian Area Studies, BA (p. 133)
• East Asian Languages and Civilizations: Japanese, BA (p. 51)
• East Asian Languages and Civilizations: Japanese, Minor (p. 167)
• East Asian Languages and Civilizations: Korean, BA (p. 130)
• East Asian Languages and Civilizations: Korean, Minor (p. 167)
• East Central European Studies, Minor (p. 147)
• Economic Policy, Minor (p. 147)
• Economics, BA (p. 51)
• Economics, Minor (p. 148)
• Economics, PhD (p. 300)
• Education Policy, PhD (p. 268)
• Education, Culture, and Society, PhD (p. 269)
• Educational Linguistics, PhD (p. 269)
• Electrical and Systems Engineering, PhD (p. 331)
• Electrical Engineering, BSE (p. 182)
• Electrical Engineering, Minor (p. 191)
• Energy & Sustainability, Minor (p. 189)
• Engineering Entrepreneurship, Minor (p. 190)
• English, MA (p. 301)
• English, Minor (p. 148)
• English, PhD (p. 301)
• English: 18th/19th Centuries, BA (p. 52)
• English: 20th/21st Centuries, BA (p. 53)
• English: Africana Literatures & Culture, BA (p. 53)
• English: American Literature & Culture, BA (p. 54)
• English: Celtic Literature & Culture, BA (p. 55)
• English: Cinema & Media Studies, BA (p. 55)
• English: Colonial & Postcolonial, BA (p. 56)
• English: Creative Writing, BA (p. 57)
• English: Drama, BA (p. 57)
• English: Gender/Sexuality, BA (p. 58)
• English: General English, BA (p. 58)
• English: Historical, BA (p. 59)
• English: Individualized, BA (p. 59)
• English: Law and Literature, BA (p. 60)
• English: Literary Theory & Cultural Studies, BA (p. 61)
• English: Literature, Journalism and Print Culture, BA (p. 61)
• English: Medieval/Renaissance, BA (p. 62)
• English: Poetry and Poetics, BA (p. 63)
• English: The Novel, BA (p. 63)
• Environmental Policy & Management, BS (p. 212)
• Environmental Science, Minor (p. 169)
• Environmental Studies, Minor (p. 149)
• Environmental Studies: Environmental History and Regional Studies, BA (p. 64)
• Environmental Studies: Environmental Policy and Application, BA (p. 65)
• Environmental Studies: General Environmental Studies, BA (p. 65)
• Environmental Studies: Global Environmental Systems, BA (p. 66)
• Environmental Studies: Sustainability and Environmental Management, BA (p. 67)
• Epidemiology and Biostatistics: Biostatistics, MS (p. 280)
• Epidemiology and Biostatistics: Biostatistics, PhD (p. 281)
• Epidemiology and Biostatistics: Epidemiology, PhD (p. 282)
• Ethics and Legal Studies, PhD (p. 340)
• European Studies, Minor (p. 149)

F
• Finance, BS (p. 213)
• Finance, PhD (p. 341)
• Fine Arts, BA (p. 67)
• Fine Arts, Minor (p. 149)
• French and Francophone Studies, BA (p. 68)
• French and Francophone Studies, Minor (p. 150)
G
- Gender, Sexuality, & Women’s Studies, BA (p. 69)
- Gender, Sexuality, and Women’s Studies, Minor (p. 150)
- Genomics and Computational Biology, PhD (p. 283)
- Geology, Minor (p. 151)
- German Languages and Literatures, PhD (p. 302)
- German, BA (p. 69)
- German, Minor (p. 151)
- Global Analysis, BS (p. 214)
- Global Health, Minor (p. 202)
- Global Medieval Studies, Minor (p. 168)

H
- Health and Societies: Bioethics & Society, BA (p. 70)
- Health and Societies: Disease & Society, BA (p. 71)
- Health and Societies: Environment & Health, BA (p. 71)
- Health and Societies: Gender & Health, BA (p. 72)
- Health and Societies: Global Health, BA (p. 73)
- Health and Societies: Health Care Markets & Finance, BA (p. 73)
- Health and Societies: Health Policy & Law, BA (p. 74)
- Health and Societies: History of Medicine, BA (p. 75)
- Health and Societies: Public Health, BA (p. 75)
- Health Care Management & Economics, PhD (p. 342)
- Health Care Management and Policy, BS (p. 215)
- Health Care Management, Minor (p. 151)
- Health Communications, Minor (p. 203)
- Higher Education, PhD (p. 270)
- Hispanic Studies, BA (p. 76)
- Hispanic Studies, Minor (p. 152)
- History and Legal Studies, Minor (p. 152)
- History and Sociology of Science, PhD (p. 303)
- History of Art, BA (p. 77)
- History of Art, MA (p. 303)
- History of Art, Minor (p. 165)
- History of Art, PhD (p. 304)
- History, Health and the Humanities, Minor (p. 203)
- History, MA (p. 304)
- History, Minor (p. 153)
- History, PhD (p. 304)
- History, American History, BA (p. 77)
- History, Diplomatic History, BA (p. 78)
- History, Economic History, BA (p. 79)
- History, European History, BA (p. 80)
- History, Gender History, BA (p. 80)
- History, General History, BA (p. 81)
- History, Intellectual History, BA (p. 82)
- History, Jewish History, BA (p. 82)
- History, World History, BA (p. 83)

I
- Immunology, PhD (p. 284)
- Individualized Major, BA (p. 84)
- Individualized Program, BAS (p. 184)
- Individualized, BS (p. 216)
- Interdisciplinary Studies in Human Development, PhD (p. 271)
- International Development, Minor (p. 153)
- International Relations, BA (p. 84)
- International Relations, Minor (p. 153)
- Italian Studies: Italian Culture, BA (p. 85)
- Italian Studies: Italian Culture, Minor (p. 166)
- Italian Studies: Italian Literature, BA (p. 85)
- Italian Studies: Italian Literature, Minor (p. 154)

J
- Jewish Studies, BA (p. 86)
- Jewish Studies, Minor (p. 154)
- Journalistic Writing, Minor (p. 154)

L
- Landscape Studies, Minor (p. 155)
- Latin American & Latino Studies, BA (p. 86)
- Latin American and Latino Studies, Minor (p. 155)
- Law and Society, Minor (p. 155)
- Legal Studies & Business Ethics, BS (p. 217)
- Linguistics, BA (p. 87)
- Linguistics, MA (p. 305)
- Linguistics, Minor (p. 156)
- Linguistics, PhD (p. 305)
- Logic, Information, & Computation, BA (p. 87)
- Logic, Information, and Computation, Minor (p. 156)

M
- Management, PhD (p. 342)
- Management: Entrepreneurship and Innovation Track, BS (p. 218)
- Management: General Track, BS (p. 219)
- Management: Multinational Management Track, BS (p. 220)
- Management: Organizational Effectiveness Track, BS (p. 221)
- Management: Strategic Management Track, BS (p. 222)
- Managing E-Commerce, BS (p. 223)
- Marketing & Communication, BS (p. 224)
- Marketing & Operations Management, BS (p. 225)
- Marketing, BS (p. 226)
- Marketing, PhD (p. 344)
- Material Science & Engineering, Minor (p. 191)
- Material Science and Engineering, PhD (p. 331)
- Materials Science and Engineering, BSE (p. 184)
- Mathematical Economics, BA (p. 88)
- Mathematics, M.Phil (p. 306)
- Mathematics, MA (p. 306)
- Mathematics, Minor (p. 157)
- Mathematics, PhD (p. 306)
- Mathematics: Biological Mathematics, BA (p. 89)
- Mathematics: General Mathematics, BA (p. 91)
- Mechanical Engineering and Applied Mechanics, BSE (p. 185)
• Mechanical Engineering and Applied Mechanics, Minor (p. 190)
• Mechanical Engineering and Applied Mechanics, PhD (p. 332)
• Medical Sociology, Minor (p. 157)
• Modern Middle Eastern Studies, BA (p. 91)
• Modern Middle Eastern Studies, Minor (p. 158)
• Music, BA (p. 92)
• Music: Ethnomusicology, PhD (p. 307)
• Music: History of Music, PhD (p. 308)
• Music: Jazz and Popular Music, Minor (p. 158)
• Music: Music, Minor (p. 158)
• Music: Musical Composition, PhD (p. 309)
• Music: Theory of Music, PhD (p. 309)

N
• Nanotechnology, Minor (p. 192)
• Native American and Indigenous Studies, Minor (p. 159)
• Near Eastern Languages & Civilizations: Ancient Near East, BA (p. 92)
• Near Eastern Languages & Civilizations: Ancient Near East, Minor (p. 159)
• Near Eastern Languages & Civilizations: Arabic & Hebrew Studies, BA (p. 93)
• Near Eastern Languages & Civilizations: Arabic & Hebrew Studies, Minor (p. 166)
• Near Eastern Languages & Civilizations: Arabic & Islamic Studies, BA (p. 93)
• Near Eastern Languages & Civilizations: Arabic & Islamic Studies, Minor (p. 159)
• Near Eastern Languages & Civilizations: Hebrew & Judaica, BA (p. 94)
• Near Eastern Languages & Civilizations: Hebrew & Judaica, Minor (p. 166)
• Near Eastern Languages & Civilizations: Persian Language & Literature, BA (p. 134)
• Near Eastern Languages & Civilizations: Persian Language & Literature, Minor (p. 169)
• Near Eastern Languages and Civilizations: Arabic and Islamic Studies, MA (p. 310)
• Near Eastern Languages and Civilizations: Arabic and Islamic Studies, PhD (p. 310)
• Near Eastern Languages and Civilizations: Biblical Studies, MA (p. 311)
• Near Eastern Languages and Civilizations: Biblical Studies, PhD (p. 312)
• Near Eastern Languages and Civilizations: Classical and Medieval Hebrew Literature, MA (p. 313)
• Near Eastern Languages and Civilizations: Classical and Medieval Hebrew Literature, PhD (p. 313)
• Near Eastern Languages and Civilizations: Egyptology and Archaeology, MA (p. 314)
• Near Eastern Languages and Civilizations: Egyptology, PhD (p. 315)
• Near Eastern Languages and Civilizations: Mesopotamian Civilization, MA (p. 316)
• Near Eastern Languages and Civilizations: Mesopotamian Civilization, PhD (p. 316)
• Networked and Social Systems Engineering, BSE (p. 186)
• Neuroscience, PhD (p. 284)
• Nursing and Health Services Management, Minor (p. 203)
• Nursing, BSN (p. 198)
• Nursing, PhD (p. 334)
• Nutrition Science, BA (p. 136)
• Nutrition, BSN (p. 201)
• Nutrition, Minor (p. 159)
• Nutrition, Minor (p. 204)

O
• Operations, Information & Decisions: Decision Processes Track, BS (p. 228)
• Operations, Information & Decisions: General Track, BS (p. 229)
• Operations, Information & Decisions: Information Systems Track, BS (p. 230)
• Operations, Information & Decisions: Operations Management/Management Science Track, BS (p. 230)
• Operations, Information and Decisions, PhD (p. 346)

P
• Pharmacology, PhD (p. 285)
• Philosophy, Minor (p. 160)
• Philosophy, PhD (p. 317)
• Philosophy, Politics and Economics: Choice & Behavior, BA (p. 95)
• Philosophy, Politics and Economics: Distributive Justice, BA (p. 95)
• Philosophy, Politics and Economics: Ethics & Professions, BA (p. 96)
• Philosophy, Politics and Economics: Globalization, BA (p. 97)
• Philosophy, Politics and Economics: Public Policy & Governance, BA (p. 97)
• Philosophy: General Philosophy, BA (p. 98)
• Philosophy: Humanistic Philosophy, BA (p. 99)
• Philosophy: Philosophy and Science, BA (p. 99)
• Philosophy: Political and Moral Philosophy, BA (p. 100)
• Physics and Astronomy, PhD (p. 317)
• Physics, Minor (p. 160)
• Physics: Astrophysics, BA (p. 101)
• Physics: Biological Science, BA (p. 102)
• Physics: Business & Technology, BA (p. 103)
• Physics: Chemical Principles, BA (p. 103)
• Physics: Computer Techniques, BA (p. 104)
• Physics: Physical Theory and Experimental Technique, BA (p. 105)
• Political Science, Minor (p. 161)
• Political Science, PhD (p. 318)
• Political Science: American Politics, BA (p. 106)
• Political Science: Comparative Politics, BA (p. 106)
• Political Science: General Political Science, BA (p. 107)
• Political Science: Individualized, BA (p. 108)
• Political Science: International Relations, BA (p. 109)
• Political Science: Political Economy, BA (p. 109)
• Political Science: Political Theory, BA (p. 110)
• Psychoanalytic Studies, Minor (p. 161)
• Psychology, BA (p. 111)
• Psychology, Minor (p. 161)
- Psychology, PhD (p. 318)
- Quantitative Methods, PhD (p. 271)

R
- Reading, Writing, Literacy, PhD (p. 272)
- Real Estate, BS (p. 231)
- Religious Studies, BA (p. 112)
- Religious Studies, Minor (p. 162)
- Religious Studies, PhD (p. 319)
- Retailing, BS (p. 232)
- Romance Languages: French and Francophone Studies, PhD (p. 320)
- Romance Languages: French and Italian, BA (p. 112)
- Romance Languages: French and Spanish, BA (p. 113)
- Romance Languages: Hispanic Studies, PhD (p. 321)
- Romance Languages: Italian and Spanish, BA (p. 114)
- Romance Languages: Italian Studies, PhD (p. 322)
- Russian and East European Studies: Cinema, Arts and Letters, BA (p. 136)
- Russian and East European Studies: History, Politics and Society, BA (p. 136)
- Russian and East European Studies: Language, Literature and Culture, BA (p. 134)
- Russian and East European Studies: Russian Culture and History, Minor (p. 162)
- Russian and East European Studies: Russian Language, Literature and Culture, Minor (p. 163)

S
- Science, Technology and Society, Minor (p. 163)
- Science, Technology and Society: Biotechnology & Biomedicine, BA (p. 115)
- Science, Technology and Society: Energy and Environment, BA (p. 115)
- Science, Technology and Society: Global Science and Technology, BA (p. 116)
- Science, Technology and Society: Information and Organizations, BA (p. 116)
- Science, Technology and Society: Science/Nature/Culture, BA (p. 117)
- Social Impact & Responsibility, BS (p. 233)
- Social Welfare, PhD (p. 337)
- Sociology, Minor (p. 163)
- Sociology, PhD (p. 323)
- Sociology, Global and International Studies, BA (p. 118)
- Sociology, Law and Society, BA (p. 118)
- Sociology, Quantitative Methods, BA (p. 119)
- Sociology: Sociology of Culture, BA (p. 120)
- Sociology: Sociology of Families and Populations, BA (p. 121)
- Sociology: Sociology of Health and Medicine, BA (p. 121)
- Sociology: Structures of Opportunity and Inequality, BA (p. 122)
- Sociology: Urban Sociology, BA (p. 123)
- South Asia Regional Studies, MA (p. 324)
- South Asia Regional Studies, PhD (p. 324)

- South Asia Studies, BA (p. 124)
- South Asia Studies, Minor (p. 163)
- Statistics, BS (p. 234)
- Statistics, Minor (p. 235)
- Statistics, PhD (p. 347)
- Survey Research and Data Analytics, Minor (p. 164)
- Sustainability and Environmental Management, Minor (p. 164)
- Systems Science and Engineering, BSE (p. 187)
- Systems Science and Engineering, Minor (p. 191)

T
- Teaching, Learning and Teacher Education, PhD (p. 272)
- Theatre Arts, BA (p. 124)
- Theatre Arts, Minor (p. 164)

U
- Urban Education, Minor (p. 168)
- Urban Real Estate and Development, Minor (p. 165)
- Urban Studies, BA (p. 125)
- Urban Studies, Minor (p. 165)

V
- Visual Studies: Architecture Practice and Technology, BA (p. 126)
- Visual Studies: Art and Culture of Seeing, BA (p. 126)
- Visual Studies: Art, Practice and Technology, BA (p. 128)
- Visual Studies: Philosophy and Science of Seeing, BA (p. 129)
COURSES A-Z

Courses are organized by subject and include courses at the undergraduate and graduate levels.

Search courses by keyword using the Advanced Course Search (p. 1478).

For more information, see the guide to Course Numbering and Academic Credit (p. 258) at the University of Pennsylvania.

A

- Accounting (ACCT) (p. 372)
- African Studies Program (AFST) (p. 375)
- Africano Studies (AFRC) (p. 381)
- Anatomy (ANAT) (p. 406)
- Ancient History (ANCH) (p. 407)
- Ancient Near East Languages (ANEL) (p. 411)
- Anthropology (ANTH) (p. 413)
- Applied Math & Computational Science (AMCS) (p. 439)
- Arabic (ARAB) (p. 441)
- Architecture (ARCH) (p. 445)
- Art & Archaeology of Mediterranean World (AAMW) (p. 459)
- Art History (ARTH) (p. 466)
- Asian American Studies (ASAM) (p. 488)
- Asian Languages (ALAN) (p. 490)
- Astronomy (ASTR) (p. 491)

B

- Behavioral & Decision Sciences (BDS) (p. 492)
- Bengali (BENG) (p. 493)
- Biochemistry & Molecular Biophysics (BMB) (p. 494)
- Biochemistry (BCH) (p. 497)

Accounting (ACCT)

ACCT 101 Accounting and Financial Reporting
This course is an introduction to the basic concepts and standards underlying financial accounting systems. Several important concepts will be studied in detail, including: revenue recognition, inventory, long-lived assets, present value, and long term liabilities. The course emphasizes the construction of the basic financial accounting statements - the income statement, balance sheet, and cash flow statement - as well as their interpretation.

One term course offered either term
Activity: Lecture
1 Course Unit

ACCT 102 Strategic Cost Analysis
The first part of the course presents alternative methods of preparing managerial accounting information, and the remainder of the course examines how these methods are used by companies. Managerial accounting is a company's internal language, and is used for decision making, production management, product design and pricing and for motivating and evaluating employees. Unless you understand managerial accounting, you cannot have a thorough understanding of a company's internal operations. What you learn in this course will help you understand the operations of your future employer (and enable you to be more successful at your job), and help you understand other companies you encounter in your role as competitor, consultant, or investor.

One term course offered either term
Activity: Lecture
1 Course Unit

ACCT 212 Financial Measurement and Disclosure(X)
This course builds on the knowledge you obtained in your introductory financial accounting course. This is an intermediate level course on financial reporting which covers more complicated transactions than those found in ACCT 101. We will cover major valuation and financial reporting topics on all three major sections of the balance sheet - assets, liabilities, and equity - along with their consequences for net income and cash flows. Case studies and illustrative examples from the financial press will be used to increase your familiarity with actual firms' financial statements and to emphasize the effect of financial accounting rules on the information presented in financial statements. After completing this course, you will have obtained many of the tools necessary to both prepare and analyze financial statements and accounting information provided by firms. You will acquire an understanding of both the how of accounting procedures and the underlying reasons why these practices are adopted. These skills are essential for pursuing a broad range of professions in accounting and finance.

Course usually offered in fall term
Prerequisite: ACCT 101
Activity: Lecture
1 Course Unit

ACCT 242 Accounting and Business Analysis
In the course, students learn how to analyze firms’ financial statements and disclosures to determine how a firm’s particular accounting choices reflect the underlying economics of the firm. As a result, the course strengthens students’ ability to use financial statements as part of an overall assessment of the firm’s strategy and valuation. The course is especially useful for anyone interested in working on the buy or sell side. The course provides both a framework for and the tools necessary to analyze financial statements. At the conceptual level, it emphasizes that preparers and users of financial statements have different objectives and incentives. At the same time, the course is applied and stresses the use of actual financial statements. For example, students learn how to detect when firms are managing earnings and/or balance sheets. It draws heavily on real business problems and uses cases to illustrate the application of the techniques and tools.

One term course offered either term
Also Offered As: ACCT 742
Prerequisite: ACCT 101
Activity: Lecture
1 Course Unit

ACCT 243 Accounting for Mergers, Acquisitions, and Complex Financial Structures
The objective of this course is to discuss and understand the accounting that underlies merger, acquisition, and investment activities among firms that result in complex financial structures. Key topics include the purchase accounting method for acquisitions, the equity method for investments, the preparation and interpretation of consolidated financial statements, tax implications of mergers and acquisitions, earnings-per-share considerations, the accounting implications of intercompany transactions and non-domestic investments, etc.

Course usually offered in fall term
Also Offered As: ACCT 743
Prerequisites: Prerequisites: ACCT 101, 102, 201 or 202 or 212
Activity: Lecture
1 Course Unit

ACCT 270 Predictive Analytics Using Financial Disclosures(X)
Recent trends in Big Data and predictive analytics are revolutionizing the way stakeholders analyze financial data. This course teaches students the hands-on skill necessary to manipulate large-scale financial databases and build predictive models useful for strategic and investment decisions. The course will cover four applications of Big Data and predictive analytics: (1) extracting insight about past and future firm performance, (ii) forecasting future earnings, (iii) predicting accounting fraud, and (iv) detecting insider trading. The course will draw on cutting-edge academic research in each area; introduce students to the basic SQL coding skills necessary to manipulate Big Data and conduct meaningful analyses; and leverage the datasets and computing power of Wharton Research Data Services.

Course usually offered in spring term
Prerequisites: ACCT 101, STAT 101, STAT 102
Activity: Lecture
1 Course Unit
ACCT 297 Taxes and Business Strategy
The objective of this course is to develop a framework for understanding how taxes affect business decisions. The key themes of the framework - all parties, all taxes and all costs - are applied to decision contexts such as investments, compensation, organizational form, and mergers and acquisitions. The ultimate goal is to provide a new approach to thinking about taxes that will be valuable even as laws and governments change. One term course offered either term
Also Offered As: ACCT 897
Prerequisites: ACCT 101 and FNCE 101
Activity. Lecture
1 Course Unit

ACCT 399 Supervised Study
Intensive reading and study with some research under the direction of a faculty member. Approval from one of the departmental advisers must be obtained before registration.
One term course offered either term
Prerequisites: Senior standing and 3.4 average in major related subjects
Activity. Independent Study
1 Course Unit

ACCT 611 Fundamentals of Financial Accounting
The objective of this course is to provide an understanding of financial accounting fundamentals for prospective consumers of corporate financial information, such as managers, stockholders, financial analysts, and creditors. The course focuses on understanding how economic events like corporate investments, financing transactions and operating activities are recorded in the three main financial statements (i.e., the income statement, balance sheet, and statement of cash flows). Along the way, students will develop the technical skills needed to analyze corporate financial statements and disclosures for use in financial analysis, and to interpret how accounting standards and managerial incentives affect the financial reporting process. This course is recommended for students who want a more in-depth overview of the financial accounting required for understanding firm performance and potential future risks through analysis of reported financial information, such as students intending to go into security analysis and investment banking.
One term course offered either term
Activity. Lecture
1 Course Unit

ACCT 612 Accelerated Financial Accounting
The intended audience for this course is students with prior knowledge of financial accounting who understand: (1) the recording of economic transactions in the accounting records; (2) the basic financial statements that summarize a firm's economic transactions (the balance sheet, the income statement and the statement of cash flows); and (3) the fundamental concepts needed to prepare or understand published financial statements (e.g. use of accrual accounting). Exploiting prior knowledge, the course aims in six weeks to help students become effective users of financial statements.
Course usually offered in fall term
Activity. Lecture
0.5 Course Units

ACCT 613 Fundamentals of Financial and Managerial Accounting
This course provides an introduction to both financial and managerial accounting, and emphasizes the analysis and evaluation of accounting information as part of the managerial processes of planning, decision-making, and control. A large aspect of the course covers the fundamentals of financial accounting. The objective is to provide a basic overview of financial accounting, including basic accounting concepts and principles, as well as the structure of the income statement, balance sheet, and statement of cash flows. The course also introduces elements of managerial accounting and emphasizes the development and use of accounting information for internal decisions. Topics include cost behavior and analysis, product and service costing, and relevant costs for internal decision-making. This course is recommended for students who will be using accounting information for managing manufacturing and service operations, controlling costs, and making strategic decisions, as well as those going into general consulting or thinking of starting their own businesses.
One term course offered either term
Activity. Lecture
1 Course Unit

ACCT 706 Cost Management
This course covers managerial accounting and cost management practices that can be strategically applied across the various functions of a business organization to improve organizational performance. The course emphasizes the methods available to measure and evaluate costs for decision-making and performance evaluation purposes. It reviews a number of cost management issues relating to the design and implementation of strategic, marketing, value analysis, and other management models in modern firms; and identifies major contemporary issues in managerial accounting and financial decision-making. A variety of case studies in different industries and decision contexts are used to examine the application of these concepts.
One term course offered either term
Prerequisites: ACCT 611, 612, 613 or waiver.
Activity. Lecture
0.5 Course Units
Notes: Lecture, case studies, class participation, written group cases, and exams.

ACCT 742 Financial Reporting and Business Analysis
This intensive one-semester course focuses on how to extract and interpret information in financial statements. The course adopts a user perspective of accounting by illustrating several specific accounting issues in a decision context.
One term course offered either term
Also Offered As: ACCT 242
Prerequisites: ACCT 611, 612, 613 completed or waiver. ACCT 742 cannot be taken concurrently with ACCT 611, 612, 613.
Activity. Lecture
1 Course Unit
Notes: Format: Discussions, lectures on advanced topics, problems and cases. Daily preparation of cases and reading assignments. Comprehensive final exam. Some instructors may choose to grade homework, class participation, and case write-ups.

2018-19 Catalog | Generated 02/28/19
ACCT 743 Accounting for Mergers, Acquisitions and Complex Financial Structures
This class studies how complex financial structures account for their activities. Primary emphasis is on the application of purchase accounting for mergers and acquisitions, the equity method for investments, and preparing and interpreting consolidated financial statements. Other topics covered include translations and remeasurements for nondomestic investments, and earnings per share calculations for complex financial structures. Tax considerations and acquisition strategies are of only peripheral interest in this class, and students who are concerned primarily with those topics are advised to seek a different elective.
Course usually offered in fall term
Also Offered As: ACCT 243
Prerequisites: ACCT 611, 612, 613 or waiver.
Activity: Lecture
1 Course Unit
Notes: Lectures and quizzes, class participation, and satisfactory performance on quizzes.

ACCT 747 Financial Disclosure Analytics
This course focuses on the analysis of financial communications between corporate managers and outsiders, including the required financial statements, voluntary disclosures, and interactions with investors, analysts, and the media. The course draws on the findings of recent academic research to discuss a number of techniques that outsiders can use to detect potential bias or aggressiveness in financial reporting. FORMAT: Case discussions and lectures. Comprehensive final exam, group project, case write-ups, and class participation.
One term course offered either term
Prerequisites: ACCT 611, 612, 613 completed or waiver.
Activity: Lecture
1 Course Unit

ACCT 897 Taxes and Business Strategy
The objective of this course is to develop a framework for understanding how taxes affect business decisions. Traditional finance and strategy courses do not consider the role of taxes. Similarly, traditional tax courses often ignore the richness of the decision context in which tax factors operate. The key themes of the framework - all parties, all taxes and all costs - are applied to decision contexts such as investments, compensation, organizational form, regulated industries, financial instruments, tax-sheltered investments, mergers and acquisitions, multinational, and multistate. The ultimate goal is to provide a new approach to thinking about taxes (and all forms of government intervention) that will be valuable even as laws and governments change.
One term course offered either term
Also Offered As: ACCT 297
Prerequisites: ACCT 611, 612, 613 or waiver and FNCE 611, 612.
Activity: Lecture
1 Course Unit
Notes: Lecture and case discussions.

ACCT 910 Accounting Theory Research
This is theory course covering topics in agency theory, disclosure theory, and incentive design.
Course usually offered in fall term
Activity: Seminar
1 Course Unit

ACCT 921 Empirical Research in Accounting I
This is an empirical literature survey course covering topics that include corporate disclosure, cost of capital, incentives, compensation, governance, financial intermediation, financial reporting, tax, agency theory, cost accounting, capital structure, international financial reporting, analysts, and market efficiency.
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ACCT 922 Empirical Research in Accounting II
This is an empirical literature survey course covering topics that include corporate disclosure, cost of capital, incentives, compensation, governance, financial intermediation, financial reporting, tax, agency theory, cost accounting, capital structure, international financial reporting, analysts, and market efficiency.
Course usually offered in spring term
Activity: Seminar
1 Course Unit

ACCT 930 Empirical Design in Accounting Research
This is an empirical research design course covering topics related to empirical methodology, causal inference, econometric analysis, and panel data approaches.
Prerequisites: At least one graduate level course in econometrics.
Activity: Seminar
1 Course Unit

ACCT 981 Workshop Colloquium I
Students attend workshops in departments outside of accounting to provide student exposure to theory, research designs and methods that are being explored outside of accounting to provide breadth of exposure to foster innovative research ideas. Students are required to attend 15 non-accounting workshops over one academic year and write up a referee report for 8 of those workshop papers. They are also required to write up at least one research proposal that stems from theories or research methods gleaned from one or more of the workshops attended.
Activity: Seminar
1 Course Unit

ACCT 982 Workshop Colloquium II
Students attend workshops in departments outside of accounting to provide student exposure to theory, research designs and methods that are being explored outside of accounting to provide breadth of exposure to foster innovative research ideas. Students are required to attend 15 non-accounting workshops over one academic year and write up a referee report for 8 of those workshop papers. They are also required to write up at least one research proposal that stems from theories or research methods gleaned from one or more of the workshops attended.
Activity: Seminar
1 Course Unit
African Studies Program (AFST)

AFST 140 Elementary Zulu I in Residence
This elementary course is for beginners and it requires no prior knowledge of Zulu. The course will expose students to the Zulu language and culture and will be based in the National Standards for Foreign Language Learning. Students will be engaged in communicative language learning through interpersonal, interpretive and presentational modes of language learning techniques. They will gain knowledge and understanding of the Zulu culture. They will use their Zulu language and culture learning experience to connect with other disciplines and further their knowledge of these disciplines through perspectives acquired from their Zulu class. They will also develop insight into the nature of language and culture through comparisons of the Zulu language and culture and their own. Through movies, songs, and other cultural activities online students will acquire the natural use of the language which will enable them to acquire linguistic and cultural skill to become life-long learners who can participate in Zulu communities in the U.S. and overseas.

Taught by: Mbeje

One-term course offered either term
Also Offered As: AFRC 140
Activity: Lecture
0.5 Course Units
Notes: OBJECTIVE: Attainment of Level 1 (ceiling) in speaking, listening, reading, and writing skills on the Interagency Language Roundtable (ILR) scale.

AFST 170 Elementary Yoruba I
The Elementary Yoruba I course can be taken to fulfill a language requirement, or for linguistic preparation to do research on Nigeria and the diaspora/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Yoruba. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content. Students will acquire the speaking, listening, reading, and writing skills at the mid-high novice level, based on the ACTFL scale. The mid-high novice level proficiency skills that the students will acquire constitute threshold capabilities of the second semester range of proficiency to prepare students for Elementary Yoruba II course materials.

For BA Students: Language Course

Taught by: Awoyale

Course usually offered in fall term
Also Offered As: AFRC 170, AFST 517
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 171 Elementary Yoruba II
The main objective of this course is to further sharpen the Yoruba linguistic knowledge that the student acquired in level I. By the end of the course, the student should be able to (1) read, write, and understand simple to moderately complex sentences in Yoruba; and, (2) advance in the knowledge of the Yoruba culture.

For BA Students: Language Course

Taught by: Awoyale

Course usually offered in spring term
Also Offered As: AFRC 171, AFRC 517, AFST 518
Prerequisites: Completion of Elementary Yoruba I, or permission of instructor
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 180 Elementary Swahili I
The Elementary Swahili I course can be taken to fulfill a language requirement, or for linguistic preparation to do research on East Africa/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Swahili. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content. Students will acquire the speaking, listening, reading, and writing skills at the mid-high novice level, based on the ACTFL scale. The mid-high level proficiency skills that the students will acquire constitute threshold capabilities of the second semester range of proficiency to prepare students for Elementary Swahili II course materials.

For BA Students: Language Course

Taught by: Mshomba

Course usually offered in fall term
Also Offered As: AFRC 180, AFST 580
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 181 Elementary Swahili II
This course continues to introduce basic grammar, vocabulary, and the reading and writing of Swahili to new speakers. During this term, folktales, other texts, and film selections are used to help introduce important aspects of Swahili culture and the use of the language in wide areas of Africa.

For BA Students: Language Course

Taught by: Mshomba

Course usually offered in spring term
Also Offered As: AFRC 181, AFST 581
Prerequisites: Completion of Elementary Swahili I, or permission of instructor
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center
AFST 190 Introduction to Africa
This course provides an introduction to the study of Africa in all its
diversity and complexity. Our focus is cultural, geographical, and
historical; we will seek to understand Africa’s current place in the world
political and economic order and learn about the various social and
physical factors that have influenced the historical trajectory of the
continent. We study the cultural formations and empires that emerged
in Africa before European colonial invasion and then how colonialism
reshaped those sociocultural forms. We’ll learn about the unique kinds of
kinship and religion in precolonial Africa and the changes brought about
by the spread of Islam and Christianity. Finally, we’ll take a close look at
temporary issues such as ethnic violence, migration, popular culture
and poverty, and we’ll debate the various approaches to understanding
those issues.
For BA Students: Society Sector
Taught by: Hasty
Course usually offered in fall term
Also Offered As: AFRC 190, ANTH 190
Activity: Lecture
1 Course Unit

AFST 221 African Women’s Lives: Past and Present
Restoring women to African history is a worthy goal, but easier said
than done. The course examines scholarship over the past forty years
that brings to light previously overlooked contributions African women
have made to political struggle, religious change, culture preservation,
and economic development from pre-colonial times to present. The
course addresses basic questions about changing women’s roles and
human rights controversies associated with African women within the
wider cultural and historical contexts in which their lives are lived. It
also raises fundamental questions about sources, methodology, and
representation, including the value of African women’s oral and written
narrative and cinema production as avenues to insider perspectives on
African women’s lives.
Taught by: Blakely
Course not offered every year
Also Offered As: AFRC 222, GSWS 222
Activity: Lecture
1 Course Unit

AFST 240 Elementary Amharic I
The Elementary Amharic I course can be taken to fulfill a language
requirement, or for linguistic preparation to do research on Ethiopia/
Africa related topics. The course emphasizes communicative
competence to enable the students to acquire linguistic and extra-
linguistic skills in Amharic. The content of the course is drawn from
various everyday life situations to enable the students to communicate
in predictable common daily settings. Culture, as it relates to language
use, is also part of the course content. Students will acquire the speaking,
listening, reading, and writing skills at the mid-high novice level, based
on the ACTFL scale. The mid-high novice level proficiency skills that the
students will acquire constitute threshold capabilities of the second
semester range of proficiency to prepare students for Elementary
Amharic II course materials.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: AFRC 240, AFRC 540, AFST 540, NELC 481
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 241 Elementary Amharic II
Continuation of Elementary Amharic I. Amharic belongs to the southern
branch of Hemet-Semitic languages, which is also referred to as
"Afrasi." Amharic is the official language of Ethiopia and is spoken by
14 million native Amharas and by approximately 18 million of the other
groups in Ethiopia. This course continues to introduce basic grammar,
vocabulary, and the reading and writing of Amharic to new speakers.
For BA Students: Language Course
Taught by: Hailu
Course usually offered in spring term
Also Offered As: AFRC 241, AFRC 541, AFST 541, NELC 482
Prerequisites: Completion of Elementary Amharic I, or permission of the
instructor
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 242 Intermediate Amharic I
For BA Students: Language Course
Taught by: Hailu
Course usually offered in fall term
Also Offered As: AFRC 242, AFRC 543, AFST 543, NELC 483
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 243 Intermediate Amharic II
For BA Students: Last Language Course

Course usually offered in spring term
Also Offered As: AFRC 243, AFRC 544, AFST 544, NELC 484
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 247 Advanced Amharic
An advanced Amharic course that will further sharpen the students’
knowledge of the Amharic language and the culture of the Amharas. The
learners communicative skills will be further developed through listening,
speaking, reading and writing. There will also be discussions on cultural
and political issues.
For BA Students: Advanced Language Course
Taught by: Zemichael
One term course offered either term
Also Offered As: AFRC 548, AFST 547
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 270 Intermediate Yoruba I
For BA Students: Language Course
Taught by: Awoyale
Course usually offered in fall term
Also Offered As: AFRC 270, AFST 529
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center
AFST 271 Intermediate Yoruba II
For BA Students: Last Language Course
Taught by: Awoyale
Course usually offered in spring term
Also Offered As: AFRC 271, AFRC 534, AFST 532
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 277 Penn Slavery Project Research Seminar
Taught by: Brown
Activity: Seminar
1 Course Unit

AFST 280 Intermediate Swahili I
The objectives of this course are: to strengthen students' knowledge of speaking, listening, reading, and writing Swahili and to compare it with the language of the students; to learn more about the cultures of East Africa and to compare it with the culture(s) of the students; to consider the relationship between that knowledge and the knowledge of other disciplines; and using that knowledge, to unite students with communities outside of class.
For BA Students: Language Course
Taught by: Mshomba
Course usually offered in fall term
Also Offered As: AFRC 280, AFST 582
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 281 Intermediate Swahili II
At the end of the course students will be at Level 2 on the ILR (Interagency Language Roundtable) scale.
For BA Students: Last Language Course
Taught by: Mshomba
Course usually offered in spring term
Also Offered As: AFRC 282, AFST 583
Prerequisites: Intermediate Swahili I, or permission of instructor
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFST 284 Advanced Swahili I
This is an advanced Kiswahili course which will engage learners in extended spoken and written discourse. Advanced learners of Kiswahili will listen to, read about, write and speak on authentic video materials, contemporary novels, and newspapers. They will also participate in various discussions on cultural and political issues.
For BA Students: Advanced Language Course
Taught by: Mshomba
Course usually offered in fall term
Also Offered As: AFRC 284, AFST 584
Prerequisites: AFST 280, LING 280, AFRC 280 or permission of instructor
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 285 Advanced Swahili II
The objectives are to continue to strengthen students' knowledge of speaking, listening, reading, and writing Swahili and to compare it with the language of the students; to continue learning about the cultures of East Africa and to continue making comparisons with the culture(s) of the students; to continue to consider the relationship between that knowledge and the knowledge of other disciplines; and using that knowledge, to continue to unite students with communities outside of class. Level 3 on the ILR (Interagency Language Roundtable) scale.
For BA Students: Advanced Language Course
Taught by: Mshomba
Course usually offered in spring term
Also Offered As: AFRC 285, AFST 586
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 300 Advanced Yoruba I
For BA Students: Advanced Language Course
Taught by: Awoyale
Course usually offered in fall term
Also Offered As: AFST 587
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 301 Advanced Yoruba II
For BA Students: Advanced Language Course
Taught by: Awoyale
Course usually offered in spring term
Also Offered As: AFST 588
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 460 Middle Egyptian
Introduction to the grammar of Middle Egyptian.
Taught by: Silverman
Two terms. student must enter first term.
Also Offered As: ANEL 460
Activity: Lecture
1 Course Unit

AFST 467 Introduction to Egyptian Culture and Archaeology
Covers principal aspects of ancient Egyptian culture (environment, urbanism, religion, technology, etc) with special focus on archaeological data; includes study of University Museum artifacts. Follows AMES 266/466 - History of Egypt taught in the Fall semester.
Taught by: Wegner
Course usually offered in spring term
Also Offered As: NELC 467
Activity: Lecture
1 Course Unit

AFST 470 Twi Language & Culture I
Activity: Lecture
1 Course Unit

AFST 471 Twi Language & Culture II
Activity: Lecture
1 Course Unit
AFST 484 Swahili Lang/Culture I
This course taught in Swahili will focus on reading/writing skills and speaking/listening skills as well as structural and cultural information. The course will be structured around three thematic units: History, Politics, and Education. The course will provide background on the Swahili-speaking world: Who were the first Swahili speakers and what varieties of the language did they speak? How did Swahili spread from the coast to other Swahili-speaking areas as far inland as Uganda, Rwanda, and Congo? Swahili is a lingua franca and has importance in the spread of religion and trade movements. Influences of other languages on Swahili and influences of Swahili on local languages will be discussed. Political and educational systems will be discussed as well.
For BA Students: Advanced Language Course
Taught by: Mshomba
Course not offered every year
Also Offered As: AFST 590
Prerequisite: Completion of Advanced Swahili I & II
Activity: Lecture
1 Course Unit

AFST 485 Yoruba Language & Culture I
Taught by: Awoyale
Course not offered every year
Prerequisites: Completion of Advanced Yoruba I & II.
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 487 Yoruba Language & Culture II
Taught by: Awoyale
One-term course offered either term
Prerequisites: Completion of Advanced Yoruba I & II.
Activity: Lecture
1 Course Unit

AFST 490 African Language Tutorial - Elementary I
The main objective of this course is to allow students to study an African language of their choice, depending on the availability of the instructor. The course will provide students with linguistics tools which will facilitate their research work in the target country. Cultural aspects of the speakers of the language will be introduced and reinforced.
For BA Students: Language Course
One-term course offered either term
Also Offered As: AFST 594
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 491 African Language Tutorial - Elementary II
Continuation of AFST 490.
For BA Students: Language Course
One-term course offered either term
Also Offered As: AFRC 491
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 492 African Language Tutorial - Intermediate I
Intermediate level courses in a variety of African languages: Igbo, Shona, Wolof, Malagasy, Chichewa, Setswana, Manding, Afrikaans, Setswana.
Focus on oral proficiency and productive language skills. All course are language specific and follow ACTFL proficiency guidelines.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: AFST 596
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 493 African Language Tutorial - Intermediate II
Continuation of AFST 492.
For BA Students: Last Language Course
Course usually offered in spring term
Also Offered As: AFRC 493, AFST 597
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 494 African Language Tutorial - Advanced I
Language specific sections for students interested in doing country-specific research in a target language. Courses cover project-based skills for AFST research.
For BA Students: Advanced Language Course
Course usually offered in fall term
Also Offered As: AFST 598
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 495 African Language Tutor: Adv II Languages will be specified in each section.
Continuation of AFST 494.
Course usually offered in spring term
Also Offered As: AFRC 495, AFST 599
Prerequisite: Permission of Penn Language Center
Activity: Lecture
1 Course Unit

AFST 496 Language & Culture I
Aspects of the targeted language's history, language, and culture.
For BA Students: Language Course
Course usually offered in fall term
Prerequisites: Permission of Penn Language Center.
Activity: Lecture
1 Course Unit
Notes: Offered Through Penn Language Center

AFST 497 Language & Culture II
Continuation of AFST 496.
Course usually offered in spring term
Also Offered As: AFRC 497
Prerequisites: Permission of Penn Language Center.
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center
AFST 509 Arabic: Reading Historical Manuscripts
Arabic language is used by many societies not only in communication but also in correspondence and in documenting the affairs of their daily lives. Arabic script is adopted by many groups who native languages are not Arabic, in writing their language before some moved to the roman alphabet. In many historical documents specific style of writing and handwriting are dominant. This specificity is influenced by the dialectical variations, the historical development of each region and the level of Arabic literacy and use.
Course not offered every year
Activity: Lecture
1 Course Unit

AFST 517 Elementary Yoruba I
This is an introductory course in Yoruba whose goals are to introduce students to the history, geographical location of the people who speak Yoruba, their culture, customs, and traditions; and, to enable students to develop communicative skills through listening, speaking, reading and writing.
For BA Students: Language Course
Taught by: Awoyale
Course usually offered in fall term
Also Offered As: AFRC 170, AFST 170
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 518 Elementary Yoruba II
The main objective of this course is to further sharpen the Yoruba linguistic knowledge that the student acquired in level I. By the end of the course, the student should be able to (1) read, write, and understand simple to moderately complex sentences in Yoruba; and (2) advance in the knowledge of the Yoruba culture.
For BA Students: Language Course
Taught by: Awoyale
Course usually offered in spring term
Also Offered As: AFRC 171, AFRC 517, AFST 171
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 529 Intermediate Yoruba I
For BA Students: Language Course
Taught by: Awoyale
Course usually offered in fall term
Also Offered As: AFRC 270, AFST 270
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 532 Intermediate Yoruba II
For BA Students: Last Language Course
Taught by: Awoyale
Course usually offered in spring term
Also Offered As: AFRC 271, AFRC 534, AFST 271
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 540 Elementary Amharic I
An introductory course for students with no previous knowledge of Amharic. Amharic belongs to the southern branch of Hamito-Semitic languages which is also referred to as "Afrasian." Amharic is the official language of Ethiopia and is spoken by 14 million native Amharas and by approximately 18 million of the other ethnic groups in Ethiopia. The goals of this course are to introduce students to the culture, customs, and traditions of the Amharas. Students will develop communicative skills through listening, speaking, reading and writing.
For BA Students: Language Course
Taught by: Hallu
Course usually offered in fall term
Also Offered As: AFRC 240, AFRC 540, AFST 240, NELC 481
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 541 Elementary Amharic II
Continuation of Elementary Amharic I.
For BA Students: Language Course
Taught by: Hallu
Course usually offered in spring term
Also Offered As: AFRC 241, AFRC 541, AFST 241, NELC 482
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 543 Intermediate Amharic I
Offered through Penn Language Center
For BA Students: Language Course
Taught by: Hallu
Course usually offered in fall term
Also Offered As: AFRC 242, AFRC 543, AFST 242, NELC 483
Activity: Lecture
1 Course Unit

AFST 544 Intermediate Amharic II
Offered through Penn Language Center
For BA Students: Last Language Course
Taught by: Hallu
Course usually offered in spring term
Also Offered As: AFRC 243, AFRC 544, AFST 243, NELC 484
Activity: Lecture
1 Course Unit

AFST 547 Advanced Amharic
An advanced Amharic course that will further sharpen the students' knowledge of the Amharic language and the culture of the Amharas. The learners communicative skills will be further developed through listening, speaking, reading and writing. There will also be discussions on cultural and political issues.
For BA Students: Advanced Language Course
Taught by: Hallu
One term course offered either term
Also Offered As: AFRC 548, AFST 247
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center
AFST 580 Elementary Swahili I
Beginning level of Swahili which provides training and practice in speaking, reading and writing with initial emphasis on speaking and listening. Basic grammar, vocabulary and cultural skills learned gradually with priority on the spoken language. Especially during the second term, folktales, other texts and films will be used to help introduce important aspects of Swahili culture.
For BA Students: Language Course
Taught by: Mshomba
Course usually offered in fall term
Also Offered As: AFRC 180, AFST 180
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 581 Elementary Swahili II
This course continues to introduce basic grammar, vocabulary, and the reading and writing of Swahili to new speakers. During this term, folktales, other texts, and film selections are used to help introduce important aspects of Swahili culture and the use of the language in wide areas of Africa.
For BA Students: Language Course
Taught by: Mshomba
Course usually offered in spring term
Also Offered As: AFRC 181, AFST 181
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 582 Intermediate Swahili I
For BA Students: Language Course
Taught by: Mshomba
Course usually offered in fall term
Also Offered As: AFRC 280, AFST 280
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 583 Intermediate Swahili II
For BA Students: Last Language Course
Taught by: Mshomba
Course usually offered in spring term
Also Offered As: AFRC 282, AFST 282
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 584 Advanced Swahili I
This is an advanced Kiswahili course which will engage learners in extended spoken and written discourse. Advanced learners of Kiswahili will listen to, read about, write and speak on authentic video materials, contemporary novels, and newspapers. They will also participate in various discussions on cultural and political issues.
For BA Students: Advanced Language Course
Taught by: Mshomba
One term course offered either term
Also Offered As: AFRC 284, AFST 284
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

AFST 586 Advanced Swahili II
For BA Students: Advanced Language Course

Activity: Lecture
1 Course Unit

AFST 649 Amharic Lang & Culture
For BA Students: Advanced Language Course
One term course offered either term
Activity: Lecture
1 Course Unit
Africana Studies (AFRC)

AFRC 001 Introduction to Africana Studies
The term Africana emerged in public discourse amid the social, political, and cultural turbulence of the 1960s. The roots of the field, however, are much older, easily reaching back to oral histories and writings during the early days of the Trans-Atlantic African slave trade. The underpinnings of the field continued to grow in the works of enslaved Africans, abolitionists and social critics of the nineteenth century, and evolved in the twentieth century by black writers, journalists, activists, and educators as they sought to document African descendant people's lives. Collectively, their work established African Studies as a discipline, epistemological standpoint and political practice dedicated to understanding the multiple trajectories and experiences of black people in the world throughout history. As an ever-transforming field of study, this course will examine the genealogy, major discourses, and future trajectory of Africana Studies. Using primary sources such as maps and letters, as well as literature and performance, our study of Africana will begin with continental Africa, move across the Atlantic during the middle passage and travel from the coasts of Bahia in the 18th century to the streets of Baltimore in the 21st century. The course is constructed around major themes in Black intellectual thought including: retention and transferal, diaspora, black power, meanings of blackness, uplift and nationalism. While attending to narratives and theories that concern African descendant people in the United States, the course is uniquely designed with a focus on gender and provides context for the African diasporic experience in the Caribbean and Latin America.

For BA Students: Humanities and Social Science S
Taught by: Beavers, Butler, Charles, Johnson, Hanchard

Activity: Lecture
1 Course Unit

AFRC 002 Introduction to Sociology
We live in a country which places a premium on indivi dual accomplishments. Hence, all of you worked extremely hard to get into Penn. Yet, social factors also have an impact on life chance. This class provides an overview of how membership in social groups shapes the outcomes of individuals. We will look at a range of topics from the organizational factors which promoted racial inequality in Ferguson, Mo to the refusal of (mosty elite) parents to vaccinate their children. The experience of women and men in the labor market – and the social factors that lead women to earn less than men – is another interesting topic taken up in the course. Who gets ahead in America? Course requirements include a midterm, research paper (five to six pages), final and recitation activities. Students are not expected to have any previous knowledge of the topic. Welcome to the course!

For BA Students: Society Sector
Taught by: Imogene, Zuberi
One term course offered either term
Also Offered As: SOCI 001
Activity: Recitation
0 Course Units

AFRC 003 Refuge: Stories on Art and Survival
"The nomad or immigrant who learns something rightly must always ponder travel and movement, just as the grief-striken must inevitably ponder death. As does the artist who comes from a culture that is as much about harnessing life-joyous, jubilant, resilient life-as it is about avoiding death." Edwidge Danticat, Create Dangerously: The Immigrant Artist at Work What can we learn about the current migration crisis from literature and film? This course will first introduce students to histories of migration during the 20th and 21st centuries that have emerged from Cameroon, Canada, Canada, France, Haiti, South Africa, United Kingdom, United States, among others. Students will then study how these histories shape film and literature as much as how artistic works shape these histories. From studying artistic works by Raoul Peck, Dany Laferriere, Ousmane Sembene, NoViolet Bulawayo and Edouard Duval-Carri we will approach a few questions. What is it like to lose your home and your homeland? How can we learn from the stories of exiles, expatriates, immigrants, migrants and refugees of their search for refuge? How have these experiences of migration been affected by race, gender and class? Finally, how do "immigrant artists," to borrow from Edwidge Danticat, negotiate the zone of comfort or discomfort necessary to create and recreate? This course is open to students from all majors. No previous knowledge of literary studies or current affairs required. Course evaluations include weekly Canvas posts, oral presentations and creative, individualized projects.

Taught by: IRELE
Course not offered every year
Also Offered As: COML 002, ENGL 002
Activity: Seminar
1 Course Unit

AFRC 006 Race and Ethnic Relations
The course will focus on race and ethnicity in the United States. We begin with a brief history of racial categorization and immigration to the U.S. The course continues by examining a number of topics including racial and ethnic identity, interracial and interethnic friendships and marriage, racial attitudes, mass media images, residential segregation, educational stratification, and labor market outcomes. The course will include discussions of African Americans, Whites, Hispanics, and Asian Americans and Multiracials.

1 Course Unit

AFRC 008 Sociology of the Black Community
This course explores a broad set of issues defining important aspects of the Black/African American experience. In addition to the "usual suspects" (e.g., race, socioeconomic status, poverty, gender, and group culture), we also think about matters of health and well-being, the family, education, and identity in Black/African American communities. Our goal is to gain a deeper sociological understanding and appreciation of the diverse and ever-changing life experiences of Blacks/African Americans.

Taught by: Charles
One term course offered either term
Also Offered As: SOCI 028
Activity: Seminar
1 Course Unit
Notes: Freshman Seminar
AFRC 010 Freshman Seminar
This course is cross-listed with PSCI 010 (Freshmen Seminar) when the subject matter is related to African American or other African Diaspora issues. Topics vary. A recent topic is "Race, Crime, and Punishment." See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.

Also Offered As: SOCI 011, URBS 112
Activity: Seminar
1 Course Unit

AFRC 015 Freshman Seminar in 20TH Century History
In this First Year Seminar we will use coming-of-age autobiographies to explore some of the most significant historical developments of the 20th century. By coming of age I mean autobiographies in which the author focuses primarily on the periods of childhood and adolescence into young adulthood. We will read books by people who lived during segregation in the South, the Great Depression, Japanese Internment during World War II, and the Civil Rights Movement of the 1960s. We will consider many issues, including: race, racism, immigration, religion, social class, and gender. We will contemplate questions about identity, family, honesty, and memory. As we read each book we will examine an individual life in a particular place and time, and we will move out beyond the confines of a person, family, or town to explore the broader historical moment in which the individual lived. To make this deeper contextualization possible, the course is divided into segments that will allow us to study the historical context of the autobiography as well as engage in focused discussion of the texts themselves.
Taught by: Williams
One term course offered either term
Also Offered As: HIST 104
Activity: Seminar
1 Course Unit

AFRC 017 Topics in Literature
SPRING 2018: This seminar will introduce students to the power of public art. Outdoor murals, painted poetry, poetry performed outdoors, anti-museum sculpture, and outdoor theater will be the focus of this seminar. How does public art make the very idea of art gain new dimensions such as art as an event (not an object) and art as a community intervention? Our starting point will be outdoor murals in Philadelphia and other very recent art reconsidering the meaning of public monuments. In addition to our focus on contemporary public art in Philadelphia, we will focus on the role of public art in the 1960s and 1970s Black Arts Movement. The seminar will unveil the power of outdoor space to create art that has urgency and the openness of radical experimentation. See the Africana Studies Department’s website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Beavers, Tillet, Crawford

Activity: Seminar
1 Course Unit
Notes: Freshmen Seminar

AFRC 019 AFAM Freshman Seminar
This course will introduce students to a more hemispheric understanding of the American experience, through the writings of many authors from the New World, including the United States, on what it means to be an American. Students will read texts from many genres including but not limited to poetry, film, prose, political speeches and autobiography, to come to terms with histories of native Americans, African-Americans, Latinos, and whites in the United States, as well as peoples of South America and the Caribbean. In the process students will become familiar with scholarship across the social sciences and humanities that consider issues of race, culture, nation, freedom and inequality in the Americas, and how racial slavery and the Afro-American hemispheric experience has informed multiple American visions.
Taught by: Hanchard
Course usually offered in fall term
Activity: Seminar
1 Course Unit
AFRC 041 Homelessness & Urban Inequality
This freshman seminar examines the homelessness problem from a variety of scientific and policy perspectives. Contemporary homelessness differs significantly from related conditions of destitute poverty during other eras of our nation's history. Advocates, researchers and policymakers have all played key roles in defining the current problem, measuring its prevalence, and designing interventions to reduce it. The first section of this course examines the definitional and measurement issues, and how they affect our understanding of the scale and composition of the problem. Explanations for homelessness have also been varied, and the second part of the course focuses on examining the merits of some of those explanations, and in particular, the role of the affordable housing crisis. The third section of the course focuses on the dynamics of homelessness, combining evidence from ethnographic studies of how people become homeless and experience homelessness, with quantitative research on the patterns of entry and exit from the condition. The final section of the course turns to the approaches taken by policymakers and advocates to address the problem, and considers the efficacy and quandaries associated with various policy strategies. The course concludes by contemplating the future of homelessness research and public policy.
Taught by: Culhane
One-term course offered either term
Also Offered As: SOCI 041, URBS 010
Activity: Seminar
1 Course Unit
Notes: This freshman seminar is cross-listed with URBS 010 when the subject matter is related to African, African American, or other Diaspora issues. A recent topic is "Homelessness and Urban Inequality." See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings.

AFRC 050 World Musics and Cultures
This course examines how we as consumers in the "Western" world engage with musical difference largely through the products of the global entertainment industry. We examine music cultures in contact in a variety of ways—particularly as traditions in transformation. Students gain an understanding of traditional music as live, meaningful person-to-person music making, by examining the music in its original site of production, and then considering its transformation once it is removed, and recontextualized in a variety of ways. The purpose of the course is to enable students to become informed and critical consumers of "World Music" by telling a series of stories about particular recordings made with, or using the music of, peoples culturally and geographically distant from the US. Students come to understand that not all music downloads containing music from unfamiliar places are the same, and that particular recordings may be embedded in intriguing and controversial narratives of production and consumption. At the very least, students should emerge from the class with a clear understanding that the production, distribution, and consumption of world music is rarely a neutral process.
For BA Students: Arts and Letters Sector

Activity: Lecture
1 Course Unit

AFRC 056 Seeing/Hearing South Africa: Politics and History through Contemporary Performance
This course begins in the regular semester—students are provided a general introduction to South African history, politics, environment, and performance through a range of resources: scholarly literature, film, music, and online resources; with particular focus on sites, communities, and events included in the two week intensive travel to South Africa (either Fall semester Intro with winter break travel; or spring semester Intro with late spring intensive travel). Students are given guidelines for writing about and representing live performances and experiences of exhibits and heritage sites. For fall/winter travel: focus is on Cape Town’s New Year’s Festival performed by those historically called “Cape Coloured” a Festival that makes complicated understandings of race, slavery, and transatlantic translation of borrowed culture. For the Spring/late spring travel, the destination is music festivals in mid-May. Both classes include visits to Robben island, Kirstenbosch gardens; “Cape Malay” heritage sites; travel to KwaZulu Natal, and to Johannesburg’s apartheid museum, Soweto’s anti apartheid destinations, the Cradle of Humankind works heritage site, a game park, and the Union Buildings in Pretoria. En route we will stop over to view Khoisan rock art.

AFRC 062 Land of the Pharaohs
This course provides an introduction to the society, culture and history of ancient Egypt. The objective of the course is to provide an understanding of the characteristics of the civilization of ancient Egypt and how that ancient society succeeded as one of the most successful and long-lived civilizations in world history.
For BA Students: History and Tradition Sector
Also Offered As: NELC 062
Activity: Lecture
1 Course Unit
AFRC 070 Colonial Latin America
This course provides an introduction to the broad literature on Latin America's rich colonial history. We will begin by tracing some of the early origins of and points of contact between the Indian, Iberian, and African men and women who formed the basis of colonial society. As the course progresses, we will explore the variety of ways in which colonial subjects lived, worked, ate, worshipped, and socialized. Lectures and reading assignments will draw upon a variety of sources, including court cases, artistic renditions, city maps, and street plans, travel accounts of visits to the regions, and the material, cultural, and intellectual products made possible by the wealth and dynamism of the seventeenth and eighteenth centuries. The course will conclude with an analysis of the Age of Revolutions, a period of dramatic upheaval that remains at the center of lively scholarly debates. By the end of the semester, students will be able to engage the key questions driving these debates, the most important of which, perhaps, is: what is Latin America's colonial legacy?
For BA Students: History and Tradition Sector

AFRC 078 Faculty-Student Collaborative Action Seminar in Urban University-Community Relations
One of the goals of this seminar is to help students develop their capacity to solve strategic, real-world problems by working collaboratively in the classroom, on campus, and in the West Philadelphia community. Research teams help contribute to the improvement of education on campus and in the community, as well as the improvement of university-community relations. Among other responsibilities, students focus their community service on college and career readiness at West Philadelphia High School and Sayre High School. Students are typically engaged in academically based community service learning at the schools for two hours each week.
Taught by: Harkavy
One term course offered either term
Also Offered As: HIST 173, URBS 178
Activity: Seminar
1 Course Unit

AFRC 079 Literatures of Jazz
That modernism is steeped as much in the rituals of race as of innovation is most evident in the emergence of the music we have come to know as jazz, which results from collaborations and confrontations taking place both across and within the color line. In this course we will look at jazz and the literary representations it engendered in order to understand modern American culture. We will explore a dizzying variety of forms, including autobiography and album liner notes, biography, poetry, fiction, and cinema. We’ll examine how race, gender, and class influenced the development of jazz music, and then will use jazz music to develop critical approaches to literary form. Students are not required to have a critical understanding of music. Class will involve visits from musicians and critics, as well as field trips to some of Philadelphia’s most vibrant jazz venues. Topics vary. See the Africana Studies Department’s website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Beavers
Course not offered every year
Also Offered As: ENGL 080
Activity: Lecture
1 Course Unit

AFRC 081 African-American Literature
This introductory to African-American literature will begin with contemporary, groundbreaking texts such as Claudia Rankines Citizen: An American Lyric and Toni Morrisons A Mercy. These twenty-first century texts will lead us to the questions about freedom, beauty, struggle, pleasure, and resistance that shape the origins of African American literature. The course will be shaped around circles of influence (not a linear mapping of a literary tradition). These circles of the changing same become the art of flow, layering, and rupture. We will dive into the multidirectional flow of slave narratives/neotribal narratives/black modernism/black postmodernism/black respectability politics/black radicalism, and mastery of form/deformation of mastery. See the Africana Studies Department’s website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Beavers, Davis, Tillet
Course not offered every year

1 Course Unit
Notes: This course is cross-listed with ENGL 074 (Contemporary American Literature) when the course content is related to Afro-American issues. Topics vary. Consult the Africana Department website for a current course description.

AFRC 100 Introduction to Art
Spring 2018: Starting with the Penn Museum and the Philadelphia Museum of Art, the seminar will visit major collections of Philadelphia, both to examine the works of art and artifacts (on display and in storage) and to meet with directors, curators, keepers, and collectors. Most meetings will take place in the museums, not in the classroom. While the seminar will provide an overview of the history of art, our discussions on site will focus on changing aesthetics and collecting practices, aspects of display and contextualization, the institution of the museum, thing theory, and the blurred boundaries between ethnography, archeology, and art history

One term course offered either term
Also Offered As: ARTH 100 Activity: Seminar
1 Course Unit
Notes: For Freshmen only. Topics Varies

AFRC 101 Study of an Author
This course introduces students to literary study through the works of a single author—often Shakespeare, but other versions will feature writers like Jane Austen, Geoffrey Chaucer, Herman Melville, and August Wilson. Readings an individual author across his or her entire career offers students the rare opportunity to examine works from several critical perspectives in a single course. What is the author’s relation to his or her time? How do our author’s works help us to understand literary history more generally? And how might be understand our author’s legacy through performance, tributes, adaptations, or sequels? Exposing students to a range of approaches and assignments, this course is an ideal introduction to literary study for those students wishing to take an English course but not necessarily intending to major. See the Africana Studies Department’s website at https://africana.sas.upenn.edu for a description of the current offerings.

AFRC 112 Discrimination: Sexual and Racial Conflict
This course is concerned with the structure, the causes and correlates, and the government policies to alleviate discrimination by race and gender in the United States. The central focus of the course is on employment differences by race and gender and the extent to which they arise from labor market discrimination versus other causes, although racial discrimination in housing is also considered. After a comprehensive overview of the structures of labor and housing markets and of nondiscriminatory reasons (that is, the cumulative effects of past discrimination and/or experiences) for the existence of group differentials in employment, wages, and residential locations, various theories of the sources of current discrimination are reviewed and evaluated. Actual governmental policies and alternative policies are evaluated in light of both the empirical evidence on group differences and the alternative theories of discrimination. This course is concerned with the structure, the causes and correlates, and the government policies to alleviate discrimination by race and gender in the United States. The central focus of the course is on employment differences by race and gender and the extent to which they arise from labor market discrimination versus other causes, although racial discrimination in housing.

AFRC 114 Poetry Writing Workshop
This is a workshop for students who are interested in exploring a variety of approaches to poetry. Students will encounter a diverse series of readings, in-class writing activities, weekly writing assignments, and creative methods for heightening your abilities as a reader and writer.
Taught by: Beavers
Course usually offered in fall term
Also Offered As: ENGL 113 Activity: Seminar
1 Course Unit
Notes: This course is not open to freshmen. Students wishing to take this course must submit a writing sample as part of the selection process.

AFRC 115 Religious Ethics and Modern Society
Religious beliefs of Malcolm X and MLK formed their social action during the Civil Rights for African Americans. This seminar will explore the religious biographies of each leader; how religion shaped their public and private personas, and the transformative and transgressive role that religion played in the history of the Civil Rights movement in the United States and abroad. Students in this course will leave with a clearer understanding of religious beliefs of Christianity, Islam, and Islam, as well as religiously based social activism. Other course emphases include the public and private roles of religion within the context of the shaping of ideas of freedom, democracy, and equality in the United States, the role of the “Black church” in depicting messages of democracy and freedom, and religious oratory as exemplified through MLK and Malcolm X. See Africana Studies Department’s website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Butler

1 Course Unit

AFRC 120 Social Statistics
This course offers a basic introduction to the application/interpretation of statistical analysis in sociology. Upon completion, you should be familiar with a variety of basic statistical techniques that allow examination of interesting social questions. We begin by learning to describe the characteristics of groups, followed by a discussion of how to examine and generalize about relationships between the characteristics of groups. Emphasis is placed on the understanding/interpretation of statistics used to describe and make generalizations about group characteristics. In addition to hand calculations, you will also become familiar with using PCs to run statistical tests.
Taught by: Charles
One term course offered either term
Also Offered As: SOCI 120
Activity: Recitation
0 Course Units

AFRC 121 Writing for Children
We will read our favorite kids' books, determine the kinds of books we love to read and write, and then write them, aiming at a clear voice appropriate to the story and as much order or misrule as each writer's kid-muse demands. For inspiration, we'll visit the Maurice Sendak Collection at the Rosenbach Museum and Library and have a nostalgia wallow in the kids' section at the library. Then students write, fast-fast, drafts of stories to workshop, mull and revise. Yes, fun is required.
For sure we'll critique, but first we'll try to outrun our interior grown-up! Workshopping happens first with student writer colleagues, and then with the real kids in schools, through our partner West Philadelphia Alliance for Children. Reading to children will give studentwriters a chance to hear where children laugh, see where they look scared, or notice when they begin to fidget. Returning with revisions will be a promise fulfilled, and an important marker in the literary life of everyone involved. Our class will act as a team of editors, then, to submit stories-and illustrations by authors and/or kids-on the upcoming website, SafeKidsStories.org.
Taught by: Cary
One term course offered either term
Also Offered As: ENGL 121

1 Course Unit
Notes: This course is not open to freshmen. Students wishing to take this course must submit a writing sample as part of the selection process. May be repeated for credit with a different instructor.

AFRC 134 Creative Non-Fiction Writing
SPRING 2018: As children, we first begin to learn stories and myths that explain how the world works, what life means, and how we're the same and different. In this writing seminar, we will explore myths about race, class, gender, and sexuality that are embedded in the culture of ordinary life, as well as in systems of power and privilege. We'll examine how inequalities impact not only our opportunities, but also how we perceive ourselves and others. During this semester, students will learn how other writers including Frederick Douglass, Audre Lorde, Leslie Marmon Silko, Thandeka, Angela Davis, James Baldwin, Jimmy Santiago Baca, and Amy Tan have used language to help them convey who they are and how their experiences have shaped them. Throughout the semester, we also will mine a deep understanding of the art of writing. In addition to in-class exercises, meditation and movement, students will be asked to maintain a daily practice of free-writing; writing responses (2-3 pages weekly) to assigned books, essays, stories, and documentaries; participate in workshop discussions and peer review, and write and revise three stories/essays (45 pages).
Taught by: Cary, Watterson

AFRC 135 Law and Society
After introducing students to the major theoretical concepts concerning law and society, significant controversial societal issues that deal with law and the legal systems both domestically and internationally will be examined. Class discussions will focus on issues involving civil liberties, the organization of courts, legislatures, the legal profession and administrative agencies. Although the focus will be on law in the United States, law and society in other countries of Africa, Asia, Europe and Latin America will be covered in a comparative context. Readings include research, reports, statutes and cases.

AFRC 140 Elementary Zulu I in Residence
This elementary course is for beginners and it requires no prior knowledge of Zulu. The course will expose students to the Zulu language and culture and will be based in the National Standards for Foreign Language Learning. Students will be engaged in communicative language learning through interpersonal, interpretive and presentational modes of language learning techniques. They will gain knowledge and understanding of the Zulu culture. They will use their Zulu language and culture learning experience to connect with other disciplines and further their knowledge of these disciplines through perspectives acquired from their Zulu class. They will also develop insight into the nature of language and culture through comparisons of the Zulu language and culture and their own. Through movies, songs, and other cultural activities online students will acquire the natural use of the language which will enable them to acquire linguistic and cultural skill to become life-long learners who can participate in Zulu communities in the U.S. and overseas.

AFRC 147 Studies in African American Music
This course explores aspects of the origins, style development, aesthetic philosophies, historiography, and contemporary conventions of African-American musical traditions. Topics covered include: the music of West and Central Africa, the music of colonial America, 19th century church and dance music, minstrelsy, music of the Harlem Renaissance, jazz, blues, gospel, hip-hop, and film music. Special attention is given to the ways that black music produces "meaning" and to how the social energy circulating within black music articulates myriad issues about American identity at specific historical moments. The course will also engage other expressive art forms from visual and literary sources in order to better position music making into the larger framework of African American aesthetics.
Taught by: Ramsey
Course not offered every year

1 Course Unit

AFRC 167 The New African Diaspora
This seminar will examine the experiences of recent African immigrants and refugees in Philadelphia in an historical framework. We will employ a variety of sources—newspapers, census data, legal briefs, literature and film, and diaspora internet sites—to explore the lives, aspirations, and perceptions of Philadelphia’s African residents. There will be opportunities for dialogue with high school students, teachers, and parents; with representatives of African community and business organizations; and with local government and service agencies. Students will be required to do a final project which involves volunteering with an African immigrant non-profit or business and/or conducting focused research on specific African communities in Philadelphia.

AFRC 170 Elementary Yoruba I
This Elementary Yoruba I course can be taken to fulfill a language requirement, or for linguistic preparation to do research in Nigeria and the diaspora/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Yoruba. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content. Students will acquire the speaking, listening, reading, and writing skills at the mid-high novice level based on the ACTFL scale. The mid-high novice level proficiency skills that the students will acquire constitute threshold capabilities of the second semester range of proficiency to prepare students for Elementary Yoruba II course materials.
For BA Students: Language Course
Taught by: Awoyale

Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 171 Elementary Yoruba II
The main objective of this course is to further sharpen the Yoruba linguistic knowledge that the student acquired in level I. By the end of the course, the student should be able to (1) read, write, and understand simple to moderately complex sentences in Yoruba; and, (2) advance in the knowledge of the Yoruba culture.
For BA Students: Language Course
Taught by: Awoyale
Course usually offered in spring term
Also Offered As: AFRC 517, AFST 171, AFST 518
Prerequisites: Completion of Elementary Yoruba I, or permission of instructor.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center
AFRC 172 The American South
This course will cover southern culture and history from 1607-1860, from Jamestown to secession. It traces the rise of slavery and plantation society, the growth of Southern sectionalism and its explosion into Civil War.
For BA Students: History and Tradition Sector
Taught by: Hahn
One term course offered either term
Also Offered As: HIST 170
Activity: Recitation
1 Course Unit

AFRC 174 Capitalism, Socialism, & Crisis in Twentieth-Century Americas
From the crisis of the Great Depression through the 1970s, the United States and Latin America produced remarkable efforts to remake society and political economy. This course analyzes the Cuban and Guatemalan Guatemalan revolutions, as well as social movements that transformed the United States: the black freedom movement, the labor movement, and changing forms of Latino politics. In all three countries, Americans looked for ways to reform capitalism or build socialism; address entrenched patterns of racism; define and realize democracy, and achieve national independence. They conceived of these as challenges in dramatically different ways. Together, we will compare national histories and analyze the relationships between national upheavals. In studying the US and Latin America together, the class allows students to explore central questions in both regions’ histories. What did capitalism, socialism, and communism amount to? What did democracy mean? What were the roots of racial inequality and how did Americans address it? Why were Americans so enticed by economic growth, and how did they pursue it? How did the Cold War shape social movements? What purposes did unions serve? How did Christianity inform movements for and against social change? Studying these regions together also allows us to explore international interactions. How did the black freedom movement in the US relate to the Cuban revolution? How did Latin American immigration shape the US labor movement? How US Cold War policy influence Latin American revolutionary movements? The goal of this class is for you to interpret the readings and decide what you think. What you learn in this class, and the quality of our experience together, depends on your reading closely, coming to class with informed ideas and questions, and being prepared to help your classmates answer theirs. We will read approximately 100 pages per week. No background is required.
Course usually offered in fall term
Also Offered As: HIST 174, LALS 174

1 Course Unit

AFRC 175 Society and Culture of Brazil
With its booming economy, the recent inauguration of its first female president, and its selection as host to the 2012 World Cup and Olympic games, Brazil is growing in global prestige. But amid all these exciting developments are devastating socioeconomic inequalities. Access to safe living conditions, livable wages, higher education, and overall social mobility remain painfully out of reach to many Brazilians, the majority of whom are the descendants of slaves. Why do these problems persist in a country that has had such an enduring and widespread reputation as a "racial democracy"? What are the possibilities of closing the equality gap in Brazil?
Also Offered As: HIST 175, LALS 175
Activity: Lecture
1 Course Unit

AFRC 176 Afro-American History 1550-1876
This course examines the experiences of Africans and African Americans in colonial America and in the United States to 1865. We will explore a variety of themes through the use of primary and secondary sources. Topics include: the development of racial slavery, labor, identity, gender, religion, education, law, protest, resistance, and abolition.

AFRC 187 Topics in Africana Studies
Topics Vary. See the Africana Studies Program's website at www.sas.upenn.edu/africana for a description of the current offerings.
SPRING 2017: The history of the women and men of African Descent who have studied, taught, researched, and worked at the University of Pennsylvania provides a powerful window into the complex history of Blacks not only in America but throughout the Diaspora. This class will unpack, uncover, and present this history through close studies of texts and archived records on and at the university, as well as through first hand accounts by alumni and past and present faculty and staff members. These stories of the trials and triumphs of individuals on and around this campus demonstrate the amazing and absurd experience that Blacks have endured both at Penn and globally. Emphasis will be placed on the research process with the intent of creating a democratic classroom where all are students and all are instructors. Students will become familiar with archival historical research (and historical criticism) as well as with ethnographic research. Far more than just a survey of historical moments on campus and in the community, students will meet face to face with those who have lived and are presently living history and they will be faced with the challenge of discerning the most effective ways of documenting, protecting, and representing that history for future generations of Penn students.
Taught by: Howard, Peterson
One-term course offered either term
Activity: Seminar
1 Course Unit

AFRC 190 Introduction to Africa
This course provides an introduction to the study of Africa in all its diversity and complexity. Our focus is cultural, geographical, and historical; we will seek to understand Africa's current place in the world political and economic order and learn about the various social and physical factors that have influenced the historical trajectory of the continent. We study the cultural formations and empires that emerged in Africa before European colonial invasion and then how colonialism reshaped those sociocultural forms. We'll learn about the unique kinds of kinship and religion in precolonial Africa and the changes brought about by the spread of Islam and Christianity. Finally, we'll take a close look at contemporary issues such as ethnic violence, migration, popular culture, and poverty, and we'll debate the various approaches to understanding those issues.
For BA Students: Society Sector
Taught by: Hasty
Course usually offered in fall term
Also Offered As: ANTH 190, HIST 190
Activity: Lecture

Also Offered As: LGST 218
Activity: Lecture
1 Course Unit

AFRC 222 African Women's Lives: Past and Present
Restoring women to African history is a worthy goal, but easier said than done. The course examines scholarship over the past forty years that brings to light previously overlooked contributions African women have made to political struggle, religious change, culture preservation, and economic development from pre-colonial times to present. The course addresses basic questions about changing women's roles and human rights controversies associated with African women within the wider cultural and historical contexts in which their lives are lived. It also raises fundamental questions about sources, methodology, and representation, including the value of African women's oral and written narrative and cinema production as avenues to insider perspectives on African women's lives.
Taught by: Blakley
Course not offered every year
Also Offered As: AFST 221, GSWS 222
Activity: Lecture
1 Course Unit

AFRC 225 African Languages and Culture
The aim of the course is to provide an overall perspective on African languages and linguistics. No background in linguistics is necessary. Students will be introduced to theoretical linguistics—its concepts, theories, ways of argumentation, data collection, data analysis, and data interpretation. The focus will be on the languages and linguistics of Africa to provide you with the knowledge and skills required to handle the language and language-related issues typical of African conditions. We will cover topics related to formal linguistics (phonology/phonetics, morphology, syntax, and semantics), aspects of pragmatics as well as the general socio-linguistic character of African countries. We will also cover language in context, language and culture, borrowing, multilingualism, and cross-cultural communication in Africa.

Activity: Seminar
1 Course Unit
AFRC 229 Topics in US History
Topics vary. See the Africana Studies Department’s website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Berry, Brown, Hahn
Course usually offered in fall term
Also Offered As: GSWS 229, HIST 231
Activity: Seminar
1 Course Unit

AFRC 320 Special Topics in Sociology
Topics vary from semester to semester.
Taught by: Charles, Zuberi, Roberts
One-term course offered either term
Also Offered As: AFRC 533
Activity: Seminar
1 Course Unit
Notes: This course is cross-listed with SOC 430 (Special Topics in Sociology) when the subject matter is related to African, African American, or other African Diaspora issues.

AFRC 232 Race and Ethnic Politics
This course examines the role of race and ethnicity in the political discourse through a comparative survey of recent literature on the historical and contemporary political experiences of the four major minority groups (Blacks or African Americans, American Indians, Latinos or Hispanic Americans, and Asian Americans). A few of the key topics will include assimilation and acculturation seen in the Asian American community, understanding the political direction of Black America in a pre and post Civil Rights era, and assessing the emergence of Hispanics as the largest minority group and the political impact of this demographic change. Throughout the semester, the course will introduce students to significant minority legislation, political behavior, social movements, litigation/court ruling, media and various forms of public opinion that have shaped the history of racial and ethnic minority relations in this country. Readings are drawn from books and articles written by contemporary political scientists.
Taught by: Gillon
Course not offered every year
Also Offered As: PSCI 231
Activity: Lecture
0 Course Units

AFRC 233 World History: Africa or the Middle East
SPRING 2018: African cities in the past contributed to dynamic and prosperous civilizations. What happened? This course examines Africans’ aspirations of modernity through the lens of African urban history using fiction, film and current scholarship in several disciplines. Each class will explore two temporarilites—the precolonial history of African cities, and the colonial and postcolonial histories of economic, social and political progress which goes by the name of development. Grounded in the case studies of both ancient and modern cities, this course explores the emergence and decline of trading centers, the rise of colonial cities, and the dilemmas of postcolonial economies and politics.
Taught by: Babou, Powell
Course usually offered in fall term
Also Offered As: GSWS 232, HIST 232, NELC 282
Activity: Seminar
1 Course Unit
Notes: Topics vary. See the Africana Studies Program’s website at www.sas.upenn.edu/africana for a description of the current offerings.

AFRC 234 World History: East Asia or Latin America
Topics vary. See the Africana Studies Department’s website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Fabella
Course usually offered in fall term
Also Offered As: HIST 233
Activity: Seminar
1 Course Unit

AFRC 235 Law and Social Change
Beginning with discussion of various perspectives on social change and law, this course then examines in detail the interdependent relationship between changes in legal and societal institutions. Emphasis will be placed on (1) how and when law can be an instrument for social change, and (2) how and when social change can cause legal change. In the assessment of this relationship, emphasis will be on the laws of the United States. However, laws of other countries and international law relevant to civil liberties, economic, social and political progress will be studied. Throughout the course, discussions will include legal controversies relevant to social change such as issues of race, gender and the law. Other issues relevant to State-Building and development will be discussed. A comparative framework will be used in the analysis of this interdependent relationship between law and social change.
Taught by: Fetni
One-term course offered either term
Also Offered As: SOCI 235
Activity: Lecture
1 Course Unit

AFRC 236 Topics in Transnational History

Activity: Lecture
1 Course Unit
AFRC 240 Elementary Amharic I
The Elementary Amharic I course can be taken to fulfill a language requirement, or for linguistic preparation to do research on Ethiopia/Africa-related topics. The course emphasizes communicative competence to enable the students to acquire linguistic and extra-linguistic skills in Amharic. The content of the course is selected from various everyday life situations to enable the students to communicate in predictable common daily settings. Culture, as it relates to language use, is also part of the course content. Students will acquire the speaking, listening, reading, and writing skills at the mid-high novice level, based on the ACTFL scale. The mid-high novice level proficiency skills that the students will acquire constitute threshold capabilities of the second semester range of proficiency to prepare students for Elementary Amharic II course materials.
For BA Students: Language Course
Taught by: Hailu
Course usually offered in fall term
Also Offered As: AFRC 540, AFST 240, AFST 540, NELC 481
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 241 Elementary Amharic II
Continuation of Elementary Amharic I. Amharic belongs to the southern branch of Hamito-Semitic languages, which is also referred to as "Afranian." Amharic is the official language of Ethiopia and is spoken by over 14 million native Amharas and by approximately 18 million of the other groups in Ethiopia. This course continues to introduce basic grammar, vocabulary, and the reading and writing of Amharic to new speakers.
For BA Students: Language Course
Taught by: Hailu
Course usually offered in spring term
Also Offered As: AFRC 541, AFST 241, AFST 541, NELC 482
Prerequisites: Completion of Elementary Amharic I, or permission of the instructor.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 242 Intermediate Amharic I
For BA Students: Language Course
Taught by: Hailu
Course usually offered in fall term
Also Offered As: AFRC 543, AFST 242, AFST 543, NELC 483
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 243 Intermediate Amharic II
For BA Students: Last Language Course
Taught by: Hailu
Course usually offered in spring term
Also Offered As: AFRC 544, AFST 243, AFST 544, NELC 484
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 248 Haitian Revolution
In August 1791, enslaved Africans on the northern plain of Saint Domingue (colonial Haiti) rose up in a coordinated attack against their French colonial masters and plantation overseers, launching the initial revolt in what would come to be known as the Haitian Revolution. In the years that followed, their actions forced the legal abolition of racial discrimination, and then the abolition of slavery, throughout the French Empire. Ultimately, when Napoleon Bonaparte threatened to return slavery to Saint Domingue, they waged a war for independence. After defeating the Napoleonic army, these former slaves then declared the world’s first "Black Republic," the independent state of Haiti, in 1804.
This seminar will examine some of the major themes and debates surrounding Haiti’s colonial and revolutionary history. We will begin by considering the colonial paradox: France’s leading role in the intellectual movement called the "Enlightenment" coincided with its ascent as a slaveholding colonial power. The seminar will also explore parallels and pointsof connection between the revolutionary movements in France and Saint Domingue. When the Haitian Revolution began in 1791, the French Revolution was already two years old: how did the increasingly radical ideas and widespread violence in France shape events in the Caribbean? Likewise, how did West African traditions and political ideologies influence insurgents? And how, in turn, did the revolution in Saint Domingue impact the revolution in France? From a diplomatic perspective, we will also consider relations between the Haitian Revolutionary leadership and French officials, examining their respective goals, which overlapped and diverged at different moments. Finally, we will ask how the revolution in Saint Domingue and the birth of Haiti—painted ideas about liberty, sovereignty and freedom throughout the Atlantic world. We will read a combination of primary and secondary materials each week. Students are encouraged to read primary documents in the original French if they are able. A final research paper will be required of all students, drawing on the Kislak Center’s rich collection of revolutionary-era documents.
Also Offered As: HIST 248
Activity: Seminar
1 Course Unit

AFRC 258 Caribbean Music and Diaspora
This course considers Caribbean music within a broad and historical framework. Caribbean musical practices are explored by illustrating the many ways that aesthetics, ritual, communication, religion, and social structure are embodied in and contested through performance. These initial inquiries open onto an investigation of a range of theoretical concepts that become particularly pertinent in Caribbean contexts—concepts such as post-colonialism, migration, ethnicity, hybridity, syncretism, and globalization. Each of these concepts, moreover, will be explored with a view toward understanding its connections to the central analytical paradigm of the course—diaspora. Throughout the course, we will listen to many different styles and repertoires of music ranging from calypso to junkanoo, from rumba to merengue, and from dance hall to zouk. We will then work to understand them not only in relation to the readings that frame our discussions but also in relation to our own North-American contexts of music consumption and production.
Taught by: Rommen
Course not offered every year
Also Offered As: ANTH 256, FOLK 259, LALS 258, MUSC 257
Activity: Lecture
1 Course Unit
AFRC 266 Topics in Modern American Literature
See the Africana Department's website at www.sas.upenn.edu/africana for a description of the current offerings.
Course not offered every year
Also Offered As: ENGL 264
Activity: Seminar
1 Course Unit

AFRC 268 Contemporary Issues in African Society
This course will deal with law and society in Africa. After surveying the various legal systems in Africa, the focus will be on how and to what extent the countries of Africa "re-Africanized" their legal systems by reconciling their indigenous law with western law and other legal traditions to create unified legal systems that are used as instruments of social change and development. Toward this end, the experiences of various African countries covering the various legal traditions will be included. Specific focus will be on laws covering both economic and social relations. This emphasis includes laws of contracts and civil wrongs, land law, law of succession, marriage and divorce and Africa's laws of International Relations, among other laws. Throughout this course a comparative analysis with non-African countries will be stressed.
Taught by: Imoogene, Zuberi
Also Offered As: SOCI 268
Activity: Lecture
1 Course Unit

AFRC 269 Constitutional Law: Public Power & Civil Rights to 1912
This course explores the creation and transformations of the American constitutional system's structures and goals from the nation's founding through the period of Progressive reforms, the rise of the Jim Crow system, and the Spanish American War. Issues include the division of powers between state and national governments, and the branches of the federal government; economic powers of private actors and government regulators; the authority of governments to enforce or transform racial and gender hierarchies; and the extent of religious and expressive freedoms and rights of persons accused of crimes. We will pay special attention to the changing role of the Supreme Court and its decisions in interpreting and shaping American constitutionalism, and we will also read legislative and executive constitutional arguments, party platforms, and other influential statements of American constitutional thought.
Taught by: Smith
One-term course offered either term
Also Offered As: PSCI 271
Activity: Recitation
1 Course Unit

AFRC 270 Intermediate Yoruba I
For BA Students: Language Course
Taught by: Awoyale
Course usually offered in fall term
Also Offered As: AFST 270, AFST 529
Activity: Lecture

Course usually offered in spring term
Also Offered As: AFRC 534, AFST 271, AFST 532
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 274 Islam and Society in Africa
This course is designed to provide the students with a broad understanding of the history of Islam in Africa. The focus will be mostly on West Africa, but we will also look at developments in other regions of the continent. We will examine the process of Islamization in Africa and the interplay between Islam and the African traditional religions and customs. Topics include conversion, Islamic education and literacy, the status of women, Muslim response to European colonial domination, Islamic mysticism and the contemporary development of Sunni movements.
Taught by: Babou
One-term course offered either term
Also Offered As: HIST 275
Activity: Lecture
1 Course Unit

AFRC 276 African American Life and Culture in Slavery
This course will examine the lives of enslaved African Americans in the United States, both in the North and the South. We will engage historiographical debates, and tackle questions that have long concerned historians. For example, if slaves were wrenched from families and traded, could they sustain family relationships? If slaves worked from sun-up until sun-down, how could they create music? We will engage with primary and secondary sources to expand our understandings of values, cultural practices, and daily life among enslaved people. Topics will include: literacy, family, labor, food, music and dance, hair and clothing, religion, material culture, resistance, and memories of slavery. Several disciplines including History, Archaeology, Literature, and Music, will help us in our explorations. Written, oral, and artistic texts for the course will provide us with rich sources for exploring the nuances of slave life, and students will have opportunities to delve deeply into topics that are of particular interest to them.
Taught by: Williams
Course not offered every year
Also Offered As: COML 273, ENGL 271, HIST 274
Activity: Seminar
1 Course Unit
Notes: This course will also count as the AFRC 176 requirement for the AFRC major.

AFRC 277 Penn Slavery Project Research Seminar
This research seminar provides students with instruction in basic historical methods and an opportunity to conduct collaborative primary source research into the University of Pennsylvania's historic connections to slavery. After an initial orientation to archival research, students will plunge into doing actual research at the Kislak Center, the University Archives, the Historical Society of Pennsylvania, the American Philosophical Society, the Library Company, and various online sources. During the final month of the semester, students will begin drafting research reports and preparing for a public presentation of the work. During the semester, there will be opportunities to collaborate with a certified genealogist, a data management and website expert, a consultant on public programming, and a Penn graduate whose research has been integral to the Penn Slavery Project.
Taught by: Brown
One-term course offered either term
Also Offered As: HIST 273
Activity: Field Work
1 Course Unit
AFRC 280 Intermediate Swahili I
The objectives of this course are: to strengthen students’ knowledge of speaking, listening, reading, and writing Swahili and to compare it with the language of the students; to learn more about the cultures of East Africa and to compare it with the culture(s) of the students; to consider the relationship between that knowledge and the knowledge of other disciplines; and using that knowledge, to unite students with communities outside of class.
For BA Students: Language Course
Taught by: Mshomba
Course usually offered in fall term
Also Offered As: AFST 280, AFST 582
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 281 Topics in African American Literature
In this advanced seminar, students will be introduced to a variety of approaches to African American literatures, and to a wide spectrum of methodologies and ideological postures (for example, The Black Arts Movement). The course will present an assortment of emphases, some of them focused on geography (for example, the Harlem Renaissance), others focused on genre (autobiography, poetry or drama), the politics of gender and class, or a particular grouping of authors. Previous versions of this course have included “African American Autobiography,” “Backgrounds of African American Literature,” “The Black Narrative” (beginning with eighteenth century slave narratives and working toward contemporary literature), as well as seminars on urban spaces, jazz, migration, oral narratives, black Christianity, and African-American music. See Africana Studies Department’s website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Beavers, Davis, Jackson, Tillet
Course not offered every year
Also Offered As: ENGL 281
Activity: Seminar
1 Course Unit
Notes: Spaces will be reserved for English Majors.

AFRC 282 Intermediate Swahili II
At the end of the course students will be at Level 2 on the ILR (Interagency Language Roundtable) scale.
For BA Students: Last Language Course
Taught by: Mshomba
Course usually offered in spring term
Also Offered As: AFST 281, AFST 583
Prerequisites: AFST 280, or permission of Instructor.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 284 Advanced Swahili I
This is an advanced Kiswahili course which will engage learners in extended spoken and written discourse. Advanced learners of Kiswahili will listen to, read about, write, and speak on authentic video materials, contemporary novels, and newspapers. They will also participate in various discussions on cultural and political issues.
For BA Students: Advanced Language Course
Taught by: Mshomba
One-term course offered either term
Also Offered As: AFST 284, AFST 584
Prerequisites: AFST 280, LING 280, AFRC280 or permission of Instructor.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 285 Advanced Swahili II
The objectives are to continue to strengthen students’ knowledge of speaking, listening, reading, and writing Swahili and to compare it with the language of the students; to continue learning about the cultures of East Africa and to continue making comparisons with the culture(s) of the students; to continue to consider the relationship between that knowledge and the knowledge of other disciplines; and using that knowledge, to unite students with communities outside of class. Level 3 on the ILR (Interagency Language Roundtable) scale.
For BA Students: Advanced Language Course
Taught by: Mshomba
Course usually offered in spring term
Also Offered As: AFST 285, AFST 586
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

AFRC 286 Topics in Race and Ethnicity - No Bench by the Road: Monuments, Memory, and the Afterlife of Slavery
SPRING 2018: In 1989, as she reflected on her magnum opus, Beloved, Toni Morrison declared “There is no place you or I can go, to think about or not think about, to summon the presences of or recollect the absences of slaves. She went on, There is no suitable memorial, or plaque, or wreath, or wall, or park, or skyscraper lobby. There’s no 300-foot tower, there’s no bench by the road.” And because such a place doesn’t exist...the book had to.” Today, there are significantly more markers of slavery in the public sphere as well as new novels, films, and television shows that directly take up the history and remnants of slavery in our lives. Looking at Colson Whitehead’s novel, The Underground Railroad and WGN’s tv series "The Underground," the remaking of the Whitney Plantation in Louisiana as well as considering the debates about confederate flags and monuments in places like New Orleans, Virginia, and South Carolina, this course will examine the meaning and movements behind these contemporary engagements with American slavery today. See the Africana Studies Program’s website at www.sas.upenn.edu/africana for a description of the current offerings.
Taught by: Beavers, Tillet
Course not offered every year
Also Offered As: ENGL 284
Activity: Seminar
1 Course Unit
AFRC 290 Topics In Gender, Sexuality, and Literature
See the Department of Africana’s website at www.sas.upenn.edu/africana for a description of the current offerings.
One-term course offered either term
Also Offered As: ENGL 290, GSWS 290
Activity: Seminar
1 Course Unit

AFRC 294 Facing America
This course explores the visual history of race in the United States as both self-fashioning and cultural mythology by examining the ways that conceptions of Native American, Latino, and Asian identity, alongside ideas of Blackness and Whiteness, have combined to create the various cultural ideologies of class, gender, and sexuality that remain evident in historical visual and material culture. We will also investigate the ways that these creations have subsequently helped to launch new visual entertainments, including museum spectacles, blackface minstrelsy, and early film, from the colonial period through the 1940s.
Taught by: Shaw
Course not offered every year
Also Offered As: ARTH 274, ARTH 674, ASAM 294, CIMS 293, LALS 274
Activity: Lecture
1 Course Unit

AFRC 307 Race, Science and Justice
This course draws on an interdisciplinary body of biological and social scientific literature to explore critically the connections between race, science, and justice in the United States, including scientific theories of racial inequality, from the eighteenth century to the genomic age. After investigating varying concepts of race, as well as their uses in eugenics, criminology, anthropology, sociology, neuroscience, and medicine, we will focus on the recent expansion of genomic research and technologies that treat race as a biological category that can be identified at the molecular level, including race-specific pharmaceuticals, commercial ancestry testing, and racial profiling with DNA forensics. We will discuss the significance of scientific investigations of racial difference for advancing racial justice in the United States.
Taught by: Roberts
One-term course offered either term
Also Offered As: SOCI 307
Activity: Recitation
0 Course Units

AFRC 308 Religious Diversity in America
Images and beliefs about Jesus have always been a compelling part of American life. This course seeks to examine the social, political, religious and artistic ways that Jesus has been appropriated and used in American life, making him a unique figure for exploring American religious life. Special attention will be given to how Jesus is used to shape social and political concerns, including race, gender, sexuality, and culture. See the Africana Studies Department’s website at https://africana.sas.upenn.edu for a description of the current offerings.
Taught by: Butler
Course not offered every year
Also Offered As: RELS 310
Activity: Seminar
1 Course Unit

Notes: This course is cross-listed with RELS 310 (Religious Diversity in America) when the subject matter is related to African, African American, or other African Diaspora issues. A recent topic is Religious Diversity and Social Change in West Philadelphia.

AFRC 310 Sustainable Development in Ghana
This course is mandatory for students participating in the International Development Summer Institute (IDS). IDS is a service learning and training program for undergraduates that provides students with the opportunity to have an applied learning and cultural experience in Ghana. The program consists of 5 weeks of pre-program preparation at Penn and a 4-week long training program on the campus of Kwame Nkrumah University of Science and Technology (KNUST) in Kumasi, Ghana.
Course usually offered in fall term
Prerequisite: Participation in the International Development Summer Institute (IDS)
Activity: Seminar
1 Course Unit

AFRC 315 Africa, Decolonization, and Internationalism
In 1955, delegates from the Gold Coast, which would soon become the independent nation of Ghana, attended the first large-scale Afro-Asian conference alongside representatives from Indonesia, India, China, and other nations. The Bandung Conference is just one example of the importance of international linkages in the era of decolonization. This course will address decolonization in Africa within an international context and examine how African nationalism was forged in an interconnected world. Students will learn how African political thinkers engaged with, contributed to, and were shaped by intercontinental currents of thought, including Pan-Africanism, Pan-Arabism, communism, socialism, and the Non-Aligned Movement.
Course usually offered in spring term
Also Offered As: HIST 369
Activity: Lecture
1 Course Unit

AFRC 318 Topics in African Art
Course not offered every year
Also Offered As: ARTH 318
Activity: Seminar
1 Course Unit

AFRC 320 Transoceanic Encounters: East Africa and the Indian Ocean
East Africa has been linked culturally, economically, and politically to the wider Indian Ocean world for centuries. In historical scholarship, the Indian Ocean is often portrayed in overly romanticized terms as a hybrid, cosmopolitan space. This course, which brings together some of the best work on East Africa and the Indian Ocean, will provide a more nuanced view of the region. By critically examining a variety of primary and secondary sources (including novels, photography exhibits, music, and historical texts), students will learn about the legacies of slavery, conquest, and inequality as well as the ways in which the region became a space of multicultural exchange and intercontinental interaction. We will explore the idea of African diasporas in their plurality and examine whether the theoretical tools used to study the Atlantic World can be applied to the Indian Ocean.
Taught by: Weitzberg
Course usually offered in spring term
Also Offered As: HIST 374
Activity: Lecture
1 Course Unit
AFRC 321 Understanding African Conflict
The end of colonial rule was the springboard for the start of cold wars in various regions of Africa. Where peace could not be maintained violence erupted. Even where secession has been attained, as in the new country of South Sudan, the threat of civil war lingers. While domestic politics have led to the rise of armed conflicts and civil wars in many African countries, the external factors should also not be ignored. Important in all current conflicts is the concern to international peace and security. Overall this course will: (1) investigate the general nature of armed conflicts in Africa (2) provide in-depth analysis of the underlying factors (3) and discuss the regional and the international responses to these conflicts and their implications. Special emphasis will be placed upon African conflicts and civil wars in: great Lakes area, Mali, Nigeria, Senegal, Sudan, Somalia, South Sudan, and Uganda.
Taught by: Ali-Dinar
One-term course offered either term
Activity: Seminar
1 Course Unit

AFRC 322 American Slavery and the Law
In this course, we will work both chronologically and thematically to examine laws, constitutional provisions, and local and federal court decisions that established, regulated, and perpetuated slavery in the American colonies and states. We will concern ourselves both with change over time in the construction and application of the law, and the persistence of the desire to control and sublimate enslaved people. Our work will include engagement with secondary sources as well as immersion in the actual legal documents. Students will spend some time working with Mississippi murder cases from the 19th century. They will decipher and transcribe handwritten trial transcripts, and will historicize and analyze the cases with attention to procedural due process as well as what the testimony can tell us about the social history of the counties in which the murders occurred. The course will end with an examination of Black Codes that southern states enacted when slavery ended.
Taught by: Williams
Course usually offered in spring term
Also Offered As: HIST 322
Activity: Seminar
1 Course Unit

AFRC 324 Dress and Fashion in Africa
Throughout Africa, social and cultural identities of ethnicity, gender, generation, rank and status were conveyed in a range of cultural ornamentation that reflects the variation of African cultures. The meaning of one particular item of clothing can transform completely when moved across time and space. As one of many forms of expressive culture, dress shape and give forms to social bodies. In the study of dress and fashion, we could note two distinct broad approaches, the historical and the anthropological. While the former focuses on fashion as a western system that shifted across time and space, and linked with capitalism and western modernity; the latter approach defines dress as an assemblage of modification the body. The Africanist proponents of this anthropological approach insisted that fashion is not a dress system specific to the west and not tied with the rise of capitalism. This course will focus on studying the history of African dress by discussing the forces that have impacted and influenced it overtime, such as socio-economic, colonialism, religion, aesthetics, politics, globalization, and popular culture. The course will also discuss the significance of the different contexts that impacted the choices of what constitute an appropriate attire for distinct situations. African dress in this context is not a fixed relic from the past, but a live cultural item that is influenced by the surrounding forces.
Taught by: Ali-Dinar
Course usually offered in spring term
Also Offered As: ANTH 342, ARTH 324
Activity: Lecture
1 Course Unit

AFRC 325 Performance in the African Diaspora
The purpose of this course is to engage students in the rigorous process of mining experiences for material that can be transformed into a public performance piece. In-class writing, group discussions, and field work in the Philadelphia area. AUGUST WILSON AND BEYOND. The people need to know the story. See how they fit into it. See what part they play. - August Wilson, King Hedley II. In this seminar, students will read groundbreaking playwright August Wilson’s 20th Century Cycle: ten plays that form an iconic picture of African American traumas, triumphs, and traditions through the decades, told through the lens of Pittsburgh’s Hill District neighborhood. Other readings include supporting material on Wilson’s work and African American theatre, the works of contemporary playwrights whom Wilson has influenced (such as Suzan-Lori Parks and Tarell Alvin McCraney), and context on Penn’s relationship with West Philadelphia. As an Academically Based Community Service (ABCS) course, this seminar gives students the opportunity to enhance their understanding of the plays, and history and culture that shaped them, by forming meaningful relationships with West Philadelphia residents. Wilson’s plays provide the bridge between the two groups. The course culminates with students writing an original theatre piece inspired by the readings and relationships, which they will share at an end-of-semester performance.
Taught by: Beavers, Berger
One-term course offered either term
Also Offered As: ENGL 380
Activity: Seminar
1 Course Unit
Notes: Formerly AFRC 309. Writing Out Loud.
AFRC 326 Theories in Gender and Sexuality Studies
FALL 2015: QUEER VALUES - What are queer cultural experiences and values? Many academics and social movements have noted that the radical aspirations of queer theory and activism not only disrupt but also shore up neoliberal ideologies. In this course students will explore the historical co-emergence of queer cultures and neoliberalism by examining the promises and pitfalls of queer politics over the past quarter century. The coining of queer theory by Theresa de Lauretis in 1990 was intended as a disruptive joke. Its provocation resided in joining queer, an appropriation of street slang bandied about among New York City activists and artists in the 1980s, to theory, the passport of privilege in academic life. The irreverence of her joke exemplifies a central ethic of queer experience that renders palpable the tensions between margins and centers. The course will traverse scholarship from economic and queer anthropology, history, sociology & science studies, philosophy, political theory and literary studies. This wide survey of literature will allow students to develop an understanding of the political and economic processes that have conditioned the emergence of queerness as a diverse range of ethical commitments in particular sociocultural contexts globally. Students will investigate the affective dimensions of the emergence of queer theory, studies and activism within the United States and elsewhere in the context of global neoliberal social reforms. The course is split into four units: 1) In the Place of Queer Origins; 2) Queer Values; 3) Queer Circulations and Subjectivities; and 4) Queer Temporalities.
Taught by: Krebeck
Course usually offered in fall term
Also Offered As: GSWS 326
Prerequisites: A prior course in gender, sexuality and women's studies.
Activity: Seminar
1 Course Unit

AFRC 332 North Africa: History, Culture, Society
This interdisciplinary seminar aims to introduce students to the countries of North Africa, with a focus on the Maghreb and Libya (1830-present). It does so while examining the region's close economic and cultural connections to sub-Saharan Africa, Europe, and the Middle East. Readings will include histories, political analysis, anthropological studies, and novels, and will cover a wide range of topics such as colonial and postcolonial experiences, developments in Islamic thought and practice, and labor migration. This class is intended for juniors, seniors, and graduate students.
Taught by: Sharkey
Course not offered every year
Also Offered As: AFRC 632, HIST 370, NELC 332
Prerequisites: A university-level survey course in Middle Eastern, African, or Mediterranean history.
Activity: Seminar
1 Course Unit

AFRC 335 "Where My Girls At?": African American Women Performers in The 20th Century
African American women performers from blues woman Bessie Smith to Paris revue star Josephine Baker, from jazz darling Billie Holiday to rock legend Tina Turner, and from hip hop giant Lauryn Hill to millennial star Beyoncé, have constantly redefined and expanded American popular music. Using the long 20th century as our historical marker, this course will explore how African American women performers, across genres and time, have consciously and sometimes contradictorily navigated the racial and sexual limits of American popular culture in order to assert their own particular narratives of artistic and political freedom.
Taught by: Tillett
Course usually offered in spring term
Also Offered As: GSWS 336
Activity: Seminar
1 Course Unit

AFRC 345 Race and Sex in Early America
This course explores the lost worlds of sinners, witches, sexual offenders, rebellious slaves, and Native American prophets from the seventeenth to nineteenth centuries. Using the life stories of unusual individuals from the past, we try to make sense of their contentious relationships with their societies. By following the careers of the trouble-makers, the criminals, and the rebels, we also learn about the foundations of social order and the impulse to reform that rocked American society during the nineteenth century.
Taught by: Brown
Course usually offered in fall term
Also Offered As: GSWS 345, HIST 345
Activity: Lecture
0 Course Units

AFRC 346 Gender in Modern American History
This course explores how immigration, industrialization, racial segregation, and the growing authority of science transformed the fundamental conditions of women's lives in the late nineteenth and early twentieth centuries. Building on previous efforts by female reformers to perfect society, women at the turn of the century organized large social movements dedicated to improving the lives of women and children and gaining public access to political power. We will examine the fruits of this activism as well as the consequences of subsequent events for the rise of several important social movements in the latter half of the century -- including civil rights, women's liberation, and gay rights -- in which women played a vital role. The course concludes with an assessment of feminism in the present day, with special emphasis on the responses of younger women to its legacy.
Taught by: Brown, Peis
Course usually offered in spring term
Also Offered As: GSWS 346, HIST 346
Activity: Recitation
1 Course Unit
AFRC 357 Undergraduate Topics in African Studies
SPRING 2017 - UNDERSTANDING AFRICA: This course will explore the economic, social, and political realities facing sub-Saharan Africa today by placing them in historical and global contexts. Key themes will include colonial and precolonial history, nationalisms and cold war politics, economic development and foreign aid, ethnic and political conflicts, media representation and popular culture. The course will focus on local and global dynamics that have a role in shaping the present day Africa.
One term course offered either term
Activity: Lecture
1 Course Unit

AFRC 372 Africa & the Mid-East
This seminar will explore the historical relationship between these two regions from the early modern age to the present. We will examine the history of trade, particularly the slave trade, and its cultural and political legacy. We will compare the experiences of European imperialism—how the scramble for Africa dovetailed with the last decades of the Ottoman Empire—with an eye to how this shaped nationalist movements in both regions. The course will also explore the decades of independence with a special eye towards pan-Africanism and pan-Arabism. We will also study the ramifications of the Arab-Israeli conflict on the relationship between African and Middle Eastern countries, from Uganda to Ethiopia, from OPEC to Darfur. This course will pay close attention to migrations through the regions, whether forced or economic or religious. Whenever possible we will explore, through film and literature, how people in Africa and the Middle East see their connections, and their differences.

Activity: Seminar
1 Course Unit

AFRC 373 The History of Foreign Aid in Africa
This course examines the history, politics, and significance of foreign aid to Africa since the late 19th century. While we do not typically think about the European colonial period in Africa in terms of foreign aid that era introduced ideas and institutions which formed the foundations for modern aid policies and practices. So we start there and move forward into more contemporary times. In addition to examining the objectives behind foreign assistance and the intentions of donors and recipients, we will look at some of the consequences (intended or unintended) of various forms of foreign aid to Africa over the past century. While not designed to be a comprehensive history of development theory, of African economics, or of international aid organizations, the course will touch on all of these topics. Previous coursework on Africa is strongly advised.

AFRC 387 Topics in Africana Studies
Topics vary: Black Feminist Approaches to History & Memory - The term black feminism emerged in public discourse amid the social, political, and cultural turbulence of the 1960s. The roots of black feminism, however, are much older, easily reaching back to the work of black women abolitionists and social critics of the nineteenth century. The concept continued to grow and evolve in the work of twentieth century black women writers, journalists, activists, and educators as they sought to document black women’s lives. Collectively, their work established black feminism as a political practice dedicated to the equality of all people. More recently, black feminism has been deployed as a tool for theoretical and scholarly analysis that is characterized by an understanding that race, class, gender, and sexuality are inextricably interconnected. Using materials such as slave narratives, social criticism, and archival sources, this course will explore the theoretical and practical applications of black feminist thought in nineteenth and twentieth century North American culture and politics. In particular, we will consider the symbols and practices (storytelling, myth-making, art, archival research) that black women use to document lives. We will ask: how do these methods of documentation inform our understanding of the past and the production of historical knowledge? How can we understand black feminism as both theory and practice? And what are the implications of black feminist approaches for current research and scholarship? We will give particular attention to concepts such as gender, race, memory, the archive, and embodied knowledge to complicate our understanding of historical documentation, epistemology, and authenticity. The course material will include scholarship by Harriet Jacobs, Audre Lorde, Saidiya Hartman, Hazel Carby, Hershini Young, Evelyn Brooks Higginbotham, Toni Morrison, and others. (Image: From In Praise of Shadows, Kara Walker (2009)).

AFRC 393 Cinema and Civil Rights
Topic Varies Spring 2017. This course will examine key moments in the history of civil rights through a cinematic lens. Over the course of the semester, we will explore how filmmakers have depicted the lives, aspirations, and strategies of those who have struggled for equal rights; how different struggles have intersected with each other; what aesthetic strategies have been adopted to represent freedom and the denial of it; and how effective cinematic efforts to contribute to increased freedom have been as well as what criteria we use to evaluate success or failure in the first place. Each week, we will watch a film and read a series of texts that will be drawn from a variety of arenas, including histories of civil rights; civil rights pamphlets and speeches; filmmaker interviews; film and media theory; memoirs; and theories of race, gender and sexuality.
Course requirements: mutual respect; completion of all readings and screenings; participation in class discussion; weekly online responses; a final project that can be a research paper, film, art project, or community-based initiative.
Taught by: Redrobe

Suite 331A, 3401 Walnut or visit the department's website at https://africana.sas.upenn.edu to submit an application.

AFRC 400 Seminar in Africana Studies
This course is an examination and analysis of the changing images and achievements of African Americans in motion pictures and television. The first half of the course focuses on African-American film images from the early years of D.W. Griffith's "renegade bucks" in The Birth of a Nation (1915); to the comic servants played by Steppin Fetchit, Hattie McDaniel, and others during the Depression era; to the post-World War II New Negro heroes and heroines of Pinky (1949) and The Defiant Ones (1958); to the rise of the new movement of African American directors such as Spike Lee (Do the Right Thing), Julie Dash (Daughters of the Dust), Charles Burnett, (To Sleep With Anger) and John Singleton (Boyz N the Hood). The second half explores television images from the early sitcoms "Amos 'n Andy" and "Beulah" to the "Cosby Show," "Fresh Prince of Bel Air," and "Martin." Foremost this course will examine Black stereotypes in American films and television--and the manner in which those stereotypes have reflected national attitudes and outlooks during various historical periods. The in-class screenings and discussions will include such films as Show Boat (1936), the independently produced "race movies" of the 1930s and 1940s, Cabin in the Sky (1943), The Defiant Ones (1958), Imitation of Life (the 1959 remake) & Super Fly (1972).

AFRC 405 Religion, Social Justice & Urban Development
Urban development has been influenced by religious conceptions of social and economic justice. Progressive traditions within Judaism, Christianity, Islam, Buddhism, Hinduism, Jainism, Baha'i, Humanism and other religions and systems of moral thought have yielded powerful critiques of oppression and hierarchy as well as alternative economic frameworks for ownership, governance, production, labor, and community. Historical and contemporary case studies from the Americas, Europe, Africa, Asia, and the Middle East will be considered, as we examine the ways in which religious responses to poverty, inequality, and ecological destruction have generated new forms of resistance and development.

AFRC 420 Advanced topics in Africana Studies
Topics vary. See the Africana Studies Department's course list at https://africana.sas.upenn.edu for a description of the current offering. Fall 2017: After an examination of the philosophical, legal, and political perspectives on Human Rights, this course will focus on US policies and practices relevant to Human Rights. Toward that end, emphasis will be placed on both the domestic and the international aspects of Human Rights as reflected in US policies and practices. Domestically, the course will discuss (1) the process of incorporating the International Bill of Human Rights into the American legal system and (2) the US position on and practices regarding the political, civil, economic, social, and cultural rights of minorities and various other groups within the US. Internationally, the course will examine US Human Rights policies toward Africa. Specific cases of Rwanda, Kenya, South Africa and Egypt, as well as other cases from the continent, will be presented in the assessment of US successes and failures in the pursuit of its Human Rights strategy in Africa. Readings will include research papers, reports, statutes, treaties, and cases.

AFRC 435 Modern Presidency and Race
This seminar is designed to serve as a "capstone" experience for advanced undergraduates interested in American politics. It exposes students to some of the issues currently being studied and debated by the leading scholars in the field. For each topic we will read works that take competing or opposing positions on an issue; for example we will examine the current controversy over the causes and consequences of divided government. Students will write a research paper analyzing one of the debates.

Activity: Seminar
1 Course Unit
AFRC 436 Africana Studies Undergraduate Seminar
On the stage of modern world history, Haiti plays the unique role as both the exceptionally victorious and tragic character. This course interrogates archival documents, oral histories, historical texts, and prose created within the nation and her diaspora in order to establish a nuanced image of the projection of Haiti’s modern history. Using two classic Haitian texts, Marie Vieux-Chauvet’s Love, Anger, Madness (1968) and Michel-Rolph Trouillot’s Silencing the Past: Power and the Production of History (1995), this course examines how, why, and to what end Haiti’s history and popular narratives about the country have served to construct and dismantle global movements, popular culture, and meanings of race, gender, and citizenship in the Americas. In our historical examination, we will question some of the iconic representations of Haiti through literature that deepen the affective historical profile of Haiti with interrogations of culture, sexuality, political, and media performance. Students will become familiar with the post-colonial history of Haiti and the region, meanings of race, and the production of history. The course is a research and historical methods seminar. Students will conduct archival research and write narratives from primary source material. This course qualifies as a “methods” course for Africana Studies undergraduate majors and minors.
Taught by: Johnson
Course usually offered in spring term
Also Offered As: GSWS 436, HIST 436, LALS 437
Activity: Seminar
1 Course Unit

AFRC 437 Race & Criminal Justice
Why are African Americans and some other minority groups disproportionately incarcerated and subjected to penal sanctions? What are the political, social, and economic consequences for individuals, communities, and the wider society of mass incarceration in the United States? What types of reforms of the criminal justice system are desirable and possible? This advanced seminar analyzes the connection between race, crime, punishment, and politics in the United States. The primary focus is on the role of race in explaining why the country’s prison population increased six-fold since the early 1970s and why the United States today has the highest incarceration rate in the world. The class will likely take field trips to a maximum-security jail in Philadelphia and to a state prison in the Philadelphia suburbs.

AFRC 480 Liberation and Ownership
Who is going to own what we all have a part of creating? The history of the Americas, and of all peoples everywhere, is an evolving answer to the question of ownership. Ownership is about: the ties that bind and those that separate; production, participation, and control; the creation of community and the imposition of hierarchies—racial, sexual, and others; dreams of possessing and the burdens of debt and ecological despoliation; dependency and the slave yearning to breathe free. Of all the issues relevant to democracy, oppression, injustice, and inequality, ownership is arguably the most important and least understood. Utilizing a variety of disciplinary perspectives—with a particular emphasis on radical and critical theories of liberation, and by focusing on particular global sites and processes of capitalism, students will assess and refine their views regarding ownership and liberation in light of their own social, political, religious, aesthetic, and ethical commitments.

AFRC 518 Topics in American Religion
From Marvin Gaye, to Tammy Faye Baker, to Sarah Palin and James Baldwin, Pentecostalism has influenced many, including politicians, preachers, writers, and the media. One of the fastest growing religious movements in the world, Pentecostalism continues to have a profound effect on the religious landscape. Pentecostalism's unique blend of charismatic worship, religious practices, and flamboyant, media-savvy leadership, has drawn millions into this understudied and often controversial religious movement. This course will chronicle the inception and growth of Pentecostalism in the United States, giving particular attention to beliefs, practices, gender, ethnicity, and Global Pentecostalism.
Taught by: Butler

AFRC 527 Advanced Seminars in Africana Studies
SPRING 2017: Market Women, Madames, Mistresses & Mother Superior studies gender, labor, sexuality, and race in the Caribbean. In our historical examination of primary source documents alongside literature, and popular media, we will question some of the iconic representations of Caribbean and Latin American women in order to understand the meaning, purpose and usages of these women's bodies as objects of praise, possession, obsession and/or ridicule by communities, governments and religions within and outside of the region. Beginning in the late-18th century and ending with contemporary migration narratives, this course considers the relationship between slave society and colonial pasts on gender performance in the modern Caribbean, Latin America, and their diasporas.

AFRC 533 Advanced Selected Topics
This course is cross-listed when the subject matter is related to African, African American, or other African Diaspora issues. Courses currently offered are, "Political Culture and American Cities, Social Movements and Social Change, Critical Race Theory. See the Africana Studies Department's website at https://africana.sas.upenn.edu for a description of the current offerings. This course brings together the vantage points of urban political economy, history and urban anthropology. Readings and discussions will cross those literatures, folding in considerations of race, ethnicity and gender in the American city life, with a focus on the relation between culture and political economy. We will reconstruct the history of the different tracks of urban studies in the U.S., beginning with its roots in sociology and anthropology in the Chicago School and in political science in reform-oriented studies of public administration. We will revisit the community power debate of the 1950s-1970s, which shook out significantly along disciplinary lines, and will examine the development of the urban political economy perspective in the 1980s and 1990s, as well as developments within U.S. urban anthropology since the 1960s. We will employ local case study materials, and at every point we will try to understand the intellectual trajectories of the urbanist discourses in relation to dynamics contemporaneously shaping urban politics and policy. Course requirements are seminar preparation which includes each student's leading discussion around specified reading assignments – and a research paper, the topic of which must be approved by week 5.

AFRC 538 Topics in Medieval Art
The craft of ivory carving around the Mediterranean is contingent upon the availability of imported elephant tusks, from either South East Asia or, more frequently, from the African continent. The shifting winds of trade routes offer an interpretive paradigm with which to analyze ivory objects from a variety of different cultural groups: the lack or abundance of ivory and the resulting desire for or surfeit of the material shapes its meaning and use around the Mediterranean basin. The study of ivory objects as they migrate around the Mediterranean allows us to investigate the rich intercultural interactions between Eastern and Western Christians, and both of these with the Islamic world. This course focuses on an object oriented knowledge of ivory artefacts, with a strong emphasis on the collections at the Penn Museum, the Philadelphia Museum of Art, and other area collections.
