Thinking like a designer can transform the way people and organizations develop products, services, processes, and strategy. This approach, called design thinking, brings together what is desirable from a human point of view with what is technologically feasible and economically viable. It also allows people who aren’t trained as designers to use creative tools to address a vast range of challenges. Design thinking is a deeply human process that taps into abilities we all have but get overlooked by more conventional problem-solving practices. It relies on our ability to be intuitive, to recognize patterns, to construct ideas that are emotionally meaningful as well as functional, and to express ourselves through means beyond words or symbols.
Course usually offered summer term only
Also Offered As: SWRK 593
Activity: Lecture
1 Course Unit
Notes: Fall section open only to students in the hybrid NPLD program

NPLD 595 Effective Communication and Storytelling
Great leaders are storytellers. They are able to engage and entertain their communities, and tell a compelling narrative about how the world works. They use language powerfully and communicate in ways that uplift and inspire others. In this class, we will explore the power of telling great stories, and learn how to do it most effectively when promoting your campaigns to make the world a better place. We will also look at the skills of framing language in ways that will win over an audience. Finally, we will look at other key skills of effective communication, including the best strategies for persuasion, negotiation, and conflict resolution.
Taught by: Sherman
Course usually offered summer term only
Also Offered As: SWRK 595
Activity: Lecture
1 Course Unit

NPLD 596 Design and Incorporation of High Impact Nonprofits
Design and Incorporation of High Impact Not-For-Profits is designed for those who have a practitioner’s interest in the design, governance, leadership, and management of high impact not-for-profit organizations. This course is taught through learning best practice theory, applying this theory to a simulation experience, and providing students the opportunity to apply their new knowledge and experience in an interview with a current not-for-profit leader. Students, through the combination of theory and practice, are provided with the essential competencies and tools to design and incorporate a not-for-profit, conduct in-depth analysis of a not-for-profit’s effectiveness including, but not limited to, governance, leadership, social impact, financial sustainability, and systems and policy influence. Through the mock simulation process of designing, incorporating, and governing, students will leave with a “best practice” for not-for-profit manual that includes articles of incorporation, bylaws, governance, organizational scorecard, 3-5 year budget, development plan, and public policy strategy.
Also Offered As: SWRK 596
Activity: Lecture
1 Course Unit
NPLD 720 Data Analysis for Social Impact
Practitioners, leaders, and researchers need to engage with the latest cutting-edge research findings in their field. In this class you will develop an understanding of the quantitative methods that underpin social impact research, in an applied lab-based context. Theoretically, we will focus on developing your working statistical knowledge, and practically we will develop your data analysis skills by introducing you to a range of approaches for analyzing and handling large-scale secondary quantitative data that capture social impact. The substantive focus of the course will be on individual-level participation in the Nonprofit Sector in activities such as volunteering and charitable giving. This applied course covers the fundamental elements and approaches to handling and analyzing quantitative survey data. The emphasis is on developing an adequate understanding of basic theoretical statistical principles, descriptive and exploratory methods of analysis, graphical representation, observational procedures and interpretation of statistical results using STATA. The course will cover a wide range of statistical techniques from basic descriptive statistics to more advanced multivariate statistical techniques, such as OLS regression and logistic regression. You will also be introduced to a number of important topics, including theory testing and development; philosophy of science and research judgement; and replication in social impact research.
Taught by: Bennett
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: fall section open only to students in the hybrid NPLD program

NPLD 730 Difficult Art of Listening
The art of listening ethnographically has many benefits. Using a generally anthropological framework to organize sessions, this course attempts to make a case for the productive force (for scholars, policy makers, nonprofit leaders and others) of hearing in proactive and nuanced ways. Highlighting the value of acoustemological ways of understanding the world (knowing through hearing), the course asks students to listen in newfangled ways to many of the things they’ve heard before - while also listening out for things that they’ve never previously taken note of. Thinking about how listening carefully greases the wheels for successful interpersonal communication and overall cultural understanding, students will be asked to observe themselves listening in ways that might allow for innovative translations of observable/empirical data into knowledge that can be deployed in serice to personal, institutional, and structural change. Course usually offered in fall term
Activity: Online Course
0.5 Course Units
Notes: Open only to students in the hybrid NPLD program

NPLD 750 Corporate Social Responsibility (CSR): Partnerships and Practices
Businesses performing philanthropic activity often use their platform of CSR activities to engage with society, directly, via a corporate foundation, or through partnerships with nonprofit organizations. Although such philanthropic activities are not directly related to profit-making ventures, they may boost their reputation, be used in marketing their products, talent recruitment, increase employee engagement and commitment, and thus contribute to the profit indirectly. Many businesses undertake their CSR related philanthropic activities using strategic partnerships with nonprofits or public sector organizations to meet their goals. This provides opportunities to nonprofit and public sector leaders in achieving social and sustainable change.
Taught by: Handy
Activity: Lecture
1 Course Unit
Notes: Course takes place in the Netherlands Pre-travel meeting dates TBA; Application required: www.sp2.upenn.edu/global/courses

NPLD 751 Widening the Aperture: Assessing Global Social Impact Interventions
Part of being a working professional in social impact is assessing the effectiveness of intervention models. This is true whether you work in service delivery, consulting, evaluation or philanthropy. This course offers students a unique, experience-based opportunity to assess an organization’s work from afar, then on the ground in Malawi. The expectation is that several assumptions established in the beginning of the course will hold through to the end. Importantly, others will not. Students will understand how we build a knowledge base about an organization’s work, what assertions we come to, and then how we test those assumptions. This process represents a vital skill set including research, perspective-taking, and direct engagement with the communities served and the people doing the work. The course will provide students with a practical framework for analyzing social impact interventions through three important and complementary lenses: sector practice, environmental factors and organizational implementation. Students will use the immersive, travel experience in Malawi to engage directly with one of three service organizations to apply the framework. They will also use data collected about these organizations through the Lipman Family Prize selection process, a University of Pennsylvania-based social impact prize, combined with their own research, both primary and secondary, to better understand the organizations, staff, and forces influencing the intervention. Students will use ethnographic tools to collect and analyze primary data regarding staff attitudes and perceptions at these organizations. Students will present their findings to the organizational leadership while still in the country. The course will include significant team-based project work.
Course usually offered summer term only
Activity: Lecture
1 Course Unit
NPLD 782 Small Group Processes
Studying the behavior of groups and the actions/inactions of people within groups provides a doorway to deeper understanding of our selves, our families, our friends, our colleagues, our organizations, and our communities. This half credit course is designed for Penn Graduate students eager to generate constructive group processes when chairing a committee, managing a work group, teaching in a classroom, serving on a jury, conducting a support/therapy group or facilitating strategy formulation. It is easy to see what is going well or poorly when observing what others are doing. But tuning into and gaining a comprehensive grasp of these processes when they are happening in the groups we belong to and learning how to take constructive actions in the here and now when it can have a meaningful impact requires a high level of cognitive capability combined with a special form of relational artistry. This course is an amalgam of experiential activities and energizing ways to internalize the rich concepts developed during many decades of applied-academic research. Participants are required to be fully present and fully engaged for the whole weekend, read the major book and a number of articles, pull write a paper. This course occupies a full weekend and runs from 6pm Fri. to 6pm Sun. This is a 48-hour intensive weekend; you go home to sleep. Participants applying for this course are required to take a Primer, which provides potential participants with a common conceptual base for engaging in the essential learning and lays out the intellectual foundations of the course. Permits will be issued soon after participants have taken the Primer. Contact the NPLD program for more information on primer and course dates.
One term course offered either term
Prerequisite: Attendance at course Primer (see course description)
Activity: Seminar
0.5 Course Units
Notes: Fall 2018 Class Schedule: Option 1: Friday 9/14 6-11 pm; Saturday 9/15 9am-11 pm; Sunday 9/16 9am-6 pm. Option 2: Friday 9/21 6-11 pm; Saturday 9/22 9am-11 pm; Sunday 9/23 9am-6 pm.

NPLD 783 Field Exercise in Social Impact Measurement
The twofold purpose of social impact measurement is to assess and improve the impact of nonprofit programs, and to inform grantmaking practice and effectiveness. In addition to accounting for funds spent and reporting on the actual work carried out, social impact measurement is an essential learning opportunity for grantmaker and grantee. However, choosing an appropriate methodology of measurement is critical. This course will offer an overview of leading social impact measurement methodologies and tools, and an impact measurement field exercise. During the field exercise, student teams will develop an evaluation plan and associated instruments for a local nonprofit using one or more of the methodologies. Teams will present their evaluation plans and offer recommendations for implementation. Lectures will be complemented by class time devoted to field exercise team meetings and off-site field work.
Taught by: Hargro
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NPLD 784 The Nonprofit Sector: Concepts and Theories
Can you imagine a world without the vitality and diversity of the nonprofit sector? What would it be like? Everything from health care to education, from serving the disadvantaged to protecting and restoring the environment, nonprofit organizations seem to have become an inseparable part of every aspect of our lives. So often they are taken for granted that we seldom pause and reflect on the roles and functions of these vital organizations in our community. This course will introduce you to the various roles that voluntary, philanthropic and nonprofit organizations play in American society. It will cover the theory, size, scope and functions of the sector from multiple disciplinary perspectives including historical, political, economic, and social views. The course also has a "hidden agenda." Take this class to see and discover what this agenda is!
Taught by: Guo
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NPLD 785 Group Dynamics and Organizational Politics
This is one of the courses referred to as "The Power Lab at Penn." This intensely experiential course is designed for those providing group and institutional leadership at any level of a human enterprise, managing work groups, chairing committees, serving on special task forces, conducting support groups, offering legal services, teaching in classrooms, facilitating groups in clinical settings, etc. Participants will focus on two topics: (1) an in-depth understanding of group dynamics while they are in action, and (2) the organizational relationships between groups that are in a powerful position, groups locked in a powerless state and those caught in the middle between the powerful and the powerless.
Course Structure: This course has six components: (1) A pre-course discerning process, which consists of a one evening plus one full day Primer workshop; (2) Module 1 which is focused on group dynamics; (3) reading an assigned book and writing a paper based on Module 1 experiences; (4) Module 2 which addresses power relationships among groups with differential resources; (5) reading two assigned books and writing a paper based on Module 2 experiences; and (6) a post-course debriefing. The Primer provides all potential participants with a common conceptual base for engaging in the essential learning and lays out the intellectual foundations of the course.
Taught by: Smith
Course usually offered in fall term
Prerequisites: Permitted required; all potential participants are required to attend a Primer class which consists of one evening session AND an all day session. Permits are granted only after students have completed the primer classes.
Activity: Lecture
1 Course Unit
Notes: Students from all graduate programs at Penn are welcome to apply. Contact the NPLD program for more information.
NPLD 786 Strategic Management and Leadership of Nonprofits
This course is about doing good and doing well. It is designed to introduce you to the fundamental issues in accountability and governance and the administration and management in nonprofit organizations. Through research and analysis, you will understand multiple structures of accountability and the various stakeholders in nonprofits, understand the duties and dynamics of boards of directors in conjunction with other mechanisms of governance (e.g., chief executive officers, advisory boards, etc.), and develop an understanding of management techniques and leadership skills for enhancing the effectiveness of nonprofit organizations. You will be asked to think about the challenges of running nonprofit organizations in a comparative context, with cases drawn from both the U.S. and abroad. The emphasis of this course is on acquiring operational skills. The course is designed for those who may have had years of experience managing other people and programs in the nonprofit sector but who want to develop a more systematic mastery of this challenge, as well as students from other sectors who aspire to a nonprofit leadership role.
Taught by: Guo
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NPLD 790 Social Finance
Economic analysis and financial accounting are like languages: fluency comes with practice. In-class review of case studies (including, on occasion, in-person discussions with the representatives of diverse agencies and organizations featured in the case studies) will enable students to test and develop their capacity for applying conceptual tools and analytical methods to sometimes messy and always complicated, real-life situations. The course objective is to develop theoretical understanding, critical judgment, and practical skills for sensitive and effective engagement with financial and economic matters of significance. Students will learn: (a) different ways of thinking about the economic foundations of social policy, (b) the basic terminology, tools, and methods for analyzing the financial statements of a wide range of organizations, and (c) accounting procedures for evaluating business, government, and organizational operations, policies, and practices.
Taught by: Lamas
Course usually offered in fall term
Also Offered As: NPLD 590
Activity: Lecture
1 Course Unit

Notes: The course is open to students across the University. All graduate students who take this course must register under NPLD790. All undergraduate students must register under NPLD590. SECTION 002 is open only to students in the hybrid NPLD program.

NPLD 791 Leadership: Designing the Future
This is one of the two courses referred to as The Power Lab at Penn. The other is NPLD 785/SWRK 766. This experiential, highly interactive seminar is for those eager to serve in managerial/leadership positions of human systems that create/maintain the organizational and fiscal viability of public, non-profit or private enterprises, including their partnerships. Candidates in all Penn graduate programs are welcome, whether one’s ambition is to generate sustainable livelihoods, renewable energy, clean water, viable environments, robotics, or quality services in fields such as education, health care, AI, communication, the arts, or criminal justice, or security. Course participants are members of decision-making groups that run a computer-based, data-driven, future-creating, socio-economic simulation while synchronously studying the intra and inter-group dynamics inherent in all leadership actions. The educational methodology of this course is based on discovery-learning processes about the critical inter-dependencies among several phenomena, such as: strategy formulation-execution and organizational practices that unleash latent possibilities; wealth creation and the dynamics of competition/collaboration within and among groups; robust economic metrics and intra/inter-group decision-making and sophistication; leadership of market-financial-political ecosystems and quality group-based followership; the efficacy of work-based activities and system conflict management capabilities; building new forms of private, public, non-profit ventures and developing human capital.
This course combines intellectual and experiential learning about the business of organizing and an organization’s businesses. It is based on cutting-edge sociological, economic, psychological, managerial and anthropological thinking about wealth-creation/circulation, the power of combining left-brain and right-brain reasoning, the harnessing of energies trapped by classic organizational conflicts and accessing the abundance located in contexts of seeming scarcity.
Taught by: Smith
One-term course offered either term
Prerequisites: Permit required; all potential participants are required to attend a Primer class which consists of one evening session AND an all day session. Permits are granted only after students have completed the primer classes.
Activity: Lecture
1 Course Unit
Notes: Students from all graduate programs at Penn are welcome to apply. This course meets on two Wednesday evenings and two consecutive weekends. It is a distinct advantage to have previously taken NPLD 782. Contact the NPLD program for course dates and more information.
NPLD 792 Social Entrepreneurship
Social entrepreneurs are individuals with innovative vision seeking to accomplish important public purposes through the creative and aggressive mobilization of people and resources. Using academic theory and research on social entrepreneurship as a framework, student innovators learn to design, develop, and lead social change organizations of their own invention. Students turn their passion for changing the world into concrete plans for launching a venture. Over the course of the semester, we will cover a broad array of topics associated with social innovation and entrepreneurship, including defining the problem/opportunity, refining the mission/vision, developing market research and industry analysis, defining a financial and operating structure, assessing results and progress, and scaling an enterprise. This course is neutral on sector. Graduate students in any of Penn’s graduate and professional schools who want to create social value through either nonprofit or for-profit ventures are invited to take the class and develop their ideas. The class will expose students to the process of getting an organization - regardless of sector - off the ground and running. While this is a class on innovation and entrepreneurship, students do not need to be committed to starting a venture upon graduation. The skills and tools contained in the course have wide applicability in the workplace. Being able to develop a coherent venture plan is great training for anyone who wants to work in government, philanthropy, or the business sector funding or managing existing organizations. The course attempts to convey a picture of what a well-considered and well-executed venture plan looks like with the goal of developing in students an appreciation for clear thinking in the pursuit of the creation of public value.

Taught by: Frumkin
One term course offered either term
Activity: Seminar
1 Course Unit
Notes: Fall class open only to student in the hybrid NPLD program

NPLD 796 Philanthropy and Fundraising Tools for Managers
This course will review the everyday tools that nonprofit managers and development officers need to raise funds from individuals and other sources of private philanthropy. Last year, Americans gave approximately $300 million and 83% of it was from individuals. The fundraising profession has created a body of knowledge in the past twenty years that can guide effective fundraising programs so that charitable organizations can support their mission. The sessions will review the theory and practical techniques that development professionals use every day in large and small organizations including annual giving, major gifts, planned giving, cultivation of donors, making your case for support, the Seven Faces of Philanthropy, special events, and prospect research.
There will also be discussions of philanthropic trends and current giving patterns. For those who are interested in nonprofit administration, these will be critical tools to understand.

Taught by: Heisman
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Undergraduates need permission

NPLD 797 Philanthropy and the City
This course will focus on how urban communities are shaped by the nonprofit sector and the billions of philanthropic dollars that fuel their work. By bridging theory and practice, the class explores what dynamics are at play to deliver vital services or programs in healthcare, education, the arts, community development, and other issues. The course will also focus on these important questions: (1) Whose responsibility is the public good? How is that responsibility shared by the public, private, and nonprofit sectors? and (2) Given that responsibility for the public good, which individuals and groups make the decisions about how to serve the public good? How are these decisions made, and who benefits from these decisions? Students will consider these questions in an interdisciplinary context that will bring a historical and philosophical perspective to the examination of the values and institutions that characterize the contemporary philanthropy and the nonprofit sector.

Taught by: Bauer/Goldman
Course usually offered in spring term
Also Offered As: URBS 404
Activity: Seminar
1 Course Unit

NPLD 799 Independent Study
Independent studies provide a flexible opportunity for students and NPL faculty or part-time instructors to work together in pursuing a topic of special interest that is not sufficiently covered by other courses in the curriculum. The content of independent studies is highly specialized and, as such, requires a plan of study developed jointly by the student(s) and the supervising professor. Independent studies require the academic advisor’s approval.
Activity: Independent Study
1 Course Unit

Nursing (NURS)

NURS 061 Biologically-Based Chemistry
A contextual approach will be used in studying the concepts in General, Organic and Biological Chemistry that are foundational to an understanding of normal cellular processes. Topics that will be covered include measurements, atomic structure, bonding, chemical reactions, properties of gases and liquids, solutions, equilibrium, acids and bases, pH, buffers, nuclear chemistry, nomenclature and properties of the main organic functional groups, and the structures and function of carbohydrates, proteins and lipids.

Taught by: Lafferty-Della Valle
Course usually offered in fall term
Prerequisite: One year of high school general chemistry or its equivalent
Activity: Lecture
0.5 Course Units
Notes: 0.5 course units

NURS 065 Fundamentals of Nutrition
Essentials of normal nutrition and their relationships to the health of individuals and families. These concepts serve as a basis for the development of an understanding of the therapeutic application of dietary principles and the nurse’s role and responsibility in this facet of patient care.

Taught by: Compher; Dolan; Caspar-Clark
Course usually offered in spring term
Prerequisite: NURS 061; NURS 062 (or equivalent Science Sequence Courses)
Activity: Lecture
1 Course Unit
NURS 068 Integrated Cell Biology and Microbiology
This course will include the major topics of cell biology and microbiology that are foundational for an understanding of normal and pathological cellular processes. Topics will include the brief study of prokaryotic and eukaryotic cell structures and functions; the main biological molecules; membrane transport; cellular communications; the flow of genetic information; cell division; and cellular metabolism. The course will also examine the role of cells and microbes in human health and infectious diseases. It will include a description of the main types of microbes, how they are identified, their growth requirements, and the role of the immune system in controlling infections, the control of microbes, host-microbe interactions. The context for this course will be the application of cell biology and microbiology for understanding the cellular basis of cancer and infectious human infection disease processes. This course will include special sessions from a clinical perspective in the various fields of medicine, microbiology, and immunology.
Taught by: Johnson, Ross
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NURS 101 The Nature of Nursing Practice
This course facilitates students’ ability to conceptualize the experiences of individuals, families, communities, and populations living with health and illness. It emphasizes the integration of knowledge from other disciplines and of nursing science as the basis for practice. The course introduces the four core themes of the undergraduate nursing program: engagement, inquiry, judgment, and voice and examines how the themes are used to characterize the nature of nursing practice.
Taught by: Kutney-Lee; Brooks-Carthon; Wiltse Nicely
Course usually offered in fall term
Activity: Lecture
0.5 Course Units
Notes: 0.5 course units

NURS 102 Situating the Practice of Nursing
This course emphasizes not only how nursing is practiced, but also where it is practiced. The course further explores the four core themes of engagement, inquiry, judgment, and voice as it provides guided observational experiences in a wide variety of settings. These experiences help the student to discover what is not known and what is subsequently necessary to know. These experiences also explore the place of the natural and social sciences and the arts and humanities in nursing practice. This course also will highlight the relationships between and among members of the interprofessional team and families and patients. NURS 102 fosters development of the professional role and sets the stage for life-long learning.
Taught by: Kutney-Lee; Brooks-Carthon; Kaufman; Brewer
Course usually offered in spring term
Prerequisite: NURS 101
Activity: Lecture
0.5 Course Units
Notes: 0.5 course units

NURS 103 Psychological and Social Diversity in Health and Wellness
This course explores and integrates the intersection of psychological, cognitive, and social development with the lived experiences of individuals, families, and communities across the lifespan in order to conduct socially contextualized health assessments and health teaching. Extant theories will be critically analyzed and examined with respect to issues of health care access, health history, health promotion, and issues of equity and diversity from a life-course perspective. This knowledge will be synthesized and integrated with the development of the student's communication skills and interviewing processes necessary to develop socially attuned health history and teaching that promote psychological well being and healthy lifestyles. Simulated and observational experiences provide students with opportunities to acquire and apply knowledge necessary for conducting a comprehensive health history of an individual situated within a diverse community. They also provide opportunities to develop prioritized health teaching plans in partnership with that individual.
Taught by: Connolly; Lewis, L
Course usually offered in fall term
Prerequisite: NURS 101
Activity: Lecture
1 Course Unit
Notes: Offered in Summer for Accelerated BSN Program

NURS 112 Nutrition: Science & Applications
An overview of the scientific foundations of nutrition. The focus is on the functions, food sources and metabolism of carbohydrate, fat, protein, vitamins and minerals. Effects of deficiency and excess are discussed and dietary recommendations for disease prevention are emphasized. Current issues and controversies are highlighted. Students will analyze their own dietary intakes and develop plans for future actions.
Taught by: DeJonghe; Hayes
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: For Non-Nursing Majors

NURS 131 Human Anatomy and Physiology - Part A
The structural and functional organization of the human organism is presented, along with the fundamentals of developmental anatomy and embryology. Histologic and gross anatomical features of selected organ systems are related to the physiologic and biochemical mechanisms which enable the human body to maintain homeostasis in an ever-changing environment.
Taught by: Scanga
Course usually offered in spring term
Prerequisites: NURS 61 and NURS 62 (or equivalent College Level Chemistry and Biology)
Activity: Lecture
1.5 Course Unit
Notes: 4 h. lec. 2 h. lab. $100 lab fee
NURS 132 Human Anatomy and Physiology - Part B
The structural and functional organization of the human organism is presented, along with the fundamentals of developmental anatomy and embryology. Histologic and gross anatomical features of each organ system are related to the physiologic and biochemical mechanisms which enable the human body to maintain homeostasis in an ever-changing environment. Basic concepts of pathophysiology are introduced and applied to certain clinical disorders.
Taught by: Scanga
Course usually offered in fall term
Prerequisite: NURS 131
Activity: Lecture
1.5 Course Unit
Notes: 4 h. lec. 2 h. lab. $100 lab fee.

NURS 159 Pathways To Practice
Activity: Lecture
1 Course Unit

NURS 160 Physical Assessment
This is a laboratory course designed to help beginning nursing students to develop competence in the process of physical assessment. Students engage in actual practice of physical assessment with fellow students as their ‘patient’ subject. A blending of instructor demonstration and supervision of physical examination practice sessions is used in the learning laboratory setting. Students prepare via self-learning activities with a variety of supplied resources (readings, videotapes, computer programs) and have the opportunity to refine their skill through faculty-supervised practice sessions. Procedural skills that correlate with the presentations of physiologic system assessment are included.
Course usually offered summer term only
Prerequisite: Matriculation in the Accelerated BSN Nursing Program
Activity: Lecture
1 Course Unit
Notes: For Students in Accelerated BSN Nursing Program Only

NURS 163 Integrated Anatomy, Physiology, and Physical Assessment I
This is the first part of a two-semester course designed to provide a comprehensive study of the structure and function of the human body along with essential embryology and maturational physiology. Histological and gross anatomical features of selected organ systems are related to the physiologic and biochemical mechanisms that enable the human body to maintain homeostasis. Within each system, deviations from normal are considered to situate the student’s understanding of health problems and to foster an appreciation for the complexity of the human organism. Integrated into each topic are the correlated physical assessment parameters and related procedural skills. Laboratories exercises and case study analysis provide a contextual base to acquire and use domain-specific knowledge of concern to the practice of nursing.
Taught by: Scanga; Quigley
Course usually offered in spring term
Prerequisite: NURS 061; NURS 062; NURS 063; (or equivalent Science Sequence Courses)
Activity: Lecture
2 Course Units
Notes: 2.0 course units

NURS 164 Integrated Human Anatomy, Physiology & Physical Assessment II
This is the second part of a two semester course designed to provide a comprehensive study of the structure and function of the human body along with essential embryology and maturational physiology. Histological and gross anatomical features of selected organ systems are related to the physiologic and biochemical mechanisms that enable the human body to maintain homeostasis. Within each system, deviations from normal are considered to situate the student’s understanding of health problems and to foster an appreciation for the complexity of the human organism. Integrated laboratories and case studies provide a contextual base to acquire and use domain-specific knowledge that includes physical assessment, and procedural.
Taught by: Scanga; Quigley
Course usually offered in fall term
Prerequisite: NURS 163
Activity: Lecture
2 Course Units
Notes: 2.0 course units

NURS 165 Integrated Pathophysiology, Pharmacology, and Therapeutics
Pathophysiologic concepts and processes are introduced with major emphasis on commonly occurring acute and chronic illnesses and their therapeutic interventions. Major classes of drugs that are used to support organ function are explored. The physiological and pathophysiologic rationale for each drug indication, mechanisms of drug action, individualized dosing implications, and adverse drug events will be explored for prototypical agents used in the selected cases. The course will enhance the student’s comprehension of the scientific complexity of therapeutic interventions in various conditions and will build upon the foundational sciences. Additionally the course will provide the student with sufficient scientific knowledge and skills to prepare administer and monitor drugs and therapies in a safe and effective manner.
Taught by: Boullata
Course usually offered in spring term
Prerequisite: NURS 164 (or Equivalent)
Activity: Lecture
2 Course Units
Notes: 2.0 course units
NURS 215 Nursing of Women and Infants
This course emphasizes the child-bearing cycle, and the related issues of maternal and infant mortality and morbidity. It also explores women and infant's health care and health promotion across the lifespan. It provides a global perspective, and uses the United Nations' Pillars of Safe Motherhood and World Health Organization's Millennium Development Goals as the vehicles to enable students to understand the interrelationships among issues of health and health promotion; social, economic, political and environmental contexts; and the care of women across the lifespan. Clinical experiences provide opportunities for students to understand the connections between the local and the global; to use their developing knowledge base to affect the health of women and their infants. Students will have opportunities for hospital-based care of child-bearing women and their infants. In addition, community-based experiences with individual women and with groups of women across the life cycle will be provided in order to enhance teaching, interviewing and assessment skills.
Taught by: Guida; O'Hare; Hill-O'Neill
Course usually offered in spring term
Prerequisite: NURS 101; NURS 102; NURS 103; NURS 164 (Traditional) or NURS 106 (Accelerated)
Activity: Lecture
1.5 Course Unit

NURS 225 Pediatric Nursing
This course considers how nursing influences the health and healing capacities of infants, children, adolescents and their families. It focuses on the knowledge and skill acquisition needed to care for these patients at particular moments, across the continuum of care, and through transitions in an illness experience. It addresses pediatric nursing phenomena of concern and major final common pathways of pediatric illness from infancy through adolescence using a using a developmental and systems approach. Emphasis is placed on family-centered care through transitions in the illness and recovery phases. The course emphasizes clinical reasoning; family centered strategies for optimizing health and maintaining individuality; promoting optimal developmental, physiological, and psychological functioning; and enhancing strengths within the context of family. Clinical experiences at various children's hospitals and simulation experiences provide sufficient opportunities for clinical reasoning, clinical care and knowledge integration.
Taught by: Hickerson
One-term course offered either term
Prerequisite: NURS 215
Corequisite: NURS 235
Activity: Lecture
1.5 Course Unit
Notes: Clinical 12 hours weekly and 2 hours Simulated Laboratory Weekly

NURS 230 Statistics for Research and Measurement
This course examines statistical methods used by scientists in the analysis of research data. The fundamental theorem for this course is the "square root law" (central limit theorem). Students become literate in statistical terminology and symbols and knowledgeable of assumptions for statistical tests. Fundamental statistics include basic theorems and principles, sample, population and data distributions, measures of central tendency, correlational techniques, and commonly used parametric and nonparametric statistical tests. Parameters for inferential and descriptive statistics are examined as the basis for explaining the results from research studies. Students apply chance models in estimating confidence intervals of percentages and means, and in hypothesis testing. This content is taught in the context of nursing research and measurement of nursing phenomena. Examination of research publications enable students to apply their knowledge to reading and understanding data analyses used in studies. Students evaluate tables and graphs as ways to summarize research findings. Course content prepares students to examine statistical and clinical significance of research findings.
Taught by: Kim
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NURS 235 Psychiatric Nursing
This course examines how nursing influences the health and healing capacities of individuals and families experiencing severe psychiatric distress. It focuses on the knowledge and skill acquisition needed to care for these patients at particular moments, across the continuum of care, and through transitions in an illness experience. The course addresses nursing phenomena of concern related the meanings of an illness experience, the development of healing relationships with or within individuals, families, and groups, and on the advanced communication strategies needed to engage individual and families in mental health promotion strategies. It also provides the tools to enable students to construct effective treatment groups with patients; work groups with disciplinary and inter-professional colleagues; and to understand the healing dimensions of environments. Clinical and simulation experiences provide sufficient opportunities for clinical reasoning, clinical care and clinically situated knowledge integration.
One-term course offered either term
Prerequisite: NURS 215
Corequisite: NURS 225
Activity: Lecture
1.5 Course Unit
Notes: Clinical 12 hours weekly and 2 hours Simulated Laboratory Weekly
NURS 245 Nursing of Young and Middle Aged Adults
This course considers how nursing influences the health and healing capacities of young and middle aged adults who experience functional status impairments as a result of serious illness or injury. It focuses on the knowledge and skill acquisition needed to care for these patients at particular moments, across the continuum of care, and through transitions in an illness experience. It addresses nursing phenomena of concern, including risk factors for illness or injury, strategies to overcome barriers and support personal health resources, alleviate suffering and reduce the impact of illness or injury on the functioning of the person. Content and clinical experiences integrate developmental and role issues; policy, cultural and ethical considerations. Clinical experiences in acute care hospital units and simulation experiences provide opportunities for clinical reasoning, clinical care, and knowledge integration.
Taught by: Walsh-Brennan
One-term course offered either term
Prerequisite: NURS 215
Corequisite: NURS 255
Activity: Lecture
1.5 Course Unit
Notes: Clinical 12 hours weekly and 2 hours Simulated Laboratory Weekly

NURS 255 Nursing of Older Adults
This course considers how nursing influences the health and healing capacities of older adults. It focuses on the knowledge and skill acquisition needed to care for these patients at particular moments, across the continuum of care, and through transitions in an illness experience. It addresses nursing phenomena of concern including the unique set of principles and body of knowledge and skills necessary to the practice of nursing with older adults. Students are provided with the theoretical background necessary to understand health system issues affecting older adults. Students will attain the knowledge necessary to complete a comprehensive assessment of the older adult’s physical, functional, psychosocial, and cognitive capacities. Common problems associated with cardiovascular, respiratory, neurological, musculoskeletal, sensory, and genitourinary systems that affect older adults will be discussed. In addition, principles of continuity of care, rehabilitation, nutritional and pharmacodynamic changes, cultural diversity and ethics will be integrated throughout the course. Clinical experiences in acute care hospitals and simulation experiences provide sufficient opportunities for clinical reasoning, clinical care, and knowledge integration. Special emphasis is placed on transitional care for older adults across the health care continuum.
Taught by: Matura
One-term course offered either term
Prerequisite: NURS 215
Corequisite: NURS 245
Activity: Lecture
1.5 Course Unit
Notes: Clinical 12 hours weekly and 2 hours Simulated Laboratory Weekly

NURS 299 Independent Study in Nursing
An opportunity to develop and implement an individual plan of study under faculty guidance.
One-term course offered either term
Prerequisites: Permission of instructor and NURS 106
Activity: Independent Study
1 Course Unit

NURS 303 Contemporary Issues in Human Sexuality and Health
Course content emphasizes theories of sexual development and factors influencing sexual behavior within the continuum of health and illness. Common sexual practices of people are studied within the context of lifestyle and situational life crises. Concepts of normal sexual function and dysfunction are examined. Contemporary sexual issues are explored.
Taught by: Stevens
Course usually offered in spring term
Also Offered As: NURS 503
Activity: Lecture
1 Course Unit

NURS 304 Contemporary Issues in Global Women’s Health
This undergraduate elective course will provide an introduction to contemporary issues in global women’s health and multiple theoretical perspectives related to global women’s health. This course will examine and analyze various women’s health issues across the globe within historical, social, cultural, economic, political and environmental contexts. This course will have particular emphasis on intensive analyses of gender equity and cultural sensitivity issues in providing appropriate and adequate care for women across the globe.
Taught by: Im
Course usually offered in spring term
Prerequisite: Nursing Students must have completed NURS 215
Activity: Lecture
1 Course Unit
Notes: Freshmen and Sophomores need Instructor Permission

NURS 305 Narrative Matters in Health and Illness Experiences
This course emphasizes the uses of narrative and memoir to consider major themes and events related to the experience of health and illness in the United States as well as the carative role, as either family member or health professional and crafting policy.
Taught by: Connolly, C
Activity: Seminar
1 Course Unit
Notes: Foundational Course for History, Health, and Humanities Minor

NURS 306 Opioids: From Receptors to Epidemics
Taught by: Compton; Schmidt
Prerequisites: Biology 101 or Biology 121 or with permission of instructors. For BSNs: N165 Integrated Pathophysiology, Pharmacology and Therapeutics
Activity: Lecture
1 Course Unit
Notes: This survey course reviews the neuropharmacology of opioids including central and peripheral sites of opioid actions. Opioid receptor pharmacology as well as cellular and molecular neuroadaptations to opioids are discussed in relation to addiction, physical dependence, tolerance, hyperalgesia and withdrawal. Genetic and pharmacogenic effects on variation of opioid response are also presented. Opioid addiction and the actions of opioids on pain systems are reviewed with an emphasis on their pre-clinical and clinical expression. The effects of regulatory, pharmaceutical and criminal justice justice forces on opioid prescription in the US are considered vis-à-vis pain management and opioid addiction. Finally, the causes and consequences of the of the current “opioid epidemic” are reviewed, as well as federal, healthcare and community efforts to address it.
NURS 312 Nutritional Aspects of Disease
This course provides an advanced understanding of the role of nutrition in integrated biological systems. Students will develop a rigorous comprehension of major clinical disorders, including the underlying pathophysiology and conditions that are affected by nutrition and how optimization of nutritional variables may modulate these processes. A critical overview of the role of nutrition in disease prevention, management and treatment, and in health maintenance will be emphasized throughout the course.
Taught by: Hayes, M
Course usually offered in spring term
Prerequisite: NURS 112
Activity: Lecture
1 Course Unit

NURS 313 Obesity and Society
This course will examine obesity from scientific, cultural, psychological, and economic perspectives. The complex matrix of factors that contribute to obesity and established treatment options will be explored. This course satisfies the Society & Social Structures Sector for Nursing Class of 2012 and Beyond.
Taught by: Compher
Course usually offered in fall term
Also Offered As: NURS 513
Activity: Lecture
1 Course Unit

NURS 315 Sociocultural Influences on Health
This course is intended for students interested in U.S/Global Healthcare. It includes lectures, discussions, readings, and written assignments focused on various social, cultural, and economic factors that impact the health and illness perceptions and behaviors of various ethnic and minority groups. In particular, it focuses on how culture affects health and disease, and how health and disease affect culture. This course takes a critical approach to knowledge development by scrutinizing values, theories, assumptions, and practices cross culturally. It relies upon a range of interdisciplinary approaches to analyze how disease is diagnosed, treated, and experienced differently in various cultural contexts. At the same time, students will have the opportunity to examine and critique cultural assumptions and theories, the shifting nature of cultures, the situational use of cultural traditions, and the ethnocentrism of contemporary Western health care. Special attention is given to the influence of race, class, gender, religious, and spiritual ideas about health and illness.
Taught by: Wall
Course usually offered in spring term
Also Offered As: NURS 515
Activity: Lecture
1 Course Unit
Notes: Foundational Course for Minor in Multicultural/Global Health Care

NURS 316 International Nutrition: Political Economy of World Hunger
A detailed consideration of the nature, consequences, and causes of hunger and undernutrition internationally. Approaches are explored to bringing about change, and to formulating and implementing policies and programs at international, national, and local levels, designed to alleviate hunger and under-nutrition.
Taught by: Chrzan
Course usually offered in spring term
Also Offered As: NURS 516
Prerequisites: Junior-year or higher; at least one background course in nutrition, anthropology, sociology or economics
Activity: Lecture
1 Course Unit

NURS 318 Race, Gender, Class and the History of American Health Care
This multidisciplinary course surveys the history of American health care through the multiple perspectives of race, gender, and class, and grounds the discussions in contemporary health issues. It emphasizes the links between the past and present, using not only primary documents but materials from disciplines such as literature, art, sociology, and feminist studies that relate both closely and tangentially to the health professions and health care issues. Discussions will surround gender, class-based, ethnic, and racial ideas about the construction of disease, health and illness; the development of health care institutions; the interplay between religion and science; the experiences of patients and providers; and the response to disasters and epidemics. Skills for document analysis and critique are built into the course as is the contextual foundation for understanding the history of health care. This course satisfies both the Society & Social Structures and the Histories & Traditions sectors for the Nursing Class of 2012 and beyond.
Taught by: Fairman
Course usually offered in fall term
Also Offered As: GSWS 318
Activity: Seminar
1 Course Unit
Notes: For Benjamin Franklin Scholars Nursing Honors Students

NURS 319 Etiology and Treatment of Contemporary Chronic Diseases in America: Focus on Obesity and Cancer
This course will focus on two of the major public health problems in the United States—obesity and cancer. These diseases will be considered from a variety of perspectives: epidemiological, environmental, physiological and behavioral. In addition, the course will focus on the range of interventions being developed to treat as well as prevent both diseases.
Taught by: Glanz; Jacobs, L.; Sarwer
Course usually offered in spring term
Also Offered As: NURS 519
Activity: Lecture
1 Course Unit

NURS 324 Children's Health in the United States, 1800-2000
This course explores the impact of historical ideas, events, and actors pertaining to the history of children's health care in the United States. Emphasis is placed on tracing the origins and evolution of issues that have salience for twenty-first century children's health care policy and the delivery of care. This course satisfies the History & Traditions Sector for Nursing Class of 2012 and Beyond.
Taught by: Connolly
Course usually offered in fall term
Also Offered As: GSWS 324
Activity: Seminar
1 Course Unit
Notes: For Benjamin Franklin Scholars Nursing Honors Students
NURS 330 Theoretical Foundations of Health Care Ethics
The theoretical foundations of health care ethics including definitions of ethics, history of bioethics and nursing ethics, and the influence of religion, psychology of moral development and philosophy in the development of ethical theory. Nursing code of ethics, changing ideas in ethics, and discussion of the developing profession of nursing are included.
Taught by: Perlman; Ulrich
One term course offered either term
Activity: Lecture
1 Course Unit

NURS 331 Forensic Mental Health
Forensic mental health is the interface between the law and mental health. This course examines the components of human behavior that bring people into a judicial setting. Content will cover: criminal personalities, forensic interview, and the role of forensic psychiatry. Domestic violence offenders, sex offenders, stalkers, gang members, and offenders who commit homicide will be discussed. Definitions and dynamics of criminal madness and the psychodynamics of violent juvenile offenders will be presented. Use of the internet by offenders will also be discussed. This course also offers a field experience in which student's interview incarcerated individuals. As of Spring 2016, students in the College of Arts and Sciences are not permitted to enroll in this course.
Taught by: Brown, K.; Sabella
Course usually offered in fall term
Also Offered As: NURS 531
Activity: Lecture
1 Course Unit

NURS 332 Forensic Science I
This course discusses the interface of law and science. Forensic science is the application of scientific principles in the legal arena. This course examines the contribution of forensic science to criminal and civil investigation. Crime scene analysis is accomplished via disciplines within forensic science. The role of the medical examiner, the structure and function of crime laboratories, death investigation and the role of health care personnel in forensic cases is discussed. As of Spring 2016, students in the College of Arts and Sciences are not permitted to enroll in this course.
Taught by: Cronin, G.
Course usually offered in spring term
Also Offered As: NURS 534
Activity: Lecture
1 Course Unit

NURS 333 Victimology
This course examines the wide range of victimization experiences from the perspective of the victim, their families and society. Crimes to be studied include workplace violence, corporate crime, robbery, burglary, assault, rape, stalking, domestic violence, homicide, suicide, elderly abuse and child sexual abuse and exploitation. The role of the medical examiner, health care providers and the FBI as they relate to victims of crime will be discussed. Emphasis will be given to exploring the elements of each crime and response patterns to victimizations. Services available to victims of crime will be discussed. As of Spring 2016, students in the College of Arts and Sciences are not permitted to enroll in this course.
Taught by: Cronin G
One term course offered either term
Also Offered As: NURS 533
Activity: Lecture
1 Course Unit

NURS 334 Public Policy and the Nation's Health
This course examines health care and social policy from domestic and international perspectives. It is designed to engage undergraduate students in critical thinking about health policy issues as they affect our health care, employment, taxes, and social investments. The current national debate on health care reform is used as a frame of reference for examining the strengths and weaknesses of health care services in the U.S. from the perspectives of patients/families, health professionals, health services providers, insurers, employers, and public policy makers, and the pros and cons of a range of prescriptions for system improvement from across the political spectrum. About a third of the course focuses more specifically on global public health challenges and the policy strategies for reducing health disparities worldwide. Please note, the online version of this course has a synchronous component (live online class sessions). The day/time will be listed in the course register. Taught by: Sochalski
Course usually offered in spring term
Also Offered As: NURS 540
Activity: Lecture
1 Course Unit

Notes: Cross Currents Course

NURS 335 Global Food Security for Ten Billion
This is an interdisciplinary course on the problems of food demand and consumption, production and supply in our increasingly globalized and urbanizing world. Special attention will be given to the intersections of current technologies of food production, current nutritional problems, environmental change and resource degradation, and the changing quality of human social life under globalization. Where and how will sufficient nutritious food be produced sustainably and how can the politics and economics of equitable distribution in such large urban populations be achieved?
Taught by: Spooner; Compher; Muecke; Chrzan
Course usually offered in spring term
Activity: Lecture
1 Course Unit

Notes: Cross Currents Course

NURS 343 Global Engagement Seminar Environmental Health Issues
Cross Listed with NURS 543 All students must apply through the Penn Global Seminar Webiste for permission to register for this course. Those who are accepted will receive a permit to register for this course.
Also Offered As: NURS 543
Prerequisites: General college-level chemistry and biology knowledge (e.g. CHEM/ BIOL 101, 102) to understand the science underlying environmental health topics or special permission
Activity: Seminar
1 Course Unit

Notes: This course will be a broad overview on current environmental health issues that contribute to significant global morbidity and mortality due to increased urbanization and growth in the economy. The course will cover basic principles of environmental epidemiology, toxicology, health effects of environmental exposures, risk assessment, as well as environmental policy and ethics. The class will have two portions. The first part of the class will be taught lectures, case studies, discussions on campus and a local field trip in the Philadelphia area. The second part of the course will involve a field trip to China during the early summer to help students gain a global perspective on environmental health concerns.
NURS 344 Etiology and Treatment of Contemporary Chronic Diseases in America: Focus on Obesity and Cancer
This course will focus on two of the major public health problems in the United States - obesity and cancer. These diseases will be considered from a variety of perspectives: epidemiological, environmental, physiological and behavioral. In addition, the course will focus on the range of interventions being developed to treat as well as prevent both diseases.
Taught by: Glanz; Sarwer; Jacobs, L.
Course usually offered in spring term
Also Offered As: NURS 544
Activity: Lecture
1 Course Unit

NURS 353 Health Comm Digital Age: Health Communication in the Digital Age
Also Offered As: NURS 565, PUBH 565
Activity: Lecture
1 Course Unit

NURS 354 Case Study - Addressing the Social Determinants of Health: Community Engagement Immersion
Prerequisite: Completion of sophomore year nursing requirements
Activity: Lecture
1 Course Unit
Notes: This case study offers students experiential learning to develop an in depth understanding of social determinants of health in vulnerable, underserved populations and to collaboratively design and refine existing health promotion programs based on the needs of the community site. Grounded on an approach that builds upon the strengths of communities, this course emphasizes the development of techniques to lead effective, collaborative, health-focused interventions for underserved populations. Students are required to draw on skills and knowledge obtained from previous classes related to social determinants of health and community engagement and will engage in specific creative, innovative community based programs developed for populations across the life span. These culturally relevant programs, which have been shown to positively impact communities, create opportunities for students to address the social determinants of health, build engagement and leadership skills and increase program success and sustainability.

NURS 355 Case Study: Self-Care of Chronic Illness
Self-care is done by lay people to prevent or manage chronic illness. In this case study, we will discuss the history, definitions, predictors, and outcomes of self-care in various chronically ill populations. A focus of discussion will be an in depth exploration of the factors that influence self-care. Understanding these factors will prepare nurses for their role in promoting self-care. Fieldwork experiences are designed to provide practical experience in engaging well individuals in preventing illness and helping chronically ill perform self-care.
Taught by: Riegel
Course usually offered in spring term
Prerequisite: NURS 215
Activity: Lecture
1 Course Unit
Notes: 2 hour seminar; 1 hour fieldwork / week

NURS 356 Case Study: Culture of Birth
This course will explore the cultural context of birth and the activities of women and professionals and/or attendants in meeting the health care needs of pregnant women. The history of caring for women at birth, international health care, cultural mores/societal values, place of birth, psychosocial factors, ethical decision-making and the role of technology are content areas that will be discussed.
Taught by: McCool
Course usually offered in spring term
Prerequisites: NURS 215, 225 or Permission of Instructor
Activity: Lecture
1 Course Unit

NURS 358 Case Study: Nurses and the Child Welfare System
Building on knowledge and skill acquired through undergraduate nursing courses, this case study offers nursing majors an in depth and interprofessional opportunity to study research, policy, and practice-based issues in children and families involved with the child welfare system. Special emphasis is placed on the role of the nurse in the child welfare system. Fieldwork experiences will enable students to gain practical experience regarding the needs of children and families with an emphasis on a consideration of how to achieve partnership and create alliances with parents and youngsters.
Taught by: Connolly
Course usually offered in fall term
Prerequisite: NURS 165; NURS 215
Activity: Lecture
1 Course Unit

NURS 359 Case Study: Quality Care Challenges in an Evolving Health Care Market
Quality care is an issue for consumers, providers, purchasers, and policy makers. This case study examines the multiple challenges that surround the quality of health care in the evolving United States health care marketplace. Through classroom discussion and special project experience, the student will become familiar with the concept of health care quality and approaches to the measurement and management of quality. Using Donabedian’s construct of structure, process and outcomes, strategies to improve quality while containing or reducing costs are reviewed, including the contributions of clinical practice guidelines. The evolving dominant structures for providing health care services, managed care and integrated delivery systems, and their approaches to quality management and reporting will be explored.
Taught by: Pinola, Sparrow
Course usually offered in spring term
Prerequisites: NURS 104, 106
Activity: Lecture
1 Course Unit

NURS 360 Case Study: Nursing Practice with HIV+ Patients
This course is directed at the need to increase nursing majors knowledge and clinical expertise in the care of persons with HIV/AIDS. Hands on clinical practice with nurses who are AIDS experts will be combined with seminars that provide epidemiologic, clinical assessment, infection control, symptom management, patient teaching, psychosocial, ethical, cultural, political, and policy information.
Taught by: Vincent
Course usually offered in fall term
Prerequisites: NURS 104, 106
Activity: Lecture
1 Course Unit
NURS 361 Case Study: Breast Feeding & Human Lactation
Human milk is recognized universally as the optimal diet for newborn infants. The health benefits of breastfeeding are so significant that a National Health Objective set forth by the Surgeon General of the United States for the year 2010 is to increase the proportion of mothers who breastfeed their babies in the postpartum period. Through classroom and clinical experiences, this course will provide an in depth examination of the anatomy and physiology of lactation, essential aspects of establishing and maintaining lactation, and the nurses’ role in counseling the breastfeeding family. Emphasis will be placed on current research findings in the content area.
Taught by: Spatz
Course usually offered in fall term
Prerequisites: NURS 104, 106
Activity: Lecture
1 Course Unit

NURS 363 Case Study: Aggressive Behavior in Healthcare: Assessment Prevention and Treatment
The escalating incidence and prevalence of aggression in the health care setting requires that providers acquire a new set of pragmatic competencies for managing its complex sequelae. This course presents theoretical frameworks for understanding, predicting, preventing and responding to aggressive behaviors across the life span. Historical, bio-behavioral, social, and cultural explanations for aggression will be synthesized and analyzed within the context of multiple points of entry into the health care system across clinical settings. Personal self-awareness, debriefing, and stress management techniques exemplify techniques to prevent untoward consequences in providers. This course also uses exemplars and a range of experiential learning strategies, including skill development, situation analysis, concept mapping, unfolding case studies and cooperative learning, to examine the assessment, prevention, treatment, and response to aggressive behavior in patients and management of its consequences in self and others.
Taught by: Coleman
Course usually offered in spring term
Prerequisites: NURS 104, 106
Activity: Lecture
1 Course Unit

NURS 364 Case Study: Cancer
This elective case study offers students the opportunity to learn about the etiology, diagnosis, and management of cancer across the lifespan. Building on existing clinical knowledge and skills, students will explore cancer care from the perspectives of prevention, early detection, treatment, survivorship, and death. Observational clinical experiences and selected case studies will enhance students’ understanding of patients’ and families’ cancer experience.
Taught by: Holli
Course usually offered in spring term
Prerequisites: NURS 104, 106
Activity: Lecture
1 Course Unit

NURS 365 Case Study: Case Analysis in Clinical Nutrition
This course is designed for present and future nurse professionals who wish to increase their knowledge of nutrition and expertise and application of knowledge to achieve optimal health of clients and themselves. Principles of medical nutrition therapy in health care delivery are emphasized in periods of physiologic stress and metabolic alterations. Individual nutrient requirements are considered from pathophysiologic and iatrogenic influences on nutritional status. Nutritional considerations for disease states will be explored through epidemiological, prevalence, incidence, treatment and research data. Understanding application of medical nutrition therapy are included through case analysis and field experiences.
Taught by: Dolan
Course usually offered in spring term
Prerequisite: NURS 065 or 112
Activity: Lecture
1 Course Unit

NURS 367 Case Study: Principles of Palliative Care
This course prepares students to collaborate effectively with an interdisciplinary team in assessing patients and families, and planning and evaluating palliative and end of life care for diverse populations with progressive illness in multiple health care settings. Course content and assignments focus on the nurse’s role in addressing the complex assessment and responses to the psychosocial and spiritual concerns of patients and caregivers across the trajectory of advanced illness.
Taught by: Ersek
Course usually offered in fall term
Also Offered As: NURS 557
Prerequisites: NURS 104, NURS 106
Activity: Lecture
1 Course Unit

NURS 368 Case Study: Home Health Care
This course examines the major aspects of home-based care across patients’ life spans from acute to long term care. New trends, advances, and issues in home management of complex conditions, innovative delivery systems and legal, ethical and policy consideration will be explored.
Taught by: Doyle
Course usually offered in fall term
Also Offered As: NURS 550
Prerequisites: NURS 104, NURS 106
Activity: Lecture
1 Course Unit

NURS 375 Nutrition Throughout The Life Cycle
Understanding and meeting nutritional needs from conception through adulthood will be addressed. Nutrition-related concerns at each stage of the lifecycle, including impact of lifestyle, education, economics and food behavior will be explored.
Taught by: Berman-Levine
Course offered fall; odd-numbered years
Prerequisites: NURS 54, or NURS 112, comparable nutrition course, or approved introductory course
Activity Lecture
1 Course Unit
**NURS 376 Issues in Nutrition, Exercise, and Fitness**
An examination of the scientific basis for the relationship between nutrition, exercise and fitness. The principles of exercise science and their interaction with nutrition are explored in depth. The physiological and biochemical effects of training are examined in relation to sports performance and prevention of the chronic diseases prevalent in developed countries.
Taught by: Compher; Dougherty
Course usually offered in spring term
Activity: Lecture
1 Course Unit

**NURS 377 Weight Management: Principles and Practices of Obesity Treatment**
This course focuses on the principles and theories guiding the clinical care and treatment of people with obesity across the lifespan. We will discuss the effectiveness and evidence-based supporting a variety of obesity treatments: diet, physical activity, behavioral therapy, pharmacological, surgical, and combined approaches. Emphasis will be placed on the practical aspects of providing obesity education and counseling to assist individuals and families in attaining and maintaining a healthy weight.
Course usually offered in spring term
Prerequisite: NURS 065 or NURS 112
Activity: Seminar
1 Course Unit

**NURS 380 Nursing in the Community**
This course considers how nursing influences the health and healing capacities of both communities as a whole (populations) and of groups, families, and individuals living within particular communities locally and globally. It addresses the complexity of nursing practice using a public health paradigm. It requires students to draw from prior class and clinical knowledge and skills and apply this practice base to communities across care settings, ages, and cultures with different experiences of equity and access to care. It provides the tools needed to engage in collaborative community work and to give voice to the community's strengths, needs, and goals. It also moves students from an individual and family focus to a population focus for health assessment and intervention. Students consider the science, policies, and resources that support public health, and community based and community-oriented care. Clinical and simulated experiences in community settings provide sufficient opportunities for clinical reasoning, clinical care and knowledge integration in community settings. Students will have opportunities to care for patients and populations within selected communities.
Course usually offered in fall term
Prerequisite: NURS 225; NURS 235; NURS 245; NURS 255
Activity: Lecture
2 Course Units
Notes: Clinical 16 hours Weekly and 2 hours Simulated Laboratory Weekly
Also Offered Summer Session (12 Weeks)

**NURS 386 Nursing Honors Research Project**
This course is an advanced seminar for research and scholarship to be taken by honors students in nursing. Enrollment is concurrent with implementation of the individual student's honors project. Practical considerations in carrying out such a project, including scholarly approach and scientific integrity as well as scholarly writing and dissemination will be discussed and illustrated, using exemplars and student projects. The various phases of students' projects will be used as launching points for discussions and to complement students’ work with their faculty supervisors. Paths and planning for careers in nursing and related disciplines and the idea of scholarship and research trajectories will be developed throughout the course.
Taught by: Kagan; McCauley, K
Course not offered every year
Prerequisites: NURS 260 or NURS 637, NURS 385H
Activity: Seminar
1 Course Unit
Notes: Enrollment in Nursing Undergraduate Honors Program Required

**NURS 389 Research/Inquiry-Based Service Residency**
This course is designed to facilitate students' intellectual curiosity and independence in exploring the research process relevant to an area of interest. Students expand their research knowledge base provided in NURS 230 and NURS 547 through a structured individualized faculty mentored experience based on specific learning objectives. Students identify a faculty advisor and, in collaboration with the advisor, define learning objectives to guide a plan of study. All research or inquiry residencies are under the guidance of a faculty member in the School of Nursing, but students may also interact with affiliated investigators and clinicians who contribute to and enrich the course. The residency offers students opportunities to experience at any level systematic methods for research, or service-based clinical inquiry or quality improvement. This mentored residency can be fulfilled by one of the following options: * Research-based practicum in basic science, clinical research, nursing history, healthcare policy, ethics, or informatics. * Inquiry-based Service practicum such as conducting quality improvement procedures or program evaluations in an affiliated healthcare institution. * Taking one of the University's Academically Based Community Service (ABCS) courses with prior approval by the Steering Committee. * Individualized study abroad experience with prior approval by the Steering Committee.
Taught by: Curley; Leary, M.
One-term course offered either term
Prerequisite: NURS 547
Activity: Lecture
0.5 Course Units
Notes: 0.5 course units
NURS 390 Leadership in the Complex Healthcare System
This two-part course provides the didactic and clinical experiences in increasingly complex nursing care situations and environments which facilitate the students' transition to independent practice. In the lecture component, the focus is on the integration of knowledge and skill for nursing practice and develops the ability of students to see nursing practice as part of a complex system. It examines systems thinking and complexity, development of a leadership role and skills, inter-professional communication and teamwork, and leading change in healthcare organizations. This course also examines the nurse's role in improvement science and patient care delivery, focusing on quality improvement processes, patient safety, nurse sensitive process and outcome metrics with micro-systems. This course also allows students to develop the capacity for clinical expertise, leadership, and for translating the science of the profession into practice. Students also are assigned to a seminar component that is correlated with their selected site for the specialty clinical practicum. This aspect of the course allows the student to develop additional expertise in a specialty area of practice and to develop competences specific to that population of patients. These seminar components are adult health and illness; adult critical care, obstetrics/ labor & delivery, psychiatric/mental health, and pediatrics. Advanced simulation experiences and extensive clinical practice in an area of the students' choice provide multiple opportunities to synthesize the multidimensional aspects of nursing, and provide the environment which facilitates transition to professional nursing practice. Students select from a variety of settings in which to refine their practice skills. Principles of leadership, accountability and change will be applied to clinical practice as the student begins to operationalize the professional nursing role. Emphasis is placed on the nurse as a knowledgeable provider of health care who is both a change agent and advocate.
One term course offered either term
Prerequisite: NURS 380
Activity: Lecture
3 Course Units
Notes: Clinical 16 hours Weekly and 2 hours Simulated Laboratory Weekly

NURS 400 Advances in Health Systems Research And Analysis
Capstone Course for NURS/WH Joint Degree Students.
Taught by: Sochalski; McHugh, M
Course offered spring; odd-numbered years
Activity: Seminar
1 Course Unit
Notes: by Permission Only

NURS 500 Introduction to Principles and Methods of Epidemiology
This course provides an introduction to epidemiologic methods and overview of the role of epidemiology in studies of disease etiology and in the planning, delivery and evaluation of health services. The population-based approach to the collection and analysis of health data will be emphasized throughout the course. Through textbook reading, problems sets, class discussion and review of the recent literature, students will become acquainted with the basic designs of epidemiologic studies in theory and in practice. Students will develop the basic skills necessary to use epidemiologic knowledge and methods as the basis for scientific public health practice. Please note, the online version of this course has a synchronous component (five online class sessions). The day/time will be listed in the course register.
Taught by: Schmitz
Course usually offered in spring term
Also Offered As: PUBH 502
Prerequisite: Elementary statistics
Activity: Lecture
1 Course Unit

NURS 503 Contemporary Issues in Human Sexuality and Health
Emphasizes the theories of sexual development and sexual behavior within the continuum of health and disease. Common sexual practices of people are studied in relation to life-style and/or situational life crisis. Contemporary issues in sexuality and health will be examined. This course satisfies the Society & Social Structures Sector for Nursing Class of 2012 and Beyond.
Taught by: Guidera; Villari
Course usually offered in spring term
Also Offered As: NURS 303
Activity: Lecture
1 Course Unit
Notes: Junior and Senior undergraduates. Open to all graduate students

NURS 509 The Medically Fragile Child
This course is designed to assist prospective practitioners develop advanced skills in identifying the needs and interventions for medically fragile neonates, children and their families.
Taught by: Beatrick
Course usually offered summer term only
Activity: Lecture
1 Course Unit
Notes: Summer Session II

NURS 511 Loss, Grief and Bereavement
Loss, grief and bereavement are pervasive aspects of the human experience. The content of this course provides a basis both for personal development and professional growth. Through a series of seminars, key issues surrounding loss, death, dying, grief and bereavement will be examined.
Taught by: Sabela
Course usually offered summer term only
Activity: Lecture
1 Course Unit
Notes: Summer Session II

NURS 513 Obesity and Society
This course will examine obesity from scientific, cultural, psychological, and economic perspectives. The complex matrix of factors that contribute to obesity and established treatment options will be explored. This course satisfies the Society & Social Structures Sector for Nursing Class of 2012 and Beyond.
Taught by: Compher
Course usually offered in fall term
Also Offered As: NURS 313
Prerequisite: Undegraduates by permission of instructor
Activity: Lecture
1 Course Unit
NURS 515 Sociocultural Influences on Health
This course is intended for students interested in U.S/Global Healthcare. It includes lectures, discussions, readings, and written assignments focused on various social, cultural, and economic factors that impact the health and illness perceptions and behaviors of various ethnic and minority groups. In particular, it focuses on how culture affects health and disease, and how health and disease affect culture. This course takes a critical approach to knowledge development by scrutinizing values, theories, assumptions, and practices cross culturally. It relies upon a range of interdisciplinary approaches to analyze how disease is diagnosed, treated, and experienced differently in various cultural contexts. At the same time, students will have the opportunity to examine and critique cultural assumptions and theories, the shifting nature of cultures, the situational use of cultural traditions, and the ethnocentrism of contemporary Western health care. Special attention is given to the influence of race, class, gender, religious, and spiritual ideas about health and illness.
Taught by: Wall
Course usually offered in spring term
Also Offered As: NURS 315
Activity: Lecture
1 Course Unit

NURS 516 International Nutrition: Political Economy of World Hunger
A detailed consideration of the nature, consequences, and causes of hunger and undernutrition internationally. Approaches are explored to bringing about change, and to formulating and implementing policies and programs at international, national, and local levels, designed to alleviate hunger and under-nutrition. This course satisfies the Society & Social Structures Sector for Nursing Class of 2012 and Beyond.
Taught by: Chrzan
Course usually offered in spring term
Also Offered As: NURS 316
Activity: Lecture
1 Course Unit
Notes: Graduate Students Only

NURS 517 Advanced Nutrition and Metabolism
Essentials of nutritional biochemistry from the molecular level to the level of the whole human organism. Nutrient functions and inter-relationships are explored with attention to the association between nutrients and disease risk. Topics include energy metabolism and regulation of fat storage, new functions of vitamins and minerals, gene nutrient interactions and current research topics.
Taught by: Compfer
Course usually offered in spring term
Prerequisite: Nurs 54 or Nurs 112 (Students with extensive background in life sciences by permission of faculty)
Activity: Lecture
1 Course Unit

NURS 518 Nursing and the Gendering of Health Care in the United States and Internationally, 1860-2000
This course examines changing ideas about the nature of health and illness; changing forms of health care delivery; changing experiences of women as providers and patients; changing role expectations and realities for nurses; changing midwifery practice; and changing segmentation of the health care labor market by gender, class and race. It takes a gender perspective on all topics considered in the course. A comparative approach is used as national and international literature is considered. This focus is presented as one way of understanding the complex interrelationships among gender, class, and race in health care systems of the United States and countries abroad.
Taught by: Connolly
Course usually offered in spring term
Also Offered As: GSWS 518
Activity: Lecture
1 Course Unit

NURS 519 Etiology and Treatment of Contemporary Chronic Diseases in America: Focus on Obesity and Cancer
This course will focus on two of the major public health problems in the United States—obesity and cancer. These diseases will be considered from a variety of perspectives: epidemiological, environmental, physiological and behavioral. In addition, the course will focus on the range of interventions being developed to treat as well as prevent both diseases.
Taught by: Glanz; Jacobs, L.; Sauer
Course usually offered in fall term
Also Offered As: NURS 319
Activity: Lecture
1 Course Unit

NURS 521 Current Topics in Nutrition
The objective of the course is to integrate the nutrition knowledge obtained from previous course work in nutrition and provide the student the opportunity to explore, analyze and formulate implications of the research and related literature on a self-selected topic under the guidance of the faculty coordinator. Current topics and controversies in nutrition will be discussed weekly. Readings will be assigned in coordination with each discussion topic and students will be required to seek out other sources of information to add to the class discussion. Topics will change from year to year to reflect the most recent interests and issues.
Taught by: Compfer
Course not offered every year
Activity: Seminar
0.5 Course Units

NURS 523 Advanced Nutrition: Molecular Basis of Nutrition
Prerequisite: NURS 065 or 112
Activity: Lecture
1 Course Unit
Notes: Essentials of nutritional biochemistry of macronutrient (protein, carbohydrate, lipid) metabolism from the molecular level to the level of the whole human organism. Linkages between energy and nitrogen balance and states of health and disease are examined. Topics include energy metabolic pathways, nutrient transportation, nutrient catabolism, nutrient anabolism, body composition, and biomarkers.
NURS 524 Advanced Human Nutrition and Micronutrient Metabolism
Prerequisite: NURS 605 or NURS 112 or Special Permission
Activity: Lecture
1 Course Unit
Notes: Essentials of vitamin and mineral digestion, absorption, metabolism, and function in humans during states of health and disease are examined. Linkages between key vitamins and their function in biological systems, such as bone health, energy metabolism, hematopoietic function, and immune function, are explored in depth. Topics include pertinent research methodologies, biomarkers, deficiency and toxicity states, and requirements across the life cycle.

NURS 525 Ethical Aspects of Health and Technology
Interdisciplinary approach to the study of the interface between ethics and law in the provision of health and illness care. This course draws upon the disciplines of philosophy, law, biomedical engineering and nursing in examining such concepts as the use/nonuse of biomedical technology, who and how one decides what shall be done for a given "patient," and the "rights" and responsibilities (accountability) of all persons involved in health/illness care decisions. The interplay of ethical theory, personal value systems, law and technology will be stressed throughout. Lectures, seminars and case studies will be used. This course satisfies the Society & Social Structures Sector for Nursing Class of 2012 and Beyond.
Taught by: Ulrich
Course usually offered in spring term
Activity: Lecture
1 Course Unit

NURS 526 Child and Adolescent Mental Health
This course is designed to prepare advanced practice registered nurses to address mental health concerns of children, adolescents and their families from a bio-psycho-socio-cultural perspective. Prevention, assessment, and treatment of psychiatric disorders affecting children and adolescents in a variety of settings will be presented in the context of mental health, school and primary health care delivery systems. Students will explore both pharmacologic and nonpharmacologic treatment strategies, as well as methods to identify and implement evidence-based practice in child and adolescent populations. Mental health policy, as well as the unique needs of special populations (e.g., youth in the juvenile justice system) will also be discussed.
Taught by: Brawner
Course usually offered in fall term
Prerequisite: Matriculation in a MSN Program or permission of instructors
Activity: Lecture
1 Course Unit
Notes: Priority will be given to Psychiatric Mental Health NP students

NURS 531 Forensic Mental Health
Forensic mental health is the interface between the law and mental health. This course examines the components of human behavior that bring people into a judicial setting. Content will cover: criminal personalities, forensic interview, and the role of forensic psychiatry. Domestic violence offenders, sex offenders, stalkers, gang members, and offenders who commit homicide will be discussed. Definitions and dynamics of criminal motherhood and the psychodynamics of violent juvenile offenders will be presented. Use of the internet by offenders will also be discussed. This course also offers a field experience in which student's interview incarcerated individuals. As of Spring 2016, students in the College of Arts and Sciences are not permitted to enroll in this course.
Taught by: Brown, K.
Course usually offered in fall term
Also Offered As: NURS 331
Activity: Lecture
1 Course Unit

NURS 532 Cognitive Behavior Strategies in Health Care
Cognitive therapy will be studied as it has been adapted to treat a broad spectrum of clinical disorders including depression, anxiety, phobias, substance, obesity, marital problems, sexual dysfunction, and psychosomatic disorders. Students will have an opportunity to study and observe the crucial link between thoughts and emotions and the sense of competency patients can develop through self-help techniques. The course utilizes didactic, experiential and observational techniques.
Taught by: Kuehlwein
Course usually offered in spring term
Activity: Lecture
1 Course Unit

NURS 533 Victimology
This course examines the wide range of victimization experiences from the perspective of the victim, their families and society. Crimes to be studied include workplace violence, corporate crime, robbery, burglary, assault, rape, stalking, domestic violence, homicide, suicide, elderly abuse and child sexual abuse and exploitation. The role of the medical examiner, health care providers and the FBI as they relate to victims of crime will be discussed. Emphasis will be given to exploring the elements of each crime and response patterns to victimizations. Services available to victims of crime will be discussed. As of Spring 2016, students in the College of Arts and Sciences are not permitted to enroll in this course.
Taught by: Cronin, G.
One term course offered either term
Also Offered As: NURS 333
Activity: Lecture
1 Course Unit
Notes: Offered Fall, Spring Summer I
NURS 534 Forensic Science I
This course discusses the interface of law and science. Forensic science is the application of scientific principles in the legal arena. This course examines the contribution of forensic science to criminal and civil investigation. Crime scene analysis is accomplished via disciplines within forensic science. The role of the medical examiner, the structure and function of crime laboratories, death investigation and the role of health care personnel in forensic cases is discussed. As of Spring 2016, students in the College of Arts and Sciences are not permitted to enroll in this course.
Taught by: Cronin, G.
Course usually offered in spring term
Also Offered As: NURS 332
Activity: Lecture
1 Course Unit

NURS 535 Comparing Health Care Systems in an Intercultural Context: Study Abroad
This course offers students an opportunity to: 1) expand their knowledge base in health care systems; 2) develop intercultural competency skills and 3) shape a conceptual framework for improving the quality of health care for the individual, the family, the community and society at large. Emphasizes the relational, contextual nature of health care and the inseparability of the notions of the health of individuals and the health of family, society, and culture. Includes field experience.
Taught by: Kagan; Stringer; Muecke
Course usually offered in spring term
Prerequisite: Permission of instructor
Activity: Lecture
1 Course Unit
Notes: Seminar held in Spring, study abroad field experience held intra-session

NURS 540 Current Issues in Health and Social Policy
Analysis of key contemporary issues in health and social policy that will provide students with a deeper understanding of the design and structure of the U.S. health care system, the policy initiatives that have shaped it, and the roles of the government, the private sector, and consumers and advocacy groups in setting the policy agenda. Seminars will examine the origins of each issue, the policies enacted and their effects, both intended and unintended, and will propose and debate the merits of alternative policy solutions. The role of health services and policy research in informing the policy debate and directions will be highlighted. Please note, the online version of this course has a synchronous component (live online class sessions). The day/time will be listed in the course register. This course satisfies the Society & Social Structures Sector for Nursing Class of 2012 and Beyond.
Taught by: Sochalski; McHugh, M
Course usually offered summer term only
Also Offered As: NURS 334
Activity: Lecture
1 Course Unit

NURS 543 Global Engagement Seminar: Environmental Health Issues
Cross Listed with NURS 343
Also Offered As: NURS 343
Prerequisites: General college-level chemistry and biology knowledge (e.g. CHEM/BIOL 101, 102) to understand the science underlying environmental health topics or special permission
Activity: Seminar
1 Course Unit
Notes: This course will be a broad overview on current environmental health issues that contribute to significant global morbidity and mortality due to increased urbanization and growth in the economy. The course will cover basic principles of environmental epidemiology, toxicology, health effects of environmental exposures, risk assessment, as well as environmental policy and ethics. The class will have two portions. The first part of the class will be taught lectures, case studies, discussions on campus and a local field trip in the Philadelphia area. The second part of the course will involve a field trip to China during the early summer to help students gain a global perspective on environmental health concerns.

NURS 544 Etiology and Treatment of Contemporary Chronic Diseases in America: Focus on Obesity and Cancer
This course will focus on two of the major public health problems in the United States - obesity and cancer. These diseases will be considered from a variety of perspectives: epidemiological, environmental, physiological and behavioral. In addition, the course will focus on the range of interventions being developed to treat as well as prevent both diseases.
Taught by: Glanz; Sarwer; Jacobs, L
Course usually offered in spring term
Also Offered As: NURS 344
Activity: Lecture
1 Course Unit

NURS 545 Maternal and Infant Care in the Americas
This clinical elective will provide an intensive historical, sociopolitical, and cultural perspective of health and health care delivery in the Americas with a special emphasis on Latin America and the Caribbean. Classroom, direct clinical care and field experiences are designed to provide students with a broad view of the history and culture system of the country of focus. The delivery of health care to women and children will be explored from a sociopolitical, cultural and historical context. Service learning experiences are an integral component of this course. The course includes 5 seminars on campus and 10-14 days on site in the country of focus. The country of focus may vary each semester.
Taught by: Guidera; Durain
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Registration By Permission of Instructor
NURS 547 Scientific Inquiry for Evidence-based Practice
This course is designed to advance students' understanding of the research process, methods of scientific inquiry, and analytical techniques. Students acquire knowledge of systematic approaches used by scientists to design and conduct studies. Course content prepares students to appraise quantitative and qualitative research, and evaluate the scientific merit and clinical significance of research for translation into practice. Evidence-based guidelines are examined and rated for strength of evidence and expert consensus using evidence grading systems and defined criteria. Students engage in variety of creative learning experiences to facilitate appreciative inquiry, clinical reasoning, and evidence-based practice. Quality improvement, comparative effectiveness analyses, information science, and electronic health systems technology demonstrate the capacity for measurement and surveillance of nursing-sensitive and other outcomes used to evaluate quality nursing care and test interventions. Ethical, legal and health policy implications for research are explored. This course serves as the basis for scientific inquiry about human experiences to address important problems that require solutions and to expand the research and the evidence base for professional nursing practice.
Taught by: Spatz; Kutney-Lee; Polomano
One-term course offered either term
Prerequisite: NURS 230
Activity: Lecture
1 Course Unit

NURS 548 Negotiations in Healthcare
This course examines the process that leads to change in health care settings and situations. Students will develop skills that lead to effective negotiations in interpersonal and organizational settings. Included in the discussion are: concepts of organizational structure and power, negotiating in difficult situations, and the role of the health care professional in negotiation and change. The course also examines techniques leading to successful implementation of negotiated change in the practice setting. This course satisfies the Society & Social Structures Sector for Nursing Class of 2012 and Beyond.
Taught by: Burke, K.;
Course usually offered in fall term
Prerequisite: Undergraduates must have permission of instructor
Activity: Lecture
1 Course Unit

NURS 550 Home Health Care Concepts: Mgmt. & Delivery of Community-Based Care
This course examines the major aspects of home-based care across patients' life spans from acute to long term care. New trends, advances, and issues in home management of complex conditions, innovative delivery systems and legal, ethical and policy consideration will be explored.
Taught by: Doyle
Course usually offered in fall term
Also Offered As: NURS 368
Activity: Lecture
1 Course Unit

NURS 551 Applied Health Informatics
Catalogue Description: This course is designed to address issues related to the impact of information technology on health care practitioners and consumers of all ages. Students will learn about and gain experience with practical applications of information technology (Access, handheld devices, telehealth, Internet resources) that improve the quality of health care communication and delivery and facilitate health care research. Class projects include working with clinical databases and evidence based information sources.
Taught by: Bowles
Course offered fall; even-numbered years
Prerequisites: Experience in using the Internet to retrieve information.
Basic knowledge of Microsof Access is expected.
Activity: Lecture
1 Course Unit

NURS 552 Health Care and Social Policy
This course is an area study or survey of social policy issues in contemporary health care. Topics include social contexts of health care and health policy; the organization and financing of health services; the health professions; health and illness over the life cycle; achieving equitable access to health services; the interface between health and social services. Health problems of national significance will be addressed including infant mortality, teenage pregnancy, AIDS, the chronically mentally ill and homeless, health impaired elderly.
Taught by: Aiken
Course usually offered in fall term
Activity: Lecture
0.5 Course Units

NURS 553 Innovation & Applied Technology in Health Care II
Course usually offered in spring term
Activity: Lecture
0.5 Course Units

NURS 555 Women and Incarceration
This elective course will afford students the opportunity to develop and implement health education workshops for incarcerated women in the Philadelphia jail system. Students will explore the social and historical framework and trends in the incarceration of women, as well as the needs of this population, and will identify specific areas that need to be addressed by particular disciplines or professions. Students will have direct contact with the jail system, its staff, and female inmates.
Taught by: Brown, K.
Course usually offered in fall term
Also Offered As: GSWS 555
Activity: Lecture
1 Course Unit

NURS 556 Men and Incarceration
Students in this course will develop and implement health and wellbeing education programming for incarcerated men in the Philadelphia Department of Prisons. Evidence suggests improved self-regulation may enhance other therapeutic methodologies consequently reducing the frequency of reoffending. Students will explore the social and legal trends driving the incarceration of urban men and the resulting health and wellbeing needs of this population. Students will have direct contact with the jail system, its staff, and male inmates.
Taught by: Cronin
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Enrollment by Permission of Instructor
NURS 557 Principles of Palliative Care
This course examines national and global perspectives and clinical issues in the delivery of palliative care with diverse populations in multiple health care settings. Students focus on the care of persons with life-threatening, progressive illness, emphasizing respect for patients' and families' beliefs, values, and choices. Students also explore psychosocial and spiritual dimensions of palliative care. Historical, sociocultural, economic, legal, and ethical trends in palliative care are discussed. Factors affecting health care systems and societal attitudes are considered in evaluating the delivery of care during advanced illness and at the end of life. Students engage in the critical analysis of literature, research, and observational experiences concerning biopsychosocial needs of patients and families. Students acquire competencies in patient/family assessment, communication, decision-making, and interdisciplinary collaboration in palliative care. This course satisfies the Society & Social Structures Sector for Nursing Class of 2012 and Beyond. Taught by: Ersek
Course usually offered in fall term
Also Offered As: NURS 367
Prerequisite: Undergraduate Students Need Permission
Activity: Lecture
1 Course Unit
Notes: for Graduate Students and Junior and Senior Undergraduate Nursing Students (with Course Faculty Permission)

NURS 565 Health Comm Digital Age: Health Communication in the Digital Age
Also Offered As: NURS 353, PUBH 565
Activity: Lecture
1 Course Unit

NURS 567 An Evidence-based Approach to Managing Symptoms in Advanced Illness
This course uses an evidence-based approach towards systematic assessment and management of common symptoms and symptom clusters accompanying progressive, life-limiting illnesses within a framework of nationally recognized standards and guidelines for palliative and end-of-life care. Students are prepared to apply principles of palliative management to diverse patient populations across clinical settings including acute, primary, long-term, and community care. Refer to course syllabus or email course faculty for respective requirements. Taught by: Meghan; Ersek
Course usually offered in spring term
Prerequisites: Junior and Senior undergraduate students may be admitted with course faculty permission
Activity: Lecture
1 Course Unit

NURS 570 Introduction to Public Health
This course will provide a foundational overview of the field of public health and grounding in the public health paradigm. Content will include the history of public health, an introduction to the basic public health sciences including behavioral and social sciences, biostatistics, epidemiology, environmental public health, policy and management and prevention of chronic and infectious diseases and injuries, future directions for public health and an introduction to issues in international health, ethics, context analysis (specifically the notion of urban health), health promotion and disease prevention paradigms. Taught by: Buttenheim; Nguyen
Course usually offered in fall term
Also Offered As: PUBH 500
Prerequisite: Undegrad Need Permission
Activity: Lecture
1 Course Unit

NURS 573 Innovation in Health: Foundations of Design Thinking
Innovation, defined as a hypothesis-driven, testable, and disciplined strategy, is important to improve health & healthcare. Employing new ways of thinking, such as with design thinking, will help open up possibilities of ways to improve health & the process of healthcare. Incorporating current & emerging social & digital technologies such as mobile apps, wearables, remote sensing, and 3D printing, affords new opportunities for innovation. This course provides foundational content & a disciplined approach to innovation as it applies to health & healthcare. A flipped classroom approach with the in-class component focusing on group learning through design thinking activities. The course is open to undergraduate nursing students as a case study & upper-level undergraduates and graduate students from across the Penn campus. The course provides a theoretical foundation in design thinking & may provide an overview of innovation technology & digital strategies as well as social & process change strategies. To enhance the didactic component, students will actively participate in a design case study. Students will be matched by interest and skill level with teams & will work with community-based organizations, healthcare providers and/or innovation partners. Student teams will meet their partners to identify & refine a health or healthcare problem to tackle. Students will work throughout the semester to create an innovative solution that will be pitched to their community-based organization, healthcare provider, and/or innovation partner at the end of the semester. Taught by: Leary
Course usually offered in fall term
Also Offered As: NURS 357
Prerequisites: Completed freshman & sophomore level courses or graduate student status.
Activity: Lecture
1 Course Unit
NURS 575 Health, Sustain & Design: Health, Sustainability & Built Environment Design
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: This foundational course is for students in nursing, public health, medicine, environmental policy, planning and design to be prepared for increasingly prevalent intersectoral professional work. Students will learn the social determinants of health through the design of place, including housing, schools, healthcare and the workplace. They will learn about design and planning theory that intersects with diseases, sustainability and climate action’s action’s impact on health. Through case studies seminars and tours, students will be prepared to articulate the essential role of design and development processes to increase health professionals’ effectiveness. Rather than just combating diseases, health promotion through placemaking can be essential for healthy communities..

NURS 577 Advanced Practice Issues for Palliative Care Nurses
This course provides an in-depth examination of 1) key practice, policy, and ethical issues affecting the delivery of palliative care and 2) the responsibilities of advanced practice nurses (APRN) providing care to patients with progressive, life-limiting illness and their families. Learning experiences will focus on conducting patient/family conferences; examining selected ethical issues in palliative care; analyzing organizational, economic and health policy issues that affect the delivery of hospice and palliative care; exploring current and emerging models of palliative care delivery; and creating approaches to enhancing continuity of palliative care across settings. Students will choose assignments to meet their professional goals.
Taught by: Ersek; Meghan; Polomano
Course usually offered summer term only
Prerequisite: NURS 557
Activity: Lecture
1 Course Unit
Notes: Undergraduates with permission of the instructor

NURS 580 Pharmacology of Anesthesia and Accessory Drugs I
This course explores the various routes of anesthetic administration addressing the potential benefits and risk of each. Special emphasis is placed on specific anesthetic agents and their appropriate use. The responses and common complications associated with these agents are discussed.
Taught by: Magro; Lynn
Course usually offered in fall term
Prerequisite: NURS 617
Activity: Lecture
1 Course Unit

NURS 587 Advanced Leadership Skills in Community Health
Grounded in a social justice perspective, this course aims to provide the student with a foundational overview of the field of community health and leadership skills in public health advocacy. The course encourages critical thinking about health outcomes framed by the broad context of the political and social environment. This course analyzes the range of roles and functions carried out by leaders in healthcare advocacy for marginalized communities; integrates knowledge of health policy and the key influence of government and financing on health outcomes; explores community-based participatory research and interventions as tools for change; and discuss ways to develop respectful partnerships with community organizations. An assets-based approach that draws upon the strengths of communities and their leaders provides a foundation for community engagement skill building. The course emphasizes the development of skills and techniques to lead effective, collaborative, health-focused interventions for disenfranchised groups, including residents of urban neighborhoods.
Taught by: Margo; Klusaritz; Lipman
Course usually offered in spring term
Also Offered As: PUBH 588
Prerequisite: Enrollment in a Masters or Doctoral program
Activity: Lecture
1 Course Unit
Notes: Undergraduates with permission of the instructor

NURS 588 The Politics of Women’s Health Care
This course will utilize a multidisciplinary approach to address the field of women’s health care. The constructs of women’s health care will be examined from a clinical, as well as sociological, anthropological and political point of view. Topics will reflect the historical movement of women’s health care from an an obstetrical/gynecological view to one that encompasses the entire life span and life needs of women. The emphasis of the course will be to undertake a critical exploration of the diversity diversity of women’s health care needs and the past and current approaches to this care. Issues will be addressed from both a national and global perspective, with a particular focus on the relationship between women’s equality/status and state of health. This course satisfies the Society & Social Structures Sector for Nursing Class of 2012 and Beyond.
Taught by: McCool; Durain; Lewis, L.
Course usually offered in spring term
Also Offered As: GSWS 588
Activity: Lecture
1 Course Unit

NURS 600 Principles and Practice of Transformative Nursing Education
This course is designed to provide expert nurses with a theoretical foundation to promote excellence in teaching in both faculty and professional development roles. Principles of adult learning theory, learning styles and preferences are explored with a focus on impact for educational design. Students will review various learning domains and approaches for curriculum development including writing measurable learning objectives. Content also includes an examination of numerous didactic teaching strategies, general tactics for the use of simulation, approaches for inter-professional collaboration, and methods for evaluating learner competence.
Taught by: Keim; Wildenberg
Course usually offered in fall term
Prerequisites: Baccalaureate in Nursing plus a Master’s Degree in Nursing or in a Health Related Area. Current Master or Doctoral Students with permission of the Program Director and the Course Director.
Activity: Lecture
1 Course Unit
NURS 601 Teaching Nursing in an Academic Environment
This course provides students with the fundamental knowledge and skills in preparation for teaching in a faculty role in an academic environment. Specific focus will be placed on program design, development of teaching skills in the didactic, simulation, clinical, and online learning environments, management of didactic and clinical course offerings including effective use of learning management systems, and methods for evaluation of student performance including various test constructions and paper grading rubrics. This course also reviews approaches and resources for working with students who have learning challenges or performance issues.
Taught by: Keim; Wildenberg
Course usually offered in spring term
Prerequisite: NURS 600
Activity: Lecture
1 Course Unit

NURS 604 Chronic Illness in the Community: Lifespan Approach
This course focuses on theory and research from the behavioral and nursing sciences on the psychological and social consequences of ongoing illness. In addition, the health policy issues engendered by these problems will be addressed.
Taught by: Shaughnessy, Buzby, Murphy
Course usually offered in spring term
Prerequisite: Primary Care Majors or instructor permission
Activity: Lecture
1 Course Unit

NURS 605 Biochemical and Physiological Aspects of Metabolism and Human Disease
Selected aspects of genetics, biochemistry, physiology and pharmacology are presented and applied to nursing care. Embryonic, histologic, and gross anatomical features of certain organ systems are functionally related to biochemical and physiological mechanisms essential for the maintenance of a stable internal environment. Special emphasis is placed upon integrating functions of the nervous and endocrine systems. Certain deviations from normal metabolism, structure and function are detailed.
Taught by: Lafferty; Malseed, Z.; Tkacs
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Summer I

NURS 607 Advanced Physiology and Pathophysiology
This course will integrate advanced physiology with pathophysiology and clinical implications across the lifespan for advanced nursing practice. Organ systems function and dysfunction from the level of the cell through integrated organ levels will be presented, and the genetic basis of disease will be discussed. Recent scientific advances will be discussed with application to new approaches to disease and symptom management. The interrelationships between basic physiology, clinical pathophysiology, and genetics are emphasized through lecture and case studies.
Taught by: Libonati
Course usually offered in fall term
Prerequisites: Completion of undergraduate courses that include Biochemistry, Nutrition, Anatomy and Physiology or permission of the instructor.
Activity: Lecture
1 Course Unit

NURS 608 Advanced Pharmacology and Therapeutics for Nursing Practice
Advanced principles of clinical pharmacology and therapeutics are applied to the nursing care of individuals across the life-stage spectrum. It focuses on the content and knowledge employed by the advanced practice registered nurse in the management of various conditions and disease states. The course builds on the pharmacology knowledge base acquired in the baccalaureate nursing program. The advanced pharmacology and therapeutics of several common diseases or conditions found in the acute care and primary care setting is presented. This is supplemented with pharmacotherapy modules to meet program specific needs.
Taught by: Boulaatta; Carey, Manning
One term course offered either term
Prerequisite: NURS 607 or NURS 685
Activity: Lecture
1 Course Unit

NURS 609 Advanced Pathophysiology
Integrates basic physiology and clinical pathophysiology for graduate nursing students. Whenever possible basic physiologic concepts will be used to illustrate specific pathophysiological problems. The interrelationships between clinical pathophysiology and basic physiology are emphasized.
Taught by: Tkacs; Staff
Course usually offered in spring term
Prerequisites: NURS 605, or 684, or 695
Activity: Lecture
1 Course Unit
Notes: Summer Session II

NURS 610 Concepts in Healthcare Economics
This course examines health care from an economic perspective tailored for the nurse manager and executive. Emphasis is on the allocation of health care resource policies in the United States with examination of different health care programs. Within the health care industry, focus is on public and private health care funding in addition to the role of managed care systems with relation to financing and delivery of health services. This course satisfies the Society & Social Structures Sector for Nursing Class of 2012 and Beyond.
Taught by: Piper, A
Course usually offered in spring term
Activity: Lecture
0.5 Course Units

NURS 611 Advanced Principles of Nurse Anesthesia Practice: Problem-Based Learning
Course usually offered in fall term
Prerequisite: NURS 609; NURS 858
Activity: Lecture
1 Course Unit
NURS 612 Principles and Practice of Healthcare Quality Improvement
Healthcare delivery is complex and constantly changing. A primary
mission of leading healthcare organizations is to advance the quality
of patient care by striving to deliver care that is safe, effective, efficient,
timely, cost-effective, and patient-centered (Institute of Medicine).
The goal of this interprofessional course is to provide students with a
broad overview of the principles and tools of quality improvement and
patient safety in healthcare as well address the knowledge, skills and
attitudes as defined by the Quality and Safety Education for Nurses
(QSEN) guidelines. It will provide a foundation for students or practicing
clinicians who are interested in quality improvement and patient safety
research, administration, or clinical applications. Content will address
the history of the quality improvement process in healthcare, quality
databases and improvement process tools and programs. Through the
use of case studies and exercises students will be become familiar
with the use of several quality improvement programs and tools. For
example, the Plan-Do-Study- Act (PDSA) cycle, Six Sigma and the
Toyota Production System known as Lean Production processes will be
addressed. Students can use this course to identify the tools and design
the methods that they plan to employ in a quality improvement or patient
safety project in their area of interest.
Taught by: Myers, J.; Burke, K.
Course usually offered in fall term
Also Offered As: HPR 504
Activity: Lecture
1 Course Unit

NURS 613 Behavioral Economics and Health
An introduction to the application of behavioral economics to health
& health care. Behavioral economics, a field at the intersection of
psychology & economics, help us understand how bounded rationality,
common cognitive biases, and inconsistent time preferences lead us
to act against our best interest (& sometimes against the interests of
the patients, family members, or communities that we care for). The
course provides a pragmatic, hands-on orientation to using behavioral
economics in the diagnosis of behavioral bottlenecks & the design &
testing of behaviorally-informed interventions.
Taught by: Butterheim
Course usually offered in fall term
Also Offered As: PUBH 608
Activity: Lecture
1 Course Unit

NURS 621 Principles of Nurse Anesthesia Practice V
This course provides a systems approach to examining specialty surgical
procedures and the anesthesia requirements for each. Analysis of the
pre-anesthesia assessment, the intraoperative monitoring and the post-
anesthesia care required for patients undergoing the surgical procedure
will be presented. Population specific considerations will be emphasized.
Taught by: Magro, Lynn
Course usually offered in spring term
Prerequisite: NURS 620
Activity: Lecture
1 Course Unit

NURS 625 Clinical Modalities Across the Life Cycle in Advanced Practice
Psychiatric Mental Health Nursing
Crisis intervention, brief psychotherapy, group processes and practices,
milieu therapy, and interventions with families are examined as they relate
to nursing practice in mental health.
Taught by: Coleman, C.
Course usually offered summer term only
Activity: Lecture
1 Course Unit

NURS 626 Family and Organizational Systems Across the Life Span
This course presents Bowen Family Systems Theory as it applies to
families over the life and organizations over time. This is a theoretical
course whose purpose is to provide the student with a broad, systemic
perspective on human functioning. The course begins with a detailed
presentation of Systems Theory, from both a family and organizational
perspective. As presented there is a continual compare and contrast
to other dominant theories of human functioning. It then applies the
concepts of Systems Theory to the understanding and assessment of
the stages of the normal family life cycle from a multi-generational,
multi-cultural perspective. This is followed by discussions of the theory's
application to the emotional problems of children, adolescents, adults
and their families. Likewise, application to organizational behavior
is made, including health care organizations. Relevant research is
discussed throughout.
Taught by: Pollack, F.
Course usually offered summer term only
Activity: Lecture
1 Course Unit

Notes: Summer Session I

NURS 628 Mental Health and Aging
An examination of the psycho-socio-cultural processes which influence
the behavior patterns, coping, and adaptation of older adults. The course
emphasizes strategies to promote mental health as well as assessment,
presentation, and intervention in the major acute and chronic psychiatric
disorders affecting the older adult.
Taught by: Cacchione; Evans
Course usually offered in spring term
Activity: Lecture
1 Course Unit

NURS 629 Basic Principles of Nurse Anesthesia Practice
Course usually offered in fall term
Activity: Lecture
1 Course Unit
NURS 637 Introduction to Research Methods and Design

The relationships among nursing theory, research, and practice will be examined. An emphasis will be placed on research competencies for advanced practice nurses (APNs), including understanding research methods and strategies in order to evaluate research results for applicability to practice and to design projects for evaluating outcomes of practice. An understanding of statistical techniques will be integrated into the course and build on the required undergraduate statistics course. Published nursing research studies will be evaluated for scientific merit and clinical feasibility, with a focus on evidence-based practice. Please note, the online version of this course has a synchronous component (live online class sessions). The day/time will be listed in the course register. Taught by: Polomano; Hatfield; Matura

One term course offered either term
Prerequisites: Undergraduate Statistics Class. Must hold an RN license.

Activity: Lecture
1 Course Unit

Notes: Also offered in 6 week Summer Session I

NURS 640 Global Health and Health Policy

This participatory interdisciplinary seminar course examines contemporary issues in public health policy and global health. The organizing framework is social determinants of health. We consider evidence that inequalities in education, income, and occupation influence health status, and the policy dilemma that broad interventions to improve population health may increase health disparities. We critically examine whether prevention is always better than cure, and what modern medicine has to offer in terms of health. We explore the public policy process in health using the “tobacco wars” as a case example, of how politics, policy, law, commercial interests, and research intersect to affect the public’s health. We examine whether global health is in a state of decline, and the extent to which failures in public health, public policy, and foreign policy have contributed to increasing threats to world health. Likewise, we will examine the potential for greater integration of health into foreign policy to create global infrastructure upon which to advance health. We will examine the global health workforce and the impact of widespread global migration of health professionals on receiving and sending countries. There are no prerequisites. The course is designed for graduate students in the social and behavioral sciences, health professions, public health, business and law. Advanced undergraduate students will be admitted with permission.

Taught by: Aiken; Voet; McLaughlin
Course not offered every year
Also Offered As: PUBH 551, SWRK 793

Activity: Lecture
1 Course Unit

NURS 641 Autism Spectrum Disorder: Prevalence, Etiology, Screening and Assessment

Through classroom and clinical experiences, this course provides an overview of the public health problem of autism spectrum disorder (ASD). Content addresses the natural history, etiology, rising prevalence, risk factors, and core features. Changes in prevalence statistics and possible causes are outlined. These subjects are described in general terms for an overall picture of the disorder. Taking a developmental approach, students begin case management and follow a family through screening, diagnosis and treatment planning. Key information is elaborated through case studies. The course highlights the important and evolving role of nurses in the care of people with ASD. Content is supported by the scientific literature. Students’ clinical experiences start the identification of and collaborative work with a family that has a young child with ASD. The student follows that family and the child through diagnosis, treatments and long term planning. This course approach allows the student to work with the same family over the entire post-masters program to learn the value of interdisciplinary, contiguous care.

Taught by: Pinto-Martin; Souders
Course usually offered in fall term
Prerequisites: Post-BSN students only.

Activity: Lecture
1 Course Unit

Notes: Junior and senior undergraduate students may be admitted with course faculty permission.

NURS 642 Health and Behavioral Care Planning and Intervention for Autism Spectrum Disorder

Through classroom and clinical experiences, this course focuses on the application of various treatment approaches to the management of acute and chronic problems of autism spectrum disorder. Approaches to behavioral, psychological and medical co-morbidities are explored, practiced and evaluated. Students’ clinical experiences build on the previous semester and continue with the application of class instruction to patient and family care. The student works closely with behaviorists, psychologists and occupational therapists to integrate nursing care planning with other services. This course approach continues, and exposure to a second family is added to expand learning opportunities and develop nursing services.

Taught by: Pinto-Martin; Souders
Course usually offered in spring term
Prerequisite: NURS 641

Activity: Lecture
1 Course Unit
NURS 643 Leadership, Advocacy, and the Practice of Integrated Nursing Care of ASD
Emphasis is on the synthesis of course content practice. Through classroom and clinical experiences, students critically examine the role of nursing in the lifelong care of people with ASD, and identify ways to expand the scope of nursing care for this vulnerable population. Students explore the availability of services in the community and discuss approaches to patient advocacy. Students have opportunities to select an area of specialization to develop specific practice expertise. Such areas are Diagnosis and Referral Practices (e.g., ADOS Training), Behavioral Therapy Training (e.g., Applied Behavioral Analysis), and clinical research. Practical issues of collaboration and reimbursement for services are explored. Students’ clinical experiences are designed to facilitate scholarship, independence and advanced specialization in a chosen component of ASD care, for example, behavioral analysis, screening and/or diagnosis, or an agenda for research. Students identify and implement an independent project.
Taught by: Pinto-Martin; Souders
Course usually offered summer term only
Prerequisite: NURS 642
Activity: Lecture
1 Course Unit
Notes: Spring and/or Summer Offering

NURS 644 Health Care in an Aging Society
Individual and societal influences on the care of older adults are examined in detail within the context of an emerging health care system. Normal changes in physical and psychological health are explored in depth. Significant issues affecting care of older adults and their families at the global and national level are discussed.
Taught by: Bradway
Course usually offered in spring term
Activity: Lecture
1 Course Unit

NURS 646 Primary Care: Diagnosis and Management of Adults Across the Lifespan
This course focuses on development of critical thinking skills to address health care problems of adults across the lifespan, with an emphasis on middle-aged and older adults, develop differential problem solving skills and determine appropriate management interventions. The management of common acute and chronic health conditions will include evidence based primary preventions, drug and treatment therapeutics, and referral to other health care providers. Students have the opportunity to build on previously acquired skills and to apply concepts of primary care to manage the health problems of adults across the lifespan.
Taught by: Bradway; Cotter
Course usually offered in fall term
Prerequisite: NURS 657
Activity: Lecture
1 Course Unit

NURS 647 Primary Care Clinical Practicum: Diagnosis and Management of Adults across the Lifespan
Management and evaluation of primary care problems of middle-aged and older adults in a variety of ambulatory and occupational settings. Opportunity to implement the role of the nurse practitioner with middle-aged and older adults and their families in the community. Interdisciplinary experiences will be pursued & collaborative practice emphasized. Students are expected to assess and begin to manage common chronic health problems in consultation with the appropriate provider of care. The initiation of health promotion & health maintenance activities with individuals and groups is stressed. Includes 16 hours a week of clinical experience with a preceptor.
Taught by: Cross; O’Sullivan
Course usually offered in fall term
Prerequisite: NURS 657
Corequisite: NURS 646
Activity: Clinic
1 Course Unit

NURS 648 Primary Care: Complex Diagnosis and Management of Adults across the Lifespan
This course will build on concepts presented in the Diagnosis and Management of Adults across the Lifespan (NURS 646) course. The focus is on refining health assessment skills, interpreting findings, developing and implementing appropriate plans of care to meet common health maintenance needs of adults and to promote the health of adults with more complex health problems with an emphasis on the frail adult. The student will gain increased expertise in communication skills, health assessment skills, interpreting findings, epidemiological concepts and developing and implementing plans of care. The emphasis will be placed upon managing an aging population with complex, chronic healthcare needs and promoting healthy behaviors across the lifespan.
Taught by: Cotter
Course usually offered in spring term
Prerequisites: NURS 646, 647
Activity: Lecture
1 Course Unit

NURS 649 Primary Care Clinical Practicum: Complex Diagnosis and Management of Adults across the Lifespan
The focus of this course is the application of concepts presented in the Complex Diagnosis and Management of Adults Across the Lifespan (NURS 648) including initial workups of new patients, and the evaluation and management of patients with self-limiting acute problems, or stable chronic illnesses. Students will gain increased clinical expertise in a variety of community-based clinical settings including but not limited to health maintenance organizations, community clinics, long term care, assisted living, continuing care retirement communities, occupational health settings, and private practice. The student will gain increased expertise in communication skills, health assessment skills, interpreting findings, applying epidemiological concepts and developing and implementing plans of care for adults across the lifespan with health maintenance needs, and/or common acute and chronic health problems.
Taught by: Cotter; Taylor
Course usually offered in spring term
Prerequisites: NURS 646, 647
Corequisite: NURS 648
Activity: Clinic
1 Course Unit
NURS 650 Systems Thinking in Patient Safety
This blended online/in-classroom graduate level course integrates principles of systems thinking with foundational concepts in patient safety. Utilizing complexity theories, students assess healthcare practices and identify factors that contribute to medical errors and impact patient safety. Using a clinical microsystem framework, learners assess a potential patient safety issue and create preventive systems. Lessons learned from the science of safety are utilized in developing strategies to enhance safe system redesign. Core competencies for all healthcare professionals are emphasized, content is applicable for all healthcare providers including, but not limited to, nurses, pharmacists, physicians, social workers and healthcare administrators, and may be taken as an elective by non-majors.
Course usually offered in spring term
Also Offered As: HPR 650
Activity: Lecture
1 Course Unit

NURS 651 Nursing Informatics
This course is designed to introduce the student to fundamental concepts and issues surrounding technology and information management in today's rapidly changing healthcare environment. Emphasis will be placed on defining informatics and the models and theories used in its development. To prepare the student to take a leadership role in information system design and selection the class will study the process of information systems analysis, implementation and evaluation involving functional, organizational and human aspects.
Taught by: Bowles; Maffei
Course usually offered summer term only
Prerequisite: Basic Computer Skills
Activity: Online Course
1 Course Unit

NURS 652 Applied Healthcare Accounting and Business Planning
This course focuses on the management of financial resources in the healthcare industry particularly in inpatient and ambulatory care settings. Specific emphasis is on applied accounting, budgeting, capital planning, nursing staffing/scheduling and variance analysis. Additionally, students will apply concepts in developing a business/program plan including completion of an environmental scan, cost-benefit analysis and marketing plan. Students will engage in strategic planning, stakeholder analysis and benchmarking efforts.
Taught by: Keim; Fuir
Course usually offered in spring term
Activity: Lecture
1 Course Unit

NURS 655 Nursing Administration Practicum
This administrative practicum will be individually tailored to meet each student's career goals. Students will be placed with an expert role model who in most instances will be a practicing nurse executive. The setting may vary according to the student's interests and objectives. Examples include acute care, home care, long term care, occupational health, community based clinics, consulting groups and political/legislative experiences.
Taught by: Keim, DiMichele
One term course offered either term
Prerequisite: NURS 699
Activity: Clinic
1 Course Unit

NURS 656 Professional Role Issues for Nurse Practitioners
This course is intended for students planning a career that involves primary health care delivery. It includes lectures, discussions, readings, and projects focused on health, social, economic and professional factors influencing health care delivery in the community.
Taught by: O'Sullivan; Bryan
Course usually offered in fall term
Corequisite: NURS 657
Activity: Lecture
1 Course Unit

NURS 657 Advanced Physical Assessment and Clinical Decision Making
This is a laboratory/clinical course designed to help prospective nurse practitioners develop advanced clinical assessment skills. Provider-patient interaction, data collection, and hypothesis formulation are emphasized. All participants engage in actual practice with fellow students, and/or models, and consenting patients.
Taught by: Buzby; Reger; Sherry
Course usually offered in fall term
Activity: Laboratory
1 Course Unit

NURS 658 Clinical Management of Primary Care with Young Families
Assessment and treatment of the young child in ambulatory care settings is the focus of this developmentally organized course. This course provides the nurse practitioner student with the necessary knowledge and experience to assist individuals with the most common health problems, including acute episodic illness as well as stable chronic disease. The concepts of health promotion and health maintenance are integrated throughout the curriculum. Using a developmental framework, the maturational tasks and problems of children and their families in relation to illness and health are explored.
Taught by: O'Sullivan
One term course offered either term
Prerequisites: NURS 656, 657
Corequisite: NURS 659
Activity: Lecture
1 Course Unit

NURS 659 Clinical Practicum: Primary Care with Young Families
Management and evaluation of primary care problems of children in a variety of ambulatory settings. Opportunity to implement the role of nurse practitioner with children and their families in the community occurs under the guidance of faculty and experienced preceptors. The initiation of health promotion and health maintenance activities with individuals and groups is stressed. Collaborative, interdisciplinary practice is emphasized as students assess and manage common problems in consultation with an appropriate provider of care. 20 hours a week of clinical experience with a preceptor is arranged.
Taught by: O'Sullivan
One term course offered either term
Prerequisites: NURS 656, 657
Corequisite: NURS 658
Activity: Clinic
1 Course Unit
NURS 660 Clinical Practice with Select Populations: Adolescents
Focus on assessment and treatment of adolescents in a variety of settings. Didactic emphasis is on the special needs encountered among adolescents. This course adds to the student’s previous knowledge and skill in the delivery of primary care. Working with this specific population the student gains necessary knowledge and experience in assisting individuals with most common health problems, including acute episodic illness and stable chronic disease, as well as health promotion needs.
Taught by: O’Sullivan
Course usually offered summer term only
Prerequisites: NURS 656, 657, 658, 659
Activity: Clinic
1 Course Unit
Notes: Summer Session I

NURS 661 Clinical Management of Primary Care with Adults
Assessment and treatment of younger adults in ambulatory care settings is the focus of this clinical course. The course provides the nurse practitioner student with the necessary knowledge and experience to assist individuals with most common health problems, including acute episodic illness. The concepts of health promotion and health maintenance are integrated throughout the curriculum. Using a developmental framework, maturational tasks and problems of the adult and family in relation to illness and health are explored.
Taught by: O’Sullivan
Course usually offered summer term only
Prerequisites: NURS 646, 647 or NURS 658, 659
Activity: Clinic
0 Course Units
Notes: Summer Session I

NURS 663 Advanced Concepts in Primary Care
In conjunction with the development of advanced clinical skills, students focus on advanced practice role development and the study of issues in health service delivery related to the practice of primary health care. Economics, case management and cultural/ethical aspects of care are discussed.
Taught by: O’Sullivan
Course usually offered summer term only
Prerequisite: NURS 660 or NURS 661
Activity: Clinic
1 Course Unit
Notes: Summer Session II

NURS 664 Advanced Practice Nursing for Oncology Care
Students are introduced to cancer epidemiology and pathophysiology, cancer genetics, prevention, risk assessment and reduction for specific cancers, screening techniques, diagnostic procedures and criteria, and local and systemic therapies used to treat cancer. The influence of individual characteristics on health promotion, health behaviors, population cancer risk, and cancer detection are explored in the context of biological, psychological, socioeconomic and sociocultural factors across age groups from adolescents to older adults. Evidence-based practice guidelines and research are applied to promote healthy lifestyles, monitor cancer risk, address psychosocial issues, facilitate access to care, and reduce health care disparities for populations at risk and diagnosed with cancer, and cancer survivors.
Taught by: Hollis; Polomano
Course usually offered in fall term
Prerequisite: NURS 607; NURS 637
Activity: Online Course
1 Course Unit
Notes: Summer 12 Week Session; Permission to take this course as an elective must be approved by the course faculty.

NURS 666 Effects of Cancer and Cancer Therapy
Principles of cancer treatment, associated responses and symptom management are presented. Emphasis is on the development of advanced clinical decision making skills in identifying multiple alterations resulting from cancer and cancer therapy.
Taught by: Walker; Prechel-Dunphy
Course usually offered in spring term
Prerequisites: NURS 646, 664
Corequisite: NURS 667
Activity: Online Course
1 Course Unit

NURS 667 Oncology Nursing: Assessment, Diagnosis, & Cancer Management
Emphasis is on the application of critical thinking and diagnostic reasoning skills in advanced clinical decision making. Students access, diagnose, and manage the care of oncology patients with a variety of cancers. The delivery of care and evaluation of role effectiveness within the health care system are examined.
Taught by: Polomano; Walker; Prechel-Dunphy
Course usually offered in spring term
Prerequisites: NURS 664, NURS 666
Corequisite: NURS 666
Activity: Online Course
1 Course Unit
Notes: $60 Lab Fee
NURS 670 Principles of Adult Gerontology Acute Care I
This didactic course examines the epidemiologic, assessment, diagnostic, management and evaluation of acutely or critically ill adults across the adult-older adult age spectrum. Students explore the dynamic interplay between the pathophysiological basis of disease and the psychosocial and socio-cultural responses to acute and critical illness and injury as they develop clinical decision-making skills. An evidence-based approach to nursing and medical management including pharmacologic and non-pharmacologic modalities is emphasized. Cardiovascular and pulmonary systems, infectious and prevention issues commonly encountered by adults are covered. Particular focus is placed on specific issues related to the older adult such as frailty, dehydration, loss of functional mobility, falls, and other geriatria syndromes.
Taught by: Pawlow; Elgat; Becker; Doherty
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NURS 671 Principles of Adult Gerontology Acute Care II
In this didactic course, students learn to integrate their advanced pharmacology and pathophysiology background with their understanding of acute illness and injury. The focus is on the evidence-based management of patients with neurologic, gastrointestinal, renal, oncologic, and metabolic health problems. Students develop skills to create a differential diagnosis when an adult/older adult presents with a constellation of symptoms. Common and atypical presentations of illness and disease are explored. Focus is placed on holistic care including the psychosocial, cultural, and spiritual aspects of patients’ response to their illness or injury. Epidemiology, assessment, diagnosis, management, and advanced clinical decision making based on current clinical research are emphasized.
Taught by: Pawlow; Elgat; Becker; Doherty
Course usually offered in spring term
Activity: Lecture
1 Course Unit

NURS 672 Principles of Adult Gerontology Acute Care III
This didactic course examines issues related to the epidemiology, assessment, diagnosis, management and evaluation of acutely and critically ill people. Students explore the dynamic interplay between the pathophysiologic basis of disease and the psychosocial and socio-cultural responses to illness and injury across the adult age continuum as they develop clinical decision-making skills. An evidence-based approach to nursing and medical management including pharmacologic and non-pharmacologic modalities is emphasized. Content focuses on special adult and older adult patient populations with commonly encountered health problems.
Taught by: Pawlow; Elgat; Becker; Doherty
Course usually offered summer term only
Activity: Lecture
1 Course Unit

NURS 673 Advanced Clinical Decisions in Adult Gerontology Acute Care
This didactic and fieldwork course focuses on development of a systematic approach to advanced physical assessment, the use and interpretation of diagnostic technologies and development of diagnostic reasoning as it applies to patient management of the adult-older adult acutely ill or injured patient. Emphasis is placed on development of competence to perform a comprehensive history and physical examination, incorporating the analysis of biotechnological data trends. Building fundamental skills in developing differential diagnoses and clinical decision making for acutely ill patients across the adult age continuum is a focus of this course.
Taught by: Pawlow; Griffith; Becker
Course usually offered in fall term
Prerequisites: NURS 607, 657
Corequisite: NURS 670
Activity: Seminar
1 Course Unit

NURS 674 Adult Gerontology Acute Care NP: Professional Role and Clinical Practicum I
This didactic and clinical fieldwork course explores issues relevant to the role of the Adult Gerontology Acute Care Nurse Practitioner within the complex U.S. health care system. Role development, reimbursement issues, provision of quality and ethical care and evidence-based nursing and medical interventions are introduced and discussed in the classroom. Clinical fieldwork focuses on assessment of complex acute, critical and chronically ill patients for urgent and emergent conditions, using both physiologically and technologically derived data, to evaluate for physiologic instability and potential life-threatening conditions, development of differential diagnoses, application of diagnostic reasoning and formulation, implementation, evaluation and modification of individualized plans of care including pharmaceutical and non-pharmacological modalities. Development of advanced clinical competencies and clinical decision making abilities about adults across the age continuum is emphasized.
Taught by: Becker; Griffith
Course usually offered in spring term
Prerequisite: NURS 673
Activity: Lecture
1 Course Unit
NURS 675 Adult Gerontology Acute Care NP: Professional Role and Clinical Practicum II
This didactic and fieldwork course focuses on the role of the Adult Gerontology Acute Care Nurse Practitioner and the expansion of advanced clinical competencies and clinical decision making abilities. Clinical experiences in acute care settings provide the student with opportunities to refine history and physical examination techniques, diagnostic reasoning, formulation, implementation, evaluation and modification of individualized management plans. Specific attention is given to the unique presentation of syndromes and constellation of symptoms that may be typical or atypical presentation of complex acute, critical and chronic illness in adults and older adults. Facilitating transition of patients at varying life stages through the complex health care system is encouraged exploring the multiple governmental, social and personal resources available to acutely ill adults across the age continuum. The application of advanced nursing, medical and biopsychosocial knowledge in the management of patients and the collaboration between the nurse practitioner and the patient, family and interprofessional healthcare team are emphasized.
Taught by: Becker; Griffith; Doherty
Course usually offered summer term only
Prerequisites: NURS 670, 671, 672, 673, 674
Activity: Lecture
1 Course Unit
Notes: Summer II 12 Week Course

NURS 677 Environmental Toxicology: Risk Assessment and Health Effects
This course presents general principals of toxicology and the disposition of toxins in the body. Case studies of the effects of environmental and occupational toxins on individuals will be analyzed. This course is designed for students who desire a strong foundation in toxicological concepts and principals and provides an overview of major toxins in our environment and their association with human health.
Taught by: Liu
Course usually offered in fall term
Also Offered As: PUBH 530
Activity: Lecture
1 Course Unit
Notes: Undergraduates Need Permission

NURS 681 Applied Physiology for Nurse Anesthetists I
This course provides an in-depth analysis of the anatomy, physiology and pathophysiology of the respiratory and cardiovascular systems and related anesthesia implications. The concepts of ventilation and perfusion as they relate to oxygen and anesthetic delivery and metabolism are examined. The effects of compromised cardiac and pulmonary function and their implications for the patient and anesthesia plan are reviewed. The impact of anesthesia on the structure and function of the heart as a pump as well as the characteristics of systemic circulation will be explored. The effect of surgery and anesthesia on the respiratory and cardiovascular systems will be emphasized.
Taught by: Magro; Lynn; Tkacs
Course usually offered summer term only
Activity: Lecture
1 Course Unit
Notes: 12 Week Summer Session

NURS 682 Applied Physiology for Nurse Anesthetists II
This course provides an in-depth analysis of the anatomy, physiology and pathophysiology of the hepatic, renal, nervous, hormonal, immunologic and hematological systems and related anesthesia implications. The focus of discussion will be on the special considerations when delivering anesthetic agents to patients. Emphasis will be placed on the assessment of the patient with common disorders of these systems. Nurse anesthesia care related to patients undergoing surgeries involving each system will be discussed.
Taught by: Magro; Lynn; Libonati
Course usually offered in fall term
Prerequisite: NURS 681
Corequisite: NURS 607
Activity: Lecture
1 Course Unit

NURS 683 Applied Science Related to Anesthesia
This course is an in-depth analysis of the chemical and physical principles as they apply to nurse anesthesia practice. Aspects of organic and biochemistry including the chemical structures of compounds and its significance in pharmacology will be explored. Applications of the laws of physics as they pertain to nurse anesthesia practice will be reviewed with specific examples. Emphasis on the dynamics of the anesthesia delivery system and related equipment will be presented.
Taught by: Magro; Lynn; Scanga
Course usually offered in spring term
Prerequisites: NURS 607, 681, 682
Activity: Lecture
1 Course Unit

NURS 685 Advanced Developmental Physiology and Pathophysiology
This course will address advanced human embryology, physiology and pathophysiology. Biochemical genetics and the genetic basis of disease will be discussed. Normal fetal development and physiology of organ systems will be used as the foundation for understanding the pathophysiology of disease across the lifespan.
Taught by: Trimarchi; Marino
Course usually offered in fall term
Prerequisite: Undergraduate course in Anatomy & Physiology
Activity: Lecture
1 Course Unit

NURS 686 Well Woman Health Care
This course focuses on the management and evaluation of physical, emotional, socio-cultural and educational needs of gynecologic primary health care of women from adolescence through post-menopausal years. The content is directed at expanding the expertise of the student in meeting the primary women's health care needs in contemporary society. Social influences that have an impact on women's lives are also explored.
Taught by: Durain; Grube; Nagtalon-Ramos
Course usually offered in fall term
Also Offered As: NURS 736, NURS 781
Prerequisite: NURS 657
Activity: Lecture
1 Course Unit
NURS 688 Complementary/Alternative Therapies in Women’s Health
The dramatic rise in the use of complementary and alternative medicine (CAM) by the American public requires that the contemporary health care practitioner have an awareness of CAM therapies and modalities currently available. The end result of this is course will not be proficiency in the practice of any of these modalities in particular, but rather a basic understanding of each approach to common conditions and their potential contribution to health and well-being. The focus of the CAM modalities discussed in this course will center on their use in women’s health care provision.
Taught by: Grube
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NURS 690 Family Focused Primary Care of the Middle-Aged and Older Adult
This course focuses on primary care problems encountered by middle-aged and older adults and their families. Students have the opportunity to build on previously acquired skills and to apply concepts of primary care to manage the complex health problems of middle-aged and older adults.
Taught by: O’Sullivan
Course usually offered in spring term
Prerequisites: NURS 656, 657
Corequisite: NURS 691
Activity: Lecture
1 Course Unit

NURS 691 Clinical Practicum: Family Focused Primary Care of the Middle Aged and Older Adult
The focus of this course is the evaluation and management of primary care problems in middle-aged and older adults. Students will have an opportunity to implement the role of the nurse practitioner in the clinical setting. Interdisciplinary collaborative experiences will be essential to the clinical practicum. The initiation of health promotion and health maintenance activities with individuals, groups and families is stressed. Students are expected to assess and manage common chronic health problems in the clinical setting.
Taught by: O’Sullivan
Course usually offered in spring term
Prerequisites: NURS 656, 657
Corequisite: NURS 690
Activity: Clinic
1 Course Unit

NURS 693 Professional Issues in Midwifery
In-depth discussion of current issues facing the profession of nurse-midwifery which impact on professional education, certification, and practice. Includes ethical, legal, and political aspects of nurse-midwifery practice.
Taught by: McCool; Reale; Guidera
Course usually offered in fall term
Prerequisites: NURS 787, 788
Corequisite: NURS 786
Activity: Lecture
1 Course Unit

NURS 697 Leadership in Advanced Oncology Nursing Practice
Students explore the diagnosis and treatment of common cancers in a multidisciplinary approach. The broad array of bio-medical and psychosocial issues that result from the disease itself across the illness continuum are studied. Quality of life, rehabilitation and palliative care issues related to cancer care are addressed. Additionally, students complete an administrative practicum with a nursing leader in an oncology specialty area within a healthcare organization.
Taught by: Keim; Prechtel Dunphy; Sherry; Walker
Course usually offered summer term only
Prerequisites: NURS 666 and all requisite nursing courses in the Nursing & Healthcare Administration (NADM) program. May be taken concomitantly with NURS 699 or at the discretion of the NADM Program Director.
Activity: Field Work
1 Course Unit

NURS 698 Practicum: Quality Improvement in Healthcare
Building on coursework that provided a broad overview of the principles and tools of quality improvement and patient safety in healthcare, students will apply this knowledge through completion of a mentored quality improvement project in a healthcare organization. In collaboration with faculty and health organization preceptors, students will identify a quality improvement opportunity and develop specific project objectives including, but not limited to, the use of appropriate tools, identification of measurable aims and evaluation methods, sustainable recommendations for process improvement and a comprehensive report of findings and recommendations. This course is part of the Quality Improvement and Safety Processes in Healthcare Minor and should be completed by the student as the capstone course in that minor; students engage in 192 hours of on-site project work.
Taught by: Piper; Keim
Course usually offered in spring term
Prerequisites: NURS 650, NURS 537, NURS 612
Activity: Field Work
1 Course Unit
Notes: Summer and Fall Placement

NURS 699 Advanced Roles in Administrative Nursing Practice
Offered at the end of the Nursing and Health Care Leadership or Health Care Leadership programs, this course prepares the graduate for entry into a myriad of administrative or leadership roles. Students will explore role responsibilities for various levels of management positions; health care consultants; health policy advocates; global health leaders; staff development directors; and administrators in non-traditional settings i.e., journal editors, professional associations etc.
Taught by: Rich; Keim
Course usually offered summer term only
Prerequisites: For Students of the Nursing Administration and Healthcare Leadership Only
Activity: Lecture
1 Course Unit
NURS 705 Advanced Practice Nursing Practice: Psychiatric Mental Health NP I
Supervised advanced psychiatric mental health nursing practice with children, adolescents and their families, or adults and/or older adults and their families in a variety of settings, depending on the subspecialty option selected. Focus is on clinical assessment/diagnosis and decision-making. A minimum of 16 hours of practice and 3 hours of small group supervision is required.
Taught by: Leahy; Mulligan; Josey
Course usually offered in fall term
Activity: Seminar
1 Course Unit

NURS 706 Advanced Practice Nursing Practice: Psychiatric Mental Health NP II
Supervised advanced psychiatric mental health nursing practice with children, adolescents and their families, or adults and/or older adults and their families in a variety of settings, depending on the subspecialty option selected. Refinement and development of clinical intervention with an increasingly diverse caseload. A minimum of 16 hours of practice and 3 hours of small group supervision is required.
Taught by: Leahy; Mulligan; Josey
Course usually offered in spring term
Activity: Seminar
1 Course Unit

NURS 707 Advanced Practice Nursing Practice: Psychiatric Mental Health NP III
Supervised advanced psychiatric mental health nursing practice with children, adolescents and their families, or adults and/or older adults and their families in a variety of settings, depending on the subspecialty option selected. Outcome evaluation, termination and professional role development. A minimum of 16 hours of practice and 3 hours of small group supervision is required.
Taught by: Leahy; Mulligan; Josey
Course usually offered summer term only
Activity: Seminar
1 Course Unit
Notes: Summer Session I

NURS 708 Public Policy Leadership in the American Public/Private System of Health Care
This course will explore the philosophy and growth of public policy that has directed the American Health Care System in its ever expanding movement toward universal health care for all citizens. Analysis of health policy and systems content will assist the students to identify the knowledge and skills needed for the health or human service provider to assume leadership roles in the formulation of public policy for change; this includes system restructuring, service delivery and funding of health care. Emphasis will be on the effect of policy on the individual/family user of health care services rather than the effect on professional health care providers or health care delivery systems. Special attention will be given to the effect of policy on populations, both urban and rural, living near and below the poverty level.
Taught by: Durain
Course usually offered in spring term
Activity: Lecture
1 Course Unit

NURS 714 Management of Critically Ill Children with Acute and Chronic Conditions: Nursing of Critically Ill Children Advanced Clinical
This clinical course is designed with emphasis on continued development of advanced clinical decision-making skills in the care of critically ill children. Emphasis is placed on knowledge and skills that allow the advanced practitioner to efficiently and effectively manage children who are dependent upon or assisted by technological devices to carry out life processes.
Taught by: Verge; Bartke
Course usually offered summer term only
Prerequisites: NURS 712, 713
Activity: Lecture
1 Course Unit
Notes: Summer Session II

NURS 715 Common Management Issues of Children with Acute and Chronic Conditions: Pediatric Oncology
This course examines the unique contribution made by nurses with advanced clinical skills in the care of children with oncologic and hematologic disorders, and their families, from the time of diagnosis throughout the treatment period and beyond. The course provides the student with the most recent advances in knowledge about cancer in childhood. While the focus is on oncology, hematologic disorders as well as AIDS will be discussed. Recent methods of treatment and the nursing management of children and their families will be addressed.
Taught by: Hobbie
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NURS 720 Nursing of Children Theory I: Child and Family Development
This course focuses on developmental theories and concepts that form the basis for nursing assessment and intervention with children and families. Emphasis is given to current research and issues in child and family development and functioning.
Taught by: Deartick; Murphy, K
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NURS 721 Advanced Physical Assessment and Clinical Decision Making: Nursing of Children Clinical I
This clinical course is designed to help prospective advanced practice nurses develop advanced skills in physical and developmental assessment of children in a variety of well-child, clinic and hospital settings. Data collection, data interpretation, and hypothesis formulations are emphasized for the purpose of clinical decision making. The role of the advanced practice nurse in assessment of primary health care issues and health promotion is incorporated throughout the course. Collaboration as an integral part of assessment will be an ongoing focus.
Taught by: Lipman; Reilly, L.
Course usually offered in fall term
Corequisite: NURS 685
Activity: Lecture
1 Course Unit
NURS 731 High-Risk Neonate, Theory
This course focuses on the care of high-risk neonates within the context of the family unit. The biological and psychosocial aspects are studied as a basis for nursing practice. Emphasis is placed on the role of the Advanced Practice nurse in improving services to high-risk neonates with the purpose of decreasing mortality and morbidity rates and improving the quality of life of high-risk newborns and infants.
Taught by: Verger; Steele
Course usually offered in spring term
Prerequisites: NURS 684, 720, 721
Corequisite: NURS 733
Activity: Lecture
1 Course Unit
Notes: Summer Session I

NURS 733 Clinical Practicum for the High Risk Neonate
This clinical course focuses on the care of the high risk infant within the context of the family unit. Clinical experiences provide students with opportunities to expand their skills in managing the care of infants, both acutely ill and growing neonates. Students continue their experiences with neonatal nurse practitioners to examine role issues of these individuals.
Taught by: Verger; Steele
Course usually offered in spring term
Prerequisites: NURS 684, 720, 721
Corequisite: NURS 731
Activity: Lecture
1 Course Unit

NURS 734 Intermediate Principles of Pediatric Acute Care
This course focuses on evidenced based care for infants, children, and adolescents with complex acute and chronic health conditions. Emphasis is placed on developing a framework for practice based on a synthesis of knowledge from biological, behavioral, and nursing sciences through the process of advanced clinical decision making. The student gains the necessary clinical management skills to provide specialized patient centered care across the entire pediatric age spectrum from complex chronic illness to physiologic deterioration and life threatening instability with emphasis on the patient and family as a full partner in decision making.
Taught by: Murphy, K.; Verger
Course usually offered in spring term
Prerequisite: NURS 720; NURS 721; NURS 685 or NURS 607
Corequisite: NURS 735
Activity: Lecture
1 Course Unit

NURS 735 Pediatric Acute Care Nurse Practitioner: Professional Role and Intermediate Clinical Practice
This course focuses on the implementation of the professional role of the Pediatric Acute Care Nurse Practitioner (PNP-AC). Particular emphasis is placed on the role components of the nurse practitioner in pediatric acute care. Applications of nursing, biological and behavioral science are emphasized in the advanced clinical assessment, clinical decision making and management skills needed to care for complex, unstable acutely and chronically ill children and their families. The role of the advanced practice nurse in promoting optimal child/family outcomes is emphasized.
Taught by: Verger; Lipman; Schucker; Campisciano
Course usually offered in spring term
Prerequisite: NURS 720; NURS 721; NURS 685 or NURS 607
Corequisite: NURS 734
Activity: Lecture
1 Course Unit

NURS 736 Advanced Principles of Pediatric Acute Care
This course expands the student’s understanding evidenced based care for infants, children, and adolescents with complex acute and chronic health conditions. Emphasis is placed on advancing a framework for practice based on a synthesis of knowledge from biological, behavioral, and nursing sciences through clinical decision making. The student continues to gain the necessary clinical management skills to provide specialized patient centered care across the entire pediatric age spectrum from complex chronic illness to physiologic deterioration and life threatening instability with emphasis on the patient and family as a full partner in decision making.
Taught by: Murphy, K.; Verger; Lipman
Course usually offered summer term only
Prerequisite: NURS 734; NURS 735
Corequisite: NURS 737
Activity: Lecture
1 Course Unit

NURS 737 Pediatric Acute Care Nurse Practitioner: Professional Role and Advanced Clinical Practice
This course focuses on the implementation of the professional role of the Pediatric Acute Care Nurse Practitioner (PNP-AC). This course adds to the students’ previous knowledge and skills and prepares them to deliver care to children of any age who require frequent monitoring and intervention. Applications of nursing, biological and behavioral science are emphasized in the advanced clinical assessment, clinical decision making and management skills needed to care for complex, unstable acutely and chronically ill children and their families.
Taught by: Verger; Lipman; Schucker; Campisciano
Course usually offered summer term only
Prerequisite: NURS 734; NURS 735
Corequisite: NURS 736
Activity: Lecture
1 Course Unit

NURS 740 Advanced Practice Concepts for the Childbearing Family
The seminar will provide students with the skills necessary to provide primary health care to high risk infants in ambulatory settings. Course material will include detailed physical assessment skills of the infant through the first year of life. The clinical component will include home visits and experience in the ambulatory and long term care settings.
Taught by: Steele
Course usually offered in fall term
Activity: Lecture
1 Course Unit
NURS 741 Management of Children with Acute and Chronic Conditions: Nursing of Children in the Community Advanced Clinical
This course focuses on the implementation of the role of the advanced practice nurse with particular emphasis on providing continuity of care for children with specialized health needs across their transitions in sites of care delivery and throughout phases in the cycle of their illnesses. Application of nursing, biological and behavioral science is emphasized in the community aspects of clinical assessment and management of children with health care needs and their families.
Taught by: Deattrick; Lipman; Murphy, K.
Course usually offered summer term only
Prerequisites: NURS 724, 725
Activity: Lecture
1 Course Unit
Notes: Summer Session II

NURS 743 Fetal Evaluation
This course focuses on identifying at risk and high risk maternal fetal dyads, developing knowledge relating to assessment of fetal well being, and understanding the implications of obstetric, non obstetric, and fetal complications on the management of the high risk pregnancy. Additionally the course provides an understanding of the scientific basis for new technologies used to evaluate at risk and high risk populations. Information about the physics of ultrasound, pulse echo imaging, and doppler techniques will be provided. Students must be able to practice ultrasound skills while in this course.
Taught by: Stringer
Course usually offered in spring term
Prerequisite: NURS 607
Activity: Lecture
1 Course Unit

NURS 745 Data Analytics
Activity: Lecture
1 Course Unit

NURS 748 Leadership Development in Healthcare
This course will provide the conceptual and theoretical framework for examining the concept of leadership within the contexts of health systems, health professionals and health policy. It will focus on characteristics of personal and professional leadership, change theory, and the application of critical thinking to the analysis of work environments, systems and the politics of health.
Taught by: Fidyk
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NURS 749 History, Health and Social Policy
This course explores the impact of historical ideas, events, and actors on current issues in health and illness care. Topics include the movement from hospitals to health care systems; the changing definitions of professionalism and professional practice patterns; and the ways historical context shapes definitions of leadership roles and theoretical knowledge.
Taught by: D’Antonio
Course usually offered in spring term
Activity: Lecture
1 Course Unit

NURS 750 Inquiry and Nursing
This course introduces students to the process of intellectual inquiry. It explores the intellectual foundations of scholarly disciplines in general and the discipline of nursing in particular. Emphasis is placed on the process of knowledge development, with particular emphasis on historical, philosophical, positivist, and gendered and phenomenological ways of knowing. Emphasis is also placed on having students develop their particular intellectual approach to disciplinary inquiry and on formulating ideas for publications and presentations.
Taught by: Richmond
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: For doctoral students in nursing

NURS 752 Clinical Fieldwork for Nurse Anesthesia Practice II
This course provides the opportunity for students to integrate theoretical knowledge and research findings into practice within the clinical setting. The clinical progression allows students to provide anesthesia care to patient with complex, multisystem problems. Selected surgical specialty rotations begin, introducing the student to the particular requirements for these special. Techniques for managing the acute pain of clients are also emphasized. The student grows in the ability to individualize a plan of care specific to the patients needs and surgical requirements. The student also now possesses the ability to combine theories and skills in selected clinical situations. The guidance of CRNA faculty preceptors contributes to the development of the students critical thinking.
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NURS 753 Evolving Nursing Science
A consideration of contemporary nursing research as it pertains to the current state of the art and directions for future study. Advanced analysis of methodology, assumptions, and theoretical structures that underpin the work.
Taught by: Sommers; Riegel
Course usually offered in spring term
Prerequisite: NURS 750
Activity: Lecture
1 Course Unit
Notes: For doctoral students in nursing

NURS 754 Quantitative Research Design and Methods
This one semester survey course provides an overview of quantitative clinical research design and methods. Ethical and legal considerations in human subjects research, access to patient populations, sampling designs and power analysis, experimental and non-experimental designs, measurement of variables, data collection techniques, and data management are included. This course is intended for doctoral students in the health sciences.
Taught by: Pinto-Martin; Meghani
Course usually offered in spring term
Prerequisites: Students must have completed at least one doctoral-level statistics course. The current doctoral recommendations include: SOCI 535; SOCI 536; STAT 500; STAT 501; PUBH 501; EPID 524; EPID 525.
Please contact course faculty for permission for courses taken outside of the above recommendations
Activity: Lecture
1 Course Unit
Notes: For doctoral students in nursing.
NURS 755 Application of Statistics to Nursing Research II
Integration of non-experimental quantitative research designs and methodologies, including common statistical techniques for analyzing resulting data. Statistical techniques examined include: factor analysis, multiple regression, canonical correlation, causal modeling, and logistic regression. Power analysis of statistical tests to estimate sample size discussed. Data analysis practice using computer software integrated throughout course.
Taught by: Tulman
Course usually offered in fall term
Prerequisite: NURS 754
Activity: Lecture
1 Course Unit
Notes: For doctoral students in nursing

NURS 756 Nurse Anesthesia Res I: Nurse Anesthesia Residency I
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NURS 757 Nurse Anesthesia Res II: Nurse Anesthesia Residency II
Activity: Lecture
1 Course Unit

NURS 758 Nurse Anesthesia Residency III
This course is the third of four residencies that provide the nurse anesthetist student the opportunity to attain competencies within the Certified Registered Nurse Anesthesia (CRNA) scope of practice. Throughout the residency, the nurse anesthesia resident will utilize appropriate clinical judgment to manage the complex medical, physical and psychosocial needs of clients in the perioperative phases. Further refinement of the patient assessment, anesthesia administration, and critical thinking skills will be emphasized. Students’ progress by providing anesthesia care for patients throughout the continuum of health care services. The guidance of CRNA faculty preceptors contributes to the development of the independence of the CRNA student. Collaborative practice within a care team model is emphasized and the student assumes more overall responsibility for the quality of care for the patients throughout the perioperative experience, with clinical support as required.
Taught by: Winner; Bent
Prerequisite: NURS 757
Activity: Lecture
1 Course Unit

NURS 759 Nurse Anesthesia Residency IV
Course usually offered in fall term
Prerequisite: NURS 758
Corequisite: NURS 611
Activity: Lecture
1 Course Unit

NURS 764 Advanced Technologies & Clinical Decisions in Acute Care
This fieldwork course focuses on development of a systematic approach to advanced physical assessment, the use of diagnostic technologies and the development of a diagnostic reasoning as it applies to patient management of the acutely ill and injured. Emphasis is placed on development of competence to perform a comprehensive history and decision making for the management of acutely ill patients.
Taught by: Becker; Griffith; Bartke
Course usually offered in fall term
Prerequisites: NURS 607, 657
Activity: Lecture
1 Course Unit

NURS 768 Role of the Clinical Nurse Specialist
This clinical course provides students the opportunity to apply CNS theory to practice and enables students to develop strategies to overcome barriers to safe, quality healthcare delivery. Students acquire knowledge and skills characteristic of CNS practice particularly as it relates to clinical judgment, facilitation of learning, advocacy and moral agency, caring practice and response to diversity.
Taught by: Becker; Pawlow; Fisher
Course usually offered in fall term
Activity: Lecture
1 Course Unit

NURS 769 Clinical Nurse Specialist Clinical I
This clinical course provides students the opportunity to apply CNS theory to practice and enables students to develop strategies to overcome barriers to safe, quality healthcare delivery. Students acquire knowledge and skills characteristic of CNS practice particularly as it relates to clinical judgment, facilitation of learning, advocacy and moral agency, caring practice and response to diversity.
Taught by: Becker; Dubendorf; Muller
One-term course offered either term
Prerequisite: NURS 657
Corequisite: NURS 768
Activity: Lecture
1 Course Unit

NURS 770 Clinical Nurse Specialist Clinical II
This clinical course focuses on the application of CNS theory to practice. Students focus on furthering the development of the knowledge and skills related to the core competencies of the CNS. Strategies to improve provider and system issues related to the provision of care to the population of interest are developed, implemented and evaluated. Developing leadership in the development of system-wide or healthcare policy is promoted. Advocating for the individual, family, caregiver and population of interest needs within the context of clinical practice and policy making is encouraged.
Taught by: Becker; Dubendorf; Muller
Course usually offered summer term only
Prerequisites: NURS 657, NURS 768, NURS 769
Activity: Lecture
1 Course Unit
Notes: Also Offered in Summer 12 Week Session
NURS 775 Post-Masters Psychiatric Mental Health NP Clinical Practicum & Seminar
This clinical course prepares individuals who have completed a Psychiatric Mental Health Clinical Nurse Specialist or an Adult Psychiatric Mental Health Nurse Practitioner program to meet the clinical requirements for certification as a Family Psychiatric Mental Health Nurse Practitioner. This clinical practicum and seminar will complement previous education in advanced practice Psychiatric Mental Health nursing. The focus of the course is on skill development in therapeutic relationships with clients, interviewing, assessing client strengths and needs for mental health services, selecting and implementing interventions including psychopharmacologic agents, and maintaining a role in a mental health setting which allows active collaboration with other health professionals. A minimum of 16 precepted practicum hours per week is required in a selected community or institutional setting and a minimum of 250 total precepted clinical hours during the semester is required. In addition, there will be on-campus seminars and individual and group supervision conference calls throughout the semester.
Taught by: Cacchione; Josey; Mulligan; Leahy
Course usually offered summer term only
Prerequisites: Masters degree in Psychiatric Mental Health Advanced Practice Nursing and approval of Program Director
Activity: Seminar
1 Course Unit
Notes: By Permission Only

NURS 776 High Risk Neonate Theory II
This course examines specific pathophysiological mechanisms which may result in body system failure. Strategies for clinical management are examined based on a synthesis of biological, behavioral, medical, pharmacological, and nursing knowledge. Theoretical analysis of the roles of the advanced practitioner with critically ill patients is emphasized.
Taught by: Verger; Steele
Course usually offered summer term only
Prerequisites: NURS 731, 733
Corequisite: NURS 777
Activity: Lecture
1 Course Unit

NURS 777 High Risk Neonate Clinical II
This clinical course is designed with emphasis on continued development of advanced clinical skills in the care of critically ill children. Emphasis is placed on integration of the roles of the advanced practitioner. This course adds to the student's previous knowledge and skills in advanced practice and prepares them to manage care of critically ill children.
Taught by: Verger; Steele
Course usually offered summer term only
Prerequisites: NURS 731, 733
Corequisite: NURS 776
Activity: Lecture
1 Course Unit

NURS 778 High Risk Neonatal Clinical III
This clinical course is designed with emphasis on continued development of advanced clinical decision-making skills in the care of critically ill children. Emphasis is placed on knowledge and skills that allow the advanced practitioner to efficiently and effectively manage children who are dependent upon or assisted by technological devices to carry out life processes.
Taught by: Verger; Steele
Course usually offered summer term only
Prerequisites: NURS 776, 777
Activity: Lecture
1 Course Unit

NURS 780 Health Care of Women and Primary Care
The focus of this course is a clinical approach to primary care problems commonly encountered by women in an ambulatory setting. This course provides the women's health care nurse practitioner and midwifery student with the knowledge and problem solving approach to assist individuals with the most common health problems, including acute episodic illness as well as stable chronic disease. The concepts of health promotion and health maintenance are integrated throughout the curriculum.
Taught by: Grube; Nagtalon-Ramos
Course usually offered summer term only
Corequisite: NURS 657
Activity: Lecture
1 Course Unit

NURS 781 Well Women Health Care, Theory
This course focuses on the management and evaluation of physical, emotional, socio-cultural and educational needs of gynecologic primary health care of women from adolescence through post-menopausal years. The content is directed at expanding the expertise of the student in meeting the primary women's health care needs in contemporary society. Social influences that have an impact on women's lives are also explored.
Taught by: Durain; Grube; Nagtalon-Ramos
Course usually offered in fall term
Also Offered As: NURS 686
Prerequisites: NURS 607, 657, 780
Corequisite: NURS 782
Activity: Lecture
1 Course Unit

NURS 782 Well Women Health Care, Clinical
This clinical course further prepares students in understanding and developing the Women's Health Care Nurse Practitioner and Nurse-Midwifery roles. This clinical course focuses on the management and evaluation of physical, emotional, socio-cultural and educational needs of gynecologic primary health care needs of women from adolescence through post-menopausal years. Emphasis is placed on promoting and maintaining wellness, clinical decision making, systematic health interview, physical assessment, interpretation of laboratory findings, and diagnosis and treatment of gynecologic problems.
Taught by: Durain; Grube; Nagtalon-Ramos
Course usually offered in fall term
Prerequisites: NURS 607, 657, 780
Corequisite: NURS 781
Activity: Lecture
1 Course Unit
NURS 783 Health Care of Childbearing Women, Theory
The antepartum course builds upon the well-woman health care course. The focus is management of prenatal care for the childbearing family. Conceptual threads of public policy and ethics are integrated within the content to help students to identify broader implications for prenatal care. Content includes theory and practice related to nurse-midwifery/nurse practitioner management of the normal pregnant woman, and nurse-midwifery/nurse practitioner management and strategies to reduce selected obstetric complications.
Taught by: Trout; Lewis; J; Grube
Course usually offered in spring term
Prerequisites: NURS 781, 782
Corequisite: NURS 784
Activity: Lecture
1 Course Unit

NURS 784 Health Care of Childbearing Women, Clinical
This course focuses on the management and evaluation of the childbearing women and their families in primary care settings. The course presents the opportunity to implement the role of the Nurse Practitioner with the childbearing woman and her family. The focus is on comprehensive physical, psychosocial and educational management of women and their families during pregnancy and postpartum.
Taught by: Trout; Lewis; J; Grube
Course usually offered in spring term
Prerequisites: NURS 781, 782
Corequisite: NURS 783
Activity: Lecture
1 Course Unit

NURS 785 Integration I
Intensive integration of theory and clinical practice in women’s health care with emphasis on ambulatory care. Clinical practice in all areas of ambulatory women’s health care, teaching rounds, case presentations, and seminars with professional colleagues.
Taught by: Stringer; McCool; Reale; Nagtalon-Ramos
Course usually offered summer term only
Prerequisites: NURS 783, 784
Activity: Clinic
1 Course Unit

NURS 786 Integration II: Midwifery Integration
Intensive integration of theory and clinical practice in women’s health care with emphasis on inpatient, postpartum, and newborn care.
Clinical practice during the inpatient and postpartum, teaching rounds, case presentations, and seminars with professional colleagues.
Taught by: McCool; Reale
Course usually offered in fall term
Prerequisites: NURS 783, 784
Corequisite: NURS 785
Activity: Clinic
1 Course Unit

NURS 787 Intrapartum / Postpartum / Newborn Care, Theory
Anatomy and physiology relevant to the care of the women and their families during the intrapartum, postpartum and newborn periods. Includes management of selected obstetrical emergencies and medical complications.
Taught by: McCool; Reale; Stringer
Course usually offered summer term only
Prerequisites: NURS 783, 784
Corequisite: NURS 788
Activity: Lecture
1 Course Unit

NURS 788 Intrapartum / Postpartum / Newborn Care, Clinical
Clinical care and management of women, newborns and their families during the intrapartum, postpartum and newborn periods. Includes management of selected obstetrical emergencies and medical complications. Clinical assignments related to module objectives.
Taught by: McCool; Reale
Course usually offered summer term only
Activity: Lecture
1 Course Unit

NURS 789 Principles of Patient Safety & Quality Improvement in Healthcare
Taught by: Gleason Scott
Activity: Lecture
1 Course Unit

NURS 790 Health Care Economics and Business Planning
Course usually offered in fall term
Activity: Online Course
1 Course Unit

NURS 792 Clinical Fieldwork in Nurse Anesthesia Practice II
This course provides the opportunity for students to integrate theoretical knowledge and research findings into practice within the clinical setting. Students progress by providing anesthesia care for patients with more complex health problems. Techniques for managing the acute pain of clients are emphasized. Anesthetic requirements as dictated by patient assessment including the surgical procedure are studied in greater depth. The student now possesses the ability to combine theories and skills in selected clinical situations. The guidance of CRNA faculty preceptors contributes to the development of the student’s critical thinking.
Taught by: Magro; Lynn; Briel
Course usually offered in spring term
Prerequisite: NURS 791
Activity: Seminar
2 Course Units

NURS 795 Nurse Anesthesia Residency II
This course is the second of two residencies that provide the nurse anesthetist student the opportunity to attain competencies within the Certified Registered Nurse Anesthesia (CRNA) scope of practice. Throughout the residency, the nurse anesthesia resident will utilize appropriate clinical judgment to manage the complex medical, physical and psychosocial needs of clients in the perioperative phases. Further refinement of the patient assessment, anesthesia administration, and critical thinking skills is emphasized. Students progress by providing anesthesia care for patients throughout the continuum of health care services. The guidance of CRNA faculty preceptors contributes to the development of the independence of the CRNA student. Collaborative practice within a care team model is emphasized and the student assumes more overall responsibility for the quality of care for the patients throughout the perioperative experience, with clinical support as required.
Taught by: Magro; Lynn; Briel
Course usually offered in spring term
Prerequisite: NURS 794
Activity: Seminar
2 Course Units
NURS 796 Diagnosis and Management of Adult Gerontology Acute Care Patients I
This on-line, didactic course is designed for the practicing nurse practitioner or clinical nurse specialist who seeks to gain additional knowledge and skills related to the care of adult gerontology acutely ill patients with a specific focus on cardiovascular and pulmonary systems, thoracic issues, infectious processes, wound healing and diabetes. Particular focus is placed on specific issues related to the older adult such as frailty, dehydration, loss of functional mobility, falls, and other geriatric syndromes. The basics of ECG, CXR and PFT interpretation, ABG analysis and ventilator modes are highlighted. This course examines the epidemiologic, assessment, diagnostic, management and evaluation of acutely or critically ill adults across the adult-older adult age spectrum. An evidence-based, interprofessional team approach to nursing and medical management including pharmacologic and non-pharmacologic modalities is emphasized. Taught by: Becker Course usually offered in fall term Activity: Online Course 1 Course Unit Notes: For Streamlined Adult Gero Program Students Only

NURS 797 Diagnosis and Management of Adult Gerontology Acute Care Patients II
This online didactic course, designed for the practicing nurse practitioners or clinical nurse specialists seeking to gain knowledge and skills relative to care of adult gerontology acute care patients, focuses on the medical and surgical issues of the neurological, renal, gastrointestinal, hematological, oncologic and orthopedic systems. This course examines the epidemiology, assessment, diagnosis, management and evaluation of acutely or critically ill adults across the adult-older adult age spectrum. An evidence-based, interprofessional team approach to the nursing and medical management of patients is emphasized. Taught by: Becker Course usually offered in spring term Activity: Online Course 1 Course Unit Notes: For Streamlined Adult Gero Program Students Only

NURS 798 Adult Gerontology Acute Care NP: Professional Role & Clinical Practicum for Primary Care Prepared Providers
This online didactic course and accompanying clinical fieldwork focuses on issues essential to the implementation of the role of the Adult Gerontology Acute Care Nurse Practitioner. Clinical fieldwork focuses on the unique assessment, diagnosis, management and evaluation of acutely, critically and complex chronically-ill adults, across the adult age continuum, experiencing acute, urgent and emergent conditions, using both physiologic and technologically derived data. Evaluating for physiologic instability and potential life threatening conditions is emphasized. Attention is given to the typical and atypical presentation of syndromes and constellation of symptoms exhibited by adults and older adults experiencing complex acute, critical and complex chronic illness. Issues related to the transition of patients through the health care system are explored. Collaboration between the nurse practitioner, patient, family and interprofessional healthcare team are encouraged. Taught by: Becker One term course offered either term Prerequisite: NURS 796 completion Activity: Online Course 1 Course Unit Notes: For Streamlined Adult Gero Program Students Only

NURS 799 MSN Clinical Remediation
Students whose clinical performance would benefit from additional clinical exposure in order to demonstrate the expected competencies are, with course faculty and faculty advisor approval, eligible to register for NURS 799. This experience will be allotted no more than one credit unit and must be completed in a time frame not to exceed one academic semester. A course may be remediated only one time. Course not offered every year Activity: Clinic 1 Course Unit

NURS 800 Dissertation Seminar I
Advanced study and research in nursing leading to the completion of the dissertation proposal. Taught by: Bowles, K.; Lake Course usually offered in fall term Prerequisites: NURS 750, 753, 754, 813, 2 semesters of Statistics, plus six concentration courses Activity: Seminar 1 Course Unit Notes: For doctoral students in nursing

NURS 803 Clinical Scholars in the Discipline of Nursing
This 2-semester course is designed to enhance the understanding of the practice of nursing as an intellectual discipline for doctoral students who have limited clinical practice experience prior to pursuing the PhD. It consists of individualized clinical experiences that are integrally related to the student's area of research interest and which are facilitated by clinician guides in a variety of settings. Students actively participate in seminars that focus on examining the health needs of individuals and vulnerable patients, the praxis of nursing and its place within the complex health care delivery system, health policy and society at large. Research informing practice and practice informing research are highlighted using the clinical practice experiences as case exemplars. NURS 803 is a course designed specifically for two groups of PhD students: the Hillman Scholars in Nursing Innovation and post-baccalaureate students completing an MS in nursing who have limited clinical experience as a professional nurse. This course is designed to expose students to carefully selected clinical experiences that provide opportunities to build a clinical appreciation of the practice of nursing as an intellectual discipline, to gain an enhanced understanding of the health care delivery system, and to examine the intersection of research, policy, and practice at the frontlines of nursing practice. To this end, this course combines the clinical experiences with a weekly seminar facilitated to dissect common issues experienced by vulnerable patients and families across care settings and specialties, to critically examine the contributions of nursing science to that care, and to examine how the health care system contributes or detracts from optimal care. Taught by: Clinician Educators from the Standing Faculty, Two terms. Student must enter first term. Prerequisite: Selection as a Hillman Scholar in Nursing Innovation or at the recommendation of the student's PhD academic advisor Activity: Seminar 2 Course Units Notes: First Fall-Spring post-BSN semesters in the PhD program for Hillman Scholars

2018-19 Catalog | Generated 02/28/19
NURS 811 Historical Thought in Nursing
A seminar open to enrolled doctoral students who plan to conduct historical research as some aspect of their program. Meets for one semester on a schedule determined by participants and faculty.
Taught by: Fairman
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: For doctoral students in nursing

NURS 813 Qualitative Paradigm Empirical Nursing Research
Study of selected qualitative paradigm empirical research approaches, including design and methodology. Critique of selected qualitative research reports from the literature of nursing and related disciplines. Fieldwork exercise and research proposal required.
Taught by: Deatrick
Course usually offered in fall term
Prerequisite: NURS 750
Activity: Seminar
1 Course Unit
Notes: For doctoral students in nursing

NURS 814 Doctoral Seminar: Ethics and Nursing
A critical review of the theoretical and empirical literature dealing with bioethics, nursing ethics, moral development, women’s ethics and specific ethical concerns in health and illness care. Students will study topics related to their own interests/needs, guided by the instructor in relation to the discipline of ethics.
Taught by: Deatrick
Course offered spring; odd-numbered years
Activity: Seminar
1 Course Unit
Notes: For doctoral students in nursing

NURS 817 Theoretical Perspectives of Growth and Development: A Health Care Perspective
This seminar will explore issues related to the theoretical perspectives of growth and development during childhood. Areas of emphasis will include: methodological issues related to research of childhood growth and development, the analysis of developmental data, and measurement issues common to research of development. Included in the discussion will be an analysis of theories in relationship to research of childhood development. The seminar will conclude with an agenda for future directions of research of growth and development.
Taught by: Medoff-Cooper; Deatrick; Lipman; O’Sullivan
Course usually offered in fall term
Activity: Seminar
1 Course Unit

NURS 818 Families and Research
This seminar will explore issues related to research of families. Included in the ongoing discussion will be an analysis of nursing and other theories in relationship to research of families. Methodological issues related to research of families will be discussed, as will the analysis of family data and measurement issues common to research of families. The seminar will conclude with an agenda for future directions to research of families.
Taught by: Deatrick
Course offered spring; even-numbered years
Activity: Seminar
1 Course Unit
Notes: For doctoral students in nursing

NURS 819 Seminar on the Social History of Nursing
This course will involve a guided review of the pertinent literature relating to the history of technology in 20th century America. The focus will include a critical examination and review of the social origins and implications of technological development and diffusion in healthcare. Various theoretical frameworks in the history of technology will be closely examined in attempt to assist the student in the development of their own framework.
Taught by: Fairman
Activity: Seminar
1 Course Unit
Notes: For doctoral students in nursing

NURS 821 Proseminar in Health Outcomes Research
This the first of a two-course sequence designed for doctoral students interested in conducting health outcomes research. The first course (821) focuses on conceptual, methodological, statistical, feasibility and data issues central to the conduct of health outcomes research; the second course (822) focuses on applying health outcomes research through the development and implementation of a research project. In the first course Penn faculty researchers will use their ongoing studies to illustrate how study design, sampling, measurement, and advanced statistical techniques can be employed to address the various challenges inherent in health outcomes research. In the second course, students will design and implement a health outcomes research project.
Taught by: Lake; Aiken
Course offered spring; odd-numbered years
Prerequisites: Prior coursework at undergraduate or masters level in statistics and quantitative methods.
Activity: Seminar
1 Course Unit
NURS 823 Designing Interventions to Promote Health and Reduce Health Disparities
Advanced analysis, design and evaluation of interventions to promote health and reduce health disparities with a focus on underserved vulnerable minority or ethnic populations, through culturally competent research, education and clinical practice. Areas to be evaluated include:
- Health disparities as it relates to health promotion and disease prevention behavioral intervention research in vulnerable communities
- Concepts of marginalization, race, ethnicity, class, gender and culture as it relates to health disparities
- Social-psychological theoretical and research approaches related to developing culturally congruent health promotion interventions to reduce health disparities for vulnerable populations
- The use of elicitation, focus groups and ethnographic techniques to tailor health behavior theory to meet the needs of the population
- Culturally competent research methodologies, involving education and/or clinical practice, e.g. culturally competent measures, recruitment, retention, and informed consent in hard to reach populations
- Community participatory research as a strategy for working with the community to build research partnership and build capacity for sustained health promotion initiatives
- Health promotion intervention strategies for reducing health disparities in vulnerable communities
- Strategies to evaluate the effectiveness of interventions using randomized controlled trials (RCTs) in community and clinical settings
- Strategies for tailoring successful evidenced-based health promotion interventions to a variety of different populations for use in clinical trials and community settings
- Examine approaches for the translating and disseminating evidenced-based intervention research

Taught by: Jemmott; Teitelman
Course offered spring; odd-numbered years
Also Offered As: PUBH 539
Activity: Seminar
1 Course Unit
Notes: Doctoral Students Only

NURS 824 Health Equity: Conceptual, Linguistic, Methodological, and Ethical Issues
The course focuses on advanced analysis and evaluation of theories, concepts, and methods related to health equity. Topic areas include models and frameworks of health equity; linguistic choices related to equity, disparity, and vulnerability; role of economics, class, gender, sex, sexuality, race, and ethnicity; health equity in special populations; and issues in health policy, research ethics, and research methods. Emphasis is on advanced discourse and analysis of health equity theory and research.

Taught by: Summers
Course offered fall; odd-numbered years
Activity: Seminar
1 Course Unit
Notes: For Doctoral Students Only

NURS 825 Seminar on Integrative Science in Aging
This fall semester interprofessional seminar will prepare students and fellows to identify appropriate measurement tools for use in aging research. We will specifically focus on analysis of selected concepts, models and measures central to the integrative science in aging. Topics include measurement of geriatric syndromes, models commonly used in integrative science of aging, outcomes of evidence-based care in older adults, regulatory and ethical issues specific to the conduct of research with older adults.

Taught by: Cacchione; Ersek
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: For Doctoral Students Only

NURS 826 Advanced Qualitative Research Methods
The course extends beginning qualitative research methods skills to a more advanced level. Students planning a dissertation or career focus in qualitative or mixed methods may use the course to refine interest and skill. The focus of the course centers on interactionist perspectives and collective analysis though methods tangential to these perspectives. Standpoint and participatory methods and analysis may be considered given sufficient student interest. Students are actively involved in selection and critique of seminal and critical readings. Students must have at their disposal a suitable dataset with commensurate permissions or have plans to collect qualitative data amenable to analysis during the course term. This data base can be from previous research proposals and fieldwork can be used as the building blocks for the course assignment(s). The course will focus on data collection, analyses, interpretation, and presentation of results. Skill building will center on collection and management of data; analytic technique including comparative, narrative, and text analysis; development and management of coding schemas; abstraction and development of situation specific theory; and dissemination and diffusion of findings, theories, and relevance to similar phenomena and use in practice.

Taught by: Kagan
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: For Doctoral Students Only

NURS 827 Self-Care of Chronic Illness
This course introduces the history, definitions, predictors, measurement, and outcomes of self-care in chronic illness. Historical, classic and current literature from various disciplines will be studied to give students a broadened perspective of the self-care construct and the issues that patients face when dealing with chronic illness.

Taught by: Piegel
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: For PhD Students Only
NURS 828 Response to Chronic Illness: Theory and Research

Millions of people of all ages live with chronic illness(es). A diagnosis of a chronic illness is a life-changing event, causing disruption and a sense of loss for many. Common early responses are stress, anxiety, depression, fear, and anger. Over time, with support and experience with the illness, many adjust. But, others report persistent feelings of loss due to physical, emotional, spiritual/existential, social, occupational, and/or financial influences of chronic illness. Those who adjust the best typically find a way to return a sense of normalcy to their lives. Loved ones and caregivers are equally affected by chronic illness and much has been written in recent years about caregiver burden. However, some individuals (caregivers and patients) report positive responses to illness, including a deepened purpose for living and a reordering of life priorities. The focus of this course is on individual responses to chronic illness—the person diagnosed and his/her loved ones. This course is intended to complement N818, which focuses on families and dyads dealing with chronic illness. In this course we will explore the major theoretical perspectives that underlie this field. The literature describing common responses of both those diagnosed and their loved ones as well as the social and cultural context that helps explain the responses of individuals facing chronic illness will be examined. Methods used to study chronic illness will be explored in depth.

Taught by: Riegel
Course usually offered in fall term
Prerequisite: Permission of faculty
Activity: Seminar
1 Course Unit

NURS 829 Measurement of Physiologic Variables Related to Health Disparity

This graduate course is an advanced exploration of biometric methods (branch of science that includes the measurement of physiological variables and parameters) and their use in quantitative research. A particular focus will be on biological measures that can be used as outcome variables to evaluate interventions to promote health and health equity, and reduce health outcomes disparities in vulnerable or marginalized populations. Areas to be evaluated include:
- Measurement theory and instrument science as they relate to biological signals; role of biometrics in health outcomes disparities research
- Ethical considerations and how they relate to biometrics; mitigating perceived threats (profiling, stereotyping); the role of human subjects considerations; the responsible conduct of research
- Derivation and types of biologic signals; time-based characteristics
- Accuracy and precision of biologic measures; random and non-random error; application and exemplars of strategies to determine accuracy and precision
- Role of biological rhythms in biometric measurement; analysis of multiple data points and repeated measures of biological variables
- Methods relative to vulnerable women, children, and families: genetics; environmental contaminants; digital image analysis; hormones, metabolites; drugs and alcohol

Taught by: Sommers
Course offered fall; even-numbered years
Activity: Seminar
1 Course Unit

Notes: For Pre-Doctoral and Post-Doctoral students interested in describing health disparities and developing and testing interventions in vulnerable women, children, and families.

NURS 830 Conducting Research in Global Women's Health

An introduction to theoretical and methodological issues as they relate to conducting research in global women's health. Advanced analysis of historical, social, cultural, economic, political, technological and geographical contexts as they influence the health of girls and women across the lifespan and their relation to health care systems as both clients and providers. This includes contextual issues that constrain the provision & receipt of adequate healthcare. A critical examination of theoretical and methodological issues pertaining to research on women and girls conducted around the world across disciplines. A focused and intensive exploration of place as it pertains to women and girls formal and informal structures of health care delivery as those needing and/or seeking health care, and as those providing health care to others. Students will examine the multiple dimensions and qualities of these endeavors (e.g. activity, power, control, visibility, value, and remuneration) and the intersection of gender and health - locally, globally and across borders. Students will focus their examination on the implications of seeking and providing health care for women's and girls' health and well-being. By examining issues in local and global contexts and across geographical boundaries, students will have the opportunity to challenge gendered, class, political, and cultural assumptions related to women's health.

Taught by: Teitelman
Course usually offered in fall term
Also Offered As: GSWS 830
Prerequisites: Completion of course in global health (this may include a reputable online course eg: Coursera), or equivalent background (eg. global health field experience). Permission of Instructor.
Activity: Seminar
1 Course Unit

Notes: For graduate and professional students from any field with an interest in global women's health; Masters students by permission of instructor.

NURS 831 Advanced Topics in Health Informatics

This course is designed to survey a broad range of advanced topics in the field of health informatics. Course faculty and invited speakers will provide the content for weekly meetings conducted in a blended environment (both on-line and in the classroom). Each week, students will listen to a lecture and then participate in a group discussion. Approximately half of these lecture/discussion sessions will take place in a "live" classroom, while the remainder will be available asynchronously in an online setting (i.e., using Blackboard). There will be no textbook, however each speaker will provide links to web-based resources that provide either background information or further elaboration of their topic. A group of students (depending upon size of class, probably 2-3 per topic) will take the lead for each topic, communicating with the speaker and facilitating the class discussion. As a final project, these student groups will also develop a more complete web resource for their selected topic.

Taught by: Bowles
Course usually offered in spring term
Prerequisites: NURS 651, NURS 551, SYS 528, or permission of instructor
Activity: Lecture
1 Course Unit
NURS 832 Laboratory Based Biological Measures
This graduate course is an advanced, mentored exploration of biological measurement techniques used in nursing research. This course will provide an opportunity to gain a broad-based understanding of laboratory methodology, biomarkers, and translational research. Concepts of biological sample processing, storage, quality assurance and control and analysis will be covered. Laboratory measurements with a focus on genetic regulation of biomarkers related to stress, pain, and sleep/fatigue will be covered.
Taught by: Libonati; Muthukumaran
Course usually offered in fall term
Prerequisites: Biology, Chemistry, Physiology, and Permission of Instructor
Activity: Seminar
1 Course Unit
Notes: For Doctoral and Post-Doctoral students interested in biobehavioral research laboratory techniques.

NURS 833 Measurement of Health-Related Behavior and Determinants
Taught by: Karen Glanz
Activity: Seminar
1 Course Unit
Notes: This one semester seminar will provide a detailed overview of measurement of health-related behaviors and determinants of behavior. The course will cover characteristics of measures, data collection, and how to apply the science of measurement to specific health research questions. The course will emphasize the one semester seminar will provide a detailed overview of measurement of health-related behaviors and determinants of behavior. The course will cover characteristics of measures, data collection, and how to apply the science of measurement to specific health research questions. The course will emphasize the intersection of self-report measures with biological and physical measures, and the use of newer technologies to collect data and improve data quality. Students will integrate concepts and topics covered in the course as they work on a measurement project in their specific area(s) of interest and engage in problem-solving with their peers. This course is intended for doctoral student and advanced masters-level students in the health sciences.

NURS 836 Patient-Reported Symptoms & Outcomes for Clinical Research
Patient-reported symptoms and outcomes are central to health science and have assumed increasing importance in the broader research arena. The research goal, conceptual clarity of variables, participant characteristics, instrument psychometrics, degree of coarseness/specificity, and participant burden are all essential to consider in selecting patient-reported symptom and outcome measures. This course focuses on linking study needs, design considerations, theoretical concepts, empirical measures, data collection strategies, and analytic approaches to patient-reported symptoms and outcomes for clinical research. Specific symptoms and outcomes examined in detail may include functional status, quality of life, health status, well-being, sleep, fatigue, weight, pain, shortness of breath, depression, stress, and nausea but each semester will be tailored to the research interests of the seminar participants.
Taught by: Richmond
Course usually offered in fall term
Activity: Seminar
1 Course Unit

NURS 837 Web-based Research Methodology
This doctoral elective course will provide an introduction to Web-based research methods in health-related disciplines. This course will examine research methods that have been adapted to the study of human subjects through the Web. This course will have particular emphasis on quantitative and qualitative empirical methods using the Web as a data collection medium. Another important feature of this course will be intensive analysis of ethical and methodological issues conducting research through the Web. Areas to be analyzed include: types of Web-based research; advantages and disadvantages of Web-based research; vehicles (e.g. funding, mentoring) that have supported Web-based research; human subject protection issues; issues/concerns in recruitment and data collection in Web-based research; and professional vehicles (e.g. scholarly publication, lay publications, speaking forums) that have helped disseminate the knowledge derived from Web-based research.
Taught by: Im
Course usually offered in fall term
Prerequisite: Enrollment in a Doctoral Program
Activity: Seminar
1 Course Unit

NURS 839 Mixed Methods Research
This course will focus on mixed methods research techniques including mixed methods designs, developing mixed methods research questions, data collection, analyses focusing on data integration of qualitative and quantitative data, interpretation, and presentation of results. Skill building will center on sampling, collection, and management of data; data integration techniques; data visualization, methodological rigor and reporting data including dissemination of findings. Students will complete a mixed methods "mini" proposal.
Taught by: Brawner
Course usually offered in fall term
Prerequisites: Qualitative Research Methods; Availability of qualitative & quantitative data sets.
Activity: Seminar
1 Course Unit

NURS 849 Exploring Data Science Methods with Health Care Data
The growth and development of electronic health records, genetic information, sensor technologies and computing power propelled health care into the big data era. This course will emphasize data science strategies and techniques for extracting knowledge from structured and unstructured data sources. The course will follow the data science process from obtaining raw data, processing and cleaning conducting exploratory data analysis, building models and algorithms, communication and visualization, to producing data products. Students will participate in hands-on exercises whenever possible.
Taught by: Bowles, K; Milo
Course usually offered in spring term
Prerequisites: Students must have completed at least two, sequential graduate level statistics courses.
Activity: Lecture
1 Course Unit

NURS 851 Dnp Project I: Translating Evidence To Practice
Activity Lecture
1 Course Unit

NURS 852 Translating Ev - Prac II: Dnp Project II
Activity Lecture
1 Course Unit
NURS 853 Translating Ev- Prac III: Dnp Project III  
Activity: Lecture  
0.5 Course Units

NURS 854 DNP Project IV  
Course usually offered in fall term  
Activity: Lecture  
1 Course Unit

NURS 858 Professional Aspects & Leadership For Nurse Anesthesia Practice  
Course usually offered summer term only  
Activity: Lecture  
1 Course Unit

NURS 890 Nursing Doctoral Teaching Residency  
The purpose of this required one semester teaching residency is to enhance the expertise of students in the role of educator. The residency will be tailored to the student’s individual learning needs. At the minimum, students with no or minimal prior teaching experience will gain a beginning level of expertise in course planning, course evaluation, dealing with difficult student situations, test construction, paper assignment construction and grading, content delivery methods, as well as other aspects of the faculty teaching role. Students with more extensive teaching experience will tailor their residences with their residency supervisor to enhance their expertise in these various areas. Taught by: Designated Member of the School of Nursing Grad Group  
Course usually offered in fall term  
Activity: Independent Study  
1 Course Unit  
Notes: For Nursing Doctoral Students Only

NURS 897 Nursing Doctoral Research Residency  
The purpose of this required one semester research residency is to enhance student research training early in the doctoral program by providing a mentored research experience. The residency is designed to be a tailored hands-on experience to provide students with exposure and the opportunity to participate in one or more aspects of an ongoing research project. Research residencies are experiential activities designed to meet the student's individual learning needs. At the minimum, students with no or minimal prior research experience will gain a beginning level of experience on a variety of components of an ongoing research project. Students with more extensive research experience will tailor their residences with their residency supervisor to enhance their expertise in these various areas. Taught by: Designated Member of the School of Nursing Grad Group  
Course usually offered in fall term  
Activity: Independent Study  
1 Course Unit  
Notes: For Nursing Doctoral Students Only

NURS 900 Directed Study  
Must be arranged with the written permission of the sponsoring faculty member prior to registration.  
One term course offered either term  
Activity: Independent Study  
1 Course Unit

NURS 995 Dissertation  
Dissertation General Tuition  
One term course offered either term  
Activity: Dissertation  
1 Course Unit

Operations, Information and Decisions (OIDD)

OIDD 101 An Introduction to Operations, Information and Decisions  
OIDD 101 explores a variety of common quantitative modeling problems that arise frequently in business settings, and discusses how they can be formally modeled and solved with a combination of business insight and computer-based tools. The key topics covered include capacity management, service operations, inventory control, structured decision making, constrained optimization and simulation. This course teaches how to model complex business situations and how to master tools to improve business performance. The goal is to provide a set of foundational skills useful for future coursework at Wharton as well as providing an overview of problems and techniques that characterize disciplines that comprise Operations and Information Management. One term course offered either term  
Activity: Lecture  
1 Course Unit

OIDD 105 Developing Tools for Data Access and Analysis (VBA and SQL Programming)  
This course provides an introduction to the construction of data analysis tools that are commonly used for business applications, especially in consulting and finance. The course builds on the spreadsheet and analytical skills developed in OPIM 101, providing a much more extensive treatment of spreadsheet application development and database management. The first portion of the course will focus on programming in VBA, the embedded programming language in the Microsoft Office suite of applications. This will be supplemented with discussion of industry best practice in software development, such as specification development, interface design, documentation, and testing. The second portion of the class will emphasize data access and analysis utilizing SQL, the industry standard language for interacting with database software.  
Activity: Lecture  
1 Course Unit

OIDD 201 Technology Management, Information and the Digital Economy  
OIDD 201 introduces students to two critically important and tightly linked concepts. The first is online business model innovation, including key opportunities to exploit information-based strategies in businesses as diverse as Capital One and Uber (newly vulnerable markets) and Amazon and Airbnb (online channel conflict). The second is computer-based simulation modeling to assess the viability of an online innovation, the strategies for its launch, and its economic value.  
Activity: Lecture  
0.5 Course Units

OIDD 210 Management Information Systems  
This course provides a broad-based introduction to the management of information technology focusing on three interrelated themes: technology, organization, and strategy. The goal of this course is to equip students with the knowledge and tools to utilize information systems to pursue a firm's strategic and organizational goals. The course has no prerequisites other than a general interest in the applications of information technology. One term course offered either term  
Activity: Lecture  
1 Course Unit
OIDD 215 Intro to Analytics and the Digital Economy
Over the past decade, there has been a dramatic rise in the use of technology skills and data analytics to solve business problems in many domains, including finance, HR, policy, transport, and strategy. As a result, the modern “analyst leader” increasingly requires the use of technology, statistics, and data skills to facilitate business analysis. This includes knowing how to effectively frame data-driven questions and use a new generation of technology tools that are becoming available to acquire, analyze, interpret, and communicate insights derived from data. Students in this hands-on course will engage with weekly labs that introduce them to new technologies, techniques, and data-driven business challenges.
Activity: Lecture
0.5 Course Units

OIDD 220 Introduction to Operations Management
This course introduces basic concepts of operations management and application of the same in business practice today. We will examine the theoretical foundations of operations management and how these principles or models can be employed in both tactical and strategic decision making. Topics covered in detail are forecasting techniques, planning under deterministic and uncertain demand, operations planning and scheduling, queuing theory, service operations management, newsvendor models, risk pooling strategies in firms, capacity and revenue management, and supply chain coordination. We will conclude by discussing how supply chains evolve under technological change.
One-term course offered either term
Activity: Lecture
1 Course Unit

OIDD 221 Operations Strategy and Process Management
This course examines how organizations can develop and leverage excellence in process management. The first module focuses on operations strategy. In these classes, we examine what constitutes an operations strategy and how organizations can create value by managing complexity, uncertainty, and product development. In the second half of the course, we discuss recent developments in both manufacturing and service industries. Specifically, we examine initiatives in quality, lean manufacturing and enterprise-wide planning systems. The course is recommended for those interested in consulting or operations careers, as well as students with an engineering background who wish to develop a better understanding of managing production processes.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Cross listed with ESE 522

OIDD 222 Internet Law & Policy
The Internet has become central to business and daily life. This course looks at how courts, legislatures, and regulators confront the major legal issues that the Internet poses. The fundamental challenge is that law comes from governments and other institutions in specific places, but the Internet is global and virtual. Conflicts such as the shutdown of the Napster peer-to-peer file-sharing service and the debate over "network neutrality" regulations for broadband access illustrate the challenge. How does the legal system think about Google, Skype, Twitter, and Facebook? How should it?
One-term course offered either term
Also Offered As: LGST 222
Activity: Lecture
1 Course Unit
Notes: Cross listed with LGST 222

OIDD 224 Analytics for Service Operations
This course considers tools and concepts that can generate operational excellence for the production and delivery of services in industries such as banking, transportation, health care, and communications. Since services typically are intangible, not storable or transportable, and often highly variable, the management of their operations is complex and involves distributed operations with a significant amount of customer contact. Therefore, the understanding and effective management of service operations requires specialized analytical tools and customer-centric focus. This course covers a mix of topics with the emphasis on quantitative methods, application of analytics and strategic frameworks. The class will introduce simple models and basic concepts that support analysis of tradeoffs in a variety of common service processes. Students also will have the opportunity to apply the ideas and analytical models developed in the course to a particular service industry. They will do so by conducting a guided, application group project which includes opportunities for in-depth analysis of a particular service process and field work.
Taught by: Faculty
Activity: Lecture
1 Course Unit

OIDD 236 Scaling Operations in Technology Ventures: Linking Strategy and Execution
This course helps students learn to make strategic scaling decisions that are grounded in operational reality. Students will study how to build and evaluate the "operation systems" of the firm to maximize value with the focus on scaling the firm's operations. This involves tailoring the firm's operational competencies, assets, and processes to a specific business strategy. The course will approach the challenge of scaling operations and operations strategy by taking a holistic view that incorporates competitive strategy, financial evaluation, and the customer experience.
Activity: Lecture
1 Course Unit

OIDD 240 Gamification for Business
See course description for LGST 240.
Activity: Lecture
1 Course Unit

OIDD 245 Advanced Analytics and the Digital Economy
This course is meant as a follow-on to OIDD 215 (or with instructor permission). The goal of this segment is to further immerse students in the world of data science projects. Specifically, we focus on working with large, unstructured data sources and gain experience with introductory machine learning concepts. Students who take this segment of the course will spend time inside and outside of the classroom combining data and code to develop data products for a number of new industries, including finance, the restaurant industry, and healthcare. At the end of the course, students will be expected to complete an advanced data project, which involves acquiring data from an online web property (e.g., Uber, Facebook) through an API and developing an interactive data visualization. Students who complete this course should have the necessary tools to begin building a portfolio of data science projects that they can share online through platforms such as GitHub or with future employers.
Prerequisite: OIDD 215
Activity: Lecture
0.5 Course Units
OIDD 261 Risk Analysis and Environmental Management
Taught by: Kunreuther
One-term course offered either term
Also Offered As: BEPP 261, BEPP 761, BEPP 961, ESE 567, OIDD 761
Activity: Lecture
1 Course Unit
Notes: Crosslisted with OIDD 761, BEPP 261, 761, 961, and ESE 567. See description under OIDD 761.

OIDD 263 Environmental & Energy Economics and Policy
This course examines environmental and energy issues from an economist's perspective. Over the last several decades, energy markets have become some of the most dynamic markets of the world economy, as they experienced a shift from heavy regulation to market-driven incentives. First we look at scarcity pricing and market power in electricity and gasoline markets. We then study oil and gas markets, with an emphasis on optimal extraction and pricing and geopolitical risks that investors in hydrocarbon resources face. We then shift gears to the sources of environmental problems (many of which are energy-related), and policy makers can intervene to solve some of these problems. We talk about the economic rationale for a broad range of possible policies: environmental taxes, subsidies, performance standards and cap-and-trade. In doing so, we discuss fundamental concepts in environmental economics such as externality, valuation of the environment and the challenge of designing international agreements. At the end of the course, there will be special attention for the economics and finance of renewable energy and policies to foster its growth. Finally, we discuss the transportation sector, and analyze heavily debated policies such as fuel-economy standards and subsidies for green vehicles.
Taught by: Arthur van Benthem
Also Offered As: BEPP 263
Activity: Lecture
1 Course Unit

OIDD 290 Decision Processes
This course is an intensive introduction to various scientific perspectives on the processes through which people make decisions. Perspectives covered include cognitive psychology of human problem-solving, judgment and choice, theories of rational judgment and decision, and the mathematical theory of games. Much of the material is technically rigorous. Prior or current enrollment in STAT 101 or the equivalent, although not required, is strongly recommended.
Prerequisites: STAT 101 or equivalent strongly recommended.
Activity: Lecture
1 Course Unit

OIDD 291 Negotiations
Negotiation is the art and the science of creating good agreements between two or more parties. This course develops managerial negotiation skills by mixing lectures and practice, using cases and exercises in which students negotiate with each other. The cases cover a wide range of problems and settings: one-shot deals between individuals, repeated negotiations, negotiations over several issues, and negotiations among several parties (both within and between organizations). Class participation and case studies account for half the course grade. Students will also write about a negotiation experience outside of class.
One-term course offered either term
Also Offered As: LGST 206, MGMT 291, OIDD 691
Activity: Lecture
1 Course Unit

OIDD 292 Adv Topics Negotiation
This course is designed to teach negotiation principles and to enable students to develop their negotiation skills. This course builds upon and assumes familiarity with the negotiation concepts covered in the prerequisite for this course: "Negotiations." In this course, we extend the study and practice of negotiations, and we develop a deeper understanding of how specific aspects of the negotiation process impact outcomes. Through course lectures, readings, and exercises, students will develop a rich framework for thinking about the negotiation process and acquire tools for guiding the negotiation process.
Also Offered As: LGST 292, MGMT 292
Activity: Lecture
1 Course Unit

OIDD 298 Study Abroad: Negotiations
Activity: Lecture
1 Course Unit

OIDD 299 Judg & Dec Making Res Im
This class provides a high-level introduction to the field of judgment and decision making (JDM) and in-depth exposure to the process of doing research in this area. Throughout the semester you will gain hands-on experience with several different JDM research projects. You will be paired with a PhD student or faculty mentor who is working on a variety of different research studies. Each week you will be given assignments that are central to one or more of these studies, and you will be given detailed descriptions of the research projects you are contributing to and how your assignments relate to the successful completion of these projects. To complement your hands-on research experience, throughout the semester you will be assigned readings from the book Nudge by Thaler and Sunstein, which summarizes key recent ideas in the JDM literature. You will also meet as a group for an hour every three weeks with the class's faculty supervisor and all of his or her PhD students to discuss the projects you are working on, to discuss the class readings, and to discuss your own research ideas stimulated by getting involved in various projects. Date and time to be mutually agreed upon by supervising faculty and students. the 1CU version of this course will involve approx. 10 hours of research immersion per week and a 10-page paper. The 0.5 CU version of this course will involve approx 5 hours of research immersion per week and a 5-page final paper. Please contact Maurice Schweitzer if you are interested in enrolling in the course:
schweitzer@wharton.upenn.edu
Course usually offered in fall term
Activity: Lecture
0.5 Course Units
Notes: Instructor permission required to enroll.
OIDD 311 Business Computer Languages
This course is taught with the more descriptive title of "Scripting for Business Analytics." "Business Analytics" refers to modeling and analysis undertaken for purposes of management and supporting decision making. The varieties of techniques and methods are numerous and growing, including simple equational models, constrained optimization models, probabilistic models, visualization, data analysis, and much more. Elementary modeling of this sort can be undertaken in Excel and other spreadsheet programs, but "industrial strength" applications typically use more sophisticated tools, based on scripting languages. Scripting languages are programming languages that are designed to be learned easily and to be used for special purposes, rather than for large-scale application programming. This course focuses on the special purposes associated with business analytics and teaches MATLAB and Python in this context. MATLAB and Python are widely used in practice (both in management and in engineering), as are the business analytic methods covered in the course. Prior programming experience is useful, but not required or presumed for this course.
One term course offered either term
Activity: Lecture
1 Course Unit

OIDD 314 Enabling Technologies
Conducting business in a networked economy invariably involves interplay with technology. The purpose of this course is to improve understanding of technology (what it can or cannot enable) and the business drivers of technology-related decisions in firms. We will be discussing some of the new and most disruptive technologies right now to stimulate thought on new applications for commerce and new ventures, as well as their implications to the tech industry as a whole. Topics include social media, online advertising, big data, and cloud computing. The course will take a layered approach (from network infrastructure to data infrastructure to applications infrastructure, or direct enablers of commerce) to first, understanding and then, thinking about technology enablers. Network infrastructure layers include fundamentals of wired and wireless infrastructure technologies such as protocols for networking, broadband technologies - for last (DSL, Cable etc) and other miles (advances in optical networking) and digital cellular communications. Data infrastructure layers include usage tracking technologies, search technologies and data mining. Direct application layers include personalization technologies (CRM), design technologies for content and exchanges, software renting enablers, application service provision, agents and security mechanisms. Finally some emerging technology enablers (such as cloud computing and cloud virtual reality) are identified and discussed.
One term course offered either term
Also Offered As: OIDD 662
Activity: Lecture
1 Course Unit

OIDD 315 Data Base Management Systems
Organizations continue to increase their reliance on computerized database management and information retrieval systems. Whether purchasing airplane tickets, managing retail merchandise, processing financial trades or simply sending email, data management defines the modern firm. This course aims to provide students with both a practical and theoretical introduction to the design, implementation, and use of such systems. Students are introduced to the fundamental concepts and principals of data management and gain practical experience by designing and deploying a working system. Throughout the course, case studies are used to illustrate theoretical concepts while acquainting students with innovative commercial uses of these systems.
One term course offered either term
Activity: Lecture
1 Course Unit

OIDD 316 Systems Analysis, Design, and Implementation
At its surface this course introduces students to the management and technical issues associated with planning and designing large-scale computer systems. It does so in part as an elaboration of Fred Brooks's observation that "The technology, the surrounding organization, and the traditions of the craft conspire to define certain items of paperwork." But if that were our only goal, we would soon find ourselves mired in (and probably arguing about) the minutiae of how such paper items ought to be constructed - not a very helpful pedagogical exercise. So, then, at a deeper level we seek to understand why the conspiracy endures, and why in spite of it, systems still take too long and cost too much to build as a systems project's team members struggle to understand another across disparate discourse communities and world views, differences in experience and training, and over long periods of time. More than anything else, within the context of working with the main tools and techniques of systems analysis and design, this course treats communication, corroboration, and thinking within the boundaries of a technology-oriented project as its primary subjects.
One term course offered either term
Activity: Lecture
1 Course Unit

OIDD 319 Advanced Decision Systems: Evolutionary Computation
This course is taught with the more descriptive title of "Agents, Games, and Evolution." It explores applications and fundamentals of strategic behavior. Strategic, or game-theoretic, topics arise throughout the social sciences. The topics include - and we discuss - trust, cooperation, market-related phenomena (including price equilibria and distribution of wealth), norms, conventions, commitment, coalition formation, and negotiation. They also include such applied matters as design of logistics systems, auctions, and markets generally (for example, markets for electric power generation). In addressing these topics we focus on the practical problem of finding effective strategies for agents in strategic situations (or games). Our method of exploration will be experimental: we review and discuss experiments, principally computational experiments, on the behavior of boundedly rational agents in strategic (or game-theoretic) situations. Course work includes readings, discussions in class (organized as a seminar), examinations, and a course project on a topic chosen by the participants.
One term course offered either term
Activity: Seminar
1 Course Unit
OIDD 321 Introduction to Management Science
Understanding how to use data and business analytics can be the key
differential for a company’s success or failure. This course is designed
to introduce fundamental quantitative decision-making tools for a
broad range of managerial decision problems. Topics covered include
linear, nonlinear, and discrete optimization, dynamic programming,
and simulation. Students will apply these quantitative models in
applications of portfolio management, electricity auctions, revenue
management for airlines, manufacturing, advertising budget allocation,
and healthcare scheduling operations. Emphasis in this course is placed
on mathematical modeling of real-world problems and implementation of
decision-making tools.
One term course offered either term
Activity: Lecture
1 Course Unit

OIDD 325 Computer Simulation Models
This course focuses on agent-based computational models in the social
sciences, especially in economic, in commercial and in strategic (game-
theoretic) contexts. This relatively recent and now rapidly-developing
form of computer simulation seeks to explain and predict complex social
phenomena "from the ground up", through interactions of comparatively
simple agents. The course reviews experimental and theoretical results,
and exposes the students to modern development environments for
this form of simulation. Students have the opportunity to design and
implement agent-based simulations. Programming, however, is not
required. This course aims to integrate various topics in agent-based
simulation, while developing an appreciation of the problems that are
particularly characteristic of this form of simulation so that students will
understand its promise and potential.
One term course offered either term
Activity: Lecture
1 Course Unit

OIDD 353 Mathematical Modeling and its Application in Finance
Quantitative methods have become fundamental tools in the analysis
and planning of financial operations. There are many reasons for this
development: the emergence of a whole range of new complex financial
instruments, innovations in securitization, the increased globalization
of the financial markets, the proliferation of information technology and
the rise of high-frequency traders, etc. In this course, models for hedging,
asset allocation, and multi-period portfolio planning are developed,
implemented, and tested. In addition, pricing models for options, bonds,
mortgage-backed securities, and other derivatives are studied. The
models typically require the tools of statistics, optimization, and/or
simulation, and they are implemented in spreadsheets or a high-level
modeling environment, MATLAB. This course is quantitative and will
require extensive computer use. The course is intended for students
who have strong interest in finance. The objective is to provide students
the necessary practical tools they will require should they choose
to join the financial services industry, particularly in roles such as:
derivatives, quantitative trading, portfolio management, structuring,
financial engineering, risk management, etc. Prospective students should
be comfortable with quantitative methods such as basic statistics and
the methodologies (mathematical programming and simulation) taught
in OIDD612 Business Analytics and OIDD321 Management Science (or
equivalent). Students should seek permission from the instructor if the
background requirements are not met.
One term course offered either term
Also Offered As: OIDD 653
Prerequisite: OIDD321 (or a similar optimization class)
Activity: Lecture
1 Course Unit

OIDD 380 Operations Strategy Practicum
This course focuses on the management of operations at manufacturing
and service facilities located in Israel that are used either by domestic
corporations or by multinational companies. The emphasis is on the
evolving patterns of operations strategies adopted by firms for producing
products, sourcing manufacturing, distributing products, delivering
services and managing product design as well as on programs for
enhancing quality, productivity and flexibility and managing technology.
We will focus on formulation and execution of such strategies for
established Israeli multinationals with world class operations and
innovative strategies as well as start-ups and smaller companies
that are scaling their global supply chain infrastructure to support
growth. The course will consist of a set of site visits in Israel during
Winter Break that will provide the opportunity to observe company
processes directly and in-class sessions which include lectures,
case discussions and management speakers who will describe their
companies’ current strategy. NOTE: THIS COURSE REQUIRES YOU
TO SUBMIT AN APPLICATION FOR ADMISSION. Applications will be
reviewed on a rolling basis and enrollment will be limited. Please contact
Ramon Jones at ramjones@wharton.upenn.edu for more information.
Prerequisites: OIDD 101 or an equivalent course that introduces basics
concepts of operations management, supply chains and quantitative
methods. Other OIDD and related courses or prior experience can also be
used to satisfy the pre-requisite requirement (check with instructor).
Activity: Lecture
1 Course Unit

OIDD 397 Retail Supply Chain Management
Also Offered As: OIDD 697
Activity: Lecture
0.5 Course Units
Notes: See description under OIDD 697

OIDD 398 Retail Supply Chains
The course will examine how retailers understand their customers’
preferences and respond with appropriate products through effective
supply chain management. The course class sections will deal with the
following major items: (1) linking finance and operations in retailing, (2)
what assortment of products should a retailer carry in each store, (3)
optimizing the inventory carried of each SKU in each store, (4) markdown
pricing, (5) store execution and (6) supply chain design. In addition,
we will consider a broad range of issues facing two retailers, Mothers
Work, and Best Buy, when we are visited by current and past senior
executives from these firms. The course is highly recommended for
students interested in careers in: (1) Retailing and retail supply chains,
(2) Businesses like banking, consulting and information technology
that provide services to retail firms, (3) Manufacturing companies that
sell their products through retail firms. Even if you don’t expect to
work for a retailer, this course can be useful to you in two ways. First,
because retailers are such dominant players in many supply chains
today, it is important that the processes they follow be understood by
manufacturers and distributors, or by the consultants and bankers that
service retailers and their suppliers. Second, the problems retailers
face (e.g., making data accessible, interpreting large amounts of data,
reducing lead-times, eliciting the best efforts from employees, and
so forth), are shared by firms in many other industries. It’s easier to
understand these issues through case studies in retailing because we all
experience the industry as consumers and can readily relate to chronic
problems such as stock outs and markdowns.
Also Offered As: OIDD 698
Activity: Lecture
1 Course Unit
OIDD 399 Supervised Study
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: Instructor permission required to enroll (except section 002).
Wharton Undergraduate students must also receive approval from the
Undergraduate Division. Section 002 is the Management and Technology
Freshman Seminar; instruction permission is not required for this section
and is only open to MT students.

OIDD 410 Decision Support Systems
One-term course offered either term
Also Offered As: OIDD 672
Activity: Lecture
1 Course Unit
Notes: Crosslisted with OIDD 672. See description under OIDD 672.

OIDD 415 Product Design
This course provides tools and methods for creating new products.
The course is intended for students with a strong career interest in new
product development, entrepreneurship, and/or technology development.
The course follows an overall product design methodology, including
the identification of customer needs, generation of product concepts,
prototyping, and design-for-manufacturing. Weekly student assignments
are focused on the design of a new product and culminate in the creation
of a prototype, which is launched at an end-of-semester public Design
Fair. The course project is a physical good - but most of the tools
and methods apply to services and software products. The course is open to
any Penn sophomore, junior, senior or graduate student.
Also Offered As: IPD 515, MEAM 415, OIDD 515
Corequisite: Studio Recitation (Spring Semester only)
Activity: Lecture
1 Course Unit

OIDD 416 Design and Development of Web-Based Products and Services
In this course, students will study innovation and new product
development in the context of Web-based products and services.
This course lies at the intersection of product design and information
technology; it is intended for students with general interests in the design
of new products and/or information technology management. The course
builds from a general product design methodology. For example, students
begin with opportunity identification and analysis of user needs. However,
the course also extends principles and practices used in innovation and
new product development to information technologies in general and the
Web in particular. For example, design-for-manufacturing is addressed
with open-source software and Web services. Robust Engineering and
Design of Experiments is applied to paper prototyping and server log
analysis. The course is an interdisciplinary, integrative project-based
course. Through weekly assignments, students apply the tools and
techniques to the design of a new product, culminating in the initial roll-
out of a working service. The course is open to juniors and seniors in
SEAS or Wharton
Activity: Lecture
1 Course Unit

OIDD 469 Information Strategy and Economics
The course is devoted to the study of the strategic use of information
and the related role of information technology. The topics of the course
vary year to year, but generally include current issues in selling digital
products, intermediation, and disintermediation, designing and competing
in electronic markets, outsourcing, and technology project management.
Heavy emphasis is placed on utilizing information economics to analyze
new and existing businesses in information-intensive industries.
Technology skills are not required, although a background in information
technology management (equivalent to OPIM 210), strategic management
or managerial economics is helpful.
One-term course offered either term
Activity: Lecture
1 Course Unit

OIDD 490 The Science of Behavior Change
The objective of this 14-week discussion-based seminar for advanced
undergraduates is to expose students to cutting-edge research from
psychology and economics on the most effective strategies for changing
behavior sustainably and for the better (e.g., promoting healthier eating
and exercise, encouraging better study habits, and increasing savings
rates). The weekly readings cover classic and current research in this
area. The target audience for this course is advanced undergraduate
students interested in behavioral science research and particularly those
hoping to learn about using social science to change behavior for good.
Although there are no prerequisites for this class, it is well-suited to
students who have taken (and enjoyed) courses like OIDD 290: Decision
Processes, PPE 203/PSYC 265: Behavioral Economics and Psychology,
and MKTG 266: Marketing for Social Impact and are interested in taking
a deeper dive into the academic research related to promoting behavior
change for good. Instructor permission is required to enroll in this course.
Please complete the application if interested in registering for this
seminar: https://tinyurl.com/penn-bcfq-seminar
Also Offered As: PSYC 490
Activity: Seminar
1 Course Unit
Notes: Please complete the application if interested in registering for this
seminar: https://tinyurl.com/penn-bcfq-seminar. Application deadline has
been extended to July 18th, 2018.

OIDD 515 Product Design
This course provides tools and methods for creating new products.
The course is intended for students with a strong career interest in new
product development, entrepreneurship, and/or technology development.
The course follows an overall product design methodology, including
the identification of customer needs, generation of product concepts,
prototyping, and design-for-manufacturing. Weekly student assignments
are focused on the design of a new product and culminate in the creation
of a prototype, which is launched at an end-of-semester public Design
Fair. The course project is a physical good - but most of the tools and
methods apply to services and software products. The course is open to
any Penn sophomore, junior, senior or graduate student.
Also Offered As: IPD 515, MEAM 415, OIDD 415
Corequisite: Studio Recitation
Activity: Lecture
1 Course Unit
Notes: Only Wharton MBA candidates are allowed to register for
OIDD 515. Non-MBA students must register for the OIDD 415, MEAM 415
or IPD 515 cross-listing for the course.
OID 611 Quality and Productivity
Matching supply with demand is an enormous challenge for firms: excess supply is too costly, inadequate supply irritates customers. In the course, we will explore how firms can better organize their operations so that they more effectively align their supply with the demand for their products and services. Throughout the course, we illustrate mathematical analysis applied to real operational challenges—seeking rigor and relevance. Our aim is to provide both tactical knowledge and high-level insights needed by general managers and management consultants. We will demonstrate that companies can use (and have used) the principles from this course to significantly enhance their competitiveness.
Course usually offered in fall term
Activity: Lecture
0.5 Course Units

OID 612 Business Analytics
"Managing the Productive Core: Business Analytics" is a course on business analytics tools and their application to management problems. Its main topics are optimization, decision making under uncertainty, and simulation. The emphasis is on business analytics tools that are widely used in diverse industries and functional areas, including operations, finance, accounting, and marketing.
Course usually offered in spring term
Activity: Lecture
0.5 Course Units

OID 613 Managing the Productive Core of the Firm: Information and Business Transformation
Information technology has transformed many industries, including media, financial services, and retailing, among others. These technologies have changed not only how we produce services (e.g., outsourcing and offshoring, and their newest extension, cloud computing) but what services we offer (virtual experiences, online advertising, long tail products and services, and social networking). The purpose of this course is to improve understanding of how information technologies enable transformation of business models within existing organizations as well as the development of completely new business models and new organizational forms. The course will serve as an introductory course on information technologies and will serve as a foundation on which students can explore more advanced technology concepts.
Course usually offered in spring term
Activity: Lecture
0.5 Course Units

OID 614 Innovation
The course is first and foremost an intensive, integrative, project course in which student teams create one or more real businesses. Some businesses spurn out of the course and now managed by alumni include Terrapass Inc. and Smatchy Inc. The project experience is and exciting context in which to learn key tools and fundamentals useful in innovation, problem solving, and design. Examples of these tools and fundamentals are: problem definition, identification of opportunities, generating alternatives, selecting among alternatives, principles of data graphics, and managing innovation pipelines. The course requires a commitment of at least 10 hours of work outside of class and comfort working on unstructured, interdisciplinary problems. Students with a strong interest in innovation and entrepreneurship are particularly encouraged to enroll. Please read carefully the syllabus posted on-line before registering for this course.
Course usually offered in fall term
Activity: Lecture
0.5 Course Units

OID 615 Operations Strategy
Operations strategy is about organizing people and resources to gain a competitive advantage in the delivery of products (both goods and services) to customers. This course approaches this challenge primarily from two perspectives: 1) how should a firm design their products so that they can be profitably offered; 2) how can a firm best organize and acquire resources to deliver its portfolio of products to customers. To be able to make intelligent decisions regarding these high-level choices, this course also provides a foundation of analytical methods. These methods give students a conceptual framework for understanding the linkage between how a firm manages its supply and how well that supply matches the firm’s resulting demand. Specific course topics include designing service systems, managing inventory and product variety, capacity planning, approaches to sourcing and supplier management, constructing global supply chains, managing sustainability initiatives, and revenue management. This course emphasizes both quantitative tools and qualitative frameworks. Neither is more important than the other.
Course usually offered in spring term
Activity: Lecture
0.5 Course Units

OID 621 Decision Models and Uncertainty
The applicability and use of management science models have increased dramatically in recent years due to the extraordinary improvements in computer, information, and communication technologies. Personal computers and friendly interfaces have become effective "delivery vehicles" for powerful decision models that were once the exclusive province of experts. This core course in management science has a twofold purpose. First, it seeks to introduce simple models and ideas that provide powerful (and oftentimes surprising) qualitative insights about a large spectrum of managerial problems. Its main topics include linear and integer programming, decision making under uncertainty, and simulation. Second, it aims to give a feeling for the kinds of problems that can be tackled quantitatively, the methods and software available for doing so and the difficulties involved in gathering the relevant data. the emphasis is on models that are widely used in diverse industries and functions areas, including finance, operations, accounting, and marketing.
Course usually offered in fall term
Activity: Lecture
0.5 Course Units
Notes: Lecture and discussion, with case studies and problem assignments.

OID 632 Operations Management: Supply Chain Management
Matching supply with demand is a primary challenge for a firm: excess supply is too costly, inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive. In this course we will 1) learn how to assess the appropriate level of supply flexibility for a given industry and 2) explore strategies for economically increasing a firm's supply flexibility. While tactical models and decisions are part of this course, the emphasis is on the qualitative insights needed by general managers or management consultants. We will demonstrate that companies can use (and have used) the principles from this course to significantly enhance their competitiveness.
Course usually offered in spring term
Also Offered As: LAW 517
Activity: Lecture
0.5 Course Units
Notes: Lectures, cases, class discussions.
OIDD 636 SCALING OPERATIONS: Linking Strategy and Execution  
This course helps students learn to make strategic scaling decisions that are grounded in operational reality. Students will study how to build and evaluate the "operation systems" of the firm to maximize value with the focus on scaling the firm’s operations. This involves tailoring the firm’s operational competencies, assets, and processes to a specific business strategy. The course will approach the challenge of scaling operations and operations strategy by taking a holistic view that incorporates competitive strategy, financial evaluation, and the customer experience.  
Prerequisites: OIDD 611, OIDD 612, STAT 613 or those who have a solid understanding of elementary probability and statistics.  
Activity: Lecture  
0.5 Course Units

OIDD 640 Digital Game Design Techniques for Business: Rules, Incentives, Applications  
Why can’t work be fun? Leading firms are engaging in the practice of gamification, using the techniques of digital game designers to serve objectives as varied as marketing, human resources management, productivity enhancement, training, innovation, and customer engagement. This course will examine the mechanism of gamification and provide an understanding of their effective use in the modern firm. Cross-listed with LGST 640. The course will draw upon interdisciplinary source material as well as real-world case studies and production game environments to identify effective analytical models, strategies, techniques, and metrics for the application of games to business. It will also identify a number of significant pitfalls to the successful implementation of gamification techniques, notably legal and ethical issues, the difficulty of making things fun, and the problems with implementing radical change in established firms. The course will include both in-person meetings and web-based online sessions.  
Taught by: Werbach, Hunter  
One-term course offered either term  
Prerequisite: none  
Activity: Lecture  
1 Course Unit

OIDD 642 Analytics for Services  
This course covers a range of analytical methods that are useful tools for capacity management in services, and it will provide you with insights into the economics of a range of services businesses including (i) High-level planning models that account for multiple dimensions of service capacity, (ii) Low-level models of system congestion that capture the relationship between capacity choices, quality of service and, in some cases, system revenue, (iii) Statistical estimation and forecasting models to characterize key measures of future supply and demand.  
Prerequisites: Students who have already taken OIDD 611, OIDD 612, and STAT 613 should be well equipped for this class. Other students should have a solid understanding of elementary probability, statistics and linear programming. For questions regarding the specifics of your background, please contact the instructor.  
Activity: Lecture  
0.5 Course Units  
Notes: Class participation, case write-ups, online quizzes, self-study exercises and a final exam.

OIDD 643 Analytics for Revenue Management  
This course introduces you to the essential concepts and techniques required to understand and implement revenue management (RM). The need for repeated, rapid cycles of estimation and optimization has driven the development of a set of analytical tools that are particularly well suited for RM. This course focuses on those tools.  
Prerequisites: Students who have already taken OPIM 612 and STAT 613 should be well equipped for this class. Other students should have a solid understanding of elementary probability, statistics and constrained optimization. For questions regarding the specifics of your background, please contact the instructor.  
Activity: Lecture  
0.5 Course Units  
Notes: Class participation, case write-ups, online quizzes, self-study exercises and a final exam.

OIDD 652 Advanced Management Science: Models and Applications  
This course will cover applications of decision models to managerial problems in a variety of business functions. The course will use management science techniques such as mathematical programming (LP/IP/NLP), Monte Carlo simulation, decision trees, probability theory and statistical analysis as the vehicle for applying diverse management theories to real-world problems. Potential in-class applications include product-line selection, risk management, corporate real options, and supply-chain restructuring. The course will emphasize the practical application of these techniques; problems will be solved using popular packages such as Excel, and Crystal Ball.  
Course not offered every year  
Prerequisite: OPIM 621  
Activity: Lecture  
0.5 Course Units

OIDD 653 Mathematical Modeling and its Application in Finance  
Quantitative methods have become fundamental tools in the analysis and planning of financial operations. There are many reasons for this development: the emergence of a whole range of new complex financial instruments, innovations in securitization, the increased globalization of the financial markets, the proliferation of information technology and the rise of high-frequency traders, etc. In this course, models for hedging, asset allocation, and multi-period portfolio planning are developed, implemented, and tested. In addition, pricing models for options, bonds, mortgage-backed securities, and other derivatives are studied. The models typically require the tools of statistics, optimization, and/or simulation, and they are implemented in spreadsheets or a high-level modeling environment, MATLAB. This course is quantitative and will require extensive computer use. The course is intended for students who have strong interest in finance. The objective is to provide students the necessary practical tools they will require should they choose to join the financial services industry, particularly in roles such as: derivatives, quantitative trading, portfolio management, structuring, financial engineering, risk management, etc. Prospective students should be comfortable with quantitative methods quantitative methods, such as basic statistics and the methodologies (mathematical programming and simulation) taught in OPIM612 Business Analytics or OPIM321 Management Science (or equivalent). Students should seek permission from the instructor if the background requirements are not met.  
Taught by: Tsoukalas  
One-term course offered either term  
Also Offered As: OIDD 353  
Prerequisite: Either OPIM321 or OPIM612 (or a similar optimization class)  
Activity: Lecture  
1 Course Unit
OODD 654 Product Design and Development
The course provides the student with a number of tools and concepts necessary for creating and managing product development processes. The course consists of two interwoven parts. First, it presents the basic steps that are necessary for moving from a "cool idea" to a product sufficiently mature to launch an entrepreneurial start-up. This includes cases, lectures, and exercises on topics like identifying customer needs, developing a product concept as well as effective prototyping strategies. The capstone of this first part is a real project in which student teams conceptualize and develop a new product or service up to the completion of a fully functional prototype. Second, the course discusses a number of challenges related to product development as encountered by management consultants, members of cross-functional development teams as well as general managers. We will analyze several cases related to, among others, resource allocation in R&D organizations, organizational forms of product development teams, as well as managing development projects across large geographic distances.
Course usually offered in spring term
Activity: Lecture
0.5 Course Units
Notes: Lectures, case and problem analyses, group presentations, the development of a new product to the prototype stage.

OODD 655 Operations, Marketing, and Design Integration
This course covers topics that span marketing and operations management. Students will examine issues and decisions that require significant coordination between managers in marketing and operations. Topics include channel management, supply chain design, product variety management and service operations pricing and control.
Course usually offered in spring term
Prerequisites: MKTG 621, MKTG 622, OPIM 631, OPIM 632.
Activity: Lecture
0.5 Course Units
Notes: Crosslisted with MKTG 655

OODD 656 Operations Strategy
This course examines how organizations can develop and leverage excellence in process management. The first module focuses on operations strategy. In these classes, we examine what constitutes an operation strategy and how organizations can create value by managing complexity, uncertainty, and product development. In the second half of the course, we discuss recent developments in both manufacturing and service industries. Specifically, we examine initiatives in quality, lean manufacturing and enterprise-wide planning systems. The course is recommended for those interested in consulting or operations careers, as well as students with an engineering background who wish to develop a better understanding of managing production processes.
One-term course offered either term
Prerequisites: OPIM 621, OPIM 631, and OPIM 632 or equivalent
Activity: Lecture
1 Course Unit
Notes: Crosslisted with ESE 522

OODD 658 Service Operations Management
The service sector represents the largest segment of most industrial economies. In the U.S., for example, it accounts for approximately 70% of GDP and 70% of employment. In addition to this "pure" service sector, the operations and competitive positions of many manufacturing firms are becoming increasingly service-oriented. While operational excellence is critical for success in most industries today, in a wide range of service industries this is particularly true. For example, recent, significant deregulation in banking, health care, and communications has led to intensified competition and pressure on operations. At the same time, the rapid evolution of information technology has enabled firms to operate in a fashion - and offer a level of service - that has not been previously possible. Elements common to most services make the management of their operations complex, however. In particular, services are intangible, not storable or transportable, and often highly variable. Frequently their delivery involves distributed operations with a significant amount of customer contact. All of these factors make service operations end up looking quite a bit different than manufacturing operations, and the task of achieving excellence in them requires specialized analysis frameworks and tools. This course covers a mix of qualitative and quantitative models that provide the necessary tools. The class will focus on simple models that should help you to better understand both the difficulty of managing and the underlying economics of the service operations being considered. You will have the opportunity to apply these course tools in a group service assessment project.
One-term course offered either term
Prerequisites: Courses in operations management, linear programming, probability and statistics
Activity: Lecture
0.5 Course Units

OODD 659 Advanced Topics
The specific content of this course varies from semester to semester, depending on student and faculty interest. Recent topics have included global operations, product design and development, quality management, and logistics strategy. See department for course description.
One-term course offered either term
Prerequisites: To enroll, you should have already completed one of the following courses: OIDD 415, MEAM 415, IPD 509, OIDD 515, IPD 515, MKTG 262, ARCH 725 or MKTG 853.
Activity: Lecture
1 Course Unit

OODD 662 Enabling Technologies
This course is about understanding emerging technology enablers with a goal of stimulating thinking on new applications for commerce. No prerequisite or technical background is assumed. The class is self-contained (mainly lecture-based) and will culminate in a class-driven identification of novel businesses that exploit these enablers. No prerequisite or technical background is assumed. Students with little prior technical background can use the course to become more technologically informed. Those with moderate to advanced technical background may find the course a useful survey of emerging technologies. The course is recommended for students interested in careers in consulting, investment banking and venture capital in the tech sector.
Also Offered As: OIDD 314
Activity: Lecture
1 Course Unit
Notes: Lectures, discussions, assignments and class participation.
OIDD 664 Database and Information Management Systems
Data and information are critical to the modern organization. Whether used in knowledge management, business intelligence, enterprise resource planning (ERP), product design, marketing, personalization and other aspects of managing customer relationships (CRM), the underlying principles of data management are the same. This course aims to provide a practical introduction to the fundamental principles. Examples and exercises will cover relational database tools and software such as XML, eXtensible Markup Language (XML) and UDDI, Universal Description, Discovery, and Integration (UDDI) standard.

One-term course offered either term
Activity: Lecture
1 Course Unit

OIDD 665 Operations Management in Health Care
In an era where health care systems around the world face rapidly rising costs and quality issues, organizations large and small are looking to the operational side of health care for solutions. Likewise, the abundance of unfulfilled needs in the health care marketplace has led to an array of technology ventures with innovative new products and services. In this course, we apply the tools of operations management to analyze the health care value chain. The course consists of four modules: (1) the management of productivity, quality, and variability by care providers, (2) capacity and investment decisions under uncertainty confronting pharmaceuticals, (3) the design of health insurance by health plans and the determination of health benefits by employers, and (4) business and operations models from the intersection of academic research and technology ventures. Students will learn from case discussions, hands-on decision tools, and several distinguished speakers and alumni from Stanford Hospital & Clinics, Merck, U.S. Naval Academy, and Deloitte Consulting. No prior exposure to the health care industry is assumed. The course prepares students for several career paths including consulting, operations management, and health care administration and is open to both first- and second-year MBA students.

Taught by: Faculty
Prerequisite: OPIM 631
Activity: Lecture
0.5 Course Units

OIDD 669 Advanced Topics in Information Strategy
The capstone course for the MBA major in Information Strategy, Systems, & Economics, OPIM 669 covers essential topics in information strategy - such as pricing of information goods, competing in electronic markets; market transparency and search issues; information-intensive strategies; IT outsourcing; and software project management - that have high impact on 21st-century business but are not typically covered in other Wharton courses.

Course usually offered in spring term
Activity: Lecture
1 Course Unit

OIDD 670 Special topics in Information Systems: Simulation and Dynamic Competitive Strategy
This course introduces tools and techniques for modeling dynamic competitive strategies - strategies that evolve over time as you and your competitors take actions in response to each other and to changes in the competitive environment. This goes beyond case discussions and approximates the rigor of theoretical and game theoretical analyses, even for problems for which no traditional analytical solutions exist. Students of the course will learn to model business environments and design simulators with the goal of gaining insight and designing policies for strategy implementation. Students will develop understanding of the timing and sequencing of the actions required, as well as understanding how to modify strategies on the fly based on changing conditions or objectives. Students are introduced to state of the art software for general purpose business modeling, and simulation.

Course not offered every year
Activity: Lecture
0.5 Course Units

OIDD 672 Decision Support Systems
The past few years have seen an explosion in the amount of data collected by businesses and have witnessed enabling technologies such as database systems, client-server computing and artificial intelligence reach industrial strength. These trends have spawned a new breed of systems that can support the extraction of useful information from large quantities of data. Understanding the power and limitations of these emerging technologies can provide managers and information systems professionals new approaches to support the task of solving hard business problems. This course will provide an overview of these techniques (such as genetic algorithms, neural networks, and decision trees) and discuss applications such as fraud detection, customer segmentation, trading, marketing strategies and customer support via cases and real datasets.

One-term course offered either term
Also Offered As: OIDD 410
Activity: Lecture
1 Course Unit
Notes: Lectures and discussions, written assignments, projects using software packages to build models.

OIDD 673 Global Supply Chain Mgmt.
Several forces, ranging from technology that has dramatically reduced the cost of communication, to political developments such as the opening up of China, Vietnam, and Eastern Europe, have created an avalanche of outsourcing and offshoring and lead to supply chains that stretch halfway around the world. This course will study the many questions that arise in the management of such global supply chains, including: Which design and production activities to do in house and which to outsource? Where to locate various activities around the world? How to forecast the many factors that influence these decisions, including inflation in cost factors such as labor and freight, and the likelihood of future government regulation or political instability? How to keep the supply chain flexible so as to adapt to change? How to manage a geographically dispersed supply chain, including what relationships to have with vendors to ensure low cost, high quality flexibility, safety, humane labor practices and respect for sustainability of the environment? The course is highly interactive, using case discussions in most classes and senior supply chain executives in many sessions.

Grades are based one-third each on class participation, individual write-ups of the discussion questions for 3 of the class sessions, and a course paper.
Activity: Lecture
0.5 Course Units
OID 676 Electronic Markets: Structures, Market Mechanisms and IT Enabled Strategies
This course deals with Electronic Markets and Market structures and the strategic uses of information within the firm. The course consists of four related modules on the design and functioning of Business to Business markets, use of technology to source services from global providers - i.e., outsourcing of business processes (as opposed to IT), the use of strategic technological platforms such as CRM and Web Services and the technology-enabled precision pricing techniques. Further, students are exposed to strategy formulation and execution in an online market where they compete both against each other and against (electronic) agents. This course is recommended for students interested in a career in consulting, strategic management and to students interested in information technology related professions. The course will be delivered through a mix of lectures, case discussions and hands-on trading in virtual markets using different market mechanisms. The course Web cafe will be used for discussions and responses from instructor and TA. We do not assume or require any specific technical knowledge. Workings of electronic markets and market mechanisms and how IT can enable the formulation of new strategies and empower firms to define new markets in ways that were not possible until recently. This is an advanced elective that covers several essential topics in information strategy - IT and market structure, impact of IT on knowledge-intensive products and services and creating hybrid markets that span multiple channels. Students will compete in simulated electronic markets, using different market mechanisms and formulate information-based strategies. Students will also study how IT has enabled the globalization of services through the outsourcing of processes (BPO) and how quasi market structures which combine elements of organization and markets are emerging in knowledge-intensive service industries.
Prerequisites: MGEC 621 is recommended.
Activity: Lecture
0.5 Course Units

OID 680 Operations Strategy Practicum
This course will focus on the management of operations at manufacturing and service facilities of domestic corporations and foreign multinational companies. Our emphasis will be on the evolving patterns of operations strategies adopted by firms for producing products, sourcing manufacturing, distributing products, delivering services and managing product design as well as on programs for enhancing quality, productivity and flexibility. The course will focus on the formulation and execution of such strategies for a collection of firms in the context of the current dynamics of global competition. The course consists of a set of site visits and in-class sessions which include lectures, case discussions and management speakers who will describe their company's current strategy.
Activity: Lecture
1 Course Unit

OID 690 Managerial Decision Making
The course is built around lectures reviewing multiple empirical studies, class discussion, and a few cases. Depending on the instructor, grading is determined by some combination of short written assignments, tests, class participation and a final project (see each instructor’s syllabus for details).
One term course offered either term
Also Offered As: MGMT 690
Activity: Lecture
1 Course Unit
Notes: Crosslisted with MGMT 690.

OID 691 Negotiations
Negotiation is the art and science of creating good agreements. In this course we will work on both, studying economics and psychology for the science, and practicing actual negotiations for the art. Throughout we think of negotiation in general terms, relevant not only to salary negotiations and home buying, but performance evaluations, speeches, group collaborations and interpersonal relationships. We practice these kinds of negotiations in 2, 3, 4, and 6-person exercises. Potential reasons to skip this particular negotiation course: 1) We have a strong attendance policy, 2) We have strong no-computers/phones policies, 3) the course is very discussion oriented, 4) We survey your work colleagues about your influence tactics, and 5) you have a short assignment due almost every class. Beginning with the second week of class, if you miss one class, you lose a letter grade. If you miss two classes you fail. We have this policy because it is an experiential class, and because your attendance directly affects classmates you are paired with. For some weeks you can attend another section if necessary. Cross-listed with MGMT691 and LGST806.
One term course offered either term
Also Offered As: LAW 517, LGST 806, MGMT 691, OID 691
Prerequisites: STAT 621, OPIM 621
Activity: Lecture
1 Course Unit
Notes: Crosslisted with LGST 806, MGMT 691. Lectures, cases, presentations, and written assignments.

OID 692 Advanced Topics Negotiation
This is a course the builds on the basic Negotiation course. In this course, we explore a wide range of negotiation topics from crisis and hostage negotiations, to the role of emotions including anxiety, envy and anger in negotiations, to backlash effects for women in negotiations, and the role of alcohol in negotiations. We will survey many aspects of current negotiation research, discuss historic negotiation cases, and students will participate in role-play exercise. Many of the role play exercises will involve multi-party negotiations and afford opportunities to hone skills in team-based negotiations.
One term course offered either term
Also Offered As: LGST 692, MGMT 692
Activity: Lecture
1 Course Unit
Notes: Cases, presentations, lecture and discussion.

OID 693 Influence
One term course offered either term
Also Offered As: LGST 693
Activity: Lecture

OID 695 Semester in San Francisco Regional Seminar
As part of the Wharton Semester in San Francisco (SSF) program, this course is designed to (i) provide integrative material that emphasizes links between finance, marketing, product design, negotiations, and other themes in the SSF academic curriculum; (ii) link classroom theories and principles to actual practice by reflecting on the academic literature and (iii) highlight the unique characteristics of, and the programs proximity to, the Bay Area economy. All students participating in the SSF are required to register for this Regional Seminar.
One term course offered either term
Activity: Lecture
0.5 Course Units
OIDD 697 Retail Supply Chain Management
This course is highly recommended for students with an interest in pursuing careers in: (1) retailing and retail supply chains; (2) businesses like banking, consulting, information technology, that provides services to retail firms; (3) manufacturing companies (e.g. P&G) that sell their products through retail firms. Retailing is a huge industry that has consistently been an incubator for new business concepts. This course will examine how retailers understand their customers’ preferences and respond with appropriate products through effective supply chain management. Supply chain management is vitally important for retailers and has been noted as the source of success for many retailers such as Wal-mart and Home Depot, and as an inhibitor of success for e-tailers as they struggle with delivery reliability. See M. L. Fisher, A. Raman and A. McClelland, "Rocket Science Retailing is Coming - Are You Ready?", Harvard Business Review, July/August 2000 for related research.
One-term course offered either term
Also Offered As: OIDD 397
Activity: Lecture
0.5 Course Units
Notes: Lectures, case discussion, guest speakers. Class participation, papers, and a term report.

OIDD 698 Value Networks
This is a project-based course run in a seminar format to explore current trends and opportunities for integration and coordination in IT-enabled value-chain networks. The curriculum is structured around a live case; students will work in teams to synthesize data from the live case and evaluate possible operational strategies and IT enablers in the context of a real, on-going business restructuring decision. Students will review a set of operations strategies affecting production, fulfillment, procurement product design, and support that may prove relevant e.g. Postponement, Mass Customization, Customer Service Differentiation, Buyer/Supplier Coordination. We also consider functionality that underlies relevant information technologies like Enterprise Resource Planning (ERP) or Customer Relationship Management (CRM), e.g. data integration, information quality, and security. Finally, we invite different vendors into the class to provide students with the opportunity to compare and contrast state-of-the-art IT and Operations Management solutions. Course not offered every year
Also Offered As: OIDD 398
Activity: Lecture
1 Course Unit

OIDD 761 Risk Analysis and Environmental Management
This course is designed to introduce students to the role of risk assessment, risk perception and risk management in dealing with uncertain health, safety and environmental risks including the threat of terrorism. It explores the role of decision analysis as well as the use of scenarios for dealing with these problems. The course will evaluate the role of policy tools such as risk communication, economic incentives, insurance, regulation and public-private partnerships in developing strategies for managing these risks. A project will enable students to apply the concepts discussed in the course to a concrete problem. Cross-listed with BPUB 761.
One-term course offered either term
Also Offered As: BEPP 261, BEPP 761, BEPP 961, OIDD 261
Activity: Lecture
1 Course Unit
Notes: Cross-listed with OPIM, BPUB, and ESE 567

OIDD 762 Environmental Sustainability and Value Creation
This course provides an overview of topics related to corporate sustainability with a focus on how sustainable approaches can create value for the firm. We will explore trends in corporate practices and consider several case studies to examine the interactions between the firm and the environment. Several guest lecturers will discuss how they have addressed sustainability within their company. This course has three objectives: to increase your knowledge as future top decision makers on key environmental questions; to recognize environmental concerns as competitive opportunities; to teach students to think strategically and act entrepreneurially on environmental issues. You will leave the class with a toolkit for action.
One-term course offered either term
Activity: Lecture
0.5 Course Units

OIDD 763 Energy Markets & Policy
Also Offered As: BEPP 763
Activity: Lecture
1 Course Unit

OIDD 898 Advanced Topics
Course not offered every year
Activity: Lecture
1 Course Unit

OIDD 900 Foundations of Decision Processes
The course is an introduction to research on normative, descriptive and prescriptive models of judgement and choice under uncertainty. We will be studying the underlying theory of decision processes as well as applications in individual group and organizational choice. Guest speakers will relate the concepts of decision processes and behavioral economics to applied problems in their area of expertise. As part of the course there will be a theoretical or empirical term paper on the application of decision processes to each student's particular area of interest.
One-term course offered either term
Prerequisite: STAT 510 or 550
Activity: Lecture
1 Course Unit
Notes: Non-PhD students must contact instructor for permission to enroll.

OIDD 904 Experimental Economics
Many theories in economics can be tested usefully in experiments in which researchers control parameters that are uncontrolled in natural settings. This course presents the theory of the experimental method and validity along with several examples of experimental testing: simple competitive equilibrium, intertemporal competitive equilibrium, asset markets, futures markets, bargaining models, tournaments, reputation-building in repeated games, etc.
Course not offered every year
Also Offered As: BEPP 904
Prerequisite: OIDD 900 or permission of the instructor
Activity: Lecture
1 Course Unit

OIDD 906 Proseminar in Operations and Information Management
Advanced seminar focusing on topics in Operations, Information and Decisions research
Course not offered every year
Activity: Seminar
1 Course Unit
OIDD 910 Concepts of Math Programming
Introduction to mathematical programming for PhD students who would like to be intelligent and sophisticated consumers of mathematical programming theory but do not plan to specialize in this area. Integer and nonlinear programming are covered, including the fundamentals of each area together with a sense of the state-of-the-art and expected directions of future progress.
Course usually offered in fall term
Also Offered As: ESE 504
Activity: Lecture
1 Course Unit
Notes: Crosslisted w/ ESE 504.

OIDD 912 Introduction to Optimization
This course constitutes the second part of a two-part sequence and serves as a continuation of the summer math camp. Mathematical optimization provides a unifying framework for studying issues of rational decision-making, optimal design, effective resource allocation and economic efficiency. It is a central methodology in many business-related disciplines, including operations research, marketing, accounting, economics, game theory and finance. In many of the disciplines, a solid background in optimization theory is essential for doing research. This course provides a rigorous introduction to the fundamental theory of optimization. It examines optimization theory in two primary settings: static optimization and optimization over time (dynamic programming). Applications from problem areas in which optimization plays a key role are also introduced. The goal of the course is to provide students with a foundation sufficient to use basic optimization in their own research work and/or to pursue more specialized studies involving optimization theory. The course is designed for entering doctoral students. The prerequisites are calculus, linear algebra and some familiarity with real analysis, as covered in summer math camp. Other concepts are developed as needed throughout the course.
Prerequisites: OIDD 910, OIDD 930.
Activity: Lecture
0.5 Course Units

OIDD 913 Advanced Linear Programming
Course not offered every year
Prerequisite: OIDD 910/ESE504 or equivalent
Activity: Lecture
1 Course Unit

OIDD 914 Advanced Non-Linear Programming
Course not offered every year
Prerequisite: OIDD910 or equivalent
Activity: Lecture
1 Course Unit

OIDD 915 Advanced Graph Theory
Deals mainly with algorithmic and computational aspects of graph theory. Topics and problems include reachability and connectivity, setcovering, graph coloring, location of centers, location of medians, trees, shortest path, circuits, traveling salesman problem, network flows, matching, transportation, and assignment problems.
Course not offered every year
Prerequisite: OIDD910 / ESE504 or equivalent
Activity: Lecture
1 Course Unit

OIDD 916 Advanced Integer Programming
In-depth review of solution methods: Lagrangean relaxation and column generation, Benders partitioning, cross-decomposition, surrogate relaxation, cutting planes and valid inequalities, logical processing, probing, branch and bound, branch and-price. Study of special problems and applications: matching, location, generalized assignment, traveling salesman, forest planning, production scheduling. Prerequisite: OIDD 910/ESE 504 or equivalent. Please email the instructor for any questions regarding the prerequisite.
Course not offered every year
Prerequisite: OIDD 910/ESE 504 or equivalent
Activity: Lecture
1 Course Unit

OIDD 920 Empirical Research in Operations Management
Empirical research in Operations Management has been repeatedly called for over the last 10-15 years, including calls made from the academic thought leaders in the field as well as by many of the editors of the top academic journals. Remarkably though, most researchers in the field would be pressed to name even three empirical papers published in such journals like Management Science or Operations Research. But, has there really been so little published related to empirical Operations Management (you might be surprised to learn that all five bullets listed above has been addressed by Management Science papers)? What types of problems in operations are interesting and worthwhile studying from an empirical viewpoint? How can one get started with an empirical research project in Operations Management? These are the questions that are at the heart of this course. Specifically, the objective of this course is to (a) expose doctoral students to the existing empirical literature and (b) to provide them with the training required to engage in an empirical study themselves.
Activity: Lecture
0.5 Course Units

OIDD 930 Stochastic Models
This course introduces mathematical models describing and analyzing the behavior of processes that exhibit random components. The theory of stochastic processes will be developed based on elementary probability theory and calculus. Topics include random walks, Poisson processes, Markov chains in discrete and continuous time, renewal theory, and martingales. Applications from the areas of inventory, production, finance, queueing and communication systems will be presented throughout the course.
Course usually offered in fall term
Prerequisite: STAT510 or 550 or equivalent
Activity Lecture
0.5 Course Units
OIDD 931 Stochastic Processes II
Extension of the material presented in OIDD930 to include renewal theory, martingales, and Brownian motion.
Course usually offered in spring term
Prerequisite: OIDD930
Activity: Lecture
0.5 Course Units

OIDD 932 Queuing Theory
This course presents the mathematical foundations for the analysis of queueing systems. We will study general results like Little's law and the PASTA property. We will analyze standard queueing systems (Markovian systems and variations thereof) and simple queueing networks, investigate infinite server models and many server approximations, study GI/G/1 queues through random walk approximations, and read papers on applied queueing models.
Course offered spring, even-numbered years
Prerequisites: OIDD930 and OIDD931
Activity: Lecture
0.5 Course Units

OIDD 934 Dynamic Programming and Stochastic Models
The course goal is to provide a brief but fairly rigorous introduction to the formulation and solution of dynamic programs. Its focus is primarily methodological. We will cover discrete state space problems, over finite or infinite time horizon, with and without discounting. Structured policies and their theoretical foundation will be of particular interest. Computational methods and approximation methods will be addressed. Applications are presented throughout the course, such as inventory policies, production control, financial decisions, and scheduling.
Course usually offered in spring term
Prerequisite: OIDD930
Activity: Lecture
0.5 Course Units

OIDD 937 Methods Stumblers: Pragmatic Solutions to Everyday Challenges in Behavioral Research
This PhD-level course is for students who have already completed at least a year of basic stats/methods training. It assumes students already received a solid theoretical foundation and seeks to pragmatically bridge the gap between standard textbook coverage of methodological and statistical issues and the complexities of everyday behavioral science research. This course focuses on issues that (i) behavioral researchers are likely to encounter as they conduct research, but (ii) may struggle to figure out independently by consulting a textbook or published article.
One-semester course offered either term
Activity: Lecture
0.5 Course Units

OIDD 940 Operations Management
Concepts, models, and theories relevant to the management of the processes required to provide goods or services to consumers in both the public and private sectors. Includes production, inventory and distribution functions, scheduling of service or manufacturing activities, facility capacity planning and design, location analysis, product design and choice of technology. The methodological basis for the course includes management science, economic theory/organization theory, and management information system theory.
One-semester course offered either term
Activity: Lecture
1 Course Unit
Notes: Crosslisted with ESE 620

OIDD 941 Distribution Systems Seminar
Seminar on distribution systems models and theory. Reviews current research in the development and solution of models of distribution systems. Emphasizes multi-echelon inventory control, logistics management, network design, and competitive models.
Course usually offered in spring term
Prerequisite: OIDD940
Activity: Lecture
1 Course Unit

OIDD 943 Retail Operations
Activity: Lecture
0.5 Course Units

OIDD 950 Perspectives on Information Systems
Provides doctoral students in Operations and Information Management and other related fields with a perspective on modern information system methodologies, technologies, and practices. State-of-the-art research on frameworks for analysis, design, and implementation of various types of information systems is presented. Students successfully completing the course should have the skills necessary to specify and implement an information system to support a decision process.
One-semester course offered every term
Activity: Lecture
1 Course Unit

OIDD 951 Seminar on Logic Modeling
Seminar on the elements of formal logic necessary to read and contribute to the Logic Modeling literature, as well as the implementation principles for logic models. The primary topics include elements of sentence and predicate logic, elements of modal logics, elements of semantics, mechanical theorem proving, logic and database, nonmonotonic reasoning, planning and the frame problem, logic programming, and metainterpreters.
Course not offered every year
Prerequisites: Permission of the instructor and some prior knowledge of logic or Prolog
Activity: Seminar
1 Course Unit

OIDD 952 Computational Game Theory
Seminar on principles of knowledge-based systems including expert systems. Topics include basics of expert systems, knowledge representation, meta-level reasoning, causal reasoning, truth maintenance systems, model management, planning systems and other applications.
Course not offered every year
Prerequisites: Permission of instructor and knowledge of logic and Prolog or Lisp
Activity: Seminar
1 Course Unit

OIDD 955 Research Seminar in Information Systems
This course provides an overview of some of the key Information Systems literature from the perspective of Information Strategy and Economics (ISE) and Information Decision Technologies (IDT). This course is intended to provide an introduction for first year OIDD doctoral students, as well as other Wharton doctoral students, to important core research topics and methods in ISE and IDT in order for students to do research in the field of Information Systems. While it is intended as a "first course" for OPIM doctoral students in ISE and IDT, it may also be useful for students who are engaged in research or plan to perform information technology related research in other disciplines.
Activity: Lecture
1 Course Unit
OIDD 960 Research Seminar in Information Technology - Economic Perspectives

Explores economic issues related to information technology, with emphasis on research in organizational or strategic settings. The course will follow a seminar format, with dynamically assigned readings and strong student contribution during class sessions (both as participant and, for one class, as moderator.)

Course usually offered in fall term

Activity: Lecture
1 Course Unit

OIDD 961 Research Seminar in Information: Strategy, Systems and Economics

This is the advanced doctoral level research research in information strategy and economics that builds on the foundations developed in OPIM960. Much of the content will be focused on current research areas in information strategy such as the information and organizational economics, information technology and firm performance, search cost and pricing, information and incentives, coordination costs and the boundary of the firm, and the economics of information goods (including pricing and intellectual property protection). In addition, promising empirical approaches such as the use of intelligent agents for data collection or clickstream data analysis will be discussed.

Activity: Lecture
1 Course Unit

OIDD 989 Topics in Operations and Information Management

The specific content of this course varies from semester to semester, depending on student and faculty interests.

Course not offered every year

Activity: Lecture
0.5 Course Units

OIDD 992 Conflict Mgmt Seminar

This seminar exposes students to the central issues in conflict management research. This course covers both analytic and behavioral perspectives of conflict management, and describes how the field has developed. Through discussions of theory and empirical research, the course aims to develop a foundation for understanding the extant literature and how common methodological tools have shaped the types of questions conflict management scholars have investigated - and neglected.

Course usually offered in spring term

Activity: Lecture
1 Course Unit

Organizational Anthroplogy (ORGC)

ORGC 160 Leading Teams

In this course, students learn about the basics of team dynamics. Students explore the foundations of effective teams, and understand why they inevitably become misaligned. Students then step through a process for generating passion and high-performance in any group that has to work together toward a common goal. Through engaging case studies and role plays, students get practice diagnosing and managing interpersonal issues that can derail teams.

Activity: Online Course
1 Course Unit

ORGC 201 Virtual Collaboration

Virtual Collaboration looks at interconnections and synergies that can be intentionally created in the virtual space of workby following frameworks and techniques that allow greater and more frequent exchange of views, freedom to express divergent views and harness the richness of variety of people, thoughts, geographies, cultures and social norms, intelligence and above all experience. Students practice course tools and techniques by collaborating and providing peer feedback in the virtual classroom environment.

Activity: Online Course
1 Course Unit

Organizational Dynamics (DYNM)

DYNM 500 Foundations of Research and Scholarship

A main objective of this foundation course is to improve the academic papers and presentations in all Organizational Dynamics work, including the capstone. Because the discipline of writing for academic purposes is based on skills that are not common to business writing and because the writing process is central to learning in this program, Organizational Dynamics offers this course designed to assist participants in developing efficient, reliable, and fruitful academic writing and presentation techniques.

Taught by: Barstow, Greco, and Shapiro

Prerequisites: Non-DYNM students must complete a course permit request form: https://www.sas.upenn.edu/lps/graduate/dynamics/cour...

Activity: Seminar
1 Course Unit

Notes: DYNM Category: F

DYNM 501 Perspectives on Organizational Dynamics

"Perspectives" is both a fundamental and integrating course intended for MSOD students at any point in the program who wish to understand and deploy a multiplicity of dynamics operative in organizations and in the minds that create and inhabit them. It is particularly useful for those in their first year and for non-MSOD students. One key focus is on understanding the implicit mental and emotional frameworks or metaphors that "inform" organizing so that we can virtually see more robust and complex approaches to effectiveness and to leadership within them. Several faculty members highlight their specialties. One special theme examines new management models and thinking frameworks designed to prevail in a 21st century context. Lectures, discussion, and experiential learning are used to build an informed grounding in the history, philosophy, theory and practice of Organizational Dynamics. The course requirements are active class participation, potential application projects/weekly journal, a midterm paper and a final paper.

Taught by: Greco

DYNM 542 Theories, Models, and Practices that Inform Coaching
This course will examine how theory guides the effective practice of coaching. Students will be introduced to a theory and model that encompasses a multi-disciplinary approach to coaching in an organizational setting. With this framework as a basis, students will select, research, and present a theoretical model of their own choosing and design a coaching application that demonstrates theory in action. Students will leave the course with an array of theoretical frameworks and practical techniques that would enhance their own coaching capabilities as managers and consultants. Undergraduates may enroll in 500-level courses only with permission of the instructor.
Taught by: Gorenstein

DYNM 551 Devil's Advocate: Power of Divergent Thinking
Short term or long term? Us or them? Build or buy? Margin or volume?
My way or the highway! Ad infinitum, apparent forced choices—or no choice—and limited perspectives can create costly lugs of war or constricted judgment without our minds (and hearts) and in organization dynamics, persuasive, and often hidden, divergence in thinking offers great opportunity for learning, creativity, and sound decision-making. This course offers several robust, practical techniques for bringing the value of diverse perspectives in politically productive ways to leadership thinking, communications, and organization dynamics.
Taught by: Greco

DYNM 552 Strategic Crowdsourcing & Business Models
This online course offers insight on how innovative firms are organizing strategically to gain advantage from engaging online with the value distributed resources held by a global pool of individuals. Through cases derived from original research, including Amazon, Facebook, Netflix, oDesk, Kiva, Wikipedia, among others, this course unveils the business models that these organizations use to create new value by working with "crowds" online. Open, distributed, online approaches to work and innovation have been widely studied over the past decade in the context of the computer and software industry (e.g. Benkler 2002, Chesbrough 2003; von Hippel and von Krogh 2003). Many of those concepts have since then permeated other industries, eventually giving birth to a distributed organizational paradigm referred to as "crowdsourcing" (e.g. Howe 2008; Villarroel 2008). The crowdsourcing model has proven valuable for innovation, work, entrepreneurship, among other applications. For example, in 2011, a crowd innovation initiative involving 57,000 individuals solved a decade-old scientific problem in molecular biology in only 3 weeks. In 2012, the top 3 crowd labor platforms brought skilled work to 6 million people in over 200 counties. In 2013, US $5 billion are expected to be invested in crowd-funded projects around the world. The aims of this course are (1) to gain a solid understanding of the business models in crowdsourcing; (2) to benefit from first-hand experience with the "power of the crowd", (3) to critically analyze the potential and limitations of this new organizational paradigm.

DYNM 553 Becoming a Courageous Follower
This course will examine both personal and professional behaviors that constitute effective followership. While the leadership literature is saturated with books on becoming better leaders, there is a dearth of awareness on finding and supporting those who follow those leaders effectively. Students will use surveys from the limited literature on effective followership to profile their own organization's dynamics on styles of followership, and stories of success and failure in confronting organization mistakes and leadership errors will be researched. The outcome of the class will be a personal profile on followership style and an organizational profile on its followership culture.

DYNM 555 The Idea of Nationalism
Nationalism has been the most important geo-political phenomenon of the past two hundred years. Its continuing power has been amply demonstrated by recent events in many parts of the world. The principle of national self-determination and closely related notions of individualism and human rights shape the global context in which businesses, governments, organizations, and individuals must operate in the 21st century. This seminar course will explore the ideology of nationalism through the lens of institutions and organizations, corporations, nonprofits, government, NGOs, unions, religious communities, etc. Starting with concrete examples from students’ own experiences and the contemporary conflicts confronting governments, organizations, and businesses, we will examine the ideology of nationalism, its meaning and content, its philosophical foundations, its underlying assumptions about the nature of human identity, and its contemporary expressions in nationalist movements and ethno-political conflicts around the world. In the process, we will explore such questions as: What is a nation? Does every identifiable ethnic or national group have a valid claim to a nation-state of its own? How are claims to national self-determination justified? Why do nationalist movements seem so often to engender political extremism and violent ethno-political conflicts? Is national self-determination compatible with our commitments to individualism, rationality, and universal human rights? What are the best strategies to cope with the persistence of nationalism in the 21st century?

DYNM 558 Social Media and the Organization
If you don’t yet believe in the social media revolution, then watch this: http://www.youtube.com/watch?v=ZQzsQkMFgHE. Facebook. Twitter. Pinterest. Tumblr. Path. Delicious. Digg. Youtube. LinkedIn. It’s been less than a decade since many of these social media services have launched, yet they’ve transformed society in many significant ways. Social Media and the Organization will deepen your understanding of and offer real-time practical experience with social media. The course will examine the current trends and use of social media in marketing, product development, customer service, networking, and other facets of organizational policy and practice. Students will have hands-on participation online with the class blog, http://upennsocialbook.wordpress.com, sharing relevant case studies, analyzing social media campaigns and critiquing their own organization’s culture and values surrounding social media including social media policy, staff challenges, and evaluation of challenges and opportunities in its use.

DYNM 559 Research Methods to Develop Dynamic Expertise
It’s not enough to be competent, educated, smart and professional. Globalization, technology, and vastly improved communications have increasingly led to “Winner Take All” markets. Consider the local opera house: 100 years ago, Iowa alone had more than 1,500 of them. Thousands of sopranos earned adequate, if modest, livings from the live performances, but now, thanks to i-pods, the world’s best soprano can be literally everywhere at once. And since it costs no more to transmit MP3s of Renee Fleming’s Mozart arias than her understudy’s, most opera fans listen to Fleming. Thus, Fleming earns several million dollars a year while most other sopranos, many of whom are almost as talented, struggle to get by. The same is increasingly true of other professions: Those who are recognized for being the best at what they do can sell their services anywhere and everywhere at top dollar, whereas those who lack such recognition find their services valued less and less—if they are valued at all. As graduate students at the University of Pennsylvania, you have an extraordinary opportunity to become the leading expert in a given domain in a few short years, maybe less.

DYNM 601 Gender, Power, and Leadership in Organizations
For the last seven years, issues related to gender in organizations and organizational leadership have not been hot topics of discussion in the popular media, in organizations themselves, or in academia. That is no longer true. The advent of #metoo and the revelation of sexual harassment in corporations, government sector organizations, and nonprofits has highlighted the ways in which those with more power have been using their power to both harass and silence their victims, many of whom are women—even though this dynamic is true for others belonging to groups with less power. Addressing these issues effectively will require more than lawsuits and more than sexual harassment and bystander training. This course will explore what will be required if we are to have organizations that effectively leverage the skills and talents of both men and women. Although in the last 30 years there has been some significant progress made in placing women in leadership roles in organizations, we will take a deep look at the data about where and how gender differences continue to exist in organizations including differences in both professional and outcomes.

DYNM 602 Leader-Manager as Coach
New work technologies, increased competition, and employees’ desire for more involvement in their work are changing the traditional role of the manager. Rather than directing, planning, and controlling the work, managers and leaders are facilitating processes and coaching and developing their employees. Team-based organizations are built on coaching as a core requirement of the team leader role. This course explores the theory and practices of individual coaching as leadership behavior. The focus is on helping managers develop their skills and improve their performances as coaches. We will examine the need to provide others with successful performance strategies, timely feedback on strengths and on development needs, and growth opportunities in order to challenge others to reach their potential. We will explore workplace environments that foster the growth and achievement of those we lead.

DYNM 603 Leading Emergence: Creating Adaptive Space in Response to Complex Challenges
This seminar is designed to be highly experiential so that participants can engage in the practices necessary to enable innovation and adaptation. Participants will examine emergent innovation theory by addressing the dynamics and conditions in which ideas emerge in an informal manner, garner organizational attention, and gain momentum towards becoming successful innovations or bold changes within complex organizations. This will include examining the need for adaptive space in generating value that drives growth by enabling an environment of idea generation, entrepreneurship and innovation while leveraging the benefits of existing, formal systems to scale these ideas. Participants will explore and engage in such topics as creative experimentation, idea emergence, organizational network analysis, social capital, design thinking, organizational analytics and complexity leadership.

DYNM 604 Enterprising Risk Management
Can enterprises undertake effective risk management in our globalized, interdependent economy? What risk management role do we play in our organizations? We will apply readings and engage in case studies to discuss whether our organizations do or should manage risks as strategically as opportunities. We’ll also examine our involvement with our organizations’ risk management. By the conclusion of the course, you will develop a framework for addressing risk in your current organization or future enterprise.

DYNM 605 Resolving Project Risk, Uncertainty, and the Unexpected
DYNM 605 is a uniquely blended content of thought leadership vetted by subject matter experts worldwide. This participant-centered seminar is an opportunity to increase both awareness and knowledge of risk and uncertainty by examining causes of unexpected events in predictive (classic) and adaptive (agile) project frameworks. Successful applications of non-deterministic approaches are explored as antidotes to constrained command and control project environments. Course content is valuable in roles, organizations, and sectors of all types. Prominent project/operational risk management methodologies are included in this seminar. Processes advanced by the Project Management Institute, U.K. Association for Project Management, International Council on Systems Engineering, and by the International Organization for Standardization are contrasted with industry specific practices, including the U.S. Food and Drug Administration, NASA, and the Departments of Defense and Energy. Case examples are based on relevant experience. Participants perform hands-on implementation of processes in realistic team working sessions and facilitated dialogue. Spreadsheet/network analysis using Monte Carlo Simulation tools will be included in the course and clinics (see syllabus).

DYNM 606 Leading from the Center: Unleashing Your Leadership Potential
This seminar is designed to support existing and emerging leaders who recognize their need for more adaptive leadership skills to effectively respond to rapidly changing environments. We will weave leadership theory and practice in a highly experiential seminar so that participants can actively engage in a leadership lab including deep reflective thinking, rapid prototyping and experimenting with new behaviors and practices. The purpose of the seminar is to evoke personal leadership at more impactful levels and improve organizational performance and personal satisfaction. Participants will examine their own, and others’, leadership theories by identifying assumptions about leading, creating a preferred model for individual leadership, and field testing actual shifts in behavior. Participants will engage in a three-part exploration over the course of the seminar: first, we will have an opportunity to examine our own models and those of the leading theorists in the field; second, participants will be asked to articulate and improve their own model; and finally, participants will be asked to activate and test their model and report back on the experience. This course is designed to create an ‘action-learning’ community in which you will integrate your professional experience, this class, and other graduate course work with a final exploration of leadership concepts, theory, and applied practice. This course is also designed to strengthen your ability to lead, including as a colleague who can support leadership behavior in peers and as one who can promote leadership behavior in supervisors and subordinates.

DYNM 607 Psychodynamics of Organizations
As an area of study, the psychodynamics of organizations draws out attention to the tacit, implicit, and unconscious dimensions of organizational life. It presumes that a person takes up his or her role at work by drawing on both individual history and the organizational context that helps define a role, its boundary, and the resources available to take it up. In both these aspects, the organizational context, and one’s individual biography, people are often unaware of the thoughts and feelings that animate their behavior. This course will introduce students to some basic concepts of psychoanalysis, which focuses on individual motivation, and systems psychodynamics, which focuses on group dynamics and group psychology. System psychodynamics also emphasizes how an organization’s primary task, or its “reason for being” influences individual experience. Readings include case studies as well as expositions of theory. The instructor will also draw on his own consulting cases.

DYNM 608 Organizational Dynamics of Working in a Global Marketplace
This course examines some of the sources of confusion, conflict, misperception and error that arise when representatives of U.S. organizations interact and work in the global marketplace. The aim is to heighten awareness, help avoid personal or professional pitfalls, and to more effectively manage some of the organizational and business challenges that arise when operating across dissimilar environments. We will focus on areas including: ethics, culture, language, ethnicity, religion, gender, the political and legal systems, labor, corruption, and corporate organization. Each class session will begin with a short, interactive introductory lecture, followed by discussion around assigned readings and mini-cases.

DYNM 609 From Traditional Project Management to Transformational Project Leadership
The primary objective of this course is to provide a comprehensive framework for analyzing both current and future expectations for success of Project Leaders in the context of Project Management, Project Teams, and the Project/Program/Portfolio Management Office (PMO) by addressing the following questions: 1) What is the track record of Project Management and what capabilities are required to succeed as a Project Leader in a complex and evolving business environment? 2) What characteristics does a Project Leader possess and can every Project Manager become a successful Project Leader? 3) How can Project Managers better integrate their left-brained analytic intelligence with their right-brained emotional intelligence to become successful Project Leaders? 4) What are the desired attributes of a transformational leader and what organizational barriers may impede transformational change? 5) What are the roles and responsibilities of the Project Leader as Team Leader, Coach, and Mentor? 6) How can Project Managers and Project Leaders better prepare themselves for integration into PMOs within their organizations?

DYNM 610 Knowing Yourself: The Coach as an Instrument of Change
Note: This class is predicated on the assumption that prior to offering coaching assistance, a coach should have a deep understanding of his or her own behavior and its impact on a client. Utilizing validated tools and strategies available for coaches, the students practice sets of coaching skills on each other. This includes practice in interviewing and observational skills. In addition, students will have the opportunity to give and analyze 360 degree feedback data, as well as use a variety of other instruments that can be foundational for a useful coaching experience. Premise: Coaching others is very serious business. Intrepid individuals willing to take on this responsibility should be willing to answer the following questions: Who am I as a leader and helper? What are the assets I bring to the coaching relationship? What are my deficits, overused strengths, or underutilized skills and behaviors? What historical influences from my family of origin influence my capacity to build a positive relationship with my coaching client? Are there discrepancies in relation to my self-perceptions and those who know me well—family members, peers, colleagues, friends, boss, and direct reports? As a result, are these specific areas of personal development that I need to address as I move? Similar to most traditional programs where the focus is on the management of change, the course is organized to: 1) A diagnostic phase in which the values, history, assumptions, and behaviors of the client will be assessed. In this case the client will be the student/coach. 2) The applied phase in which analysis, interpretation, and formal learning will be the central focus. The end result will be individuals with a deep and abiding understanding of their own psychodynamics and their personal impact. Finally, by modeling many of the tools and strategies useful in any effective coaching effort and practicing them on themselves and their student peers, it is hoped that the experiential nature of the course will allow maximum transference to the real work of coaching.

DYNM 611 Effective Collaboration for a Changing Global Workplace
Effective collaboration requires a combination of strong self-awareness and an ability to make adjustments at the individual and group level. This course provides tools for building teams that leverage individual strengths and a mutual learning process of continuously addressing collaboration barriers to improve team performance. This seminar/lab is designed to extend each participant's analytical skills and gain practice implementing high performance practices through a team-based simulation. Specific learning objectives are to: 1. Understand leading-edge frameworks for building effective teams. 2. Learn and apply tools for diagnosing barriers to collaboration. 3. Develop implementation plans for teams and organizations consistent with best practices. 4. Provide tools for self-assessment of participants to leverage their strengths for teamwork success. 5. Apply learning from classroom-based teamwork simulation to participants' real-life experiences.

DYNM 612 Mastering Organizational Politics and Power
The purpose of this course is to explore, enhance, and expand the participants' competence in organizational politics. Students will observe political dynamics as they occur in their own organizations and will interview senior managers in other organizations to learn how political realities vary from one organization to another. Theoretical ideas about a dimension of organizational politics of particular interest to each individual participant will be analyzed in a term paper. In addition, each participant will keep a personal diary of political dynamics in his or her own workplace. The course will also explore ways to master the political skills of networking, negotiating, influencing, leading, and following, as well as developing a political strategy.

DYNM 617 Economics of Human Behavior and Organizational Life
As a society, we choose many different ways to organize different aspects of our lives. The institutions and organization we choose to provide us with the necessities and comforts of life range from the fundamental institutions of family and religious organizations, to firms in the capitalistic market and democratically elected governments. We respond to this environment in unique ways: we marry, we worship, we buy and sell goods and services, and we vote. The primary goal of this course is an examination of the various aspects of human behavior in the context of organizational and institutional life from an economic perspective. We recognize that the choices we make are sensitive to the costs and benefits of different actions and use this economic perspective to gain insights into social, economic and political behavior in our daily lives. We start the course with an examination of how micro economists view the world and examine their favorite toolkit. We discuss concepts such as: efficiency, opportunity cost, marginal analysis, externalities, incentives, free-riding, rent-seeking, and transaction costs. These concepts are fundamental if an economic perspective and they will be presented using every day examples. Before concluding the course, we will look at several topics such as: Human capital and investment in education (Should you invest in an Ivy League school education?); Law and enforcement (When is it profitable to break the law?); Bribe and gifts (Quid pro quo?); Economics of information (Used cars and the market for "lemons"); Why do we discriminate against minorities?; Property rights and externalities (The tragedy of the commons: Should we have smoke-free environments?); and Free-riding (Should I vote in the next election? Should I volunteer to clean up?)

DYNM 618 Strategic Crowdsourcing and Business Models 2.0
Crowdsourcing is among the most impactful innovations in organization of the 21st century, enabling the rise of distributed organizations. In this course, we will learn the radical business models used by a new generation of companies that transcend the format boundaries of the firm—e.g., Uber, oDesk, Kickstarter, among hundreds of such distributed organizations. The crowdsourcing economy is rapidly expanding, with at least 117 distributed work companies receiving venture capital in 2013–up from 17 in 2009 and 55 in 2011 (The Economist, 2015). Entrepreneurs taking this course will understand how crowdsourcing startups made big strides in the global economy. For example, five-year-old Uber—founded in 2009—developed operations in more than 50 countries, reaching sales of $1 billion in 2014. It received $3.3 in venture capital, valued at more than $41 billion in December 2014 (The Wall Street Journal, 2014). Uber offers an online platform connecting self-selected drivers and users who use a smartphone app to interact with the service. Any interested driver, who has a car and a smartphone, can sign up to be an Uber driver.

Notes: This course will be in a hybrid in-person and online course.

DYNM 619 Organizational Project Management
The course provides an overview of the concepts, procedures, and fundamental processes of project management for working professionals. Participants are introduced to the principles, tools, and techniques of project management within an integrative framework. The course emphasizes that, for most organizations, projects are the primary means for implementing strategic initiatives. Course Objectives: 1) Understand and critically evaluate expectations, procedures and processes of program management as currently practiced in large for-profit enterprises; 2) Understand the content and processes and standards of practice as defined by the Program Management Institute (PMI); 3) Understand how to build and manage effective project teams; 4) Become familiar with the critical components of effective project plans. In addition to the scheduled meeting dates, additional class activities will be planned between faculty and students.

DYNM 620 The Art and Science of Paradox in Organizations
This course introduces multiple approaches to understand and interpret the paradoxes that baffle us, such as: 1) Why is it that we go to hospitals to be healed and get well, but we leave sick and infected? 2) How is it that we come together to do purposeful work and end up doing mundane, boring tasks? 3) Why is it that banks were created to protect and ensure financial security, but banks have caused a global recession? 4) Why do we not learn from history? Why do we repeat the mistakes we have made before? 5) Why is it that the "Developed and Advanced" countries of the world are destroying the planet? This highly interactive, flexible, and remarkably diverse online course will offer frames to observe the paradox in ourselves, our families, our friendships, our workplace, and our relationships with individuals, teams, and systems—the three units of analysis that constitute every paradoxical situation. Paradox appears in our organizations, our relationships, and our experience as contributing members and leaders of our society.

**DYNM 621 Project Portfolio Management**

The primary objective of this course is to enable participants to gain a thorough understanding of and appreciation for the discipline of Project Portfolio Management. Ill-defined and poorly utilized in many organizations, Portfolio Management has struggled to become inculcated within the fabric of these cultures without direct intervention and sponsorship from the highest levels of Senior Management. Beginning with a decidedly strategic focus, the course brings together the very essence of Portfolio Management—technically robust analytics—with the softer elements of communication and decision-making to enable portfolio value maximization. The course is structured in such a way that it follows a unique Portfolio Management framework—CREOPMTM—created by the authors Bayney & Chakravarti in their book titled Enterprise Project Portfolio Management: Building Competencies For R&D and IT Investment Success. In each of the first 6 classes, the framework is followed sequentially and is then applied holistically to a case study in the final classes. The impact of risk and uncertainty to the quantification of project, program, and portfolio value is addressed through classic program and portfolio optimization. Students will be expected to apply many of the principles taught in this course to their own organizations and to deliver class presentations that address portfolio strategy, linkages between organizational plans, decomposing complex decisions, project prioritization, portfolio optimization, and Stage Gate Review (SGR) processes. In their final paper, students will be presented with a choice of analyzing their organizations' portfolio health or a selected Kellogg School of Management case study in Portfolio Management using the CREOPMTM framework.

**DYNM 623 Building Intercultural Competence in A Global Work Environment**

This engaging course will promote intercultural competence and heighten cross-cultural awareness. You will engage in activities, simulations, and discussion about culture, values, perceptions, communication styles, and cultural patterns of thought and behavior that will help you understand the basic concepts, theories, and issues of intercultural communication related to intercultural relationships and how these concepts apply to your personal and professional lives. This fun and stimulating course will also explore ways to create an interculturally-competent work environment. Learning opportunities will examine tools to interact more positively with each other. As we build intercultural competence, we will sometimes encounter barriers as we interact with people whose cultural backgrounds vary from our own. As learners of intercultural communication, we will be bringing different cultural experiences and perspectives. As we interact and learn together, you will be exposed to different viewpoints and cultural lenses. We will all realize that as we unravel differences, you will find that what is acceptable and appropriate in one culture may be disrespectful from another cultural vantage point.

As we cultivate, learn, and shape our intercultural competences, we may need to have an open mindset to learn new things and unlearn misinformation. The cultural competency of learning and unlearning, shaping and reshaping is a life skill that will be useful and extended well beyond the course to our work settings and personal lives.

DYNM 624 Program Leadership Skills and Systems
Program Leadership Skills and Systems takes a fresh look at how organizations (and the people who work for them) pursue strategic goals via initiatives that can be recognized as programs. Taking a broad view of the nature of programs, it examines the role of teams in delivering program success and how an individual team member's knowledge, skills, and behaviors, should contribute to that success. Program Leadership Skills and Systems will progress through content that examines: 1) The important of programs: What are programs and why are they critical to organizational, professional, and personal success? 2) The challenges of programs: Why do most programs fail to deliver their intended benefits? 3) The leadership nees of programs: How does an individual's leadership style and focus influence the likelihood of success of their programs—and the likelihood that they will get promoted? 4) The ideal program team: What should one look for when building a program team? 5) An individual's role on a program team: What should program team members do to be a more successful team leader, manager, or member? 6) What experts say: What are the current "standards" of program management and how can you learn from them? It is expected that students who take Program Leadership Skills and Systems will achieve a greater understanding of how programs can be used to pursue organizational, professional, and personal goals. They will learn what it takes to effectively fill the role of a program team member, manager, and/ or leader and to achieve personal and professional success in their roles.

DYNM 625 Ethnography of Everyday Life: A Master Class
Ethnography is a fundamental method within the social sciences that concerns the systematic study of culture. It involves a "thick description" of how people actually live their everyday lives, personal or professional. Ethnographers study how human groups form institutions and how these structures grow, function, maintain themselves, and persist. Also at issue is how people share their understandings and develop ideologies pertaining to these processes. Social negotiation and the development of "local knowledge" in the culture of interpersonal affairs will be emphasized, particularly as it is transmitted from one generation to the next. Through direct observation and discussion, students will treat Philadelphia as an "urban laboratory" and seek to identify, to study, and to learn about local people and places. In this vein, the class will visit communities and organizational settings to gain exposure to ordinary people but, particularly, to apply ethnographic methods to the complexities of the modern workplace as well as to everyday life of the city. The final paper will be a synthesis of ethnographic literature and observations of local urban life and culture, particularly as these issues apply to understanding and organization or a local community.

DYNM 626 Navigating the Post-Professional World
This course will explore the emerging space between virtual reality and augmented reality as they manifest themselves in the marketplace shifts in both startups and large corporations. The goal of this course is to design, from the future back to the present, a graduate curriculum that supports the evolution and transformation of traditional professional training and development. Leaders of professional services from disparate fields, including health/medicine, law, architecture/design, information technology, and spirituality/religion will be engaged to participate in identifying trends for future professional enhancement. These representatives would be asked to be both resources to the class and recruiters within their own organizations so we can obtain participants for a Delphi study for the future of that profession. DYNM 628 Organizational Diagnosis: Diagnostic Strenths for Effectiveness
This seminar is designed to help participants learn multiple approaches to diagnosing the complex ways in which issues and/or problems manifest themselves in organizations. Frequently, when organizations find themselves in trouble, i.e., there are rumblings in the system about such things as lack of leadership, poor communication, diminished productivity, low morale, etc., there is a tendency to frame the problem(s) simplistically and/or locate blame in a few difficult individuals or groups. However, upon closer examination, problematic issues are often found to be symptomatic and/or symbolic of multiple issues within the organization. This course will help students understand how problems which appear at one level of the system (for example, at the personal or interpersonal level) often represent problems at other levels of the system (e.g., at the group and/or institutional level) or signify a range of inter-related issues. It will provide students with the theoretical constructs and application skills necessary for identifying and framing problem areas, collecting data, and organizing feedback to client systems. Real-time examples will inform our discussions as we consider the relationships between diagnosis, organizational reflection and appropriate action. Taught by: Kaminstein

DYNM 629 Strategic Approaches to Human Capital Management and Its Implications for Leaders

In this course we look at how human capital strategy is changing in response to increasing demands for results and more purposeful practice. We look first at the broader landscape of human capital management and see what’s new in the way an organization should approach its human capital practice. Then, we look more closely at the specific challenges—demographically, structurally, and organizationally—facing managers and Human Capital professionals in an age of uncertainty, and learn what they can do to remain adaptive and competitive. By the end of the course, through meetings and discussions, assignments, presentations, case studies, research, and required reading, participants will: 1) Learn how to assess and adjust Human Capital Development (HCD) policies, processes, and practices; 2) Think strategically about the critical human capital concerns in their own organization; 3) Connect and align individual and organizational learning imperatives; 4) Learn how to reshape human capital goals to meet continuously changing global, political, and economic environments; 5) Inspire leadership of human capital that is results-oriented and ethical; 6) Identify and explore a specific human capital issue relevant and important to their organization and develop a strategic approach for addressing it.

DYNM 630 The Discipline of Value-driven Business Process Management: Strategy Execution in a Digital World

Business strategies and operations are driven by scores of ever-shifting factors: from demographic changes and capital availability to increasing regulations, technological innovations and all present digitalization. Static business models are no longer able to keep pace with such dynamic change. Companies need a next generation management approach that fits to this environment and drives collaboration across organizational boundaries. In effect, they need to know how and when to modify or enhance their business processes, which processes are best candidate for intervention, and how to move rapidly and at the lowest risk from business strategy to execution. Business Process Management (BPM) helps organizations master change successfully and create immediate as well as durable competitive advantage. It uses the opportunities of our digital world systematically. BPM has become a management discipline that delivers significant business value by converting strategy into people and technology-based execution—at pace with certainty. It is implemented through the "process of process management" that addresses all aspects of the lifecycle of a business process: design, implementatio, execution, an controlling of processes. It is about identifying the right focus to improve what really matters and to sustain those improvements. Framework, approaches, methods and software for achieving and maintaining a

DYNM 631 Everyday Intergenerational Conversations: Baby Boomers and Millennials

This hybrid course delves into three big questions around the burning theme of everyday intergenerational conversations. The class-experience will be a living such conversation with Dr. Barstow, a Baby Boomer, and Amrita Subramanian, a millenial. The course format is 20% in person and 80% on a virtual platform. It’s a learner-centric and a learner-driven course. It is created to mine the practical know-how and life experiences of all participants, so all generations within the class can have a revealing experience that they can immediately apply at work and their personal relationships in life. At this exact point in time there are 300+ million people in the workforce and four generations at play. We begin to see the tiers of own understanding falling apart. It’s no longer about stereotyping or simply managing by default or banking on quick-recall labels—and here’s why—workplace performance or productivity or engagement or intergenerational respect and trust cannot be left to chance or opinions. We have to pause and consider the following questions: 1) Wh: What are the generation names and labels we use? What purpose do they serve? How do they help and how do they hurt? What do they help us see? What do they hide, obstruct or make us miss? 2) So what? Intergenerational communication is poor and we can do better. Understand it and skills (strategies and tactics) to prosper and cope. How to use agency and brokerage? What of cognitive dissonance? Responding versus reacting to Fake News? 3) What’s next? What have we learned from this whole century about the 4 generations at work? At home? At meetings or webinars or potluck parties? What of families at Thanksgiving? How can we expect to have valuable and meaningful conversations and relationships with all generations—current and future?

DYMN 633 Leadership from the Middle of the Organization
Durable organizations have learned to encourage innovation from within. This course’s objective is to give Organizational Dynamics graduates the skills and practical knowledge to organize change and improvement from a middle position within an existing organization. The course seeks to prepare students to assume responsibility for acting without authority by becoming the leader they have been looking for. The course’s learning objectives are: (a) to gain a working understanding of the pragmatic, ethical/moral, and cognitive foundations for leading informally from mid-organization; (b) to adapt an existing Leading from the Middle (LfM) process to each student’s actual situation; and (c) to carry out small scale actions in accordance with the process between classes, and in each class to coach students in learning by doing leadership arts and skills such as negotiating, maximizing the feasibility of change plans, enlisting and coordinating cooperation on a team, identifying and addressing stakeholder points of view, maintaining legitimacy of an initiative, and crediting all who help. Students who take this course should already be concerned about one or more important opportunities or upsetting challenges in their present or previous organizational surroundings. The instructor will coach the class in functioning as an idealized design team. The design process has two phases, a base case projection and an idealized design. Phase 1, the base case projection, formulates the current reality without change, and projects the likely undesired effects and outcomes of maintaining status quo. Phase 2, idealized design, creates a leadership approach that all stakeholders would wish for, if all their feasible, sustainable and adaptable wishes could come true today. By participating in a design process, the class itself models many group dynamics of an actual LfM situation. Scholarly Commons describes the work done in this class with examples. (Please see Stankard, Martin (2011). Guest speakers from earlier years are invited to share experiences with course content and answer questions. This course fills the following Organizational Dynamics requirements: Categories: DE, A Concentrations LMC, OC

DYMN 634 Process Improvement Tools and Strategies
Process improvement as taught in this course often provides high-leverage, high visibility opportunities for showcasing coaching and leadership skills as a member, coach, or leader of cross-functional process improvement teams. Cross-functional process improvement teams (running lean and six sigma projects) have evolved into a major pathway for developing leadership and coaching talent in such organizations as Baptist Healthcare, Federal Express, Ritz Carlton, Toyota Motor Co., and General Electric. Process improvement project leaders and teams members use specific tools and capabilities to analyze as-is processes and to define and deploy new or improved processes that deliver better outcomes and customer satisfaction with less non-value added effort. Leading or serving on cross-functional process improvement teams creates opportunities to work and network with people from other parts of your organization and creates opportunities for visibility to executives and managers sponsoring strategic improvements. Participating in or leading process improvement is also a great leadership, coaching and professional development activity.

DYMN 635 Organizational Essentials for Leadership
Through presentations by expert speakers, case discussions, and participation in team projects, students will review and evaluate critical issues from across the frames of business, including general; human resource; marketing; information and stakeholder management; leadership; corporate culture; communications; organizational behavior; sales, marketing and public relations; finance and financial reporting; ethics and social responsibility; unions and government relations; and business law. Each of these elements will be studied in light of changing environmental conditions, including the economy; society; consumer behavior; market trends; regulation; politics, unpredictable events such as 9/11; organizational change; history; and internationalism.

DYNM 636 21st Century Leadership Development: Integrating Cultural Influences into Coaching Practice
Coaching has been used to support high-level leadership, to develop high potential talent, to overcome or remediate deficiencies or unproductive behaviors, and to support or manage performance during periods of change. As the use of organizational coaching has grown over the last decade, globalization of the economy has transformed organizational markets, operations, and workforces so that "culture" routinely influences interpersonal, group, and organizational interfaces. In this context leadership requires an ability to recognize and leverage the "cultural diversity" inherent in teamwork, communication, collaboration, conflict, and change. Coaching, as a leadership development practice, must help leaders grow in their ability to recognize and leverage the national, professional, functional, and organizational cultures that influence workforce engagement, productivity, satisfaction, and innovation. This course is intended for students with an interest in culturally complex leadership and organizational development. This course has a dual purpose. First, through reading, class discussion, and written reflection, the course will enhance student understanding of coaching models, methods, and cases informed by cross-cultural psychology, intercultural communication, anthropology, and international business disciplines. Secondly, through guided practice, students will develop their skills in coaching across cultural differences. Students will coach one another through self-assessment, development planning process, and initial movement toward their objectives using Rosinski's global coaching process as one illustrative example of this kind of coaching. This course is a hybrid of online and in-person meetings on the following schedule: 6/1: In-person and online; 6/25 & 26; 7/23 & 24: In-person and online.

DYNM 637 Creating High-Performing Groups and Teams: A Course in Real-Time Experiential Learning
This course will be offered in Pennsylvania, August 4th through 9th, 2017. This course will have an additional course fee to cover lodging and other program logistics. Registration permits will be issued upon signed Travel Agreement being returned to the Organizational Dynamics program office. This course is limited to 12 students. This five-day, on-site program is more about the "how" to develop high performing teams than the intellectual "what" of such teams. For five days the twelve members will immerse themselves into what differentiates a high performing team from the dysfunctional teams with which we are familiar. We will take a deep dive into the fundamentals of any group or team in our efforts to become such a team. We will, along the way, learn about the art of design--internalizing the skills and tools essential for building strategic interventions into a team in real time. Not only will we design them, but also we will be critiqued in relation to the quality of our efforts as well as to the facilitation skills we used during the process.

DYNM 638 Organizing for Entrepreneurial Effectiveness
Entrepreneurship has become a popular aspiration for many individuals in the United States and around the world. In fact, a recent survey by UK Trade & Investment confirmed that roughly 1 in 3 individuals under the age of 34 have expressed a desire to form their own new venture within the next five years. This represents a marked increase in aspirational levels over the past two decades. Although not all new ventures are entrepreneurial in nature, the motivation for starting a new venture is ultimately rooted in a desire to change one's professional and/or personal circumstances. Most individuals never achieve this objective because they fail to take the first step in organizing their entrepreneurial aspirations into an effective plan. This course is designed for mid-career professionals who aspire to either form an independent new venture (i.e., entrepreneurial venture) or lead the creation of a new venture within their existing organization (i.e., intrapreneurial venture). Participants in this course will: 1) learn the internal and external motivators that drive individuals in general and themselves in particular; 2) become familiar with the general competencies and skills needed for a new venture to be effective; 3) understand the unique needs associated with creating a balance team for the new venture; 4) cover the practical aspects of developing an effective new venture; and 5) prepare a formal plan designed to marshal the necessary resources and support the new venture. The course will culminate with each student preparing a formal executive summary and professional presentation to support the creation of a new venture in a new or existing organization.

DYMN 639 Sustainable Change: Managing Organizational Culture to Achieve Leadership Goals
"Culture eats strategy for breakfast," as management guru Peter Drucker famously said. We know that leaders who can effectively manage their organization’s culture are better at adapting to market trends, retaining employees, and engaging external stakeholders who demand more corporate transparency and social responsibility. Yet most of us find it difficult to understand what culture really is, let alone manage it successfully. This challenge is magnified at a time when technological and demographic trends have made organizational boundaries more porous and ambiguous than ever, threatening to make traditional models of top-down change management ineffective. This course will therefore take a bottom-up, contextual approach to helping students understand and manage organizational culture in order to achieve their strategic and career goals. We will start with the individual, learning how culture works to shape organizational politics. We will discuss ways in which students can develop strategies for navigating organizational culture to achieve their career goals. We will then move to the group level, examining how cultural barriers form between teams, functions, and divisions, harming communication and coordination. The final section of the course will build to the organization level and provide students with a toolkit for creating strategies to achieve sustainable cultural change. The course will be heavily focused on practical application: students will conduct semester-long cultural research/consulting projects with organizations located in Philadelphia. We will also apply course frameworks and tools to case studies of leaders attempting to create sustainability-oriented cultures in their organizations.

DYMN 640 Virtual Collaboration
NOTE: Logitech ClearChat Headphones and Logitech QuickCam Pro9000 are required for this course. Please see the syllabus for other requirements. Across the globe companies, both large and small, are increasingly conducting culturally complex work through technology channels and virtual personnel transfers, making multi-cultural organization and virtual work inextricably intertwined. In this context electronically mediated collaboration and communication capabilities across time, distance, organization, culture, and other knowledge boundaries have become necessary for the everyday work of telecommuters, virtual teams, remote managers, professional knowledge communities, and electronic marketplaces. This course is primarily intended for students with an interest in globally distributed work and collaborative virtual organizations. The purpose of this elective is to enhance student understandings of virtual forms of human collaboration and to develop student abilities to work jointly with others via electronic tools. This course design makes typical social patterns encountered in virtual organizations visible so that students can learn from participating and collectively reflecting on their course experiences. This course has an online course fee of $150.

DYMN 641 The Art and Science of Organizational Coaching
Coaching has become a primary tool for consultants, human resources professionals and administrators interested in promoting and sustaining leadership and executive development, behavioral change, and role transition. This course explores the theory and practices associated with organizational coaching. We examine and practice the steps of the normative coaching process, the issues and boundaries that effect coaching, and pitfalls to avoid. This is an introductory course that follows a hybrid model of instruction, learning and application in class and in virtual class. The first class will be a weekend face-to-face experience followed by consecutive virtual classroom sessions with a variety of different applications. Students will practice phone coaching and virtual coaching as well as virtual group written discussion. Throughout the course we will contrast theory and practice through our own experience and observation via assignments and behavioral experimentation.

2018-19 Catalog | Generated 02/28/19
DYNM 642 A Cognitive Playbook: How to Integrate Strategy, Organization, and Thinking
Strategy and organization are of a piece. Bain & Company’s Chris Zook put the matter ironically: “I don’t know whether organization is the new strategy, or strategy is the new organization, but it’s something like that.” Too often, however, these realms are treated as discrete. This course not only integrates strategy and organization; it adds metacognition (thinking about thinking) to the mix. A Cognitive Playbook enables students to understand the three perspectives—strategy creation, organizational design, and critical thinking—in light of each other. Students gain both big-picture scope and nitty-gritty tools for organizational analysis, planning and change. They also learn how to speed-read the literature on strategy, organization, leadership, management, and the like—because so much of it is derivative and redundant. Old wine in new bottles.

DYNM 643 Trappings, Substance, and Memories: Effective Public Presentations in Organizations
In spite of the technological advances that have transformed organizational communication, the ability to articulate and present ideas, arguments, and positions in a face-to-face context remains a vital skill. At the same time, the opportunities to develop fundamentally sound presentation skills are rather limited, and, in many cases, organizations don’t train their employees to do so. In this very hands-on course, we will resurrect this age-old practice by exploring the tried and true presentation methods and approaches while simultaneously making direct connections to how technology has transformed presentation speaking in organizations. We will initially explore the fundamentals of public presentations: what makes an effective presentation, the arguments for developing strong presentation skills, and specific analysis of business speech. How does one establish proper credibility and build the trust necessary for success? Where does structure play a role and how can certain elements from theater, storytelling, and narrative help create highly impactful organizational presentations. We’ll explore what determines ethical presentations, where charisma (or lack thereof) plays a role, and how to most effectively incorporate visual accompaniments such as PowerPoint into presentations. We will dig much deeper into the development of strong persuasive arguments with emphasis on how social media has impacted credibility in novel ways. Finally, we will use improvisational techniques as a way to prepare for those sudden moments when one is called upon to make a quick presentation.

DYNM 644 Applied Organizational Change: Methods Dojo
This seminar is designed to support existing and emerging leaders who recognize their need for more adaptive practices to effect organizational and individual change in complex and rapidly changing environments. Building on a strong base of theory, this seminar is largely experiential. Students are expected to identify a real need in a system (work, internship, or volunteer), which, if improved, would have a substantial improvement on overall organizational performance and satisfaction. Beginning with this problem or dilemma, the seminar is designed as a ‘dojo’ or practice space, where students can clarify their own assumptions about how and why change occurs and practice new techniques and approaches for eliciting change. Theory provides the foundation for our work and students will be expected to recognize and be able to articulate how they are operationalizing theory in their setting.

DYNM 646 Bringing New Technologies to Market
Each year, innovators attempt to bring dozens of new technologies to the mainstream, commercial market. Inevitably, most of them fail, but equally inevitably, a few of them succeed, sometimes spectacularly. Organizational professionals may be called upon to evaluate investments in new technologies in several ways. Some organizations may want to bring such new technologies to market embedded in new products. Other organizations will want to be pioneers in using new technologies to gain competitive advantage. Careful evaluation will be required to select the right technologies and provide them with the proper context to ensure successful commercialization. This includes identifying promising candidates, considering packaging and design alternatives, understanding issues of timing and customer readiness, and looking at how pricing and distribution models are crafted. Choosing new technologies is just like making any other investment. Organizations seek high rewards at acceptable risks. In this course, real-world examples of technologies that failed versus those that succeeded will be presented and analyzed. We will do this by examining the technologies in related pairs, i.e., by comparing the Apple Newton and the Palm Pilot. Participants are invited to bring interesting new technologies to the attention of the class.

1 Course Unit
DYMN 650 Outdoor Dynamics
This course explores the implications of past and future changes in land use and population changes over time in one of the least densely populated areas of the country, but which serves as both a winter and summer playground for millions of urban residents each year. Set in the White Mountains of New Hampshire, only a day’s drive for over 10 million Americans, the area boasts some of the most pristine and exotic microenvironments in the world, left from the last Ice Age. Over 250,000 people visit the summit of Mt. Washington, the region’s highest peak, every year, driving, hiking or riding the cog railway to the top. The focus of this course is the growing interest in promoting “sustainable development,” which most people envision as protecting the environment and wild species from human encroachment and pollution. The course will examine the human sphere and the natural sphere as common ground in the analysis of competing issues; areas of compatibility, and future plans to promote a sustainable environment in this region. The course will focus on three themes: 1) how the people and institutions tasked with being the environment’s guardians go about their jobs; 2) how the area is used by visitors; and 3) how industry and its stakeholders have worked with local regulators and politicians to create jobs and promote growth. The course will ask students to overlay the principles of sustainability and issues management, in managing the increasing concern that the trajectory of land use and industrial growth will compromise the region’s native ecology and wilderness and backcountry attractiveness. Left to its own momentum, how will the future of the area fare versus promoting and implementing more sustainable goals? Changes in behavior will be needed to bring the two into line, and that leads to organizational dynamics. How will stakeholders resolve the natural tensions of the institutions’ (primarily those that operate in the region) mission and development goals with outsiders’ desires? What leverage do they and others have in the debate over the future of the region? In addition to an active outdoor week in the White Mountains, participants will meet with key players and leaders from the area and come away with a deeper understanding of the major issues in the tensions between “the place no one knew and the place that got loved to death.”

DYMN 651 Group Team Dynamics: Understanding the Overt and Covert Dynamics that Support Effective Work
Although groups and teams are often lauded as the mechanisms that provide the competitive edge for organizations in today’s challenging economic environment, there is often little attention paid to the deeper social and psychological currents influencing group and team dynamics. Organizational leaders and facilitators frequently lack an in-depth understanding of how work groups, multifunctional teams, and cross-national executive groups develop, operate, accomplish their goals—or not—and end. Team members often struggle to make meaning of the myriad spoken, as well as unexpressed, factors influencing the process and outcomes of the groups of which they are a part. This course, by emphasizing both theory and practice, provides students with a thorough grounding in the ways groups and teams develop and learn. The class will also examine approaches to building group and team competencies related to effective communication, conflict-resolution, and solving complex strategic problems as well as ways to manage the range of intentional and more hidden dynamics that both support and challenge high performance. The course is designed to include seven 3-hour classroom meetings across the semester and two extended sessions that will afford students the opportunity to explore various theoretical frameworks. In addition to drawing on the extensive literature and research in group dynamics and team building, the class will rely on experiential methods to help students develop keener understanding and insight into the ways in which their own leadership and followership dynamics, as well as the dynamics of the group as a whole, influence their team’s ability to accomplish its tasks.

**DYNM 653 Coaching Others to Manage Conflict**
Not a day goes by when you or I, or a person we are coaching, is not faced with some tantalizing, challenging conflict. It may be with someone we love, a conflict in a team, a struggle between two direct reports, a difference with our boss, or the challenge of a difficult, perhaps aggressive persona in a meeting we facilitate. The problem is not that there is a conflict. The problem is that most of us have a very thin, often inadequate repertoire of responses to the conflicts that engage us on a daily basis. The result is that all too often we are predictable in our responses. Thus, if we take these same limited skills and attempt to provide them to a client in our role as a coach, the consequences will more than likely be similar. This course is about expanding your repertoire of responses to a wide array of conflict situations. In the process, you will increase your understanding of the theoretical constructs that underlie successful conflict management. Not only will your strategies for managing a variety of conflicts expand, but you will be better able to design unique responses that relate to the particular situation with which your client is faced. How you translate these ideas to your clients and, in the process, provide them the confidence to use them, will be a central theme throughout the course. This course provides a balance between intellectual theory, skills, and applied strategies along with the time to practice them.

**DYNM 655 Using the Political Process to Effect Organizational Change**
At one time or another, each of us has said something like, "I know what to do to make some really effective—and possibly even profitable—changes in this organization, but the politics make it almost impossible to get anything done." The sense is that, although there are changes that should be made to improve organizational performance, politics (internal, external, governmental) simply obstructs our ability to make a difference. Frustrations notwithstanding, depending on how it is employed, politics can be either an impediment or, more importantly, a source of opportunities for improving organizations. Politics is the art and science of coordinating individuals, departments, management, markets—the entire organizational environment—to effect a balance between the organization’s objectives and the methods used to achieve them. As with the other factors that are employed to affect organizational performance, the methods used to improve manufacturing, marketing, sales, finance, and so on—politics is a means that organizations can use to initiate and maintain critical personal and institutional relationships. One of the seminar readings—Latimer’s "Why Do They Call It Business If It’s Mostly Politics?" is used to provide illustrations of the ambiguous nature of much of what is regarded as organizational politics. What is critical to understand and appreciate from the outset, however, is that politics is not an external factor that is imposed on organizations. Politics is not only a means for achieving personal or institutional power; it is also a method for developing and maintaining personal and institutional relationships within and among individuals and organizations of all types.
This seminar will discuss organizational politics and the ways that it is used to identify, characterize, and effect change—both within and among organizations. After reviewing several perspectives on organizations and the roles that political processes play in decision-making, a series of cases is presented that illustrate the contexts and conditions for effective political communication and coordination.

DYMN 656 The New Normal: Racial and Ethnic Diversity in the 21st Century Workplace
This course examines the social construction of race and ethnicity, including relations within and across groups, with a particular focus on their implications for organizational culture and management. In a very real sense, the workplace is a microcosm of the larger society; a place where our individual experiences, beliefs, and biases related to race and ethnicity intersect, creating both opportunities and challenges. Our capacity to understand the different backgrounds and experiences that individuals and groups bring to the organization, as well as recognizing our own biases and the biases of others is directly implicated in our ability to both manage and be managed in the organizations that we are a part of. A primary objective in this course is to increase our capacity to first understand the contours of racial and ethnic diversity in twenty-first century America by investigating (1) the historical context that influences present-day understandings of racial/ethnic diversity (2) how and why individuals from different racial/ethnic backgrounds can "see" the same thing but interpret it very differently, depending on experience, culture, and social position relative to race/ethnicity (3) the meaning and importance of dominant and minority groups, the degree to which a racial hierarchy exists, and the implications of that hierarchy for important outcomes (4) the degree to which the workplace is, indeed, a microcosm of the larger society (5) the pitfalls of "colorblindness" (6) the nature of stigma and its workplace implications and (7) the benefits and drawbacks of affirmative action policy in the workplace.

DYMN 661 Organizational Culture Change: Theory and Practice
The importance of organizational culture as a factor that can influence organizational performance either positively or negatively gained renewed attention beginning in the mid-1990's. The success of high-profile firms with "quirky cultures" such as Southwest Airlines and the entrepreneurial cultures of high tech firms, along with the rise of interest in companies that have created "Great Places to Work" with associated awards programs have generated recognition that organizational culture can be a major factor contributing to organizational performance. The related emergence of "high performance organizations," acknowledgment that organizational culture can trump the implementation of organizational strategy, competition among companies to attract the best employees, and the failure of many financially-promising mergers and acquisitions all pointed to the importance of understanding and intentionally managing organizational culture. This course will address many of the major debates about organizational culture as well as provide students with tools for better assessing and understanding organizational culture and managing culture change.

DYMN 662 Entrepreneurship and Leadership: Creating Winners
Peter Drucker once famously said that "entrepreneurs innovate." The course looks at how innovation drives the entrepreneurial process in both large organizations and in startup ventures. It stresses the importance of bringing entrepreneurial vision and energy to all organizations: profit and non-profit, as well as government and institutional. The course examines the characteristics of successful entrepreneurs. Participants will learn how to develop their own entrepreneurial instincts and how to encourage an entrepreneurial culture in their organizations. The course examines the challenges of startup ventures and provides practical information to participants who are considering an entrepreneurial venture. It explores strategies for identifying opportunities, creating successful business models, valuing a business, raising capital and managing the business. The course builds understanding of how a culture of entrepreneurship and innovation are critical to any organization that wants to survive and prosper in the future. The course discusses how sustainability is becoming a global force for change, creating exceptional entrepreneurial opportunities. The course looks closely at the leadership roles of both the CEO in a large organization and the entrepreneur in a venture. The course examines how leaders in all kinds of organizations set priorities, identify game-changing opportunities, shape the organizational culture and motivate their teams to achieve outstanding performance or, sometimes, fail. The course stresses the leadership responsibilities of the board of directors in providing governance and oversight in both for-profit and non-profit organizations.

DYNM 663 Green Skepticism: Communicating and Implementing Sustainable Business

Green initiatives are creating competitive advantage for businesses. Smart companies are integrating environmental stewardship into their strategies, operations, marketing, and product innovation. Companies that successfully embed sustainability in their core business strategy and culture—rather than "bolting it on" as a peripheral activity—are gaining the most value added. Embedding sustainability requires the active engagement of all organizational stakeholders, many of whom may be green skeptics, dubious of the need to change. "Many people who feel passionately about sustainability cannot relate to those who have a harder time understanding the need for a change..." - Corporate associate & MBA candidate. The business case for sustainability has been made many times, yet skepticism about the need for change remains widespread. While adopting sustainable business practices must make sense financially, an economic argument alone may not be enough to convince people to purchase green business products and services or to implement sustainability practices. The course is based on the assumption that "task significance" is an important factor for implementing sustainable business practices. This means helping people see the connection between small tasks they are being asked to do and the big picture of global sustainable businesses. The first part of the course focuses on understanding sustainability driven changes in the global business landscape through a coherent framework. The second part of the course focuses on what those changes mean for business fundamentals: consumption, production systems, innovation, and emerging economies. The third part of the course focuses on communicating and implementing sustainable business strategies and initiatives. Students will have the opportunity, with a team, to design a communication and implementation program for an organization. Throughout the course, strategies and tactics that work to engage skeptics who do not understand the need for change, as well as tactics that don't work, will be studied. The course is based on the instructor's experience leading hundreds of business and environmental professionals from skepticism to enthusiasm for sustainable business over the past decade. This course is designed for everyone tasked with engaging others in implementing sustainable business practices and for entrepreneurs selling green business products and services. It will provide strategies for enhancing a technical and economic sales pitch. The course is also for those who may be skeptical themselves, and want to reconsider their skepticism. DYNM 664 Organizational Culture and Learning

What is organizational culture? What is organizational learning? How do organizations learn effectively and change their culture? A learning organization is skilled at creating, acquiring, and transferring knowledge, and at modifying its behavior to reflect new knowledge (Garvin, 1993). According to Ray Stata, Chairman of Analog Devices, "The rate at which individuals and organizations learn may become the only sustainable competitive advantage." However we define and prioritize organizational learning, we must still struggle with how to do it. This is a tougher question. The thesis of this seminar is that an enriched understanding of culture can enhance organizational learning. Participants will explore the concept of culture, study the work of Chris Argyris, and discover practices and behaviors that promote organizational learning and culture change. The objective of this seminar is to help participants get beyond highly abstract philosophy and develop a deeper understanding and useful skills based on these concepts. This course will meet on the following Wednesdays: May 27th; June 3rd, 10th, and 17th; July 22nd and 29th.

DYNM 666 Systems and Design Thinking

This class is designed to challenge the traditional thinking of basic management strategy and practice. Through a series of lectures, interactive cases, and group discussions, faculty will challenge participants to rethink their assumptions and move beyond the traditional practice of management strategy formulation and execution. The prevailing pattern of thought employed by management is analytical. Analysis has come to dominate thought in the western world. But no amount of analysis can explain systemic interaction and organizational behavior. A new pattern of thought is required: synthetic. Systems Thinking involves both analysis - to produce knowledge of organizations (system) - and synthesis to provide understanding. Without both, effective solutions to problems cannot be obtained. To go beyond understanding to wisdom requires awareness of the difference between doing things right (efficiency) and doing the right thing (effectiveness). The better we do the wrong thing, the more wrong we become. Today a great deal of energy is expended by organizations in an effort to increase the efficiency with which wrong things are done.

DYMN 667 Building a Business Case for Sustainability
What are the systemic changes that an organization must undergo in order to become sustainable? (Sustainability is defined here to mean that no aspect of business operations is harmful to the planet or future generations.) We will examine the issues of sustainability using Peter Senge’s work on learning organizations, the Swedish sustainability model, The Natural Step, and Russell Ackoff’s idealized design as our frameworks for building a business case for sustainability within an organization or department. Class participants will be asked to build a business case for sustainability within an organization or department and to prepare an interim progress report (5-7 pages) plus a final paper (15-20 pages) using the concepts and principles covered in this course and then will present their case to the class in the last sessions of the course.

DYMN 669 The Power of Confusion
Confusion is a lack of clarity about some situation that matters to you, which causes you to feel so uncertain or uncomfortable that you have a hard time making decisions. You may be confused about whether you fit into an organization; or about what work makes you feel great versus work that you are good at or about the right thing to do when you are frightened. The power of confusion is that it forces you to stop and seek clarity in your life and career. This seminar addresses seven types of personal and organizational confusion encountered in organizational life during a professional career: 1) confusion over which personal ethics, skills, and talents you find most meaningful; 2) confusion over discovering what is really going on in an organization; 3) confusion of who is in charge—leadership and which direction ‘we’ are moving toward; 4) confusion over ‘what’s it for me?’ How motivation and satisfaction relate to incentives and pay schemes; 5) confusion caused by blaming, rather than developing skills needed to make lasting changes and improvements; 6) confusion about how teams pull together; 7) confusion caused by committing random acts of improvement instead of building a system for making customer-oriented organizational innovations and improvements. You were not born with any inherent knowledge or wisdom, yet you are certain to face fear and confusion during your lifetime. You were born with curiosity and the ability to ask ‘why?’ when you face a confusing situation. You were also born with the ability to think for yourself, listen to others, and learn from experience. Confusion spurs you to use these abilities to gain the clarity that leads to understanding and wisdom; you will need tools to guide your learning. This seminar will show you how to use simple tools to achieve that clarity.

DYMN 671 Workplace Ethics: Ownership, Participation, Productivity
In this course, you will have the opportunity to: 1) examine ethical, religious, legal, technological, and economic bases for different ownership systems from early human history through the 20th century; 2) develop a theoretical framework for understanding ownership issues in the contemporary workplace; 3) review social science concerning ownership and the related organizational issues of motivation, performance, productivity, profitability, culture, diversity, and equity; 4) analyze a variety of cases to measure ownership’s effects across many industries and business situations; 5) learn about various forms of ownership and compensation in use today in small and large organizations, both public and private; 6) utilize a diagnostic tool for assessing the ways in which your own organization’s culture and business outcomes are impacted by the firm’s ownership system; 7) describe your own experiences of the different ownership systems with which you may have engaged, including: family, schools, little leagues and professional sports, volunteer service organizations, charities, religious institutions, professional service providers (e.g., doctors, lawyers, veterinarians), the places where you shop (e.g., think about Genardi’s before and after it was sold to Safeway), and the different places you have worked... as a way of systems; 8) assess and refine your views regarding ownership in light of your own social, political, religious, and ethical commitments. Who is going to own what we all have a part in creating? The history of American business is an evolving answer to the question of ownership. Of all the issues relevant to organizational dynamics, ownership is arguably the most important and least understood. Matters of ownership have also been and remain of intimate concern to ordinary Americans—the slave yearning to be free, the young couple with a dream of home ownership, the entrepreneur who wants to be his own boss, the consultant who wants to form a partnership with her best friends, and the indebted, mid-level manager reviewing last year’s 401(k) statement.

DYNM 672 A Systems Approach to Crisis Preparation and Organizational Resilience

Educational Objectives: 1. Awareness of crisis as a part of life and social systems; macro-level crises that could affect you; organizational/individual crisis in the organization; types of organizational crises; group, family, and individual crises. 2. Understanding of: nature and phases of crisis; what to do before, during, and after a crisis; crisis psychology/decision-making; security strategies—anticipation vs. resilience; Skills, models, and practices of resilience; systemic vulnerability/systemic resilience. 3. Enhance ability to: think critically; develop expertise; adopt a systems perspective; articulate and communicate your thoughts cogently, concisely, and compellingly. 4. Apply course-related knowledge to be able to successfully foresee and weather crises. General Education Philosophy: This course fills the following Organizational Dynamics requirements: Categories: A Concentrations: LMC, SD The course includes travel to New York and the World Trade Center site, and lectures at Columbia University to understand what can happen during and after a crisis.

DYNM 673 Stories in Organizations: Tools for Executive Development

As we all know, living in- and out-of-organizations is getting exponentially harder. Things seem to be multiplying, splintering, and coalescing kaleidoscopically, and each of us is increasingly taxed to make sense of it all, let alone create meaning for ourselves and those we manage and care about. Remarkably, a powerful tool for helping us is one we have already mastered: stories. As humans we think, feel, speak, listen, explain, and believe in narrative form. Yet this capability is dramatically underexploited at work. This course examines a variety of ways to bring the power of stories to organizational life. We will look at how stories enhance communication, support change, and intensify learning and development in individuals and organizations, thus informing your leadership style and effectiveness. We will have many opportunities in class to apply "story-based technologies" to issues you face in personal or professional life. Readings come from the literatures of human development, narrative psychology, organizational change, executive learning, and, of course, from literature itself.

DYNM 676 Communication Competence: Extracting Value in Key Organizational Interactions

Often an organization can facilitate its own success by employing fundamental communication practices during value-laden interpersonal interactions. In this course we explore the direct relationship between competent communication and the ability to extract maximum value in most Key Organizational Interactions. Starting off on a personal development note and building off time-tested principles, participants will conduct their own communication skills assessment to determine their own communication strengths and identify specific areas for improvement. Qualities such as effective empathy and active listening are also explored. Moving into the organizational realm, together we define then locate those Key Organizational Interactions, both within and external to the organization, that significantly impact how that organization is perceived. We explore all the possible value points within these Key Organizational Interactions, how they tie into the organization's strategic objectives, and how to best approach them interpersonally.

DYNM 679 To Thrive Or To Survive? Our Question in the Evolving World

The seminar focuses on the implications for our own work and personal lives as we reinvent ourselves, our organizations, and our society in what is often called "the new normal." We begin with a realistic exploration of the relationship of the global economy to the widely different political systems which provide individuals with safety nets. We compare the United States to China and Europe and the ways in which our different systems both compete and support each other. Each participant will research a portion of the regional job market, analyzing the source of investments, patents, required skill level and experience of employees, and competitive outlook. The final presentation and paper will fit their regional analysis into the global picture. Where does it fit? What are its risks?

**DYNM 683 Quantitative Project Risk Analysis Methods and Tools**

DYNM 683 is an unusual opportunity for students to develop a working knowledge and set of skills in a seminar conducted by an experienced subject-matter while using their own Windows PC computers. Quantitative project risk analysis of cost estimates, critical path networks, and integrated cost schedule models is a highly specialized capability that industry and government organizations increasingly seek to deploy. Sophisticated tools and methods used in this course can be applied across industry domain boundaries and are scalable from small to large projects to volatile start-ups. These world-class tools and best practices have been validated through use in public and private organizations. (Academic licenses will be provided with the course.) Prospective students need previous experience using spreadsheet software (an installed version of Microsoft Excel is required). Also, it is preferable, but not required, for students to have some experience with planning/scheduling software (for example, Microsoft Project or Oracle Primavera P6). Please contact the instructor with questions and to clarify expectations. The course is composed of 4 modules, each of which will be approximately two sessions in duration. Learning objectives are to answer these important questions—How confident are you in achieving your project’s cost and schedule objectives? What can you do to improve your confidence? Will the right resources be available to implement your responses when needed? Module 1: Develop project plans with resources and costs during uncertain conditions Module 2: Implement spreadsheet quantitative cost risk analysis (Monte Carlo simulation) Module 3: Implement Monte Carlo simulation of plans, CPM schedules, and decision trees Module 4: Integrate cost and schedule risk analysis using Monte Carlo Simulation.

**DYNM 689 Balance of Power in the Global New Normal**

The economy is global and every successful business in every nation must operate with awareness of its place in the interconnected dynamics of local, national, and global issues. This course uses many lenses, such as history, culture, and economy to understand the global issues, their interconnections, and the impact they may have in different places, on different organizations, and in our personal decisions. Each of us needs to be able to engage systems thinking as we aim to understand others from the inside and ourselves from the outside. The central relationship in the global new normal is the United States and China. The weekly readings begin with recognition of the centrality of a liberal for the United States and the effect that has on China and the cultures of East Asia. This sets up three frames of reference: Human Rights, Democracy, and Capitalism. Current and potential Organizational Dynamics students with interest in Global Studies, particularly those focusing on Systems Thinking, (Sustainable) Development Policy, and international courses will find this course helpful. MPhil students with MSOD background can use this course as a foundation for advanced research in Global Studies.

**DYNM 692 Innovation in Organizations**

Most serious study of innovation has focused on its dynamics and how these dynamics can be managed. A broader range of studies also consider the nature of creativity and techniques to facilitate innovation. We survey these areas, emphasizing the relationship between innovation and organization, which are central to innovation both as facilitators and impediments. More generally, we consider the process of Organizing Innovation, the role of individuals, teams and organizations in effecting change and realizing its benefits. I cover one additional theme—improvisation—because it provides insight into dealing with novel situations, and also as antidote to the relentless organizational and institutional pressures that crush the "impulsivity" and "deviance" that we need for creativity and innovation. In the end, though, the core of the course are the real issues of your life and work. Creativity begins with questions, innovation begins with problems, and education begins with you. Reflect on the central issues of your life and work and come prepared to share them with the class. The success of your experience rests on a willingness to explore your core interests and take a leadership role in molding the course to meet them. This course fills the following Organizational Dynamics requirements: Categories: A Concentrations: LMC, SD

**DYNM 693 The Global Leader**

The "Global Leader" is a co-listed INTS/DYMN course, developed as part of the Lauder Institute’s new Global Program that will prepare students for leadership roles in international and culturally diverse environments. The course will focus on developing skills through a hands-on approach that includes using case students, in-class exercises, movie clips, and class discussion, with readings that emphasize theory and application. The course is comprised of two modules. The first module - Globally Capable Leadership - will introduce students to the core qualities of leadership that transcend cultures, as well as examine how cultural context influences leadership efficacy. The second module - Managing Across Borders - will teach students how to negotiate effectively in a variety of contexts, including conflict resolution, transactional settings, conflict resolution, and across borders, such as those of gender, ethnic identity, national culture, and differences in values and beliefs.

DYNM 705 Capstone Course
This course requires the student to study a topic of their own choice, discuss their progress with the class in regular meetings and to deliver a final paper that meets the following criteria: 1. Makes an argument, describes or summarizes a position that is unique, original, or which directly applies to the student; 2. Uses primary sources or applies to a primary organization as much as possible; 3. Conforms to the style and format of good academic writing and the MSOD Capstone Presentation Guidelines; 4. Allows a student to demonstrate competencies gained from the courses completed in the Organizational Dynamics program. The role of the capstone professors is to coordinate the development of each student’s capstone committee, to offer facilitation during peer-review discussion, to discuss the student’s work as the capstone is written. A course professor may also be the student’s primary advisor or a reader. For details about the capstone course, including delivery dates, please see the DYNM Canvas community site.

DYNM 720 Foundations of Organizational Consulting and Executive Coaching
This 5.5 day intensive course is the first in a six-course cohort program in Organizational Consulting and Executive Coaching. During this course students will experience the formation of a group (their cohort) and learn the dynamics that commonly affect groups. Students will be taught a variety of theoretical constructs which influence the helping professional role and also start to practice as helping professionals through live coaching and case studies. This course is a residential course. This course will have an additional course fee to cover lodging and other program logistics. Registration permits will be issued upon a signed Travel Agreement being returned to the Organizational Dynamics program office.
Taught by: Bergey/Pennington/Russo

Notes: DYNM Category: F; DYNM Concentration: OCEC. Course Schedule: TBA

DYNM 722 Making Meaning from Organizational Experience and Establishing Frameworks for Consulting and Coaching
This course is designed to immediately follow the five-day DYNM 720 intensive in order to build on cohort member experiences by introducing a broad range of coaching and consulting theories. Using newly introduced theories and your own experiences and observations, you will begin applying them to assess, interpret, and make meaning of behavior at three levels: individual, group, and organizational. Using your knowledge and research, you will begin narrowing and deepening theories you are drawn toward to begin laying a foundation for your further work in DYNM 723 and 724. DYNM 722 culminates with each cohort member researching and executing a high-level presentation based on one theoretical approach. You will continue your cohort-based learning with your deeper appreciation of one approach, as well as benefiting from each of your cohort member's presentations.

DYNM 723 Consulting and Coaching Process: Knowing Yourself
Participants learn to be coaches by being coaches to one another. Over a two-month period, cohort members expand their repertoire of skills and tools, share their experiences, and together scrutinize the client/coach relationship.
Taught by: Pennington
One-term course offered either term
Prerequisites: This course is for OCEC cohort members only.
Activity: Seminar
1 Course Unit
Notes: DYNM Category: A; DYNM Concentration: OCEC. Course Schedule: 4/7-8; 5/5-6; 6/9-10.

DYNM 724 Building Consulting/Coaching Tools and Techniques
This course will offer a conceptual comprehension of the tools and techniques used in effective internal and external organizational consulting engagements. By contrasting the theory and practice of alternative coaching models, we will build tools and techniques for effective coaching as a leadership competency. Through an analysis of the coaching relationships in your organization, you will learn to develop a personalized approach to coaching and expand upon within organizational settings. Participants learn the "how and why" as well consulting frameworks. Additionally, the relevant and often symbiotic connection between consulting and coaching will be studied. What process tools are most useful to today’s executive coach in a consultative environment? How do approaches to consulting and coaching differ? How are they similar? How can a confluence of coaching and consulting lead to more effective decision making and wide-scale organizational performance? DYNM 724 will be presented over five class meetings. The class sessions will be taught utilizing lectures, case studies, structured small group discussions, individual, and team presentations, faculty and participant experiences, and guest speakers.
Taught by: Russo
One-term course offered either term
Prerequisites: This course is for OCEC cohort members only. DYNM 614, which teaches the same content, is open to all DYNM students.
Activity: Seminar
1 Course Unit
Notes: DYNM Category: DE; DYNM Concentration: OCEC. Course Schedule: 1/6 7; 2/17 18; 3/17 18
DYNM 725 Interpretation & Problem-Solving & Managing Conflict
Participants explore sources of problems and conflicts, identify the range of choices for resolution, and spend time in the field identifying and resolving conflicts at the personal and team levels.
Taught by: Napier
One-term course offered either term
Corequisite: DYNM 726
Activity: Seminar
1 Course Unit
Notes: For additional information, please see our website at: http://www.organizationaldynamics.upenn.edu

DYNM 726 Expanding Coaching/Consulting Tools and Skills
Competencies are expanded into more complex aspects of team and organizational change. Having experienced the art of design at a micro level, they now examine it as a means of enhancing larger system change. The cohort explores the nature of system change and how it relates to changing teams and individuals.
Taught by: Russo/Napier/Orenstein
Corequisite: DYNM 725
Activity: Seminar
1 Course Unit
Notes: For additional information, please see our website at: http://www.organizationaldynamics.upenn.edu

DYNM 727 Practicum Experience in Consulting and Coaching
Participants integrate everything they have learned by contracting with a client to provide consulting/coaching services. Individual supervision is provided on a weekly basis by a core faculty member and peer supervision is provided in two clinics, where cohort members share their experiences and learning with one another and, at the conclusion of the second clinic, bid the cohort farewell as members are now ready for their internship experiences. This course is open to OEC students only. This course fulfills the following Organizational Dynamics requirements:
Categories: A Concentrations: OEC

One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: For additional information, please see our website at: http://www.organizationaldynamics.upenn.edu

DYNM 729 Executive Coaching Internship
In this course, each participant is exposed to a variety of executive coaching opportunities designed to enable them to utilize their skills in multiple situations and contexts. Access to an advisor/coach during this period ensures that each participant’s advanced learning will be provided in a timely and individualized manner.
Taught by: Berger/Pennington/Russo
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: DYNM Category: A; DYNM Concentration: OEC

DYNM 730 Capstone Portfolio Preparation and Proposal
In this course, students demonstrate their consulting and coaching mastery and scholarship by creating their capstone/thesis summary proposal. Throughout the program, participants will have systematically codified their learning experiences through the delivery and accumulation of various papers, project results, and other measures of performance. These will be contained in a Personal Portfolio which includes a record of understanding the assigned literature and classroom-based theory and experiences. In addition, each individual’s personal coaching philosophy is framed in a theoretical and model developed over the course of the program. Personal reflections and insights are an essential aspect of the ongoing record of learning. Using all of these as source material, the participant writes and assembles a full case history drawn from the Practicum (DYNM 727) and the Internships (DYNM 728 and DYNM 729).
Taught by: Russo/Napier/Orenstein
One-term course offered either term
Corequisite: DYNM 729
Activity: Seminar
1 Course Unit
Notes: For additional information, please see our website at: http://www.organizationaldynamics.upenn.edu

DYNM 758 Sweden: Strategies for Thriving in the 21st Century
Neutral during WW2, and claiming a “Middle Way” between east and west in the post-war twentieth century, Sweden - its people, institutions, and culture - has left its mark on our global society. In today’s world, the influence of Swedish ideas and innovations can be seen in government structures, health and social policies, business organizations, working life, education, science, art, literature, and, of course, the design and style of many products and services which enjoy high demand. These are impressive impacts from a nation-state of only eight million people. What lessons are there for Americans and our institutions as we enter the twenty-first century where our leadership position, ability to determine the rules and control the agenda of world economic and political affairs are diminished? In this course, we focus on “the people philosophy” of Sweden, its government, businesses and organizations. We cover healthcare issues and policy, sustainable development, the European Community and the human relations issues in organizations. This course will include meetings with academics and leaders from industry, government, health care, science, media, arts and culture. Students will meet with and learn from these representatives in order to explore Swedish organizational dynamics, both in terms of its economic prosperity and the problems Swedish society faces today.

Notes: For additional information, please see our website at: http://www.organizationaldynamics.upenn.edu
DYNM 766 Global Collaboration for Sustainability: The Food-Water-Energy Nexus in Italy

Environmentalist Paul Hawken challenged a class of 2009 college graduates that they would have to "figure out what it means to be a human being on earth at a time when every living system is declining and at the rate of decline is accelerating." That theme is at the heart of this course. While we have seen the notion of sustainability gaining traction in recent years, our quality of life in the near future very likely hinges on the development and implementation of sustainable solutions to enormously complex environmental and social problems—particularly around food, water, and energy. This course is designed to foster the thinking and the collaborative spirit that's needed to address those enormous problems. It involves focusing on a critical global sustainability problem with vast social, cultural, and environmental dimensions—in this case, the need to balance global food, water, and energy needs in a manner that allows the world to feed 9.6 billion citizens by 2050 while preserving the environment for future generations. It also involves collaboration and the exchange of ideas between multi-disciplinary leaders from multiple countries and perspectives on how to manage diverse views and sustainability initiatives that are extremely relevant to the success of today's organizations (i.e., how to lead "big change" for competitive advantage).

Course usually offered summer term only
Prerequisites: Permits to register for this course will be issued upon receipt of a signed travel agreement.
Activity: Seminar
1 Course Unit
Notes: This course departs the US 4/28 and returns 5/6.

DYNM 770 Process Excellence in South America: Chile on Its Journey to Productivity and Performance

This course will travel to Chile July 21st through 29th. The class will meet on campus before and after departure on dates to be determined. This course will have an additional course fee to cover lodging and other program logistics. Registration permits will be issued upon a signed Travel Agreement being returned to the Organizational Dynamics program office. Chile is a long and narrow strip of land along the Pacific coast of South America. It is the longest country in the world, 2,700 miles in length, which is about the distance from San Francisco to New York. In 1973 the military imposed a dictatorship, led by Augusto Pinochet, who ruled the country until 1990. The Chilean strategy to be part of the world economy has been based on open markets and the development of Free Trade Agreements. A report by The EconomistIntelligence Unit shows Chile has the best environment in the region for business and is among the top 20 countries worldwide. Chile stands out for the effectiveness of its policies, labor and infrastructure. The strength and stability of its banking and financial systems have generated high credibility indexes in foreign markets, which has meant that big companies want to invest in the country, improving access to goods and services. Chilean companies have started improving the way they organize themselves. Business Process Management and Digitalization have become important topics in many organizations. The Universidad de Chile offers numerous courses and certificates in that field. Chile is making good progress on its journey to productivity and performance. Students will meet with academics and business leaders and observe the organizational dynamics of Chile.

Taught by: Kirchmer and Olivos
One term course offered either term

1 Course Unit
Notes: DYNM Category: A; DYNM Concentrations: LMC, GL. Travel Dates: 7/21-29. Pre-departure class is 7/5 from 1-4 pm.

DYNM 771 Micro-Finance in India: The Past, Present and Future

This 2CU course includes travel and study in Bangalore, Mangalore and Mumbai, India, a country acknowledged as the world's largest democracy with a population of over 1 billion. India has a thriving microfinance industry that has come under scrutiny in the past year. While micro finance has been touted by many as the panacea in helping raise people out of poverty, empower women and aid in development from the grassroots level, it has come with some serious attendant costs. This course will discuss a variety of different models of microfinance and review the new trends of financial inclusion for the poor. We will start in Bangalore and continue to Mangalore, where we will visit local development projects, microfinance women's groups, and meet organizational leaders. We will see firsthand how and if microfinance and financial inclusion "work effectively" to achieve the goals of alleviating poverty. While in Mangalore, students will attend and participate in a conference: Micro Finance in India: The Past, Present and Future, being held at Nitte University. We will hear experts speak on current issues and how new legislation in India may change the face of micro finance. We will end the program in Mumbai, one of the most populous urban regions in the world and the richest city in India with the highest GDP of any city in South, West or Central Asia.

DYNM 786 European Approaches to Multi-Stakeholder Project Management

In the interconnected world of global corporations, studying Project Management from the standpoint of U.S. firms is not enough. Broadening perspectives is the goal of the seminar in Paris, France. Dr. Jean-Marc Choukroun will lead Organizational Dynamics students in a study of European approaches to the challenges of large project management, particularly those involved in public-private and other multi-group projects. Dr. Choukroun notes that "in today's global economy, managing multinational, multi-cultural teams, devising innovative financing arrangements and securing public-private cooperation are increasingly becoming standard requirements for complex projects. European integration has made dealing with these issues a priority with many European organizations. Students will be exposed to new ideas, and new ways of applying time-tested methods and techniques that European organizations in general, and more specifically French organizations, have developed to address these issues. Properly adapted, some of these ideas should prove to be readily applicable in the US context. In addition, students will discover how French managers in the public and private sectors frame issues, approach problems and implement solutions."

Taught by: Choukroun
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: DYNM Category: A; DYNM Concentrations: LMC, GL. Travel Course Dates: 5/25 to 6/2.

DYNM 899 MPhil Capstone Registration
Activity: Masters Thesis
1 Course Unit
Notes: DYNM 899 is a required registration for MPhil candidates.
Persian (PERS)

PERS 011 Elementary Persian I
This course is designed to help you start learning Persian and to give you the necessary tools to continue your study of Persian. This course introduces the Persian alphabet alongside grammar and vocabulary. Emphasis is placed on actively using the language for interpersonal, interpretive, and presentational modes of communication. The four language skills (i.e., listening, speaking, reading and writing) as well as pronunciation and culture are integrated into the curriculum. There is no prerequisite.
For BA Students: Language Course
Taught by: Entezari
Course usually offered in fall term
Also Offered As: PERS 611
Activity: Lecture
1 Course Unit

PERS 012 Elementary Persian II
This course is designed to help you build upon what you have learned in Elementary Persian I. Emphasis is placed on using the language for interpersonal, interpretive, and presentational modes of communication. Therefore use of English is restricted. Listening, speaking, reading, and writing as well as culture, vocabulary, grammar, and pronunciation are integrated into the course. Students must either have successfully completed PERS-011, or take the departmental exam.
For BA Students: Language Course
Taught by: Entezari
Course usually offered in spring term
Also Offered As: PERS 612
Prerequisite: PERS 011 or equivalent
Activity: Lecture
1 Course Unit

PERS 013 Intermediate Persian I
This course is conducted in Persian and designed to help you continue expanding upon what you have learned in Elementary Persian II (PERS-012). In this course, we will begin to address a broader variety of cultural topics in order to increase your proficiency in linguistic as well as cultural terms. Emphasis is placed on actively using the language for interpersonal, interpretive and presentational modes of communication. Therefore use of English is restricted. Listening, speaking, reading, and writing are integrated into the course, as are culture, grammar, vocabulary, and pronunciation. Students must either have successfully completed PERS-012 or take the departmental placement exam.
For BA Students: Language Course
Taught by: Entezari
Course usually offered in fall term
Also Offered As: PERS 613
Prerequisite: PERS 012 or equivalent
Activity: Lecture
1 Course Unit

PERS 014 Intermediate Persian II
In this course, we will continue to address a broader variety of cultural topics in order to increase your proficiency in linguistic as well as cultural terms. Emphasis is placed on actively using Persian for interpersonal, interpretive and presentational modes of communication. Therefore use of English is restricted. Listening, speaking, reading, and writing are integrated into the course, as are culture, grammar, vocabulary, and pronunciation. Students must either have successfully completed PERS-013, or take the departmental placement exam.
For BA Students: Last Language Course
Taught by: Entezari
Course usually offered in spring term
Also Offered As: PERS 614
Prerequisite: PERS 013 or equivalent
Activity: Lecture
1 Course Unit

PERS 015 Advanced Persian I
For BA Students: Advanced Language Course
Course usually offered in fall term
Also Offered As: PERS 615
Prerequisite: PERS 014 or PERS 018 or equivalent
Activity: Lecture
1 Course Unit

PERS 016 Advanced Persian II
For BA Students: Advanced Language Course
Taught by: Assefi-Shirazi
Course usually offered in spring term
Also Offered As: PERS 616
Prerequisite: PERS015 or equivalent
Activity: Lecture
1 Course Unit

PERS 017 Persian for Heritage Speakers I
A course designed to teach the reading and writing of standard modern Persian to those with a competency in spoken Persian. The course will focus on the lexical and syntactic differences between written and spoken Persian, and the problems of Persian spelling.
Taught by: Assefi-Shirazi
One term course offered either term
Also Offered As: PERS 617
Prerequisites: Fluency in spoken Persian.
Activity: Lecture
1 Course Unit

PERS 018 Persian for Heritage Speakers II
A course designed to develop greater skills in reading and writing standard modern Persian for those with a competency in spoken Persian. The course will focus on the lexical and syntactic differences between written and spoken Persian, and the problems of Persian spelling.
One term course offered either term
Prerequisites: PERS 017 or permission of the instructor.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center
PERS 019 Advanced Persian in the Media
This course is designed for advanced students of Persian interested in contemporary Persian media from Iran as well as Afghanistan and abroad, who wish to gain a deeper understanding of contemporary Persian-speaking societies and politics. Students will advance their skills in reading and listening, as well as in writing and speaking.
Taught by: Assefi-Shirazi
Course usually offered in spring term
Prerequisites: PERS 016 or permission of the instructor.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

PERS 111 Beginning Pashtu I
Reading, writing, basic grammar and elemental speaking.
For BA Students: Language Course
Taught by: Santry
Course usually offered in fall term
Also Offered As: SAST 405
Activity: Lecture
1 Course Unit

PERS 113 Intermediate Pashtu
A wide variety of reading genres, writing, and oral expression.
For BA Students: Language Course
Taught by: Santry
Course usually offered in fall term
Also Offered As: SAST 425
Prerequisites: Beg. Pashto, or permission by instructor.
Activity: Lecture
1 Course Unit

PERS 114 Intermediate Pashtu Part II
Beg. Pashto, or permission of the instructor. A wide variety of reading genres, writing, and oral expression
For BA Students: Last Language Course
Taught by: Santry
Course usually offered in spring term
Also Offered As: PERS 514, SAST 426
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center. This is a two-semester course.

PERS 320 Persian Culture, Literature and Film for Advanced Learners I
Taught by: Shams Esmaeili
Also Offered As: PERS 620
Activity: Lecture
1 Course Unit

PERS 321 Persian Culture, Literature and Film for Advanced Learners II
Taught by: Shams Esmaeili
Also Offered As: PERS 621
Activity: Lecture
1 Course Unit

PERS 415 Classical Persian Prose
This course is designed for those junior and senior students who are eager to explore the major works of classical Persian prose. Students will become familiar with the medieval Persia through an in-depth reading of major mystical, historical and literary works of classical Persian prose. Depending on the text under discussion, students will be introduced to the socio-cultural context of Medieval Persia. Although no prerequisites are required, this course is a perfect follow-up for NELC 216 "Persian Poetry in Translation". Only basic knowledge of Persian language is required for this course as all texts will be read and compared against their English translation.
Taught by: Shams Esmaeili
One term course offered either term
Activity: Seminar
1 Course Unit

PERS 512 Beginning Pashtu Part II
Reading, writing, basic grammar and elemental speaking.
For BA Students: Language Course
Taught by: Santry
Two terms. student must enter first term.
Prerequisites: For second semester completion of the first semester.
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center. This is a two-semester course.

PERS 514 Intermediate Pashtu Part II
For BA Students: Last Language Course
Taught by: Santry
Two terms. student must enter first term.
Also Offered As: PERS 114, SAST 426
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center. This is a two-semester course.

PERS 611 Elementary Persian I
This course is designed to help you start learning Persian and to give you the necessary tools to continue your study of Persian. This course introduces the Persian alphabet alongside grammar and vocabulary. Emphasis is placed on actively using the language for interpersonal, interpretive, and presentational modes of communication. The four language skills (i.e., listening, speaking, reading and writing) as well as pronunciation and culture are integrated into the curriculum. There is no prerequisite.
For BA Students: Language Course
Taught by: Entezari
Course usually offered in fall term
Also Offered As: PERS 011
Activity: Lecture
1 Course Unit
PERS 612 Elementary Persian II
This course is designed to help you build upon what you have learned in Elementary Persian I. Emphasis is placed on using the language for interpersonal, interpretive, and presentational modes of communication. Therefore use of English is restricted. Listening, speaking, reading, and writing as well as culture, vocabulary, grammar, and pronunciation are integrated into the course. Students must either have successfully completed PERS 611, or take the departmental exam.
For BA Students: Language Course
Taught by: Entezari
Course usually offered in spring term
Also Offered As: PERS 612
Prerequisite: PERS 611
Activity: Lecture
1 Course Unit

PERS 613 Intermediate Persian I
This course is conducted in Persian and designed to help you continue expanding upon what you have learned in Elementary Persian II (PERS 012). In this course, we will begin to address a broader variety of cultural topics in order to increase your proficiency in linguistic as well as cultural terms. Emphasis is placed on actively using the language for interpersonal, interpretive and presentational modes of communication. Therefore use of English is restricted. Listening, speaking, reading, and writing are integrated into the course, as are culture, grammar, vocabulary, and pronunciation. Students must either have successfully completed PERS 612 or take the departmental placement exam.
For BA Students: Language Course
Taught by: Entezari
Course usually offered in fall term
Also Offered As: PERS 613
Prerequisite: PERS 612
Activity: Lecture
1 Course Unit

PERS 614 Intermediate Persian II
In this course, we will continue to address a broader variety of cultural topics in order to increase your proficiency in linguistic as well as cultural terms. Emphasis is placed on actively using Persian for interpersonal, interpretive and presentational modes of communication. Therefore use of English is restricted. Listening, speaking, reading, and writing are integrated into the course, as are culture, grammar, vocabulary, and pronunciation. Students must either have successfully completed PERS 613, or take the departmental placement exam.
For BA Students: Last Language Course
Taught by: Entezari
Course usually offered in spring term
Also Offered As: PERS 014
Prerequisite: PERS 613
Activity: Lecture
1 Course Unit

PERS 615 Advanced Persian I
For BA Students: Advanced Language Course
Course usually offered in fall term
Also Offered As: PERS 015
Prerequisite: PERS 614
Activity: Lecture
1 Course Unit

PERS 616 Advanced Persian II
For BA Students: Advanced Language Course
Course usually offered in spring term
Also Offered As: PERS 016
Prerequisite: PERS 615
Activity: Lecture
1 Course Unit

PERS 617 Persian for Heritage Speakers I
An intensive, one-semester course designed to teach the reading and writing of standard Tehran Persian to those with a speaking knowledge of that language. In recent years there has been an increasing demand from Persian-speaking Iranian-American students for formal instruction in Persian. While many of these students have some degree of spoken fluency in Persian, they are often unable to read or write it. Their speaking ability makes it difficult to integrate them into first- or second-year classes of students who have started with no knowledge of Persian. If these Persian-speaking students could be brought to at least a second-year level of reading and writing, they could then be enrolled in more advanced courses in Persian where they would be more or less at the same level as other students. The course will focus on the lexical and syntactic differences between written and spoken Persian, and the problems of Persian spelling.
One term course offered either term
Also Offered As: PERS 017
Prerequisites: Fluency in spoken Persian.
Activity: Lecture
1 Course Unit

PERS 620 Persian Culture, Literature and Film for Advanced Learners I
Taught by: Shams Esmaeili
Also Offered As: PERS 320
Activity: Lecture
1 Course Unit

PERS 621 Persian Culture, Literature and Film for Advanced Learners II
Taught by: Shams Esmaeili
Also Offered As: PERS 321
Activity: Lecture
1 Course Unit
Pharmacology (PHRM)

PHRM 495 High Throughput discovery: A multidisciplinary approach to cancer
The newly developed massively parallel technologies have enabled the simultaneous analysis of many pathways. There are several large scale international efforts to probe the genetics and drug sensitivity of cancer cell lines. However, there are some rare cancers that have not been analyzed in depth. One of these rare cancers is malignant peripheral nerve sheet tumors (MPNST). MPNST, although a rare cancer, are common in patients with neurofibromatosis type 1. In the course, students will take part in a high throughput discovery effort in two phases. Phase 1 is a training phase, which will consist of quantitative profiling the sensitivity of MPNST cell lines to a library of 130 common and experimental cancer drugs. Phase 2 is an independent research project. We expect the course to be a hypothesis engine that generates ideas for further research.
Taught by: Staff Dr. Jeffrey Field; Dr. David Schultz; Dr. Simon Berrett
Course usually offered in spring term
Also Offered As: CHEM 495
Prerequisites: Prerequisites include a strong foundation in biology and chemistry. Students will prepare an abstract proposal by week four on their phase 2 projects, and a report in scientific paper style, due on the last day of the semester. In addition to attending the class lecture, an estimated 10 hours a week Independent Laboratory Research is expected.
Activity: Laboratory
1 Course Unit

PHRM 510 Neurotransmitter Signaling & Neuropsychopharmacology
The goals of this course are three-fold: 1) Provide an overview of major psychiatric disorders. 2) Provide in-depth information on neurotransmitters, emphasizing the wealth of new molecular information on how neurons function and communicate, as well as the basis for psychotherapeutics (one class per week). 3) Develop skills to appreciate, present and critically evaluate the current literature in neurotransmitter signaling and neuropsychopharmacology (one class per week).
Taught by: Staff Dr. Steve Thomas; Dr. Chris Pierce; Dr. Wade Berrettini; Dr. Liz Heller
Course offered spring; even-numbered years
Also Offered As: NGG 510
Prerequisite: Permission of course director
Activity: Lecture
1 Course Unit
Notes: Meets two times per week.

PHRM 532 Human Physiology.
This course will present a survey of the physiology of most of the major organ systems. It will integrate knowledge of cellular and molecular mechanisms into an understanding of function at the tissue organ and organism levels. It will begin with a brief review of membrane physiology followed by electrophysiology and signaling in nerve. Then after a brief outline of neural control systems and their role in homeostasis it will present motility and muscle the cardiovascular system respiration the renal and gastrointestinal systems and selected topics from the endocrine system the reproductive systems environmental and exercise physiology. As well as providing a basis of integrative physiology for students in fields such as physiology bioengineering and pharmacology it should be of interest to students of cellular and molecular biology and genetic engineering who will need to appreciate the roles of specific systems and molecules at higher levels of organization.
Taught by: Tejvir Khurana, Ben Prosser, and Paul Titchenell
Also Offered As: CAMB 532
Prerequisites: Although not a formal prerequisite a good foundation in cell biology at the level of BIOM/CAMB 600 (or an equivalent upper level undergraduate course) is strongly recommended. A general understanding of the chemistry and biochemistry of macromolecules and of basic molecular biology will also be assumed. This course is primarily designed for 2nd year BGS students; 1st year students in BGS or other programs will require the permission of the instructor. This course is not open to undergraduates.
Corequisites: Students without BIOM 600 require the instructors permission.
Activity: Lecture
1 Course Unit

PHRM 534 Experimental Genome Science
This course will survey methods and questions in experimental genomics including next generation sequencing methods genomic sequencing in humans and model organisms functional genomics proteomics and applications of genomics methods. Students will be expected to review and discuss current literature and to propose new experiments based on material learned in the course.
Taught by: C. Brown, J. Murray
Also Offered As: GCB 534
Prerequisites: Undergraduates and Masters students need BIOL431 or equivalent
Activity: Lecture
0.01 Course Units
PHRM 535 Introduction to Bioinformatics
This course provides an overview of bioinformatics and computational biology as applied to biomedical research. A primary objective of the course is to enable students to integrate modern bioinformatics tools into their research activities. Course material is aimed at addressing biological questions using computational approaches and the analysis of data. A basic primer in programming and operating in a UNIX environment will be presented, and students will also be introduced to Python R and tools for reproducible research. This course emphasizes direct hands-on experience with applications to current biological research problems. Areas include DNA sequence alignment, variant calling, and analysis motif discovery study design for high-throughput sequencing RNA and gene expression data analysis, and machine learning and topics in systems biology. The relevant principles underlying methods used for analysis in these areas will be introduced and discussed at a level appropriate for biologists with a background in computer science.
Taught by: B. Voight, C. Greene
Course usually offered in spring term
Also Offered As: GCB 535
Prerequisites: The course will assume a solid knowledge of modern biology. An advanced undergraduate course such as BIOL 421 or a graduate course in biology such as BIOL 526 (Principles in Cell and Molecular Biology) or BIOL 527 (Advanced Molecular Biology and Genetics) or BIOL 528 (Advanced Molecular Genetics) or BIOL 540 (Genetic Systems or equivalent) is a prerequisite.
Activity: Lecture
1 Course Unit
Notes: All students are required to bring a laptop to the lab sessions (Fridays). TAs will provide help with the material, but students should be computer-capable with their own laptop and should be willing/capable to download and install free software from the internet.

PHRM 542 Topics in Molecular Medicine
TIPM is planned as a once-weekly seminar course whose goal is to introduce students to the ways in which biomedical research can provide new insights into clinical medicine and, conversely, how knowledge of clinical disease impacts scientific discovery.
Taught by: Skip Brass, MD, PhD; Gary Koretzky, MD, PhD; Mark Kahn, MD
Course usually offered in fall term
Also Offered As: CAMB 542
Prerequisite: Permission of the course directors
Activity: Seminar
1 Course Unit
Notes: The course is designed primarily for combined degree (MD/PhD) students, but will be available to all medical and graduate students as space permits. Priority will be given to 2nd and 2nd year combined degree students. The optimal class size will be 14. Tentatively, the course will meet for one hour from 4-5 pm on Wednesday afternoons with occasional double sessions that will be two hours long.

PHRM 564 Drug Delivery
In this course, students will learn about drug delivery systems with emphasis on targeted therapeutics and translational nanomedicine. The course will be directed and taught by Miriam Wattenbarger (CBE) and Vladimir Muzykantov (PHRM). Lectures will also be given by other faculty from the Penn School of Engineering and Applied Science and the School of Medicine. The four main topics for the course are traditional drug delivery, drug delivery systems and nanocarriers, targeted and smart drug delivery systems, and translational aspects of drug delivery systems. There will be a midterm, final, and a group project for the course. Students will form small groups for the project and research a drug delivery topic to propose an extension of a current research area.
An oral and written proposal will be given by each group to the class at the end of the semester. The course is open to SEAS seniors and graduate students, SAS college pre-med, pre-Be and pre-BGS seniors, biotechnology MS students, PGG and BGS graduate students, Wharton and Dental School students.
Also Offered As: CBE 564
Activity: Lecture
1 Course Unit

PHRM 570 Principles of Cardiovascular Biology: Vascular biology, medicine and engineering
Lectures to be presented by various Medical School faculty members. Topics covered include: general principles of vascular biology and hemodynamics, endothelial cells and integral vascular functions, signaling in the cardiovascular system, angiogenesis, hemostasis and thrombosis, platelets, platelet/vascular interactions, vascular integrins and adhesion molecules, vascular inflammation and oxidative stress, white blood cells, vasomotor compounds and drugs, mechanisms of atherosclerosis, cholesterol and lipid metabolism, hypertension, novel vascular directed gene and enzyme therapies.
Taught by: Drs. Vladimir Muzykantov and Tilo Grosser
Course usually offered in spring term
Prerequisite: Permission of course director
Activity: Lecture
1 Course Unit

PHRM 580 Topics In Pharmacogenetics
This is a literature-based course (i.e. a seminar course/literature survey). It will survey the emerging technologies and computational advances that have permitted the field of pharmacogenetics to mature into a major biomedical discipline over the past few years. It will consider the likely impact on disease target identification, the development of new drugs for established and "niche" markets, the advent of "personalized medicine", including the selection of therapies that have maximum efficacy and minimum side-effect profiles. This course will also touch on some of the ethic issues associated with the routine genetic testing of patients to facilitate treatment choices and clinical monitoring.
Taught by: DR. A. STEVEN WHITEHEAD
Course usually offered in spring term
Prerequisite: Permission of course director
Activity: Seminar
1 Course Unit
PHRM 590 Molecular Toxicology: Chemical and Biological Mechanisms
Course Goals: Exposures to foreign compounds (drugs, carcinogens, and pollutants) can disrupt normal cellular processes leading to toxicity. This course will focus on the molecular mechanisms by which environmental exposures lead to end-organ injury and to diseases of environmental etiology (neurodegenerative and lung diseases, reproduction disruption and cardiovascular injury). Students will learn the difficulties in modeling response to low-dose chronic exposures, how these exposures are influenced by metabolism and disposition, and how reactive intermediates alter the function of biomolecules. Mechanisms responsible for cellular damage, aberrant repair, and end-organ injury will be discussed. Students will learn about modern predictive molecular toxicology to classify toxicants, predict individual susceptibility and response to environmental triggers, and how to develop and validate biomarkers for diseases of environmental etiology. Students are expected to write a term paper on risk assessment on an environmental exposure using available TOXNET information.
Taught by: Dr. Trevor M. Penning
Course usually offered in spring term
Also Offered As: REG 590
Prerequisites: Pre-requisites: Must have taken or will take Fundamentals of Pharmacology concurrently. Undergraduate course work in biochemistry and chemistry essential. Exceptions allowed based on past course work. Please consult with Course Director. Students: All 1st and 2nd year PGPS, CAMB, Neuro and BSTA students with required prerequisites; residents in Environmental and Occupational Health, and professional masters students (MPH and MTR).
Activity: Lecture
1 Course Unit

PHRM 605 Drug Discovery and Devel
Course usually offered in spring term
Also Offered As: BMB 605, CAMB 710
Activity: Lecture
0 Course Units

PHRM 623 Fundamentals of Pharmacology
This course is designed to introduce students to basic pharmacological concepts with special emphasis on the molecular actions of drugs. Subject matter includes use of microcomputers to analyze pharmacological data.
Taught by: Dr. Jeffrey Field and staff
Course usually offered in fall term
Also Offered As: REG 623
Prerequisite: Permission of course director
Activity: Lecture
1 Course Unit
Notes: Meets three times per week

PHRM 624 Medical Pharmacology
This course surveys the major classes of drugs used to treat human conditions, and focuses in the detail on their molecular mechanisms of action. It consists of two 2-hour lectures per week and problem sets. Student evaluation is based 50% on exams and 50% on problem sets. PHRM 624 is required of all 2nd year PG students. PG students must co-enroll in PHRM 532/CAMB 532 (Human Physiology).
Taught by: Course Directors: Paul H. Axelsen, Park Cho Park, Akiva Cohen, Steve Whitehead
Prerequisites: PHRM 623 - Fundamentals of Pharmacology; BIOM 600 - Cell Biology and Biochemistry Non-PG students must have permission from course director to enroll.
Activity: Lecture
2 Course Units

PHRM 632 Cell Control by Signal Transduction Pathways
This course, "Targeting the cancer cell: from mechanism to precision medicine", will examine how various signal transduction mechanisms influence cell functions including replication, growth, transcription, translation and intracellular trafficking. We will also consider how non-cell autonomous mechanisms, such as the tumor microenvironment and the immune system influence cancer cell signaling. We will consider how important signaling pathways, such as Ras, Raf, Notch, Wnt, TGF beta, and various kinases/phosphatases become dysregulated in cancer, as well as delve into how the DNA damage response, immune system, and tumor microenvironment exert important influences on oncogenic signaling. In the first half of the course, invited faculty members will pick 2 relatively recent papers from their field that highlight important areas. Each paper will be assigned to a student, who will meet with the faculty mentor prior to the class to discuss the paper and their presentation. During the class, students will present each paper for approximately 45 minutes with time for discussion. Students will present the important background, break down the paper, look for strengths and weakness and come up with a plan of what the next set of experiments could or should be. In the second half of the course, students will independently pick a relevant paper for in class presentation and will also write a short "News and Views" style article based on the paper they have chosen. The goal of the course is to provide students with a view of the cancer cell that integrates both cell autonomous and non-cell autonomous signals and to use this information to consider how to successfully treat cancer.
Taught by: X. Hua, J. Field, A. Resnick, and W. Pear
Course usually offered in spring term
Also Offered As: CAMB 632
Prerequisites: BIOM 600, Molecular and Cell Biology Courses
Activity: Seminar
1 Course Unit

PHRM 650 Current Biochemical Topics
Participation in the "Dr. George W. Raiziss Biochemical Rounds", a weekly seminar program sponsored by the Department of Biochemistry and Biophysics. Program deals with a wide range of modern biochemical and biophysical topics presented by established investigators selected from our faculty, and by leading scientists from other institutions.
Taught by: Black, B. & Shorter, J.
Also Offered As: BMB 650, CAMB 702
Prerequisites: Course is limited to BGS graduate students and undergrads from the Vagelos Scholars Program.
Activity: Seminar
1 Course Unit
PHRM 657 Introduction to Superfund Sites and Health Effects of Hazardous Waste
Superfund hazardous waste sites are prevalent in our nation and the exposures to toxicants from these sites raise immediate health concerns. The aims of this course are to educate students about such sites and provide a scientific basis for hazard identification, hazard characterization, risk communication and risk management. The course will describe the effect of these hazardous chemicals on the ecosystem and vice-versa, and remediation and mitigation approaches. These environmental science issues will lead into the environmental health aspects of exposures including: biomonitoring (external and internal dose, biomarkers and the exposome), toxicological properties of contaminants and mode-of-action. The course will be complemented with visits to two Superfund sites in the region: Ambler (asbestos) and Palmerton (heavy metals). Taught by: Jane Wollenbrink, Richard Pepino, Trevor Penning
Also offered as: ENVS 657
Prerequisites: 400 level course in Biology/Chemistry and Biochemistry
Activity: Lecture
1 Course Unit

PHRM 660 Frontiers in Cancer Pharmacology
This advanced course for graduate students combines didactic lectures from Penn faculty with oral presentations and oral assignments from the students. Students should have either completed PHRM 560, Principles in Cancer Signaling and Therapeutics or PHRM 640, Topics in Cancer Pharmacology or equivalent classes. The faculty will present overviews of current and emerging topics in cancer pharmacology. Emphasis of the presentations will be on the translation of basic science discoveries into therapeutic agents. Students will choose related topics to explore in more detail. In consultation with Dr. Blair, students will prepare a 45-minute presentation (using PowerPoint slides). Each student will give at least two presentations during the semester. The faculty teaching the course will be available for help with the presentations. The written assignment will involve a 10-page double spaced paper (exclusive of references) with a maximum of 25 references. The assignment will consist of a literature review in the area of one of the presentation topics chosen by the student. Additional information can be obtained from the Center for Cancer Pharmacology web site: http://www.med.upenn.edu/ccp/
Taught by: Dr. Ian A. Blair
Course usually offered in fall term
Prerequisite: Permission of the course director
Activity: Lecture
1 Course Unit

PHRM 699 Laboratory Rotation
Activity: Laboratory
1 Course Unit

PHRM 799 Independent Study
One-term course offered either term
Activity: Independent Study
0.5 Course Units

PHRM 899 Pre-Dissertation Lab Rotation
Activity: Laboratory
1 Course Unit

PHRM 970 Candidacy Examination
One-term course offered either term
Activity: Lecture
2 Course Units

PHRM 995 Dissertation
Activity: Dissertation
1 Course Unit

PHRM 999 Research in Pharmacology
Independent or collaborative research in various fields of pharmacology arranged individually with members of the staff.
One-term course offered either term
Prerequisite: Permission of staff member
Activity: Independent Study
1 Course Unit

Philosophy (PHIL)

PHIL 001 Introduction to Philosophy
Philosophers ask difficult questions about the most basic issues in human life. Does God exist? What can we know about the world? What does it mean to have a mind? How should I treat non-human animals? Do I have free will? This course is an introduction to some of these questions and to the methods philosophers have developed for thinking clearly about them.
For BA Students: Humanities and Social Science S
Taught by: Forbes
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Also fulfills General Requirement in History Tradition for Class of 2009 and prior. Freshman Seminar sections offered

PHIL 002 Ethics
Ethics is the study of right and wrong behavior. This introductory course will introduce students to major ethical theories, the possible sources of normativity, and specific ethical problems and questions. Topics may include euthanasia, abortion, animal rights, the family, sexuality, bioethics, crime and punishment and war.
For BA Students: Society Sector
Taught by: S. Meyer, Tan, Lord, M. Meyer
One-term course offered either term
Activity: Lecture
1 Course Unit

PHIL 003 History of Ancient Philosophy
"What is philosophy? How does it differ from science, religion, literature, and other modes of human discourse? This course traces the origins of philosophy as a discipline in the Western tradition, looking to thinkers of Ancient Greece and Rome. We will examine how natural philosophers such as Thales, Anaximander and Heraclitus distinguished their inquiries from the teachings of poets such as Homer and Hesiod; how ancient atomism had its origins in a response to Parmenides' challenge to the assumption that things change in the world; how Socrates reoriented the focus of philosophy away from the natural world and toward the fundamental ethical question, how shall I live? We will also examine how his pupil, Plato, and subsequently Aristotle, developed elaborate philosophical systems that address the nature of reality, knowledge, and human happiness. Finally, we will examine the ways in which later thinkers such as the Epicureans and Stoics transformed and extended the earlier tradition."
For BA Students: History and Tradition Sector
Taught by: S. Meyer
Course usually offered in fall term
Also offered as: CLST 103
Activity: Lecture
1 Course Unit
PHIL 004 History of Modern Philosophy
This course is an introduction to a few central themes in philosophy in the 17th and 18th centuries, and to some of the crucial thinkers who addressed those themes. Topics to be covered may include, among others, the nature of the human being (including the human mind), the relationship between God and the created world, the nature of freedom, and the relations among natural sciences, philosophy and theology in this rich period of human history.
For BA Students: History and Tradititon Sector
Taught by: Hatfield, Detlefsen, Chignell
Course usually offered in spring term
Also Offered As: GSWS 006
Activity: Lecture
1 Course Unit

PHIL 005 Formal Logic I
This course provides an introduction to some of the fundamental ideas of logic. Topics will include truth functional logic, quantification logic, and logical decision problems.
Taught by: Domotor, Weinstein
One term course offered either term
Also Offered As: LGIC 010, PHIL 505
Activity: Lecture
1 Course Unit
Notes: This is a Formal Reasoning course.

PHIL 006 Formal Logic II
An introduction to first-order logic including the completeness, compactness, and Löwenheim-Skolem theorems, and Godel's incompleteness theorems.
Taught by: Weinstein
Course usually offered in spring term
Also Offered As: PHIL 506
Activity: Lecture
1 Course Unit

PHIL 007 Critical Thinking
This course will provide the student with informal techniques for identifying and analyzing arguments found in natural language. Special attention will be paid to developing the ability to assess the strength of natural language arguments, as well as statistical arguments.
Course not offered every year
Activity: Lecture
1 Course Unit

PHIL 008 The Social Contract
This is a critical survey of the history of western modern political philosophy, beginning from the Early Modern period and concluding with the 19th or 20th Century. Our study typically begins with Hobbes and ends with Mill or Rawls. The organizing theme of our investigation will be the idea of the Social Contract. We will examine different contract theories as well as criticisms and proposed alternatives to the contract idea, such as utilitarianism. Besides the above, examples of authors we will read are Locke, Rousseau, Hume, Mill and Marx.
For BA Students: Society Sector
Taught by: Tan
Course usually offered in spring term
Also Offered As: PPE 008
Activity: Lecture
1 Course Unit

PHIL 015 Logic and Formal Reasoning
This course offers an introduction to three major types of formal reasoning: deductive, inductive (probabilistic and statistical), and practical (decision-making). The course will begin with the study of classical sentential and predicate logics. It will move on to elementary probability theory, contemporary statistics, decision theory and game theory.
For BA Students: Formal Reasoning and Analysis
Taught by: Domotor
Course usually offered in spring term
Activity: Lecture
1 Course Unit

PHIL 024 Philosophy of Biology
An introductory course about conceptual and ethical issues in the life sciences. Topics may include the nature of species, adaptation, fitness, the evolution of altruism, and debates about human nature. No prior background about biology or its history are required.
Activity: Seminar
1 Course Unit

PHIL 025 Philosophy of Science
What counts as a scientific theory? What counts as evidence for a scientific theory? Are scientific inferences justified? Does science give us truths or approximate truths about a world that exists independently of us? How can we know? Does it matter? These are all perennial questions in the philosophy of science, and the goal of this course is to look at how philosophers have answered these questions since the scientific revolution. In addition to reading classic work by philosophers of science, we will read material from living and dead scientists in order to gain a deeper appreciation of the philosophical questions that have troubled the most brilliant scientists in Western science.
For BA Students: Natural Science and Math Sector
Taught by: Weisberg, Spencer
One term course offered either term
Activity: Lecture
1 Course Unit

PHIL 026 Philosophy of Space and Time
This course provides an introduction to the philosophy and intellectual history of space-time and cosmological models from ancient to modern times with special emphasis on paradigm shifts, leading to Einstein's theories of special and general relativity and cosmology. Other topics include Big Bang, black holes stellar structure, the metaphysics of substance, particles, fields, and superstrings, unification and grand unification of modern physical theories. No philosophy of physics background is presupposed.
Taught by: Domotor
Course usually offered in fall term
Activity: Lecture
1 Course Unit
PHIL 028 Introduction to Feminist Philosophy
This course is an introduction to feminist thought, both in theory and in practice. We will consider how feminist thought emerged and evolved, as well as how feminist theories respond to various intellectual, social and political challenges. Questions we will address include: What exactly is feminism? How does one's gender identity impact one's lived experiences? How should we revise, reformulate, or rethink traditional answers to political and ethical issues in light of feminist theories? How can feminist analyses contribute to the development of better science, and our conceptions of knowledge?
Taught by: M. Meyer
Course not offered every year
Also Offered As: GSWS 028
Activity: Seminar
1 Course Unit
Notes: Offered through the College of General Studies

PHIL 029 Philosophy of Sport
This is an introductory philosophy course that uses philosophical tools to understand and answer questions that arise in and about sports. Is there a principled basis for determining methods of performance enhancement are acceptable? Developing a framework to answer this question will take us through: 1) questions about rules: what is their point in sports and what are appropriate reasons to change them; 2) questions about the point of participation in a sport; 3) questions about the kinds of virtues sports participants can demonstrate; and 4) questions about integrity of participants and a sport itself. A related set of questions concerns the appropriate competitors in sporting events: Should competition be restricted to single sex categories; Should competition be divided into disabled and non-disabled categories?
Taught by: M. Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 030 Plato: Democracy and the Power of Rhetoric
If you aspired to a political career in ancient Athens, public speaking was an essential skill. Athens was a direct democracy which meant that having the ability to win over your fellow citizens was tantamount to political success. Young, ambitious citizens would therefore pay handsomely to study with rhetoricians, who professed to teach this all-important skill. Plato, however, was famously wary of the power of rhetoric. In this class, we will read selections from Plato's dialogues in which many of the most prominent rhetoricians are engaged in discussion with Socrates about the nature of rhetoric, as well as its potential benefits and pitfalls. Students will then assume the role of citizens charged with speaking before the Athenian Assembly on various subjects. This will likely include a recreation of the trial of Socrates, who was himself accused of using rhetoric to make the weaker argument the stronger. By examining democracy at its threshold, and the power wielded by rhetoricians within a democracy, this CWIC seminar aims to provide both the context and the perspective to consider its later evolution.
Grades will be based on at least two oral presentations, as well as general participation in other classroom activities.
Taught by: Reese
Also Offered As: CLST 020
Activity: Seminar
1 Course Unit

PHIL 034 Philosophy of Religion
An introductory philosophical examination of questions regarding the nature of religious experiences and beliefs; arguments for and against the existence of God; the problem of evil; the relationships of faith, reason and science, the possibility of religious knowledge, the role of religious communities, etc. Readings from the history of philosophy, 20th century and contemporary philosophy.
Taught by: Steinberg
Course not offered every year
Activity: Lecture
1 Course Unit

PHIL 044 Introduction to Cognitive Science
Scope and limits of computer representation of knowledge, belief and perception, and the nature of cognitive processes from a computational perspective.
Taught by: Kearns, Liberman, Weinstein, Hatfield
Course usually offered in fall term
Also Offered As: CIS 140, LING 105, PSYC 207
Activity: Lecture
1 Course Unit
Notes: Formal Reasoning Course. All Classes

PHIL 050 Introduction to Indian Philosophy
This course will take the student through the major topics of Indian philosophy by first introducing the fundamental concepts and terms that are necessary for a deeper understanding of themes that pervade the philosophical literature of India—arguments for and against the existence of God, for example the ontological status of external objects, the means of valid knowledge, standards of proof, the discourse on the aims of life. The readings will emphasize classical Hindu, Buddhist, and Jain philosophical articulations (from 700 B.E. to 16th century CE) but we will also supplement our study of these materials with contemporary or relatively recent philosophical writings to modern India.
For BA Students: History and Tradition Sector
Also Offered As: RELS 155, SAST 050
Activity: Lecture
1 Course Unit

PHIL 051 Yoga and Philosophy
"Yoga" means to yoke in Sanskrit. Metaphorically, this is often interpreted as union, or integration. This course will explore central aspects of yogic philosophy and practice, and how they relate to, and might be integrated with, contemporary analytic philosophy, college life, and beyond. We will focus on three key issues: (1) What is yogic philosophy? How does it relate to the western philosophical tradition more commonly taught in philosophy departments in the U.S.? (2) What does the practice of yoga have to do with theoretical understanding? (3) Is it possible to integrate a yogic worldview and a scientific worldview? Is there scientific evidence that yoga "works"? What does that even mean? This course will contain both a theoretical component and a practice component. In addition to writing analytical essays on these topics, students will maintain a yoga practice and a reflective journal throughout the course. No prior experience with yoga is required.
Taught by: Miracchi
Activity: Seminar
1 Course Unit
PHIL 055 Existentialism
An introduction to the philosophy and literature of Existentialism. Readings from philosophers such as Nietzsche, Kierkegaard, Heidegger, de Beauvoir, Camus, Sartre, and writers such as Dostoyevsky, Ibsen, Kafka, and Beckett.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 072 Biomedical Ethics
This course is an introduction to bioethics, focusing on ethical questions arising at the beginning and end of life. Topics will include procreative responsibilities, the question of wrongful life, and prenatal moral status as well as questions of justice related to markets for sperm, eggs and gestation. We will also attend to dilemmas at the end of life, including the authority of advance directives, euthanasia and the allocation of life-saving therapies.
For BA Students: Society Sector
Course not offered every year
Also Offered As: PPE 072
Activity: Lecture
1 Course Unit

PHIL 073 Topics in Ethics
This course examines some of the central theoretical and applied questions of ethics. For example, what is the good life? By what measure or principles do we evaluate the rightness and wrongness of actions? How does ethical reasoning help us understand and address real world problems such as world hunger, social injustice, sex and race discrimination, allocation of scarce resources and the like. The course can be organized around an applied topic or practical issue such as global ethics, just war, biomedical ethics or environmental ethics.
Taught by: Gibbons, M.Meyer
Course not offered every year
Also Offered As: ENVS 073, PPE 073
Activity: Seminar
1 Course Unit

PHIL 074 Business Ethics
We will examine practical ethical issues facing businesses, and the philosophical tools for addressing them. Topics may include corporate responsibility, shareholders vs. stakeholders, whistle blowing, raiding and restructuring, the morality of markets, fair hiring practices, workers rights, sexual harassment, environmental impact.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 076 Political Philosophy
An introduction to some central issues in social and political philosophy, liberty, equality, property, authority, distributive justice. Readings may be from Hobbes, Locke, Mill, Marx, and more recent theorists such as Rawls and Nozick.
Taught by: Freeman
Course not offered every year
Activity: Lecture
1 Course Unit

PHIL 077 Philosophy of Law
This course is an introduction to some of the central philosophical problems of law. What is law? What makes law? What is the relationship between law and morality? Can laws be unjust? Is there a moral obligation to obey the law? We will look at different theories of law, such as positivism and natural law theory, and discuss topics like civil disobedience, liberty and the law, and punishment and the law. The third and final section of the course will consider an unusual and particularly significant kind of law: constitutional law. We will consider the purpose(s) of constitutions, how constitutionalism relates to democracy, and how constitutions ought to be understood and interpreted, in light of our answers to these first two questions. Throughout the course, we will engage with both classic and contemporary work, reading work by Michelle Alexander, Jeremy Bentham, Angela Davis, Ronald Dworkin, John Hart Ely, H.L.A. Hart, Thomas Hobbes, John Locke, John Stuart Mill, Robert Nozick, Martha Nussbaum, Richard Posner, Jeremy Waldron, and others.
For BA Students: Society Sector
Taught by: Hutler
Course not offered every year
Activity: Lecture
1 Course Unit

PHIL 079 Environmental Ethics
In this course we will investigate some of the ethical issues that arise from our relationship with the environment. Topics may include: What are our responsibilities toward the environment, as individuals and as members of institutions? How do our responsibilities toward the environment relate to other ethical considerations? Do non-human animals/species/ecosystems have intrinsic value? What should conservationists conserve?
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 080 Aesthetics
This course examines philosophical issues centering on the nature and value of the arts. Some questions we'll consider are: What is art? What does it mean to have an aesthetic experience? How are aesthetic experiences different from non-aesthetic ones? What is the relation between art and truth? How do the moral qualities of a work of art affect its aesthetic qualities? Why are emotions important in our interpretations of artworks? What is the relation between art and expression? Do forgeries necessarily have less aesthetic value than original artworks? What are aesthetic judgments, and are they merely expressions of taste? Lecture and discussion will center on both classical and contemporary works in aesthetics.
For BA Students: Arts and Letters Sector
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 155 Continental Philosophy
In this course we read various texts in the Enlightenment tradition and more recent ones critical of modern distortions of this tradition. Readings may include: Kant and Marx, two exemplars of this tradition, as well as the views of the Frankfurt School (e.g. Horkheimer and Adorno), Foucault, Derrida, Nietzsche and Saussure.
Taught by: Steinberg
Course not offered every year
Activity: Seminar
1 Course Unit
PHIL 203 Thinking with Models
When a flu pandemic strikes, who should get accinated first? What's our best strategy for minimizing the damage of global climate change? Why is Philadelphia racially segregated? Why do most sexually reproducing species have two sexes, in roughly even proportions? These and many other scientific and practical problems required us to get a handle on complex systems. And an important part of deepening our understanding and sharpening our intuitions requires us to think with models. Students in this laboratory-based course will learn about the varied practices of modeling, and will learn how to construct, analyze, and validate models. For BA Students: Formal Reasoning and Analysis
Taught by: Weisberg
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 205 What is Meaning?
This course will survey several central topics in philosophy of mind and language, as well as investigate how these areas of philosophy interact with the scientific study of the mind. Questions addressed may include: What is it to have a mind? What is consciousness? What is it to think, to perceive, to act, to communicate, to feel emotions? What is the relationship between the mind and the brain? Can there be a science of the mind? Of language? What can it tell us? What can philosophy contribute to cognitive science? We will look for more precise ways of asking these questions, and we will study some canonical answers to them.
Course not offered every year
Activity: Lecture
1 Course Unit

PHIL 209 Introduction to Plato
A survey of selected dialogues of Plato, an Athenian philosopher of the fourth century BCE. Works read may include the Euthyphro, Crito, Gorgias, Laches, Charmides, Phaedo, Philebus, Statesman, and Plato's last dialogue, the Laws. The course will be run as a seminar. All works will be read in English translation. Topics to be discussed may include metaphysics, epistemology, psychology, ethics, and political theory.
Taught by: S. Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 210 Introduction to Aristotle
Aristotle (384-323 BCE) was one of the most important philosophers in Classical Greece, and his legacy had unparalleled influence on the development of the Western philosophical thought through the medieval period. We will study a selection of his works in natural philosophy, metaphysics, epistemology, psychology, ethics and politics. All texts will be read in English translation. No background in Greek philosophy or knowledge of Greek is required.
Taught by: S. Meyer
Course not offered every year
Activity: Lecture
1 Course Unit

PHIL 211 Ancient Moral Philosophy
A survey of ethical philosophy in the Ancient Greek tradition. We will study the work of Plato, Aristotle, Epicurus, and the Stoics, including writings of later Roman authors such as Cicero, Seneca, Epictetus, and Marcus Aurelius. The class will be run as a seminar. All works will be read in English translation.
For BA Students: Society Sector
Taught by: S. Meyer
Course not offered every year
Also Offered As: CLST 211
Activity: Seminar
1 Course Unit

PHIL 211 Philosophy East and West
Our goal in this course is to bring Western Philosophy and Eastern Philosophy into dialogue. Topics we will cover include skepticism and knowledge, ethics and the good life, moral responsibility and personal relationships, and political obligations and justice. Do the Western and Eastern philosophical traditions approach these topics in the same way? Do they even share an understanding of what the problems and issues at stake are? And what can we learn from comparative philosophy? This freshman seminar does not presuppose prior knowledge of philosophy. Examples of authors we will study include Descartes, Aristotle, Mencius, and Confucius.
Taught by: Tan.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 223 Philosophy and Visual Perception
In this course, we'll use the biology, psychology and phenomenology of vision to explore philosophical questions about color, such as these: Color vision helps us get around in our environments, but in what sense is it a window onto reality, if it is? Are colors properties of objects, or are they inherently private, subjective properties of minds? What can non-human forms of color vision teach us about the nature of color and how should we empirically study color vision? Do we need to see in color to understand it? How do our ordinary ways of talking and thinking about colors relate to the experiences we have in color? How does color vision figure in aesthetic judgment? And to what degree can it be influenced by learning, or by social biases like sexist or racist prejudices?
Taught by: Hatfield, Connolly
Also Offered As: PHIL 423, VLST 223
Activity: Seminar
1 Course Unit

PHIL 225 Introduction to Philosophy of Science
A discussion of some philosophical questions that naturally arise in scientific research. Issues to be covered include: The nature of scientific explanation, the relation of theories to evidence, and the development of science (e.g., does science progress? Are earlier theories refuted or refined?).
Taught by: Domotor
One term course offered either term
Activity: Seminar
1 Course Unit
PHIL 226 Philosophy of Biology
This course consists of a detailed examination of evolutionary theory and its philosophical foundations. The course begins with a consideration of Darwin's formulation of evolutionary theory and the main influences on Darwin. We will then consider two contemporary presentations of the theory: Richard Dawkins' and Richard Lewontin's. The remainder of the course will deal with a number of foundational issues including adaptation, the units of selection, the evolution of altruism, and the possibility of grounding ethics in evolutionary theory.
For BA Students: Natural Science and Math Sector
Taught by: Weisberg
Course not offered every year
Also Offered As: PHIL 521, PPE 225
Activity: Seminar
1 Course Unit
Notes: Application required through Penn Global: https://global.upenn.edu/pennabroad/pgs

PHIL 228 Philosophy of Social Science
This course is about the foundations of contemporary social science. It focuses on the nature of social systems, the similarities and differences between social and natural sciences, the construction, analysis, and confirmation of social theories, and the nature of social explanations. Specific topics may include: What are social norms and conventions? What does it mean to have one gender rather than another, or one sexual orientation rather than another? Should social systems be studied quantitatively or qualitatively?
Taught by: Weisberg, Bichieri
Course not offered every year
Also Offered As: PPE 314
Prerequisites: PPE 008, ECON 001, ECON 002, PSCI 182, PPE 153, PPE 201
Activity: Lecture
1 Course Unit

PHIL 231 Epistemology
Two basic assumptions of academic research are that there are truths and we can know them. Epistemology is the study how knowledge, what it is, how it is produced, and how we can have it. Metaphysics, the study of the basic constituents of reality, the study of being as such.
In this introduction to metaphysics and epistemology, we will ask hard questions about the nature of reality and knowledge. No philosophy background is required for this course.
Taught by: Singer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 233 Philosophy of Economics
In this course, general philosophy of science issues are applied to economics, and some problems specific to economics are tackled. While analytical questions like "What is economics?" or "What is an economic explanation" must be pursued, the ultimate goal is practical: What is good economics? How can economists contribute to a better understanding of society, and a better society? How can we make economics better? Topics to be discussed include the following: specific object and method of economics as a social science; its relation with other disciplines (physics, psychology and evolutionary theory); values in economics (welfare, freedom, equality and neutrality); the role of understanding and possible limits of a quantitative approach to human behavior (purposefulness, freedom, creativity, innovation); prediction, unpredictability and the pretension of prediction; causation in econometrics and in economic theory (equilibrium); selfishness and utility maximization (cognitive and behaviorist interpretations); economic models and unrealistic assumptions (realism and instrumentalism); empirical basis of economics (observation and experiment); microeconomics and macroeconomics (redistribution and autonomy); pluralism in economics (mainstream economics and heterodox schools).
Taught by: Pereira Di Salvo, Carlos
Course not offered every year
Also Offered As: PPE 233
Activity: Lecture
1 Course Unit

PHIL 234 Philosophy of Religion
This course will focus on arguments for and against the existence of God. It will begin by examining the ontological, cosmological, and design arguments for the existence of God. Included will be a discussion of purported evidence for the existence of God from modern biology and cosmology. It will then examine arguments against the existence of God based on human and animal suffering, followed by arguments against the existence of God arising from the scarcity of credible miracle claims.
Course not offered every year
Also Offered As: RELS 204
Activity: Seminar
1 Course Unit

PHIL 243 Topics In Metaphysics
In this class we employ science fiction thought experiments as a means of reflecting on questions like: What is reality? What is the nature of the self and mind? Might you be in a computer simulation (e.g., as in The Matrix)? Is time travel possible? Can your mind survive the death of your brain by uploading? Is time real or is it merely an illusion?
Taught by: Domotor
Course not offered every year
Prerequisites: PHIL 001 or PHIL 003 or PHIL 004, or permission of instructor.
Activity: Seminar
1 Course Unit
PHIL 244 Introduction to Philosophy of Mind
This course will survey several central topics in philosophy of mind, as well as investigating how philosophy of the mind interacts with scientific study of the mind. Among the questions we’ll be asking are: What is it to have a mind? What is the relationship between the mind and the brain? Can there be a science of the mind? What can it tell us? What can philosophy contribute to a science of the mind? What is consciousness? What is it to think, to perceive, to act? How are perception, thought, and action related to one another?
Taught by: Domotor Miracchi
One term course offered either term
Also Offered As: PPE 244, VLST 221
Activity: Seminar
1 Course Unit

PHIL 247 Marx
Precious few, if any, communist states exist today as Karl Marx would have imagined them. Indeed, almost every part of the 19th-century culture Marx put under his philosophical microscope has in one way or another vanished or been radically transformed: the state, the school, even sex have been fundamentally altered during a long 20th century filled with revolutions of culture. This class asks: is there a future for a philosopher whose political projects seem so precarious—if they have not failed outright in the face of global capitalism? We will try to answer this question by examining the origins and the implications of Marx’s writings, but also his complex legacy, from Lenin through Guevara to Foucault and Zizek. The course will conclude with a consideration of the role of the radical in today's global politics and cultural sphere.
For BA Students: Humanities and Social Science S
Taught by: Jarosinski
Course not offered every year
Also Offered As: COML 247, GRMN 247
Activity: Lecture
1 Course Unit

PHIL 249 Philosophy of Education
We sometimes see philosophy as an inaccessible subject and the philosopher a solitary academic musing about abstract concepts from her office chair. However, philosophical thinking lies at the heart of many aspects of human life. Anyone who has pondered over questions regarding goodness, value, personal identity, justice, how to live well, or how to determine the right course of action has thought philosophically. These issues are of great interest and importance not just to adults, but also to children and teenagers. Introducing younger students to philosophical thought consists, in part, of showing them the ways in which they are already thinking philosophically. In this course, we will study a variety of topics in philosophy with the aim of developing curricula and lesson plans for delivery in middle school (6th through 8th grades). Course participants will work with the instructor and with help from a curricular planner from Penn’s Graduate School of Education to develop a series of one-hour lessons in philosophy, which participants will then teach to the middle school students in a local school. Part of the course will be held on Penn’s campus, and part of the course will be held on-site with one of our partner schools. This course is an Academically Based Community Service course. Registration in this class requires a permit, following an interview with the instructor.
Taught by: Detlefsen
Course not offered every year
Also Offered As: GSWS 249
Activity: Seminar
1 Course Unit

PHIL 271 Global Justice
This course is an introduction to some of the central problems in global justice. Samples of these topics include: What are our duties to respond to world poverty and what is the basis of this duty? Is global inequality in itself a matter of justice? How universal are human rights? Should human rights defer to cultural claims at all? Is there a right to intervene in another country to protect human rights there? Indeed can intervention to protect human rights ever be a duty? Who is responsible for the environment? We will read some influential contemporary essays by philosophers on these topics with the goal of using the ideas in these papers as a springboard for our own further discussion and analysis.
Taught by: Tan
Course not offered every year
Also Offered As: PPE 271
Activity: Seminar
1 Course Unit

PHIL 277 Justice, Law and Morality
The course will focus on the philosophical background to the individual rights protected by the U.S. Constitution, including 1st Amendment freedoms of religion, expression, and association; the 14th amendment guarantee of Due Process and the rights of privacy, abortion, assisted suicide, and marriage; the Equal Protection clause and equal political rights and the legitimacy of affirmative action; and the Takings and Contract clauses and their bearing on rights of private property and economic freedoms. In addition to Supreme Court decisions on these issues, we will read works by political philosophers and constitutional theorists, including J. S. Mill, Ronald Dworkin, Cass Sunstein, Martha Nussbaum, Katherine MacKinnon and others.
Taught by: Freeman, Allen
Course not offered every year
Also Offered As: PPE 277
Activity: Lecture
1 Course Unit

PHIL 280 Topics in Aesthetics
What is beauty? What is the relationship between beauty and goodness? What does aesthetic judgment tell us, if anything, about the world? This course addresses these and other questions by focusing predominantly on Kant’s highly influential aesthetic theory. It situates this text in the context of other works on aesthetics. We begin with Plato’s views expressed in The Symposium that beauty is a form to which humans gain (some) access through love. We then turn to essays by Shaftesbury and Hume that introduce key aesthetic notions that Kant will elaborate (and revise) – including those of taste, common sense, harmony, and aesthetic disinterest. We also read selections from the work of Friedrich Schiller, John Dewey, and A. K. Coomaraswamy who offer alternative accounts of the relationship between beauty and ethical life – a relationship that Kant acknowledges but considers to be importantly limited. The question of the relationship between ethics and aesthetics will form the backdrop for this semester’s reading overall.
Course not offered every year
Also Offered As: GRMN 280
Activity: Seminar
1 Course Unit
PHIL 291 Philosophy of Race
Historically, philosophical questions about race have been about the nature and reality of race, the nature of racism, and social or political questions related to race or racism. In fitting with that history, the first part of the course will focus on the nature and reality of race, as understood in biology and as understood by ordinary people. We will begin by looking at biological race theories from François Bernier in 1684 to Pigliucci and Kaplan in 2003. Next, we will look at the philosophical work that has been done on the nature and reality of race as ordinarily understood in the contemporary United States. We will discuss racial anti-realism, social constructionism about race, and biological racial realism from well-known philosophers of race like Anthony Appiah, Sally Haslanger, and Joshua Glasgow. The second part of the course will focus on the nature of racism and social or political questions related to race or racism. In our discussion of racism, we will cover, at least, intrinsic racism, extrinsic racism, and institutional racism. In our discussion of social or political issues related to race or racism, we will look at whether any US racial groups should be used to diagnose, study, or treat genetic disorders.

Taught by: Spencer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 295 Identity
The content of the course may include the following, and related, themes: what makes a human the same human over time? What constitutes our identities? Are gender, race, sexual orientation, and the like essential features of our identities, and if so, how do they become so? How do ethics, politics, and identity interact? After learning this philosophical content, Penn students will develop lesson plans for introducing this content to Philadelphia public high school students. Midway through the semester, Penn students will start to prepare the high school students to present their own original work on the philosophy of identity at a conference to be held at Penn in May 2017. Penn students will be assessed on their own written and other work for the course, and in no way on the written or oral work of the high school students. Enrollment by permit only. Please contact Professor Detlefsen detlefsen@sas.upenn.edu to schedule an interview for admission to the course.

PHIL 299 Independent Study
Student arranges with a faculty member to pursue a program of reading and writing on a suitable topic.
One term course offered either term
Activity: Independent Study
1 Course Unit

PHIL 301 Directed Honors Research
Open only to senior majors in philosophy. Student arranges with a faculty member to do an honors thesis on a suitable topic.
One term course offered either term
Activity: Independent Study
1 Course Unit

PHIL 325 Topics in Philosophy of Science
The aim of this course is to explore the relationships between philosophy and physics, with a focus on prominent foundational issues in modern physics. The course is organized around four main areas. In the first part, we focus on the philosophy and (classical and relativistic) structure of space and time, including the proliferations of physical geometries (Lobachevskian and Riemannian) of curved space time. Are space and time real? If so, what kind of entities are they? Metaphysically, we have a choice between presentism and eternalism, and regarding the nature of physical objects in space-time, there is a choice between endurantism and perdurantism. Is time travel possible? In the second part, we concentrate on the basic metaphysical and epistemological questions posed by physics: causality, determinism, randomness, and the nature of physical laws. How is cause conveyed from one physical body to another? Are the laws of physics true? In the third part, we turn to the principal philosophical issues raised by quantum physics: structural realism and the interpretations of quantum mechanics, non-locality and Bell’s theorem, the infamous Schrödinger cat paradox, hidden variables, and quantum measurement. What is primary – particles or waves? Finally in the fourth part, we investigate the metaphysics underlying Big Bang and Ekpyrotic cosmological theories, and evidence for a parallel universe and baby universes. All these philosophical issues will be addressed by looking at some simple examples or episodes taken from modern physics. The bulk of the readings will come from two textbooks (available at the Barnes & Noble University Bookstore) and articles in journals.

PREREQUISITES: This course is entirely self-contained. All topics in physics that are necessary for understanding the pertinent philosophical problems will be reviewed in class.

Taught by: Weisberg
One term course offered either term
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 330 Philosophy of Perception
Taking our perceptual experience as a given, what causes it? In a realistic mood, we accept that objects in the environment, or in the “external world”, cause us to have the perceptual experiences that we do (as of a table with food, or of a garden with flowers in it). Yet on this realistic view, our perception is the result of a causal chain that leads from object to eye to brain to experiences, and we are only given the last element: the experience. So how do we really know how our experiences are caused, and where do we get the idea that they are caused by an external world of physical objects? The seminar will focus on the problem of the external world as examined by David Hume, Thomas Reid, G. E. Moore, and Bertrand Russell, along with recent authors.

Taught by: Hatfield
Course not offered every year
Also Offered As: VLST 222
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 343 Philosophy of Mind
This majors seminar will focus on selected topics in Philosophy of Mind.

Taught by: Miracchi
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only
PHIL 359 Topics in Theoretical Philosophy
This majors seminar will cover selected topics in metaphysics, epistemology, philosophy of mind, philosophy of science, or philosophy of language. Topics will vary from term to term.
Taught by: Spencer
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 361 Ancient Philosophical Figures
A study of selected topics, texts, and figures from classical Greek philosophy. Topics will vary from term to term.
Taught by: S. Meyer
Course not offered every year
Prerequisite: PHIL 003
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 362 Modern Philosophical Figures
A study of selected topics, texts, and figures from 17th and 18th century European philosophy. Figures studied may include Descartes, Leibniz, Locke, Berkeley, Hume, or Kant. Topics will vary from term to term.
Taught by: Hatfield, Detlefsen
Course not offered every year
Also Offered As: GRMN 363, PHIL 565
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 372 Topics in Ethics
This majors seminar will cover selected topics in ethics. The content will vary from semester to semester.
Taught by: Freeman
Course not offered every year
Prerequisite: PHIL 002 (or consent of the instructor)
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 376 Justice
This majors seminar will focus on contemporary works on liberalism, democracy, capitalism, and distributive justice. Questions to be discussed may include: Which rights and liberties are fundamental in a constitutional democracy? What is equality and what requirements does it impose? Are economic rights of property and freedom of contract equally important as personal liberties of speech, religion, and association? Does capitalism realize a just distribution of income and wealth? What is socialism and is it potentially just, or necessarily unjust? Readings from works by John Rawls, Robert Nozick, Milton Friedman, and others.
Taught by: Freeman
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 379 Topics in Political Philosophy
This majors seminar will focus on various topics in political philosophy. Topics will vary from term to term.
Taught by: Pereira Di Salvo
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Department Majors Only

PHIL 405 Philosophy of Language
This course provides an overview of 20th century analytic philosophy of language. Questions we will ask may include: How do words refer? How do they combine to express thoughts? How do words relate to concepts or to thoughts more generally? What do words and sentences mean? How do we use them to communicate with each other? How does word and sentence meaning depend on the contexts in which they are spoken or heard, or on stable features of environments of linguistic speakers?
Taught by: Miracchi
Course not offered every year
Prerequisite: PHIL 005 or PHIL 505 or permission of instructor
Activity: Seminar
1 Course Unit

PHIL 407 Aristotle
A study of Aristotle's main writings on language, reality, knowledge, nature and psychology. All texts will be read in English translation. No background in Greek philosophy or knowledge of Greek is required, although previous work in philosophy is strongly recommended.
Taught by: S. Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 409 Plato's Selected Dialogues
A study of selected dialogues of Plato. All texts will be read in translation. No prior experience in Plato is required, but students should have some background in philosophy. Dialogues studied will vary from term to term.
Taught by: S. Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 410 Introduction to Logic and Computability
Taught by: Weinstein
Course not offered every year
Also Offered As: LGIC 310, MATH 570
Prerequisite: Math 371 or Math 503
Activity: Lecture
1 Course Unit

PHIL 412 Topics in Logic
The course focuses topics drawn from the central areas of mathematical logic: model theory, proof theory, set theory, and computability theory.
Taught by: Weinstein
Course not offered every year
Also Offered As: CIS 518, LGIC 320, MATH 571, MATH 671
Activity: Seminar
1 Course Unit
PHIL 414 Philosophy of Mathematics
The course will focus on the development of the foundations and philosophy of mathematics from the late nineteenth-century through the present day. Topics may include logicism, formalism, intuitionism, and the foundations of set theory. Ample consideration will be given to some of the fundamental results of mathematical logic, such as the Gödel incompleteness theorems and the independence of the Continuum Hypothesis from Zermelo-Fraenkel set theory, that have had a profound impact on contemporary approaches to the philosophy of mathematics.
Taught by: Weinstein, Ewald
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 423 Philosophy and Visual Perception
Central issues in the philosophy of perception from the modern period, including: what we perceive, the meaningful content of perception, and its relation to a mind-independent external world. Additional topics may include: (1) color perception and color metaphysics; (2) object perception in its interplay between Gestalt organizational factors and background knowledge; (3) the role of ecological regularities in the formation of our visual system and in the ongoing tuning of the system to the environment; (4) the geometry of visual space and the phenomenology of visual appearances of size and shape; (5) the problem of how visual scenes are experienced by means of images. Readings from authors such as Bertrand Russell, R. W. Sellars, Tim Crane, Evan Thompson, Robert Swartz, Wolfgang Metzger, Nelson Goodman, Richard Wollheim, and William Hopp, among others.
Taught by: Hatfield
One-term course offered either term
Also Offered As: PHIL 223, VLST 223
Activity: Seminar
1 Course Unit

PHIL 425 Philosophy of Science
An advanced introduction to the central philosophical questions concerning the nature of scientific knowledge and its relation to experience, and the metaphysical assumptions underlying the natural sciences. Topics to be covered include: science versus pseudo-science, laws of nature, causation, determinism and randomness, theories and models in science, scientific explanation, underdetermination of theories by observation and measurement, realism and antirealism, reductionism and intertheory relations, objectivity and value judgments in science, hypothesis testing and confirmation of scientific theories, and classical paradoxes in scientific methodology.
Taught by: Domotor
One-term course offered either term
Also Offered As: STSC 325
Prerequisites: Background in elementary logic and some rudiments of science
Activity: Seminar
1 Course Unit

PHIL 426 Philosophy of Psychology
An examination of major trends of thought in experimental psychology in relation to philosophy and the philosophy of science. What is the subject matter and object of explanation of experimental psychology? What is the relation between psychology and neuroscience? How is scientific psychology related to traditional philosophical investigations of the mind? The course covers the classical systems and schools of psychology (Wundt, James, behaviorism, Gestalt psychology, cognitive and perceptual psychology, and cognitive science) and such contemporary problems as consciousness, philosophical foundations of cognitive science, theories of the extended and embodied mind, and the relation between neuroscience and psychology.
Taught by: Hatfield
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 430 Philosophy of Mind
This course studies particular topics in contemporary philosophy of mind and cognitive science. Examples include: the nature of consciousness, naturalistic accounts of intentionality, the nature scope of scientific explanation in studying the mind, the intersection of philosophy of mind and epistemology, and theories of agency. Typically, readings include both philosophy and empirical work from relevant sciences.
Taught by: Miracchi
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 431 Theory of Knowledge
Selected topics in Epistemology such as: bridging the gap between mainstream and formal epistemology, the familiar tripartite definition of knowledge (knowledge as justified true belief), basic logical and probabilistic models of knowledge (Hintikka, Aumann, and Bayesian) and their multi-agent variants, logical omniscience and other problems (including the epistemic closure principle), attempts at formalizing joint and common knowledge, resource-bounded knowledge, knowledge under limited logical powers, and empirical knowledge obscured by system complexity.
Taught by: Domotor
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 448 19th Century Philosophy
A study of selected figures in 19th century philosophy. Figures to be studied may include Hegel, Fichte, Schelling, Schopenhauer, Nietzsche and, Kierkegaard.
Taught by: Horstmann
Course not offered every year
Also Offered As: GRMN 548
Activity: Seminar
1 Course Unit
PHIL 450 African, Latin American and Native American Philosophy
This course is an introduction to philosophical work from Africa, Latin America, and the indigenous peoples of North America, covering topics in ethics, metaphysics, epistemology, philosophy of mind, aesthetics, social philosophy, and political philosophy. The course aims to give work from these traditions greater exposure and to provide a chance for students to encounter work that might spark an interest in future research. We will cover in some depth views held by Akan, Aztec, Blackfoot, Dogon, Iroquois, Lakota, Navajo, Ojibwa, and Yoruba peoples. We will also read work by a number of philosophers, including: Kwame Anthony Appiah, Kwame Gyekye, Julius Nyerere, Sor Juanna Ines de la Cruz, Simon Bolivar, Jose Marti, Jose Vasconcelos, Enrique Dussel, Gregory Cajete, Anne Waters, and many others. Throughout, we will also engage with related meta-philosophical issues that emerge with work from all three areas, allowing for interesting cross-discussion. Are these really proper fields of philosophy? How do we make sense of the idea of African (or Latin American, or Native American) Philosophy as a field? Are there philosophically important differences between oral traditions and written traditions? How should we understand ethnophilosophy and cultural worldviews as philosophical contributions? How should we think of the "sage" figure in relation to philosophy? How do these traditions engage discussions of identity, autonomy, and post-colonialism? Should this work be incorporated into the mainstream philosophical canon?
Activity: Seminar
1 Course Unit

PHIL 465 Kant I
The course will concentrate on the Critique of Pure Reason and discuss in detail Kant's conception of knowledge and experience, his criticism of traditional metaphysics and the resulting project of a system of transcendental philosophy.
Taught by: Horstmann
Course not offered every year
Also Offered As: GRMN 551
Prerequisites: PHIL 004, one advanced Philosophy course, or permission of instructor
Activity: Seminar
1 Course Unit

PHIL 466 Kant II
This course is a study of Kant's moral and political philosophy. Texts may include Kant's Lectures on Ethics, Groundwork for the Metaphysics of Morals, Critique of Practical Reason, Religion within the Boundaries of Mere Reason, and Metaphysics of Morals.
Course not offered every year
Also Offered As: GRMN 552
Prerequisites: PHIL 002, PHIL 004, or permission of instructor
Activity: Seminar
1 Course Unit

PHIL 468 Hegel
A study of Hegel's philosophy, focusing primarily on his Phenomenology of Spirit, with attention to relevant passages in other works such as Hegel's Logic and Philosophy of Right. Topics may include: (1) Hegel's conception of philosophy, (2) the development of his system, (3) the problem of an introduction to his system (Phenomenology of Spirit), (4) Hegel's criticism of traditional metaphysics, (5) his notion of a 'concept' (Begriff), his theory of the Idea. The seminar will focus primarily on some of Hegel's early Jena writings, his Phenomenology of Spirit, on passages from different versions of Hegel's Logic and (maybe) on aspects of his Philosophy of Right. Topics that are dealt with include: (1) Hegel's conception of philosophy, (2) the development of his system, (3) the problem of an introduction to his system (Phenomenology of Spirit), (4) Hegel's criticism of traditional metaphysics, (5) his notion of a 'concept' (Begriff), his theory of the Idea. Other topics might become of interest as well.
Taught by: Horstmann
Course not offered every year
Also Offered As: GRMN 583
Activity: Seminar
1 Course Unit

PHIL 472 Survey of Ethical Theory
This course is an investigation of the main questions and problems in metaethics since the turn of the 20th century. We will investigate questions about the metaphysics of morality, the philosophy of language of moral talk, the philosophy of mind of moral thought, the epistemology of morality, and the objectivity of morality.
Taught by: Lord
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 479 Modern Political Philosophy
A survey of several works in modern political philosophy, including Thomas Hobbes's, Leviathan; John Locke's, Second Treatise on Government and Letter Concerning Tolerance; David Hume's 'Of the Original Contract' and 'On Justice'; John Stuart Mill's Utilitarianism, On Liberty, and The Subjection of Women; excerpts from Karl Marx's Capital and other writings; and John Rawls's A Theory of Justice.
Taught by: Freeman
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 488 The Idea of Nationalism
Nationalism has been the most important geo-political phenomenon of the past two hundred years. This seminar course will explore the ideology of nationalism, what it means, its philosophical foundations, underlying assumptions about the nature of human identity, moral implications, and political consequences. What is a nation? Does every identifiable ethnic or national group have a valid claim to a nation-state of its own? How are claims to national self-determination justified? How do nations differ from states, peoples, groups, communities, and citizenries? How does nationalism relate to notions of "chooseness" or ethnic and cultural superiority? Why do nationalist movements seem to so often engender political extremism and violent ethno-political conflicts? Is national self-determination compatible with our commitments to individualism, rationality, and universal human rights?
Taught by: Steinberg
Course not offered every year
Activity: Seminar
1 Course Unit
PHIL 489 Ethnicity, Identity and Nationhood
This MLA seminar will deepen our understanding of the role that political and cultural ideologies -- such as liberalism, conservatism, nationalism, totalitarianism, fundamentalism, etc. -- play in contemporary public discourse and the psychology of ideological thinking that makes political conflicts so difficult to resolve. Drawing on a series of case studies in contemporary political, social and cultural conflict such as recent political campaigns and nationalist movements around the globe, we will identify and examine the ideologies driving such conflicts, and from these we will draw out the common philosophical characteristics and psychological features of ideological thinking. We will begin by considering a series of case studies in contemporary political, social and cultural conflict, drawn from contemporary events such as the 2012 political campaigns, the 2011 debt ceiling debate in Congress, nationalist movements around the globe, etc. We will identify and examine the ideologies driving such conflicts, and from these we will draw out the common philosophical characteristics and psychological features of ideological thinking. Throughout, we will seek to understand the deep attraction of ideological commitments and why they tend to push public discourse and behavior to extremes and even violence. Finally, we will consider efforts to reduce or resolve ideological conflicts through strategies of political compromise, dialogue, toleration, and democratic deliberation.
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 505 Formal Logic I
This course provides an introduction to some of the fundamental ideas of logic. Topics will include truth-functional logic, quantificational logic, and logical decision problems.
Taught by: Domotor Weinstein
One-term course offered either term
Also Offered As: PHIL 005
Activity: Lecture
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 506 Formal Logic II
An introduction to first-order logic including the completeness, compactness, and Lowenheim-Skolem theorems, and Godel's incompleteness theorems. UNDERGRADUATES NEED PERMISSION
Taught by: Weinstein
Course usually offered in spring term
Also Offered As: MATH 570, PHIL 006
Activity: Lecture
1 Course Unit
Notes: Undergraduates Need Permission.

PHIL 511 Aristotle's Ethics
A study of Aristotle's ethical works, with emphasis on the NICOMACHEAN ETHICS. Topics may include moral psychology, practical reasoning, the nature of good, emotion and reason, responsibility, and friendship.
Taught by: Meyer
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 521 Philosophy of Biology
This course consists of a detailed examination of evolutionary theory and its philosophical foundations. The course begins with a consideration of Darwin's formulation of evolutionary theory and the main influences on Darwin. We will then consider two contemporary presentations of the theory: Richard Dawkins' and Richard Lewontin's. The remainder of the course will deal with a number of foundational issues including adaption, the units of selection, the evolution of altruism, and the possibility of grounding ethics in evolutionary theory. UNDERGRADUATES NEED PERMISSION
Taught by: Weisberg
One-term course offered either term
Also Offered As: PHIL 226, PPE 225
Activity: Lecture
1 Course Unit
Notes: Undergraduates need permission

PHIL 525 Topics in the Philosophy of Science
For the last four centuries, scientific research has provided our most reliable understanding of the world. Although the scientific revolution started modestly with attempts to understand stellar movement, we now know the age and constitution of the universe, the basis of heredity, and we can make and break chemical bonds at will. By all appearances, science seems to have made substantial progress from the scientific revolution to the global scientific enterprise of the 21st century. This course is about how science has generated this knowledge, and whether it has been as progressive and reliable as it seems. We will consider methodological issues such as the sources of scientific knowledge, objectivity, the growing importance of computation in the natural sciences, and the nature of modeling. We will examine products of scientific research: explanations, models, theories, and laws of nature. And we will discuss questions about science and values, including whether non-scientific values can and should enter scientific research, the relationship between science and religion, and the role of the public in guiding the scientific enterprise.
Taught by: Weisberg, Bichieri
Course not offered every year
Also Offered As: COML 525, HSSC 527
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 526 Philosophy of Psychology
More than a century after Sigmund Freud transformed -- for better or worse -- our understanding of what it means to be human, Freudian psychoanalysis still exerts a profound influence in our culture. This seminar course is an exploration of the philosophical issues raised by Freudian psychoanalysis as a theory of mind and culture. After a close reading of Freud's theoretical writings on the nature of the mind and human behavior, we will explore why Freud's theories -- despite more than a century of criticism remain highly influential as a framework for the interpretation of art, literature, religion, society, politics, and history. Readings from Freud's "meta-psychological," cultural, and social writings, Paul Ricoeur's Freud and Philosophy, and other contemporary authors in philosophy, psychoanalysis, and other fields.
Taught by: Steinberg
Course not offered every year
Also Offered As: GRMN 527
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission
PHIL 530 Philosophy of Mind
This course explores core issues in philosophy of mind, such as: the nature of mental states and events, the mind-body problem, and the relationship between philosophy of mind and related disciplines, such as cognitive science. We approach these issues through more specific topics, depending on the interests of the instructor. Topics may include: identity theories, grounding physicalism, functionalism, computationalism, disjunctivism and knowledge-first theories, internalism and externalism, consciousness, self-knowledge, perception, emotion, action, representationalism, mental causation, and intersections with psychology, artificial intelligence, linguistics, and neuroscience. For details in a specific year, consult with the instructor and/or department.
UNDERGRADUATES NEED PERMISSION.
Taught by: Hatfield, Miracchi
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 531 Social Norms
This is a graduate research seminar covering interdisciplinary research in psychology, philosophy, sociology and behavioral economics related to social norms. Social norms are informal institutions that regulate social life. We will devote particular attention to the following questions: 1. What is a good, operational definition of social norms? 2. Is there a difference between social and moral norms? 3. How can we measure whether a norm exists, and the conditions under which individuals are likely to comply with it? 4. Are behavioral experiments a good tool to answer questions 3? 5. How do norms emerge? 6. How are norms abandoned? 7. What is the role of trendsetters in norm dynamics?
Taught by: Bicchieri
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 532 Topics in Epistemology
This seminar will cover topics of interest to contemporary epistemologists. Possible topics may include skepticism, accounts of knowledge and justification, virtue epistemology, formal epistemology, social epistemology, feminist epistemology, meta-epistemology and epistemic normativity.
Taught by: Lord, Errol
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 536 Stoicism
A study of some major texts in Ancient Greek Stoicism, the school founded by Zeno of Citium in the post Aristotelian period. Topics may include: ethics, nature, philosophy, epistemology, and metaphysics. Authors may include: Cicero, Seneca, Epictetus, and Marcus Aurelius. All works will be read in English translation. Against the Ethicists will be the other major texts studied in this course. All readings will be in English translation. No knowledge of Greek or Latin is required.
Taught by: S. Meyer
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 540 Topics in Philosophy of Language
This course explores core issues in philosophy of language, such as: meaning, reference, truth, communication, speech acts, the norms governing language use, and the relationship between philosophy of language and related disciplines, such as linguistics. We approach these issues through more specific topics, depending on the interests of the instructor. Topics may include: the nature of propositions, truth, context-sensitive expressions, the relationship between logical structure and linguistic structure, the relationship between mental and linguistic meaning, the mechanisms of communication, the semantic/pragmatic distinction, the norms of assertion, relativism, expressivism, injustice in linguistic communication. For details in a specific year, consult with the instructor and

Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 547 Leibniz/Locke
This course focuses on topics in philosophy of the 17-18th centuries. Topics may include natural philosophy in the early modern period, the relation of metaphysics to the 'sciences' (including what is meant by "metaphysics"), and what falls under the scope of the various sciences), and the special role played by the life sciences. An examination of the development of a few topics in natural philosophy in the early modern period, such as: method (the evolution of hypotheses and their reception, the relation of theory to empirical work, and the importance of different kinds of empirical work, e.g. observation, experiment, use of instruments); the relation of metaphysics to the 'sciences' (including what is meant by "metaphysics"), and what falls under the scope of the various sciences); and the special role played by the life sciences.
Taught by: Detlefsen
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 550 Topics in Philosophy of Education
In this course, we will examine problems in contemporary philosophy of education, including: how much control over a child's education ought to be allocated to parents and how much to the state; what role, if any, ought religion to play in education; how do race and gender impact individuals' educational experiences and how should such issues should be addressed in the classroom; what sort of (if any) civic education ought to be taught in schools (especially in wartime such as in the post 9-11 USA); and how should schools be funded? We will deal with a number of case studies, mostly recent, but some crucial historical cases as well. Our readings will be primarily philosophical texts, supplemented with those from other fields, such as psychology, history and sociology, in order to provide empirical context to the theoretical problems facing education today.
Taught by: Detlefsen
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission
PHIL 551 Topics in Early Modern Philosophy
125 A seminar in philosophy of the early modern period (roughly 1600-1800), covering specific figures and/or topics. Examples of figures studied include (but are not limited to) Descartes Cavendish, Astell, Locke, Hume, Du Chatelet, or Kant. Examples of topics studied include (but again are not limited to) substance, causation, freedom, natural philosophy, education, the human being, the private and the public, or political authority.
Taught by: Detlefsen, Chignell
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 554 Contemporary Continental Philosophy
This MLA seminar is an introduction to 20th-century continental European philosophy, focusing on the origins and development of phenomenology, existentialism, hermeneutics, and deconstruction. No previous background in philosophy is required. We will begin with an introduction to the phenomenology of Edmund Husserl and the contemporary debate over its proper interpretation. Then we will examine three existentialist critics of Husserl, whose philosophies have influenced much of recent continental thought: Martin Heidegger, Jean-Paul Sartre, and Maurice Merleau-Ponty. Finally, we will examine the important influence of phenomenology and existentialism on contemporary trends in continental philosophy as exhibited in works by Paul Ricoeur, Hans Georg Gadamer, Jacques Derrida, Hannah Arendt, and Emmanuel Levinas. Finally, we will examine the important influence of phenomenology and existentialism on contemporary trends in continental philosophy as exhibited in works by Paul Ricoeur, Hans Georg Gadamer, Jacques Derrida, Hannah Arendt, and Emmanuel Levinas.
Course not offered every year
Also Offered As: GRMN 580
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 558 Truth & Concealment
This course is an exploration of traditional philosophical questions concerning objectivity in science. We will start by addressing central questions in feminist philosophy of science, such as what is objective reality and what is objective knowledge? Next, we will explore whether science discovers objective real entities or relations, which is a central topic in the scientific realism debate. We will also explore whether scientific knowledge is objective. We will read mostly 20th and 21st century philosophers of science, such as Goodman, Kuhn, Psillos, and Longino. We will also apply what we learn to at least one case study.
UNDERGRADUATES NEED PERMISSION
Taught by: Spencer
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates need permission.

PHIL 572 Contemporary Ethics
A venerable idea throughout the history of ethics is that rationality is a fundamental or foundational part of the metaphysics of the normative. The course will be an investigation of several different strains of this rationalist idea. We'll discuss four rationalist views of the nature of normative reasons (Kantian, Humean, Aristotelian, and new-fangled constructivism). Our aim will be to investigate the plausibility of these rationalist views against the backdrop of a more recent hypothesis about the metaphysics of the normative—viz., the claim that normative reasons themselves are the fundamental constituents of the normative.
Taught by: Freeman, Meyer
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 576 Rationality, Morality and Law
This class will be dedicated to investigating topics related to rationality in its many forms. Potential areas of study are metaethics, epistemology, moral psychology, and the philosophies of mind, language and action.
UNDERGRADUATES NEED PERMISSION.
Taught by: Freeman, Lord
Course not offered every year
Also Offered As: LAW 946
Activity: Seminar
1 Course Unit
Notes: Undergraduates need permission.

PHIL 577 Topics in Philosophy of Law
This seminar will examine leading academic theories of constitutional interpretation, starting with classic texts by (for illustration) Thayer, Wechsler, Ely, Bobbitt, Dworkin, and Scalia, and emphasizing current debates within originalism and between originalists and their critics. While the focus will be on American constitutional interpretation, we will also see how that literature is currently running up against, and possibly contributing to, more "philosophical" or "jurisprudential" accounts of the contents of law. Consistent with the nature of the material, the reading load is likely to be somewhat heavier and more demanding than in the average seminar. Students will be expected to read the assigned material carefully and to participate actively in class discussions; they will have the option of submitting either a single research paper or several shorter papers.
Taught by: Perry, Berman, Finkelstein
Course not offered every year
Also Offered As: LAW 946, LAW 992
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission

PHIL 578 Topics in Political Philosophy
This is a topics-based graduate seminar in political philosophy. Examples of topics we can examine in this course include distributive justice, liberty, equality, and global justice. Course readings will be drawn from a combination of seminal and more recent works on the selected topics.
Taught by: Freeman, Tan
Course not offered every year
Also Offered As: LAW 946
Activity: Seminar
1 Course Unit
Notes: Undergraduates Need Permission
PHIL 600 Proseminar
An intensive seminar for first-year doctoral students, with readings drawn from recent and contemporary epistemology and metaphysics, broadly construed. Students will develop their abilities to present and discuss philosophical texts, and to write and revise their own papers.
Taught by: Singer, Daniel
Course usually offered in fall term
Activity: Seminar
1 Course Unit
Notes: Graduate Students Only

PHIL 601 Consortium Course
For graduate students taking courses at other institutions belonging to the Philadelphia area Philosophical Consortium.
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: Graduate Students Only

PHIL 612 Topics in Hellenistic Philosophy
The ancient Stoics famously rejected the tripartite psychology of Plato and the Aristotelian division of the psyche into rational and non-rational parts. Everything we think, say, feel, and do is an exercise of reason, specifically, an assent to an impression. This includes the pathe- emotions such as fear, anger, and pity and love. According to the Stoic doctrine of apatheia, we should eradicate the pathe from our lives. But there are some emotions of which the Stoics approve: the so-called "good feelings" (eupatheiai) which include joy, reverence, and goodwill. We will examine the difference between the pathe and the eupatheiai in the context of their Stoic doctrine of "impulse" (horpe), and of their ethical theory more generally. All texts will be read in translation, and will include selections from: Cicero: Tusculan Disputations, On Ends, On Duties, Epicureus: Discourses, Seneca: Letters, Stobaeus: Eclogues, Galen: On the Doctrines of Hippocrates and Plato.
Taught by: S. Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 672 Topics in Ethics
Phil 672 will be a workshop on writing papers for submission to either conferences or journals. Papers may address any topic in value theory, broadly construed, and some participants may choose to revise papers written for previous seminars. All participants will be responsible for generating short bibliographies and then leading class discussions on their topics, providing drafts of their papers for critique by the class, and presenting their papers to the class. Students who have passed their prelims are encouraged to participate as auditors.
Taught by: S. Meyer
Course not offered every year
Activity: Seminar
1 Course Unit

PHIL 699 Independent Study
Directed readings in consultation with individual faculty members.
One term course offered either term
Activity: Independent Study
1 Course Unit

PHIL 700 Dissertation Workshop
Registration required for all third-year doctoral students. Third-year students and beyond attend and present their dissertation work or their preliminary exam prospectus. From time to time, topics pertaining to professional development and dissertation writing will be discussed.
Taught by: Weinstein, Scott
Two terms. student must enter first term.
Activity: Seminar
1 Course Unit

PHIL 990 Masters Thesis
Taught by: Staff.
One term course offered either term
Activity: Masters Thesis
1 Course Unit

PHIL 995 Dissertation
Ph.D. candidates, who have completed all course requirements and have an approved dissertation proposal, work on their dissertation under the guidance of their dissertation supervisor and other members of their dissertation committee.
One term course offered either term
Activity: Dissertation
1 Course Unit

PHIL 998 Teaching Practicum (Independent Study)
Supervised teaching experience. Four semesters are required of all doctoral students in philosophy.
One term course offered either term
Activity: Independent Study
1 Course Unit

PHIL 999 Independent Study
Directed readings in consultation with individual faculty members.
One term course offered either term
Activity: Independent Study
1 Course Unit
Notes: May be repeated for credit

Philosophy, Politics, Economics (PPE)

PPE 008 The Social Contract
This is a critical survey of the history of Western modern political philosophy, beginning from the Early Modern period and concluding with the 19th or 20th Century. Our study typically begins with Hobbes and ends with Mill or Rawls. The organizing theme of our investigation will be the idea of the Social Contract. We will examine different contract theories as well as criticisms and proposed alternatives to the contract idea, such as utilitarianism. Besides the above, examples of authors we will read are Locke, Rousseau, Hume, Mill and Marx.
For BA Students: Society Sector
Taught by: Freeman, Tan
Course usually offered in spring term
Also Offered As: PHIL 008
Activity: Lecture
1 Course Unit
PPE 036 Law and Economics
The relationship of economic principles to law and the use of economic analysis to study legal problems. Topics will include: property rights and intellectual property; analysis of antitrust and economic analysis of legal decision making.
Course usually offered in fall term
Also Offered As: ECON 036
Prerequisite: ECON 001 or ECON 010
Activity: Lecture
1 Course Unit
Notes: Credit cannot be received for both ECON 036 and 234.

PPE 072 Biomedical Ethics
This course is an introduction to bioethics, focusing on ethical questions arising at the beginning and end of life. Topics will include procreative responsibilities, the question of wrongful life, and prenatal moral status as well as questions of justice related to markets for sperm, eggs and gestation. We will also attend to dilemmas at the end of life, including the authority of advance directives, euthanasia and the allocation of life-saving therapies.
For BA Students: Society Sector
Taught by: Gibbons
Course not offered every year
Also Offered As: PHIL 072
Activity: Lecture
1 Course Unit

PPE 073 Topics in Ethics
This course examines some of the central theoretical and applied questions of ethics. For example, what is the good life? By what measure or principles do we evaluate the rightness and wrongness of actions? How does ethical reasoning help us understand and address real world problems such as world hunger, social injustice, sex and race discrimination, allocation of scarce resources and the like. The course can be organized around an applied topic or practical issue such as global ethics, just war, biomedical ethics or environmental ethics.
Taught by: Gibbons, M.Meyer
Course not offered every year
Also Offered As: ENVS 073, PHIL 073
Activity: Seminar
1 Course Unit

PPE 153 Judgment and Decisions
Thinking, judgment, and personal and societal decision making, with emphasis on fallacies and biases.
One term course offered either term
Also Offered As: PSYC 253
Prerequisite: One semester of statistics OR microeconomics
Activity: Lecture
1 Course Unit
Notes: An LPS section may be given

PPE 225 Philosophy of Biology
This course consists of a detailed examination of evolutionary theory and its philosophical foundations. The course begins with a consideration of Darwin's formulation of evolutionary theory and the main influences on Darwin. We will then consider two contemporary presentations of the theory: Richard Dawkins' and Richard Lewontin's. The remainder of the course will deal with a number of foundational issues including adaptation, the units of selection, the evolution of altruism, and the possibility of grounding ethics in evolutionary theory.
For BA Students: Natural Science and Math Sector
Taught by: Domotor, Spencer, Weisberg
Course not offered every year
Also Offered As: PHIL 226, PHIL 521
Activity: Lecture
0 Course Units
Notes: Application required through Penn Global: https://global.upenn.edu/pennabroad/pgs

PPE 233 Philosophy of Economics
In this course, general philosophy of science issues are applied to economics, and some problems specific to economics are tackled. While analytical questions like "What is economics?" or "What is an economic explanation" must be pursued, the ultimate goal is practical: What is good economics? How can economists contribute to a better understanding of society, and a better society? How can we make economics better? Topics to be discussed include the following: specific object and method of economics as a social science; its relation with other disciplines (physics, psychology and evolutionary theory); values in economics (welfare, freedom, equality and neutrality); the role of understanding and possible limits of a quantitative approach to human behavior (purposefulness, freedom, creativity, innovation); prediction, unpredictability and the pretension of prediction; causation in econometrics and in economic theory (equilibrium); selfishness and utility maximization (cognitive and behaviorist interpretations); economic models and unrealistic assumptions (realism and instrumentalism); empirical basis of economics (observation and experiment); microeconomics and macroeconomics (reductionism and autonomy); pluralism in economics (mainstream economics and heterodox schools).
Course usually offered in fall term
Also Offered As: PHIL 233
Activity: Lecture
1 Course Unit

PPE 244 Introduction to Philosophy of Mind
This course will survey several central topics in philosophy of mind, as well as investigating how philosophy of the mind interacts with scientific study of the mind. Among the questions we'll be asking are: What is it to have a mind? What is the relationship between the mind and the brain? Can there be a science of the mind? What can it tell us? What can philosophy contribute to a science of the mind? What is consciousness? What is it to think, to perceive, to act? How are perception, thought, and action related to one another?
Taught by: Domotor, Miracchi
Course not offered every year
Also Offered As: PHIL 244, VLST 221
Activity: Lecture
1 Course Unit
PPE 271 Global Justice
This course is an introduction to some of the central problems in global justice. Samples of these topics include: What are our duties to respond to world poverty and what is the basis of this duty? Is global inequality in itself a matter of justice? How universal are human rights? Should human rights defer to cultural claims at all? Is there a right to intervene in another country to protect human rights there? Indeed can intervention to protect human rights ever be a duty? Who is responsible for the environment? We will read some influential contemporary essays by philosophers on these topics with the goal of using the ideas in these papers as a springboard for our own further discussion and analysis.
Taught by: Tan
Course not offered every year
Also Offered As: PHIL 271
Activity: Seminar
1 Course Unit

PPE 272 Ethics and the Professions
Since Louise Brown, the first so-called "test tube baby" was born in 1978, reproductive technologies have generated many new ways to "make" babies. These technologies mean that a number of difficult ethical questions are inescapable, not only for individuals who otherwise couldn't have children (due to biological and/or social constraints) but for the larger society. This course will consider the pre-natal moral status and identity of the fetus. It explores pre-natal (and pre-implantation) genetic interventions and their possible effects on the autonomy of the child later in life as well as the possible eugenic implications of such interventions.
It examines the potential conflict between a mother's autonomy and an infant's pre-natal harm in the larger context created by new kinds of parents and new forms of kinship. Finally, it investigates the market for sperm, eggs, embryos and gestation and reflects on the questions of justice they imply.
Taught by: Tan
Course not offered every year
Also Offered As: PHIL 272
Prerequisites: At Least one of PHIL 002, 008, 009 or equivalent.
Activity: Seminar
1 Course Unit

PPE 275 Introduction to Political Psychology
This course will explore psychological approaches to understanding political beliefs, attitudes, and actions at the levels of both individual citizens and national leaders. It will also explore the possibility that psychological science itself is not immune to the political debates swirling around it. Specific topics will include: the workings of belief systems (and their power to shape what we "see"), cognitive biases (and their power to cause miscalculations), sacred values and their role in stabilizing belief systems and social interaction, personality and ideology (the linkages between the personal and the political), and clashing conceptions of morality and distributive and corrective justice (striking variations among people in what they consider to be fair). We shall also explore some topics that have sparked controversy in the psychological research literature and that tend to polarize opinion along political lines, including work on intelligence and unconscious bias.
Taught by: Tetlock
One term course offered either term
Also Offered As: PSYC 275
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit
Notes: NOTE: Students who are more interested in business-related issues may want Wharton 276x which is a modified version of this course specifically for Wharton undergraduates.

PPE 277 Justice, Law and Morality
The course will focus on the philosophical background to the individual rights protected by the U.S. Constitution, including 1st Amendment freedoms of religion, expression, and association; the 14th amendment guarantee of Due Process and the rights of privacy, abortion, assisted suicide, and marriage; the Equal Protection clause and equal political rights and the legitimacy of affirmative action; and the Takings and Contract clauses and their bearing on rights of private property and economic freedoms. In addition to Supreme Court decisions on these issues, we will read works by political philosophers and constitutional theorists, including J.S. Mill, Ronald Dworkin, Cass Sunstein, Martha Nussbaum, Katherine MacKinnon and others.
Taught by: Freeman, Allen
Course not offered every year
Also Offered As: PHIL 277
Activity: Lecture
1 Course Unit

PPE 311 Strategic Reasoning
This course is about strategically interdependent decisions. In such situations, the outcome of your actions depends also on the actions of others. When making your choice, you have to think what the others will choose, who in turn are thinking what you will be choosing, and so on. Game Theory offers several concepts and insights for understanding such situations, and for making better strategic choices. This course will introduce and develop some basic ideas from game theory, using illustrations, applications, and cases drawn from business, economics, politics, sports, and even fiction and movies. Some interactive games will be played in class. There will be little formal theory, and the only pre-requisites are some high-school algebra and having taken Econ 1. However, general numeracy (facility interpreting and doing numerical graphs, tables, and arithmetic calculations) is very important. This course will also be accepted by the Economics department as an Econ course, to be counted toward the minor in Economics (or as an Econ elective).
Taught by: Dillenberger
Course usually offered in fall term
Also Offered As: ECON 013
Prerequisites: Some high school algebra, ECON 001.
Activity: Lecture
1 Course Unit
Notes: This course may NOT be taken concurrently with or after Econ 212.

PPE 312 Public Policy Process
This course introduces students to the theories and practice of the policy-making process. There are four primary learning objectives. First, understanding how the structure of political institutions matter for the policies that they produce. Second, recognizing the constraints that policy makers face when making decisions on behalf of the public. Third, identifying the strategies that can be used to overcome these constraints. Fourth, knowing the toolbox that is available to participants in the policy-making process to help get their preferred strategies implemented. While our focus will primarily be on American political institutions, many of the ideas and topics discussed in the class apply broadly to other democratic systems of government.
Taught by: Levendusky, Meredith
Course usually offered in spring term
Also Offered As: PSCI 236
Activity: Recitation
1 Course Unit
PPE 313 Behavioral Economics and Psychology
Our understanding of markets, governments, and societies rests on our understanding of choice behavior, and the psychological forces that govern it. This course will introduce you to the study of choice, and will examine in detail what we know about how people make choices, and how we can influence these choices. It will utilize insights from psychology and economics, and will apply these insights to domains including risky decision making, intertemporal decision making, and social decision making.
Taught by: Bhatia
Course usually offered in fall term
Also Offered As: PSYC 265
Prerequisites: ECON 001.
Activity: Lecture
1 Course Unit
Notes: Prerequisite: ECON 1

PPE 314 Philosophy of Social Science
This course is about the foundations of contemporary social science. It focuses on the nature of social systems, the similarities and differences between social and natural sciences, the construction, analysis, and confirmation of social theories, and the nature of social explanations. Specific topics may include: What are social norms and conventions? What does it mean to have one gender rather than another, or one sexual orientation rather than another? Should social systems be studied quantitatively or qualitatively?
Taught by: Bicchieri, Weisberg
Course usually offered in spring term
Also Offered As: PHIL 228
Prerequisites: ECON 001, ECON 002, and PHIL 008.
Activity: Lecture
1 Course Unit

PPE 401 Independent Study
Student arranges with a faculty member to pursue a research project on a suitable topic. For more information about research and setting up independent studies, visit: https://ppe.sas.upenn.edu/study/curriculum/independent-studies
One-term course offered either term
Activity: Independent Study
1 Course Unit

PPE 402 Research in Philosophy, Politics & Economics
Led by fellows in the Philosophy, Politics and Economics program, this course teaches students how to conduct research in PPE with an emphasis on creating a well-formed research question, determining what kinds of data or scholarly research bears on that question, and how to carry out an interdisciplinary, research-driven project on that question.
Taught by: Fellows in PPE
One-term course offered either term
Activity: Seminar
1 Course Unit

PPE 460 Experiments in Behavioral Ethics
In reality, our understanding of different mechanisms and (economic) relationships is hampered by the lack of data. More often than not, either the observation itself is difficult or the data is not reliable. Over the last decades, economic experiments have become a vital part of the scientific discourse, facilitating our understanding of the world we live in (much like in Biology, Chemistry, Physics or the like). Economic experiments allow exploring economic behavior under controlled conditions by generating observations under different experimental designs and controlled conditions. Pioneering this field of research, Daniel Kahneman and Vernon Smith were awarded the Nobel memorial prize in recognition of their work on behavioral and experimental economics. In this course, we provide you with the methodology of how to develop a research idea and a proper experimental design that allows to explore this idea. Essentially, you will learn how to think about ideas, generate predictions, and how to use economic experiments to test them.
Taught by: Bicchieri, Dimant
Activity: Seminar
1 Course Unit

PPE 470 Capstone: Social Policy
Social policy is the study of human wellbeing and is concerned with the effects in areas of health care, criminal justice, inequality, and education, among others. As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission). For more see: https://ppe.sas.upenn.edu/study/curriculum/advanced-interdisciplinary-courses
Taught by: Dimant
Course not offered every year
Activity: Seminar
1 Course Unit

PPE 471 Capstone: Political Economy
Political Economy studies the relationships between individuals and society and between markets and the state. As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission).
For more see: https://ppe.sas.upenn.edu/study/curriculum/advanced-interdisciplinary-courses
Taught by: Sontuoso
Course not offered every year
Activity: Seminar
1 Course Unit

PPE 472 Capstone: Networks
Network Theory studies graphs as a representation of the structure of relationships between social entities. It can be used to examine how the behavior of individuals in a socio-economic system affects - and is affected by - the structure of connections of the system. As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission). For more see: https://ppe.sas.upenn.edu/study/curriculum/advanced-interdisciplinary-courses
Taught by: Sontuoso
Course not offered every year
Activity: Seminar
1 Course Unit
PPE 473 Capstone: Modeling
Modeling provides a way to identify and analyze the salient features of complex problems or dynamic social situations. Using models can further provide a way to see what strategies may be rational over time. As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission). For more see: https://ppe.sas.upenn.edu/study/curriculum/advanced-interdisciplinary-courses
Taught by: Funcke
Course not offered every year
Activity: Seminar
1 Course Unit

PPE 474 Capstone: Judgment and Decision Making
The interdisciplinary study of individual's judgments and decisions, including normative, descriptive, and prescriptive theories. As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission). For more see: https://ppe.sas.upenn.edu/study/curriculum/advanced-interdisciplinary-courses
Taught by: Hart
Course not offered every year
Activity: Seminar
1 Course Unit

PPE 476 Philosophy, Politics and Economics
This is an integrative senior seminar (open to others by departmental permission). The following website will give descriptions of the specific capstone courses that will be offered each semester: http://www.sas.upenn.edu/ppe/Courses/general
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission).

PPE 477 Capstone: Social Psychology
Social psychology explores how an individual's judgments and behaviors can be influenced or determined by others and their social context.
Taught by: Royzman
Course not offered every year
Also Offered As: PSYC 478
Activity: Seminar
1 Course Unit
Notes: As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission).

PPE 481 Capstone: Political Science
A PPE capstone offered by faculty in Political Science. As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission). For more see: https://ppe.sas.upenn.edu/study/curriculum/advanced-interdisciplinary-courses
Taught by: Berger
Course not offered every year
Activity: Seminar
1 Course Unit

PPE 482 Capstone: Psychology
A PPE Capstone offered by faculty in Psychology. As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission). For more see: https://ppe.sas.upenn.edu/study/curriculum/advanced-interdisciplinary-courses
Taught by: Bhatia
Course not offered every year
Activity: Seminar
1 Course Unit

PPE 483 Capstone: Economics
A PPE Capstone seminar offered by faculty in Economics. As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission). For more see: https://ppe.sas.upenn.edu/study/curriculum/advanced-interdisciplinary-courses
Taught by: Dillenberger
Course not offered every year
Activity: Seminar
1 Course Unit

PPE 484 Capstone: Philosophy
A PPE Capstone seminar offered by faculty in Philosophy. As a PPE Capstone, this is an integrative senior seminar (open to others by departmental permission). For more see: https://ppe.sas.upenn.edu/study/curriculum/advanced-interdisciplinary-courses
Taught by: Bicchieri
Course not offered every year
Activity: Seminar
1 Course Unit

PPE 498 Directed Honors Research
Student arranges with a faculty member to do research and write a thesis on a suitable topic. For more information on honors visit: https://ppe.sas.upenn.edu/study/curriculum/honors-theses
One term course offered either term
Activity: Independent Study
1 Course Unit

PPE 499 Advanced Research
This course may be taken by a PPE student for advanced research. Enrollment by permit only.
Course not offered every year
Activity: Independent Study
1 Course Unit

Physics (PHYS)

PHYS 008 Physics for Architects I
An introduction to the classical laws of mechanics, including static equilibrium, elasticity, and oscillations, with emphasis on topics most relevant to students in architecture. Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 091 or 093 who complete PHYS 008 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered fall; odd-numbered years
Prerequisites: Entrance credit in algebra and trigonometry.
Activity: Lecture
1 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 091 or 093 who complete PHYS 008 will thereby surrender the AP or Transfer Credit.
PHYS 009 Physics for Architects II
Briefly reviews Newton's laws, then introduces waves, sound, light, fluids, heat, electricity, magnetism, and circuits, with emphasis on topics most relevant to students in architecture. Illustrates physics principles using examples drawn from architecture. Students with a strong high-school physics background may take PHYS 008 and PHYS 009 in either order. Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 092 or 094 who complete PHYS008 will surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered fall; even-numbered years
Activity: Lecture
1 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 092 or 094 who complete PHYS 008 will thereby surrender the AP or Transfer Credit.

PHYS 016 Energy, Oil, and Global Warming
The developed world's dependence on fossil fuels for energy production has extremely undesirable economic, environmental, and political consequences, and is likely to be mankind's greatest challenge in the 21st century. We describe the physical principles of energy, its production and consumption, and environmental consequences, including the greenhouse effect. We will examine a number of alternative modes of energy generation - fossil fuels, biomass, wind, solar, hydro, and nuclear - and study the physical and technological aspects of each, and their societal, environmental and economic impacts over the construction and operational lifetimes. No previous study of physics is assumed.
For BA Students: Natural Science and Math Sector
One term course offered either term
Prerequisites: Algebra and Trigonometry
Activity: Lecture
1 Course Unit
Notes: May be counted as Science Studies for students in Class of 2009 and prior. Target audience: Non-science majors (although science/engineering students are welcome).

PHYS 050 Physics Laboratory I
Experiments in classical mechanics.
One term course offered either term
Prerequisites: AP score of 5 on the Physics B or Physics C - Mechanics exam, or transfer credit for PHYS 91 or PHYS 93. Only for students with above prerequisites.
Activity: Laboratory
0.5 Course Units
Notes: Course carries .5 course unit and student receives grade. Permit required. Only for students with above prerequisites.

PHYS 051 Physics Laboratory II
Experiments in electromagnetism and optics.
One term course offered either term
Prerequisites: AP score of 5 on the Physics B or Physics C - Electricity and Magnetism exam, or transfer credit for PHYS 92 or PHYS 94.
PHYS 050. Only for students with above prerequisites.
Activity: Laboratory
0.5 Course Units
Notes: Course carries .5 course unit and student receives grade. Permit required. Only for students with above prerequisites.

PHYS 080 Physics and Consciousness
We will explore the link between physics, physical models and quantitative thinking to areas of consciousness and brain research. This will include examples and phenomena in classical and quantum physics, the nature of physical measurements, observation, the role of the observer, the role of the human mind in interpreting reality and consciousness. Brain imaging studies enabled by physical phenomena may be used to support certain theories of how we process information. The course will be based on cutting edge physical phenomena and as quantitative as possible. We will explore related areas of psychology including the area of emotions and try to explore new links between them and the limits of quantitative approaches in these topics. We will decide on decision making and links to quantum theories. For example, the making of a decision has been hypothesized to collapse "a thought wave into a particle". Much of human thinking is probabilistic in nature and we will link this to physics. We will explore topics of quantum entanglement, quantum computing, information, and free will. We will explore other work showing that quantum models were able to predict effects shown in national surveys. We will explore how the brain works, how this is linked to physics, physicists' ways of thinking, as well as psychology (and develop useful methods for rational living).
For BA Students: Natural Science and Math Sector
Activity Lecture
1 Course Unit

PHYS 101 General Physics: Mechanics, Heat and Sound
An introduction to the classical laws of motion, including kinematics, forces in nature, Newton's laws of motion, conservation of energy and momentum, fluid statics and dynamics, oscillations, and waves. Suggested for students in a pre-health program. Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 101 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered summer, fall and spring terms
Prerequisites: Entrance credit in algebra and trigonometry.
Corequisite: PHYS 101 LAB
Activity: Lecture
1.5 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 101 will thereby surrender the AP or Transfer Credit.
PHYS 102 General Physics: Electromagnetism, Optics, and Modern Physics
A continuation of PHYS 101 emphasizing an introduction to classical electricity and magnetism, light and optics, special relativity, the quantum theory of matter, and nuclear physics. Suggested for students in a pre-health program. Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 92 or PHYS 94 who complete PHYS 102 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered summer, fall and spring terms
Prerequisites: PHYS 101, 150, or 170, entrance credit in algebra and trigonometry.
Corequisite: PHYS 102 LAB
Activity: Lecture
1.5 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 92 or PHYS 94 who complete PHYS 102 will thereby surrender the AP or Transfer Credit.

PHYS 137 Community Physics Initiative
This is an Academically Based Community Service Course (ABCS). It will be aligned to the Philadelphia School District curriculum in introductory physics at University City High School (UCHS). The UCHS curriculum roughly parallels the contents of first semester introductory physics (non-calculus) at Penn.
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PHYS 140 Principles of Physics I (without laboratory)
The topics of this calculus-based course are: Classical laws of motions; interactions between particles; conservation laws and symmetry principles; particle and rigid body motion; gravitation, harmonic motion, and applications of mechanics to real-world problems. Engineering students only.
One term course offered either term
Corequisite: MATH 104
Activity: Lecture
1 Course Unit
Notes: For Engineering students whose course of study does not require a physics laboratory course. Those who are enrolled in a dual degree program with the College must register for the lab-based version of this course, PHYS 150.

PHYS 141 Principles of Physics II (without laboratory)
The topics of this calculus-based course are electric and magnetic fields; Coulomb’s, Gauss’s, Ampere’s, and Faraday’s laws; DC and AC circuits; Maxwell’s equations and electromagnetic radiation. Engineering students only.
Course offered summer, fall and spring terms
Prerequisite: PHYS 140
Corequisite: MATH 114
Activity: Lecture
1 Course Unit
Notes: For Engineering students whose course of study does not require a physics laboratory course. Those who are enrolled in a dual degree program with the College must register for the lab-based version of this course, PHYS 151.

PHYS 150 Principles of Physics I: Mechanics and Wave Motion
This calculus-based course is recommended for science majors and engineering students. Classical laws of motion; interactions between particles; conservation laws and symmetry principles; particle and rigid body motion; gravitation, harmonic motion, and applications of mechanics to real-world problems. Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 150 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
One term course offered either term
Prerequisites: Students in PHYS 150 should already have taken MATH 104 or the equivalent, or be taking it simultaneously with PHYS 150
Corequisite: PHYS 150 LAB
Activity: Lecture
1.5 Course Unit
Notes: Credit is awarded for only one of the following courses: PHYS 008, PHYS 101, PHYS 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 150 will thereby surrender the AP or Transfer Credit.

PHYS 151 Principles of Physics II: Electromagnetism and Radiation
The topics of this calculus-based course are electric and magnetic fields; Coulomb’s, Gauss’s, Ampere’s, and Faraday’s laws; DC and AC circuits; Maxwell’s equations and electromagnetic radiation. Credit is awarded for only one of the following courses. PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 92 or PHYS 94 who complete PHYS 151 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course offered summer, fall and spring terms
Prerequisites: PHYS 150; Students in PHYS 151 should already have taken MATH 114 or the equivalent, or be taking it simultaneously with PHYS 151
Corequisite: PHYS 151 LAB
Activity: Lecture
1.5 Course Unit
Notes: Credit is awarded for only one of the following courses. PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 92 or PHYS 94 who complete PHYS 151 will thereby surrender the AP or Transfer Credit.

PHYS 170 Honors Physics I: Mechanics and Wave Motion
This course parallels and extends the content of PHYS 150, at a significantly higher mathematical level. Recommended for well-prepared students in engineering and the physical sciences, and particularly for those planning to major in physics. Classical laws of motion; interaction between particles; conservation laws and symmetry principles; rigid body motion; non-inertial reference frames; oscillations. Credit is awarded for only one of the following courses: PHYS 008 PHYS 101, 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 170 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course usually offered in fall term
Prerequisite: MATH 104 or permission of instructor
Corequisites: MATH 114 or MATH 116, PHYS 170 lab
Activity: Seminar
1.5 Course Unit
Notes: Benjamin Franklin Seminar. Credit is awarded for only one of the following courses: PHYS 008 PHYS 101, 150, or PHYS 170. Students with AP or Transfer Credit for PHYS 91 or PHYS 93 who complete PHYS 170 will thereby surrender the AP or Transfer Credit.
PHYS 171 Honors Physics II: Electromagnetism and Radiation
This course parallels and extends the content of PHYS 151, at a somewhat higher mathematical level. Recommended for well-prepared students in engineering and the physical sciences, and particularly for those planning to major in physics. Electric and magnetic fields; Coulomb's, Ampère's, and Faraday's laws; special relativity; Maxwell's equations, electromagnetic radiation. Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 092 or PHYS 094 who complete PHYS 171 will thereby surrender the AP or Transfer Credit.
For BA Students: Physical World Sector
Course usually offered in spring term
Prerequisites: Math 114 or Math 116 and Phys 150 or Phys 170, or permission of the instructor
Corequisites: MATH 240, MATH 260 or permission of instructor
Activity: Seminar
1.5 Course Unit
Notes: Benjamin Franklin Seminar. Credit is awarded for only one of the following courses: PHYS 009, PHYS 102, PHYS 151, or PHYS 171. Students with AP or Transfer Credit for PHYS 092 or PHYS 094 who complete PHYS 171 will thereby surrender the AP or Transfer Credit.

PHYS 230 Principles of Physics III: Thermal Physics and Waves
Laws of thermodynamics, gas laws and heat engines. Waves on a string, electromagnetic waves including optical phenomena such as refraction, interference and diffraction. Introduction to special relativity including time dilation, length contraction, simultaneity, Lorentz transforms and relativistic energy and momentum. Students are encouraged but not required to take Math 240 concurrently or in advance.
Course usually offered in fall term
Prerequisites: PHYS 150/151 or PHYS 170/171 and MATH 104, MATH 114 or 116
Corequisite: MATH 240
Activity: Lecture
1 Course Unit

PHYS 240 Principles of Physics IV: Modern Physics (without laboratory)
An introduction to the experimental basis for and principles of quantum mechanics, properties of electrons, protons, neutrons, and the elements of atomic structure and nuclear structure. Electromagnetic radiation and photons; interaction of photons with electrons, atoms, and nuclei. Students are encouraged but not required to take Math 241 concurrently or in advance.
Course usually offered in spring term
Prerequisite: PHYS 150/151 or PHYS 170/171
Corequisite: MATH 240 (Note: MATH 240 will become a prerequisite in Spring 2019)
Activity: Lecture
1 Course Unit

PHYS 250 Principles of Physics IV: Modern Physics
An introduction to the experimental basis for and principles of quantum mechanics, properties of electrons, protons, neutrons, and the elements of atomic structure and nuclear structure. Electromagnetic radiation and photons; interaction of photons with electrons, atoms, and nuclei. Students are encouraged but not required to take Math 241 concurrently or in advance.
Course usually offered in spring term
Prerequisite: PHYS 150/151 or PHYS 170/171
Corequisites: MATH 240. (Note: MATH 240 will become a prerequisite in Spring 2019)
Activity: Lecture
1.5 Course Unit
Notes: PHYS 250 students take a two-hour lab

PHYS 280 Physical Models of Biological Systems
Classic case studies of successful reductionistic models of complex phenomena, emphasizing the key steps of making estimates, using them to figure out which physical variables and phenomena will be most relevant to a given system, finding analogies to purely physical systems whose behavior is already known, and embodying those in a mathematical model, which is often implemented in computer code. Topics may include bacterial genetics, genetic switches and oscillators; systems that sense or utilize light; superresolution and other microscopy methods; and vision and other modes of sensory transduction.
Course usually offered in fall term
Also Offered As: BCHE 280
Prerequisites: PHYS 101 (or higher), MATH 104-MATH 114 or MATH 104-MATH 115 or MATH 116. Recommended: previous or concurrent PHYS 102; basic background in chemistry and biology.
Activity: Lecture
1 Course Unit

PHYS 299 Independent Study
Special projects and independent study under the direction of faculty member.
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: Repetitive credit
PHYS 314 Ocean-Atmosphere Dynamics and Implications for Future Climate Change
This course covers the fundamentals of atmosphere and ocean dynamics, and aims to put these in the context of climate change in the 21st century. Large-scale atmospheric and oceanic circulation, the global energy balance, and the global energy balance, and the global hydrological cycle. We will introduce concepts of fluid dynamics and we will apply these to the vertical and horizontal motions in the atmosphere and ocean. Concepts covered include: hydrostatic law, buoyancy and convection, basic equations of fluid motions, Hadley and Ferrel cells in the atmosphere, thermohaline circulation, Sverdrup ocean flow, modes of climate variability (El-Nino, North Atlantic Oscillation, Southern Annular Mode). The course will incorporate student led discussions based on readings of the 2007 Intergovernmental Panel on Climate Change (IPCC) report and recent literature on climate change. Aimed at undergraduate or graduate students who have no prior knowledge of meteorology or oceanography or training in fluid mechanics. Previous background in calculus and/or introductory physics is helpful. This is a general course which spans many subdisciplines (fluid mechanics, atmospheric science, oceanography, hydrology).
Taught by: Marinov
Also Offered As: ENVS 312, ENVS 640
Prerequisites: MATH 114 or permission of the instructor.
Activity: Lecture
1 Course Unit

PHYS 351 Analytical Mechanics
An intermediate course in the statics and dynamics of particles and rigid bodies. Lagrangian dynamics, central forces, non-inertial reference frames, and rigid bodies.
Course usually offered in spring term
Prerequisites: PHYS 150/151 or PHYS 170/171, MATH 104/114, and MATH 240, or permission of instructor.
Activity: Lecture
1 Course Unit

PHYS 360 Statistics, Data Mining, and Machine Learning
This is a practical course on computing, numerical methods, statistics, and data analysis techniques with particular emphasis on data mining and machine learning applied to large datasets. Topics include basic numerical methods and algorithms, probability theory, classical and Bayesian statistical inference, model fitting, Monte Carlo methods, and classification. We will be using Python for the exercises. Prior experience in programming (in any language) is required.
Prerequisites: MATH240, CIS110 or prior experience in programming
Activity: Lecture
1 Course Unit

PHYS 361 Electromagnetism I: Electricity and Potential Theory
First term course in intermediate electromagnetism. Topics include electrostatics, static potential theory, multipole expansions, Laplace equation, image solutions, fields in polarized matter.
Course usually offered in fall term
Also Offered As: PHYS 561
Prerequisites: PHYS 151 or 171, and MATH 241
Activity: Lecture
1 Course Unit

PHYS 362 Electromagnetism II: Magnetism, Maxwell’s Equations, and Electromagnetic Waves
Second term course in intermediate electromagnetism. Topics include magnetostatic forces and fields, magnetized media, Maxwell’s equations, Poynting and stress theorems, free field solutions to Maxwell’s equations, and radiation from separable and nonseparable time dependent charge and current distributions. 
Course usually offered in spring term
Also Offered As: PHYS 562
Prerequisite: PHYS 361
Activity: Lecture
1 Course Unit

PHYS 364 Laboratory Electronics
A laboratory-intensive survey of analog and digital electronics, intended to teach students of physics or related fields enough electronics to be effective in experimental research and to be comfortable learning additional topics from reference textbooks. Analog topics include voltage dividers, impedance, filters, operational amplifier circuits, and transistor circuits. Digital topics may include logic gates, finite-state machines, programmable logic devices, digital-to-analog and analog-to-digital conversion, and microcomputer concepts. Recommended for students planning to do experimental work in physical science.
One term course offered either term
Also Offered As: PHYS 564
Prerequisites: Familiarity with electricity and magnetism at the level of PHYS 102, 141, 151 or 171.
Activity: Lecture
1 Course Unit

PHYS 401 Thermodynamics and the Introduction to Statistical Mechanics and Kinetic Theory
Entropy, temperature, and introduction to ensemble theory, distribution functions, and phase transitions.
Course usually offered in fall term
Also Offered As: PHYS 581
Prerequisite: PHYS 240 or 250
Activity: Lecture
1 Course Unit

PHYS 411 Introduction to Quantum Mechanics I
An introduction to the principles of quantum mechanics designed for physics majors and graduate students in physics-related disciplines. The Schrodinger equation operator formalism, central field problem, angular momentum, and spin. Application to one-dimensional and central field problems.
Course usually offered in fall term
Also Offered As: PHYS 511
Prerequisites: PHYS 150 or 170, 240 or 250, and MATH 240 or MATH 260
Activity: Lecture
1 Course Unit

PHYS 412 Introduction to Quantum Mechanics II
Perturbation theory, variational principle, application of the quantum theory to atomic, molecular, and nuclear systems, and their interaction with radiation.
Course usually offered in spring term
Also Offered As: PHYS 512
Prerequisite: PHYS 411
Activity: Lecture
1 Course Unit
PHYS 414 Laboratory in Modern Physics
In this course you will have the opportunity to do a variety of experiments, ranging from "classic experiments" such as measuring G with a torsion balance, determining the relativistic mass of the electron, and muon lifetime, to experiments studying atomic spectroscopy, NMR, Optical pumping, Mossbauer effect, nuclear energy levels, interaction of gamma rays with matter, single photon interference, and magnetic susceptibility. There are also experiments using a High-Tc superconducting tunnel junction and a PET scanner. You will learn basic statistics, become proficient in analysis using Python, acquire an understanding of systematic errors, and learn how to write a professional report. Many of the laboratories provide excellent opportunities to exercise, and expand upon, the knowledge you have gained in your physics courses.
Course usually offered in spring term
Also Offered As: PHYS 521
Prerequisite: PHYS 411
Activity: Lecture
1 Course Unit

PHYS 421 Modern Optics
Course not offered every year
Also Offered As: PHYS 529
Prerequisites: PHYS 240 or 250 and 362, or permission of instructor
Activity: Lecture
1 Course Unit

PHYS 433 Order of Magnitude Physics
This course focuses on the art of estimating physical quantities to within the nearest factor of ten. Problem solving techniques such as dimensional analysis and scaling relations will be covered and applied to a wide range of topics including fluid mechanics, waves and sound, atomic physics, material properties, astrophysics, everyday life, and more. The course is intended for advanced undergraduate students.
One-term course offered either term
Prerequisite: Prerequisites: PHYS 411 or permission from instructor
Activity: Lecture
1 Course Unit

PHYS 499 Senior Honor Thesis
Experimental and theoretical research projects in various areas of physics planned by student in consultation with a member of faculty. A written thesis and an oral presentation and defense are required.
One-term course offered either term
Prerequisites: PHYS 412 and 414
Activity: Independent Study
1 Course Unit

PHYS 500 Mathematical Methods of Physics
A discussion of those concepts and techniques of classical analysis employed in physical theories. Topics include complex analysis, Fourier series and transforms, ordinary and partial equations, Hilbert spaces, among others.
Course usually offered in fall term
Also Offered As: MATH 594
Activity: Lecture
1 Course Unit

PHYS 501 Introduction to Research
Introduction to research in particle, nuclear, condensed matter and astrophysics. Selected current topics from journals.
One-term course offered either term
Activity: Lecture
0 Course Units
Notes: Taken by all first-year graduate students. This is a required seminar that does not carry credit or a grade.

PHYS 503 General Relativity
This is a graduate level, introductory course in general relativity. The basics of general relativity will be covered with a view to understanding the mathematical background, the construction of the theory, and applications to the solar system, black holes, gravitational waves and cosmology. The latter part of the course will cover some of the basic modern topics in modern cosmology, including the current cosmological model, the accelerating universe, and open questions driving current research.
One-term course offered either term
Activity: Lecture
1 Course Unit

PHYS 505 Introduction to Cosmology
Introduction to physical cosmology emphasizing recent ideas on the very early evolution of the universe. The course will introduce standard big bang cosmology, new theories of the very early universe, and the key observations that have tested and will be testing these ideas. No prior knowledge of astrophysics, cosmology, general relativity, or particle physics will be assumed, although aspects of each will be introduced as part of the course. The course is intended for graduate students and advanced undergraduates.
Course offered spring; odd-numbered years
Prerequisite: Graduate standing in physics or permission of instructor
Activity: Lecture
1 Course Unit

PHYS 516 Electromagnetic Phenomena
Survey of electrodynamics, focusing on applications to research done in the Department. Topics include mathematical structure and relativistic invariance properties of Maxwell equations, tensor methods, and the generation and scattering of radiation, in vacuum and in materials. Applications vary from year to year but include optical manipulation, astrophysical phenomena, and the generalizations from Maxwell's theory to those of other fundamental interactions (strong, electroweak, and gravitational forces).
Course usually offered in spring term
Activity: Lecture
1 Course Unit

PHYS 517 Particle Cosmology
This introduction to cosmology will cover standard big bang cosmology, formation of large-scale structure, theories of the early universe and their observational predictions, and models of dark energy. It is intended for graduate students or advanced undergraduates. No prior knowledge of general relativity or field theory will be assumed, although aspects of each will be introduced as part of the course.
One-term course offered either term
Activity: Lecture
1 Course Unit
PHYS 518 Introduction to Condensed Matter Physics
An introduction to condensed matter physics designed primarily for advanced undergraduate and graduate students desiring a compact survey of the field. Band theory of solids, phonons, electrical magnetic and optical properties of matter, and superconductivity.
Course usually offered in spring term
Prerequisites: Undergraduate training in quantum mechanics and statistical thermodynamics
Activity: Lecture
1 Course Unit

PHYS 521 Advanced Laboratory
In this course you will have the opportunity to do a variety of experiments, ranging from "classic experiments" such as measuring G with a torsion balance, determining the relativistic mass of the electron, and muon lifetime, to experiments studying atomic spectroscopy, NMR, Optical pumping, Mossbauer effect, nuclear energy levels, interaction of gamma rays with matter, single photon interference, and magnetic susceptibility.
There are also experiments using a High-Tc superconducting tunnel junction and a PET scanner. You will learn basic statistics, become proficient in analysis using Python, acquire an understanding of systematic errors, and learn how to write a professional report. Many of the laboratories provide excellent opportunities to exercise, and expand upon, the knowledge you have gained in your physics courses.
Course usually offered in spring term
Also Offered As: PHYS 414
Activity: Lecture
1 Course Unit

PHYS 522 Introduction to Elementary Particle Physics
An introduction to elementary particles (photons, leptons, hadrons, quarks), their interactions, and the unification of the fundamental forces.
Course not offered every year
Prerequisites: Permission of instructor required.
Activity: Lecture
1 Course Unit

PHYS 526 Astrophysical Radiation
This is a course on the theory of the interaction of light and matter designed primarily for graduate and advanced undergraduate students to build the basic tools required to do research in astrophysics. Topics to be discussed include structure of single- and multi-electron atoms, radiative and collisional processes, spectral line formation, opacity, radiation transfer, analytical and numerical methods, and a selection of applications in astrophysics based on student research interest.
Course offered fall; even-numbered years
Activity: Lecture
1 Course Unit

PHYS 528 Introduction to Liquid Crystals
Overview of liquid crystalline phases, their elasticity, topology, and dynamics.
One-term course offered either term
Activity: Lecture
1 Course Unit

PHYS 529 Modern Optics
Course offered spring; even-numbered years
Also Offered As: PHYS 421
Activity: Lecture
1 Course Unit

PHYS 530 Modern Optical Physics and Spectroscopy
Introduction to contemporary optics. Topics include propagation and guiding of light waves, interaction of electromagnetic radiation with matter, lasers, non-linear optics, coherent transient phenomena, photon correlation spectroscopies and photon diffusion.
Course not offered every year
Prerequisites: Working knowledge of electricity and magnetism and quantum mechanics. For example, at least at the level of Physics 362, PHYS 411.
Activity: Lecture
1 Course Unit
Notes: Graduate level course designed for beginning or intermediate graduate students in physics, but it is likely to be of use to a broader community including beginning graduate students whose research involves light scattering in electrical engineering, chemistry, and biophysics, and advanced undergraduates.

PHYS 531 Quantum Mechanics I
Graduate-level introduction to quantum theory. Topics covered include the postulates of quantum mechanics, unitary operators, time evolution and Schrodinger's equation, theory of angular momentum, density matrices, and Bell's inequalities. Other topics may include semi-classical (WKB) approximation, bound state techniques, periodic potentials and resonance phenomena.
Course usually offered in fall term
Prerequisites: A minimum of one semester of quantum mechanics at the advanced undergraduate level.
Activity: Lecture
1 Course Unit

PHYS 532 Quantum Mechanics II
Continuation of PHYS 531. Topics covered include the path integral formulation, symmetries in quantum mechanics, scattering theory, and decoherence. Other topics may include time independent and time dependent perturbation theory, and atomic and molecular systems.
Course usually offered in spring term
Prerequisite: PHYS 531
Activity: Lecture
1 Course Unit

PHYS 533 Topics in Cosmology
This course aims to survey three or four topics of current research interest in cosmology, mostly at the level of review articles. The topics will be covered in greater depth and with more connections to ongoing research than the introductory cosmology course, ASTR 525. The course will be largely accessible to first and second year graduate students. Some exposure to cosmology and general relativity will be helpful but the first two weeks will attempt to bridge that gap. The topic selection will be done in part with input from the students.
Course not offered every year
Activity: Lecture
1 Course Unit
PHYS 535 Topics in Theory of Living Systems
The goal of this course is to discuss broad conceptual theories that address complex phenomena of living systems. Example questions include: what is the molecular architecture of information processing in cells and developing organisms? What is the functional architecture of cooperative organization from molecules in a cell to whole organism social interactions? How is complex multi-factorial information represented in organisms? The course will meet once a week and students will research relevant papers, lead discussions, and generate synopsis of group discussions. At the end of the semester, faculty and students are expected to co-author a review report of the discussed topics.
Taught by: Kim, Goulain, Akçay, Balasubramanian, Raj, Mossel
Course not offered every year
Also Offered As: BIOL 535
Prerequisite: Permission of instructor
Activity: Seminar
0.5 Course Units

PHYS 561 Electromagnetism I
First term course in intermediate electromagnetism. Topics include electrostatics, static potential theory, multipole expansions, Laplace equation, image solutions, fields in polarized matter.
Course usually offered in fall term
Also Offered As: PHYS 361
Activity: Lecture
1 Course Unit

PHYS 562 Electromagnetism II: Magnetism, Maxwell’s Equations, and Electromagnetic Waves
Second term course in intermediate electromagnetism. Topics include magnetostatic forces and fields, magnetized media, Maxwell's equations, Poynting and stress theorems, free field solutions to Maxwell's equations, and radiation from separable and nonseparable time dependent charge and current distributions.
Course usually offered in spring term
Also Offered As: PHYS 362
Activity: Lecture
1 Course Unit

PHYS 564 Laboratory Electronics
A laboratory-intensive survey of analog and digital electronics, intended to teach students of physics or related fields enough electronics to be comfortable learning additional topics on their own from a reference such as Horowitz and Hill. Specific topics will vary from year to year from the selection of topics listed below. Analog topics may include voltage dividers, impedance, filters, operational amplifier circuits, and transistor circuits. Digital topics may include logic gates, finite-state machines, programmable logic devices, digital-to-analog and analog-to-digital conversion, and microcomputer concepts. Recommended for students planning to do experimental work in physical science.
One-term course offered either term
Also Offered As: PHYS 364
Activity: Lecture
1 Course Unit

PHYS 580 Biological Physics
The course will explore the basic physical principles behind the structure and function of life across many length and time scales (molecule, cell, organism, population). Emphasis will be given on overarching physical themes such as entropy and biological noise, and how they affect the organization of living matter and its emergent properties. Topics may include biopolymers and single molecule biophysics, molecular motors, gene and transcription networks, pattern formation in biological systems, phyllotaxis, neural computing and evolution.
Course not offered every year
Also Offered As: BCHE 580
Prerequisites: MATH 240 and MATH 241 (or equivalent preparation), PHYS 401 or familiarity with statistical mechanics and thermodynamics.
Activity: Lecture
1 Course Unit
Notes: Recommended: Basic background in biology.

PHYS 581 Thermodynamics
Course usually offered in fall term
Also Offered As: PHYS 401
Activity: Lecture
1 Course Unit

PHYS 582 Medical Radiation Engineering
This course in medical radiation physics investigates electromagnetic and particulate radiation and its interaction with matter. The theory of radiation transport and the basic concept of dosimetry will be presented. The principles of radiation detectors and radiation protection will be discussed.
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PHYS 585 Theoretical and Computational Neuroscience
This course will develop theoretical and computational approaches to structural and functional organization in the brain. The course will cover: (i) the basic biophysics of neural responses, (ii) neural coding and decoding with an emphasis on sensory systems, (iii) approaches to the study of networks of neurons, (iv) models of adaptation, learning and memory, (v) models of decision making, and (vi) ideas that address why the brain is organized the way that it is. The course will be appropriate for advanced undergraduates and beginning graduate students. A knowledge of multi-variable calculus, linear algebra and differential equations is required (except by permission of the instructor). Prior exposure to neuroscience and/or Matlab programming will be helpful.
Course usually offered in spring term
Also Offered As: BE 530, BIBB 585, NGG 594, PSYC 539
Activity: Lecture
1 Course Unit

PHYS 601 Introduction to Field Theory
Elementary relativistic quantum field theory of scalar, fermion, and Abelian gauge fields. Feynman Diagrams.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
PHYS 611 Statistical Mechanics
Course usually offered in fall term
Prerequisites: PHYS 401, 531, or equivalent
Activity: Lecture
1 Course Unit

PHYS 612 Advanced Statistical Mechanics
In depth study of classical and quantum lattice spin models, perturbation techniques, and the renormalization group.
Course not offered every year
Prerequisite: PHYS 611 or equivalent
Activity: Lecture
1 Course Unit

PHYS 622 Introduction to Elementary Particle Physics
Introduction to the phenomenology of elementary particles, strong and weak interactions, symmetries.
Course not offered every year
Prerequisite: PHYS 601
Activity: Lecture
1 Course Unit

PHYS 632 Relativistic Quantum Field Theory
Advanced topics in field theory, including renormalization theory.
Course not offered every year
Prerequisite: PHYS 601
Activity: Lecture
1 Course Unit

PHYS 633 Relativistic Quantum Field Theory
A continuation of PHYS 632, dealing with non-Abelian gauge theories.
Course not offered every year
Prerequisite: PHYS 632
Activity: Lecture
1 Course Unit

PHYS 661 Solid State Theory I
This course is intended to be an introductory graduate course on the physics of solids, crystals and liquid crystals. There will be a strong emphasis on the use and application of broken and unbroken symmetries in condensed matter physics. Topics covered include superconductivity and superfluidity.
Course not offered every year
Activity: Lecture
1 Course Unit

PHYS 662 Solid State Theory II
A continuation of PHYS 661.
Course not offered every year
Activity: Lecture
1 Course Unit

PHYS 696 Advanced Topics in Theoretical Physics
Course not offered every year
Activity: Lecture
1 Course Unit

PHYS 995 Dissertation
One term course offered either term
Activity: Dissertation
1 Course Unit

PHYS 999 Independent Study
One term course offered either term
Activity: Independent Study
1 Course Unit

Political Science (PSCI)

PSCI 010 Freshman Seminars
Freshman seminars are small, substantive courses taught by members of the faculty and open only to freshmen. These seminars offer an excellent opportunity to explore areas not represented in high school curricula and to establish relationships with faculty members around areas of mutual interest. See www.college.upenn.edu/admissions/freshmen.php
One term course offered either term
Also Offered As: AFRC 010, GSWS 010, LALS 107
Activity: Seminar
1 Course Unit

PSCI 107 Introduction to Data Science
Understanding and interpreting large, quantitative data sets is increasingly central in political and social science. Whether one seeks to understand political communication, international trade, inter-group conflict, or other issues, the availability of large quantities of digital data has revolutionized the study of politics. Nonetheless, most data-related courses focus on statistical estimation, rather than on the related but distinctive problems of data acquisition, management and visualization—in a term, data science. This course addresses that imbalance by focusing squarely on data science. Leaving this course, students will be able to acquire, format, analyze, and visualize various types of political data using the statistical programming language R. This course is not a statistics class, but it will increase the capacity of students to thrive in future statistics classes. While no background in statistics or political science is required, students are expected to be generally familiar with contemporary computing environments (e.g. know how to use a computer) and have a willingness to learn a variety of data science tools. You are encouraged (but certainly not required) to register for both this course and PSCI 338 at the same time, as the courses cover distinct, but complimentary material.
Taught by: Hopkins
Course not offered every year
Activity: Recitation
1 Course Unit

PSCI 110 Introduction to Comparative Politics
This course is designed to introduce students to comparative political analysis. How can the political behavior, circumstances, institutions, and dynamic patterns of change that people experience in very different societies be analyzed using the same set of concepts and theories? Key themes include nationalism, political culture, democratization, authoritarianism, and the nature of protracted conflict.
For BA Students: Society Sector

Activity: Recitation
1 Course Unit

2018-19 Catalog | Generated 02/28/19
PSCI 116 Political Change in the "Third World"
This is a comparative politics course that examines political and socio-economic change in the so-called "Third World," defined here as post-colonial developing areas in Asia, Africa and Latin America. The course is not as concerned with keeping up with current events as with analyzing the relationships between colonial legacies, the initial challenges of post-colonial political and socioeconomic development, and how these interact with contemporary problems and global trends. Although chiefly concerned with "political change" within countries, it will also devote substantial attention to economic, socio-cultural and international factors. The course is divided into three parts. The first examines the common and distinctive features of colonial rule in different regions as well as the varying challenges of political and economic development in diverse post-colonial settings. The second part focuses on elaborating on the themes developed in the first by looking more closely at the developmental experiences of Brazil, India, Algeria, Iran, Nigeria, and South Korea (with passing references to other countries as comparative refers). The third part focuses on trends and challenges that have emerged over the last two decades - including market reforms, democratization, and problems related to gender and the environment.
For BA Students: Society Sector
Taught by: Sl
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 130 Introduction to American Politics
This course is intended to introduce students to the national institutions and political processes of American government. What are the historical and philosophical foundations of the American Republic? How does American public policy get made, who makes it, and who benefits? Is a constitutional fabric woven in 1787 good enough for today? How, if at all, should American government be changed, and why? What is politics and why bother to study it? If these sorts of questions interest you, then this course will be a congenial home. It is designed to explore such questions while teaching students the basics of American politics and government.
For BA Students: Society Sector
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 131 American Foreign Policy
This course analyzes the formation and conduct of foreign policy in the United State. The course combines three elements: a study of the history of American foreign relations; an analysis of the causes of American foreign policy such as the international system, public opinion, and the media; and a discussion of the major policy issues in contemporary U.S. foreign policy, including terrorism, civil wars, and economic policy.
Taught by: Horowitz, Vitalis
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 135 The Politics of Food and Agriculture
Students will use course readings and their community service to analyze the institutions, ideas, interests, social movements, and leadership that shape the "politics of food" in different arenas. Service opportunities include work with the Urban Nutrition Initiative, Community School Student Partnerships, and the possibility of other placements as approved by the professors.
Taught by: Summers
Course not offered every year
Also Offered As: HSOC 135
Activity: Lecture
1 Course Unit

PSCI 136 Urban Politics in the United States
This course explores the political character of contemporary urban American life. Particular attention is given to the relationship between urban politics and policymaking – including the structural and ideological factors (e.g., dynamics of political economy, race, ethnicity, pluralism and gender) that constrain the policy context and shape the urban environment as a terrain for conjoining, competition and conflict over uses of space. It makes considerable use of case studies to throw into relief the complex and sometimes subtle processes that shape urban life.
For BA Students: Society Sector
Taught by: Reed
Course usually offered in spring term
Also Offered As: AFRC 136, URBS 136
Activity: Lecture
1 Course Unit

PSCI 139 Politics Of Poverty & Development
This academically based community service seminar will explore the ideas and theories, alliances and opposition that have shaped policy and organizing efforts addressed to the problems associated with urban poverty in the United States. There will be a special focus on the issues of increasing inequality, education, low wage work, health and nutrition, welfare reform and social security. Students will evaluate contemporary policy debates and programs in the light of selected case studies, readings, and their own experience working with community groups, institutions, and federal programs in West Philadelphia.
For BA Students: Humanities and Social Science S
Taught by: Summers
Course not offered every year
Activity: Seminar
1 Course Unit
PSCI 144 Communism
The rise and fall of Communism dominated the history of the short twentieth century from the Russian revolution of 1917 to the collapse of the Soviet Union in 1991. As a system of government, Communism is more or less dead, but its utopian ideals of liberation from exploitation and want live on. Communism remains the one political-economic system that presented, for a time, an alternative to global capitalism. In this course, students will gain an introduction to socialist and Communist political thought and explore Communist political and economic regime - their successes and failures, critics and dissidents, efforts at reform, and causes of collapse. We will learn about the remnants of Communism in China, North Korea, and Cuba and efforts of contemporary theorists to imagine a future for Communism.
For BA Students: Society Sector
Taught by: Orenstein
Course not offered every year
Also Offered As: RUSS 134
Activity: Lecture
1 Course Unit

PSCI 150 Introduction to International Relations
This course is an introduction to the major theories and issues in international politics. The goals of the course are to give students a broad familiarity with the field of international relations, and to help them develop the analytical skills necessary to think critically about international politics. The course is divided into four parts: 1) Concepts and Theories of International Relations; 2) War and Security; 3) The Global Economy; and 4) Emerging Issues in International Relations.
For BA Students: Society Sector
Taught by: Mansfield
One term course offered either term
Activity: Recitation
1 Course Unit

PSCI 151 International Security
This lecture course introduces students to the subfield of international security or strategic studies. In order to grasp the usefulness of the theoretical ideas presented in readings and lectures, abstract concepts are linked with the study of the national security policies states have adopted in the decades following World War II. Topics include current debates about nuclear proliferation, terrorism, the Iraq war, Europe's changing international role, the rise of China, Asian "flashpoints" (Korea, the Taiwan Strait), and US security policy for the 21st century - considering some of the main strategic alternatives to the US as well as their implications for the types of forces deployed (the impact of the "revolution in military affairs," the future of missile defense, and the economic burden to be shouldered).
Taught by: Goldstein
One term course offered either term
Activity: Recitation
1 Course Unit

PSCI 152 International Political Economy
This course examines the politics of international economic relations. The course will analyze the interplay between politics and economics in three broad areas: international trade, international finance, and economic development. In each section, we will first discuss economic theories that explain the causes and consequences of international commerce, capital flows, and economic growth. We will then explore how political interests, institutions, and ideas alter these predictions, examining both historical examples and current policy debates.
Taught by: GrayBrutger
Course not offered every year
Activity: Recitation
1 Course Unit

PSCI 153 International Law & Institutions
This lecture course examines the role that international law and institutions play in international relations. The course begins by exploring broad theoretical questions - questions about why states create international law and international institutions; how states design institutions; the impact that institutional design may have on the effectiveness of international institutions; and the conditions under which states are likely to comply with the rules set out by international institutions and the dictates of international law. Specific topics include collective security institutions such as the League of Nations, the United Nations, and NATO; human rights law; the laws of war; international intervention and peacekeeping; international justice and the International Criminal Court; environmental law; international trade law and the World Trade Organization; economic development and the World Bank; and international finance and the role of the International Monetary Fund.
One term course offered either term
Activity: Recitation
1 Course Unit

PSCI 180 Ancient Political Thought
Through reading texts of Plato (Socrates), Aristotle, Augustine and Aquinas, the student encounters a range of political ideas deeply challenging to – and possibly corrosive of – today’s dominant democratic liberalism. Can classical and medieval thinking offer insight into modern impasses in political morality? Is such ancient thinking plausible, useful, or dangerous?
For BA Students: History and Tradition Sector
Taught by: Norton, Green
Course not offered every year
Also Offered As: CLST 185
Activity: Recitation
0 Course Units
PSCI 181 Modern Political Thought
This course will provide an overview of major figures and themes of modern political thought. We will focus on themes and questions pertinent to political theory in the modern era, particularly focusing on the relationship of the individual to community, society, and state. Although the emergence of the individual as a central moral, political, and conceptual category arguably began in earlier eras, it is in the seventeenth century that it takes firm hold in defining the state, political institutions, moral thinking, and social relations. The centrality of "the individual" has created difficulties, even paradoxes, for community and social relations, and political theorists have struggled to reconcile those throughout the modern era. We will consider the political forms that emerged out of those struggles, as well as the changed and distinctly "modern" conceptualizations of political theory such as freedom, responsibility, justice, rights and obligations, as central categories for organizing moral and political life.
For BA Students: History and Tradition Sector
Taught by: Hirschmann, Norton, Goldman
Course not offered every year
Activity: Recitation
1 Course Unit

PSCI 182 Contemporary Political Thought
This course is intended as a general introduction to political theory since 1900, examining prominent theorists of politics including Max Weber, Hannah Arendt, Carl Schmitt, Isaiah Berlin, Jurgen Habermas, John Rawls, Michel Foucault, and Jacques Derrida. Our theme for the Fall 2012 course will be: The Disenchantment of the World? Topics include: the nature of the political and the concern, particular to the last century, that politics is itself under attack; the spread of liberal democracy across the globe and a critical appraisal of the moral meaning of this regime; contemporary theories of social justice; and an exploration of various issues pertaining to violence and the politics of security.
Taught by: Green, Hirschmann
Course usually offered in fall term
Activity: Recitation
1 Course Unit

PSCI 183 American Political Thought
Whether America begins with the Puritans and the Mayflower Compact, or with the Declaration of Independence and the Revolution, it is founded in resistance to empire. In the generations between, Americans have desired, dreaded and debated empire. This course will focus on empire and imperialism in American political thought. We will read primary texts addressing empire: from the departure and dissent of the Puritans, and Burke's Speech on Conciliation with the Colonies, to twentieth and twenty-first century debates over America's role in the world. These texts will include political pamphlets and speeches, poetry, novels, policy papers and film.

PSCI 208 International Organizations in Latin America
International Organizations play a powerful role in mitigating conflict at the global level. What role do they play in solving problems related to global politics, economic development, corruption, inequality and civil society in Latin America? How much power, influence and control do they possess in the region? This course examines the role and impact international organizations have had on Latin America since the mid-20th century. After a review of theoretical and methodological perspectives on the significance of IOs in international relations, students will examine the workings, issues and often controversies surrounding IOs in Latin America, including the IMF; World Bank, UN, OAS and ICC as well as regional organizations such as the Inter-American Court of Human Rights and area trade blocs and agreements of Mercosur, NAFTA and others. Students will also explore the regional impact of transnational civil society organizations, such as human rights organizations and the International Olympic Committee. Students will be invited to participate in the Washington Model OAS from April 10-17.
Taught by: Barch
Course usually offered in spring term
Also Offered As: LALS 208
Activity: Seminar
1 Course Unit

PSCI 210 Contemporary African Politics
This class provides an introduction to contemporary African politics. The core questions that motivate the course are (i) to what extent are political outcomes in contemporary Africa a consequence of its history, culture and geography? (ii) Why are state structures and institutions weaker in Africa than elsewhere? (iii) What accounts for Africa's relatively slow economic growth? (iv) Why have some African countries been plagued by high levels of political violence while others have not? (v) What explains the behavior of key African actors: parties or politicians?
Taught by: Grossman
One-term course offered either term
Activity: Lecture
1 Course Unit

PSCI 211 Politics in the Contemporary Middle East
This course is an introduction to the most prominent historical, cultural, institutional, and ideological features of Middle Eastern politics. Typical of the questions we shall address are why processes of modernization and economic change have not produced liberal democracies, why Islamic movements have gained enormous strength in some countries and not others, why conflicts in the region–between Israel and the Arabs, Iran and Iraq, or inside of Lebanon–have been so bitter and protracted; why the era of military coups was brought to an end but transitions to democracy have been difficult to achieve; why Arab unity has been so elusive and yet so persistent a theme; and why oil wealth in the Gulf, in the Arabian Peninsula, and in North Africa, has not produced industrialized or self-sustaining economic growth.

1 Course Unit
PSCI 213 Latin American Politics
This course examines the dynamics of political and economic change in twentieth century Latin America, with the goal of achieving an understanding of contemporary politics in the region. We will analyze topics such as the incorporation of the region to the international economy and the consolidation of oligarchic states (1880s to 1930s), corporatism, populism, and elict pacts (1930s and 1940s), social revolution, democratic breakdown, and military rule (1960s and 1970s), transitions to democracy and human rights advocacy (1980s), market-oriented reforms (1990s), and the turn to the left of current governments (2000s). The course will draw primarily from the experiences of Argentina, Brazil, Colombia, Chile and Mexico. No prior knowledge of the region is required.
Taught by: Falleti
One term course offered either term
Also Offered As: LALS 213
Activity: Recitation
1 Course Unit

PSCI 215 The European Union
This lecture course, after introductory sessions which outline the EU’s core institutions, is built on an exposition of the works of major thinkers who have reflected on the European Union’s origins, outcomes and significance. It critically reviews their arguments, especially their relevance to major recent crises, notably: the failure of the European Constitution, the current crisis of credibility facing the Euro. Whether the European Union is a federation, a federalism, or an empire, or a novel political formation shall be examined. Whether its recent major widening signals an end to institutional deepening will be discussed. Whether the Union has “a democratic deficit” is examined, as is the claim that in external relations it represents a novel form of soft power.
Taught by: O’Leary
Course not offered every year
Activity: Recitation
1 Course Unit

PSCI 217 Russian Politics
This course will present an in-depth examination of political, economic and social change in post-Soviet Russia within a historical context. After a brief discussion of contemporary problems in Russia, the first half of the course will delve into the rise of communism in 1917, the evolution of the Soviet regime, and the tensions between ideology and practice over the seventy years of communist rule up until 1985. The second part of the course will begin with an examination of the Gorbachev period and the competing interpretations of how the events between 1985 and 1991 may have contributed to the collapse of the Soviet Union. We will then proceed to make sense of the continuities and changes in politics, economics and society in contemporary Russia. Important topics will include the confrontations accompanying the adoption of a new constitution, the emergence of competing ideologies and parties, the struggle over economic privatization, the question of federalism and nationalism, social and political implications of economic reform, and prospects for Russia’s future in the Putin and post-Putin era.
Taught by: Sil
Course usually offered in spring term
Also Offered As: PSCI 517, RUSS 217
Activity: Recitation
1 Course Unit

PSCI 218 Politics of Post War Western Europe
This course examines political institutions, processes and events in postwar Western Europe. The focus will be a comparative analysis of such topics as political parties and systems, electoral behavior, as well as social and economic policy. We will also examine the way in which domestic processes and policies interact with membership in the European Union.
Taught by: Lynch
Course not offered every year
Activity: Recitation
1 Course Unit

PSCI 219 Contemporary Chinese Politics
This lecture course introduces students to the politics of the Peoples Republic of China. Complementing offerings in other departments, this course emphasizes events in the period since the Chinese Communist Party established its regime in 1949. In addition to surveying the political history of contemporary China, we will assess the meaning of these events by drawing upon theories about the nature and significance of ideology and organization in communist regimes, factionalism and its relationship to policy formulation and implementation, and general issues of political and economic development. Although the principal focus is on the domestic politics of the PRC, the course includes several lectures examining China’s international relations.
Taught by: Goldstein
One term course offered either term
Activity: Recitation
1 Course Unit

PSCI 221 Comparative Health Politics
This course examines the relationship between politics and the health of populations in the world’s rich democracies, including the United States. The key questions the course addresses are how and why countries differ in their health care policies, public health policies, and policies that affect the social determinants of health. There are no prerequisites, but prior coursework in comparative politics at the 100 or 200 level will be helpful.
Taught by: Lynch
Course not offered every year
Activity: Lecture
1 Course Unit
PSCI 223 Issues Comp Pol/Gender
Struggles over gender roles and rights have been prominent in the Middle East and North Africa since the 19th century and continue to mark contemporary political and social discourses. Since the colonial period, gender categories and sexualities have been critiqued and negotiated on behalf of empire, the nation, modernity, personal freedom; today debates and struggles over global rights, Islamic law, and modernity continue to mark politics. Despite the particularity of ideas and events in the region, a comparative framework helps to overcome exoticization of the region and develop a more acute understanding. The topics of the course include engagement with the discourse of the exotic Other, the effects of modernity, the role of nationalism and the state, state-society negotiation, Islamic formulations, and continously, the question: where does change come from? Issues of the veil and Islamic dress the expansion of anti-gay laws, the disciplining of bodies in state and social settings - these issues of gender and sexuality extend the realm of the political into intimate spaces. Assignments include a midterm and a short paper that develops research and analytical skills. The course is 200 level. While background in the study of the Middle East or gender is not necessary, an introductory political science or social science course is required.
Taught by: Harrold
Course not offered every year
Also Offered As: GSWS 225
Activity: Seminar
1 Course Unit

PSCI 224 Political Economy of Development
The course surveys some of the principal themes in the political economies of lower income countries. The questions we shall seek to address cover a broad terrain. Who are the key actors? What are their beliefs, interests, and motivations? What are their constraints? How are these being affected by closer economic linkages between national economies? While there is no single integrative framework or paradigm into which these themes neatly fit, a common thread is the changing dynamics and interplay between the local, the national, and the global. A familiarity with basic economic concepts will be helpful, but is not necessary.

Activity: Recitation
1 Course Unit

PSCI 225 Sex and Power
Gender has been a primary way of organizing power relations throughout history. This class asks how transformations in the global economy, technological change, new patterns of household formation, and social movements, have influenced women's access to economic and political positions over the last two centuries. We will examine how women's mobilization contributed to the abolition of slavery, reform of property and franchise laws, and to the formation of the welfare state. Next, we turn to thinking about how women's increasing labor force participation was hindered by institutions like marriage bars and union policy. Third, we look at cross-national patterns of women's political participation and descriptive representation including whether and how the adoption of electoral quotas influences gender equality more generally. Finally, we study how institutional norms and gender stereotypes affect political representation. This class will draw on examples from around the world, and will look at experiences of women from all economic, social, and aspirational backgrounds.
Taught by: Teele
Course not offered every year
Also Offered As: GSWS 227
Activity: Lecture
1 Course Unit

PSCI 227 China: Inst & the Econ
The rise of China since its economic reform starting from 1978 is one of the most important developments the world witnessed in the twenty-first century. In this seminar course, we explore topics including the political logic of China's economic reform, the institutional foundations of the Chinese economic growth miracle, as well as detailed analysis of Chinese financial markets, housing markets, fiscal reform, corruption/anti-corruption, labor market transitions, China's integration into the world economy, village democracy and its impact on resource allocation, the impact of population ageing, the impact of China on US economy and politics, and others. The discussions will focus on China, but will relate broadly to emerging and developed economies. The course will be based on reading and discussing research articles and books selected by the instructors.

PSCI 229 China’s Domestic Politics
This is an advanced course on the main issues of contemporary Chinese politics, economy and social change. There is a strong focus on the reform period (post 1978). We will spend considerable time and energy on understanding the major themes and challenges of China’s reforms, including the political system, the legal system, the inequality, foreign direct investment, village elections, lawmaking, environmental degradation, social opposition, corruption, and religion. We also investigate the many political and social consequences of reform and changing landscape of Chinese politics. A prior course on Chinese politics (for example, PSCI 219) is highly recommended.
Taught by: Hou
Course not offered every year
Activity: Lecture
1 Course Unit

PSCI 231 Race and Ethnic Politics
This course examines the role of race and ethnicity in the political discourse through a comparative survey of recent literature on the historical and contemporary political experiences of the four major minority groups (Blacks or African Americans, American Indians, Latinos or Hispanic Americans, and Asian Americans). A few of the key topics will include assimilation and acculturation seen in the Asian American community, understanding the political direction of Black America in a pre and post Civil Rights era, and assessing the emergence of Hispanics as the largest minority group and the political impact of this demographic change. Throughout the semester, the course will introduce students to significant minority legislation, political behavior, social movements, litigation/court rulings, media, and various forms of public opinion that have shaped the history of racial and ethnic minority relations in this country. Readings are drawn from books and articles written by contemporary political scientists.
Taught by: Gillion
Course not offered every year
Also Offered As: AFRC 232
Activity: Lecture
1 Course Unit

PSCI 232 Introduction to Political Communications
This course is an introduction to the field of political communication, conceptual approaches to analyzing communication in various forms, including advertising, speech making, campaign debates, and candidates’ and office-holders’ uses of news. The focus of this course is on the interplay in the U.S. between television and politics. The course includes a history of televised campaign practices from the 1952 presidential contest onward.
Taught by: Jamieson
Course not offered every year
Also Offered As: COMM 226
Activity: Lecture
1 Course Unit

PSCI 233 Introduction to African American Politics
This course is an historical survey of the main bases and substances of politics among black Americans and the relation of black politics to the American political order. Its two main objectives are: 1) to provide a general sense of pertinent historical issues and relations as a way of helping to make sense of the present and 2) to develop criteria for evaluating political scientists’ and others’ claims regarding the status and characteristics of black American political activity.
Taught by: Reed
Course not offered every year
Activity: Lecture
1 Course Unit

PSCI 234 Changing American Electorate
In 1960, a Democratic candidate won a very narrow Presidential victory with just 100,000 votes; in 2000, the Democratic candidate lost but received 500,000 more votes than his opponent. Still, contemporary scholars and journalists have made a variety of arguments about just how much the American political landscape changed in the intervening 40 years, often calling recent decades a transform ation. This course explores and critically evaluates those arguments. Key questions include: how, if at all, have Americans political attitudes and ideolog is changed? How have their connections to politics changed? What has this meant for the fortunes and strategies of the two parties? How have the parties base voters and swing voters changed? What changes in American society have advantaged some political messages and parties at the expense of others? Focusing primarily on mass-level politics, we consider a wide range of potential causes, including the role of race in American politics, suburbanization, economic transformations, the evolving constellation and structure of interest groups, declining social capital, the changing role of religion, immigration, and the actions of parties and political elites. For three weeks in the semester, we will take a break from considering broader trends to look at specific elections in some depth.
Taught by: Hopkins
Course not offered every year
Activity: Recitation
1 Course Unit

PSCI 236 Public Policy Process
This course introduces students to the theories and practice of the policy-making process. There are four primary learning objectives. First, understanding how the structure of political institutions matter for the policies that they produce. Second, recognizing the constraints that policy makers face when making decisions on behalf of the public. Third, identifying the strategies that can be used to overcome these constraints. Fourth, knowing the toolbox that is available to ticipants in the policy-making process to help get their preferred strategies implemented. While our focus will primarily be on American political institutions, many of the ideas and topics discussed in the class apply broadly to other democratic systems of government.
Taught by: Levendusky, Meredith
Course usually offered in fall term
Also Offered As: PPE 312
Activity: Recitation
1 Course Unit
PSCI 237 The American Presidency
This course surveys the institutional development of the American presidency from the Constitutional convention through the current administration. It examines the politics of presidential leadership, and how the executive branch functions. An underlying theme of the course is the tensions between the presidency, leadership, and democracy. Taught by: Gottschalk
Course usually offered in fall term
Activity: Recitation
1 Course Unit

PSCI 241 Polarization
Are ordinary Americans polarized? What about political elites? Is there any connection between mass and elite polarization? What do we even mean when we say some group is "polarized"? This class will explore these questions in some detail, and try to sort out all of the discussions about polarizations, red states and blue states, and the like. Taught by: Levendusky
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 243 Dilemmas of Immigration
Beneath the daily headlines about refugees blocked entry, and undocumented migrants deported there is a set of hard questions which deserve closer attention. Should countries have borders? If countries have borders, how should they decide who is kept out and who is allowed in? How many immigrants is 'enough'? Are immigrants equally desirable? What kinds of obligations do immigrants have to their receiving society? What kinds of obligations do host societies have to immigrants? Should there be 'pathways' to citizenship? Can citizenship be earned? Should citizenship be automatic? This course explores these and other dilemmas raised by immigration. Taught by: Jones-Correa
Course not offered every year
Activity: Lecture
1 Course Unit

PSCI 250 C.I.A. Assassinations and Coups in Latin America
Why has the United States government participated in political assassinations and coups d'état in Latin America? How have these interventions affected Latin American political and economic outcomes? How have they helped or hurt U.S. interests in the region? This lecture course provides an introduction to the history and politics of U.S.-led assassinations and coups in Latin America since 1949. For each event, the course will help students understand (1) the goals of the U.S. government; (2) the historical and political context of the intervention; and (3) the outcomes and consequences, both in Latin America and for the United States. Knowledge of the history of U.S. involvement in regime change is critical for understanding contemporary foreign policy. Taught by: Kronick
Course offered spring; odd-numbered years
Also Offered As: LALS 250
Activity: Lecture
1 Course Unit

PSCI 251 Arab Israeli Relations
In this course the Arab-Israeli dispute from 1948 to the present will serve as a vehicle for understanding how domestic and global political processes interact to shape, contain, or aggravate Middle Eastern wars between states and non-state actors. Particular stress will be placed on understanding how wars affect international politics in states and political organizations and how ideological and structural features of states and organizations find expression in wars and complicate or enable the search for peace. In addition, the key features of the conflict will be interpreted as both a clash between the political interests of national and/or religious groups and as a reflection of global political power struggles. Attention will be given toward the end of the course to alternative ideas about possible resolution of the conflict as well as to the increasingly prominent argument that, in this case, there is no solution. Taught by: Lustick
One-term course offered either term
Also Offered As: JWST 248
Activity: Recitation
1 Course Unit

PSCI 252 War, Strategy and Politics
This class examines the strategy and politics of warfare, focusing on the way actors plan military campaigns and the factors that are likely to lead to victory and defeat. The course readings center in particular on the factors driving changes in warfare and civil-military relations. The course will cover a wide range of topics from theories of war-fighting to historical military campaigns to insurgency warfare, terrorism, and the future of war. Taught by: Horowitz
One-term course offered either term
Activity: Recitation
1 Course Unit

PSCI 253 International Politics of the Middle East
This course will focus primarily on episodes of external intervention by Great Powers in the politics of Middle Eastern states. We shall begin by examining the emergence of the Middle Eastern state system after the disappearance of the Ottoman Empire in the early part of the 20th century. This discussion will provide opportunities to develop key concepts in the study of international politics and will serve as crucial historical background. We shall then turn our attention to the primary concern of the course - a systematic consideration of the motives, operational results, and long-term implications of a number of important examples of intervention by Great Powers in the Middle East. Among the episodes to be considered will be British policies toward the end of World War I, in Palestine in the 1930s, and, along with the French, in Suez in 1956. Soviet intervention in the first Arab-Israeli war, in 1948, will be analyzed along with Soviet policies toward Egypt in the early 1970s. American intervention in Iran in 1953 and in the Gulf War in 1991 will also be examined. Taught by: Lustick
Course usually offered in spring term
Also Offered As: JWST 253
Activity: Recitation
1 Course Unit
PSCI 255 The Causes of War & Peace
The existence and endurance of war provides one of the most important puzzles of politics: why is it that people keep making use of such a destructive and painful way of resolving their disputes? This course addresses this question and the related question of what factors contribute to peace, focusing on both academic and popular explanations for conflict, including among others anarchy, over-optimism, shifting power, diversionary war, the malevolent influence of war profiteers, and a variety of explanations grounded in culture, religion and other ideational variables. In this discussion, we will focus on both interstate and civil wars, and on both the onset and the eventual termination of war. At various points in the course we will discuss a wide range of historical and contemporary cases, including the World Wars, Vietnam, the Gulf War, the Iraq War, the various Arab-Israeli wars, the India-Pakistan rivalry, and a number of recent civil conflicts such as the wars in Yugoslavia, Congo, and Sudan. The course concludes with a discussion of strategies for managing ongoing conflicts and for securing peace in post-war settings.
Taught by: Weisger

PSCI 260 Ethics & Ir
Course not offered every year
Activity: Recitation
1 Course Unit

PSCI 261 Emerging Technologies and the Future of the World
Technological change is always occurring, but the rate of change seems to be accelerating. Advances in robotics, artificial intelligence, cyber, biotechnology, and other areas generate promise as well as peril for humanity. Will these emerging technologies unleash the innovative capacity of the world, generating new opportunities that help people live meaningful lives? Alternatively, are automation and other technologies chipping away at the labor market in a way that could create severe generational dislocation at best, and national and international turmoil at worst? These questions are important, and have consequences for how we live our lives, how nations interact, and the future of the world writ large. Emerging technologies could shape public policy at the local, national, and international level, and raise questions of fairness, ethics, and transparency. This course takes a unique approach, combining insights from engineering, political science, and law in an interdisciplinary way that will expose students both to the key technologies that could shape the future and ways to think about their potential politics, and society.
Taught by: Horowitz
Also Offered As: EAS 261, INTG 261
Activity: Seminar

PSCI 271 Constitutional Law: Public Power & Civil Rights to 1912
This course explores the creation and transformations of the American constitutional system’s structures and goals from the nation’s founding through the period of Progressive reforms, the rise of the Jim Crow system, and the Spanish American War. Issues include the division of powers between state and national governments, and the branches of the federal government; economic powers of private actors and government regulators; the authority of governments to enforce or transform racial and gender hierarchies; and the extent of religious and expressive freedoms and rights of persons accused of crimes. We will pay special attention to the changing role of the Supreme Court and its decisions in interpreting and shaping American constitutionalism, and we will also read legislative and executive constitutional arguments, party platforms, and other influential statements of American constitutional thought.
Taught by: Smith
One term course offered either term
Also Offered As: AFRC 269
Activity: Recitation
1 Course Unit

PSCI 272 American Constitutional Law II
This course examines American constitutional development from the eve of WWI through the second Obama administration. Topics include the growth of the New Deal and a Great Society regulatory and redistributive state, struggles for equal rights for racial and ethnic minorities, women and GLBT Americans, contests over freedoms of religion and expression, criminal justice issues, the Reagan Revolution and the revival of federalism and property rights, and issues of national security powers after September 11, 2001. Lectures are on videos and class time is devoted to in-depth discussions.
Taught by: Smith
Activity: Recitation
1 Course Unit
PSCI 280 Feminist Political Thought
This course is designed to provide an overview of the variety of ideas, approaches, and subfields within feminist political thought. Readings and divided into three sections: contemporary theorizing about the meaning of "feminism"; women in the history of Western political thought; and feminist theoretical approaches to practical political problems and issues, such as abortion and sexual assault.
For BA Students: Society Sector

1 Course Unit

PSCI 282 Lying, Cheating, Stealing, and Killing: How to Think About Professional Ethics
Professionals - in business, medicine, law, and politics - face myriad ethical dilemmas in their daily work life that challenge, and sometimes conflict with, the moral commitments that guide their everyday life. This course systematically examines the ethical dimensions of these four professional roles, asking questions such as: Are there limits to what we should sell? How far should competitors go to "win"? Who should get ventilators in a flu pandemic? Is it morally permissible for physicians to assist in suicide? Should lawyers represent terrorists or child killers? How far does attorney-client privilege go? Is it morally justifiable to torture enemy combatants? Should politicians lie?

Activity: Seminar
1 Course Unit

PSCI 314 Democracy in Latin America
Since the inception of the twenty first century, Latin America has undergone major economic, social, and political transformations. Many of the neoliberal policies of the last quarter of the twentieth century were reversed or revisited, economic inequality decreased significantly across the region, and anumber of governments turned to the left of the political spectrum, often instituting major public policy and constitutional reforms. How have those changes affected citizenship and democracy in the region? In particular, have citizens' channels for representation and participation changed in the recent past? What has happened to local participatory institutions since the return to the right in some countries of the region? The course will explore these and related questions. Students will develop their own research projects throughout the semester.
While not a requirement, the ability to read Spanish or Portuguese will significantly enhance students' learning experience.
Taught by: Falleti
One-term course offered either term
Also Offered As: LALS 314
Activity: Seminar
1 Course Unit

PSCI 320 Who Gets Elected and Why? The Science of Politics
What does it take to get elected to office? What are the key elements of a successful political campaign? What are the crucial issues guiding campaigns and elections in the U.S. at the beginning of the 21st century? This class will address the process and results of electoral politics at the local, state, and federal levels. Course participants will study the stages and strategies of running for public office and will discuss the various influences on getting elected, including: Campaign finance and fundraising, demographics, polling, the media, staffing, economics, and party organization. Each week we will be joined by guest speakers who are nationally recognized professionals, with expertise in different areas of the campaign and election process. Students will also analyze campaign case studies and the career of the instructor himself. Edward G. Rendell is the former Mayor of Philadelphia, former Chair of the Democratic National Committee, and former Governor of Pennsylvania.
Taught by: Rendell
One-term course offered either term
Also Offered As: GAFL 509, URBS 320
Activity: Lecture
1 Course Unit

PSCI 327 Modern India
This course attempts to examine the experience of representative democracy in India and the country's development record in a historical framework. It will ask questions such as: How did representative democracy emerge in India and what explains its persistence? What are the sources of its vulnerability? What kind of a sense of nationhood does this democratic experience rest upon? What are the exclusions built into this conception of nationhood? What is the relationship between India's development experience and its democratic experiment? How have India's "traditional" institutions adapted or failed to adapt to modern circumstances? Why has India performed well in certain economic sectors such as IT even while its record in providing basic social services has been poor? How has India's self-perception about its place in the world changed in recent years and what are its implications?

1 Course Unit

PSCI 328 Democracy in Trouble: OAS to the Rescue?
Democracy in the Americas is in trouble. Enraged political, economic, and social inequality, combined with environmental degradation, weak institutions, pervasive health epidemics, weapon proliferation, and other pressing issues pose formidable challenges for strengthening democratic ideals and institutions. The Organization of American States (OAS), is uniquely poised to confront and purposefully focused to strengthen peace, security, democracy, and human rights. In this community-based course, students will study the role and history of the OAS while working directly with area public high school students in preparation for the OAS annual high model OAS simulation in Washington, DC.

PSCI 332 Survey Research & Design
Survey research is a small but rich academic field and discipline, drawing on theory and practice from many diverse fields including political science and communication. This course canvases the science and practice of survey methods, sampling theory, instrument development and operationalization, and the analysis and reporting of survey data. Major areas of focus include measurement and research on survey errors, application to election polling, new frontiers in data collection, overall development of data management and introductory statistics.
Taught by: Dutwin
Course not offered every year
Also Offered As: COMM 332
Activity: Seminar
1 Course Unit

PSCI 333 Political Polling
Political polls are a central feature of elections and are ubiquitously employed to understand and explain voter intentions and public opinion. This course will examine political polling by focusing on four main areas of consideration. First, what is the role of political polls in a functioning democracy? This area will explore the theoretical justifications for polling as a representation of public opinion. Second, the course will explore the business and use of political polling, including media coverage of polls, use by politicians for political strategy and messaging, and the impact polls have on elections specifically and politics more broadly. The third area will focus on the nuts and bolts of election and political polls, specifically with regard to exploring traditional questions and scales used for political measurement; the construction and considerations of likely voter models; measurement of the horse race; and samples and modes used for election polls. The course will additionally cover a fourth area of special topics, which will include exit polling, prediction markets, polling aggregation, and other topics. It is not necessary for students to have any specialized mathematical or statistical background for this course.

PSCI 338 Statistical Methods PSCI
The goal of this class is to expose students to the process by which quantitative political science research is conducted. The class will take us down three separate, but related tracks. Track one will teach some basic tools necessary to conduct quantitative political science research. Topics covered will include descriptive statistics, sampling, probability and statistical theory, and regression analysis. However, conducting empirical research requires that we actually be able to apply these tools. Thus, track two will teach us how to implement some of these basic tools using the computer program R. However, if we want to implement these tools, we also need to be able to develop hypotheses that we want to test. Thus, track three will teach some basics in research design. Topics will include independent and dependent variables, generating testable hypotheses, and issues in causality. You are encouraged to register for both this course an PSCI 107 at the same time, as the courses cover distinct but complementary material. But there are no prerequisites for this course. The class satisfies the College of A Science Quantitative Data Analysis (QDA) requirement.

PSCI 395 Power Sharing in Deeply Divided Places - BFS
This course examines conceptual, explanatory and normative debates over power-sharing systems. We explore the circumstances in which federal, consociational and other power-sharing institutions and practices are proposed and implemented to regulate deep national, ethnic, religious or linguistic divisions. We evaluate these systems, seeking to explain why they are formed or attempted, and why they may endure or fail, paying special attention to bi- and multi-national, multi-ethnic, multi-religious and multi-lingual environments.
Taught by: O'Leary
Course not offered every year
Corequisites: Benjamin Franklin Scholars, seniors and juniors in Political Science, seniors in PPE; others by permission.
Activity: Seminar
1 Course Unit

PSCI 398 Selected Topics in Political Science
Consult department for detailed descriptions. More than one course may be taken in a given semester. Recent titles have included: Sustainable Environmental Policy & Global Politics; Shakespeare and Political Theory.
One term course offered either term

PSCI 402 Us-Latin American Rel
Course not offered every year
Activity: Lecture
1 Course Unit

PSCI 404 Media and Politics
Media and Politics will examine multiple issues specific to the past and present political media environment in the United States. Focus will be primarily, though not exclusively on the contemporary news media (as opposed to political advertising and other marketing-oriented communications). Topics will include the rise of partisan media, selective exposure, news as entertainment, etc. Reading expectations will be relatively heavy, and under the supervision of the professor, students will be expected to write a research paper on a topic not directly a part of the course material.
Taught by: Mutz
One term course offered either term
Also Offered As: COMM 404
Activity: Seminar
1 Course Unit

PSCI 412 Comparative Politics
This seminar focuses on comparative political systems. Themes include political participants, leadership, institutions, instability, and system transformation in developed and less developed countries.
Course not offered every year
Also Offered As: AFRC 417
Activity: Lecture
1 Course Unit

PSCI 413 Evidence Based Policies of Economic and Political Development
This class provides a "hands-on" introduction to the promises and limitations of using Randomized Control Trials (RCTs) to inform policy makers, practitioners, and academics of the conditions under which policies likely would have a positive effect on economic and political outcomes, in the context of international development. This course has three parts: the first is devoted to understanding the "nuts and bolts" of running field experiments / RCTs in developing countries. In part, we will be reading Glemstern and Takavarasha’s Running Randomized Evaluations: A Practical Guide. In addition, we will discuss core behavioral concepts from both behavioral economics and social psychology (prospect theory). The second part of the course will be devoted to demonstrating how schools have used RCTs to inform core policy debates (e.g. What are some effective ways to reduce corruption? How can we improve the performance of frontline service providers? How can politicians be more responsive to their constituents?) In the third part, students will be presenting their own research proposals, explicitly designed to address either a core policy question in the developing world or for those interested in the USA. Here students will have an opportunity to partner with the Social and Behavioral Sciences Team (https://sbst.gov), which is under the National Science and Technology Council.
Taught by: Grossman
One term course offered either term
Also Offered As: GAFL 530
Activity: Seminar
1 Course Unit

PSCI 418 Evolution, Politics and Computer Simulation
In this course we shall explore how recent developments in evolutionary theory relate to larger questions raised by students of complexity and complex adaptive systems. We shall study how they together provide a basis for important critiques of standard approaches in political science and enable fascinating and powerful understandings of politics and political phenomena – including national identity and identity change, state formation, revolution, globalization, and leadership. An important vehicle for the application of these insights for understanding politics is computer simulations featuring agent-based modeling. Students will use "PS-I" an agent based computer simulation platform, to develop their own models, conduct experiments, test hypotheses, or produce existence proofs in relation to popular theoretical positions in contemporary political science. No knowledge of computer programming is required.
Taught by: Lustick
One term course offered either term
Also Offered As: PPE 476
Activity: Seminar
1 Course Unit
PSCI 433 Social Movements
Social movements and political protest have become some of the most effective tools for citizens and non-citizens to influence the political system. This course is designed to introduce students to the theoretical and methodological approaches taken in understanding these behaviors. Analyzing social movements that range from civil discontent to contentious political protest, the course will address a variety of questions: What is the origin of movement behavior and why do individuals turn to these actions in lieu of simply engaging in institutional modes of political action such as voting? What were the strategies of these movements? What are the political conditions that allow social movements to resonate with the American public? In addition to addressing these topics, this course surveys the policy successes of major social and political movements. From the Civil Rights and Women’s Right Movement to the recent Tea Party movement and Hong Kong demonstrations over democracy, this course explores the various public policies that have resulted from citizens’ protest actions. While state level and local level government responsiveness will be addressed, special attention will be given to how political protest influences public policy in all three branches of the federal government.
Taught by: Gillion
Course not offered every year
Also Offered As: AFRC 433
Activity: Seminar
1 Course Unit

PSCI 434 Advanced Topics in American Politics
This seminar is designed to serve as a “capstone” experience for advanced undergraduates interested in American politics. It exposes students to some of the issues currently being studied and debated by the leading scholars in the field. For each topic we will read works that take competing or opposing positions on an issue; for example we will examine the current controversy over the causes and consequences of divided government. Students will write a research paper analyzing one of the debates.
Taught by: Gillion
Course not offered every year
Also Offered As: AFRC 435
Activity: Seminar
1 Course Unit

PSCI 436 Political Psychology
How do campaign advertisements influence voters’ perceptions and behavior? What roles do emotions play in politics? Do we all harbor some measure of racism, sexism, or homophobia, and what role do these stereotypes play in political behavior? How and why do ideologies form, and how does partisanship influence the way that voters understand the political world? How do people perceive threat, and what are the psychological consequences of terrorism? These questions, and many others, are the province of political psychology, an interdisciplinary field that uses experimental methods and theoretical ideas from psychology as tools to examine the world of politics. In this course, we will explore the role of human thought, emotion, and behavior in politics and examine the psychological origins of citizens’ political beliefs and actions from a variety of perspectives. Most of the readings emphasize politics in the United States, though the field itself speaks to every aspect of political science.
Taught by: Margolis
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 437 Race & Criminal Justice
Why are African Americans and some other minority groups disproportionately incarcerated and subjected to penal sanctions? What are the political, social and economic consequences for individuals, communities, and the wider society of mass incarceration in the United States? What types of reforms of the criminal justice system are desirable and possible? This advanced seminar analyzes the connection between race, crime, punishment, and politics in the United States. The primary focus is on the role of race in explaining why the country’s prison population increased six-fold since the early 1970s and why the United States today has the highest incarceration rate in the world. The class will likely take field trips to a maximum-security jail in Philadelphia and to a state prison in the Philadelphia suburbs.
Taught by: Gottschalk
Course not offered every year
Also Offered As: AFRC 437, AFRC 638, PSCI 638
Activity: Seminar
1 Course Unit

PSCI 439 Experimental Methods of Inquiry
The main goal of this course is to familiarize students with experiments, quasi-experiments, population-based survey experiments and field experiments as they are widely used in the social sciences. By the end of the course, students will be expected to understand what it is about a study that allows for a strong causal inference. Whether one is reading about studies in a newspaper or reading academic journal articles, it is important to know how to distinguish convincing versus unconvincing evidence of any given claim. As a final project, students will be expected either to develop their own original experimental design or to analyze the evidence pertaining to a causal claim of their own choosing based on what they have learned in class. Throughout the course of the semester, we will also consider how to deal with the issue of causality as it occurs in observational studies, and draw parallels between experimental and observational research.

PSCI 497 Political Science Honors
This is a mandatory seminar for all students planning to submit an honors thesis for the purpose of possibly earning distinction in Political Science upon graduation. The course is aimed at helping students identify a useful and feasible research question, become familiar with the relevant literatures and debates pertaining to that question, develop a basic understanding of what might constitute "good" and "original" research in different subfields, and set up a plan for conducting and presenting the research. The course is also aimed at building a community of like-minded student researchers, which can complement and enrich the honor student's individual experience of working one-on-one with a dedicated faculty thesis advisor. Students apply in the spring of their junior year for admissions to the honors program and enrollment in PSCI 497.
Taught by: Doherty-Sil

PSCI 511 Society and Politics in India
This course examines the experience of representative democracy in India and the country's development record in a historical framework. It will ask questions such as: How did representative democracy emerge in India, and what explains its persistence? What are the sources of its vulnerability? What kind of a sense of nationhood does this democratic experience rest upon? What are the exclusions built into this conception of nationhood? What is the relationship between India's development experience and its democratic experiment? How have India's "traditional" institutions adapted or failed to adapt to modern circumstances? Why has India performed well in certain economic sectors even while its record in providing basic social services has been dismal? How have the Indian State and its public institutions managed and coped with these changes? And how has India's self-perception about its place in the world changed in recent years, and what are its implications?

Also Offered As: SAST 528
Activity: Seminar
1 Course Unit

PSCI 517 Russian Politics
This course will present an in-depth examination of political, economic and social change in post-Soviet Russia within a historical context. After a brief discussion of contemporary problems in Russia, the first half of the course will delve into the rise of communism in 1917, the evolution of the Soviet regime, and the tensions between ideology and practice over the seventy years of communist rule up until 1985. The second part of the course will begin with an examination of the Gorbachev period and the competing interpretations of how the events between 1985 and 1991 may have contributed to the collapse of the Soviet Union. We will then proceed to make sense of the continuities and changes in politics, economics and society in contemporary Russia. Important topics will include the confrontations accompanying the adoption of a new constitution, the emergence of competing ideologies and parties, the struggle over economic privatization, the question of federalism and nationalism, social and political implications of economic reform, and prospects for Russia's future in the post-Yeltsin era. This course may also be taken as a graduate seminar (PSCI 517) with the permission of the instructor and the completion of additional requirements.

PSCI 531 Public Opinion & Elections
This course is designed to give advanced undergraduates and graduate students exposure to the literature on political behavior in American politics (the course is part of the departments 3-course graduate sequence in American politics). The course will cover both the classics of public opinion and political behavior from the Columbia, Michigan, and Rochester schools, as well as more current topics and debates in the literature. Topics include (but are not limited to) the early voting studies, the role of partisanship, the nature and origins of ideology, mass-elite interactions, heuristics and low information rationality, the nature of the survey response, campaign and media effects, framing effects, and the role of institutions in structuring behavior. Undergraduates are welcome in the class, but they should know that the class assumes familiarity with quantitative approaches to studying politics.

PSCI 552 Game Theory
This course provides an introduction to non-cooperative game theory and its applications to political science. The goal of the course is to provide students with the background and understanding necessary to read published game-theoretic work in political science journals. To that end, the course covers the basic concepts of game theory, including Nash equilibrium and its main refinements, simultaneous and sequential games, repeated games, evolutionary game theory, and games of incomplete and private information. In addition, we will cover some of the central models used in political science, notably models of public choice (such as the median voter theorem) and models of bargaining.
Taught by: Weisgerber
Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 558 Human Rights
This course will examine the theoretical, historical and political foundations of contemporary human rights debates. The course will cover not only broad conceptual issues, but also specific issue areas (e.g., civil rights, economic rights, women's rights, business and human rights), as well as the question of how new rights norms emerge and diffuse in the international arena. The course is open to students in the Master of Liberal Arts Program, as well as students who are actively pursuing the Graduate Certificate in Interdisciplinary Studies in Global Human Rights.
Taught by: Doherty-Sil
Also Offered As: PSCI 258
Activity: Recitation
1 Course Unit

PSCI 584 Political Philosophy
An examination of basic theoretical problems of political science divided into three parts. First, specific features of social sciences will be examined and three most important general orientations of social sciences (analytical, interpretative and critical) will be compared and analyzed. Second, basic concepts of social and political sciences will be studied: social determination, rationality, social change, politics, power, state, democracy. Third, the problem of value judgments will be considered: Is there a rational, objective method for the resolution of conflicts in value judgments? Is morality compatible with politics?

PSCI 598 Selected Topics
Consult department for detailed descriptions. More than one course may be taken in a given semester. Recent titles have included: Race Development and American International Relations, Hegel and Marx, and Logic of the West.
One term course offered either term
Also Offered As: PPE 475
Activity: Seminar
1 Course Unit

PSCI 600 International Relations Theory
This purpose of this course is twofold. First, the survey course is designed to introduce students to a wide range of theories of international politics. During the course of the semester we will examine neo-realism, power transition theory, hegemonic stability theory, the modern world system, international regimes and interdependence, the democratic peace, bureaucratic politics, organizational theory, constructivism, and decision making theory. Second, the course will sharpen students' research design skills. The written assignments require students to take the often abstract theories presented in the readings and develop practical research designs for testing hypotheses derived from the theories. The papers will not include data collection or the execution of actual tests. Rather, they will focus on the conceptual problems of designing tests which eliminate competing hypotheses, operationalizing variables, and identifying potential sources of data. Student's grades will be based on five short research designs and discussion leadership.

1 Course Unit

PSCI 605 Great Books Comp Pol
Activity: Seminar
1 Course Unit

PSCI 610 Comparative Political Analysis
This seminar is aimed primarily at graduate students planning to take doctoral exams in comparative politics. It provides a critical survey of the field of comparative politics, tracing the intellectual history of the field, examining shifts in conceptual frameworks and research traditions, and comparing alternative methodological approaches. The first half of the course generally examines how processes of political, economic, and social change have been theorized in the social sciences from the mid-19th century to the present. In this process, particular attention is paid to the bifurcation between theories that emphasize the "universal" (e.g. the homogenizing effects of specific processes or variables) and the "particular" (e.g. the persistence of distinctive historical legacies and trajectories). Since this bifurcation is reinforced by distinct styles and methods of research, the seminar also probes the recent battles between rational-choice, cultural, and structuralist scholars; while considering the trade-offs between varieties of formal, quantitative, and qualitative methods. In the second half, the focus shifts to the range of substantive problems investigated by scholars in the field of comparative politics. These topics cover the complex relations among nations, states and societies; the origins, consolidation, and patterns of democratic governance; political economy in relation to development processes and social policies; the intersection of international/global economy and domestic politics; the dynamics of revolutions and social movements; and alternative problematiques constructed from the point of view of real actors such as workers, women, and local communities. In all cases, as a whole, the course is designed to provide an introduction to important issues and debates that comparativists have regularly engaged in; to help you understand the assumptions behind, and differences between, particular approaches, methods, and styles of research; to examine whether current debates are spurring new or better research in a given field in light of past approaches; and to gauge whether there has been progress, fragmentation, or stagnation in the field of comparative politics as a whole.

Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 615 Political Economy of Development
This course examines the debate in development studies arising from recognition that economic models, theories, methods, and strategies abstracted from the specific experience of western societies and cultures do not have general applicability. A broader social science approach is adopted, one which emphasizes the need to understand the social structures and cultures of the developing countries, the capabilities of weak versus strong states, and the links with the international system that influence transformative processes to which industrializing economies are subjected. The readings offer an overview of the most influential theories of development and underdevelopment that structured debate from the 1960's through the 1990's, and focus on the elements of these approaches that advance understanding of development and stagnation in several key countries, including Brazil, Mexico, India and selected countries in East and Southeast Asia.

Course not offered every year
Activity: Seminar
1 Course Unit

PSCI 631 American Political Development
Analyzes important patterns of continuity and change in American politics by examining the development of the American State from a comparative and historical perspective. Covers issues and debates central to not only the subfield of American politics, but also the discipline of political science more broadly. These include the role of the state, political culture, interests, ideas, and institutions in political development, and the role of history in political analysis. Open to advanced undergraduates with the permission of the instructor.

Taught by: Gottschalk
One term course offered either term
Activity: Seminar
1 Course Unit

PSCI 633 Hegemonic Analysis: Theories and Applications
An important strain within contemporary political science has been the attempt to explain how power is exercised through the manipulation or exploitation of consciousness, habits, and cultural predispositions. One of the key concepts in the study of these issues is that of "hegemony" – the establishment of particular beliefs as commonsensical presuppositions of political life. In this course that notion will be systematically explored. Of particular interest will be how authors who conduct hegemonic analysis cope with the problem of analyzing the effect of what the objects of their analysis, by definition, do not and, in some sense, cannot, think about. Illustrations of hegemonic phenomena and attempts to analyze them will be drawn from a variety of fields, such as political theory, historiography, comparative politics, American politics, rational choice theory, agent based modeling, and epistemology.

Portuguese (PRTG)

PRTG 110 Elementary Portuguese I
Portuguese 110 is a first-semester introductory language course for students who have not studied Portuguese before, or who have had little exposure to the language. The course will emphasize the development of foundational reading, writing, listening and speaking abilities within a cultural context. Students will participate in paired and group activities designed to elicit meaningful and accurate exchanges of information. The course will introduce students to Portuguese and Lusophone culture through a variety of authentic materials, including texts, songs, films and other audio and video material. Classes will be conducted in Portuguese.
For BA Students: Language Course
Course usually offered in fall term
Activity: Seminar
1 Course Unit

PRTG 114 Portuguese for Spanish Speakers I
Portuguese 114 is designed for students who have studied Spanish. The course begins with exposure to basic vocabulary and structures, advancing at an accelerated pace. Classroom activities will emphasize pronunciation, spoken production as well as language structures and vocabulary. Students will participate in pairs, small groups and whole-class activities that focus on the meaningful and accurate exchange of information. The class will be conducted in Portuguese.
One term course offered either term
Activity: Seminar
1 Course Unit

PRTG 120 Elementary Portuguese II
This class continues the development of a basic proficiency that will help reinforce the student's abilities and confidence. A broad range of lively, high-interest readings such as newspaper and magazine articles in current events on Brazilian culture will allow the student to gain a genuine sense of current usage. A Brazilian movie is presented and discussed in groups. Daily homework assignments involve writing exercises, short compositions and group projects.
For BA Students: Language Course
Course usually offered in spring term
Prerequisite: PRTG 110 or instructor's permission
Activity: Seminar
1 Course Unit

PRTG 130 Intermediate Portuguese I
This is a third-semester intermediate course, in a four-course strand, designed for students who have taken at least two semesters of Portuguese. Classroom activities will emphasize pronunciation, spoken production, language structures and vocabulary, as students explore movies, music and other authentic media to further develop their ability to communicate in Portuguese. The course will be conducted in Portuguese.
For BA Students: Language Course
Course usually offered in fall term
Prerequisite: PRTG 120 or instructor's permission
Activity: Seminar
1 Course Unit

PRTG 134 Portuguese for Spanish Speakers II
Portuguese 134 is an accelerated intermediate course designed for students who have taken Portuguese for Spanish Speakers I, or its equivalent. Classroom activities will emphasize the development of pronunciation and spoken production, the use of language structures and vocabulary at the intermediate level. In addition, students will explore movies, music, short stories, and other media as they further develop reading, speaking and interpretive skills in Portuguese. The course will be conducted in Portuguese.
One term course offered either term
Prerequisite: PRTG 114
Activity: Seminar
1 Course Unit

PRTG 140 Intermediate Portuguese II
This is a fourth-semester intermediate course, in a four-course strand, designed for students who have taken at least three semesters of Portuguese. Classroom activities will emphasize pronunciation, spoken production, grammar and language structures, and vocabulary at the advanced intermediate level. Students will explore movies, readings, news, music and other media as they further develop speaking, writing, reading and interpretive skills in Portuguese. The course will be conducted in Portuguese.
For BA Students: Last Language Course
Course usually offered in spring term
Prerequisite: PRTG 130 or instructor's permission
Activity: Seminar
1 Course Unit

PRTG 202 Advanced Portuguese
This course is designed for students who have already taken basic and intermediate levels of Portuguese. It complements students' knowledge of Portuguese by emphasizing the use of advanced grammatical structures and vocabulary. Classes will focus on practicing such advanced language structures by reading a diverse range of texts, including short stories by different authors of the Lusophone countries, and one novel; speaking and writing about a variety of contemporary texts; watching movies and documentaries; and listening to news, songs and other authentic audio material. The emphasis will be on language usage and culture. This course will be conducted in Portuguese.
For BA Students: Advanced Language Course
One term course offered either term
Prerequisites: PRTG 134, PRTG 140 or instructor's permission
Activity: Seminar
1 Course Unit
PRTG 215 Portuguese for the Professions
Portuguese for the Professions is designed for advanced-level students to develop their ability to use a wide technical vocabulary. The course will cover an array of topics in the areas of Economy, Politics, Science, Technology, Law and others as they pertain to the societies and cultures of the Lusophone countries, with particular emphasis placed on Brazil. Through readings, movies, discussions, essays and presentations, students will enhance their ability to write about and discuss these topics while employing the appropriate technical vocabulary.
One term course offered either term
Prerequisite: Portuguese 202
Activity: Seminar
1 Course Unit

PRTG 217 Portuguese for the Professions II
Portuguese for the Professions II is a second-semester course designed to provide advanced-level students with exposure to, and practice in, a wide variety of technical vocabulary, and to develop their communicative skills on topics related to Brazil’s economic, social and historical context. Classroom activities will be based on the readings and discussions of articles, papers, the viewing of documentaries and other visual media, covering an array of topics within the proposed themes. The course will be conducted in Portuguese.
For BA Students: Advanced Language Course
Course usually offered in fall term
Prerequisite: Portuguese 202
Activity: Seminar

Professional Writing (PROW)

PROW 100 Fundamentals of Professional Writing
Using an immersive, case-based teaching style, this course introduces the basic concepts and vocabulary students build upon throughout the remainder of the certificate and draw upon in all future writing tasks. Students become equipped with a deep understanding of how to analyze any writing situation and make their writing a purposeful act of communication. Students engage with a series of authentic writing scenarios and a range of activities that provide hands-on practice and instructor coaching and feedback, as well as targeted exercises for improving grammar, mechanics, clarity, precision and persuasiveness. This collaborative, problem-based learning approach provides students with the strategies and flexibility they need to adapt to an ever-changing multimedia communication environment.
Activity: Online Course
1 Course Unit

PROW 101 Writing For Specialized Audiences: Private Sector
Using case studies and other real-world examples, this course provides an introduction to writing for audiences in the private sector, including business, technical and professional organizations. Students learn to identify the different purposes, genres and specialized audiences one encounters when writing in the private sector, as well as methods for effectively reaching and persuading these audiences. The course also provides practical simulations to aid students as they adapt their processes and styles to specialized situations, expanding their writers repertoire while deepening their understanding of writing for a specific context. Genres to be studied include e-mail, letters (for example sales, job applications, rejection letters, responses to complaints), mission/ vision/goal statements, biographical notes, organization descriptions and reports. PROW 100 is a prerequisite for students who are enrolled in the PROW certificate.
Activity: Online Course
1 Course Unit

PROW 102 Writing Studio
This is an intensive, hands-on, guided practice to writing intended for those who would like to work on their basic writing skills or on a particular type of writing—for instance, targeting practice to real-world examples from their workplace. Receiving extensive individualized attention, students draft and revise their writing as well as engage in targeted exercises to address particular areas that need improvement. Students may focus on grammar and mechanics, as well as deeper structure, content and stylistic issues. PROW 100 is a prerequisite for students who are enrolled in the PROW certificate.
Activity: Online Course
1 Course Unit

Psychology (PSYC)

PSYC 001 Introduction to Experimental Psychology
This course provides an introduction to the basic topics of psychology including our three major areas of distribution: the biological basis of behavior, the cognitive basis of behavior, and individual and group bases of behavior. Topics include, but are not limited to, neuropsychology, learning, cognition, development, disorder, personality, and social psychology.
For BA Students: Living World Sector
One term course offered either term
Activity: Lecture
1 Course Unit
PSYC 070 Psychology of Food
Taught by: Rozin
Activity: Seminar
1 Course Unit
Notes: Does not count for the Psych major. To apply: https://www.curf.upenn.edu/spring-2018-bfs-seminars

PSYC 097 Decision Theory
One term course offered either term
Activity: Lecture
1 Course Unit

PSYC 109 Introduction to Brain and Behavior
Introduction to the structure and function of the vertebrate nervous system, including the physiological bases of sensory activity, perception, drive, motor control and higher mental processes. The course is intended for students interested in the neurobiology of behavior. Familiarity with elementary physics and chemistry will be helpful.
For BA Students: Living World Sector
One term course offered either term
Also offered As: BIBB 109, BIOL 109
Activity: Lecture
1 Course Unit

PSYC 111 Perception
How the individual acquires and is guided by knowledge about objects and events in their environment.
One term course offered either term
Also offered As: VLST 211
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit

PSYC 127 Physiology of Motivated Behaviors
This course focuses on evaluating the experiments that have sought to establish links between brain structure (the activity of specific brain circuits) and behavioral function (the control of particular motivated and emotional behaviors). Students are exposed to concepts from regulatory physiology, systems neuroscience, pharmacology, and endocrinology and read textbook as well as original source materials. The course focuses on the following behaviors: feeding, sex, fear, anxiety, the appetite for salt, and food aversion. The course also considers the neurochemical control of responses with an eye towards evaluating the development of drug treatments for: obesity, anorexia/cachexia, vomiting, sexual dysfunction, anxiety disorders, and depression.
Taught by: Grill
One term course offered either term
Also offered As: BIBB 227
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 149 Cognitive Neuroscience
The study of the neural systems that underlie human perception, memory and language; and of the pathological syndromes that result from damage to these systems.
Taught by: Epstein or Mackey
One term course offered either term
Also offered As: BIBB 249
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit

PSYC 151 Language and Thought
This course describes current theorizing on how the human mind achieves high-level cognitive processes such as using language, thinking, and reasoning. The course discusses issues such as whether the language ability is unique to humans, whether there is a critical period to the acquisition of a language, the nature of conceptual knowledge, how people perform deductive reasoning and induction, and how linguistic and conceptual knowledge interact.
Taught by: Trueswell
One term course offered either term
Prerequisites: PSYC 001, COGS 001, LING 105, or PSYC 207
Activity: Lecture
1 Course Unit

PSYC 160 Personality and Individual Differences
This course provides an introduction to the psychology of personality and individual differences. Many psychology courses focus on the mind or brain; in contrast to those approaches of studying people in general, the focus in this course is on the question “How are people different from each other?” It will highlight research that take a multidimensional approach to individual differences and attempts to integrate across the biological, cognitive-experimental, and social-cultural influences on personality.
One term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 162 Abnormal Psychology
The concepts of normality, abnormality, and psychopathology; symptom syndromes, theory and research in psychopathology and psychotherapy.
Taught by: Ruscio
One term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 170 Social Psychology
An overview of theories and research across the range of social behavior from intra-individual to the group level including the effects of culture, social environment, and groups on social interaction.
For BA Students: Society Sector
One term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 181 Intro to Developmental Psychology
The goal of this course is to introduce both Psychology majors and non-majors majors to the field of Developmental Psychology. Developmental Psychology is a diverse field that studies the changes that occur with age and experience and how we can explain these changes. The field encompasses changes in physical growth, perceptual systems, cognitive systems, social interactions and much more. We will study the development of perception, cognition, language, academic achievement, emotion regulation, personality, moral reasoning, and attachment. We will review theories of development and ask how these theories explain experimental findings. While the focus is on human development, when relevant, research with animals will be used as a basis for comparison.
Taught by: Brannon
One term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit
PSYC 207 Introduction to Cognitive Science
Cognitive Science is founded on the realization that many problems in the analysis of human and artificial intelligence require an interdisciplinary approach. The course is intended to introduce undergraduates from many areas to the problems and characteristic concepts of Cognitive Science, drawing on formal and empirical approaches from the parent disciplines of computer science, linguistics, neuroscience, philosophy and psychology. The topics covered include Perception, Action, Learning, Language, Knowledge Representation, and Inference, and the relations and interactions between such modules. The course shows how the different views from the parent disciplines interact, and identifies some common themes among the theories that have been proposed. The course pays particular attention to the distinctive role of computation in such theories, and provides an introduction to some of the main directions of current research in the field. It is a requirement for the BA in Cognitive Science, the BAS in Computer and Cognitive Science, and the minor in Cognitive Science, and it is recommended for students taking the dual degree in Computer and Cognitive Science.
Taught by: Brainard/Ungar
One term course offered either term
Also Offered As: CIS 140, COGS 001, LING 105, PHIL 044
Prerequisites: An Introductory Course in Computer Science, Linguistics, Neuroscience, Philosophy, or PSYC 001
Activity: Lecture
1 Course Unit

PSYC 217 Visual Neuroscience
An introduction to the scientific study of vision, with an emphasis on the biological substrate and its relation to behavior. Topics will typically include physiological optics, transduction of light, visual thresholds, color vision, anatomy and physiology of the visual pathways, and the cognitive neuroscience of vision.
Taught by: Stocker
Course usually offered in spring term
Also Offered As: BIBB 217, VLST 217
Prerequisite: PSYC 109
Activity: Lecture
1 Course Unit

PSYC 225 Drugs, Brain, and Mind
The course will begin with a review of basic concepts in pharmacology: routes of drug administration, drug metabolism, the dose response curve, tolerance, and sensitization. Following a brief overview of cellular foundations of neuropharmacology (cell biology, synaptic and receptor function), the course will focus on various classes of drugs used to treat neuropsychiatric disorders including, among others, depression, schizophrenia, and anxiety. We will additionally consider mechanisms mediating the mind-altering, addictive and neurotoxic effects of abused drugs.
Taught by: Kane
Course usually offered in spring term
Also Offered As: BIBB 270
Prerequisite: PSYC 109 or BIBB 109
Activity: Lecture
1 Course Unit

PSYC 231 Evolution of Behavior: Animal Behavior
The evolution of social behavior in animals, with special emphasis on group formation, cooperation among kin, mating systems, territoriality and communication.
One term course offered either term
Also Offered As: BIBB 231, BIOL 231
Prerequisite: PSYC 001 or BIOL 102 or COGS 001
Activity: Lecture
1 Course Unit

PSYC 235 Psychology of Language
This course describes the nature of human language, how it is used to speak and comprehend, and how it is learned. The course raises and discusses issues such as whether language ability is innate and unique to humans, whether there is a critical period for the acquisition of a language, and how linguistic and conceptual knowledge interact.
Taught by: Dahan
One term course offered either term
Prerequisite: PSYC 151 or LING 001
Activity: Lecture
1 Course Unit

PSYC 239 Neuroendocrinology
This course is designed to examine the various roles played by the nervous and endocrine systems in controlling both physiological processes and behavior. First, the course will build a foundation in the concepts of neural and endocrine system function. Then we will discuss how these mechanisms form the biological underpinnings of various behaviors and their relevant physiological correlates.
Taught by: Flanagan-Cato
One term course offered either term
Also Offered As: BIBB 260
Prerequisite: PSYC 109
Activity: Lecture
1 Course Unit

PSYC 247 Neuroscience and Society
Cognitive, social, and affective neuroscience have made tremendous progress in the last two decades. As this progress continues, neuroscience is becoming increasingly relevant to all of the real-world endeavors that require understanding, predicting and changing human behavior. In this course we will examine the ways in which neuroscience is being applied in law, criminal justice, national defense, education, economics, business, and other sectors of society. For each application area we will briefly review those aspects of neuroscience that are most relevant, and then study the application in more detail.
Taught by: Gerstein
One term course offered either term
Also Offered As: BIBB 247, PSYC 549
Prerequisite: PSYC 109 or PSYC 149
Activity: Lecture
1 Course Unit

PSYC 253 Judgment and Decisions
Thinking, judgment, and personal and societal decision making, with emphasis on fallacies and biases.
One term course offered either term
Also Offered As: PPE 153
Prerequisite: One semester of statistics or microeconomics
Activity: Lecture
1 Course Unit
PSYC 265 Behavioral Economics and Psychology
This course will introduce you to the study of choice, and will examine in detail what we know about how people make choices, and how we can influence these choices. It will utilize insights from psychology and economics, and will apply these insights to domains including consumer choice, risky decision making, and prosocial decision making.
Taught by: Bhattacharya
One-term course offered either term
Also Offered As: PPE 313
Prerequisites: Microeconomics and PSYC 001
Activity: Lecture
1 Course Unit

PSYC 266 Introduction to Positive Psychology
An introduction to the study of positive emotions, positive character traits, and positive institutions. The positive emotions consist of emotions about the past (e.g., serenity, satisfaction, pride), about the future (e.g., hope, optimism, faith), and emotions about the present (pleasure and gratification). The distinction among the pleasant life, the good life, and the meaningful life is drawn. The positive traits include wisdom, courage, humanity, justice, temperance, and spirituality, and the classification of these virtues is explored. The positive institutions are exemplified by extended families, free press, humane leadership, and representative government.
Course usually offered in spring term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 272 Evolutionary Psychology
This course introduces the field of evolutionary psychology, which is an approach to the study of human behavior. We will consider the theoretical underpinnings of the field, including evolutionary theory, development, kinship, and adaptations for social life, and will sample some of the recent empirical contributions to this growing area.
Taught by: Kurzban
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 275 Introduction to Political Psychology
This course will explore psychological approaches to understanding political beliefs, attitudes, and actions at the levels of both individual citizens and national leaders. It will also explore the possibility that psychological science itself is not immune to the political debates swirling around it. Specific topics will include: the workings of belief systems (and their power to shape what we “see”), cognitive biases (and their power to cause miscalculations), sacred values and their role in stabilizing belief systems and social interaction, personality and ideology (the linkages between the personal and the political), and clashing conceptions of morality and distributive and corrective justice (striking variations among people in what they consider to be fair). We shall also explore some topics that have sparked controversy in the psychological research literature and that tend to polarize opinion along political lines, including work on intelligence and unconscious bias.
Taught by: Tetlock
One-term course offered either term
Also Offered As: PPE 275
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit
Notes: NOTE: Students who are more interested in business-related issues may want Wharton 276X which is a modified version of this course specifically for Wharton undergraduates.

PSYC 280 Developmental Psychology: Social and Emotional Development
This course will cover theory and research related to the development of attachment, emotional regulation, peer and intimate relationships, personality, moral reasoning, and emotional and behavioral disorders. The course will emphasize the degree to which family, peer, and community contexts influence development from infancy into adulthood. Efforts will be made to integrate biological and environmental accounts of development across the lifespan.
One-term course offered either term
Prerequisite: PSYC 001
Activity: Lecture
1 Course Unit

PSYC 281 Cognitive Development
What infants and young children come to know about the world, and how they learn it. Topics will include changes in children’s thinking, perceptual development, language acquisition, and current theories of cognitive development.
Taught by: Swingley
One-term course offered either term
Prerequisite: PSYC 001 or COGS 001
Activity: Lecture
1 Course Unit

PSYC 311 Research Experience in Perception
In this research course, students will begin by first replicating earlier experiments to measure human visual memory capacity. After several class discussions to discuss ideas, each student will design and conduct their own experiment to further investigate visual and/or familiarity memory.
Taught by: Rust
One-term course offered either term
Also Offered As: VLST 212
Prerequisites: One semester of statistics, and one of the following: PSYC 111, 149, 151, 217, or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Dept permission required. Undergraduates only.
PSYC 351 Research Experience in Cognitive Psychology
Students will work in small groups to develop, empirically test, and report on a research question in the field of cognitive psychology. Through this process, students will learn how to conduct and report a psychological study, including the appropriate statistical tests. Class discussions will help students craft their projects, and in-class presentations will provide the opportunity to develop and refine presentation skills. Psychology majors only. Class size is limited to 16 students.
Taught by: Weisberg
One-term course offered either term
Prerequisites: One semester of statistics.
Activity: Seminar
1 Course Unit
Notes: Dept permission required. Psych majors only.

PSYC 362 Research Experience in Abnormal Psychology
PSYC 362-301 is a two-semester course starting in the Fall. Class size limited to 8 students.
Taught by: Dr. Melissa Hunt
Prerequisites: PSYC 162 and one semester of statistics. Psych majors only. Instructor permission required.
Activity: Seminar
1 Course Unit
Notes: PSYC 362-301 is a two-semester course starting in the Fall.

PSYC 370 Research Experience in Social Psychology
In this course students will work in small groups to develop, empirically test, and report on a research question within one of the domains of social psychology. Depending on the nature of the project, students will employ survey/experimental, or observational research methodology, and learn how to conduct and report the appropriate statistical tests with Excel and/or SPSS (typically, correlations, t-tests, ANOVA and ANCOVA, multiple regression, factor analysis, and measures of reliability). Class discussions will help students craft their projects, and in-class presentations will provide the opportunity to develop and refine presentation skills. Psychology majors only. Class size is limited to 12 students.
Taught by: Royzman
Prerequisites: PSYC 170 AND one semester of statistics.
Activity: Seminar
1 Course Unit
Notes: Dept permission required. Psychology majors only.

PSYC 380 Research Exp Develop Psy
Activity: Seminar
1 Course Unit

PSYC 399 Individual Empirical Research
Individual research involving data collection. Students do independent empirical work under the supervision of a faculty member, leading to a written paper. Normally taken in the junior or senior year.
One-term course offered either term
Activity: Independent Study
1 Course Unit
Notes: Dept permission required

PSYC 400 Senior Honors Seminar in Psychology
Open to senior honors candidates in psychology. A two-semester sequence supporting the preparation of an honors thesis in psychology. Students will present their work in progress and develop skills in written and oral communication of scientific ideas.
Taught by: Thompson-Schill
Prerequisite: acceptance into the Honors Program in Psychology
Activity: Seminar
0.5 Course Units
Notes: Dept permission required

PSYC 407 Behavioral Genetics
This course will cover basic principles of human and animal behavior genetics, including the genetics of normal variation as well as extreme phenotypes represented by behavioral, psychiatric and neurologic disorders. The course will focus on methods necessary to critically evaluate research findings on normal and abnormal human behavior. Animal models will also be reviewed.
Taught by: Price
One-term course offered either term
Also Offered As: BIBB 451
Prerequisite: Basic statistics or permission of instructor
Activity: Seminar
1 Course Unit

PSYC 421 Neurobiology of Learning and Memory
This advanced course focuses on the current state of our knowledge about neurobiological basis of learning and memory. Students will explore the molecular and cellular basis of learning invertebrates and vertebrates from a behavioral and neural perspective.
Taught by: Gerstein
One-term course offered either term
Also Offered As: BIBB 442, BIOL 442, NGG 575
Activity: Seminar
1 Course Unit

PSYC 429 Big Data, Memory, and the Human Brain
Advances in brain recording methods over the last decade have generated vastly more brain data than had been collected by neuroscientists during the previous century. To understand the human brain, scientists must now use computational methods that exploit the power of these huge data sets. This course will introduce you to the use of big data analytics in the study of human memory and its neural basis. Through hands-on programming projects, we will analyze multi-terabyte data sets both to replicate existing phenomena and to make new discoveries. Although the course has no formal neuroscience or psychology prerequisites it does require CISI 21 and Python experience. Because of the heavy computing resources required to perform the assignments enrollment is limited to 15 students and there is a required course application. http://psychology.sas.upenn.edu/undergraduate/forms
Taught by: Kahana
Also Offered As: BIBB 429
Prerequisite: CISI 21 & Python experience
Activity: Seminar
1 Course Unit
Notes: Instructor permission required. Application form can be found here: http://psychology.sas.upenn.edu/undergraduate/forms
PSYC 431 Seminar in Animal Cognition
The aim of this course will be to provide advanced undergraduates with a detailed review of a number of research areas in behavioral ecology.
One-term course offered either term
Also Offered As: BIBB 432, BIOL 432
Prerequisite: PSYC 231/Biol 231/ BIBB 231
Activity: Seminar
1 Course Unit

PSYC 435 Psycholinguistics
Taught by: Dahan
Prerequisites: PSYC 151, or PSYC 235, or LING 001, or permission of instructor.
Activity: Seminar
1 Course Unit

PSYC 439 Neuroendocrinology Seminar
This course is designed to examine the various roles played by the nervous and endocrine systems in controlling both physiological processes and behavior. First, the course will build a foundation in the concepts of neural and endocrine system function. Then, we will discuss how these mechanisms form the biological underpinnings of various behaviors and their relevant physiological correlates. We will focus on sexual and parental behaviors, stress, metabolism, neuroendocrine-immune interactions, and mental health. Taught by: Flanagan-Cato
One-term course offered either term
Also Offered As: BIBB 460
Prerequisite: PSYC 109
Activity: Seminar
1 Course Unit

PSYC 440 Sleep and Sleep Disorder
Activity: Lecture
1 Course Unit

PSYC 447 Seminar in Neuroscience
Neurology
Taught by: Gottfried
One-term course offered either term
Prerequisite: PSYC 109
Activity: Seminar
1 Course Unit
Notes: Undergraduates only.

PSYC 449 Seminar in Cognitive Neuroscience
Topics vary each semester. PSYC 449 (Gerstein) Neuroscience for Policymakers: This seminar will provide an overview of the neuroscience behind some of the most relevant issues in public health policy today. We will examine the primary scientific literature as well as delve into lay articles about the science and policy surrounding each issue. /PSYC 449 (Epstein) Consciousness: Consciousness is our subjective experience of the world, including both perceptions and felt internal states. In this seminar, we will explore the burgeoning scientific literature on the neural basis of consciousness. We will focus in particular on three topics: What are the neural systems underlying visual awareness? What are the mechanisms that control the progression of conscious contents to create our stream of thought? What is the relationship between consciousness and behavior? /PSYC 449 (Jenkins) The Social Brain: This seminar examines the cognitive and neural mechanisms that enable humans to predict and understand people's behavior. We will be propelled throughout the course by fundamental questions about the human social brain. For example, why are humans so social? Does the human brain have specialized processes for social thought? Consideration of these questions will involve advanced treatment of a range of topics.
Prerequisite: PSYC 149
Activity: Seminar
1 Course Unit
Notes: PSYC 449-601 is an LPS course, PSYC 449-301, -302 and -303 are Psych Dept. courses.

PSYC 453 Seminar in Decision Making: Judgment and Decisions
This seminar will be a series of engaging discussions on a variety of topics that are important to the field of behavioral decision theory. We'll cover issues such as constructed preferences, loss aversion, nudging, emotions, well-being, other-oriented decisions, intuitive predictions, unethical choices, and more. Students will be asked to present papers and generate ideas for potential research projects each week. Grades will be based on class contributions and a paper that is either a literature review or a careful and detailed proposal for a research project.
Taught by: Mellers
One-term course offered either term
Prerequisite: PSYC 253 or PSYC 265
Activity: Seminar
1 Course Unit
Notes: Undergraduates only.

PSYC 460 Body Image: Etiology, Psychopathology and Treatment
Course not offered every year
Activity: Seminar
1 Course Unit

PSYC 462 Seminar in Abnormal Psychology
Topics vary each semester.
Prerequisite: PSYC 162
Activity: Seminar
1 Course Unit
Notes: Undergraduates only. 462-601 is an LPS course.

PSYC 470 Seminar in Social Psychology
Topics vary each semester.
One-term course offered either term
Prerequisite: PSYC 170
Activity: Seminar
1 Course Unit
Notes: Undergraduates only.
PSYC 472 Behavioral Biology of Women
A course that explores female behavior focusing on evolutionary, physiological, and biosocial aspects of women’s lives from puberty through reproductive processes such as pregnancy, birth, lactation to menopause and old age. Examples are drawn from traditional and modern societies and data from nonhuman primates are also considered.
Taught by: Apicella
One term course offered either term
Prerequisites: PSYC 272 or permission of instructor.
Activity: Seminar
1 Course Unit

PSYC 473 Neuroeconomics
This course will review recent research that combines psychological, economic and neuroscientific approaches to study human and animal decision-making. A particular focus will be on how evidence about the neural processes associated with choices might be used to constrain economic and psychological theories of decision-making. Topics covered will include decisions involving risk and uncertainty, reinforcement learning, strategic interactions, and games, and social preferences.
Taught by: Kable
One term course offered either term
Also Offered As: BIBB 473, NGG 706
Prerequisites: PSYC 149, 253, or 265
Activity: Seminar
1 Course Unit

PSYC 474 PSYC 474-301: Being Human; PSYC 474-601: Cultural Psychology
Taught by: Platt (PSYC 474-301); Abiola (PSYC 474-601)
Prerequisite: PSYC 001
Activity: Seminar
1 Course Unit
Notes: Undergraduates only, PSYC 474-601 is an LPS course.

PSYC 477 Seminar in Political Psychology: Terrorism, Radicalization, Martyrdom and Revolution
Seminar will focus on rare events that change history: terrorism, revolution, and martyrdom (not to be confused with suicide bombing). Applying theory and research from social psychology, evolutionary psychology and behavioral economics we will try to understand these phenomena from the inside out: from individual psychology of terrorists, revolutionaries and martyrs to mass psychology of large publics moved by these individuals.
Taught by: Moskalenko
One term course offered either term
Prerequisite: PSYC 170
Activity: Seminar
1 Course Unit
Notes: Undergraduates only.

PSYC 478 CAPSTONE: SOCIAL PSYCHOLOGY
Though almost half a century old, Milgram’s 1961-1962 studies of “destructive obedience” continue to puzzle, fascinate, and alarm. In this seminar, we will take an in-depth look at these famous studies (along with the more recent replications) and explore their various psychological, historical, and philosophical ramifications. This course has a number of intellectual goals that go beyond simply clarifying one’s understanding of a particular content area (important and generative as it may be). One such a goal is to enable you to think critically (though not disparagingly) about other people’s research and theoretical claims that ensue from it, all with the hope that you can then apply the self-same critical acumen to your own future work. Second, this course will offer a hospitable environment for developing (and exchanging) creative ideas of your own. Your work on your individual reaction papers and on the term paper in particular will be a key element in achieving this goal.
Taught by: Boyzman
Also Offered As: PPE 477
Prerequisite: PSYC 170
Activity: Seminar
1 Course Unit

PSYC 480 Seminar in Developmental Psychology
PSYC 480-301 (Brannon): The field of educational neuroscience is an emerging field with the goal of joining knowledge gained from the disciplines of neuroscience, cognitive science, developmental psychology, and education. This interdisciplinary course will focus on how scientific exploration of the mind and brain can inform educational practices. PSYC 480-302 (Connolly): This advanced discussion-based seminar will focus on approaches to success in domains of modern life such as social living and academia. The first portion of this seminar will be a psychology book club where we read various books written by psychology researchers. This will contribute to an ongoing discussion about scientific communication, and the presentation of psychological research to various audiences. From there, students will focus on a specific area of interest, and write a literature review based on contemporary empirical research critiquing their given topic. Students must understand the workload for this seminar requires intensive reading culminating in a large written assignment.
Taught by: Weisberg, Brannon, or Connolly
Prerequisite: PSYC 001
Activity: Seminar
1 Course Unit
Notes: Undergraduates only.
PSY 482 Inside the Criminal Mind
This seminar explores the development of antisocial behavior including psychopathy, aggression, and violence. At its core, this course examines what increases the risk that children will develop behavior problems and go onto more chronic and extreme forms of violence and psychopathic personality that results in harm to others. We will examine psychiatric diagnoses associated with these antisocial behaviors in both childhood and adulthood and how they link to other relevant forms of psychopathology (e.g., substance use, ADHD). We will explore research elucidating the neural correlates of these behaviors, potential genetic mechanisms underlying these behaviors, and the environments that increase risk for these behaviors. Thus, there will be a focus on neurobiology and genetics approaches to psychiatric outcomes, as well as a social science approach to understanding these harmful behaviors, all while considering development across time. We will also consider ethical and moral implications of this research.
Taught by: Waller
Prerequisites: PSYC 162 and PSYC 181
Activity: Seminar
1 Course Unit
Notes: Undergraduates only.

PSYC 492 Social Cognition
Activity: Seminar
1 Course Unit

PSYC 511 Visual Tasks, Models, Processing, Receptors & Stimuli
Activity: Lecture
1 Course Unit

PSYC 521 Judgment & Decisions
Activity: Seminar
1 Course Unit

PSYC 525 Controversies in Psychology and Neuroscience
In this seminar, we will discuss several recent controversies in psychology and neuroscience, for example: "p-hacking" replicability, methodological terrorists, neural activity in dead salmon and failures to control the false positive rate in neuroimaging, "voodoo correlations" and double dipping, whether Tic-Tacs can improve self-control and whether reading "old" makes you walk slower. Our goal is not just to engender ennui and/or schadenfreude, but also to ask what we can learn from these discussions about how to do science in the most rigorous, reproducible manner possible.
Activity: Seminar
1 Course Unit

PSYC 539 Theoretical and Computational Neuroscience
This course will develop theoretical and computational approaches to structural and functional organization in the brain. The course will cover: (i) the basic biophysics of neural responses, (ii) neural coding and decoding with an emphasis on sensory systems, (iii) approaches to the study of networks of neurons, (iv) models of adaptation, learning and memory, (v) models of decision making, and (vi) ideas that address why the brain is organized the way it is. The course will be appropriate for advanced undergraduates and beginning graduate students. A knowledge of multi-variable calculus, linear algebra and differential equations is required (except by permission of the instructor). Prior exposure to neuroscience and/or Matlab programming will be helpful.
Taught by: Balasubramanian
Course not offered every year
Also Offered As: BIBB 585, NGG 594, PHYS 585
Activity: Lecture
1 Course Unit

PSYC 547 Foundations of Social, Cognitive, and Affective Neuroscience
Activity: Lecture
1 Course Unit

PSYC 549 Neuroscience and Society
Also Offered As: PSYC 247
Activity: Lecture
1 Course Unit

PSYC 557 Neuroscience, Ethics & Law
How does the neuroscience of human decision-making and emotion impact our understanding of ethics and law? What can neuroscience tell us about why people find actions moral or immoral, worthy of praise or punishment? What, if anything, can it tell us normatively about morality, agency and responsibility? And what other insights might neuroscience offer regarding other morally and legally relevant phenomena such as stereotyping and bias, the causes of antisocial behavior and the detection of deception?
Activity: Seminar
1 Course Unit

PSYC 579 Exp Methods Perception
Activity: Lecture
1 Course Unit

PSYC 600 Proseminar in General Psychology
Choice of half or full course units each sem. covering a range of subjects and approaches in academic psychology.
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Dept permission required

PSYC 609 Systems and Integrative Neuroscience
Course usually offered in fall term
Also Offered As: NGG 573
Activity Lecture
1 Course Unit
Notes: Fulfills the Brain requirement

PSYC 611 Statistics for Psychologists
Course usually offered in fall term
Also Offered As: BSTA 550, STAT 500
Activity: Lecture
1 Course Unit

PSYC 612 Introduction to Nonparametric Methods and Log-linear Models
Course usually offered in spring term
Also Offered As: STAT 501
Activity: Lecture
1 Course Unit

2018-19 Catalog | Generated 02/28/19
PSYC 671 Violence: A Clinical Neuroscience Approach
Developed for both Psychology and Criminology graduate students, this interdisciplinary course outlines a clinical neuroscience approach to understanding violence in which the tools of neuroscience-neuroanatomy, neurophysiology, neurocognition, neuroendocrinology, neuropharmacology, molecular and behavioral genetics-are used to help inform the etiology and treatment of violence. Clinical components include psychopathy, proactive and reactive aggression, homicide, domestic violence, conduct disorder, oppositional defiant disorder, antisocial personality disorder, crime, and delinquency as well as their comorbid conditions (schizophrenia, drug abuse, hyperactivity). The interaction between social, psychological, and neurological processes in predisposing to violence will be highlighted, together with neurodevelopmental perspectives on violence focusing on prospective longitudinal and brain imaging research. Key implications for the criminal justice system, neuroethics, forensics psychology, and intervention will also be outlined.
Taught by: Raine
Course usually offered in fall term
Also Offered As: CRIM 671
Activity: Lecture
1 Course Unit
Notes: Graduate students only.

PSYC 698 Laboratory Rotation.
Lab rotation for psychology grad students.
One-term course offered either term
Activity: Lecture
3 Course Units
Notes: Dept permission required. Open only to psychology dept graduate students.

PSYC 699 Individual Research for First-Year Graduate Students
Two terms. Student must enter first term.
Activity: Independent Study
3 Course Units

PSYC 703 Special Topics in Psychology
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 704 Research Methods and Statistical Procedures for Social and Clinical Sciences
This course has three primary objectives: 1) developing criteria and strategies for strong inference of causal relationships in social and clinical psychology research; 2) examining the array of research designs employed in the social/clinical sciences together with the threats to internal and external validity associated with each; 3) learning and applying statistical analytical methods appropriate for questions in the social/clinical sciences. The course will employ a seminar format and a project-oriented approach to learning. Students will be encouraged to utilize examples from their own research programs in applying the design and analysis concepts covered in the course.
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 705 Neuroethics
Neuroscience is increasingly affecting all aspects of human life, from the relatively familiar medical applications in neurology and psychiatry, to new applications in education, business, law, and the military. Today's neuroscience graduate students will be among the scientists, citizens, and policymakers who will lead society through the maze of decisions regarding the appropriate uses of neuroscience. This course provides a survey of the key ethical, legal, and social issues at the intersection of neuroscience and society. It will include a combination of traditional classroom lectures, discussions, and debates, as well as an online component coordinated with a course at Wisconsin's Neuroscience and Public Policy graduate program.
Taught by: Farah
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Dept permission required.

PSYC 709 Special Topics in Clinical Psychology
In this seminar we will survey substantive, methodological and statistical issues that arise in the planning, conduct, and interpretation of empirical inquiries about the effects of psychotherapies. Challenges presented in efforts to disseminate evidence-based clinical practices will also be addressed.
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Graduate students only.

PSYC 711 Basic Problems in Developmental II
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 712 Regression & Anova II
One-term course offered either term
Activity: Seminar
1 Course Unit

PSYC 745 Special Topics in Cognitive Neuroscience
One-term course offered either term
Also Offered As: NGG 583
Activity: Seminar
1 Course Unit

PSYC 810 Psychodiagnostic Testing
Course usually offered in fall term
Activity: Seminar
1 Course Unit

PSYC 811 Psychodiagnostic Interviewing
Course usually offered in fall term
Activity: Seminar
1 Course Unit

PSYC 815 Introductory Practicum
Course usually offered in spring term
Activity: Seminar
1 Course Unit

PSYC 820 Advanced Practicum
Intensive studies of single individuals including interviews, tests, and experiments; also clinical experience at appropriate community agencies.
One-term course offered either term
Activity: Seminar
1 Course Unit
PSYC 999 Individual Study and Research
One-term course offered either term
Activity: Independent Study
0.5 Course Units

Public Health Studies (PUBH)

PUBH 500 Foundations of Public Health
This course will provide a topical overview of the inter-disciplinary field of public health and provides grounding in the public health paradigm. Through a series of lectures and recitation sessions, students will learn about the history of public health and the core public health sciences including behavioral and social sciences, biostatistics, epidemiology, environmental health, and policy and management. Other topics include ethics in public health, context analyses (specifically sociographic mapping and urban health), community participation in research, public health promotion, and the prevention of chronic and infectious diseases.
Course usually offered in fall term
Also Offered As: NURS 570
Activity: Lecture
1 Course Unit

PUBH 501 Introduction to Biostatistics
Introduction to Biostatistics This course is designed to provide a broad overview of biostatistics methods as well as applications commonly used for public health research. Topics covered include measurement and categorizing variables, use and misuse of descriptive statistics, testing hypotheses, and applying commonly used statistical tests. An emphasis will be placed on the practical application of data to address public health issues, rather than theoretical and mathematical development. Students will learn how to choose and apply statistical tools to data sources, when and how statistical tools can be used to analyze data, and how to interpret others' quantitative studies. Students will gain experience using online datasets and the STATA statistical software package.
Taught by: Shofe, Hanlon
One-term course offered either term
Activity: Lecture
1 Course Unit

PUBH 502 Introduction to the Principles and Methods of Epidemiology
This course will provide an introduction to the principles and methods of epidemiology as a research science. The course introduces the student designs applied to human populations, including randomized trials and observational studies (cohort, case-control, cross-sectional, ecological). Homework and in-class assignments focus on building skills in locating, assessing, and synthesizing evidence from the epidemiologic literature, with an emphasis on critical thinking, causal inference, and understanding bias and confounding.
Taught by: Smith, Nunuzzo
One-term course offered either term
Also Offered As: NURS 500
Activity: Lecture
1 Course Unit

PUBH 503 Environmental and Occupational Health
This course will provide a broad introduction to the scientific basis of occupational and environmental health. Content will address issues in the ambient, occupational and global environments as well as the tools, concepts and methods used in environmental health.
Taught by: Howarth, Pepino, Klinger, Ketcher
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PUBH 504 Public Health Theories & Frameworks
This course provides students with a solid foundation in behavioral and social science theory, research, and interventions as they pertain to public health. Content will provide exposure to a broad range of theories, including the theoretical foundations of social science applications for help-seeking, gender, race, ethnicity and social class. These theories will be discussed using examples of their applications to numerous public health problems including HIV/AIDS, violence, cancer, cardiovascular diseases, obesity, and diabetes.
Taught by: Ruggieri, Fleisher
One-term course offered either term
Activity: Lecture
1 Course Unit

PUBH 505 Public Health Policy and Administration
This course is an introduction to health policy and management. It examines both the historical and current state of health policy in America and integrates these concepts within the context of public health practice. We will examine key concepts in understanding US health care organization, financing and delivery, our current political and economic debate on health care reform, examining the role and management issues of public health departments, and case studies in public health policy and management.
Taught by: Noonan, Klusaritz
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PUBH 506 Methods for Public Health Practice
This is a course designed around modules whose objective is to provide students with greater familiarity in a range of methods essential to public health practice. The course will be framed around an in-depth capacity and needs assessment and community public health planning in Philadelphia. Topics covered will include data collection and evaluation, both quantitative and qualitative, uses of informatics in public health, analysis of vital statistics, working with communities, methods for developing and facilitating solutions to public health problems, including concepts of advocacy and policy formation and development of interventions. The course demonstrates how core public health competency areas in data analysis and communication provide foundations for applications for both practice and practice-based research.
Taught by: Solomon, Hall, Leary
One-term course offered either term
Activity: Lecture
1 Course Unit

PUBH 507 Public Health Law & Ethics
What is best - or, at least, seems best – for the public's health is not always consistent with society's view of what is legal, ethical, or good policy. This course introduces key concepts of legal, ethical, and policy analysis and attempts to demonstrate with current examples how these forces empower, guide, and constrain public health decision-making and actions. The course will combine lecture, Socratic dialogue, and group discussion in an informal setting. The course will feature guest lectures by several distinguished experts from Penn and from other universities.
Taught by: Anderson
Course usually offered in fall term
Activity: Lecture
1 Course Unit
PUBH 508 Capstone Seminar I
The Capstone is a culminating experience required for graduation in the Master of Public Health Program. In two Capstone seminars, students will have an opportunity to synthesize the knowledge and public health competencies they have developed through their coursework. Capstone students will apply their knowledge and skills to public health problems in a chosen area of interest. They will engage their peers in scholarly discussion, drawing from relevant scientific literature and public health experience in order to begin to develop a common grounding and identity as public health professionals. The Capstone incorporates two semester-long seminars and a research project. Over the course of the Capstone, students will develop, propose, revise, implement, and present their projects. As their projects successfully come to fruition, they will also advise their junior colleagues still in the proposal stage.
Taught by: Frasso, Anderson, Levy, Grasso
Two terms, student may enter either term.
Activity: Lecture
1 Course Unit

PUBH 514 Experiential Learning in Environmental and Occupational Health
Activity: Lecture
1 Course Unit

PUBH 517 Geography and Health
This course will provide an introduction to GIS in public health research and practice. Through a series of lectures and labs, students will explore theories linking health and the environment, spatial analysis and spatial epidemiology, and applications of GIS-related data collection and analysis.
Taught by: Wiebe
Course usually offered in fall term
Also Offered As: EPID 518
Activity: Lecture
1 Course Unit

PUBH 519 Issues in Global Health
This course presents an overview of issues in global health from the viewpoint of many different disciplines, with emphasis on economically less developed countries. Subjects include: millennium goals; measures of disease burden; population projections and control; environmental health and safe water; demography of disease and mortality; zoonotic infectious diseases; AIDS and HIV prevention; vaccine utilization and impact; eradication of polio virus; chronic diseases; tobacco-associated disease and its control; nutritional challenges; social determinants of global health; harm reduction and behavioral modifications; women’s reproductive rights; health economics and cost-effective interventions; health manpower and capacity development; bioethical issues in a global context.
Taught by: McLaughlin
Course usually offered in fall term
Prerequisites: Undergraduates must have completed HSOC-010-401.
Activity: Lecture
1 Course Unit

PUBH 521 Program Evaluation in Public Health
There are many public health programs developed to promote change. The question most funders have for public health programs is: what outcomes do you expect? This course is designed to review the principles of identifying short term, mid term and long term outcomes and methods of measurement. Students learn about the application of data collection skills to all phases of developing a public health program or service innovation, from needs assessment to analysis of finding their implementation of changes based on results. Students learn to appreciate how these skills can be used as practical tools for identifying public health problems, program development, program implementation and including a reflective practice approach, ensuring equity and fairness in program delivery (i.e. combating disparities) and generally promoting public health through effective and efficient programmatic efforts.
Taught by: Karpyn
Course offered spring; odd-numbered years
Activity: Lecture
1 Course Unit

PUBH 525 Developing Effective Public Health Programs Using a Human Rights Based Approach
This course will engage students in discussion of how a human rights approach, informed by international human rights declarations and covenants as well as gender theory, can more comprehensively inform the development of a variety of public health programs. Specifically, the class will discuss how health policies, programs and practices can impact on human rights (e.g. mandatory reporting of certain communicable diseases, quarantine, accessibility of services, etc.); how violations of human rights affect health (e.g. torture, discrimination, etc.) and how health and human rights are ultimately inextricably linked and programming for public health must use a framework that ensures a balance of interests between the two disciplines.
Taught by: Voet
Course usually offered summer term only
Activity: Lecture
1 Course Unit

PUBH 526 Anthropology and Public Health
Taught by: Barg
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: In this course, we examine three types of relationships between anthropology and public health. Anthropology and public health will examine complementary and competing concepts fundamental to each discipline and ways that these concepts make it essential and difficult for the disciplines to work together. Anthropology in public health takes a critical look at assumptions in public health praxis. Anthropology in public health will focus on ways that anthropology theory and methods inform the practice of public health. Using these three approaches, we will examine topics in public health such as mental health, health promotion/disease prevention communication, cancer disparities, reproductive health, violence and infectious disease. Students will learn and apply anthropologic research methods to these problems.
PUBH 527 Media, Advocacy and Public Health
This course will examine the ways in which the media can be used as a tool to improve health. It will also investigate the ways in which the media has had an negative impact on health behaviors in the population. Looking at specific topics like tobacco, food and nutrition, and HIV/AIDS, we will explore the intersection of media, advocacy, advertising and entertainment and the impact of media broadly on health behavior and society. The course will also provide students the opportunity to practice strategically working with the media to address health problems.
Taught by: TBA
Course not offered every year
Activity: Seminar
1 Course Unit

PUBH 528 Class, Inequality and Health: Ethnographic Perspectives
Taught by: Bourgois
Course usually offered in spring term
Also Offered As: ANTH 623
Activity: Seminar
1 Course Unit
Notes: This seminar examines anthropological approaches to the concept of class and social inequality through a close reading of a dozen ethnographies that deal with a broad definition of health, illness, and social suffering. Readings span many of the theoretical, political, sub-disciplinary and area studies debates in anthropology and the larger fields of poverty, social inequality, international development, violence studies, science studies, governmentality, and social policy interventions over the past century.

PUBH 529 Topics in Family Planning
This course will survey a range of key current and historic topics in family planning nationally and internationally. Policy, epidemiology, clinical practice, advocacy, and service delivery topics will be covered through presentations and conversations with leaders in the field of reproductive health. The course will provide students with a broad general introduction to family planning which is appropriate for those interested in either public health or clinical aspects of the field. For students who wish to pursue a focused career in this area this course is a necessary introduction, while students who will be working in related areas of public health will have a broad general understanding of family planning. Students will participate through an interactive seminar style and will prepare an oral presentation on a relevant topic of their choice.
Taught by: Bennett, Schreiber
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PUBH 530 Environmental Toxicology: Risk Assessment and Health Effects
This course presents general principles of toxicology and the disposition of toxins in the body. Case studies of the effects of environmental and occupational toxins on individuals will be analyzed. This course is designed for students who desire a strong foundation in toxicological concepts and principals and provides an overview of major toxins in our environment and their association with human health.
Taught by: Liu
Course usually offered in fall term
Also Offered As: NURS 677
Activity: Lecture
1 Course Unit
Notes: Undergrads need Permission

PUBH 531 Public Health Nutrition
Activity: Lecture
1 Course Unit

PUBH 535 Urban Poverty and Violence
Taught by: Bourgois
Course not offered every year
Also Offered As: ANTH 625
Activity: Seminar
1 Course Unit
Notes: This seminar examines anthropological approaches to poverty and violence through a close reading of eight ethnographies. Readings span many of the theoretical, political, sub-disciplinary and area studies debates in anthropology and the larger fields of poverty, social inequality, international development, and violence studies over the past century. My hope is to bring the subjects of urban poverty, violence, social suffering and a critique of neoliberal governmentality into the center of the disciplines of anthropology and public health specifically, and the social sciences, humanities and medicine more broadly. In the seminar we will be bringing students from anthropology, and other social science and humanities disciplines in dialogue with students in public health, science studies, and clinical medicine.

PUBH 537 Evidenced-Based Health Policy
Achieving Evidence-Based Health Policy examines how research can influence health policy. Individual sessions will be devoted to topics such as the Nurse-Family Partnership program, health insurance, smoking, and early childhood mental health. Sessions will examine how selection of research methods may influence results; the dialectical relationship between research and policy; and the role of various stakeholders (the media, foundations, government, advocates) in both research and policy debates. Didactic topical research presentations will be followed by interactive discussions examining how research finds translates (or, as the case may be, do not translate) into policy. Guest speakers will include research and policy experts from the public and private sectors. Prerequisites are Fundamentals of Health Policy (offered through the Master's of Science in Health Policy); PUBH 505 Public Health Administration and Policy; or permission of instructor. Enrollment limited to 12.
Taught by: Gerdes, Zlotnik
Course usually offered in spring term
Prerequisites: HPR 606 and PUBH 505 or permission of instructor
Activity: Lecture
1 Course Unit

PUBH 538 Qualitative Methods in Health
The purpose of this course is to expose students to a variety of qualitative approaches/methodologies that may be used in health services/policy research. In didactics we will discuss the pros and cons of various methods, explaining how the method is actually implemented (with multiple experts presenting their approaches), and pair the presentation with a broader discussion in which we compare and contrast health oriented articles in which the method was used.
Taught by: Barg, Shea
Course usually offered summer term only
Also Offered As: HPR 503
Activity: Lecture
1 Course Unit

PUBH 539 Designing Interventions To Promote Health and Reduce Health Disparities
Also Offered As: NURS 823
Activity: Seminar
1 Course Unit
PUBH 540 Goglobal: Ghana
Activity: Lecture
1 Course Unit

PUBH 541 Social Epi: Social Epidemiology
Activity: Lecture
1 Course Unit

PUBH 545 Contemporary Issues in Maternal Child Health
Activity: Lecture
1 Course Unit

PUBH 551 Global Health Policy and Delivery
This participatory interdisciplinary seminar course examines contemporary issues in global health policy and delivery. The overall organizing framework for the class is the social determinants of health. The class will consider evidence that inequalities in education, income, and occupation influence health status. Students will develop skills in policy analysis, policy brief development, and policy impact monitoring. The public policy process will be explored using a variety of contemporary global health case studies which focus on content areas such as maternal health, HIV policy, refugee health, and global healthcare delivery. Finally, we will examine the global health workforce and its impact on widespread global migration of health professionals on receiving and sending countries.
Taught by: McLaughlin and Voet
Course usually offered in spring term
Also Offered As: NURS 640, SWRK 793

PUBH 553 Science & Politics of Food
Activity: Lecture
1 Course Unit

PUBH 554 Impact Evaluation of Global Health Programs
Activity: Lecture
1 Course Unit

PUBH 558 Health & Disease For Public Health Practitioners
Activity: Lecture
1 Course Unit

PUBH 565 Health Communication in the Digital Age
Also Offered As: NURS 353, NURS 565
Activity: Lecture
1 Course Unit

PUBH 570 Adolescent & Young Adult Health/Health Policy
Course usually offered in spring term
Activity: Lecture
1 Course Unit

PUBH 575 Intimate Violence: Intimate Violence
Also Offered As: SWRK 775
Activity: Lecture
1 Course Unit

PUBH 580 Implementing the Aca-Obamacare: Multi-Stakeholder Perspectives
Activity: Lecture
1 Course Unit

PUBH 588 Advanced Leadership Skills in Community Health
Grounded in a social justice perspective, this course aims to provide the student with a foundational overview of the field of community health and leadership skills in public health advocacy. The course encourages critical thinking about health outcomes framed by the broad context of the political and social environment. This course analyzes the range of roles and functions carried out by leaders in healthcare advocacy for marginalized communities; integrates knowledge of health policy and the key influence of government and financing on health outcomes; explores community-based participatory research and interventions as tools for change; and discuss ways to develop respectful partnerships with community organizations. An assets-based approach that draws upon the strengths of communities and their leaders provides a foundation for community-engagement skill building. The course emphasizes the development of skills and techniques to lead effective, collaborative, health-focused interventions for disenfranchised groups, including residents of urban neighborhoods.
Taught by: Margo; Klusaritz; Lipman
Course usually offered in spring term
Also Offered As: HPR 588, NURS 587
Prerequisite: Enrollment in a Masters or Doctoral program
Activity: Lecture
1 Course Unit
Notes: Undergraduates with permission of the instructor

PUBH 589 The Public Health Challenges of Alzheimer’s Disease and Cognitive Aging
Activity: Lecture
1 Course Unit

Taught by: Nelson, Grisso
One term course offered either term
Corequisites: For BGS Public Health Certificate students only.
Activity: Seminar
1 Course Unit

PUBH 598 Immersion Experience in Global Public Health
Taught by: Nguyen
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: This independent educational experience seeks to provide motivated students with the opportunity to expand their knowledge in global health through focused experiential learning at international sites that provide direct public health services. Such learning will allow students to gain real-world experience concerning the core competencies of public health (health policy, behavior/social sciences, environmental health, epidemiology, or biostatistics).

PUBH 599 Independent Study in Public Health
One term course offered either term
Activity: Independent Study
1 Course Unit

PUBH 602 Epi Methods Dis/Prev: Intermediate Epi and Statistical Methods For Ph Practice
Activity: Lecture
1 Course Unit

PUBH 603 Adv Research Methods: Advanced Research Methods For Scholarship
Activity: Lecture
1 Course Unit
PUBH 604 Qualitative Research in Social Sciences
Course usually offered in fall term
Also Offered As: SWRK 781
Activity: Lecture
1 Course Unit

PUBH 605 Epidemiology and Control of Infectious Diseases
Taught by: Smith
Activity: Lecture
1 Course Unit

PUBH 606 Synthesis and Translation of Epidemiologic Literature
Activity: Lecture
1 Course Unit

PUBH 607 Advanced Local Public Health Policymaking
Activity: Lecture
1 Course Unit

PUBH 608 Behavioral Economics & Health
Also Offered As: NURS 613
Activity: Lecture
1 Course Unit

PUBH 637 Advocacy & Public Health: Turning Knowledge Into Action
Course usually offered in spring term
Also Offered As: HPR 637
Activity: Lecture
1 Course Unit

PUBH 701 Industrial Hygiene
Activity: Lecture
1 Course Unit

PUBH 702 Organizational and Healthcare Management
Activity: Lecture
1 Course Unit

Punjabi (PUNJ)

PUNJ 404 Beginning Punjabi Part I
This course emphasizes speaking and reading skills in Punjabi. Upon completion of this course, students should be able to interact meaningfully and in a socially acceptable manner in a variety of simple situations involving everyday conversational topics. Further, students should be able to read and understand the main idea and most details of simple connected texts. This course will utilize authentic printed, audio, and video materials and will provide opportunities for natural communication both within and outside the classroom.
For BA Students: Language Course
Taught by: Gahunia
Course usually offered in fall term
Activity: Lecture
1 Course Unit

PUNJ 405 Beginning Punjabi Part II
This course emphasizes speaking and reading skills in Punjabi. Upon completion of this course, students should be able to interact meaningfully and in a socially acceptable manner in a variety of simple situations involving everyday conversational topics. Further, students should be able to read and understand the main idea and most details of simple connected texts. This course will utilize authentic printed, audio, and video materials and will provide opportunities for natural communication both within and outside the classroom.
For BA Students: Language Course
Taught by: Gahunia
Course usually offered in spring term
Prerequisites: Beginning Punjabi Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

PUNJ 424 Intermediate Punjabi Part I
This course is designed as a continuation of Beginning Punjabi, but can also be taken by anyone who can demonstrate a similar level in proficiency of the language. The course objectives are to expand the mastery of sentence patterns and augment vocabulary and its usage through intensive grammar review and comprehension exercises. A special emphasis will also be placed on greater cultural awareness. Upon completion of this course students should be able to interact socially with added confidence and greater expressiveness. Students should also experience a great improvement in their comprehension of the spoken and written language.
For BA Students: Language Course
Taught by: Gahunia
Two terms. student must enter first term.
Activity: Lecture
1 Course Unit

PUNJ 425 Intermediate Punjabi Part II
This course is designed as a continuation of Beginning Punjabi, but can also be taken by anyone who can demonstrate a similar level in proficiency of the language. The course objectives are to expand the mastery of sentence patterns and augment vocabulary and its usage through intensive grammar review and comprehension exercises. A special emphasis will also be placed on greater cultural awareness. Upon completion of this course students should be able to interact socially with added confidence and greater expressiveness. Students should also experience a great improvement in their comprehension of the spoken and written language.
For BA Students: Last Language Course
Taught by: Gahunia
Course usually offered in spring term
Prerequisites: Intermediate Punjabi Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit
Punj 434 Advanced Punjabi
The objective of the course is to improve proficiency in speaking, listening, reading and writing. Fall semester: Readings in Punjabi Literature - This course addresses the individual needs of learners. This is a one semester course. The focus of the course will be to study the interpretation of written and oral materials on social, political and contemporary cultural topics from modern literature, literary criticism, poetry and drama. Weekly written compositions and oral presentations will be assigned. Grading will be based on this. Spring semester: Punjabi Popular Culture - This course focuses on different aspects of popular Punjabi culture as they are represented in media - television, internet, magazines, newspapers, film, and music. This course aims at making the best use of class participation to improve all four language skills. This is also a one semester course.
For BA Students: Advanced Language Course
Taught by: Cahunia
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: This course is offered through the Penn Language Center.

Quechua (QUEC)

QUEC 110 Elementary Quechua I
For BA Students: Language Course
Taught by: Mendoza-Mori, Americo
One term course offered either term
Activity: Seminar
1 Course Unit

QUEC 120 Elementary Quechua II
For BA Students: Language Course
One term course offered either term
Activity: Seminar
1 Course Unit

QUEC 130 Intermediate Quechua I
For BA Students: Language Course
Course usually offered in fall term
Activity: Seminar
1 Course Unit

Real Estate (REAL)

REAL 204 Real Estate Law
This course examines the fundamentals of real estate finance and development from a legal and managerial perspective. The course serves as a foundation course for real estate majors and provides an introduction to real estate for other students. It attempts to develop skills in using legal concepts in a real estate transactional setting. The course will be of interest to students contemplating careers in accounting, real estate development, real estate finance, city planning, or banking. The main topics covered may include the following: land acquisition, finance; choice of entity; tax aspects; management (leasing, environmental); disposition of real property (sale of mortgaged property, foreclosures, wraparound mortgages, sale-leasebacks); and recent legal developments.
One term course offered either term
Also Offered As: LGST 204, LGST 804, REAL 804
Activity: Lecture
1 Course Unit

REAL 205 Global Real Estate: Risk, Politics and Culture
This is an introductory course to global real estate markets, with a focus on income-producing real estate assets. Globally, estimates suggest the value of investable real estate assets in the world exceeds $60 trillion. We will discuss the basics of valuation and risk management, emphasizing concepts that are salient in the global context, including political risk, currency risk, property rights and culture. The course will cover markets outside the United States, except for one special topic on international investors in the United States. We will focus more on the qualitative aspects of real estate investment analysis and less on quantitative aspects. As firms expand their ventures across borders, there is a growing emphasis on the ability to assess and manage risk in a global business environment. Many of these decisions have implications on real estate assets. In this class, we will discuss the real estate business decisions of global firms, such as Blackstone, Hilton, AirBNB, WeWork, Prologis, Walmart and Amazon. This is a full semester course, open to undergraduates and MBA's.
Taught by: Maisy Wong
Course usually offered in fall term
Also Offered As: REAL 705
Prerequisites: There is no pre-requisite for the course. No prior real estate experience is needed and no prior financial modelling experience is needed.
Activity: Lecture
1 Course Unit
Notes: Lecture with discussion required.

REAL 208 Housing Markets
This course is designed for students interested in the economics and operations of housing markets. It is primarily a U.S. focused course, but does include a limited amount of international material for comparative purposes. The class is divided into four sections: (1) supply and demand for housing, including the operations of homebuilders and rental landlords; (2) house prices, including cycles and price dynamics; (3) international comparisons; and (4) public policy analysis applied to a current housing markets-related issue. This course presumes knowledge of intermediate economics, as we will apply that knowledge throughout the semester. For Wharton students, this means you must have passed BEPP 250 (undergrads) or MGEC 611 and 612 for MBA's. Non-Wharton students should have taken the equivalent course in the College.
Taught by: GYORKO
Course usually offered in spring term
Also Offered As: BEPP 208, BEPP 708, REAL 708
Prerequisites: Managerial Economics (BEPP 250) or equivalent.
Activity: Lecture
1 Course Unit
Notes: Lecture with discussion required.
REAL 209 Real Estate Investment: Analysis and Financing
This course provides an introduction to real estate with a focus on investment and financing issues. Project evaluation, financing strategies, investment decision making and real estate capital markets are covered. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate markets. Classes are conducted in a standard lecture format with discussion required. The course contains cases that help students evaluate the impact of more complex financing and capital markets tools used in real estate. There are case studies and two midterms, (depending on instructor).
Taught by: Ferreira, Handbury, Harari, Keys, Sinai, Wong
One term course offered either term
Also Offered As: FNCE 209
Prerequisite: FNCE 100
Activity: Lecture
1 Course Unit

REAL 215 Urban Real Estate Economics
Urban Real Estate Economics uses economic concepts to analyze real estate markets, values and trends. The course focuses on market dynamics in the U.S. and internationally, with an emphasis on how urban growth and local and federal government policies impact urban development and real estate pricing. A group development project gives hands on experience, and invited guest speakers bring industry knowledge. Besides the group project and presentation, problem sets are required along with a midterm and an optional second exam.
Taught by: Wachter
One term course offered either term
Also Offered As: REAL 724, REAL 945
Prerequisite: FNCE 100 & FNCE 101
Activity: Lecture
1 Course Unit

REAL 230 Urban Fiscal Policy
The purpose of this course is to examine the financing of governments in the urban economy. Topics to be covered include the causes and consequences of the urban fiscal crisis, the design of optimal tax and spending policies for local governments, funding of public infrastructures and the workings of the municipal bond market, privatization of government services, and public financial systems for emerging economies. Applications include analyses of recent financial crises, local services and taxes as important determinants of real estate prices, the infrastructure crises, financing and the provision of public education, and fiscal constitutions for new democracies using South Africa as an example.
Taught by: Inman
Course usually offered in fall term
Also Offered As: BEPP 230, BEPP 899, FNCE 230
Prerequisites: FNCE 101 and ECON 001
Activity: Lecture
1 Course Unit

REAL 236 International Housing Comparisons
This course analyzes housing finance systems and housing market outcomes across the globe. In the US, the course focuses on the development of securitization markets and addresses the current challenges of housing finance reform, including the future of Fannie Mae and Freddie Mac. Internationally, the course covers issues of access to housing and housing informality in developing countries, financial crises arising out of the housing sector, and market-oriented and public policy solutions. The course features a wide array of speakers in finance, government and academia who contribute their perspectives to pressing issues of mortgage market design.
Taught by: Wachter
Course usually offered in spring term
Also Offered As: BEPP 236, BEPP 836, REAL 836
Prerequisites: FNCE 101 MONETARY ECON & GLOBAL ECO, ECON 010 INTRO TO ECON FOR BUS
Activity: Lecture
1 Course Unit

REAL 240 Advanced Real Estate Investment and Analysis
This course is designed for majors in Real Estate, but is also open to finance-oriented students who wish a deeper analysis of real estate investment and investment analysis issues than that offered in REAL 209. The class will contain a mixture of lectures, guest speakers and case discussions. Academic research is paired with recent industry analysis of key issues in order to marry sound theory and empirical results with current events and practices. Several classes will include lectures outlining what economics and finance tell us about a number of topics. Generally, these will be followed by guest lectures from industry professionals who will focus on a specific application of the principles introduced in the lectures.
Taught by: Sinai
Course usually offered in spring term
Also Offered As: REAL 840
Prerequisite: REAL 209 or FNCE 209
Activity: Lecture
1 Course Unit

REAL 321 Real Estate Development
REAL 821
One term course offered either term
Also Offered As: ARCH 768, REAL 821
Activity: Lecture
1 Course Unit
REAL 390 International Real Estate Comparisons
As a truly non-U.S. focused course, we explore the world of cross-border real estate development, with a focus on fast growing emerging market economies. Topics will emphasize the importance of strategy and implementation in cross-border real estate investment and include: the rationale, opportunities and risks of international real estate investing; the macro factors that influence the performance of real estate markets across countries; market specific factors that impact RE investment performance (property rights, taxes, transparency, planning procedures); the qualitative aspects of identifying and achieving successful projects; and the growing market for international RE securities and strategies for portfolio management. Classes will combine a lecture on specific aspects of global cross-border RE in the first half of the class and international case presentations in the second half. Cases will be presented by leading executives in charge of major international RE projects or funds. Cases have been selected to cover different types of RE development-residential, office, retail, hospitality and logistics-important emerging market countries/continents (East/South Asia, Latin America, Sub-Saharan Africa, the Middle East) and different development and investment strategies.
Course usually offered in fall term
Also Offered As: REAL 890
Prerequisite: REAL 209 OR FNCE 209
Activity: Seminar
0.5 Course Units
Notes: This class is offered in the second half of the semester.

REAL 396 Real Estate Entrepreneurship
What makes a successful entrepreneur in the real estate industry? This half semester mini-course exposes undergraduates and MBA students to the broad entrepreneurial aspects of creating and executing real estate investments. The course consists of lectures by the professor, case discussions and guest lectures by leading entrepreneurs. Lectures and discussions will emphasize real estate entrepreneurship, leadership and challenges often encountered in creating successful real estate investments rather than development processes. Cases will be used to illustrate investment decision making and financial evaluations. Short written responses to questions raised in each case will be assigned. Class members are expected to engage the speakers with questions and discussion as well as explain their views on cases. Class participation and writings will each represent 50% of the grade.
One-term course offered either term
Also Offered As: REAL 891
Activity: Lecture
0.5 Course Units
Notes: Offered in the first half of the semester.

REAL 399 Independent Study
All independent studies must be arranged and approved by a Real Estate department faculty member.
One-term course offered either term
Activity: Independent Study
1 Course Unit

REAL 705 Global Real Estate: Risk, Politics and Culture
This is an introductory course to global real estate markets, with a focus on income-producing real estate assets. Globally, estimates suggest the value of investable real estate assets in the world exceeds $60 trillion. We will discuss the basics of valuation and risk management, emphasizing concepts that are salient in the global context, including political risk, currency risk, property rights, and culture. The course will cover markets outside the United States, except for one special topic on international investors in the United States. We will focus more on the qualitative aspects of real estate investment analysis and less on the quantitative aspects. As firms expand their ventures across borders, there is a growing emphasis on the ability to assess and manage risk in a global business environment. Many of these decisions have implications on real estate assets. In this class, we will discuss the real estate business decisions of global firms, such as Blackstone, Hilton, AirBNB, WeWork, Prologis, Walmart and Amazon. This is a full semester course, open to undergraduates and MBA's.
Taught by: Maisy Wong
Course usually offered in fall term
Also Offered As: REAL 205
Prerequisites: There is no prerequisite for the course. No prior real estate experience is needed and no prior financial modeling experience is needed.
Activity: Lecture
1 Course Unit
Notes: Lecture with discussion required.

REAL 708 Housing Markets
This course is designed for students interested in the economics and operations of housing markets. It is primarily a U.S. focused course, but does include a limited amount of international material for comparative purposes. The class is divided into four sections: (1) supply and demand for housing, including the operations of homebuilders and rental landlords; (2) house prices, including cycles and price dynamics; (3) international comparisons; and (4) public policy and analysis applied to a current housing markets-related issue. This course presumably knowledge of intermediate economics, as we will apply that knowledge throughout the semester. For Wharton students, this means you must have passed BEPP 250 (undergrads) or MGEC 611 and 612 for MBA's. Non-Wharton students should have taken the equivalent course in the College.
Taught by: GYORKO
Course usually offered in spring term
Also Offered As: BEPP 208, BEPP 708, REAL 208
Prerequisites: Microeconomics for Managers (MGEC 611) and Microeconomics for Managers (Advanced) (MGEC 612) or equivalent.
Activity: Lecture
1 Course Unit
Notes: Lecture with discussion required.
REAL 721 Real Estate Investment: Analysis and Financing
This course provides an introduction to real estate with a focus on investment and financing issues. Project evaluation, financing strategies, investment decision making and capital markets are covered. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate markets. Classes are conducted in a standard lecture format with discussion required. The course contains cases that help students evaluate the impact of more complex financing and capital markets tools used in real estate. There are case studies and two mid-terms, (depending on instructor). Cross-listed with FNCE 721.
Taught by: Ferreira, Handbury, Harari, Keys, Sinai, Wong
One term course offered either term
Also Offered As: FNCE 721
Prerequisite: FNCE 611 or FNCE 612
Activity: Lecture
1 Course Unit
Notes: Lecture with discussion required.

REAL 723 Introduction to Real Estate
The goal of this class is to help students become informed consumers of real estate advice. The class material breaks down into four major sections: 1) The financial risk and return of property level real estate investments. Be able to interpret, understand and evaluate a real estate property investment pro forma. 2) The legal landscape for investing in real estate and using legal structures to manage risk. 3) The economics of commercial real estate markets. Understanding the forces that will determine the value and income-producing potential of a real estate investment. 4) Important real estate issues of the day.
Taught by: Sinai
One term course offered either term
Activity: Lecture
0.5 Course Units
Notes: WEMBA COURSE

REAL 724 Urban Real Estate Economics
Urban Real Estate Economics uses economic concepts to analyze real estate markets, values, and trends. The course focuses on market dynamics in the U.S. and internationally, with an emphasis on how urban growth and local and federal government policies impact urban development and real estate pricing. A group development project gives hands on experience, and invited guest speakers bring industry knowledge. Besides the group project and presentation, problem sets are required along with a midterm and optional second exam.
Taught by: Wachter
One term course offered either term
Also Offered As: REAL 215, REAL 945
Prerequisites: MGEC 621, Managerial Economics
Activity: Lecture
1 Course Unit
Notes: Although some of the material is presented by lecture, the instructor expects considerable class participation.

REAL 730 Urban Fiscal Policy
The purpose of this course is to examine the financing of governments in the urban economy. Topics to be covered include the causes and consequences of the urban fiscal crisis, the design of optimal tax and spending policies for local governments, funding of public infrastructures and the workings of the municipal bond market, privatization of government services, and public financial systems for emerging economies. Applications include analyses of recent fiscal crises, local services and taxes as important determinants of real estate prices, the infrastructure crises, financing and the provision of public education, and fiscal constitutions for new democracies using South Africa as an example.
Taught by: Inman
Course usually offered in fall term
Also Offered As: BEPP 773, FNCE 730
Prerequisites: MGEC 621, FNCE 611
Activity: Lecture
1 Course Unit
Notes: Lecture, discussion.

REAL 804 Real Estate Law
This course examines the fundamentals of real estate finance and development from a legal perspective. The course serves as a foundation course for real estate majors and provides an introduction to real estate for other students. It attempts to develop skills in using legal concepts in a real estate transactional setting. The course will be of interest to students contemplating careers in accounting, real estate development, real estate finance, city planning, or banking. The main topics covered may include the following: land acquisition, finance, choice of entity; tax aspects; management (leasing, environmental); disposition of real property (sale of mortgaged property, foreclosures, wraparound mortgages, sale-leasebacks); and recent legal developments. Format: Although some of the material is presented by lecture, the instructor expects considerable class participation. Cross- listed with LGST 804.
One term course offered either term
Also Offered As: LGST 204, LGST 804, REAL 204
Activity: Lecture
1 Course Unit
Notes: Although some of the material is presented by lecture, the instructor expects considerable class participation.
REAL 821 Real Estate Development
This course evaluates "ground-up" development as well as re-hab, re-development, and acquisition investments. We examine raw and developed land and the similarities and differences of traditional real estate product types including office, R & D, retail, warehouses, single family and multi-family residential, mixed use, and land as well as "specialty" uses like golf courses, assisted living, and fractional share ownership. Emphasis is on concise analysis and decision making. We discuss the development process with topics including market analysis, site acquisition, due diligence, zoning, entitlements, approvals, site planning, building design, construction, financing, leasing, and ongoing management and disposition. Special topics like workouts and running a development company are also discussed. Course lessons apply to all markets but the class discusses U.S. markets only. Throughout the course, we focus on risk management and leadership issues. Numerous guest lecturers who are leaders in the real estate industry participate in the learning process. Format: predominately case analysis and discussion, some lectures, project visits.

One-term course offered either term
Also Offered As: ARCH 768, REAL 321
Prerequisites: REAL 721 OR FNCE 721. The prerequisite is STRICTLY enforced for this class unless it is undersubscribed.
Activity: Lecture
1 Course Unit
Notes: Predominately case analysis, discussion, some lectures, and project visits.

REAL 836 International Housing Comparisons
This course analyzes housing finance systems and housing market outcomes across the globe. In the US, the course focuses on development of securitization markets and addresses current challenges of housing finance reform, including the future of Fannie Mae and Freddie Mac. Internationally, the course covers issues of access to housing and housing informality in developing countries, financial crises arising out of the housing sector, and potential market-oriented and public policy solutions. The course features a wide array of speakers in finance, government and academia who contribute their perspectives to pressing issues of mortgage market design.

Taught by: Wachter
Course usually offered in spring term
Also Offered As: BEPP 236, BEPP 836, REAL 236
Prerequisites: FNCE 613 Macroeconomics and the Global Economic Environment
Activity: Lecture
1 Course Unit

REAL 840 Advanced Real Estate Investment and Analysis
This course, is designed for majors in Real Estate, but is also open to finance-oriented students who wish a deeper analysis of real estate investment and investment analysis issues than that offered in REAL/ FNCE 721. The class will contain a mixture of lectures, guest speakers and case discussions. Academic research is paired with recent industry analysis of key issues in order to marry sound theory and empirical results with current events and practices. Several classes will include lectures outlining what economics and finance tell us about a number of topics. Generally, these will be followed by guest lectures from industry professionals who will focus on a specific application of the principles introduced in the lectures. Format: Lecture, industry speakers.

Taught by: Sinai

Also Offered As: REAL 215, REAL 724
Prerequisite: MGEC 601
Activity: Lecture
1 Course Unit

REAL 946 Advanced Topics in Urban Economics
This course addresses advanced topics in urban and real estate economics. The course will mix theory and empirics and will cover a broad range of topics including the modeling and estimation of agglomeration economies, land use and urban costs, transportation in cities, urban growth, migration between cities etc. The classes will mix formal presentations made by the instructor and student-led discussions of recent academic papers. In addition to presentations, students will be expected to complete a series of assignments including a short original research paper.
Taught by: FERREIRA, DURANTON
One-term course offered either term
Prerequisites: The course assumes that students have familiarity with standard first year econometrics and microeconomics.
Activity: Lecture
1 Course Unit
Notes: All PhD students will be expected to complete a research paper in addition to the successful completion of the course examination requirements.

REAL 947 Advanced Real Estate and Urban Economics
This course covers fundamental and cutting-edge topics in urban economics and real estate as well as the most important econometric issues that arise in the estimation of urban economics and real estate models. The first part of the course focuses on the application of modern econometric methods to analyze empirical questions in the broad urban economics field, which includes topics from public economics and local finances, such as household sorting and valuation of public goods. This part of the course is especially concerned about dealing with nonexperimental data, and also provides a guide for tools that are useful for applied research. The second and third parts of the course examine the economic modeling and intuition of a range of topics in urban economics and real estate, such as spacial equilibrium, supply and demand of space, housing prices and cycles. In addition, special emphasis is given to how the understanding of economic theory and institutions can help any empirical analysis. At the end of the course students should have a firm grasp of theory and econometric tools that lead to convincing empirical applications. All Ph.D. students will be expected to complete a research paper in addition to the successful completion of the course examination requirements.

Regulation (REG)

REG 510 Introduction to Clinical and Translational Research
This introductory course lays the foundation for understanding practical aspects of conducting clinical research in an academic environment. The course is divided into two modules: Module 1: Research Methods & Protocol Development and Module 2: Regulatory Environment for Clinical Trials. The first module introduces clinical research, clinical protocols, study designs and biostatistics that underlie such studies. The second module covers ethical considerations in clinical research, study execution and oversight, and the regulatory environment for clinical research. Upon completion, students should have a strong foundation in the fundamentals of clinical research and should be able to apply contemporary research tools to clinically relevant areas of investigation.
Taught by: Emma A. Meagher, MD
Course usually offered in fall term
Also Offered As: MTR 510
Activity: Lecture
1 Course Unit
Notes: This course requires permission to register. Please contact Anna Greene (acgreene@upenn.edu) to register.

REG 610 Fundamentals of FDA Regulation
This introductory course provides an overview of Regulatory Affairs in relation to three key areas of development: Drugs, Biologics, and Medical Devices. The course will look at the rules governing prescription and over-the-counter drugs as well as the changes introduced by the influence of genetic engineering and biological product development. Throughout the course, practical issues facing regulatory specialists as they work with the FDA and other international regulatory bodies to secure and keep product approval will be addressed.
Taught by: Monica Ferrante
Course usually offered summer term only
Prerequisites: Permission needed to register. Contact Anna Greene (acgreene@upenn.edu) to register.
Activity: Lecture
1 Course Unit

REG 611 Clinical Study Management
This course will focus on the practical aspects of conducting clinical research in an academic environment. Upon course completion students will be able to apply scientific principles of research to the implementation and management of both investigator-initiated and industry-sponsored clinical research studies. Students will be guided through the operational aspects and regulatory processes for the three stages of study management: pre study start-up, ongoing study management and study close out. Students will learn strategies for navigating the complex regulatory/operational clinical research environment and for successful protocol development and approval, subject recruitment, data management and IRB clinical practices guiding research in humans is a critical concept that will be integrated throughout each of the lectures.
Taught by: Emma A. Meagher, MD
Activity: Lecture
1 Course Unit
Notes: Permission needed to register. Contact Anna Greene (acgreene@upenn.edu) to register.

REG 612 Introduction to Drug Development
This introductory course lays the foundation for conducting pharmaceutical research in many ways. It begins with a brief review of the history of drug development and explains the phases of drug development in detail. The decision making process, drug development milestones and compound progression metrics are defined and explained with examples. At the conclusion of this course, students should have a working knowledge of the drug development process, understand the regulatory basis by which new chemical entities are evaluated and ultimately approved, and appreciate the time and expense of drug development.
Taught by: Jeffrey S. Barrett, PhD, FCP
Course usually offered in spring term
Prerequisites: Undergraduates and graduate students from other departments are welcome. Please contact acgreene@upenn.edu to request permission to register.
Activity: Lecture
1 Course Unit
REG 614 Biopharmaceutical Product Development, Manufacturing and Regulatory Affairs
Biopharmaceutical protein products have been successfully used to treat a number of diseases and currently represent a large segment of the product pipeline in most major pharmaceutical companies. More than half of the current top 20 blockbuster drugs are biopharmaceuticals. Drugs like Actos, Humira, and Avastin have revolutionized the drug industry in treating the unmet medical needs of many patients. With innovation at the heart of the biopharmaceutical industry, this course is aimed at developing the student’s understanding of the application of basic research in molecular biology and genetics to the development of novel drugs for treating diseases. The course is designed to provide an overview of biopharmaceutical protein drug development and manufacturing processes with an emphasis on regulatory affairs activities. The class has been developed and is taught by a former VP of biopharmaceutical product development with over 30 years of experience in biotechnology and the biopharmaceutical industry. The course director will provide insights into the unique challenges and opportunities facing the biopharmaceutical industry and how they relate to regulatory affairs. Subject area experts from industry will also participate as guest lecturers.
Taught by: Marcia Federici, PhD
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Permission required to register. Please contact Anna Greene (acgreene@upenn.edu) to request a permit.

REG 615 Post-Approval Maintenance of Drugs, Biologics, and Devices.
The FDA regulates prescription drugs, biologics and medical devices for utilization in the United States. The approval of a marketing application is a major accomplishment; however, it comes with significant responsibilities for a sponsor including numerous reporting requirements and activities to maintain a license as well as a need for lifecycle maintenance activities to stay competitive. The purpose of this course is to provide an overview of post-approval activities required for drugs, biologics and devices.
Taught by: Ajay Parashar, BPharm, MS, MDD, RAC
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Contact Anna Greene (acgreene@upenn.edu) to receive a permit for registration.

REG 621 Cell and Gene Therapy
This course will provide students with a general overview of translational research in the area of gene and cell therapy. This includes technical considerations, translating preclinical investigation into therapeutics, the execution of gene and cell therapies clinical trials, and key regulatory issues. Entrepreneurial considerations will be discussed as well. By the end of this course, students will understand the basic technologies employed for gene and cell therapy and approach with approaches and pitfalls to translating these therapies into clinical applications including regulatory and commercial aspects of this emerging area.
Taught by: Michael C. Milone, MD, PhD
Course usually offered in spring term
Also Offered As: CAMB 707, MTR 621
Prerequisites: At least one course in immunology.
Activity: Lecture
1 Course Unit

REG 622 New Trends in Medicine and Vaccine Discovery
Modern drug discovery has evolved to include human genetic diagnosis and various biological approaches which has enabled progress in a variety of fields, including rare diseases, immuno-oncology, precision medicine, and biomarkers. The goal of this course is for students to understand newer treatment modalities and approaches beyond one size fits all small molecule drugs, as well as the technologies that empower them. Students will learn regulatory processes that govern medicine discovery and development and also consider business and societal aspects of medical progress. Students will be able to apply concepts directly to work in the healthcare industry. Students will be taught by experts in the field internal and external to Penn.
Taught by: Claudine Bruck, PhD
Course usually offered in fall term
Also Offered As: MTR 622
Activity: Lecture
1 Course Unit
Notes: Permission required to register. Please contact Anna Greene (acgreene@upenn.edu) to request a permit.

Religious Studies (RELS)

RELS 002 Religions of the West
This course surveys some of the core beliefs and practices within Judaism, Christianity, and Islam. To do so, we will focus on history and memory, exploring how key figures and formative events from the past have been made present, from generation to generation, through scripture, ritual, liturgy, and remembrance. Special attention will be given to points of interaction between Jews, Christians, and Muslims, as well as to the impact of their intertwined histories on the formation and development of Western cultures. Satisfies History & Tradition Sector.
For BA Students: History and Tradition Sector
Taught by: Reed
One-term course offered either term
Also Offered As: JWST 122
Activity: Lecture
1 Course Unit

RELS 003 Religion and Literature
A consideration of how great works of literature from different cultural traditions have reclaimed and reinterpreted compelling religious themes. The focus this semester will be on themes of creation, especially the creation of human beings, from ancient myths of different cultures to modern science fiction. This course fulfills the General Requirement in Sector 3, Arts and Letters.
For BA Students: Arts and Letters Sector
Taught by: Matter
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Theme of the course will change from term to term. See syllabus for more info.
RELS 004 Art and Religion
What is religious art and what makes art religious? This course will survey a wide variety of artistic expressions from a number of religious traditions which draw on spiritual themes, are inspired by religious experiences or texts, and which serve an important role in religious practice and belief. Some of the themes which this course will explore are: visualization and action within the cosmos, passion and religious ecstasy, the material culture of personal devotion, icons and iconoclasm, depictions of the miraculous, and the relationship between word and image. Objects and images from Christianity, Islam, Judaism, and Buddhism and will be explored along with examples from other traditions.
Taught by: Muravchick
One term course offered either term
Activity, Lecture
1 Course Unit

RELS 005 Gender, Sexuality, & Religion
What does it mean to be a Muslim, Hindu, Jewish, Christian, or spiritual woman or man? How important are the gender differences in deciding social roles, ritual activities, and spiritual vocations? How does gender intersect with nationality, language, and politics? This course tackles all of these questions, showing how gender- it’s definition and the way it is taught and performed- is central to the study of religion. In this course we will learn about women’s and men’s rituals, social roles, and mythologies in specific religious traditions. We will also look at the central significance of gender to the field of religious studies generally, with particular attention to non-binary genders. The first part of the course will be focused on building a foundation of knowledge about a range of religious traditions and the role of women in those traditions. This course emphasizes religious traditions outside the West. Although it is beyond the scope of this class to offer comprehensive discussions of any one religious tradition, the aim is to provide entry points into the study of religious traditions through the lens of gender. This course will emphasize both historical perspectives and contemporary contexts. We will read religion through a variety of feminist and queer theory lenses- exploring the key characteristics of diverse feminist analyses of religion, as well as limits of specific feminist approaches.

One term course offered either term
Also Offered As: FOLK 029, GSWS 109
Activity, Lecture
1 Course Unit

RELS 010 Religion in Public Life
This seminar is an introduction to several aspects of the hotly debated relation between religion and public life in America. In the first half of the course we will study two books by law professors, one Jewish and the other Christian. Their debate will introduce us to the legal and historical background, and to the continuing challenges of church-state separation in America. The second half of the course will examine the claim that we now live in a "new religious America," one in which the increasing presence of Hindus, Buddhists and Muslims has created a new pluralism and a new set of challenges. We will then consider the argument of one historian that diversity and difference have characterized religious groups in America since at least the 19th century, and that this has resulted in a number of paradoxical social situations. Finally, we will close with a brief look at the claim that there exists in America a "civil religion," one that unites all citizens despite their other religious differences.

1 Course Unit

RELS 013 Gods, Ghosts, and Monsters
This course seeks to be a broad introduction. It introduces students to the diversity of doctrines held and practices performed, and art produced about "the fantastic" from earliest times to the present. The fantastic (the uncanny or supernatural) is a fundamental category in the scholarly study of religion, art, anthropology, and literature. This course will focus both theoretical approaches to studying supernatural beings from a Religious Studies perspective while drawing examples from Buddhist, Shinto, Christian, Hindu, Jain, Zoroastrian, Egyptian, Central Asian, Native American, and Afro-Caribbean sources from earliest examples to the present including mural, image, manuscript, film, codex, and even comic books. It will also introduce students to related humanistic categories of study: material and visual culture, theology, cosmology, shamanism, transcendentalism, soteriology, eschatology, phantasmagoria, spirituality, mysticism, theophany, and the historical power of rumor. It will serve as a gateway course into the study of Religion among numerous Asian, and East Asian Studies, as well as Visual Culture and Film Studies. It will include guest lectures from professors from several departments, as well as an extensive hands-on use of the collections of the Penn Museum of Archaeology and Anthropology and the manuscripts held in the Schoenberg Collection of Van Pelt Library. It aims to not only introduce students to major approaches, and terms in the study of religion and the supernatural, but inspire them to take more advanced courses by Ilya Vinitsky, Liliane Weissberg, Prójit Mukharji, Talya Fishman, Annette Reed, David Barnes, David Spafford, Frank Chance, Michael Meister, Paul Goldin, Renata Holod, Paul Rosin, among several others.

RELS 014 Myths and Religions of the Ancient World
This course will survey the religions of the ancient Middle East, situating each in its historical and socio-cultural context and focussing on the key issues of concern to humanity: creation, birth, the place of humans in the order of the universe, death and destruction. The course will cover not only the better known cultures from the area, such as Egypt and Mesopotamia, but also some lesser known traditions, such as those of the Hurrians, or of the ancient Mediterranean town of Ugarit. Religion will not be viewed merely as a separate, sealed-off element of the ancient societies, but rather as an element in various cultural contexts, for example the relationship between religion and magic, and the role of religion in politics will be recurring topics in the survey. Background readings for the lectures will be drawn not only from the modern scholarly literature, but also from the words of the ancients themselves in the form of their myths, rituals and liturgies.

REL 024 Archaeology and the Bible
Archaeology and the Bible is a chronological survey of the long span of human occupation in the Land of the Bible, known by the names of the modern nation-states and political entities that occupy the area, as well as various short hands such as Levant and Syria-Palestine, from ca. 10,000 BCE, when humans first began to farm and herd animals through the time of the Divided Monarchy of Israel and Judah. While archaeology has moved beyond a primary concern with illuminating the Bible, NELC155 will investigate the broader import of archaeological discoveries for our understanding of ancient Israel and its neighbors. REL 027 Great Books of Judaism
The Babylonian Talmud, known simply as the Bavli, is the foundational legal and ethical document of rabbinic Judaism. It is one of the best read works of world literature, and it is the most widely disseminated and revered rabbinic work. It not only contains legal discussions and rulings but rather it also presents the worldview of the rabbis. This course will analyze and contextualize the perspectives of the Talmud towards the important phases of life. We will examine in-depth several Talmudic passages relating to the various stages of the human lifecycle: birth and naming of the child; circumcision, bar/bat mitzva and adulthood; earning a livelihood and choosing a career; marriage and divorce; procreation and raising children; death, burial, mourning and the belief in the resurrection of the dead among others. We will evaluate these teachings in light of other traditions and in their broader late antiquity and contemporary contexts. All texts will be read in their English translation but originals will be provided.

REL 030 Gurus, Prophets & Aliens: Understanding New Religious Movements
This course offers a thematic introduction to the history of New Religious Movements (NRM) from the mid-19th century to the present day. Often labeled as "cults" by the state and established religious institutions, new religions offer modern believers alternative spiritual and ideological solutions to age-old problems. In this class, students will be introduced to the teachings and practices of prominent NRMs in North America, Europe, Asia, and Australia, from wide-spread movements such as Scientology, Mormonism, and the Unification Church to lesser known groups such as the Church of the Almighty God, Neo-Paganism, and Raelism. We will explore the emergence of the anti-cult campaign in the second half of the 20th century, the relationship between apocalyptic sects such as the Peoples Temple and the Branch Davidians and political and social protest, and the role of Asian religions such as the Maharishi Mahesh Yogi's Transcendental Meditation in the development of New Age religiosity. In addition, we will learn how new religious movements such as Wicca and the Children of God helped reshape gender roles and changed mainstream views about sexuality, and how developments in mass media and popular culture contributed to the creation of new groups such as the Star Wars inspired Temple of the Jedi Order (Jediism), the Church of the Latter-Day Dude (Dudeism), as well as UFO religions such as Heaven's Gate. Throughout the semester, students will be exposed to a wide variety of primary and secondary sources, from academic articles and scholarly essays to documentaries, feature films, and TV shows. No previous knowledge in Religious Studies is required.

RELS 033 Modern Catholic Christianity
At the turn of the twentieth century, Sigmund Freud hypothesized that religion was a dead duck. Many other thinkers of “modernity” have agreed with his thesis; and yet, over a century later, it is clear that religion is still a forceful presence in human culture. One religious tradition that has survived to the surprise (and even consternation) of some critics, is Roman Catholic Christianity. This Freshman Seminar will look closely at the Catholic Church in the twenty-first century, to explore the ways in which Catholicism has (and has not) adapted to modernity. We will begin with an investigation into the history of Roman Catholicism; how it is defined, and how it developed in relation to politics and culture in the Roman Empire, medieval and early modern Europe, and in the Americas; but most of the semester will focus on the Catholic Church of the past 200 years, especially as it appears in the United States. We will consider the relationship of Catholicism to many aspects of modern life, including science and technology, political systems and leaders, aesthetics (visual arts, music, literature and film), and understandings of gender and sexuality. There will be a mid-term examination and a final paper of 6 to 10 pages.

RELS 069 Love Sex and Death
This course focuses on important constants of human life as they are grappled with across religious traditions. Drawing on data across a range of religious traditions (such as Christianity, Hinduism, Judaism, Islam, Buddhism and Mesoamerican Religion), we will explore topics such as sexual identity, politics, religion and the individual in contemporary life; and eroticism, sex and love as they are reflected in religious literature, art and history. Divine love and religious devotion will be examined in relation to acts of violence, including human sacrifice and self-sacrifice in the past as well as the present. Other important questions considered in this course include: how does the body function as the locus in which religion is enacted? What is the conflict between our agency over our bodies and socioreligious claims over individual autonomy? Is violence an integral part of religion? What are religious understandings of the relationship between our agency over our bodies and socioreligious claims over individual autonomy? Is violence an integral part of religion? What are religious understandings of the relationship between love and sex? What does it mean for human beings to love God?

RELS 101 Religion and Evolution
This class will explore encounters between religion and evolutionary sciences, from the 19th century to the present. We will consider the history of evolutionary biology's entanglements with faith, from the initial explosion of interest in the wake of Darwin's Origin of the Species in 1859 to contemporary debates about creationism and intelligent design here in Pennsylvania in the 21st century. In the first half of the class, we will look at how writers, philosophers, and theologians from around the world and a range of religious traditions have assessed the evolution-religion relationship — some seeing conflict, others concord. In the second half, we will consider evolutionary approaches to the origins of religion, from late-19th century accounts to modern cognitive science and group selection theories. Topics covered will include scientific racism, sociobiology and the evolutionary origins of morality, primate religion, and the relationship between science, religion, and politics.

RELS 102 Sacred Stuff: Religious Bodies, Places, and Objects
Does religion start with what’s in our heads? Or are religious commitments made, shaped and strengthened by the people, places, and things around us? This course will explore how religion happens in the material world. We’ll start with classical and contemporary theories on the relationship of religion to stuff. We’ll then consider examples of how religion is animated not just by texts, but through interactions with objects, spaces, bodies, monuments, color, design, architecture, and film. We’ll ask how these material expressions of religion move beyond private faith and connect religion to politics and identity.

RELS 108 Introduction to Folklore
The purpose of this course is to introduce you to the subjects of the discipline of Folklore, their occurrence in social life, and the scholarly analysis of their use in culture. As a discipline, folklore explores the manifestations of expressive forms in both traditional & modern societies, in small-scale groups where people interface with each face-to-face, and in large-scale, often industrial societies, in which the themes, symbols, and forms that permeate traditional life, occupy new positions, or occur in different occasions in everyday life. For some of you, the distinction will not be helpful. In traditional societies, and within all groups that define themselves ethnically, professionally, or culturally, within modern heterogenous societies in the Americas, Africa, Asia, Europe and Australia, folklore plays a more prominent role in society than it appears to play in literate cultures on the same continents. Consequently, the study of folklore and the analysis of its forms are appropriate in traditional as well as modern societies, and in any society that is in a transitional phase.

RELS 109 Witchcraft and Possession
This course explores world witchcraft and possession from the persecutions of the early eleventh century through the rise of Wicca in the twentieth century. The mere mention of these terms, or of such close cousins as demonology, sorcery, exorcism, magic, and the witches Sabbath, raises clear ethnographic and historical challenges. How can the analysis of witchcraft—including beliefs, patterns of accusation, the general social position of victims, the intensity and timing of witch hunts, and its relation to religious practice, law, language, gender, social marginalization, and property—lead us to a more humane understanding of belief and action? Films such as The Exorcist, The Blair Witch Project, The Crucible, and Three Sovereigns for Sarah will focus discussion.

Activity: Lecture
1 Course Unit

RELS 129 Themes in the Jewish Tradition
Course topics will vary; have included The Binding of Isaac, Responses to Catastrophes in Jewish History. Holy Men & Women (Ben-Amos); Rewriting the Bible (Dohrmann); Performing Judaism (Fishman); Jewish Political Thought (Fishman); Jewish Esotericism (Lorberbaum). Democratic culture assumes the democracy of knowledge-the accessibility of knowledge and its transparency. Should this always be the case? What of harmful knowledge? When are secrets necessary? In traditional Jewish thought, approaching the divine has often assumed an aura of danger. Theological knowledge was thought of as restricted. This seminar will explore the “open” and “closed” in theological knowledge, as presented in central texts of the rabbinic tradition: the Mishnah, Maimonides and the Kabbalah. Primary sources will be available in both Hebrew and English.

RELS 130 How to Read the Bible
While the Bible may be the most read text in the world, it is not clear that anyone understands what it actually means. Secular scholars read the Bible as they would any other ancient document, trying to understand who wrote it and what it reveals about the past, but that is not how the Bible is understood by hundreds of millions of readers who embrace it as a message from God and its contents not just to learn about the past but to understand what the meaning of life is, how to be a good person, and where the world is headed. How is it that the Bible is read in such different ways by the secular and the religious? Who is right in the struggle over its meaning, and how does one go about deciphering that meaning in the first place?
Taught by: Weitzman
Also Offered As: JWST 131, NELC 153
Activity: Seminar
1 Course Unit

RELS 132 The History of God
This course introduces the history of God as understood by modern scholars of religion. Why do people believe in gods in the first place? How is the God of the Old Testament different from earlier Near Eastern deities, or different from God as represented in the New Testament and the Quran? When and why did people come to question the existence of God, and how has the idea of God changed in the last century in light of experiences like the Holocaust, social movements like feminism, and the rise of new technologies like the Internet? This course will address these questions as it surveys the approaches scholars have developed to comprehend the history of a being who would seem beyond human comprehension.
Taught by: Weitzman
Also Offered As: ANCH 133, JWST 132
Activity: Seminar
1 Course Unit

RELS 135 Introduction to the New Testament
What can be known— from historical perspectives— about the life and teachings of Jesus and his earliest followers? Did Jesus see himself as a teacher and/or a revolutionary and/or the messiah? If Jesus and the apostles were all Jews, how did Christianity emerge as a distinct "religion" distinct from Judaism? And how is it that this small Galilean and Judean movement came to shape world history and Western culture even to this day? This course explores these questions through a focus on the formation of the New Testament— from the letters of Paul in the early first century CE, to the collection and closure of the canon of Christian Scriptures in the fourth century CE. In the process, we will explore the lived worlds of the first followers of Jesus through readings of texts within and outside the New Testament but also through art, artifacts, and manuscripts at Penn and in Philadelphia.

RELS 164 History, Culture, and Religion in Early India
This course surveys the culture, religion and history of India from 2500 BCE to 1200 CE. The course examines the major cultural, religious and social factors that shaped the course of early Indian history. The following themes will be covered: the rise and fall of Harappan civilization, the Aryan invasion and vedic India, the rise of cities, states and the religions of Buddhism and Jainism, the historical context of the growth of classical Hinduism, including the Mahabharata, Ramayana and the development of the theistic temple cults of Saivism and Vaisnavism, processes of medieval agrarian expansion and cultic incorporation as well as the spread of early Indian cultural ideas in Southeast Asia. In addition to assigned secondary readings students will read select primary sources on the history religion and culture of early India, including Vedic and Buddhist texts, Puranas and medieval temple inscriptions. Major objectives of the course will be to draw attention to India’s early cultural and religious past and to assess contemporary concerns and ideologies in influencing our understanding and representation of that past.

RELS 172 East Asian Religions
This course introduces religious traditions in China, Japan, and Taiwan from ancient to contemporary times, with emphasis on their sociopolitical contexts, visual and material dimensions, and entanglement with gender, sexuality and the body. We will examine the history of Confucianism, Daoism, Buddhism, Shinto, as well as the practices, thoughts, and institutions that do not fall squarely into those categories. We will pay attention to the relationship between textual and oral traditions, and that between canons, rituals and the popular practices from both historical and anthropological perspectives.
Taught by: Cheng H
Also Offered As: EALC 008
Activity: Lecture
1 Course Unit

RELS 173 Introduction to Buddhism
This course seeks to introduce students to the diversity of doctrines held and practices performed by Buddhists in Asia. By focusing on how specific beliefs and practices are tied to particular locations and particular times, we will be able to explore in detail the religious institutions, artistic, architectural, and musical traditions, textual production and legal and doctrinal developments of Buddhism over time and within its socio-historical context. Religion is never divorced from its place and its time. Furthermore, by geographically and historically grounding the study of these religions we will be able to examine how their individual ethic, cosmological and soteriological systems effect local history, economics, politics, and material culture. We will concentrate first on the person of the Buddha, his many biographies and how he has been followed and worshipped in a variety of ways from Lhasa, Tibet to Phrae, Thailand. From there we touch on the foundational teachings of the Buddha with an eye to how they have evolved and transformed over time. Finally, we focus on the practice of Buddhist ritual, magic and ethics in monasteries and among lay communities in Asia and even in the West. This section will confront the way Buddhists have thought of issues such as “Just-War” Women’s Rights and Abortion. While no one quarter course could provide a detailed presentation of the beliefs and practices of Buddhism, my hope is that we will be able to look closely at certain aspects of these religions by focusing on how they are practiced in places like Nara, Japan or Vietnam, Laos.
Taught by: McDaniel
One term course offered either term
Also Offered As: EALC 015, SAST 142
Activity: Lecture
1 Course Unit
RELS 184 What is Taoism?
Our main goal in this course will be to answer the question, "what is Daoism?" Students will be introduced to a wide variety of ideas and practices that have at one time or another been labeled as "Daoist" in order to sort out the different senses of the term, and consider whether they have any common features. The course will begin with the Laozi, the most translated work in world literature besides the Bible and the one text affirmed by virtually all "Daoist" traditions as foundational. We will also survey several other bio-spiritual practices, such as the meditative techniques of Internal Alchemy and the self-cultivation regimens known today as Qigong and Tai-chi, and familiarize ourselves with theological and ritual foundations of the organized religious tradition known as "Daoism" which is still widely practiced across East Asia. No knowledge of Chinese is presumed. All readings will be in English.
Taught by: Goldin
Course not offered every year
Also Offered As: EALC 034
Activity: Lecture
1 Course Unit

RELS 203 The Religious Other
Course explores attitudes toward monotheists of other faiths, and claims made about these "religious others" in real and imagined encounters between Jews, Christians and Muslims from antiquity to the present. Strategies of "othering" will be analyzed through an exploration of claims about the Other's body, habits and beliefs, as found in works of scripture, law, theology, polemics, art, literature and reportage. Attention will be paid to myths about the other, inter-group violence, converts, cases of cross-cultural influence, notions of toleration, and perceptions of Others in contemporary life. Primary sources will be provided in English.

Activity: Seminar
1 Course Unit

RELS 204 The Graphic Novel and Religious Identities
Graphic novels and comic books express a variety of popular conceptions concerning religion and, as such, are capable of showing us where (and how) religious identities and phenomena exist in modern societies. Viewing comics as material-semiotic objects with multiple origins, audiences, and effects, this course investigates how religions, religious identity, and religious phenomena are expressed in and through the comic book. Situated at the intersection of religious studies, critical theory, media studies, and literary analysis, the course asks students to consider a number of issues and concerns, including: the appropriateness of the medium to express religious ideas, practices, texts, and histories; the different ways in which narratives of salvation and spiritual transformation are visualized; the role of alternative comix in the critique of popular religion; the use of comics as a means to proselytize, confess, memorialize, and historicize; and the cultural status of comics as material objects of religious import.

RELS 208 A History of Films By and About Native Americans
This course will examine films by and about Native Americans. From the very beginnings of film history, Native Americans have been a centrally important subject. While much of the writing about Native American films tends to focus on the perpetuation of stereotypes, this class will concentrate on four primary themes: 1) the role that film plays in helping the audience to understand the exceedingly complex place of indigenous people in "American" identity (with "American" signifying, in this instance, a hemispheric sense of identity); 2) the myriad of ways that indigenous people have been involved in the history of film as extras, actors, directors, producers; 3) how representations changed when Native Americans took control of production; 4) the ways in which films by and about Native Americans have helped to heal the historical trauma resulting from the "Indian Wars" that have gone on for 500+ years on the North American continent.

RELS 211 Religion and Ecology
This class will introduce the overlaps between religion and ecology. Rather than assuming that there is a necessary positive or negative relationship between religion and ecology, we will look at how these relationships have materialized in complicated ways at different moments in history. We'll consider perspectives and case studies from a range of different moments in history. We'll consider perspectives and case studies from a range of different traditions, with a special attention paid to the genesis of the field of Religion and Ecology in critiques of Christian attitudes toward the environment in the 1960s and 1970s.

RELS 223 Jewish Literature in the Middle Ages in Translation
Course explores the cultural history of Jews in the lands of Islam from the time of Mohammed through the late 17th century (end of Ottoman expansion into Europe) – in Iraq, the Middle East, al-Andalus and the Ottoman Empire. Primary source documents (in English translation) illuminate minority-majority relations, internal Jewish tensions (e.g., Qaraism), and developments in scriptural exegesis, rabbinic law, philosophy, poetry, polemics, mysticism and liturgy. Graduate students have additional reading and meetings. Spring 2015.

RELS 224 The Bible in Translation
This course introduces undergraduates and graduate students to one specific Book of the Hebrew Bible. "The Bible in Translation" involves an in-depth reading of a biblical source against the background of contemporary scholarship. Depending on the book under discussion, this may also involve contextual reading with other biblical books and the textual sources of the ancient Near East. Although no prerequisites are required, RELS 224 is a perfect follow-up course for RELS 125 "Intro to the Bible."

RELS 225 Introduction to the Dead Sea Scrolls
Exploration of the issues relating to the identification and history of the people who produced and used these materials as well as the claims made about the inhabitants of the Qumran site near the caves in which the scrolls were discovered, with a focus on what can be known about the community depicted by some of the scrolls, its institutions and religious life, in relation to the known Jewish groups at that time (the beginning of the Common Era). This will involve detailed description and analysis of the writings found in the caves -- sectarian writings, "apocrypha" and "pseudepigrapha," biblical texts and interpretations.

RELS 233 Daoist Traditions
This course examines the history of various intellectual and religious traditions that came to be known as Daoist (or Taoist in the Wade-Giles romanization). We will begin with a critical review of the twentieth-century reinvention of Daoism and the new classification of religious versus philosophical Daoism, before tracing chronologically the textual, institutional, and social history of Daoist traditions from the fourth century B.C.E. While familiarizing students with the key concepts, practices, and organizations developed in the history of Daoism, this class emphasizes the specific socio-political context of each of them. Throughout the course, we will think critically about the labeling of Daoist (as well as Confucian and Buddhist) in Chinese history and in modern scholarship. We will also question modern demarcations between philosophy, religion, and science, as well as that between the spiritual and the physical.

RELS 235 Eastern Christianities
The history of Christianity is often told from the perspective of its spread westward from Israel to Rome. Yet, in the first millenium, there were more Christians living in the East, in places as far away as Persia, Yemen, India, China, and Mongolia, than in the West. Spread across the Asian continent, these Christians were actively involved in local and imperial politics, composed theological literature, and were deeply embedded in the cultural fabric of their host societies. This course traces the spread of Christianity eastward, paying particular attention to its regional developments, its negotiations with local political powers, and its contact with other religions, including Buddhism, Manichaeanism, and Islam. Readings will cover a broad range of sources, including selections from classical Syriac literature, Manichaean texts, Mesopotamian magic bowls, the so-called "Jesus Sutras," and the Quran. All readings will be provided in English, and no background is presumed.

RELS 236 The Devil's Pact in Literature, Music and Film
For as long as we have been modern, the legend of the devil's pact has been the preferred metaphor for the desire to surpass the limits of human knowledge and power at any cost. Starting with the sixteenth century Faust Book, which recounts the story of a scholar, alchemist and necromancer who sold his soul to the devil, and extending to the present, this course offers students a chance to explore our enduring fascination with the forbidden.

Notes: All readings and discussions in English.
RELS 239 Death, Disease & Demons in the Medieval World
How did life end for people in the medieval world? For most, death was not considered an end point because the soul journeyed on after the end of the body. But to where did it journey? And how would it be reunited with the body in the future? Between the classical period and the High Middle Ages, death shifted from a moment of quiet release to a frightening struggle in which angels and demons lay in wait for a soul as soon as it exited the body. This course will examine these changing beliefs about dying, focusing primarily on Christian medieval Europe but drawing comparative examples from Judaism, the Roman world, and Byzantine Christianity. Other topics we’ll consider include martyrdom and fears of bodily dismemberment; the emergence of purgatory and depictions of the afterworld; and the development of Christian rites for the dead. We’ll also investigate beliefs about the invisible powers of demons and the apocalyptic end of times. The course will also explore not only the process by which people entered the afterlife in the Middle Ages but also the causes of their deaths—what kinds of disease primarily afflicted medieval society, and how did age, class and gender intersect with disease to affect certain populations? We will end the semester by examining that most apocalyptic of Medieval events—the Black Death—in light of recent scientific discoveries, medieval medical explanations, and social changes brought on by this demographic catastrophe. Students will be exposed to a range of primary sources as well as evidence from tombstone inscriptions, architecture and manuscript illuminations, and archaeology. No prior knowledge of Medieval history is necessary.

1 Course Unit

RELS 242 Muslim Sainthood Practices
This course aims at introducing various classical, popular and modern Muslim saints in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will learn about the major concepts initiated and circulated by these saints and their distinctive ways of dealing with spiritual aspects. While focusing on their sainthood practices, we also study the nature of the dialogue which addresses the questions such as pluralism, localism, and a new paradigm of spirituality that continually interacts with diverse modes of everyday life in South Asia. In order to understand their impact on visual and media cultures, we also watch two documentaries and compare these visual sources with sainthood literature and practices.

Also Offered As: SAST 251
Activity: Seminar
1 Course Unit

RELS 244 From Miracles to Mindfulness
In 1902, the most famous philosopher in America, William James, revolutionized the study of religion by analyzing religion as an experience rather than as a set of doctrines or scriptures. In this course, we will pick up the inquiry that James and scholars such as Sigmund Freud began by exploring new approaches to the science and philosophy of religious experience. We will invite a series of experts from a wide range of fields—neuroscience, psychoanalysis, phenomenology, psychology, anthropology, to name only a few—to present their cutting-edge research on the nature of religious experience. How can religious experience be studied? What does the research reveal about religious experience? And what can we learn from such experiences about the workings of the human mind and human society? The course has two components: 1) a discussion-centered mini-seminar from 3:30-5:00 will open consideration of the subject with help from relevant readings 2) a guest lecture series every Tuesday from 5:00-6:30, featuring leading scholars who approach religious experience from different disciplinary angles or in light of different questions.

Activity: Lecture
1 Course Unit

RELS 245 Sufism
This course is a survey of the large complex of Islamic intellectual and social perspectives subsumed under the term Sufism: Sufi philosophies, beliefs, practices, and social organizations have been a major part of the Islamic tradition in all historical periods and Sufism has also served as a primary muse behind Islamic aesthetic expression in poetry, music, and the visual arts. In this course, we will attempt to understand the nature and importance of Sufism by addressing both the world of ideas and socio-cultural practices. We will trace the development of Sufism as a form of Muslim piety linked to key notions in the Quran as well as living practices of venerating the Prophet Muhammad. We will then immerse ourselves in Sufi theoretical writings through a select list of primary sources introducing foundational Sufi concepts concerning the annihilation of oneself in God, and the various stages of the Sufi quest for spiritual union. From there, we will shift to a discussion of the interactions between Sufism and philosophy by looking at the writings of two of the most influential Sufi thinkers, Al-Ghazali and Ibn al-Arabi. We will also study the important role of Sufi poetry through a close reading of a selection of Rumi’s works. In our discussion of the social and political dimensions of Sufism, we will explore the relations between Sufi movements and religious and political authority, focusing on antinomianism and patronage in the Ottoman Empire, and on Sufi responses to colonial rule. The last part of the course will look at the roles of Sufis and Sufism in contemporary societies from South Asia to North America.

REL 246 Spirituality in the Age of Global Warming: Designing a Digital Mapping Project in Scalar

We are living in the midst of one of the most severe crises in the Earth's history. Science confirms the glaciers are melting, hurricanes are growing more intense, and the oceans are rising. But there is also a deeply spiritual dimension to global warming that does not factor into the scientific explanations of the Anthropocene. "Spirituality" will be defined not in terms of one particular religion, but in relationship to a passionate study of the environment and nature. Readings will include materials from both the sciences and the humanities such as Donella Meadows's Thinking in Systems, Elizabeth Kolbert's The Sixth Extinction, Barbara Kingsolver's Flight Behavior, and films such as Black Fish and Wale Rider. The theoretical focus of the course will be how "multispecies partnerships" can help us better understand and mitigate the effects of Climate Change. This class will work collaboratively on a digital archive with an interactive mapping interface designed in Scalar. This newly developed platform allows for the creation of multimedia exhibits that will document how Global Warming is affecting coral reefs in the tropics, glaciers in the Arctic and Antarctic, rainforests in the Amazon and rivers of Philadelphia. Students will also work individually to design interactive maps on the Scalar platform documenting their own more personal interactions with the environment.

REL 248 Introduction to Islamic Law

This course will introduce students to classical Islamic law, the all-embracing sacred law of Islam. Among the world's various legal systems, Islamic law may be the most widely misunderstood and even misrepresented; certainly, misconceptions about it abound. Islamic law is, however, the amazing product of a rich, fascinating and diverse cultural and intellectual tradition. Most of the readings in this course will be taken from primary sources in translation. Areas covered will include criminal law, family law, law in the Quran, gender and sexuality, the modern application of Islamic law, Islamic government and other selected topics.

REL 249 Re-enchancing Modernity: A Guide to Sufism in South Asia

This undergraduate level course introduces students to Sufism in modern South Asia, with a particular focus on how Muslim 'mystics' and their 'mystical' methods interacted with modernity, colonialism, technological developments and globalization. This course is divided into three parts.

In the first part of this course, students are provided with an overview of the theological and historical background of the dominant expression of Islam that came to be identified as 'Sufism' of 'Islamic mysticism', the historical development of Sufi institutions and spaces in South Asia, and the historical emergence of South Asia as a prominent global center of Sufism. The second and main part of this course introduces students to a range of anthropological and historical works that are revelatory about how Sufi in modern South Asia were and remain intimately connected to modern political and technological developments. Providing students with an overview of Sufi re-enchancements of modernity from the 19th to 21st century, this section of the course focuses upon Sufi movements and masters who perpetuated or defended customary Islam through sophisticated appropriations of technologies and print networks, and negotiations with non-Muslim rulers and societies. Moreover, students will be introduced to anthropological and historical scholarship on religious worlds in modern South Asia that were and remain steeped in 'customary Islam' and Sufi performances and interpretations of Islam. These sources reveal how 'mystical' methods of performing Islam through ecstasy and spiritual restoration, and interpretations of dreams and visions, have regularly interacted with contemporaneous technologies. The third part of this course introduces students to the globalization of South Asian Sufism in North America, Europe and Southeast Asia. Herein, students will be encouraged to engage with anthropological and literary works pertaining to itinerant South Asian Sufi masters and their devotional cults, and introduced to active South Asian Sufi centers in Philadelphia.

REL 251 History of Hinduism

This course will explore the history of the religion(s) designated by the term 'Hinduism' from their earliest articulations down to the rise of modern reforms in the nineteenth century. The study of Hinduism is perhaps unique among the scholarly traditions on world religions in that it has to date had no serious connected account of its historical development, as scholars have preferred to take structural, sociological, phenomenological, and doctrinal approaches to the religion. The course, after a brief review of scholarly approaches to Hinduism and their interpretive legacies, will seek to develop a historical sense of the religion through attention to shifts in liturgy, ritual, theology, doctrine, sacral kingship, and soteriology. The course will include the reading of primary sources relevant to understanding these changes as well as highlight both modern and premodern traditions of their interpretation. It will also consider and assess some of the key interpretive ideas in the study of Hinduism, including, Sanskritization, Great and Little Traditions, cult formation, regional and popular religious movements, and canon formation. There will also be sustained consideration of the question of religion and socio-political power as well as relations between Hinduism and other religions like Buddhism and Islam.

RELS 254 Violence, Tolerance, Freedom
This seminar examines how the adjective "religious" has been used to modify the nouns "violence," "tolerance," and "freedom." It traces the historical development of liberal ideas of tolerance and human rights, interrogates the common assumption that religion exerts a pervasive influence on politics and vice versa, critically examines the concept of terrorism, and connects the neoliberal ideal of unfettered free markets to the idea of being "spiritual but not religious."
Taught by: Jolyon Thomas
Also Offered As: ANTH 253
Activity: Seminar
1 Course Unit

RELS 256 Existential Despair
This is an experimental course that seeks to combine creative pedagogical methods and alternative scheduling to encourage intellectual reflection and emotional vulnerability through an in depth study of the way people cope with existential despair. Through a reading of memoirs, novels, poetry, and essays in an atmosphere conducive to close-reading and full-participation students will explore a wide-range of ways of coping with, describing, and comprehending moments of great despair. Lectures will explain the ritual, liturgical, homiletic, meditative, reflective, self-destructive, psycho-somatic, and ascetic ways despair is both conditioned and mitigated by different thinkers from various traditions over time. Format: This course is different from most others in that there is no homework, no class participation, no outside reading, and no research papers. There will be no work given to students or expected of them outside of class. All work is done in class and class is very long (8 hours straight, once a week, from four PM to midnight). Students will eat together in class, there will be three bathroom breaks, but there will be no internet, no phones, no computers, and no auditors. Each student must be fully committed to the class and 75% of the grade will be determined by class participation.
Taught by: McDaniel
Prerequisite: Permission needed from instructor

RELS 259 Ultimate Meanings
Does life have some ultimate meaning? In their search for an answer to this question, people tell stories- stories about the creation of the world, about great human beings confronted with the mysteries of existence, about what happens to people after death. To explore the role of stories in finding meaning in life, we will focus on some of the most meaningful stories ever composed: the biblical stories of Adam and Eve, Abraham and his family, the Exodus, Job and his friends, and the life and death of Jesus. One of our goals is to try to retrieve the original meaning of these narratives, what their authors intended, but we will also explore what they have come to mean for readers in our own day for believers and skeptics, scientists and artists, fundamentalists and feminists.

RELS 270 Topics in East Asian Religions
This course examines the relationship between religious institutions and the state in East Asia. Focusing on China and Japan, we will learn about the impact of religious ideas, practices, and organizations on social, political and economic processes and inspect the role of religion in the consolidation of individual, communal, and national identity. Adopting a comparative and transnational approach, we will examine the impact of Asian religious traditions: Confucianism, Daoism, Buddhism, and Shinto, as well as global religions such as Islam and Christianity, on the states and their role in shaping power relations on the international level.

RELS 271 The Politics of Shinto
Shinto-derived images and ideas frequently appear in Japanese anime and film, and journalists and academics frequently mobilize the term Shinto as a way of explaining Japan's past or envisioning its future. The environmentalist left champions a green Shinto while Shinto-derived ideas serve as red meat for politicians pandering to Japan's nationalist right. While the influential position Shinto occupies in Japanese sociopolitical life is therefore clear, the term Shinto itself is actually not. Depending on who one asks, Shinto is either the venerable indigenous religion of the Japanese archipelago, the irreducible core of Japanese culture, a tiny subset of Japanese Buddhism, an environmentalist ethic, or some combination of these. This course investigates the multivariate types of Shinto envisioned by these competing interest groups.

RELS 303 Power and Penit: The Paradox of Monarchy among Ancient Greeks, Romans, and Jews
We imagine ancient Greece and Rome as the cradles of democracy and republicanism, the early Judea as pious theocracy, but the evidence tells us that monarchy was the most common and prevalent form of government in antiquity (and the premodern world in general). Despite their ubiquity, the King was a polarizing figure—in reality and in conception. On the one hand, some idealized the monarchy as the ideal leader, and monarchy provided the language with which to describe and even imagine the very gods—but on the other, monarchs were widely reviled in both theory and practice, from the Greek tyrant to the biblical Saul. The Emporor Augustus loudly denied his own affinity to the office of "king," even as he ruled alone and was revered as a god. In other words, kings stood for both the ideal ruler and the worst form of government. This class confronts the paradox of the King. This class will take a special look at the idea and institution of kingship in the Near East, among the Jews, Greeks, and Romans to assess and discuss similarities, differences, and mutual influences among these cultures. Through the lens of the "king" we will explore the idea of god, government, human frailty, and utopianism. Why did the rule of one prevail, why was it so attractive to so many? How was the royal rule legitimized? What role did religious beliefs play for keeping a monarchical system stable? What did people expect from their rulers and what happened if the ruler failed to fulfill these expectations? How was the concept of monarchical rule adopted and transferred into other spheres, such as religious belief systems or hopes for messianic kingship? While kingship is a rich field of scholarly inquiry, the question of its ubiquity, and the entanglement and divergences of these three cultures is rarely studied in context and comparison.

RELS 311 Muslims, Christians, and Jews in the Middle East: Historical Perspectives
A reading- and discussion-intensive seminar that addresses several recurring questions with regard to the Middle East and North Africa. How have Islam, Judaism, and Christianity influenced each other in these regions historically? How have Jews, Christians, and Muslims fared as religious minorities? To what extent have communal relations been characterized by harmony and cooperation, or by strife and discord, and how have these relations changed in different contexts over time? To what extent and under what circumstances have members of these communities converted, intermarried, formed business alliances, and adopted or developed similar customs? How has the emergence of the modern nation-state system affected communal relations as well as the legal or social status of religious minorities in particular countries? How important has religion been as one variable in social identity (along with sect, ethnicity, class, gender, etc.), and to what extent has religious identity figured into regional conflicts and wars? The focus of the class will be on the modern period (c. 1800-present) although we will read about some relevant trends in the early and middle Islamic periods as well. Students will also pursue individually tailored research to produce final papers. Prior background in Islamic studies and Middle Eastern History is required. This class is intended for juniors, seniors, and graduate students.

RELS 356 Living Deliberately: Monks, Saints, and the Contemplative Life
Students who are not Religious Studies Majors and are not honors students must gain permission from instructor to enroll in this course. This is an experimental course in which students will experience monastic and ascetic ways of living. There will be no examinations, no formal papers, and very little required reading. However, each participant will need to be fully committed intellectually and participate in the monastic rules in the course involving restrictions on dress, technology, verbal communication, and food. The course subject matter is about ways in which nuns, monks, shamans, and swamis in various religious traditions (Buddhist, Muslim, Catholic, Jain, Taoist, Hindu, Animist, among others) have used poetry, meditation, mind-altering chemicals, exercise, magic, and self-torture to cope with pain and suffering, as well as struggle with spiritual, ethical, and metaphysical questions concerning the nature of the soul, the afterlife, and reality. Through monastic and spiritual practice, this course hopes to provide students with an opportunity to struggle with these questions themselves.

RELS 401 Sacred Stuff in Medieval & Early Modern Europe
During devotional activities people engage with various objects and believe that they are imbued with religious significance. In this seminar, we will explore the material culture of religion across medieval and early modern Europe. From rosary beads and crucifixes to devotional books, prints, and paintings, a range of "sacred stuff" populated the lives of medieval and early modern Europeans. We will consider objects associated with daily life as well as rites of passage. We will study objects of Christian devotion and will consider how the advent of Protestantism and the Catholic Reformation influenced the types of objects devotees used for their devotion. In this seminar, we will discuss the material culture of Judaism and Islam, religions also practiced in medieval and early modern Europe. We will engage with "sacred stuff" from a variety of disciplinary perspectives, including art history, literature, archaeology, social history, and cultural history. We will then hone these skills with visits to local museums and libraries where we will view medieval and early modern books, objects and images. Course assignments will include an in-depth analysis of a devotional object from medieval or early modern Europe chosen by the student.

REL 434 Christian Thought From 1000-1800
This course will trace the development of Christian thought (including philosophy, theology, spirituality and mysticism) from the early Scholastic period to early Methodism. Readings will be from both primary and secondary sources. A research paper will be required of each student. 
Spring 2014: This course will give an overview of the main currents of Western Christian thought from the first age of reform (that is, the Central Middle Ages) through the Reformations of the sixteenth century, to the eve of the Enlightenment. In these centuries, "Christendom" underwent an almost constant process of internal and external self-definition. The most striking results of this process were the definitive separation of eastern and western Christianity and the division of the western church into what became known as Protestant and Catholic Christianity. Our focus will be on the changing definitions of Christian culture, including theological formulations (definitions of orthodoxy and heterodoxy), trends of spirituality and mysticism, forms of worship, and gender roles and definitions. Attention will also be given to institutional questions such as ecclesiastical hierarchy, monasticism, scholasticism and the rise of universities, and the changing relationship between the secular and religious worlds. Readings will be from both original and secondary sources. Additional primary sources will be available online, attached to the course Blackboard page. I will supply copies of other readings.

REL 438 Topics in Medieval History
This seminar introduces students to the development of Jewish and Christian biblical interpretation by focusing on ancient, medieval, and modern interpretations of the Sermon on the Mount. The Sermon on the Mount is part of the Gospel of Matthew and is often considered to summarize the essential teachings of Jesus of Nazareth. Students will encounter a variety of important interpreters (including Origen, John Chrysostom, Augustine of Hippo, Thomas Aquinas, Martin Luther, Leo Tolstoy, Albert Schweitzer, Dietrich Bonhoeffer, Clarence Jordan, and Hans Dieter Betz), guided by appropriate secondary materials. The seminar will utilize a combination of lecture, discussion, student presentations, reports, close reading, and a research paper. Students will be encouraged to do original research in the primary sources. This course has no prerequisites. The readings will be made available in English. The class will utilize a combination of lecture, discussion, student presentations, reports, close reading, and a research paper.

REL 439 Religion, Social Justice & Urban Development
Urban development has been influenced by religious conceptions of social and economic justice. Progressive traditions within Judaism, Christianity, Islam, Buddhism, Hinduism, Jainism, Bahá’í, Humanism and other religions and systems of moral thought have yielded powerful critiques of oppression and hierarchy as well as alternative economic frameworks for ownership, governance, production, labor, and community. Historical and contemporary case studies from the Americas, Europe, Africa, Asia, and the Middle East will be considered, as we examine the ways in which religious responses to poverty, inequality, and ecological destruction have generated new forms of resistance and development.

REL 446 Digital Humanities
Penn recently opened the Price Lab for Digital Humanities as part of the university's new strategic plan, so it is a very exciting moment for DH at Penn. This class might be considered an advanced introduction to the relatively short history of DH. It will focus on one of the questions that has vexed the field from the beginning: Why are the Digital Humanities So White? as Tara McPherson put it rather bluntly in a chapter of Debates in the Digital Humanities. The class will provide an overview of some of the foundational texts of DH, but the primary focus of the class will be involving students in a new DH project to construct an interactive timeline, built in Omeka. The spatio-temporal timeline seeks to represent Iroquois history as seen from the perspective of Iroquois scholar and Faithkeeper, Richard Hill. Hill is the director of the Dyohahage: Indigenous Knowledge Centre on the Six Nations reserve in the Grand River region of Ontario and one of the most highly regarded traditional knowledge keepers of his generation, so it is a great honor to be able to work with him. On a more theoretical level, the class will be addressing the relationship between cultural codes and digital codes. In other words, how to represent Iroquois spiritual history (i.e., mythical events) on a chronological timeline? How to represent indigenous space on maps created by the people who colonized the Iroquois (e.g., the boarder between Canada and the US cuts the Iroquois traditional homeland in half)? Students will learn how to evaluate a complex and challenging project like this, which is still in its earliest stages. On a more practical level, students will learn skills in the exhibit building software Omeka. The class will engage many different forms of history from archival documents to You Tube videos, in its study of how digital technology makes it possible to represent the indigenous oral tradition much more accurately than is possible on the printed page.

REL 471 Religion in Eleven Objects
This advanced course for Religious Studies majors and minors approaches the study of religion through material objects. By looking at both sacred and everyday objects like rosaries melted in atomic blasts, magical amulets used in healing rituals, temple murals defaced by invading armies, manuscript stained by hold water, we will explore the many ways people express their spiritual aspirations and existential fears through objects. Not only will a different object from a variety of religious traditions be examined each week (eleven in total), but we will also explore different methodological and theoretical approaches to the study of religion. Psychological, phenomenological, bio-genetic, sociological, art historical, discursive, post-modern, and narrative approaches will be discussed.

REL 509 Teaching Religious Studies
Many faculty in academia, especially at a research university, think of themselves as scholars first and teachers second. The emphasis on scholarship is essential for a position at a research university, but what the culture of such institutions can obscure is the importance of teaching as part of the academic vocation. The purpose of this course is to help prepare graduate students to teach academic religious studies, not to teach them how to teach, a skill developed through experience and feedback, but to encourage students to plan in advance for their work as educators and to develop their teaching aspirations and approach in dialogue with issues and debates in Religious Studies, the Humanities and the field of Education.
Taught by: Weitzman
Course usually offered in fall term
Activity: Seminar
1 Course Unit

REL 510 Civil Religion
In the first half of the course, we will examine the theoretical question of whether modern liberal societies need a civil religion - an idea first proposed in the late eighteenth century by writer who feared that without some unifying ideal or principle the centrifugal forces at work in modern societies would lead them to disintegrate. We will examine various authors who have defended the idea of civil religion in these terms (including J.J. Rousseau, J.G. Herder, and G.W.F. Hegel) as well as several who (implicitly or explicitly) have rejected the argument (Max Weber, Michael Oakeshott, Daniel Bell, and Niklas Luhmann). In the second half of the class, we will turn to the American context and explore the way these arguments have played themselves out from the time of the constitutional frames to today. In this part of the class, we will read and discuss excerpts from the Federalist Papers and Tocqueville's Democracy in America, selected presidential speeches, nineteenth- and twentieth-century debates surrounding Manifest Destiny and American Exceptionalism, John Dewey/Richard Rorty's proposal for a religion of democratic "common faith," and the neoconservative case for a civil religion of "national greatness." Along the way we will also have occasion to examine sociological treatments of civil religion by such authors as Emile Durkheim, Robert Bellah, and Seymour Martin Lipset.

REL 517 Topics in American Religion
From Marvin Gaye, to Tammy Faye Baker, to Sarah Palin and James Baldwin, Pentecostalism has influenced many, including politicians, preachers, writers, and the media. One of the fastest growing religious movements in the world, Pentecostalism continues to have a profound effect on the religious landscape. Pentecostalism's unique blend of charismatic worship, religious practices, and flamboyant, media-savvy leadership, has drawn millions into this understudies and often controversial religious movement. This course will chronicle the inception and growth of Pentecostalism in the United States, giving particular attention to beliefs, practices, gender, ethnicity, and Global Pentecostalism.

REL 520 Spirit and Law
While accepting "the yoke of the commandments", Jewish thinkers from antiquity onward have perennially sought to make the teachings of revelation more meaningful in their own lives. Additional impetus for this quest has come from overtly polemical challenges to the law, such as those leveled by Paul, medieval Aristotelians, Spinoza and Kant. This course explores both the critiques of Jewish Law, and Jewish reflections on the Law's meaning and purpose, by examining a range of primary sources within their intellectual and historical contexts. Texts (in English translation) include selections from Midrash, Talmud, medieval Jewish philosophy and biblical exegesis, kabbalah, Hasidic homilies, Jewish responses to the Enlightenment, and contemporary attempts to re-value and invent Jewish rituals.

One term course offered either term
Also Offered As: HEBR 583
Prerequisites: Reading knowledge of Hebrew.
Activity: Seminar
1 Course Unit

RELS 537 Medieval Christian Mysticism
The course traces the flowering visionaries (mostly women) in Italy between the thirteenth and seventeenth centuries. We will pay close attention to the writings of some of the more famous women, notably Claire of Assisi, Catherine of Siena, Angela of Foligno, and Lucia Brocadelli, (all of whom can be read in English as well as in the original) and contextualize them with secondary sources about gender roles and the aspects of “female Christianity,” especially connected to the materiality of women in pre-modern Italy (Bynum, McGinn, Zarré, etc.). We will meet in the library to take advantage of the manuscript and early book holdings that Penn has to offer.

RELS 541 Religion and the Visual Image: Seeing is Believing
Seeing is Believing engages in a historical, theoretical, and cross-cultural analysis of the place of visuality in religion and of religion in visual culture. We will examine images, buildings, places, objects, performances and events. The geographical, cultural and historical scope of the material is broad, including subjects from Europe, the Islamic World, non-Muslim South Asia, the US and Latin America from the medieval period until the present. Theological works will be read in conjunction with representative examples to invite intellectual engagement in a socially and historically grounded way. Important issues to be covered include the relationship of visual to material culture; visual theories versus theories of vision; locating religion in human sensory experience; perception at individual and collective levels; authenticies, fakes and simulacra; iconoclasm and image veneration; aesthetics, use and utility; and things.

Also Offered As: NELC 589, SAST 541
Activity: Seminar
1 Course Unit

RELS 551 History of Hinduism
This course will explore the history of the religion(s) designated by the term 'Hinduism' from their earliest articulations down to the rise of modern reforms in the nineteenth century. The study of Hinduism is perhaps unique among the scholarly traditions on world religions in that it has to date had no serious connected account of its historical development, as scholars have preferred to take structural, sociological, phenomenological, and doctrinal approaches to the religion. The course, after a brief review of scholarly approaches to Hinduism and their interpretive legacies, will seek to develop a historical sense of the religion through attention to shifts in liturgy, ritual, theology, doctrine, sacrality, kingship, and soteriology. The course will include the reading of primary sources relevant to understanding these changes as well as highlight both modern and premodern traditions of their interpretation. It will also consider and assess some of the key interpretive ideas in the study of Hinduism, including, Sanskritization, Great and Little Traditions, cult formation, regional and popular religious movements, and canon formation. There will also be sustained consideration of the question of religion and socio-political power as well as relations between Hinduism and other religions like Buddhism and Islam.

Also Offered As: SAST 550
Activity Seminar
1 Course Unit

RELS 552 Emotion and Power
Is power smart? Conventional models of power – both in everyday, commonsense understandings and in academic studies – tend to be instrumentalist. They understand power as a thoughtful exercise designed to achieve particular ends. But as we consider the political-cultural landscape, does the assumption that power is rational hold up? This seminar will bring together an in-depth exploration of Michel Foucault’s theory of power with contemporary affect theory to address this question. We will begin by mapping out Foucault’s “analytics of power,” from his early work on power knowledge to his late work on embodiment, desire, and the care of the self. We will then consider a series of interpretations of Foucault within contemporary affect theory, an approach which centralizes the non-rational, emotive force of power. Along the way, we will consider formations of sex, race, religion, material culture, and cinema. No previous knowledge of theory is required. Students will be encouraged to connect the theoretical frames of the class to their own fields and areas of interest.
Taught by: Schaefer
One term course offered either term
Activity: Seminar
1 Course Unit
RELS 557 Seminar in Rabbinic Judaism
Most of the foundational writings of rabbinic Judaism corpora of Midrash, Mishna, and the two Talmuds were in existence by the end of the sixth century CE. Yet, for several centuries thereafter, there is little evidence attesting to the lived nature of rabbinic culture and society. Course will focus on writings by Jews and about Jews, produced between the 7th and 10th centuries, complemented by secondary sources. Texts will include selections from archaeological inscriptions; Midrash; liturgical poetry; Targum; Masora; geonic responsa, writings by Muslims and by Church Fathers. While students must be able to read Hebrew, much class time will be devoted to the improvement of reading and comprehension skills. Undergraduates should seek permission of the instructor.

RELS 571 Advanced Topics in Buddhism
This is an advanced course for upper level undergraduates and graduate students on various issues in the study of Buddhist texts, art, and history. Each semester the theme of the course changes. In recent years themes have included: Magic and Ritual, Art and Material Culture, Texts and Contexts, Manuscript Studies. Fall 2013 Topic: Buddhist repertoires (idosyncratic and personal assemblages of beliefs, reflections, wonders, possessions, and practices) for a large part, material and sensual. Buddhists are often sustained by their collection, production, and trading of stuff amulets, images, posters, protective drawings, CDs, calendars, films, comic books, and even Buddhist-themed pillow cases, umbrellas, and coffee mugs. Aspirations are interconnected with objects. Beliefs are articulated through objects. Objects are not empty signifiers onto which meaning is placed. The followers and the objects, the collectors and their stuff, are overlooked in the study of religion, even in many studies in the growing field of material culture and religion. What is striking is that these objects of everyday religiosity are often overlooked by art historians as well. Art historians often remove (through photography or physical movement to museums or shops) images and ritual implements from their ritual context and are seen as objets d’art.

RELS 581 Environmental Activism & Digital Humanities
We are living in a moment of Environmental crisis as the oceans rise and carbon emissions warm the planet. And yet more than half the US population believes climate change will not harm them personally and 30% feel they cannot trust science. As the standoff at Standing Rock and the #NoDapl movement made clear, Native Americans’ spirituality is playing a central role in galvanizing the public and providing alternative narratives to capitalist consumption. Students will work on ongoing projects to build partnerships between Penn and two Native American communities—Sitting Bull College on the Standing Rock Sioux reservation in South Dakota and a UNESCO World Heritage Site nomination submitted by D¡bwe First Nations in Canada to preserve 24,000 sq. kms. of boreal forest through the use of Traditional Ecological Knowledge. This class will learn to build multi-media exhibits using Scalar, Omeka, Google Earth, and StoryMap. No previous experience is necessary. Students will learn about choosing a platform, creating dynamic narratives that incorporate videos and interactive features, and learning about grant writing in order to sustain digital projects and benefit Indigenous communities. Although the emphasis will be on practical applications or praxis, the course will also engage with new theories from the fields of Digital Humanities and Environmental Humanities as a basis for building new exhibits.

Also Offered As: ANTH 581
Activity: Seminar
1 Course Unit

RELS 586 History of Islam in Asia
This class is designed to structure reflection on Islam and Islamic culture in South Asia—Indonesia, Pakistan, India, and Bangladesh. Contrary to the popular perception that the Middle East defines Islam, Asian countries not only host the most Muslims in the world but have been the source of some of Islam’s most important social and reform movements in the last three hundred years. This class looks at the history of Muslim societies across Asia not just as a religious community but also as a social and cultural bloc (a distinctive part of what Marshall Hodgson called the ‘Islamicate’ world, but also an area that challenges some of Hodgson’s assumptions about the Islamicate world). This course allows for the study of the Muslim world between the years 1700 to present. The class will allow students to compare and contrast Muslim societies over the last three centuries, examine points of confluence for geographically- or culturally- distinct Muslim peoples in the last three centuries, and in their writing assignments focus on the history of one society in a wider Islamicate context. In the process students will gain a more nuanced awareness of how Islam has made an impact in Asian countries, and how Asian countries have in turn impacted Islam.

Activity: Seminar
1 Course Unit
RELS 620 Godliness, Miracles, Madness
This graduate-level course introduces students to religious worlds within port cities of the modern Indian Ocean that were centered upon peripatetic Muslim, Savi, Christian and Sikh miracle-workers, missionaries and 'gods'. This course will particularly consider how extensive, published sources reveal how religion in the 19th and 20th century cosmopolitan port cities and islands: was centered upon holy men or spiritual beings, and intricately connected to modern economic, political and technological developments in the Indian Ocean. This course is divided into three parts. In the first part of this course, students will be introduced, on the one hand, to the scholarship on port cities or islands of, and religions or religious networks in, the modern Indian Ocean. On the other hand, to anthropological, historical and literary works on Muslim saints, Christian missionaries and Savi gods in the Indian Ocean. In the second and main section of this course, students will be introduced to contemporary academic literature pertaining to the inter-linkages between itinerant miracle-workers, missionaries, 'gods' and devotional cults, and economic, political and technological developments in the Indian Ocean. As well as works that explore European institutions, barracks, plantations, cells and asylums, and the steam travel being steeped, in customary religion, carnivals, ecstasy, madness and miracle stories. Here, students will be encouraged to consider ways in which a study of religion and religious economies of modern Indian Ocean port cities can be recovered through extracts from a range of anthropological, literary and historical sources. In the third part of this course, students will be encouraged to engage with the question of whether the religion of devotional cults, preoccupied with the powers of Muslim, Savi, Christian, and Sikh miracle-workers, missionaries and 'gods' in cosmopolitan port cities, was a distinct product of circulations within the Indian Ocean.

RELS 630 Gender and Religion in China
This course examines gender in Chinese religious culture from ancient to contemporary times. We will explore topics including the Buddhist accommodation of Chinese family system, Chinese transformation of the bodhisattva Guanyin, female deities in Daoist and popular religious pantheons, writings about religious women, female ghosts and fox spirits in literary imagination and folk tales, and the significance of yin force in Chinese medicine and Daoist alchemy. Through the case of China, we will look at how gender plays critical and constitutive roles in religious traditions, and how religion can be used both to reinforce and to challenge gender norms.

Activity: Seminar
1 Course Unit

RELS 632 Hinduism&Colonial Mgmt. Hinduism and Colonial Modernity
This seminar deals with the question of modernity in South Asia, with a specific focus on the construction, dissemination, and politicization of Hinduism in nineteenth and twentieth century India. It focuses on three central heuristic lenses--namely those of European imperialism, Orientalism, and nationalism--to study modernity and its discontents. What was at stake in the encounter between colonial modernity and India's religions in nineteenth and early twentieth centuries? How did colonial and native discourses on "reform" and "revival" shape Indian religions as we understand them today? How is modern "Hinduism" inextricably hinged to early forms of cultural transnationalism, Orientalism, and incipient forms of nationalism? This seminar approaches questions such as these and others, with an eye to understanding how nineteenth and early twentieth century discourses continue to shape contemporary understandings of Hinduism in deep and highly politicized ways.

Activity: Seminar
1 Course Unit

RELS 643 The Persian Intellectual Tradition
What makes Persian culture distinctive within broader Islamic intellectual history, and what constitutes the historical and geographical boundary of the Persianate intellectual and cultural zone? These questions lie at the center of inquiry in this seminar in which participants will read and discuss a broad range of works from the 11th to the 20th centuries. Readings will include works on philosophy and language, Sufi epic poems, religious and cultural geographies, accounts of natural and manufactured wonders, urban and political histories, as well as other kinds of texts. All readings will be in English for the regular meeting of the seminar; students with a reading knowledge of Persian and an interest in participating in an additional meeting to read the assignments in their original language should register for the higher of the two numbers listed for this course.

1 Course Unit

RELS 670 Religious Bodies and Sex in South Asia
This graduate-level course introduces students to the writings of key religious scholars in modern South Asia who associated the regeneration of Hinduism, Islam, and Sikhism with the cultivation of bodies and sexual practices. Particular attention will be paid towards religious texts produced in modern India, Pakistan and Bangladesh pertaining to sexual bodies, exercises and health; celibacy; body-building; the transmission of sexual knowledge; and the political roles of the 'Hindu', 'Muslim' and 'Sikh' body. In this course, students will be encouraged to engage a range of sources including religio-sexual manuals, autobiographies, novels, speeches, pamphlets, official records, recipes and films. Moreover, students will be introduced to the academic literature on South Asian religious scholars and 'sex gurus' in South and Southeast Asia; religious sexuality in South Asia, Southeast Asia, the Middle East and Europe; and, the transcultural literary networks that led to the production of religio-sexual texts in modern South Asia.

RELS 702 Topics in Medieval Art
Spring 2017: For the Christians of Medieval Europe, pilgrimages were one of the key embodied experiences of faith. Reliquaries, churches with their welcoming portals, manuscripts and music: all were crafted to augment the corporeal experience of the divine. This seminar will take the material culture surrounding the relic and its veneration as a lens for exploring the Middle Ages, from the Early Christian to the High Gothic. Cross-disciplinary methodologies and cross-cultural examples will be considered to understand these experiences. While proceeding chronologically, each week will focus on a distinct strategy for shaping the interaction between faith and matter.

RELS 738 The Long Reformation in Britain and America
This seminar will explore how protestantism infiltrated and shaped the British Isles and colonies at multiple levels, and in particular how it was imposed from above, received in the pew, and negotiated across the gap between the two. We shall examine this process during the century and a half following the official Reformation in England, Scotland, Anglo-Ireland, the Gaidhealtachd, and British settlements in North America. Readings will be for the most part recent (and some classic) historical monographs, with a sampling of primary sources including spiritual autobiographies, diaries, church court records, and sermons. Depending on student interest, readings in anthropology of religion and ritual may be added. The course will begin with readings in secondary literature, then turn to primary research. Each participant will produce a short work (ca. 12 pp. - the length of a conference paper) of original research in primary materials. An introduction to paleography will allow you to use scanned or microfilmed manuscript sources as well as early printed works. We meet in a library seminar room in order to incorporate the material history of the early modern religious text (manuscript and print) and print image as well, with the help of our rare books and manuscripts curators.

Russian (RUSS)

RUSS 001 Elementary Russian I
This course develops elementary skills in reading, speaking, understanding and writing the Russian language. We will work with an exciting range of authentic written materials, the Internet, videos and recordings relating to the dynamic scene of Russia today. At the end of the course students will be comfortable with the Russian alphabet and will be able to read simplified literary, commercial, and other types of texts (signs, menus, short news articles, short stories) and participate in elementary conversations about daily life (who you are, what you do every day, where you are from, likes and dislikes).
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: RUSS 501
Activity: Lecture
1 Course Unit

RUSS 002 Elementary Russian II
Continuation of RUSS001. Further work developing basic language skills using exciting authentic materials about life in present-day Russia. At the conclusion of the course, students will be prepared to negotiate most basic communication needs in Russia (getting around town, ordering a meal, buying goods and services, polite conversation about topics of interest) and to comprehend most texts and spoken material at a basic level.
For BA Students: Language Course
Taught by: Peeney/Alley
Course usually offered in spring term
Also Offered As: RUSS 502
Prerequisite: RUSS 001 or equivalent
Activity: Lecture
1 Course Unit

RUSS 003 Intermediate Russian I
This course will develop your ability to use the Russian language in the context of typical everyday situations, including university life, family, shopping, entertainment, etc. Role-playing, skits, short readings from literature and the current press, and video clips will be used to help students improve their language skills and their understanding of Russian culture. At the end of the semester you will be able to read and write short texts about your daily schedule and interests, to understand brief newspaper articles, films and short literary texts, and to express your opinions in Russian. In combination with RUSS 004, this course prepares students to satisfy the language competency requirement.
For BA Students: Language Course
Taught by: Peeney/Alley
Course usually offered in fall term
Also Offered As: RUSS 503
Prerequisites: RUSS 001 and 002 or placement exam.
Activity: Lecture
1 Course Unit

RUSS 004 Intermediate Russian II
A continuation of RUSS003. This course will further develop your ability to use the Russian language in the context of everyday situations (including relationships, travel and geography, leisure activities) and also through reading and discussion of elementary facts about Russian history, excerpts from classic literature and the contemporary press and film excerpts. At the end of the course you will be able to negotiate most daily situations, to comprehend most spoken and written Russian, to state and defend your point of view. Successful completion of the course prepares students to satisfy the language competency requirement.
For BA Students: Last Language Course
Taught by: Peeney/Alley
Course usually offered in spring term
Also Offered As: RUSS 504
Prerequisite: RUSS 003 or placement exam
Activity: Lecture
1 Course Unit

RUSS 009 Central and Eastern Europe: Cultures, Histories, Societies
The reappearance of the concept of Central and Eastern Europe is one of the most fascinating results of the collapse of the Soviet empire. The course will provide an introduction into the study of this region its cultures, histories, and societies from the foundation of the Holy Roman Empire to the enlargement of the European Union. Students are encouraged to delve deeper into particular countries, disciplines, and sub-regions, such as Central Europe, Eastern Europe, and the Balkans, through an individual research paper and class presentations.
Taught by: Steiner/Drenstein/Verkholantsiev
Course usually offered in spring term
Also Offered As: COML 010, EEUR 010
Activity: Seminar
1 Course Unit
Notes: This course is one of two required core courses for the Russian and East European Studies (REES) Major.
RUSS 010 Intro to Russia and Eurasia: Histories, Cultures, Societies
This course is designed as a broad introduction to the study of Russia and Eurasia that will offer students a multi-disciplinary overview of the cultures, histories and societies of this large and diverse region of the world. It is organized in units that illustrate the approaches of various disciplines to the study of the region, including history, literary studies, cinema studies, art history, and social scientific inquiry. At the conclusion of the course, students will be acquainted with these various disciplinary frameworks and the differences between them, with the modes of analysis and writing that pertain to them, and with fundamental knowledge of the region. They will be prepared for further study of the region in a variety of programs of study, including the Russian and East European Studies major, for which the course serves as a foundation.
Taught by: Platt/Staff
Course usually offered in fall term
Also Offered As: EEUR 009
Activity: Lecture
1 Course Unit

RUSS 026 BEHIND THE IRON CURTAIN
This first-year seminar provides an introduction to the histories, cultures, and societies of Central and Eastern Europe, including Poland, the Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Albania, and the successor states of Yugoslavia. Through a selection of articles and essays written by anthropologists and sociologists and based on their extended fieldwork in the region, students will explore both the ethnographic method and the experience of everyday life during and after the communist era. Topics will include: popular music under socialism, food and wine, environmental concerns, the status of Muslim minorities, socialist aesthetics, public memory and cultures of commemoration, privatization, advertising, women's rights, gender and sexuality, emergent nationalisms, and the rise of income inequality and homelessness. All readings and assignments in English.
Taught by: GHODSEE
Course not offered every year
Also Offered As: ANTH 026, EEUR 026
Activity: Seminar
1 Course Unit
Notes: In this course, first-year students gain knowledge about the cultures and societies of Central and Eastern Europe through the reading of ethnographic texts about the socialist (1945-1989) and post-socialist (1990 to the present) eras. The course takes multidisciplinary approach in that it combines ethnographic works from both anthropology and sociology and discusses how qualitative methodologies differ from survey research or other forms of quantitative analysis. By exposing students to the critical examination of how different types of knowledge are produced through the close study of Central and Eastern Europe, the course aims to teach them to be critical consumers of essentialized truths underpinning fix notions about concepts such as "culture" and "society." At the end of the course students should develop a deep understanding of the value of the ethnographic method and the contested terrain of knowledge production about the socialist and post-socialist past, and will be able to speak and write about these issues with competence and confidence.

RUSS 048 The Rise and Fall of the Russian Empire, 1552-1917
How and why did Russia become the center of the world's largest empire, a single state encompassing eleven time zones and over a hundred ethnic groups? To answer this question, we will explore the rise of a distinct political culture beginning in medieval Muscovy, its transformation under the impact of a prolonged encounter with European civilization, and the various attempts to re-form Russia from above and below prior to the Revolution of 1917. Main themes include the facade vs. the reality of central authority, the intersection of foreign and domestic issues, the development of a radical intelligentsia, and the tension between empire and nation.
For BA Students: History and Tradition Sector
Taught by: Nathans/Holquist
One term course offered either term
Also Offered As: HIST 048
Activity: Lecture
1 Course Unit

Out of an obscure, backward empire, the Soviet Union emerged to become the great political laboratory of the twentieth century. This course will trace the roots of the world's first socialist society and its attempts to recast human relations and human nature itself. Topics include the origins of the Revolution of 1917, the role of ideology in state policy and everyday life, the Soviet Union as the center of world communism, the challenge of ethnic diversity, and the reasons for the USSR's sudden implosion in 1991. Focusing on politics, society, culture, and their interaction, we will examine the rulers (from Lenin to Gorbachev) as well as the ruled (peasants, workers, intellectuals; Russians and non-Russians). The course will feature discussions of selected texts, including primary sources in translation.

RUSS 095 UNIVERSAL LANGUAGE: FROM THE TOWER OF BABEL TO ARTIFICIAL INTELLIGENCE
This is a course in European intellectual history. It explores the historical trajectory, from antiquity to the present day, of the idea that there once was, and again could be, a universal and perfect language among the human race. If recovered, it can explain the origins and meaning of human experience, and can enable universal understanding and world peace. The tantalizing question of the possibility of a universal language have been vital and thought-provoking throughout the history of humanity. The idea that the language spoken by Adam and Eve was a language which perfectly expressed the nature of all earthly objects and concepts has occupied the minds of intellectuals for almost two millennia. In defiance of the Christian biblical myth of the confusion of languages and nations at the Tower of Babel, they have over and over tried to overcome divine punishment and discover the path back to harmonious existence. By recovering or recreating a universal language, theologians hoped to be able to experience the divine; philosophers believed that it would enable apprehension of the laws of nature, while mystic cabbalists saw in it direct access to hidden knowledge. In reconstructing a proto-language, 19th-century Indo-European philologists saw the means to study the early stages of human development. Even in the 20th century, romantic idealists, such as the inventor of Esperanto, Ludwik Zamenhof, strived to construct languages to enable understanding among estranged nations. For writers and poets of all times, from Cyrano de Bergerac to Vélimir Khlebnikov, the idea of a universal and perfect language has been an inexhaustible source of inspiration. Today, this idea echoes in theories of universal and generative grammars, in approaching English as a global tongue, and in various attempts to create artificial languages, even a language for cosmic communication.

Activity: Seminar
1 Course Unit

RUSS 105 Accelerated Elementary Russian
TWO IN ONE: This is an intensive two-credit course covering two semesters of the first-year sequence (RUSS001 and 002). The course is designed for students with no background in Russian and develops language competence in speaking, reading, writing and understanding contemporary Russian. Class work emphasizes development of communication skills and cultural awareness. Together with RUSS003 and 004 fulfills Penn Language Requirement.
For BA Students: Language Course
Course not offered every year
Activity: Lecture
2 Course Units

RUSS 111 Poetics of Screenplay: The Art of Plotting
This course studies screenwriting in a historical, theoretical and artistic perspective. We discuss the rules of drama and dialogue, character development, stage vs. screenwriting, adaptation of nondramatic works, remodeling of plots, auteur vs. genre theory of cinema, storytelling in silent and sound films, the evolution of a script in the production process, script doctoring, as well as screenwriting techniques and tools.
Taught by: Todorov
Course not offered every year
Also Offered As: CIMS 111, COML 118
Activity: Seminar
1 Course Unit
Notes: This course cannot be applied towards Russian major or minor.

RUSS 115 Before Transgender: Hermaphrodites in 19th Century Literature
This course provides a literary and cultural prehistory to contemporary discourses on transgender identity by focusing on the figure of the hermaphrodite in 19th Russia and the West. Far from a marginal subject, the hermaphrodite and intersex characters played central roles in the novels of Balzac, Tolstoy, Dostoevsky, and many others whose work we will read in this course. Interdisciplinary in nature, this course draws on 19th century discourses in medicine, psychology, opera, religious philosophy, and political theory to understand why characters who exist outside of the male/female gender binary feature so prominently in 19th century literature and cultural texts across a wide range of traditions (Anglophone, French, and Russian, and others.)
Taught by: Wilson
Also Offered As: GSWS 115
Activity: Lecture
1 Course Unit

RUSS 123 Russia and Eastern Europe in International Affairs
Russia and the Russian Union (EU) are engaged in a battle for influence in Eastern Europe. EU foreign policy towards its Eastern neighbors is based on economic integration and the carrot of membership. With the application of this powerful incentive, Central and Southeastern European countries such as Poland, Hungary, the Czech Republic, and Croatia have progressed rapidly towards integration with the EU (and NATO). Yet, given Russia's opposition to the further enlargement, membership is off the table for the large semi-Western powers such as Russia itself and Turkey and the smaller countries inhabiting an emerging buffer zone between Russia and the EU, such as Georgia, Ukraine, Azerbaijan, Moldova, and Belarus. These in-between countries find themselves subject to intense competition for influence between Eastern and Western powers. In this context, EU countries must balance their energy dependence on Russia and need for new markets and geopolitical stability with concern for human rights, democratic governance, and self-determination. What are the trade-offs implicit in the foreign policies of Russia, EU member states, and Eastern Europe? What are the best policy approaches? What are the main opportunities and obstacles?

2018-19 Catalog | Generated 02/28/19
RUSS 125 The Adultery Novel
The object of this course is to analyze narratives of adultery from Shakespeare to the present and to develop a vocabulary for thinking critically about the literary conventions and social values that inform them. Many of the themes (of desire, transgression, suspicion, discovery) at the heart of these stories also lie at the core of many modern narratives. Is there anything special, we will ask, about the case of adultery—once called "a crime which contains within itself all others"? What might these stories teach us about the way we read in general? By supplementing classic literary accounts by Shakespeare, Pushkin, Flaubert, Chekhov, and Proust with films and with critical analyses, we will analyze the possibilities and limitations of the different genres and forms under discussion, including novels, films, short stories, and theatre. What can these forms show us (or not show us) about desire, gender, family and social obligation? Through supplementary readings and class discussions, we will apply a range of critical approaches to place these narratives of adultery in a social and literary context, including formal analyses of narrative and style, feminist criticism, Marxist and sociological analyses of the family, and psychoanalytic understandings of desire and family life.
For BA Students: Arts and Letters Sector
Taught by: Platt

Also Offered As: CIMS 125, COML 127, GSWS 125
Activity: Seminar
1 Course Unit
Notes: All readings and lectures in English.

RUSS 134 Communism
The rise and fall of Communism dominated the history of the short twentieth century from the Russian revolution of 1917 to the collapse of the Soviet Union in 1991. As a system of government, Communism is more or less dead, but its utopian ideals of liberation from exploitation and want live on. Communism remains the one political-economic system that presented, for a time, an alternative to global capitalism. In this course, students will gain an introduction to socialist and Communist political thought and explore Communist political and economic regimes and their successes and failures, critics and dissidents, efforts at reform, and causes of collapse. We will learn about the remnants of Communism in China, North Korea, and Cuba and efforts of contemporary theorists to imagine a future for Communism.

RUSS 135 Cold War: A Global History
The Cold War was more than simply a military confrontation between the United States and the Soviet Union; it was the frame within which the entire world developed (for better or worse) for nearly five decades. This course will examine the Cold War as a global phenomenon, covering not only the military and diplomatic history of the period, but also examining the social and cultural impact of the superpower confrontation. We will cover the origins of the conflict, the interplay between periods of tension and detente, the relative significance of disagreements within the opposing blocs, and the relationship between the "center" of the conflict in the North Atlantic/European area and the global "periphery".

Taught by: Nathans
Also Offered As: EEUR 135, HIST 135
Activity: Recitation
1 Course Unit

RUSS 136 Portraits of Russian Society: Art, Fiction, Drama
This course covers 19C Russian cultural and social history. Each week-long unit is organized around a single medium-length text (novella, play, memoir) which opens up a single scene of social history (birth, death, duel, courtship, tsar, and so on). Each of these main texts is accompanied by a set of supplementary materials (paintings, historical readings, cultural analysis, excerpts from other literary works, etc.). The object of the course is to understand the social codes and rituals that informed nineteenth-century Russian life, and to apply this knowledge in interpreting literary texts, other cultural objects, and even historical and social documents (letters, memoirs, etc.). We will attempt to understand social history and literary interpretation as separate disciplines yet also as disciplines that can inform one another. In short: we will read the social history through the text, and read the text against the social history.
For BA Students: Humanities and Social Science S

Activity: Lecture
1 Course Unit
Notes: No prior language experience required.

RUSS 145 Masterpieces of 19th Century Russian Literature
A bronze monument to an all-powerful emperor comes to life and pursues a poor everyman through the streets, driving him to his death. A studious young man kills an old woman as a philosophical experiment. A young woman at the height of aristocratic society abandons her husband and young son to devote herself to her lover. These and other tales from the classics of nineteenth-century Russian literature will touch and delight you, get under your skin, and even attempt to show you how to live. We will read these tales in order to understand how books can become events in their own right, how Russian literature gained such power and prestige, and what it can still teach us today. Works will include Pushkin's The Bronze Horseman, Turgenev's Fathers and Children, Dostoevsky's Crime and Punishment, Tolstoy's Anna Karenina, Khvoshchinskaya's City Folk and Country Folk, Chekhov's Cherry Orchard, and others.

1 Course Unit
RUSS 149 Slavery, Serfdom, and Cultures of Bondage in the U.S. and Russia
During the Cold War, the United States and Russia were locked in an ideological battle, as capitalist and communist superpowers, over the question of private property. So how did these two countries approach the most important question regarding property that ever faced human civilization: how could governments justify the treatment of its subjects, people, as property? In 1862, Russia abolished serfdom, a form of human bondage that had existed in its territories since the 11th century. Just a year later, in 1863, Abraham Lincoln signed the Emancipation Proclamation, declaring America’s slaves "then, thenceforward, and forever free.” What forces, both domestic and international, both political and cultural, influenced this near simultaneous awakening in which huge swaths of the Russian and U.S. populations were liberated? While scholars have often sought to compare slavery and serfdom as institutions, this course does not attempt to draw connections between the two. Rather, we will focus on how the slavery/anti-slavery and serfdom/anti-serfdom debates were framed in each respective country as well as how Russia used American slavery and the U.S. used Russian serfdom to shape their own domestic debates.

RUSS 159 POPULATION AND PUBLIC HEALTH IN EASTERN EUROPE
Since the collapse of communism in 1989 in Eastern Europe (and 1991 in the Soviet Union), many of the countries in the region have experienced public health crises and demographic catastrophe. Below replacement fertility rates and massive out migration have decimated the populations of these countries even as populations age and place unsustainable strains on pension systems and medical services. The demographic collapse has also been accompanied by falling male life expectancy and the rise of alcoholism, depression, domestic violence, and suicide. The economic exigencies of the transition from communism to capitalism dismantled welfare states at the exact moment when health services were most needed, leaving charities and nongovernmental organization to try to fill in the gaps. Through a combination of readings from the fields of epidemiology, demography, and medical anthropology, this course examines the public health implications of poverty and social dislocation in post-communist states. All readings and assignments are in English.

Activity: Lecture
1 Course Unit

RUSS 160 Sex and Socialism
This seminar examines classic and current scholarship and literature on gender and sexuality in contemporary Eastern Europe, and examines the dialogue and interchange of ideas between East and West. Although the scholarly and creative works will primarily investigate the changing status of women during the last three decades, the course will also look at changing constructions of masculinity and LGBT movements and communities in the former communist bloc. Topics will include: the women question before 1989; gender and emerging nationalisms; visual representations in television and film; social movements; work; romance and intimacy; spirituality; and investigations into the constructed concepts of “freedom” and “human rights.”

RUSS 164 Russian and East European Film from the October Revolution to World War II
The purpose of this course is to present the Russian and East European contribution to world cinema in terms of film theory, experimentation with the cinematic language, and social and political reflex. We discuss major themes and issues such as the invention of montage, the means of revolutionary visual propaganda and the cinematic component to the communist cultural revolutions, party ideology, and practices of social-engineering, cinematic response to the emergence of the totalitarian state in Soviet Russia before World War II.
Taught by: Todorov
Also Offered As: CIMS 164, EEUR 164
Activity: Lecture
1 Course Unit

RUSS 165 Russian and East European Film after World War II
The purpose of this course is to present the Russian and East European contribution to world cinema in terms of film theory, experimentation with the cinematic language, and social and political reflex. We discuss major themes and issues such as means of visual propaganda and the cinematic component to the communist cultural revolutions, party ideology and practices of social-engineering, cinematic response to the emergence of the totalitarian state in Russia and its subsequent installation in Eastern Europe after World War II.
Taught by: Todorov
Also Offered As: CIMS 165, EEUR 165
Activity: Lecture
1 Course Unit
RUSS 171 The Socialist City
This course will explore the ideology and politics of the socialist city in the Soviet Union, East Europe, and the Second World. We will focus on how design professionals, politicians, and residents realized utopian socialist values in the face of national design traditions, local politics, and limited resources. Beginning with the Soviet case, the course will consider how planners and architects addressed modernization, multi-family housing, and neighborhood units in new city plans. We will consider capitals, like Moscow, as well as less well-known regional centers that had strong local identities, such as Tashkent, Belgrade, and Prague. We will examine the state’s use of public spaces for commemorations and preservationists’ reinterpretation of existing historic sites. In addition, we will consider how everyday residents experienced the socialist city, such as multi-family housing, shopping centers, and subway systems. We will address how citizens circumvented official state channels to obtain state housing and illegally build homes for themselves, sometimes in a folk style. The course will center on Soviet and East European cities, but also address socialist cities in Cuba and Africa whose design was influenced by transnational exchanges. Most broadly, this course explores the question, what was the socialist city? How did its planners, architects, and politicians understand it, and what did they intend to construct? And, what resulted? In the past fifteen years, North American scholars have begun to take seriously the study of the socialist city, and this course draws on the emerging scholarship on this exciting, cross-disciplinary topic. How do scholars understand the socialist city today? We will examine the shared legacies that socialist cities across East Europe shared with their Western European counterparts, as well as the particularities of design that have sparked North American scholars’ debates on what distinguished the socialist city from the nation that emerged in a capitalist context. In our discussions, we will seek to understand how socialist design professionals understood their work and the emerging cities at the time, as well as how North American scholars view the socialist city today. Discursively, the focus of the call will fall at the intersection of architectural history and politics.

RUSS 187 Portraits of Soviet Society: Literature, Film, Drama
How can art and literature open a window on Russian lives lived over the course of the tumultuous twentieth century? This course adopts a unique approach to questions of cultural and social history. Each week-long unit is organized around a medium-length film, text, or set of texts by some of the most important cultural figures of the era (novella, play, memoir, film, short stories) which opens up a single scene of social history, work, village, avant-garde, war, Gulag, and so on. Each cultural work is accompanied by a set of supplementary materials: historical readings, paintings, cultural-analytical readings, excerpts from other literary works, etc. We will read social history through culture and culture through history.
For BA Students: Humanities and Social Science S

Activity: Lecture
1 Course Unit
Notes: All readings and lectures in English

RUSS 189 Soviet and Post-Soviet Economy
The course will cover the development and operation of the Soviet centrally planned economy—one of the grandest social experiments of the 20th century. We will review the mechanisms of plan creation, the push for the collectivization and further development of Soviet agriculture, the role of the Soviet educational system and the performance of labor markets (including forced labor camps—GULags). We will discuss the strengths and weaknesses of the Soviet system and the causes of its collapse. Privatization, called by some "piratization," will be one of the central issues in our consideration of the transition from central planning to a market economy in the early 1990s. Even though our main focus will be on the Soviet economy and post-Soviet transition, we will occasionally look back in time to the tsarist era and even further back to find evidence to help explain Soviet/Russian economic development.

Taught by: Vekker
Activity: Lecture
1 Course Unit

RUSS 191 Putin’s Russia: Culture, Society and History
Winston Churchill famously said that Russia “is a riddle, wrapped in a mystery, inside an enigma.” Strikingly, today many informed Russians would agree: no one can provide definitive answers concerning what has driven Russian public life and politics over the past three years, as it ricocheted from the mass protests of 2011 and 2012, into the Pussy Riot scandal, then the Olympics, and most recently to the intense patriotism driving the Russian annexation of Crimea and intervention in Ukraine. In this course we will examine how Russians themselves communicate about and represent Russia and what this reveals about this complex society and its development. We will consider print journalism, novels, films, televised media, and the internet pay close attention both to particular representations and to social institutions for their production, dissemination, and consumption. Topics of special concern will include: conspiracy theories, representations of Russian history, collective identity and patriotism, intellectuals and elites, gender and sexuality, consumption and wealth. Putin’s Russia is an introductory level course for which no prior knowledge of Russian history, culture or society is required.
All readings and screenings will be in English.
For BA Students: Society Sector

Course not offered every year
Activity: Lecture
1 Course Unit
Notes: No prior knowledge of Russian is required.
RUSS 193 War and Representation
This class will explore complications of representing war in the 20th and 21st centuries. War poses problems of perception, knowledge, and language. The notion of "fog of war" describes a disturbing discrepancy between agents and actions of war; the extreme nature of the violence of warfare tests the limits of cognition, emotion, and memory; war's traditional dependence on declaration is often warped by language games--"police action," "military intervention," "nation-building," or palpably unnamed and unacknowledged state violence. Faced with the radical uncertainty that forms of war bring, modern and contemporary authors have experimented in historically, geographically, experientially and artistically particular ways, forcing us to reconsider even seemingly basic definitions of what a war story can be. Where does a war narrative happen? On the battlefield, in the internment camp, in the suburbs, in the ocean, in the ruins of cities, in the bloodstream? Who narrates war? Soldiers, refugees, gossips, economists, witnesses, bureaucrats, survivors, children, journalists, descendants and inheritors of trauma, historians, those who were never there? How does literature respond to the rise of terrorist or ideology war, the philosophical and material consequences of biological and cyber wars, the role of the nuclear state? How does the problem of war and representation disturb the difference between fiction and non-fiction? How do utilitarian practices of representation-propaganda, nationalist messaging, memorialization, xenophobic depiction--affect the approaches we use to study art? Finally, is it possible to read a narrative barely touched or merely contextualized by war and attend to the question of war's shaping influence? The class will concentrate on literary objects--short stories, and graphic novels--as well as film and television. Students of every level and major are welcome in and encouraged to join this class, regardless of literary experience.

RUSS 196 Russian Short Story
This course studies the development of 19th and 20th-century Russian literature through one of its most distinct and highly recognized genres—the short story. The readings include great masters of fiction such as Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Solzhenitsyn, and others. The course presents the best works of short fiction situating them in a larger cultural-political context. The students learn about the historical formation, poetic virtue, and thematic characteristics of major narrative modes such as sentimentalism, romanticism, utopia, realism, modernism, and socialist realism. We study literary devices, styles, and trends of storytelling such as irony, absurd, satirical, grotesque, anecdote, etc. Main topics include culture of the duel; the role of chance; the riddle of death; anatomy of madness; imprisonment and survival.
Taught by: Todorov
Course not offered every year
Activity: Lecture
1 Course Unit

RUSS 197 Madness and Madmen in Russian Culture
Is "insanity" today the same thing as "madness" of old? Who gets to define what it means to be " sane" and why? Are the causes of madness biological or social? In this course, we will grapple with these and similar questions while exploring Russia's fascinating history of madness as a means to maintain, critique, or subvert the status quo. We will consider the concept of madness in Russian culture beginning with its earliest folkloric roots and trace its depiction and function in the figure of the Russian " holy fool" in classical literature, and in contemporary film. Readings will include works by many Russian greats, such as Pushkin, Gogol, Dostoevsky, Chekhov, Bulgakov and Nabokov.

RUSS 201 Dostoevsky and His Legacy
This course explores the ways Fyodor Dostoevsky (1821-1881) portrays the "inner world(s)" of his characters. Dostoevsky's psychological method will be considered against the historical, ideological, and literary contexts of middle to late nineteenth-century Russia. The course consists of three parts External World (the contexts of Dostoevsky), "Inside" Dostoevsky's World (the author's technique and ideas) and The World of Text (close reading of Crime and Punishment and The Brothers Karamazov). Students will write three essays on various aspects of Dostoevsky's "spiritual realism."
Also Offered As: COML 207
Activity: Seminar
1 Course Unit

RUSS 202 Tolstoy
Few authors have ever been able to combine their moral and artistic visions as closely as Tolstoy. Over the course of the semester, we will plot how Tolstoy's ethical concerns changed over the course of his life and how this was reflected in works, which include some of the greatest prose ever written. We will begin by surveying the majestic and far-reaching world of his novels and end with some of Tolstoy's short later works that correspond with the ascent of "Tolstoyism" as virtually its own religion.

RUSS 213 Saints and Devils in Russian Literature and Tradition
This course is about Russian literary imagination, which is populated with saints and devils, believers and religious rebels, holy men and sinners. In Russia, where people's frame of mind had been formed by a mix of Eastern Orthodox Christianity and earlier pagan beliefs, the quest for faith, spirituality, and the meaning of life has invariably been connected with religious matters. How can one find the right path in life? Is humility the way to salvation? Should one live for God or for the people? Does God even exist? In "Saints and Devils" we read works of great masters of Russian literature and learn about the historic trends that have filled Russia's national character with religious and mystical spirit. We start with old Russian fanciful stories and legends of crafty demons and all-forbearing saints. The master of fantastic writing, Nikolai Gogol, will teach us how to triumph over the devil. Together with Anton Chekhov and Leo Tolstoy, we contemplate an ambivalent cultural image of woman as a victim or a sinful agent of the devil. Immersed in the world of Dostoevsky's The Brothers Karamazov, we follow the characters in their search for truth, faith, and love. In The Master and Margarita, Mikhail Bulgakov will tell us his fantastic and devilish story of Pontius Pilate and we will see for ourselves "A man will receive his deserts in accordance with his beliefs."

RUSS 217 Russian Politics
This course will present an in-depth examination of political, economic and social change in post-Soviet Russia within a historical context. After a brief discussion of contemporary problems in Russia, the first half of the course will delve into the rise of communism in 1917, the evolution of the Soviet regime, and the tensions between ideology and practice over the seventy years of communist rule up until 1985. The second part of the course will begin with an examination of the Gorbachev period and the competing interpretations of how the events between 1985 and 1991 may have contributed to the collapse of the Soviet Union. We will then proceed to make sense of the continuities and changes in politics, economics and society in contemporary Russia. Important topics will include the confrontations accompanying the adoption of a new constitution, the emergence of competing ideologies and parties, the struggle over economic privatization, the question of federalism and nationalism, social and political implications of economic reform, and prospects for Russia's future in the Putin and post-Putin era.
Course usually offered in spring term
Also Offered As: PSCI 217
Activity: Recitation
1 Course Unit

RUSS 220 Russia and the West
This course will explore the representations of the West in eighteenth- and nineteenth-century Russian literature and philosophy. We will consider the Russian visions of various events and aspects of Western political and social life Revolutions, educational system, public executions, resorts, etc. within the context of Russian intellectual history. We will examine how images of the West reflect Russia's own cultural concerns, anticipations, and biases, as well as aesthetic preoccupations and interests of Russian writers. The discussion will include literary works by Karamzin, Pushkin, Gogol, Dostoevsky, Leskov, and Tolstoy, as well as non-fictional documents, such as travelers' letters, diaries, and historiosophical treatises of Russian Freemasons, Romantic and Positivist thinkers, and Russian social philosophers of the late Nineteenth century. A basic knowledge of nineteenth-century European history is desirable. The class will consist of lectures, discussion, short writing assignments, and two in-class tests.
For BA Students: Humanities and Social Science S
Also Offered As: COML 220, HIST 220

1 Course Unit
Notes: From the Other Shore: Russia and the West

RUSS 222 Imagining Asia: Russia and the East
This course examines the important role of the East in Russian literature and nationalism. Focusing specifically on the Caucasus, Central Asia, Iran, and Turkey, this course will analyze how Russian writers connected the East to Russian identity, and how their approaches implicate different artistic periods (Romanticism, Realism, Socialist Realism, Post-Modernism) and different political atmospheres (Tsarist Russia, Soviet Union, Post-Soviet). Students will also ascertain how Russian literature on the East has affected and influenced literature and political movements produced in the East. In particular, students will analyze how Soviet Central Asian writers, Iranian Socialists, and contemporary Turkish writers were influenced by Russian literature and Soviet ideology. Ultimately, this course examines the impact of Russian cultural and political history in 20th century Central Asia and the Middle East.
Readings will include works by. Pushkin, Lermontov, Tolstoy, Dostoevsky, Platonov, Chingiz Aitmatov, Sadek Hedayat, Orhan Pamuk, and others.
Also Offered As: COML 217, NELC 222
Activity: Seminar

RUSS 234 Medieval Russia: Origins of Russian Cultural Identity
This course offers an overview of the cultural history of Rus from its origins to the eighteenth century, a period which laid the foundation for the Russian Empire. The course takes an interdisciplinary approach to the evolution of the main cultural paradigms of Russian Orthodoxy viewed in a broader European context. Although this course is historical in content, it is also about modern Russia. The legacy of Medieval Rus is still referenced, often allegorically, in contemporary social and cultural discourse as the Russian, Ukrainian and Belarusian societies attempt to reconstruct and reinterpret their histories. In this course, students learn that the study of the medieval cultural and political history explains many aspects of modern Russian society, its culture and mentality.

1 Course Unit
RUSS 240 Napoleonic Era and Tolstoy
In this course we will read what many consider to be the greatest book in world literature. This work, Tolstoy’s War and Peace, is devoted to one of the most momentous periods in world history, the Napoleonic Era (1789-1815). We will study both the novel and the era of the Napoleonic Wars: the military campaigns of Napoleon and his opponents, the grand strategies of the age, political intrigues and diplomatic betrayals, the ideologies and human dramas, the relationship between art and history. How does literature help us to understand this era? How does history help us to understand this great novel? Because we will read War and Peace over the course of the entire semester, readings will be manageable (circa 100 pages of the epic and 50 pages of additional reading per week) and very enjoyable.
Taught by: Holquist

Notes: All readings and lectures in English.

RUSS 250 Tarkovsky’s Passions
Andrei Tarkovsky is universally acknowledged to be the greatest Soviet filmmaker of the last half of the twentieth century. In Kurosawas assessment following Tarkovsky's death in the late 1980's, he had no equal among film directors alive now. In Ingmar Bergmans words, Tarkovskys work was a miracle. His films are beautiful, intellectually challenging, and spiritually profound. They range from Ivans Childhood, an exploration of wartime experience through the eyes of a child; to Solaris, a philosophical essay in the form of a science-fiction thriller; to Andrei Rublev, an investigation of the power of art and spirituality. In this course, we will study Tarkovsky's films and life, with attention both to his formal and artistic accomplishments, his thought and writings concerning art and film, and the cultural and political contexts of his work.

RUSS 261 Russian Thinkers
This class focuses on the complex relations between philosophy, history, and art in Russia and offers discussions of works of major Russian authors (such as Dostoevsky, Tolstoy, Khlebnikov), religious and political thinkers (Chapaev, Herzen, Berdiaev, Lenin, Bogdanov), avant-garde artists (Filonov, Malevich), and composers (Skriabin) who created and tested in their lives their own, sometimes very peculiar and radical, worldviews. We will consider these worldviews against a broad cultural background and will reenact them in class in the form of philosophical mini-dramas. The only prerequisite for this course is intellectual curiosity and willingness to embrace diverse, brave and often very weird ideas.
Course not offered every year
Also Offered As: COML 255
Activity: Seminar
1 Course Unit

RUSS 275 Russian History in Film
This course draws on fictional, dramatic and cinematic representations of Russian history based on Russian as well as non-Russian sources and interpretations. The analysis targets major modes of imagining, such as narrating, showing and reenacting historical events, personae and epochs justified by different, historically mutating ideological postulates and forms of national self-consciousness. Common stereotypes of picturing Russia from "foreign" perspectives draw special attention. The discussion involves the following themes and outstanding figures: the mighty autocrats Ivan the Terrible, Peter the Great, and Catherine the Great; the tragic ruler Boris Godunov; the brazen rebel and royal impostor Pugachev, the notorious Rasputin, his uncanny powers, sex-appeal, and court machinations; Lenin and the October Revolution; images of war; times of construction and times of collapse of the Soviet Colossus.

Prerequisites: Russian 312 or placement exam.
Activity: Lecture
1 Course Unit

RUSS 413 Twentieth-Century Russian Literature, Film and Culture: Utopia, Revolution and Dissent
This course continues developing students’ advanced skills in Russian, and introduces students to major movements and figures of twentieth-century Russian literature and culture. We will read the works of modern Russian writers, and watch and discuss feature films. The course will introduce the first Soviet films and works of the poets of the Silver Age and beginning of the Soviet era as well as the works from later periods up to the Perestroika and Glasnost periods (the late 1980s).
Taught by: Bourlatskaya
Course not offered every year
Prerequisites: Russian 312 or placement exam.
Activity: Seminar
1 Course Unit
Notes: Conducted in Russian.

RUSS 416 Business and Democracy in the New Russia
This course continues developing students’ advanced skills in Russian, and is designed to familiarize students with contemporary Russian society, its historical background and its present political and economic structure, and to develop functional proficiency in speaking, writing, reading and listening. The course will focus on a variety of issues central to Russian society since the fall of the Soviet Union, including changing values, political parties and movements, the business climate and businessmen, various nationalities within Russia, women in the family and at work. Course materials will include interviews, articles, essays by leading Russian journalists and statesmen, and contemporary Russian movies.
Taught by: Bourlatskaya
Course not offered every year
Prerequisites: RUSS 312 or placement exam.
Activity: Seminar
1 Course Unit
Notes: Conducted in Russian.
**RUSS 419 Russian Song and Folklore**
This course offers a general introduction to the history of Russian folklore, song and musical culture. Students will explore the history of song in Russia and various song genres including folk songs, gangster songs, cabaret, war songs, Soviet ideological songs, and Russian rock and pop music. We will discuss ritual functioning of songs in Russian calendar rites, examine the aesthetic properties of song lyrics and music, and analyze the educational, community-building and ideological roles of song in Russian society.

Activity: Seminar
1 Course Unit
Notes: Conducted in Russian.

**RUSS 420 Contemporary Russia Through Film**
This course continues developing students' advanced skills in Russian and offers intensive study of Russian film, arguably the most powerful medium for reflecting changes in modern society. This course will examine Russia's transition to democracy and market economy through the eyes of its most creative and controversial cinematographers. The course will focus on the often agonizing process of changing values and attitudes as the country moves from Soviet to Post-Soviet society. Russian films with English subtitles will be supplemented by readings from contemporary Russian media sources. The course provides an excellent visual introduction to the problems of contemporary Russian society.

Course not offered every year
Prerequisites: Russian 312 or placement exam.
Activity: Seminar
1 Course Unit
Notes: Conducted in Russian

**RUSS 421 The Life and Art of Anton Chekhov**
This course continues developing students' advanced skills in Russian. Language work will be combined with an examination of the life and creative work of one of Russia's greatest writers, Anton Chekhov. Chekhov's prose and drama will be analyzed using the political, social and literary currents of his time as the background. This course will introduce students to the literary technique, poetics, and deeply humane worldview of Chekhov. Course materials will include short stories and drama, as well as some background readings. The advanced study of Russian language will have an emphasis on improving pronunciation, significantly expanding the vocabulary, mastering complicated grammatical and syntactic structures, and learning the basic conventions of academic discourse. As part of this course, students will be asked to write short response papers and some pieces of creative writing. Students will also produce a short film and stage a scene from a play. All class discussions and primary sources will be in Russian. Some secondary readings will be in English.
Activity: Seminar
1 Course Unit
Notes: Conducted in Russian

**RUSS 426 Chekhov: Stage & Screen**
What's so funny, Mr. Chekhov? This question is often asked by critics and directors who still are puzzled with Chekhov's definitions of his four major plays as comedies. Traditionally, all of them are staged and directed as dramas, melodramas, or tragedies. Should we cry or should we laugh at Chekhovian characters who commit suicide, or are killed, or simply cannot move to a better place of living? Is the laughable synonymous to comedy and the comic? Should any fatal outcome be considered tragic? All these and other questions will be discussed during the course. The course is intended to provide the participants with a concept of dramatic genre that will assist them in approaching Chekhov's plays as comedies. In addition to reading Chekhov's works, Russian and western productions and film adaptations of Chekhov's works will be screened. Among them are, Vanya on 42nd Street with Andre Gregory, and Four Funny Families. Those who are interested will be welcome to perform and/or direct excerpts from Chekhov's works.
Taught by: Zubarev
Course not offered every year
Also Offered As: CIMS 365
Activity: Seminar
1 Course Unit
Notes: Forms a part of the LPS Masters in Liberal Arts Program.

**RUSS 430 Nationalism and Ethnic Conflict in Film**
This course studies the cinematic representation of civil wars, ethnic conflicts, nationalistic doctrines, and genocidal policies. The focus is on the violent developments that took place in Russia and on the Balkans after the collapse of the Soviet Bloc and were conditioned by the new geopolitical dynamics that the fall of communism had already created. We study media broadcasts, documentaries, feature films representing the Eastern, as well as the Western perspective. The films include masterpieces such as "Time of the Gypsies", "Underground", "Prisoner of the Mountains", "Before the Rain", "Behind Enemy Lines", and others.
Taught by: Todorov
Course not offered every year
Also Offered As: CIMS 430, EEUR 430
Activity: Online Course
1 Course Unit
Notes: Forms a part of the LPS Masters in Liberal Arts Program.

**RUSS 432 Fate and Chance in Literature and Culture**
In Fate and Chance in Literature and Culture, we will explore these two interrelated concepts in comparative perspective over a broad historical range. As a result, the students will learn how the philosophy of fate and chance has been reflected in works of different Russian authors and in different cultural and political environments. In Russian as well as western systems of belief fate and chance represent two extreme visions of the universal order, or, perhaps, two diametrically opposed cosmic forces: complete determinism, on the one hand, and complete chaos or unpredictability, on the other. These visions have been greatly reflected by various mythopoetic systems. In this course, we will investigate religious and folkloric sources from a series of Russian traditions compared to other Indo-European traditions (Greek, East-European). Readings will include The Song of Prince Igor's Campaign, The Gambler by Dostoevsky, The Queen of Spades by Pushkin, Vij by Gogol, The Black Monk by Chekhov, The Fatal Eggs by Bulgakov, and more.
Taught by: Zubarev
Course not offered every year
Also Offered As: CIMS 432, COML 196
Activity: Seminar
1 Course Unit
Notes: Forms a part of the LPS Masters in Liberal Arts Program.
RUSS 455 The Living & the Dead: The Great Patriotic War in Russ Cultural Imagination
This course is dedicated to the 70th anniversary of the Great Patriotic War, 1941-45. Students will explore the cultural myth of the war, created in the 1960-80s. The materials will include literary texts, documentaries, photographs, and films. We will focus on three major themes of this myth: 1. moral strength and courage; 2. respect for Russia's military past; and 3. the rise of national consciousness.
Course not offered every year
Prerequisites: RUSS361 or comparable language experience.
Activity: Seminar
1 Course Unit

RUSS 463 Fantasy, Science Fiction and Fantastic Imagination in Russian Culture
Explores masterpieces of Russian fantastic imagination from folklore and 19th century classics to 20th and 21st century dystopia, magic realism and science fiction. Readings include works by Nikolai Gogol, Mikhail Bulgakov, the Strugatsky brothers, and Victor Pelevin. Discussions focus on 1) the philosophical quest of Russian fantastic authors and their ideas about humanity, the meaning of existence, and human relationship with nature; 2) the texture of fantasy, including the absurd and surreal, the grotesque humor, and macabre irony.
Taught by: Nazyrova
Course not offered every year
Prerequisite: RUSS361 or equivalent proficiency
Activity: Seminar
1 Course Unit
Notes: All lectures and readings in Russian

RUSS 464 Russian Humor
One of the most fascinating and most difficult things for a student of foreign culture is to understand national humor, as it is presented in various stories and films, jokes and shows. To an extent, humor is a gateway to national mentality. In the present course we will examine Russian cultural history from the sixteenth through the twenty-first centuries, through the vehicle of Russian humor. How does Russian humor depend on religion and history? What was considered funny in various cultural trends? What are the peculiarities of Russian humorist tradition? Students will be familiarized with different Russian theories of humor (Bakhtin, Likhachev, Panchenko, Tynianov, etc.) and, of course, with a variety of works by Russian kings of humor Pushkin and Gogol, Chekhov and Zoshchenko, Bulgakov and Ili and Petrov, Erofeev and Kibirov, etc. Class lectures will be supplemented by frequent video and musical presentations ranging from contemporary cartoons to high comedies and from comic songs (Chaliapins The Flea) to the music of Shostakovich (The Nose). This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional use of the Russian language.
Course not offered every year
Prerequisites: RUSS361 or comparable language competence.
Activity: Seminar
1 Course Unit
Notes: Conducted in Russian.

RUSS 466 Russian Revolution
This course is a content-based course intended for students who speak Russian at home and seek to improve their command of formal and professional registers of the Russian language. Paying tribute to the centennial of the Russian Revolution, the course examines the sociopolitical milestone of the 20th century through the works of literature, art, music, film, and material culture that both refracted the revolutionary situation and responded to the revolutionary change. The course's primary sources include works of Russian symbolist poets (e.g. Blok) and realist writers (e.g. Korolenko, Chekhov, Gorky, Andrei Platonov), the music of modernist composers, Soviet montage films, and the Soviet architecture of the International Style. The specific attention will be on the relationship between sociopolitical transformation and the raise of avant-garde movements in visual arts and poetry known as the artistic revolution (e.g. Khlebnikov, Maiakovskii, Kandinskii, Goncharova, Malevich, Chagall).
Taught by: Nazyrova
Course not offered every year
Prerequisite: RUSS361 or equivalent proficiency
Activity: Seminar
1 Course Unit

RUSS 467 Classic Russian Literature Today
This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. A study of classic Russian literature in the original. Readings will consist of some of the greatest works of 19th and 20th-century authors, such as Pushkin, Gogol, Tolstoy, Dostoievsky, and Bulgakov. Students will examine various forms and genres of literature, learn basic techniques of literary criticism, and explore the way literature is translated into film and other media. An additional focus of the course will be on examining the uses and interpretations of classic literature and elitist culture in contemporary Russian society. Observing the interplay of the "high" and "low" in Russian cultural tradition, students will develop methodology of cultural analysis.
Course not offered every year
Prerequisites: RUSS361 or comparable language competence.
Activity: Lecture
1 Course Unit

RUSS 471 Moscow: Cultural History
This course is intended for students who have spoken Russian at home and seek to improve their capabilities in formal and professional uses of the Russian language. An extraordinary diverse city, Moscow has acquired a number of names, referring both to its size and role in the national history: The Third Rome, The Whitestone One, The First Throne, The Forty Forties, The Hero City, and even The Big Village. In this course, students will examine the cultural history of the great city from 1147 to the present. The "itinerary" for this imaginary trip will include the Kremlin and the banya, Saint Basil's Cathedral and the Bolshoi Theater, the Ostankino Tower and the underground palaces of the Metro, the workers' canteen and the dining rooms of the posh restaurants, etc. The course discussions will be centered on literary texts, travelers' accounts, films, and works of art and architecture.
Course not offered every year

RUSS 485 Russian Poetics
Introduction to the analysis of poetic texts, based on the works of Batyushkov, Lermontov, Tyutchev, Fet, Mandelshtam, and others.
Taught by: Steiner
Course not offered every year
Prerequisites: RUSS361 or comparable language competence.
Activity: Seminar
1 Course Unit
Notes: This course is open to all advanced students of Russian (including students who speak Russian at home).

RUSS 508 Advanced Russian for Business
This advanced language course focuses on developing effective oral and written communication skills for working in a Russian-speaking business environment. Students will discuss major aspects of Russian business today and learn about various Russian companies using material from the current Russian business press. In addition, students will be engaged in a number of creative projects, such as business negotiation simulations, and simulation of creating a company in Russia.
For BA Students: Advanced Language Course
Taught by: Bourlatkaya
Course not offered every year
Prerequisites: At least one RUSS400-level course or comparable language competence.
Activity: Seminar
1 Course Unit

RUSS 518 Old Church Slavonic: History, Language, Manuscripts
The language that we know today as Old Church Slavonic (OCS) was invented, along with the Slavic alphabet(s), in the 9th century by two Greek scholars, Sts. Cyril and Methodius. They had been tasked by the Byzantine Emperor with bringing the Christian faith to the Slavic-speaking people of Great Moravia, a powerful medieval state in Central Europe. From there, literacy, along with the Christian faith, spread to other Slavs. OCS is thus the language of the oldest written texts of the Slavic-speaking world, which today is comprised of the following languages: Belarusian, Bosnian, Bulgarian, Croatian, Czech, Macedonian, Montenegrin, Russian, Polish, Slovak, Serbian, Slovene, and Ukrainian. Therefore, knowledge of OCS aids in understanding the cultural, literary, and linguistic history of any modern Slavic language. For learners of Russian and other Slavic languages, OCS provides a layer of elevated stylistic vocabulary and conceptual terminology, similar to, and even greater than, the role of Latin and Greek roots in the English language. For historical linguists, OCS provides valuable material for comparison with other ancient Indo-European languages, such as Latin, Greek, and Sanskrit. This course introduces students to the basics of OCS, as well as to the cultural and historical circumstances of the emergence of Slavic literacy and its material culture - manuscripts. It is suitable for both undergraduate and graduate students.

Prerequisites: Any RUSS 400 level course or comparable proficiency.
Activity: Seminar
1 Course Unit

RUSS 545 Russian Dead Poets Society
This course, designed for the lovers of poetry, will focus on close readings of the works of marvelous Russian poets from the 18th to the 20th c. These poems will be read against a broad historical and cultural background. Our goal will be to "resurrect" the distinct voice of each poet as part of a cultural myth of Russian poetry. The list of dead poets to be summoned includes a number of major names, such as Gavriil Derzhavin, Alexander Pushkin, Mikhail Lermontov, Alexander Blok, Osip Mandelshtam, and Joseph Brodsky, as well as a "short list" of minor yet very representative and provocative authors such as the notorious "pornographic" poet Ivan Barkov and a "ghost poet" Kozma Prutkov.
Course not offered every year
Also Offered As: COML 545
Activity: Seminar
1 Course Unit

RUSS 549 Stalinist Culture
In the Soviet Union in the late 1920s the dynamic cultural life of the revolutionary era, characterized by avant-gardism, experimentation, and diversity, gave way to a new organization of Soviet cultural life one dominated by the newly formulated official style of "Socialist Realism" and bureaucratic institutions such as the Soviet Writers Union. In this course we will study the conditions that gave rise to this new era, its institutional realities, and masterworks in film, photography and literature of official art, including those by Kavlin, Pasternak and Eisenstein. We will also examine the social phenomena of cultural resistance and non-conformism of this period and its works written "for the drawer" or for non-official consumption, such as those of Akhmatova, Mandelstam, Bulgakov, Khurms and Druskin.
Taught by: Platt/Staff
Course not offered every year
Also Offered As: COML 550

1 Course Unit
RUSS 575 Russian History in Film
The course draws on the cinematic/fictional representation of the Russian/Soviet history based on Russian as well as non-Russian sources. The analysis targets major modes of imagining, staging and reenacting history, construction of images that satisfy dominant political, cultural and ideological stereotypes, and help create national identities. Bias, eye-witness accounts, propaganda uses and abuses of history, forgeries and the production of alt-facts become topics of particular interest. The discussions involve nation builders, iconic heroes and charismatic antiheroes, great commanders and revolutionaries such as Alexander Nevsky, Ivan the Terrible, Rasputin and the Fall of the Romanovs, Lenin and the October Revolution, Stalin and the construction of the Soviet Colossus, The Storming of the Winter Palace, the Civil War, The Great Purge, The Red Scare in the US, etc.

1 Course Unit

SKRT 470 Sanskrit 2nd Year Part I
This course will lead students to consolidate their knowledge of Sanskrit grammar and increase their familiarity with Sanskrit literature of all kinds, including epic, literary, philosophical, and narrative genres of texts. It will also introduce students to the study and reading of inscriptive materials.
Taught by: O'Brook
Two terms. student must enter first term.
Prerequisites: First year Sanskrit or equivalent ascertained through test or permission of instructor.
Activity: Lecture
1 Course Unit
Notes: Contact professor to discuss actual class times that work for all students.

SKRT 471 Intermediate Sanskrit Part II
This course will lead students to consolidate their knowledge of Sanskrit grammar and increase their familiarity with Sanskrit literature of all kinds, including epic, literary, philosophical, and narrative genres of texts. It will also introduce students to the study and reading of inscriptive materials.
For BA Students: Last Language Course
Two terms. student must enter first term.
Prerequisites: Intermediate Sanskrit II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

SKRT 480 Readings in Sanskrit Literature
This course is for advanced students of Sanskrit. Designed as a seminar, the course aims to take students through the primary and secondary sources of Sanskrit literary and philosophical production. Each semester will focus on a different genre: epic, belles-lettres, lyric poetry, drama, philosophy, shastra, advanced grammar, history, poetics, and epigraphy. We will focus on original sources, secondary scholarship, and theoretical approaches toward the translation and study of Sanskrit texts. One-term course offered either term
Prerequisites: Advanced Sanskrit or equivalent ascertained through test or permission of instructor.
Activity: Seminar
1 Course Unit

SKRT 490 Advanced Sanskrit Topics Course
Topics vary by semester in Advanced Sanskrit
Course not offered every year
Activity: Seminar
1 Course Unit

Scandinavian (SCND)

SCND 000 Swedish I
Activity: Lecture
1 Course Unit
SCND 101 Elementary Swedish I
Part one of the elementary level Swedish course. The first-year language course introduces you to contemporary Swedish and Nordic society, culture, and history. Students actively participate in class discussion, assignments and projects. You will learn to understand and use basic language in a contemporary everyday-life context. The course will offer individualized opportunities to explore Swedish and to reflect over how it fits with your continued academic and personal development.
For BA Students: Language Course
Taught by: Aahren
Course offered fall; odd-numbered years
Also Offered As: SCND 501
Activity: Lecture
1 Course Unit

SCND 102 Elementary Swedish II
Part two of the elementary level Swedish course. Authentic texts and media will be introduced, as well as opportunities to communicate with native speakers. By the end of the spring semester you will be able to handle a range of practical situations, such as ordering in restaurants and cafes, shopping, talking about family, holidays, plans, daily routines, health, sports/hobbies, jobs and studies. You will work on expressing your opinions and intentions, likes and dislikes, and understanding basic authentic source media, spoken language, etc. You will also learn about Sweden in an international context.
For BA Students: Language Course
Taught by: Aahren
Course offered spring; even-numbered years
Also Offered As: SCND 502
Prerequisites: SCND 101 or equivalent.
Activity: Lecture
1 Course Unit

SCND 103 Intermediate Swedish I
In part one of the intermediate year, students will research and explore a broad range of topics using authentic sources and course materials to gain greater fluency and familiarity with language and culture. You will meet native Swedish speakers and visit Swedish organizations in the Philadelphia area. Projects and assignments will give you ample opportunity to explore areas that are of special interest to you from academic, professional, and personal perspectives. We will learn about Swedish innovation, business, socio-economic and political structures, geography, tourism, migration, history, and about what it is like to live in Sweden today.
For BA Students: Language Course
Taught by: Aahren
Course offered fall; even-numbered years
Also Offered As: SCND 503
Prerequisite: SCND 102 or equivalent
Activity: Lecture
1 Course Unit

SCND 104 Intermediate Swedish II
Part two of the intermediate level Swedish course. Through in- and our-of-class interactions, you will continue to engage with your peers and native or fluent Swedish speakers. We will look at Swedish products, practices and perspectives, and we will discuss how Swedish culture and society are adapting to a rapidly changing world. We will complement the course literature with relevant authentic sources, such as online media, films, newspapers, etc. With a small class size, we have the flexibility to adapt the content to individual interests, and you will have plenty of opportunity to contribute to the total learning experience while elevating your Swedish vocabulary, grammar and communication skills.
For BA Students: Last Language Course
Taught by: Aahren
Course offered spring; odd-numbered years
Also Offered As: SCND 504
Prerequisite: SCND 103 or equivalent
Activity: Lecture
1 Course Unit

SCND 501 Elementary Swedish I
Part one of the elementary level Swedish course. The first-year language course introduces you to contemporary Swedish and Nordic society, culture, and history. Students actively participate in class discussion, assignments and projects. You will learn to understand and use basic language in a contemporary everyday-life context. The course will offer individualized opportunities to explore Swedish and to reflect over how it fits with your continued academic and personal development.

Science, Technology & Society (STSC)

STSC 001 Emergence of Modern Science
During the last 500 years, science has emerged as a central and transformative force that continues to reshape everyday life in countless ways. This introductory course will survey the emergence of the scientific world view from the Renaissance through the end of the 20th century. By focusing on the life, work, and cultural contexts of those who created modern science, we will explore their core ideas and techniques, where they came from, what problems they solved, what made them controversial and exciting and how they relate to contemporary religious beliefs, politics, art, literature, and music. The course is organized chronologically and thematically. In short, this is a "Western Civ" course with a difference, open to students at all levels.
For BA Students: Hum/Soc Sci or Nat Sci/Math Sector
Taught by: Kucuk
Course usually offered in fall term
Also Offered As: HSOC 001
Activity: Lecture
1 Course Unit

STSC 002 Medicine in History
This course surveys the history of medical knowledge and practice from antiquity to the present. No prior background in the history of science or medicine is required. The course has two principal goals: (1) to give students a practical introduction to the fundamental questions and methods of the history of medicine, and (2) to foster a nuanced, critical understanding of medicine's complex role in contemporary society. The course takes a broadly chronological approach, blending the perspectives of the patient, the physician, and society as a whole—recognizing that medicine has always aspired to "treat" healthy people as well as the sick and infirm. Rather than history "from the top down" or "from the bottom up," this course sets its sights on history from the inside out. This means, first, that medical knowledge and practice is understood through the personal experiences of patients and caregivers. It also means that lectures and discussions will take the long-discredited knowledge and treatments of the past seriously on their own terms, rather than judging them by today's standards. Required readings consist largely of primary sources, from elite medical texts to patient diaries. Short research assignments will encourage students to adopt the perspectives of a range of actors in various historical eras.
For BA Students: History and Tradition Sector
Taught by: Barnes
Course usually offered in fall term
Also Offered As: HIST 036, HSOC 002
Activity: Lecture
1 Course Unit

STSC 003 Technology & Society
Technology plays an increasing role in our understandings of ourselves, our communities, and our societies, in how we think about politics and war, science and religion, work and play. Humans have made and used technologies, though, for thousands if not millions of years. In this course, we will use this history as a resource to understand how technologies affect social relations, and conversely how the culture of a society shapes the technologies it produces. Do different technologies produce or result from different economic systems like feudalism, capitalism and communism? Can specific technologies promote democratic or authoritarian politics? Do they suggest or enforce different patterns of race, class or gender relations? Among the technologies we'll consider will be large objects like cathedrals, bridges, and airplanes; small ones like guns, clocks and birth control pills; and networks like the electrical grid, the highway system and the internet.
For BA Students: Society Sector
Taught by: Benson
Course usually offered in spring term
Also Offered As: HSOC 003, SOCI 033
Activity: Lecture
1 Course Unit
STSC 021 From Darwin to DNA
Evolution has been one of the productive and important ideas in the history of biology. It has also been a scientific idea with many complex social and political meanings. In this freshman seminar, we explore the history of ideas about evolution, heredity, DNA and genomics, attentive to the profound social dimensions of biological ideas. We consider the political and intellectual history of genetics and genomics, from pre-Darwinian ideas about evolution (there were many theories before Darwin's) to contemporary debates about ancestry testing and creation science. We look at evolution's role in the politics of race, eugenics, creation science and identity. This course will provide students with critical historical and social perspectives on science, technology and medicine.
Taught by: Lindee
Course not offered every year
Activity: Seminar
1 Course Unit

STSC 026 Relativity and the Philosophy of Space and Time
This course will present a detailed introduction to Einstein's special and general theories of relativity and will examine their historical development and philosophical significance. No previous physics or philosophy will be presupposed, and only high school mathematics will be used.
For BA Students: Natural Science and Math Sector
Taught by: Dorner
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Also fulfills General Requirement in Science Studies for Class of 2009 and prior

STSC 062 American Way of War
Do Americans fight wars differently than do the people of other nations? Are there unique American tactics or technologies? Does America's success in war owe to its arsenal of sophisticated weapons, or to the fighting spirit of its people? What characterizes the American experience in combat? A respect for limits, or a willingness to win at any cost? And can we even answer these questions, or do the myths we tell ourselves about our past get in the way? This seminar explores the scientific and technological development of warfare in the United States from the time of European settlement of the Americas to the era of unmanned aerial vehicles. The changing nature of warfare beginning in 1775 and continuing through 2014 involved the creation and deployment of increasingly complex and powerful weapons, as well as a corresponding evolution in tactics and strategy.
Course not offered every year
Activity: Seminar
1 Course Unit

STSC 077 Voyages of Discovery
Across the nineteenth century, voyages of sail and steam made possible the creation of empires and a globalized world, through the transportation of people and commodities. Similarly, this course is a voyage of discovery based on the study of actual ship's logs held in Penn's Rare Book collection. We will use these accounts to guide our investigation into the science, technology, medicine, economic and environmental history of life at sea and in the ports of call for these ships around the Indian and Atlantic Oceans. Collectively, the seminar will produce an online exhibition built on logs, diaries and other sources held at Penn, in other local collections and gleaned from archives around the world.
Taught by: Petrie
Course not offered every year
Activity: Seminar
1 Course Unit

STSC 078 Everyday Technologies and the Making of the Modern World
Long before iPhones and Fitbits, personal technology – small(ish), portable, purchasable – had a tremendous impact on the lives of people around the globe. Items such as wristwatches, bicycles, sewing machines and radios could empower their users (or sometimes discipline them), creating economic, educational or recreational opportunities while also being associated with grander ideas and ideologies. This course will explore such everyday technologies across the nineteenth and twentieth centuries, in locations spanning the Americas, Europe, Africa and Asia. We will consider how the use and significance of particular technologies varied according to time and place; how these everyday items contributed to “self-fashioning” for individuals, nations, and empires; and how, through use and modification, consumers themselves could become part of the story of technological change. In addition to reading a variety of classic and recent scholarship, students will work with a wide array of primary sources (newspapers, photographs, patent records, trade cards) and use digital tools to present their own research projects.
Taught by: Petrie
Activity: Seminar
1 Course Unit

STSC 107 Science, Technology & Medicine in Colonial India
In this course we will explore the broad contours of the histories of Science, Medicine and Technology in Colonial India (c. 1757 - 1947).
This broad overview will be developed each week through a case study based on any one particular scientific discipline, technological project or medical event. Overall the course will attempt to locate the development of science, technology and medicine within the social, political and cultural context of colonial India. It is also worth noting that "Colonial India", will include discussions of regions which today make up the Republic of India, Pakistan and Bangladesh.
Taught by: Mukharji
One term course offered either term
Also Offered As: HSOC 107
Activity: Seminar
1 Course Unit
STSC 110 Science and Literature
This course will explore the emergence of modern science fiction as a genre, the ways it has reflected our evolving conceptions of ourselves and the universe, and its role as the mythology of modern technological civilization. We will discuss such characteristic themes as utopias, the exploitation of space and time, biological engineering, superman, robots, aliens, and other worlds—and the differences between European and American treatment of these themes.
For BA Students: Arts and Letters Sector
Course usually offered in spring term
Also Offered As: COML 074, ENGL 075, HIST 117, HSOC 110
Activity: Lecture
1 Course Unit

STSC 135 Modern Biology and Social Implications
This course covers the history of biology in the 19th and 20th centuries, giving equal consideration to three dominant themes: evolutionary biology, classical genetics, and molecular biology. The course is intended for students with some background in the history of science as well as in biology, although no specific knowledge of either subject is required. We will have three main goals: first, to delineate the content of the leading biological theories and experimental practices of the past two centuries; second, to situate these theories and practices in their historical context, noting the complex interplay between them and the dominant social, political, and economic trends; and, third, to critically evaluate various methodological approaches to the history of science.
For BA Students: Natural Science and Math Sector
Taught by: Cecatti
One-term course offered either term
Also Offered As: HIST 035
Activity: Seminar
1 Course Unit

STSC 145 Comparative Medicine
This course explores the medical consequences of the interaction between Europe and the "non-West." It focuses on three parts of the world Europeans colonized: Africa, South Asia, and Latin America. Today's healing practices in these regions grew out of the interaction between the medical traditions of the colonized and those of the European colonizers. We therefore explore the nature of the interactions. What was the history of therapeutic practices that originated in Africa or South Asia? How did European medical practices change in the colonies? What were the effects of colonial racial and gender hierarchies on medical practice? How did practitioners of "non-Western" medicine carve out places for themselves? How did they redefine ancient traditions? How do patients find their way among multiple therapeutic traditions? How does biomedicine take a different shape when it is practiced under conditions of poverty, or of inequalities in power? How do today's medical problems grow out of this history? This is a fascinating history of race and gender of pathogens and conquerors, of science and the body. It tells about the historical and regional roots of today's problems in international medicine.
For BA Students: History and Tradition Sector
Taught by: Mukharji
Course usually offered in fall term
Also Offered As: HIST 146, HSOC 145
Activity: Lecture
1 Course Unit

STSC 160 The History of the Information Age
Certain new technologies are greeted with claims that, for good or ill, they must transform our society. The two most recent: the computer and the Internet. But the series of social, economic and technological developments that underlie what is often called the Information Revolution include much more than just the computer. In this course, we explore the history of information technology and its role in contemporary society. We will explore both the technologies themselves—calculating machines, punched card tabulators, telegraph and telephone networks, differential analyzers, digital computers, and many others—and their larger social, economic and political contexts. To understand the roots of these ideas we look at the prehistory of the computer, at the idea of the post-industrial or information society, at parallels with earlier technologies and at broad historical currents in the United States and the world.
For BA Students: Humanities and Social Science S
Taught by: Dick
One-term course offered either term
Also Offered As: SOCI 161
Activity: Lecture
1 Course Unit

STSC 162 Technology and Medicine in Modern America
Medicine as it exists in contemporary America is profoundly technological; we regard it as perfectly normal to be examined with instruments, to expose our bodies to many different machines; and to have knowledge produced by those machines mechanically/electronically processed, interpreted and stored. We are billed technologically, prompted to attend appointments technologically, and often buy technologies to protect, diagnose, or improve our health: consider, for example, HEPA-filtering vacuum cleaners; air purifiers; fat reducing grills; bathroom scales; blood pressure cuffs; pregnancy testing kits; blood-sugar monitoring tests; and thermometers. Yet even at the beginning to the twentieth century, medical technologies were scarce and infrequently used by physicians and medical consumers alike. Over the course of this semester, we will examine how technology came to medicine's center-stage, and what impact this change has had on medical practice, medical institutions and medical consumers - on all of us!
Taught by: Johnson
Course usually offered summer term only
Also Offered As: HSOC 152
Activity: Seminar
1 Course Unit

STSC 168 Environment and Society
This course examines contemporary environmental issues such as energy, waste, pollution, health, population, biodiversity and climate through a historical and critical lens. All of these issues have important material, natural and technical aspects; they are also inextricably entwined with human history and culture. To understand the nature of this entanglement, the course will introduce key concepts and theoretical frameworks from science and technology studies and the environmental humanities and social sciences.
For BA Students: Humanities and Social Science S
Taught by: Benson
Course not offered every year
Activity: Lecture
1 Course Unit
**STSC 179 Environmental History**
This course provides an introduction to environmental history—the history of the interrelationship between humans and the rest of nature. In the words of historian J.R. McNeill, “Human history has always and will always unfold within a larger biological and physical context, and that context evolves in its own right. Especially in recent millennia, that context has co-evolved with humankind.” In this course we will study the co-evolution between human actors and non-human actors in global history, analyzing political, social, cultural and economic factors that affect ideas about nature and natural effects on nature. We will consider the concept of the Anthropocene and study current environmental changes and challenges.
Taught by: Greene, A
Course not offered every year
Also Offered As: HSOC 179
Activity: Lecture
1 Course Unit

**STSC 201 Hist Phys Sci 19th & 20th Century**
Over the last two centuries, scientists have produced a broad range of knowledge about the physical world, from light to electromagnetism to atoms to nuclei, facilitating or explaining an ever increasing mastery over the natural world. Because of their success, these developments played an important role in forming our views of how to effectively generate knowledge of the natural world. This course will examine some of the major developments in the physical sciences during the 19th and 20th century, asking how that knowledge and the means by which it was produced related to institutions, technical practices and broader cultural knowledge and knowledge production to explore how past practices have, or have not, left their traces in later science. The course will meet twice a week for lecture and discussion. Readings will consist of Pursuing Power and Light: Technology and Physics from James Watt to Albert Einstein by Bruce J. Hunt When Physics Became king by Iwan Rhys Morus Night Thoughts of a Classical Physicist by Russel McCommach as well as articles from a course reader. Students will produce three short papers (about three pages) and a term paper (about ten pages)
Taught by: Ashraf
Course not offered every year
Activity: Lecture
1 Course Unit

**STSC 208 Science and Religion: Global Perspectives**
This survey course provides a thematic overview of science and religion from antiquity to the present. We will treat well-known historical episodes, such as the emergence of Muslim theology, the Galilean Affair and Darwinism, but also look beyond them. This course is designed to cover all major faith traditions across the globe as well as non-traditional belief systems such as the New Age movement and modern Atheism
Taught by: Kucuk
Course not offered every year
Activity: Lecture
1 Course Unit

**STSC 209 Race and Gender in Global Science**
This course critically examines the creation of scientific conceptions of ‘race’ and ‘sex’ in the modern era and their global impact. How did ‘race’ and ‘sex’ come to be the primary categories through which human variation has been classified in the modern West? What concepts of ‘race’ and ‘sex’ did colonial scientists, doctors, naturalists, and other experts invent, and how and why did they do this? How have scientific conceptions of race and sex been adapted to fit the sociopolitical projects of formerly colonized regions? And how have recent developments in genomic science sought to reinvent these categories? With these questions in mind, this course challenges us to think critically about the political contexts in which conceptions of race and sex have been crafted as well as how they have been contested and re-defined.
Taught by: Gil-Riano
Course usually offered in spring term
Also Offered As: HSOC 209
Activity: Seminar
1 Course Unit

**STSC 212 Science Technology and War**
In this survey we explore the relationships between technical knowledge and war in the nineteenth and twentieth centuries. We attend particularly to the centrality of bodily injury in the history of war. Topics include changing interpretations of the machine gun as inhumane or acceptable; the cult of the battleship; banned weaponry; submarines and masculinity; industrialized war and total war; trench warfare and mental breakdown; the atomic bomb and Cold War; chemical warfare in Vietnam; and “television war” in the 1990s.

Taught by: Linde
Course not offered every year
Also Offered As: HSOC 212
Activity: Lecture
1 Course Unit

**STSC 218 Climate Change: Science, Technology and Society**
Climate change is a sign that humans have become a force with planet-altering power. We need to understand how human societies work if we hope to respond to its dangers effectively. This course will use history to help students see climate change’s social and political aspects. We’ll examine how previous societies have responded to episodes of non-anthropogenic climate change, exploring market-based policies, power imbalances, and vulnerability. Through the history of science, we will investigate and critique how the growth of scientific knowledge often led climate change to be framed as a techno-scientific problem, best addressed through research and technological innovation. Students will learn how climate politics have been pushed by environmental and social justice activists, as well as by anti-communist scientists and corporate-sponsored cultivation of public doubt. Assignments will help students learn how to translate scholarly insights into engaging media that can reach various publics.
Taught by: Turner
One-term course offered either term
Activity: Seminar
1 Course Unit
STSC 219 Race, Science, and Globalization
This course examines how the practice of sorting humans into distinct races is connected to the rise of modern science and to the economic globalization sparked by Columbus’ arrival in the Americas in 1492. By examining the trajectory of race in science from the Iberian conquest of the Americas until the present, we will examine the ways in which colonial logics and structures persist into the present and the ways they’ve been disrupted by various revolutionary, anti-colonial, and anti-racist movements. Along the way, we will observe how cultural ideas about race have been woven into the conceptual fabric of modern scientific disciplines such as anthropology, biology, psychology, and sociology and how these disciplines have sought to redeem themselves from their racist pasts.
One term course offered either term
Also Offered As: HSOC 219
Activity: Seminar
1 Course Unit

STSC 231 Insect Epidemiology Pests, Pollinators and Disease Vectors
Malaria, Dengue, Chagas disease, the Plague—some of the most deadly and widespread infectious diseases are carried by insects. The insects are also pensive pests; bed bugs have returned from obscurity to wreak havoc on communities, invasive species decimate agricultural production, and wood borers are threatening forests across the United States. At the same time declines among the insects on which we depend—the honeybees and other pollinators—threaten our food security and ultimately the political stability of the US and other nations. We will study the areas where the insects and humans cross paths, and explore how our interactions with insects can be cause, consequence or symptom of much broader issues. This is not an entomology course but will cover a lot about bugs. It’s not a traditional epidemiology course but will cover some fascinating epidemiological theory originally developed for the control of disease vectors. It will cover past epidemics and infestations that have changed the course of the history of cities and reversed advancing armies. HSOC 241, Stem Cells, Science and Society. Gearhart/Zaret.
Taught by: Levy
Course not offered every year
Also Offered As: HSOC 231
Activity: Seminar
1 Course Unit

STSC 260 Cyberculture
Computers and the internet have become critical parts of our lives and culture. In this course, we will explore how people use these new technologies to develop new conceptions of identity, build virtual communities and affect political change. Each week we’ll see what we can learn by thinking about the internet in a different way, focusing successively on hackers, virtuality, community, sovereignty, interfaces, algorithms and infrastructure. We’ll read books, articles, and blogs about historical and contemporary cultures of computing, from Spacewar players and phone phreaks in the 1970s to Google, Facebook, World of Warcraft, WikiLeaks, and Anonymous today. In addition, we’ll explore some of these online communities and projects ourselves and develop our own analyses of them.
Taught by: Dick
One term course offered either term
Also Offered As: SOCI 260
Activity: Seminar
1 Course Unit

STSC 270 Digital Democracy
Technological infrastructure shapes what forms of political life are possible within a society. Political campaigns, investigative journalism, public engagement, protest, government—all unfold on different time scales, in different forms, and with different consequences depending on what machines mediate them. This course explores the forms of American political life that have taken shape in and through modern digital computing. We will investigate especially a perceived tension at the heart of computing technologies—from artificial intelligence to social media—as they have been introduced to so many corners of American political life: Are computing technologies agents of liberation, or of control? The internet, for example, was embraced by some as an inherently democratizing and liberating force, giving users equal access to voice and information. On the other hand, many feared the internet as an unprecedented platform for corporate and government surveillance and manipulation. This course will analyze and historicize this tension, looking to unpack the complex and controversial role of computers in American political life from the Cold War to @POTUS.
Taught by: Dick
Course usually offered in fall term
Activity: Seminar
1 Course Unit

STSC 272 Energy in America
Energy issues are central to all aspects of American life—social, cultural, environmental, political and economic. The United States possesses abundant energy resources, and Americans have long enjoyed high, even profligate energy consumption. With 5% of the world’s population, the United States currently consumes 24% of the world energy. How did the United States’ energy system come to be? This course looks at how this energy system developed over time, in order to understand how Americans’ energy choices have been shaped by environmental conditions, economic arrangements, political practices, social structures, and cultural values. It examines the kinds of energy and power used by Americans, energy adoption and transitions, the development of power systems, the role of consumption, and the influence of energy beliefs. It emphasizes the themes of system, contingency, complementarity, and choice. Ongoing topics are the history of energy at the University of Pennsylvania and in the mid-Atlantic region, the meaning of energy efficiency, and the problem of sustainable energy.
Taught by: Greene, A
Course not offered every year

Activity: Seminar
1 Course Unit
STSC 278 Prove It: Mathematics and Certainty
Mathematical knowledge is often held up as our most reliable and certain knowledge. The truths of mathematics serve as exemplars of certainty that are not tied to any specific time and place. Yet, throughout history, mathematics has been understood and practiced in quite different ways, for quite different reasons, and by quite different people. Mathematical certainty has been shaped by different beliefs and practices. Mathematicians and their work have been shaped by rich interactions with different dimensions of social life from religion and politics to architecture and war. Mathematics is not simply surrounded by a society external to it, it is an integral and complex part of it. What concerns have motivated mathematical research through history? How has mathematics been put to work in different domains of culture? What does it mean to be a mathematician in different times and places? Does mathematical knowledge bear traces of the conditions in which it was produced? What counts as proof and to whom? How do we reconcile the changing character of mathematical research with the traditional understanding of mathematical knowledge as time and place independent? This course takes up these questions by looking to different worlds in which mathematics and mathematical certainty have taken shape.

STSC 279 Nature's Nation: Americans and Their Environment
The United States is "nature's nation." Blessed with an enormous, resource-rich geographically diverse and sparsely settled territory, Americans have long seen "nature" as central to their identity, prosperity, politics and power, and have transformed their natural environment accordingly. But what does it mean to be "nature's nation?" This course describes and explores how American "nature" has changed over time. How and why has American nature changed over the last four centuries? What have Americans believed about the nation's nature, what have they known about the environment, how did they know it and how have they acted on beliefs and knowledge? What didn't or don't they know? How have political institutions, economic arrangements, social groups and cultural values shaped attitudes and policies? How have natural actors (such landscape features, weather events, plants, animals, microorganisms) played roles in national history? In addition to exploring the history of American nature, we will look for the nature in American history. Where is "nature" in some of the key events of American history that may not, on the surface, appear to be "environmental?"

1 Course Unit

STSC 308 Science, Technology and Global Capitalism
Modern capitalism has been defined by the circulation of commodities, from gold in the 16th century to sugar in the 17th, tobacco in the 18th, cotton in the 19th, oil in the 20th, and financial derivatives in the 21st. But the world is always messy and complex, rather than neatly divided into products and goods. How, why, and for whose benefit do we divide nature into the abstractions of the marketplace? Who holds power over where, why, and how that happens? In this seminar, we'll use a wide range of scholarship from the humanities, social sciences, and the sciences, along with primary texts and other sources, in order to understand the close links among global capitalism, science and technology, and the natural world.?
One term course offered either term
Activity: Seminar
1 Course Unit

STSC 309 Rifle and Compass
This course looks at the scientific and technological aspects of warfare during what is often called the Military Revolution. The main focus will be navigation and gunpowder warfare. The first part of this course will focus on magnetism, military drilling, architecture, geography and physics. The second part of the course will turn to case studies, such as the fall of Constantinople in 1453, the Ottoman-Austrian War of 1661-2 and the expansion of Russia in the early eighteenth century.
Taught by: Kucuk

Activity: Seminar
1 Course Unit

STSC 312 Weapons of Mass Destruction
The course explores the historical development of traditional weapons of mass destruction such as chemical, nuclear and biological agents, in addition to newer and seemingly non-traditional weapons such as land mines and civilian aircraft that can also be employed to cause large numbers of injuries and deaths among civilian and military populations. Through case studies in technology and public health, students will evaluate the medical, scientific, environmental, and cultural ramifications of these weapons and their effect on human heal and society by analyzing the rise of the military-industrial-academic complex in twentieth century America.

STSC 315 Theories of Color: Ideas and Context
In this course we will investigate ideas about color and color practices from antiquity to the nineteenth century. Our historical survey will follow three intertwined threads. We will examine physical color theories, namely, what various writers thought color was in things themselves and how color was related to light. We will study anatomical and physiological accounts of the eye, especially the way in which ocular anatomy was intimately tied to ideas about color. And we will trace the history of color technology, namely, how people in the past have struggled to bring color under control. As a part of this we will study the long history of alchemy, which was in a sense born out of attempts to mimic precious stones and metals - especially their color - and we will touch on the closely related histories of dyeing, pigments, and painting. When possible we will reproduce notable historical anatomies, particularly the anatomical procedures of Galen, Vesalius, and others, and we will also replicate some key historical experiences and experiments concerning color.

Taught by: Baker
Also Offered As: VLIST 215
Activity: Seminar
1 Course Unit
Notes: This course can count toward Sector A or B (Stage 2 or 3) of the Visual Studies Major.

STSC 316 Science, Technology and Society in Modern East Asia
The course aims to survey the history of science and technology in East Asian countriesChina, Japan and Korea-since the late 19th century. Since Japan was the only nation in East Asia that succeeded in modernizing itself by adopting Western science, technology and politics, it will be studied first. The Chinese and Korean cases then will be reviewed with different angles. The course will emphasize the mutual influence between science & technology and society to answer how these countries became major industrial powers in the 21st century.

STSC 328 What is Prediction?
This course is an investigation into the notion of prediction from antiquity to the present. By looking closely at key practices from Homeric divination to modern actuarial science and from early modern astrology to contemporary climate models, the course seeks to historicize the way we engage with the future. As part of the course, students also explore the role that methodology, models, causation and big data have played in predictive practices. The readings include a mixture of primary sources, modern scholarship and journalism.

STSC 338 Hybrid Science: Nature, health, and society in Latin America
What role did science and medicine play in the creation and growth of the Spanish and Portuguese empires? And why was the creation of science and health institutions crucial to the revolutionary movements for independence in Latin America? This course examines science and medicine in Latin America by attending to the ways that knowledge of nature and health has been central to the political struggles of the countries in this region. A crucial dynamic shaping the history and culture of this region is the interplay between the healing practices and cosmologies of European settlers, indigenous Americans, and the descendants of African slaves. Bearing this interplay in mind, this course explores how Latin America has been a fertile site of scientific creativity. It also examines the ways in which Latin American scientists and medical experts have refashioned concepts and practices from Europe and North America to fit local circumstances.

Activity: Seminar
1 Course Unit

STSC 360 Data Dreams
The idea of solving problems by collecting as much data as possible about them is an old dream that has recently been revitalized. This course examines the hunger for data from a historical and social perspective, seeking to understand when, why, and how the collection of vast amounts of data has come to seem valuable and desirable, sometimes in ways that exceed any reasonable expectation of utility or feasibility. Topics include state surveillance, online tracking, the quantified self, citizen science, civic hacking, human genomics, bioinformatics, and climate science.

1 Course Unit

STSC 362 Waters, Roads and Wires
This course studies infrastructures: how and why they develop, how they are maintained, how they reshape environments, and how they interconnect with other infrastructures. We begin by reading about infrastructure and about large technological systems, then explore some specific American structures. Possible topics: the electrical grid, the interstate highway system, hydroelectric dams, Amtrak, urban mass transit systems, disasters and infrastructure (Katrina, Harvey, etc.). As the semester progresses, students will spend more time in class on individual research topics of their choice, and in working groups producing a group project.

STSC 363 Technology & Democracy
What is the relationship between technology and politics in global democracies? This course explores various forms of technology, its artifacts and experts in relation to government and political decision-making. Does technology "rule" or "run" society, or should it? How do democratic societies balance the need for specialized technological expertise with rule by elected representatives? Topics will include: industrial revolutions, factory production and consumer society, technological utopias, the Cold War, state policy, colonial and post-colonial rule, and engineers' political visions.
Taught by: Voskuhl
Course not offered every year
Activity: Seminar
1 Course Unit

STSC 368 Sustainability & Utopianism
This seminar explores how the humanities can contribute to discussions of sustainability. We begin by investigating the contested term itself, paying close attention to critics and activists who deplore the very idea that we should try to sustain our, in their eyes, dystopian present, one marked by environmental catastrophe as well as by an assault on the educational ideals long embodied in the humanities. We then turn to classic humanist texts on utopia, beginning with More's fictive island of 1517. The "origins of environmentalism" lie in such depictions of island edens (Richard Grove), and our course proceeds to analyze classic utopian texts from American, English, and German literatures. Readings extend to utopian visions from Europe and America of the nineteenth and twentieth centuries, as well as literary and visual texts that deal with contemporary nuclear and flood catastrophes. Authors include: Bill McKibben, Jill Kerr Conway, Christopher Newfield, Thomas More, Francis Bacon, Karl Marx, Henry David Thoreau, Robert Owens, William Morris, Charlotte Perkins Gilman, Ayn Rand, Christa Wolf, and others.

STSC 370 The Many Lives of Data: Population, Environment, and Planning in the United States, 1850 to the Present
This is a class about the lives and afterlives of information from 1850 to the present. Not only can information be reproduced (in a variety of material conditions); it can be repurposed and funneled through a variety of different applications, some of them serving radically different purposes than the first purpose of gathering it. Thoreau's journals of plant flowering, for instance, have become important indicators of climate change. More controversial is the sale of biomedical information by personal genomics services for drug discovery, or the construction of forensic databases consisting of the DNA of suspects arrested as a result of racial profiling. We will study the ways in which data has become a way for us to understand and define change, stability, place, and time, beginning in the mid-nineteenth century, a period of accelerated and increasingly systematic gathering of data, particularly medical, forensic, and environmental data. The class will proceed both chronologically and thematically in three units, from the gathering and use of biomedical data as a way to make patient populations "legible" (to borrow from James Scott), to data as a way to make the environment understandable, and finally to data as a tool for producing and reproducing social relations. As a final project, students will trace a particular data set from its original gathering to its latest usage. Students will also have an opportunity to create their own course content in the final three weeks of class.

STSC 379 Animals in Science Medicine Technology
This course explores human-animal relationships: the wide range of these relationships, why they originated and how they have changed over time. How have humans classified, valued, utilized, consumed, behaved toward and understood animals? Where is the boundary between humans and other animals, and how do we know, since humans are also animals? How is that boundary been maintained and redefined? Are humans part of the animal "natural" world- or apart from it? How are humans similar to and different from other kinds of animals? How do we know about animals and what is it we know? To what extent are questions about animals really questions about humans? How has the meaning of animal changed over time? The course focuses in particular to the roles and relationships of animals within science and medicine, and as biotechnologies.

1 Course Unit
STSC 391 Bioethics and National Security
At least since Augustine proposed a theory of "just war," armed conflict has been recognized as raising ethical issues. These issues have intensified along with the power and sophistication of weapons of war, and especially with increasing engineering capabilities and basic knowledge of the physical world. The life sciences have had their place in these developments as well, perhaps most vividly with the revelations of horrific experiments conducted by the Nazi and Imperial Japanese militaries, but with much greater intensity due to developments in fields like genetics, neuroscience and information science, and the widely recognized convergence of physics, chemistry, biology and engineering. The fields of bioethics and national security studies both developed in the decades following World War II. During the cold war little thought was given to the fact that many national security issues entail bioethical questions, but this intersection has been increasingly evident over the past two decades. In spite of the overlapping domains of bioethics and national security, there has been remarkable little systematic, institutional response to the challenges presented by these kinds of questions: What rules should govern the conduct of human experiments when national security is threatened? Is it permissible to study ways that viruses may be genetically modified in order to defeat available vaccines, even for defensive purposes? What role may physicians or other health care professionals play in interrogation of suspected terrorists? Must warfighters accept any and all drugs or devices that are believed to render them more fit for combat, including those that may alter cognition or personality? What responsibilities does the scientific community have to anticipate possible "dual purpose" uses or other unintended consequences of its work? Deploying the resources of ethics, philosophy, history, sociology and theory, this course will address these and other problems.

Course usually offered in spring term
Also Offered As: HSOC 391
Activity: Seminar
1 Course Unit

STSC 408 Depicting Data and Picturing Nature
Scientific knowledge has always relied on images, as in the cases of big, beautiful books of pictures like Audubon's Birds of America, photographs taken through telescopes, maps, readouts and today, digital images. These images can be a shorthand or guide to make patterns clearer or sometimes are taken to represent the natural world itself. With questions about how to represent "big data," the interpretation of medical images, and about the manipulability of digital images, the role of images in contemporary science is hardly straightforward. This course will look at the development of image-making as a part of knowledge production in medicine and the sciences. We will read works by visual specialists, historians, scientists and artists, and critically examine scientific images themselves, developing our own visual literacy.
Taught by: Berkowitz

Activity: Seminar
1 Course Unit

STSC 411 Sports Science Medicine Technology
Why did Lance Armstrong get caught? Why do Kenyans win marathons? Does Gatorade really work? In this course, we won't answer these questions ourselves but will rely upon the methods of history, sociology, and anthropology to explore the world of the sport scientists who do. Sport scientists produce knowledge about how human bodies work and the intricacies of human performance. They bring elite (world-class) athletes to their laboratories or their labs to the athletes. Through readings, discussions, and original research, we will find out how these scientists determine the boundary between "natural" and "performance-enhanced" work to conquer the problem of fatigue, and establish the limits and potential of human beings. Course themes include: technology in science and sport, the lab vs. the field, genetics and race, the politics of the body, and doping. Course goals include: 1) reading scientific and medical texts critically, and assessing their social, cultural, and political origins and ramifications; 2) pursuing an in-depth The course fulfills the Capstone requirement for the HSOC/STSC majors. Semester-long research projects will focus on "un-black-boxing" the metrics sport scientists and physicians use to categorize athletes' bodies as "normal" or "abnormal." For example, you may investigate the test(s) used to define whether an athlete is male or female, establish whether an athlete's blood is "too" oxygenated, or assess whether an athlete is "too" fast (false start). Requirements therefore include: weekly readings and participation in online and in-class discussions; sequenced research assignments; peer review; and a final 20+page original research paper and presentation.

STSC 429 The Neurological Condition
Few aspects of our physical makeup are as closely linked to who we are as people as the nervous system. We define our selves by our capacity to think, to react, by our memories. In large part, we believe we are our brains. Yet such perceptions have a history far deeper than our current neuro-obsessed moment. In this course we explore the neurological condition as the human condition: the growing sense since the nineteenth century that we are defined by our nervous systems, and the science that has fostered this vision. From theories of diminishing "nerve force" and the electric cures of the Victorian era, to fMRIs and Obama’s 2013 BRAIN Initiative, we explore how science, medicine, and technology have shaped our understanding of the brain and nervous system as the center of human identity. Course topics include the rise of professional neurology and neuroscience, cultural meanings of nerves and the brain, and the intimate role of patients and human subjects in formulating this science from the nineteenth century to the present.

STSC 436 Biopiracy: Medicinal Plants and Global Power
Biopiracy has emerged as the name of conflict between multinational pharmaceutical companies attempting to get genetic patents on medicinal plants and indigenous communities in the Global South who have long known and used these plants for medicinal purposes. Today the story of Biopiracy is an unfolding story of plants, patents and power. The extraction and commercial exploitation of plants and knowledge about them from the Global South however is not new. It has been happening at increasing pace for at least the last two centuries. Both the anti-malarial drug quinine and the cancer drug vincristine for instance have their plant-origins in the Global South where local communities used them medicinally long before their discovery by biomedicine. This course will put the current debates around Biopiracy in context and explore how the entanglements of plants and power have changed or not changed.

Activity: Seminar
1 Course Unit

STSC 442 Hospital as Curing Machine
This course examines the technological, scientific, and spatial evolution of the modern hospital from the miasmatic, vermin-infested medieval European hospital-as-alms house, to the late twentieth-century ideal of the modern hospital as a condenser of sophisticated technologies, scientific expertise, and Taylorist efficiencies. In so doing, we will see how designers of hospital space, consciously or not, have striven to realize the mechanized, technological vision of the hospital as curing machine a phrase first invoked by 18th-century French surgeon and anatomist Jacques Tenon. While the early nineteenth-century hospital had been a locus for fears about contagion, death, and disease in a pre-germ theory world, through its eventual integration of antiseptic practices, spatially produced zones of medical expertise (the operating suite, the laboratory, pediatric and maternity wards), novel technologies (incubators, hyperbaric chambers, x-rays, ultrasounds) and factory-like efficiencies the hospital came into its own as the epitome of rational modernist space. But, over the course of its evolution, the modern hospital as well, as an incubator for super-bugs, as an engine for projects of renewal, and as a site for the cultural transformation of the meaning of birth, death, and health itself.

Course not offered every year
Also Offered As: HSOC 442
Activity: Seminar
1 Course Unit

STSC 443 Science and the Senses: Visual Culture, Material Objects
Using various types of readings, podcasts, and visits to area museums and centers of research, this course examines the relationships between seeing, sensing, and knowing in science. What roles do the senses and the material objects they observe play in production of science, and how has that changed historically? Are the senses reliable and standardizable, and if so, how can we talk about them with a common vocabulary? Are some more important than others? We will begin to answer these questions historically, following the role of the senses in science from the early modern period up to the present. We will look at ways in which vision was constructed as the primary sense during the Enlightenment and at ways in which it was made objective and instrumentalized in the modern period. We will also look at objects themselves. How do museum displays, illustrations, jarred specimens, photographs, and movies make and convey knowledge?
Taught by: Berkowitz
Course not offered every year
Activity: Seminar
1 Course Unit
STSC 461 The Child in the City
This course examines the problem of the child in urban space in 19th and 20th century European and American discourses. This course does not propose to recover the subjective experience of the child but, rather, views the child as an object around which numerous adult anxieties connected to industrialization, urbanization, and modernity itself cohered. Discourses on public health, environmental pollution, sexuality, criminality, and racial degeneration all focused their attention, anxieties, and energies on how to deal with the unique vulnerability of the child in modern urban space. This interdisciplinary course focuses specifically on atmospheres, environments, and architectures in urban settings as diverse as Chicago, New York, Paris, and London. We will examine how the built environment was envisioned as part of a set of critical technologies for resolving the threat that urban space posed to the child. We will explore objects and envir as diverse as tenement babycages, wartime floating hospitals, open-air schools, adventu playgrounds in post-WWII London, car-less communities in Radburn, NJ, and American child books about urban blight and renewal.
Taught by: Greene, G
Also Offered As: HSOC 461

1 Course Unit

STSC 462 Technological & Business Innovation: Historical Perspectives
This course will explore the relationship between technological innovation and business history. By looking at a series of case studies of technologically driven firms – both U.S and international – we will develop a more sophisticated and historically informed model of the relationship between technological, economic, legal and political developments in the late 19th and 20th centuries.
Course not offered every year
Activity: Seminar
1 Course Unit

STSC 471 Guns and Health
The purpose of this course is for students to gain an understanding of the role of guns in health, and population and prevention approaches to violence. The course will include a focus on policies and regulations related to firearms, the primary mechanism by which violence-related fatalities occur in the U.S. We will address the life span of a gun, from design and manufacture through to use. In addition, we will address key aspects of the social context in which firearms exist and within which firearm policy is made.
Taught by: Sorenson
Course usually offered in fall term
Also Offered As: HSOC 471
Activity: Seminar
1 Course Unit

STSC 482 Invisible Labor in the Human Sciences
This course looks at those disciplines that take people as their subjects of research—including biology and biomedicine as well as anthropology, linguistics, and sociology—to explore the contributions of a wide range of research participants. We will focus on the sciences of human behavior, information, and medicine to analyze the labor of behind-the-scenes actors including tissue donors, survey respondents, student subjects, patients, translators, activists, ethics review boards, data curators, and archivists. Our job will be to analyze the experiences of these technoscientific laborers with a view to systems of knowledge and power in the production and maintenance of Knowledge about humans and their bodies.

SLAV 500 History of Literary Theory
Over the last three decades, the fields of literary and cultural studies have been reconfigured by a variety of theoretical and methodological developments. Bracing and often confrontational dialogues between theoretical and political positions as varied as Deconstruction, New Historicism, Cultural Materialism, Feminism, Queer Theory, Minority Discourse Theory, Colonial and Post-colonial Studies and Cultural Studies have, in particular, altered disciplinary agendas and intellectual priorities for students embarking on the /professional/ study of literature. In this course, we will study key texts, statements and debates that define these issues, and will work towards a broad knowledge of the complex rewriting of the project of literary studies in process today. The reading list will keep in mind the Examination List in Comparative Literature we will not work towards complete coverage but will ask how crucial contemporary theorists engage with the longer history and institutional practices of literary criticism. There will be no examinations. Students will make one class presentation, which will then be reworked into a paper (1200-1500 words) to be submitted one week after the presentation. A second paper will be an annotated bibliography on a theoretical issue or issues that a student wishes to explore further. The bibliography will be developed in consultation with the instructor; it will typically include three or four books and six to eight articles or their equivalent. The annotated bibliography will be prefaced by a five or six page introduction; the whole will add up to between 5000 and 6000 words of prose. Students will prepare position notes each week, which will either be posted on a weblog or circulated in class.

SLAV 501 Elementary Polish I
This course is for students who want to acquire the linguistic skills necessary for communication in everyday situations that would constitute a solid base for further study of the Polish language. In addition students will become acquainted with various aspects of Polish culture (including Polish films), history and contemporary affairs. Students will learn through classroom exercises based on a modern textbook, completion of individual and group assignments and work with various audio and video materials. The textbook Hurra - Po Polsku 1 is written in the spirit of the communicative approach, which makes it possible to communicate from the very beginning of the learning process. The special attention, however, will be paid on systematic development of all language skills: listening, reading, speaking and writing.
For BA Students: Language Course
Taught by: Dziedzic
Two terms. student may enter either term.
Prerequisites: No prerequisite.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 502 Elementary Polish II
This course is a continuation of the SLAV501 680. This is for students who want to acquire the linguistic skills necessary for communication in everyday situations that would constitute a solid base for further study of the Polish language. In addition students will become acquainted with various aspects of Polish culture (including Polish films), history and contemporary affairs. Students will learn through classroom exercises based on a modern textbook, completion of individual and group assignments and work with various audio and video materials. The textbook Hurra - Po Polsku 1 is written in the spirit of the communicative approach, which makes it possible to communicate from the very beginning of the learning process. The special attention, however, will be paid on systematic development of all language skills: listening, reading, speaking and writing.
For BA Students: Language Course
Taught by: Dziedzic
Two terms. student may enter either term.
Prerequisites: SLAV 501 or Instructor's permission.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 503 Intermediate Polish I
This is a first-semester intermediate-level language course that emphasizes the development of the four basic skills (reading, writing, listening, and speaking) within a culturally based context. Class time will focus on communicative activities that combine grammatical concepts, relevant vocabulary, and cultural themes. Students will learn through classroom exercises based on a modern textbook: Hurra Po Polsku 2, completion of individual and group assignments and work with various audio and video materials. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the Polish cases; the aspect of the verbs, the development of writing skills.
For BA Students: Language Course
Taught by: Wolski-Moskoff
Two terms. student may enter either term.
Prerequisites: SLAV 502 or placement exam.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.
SLAV 504 Intermediate Polish II
This course is a continuation of the SLAV503 680. This is a second-semester intermediate-level language course that emphasizes the development of the four basic skills (reading, writing, listening, and speaking) within a culturally based context. Class time will focus on communicative activities that combine grammatical concepts, relevant vocabulary, and cultural themes. Students will learn through classroom exercises based on a modern textbook: Hurra Po Polsku 2, completion of individual and group assignments and work with various audio and video materials. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the Polish cases, the aspect of the verbs, the development of writing skills.
For BA Students: Last Language Course
Taught by: Wolski-Moskoff
Two terms, student may enter either term.
Prerequisite: SLAV 503 or placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 505 Polish for heritage speakers I.
The course is addressed to students who have spoken Polish at home and seek to achieve proficiency in the language. The main goal of this course is to provide instruction directed at students continued development of existing competencies in the Polish language. Students will acquire skills that range from learning grammar and spelling, and developing vocabulary, to interpretation and analysis of different literary genres. Students will explore a broad variety of cultural themes. Topics will include: Polish literature - classic and modern, social life, contemporary affairs and films. Upon completion of the Polish for Heritage Speakers course, students are expected to confidently understand, read, write and speak Polish with an increased vocabulary and a better command of Polish grammar. They will increase their reading skills through interpretation and analysis of different Polish literary genres. Students will be able to organize their thoughts and write in a coherent manner. They will increase their writing skills by writing personal essays, compositions and others. Students will further their knowledge of the Polish language and will engage in class discussion on various topics. Students will gain a better understanding of the Polish culture.
For BA Students: Language Course
Taught by: Dziedzic
Course not offered every year
Prerequisite: Instructor permission required
Activity: Lecture
1 Course Unit
Notes: STUDENTS WHO COMPLETE TWO SEMESTERS OF THIS COURSE SATIFY THE PENN LANGUAGE REQUIREMENT. Polish is used exclusively in the classroom.

SLAV 506 Polish for Heritage Speakers II
Continuation of SLAV505
For BA Students: Last Language Course
Taught by: Dziedzic
Course not offered every year
Prerequisites: SLAV505 or placement test.
Activity: Lecture
1 Course Unit

SLAV 530 Elementary Czech I
An introduction to the fundamentals of the Czech language, acquisition of conversational, reading and writing skills.
For BA Students: Language Course
Two terms, student may enter either term.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center.

SLAV 575 Slavic Literary Theory in Western Context
This course will compare selected theoretical concepts advanced by Russian Formalists, Prague Structuralists, and the Bakhtin group (e.g., defamiliarization, aesthetic sign, dialogue) with similar or analogous notions drawn from Western intellectual tradition.
Taught by: Steiner
Also Offered As: COML 579
Activity: Seminar
1 Course Unit

SLAV 590 Elementary Ukrainian I
An introduction to the fundamentals of the Ukrainian language, acquisition of conversational, reading and writing skills. This course is designed for students who have no or little background in studying Ukrainian. Students will be able to develop the base for the further study of the Ukrainian language. This course provides a comprehensive introduction to modern Ukrainian language and culture for those who would like to speak Ukrainian or use the language for reading and research. The course stresses all four major communicative skills (speaking, listening comprehension, reading, writing).
For BA Students: Language Course
Taught by: Rudnytzyk
Two terms, student may enter either term.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

SLAV 591 Elementary Ukrainian II
Continuation of SLAV 590. During the second semester, the students will be mostly focused on the Ukrainian nouns and the cases, students will learn and practice each case in the context of the real-life situations. In addition, students will become acquainted with various aspects of Ukrainian culture and traditions with the special focus on the festive customs (i.e. Christmas and Easter culture in Ukraine). The course stresses all four major communicative skills (speaking, listening comprehension, reading, writing) and is a solid foundation for learning Ukrainian in future.
For BA Students: Language Course
Taught by: Rudnytzyk
Two terms, student may enter either term.
Prerequisite: SLAV 590 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center
SLAV 592 Intermediate Ukrainian I
This is a first-semester intermediate-level Ukrainian language course which is designed to make students practice reading, speaking and writing in Ukrainian. Current issues of Ukrainian newspapers, especially the weekly, will serve as the basic source for the study of the contemporary Ukrainian idiom. Reading, translation and discussion of featured articles on such topics as business, education, politics, science, sports et al. including advertising and horoscope style and terminology will not only be used to hone the language skills and build up vocabulary but also to acquaint the student with the latest linguistic developments in Ukraine, such as the loan-words and loan-translations, abbreviations and acronyms, ancient folk proverbs and sayings as well as contemporary technical terms.
For BA Students: Language Course
Taught by: Rudnytsky
Two terms. student may enter either term.
Prerequisites: SLAV 591 or placement test.
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

SLAV 593 Intermediate Ukrainian II
This second-semester intermediate-level Ukrainian language is the continuation of the SLAV 592. Students will be able to practice reading, listening, writing and speaking Ukrainian more in the context of Ukrainian history politics, and culture. Students will be provided with the newspapers in Ukrainian and other authentic materials that will be the basis of both the classroom discussions and homework.
For BA Students: Last Language Course
Taught by: Rudnytsky
Two terms. student may enter either term.
Prerequisite: SLAV 592 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

SLAV 594 Advanced Ukrainian I
This advanced Ukrainian course is addressed to the students who have taken SLAV592 and SLAV593 or can already speak and read Ukrainian. The course emphasizes on the advanced vocabulary building, conversation and reading skills. It also includes the advanced grammar review with the use of Ukrainian grammar terms. Students will learn more about Ukrainian literature, history, and modern life through the authentic materials, poems and parts literature extracts.
For BA Students: Advanced Language Course
Taught by: Rudnytsky
Two terms. student may enter either term.
Prerequisite: SLAV 593 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

SLAV 595 Advanced Ukrainian II
Continuation of SLAV 594. The course focuses on all the language skills (reading, writing, speaking, listening) on the level with the use of the authentic materials mostly from Ukrainian literature and newspapers. Students will work on reading one of the modern Ukrainian plays to be able to perform it at the end of the course. This course is a good foundation for doing the research in Ukrainian or working or studying in Ukraine.
For BA Students: Advanced Language Course
Taught by: Rudnytsky
Two terms. student may enter either term.
Prerequisite: SLAV 594 or Placement
Activity: Lecture
1 Course Unit
Notes: Offered through the Penn Language Center

SLAV 599 Inter Serbo-Croatian II
Activity: Independent Study
1 Course Unit

SLAV 619 East & West in Medieval Europe: Bohemia as Center in the Age of the Luxemburgs
The seminar will examine a range of topics in Medieval Studies viewing European medieval civilization as encompassing the whole ("global") geographic and cultural space of Europe and ignoring reference to contemporary socio-political division of Europe into "Western" and "Eastern." As a case study, the course focuses on the 14th-century Holy Roman Empire from Henry VII to the Emperor Sigismund, and particularly on the reign of Charles IV, in a context in which Prague becomes the imperial capital and Bohemia a center of Europe. A detailed examination of this monarch's vision of a "Global Europe" will allow us to explore a network of connections, a network that stretches from Prague to the farthestmost western, eastern and southern corners of the European continent. We will examine correspondences and differences between various linguistic, textual, political, and religious communities, while attempting to show how Latin and Slavic European cultures were interwoven. Some of the titles from the reading list are Charles IV's The Life of St. Wenceslas and Autobiography, The Golden Bull, Dante's Letters & Monarchia, Machaut's Judgement of the King of Bohemia, Petrarch's Epistolae & Poems, Froissart's Prison of Love, Johannes von Tep's The Plowman of Bohemia, The Life of St. Constantine the Philosopher, fragments from Czech, French, Italian, Polish, Hungarian and Rus medieval chronicles, etc. All reading will be done in English, with original language versions always available.
Taught by: Brownlee and Verkholtants'ev
Also Offered As: COML 619
Activity: Seminar
1 Course Unit

SLAV 653 Topics in Russian and Soviet Cultural History
Course is topical. Please see department for most recent description.
Course not offered every year
Also Offered As: COML 653, ENGL 591, HIST 620
Activity: Seminar
1 Course Unit
Social Work (SWRK)

SWRK 593 Design Thinking for Social Impact
Thinking like a designer can transform the way people and organizations develop products, services, processes, and strategy. This approach, called design thinking, brings together what is desirable from a human point of view with what is technologically feasible and economically viable. It also allows people who aren’t trained as designers to use creative tools to address a vast range of challenges. Design thinking is a deeply human process that taps into abilities we all have but get overlooked by more conventional problem-solving practices. It relies on our ability to be intuitive, to recognize patterns, to construct ideas that are emotionally meaningful as well as functional, and to express ourselves through means beyond words or symbols.
Course usually offered summer term only
Also Offered As: NPLD 593
Activity: Lecture
1 Course Unit

SWRK 595 Effective Communication and Storytelling
Great leaders are storytellers. They are able to engage and entertain their communities, and tell a compelling narrative about how the world works. They use language powerfully and communicate in ways that uplift and inspire others. In this class, we will explore the power of telling great stories, and learn how to do it most effectively when promoting your campaigns to make the world a better place. We will also look at the skills of framing language in ways that will win over an audience. Finally, we will look at other key skills of effective communication, including the best strategies for persuasion, negotiation, and conflict resolution.
Course usually offered summer term only
Also Offered As: NPLD 595
Activity: Lecture
1 Course Unit

SWRK 596 Design and Incorporation of High Impact Nonprofits
Design and Incorporation of High Impact Not-For-Profits is designed for those who have a practitioner’s interest in the design, governance, leadership, and management of high impact not-for-profit organizations. This course is taught through learning best practice theory, applying this theory to a simulation experience, and providing students the opportunity to apply their new knowledge and experience in an interview with a current not-for-profit leader. Students, through the combination of theory and practice, are provided with the essential competencies and tools to design and incorporate a not-for-profit, conduct in-depth analysis of a not-for-profit’s effectiveness including, but not limited to, governance, leadership, social impact, financial sustainability, and systems and policy influence. Through the mock simulation process of designing, incorporating, and governing, students will leave with a “best practice” for not-for-profit manual that includes articles of incorporation, bylaws, governance deliverables, strategic business plan, organizational scorecard, 3-5 year budget, development plan and public policy strategy.
Also Offered As: NPLD 596
Activity: Lecture
1 Course Unit

SWRK 601 History and Philosophy of Social Work and Social Welfare
This course traces the development of social welfare policy in the United States and its relationship to social work. It analyzes the values and assumptions that form the foundation of existing welfare programs and institutions and explores the social, economic, political and cultural contexts in which they have developed. The course examines the development of cash assistance and social services programs in light of the enduring legacy of poverty, racism, and sexism. The view of "outsiders" in U.S. society - low-income persons, people of color, gays and lesbians - allows us to gain perspective on the source of conflict and consensus in American history, which augments material about institutional racism learned in SWRK 603 and content about behavioral responses learned in SWRK 602. The course traces, as well, the roles that social workers have played in the formulation and implementation of social welfare policy and links these historical examples to contemporary policy practice.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 602 Human Behavior in the Social Environment
This course introduces the student to the individual and family components of social interaction in a variety of different milieu. Theories of self and personality are studied, along with theories related to traditional and non-traditional family styles, different social and ethnic groups, and of assimilation and acculturation. Emphasis is given to the impact of different cultures and traditions on individual functioning. Additional attention is given to selected social characteristics of the larger society, such as factors of socio-economic class which influence individual and family behavior and functioning.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 603 American Racism and Social Work Practice
This course explores racism in America as an historical and contemporary phenomenon. It emphasizes the development of evidence-based knowledge about institutional systems of racism, analytical skill in understanding the complexity of institutional racism and other forms of oppression more broadly defined, self-awareness, and the implications of racism for social work services and practices.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.
SWRK 604 Foundations of Social Work Practice I
This is a first of a four-course sequence designed to help students develop a professional stance and evidence-based framework for social work services to individuals, groups, families, and communities. It integrates the student's theoretical learning with the experience in the field placement agency. The student is introduced to a holistic process-oriented approach to social work practice and to methods for implementation. The course emphasizes the social context for practice with special attention to agency purpose, functions and structure; the client system and its perceptions of need; goals and resources and the social worker as a facilitator of change.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 614 Foundations of Social Work Practice II
This is the second in a four-course sequence and continues to examine varied practice frameworks and methods for service delivery in working with individuals, groups, families and communities. It emphasizes the eradication of institutional racism and other forms of oppression along with the integration of a culturally-sensitive approach to social work practice. Attention is given to understanding client problems in the context of different social work practice approaches and service requirements and to increased use of professional values to guide and inform practice.
Course usually offered in spring term
Prerequisite: SWRK 604
Activity: Lecture
1 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 615 Introduction to Social Work Research
This course presents the broad range of research tools that social workers can use to improve the effectiveness and efficiency of their practice. The course emphasizes the process of theory development, conceptualization, and hypothesis formulation across a broad spectrum of social work practice situations. The course includes methodological considerations relating to concept operationalization; research design (empirical, survey, and field), sampling instrumentation, methods of data collection and analysis, and report preparation and dissemination. The course also emphasizes how social work research can help professionals better understand and more effectively impact problems of racism and sexism in contemporary American society.
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 620 Integrative Seminar
All Advanced Standing students are required to take this non-credit Integrative Seminar in the summer upon beginning the program. The seminar meets weekly during the second summer session and supports students as they begin their field placement. In order to enroll in the fall, students must achieve satisfactory performance in the Integrative Practice Seminar and summer field placement.
Course usually offered summer term only
Prerequisite: Advanced Standing MSW students only
Activity: Seminar
0 Course Units

SWRK 701 Health and Mental Health Policy
This course provides an overview of the historical, social and economic dimensions of the health care delivery system: how health policies are developed and implemented, and how such policies influence social work practice, program planning, and research. Key health policy issues such as financing, cost, access, and the allocation of resources are explored in the context of health reform proposals. Students investigate how health policy affects specific population groups such as women and children, persons with chronic mental illnesses, persons with AIDS, older adults, and minorities.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: MSW Policy Option

SWRK 702 Social Work Practice in Health Care
This course focuses on key issues in social work practice in health care settings. Social aspects of health and illness, including cultural variations, health beliefs and behavior, and the impact of illness on the patient and the family, are examined and their relevance for practice is discussed. Appropriate theoretical models for practice are identified and applied to practice in the areas of prevention, primary care, chronic and long-term care. New roles for social work in varied health delivery systems and inter-professional collaboration are explored.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 703 Impacting Government: Policy Analysis & Coalition Building
This course focuses on developing a theoretical foundation for actionable skills in policy analysis and coalition building across a wide-range of constituencies. The material begins with a structured focus on the ideological underpinnings of social welfare in the United States and the ways in which these perspectives shape our conceptions of equity, equality, and allocation of resources along the lines of race, class, gender, immigration status, and other identities. We will then utilize this basis for developing analysis frameworks, policy briefs, and media messaging that students will utilize when working with legislative bodies to advocate for and with the populations they serve. Distinct emphasis is placed on becoming conversant across differential systems, ideas, values, and assumptions while remaining grounded in relevant research and empirical approaches.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective
SWRK 704 Advanced Clinical Social Work Practice I
Clinical Social Work Practice I and Field Practice builds on the generalist model of practice established in the foundation social work practice courses. The course work and assignments are closely linked to the students' learning objectives and experiences in the field. This course has students critically examine and deepen their understanding of advanced theoretical frameworks and specific skills to be applied in clinical practice with children, adolescents, adults, and families. Students begin with classic and modern formulations of psychodynamic work and use this as a foundation for understanding theoretically and empirically drive models of family intervention. In addition, use of self and social work values and ethics and working with diverse clients are addressed at an advanced level.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Required for Clinical Practice Concentration; This course may schedule sequence-wide lectures for all sections at various points in the semester, and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 706 Policies for Children and Their Families
This course examines policies for children and their families with a specific focus on child welfare policy. The course examines the interrelationship between: the knowledge base on child abuse and neglect; evaluations of interventions; programs and policies designed to protect maltreated children; and child welfare policy at the state and national level. The course also examines federal and state laws that govern the funding and operation of child welfare systems; the history of child welfare policies; the operation of child welfare systems; and the legal, political, and social forces that influence the structure and function of child welfare systems in the United States.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Policy Option

SWRK 708 Advanced Macro Social Work Practice I
Advanced Macro Social Work Practice I and Field builds on the foundation social work practice courses and focuses on three areas: (1) context of macro practice; (2) organizational structure with a focus on nonprofits; and (3) program design and development. The course begins with providing theoretical frameworks for macro practice and then moves to focus on delivery of services at the community level. Knowledge and skill development focuses primarily on social work practice within communities and organizations. Students learn how to organize and build relationships with communities and develop, plan, manage, fund and assess/evaluate community-based programs. Specific skill development includes learning how to research, develop, write, and pitch a grant proposal. Course content is integrated with fieldwork and is specific to the service needs of the populations with whom students are working in their field agencies.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Required for Macro Practice Concentration; This course may schedule sequence-wide lectures for all sections at various points in the semester and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 710 Supervision Seminar
Students in the Employed Practitioners Program are required to take this non-credit seminar in the fall and spring terms of their second year of study. The class meets every other week. In a limited number of cases, advanced-year students may be placed in agencies where there is no available MSW field instructor. In such instances, the student is required to attend the Clinical or Macro Supervision Seminar (depending on their concentration), which meets every other week during the academic year. Students who are required to participate in the clinical or macro supervision seminars will be given 1.5 hours of compensatory time off from their field placement every other week.
Activity: Seminar
0 Course Units
Notes: Non-credit course required for students in the Employed Practitioners Program OR Non-credit course required for students without an MSW supervisor at their field placement

SWRK 711 Contemporary Social Policy
This course introduces students to the analysis of contemporary social policy analysis. Several social welfare policy areas, including social inequality, poverty, health care, and housing are examined. Each topic area is also used to illustrate a component of the policy analysis process, including the analysis of ideologies and values as they shape policy formulation, the process by which legislation is proposed and enacted, the roles of advocacy and lobbying organizations, and the challenges of policy implementation and evaluation.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Policy Option

SWRK 712 City Limits: The Impact of Urban Policy
This course assesses the changing role of public policy in American cities. In the past, government often believed that it could direct urban development. New realities - the rise of an informal labor market, global capital and labor flows, the flight of businesses and the middle class to the suburbs - have demonstrated that government must see itself as one - but only one - ‘player’ in a more complex, transactional process of policy making that crosses political boundaries and involves business, organized interest groups, and citizens. This seminar uses a case-study method to study how public policy can make a difference in the revitalization of distressed American cities. The seminar is designed for advanced undergraduates and graduate students. Seminar readings and projects will be organized around three themes: 1) history and vision, 2) data and analysis, and 3) policy and implementation. Students will be divided into project teams assigned to work on current development issues that will be reviewed by both public and private-sector experts. Extensive use will be made of real estate, economic development, and social indicator data to understand the complex forces at work in both large and small cities. Students will learn to access, analyze, and map information; frame and interpret these data within a regional perspective; and to construct profiles of cities and neighborhoods. Students will study recent urban redevelopment initiatives in the Philadelphia region, including Philadelphia's Neighborhood Transformation Initiative and New Jersey’s Camden Revitalization plans.
Course usually offered in spring term
Also Offered As: URBS 454
Prerequisites: Students must have taken an introduction to research methods.
Activity: Seminar
1 Course Unit
SWRK 713 Understanding Social Change: Issues of Race and Gender
This course builds upon the foundation of historical, psychological, sociological, economic, political, and personal knowledge about institutionalized forms of racism and discrimination developed in SWRK 603, American Racism and Social Work Practice. The course uses understanding elements of oppression to critically examine strategies for addressing racism and sexism in organizations and communities through systematic assessment and intervention for social change. The course examines change at three levels: organizations, communities, and social movements.
Course usually offered in spring term
Prerequisite: SWRK 603
Activity: Lecture
1 Course Unit

Notes: This course may schedule sequence-wide lectures for all sections at various points in the semester and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 714 Advanced Clinical Social Work Practice II
The focus of learning in this semester is theories and skills related to clinical practice with individuals and groups, differential intervention, and the broadening of the professional role and repertoire. The course content and assignments are closely linked with the students' learning objectives and experiences in the field. Students extend and refine their practice knowledge and skills and learn to intervene with cognitive, behavioral, and narrative modalities. This semester focuses also on work with complex trauma across systems and populations. Students consolidate their identification as professionals and learn to constructively use the environment to effect systems changes.
Course usually offered in spring term
Prerequisite: SWRK 704
Activity: Lecture
1 Course Unit

Notes: Required for Clinical Practice Concentration; This course may schedule sequence-wide lectures for all sections at various points in the semester and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 716 Comprehensive School Reform: From 'No Child Left Behind' through 'Race to the Top' to 'Every Student Succeeds Act'
This course examines how K-12 education policy is designed and implemented in the United States. It uses a systems analysis as the framework for looking at what makes what kinds of demands on the education policy system, how these demands are placed on the policy agenda, the decision-making process, and resulting education policies and policy outcomes. The course pays particular attention to the roles of federal, state and local governments in education policy, and the impact of our intergovernmental system on the design and implementation of policy. Students will also examine major education policies and debate key education policy issues that arise at each level of government.
Also Offered As: EDUC 712
Activity: Seminar
1 Course Unit

SWRK 717 Art and Social Work: Art and the Ecology of Justice
How can the arts help us build a more just society? How can the arts transform social structures and systems? Public health crises involving clean water (Flint), police violence (Baltimore), and a lack of economic and educational opportunity following reentry (Philadelphia) make legible the need for a new visual language that critiques these conditions and challenges entrenched structural inequalities. We will engage the work of creative practitioners who are mapping new relationships between art and social justice and directly impacting individual and communal well-being. In so doing, the course seeks to challenge traditional constructions of public health, which often isolate individual histories from their social life and their relation to families, communities, and geographies. Readings will build upon disciplinary perspectives in the arts, humanities, and social policy. Requirements include weekly readings, class participation, and a collaborative final project. The course will meet in the Health Ecologies Lab at Slaughter Foundation, an arts organization on campus.
Course not offered every year
Also Offered As: FNAR 316, FNAR 616
Activity: Seminar
1 Course Unit

SWRK 718 Advanced Macro Social Work Practice II
Advanced Macro Social Work Practice II and Field helps students broaden and deepen the specific knowledge and skills required to become an effective and creative social work practitioner. The course focuses on five areas of macro practice: (1) community assessment and practice; (2) policy advocacy; (3) fiscal management and fundraising; (4) global human rights; and (5) emerging areas of macro practice. Students learn how to conduct a community practice analysis, engage in policy advocacy, develop an idea for a social enterprise, write an agency fundraising plan, and conduct an agency fiscal evaluation. Students learn to utilize administrative skills to promote social change within a variety of systems that influence the lives of client populations. Course content is integrated with fieldwork and is specific to the service needs of the populations with whom students are working in their field agencies.
Course usually offered in spring term
Prerequisite: SWRK 708
Activity: Lecture
1 Course Unit

Notes: Required for Macro Practice Concentration; This course may schedule sequence-wide lectures for all sections at various points in the semester and attendance is mandatory for all registered students. Joint lectures are scheduled on Mondays between 6:30-8:30PM; students should not register for other courses on Monday nights that would conflict with this time slot.

SWRK 721 Social Work Healthcare Proseminar
Activity: Seminar
0 Course Units

Notes: non-credit seminar for SWIHCS students only
SWRK 722 Practice with Children and Adolescents
This course provides a foundation for social work practice with children and adolescents. Beginning with an overview of normative child and adolescent development and psychosocial developmental theory, the course covers various methods for helping at-risk children and adolescents and their families. Emphasizing the complex interplay between children and adolescents and their social environments, consideration will be given to biological, temperamental, and developmental status; the familial/cultural context; the school context; and other aspects of the physical and social environment. Particular attention is paid to working with socially, emotionally, financially, and physically challenged and deprived children and adolescents and their families.
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; Option for Home and School Visitor (HSV) specialization

SWRK 724 Developmental Disabilities
This course enhances the students' ability to practice social work with and on behalf of people with developmental disabilities and their families. The course provides a base of knowledge about developmental disabilities and differences, their causes and characteristics. Students learn how disabilities and learning differences impact personal, familial, educational, social, and economic dimensions for the individual, family, and society, with attention to the person's special life cycle needs and characteristics. The course also emphasizes legislative, programmatic, political, economic, and theoretical formulations fundamental to service delivery.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; required for students in the HSV program

SWRK 726 Brief Treatment and Crisis Intervention
This course focuses on theory and practice of planned brief treatment in social work practice, primarily with individuals but with attention to couples, families and other groupings. The course covers the history of and different approaches to brief treatment. Topics include treatment issues such as criteria for selection of clients, understanding the importance of time in the treatment relationship, the use of history, the importance of focusing, the process of termination and other issues related to brief interventions. Particular attention will be paid to the use of brief treatment approaches in crisis situations. The course presents various methods of assessing an individual's crisis and of helping clients mobilize their strengths to utilize customary methods of coping and learn newer ways of coping.
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 727 Practice with Families
This course provides students with assessment and intervention skills for social work practice with varied family/partner configurations. The course begins with a grounding in family systems theory and proceeds to explore patterns of interaction in terms of the wide range of problems that families and partners bring to social agencies. Emphasis is given to exploring ways of supporting change in interaction patterns. Readings are augmented by videotapes of family sessions and simulations of clinical situations from students' field practice.
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 729 Social Statistics
This course provides students with a broad range of statistical methods and applications. It introduces social work students to the use of quantitative data for planning and evaluating social programs and social policy. Course topics include conceptualization and measurement of variables and basic techniques and concepts for exploring and categorizing data, for generalizing research findings and testing hypotheses, and for statistical data processing. Students will gain experience in using a Windows-based statistical software package on personal computers. Emphasis is placed on the practical application of data to address social policy and social work practice issues. Students have the opportunity to critique the application of data analysis and presentation in technical reports and professional journals.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Research Option

SWRK 730 Community Mapping
Geographic space is important to family and community well-being, as we know. Community Mapping introduces students to geographic information systems (GIS), computer software for making maps and analyzing spatial data. Students will learn how maps have been used in social welfare history as well as how GIS can be used for needs assessments, asset mapping, program evaluation, and program planning. The course builds on research skills developed in SWRK 615. For the final project, students have an opportunity to apply their GIS skills to creating maps related to their field placement. The use of such maps may lead to both program and policy change in neighborhoods and communities.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective
SWRK 731 Clinical and Macro Child Welfare Practice
Students enrolled in this course will learn about the various contexts in which child welfare practice and policy services take place and the skills and modalities that are used with children, youth, and families who are the focus of child welfare intervention. Students learn about the social conditions and unmet needs that have typically precipitated child welfare policy and ideological debates informing child welfare policy. How to structure organizations and implement planning in support of strengthening front-line practice is also addressed. Taking stock of these policies and organizational factors, students gain a firm understanding of how they influence, shape, and govern direct clinical practice in child protection and casework. Particular attention will be devoted to developing students’ practice skills in safety assessment and safety planning, risk assessment, and permanency planning. Implementation of evidence-based, trauma-informed interventions to promote positive developmental outcomes among the racially/ethnically diverse pool of children and adolescents placed in out-of-home care will also be a focus of attention. Other topics include separation, loss, and identity development; disproportionality and disparity; and self-care in child welfare practice. In the spirit of bridging connections between macro and clinical practice, course content will delve into how direct casework services influence dependency actions in the juvenile courts. How these direct practices or interventions influence case outcomes as reported by a number of federal data reporting systems will also be discussed. A social justice framework will be applied to understand how child welfare policies and organizational services sustain child and family inequalities, especially for historically oppressed and marginalized populations who are disproportionally represented in the child welfare system.
Course usually offered in fall term
Activity: Seminar
1 Course Unit
Notes: Clinical and Macro Practice Elective

SWRK 732 Integrative Seminar in Child Welfare
This capstone course in the Child Well-Being and Child Welfare specialization will integrate direct/micro and macro levels of practice; research in child welfare and related fields, as the research relates to all levels of practice; the relationship of child maltreatment and other social problems; and perspectives from several disciplines, specifically social work, other mental health professions, law, and medicine, as these disciplines address problems of child maltreatment and child welfare. The seminar will highlight issues of social justice, disproportionality - particularly the over-representation of children and families of color in the child welfare system, and disadvantaged populations, including children in general and poor children in particular. Faculty from other disciplines will be features as guest speakers throughout the course.
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: Clinical and Macro Practice Elective

SWRK 736 Building Community Capacity
This course provides an introduction to community organization and community capacity building. The course encompasses strategies, models, and techniques for the creation of organizations, the formation of federations of existing organizations; and coalition building, all designed to address problems requiring institutional or policy changes or reallocation of resources to shift power and responsibility to those most negatively affected by current socio-economic and cultural arrangements. The course emphasizes development of strategies and techniques to organize low-income minority residents of urban neighborhoods, and to organize disenfranchised groups across geographic boundaries as the first required steps in an empowerment process.
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective

SWRK 737 Bioethics in Social Work in Diverse Healthcare Settings
As medical technology develops and evolves, ethical dilemmas are occurring more frequently in many diverse healthcare settings. Social workers play an integral and unique role in bioethics: primarily as patient advocates but also as guardians of autonomy and dignity. This can come into direct conflict with decisions patients, families, and healthcare teams are asked to make on a daily basis in healthcare settings. This course will explore many of the major ethical challenges confronting medicine, social work, and biomedical sciences. We will examine legal, institutional and personal positions, beliefs, and values as we consider and debate opposing arguments. You will be challenged to think and write critically, utilizing philosophical, bioethical, and social work frameworks to structure your arguments and ethical decision making. This course will prepare students to actively participate in ethics committees, mediation, patient/family conferences with diverse populations and interdisciplinary collaborative discussions regarding ethical issues in medical settings.
Activity: Lecture
1 Course Unit

SWRK 738 Anxiety and Depression
Anxiety and depression are two of the most common mental disorders seen in social work clients, and frequently they occur concurrently. This course describes the medical and "physical" concomitants and psychosocial factors associated with both conditions and introduces diagnostic and assessment procedures and methods of intervention that social workers use in working with clients with these conditions. The course also considers how culture, social class, gender, and other social differences affect the expression of these disorders and their concomitant treatment.
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective
SWRK 739 Illness and Family Caregiving
This course focuses on social work practice in medicine and the relationships between physical health, social environments, and psychosocial functioning. Student learning will be grounded in the biopsychosocial-spiritual model, and will address a number of domains, including the impact of illness on families over the life course, the impact of a diagnosis on family functioning, medical decision making, coping, health beliefs and spirituality, culture and social class. Classroom content will include conceptualization of illness challenges from the presentation/prevention of symptoms to the end of life, in addition to writing case material, building self-awareness and identifying clinical interface issues, and the compilation of a “clinician’s toolbox” for direct practice on the front lines. Activities will include the unique opportunity to participate in hands-on, interdisciplinary training at the Simulation Center in the School of Nursing.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 740 Strategic Planning and Resource Development for Public and Nonprofit Organizations
Resilient organizations engage in a continuous process of self-review and refocusing. Referred to as "strategic planning," this process requires the active participation of a broad range of agency "stakeholders" who, in their work together, seek to realign the organization's goals, structures, and programs to make them more responsive to the changing needs of their service populations. Building on the content of foundation practice foundation courses, "Strategic Planning and Resource Development" has been designed to strengthen the the student's leadership capacity for engaging in strategic planning and resource development practice across a broad range of governmental (G0s) and civil society organizations (CSOs). The importance of organizational flexibility, innovation, and the creation of cooperative public-private partnerships is emphasized throughout the course.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective

SWRK 741 Gender & Social Policy
Gender and Social Policy develops an advanced understanding of social policies through a focus on social issues and conditions through the lens of gender, economic and critical theory. The specialized focus on gender and social policy provides students with the opportunity to develop more specialized knowledge about how market dynamics and government policies respond to the needs and risks faced by women. Specific emphasis is placed on utilizing theoretical frameworks to evaluate the intersection between social policy, history and social science in relationship to gender issues. Students are also expected to conduct a policy analysis that includes an evaluation of how current and former social movements surrounding gender issues shaped their policy of interest.
Taught by: Baker
Course usually offered in spring term
Also Offered As: MSSP 741
Activity: Lecture
1 Course Unit
Notes: Policy Option

SWRK 742 Practice with At-Risk Youth
The discourse on juvenile justice in the United States, once driven by themes of treatment and rehabilitation, has been dominated in recent years by vocabularies of punishment and incapacitation. The juvenile court, an enterprise founded by social reformers and the social work profession at the turn of the century to "save children," is now under severe political and legislative pressure to impose harsher penalties on younger and younger offenders who are increasingly portrayed as violent "super-predators," while its most vulnerable segments, children and youth, stand in greatest need of what a social service system can offer. Not surprisingly, those most likely to wind up under supervision are economically poor, under-educated, disproportionately of color and disproportionately at-risk to become victims of violent crimes. How does the profession situate itself in this discourse and what are individual social workers to do?
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Clinical and Macro Practice Elective; Option for Home and School Visitor Requirement

SWRK 743 Action Research
Action research is a form of social research that combines research with intervention. It is characterized by a collaborative relationship between the researcher and a client organization that is in an immediate problematic situation. The research process is directed toward addressing the problem situation and producing knowledge that contributes to the goals of social science. Action research is compatible with many of the values and principles of social work. This course also addresses issues of social work ethics and values encountered by the action researcher.
One-term course offered either term
Prerequisite: SWRK 615
Activity: Lecture
1 Course Unit
Notes: Research Option

SWRK 744 Direct Practice Research
This course provides graduate social work students with research knowledge and skills aimed at enhancing their direct practice with clients. The course examines methods of assessment, methods for choosing and evaluating techniques of intervention, methods for determining the effectiveness of practice and the use of research in social work decision-making. A successful outcome of the course will be that students perceive a more positive relationship between research and social work practice and possess a set of tools that they will be able to utilize in their future careers as social workers. The course starts from an assumption that students have some familiarity with research and are primarily engaged in direct practice with individuals, families or groups. Course usually offered in fall term
Prerequisites: SWRK 615, Introduction to Social Work Research
Activity: Online Course
1 Course Unit
Notes: Research Option; Course may be offered online or in classroom setting. Online section is designed for clinical direct practice students only and requires an orientation meeting.
SWRK 746 Political Social Work
This course focuses on the role of social workers and the social work profession in advocacy and the political arena. It examines the methods of advocacy (e.g., case, class, and legislative) and political action through which social workers can influence social policy development and community and institutional change. The course also analyzes selected strategies and tactics of change and seeks to develop alternative social work roles in the facilitation of purposive change efforts. Topics include individual and group advocacy, lobbying, public education and public relations, electoral politics, coalition building, and legal and ethical dilemmas in political action.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective

SWRK 748 Microfinance and Women's Empowerment in India
This course examines microfinance and its engagement with marginalized communities such as those in India. It is designed to provide students with an understanding of the phenomena of microfinance and its role in poverty alleviation. By studying the use of self-help groups with NGO facilitation, their impact on women's empowerment will be examined and understood through interaction with women engaged in microfinance activities.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Application required - www.sp2.upenn.edu/global/courses; Program Fee

SWRK 749 Civil Society Promoting Coexistence in Israel
This course offers a unique opportunity to experience the challenges and complexities of coexistence in Israel, the Holy Land for Christians, Jews and Muslims, a key point of interest and dispute for the international community, and the homeland shared and claimed by both Israelis and Palestinians. The course will focus on activities carried out by nonprofit organizations operating within the Israeli civil society, dealing with issues related to coexistence and to the protection and advancement of the civil and social rights of different populations, with special emphasis on the Arab-Palestinian population in Israel. These activities include educational and social services programs, community work and advocacy activities, aimed at creating dialogues and building coexistence among the different populations in the Israeli society and Palestine.
Course usually offered summer term only
Activity: Seminar
1 Course Unit
Notes: Application required - www.sp2.upenn.edu/global/courses; Program Fee

SWRK 755 International Social Work: Practicing in the Global South
This interdisciplinary course will introduce students to societal problems in the developing world, familiarize them with global professions in social work, education, public health, etc.; identify numerous strategies and skills social workers and other professionals have used to collaboratively build interventions within the human rights, social welfare, education, health care and sustainable community development arenas. The course will expose students to views of development as they relate to individual, interpersonal, family, community, societal and international change. Students will learn about the history of specific global problems, how cultures affect response, different social services delivery systems and initiatives aimed at resolution. Students will explore a specific development issue within a country and community.
Course usually offered in fall term
Activity: Lecture
1 Course Unit

SWRK 756 Human Sexuality
The aim of this course is to increase students' ability to deal more comfortably with the sexual aspect of human functioning. Readings, written assignments, and classroom presentations are directed to realizing the diversity, complexity, and range of human sexual expression. Current information about sexuality from the biological and physiological sciences is reviewed to increase comfort and skill in discussion and handling of sex-related behavior, personal and societal attitudes will be explored. A variety of sex-related social problems encountered by social workers in family, education, health, and criminal justice settings are discussed. Diagnostic interviewing and treatment methods are presented in role play, group exercises and case studies.
Course usually offered in spring term
Activity: Lecture
1 Course Unit

SWRK 757 Loss through the Life Cycle
This course considers loss as a central theme throughout the life cycle. Content focuses on the physical, psychosocial, spiritual, and cultural aspects of loss, dying and bereavement processes and the interaction among individuals, families and professionals. Students examine historical trends of family, community, and institutional support for the terminally ill and those experiencing traumatic loss and learn ways to advocate for a system of services that supports full decision-making on the part of the client. Course materials, journals, and special projects identify how self and other factors impact service delivery to individuals, families, and communities experiencing loss, including ethical considerations prompted by cost, technology, and end of life issues.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 759 Substance Use Interventions
This course addresses intervention approaches used in social work practice with individuals, families, and groups who misuse addictive substances themselves or are affected by another’s misuse. Students learn about addictive substances, models of intervention, how to engage and assess clients, and how to intervene and evaluate the effectiveness of their interventions. The course incorporates theory and research findings on various strategies of intervention.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; Attendance at first class required
SWRK 760 Mental Health Diagnostics
This course familiarizes students with mental health and mental disorders within the context of the life cycle, viewed from a biopsychosocial perspective. Prevalent categories of psychiatric disorders are considered with respect to their differentiating characteristics, explanatory theories, and relevance for social work practice, according to the DSM and other diagnostic tools. The course includes biological information and addresses the impact of race, ethnicity, social class, age, gender, and other sociocultural variables on diagnostic processes.
Course offered summer, fall and spring terms
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; Required for Clinical Practice Concentration

SWRK 763 Global Human Rights & US Immigration: Implications for Policy & Practice
This course will begin with the history of migration to the US, as well as legal definitions of newcomers, including obtaining documents for lawful permanent residence, refugee status, as well as grounds for exclusion and deportation, and paths to naturalized citizenship. We will then review how a framework of cultural competence, and a strength or asset-based approach can inform service to immigrant clients. The core portion of the course will then focus first on the intersection of immigrants and health, mental health, employment, crimes, public entitlements, and public education. The course will conclude with family issues relevant to immigrant families: women, children, lesbian and gay, and elderly immigrants. Public policy issues will be integrated throughout, and the course will end with specific suggestions on systems change at various levels. By the end of the course students should be able to identify strategies for individual clients advocacy (micro); agency and community strategies (mezzo), and government advocacy (macro) to empower immigrant clients to become full community participants.
Taught by: Chany-Muy
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Policy Option; Macro Practice Elective

SWRK 765 Supervision and Leadership in Human Service Organizations
This course builds on social work knowledge, values, and skills gained in foundation practice courses and links them to the roles and functions of social workers as supervisors and managers in human service organizations. Course focus is on providing students with an overview of basic supervisory and human resource development concepts so they may be better prepared as professional social workers to enter agencies and provide direct reports (supervisees) with meaningful and appropriate direction, support, and motivation.
Course not offered every year
Activity: Lecture
1 Course Unit
Notes: Clinical and Macro Practice Elective

SWRK 766 Organizational Politics and the Dynamics of Change
This is one of the courses referred to as "The Power Lab at Penn." This course explores how and when organizational change is possible. It is based on two bodies of thought: (1) the behavior of individuals within groups and the behavior of groups within organizations, and (2) the ways conflicts emerge and develop a "life of their own" within human systems. The dilemmas associated with both creating and changing human systems are investigated using a paradoxical lens, spotlighting counterintuitive ideas such as "to change, preserve the status quo," and "to grow, cutback." The effectiveness of the change strategies adopted by the "powerful," the powerless," and those caught "in the middle" is examined. This intensely experiential course is designed for those providing group and institutional leadership at any level of a human enterprise, managing work groups, chairing committees, serving on special task forces, conducting support groups facilitating groups in clinical settings, etc. Participants will focus on two topics: 1) An in-depth understanding of group dynamics while they are in action; 2) The organizational relationship between groups that are in a powerful position, groups locked in a powerless state and those caught in the middle between the powerful and the powerless. Course Structure: This course has six components: (1) A pre-course discerning process, which consists of a one evening plus one full day Primer workshop; (2) Module 1 which is focused on group dynamics; (3) reading an assigned book and writing a paper based on Module 1 experiences; (4) Module 2 which addresses power relationships among groups with differential resources; (5) reading two assigned books and writing a paper based on Module 2 experiences; and (6) a post-course debriefing. The Primer provides all potential participants with a common conceptual base for engaging in the essential learning and lays out the intellectual foundations of the course.
Course not offered every year
Prerequisites: Permit required; all potential participants are required to attend a Primer class which consists of one evening session AND an all day session. Permits are granted only after students have completed the primer classes.
Activity: Lecture
1 Course Unit
Notes: Students from all graduate programs at Penn are welcome to apply. Contact the NPLD program for more information.

SWRK 768 Social Policy Through Literature
Fiction provides a lens to look at social issues and social policy through the rich and understandable lives of human beings, their challenges, and their triumphs in the holistic context of their worlds. Through appreciation of the human condition as portrayed in literature, students learn to frame issues more precisely and present arguments in compelling and convincing ways, thus enhancing the capabilities of social workers, social policymakers, and other agents to influence policy change.
Course not offered every year
Activity: Lecture
1 Course Unit
SWRK 769 Aging: The Intersection of Policy and Practice
This course examines a variety of social welfare policies that affect the rights and interests of older adults. These include policies related to economic security, health, long term care, and civil rights. In addition, the course reviews the policy-making process with a discussion of the influence of legislative sanctions and case law in establishing aging policy in the U.S. The focus of the course is on critical analysis of the key assumptions driving policy and policy change, e.g. social responsibility vs. individual responsibility. Finally, the course includes a critical examination of the intersection between policy and practice, that is, the influence that policy has on the design of interventions and service delivery practices at the state and local level and the impact of changing policies on communities, providers, and older adults.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Macro Practice Elective; required for students in the PAC program

SWRK 772 Postcolonial Social Work Practice: International Social Welfare in India
In this course, students examine the global welfare system and its engagement with marginalized communities. This six-week course in Kolkata, India, centers around a sex workers' collaborative in Sonagachi, one of Asia's largest red light districts. Interviews with the collaborative's workers and study of their grassroots movement are combined with class discussions and research projects in which students engage with texts on HIV, sex work, feminist postcolonial theory and international social work.
Taught by: Ghose
Course usually offered summer term only
Activity: Lecture
1 Course Unit
Notes: Application Required; Program Fee

SWRK 773 Mental Health Challenges in Childhood and Adolescence
This course will be an opportunity for the student and the instructor to explore the concept "psychopathology" as it has been and is applied to childhood and adolescence. There are some psychopathological challenges that are unique to childhood and some which can manifest themselves throughout childhood into adolescence and adulthood. The social worker/practitioner will encounter a wide range of symptomatic presentations among his/her clients. At this time in the fields of clinical social work, psychology, psychiatry, and psychotherapy there are numerous frameworks available to the practitioner to aid in an understanding of symptoms in children and adolescents. During the next several weeks three conceptual frameworks will be articulated. These three frameworks will elucidate the possible meaning, origin, and/or function of the symptoms and offer to the student a vocabulary with which to engage the situation. At the turn of the 19th century into the 20th century, psychoanalysis emerged in Europe as a method of understanding symptoms from the point of view of internal conflict within the child or adolescent. After World War II in the U.S.A., a model of understanding symptoms from a systemic/cybernetic point of view revolutionized the diagnostic processes involved in working with children and adolescents. Since the late 1980’s, postmodern ideas, primarily from Europe and Australia, have greatly influenced and informed the understanding of psychopathology in children and adolescents. Narrative, social constructivist, and linguistic usage patterns have become a common vocabulary in the discourse on psychopathology. This course is not intended to be a reading of the history of child psychopathology. It is intended to expose the student to the most influential paradigms in the field of child psychopathology.
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: MSW Elective

SWRK 774 Program Evaluation
This course introduces students to theoretical and practical aspects of social service program evaluation. Students learn about the design and implementation of all phases of an evaluation, from needs assessment to analysis of findings. Skills such as survey construction and budgeting are introduced. Intensive analysis of existing studies illustrates how evaluations are designed and how findings affect social programs and policy.
One term course offered either term
Prerequisites: SWRK 615, Introduction to SW Research
Activity: Lecture
1 Course Unit
Notes: Research Option

SWRK 775 Intimate Violence
The purpose of this course is to familiarize students with the definition, theories, causes, processes, consequences, and social interventions in intimate violence. The course will attempt to provide insight on the phenomenon of intimate violence by examining the ways in which it affects survivors, perpetrators, and their children. This will be accomplished by reviewing the current research as well as by exploring how intimate violence is constructed by the participants on the personal, interpersonal, and social structural level.
Course not offered every year
Also Offered As: PUBH 575
Activity: Lecture
1 Course Unit
SWRK 777 Cognitive Behavioral Therapy
This Cognitive Behavioral Therapy course will be taught in a one-week intensive class Monday-Friday 9am-5pm. Students are expected to start a pre-course assignment approximately 2 months prior to the first day of the course. Students will receive an information request from the instructor during course registration and must reply in a timely fashion. Cognitive Behavioral Therapy (CBT) is the world’s most effective, empirically-based psychotherapy with strong scientific evidence. CBT is a collaborative and empowering psychotherapy that educates and helps clients to motivate themselves, set goals, develop, and implement treatment plans to reach those goals. This experiential/didactic advanced clinical skills course will present a CBT model to evidence-based practice that can serve as a conceptual framework for clinical applications to a wide variety of presenting problems and populations. The purpose of this course is to introduce graduate students to the theory of CBT and to begin to apply the basic principles through the stages of a self-directed case.
One term course offered either term
Prerequisite: Completion of MSW Foundation year curriculum or equivalent
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 778 Dialectical Behavioral Therapy
In this course we will examine the underlying theories, empirical foundations, and fundamental skill sets associated with dialectical behavioral therapy (DBT). Students will be expected to participate in role plays, lead mindfulness exercises, and carry out chain analyses.
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 780 Policy and "Difference" in Postmodernity
Social constructions of "difference" permeate the institutions, spaces, and assumptions of our society. These social constructions include but are not limited to the racialized, gendered, sexed, classed, and dis/abled constructions of the body. By leaning on postmodern thinkers such as Iris Marion Young, Pierre Bourdieu, Judith Butler, Jacques Derrida, Ernesto Laclau, and Michel Foucault, this seminar course will begin by engaging the questions of what is "difference" and how is "difference" discursively constructed and reproduced in society. Using a postmodern lens, the remainder of the course will engage various social science texts that deal with the varieties of "difference" (i.e. race, gender, class, sexuality) and the explicit and/or implicit policy implications of these works. Thus, we will critically engage policies such as welfare, affirmative action, economic policies of taxation, and same-gender marriage, among others. The underlying questions throughout the course will be to what extend does social policy enable the possibilities of freedom, justice, and democracy for the "Other", the deviant, the abject, the marginalized, those of assumed "difference"? And, to what extent does policy constrain those possibilities at the same time?
Taught by: Dixon-Roman
One term course offered either term
Also Offered As: MSSP 780
Activity: Seminar
1 Course Unit
Notes: Policy Option

SWRK 781 Qualitative Research
Qualitative research encompasses a variety of methods that enable the researcher to enter into the "lived experience" of research participants. These methods are particularly sensitive to the voices of populations whose perspectives are silenced by dominant societal discourses. The course begins by giving attention to underlying philosophical issues and traditions of qualitative research and proceeds to examine qualitative research design, methods of data collection, strategies to ensure rigor, data analysis, and presentation of findings. Students will learn about research interviewing, focus groups, and participant observation and ways in which qualitative research can be used to inform and evaluate social work practice and programs. Students will have the opportunity to apply qualitative research methods to in-class activities and individual or group projects.
Course usually offered in fall term
Also Offered As: PUBH 604
Prerequisites: SWRK 615, Introduction to Social Work Research
Activity: Lecture
1 Course Unit
Notes: Research Option

SWRK 783 Advanced Mental Health Practice with U.S. Veterans
Although this course is open to all students, it is designed for students in the clinical concentration and is required for students in the Cohen Veterans Network Scholars program. The course will focus on clinical knowledge and evidence-based practice skills for common mental health problems in veteran settings. The course will introduce students to the assessment and treatment of Post-Traumatic Stress Disorder (PTSD), Depression and Anxiety Disorders, Substance Abuse, Military Sexual Trauma (MST) and Suicide Assessment and Management among veteran populations. Other topics may include cultural competency, homelessness, and combat stress disorders. Since this is a seminar course, some classes will be taught by social workers/psychologists from the Veterans Hospital in Philadelphia and the Cohen Veterans Outpatient Clinic.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; Required for Cohen Veteran Network students

SWRK 785 Criminal Justice Policies: Implications for Social Work
The United States prison population has risen more than three hundred percent in the last three decades. More people are currently incarcerated than at any other point in the history of the United States, and that of the world. This unprecedented period of incarceration has gone largely invisible although it represents one of the greatest social epidemics in the history of the United States. This course provides a critical analysis of the criminal justice system in the United States from a historical and contemporary perspective. It examines the implications of significant criminal justice policies such as the Rockefeller Drug Laws, 3-Strike Legislations, and Mandatory Minimums on the current state of incarceration, and the phenomenon of "Reentry" and "Recidivism". The intersections of criminal justice and social work practice are unmistakable when examining staples of social work practice such as homelessness, mental health and substance abuse, thus the course is intended to facilitate a more informed/holistic practice for all social work students.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Policy Option
SWRK 786 Social Work Practice & Trauma
This course integrates trauma theory and practice and expands practice knowledge to include the treatment and assessment of the survivors of trauma. Emphasis is placed on differentiating PTSD from Complex Trauma in order to identify appropriate, evidence-based intervention strategies. Topics covered in the course include an historical overview of the development of our understanding of trauma and the exploration of various types of trauma including war trauma, domestic violence, childhood sexual and physical abuse, natural disasters, the experiences of political refugees and organizational trauma. Among the interventions covered in this course are CBT, EMDR, group and psychodynamic treatment. Students will consider issues that affect those treating the survivors of trauma, such as vicarious trauma, and will explore approaches to self-care. This is an advanced clinical course. Through assignments and class discussions, students are encouraged to use their experiences in the field to deepen their understanding of the material covered in the course.
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective

SWRK 787 Social Impact Strategy, Analysis, and Leadership
Around the world, new types of organizations are emerging, advances in technology and access to information continue, and there is a growing recognition that all sectors - business, public, and private nonprofit - have a role to play in creating social impact. While the desire to create social impact is clear, the field is just beginning to grapple with ways to translate these aspirations into real and meaningful change. Since 2006, Penn's Center for High Impact Philanthropy has been a pioneer in developing approaches for identifying, assessing, and growing opportunities for social impact. Team-taught by the center for High Impact Philanthropy, the course will be directed by the Center's founding executive director, Katerina 'Kat' Rosqueta, and will include guest lectures from other leading faculty and social impact innovators working in Philadelphia and around the world. Through hands-on practice, team projects, and highly interactive case-based discussions, students will gain the skills needed to: analyze opportunities for impact and potential for impact, including how to determine the scale and scope of an opportunity and how to use the tools of social impact economics to determine the cost implications of the opportunity; confidently address the strategic issues and key tasks faced by managers/leaders with a social impact mandate; influence others towards social impact by leveraging relevant research and real-world examples of effective communication and stakeholder management; and apply their research and effective storytelling skill to present their impact analysis in projects using different formats (e.g. video short, venture capitalist/donor pitch, policy brief).
Course usually offered in spring term
Activity: Lecture
1 Course Unit

SWRK 788 Harm Reduction on the Borders: Substance Use and HIV Treatment in Puerto Rico
This course examines the U.S.-based substance use and HIV treatment systems, and its engagement with injection drug users in Fajardo, Puerto Rico. It is designed to provide the students with an understanding of the political economy of harm reduction initiatives, and the manner in which it is shaped by the complicated relationship between Puerto Rico and the U.S. Students are expected to gain an understanding of Puerto Rico's welfare environment, the role of social welfare and social workers in such a context, and the interweaving of social control and social change embedded in welfare initiatives in "borderlands" such as Fajardo. During the four week course in Fajardo, students will complete a placement in a needle exchange program, and engage with texts on HIV, substance use, postcolonial theory and international social work.
Course usually offered summer term only
Activity: Seminar
1 Course Unit
Notes: Clinical Practice Elective and Macro Practice Elective; Application required

SWRK 792 Psychodynamic Theory
The purpose of this course is to review the evolution of psychodynamic theory and consider key concepts in psychoanalysis, ego psychology, object relations theory, self-psychology, attachment theory, relational and intersubjective theories and current findings in cognitive neuroscience. Participants will explore human psychological functioning as explained by these various psychodynamic theories and through the biopsychosocial lens that informs social work practice. Students will examine how external factors such as race, class, gender, culture and biology are interwoven with often unconscious, internal psychological determinants, creating the complexities of human behavior that challenge us in our clinical work. Case presentations by students, the instructor and guest lecturers will demonstrate how concepts from psychodynamic theory can be applied to social work practice with diverse clients in varied settings.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective
SWRK 793 Global Health and Health Policy
This participatory interdisciplinary seminar course examines contemporary issues in public health policy and global health. The organizing framework is social determinants of health. We consider evidence that inequalities in education, income, and occupation influence health status, and the policy dilemmas that broad interventions to improve population health may increase health disparities. We critically examine whether prevention is always better than a cure, and what modern medicine has to offer in terms of health. We explore the public policy process in health using the "tobacco wars" as a case example, of how politics, policy, law, commercial interests, and research intersect to affect the public’s health. We examine whether global health is in a state of decline, and the extent to which failures in public health, public policy, and foreign policy have contributed to increasing threats to world health. Likewise we will examine the potential for greater integration of health into foreign policy to create global infrastructure upon which to advance health. We will examine the global health workforce and the impact of widespread global migration of health professionals on receiving and sending countries. There are no prerequisites. The course is designed for graduate students in the social and behavioral sciences, health professions, public health, business and law. Advanced undergraduate students will be admitted with permission.
Course not offered every year
Also Offered As: NURS 640, PUBH 551
Activity: Lecture
1 Course Unit

Notes: Policy Option

SWRK 794 Practice with Older Adults and Families
This course focuses on practice with older adults and families within a life course and resiliency perspective. It examines the nature of the aging process, needs and life issues, the ways in which persons adapt to changes, and the ways in which interventions may assist with these adaptations. Students learn assessment, case management, and intervention skills, including the use of rapid assessment and diagnostic tools, needed to work effectively with older populations and family caregivers in a variety of community-based and institutional settings. The course emphasizes evidence-based practices that enhance quality of life, dignity, respect for differences, and maximum independent functioning.
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Clinical Practice Elective; Required for Penn Aging Concentration (PAC) students

SWRK 796 Family Economic Mobility
In this course, the experiences and voices of mothers, fathers, children, employers, children’s school teachers, human service workers, job training providers, policymakers, and others in cities across America graphically illustrate the "real life" economic challenges facing today’s families and organizations. These people, organizations, and policies dramatically show how economic, educational, and cultural practices and conditions intersect to perpetuate inequality among low-income and even many middle-income working families. The labor market, welfare and workforce programs, public schools and government are some of the institutions implicated in this intersection. In the course, notions such as “work ethic,” “family-friendly workplace,” “good jobs” and “hard work pays off” are deconstructed in terms of their meaning for today’s families, organizations and policies. At base, this course examines occupational mobility in America from multiple perspectives within the broad framework of capitalism, democracy, race, ethnicity, and gender. Students read classic and contemporary literature from occupational social work, sociology, cultural anthropology, and political science to explore generative roles and directions for “meso-oriented” clinical, macro, and policy professionals.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Policy Option

SWRK 797 Social Policy in Revolutionary Cuba (1959-2017)
Cuba represents one of the world’s long-standing institutionalized revolutions whose narrative and policies have changed from a strong nationalism yearning for independence, to an alignment with communism’s ideology and modus operandi, to a nostalgic, post-Soviet Union "socialism" ruled by a binary, state-controlled capitalism. In addition to the myriad of social and political changes affecting the island, the transition of leadership from Fidel Castro to his brother, Raúl, and then the death of the former in 2016, has put into question the theoretical pillars of the Revolution, thus undermining its initial legitimacy. This course is designed to provide students with the critical and analytical tools to dissect Cuban revolutionary politics, policies, and identity mutations within the island’s historical trajectory. We will begin by critically reviewing key points of diplomatic and historical relationships between the U.S. and Cuba, followed by an analysis of the notion of independence - upon which Castro relied to gather massive support - in the context of the 60’s debates on decolonization and underdevelopment. In addition, we will delve into the theoretical foundations of the Revolution focusing, among other texts, on the literature by Cuba’s "founding father” José Martí, who deeply influenced the Spanish-American war (1898)’s outcomes as well as Fidel Castro’s vision for Cuba. Throughout the course, students will also have the opportunity to critically read and discuss main Cuban social policies such as its famous Literacy Campaign, and other Education, Housing, Cultural, Health, and Immigration policies, as well as the island’s complex relationship with technological development and communications. Finally, we will study identity and race dynamics, which are inextricably embedded in Cuba’s political landscape.
Course usually offered in spring term
Also Offered As: MSSP 797
Activity: Lecture
0 Course Units
Notes: Application deadline: 11/20/17 at 5pm; Class dates in Havana: May 17-May 31; Pre-departure sessions at Penn: April (TBA); application available at: www.sp2.upenn.edu/global/courses
SWRK 798 Advanced Topics
Titles and Topics vary. See department website for descriptions: https://www.sp2.upenn.edu/academics/master-of-social-work/academics/course-descriptions/
One term course offered either term
Activity: Lecture
1 Course Unit

SWRK 799 Independent Study
Independent studies provide a flexible opportunity for standing faculty and students to work together in pursuing a topic of special interest that is not sufficiently covered by other courses in the curriculum. The content of independent studies is highly specialized and, as such, requires a plan of study developed jointly by the student(s) and the supervising standing faculty member. Part-time faculty members are not eligible to offer independent studies.
Activity: Independent Study
1 Course Unit

SWRK 803 History and Philosophy of Social Welfare
This seminar traces the evolution of social welfare from ancient to modern times focusing on its implications for the development of contemporary social welfare in the United States. The course examines the development of social welfare systems and the underlying philosophies in the context of the social, economic, political, and cultural environments in which they emerged. Topics include the evolution of modern conceptions of the "welfare state," the role of public, private, and voluntary sectors in the social services, trends in social and family history and their relationship to social welfare, the professionalization of social work, and methods of historical and social policy analysis.
Taught by: Stem
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: PhD students only

SWRK 804 Methods of Inquiry: Quantitative Research Methods
The purpose of this course is to teach the basics of practice research, with an emphasis on intervention research. This course will focus on research ethics, building a conceptual framework, source credibility, question and hypothesis formulation, design, sampling, measurement, and scale construction and selection. Special emphasis will be placed on the development of designing feasible and practical research studies to answer questions of importance to social work practice. The course will emphasize the selection and development of outcome measures, intervention manuals, and fidelity measures. It will closely examine the use and development of practice guidelines, evidence-based practice and meta-analytic procedures.
Course usually offered in fall term
Prerequisites: Must be enrolled in D.S.W. program.
Activity: Online Course
1 Course Unit

SWRK 805 Methods of Inquiry: Qualitative Research Methods
This course will cover the essentials of qualitative research. Students will learn how to "situate themselves" in the research process so as to best capture the lived experience of the subjects under investigation. The course will explore the appropriate use of intensive interviews, grounded theory and ethnography. Mixed methods that employ both qualitative and quantitative approaches, will also be covered.
Course usually offered in spring term
Prerequisites: SWRK 804. Must be enrolled in D.S.W. program
Activity: Online Course
1 Course Unit

SWRK 811 Social Theory
Course reading consists of the original works of theorists who offer classical, contemporary and postmodern perspectives on social thought, social interaction and issues germane to social welfare. Through intensive examination of multiple theoretical frameworks, students are expected to increase their analytical and critical orientation to theory. This will include understanding about epistemology, underlying assumptions, and theory construction can then be used to inform the student's substantive field of study and methodological orientation to research. This course is conducted in mixed lecture-seminar format.
Course usually offered in spring term
Activity: Lecture
1 Course Unit
Notes: Required for PhD Program

SWRK 812 Clinical Theory I
The purpose of this course is to broaden and deepen participants' mastery of several theories of development, personality, and behavior that have contributed to social work's knowledge base across the decades and continue to inform clinical social work epistemology today. Drawing primarily from original sources, we will consider key assumptions, constructs, and propositions of each theory in terms of its congruence with social work's principles, values, and mission and in relation to the profession's person-in-environment perspective. In this first semester, we will study the evolution of theories central to psychodynamic thought, from Freud's early biological model of the mind, through various relational perspectives, to contemporary work in the fields of attachment and interpersonal neurobiology. This examination will constitute a case study of the manner in which theories are socially constructed and will lay the foundation for critical inquiry into the social and political biases inherent in the Western European intellectual tradition from which most theories of human behavior have emerged.
Course usually offered in fall term
Prerequisites: Must be enrolled in D.S.W. program
Activity: Online Course
1 Course Unit

SWRK 813 Clinical Theory II
The purpose of this course is two-fold. First, the course is aimed at continuing and deepening students' mastery of theories of behavior and cognition as related to clinical practice. The course is designed to segue from psychodynamic theories from last semester into behavioral and cognitive theories this semester. The history and fundamentals of behavioral therapy, and its iterations will be reviewed to ground you firmly in a tradition that emphasizes empirical research. We will critically analyze and discuss the evidence and its application, and you will have opportunities to deepen or expand your knowledgebase of the material presented or through your choice of the final assignment. Case conceptualizations are emphasized as critical to informing behavioral and cognitive interventions. The second aim of the course involves using discussion and the research literature to critically examine the effectiveness and feasibility of ascribing to a single theoretical orientation. As an alternative, a more process-oriented approach through psychotherapy will be explored.
Course usually offered in spring term
Prerequisites: SWRK 812. Must be enrolled in D.S.W. program.
Activity: Online Course
1 Course Unit
SWRK 814 Applied Statistics
This course is designed to provide students with a range of statistical methods and applications used for research in human services and clinical practice settings. Topics covered include types of measurement and variables, and basic concepts and techniques for exploring and categorizing data, for generalizing data from sample to population and tests of significance. An emphasis will be placed on the practical applications of data to address social work practice issues. Students will learn how to choose and apply statistical tools to data sources, when and how statistical tools can be used to analyze data, and how to interpret others’ quantitative studies. Students will gain hands-on experience in using windows-based statistical software to manage and analyze quantitative data.
Prerequisites: Must be enrolled in D.S.W. program
Activity: Online Course
1 Course Unit

SWRK 815 Dissertation Seminar I
This seminar is designed to prepare participants for dissertation proposal writing and defense. Each component of this workshop moves the student closer to the two culminating assignments: a concisely crafted and well-supported 15-25 page written draft of the dissertation proposal and a presentation of the proposal with accompanying Powerpoint.
Activity: Online Course
1 Course Unit

SWRK 816 Dissertation Seminar II
This seminar continues the student’s dissertation work beyond the proposal. Under the direction of the dissertation chair and committee, the student begins the process of collecting and analyzing data in preparation for the final write-up and defense of the dissertation.
Prerequisites: SWRK 815. Must be enrolled in the DSW program.
Activity: Online Course
1 Course Unit

SWRK 852 Social Work Research
This is the foundation course in social work research. It deals with the nature of scientific inquiry; theory and its relation to research design and hypothesis testing; and various models of data collection, sampling, and analysis of research and is supported in following personal interests within the structure of ethical scientific research. Each student prepares an original study which demonstrates integration of the semester’s work. Students learn to work on their own. Students completing this class are prepared for more advanced coursework in research.
Taught by: Solomon
Course usually offered in fall term
Prerequisites: Completion of concurrent enrollment in a course on introductory Social Statistics.
Activity: Lecture
1 Course Unit

SWRK 855 Advanced Research Methods
The methodology of accountability research in human service programs is studied. Emphasis is placed on social program evaluation, idiosyncratic research, and secondary data analysis in policy research as specialized methods of social work research. Students undertake a laboratory experience in an ongoing program evaluation project.
Course usually offered in spring term
Prerequisites: SWRK 852 and Introduction to Statistics
Activity: Lecture
1 Course Unit
Notes: PhD course

SWRK 861 Policy Analysis
This course examines alternative models of policy development and applies them to current issues in social welfare. It emphasizes frameworks for policy research and secondary analysis of government data. Topics include: race, class, and sex in policy outcomes; major social welfare programs; and the design, implementation, and evaluation of social service systems.
Course usually offered in spring term
Prerequisite: Must have successfully completed a course in multivariate statistics
Corequisite: PhD course
Activity: Lecture
1 Course Unit

SWRK 900 Clinical DSW
Topics vary; see department for current course descriptions
Course offered summer, fall and spring terms
Prerequisites: Must be enrolled in D.S.W. program
Activity: Seminar
0 Course Units

SWRK 901 Proseminar
This course is a weekly, 90-minute (.5 course unit) proseminar. The course contains two main components: a research seminar (i.e., faculty and student presentations of their in-progress research) and skills training (e.g., how to write an abstract, software demonstrations). The two are interwoven throughout the academic year (e.g., 2 weeks of the month devoted to the research seminar and 2 weeks of the month devoted to skills training). The proseminar is required of all students until they successfully defend their dissertation proposal.
One-term course offered either term
Corequisite: PhD course
Activity: Lecture
0.5 Course Units

SWRK 902 Trauma-informed Social Work Practice
The majority of clients who present to a wide variety of social services have been exposed to adversity and trauma, often beginning in childhood. As a result, the current standard of care requires that human service delivery systems of all kinds need to be "trauma-informed." This course will explore what that actually means, since administering "trauma-specific treatment" alone is not sufficient to encompass the complexity of the multigenerational, widespread problems that confront us in the world around us. Based on an understanding that our organizations are living systems, students will draw parallels between the individual experience of trauma and the organizational aspects of trauma and loss. Using these parallel processes as a basis, students will explore a trauma-informed, parallel process of organizational recovery called the "Sanctuary Model."
Prerequisites: Must be enrolled in D.S.W. program
Activity: Online Course
1 Course Unit
SWRK 903 Relational Theory
This course will introduce the relational turn in theories of developments and psychotherapy. Relational theory emerged in the epistemological shift to postmodernism and social constructionism, characterized by concepts of knowledge as perspectival, constructed increased skill in developing a literature search, 3) developing a capacity to create operational hypotheses or questions, 4) developing a research design, and 5) designing a data analysis and interpretation plan. The aim of this course is to identify the shared principles of relational theories and apply these principles to clinical social work practice. Students will critically evaluate and compare and contrast relational psychoanalysis with relational-cultural theory. Students will evaluate the viability of relational theory in the field of clinical social work and consider the application of relational theory beyond the therapy room to the supervisory agency and teaching contexts. The focus on case studies as examples will be key to understanding the clinical applications of the various medications we will discuss.
Prerequisites: Enrolled in the D.S.W. program
Activity: Online Course
1 Course Unit

SWRK 904 Teaching
This class will focus on classroom dynamics, class culture and instructor skills using an organismic model in which the class has a life of its own and is capable of growth and development. In addition, students will learn underlying theories, research, practice wisdom, etc. that we need to communicate to our students. The course should be helpful in thinking about issues that are central to effective teaching regardless of the practice models you present to your students or the content of courses including policy, research, etc. Students will have an opportunity to share their current or past teaching with a particular emphasis on those difficult moments when they had second thought about classroom teaching as a career. Examples will be used to help illustrate the theoretical content and the readings and bring the ideas to life as they address the real day-to-day issues we all face in teaching.
Prerequisites: Enrolled in the D.S.W. program
Activity: Online Course
1 Course Unit

SWRK 905 Family-Based Interventions
This advanced-level course focuses on social work intertions with children, couples and families. Theories and research that ground family-based interventions are explored and interrogated. Through case conceptualizations, role plays and other in-vivo exercises, students will practice techniques for assessment and treatment of family systems.
Prerequisites: Must be enrolled in D.S.W. program
Activity: Online Course
1 Course Unit

SWRK 968 Social Welfare and Social Economics
This course examines the social welfare aspects of major economic decisions in the United States. Particular attention is paid to exploring the implications of social choices in relation to the goals of the achievement of increased equity and equality in the distribution of income and power, the elimination of unemployment, and the control of inflation. The growth of public welfare programs and the base of funding for social services are examined in terms of the nation's economic and political objectives.
Activity: Lecture
1 Course Unit

SWRK 995 Doctoral Dissertation
Doctoral Dissertation
Activity: Dissertation
1 Course Unit

Sociology (SOCI)

SOCI 001 Introduction to Sociology
Sociology provides a unique way to look at human behavior and social interaction. Sociology is the systematic study of the groups and societies in which people live. In this introductory course, we analyze how social structures and cultures are created, maintained, and changed, and how they affect the lives of individuals. We will consider what theory and research can tell us about our social world.
For BA Students: Society Sector
Taught by: Imaogene, Jacobs, Lareau, Wilde, Zuberi
One-term course offered either term
Also Offered As: AFRC 002
Activity: Lecture
1 Course Unit

SOCI 002 Social Problems and Public Policy
This course approaches some of today's important social and political issues from a sociological vantage point. The course begins by asking where social problems come from. The main sociological perspectives of Marx, Weber and Durkheim are developed in connection with the issues of inequality, social conflict and community. We then turn to the social construction of social problems by examining how various issues become defined as social problems. This involves a consideration of the role of the media, social experts and social movements. The last section of the course considers how social problems are addressed. Here we discuss the relative strengths and weaknesses of government programs and regulations versus market-based approached. We also discuss the role of philanthropy and voluntarism. Finally, we consider the risk of unanticipated consequences of reforms. Along the way, we will consider a variety of social issues and social problems, including poverty, immigration, crime, global warming, and education.
Taught by: Bosk, Jacobs
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 003 Deviance and Social Control
A sociological analysis of the origins, development, and reactions surrounding deviance in contemporary society. Topics include labeling theory, stigma, social organization, tradition, social power, crime, sexual deviance, drug use, and racism. Theoretical and methodological issues will be discussed and evaluated.
For BA Students: Society Sector
Taught by: Bosk
One-term course offered either term
Activity: Lecture
1 Course Unit
**SOCI 004 The Family**
Most men and women get married during their lifetimes. In addition, most men and women become fathers and mothers at some point. This class presents social science evidence on the family. For example, it shows how "greedy" workplaces, which require long work hours, create work-family conflicts for husbands and wives. The class also illuminates how men and women have different experiences within families. The lectures will also examine how economic inequality shapes family life. Students will have the opportunity to apply key concepts to daily life. All are welcome.
For BA Students: Society Sector
Taught by: Lauer, Gonalons
One term course offered either term
Also Offered As: GSWS 004
Activity: Lecture
1 Course Unit

**SOCI 005 American Society**
What is American Society? The literary critic, Leslie Fielder once wrote, "...to be an American...precisely to imagine a destiny rather than to inherit one; since we have always been, insofar as we are Americans at all, inhabitants of myth rather than history..." In this course we will explore the elements of the myth that form the basis of the civil religion as well as the facts on the ground that contradict our conceptions of American Society. Examples of mythic elements and their contradiction that we will explore are: A nation founded to pursue liberty and freedom yet allowed slavery, equality of opportunity and persistent structural inequality, and a welcoming of the Immigrant coupled with a suspicion of the outsider.
For BA Students: Humanities and Social Science S
Taught by: Bosk
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: Also fulfills General Requirement in Society for Class of 2009 and prior

**SOCI 006 Race and Ethnic Relations**
The course will focus on race and ethnicity in the United States. We begin with a brief history of racial categorization and immigration to the U.S. The course continues by examining a number of topics including racial and ethnic identity, interracial and interethnic friendships and marriage, racial attitudes, mass media images, residential segregation, educational stratification, and labor market outcomes. The course will include discussions of African Americans, Whites, Hispanics, Asian Americans and multiracials.
Taught by: Charles, Zuberi
One term course offered either term
Also Offered As: AFRC 006, ASAM 006, URBS 160
Activity: Lecture
1 Course Unit

**SOCI 007 Population and Society**
The course serves as an introduction to the study of population and demography, including issues pertaining to fertility, mortality, migration, and family formation and structure. Within these broad areas we consider the social, economic, and political implications of current trends, including: population explosion, baby bust, the impact of international migration on receiving societies, population aging, racial classification, growing diversity in household composition and family structure, population and environmental degradation, and the link between population and development/poverty.
For BA Students: Society Sector
Taught by: Flippin, Kohler, Zuberi
One term course offered either term
Also Offered As: GSWS 007
Activity: Lecture
1 Course Unit

**SOCI 010 Social Stratification**
In this course we study the current levels and historical trends of inequality in the United States especially in cross-national comparative perspective. We discuss causes and consequences of inequality as well as various policy efforts to deal with inequality. Topics include intergenerational social mobility, income inequality, education, gender, race and ethnicity among others.
For BA Students: Society Sector
Taught by: Jacobs, Staff
Course not offered every year
Activity: Lecture
1 Course Unit

**SOCI 011 Urban Sociology**
This course is a comprehensive introduction to the sociological study of urban areas. This includes more general topics as the rise of cities and theories urbanism, as well as more specific areas of inquiry, including American urbanism, segregation, urban poverty, suburbanization and sprawl, neighborhood and crime, and immigrant ghettos. The course will also devote significant attention to globalization and the process of urbanization in less developed counties.
Taught by: Flippin
Course not offered every year
Also Offered As: AFRC 011, URBS 112
Activity: Seminar
1 Course Unit
SOCI 012 Globalization
This course analyses the current state of globalization and sets it in historical perspective. It applies the concepts and methods of anthropology, history, political economy and sociology to the analysis and interpretation of what is actually happening in the course of the semester that relates to the progress of globalization. We focus on a series of questions not only about what is happening but about the growing awareness of it and the consequences of the increasing awareness. In answering these questions we distinguish between active campaigns to cover the world (e.g. Christian and Muslim proselytism, free-trade agreements, democratization) and the unplanned diffusion of new ways of organizing trade, capital flows, tourism and remote interaction via the Internet. The body of the course deals with particular dimensions of globalization, reviewing both the early and recent history of each. The overall approach is historical and comparative, setting globalization on the larger stage of the economic, political and cultural development of various parts of the modern world. The course is taught collaboratively by an anthropologist, an historian, and a sociologist, offering the opportunity to compare and contrast distinct disciplinary approaches. It seeks to develop a general social-scientific framework and theoretical understanding of the various historical dimensions of globalization: economic, political, social and cultural.
For BA Students: Humanities and Social Science S
Taught by: Guillon, Spooner
Course usually offered in fall term
Also Offered As: ANTH 012, HIST 012
Activity: Lecture
1 Course Unit

SOCI 027 Introduction to Africana Studies
The aim of this course is to provide an interdisciplinary examination of the complex array of African American and other African Diaspora social practices and experiences. This class will focus on both classic texts and modern works that provide an introduction to the dynamics of African American and African Diaspora thought and practice.
For BA Students: Humanities and Social Science S
Taught by: Charles, Zuberi
One-term course offered either term
Also Offered As: AFRC 001, ENGL 071
Activity: Lecture
1 Course Unit

SOCI 033 Technology & Society
Technology plays an increasing role in our understandings of ourselves, our communities, and our societies, in how we think about politics and war, science and religion, work and play. Humans have made and used technologies, though, for thousands if not millions of years. In this course, we will use this history as a resource to understand how technologies affect social relations, and conversely how the culture of a society shapes the technologies it produces. Do different technologies produce or result from different economic systems like feudalism, capitalism and communism? Can specific technologies promote democratic or authoritarian politics? Do they suggest or enforce different patterns of race, class or gender relations? Among the technologies we'll consider will be large objects like cathedrals, bridges, and airplanes; small ones like guns, clocks and birth control pills; and networks like the electrical grid, the highway system and the internet.
For BA Students: Society Sector
Course usually offered in spring term
Also Offered As: HSOC 003, STSC 003
Activity: Lecture
1 Course Unit

SOCI 041 Freshman Seminars
Two terms. student may enter either term.
Also Offered As: AFRC 041, URBS 010
Activity: Seminar
1 Course Unit
Notes: Freshman Seminars. Topics vary from semester to semester. See Freshman Seminar and Sociology websites for current offerings.

SOCI 100 Introduction to Sociological Research
One of the defining characteristics of all the social sciences, including sociology, is a commitment to empirical research as the basis for knowledge. This course is designed to provide you with a basic understanding of research in the social sciences and to enable you to think like a social scientist. Through this course students will learn both the logic of sociological inquiry and the nuts and bolts of doing empirical research. We will focus on such issues as the relationship between theory and research, the logic of research design, issues of conceptualization and measurement, basic methods of data collection, and how social scientists craft formal accounts of social scientific research.
Taught by: Armenta, Koppel, Park, Smith, Wilde
One-term course offered either term
Also Offered As: HSOC 100
Activity: Lecture
1 Course Unit

SOCI 101 Bioethics
This course will take an historical approach to the development of modern bioethics, which is the study of ethical issues in medicine and the life sciences. The first part of the course will be devoted to an introduction to the standard principles of academic bioethics and the way they have structured the field over the last 35 years. We will then consider topics to which the principles have long been applied, such as the care of gravely ill newborns, death and dying, and the ethics of research involving human subjects. The last part of the course will address more recent life sciences policy areas including genetics, cloning, stem cells, biodefense, and neuroscience in relation to national security. Throughout the course I will emphasize the interplay between the development of bioethics and its cultural context.
Taught by: Moreno
Course not offered every year
Also Offered As: HSOC 102
Activity: Lecture
1 Course Unit

SOCI 103 Asian Americans In Contemporary Society
This class will introduce you to sociological research of Asian Americans and engage in the ”model minority” stereotype. We begin by a brief introduction to U.S. immigration history and sociological theories about assimilation and racial stratification. The class will also cover research on racial and ethnic identity, educational stratification, mass media images, interracial marriage, multiracials, transracial adoption, and the viability of an Asian American panethnic identity. We will also examine the similarities and differences of Asian Americans relative to other minority groups.
For BA Students: Society Sector
Course not offered every year
Also Offered As: ASAM 001
Activity: Lecture
1 Course Unit
SOCI 105 Industrial Relations and Human Resource Management
One-term course offered either term
Activity: Lecture
1 Course Unit

SOCI 110 The Rich and The Poor
Who is rich? Who is poor? This course examines how wealth and income are distributed in the United States, and how its distribution affects individuals, groups, institutions, and society. We will gain a fuller understanding of what social class is and discuss how it affects all aspects of life, including: quality of schooling, access to employment, child rearing, and even tastes, preferences, and identity.
Taught by: Armenta, Lareau, Staff
Course not offered every year
Activity: Lecture
0 Course Units

SOCI 111 Health of Populations
This course is designed to introduce students to the quantitative study of factors that influence the health of populations. Topics to be addressed include methods for characterizing levels of health in populations, comparative and historical perspectives on population health, health disparities, health policy issues and the effectiveness of interventions for enhancing the health of populations. These topics will be addressed both for developed and developing world populations. The course will focus on specific areas of health and some of the major issues and conclusions pertaining to those domains. Areas singled out for attention include chronic diseases and their major risk factors, such as smoking, physical activity, dietary factors and obesity. Throughout the course, the focus will be on determining the quality of evidence for health policy and understanding the manner in which it was generated.
Taught by: E. Kohler
One-term course offered either term
Also Offered As: HSOC 111
Activity: Lecture
1 Course Unit

SOCI 112 Discrimination: Sexual and Racial Conflict
This course is concerned with the structure, the causes and correlates, and the government policies to alleviate discrimination by race and gender in the United States. The central focus of the course is on employment differences by race and gender and the extent to which they arise from labor market discrimination versus other causes, although racial discrimination in housing is also considered. After a comprehensive overview of the structures of labor and housing markets and of nondiscriminatory reasons (that is, the cumulative effects of past discrimination and/or experiences) for the existence of group differentials in employment, wages and residential locations, various theories of the sources of current discrimination are reviewed and evaluated. Actual government policies and alternative policies are evaluated in light of both the empirical evidence on group differences and the alternative theories of discrimination.
For BA Students: Society Sector
Taught by: Madden
Course not offered every year
Also Offered As: AFRC 112, GSWS 114
Activity: Lecture
1 Course Unit

SOCI 117 Sociology of Work
The material world is shaped and maintained through work, but so is the social world. How work is organized, allocated, and rewarded determines the opportunities people have for developing their own capacities, the kinds of ties they will have with others, and how much control they will have over their own lives. We will consider various sociological perspectives on work and compare alternative ways of organizing work, with a focus on the contemporary United States.
Taught by: Jacobs, Leiderer
Course not offered every year
Also Offered As: GSWS 117
Activity: Lecture
1 Course Unit

SOCI 118 Sociology of Bioethics
The Sociology of Bioethics explores the sociological approach to bioethics. The Sociology of Bioethics is not a course in bioethics itself; rather than discussing the merits of a position (is assisted suicide ethical?), we will ask how the debate has been framed, who is promoting which arguments, why the debate has arisen now, and how the issue is reflected in policy. In order to do so we will make use of social science research, along with philosophical treaties, legislation, and the popular media. The course is also not designed as a comprehensive treatment of the field; it will focus instead on choice topics that we will explore in depth. Our goal is to understand the nature of the bioethics profession and its modes of argumentation, and to explore the cultural, social, political, and professional underpinnings of bioethical debates.
Taught by: Bosk
One-term course offered either term
Activity: Lecture
1 Course Unit

SOCI 120 Social Statistics
This course offers a basic introduction to the application/interpretation of statistical analysis in sociology. Upon completion, you should be familiar with a variety of basic statistical techniques that allow examination of interesting social questions. We begin by learning to describe the characteristics of groups, followed by a discussion of how to examine and generalize about relationship between the characteristics of groups. Emphasis is placed on the understanding/interpretation of statistics used to describe and make generalizations about group characteristics. In addition to hand calculations, you will also become familiar with using PCs to run statistical tests.
Taught by: Allison, Charles, Guillet, Koppel, Park, Parrado
One-term course offered either term
Also Offered As: AFRC 120
Activity: Recitation
0 Course Units
SOCI 122 The Sociology of Gender
Gender is an organizing principle of society, shaping social structures, cultural understandings, processes of interaction, and identities in ways that have profound consequences. It affects every aspect of people's lives, from their intimate relationships to their participation in work, family, government, and other social institutions and their place in the stratification system. Yet gender is such a taken for granted basis for differences among people that it can be hard to see the underlying social structures and cultural forces that reinforce or weaken the social boundaries that define gender. Differences in behavior, power, and experience are often seen as the result of biological imperatives or of individual choice. A sociological view of gender, in contrast, emphasizes how gender is socially constructed and how structural constraints limit choice. This course examines how differences based on gender are created and sustained, with particular attention to how other important bases of personal identity and social inequality—race and class—interact with patterns of gender relations. We will also seek to understand how social change happens and how gender inequality might be reduced.
For BA Students: Society Sector
Taught by: Leidner
One-term course offered either term
Also Offered As: GSWS 122
Activity: Lecture
1 Course Unit

SOCI 125 Classical Sociological Theory
This course will cover the founding classics of the sociological tradition including works of Tocqueville, Marx and Engels, Weber, Durkheim, Mauss, Simmel, and G.H.Mead. We will also examine how the major traditions have continued and transformed into theories of conflict, domination, resistance and social change; social solidarity, ritual and symbolism; symbolic interactionist and phenomenological theory of discourse, self and mind. This course satisfies the theory requirement for sociology majors.
One-term course offered either term
Activity: Lecture
1 Course Unit

SOCI 126 Contemporary Sociological Theory
This course will explore contemporary social theory with an emphasis on theories and theoretical orientations related to social interaction, identity, culture, and inequality. For example, we will discuss sociological theories from the last half century about race and racism, gender, social class, education, emotion, and violence. Importantly, we will consider theory in the context of its application to empirical social science research and real world concerns. The course fulfills the theory requirement for sociology minors and all sociology majors.
One-term course offered either term
Activity: Lecture
1 Course Unit

SOCI 128 Introduction to Demographic Methods
This course provides an introduction to basic demographic concepts, data, indicators, and techniques. The course emphasizes hands-on applications of techniques in the analysis of population dynamics in the U.S. and elsewhere. Students will learn about the main sources of demographic data, including censuses, surveys, and vital statistics, and methods to estimate demographic processes (e.g. mortality, fertility). Students will leave the course with a solid grounding in a) the sources and limitations of demographic data; b) the construction of basic demographic indicators; and c) appropriate use of basic demographic techniques to answer questions about human populations.
Taught by: Elo, Hannum, Smith
One term course offered either term
Activity: Lecture
1 Course Unit

SOCI 134 Health and Social Policy
Health and Social Policy is an interdisciplinary course examining health care and social policy from domestic and international perspectives. The course is designed to engage students in critical thinking about social determinants of health, the organization and outcomes of health care systems and institutions, global health priorities and challenges, and the implications for public policy. Topics include the social inequalities and health; how organizational context of health care impacts outcomes; management of human resources in health nationally and globally; analysis of medical error, its causes, and consequences; review and critique of public policies in U.S. health care; and global health priorities and international health policy. Issues of current public debate in health and health care will provide a context for learning. There are no prerequisites. The course is intended for general lists as well as for those planning careers in health care.
For BA Students: Society Sector
Taught by: Aiken, Lake
Course usually offered in spring term
Also Offered As: NURS 134
Activity: Lecture
1 Course Unit

SOCI 135 Law and Society
After introducing students to the major theoretical concepts concerning law and society, significant controversial societal issues that deal with law and the legal systems both domestically and internationally will be examined. Class discussions will focus on issues involving civil liberties, the organization of courts, legislatures, the legal profession and administrative agencies. Although the focus will be on law in the United States, law and society in other countries of Africa, Asia, Europe and Latin America will be covered in a comparative context. Readings included research reports, statutes and cases.
Taught by: Bosk, Fetni
One term course offered either term
Also Offered As: AFRC 135
Activity: Lecture
1 Course Unit
SOCI 137 The Sociology of Media and Popular Culture
This course relies on a variety of sociological perspectives to examine the role of media and popular culture in society, with a particular emphasis on the power of the mass media industry, the relationship between cultural consumption and status, and the social organization of leisure activities from sports to shopping.
For BA Students: Society Sector
Taught by: Grazian
One term course offered either term
Activity: Lecture
1 Course Unit
Notes: Also fulfills General Requirement in Arts Letters for Class of 2009 and prior

SOCI 140 Social Conflict
This course will emphasize violent conflict, what leads up to it, and what determines whether it actually happens or not. Micro-sociological observations of conflict and violence as it appears in real-life observations, photos and videos. Topics include: fights and brawls; military combat; crowd and crowd-control violence; bullying and holdups; fair fights and dueling; carousing; sports violence; police violence; gangs; violence; terrorist and clandestine violence; school and workplace rampages.
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 143 Modern Social Movements
Throughout modern times groups of people have come together in an attempt to change their social world. Their successes and failures teach us about society, organizations, and individuals. This course will examine case studies of historical and contemporary social movements. Using these case studies, this course will evaluate different approaches to understanding social movements, and investigate what these different approaches suggest about individuals, the society in which they live, and the potential for social change.
Course not offered every year
Activity: Lecture
1 Course Unit

SOCI 152 American Health Policy
This lecture course will introduce students to a broad range of topics that fall under the heading of American health policy. Its main emphasis will be on the history of health care in America from the U.S. Civil War to Obamacare. The primary objective of the course will be to consider why the U.S., until very recently, remained one of the only industrialized nations to have a private, non-nationalized health care system. Some of the themes addressed include: private health insurance (such as Blue Cross/Blue Shield), industrial health and workers’ compensation, the welfare state (in Europe, Canada, and the U.S.), women’s health, especially maternal and infant care programs, Medicare/Medicaid, the Clinton Health Plan of 1993, injured soldiers and the Veterans Administration.
Taught by: Linker
Course not offered every year
Also Offered As: HSOC 150
Activity: Lecture
1 Course Unit

SOCI 153 Language and Social Identity
Also Offered As: LING 152
Activity: Seminar
1 Course Unit

SOCI 159 Population and Public Health in Eastern Europe
Also Offered As: ANTH 159, EUR 159, RUSS 159
Activity: Lecture
1 Course Unit

SOCI 161 The History of the Information Age
Certain new technologies are greeted with claims that, for good or ill, they must transform our society. The two most recent: the computer and the Internet. But the series of social, economic and technological developments that underlie what is often called the Information Revolution include much more than just the computer. In this course, we explore the history of information technology and its role in contemporary society. We will explore both the technologies themselves—calculating machines, punched card tabulators, telegraph and telephone networks, differential analyzers, digital computers, and many others—and their larger social, economic and political contexts. To understand the roots of these ideas we look at the prehistory of the computer, at the idea of the post-industrial or information society, at parallels with earlier technologies and at broad historical currents in the United States and the world.

One term course offered either term
Also Offered As: STSC 160
Activity: Lecture
1 Course Unit

SOCI 162 Environmental Sociology
Activity: Lecture
1 Course Unit

SOCI 163 Educational Inequality
Activity: Lecture
1 Course Unit

SOCI 175 Medical Sociology
This course will give the student an introduction to the sociological study of medicine. Medical sociology is a broad field, covering topics as diverse as the institution and profession of medicine, the practice of medical care, and the social factors that contribute to sickness and well-being. Although we will not explore everything, we will attempt to cover as much of the field as possible through four thematic units: (1) the organization and development of the profession of medicine, (2) the delivery of health care, especially doctor-patient interaction, (3) the social and cultural factors that affect how illness is defined, and (4) the social causes of illness. The class will emphasize empirical research especially but not only quantitative research.
For BA Students: Society Sector
Taught by: Schnitker
Also Offered As: HSOC 275
Activity: Lecture
1 Course Unit

2018-19 Catalog | Generated 02/28/19
SOCI 200 Criminal Justice
This course examines how the criminal justice system responds to crime in society. The course reviews the historical development of criminal justice agencies in the United States and Europe and the available scientific evidence on the effect these agencies have on controlling crime. The course places an emphasis on the functional creation of criminal justice agencies and the discretionary role decision makers in these agencies have in deciding how to enforce criminal laws and whom to punish. Evidence on how society measures crime and the role that each major criminal justice agency plays in controlling crime is examined from the perspective of crime victims, police, prosecutors, jurors, judges, prison officials, probation officers and parole board members. Using the model of social policy evaluation, the course asks students to consider how the results of criminal justice could be more effectively delivered to reduce the social and economic costs of crime.
For BA Students: Society Sector
Taught by: MacDonald
One-term course offered either term
Also Offered As: CRIM 200
Activity: Lecture
1 Course Unit

SOCI 221 Sample Survey Methods
This course provides an introduction to survey data collection. In meeting this objective, we examine the major planning tasks necessary for conducting surveys, including problem formulation, study design, questionnaire and interview design, pretesting, sampling, interviewer training and field management, code development and coding of data, and data cleaning and management. We critically explore the design of surveys and collection of data from epistemological and ethical perspectives. Students will leave the class with a solid understanding of the basic process of survey data collection and a familiarity with its strengths and weaknesses as a method of inquiry into human behavior.
Taught by: Hannum, Parrado
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 222 Field Methods of Sociological Research
This course is designed to introduce students to field methods in sociological research, with a focus on participant-observation and interviewing. During this course, students will read original research based on field methods and discuss their strengths, limitations, and ethical dilemmas. Most importantly, students will design their own research projects and become ethnographers and interviewers. Students will be guided through the fieldwork process from data collection to analysis, and will turn in multiple assignments and original research paper.
Taught by: Armenta, Bok, Koppel, Lareau
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 233 Criminology
This introductory course examines the multi-disciplinary science of law-making, law-breaking, and law-enforcing. It reviews theories explaining where, when, by whom and against whom crimes happen. Police, courts, prisons, and other institutions are also critically examined. This course meets the general distribution requirement.
For BA Students: Society Sector
Taught by: Adler
One-term course offered either term
Also Offered As: CRIM 100
Activity: Lecture
1 Course Unit

SOCI 235 Law and Social Change
Beginning with discussion of various perspectives on social change and law, this course then examines in detail the interdependent relationship between changes in legal and societal institutions. Emphasis will be placed on (1) how and when law can be an instrument for social change, and (2) how and when social change can cause legal change. In the assessment of this relationship, emphasis will be on the laws of the United States. However, laws of other countries and international law relevant to civil liberties, economic, social and political progress will be studied. Throughout the course, discussions will include legal controversies relevant to social change such as issues of race, gender and the law. Other issues relevant to State-Building and development will discussed. A comparative framework will be used in the analysis of this interdependent relationship between law and social change.
Taught by: Fetni
One-term course offered either term
Also Offered As: AFRC 235
Activity: Lecture
1 Course Unit

SOCI 238 Media Culture & Society in Contemporary China
This course studies contemporary Chinese culture, media, and society in the context of globalization. Major topics include Internet expression and censorship, mass media commercialization, entertainment media, middle class and consumerism, environmental degradation, new forms of inequality, and civil society and popular protest. Taking a sociological approach, this course introduces methods and theories for analyzing media, institutions, inequality, and social change.
Taught by: Yang
One-term course offered either term
Also Offered As: COMM 203
Activity: Lecture
1 Course Unit
SOCI 239 Sociology of Religion
How do the many religious institutions in our society differ, and what common qualities do they share? Why do some religious institutions adapt to modernity while others do not? In particular, why are the politics of sex and gender so fundamental to the current organization of the American religious landscape? These questions will be the central motivating questions for the semester. The course will begin with an introduction to current theories in the sociology of religion. We will then apply and critique those theories as we learn more about the histories, members, practices and beliefs of all the major religious groups in the US today, including Mainline, Fundamentalist and Evangelical Protestantism, Roman Catholicism, Judaism, and other groups such as the Seventh Day Adventists, Jehovah’s Witnesses and Mormons. Students will pick two religious groups (one liberal and one conservative) to observe over the course of the semester and will write papers comparing and contrasting the two groups.
Taught by: Wilde
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 250 Minorities And The Media
This course considers the theory and practice of minority representation in the public domain: film, theater, television, music, advertising and museums. How has "minority" been defined - who is included and why? How have notions of "minority" status been constructed in our public languages and what may be the impact of those images on both minority and non-minority populations? Our focus will be on representation and how it may work to marginalize or empower members of minority populations. While we will concentrate primarily on ethnic minorities, we will also consider how these same issues might affect sexual minorities. Our discussions will be supplemented by film and video examples. While the course will be theoretically situated in communication, it will consider how the perspectives of anthropology, feminism, and literary and ethnic studies have affected our understanding of public representations.
Course not offered every year
Also Offered As: AFRC 249
Activity: Lecture
1 Course Unit

SOCI 254 Cities, Suburbs, Regions
This course will explore the political, economic, social, and demographic forces impacting development patterns in metropolitan areas, with a particular focus on Philadelphia. We will examine the government policies, economic forces, and social attitudes that affect the way a region grows, and the impact of these forces on poverty, equity and segregation. Specific topics to be discussed include the factors that make a region competitive, the city's changing role in the region, the impact place has on opportunity, and approaches to revitalizing and improving communities.
Taught by: Black
Course offered spring; even-numbered years
Also Offered As: URBS 253
Activity: Seminar
1 Course Unit

SOCI 259 Social Determinants of Health
Over the last century, we have witnessed dramatic historical change in population incidence and mortality, e.g., rising numbers of women diagnosed with breast cancer and dramatic declines in death from stomach cancer. There has also been a highly visible social patterning of health and disease, such as socio-economic disparities in AIDS, substance abuse, and asthma in the U.S. today or the association of breast cancer with affluence globally. This course will explore the way researchers, activists, politicians and others in different eras have made sense of these changes and patterns and have responded to them. The course is historical and sociological. At the same time that we examine evidence and theories about the way poverty, affluence, and other social factors influence individual and population health, we will try to understand how social and historical forces have shaped how health and disease have been understood and categorized. In examining our current obesity "epidemic," for example, we will not only consider evidence and claims made about the causal role of market forces and changes in the built environment, but ask why (besides the fact that we are heavier) obesity has become such a visible and important medical and public health issue in the U.S. today.
Taught by: Aronowitz
Course not offered every year
Also Offered As: HSOC 260
Activity: Lecture
1 Course Unit

SOCI 260 Cyberculture
Computers and the internet have become critical parts of our lives and culture. In this course, we will explore how people use these new technologies to develop new conceptions of identity, build virtual communities and affect political change. Each week we’ll see what we can learn by thinking about the internet in a different way, focusing successively on hackers, virtuality, community, sovereignty, interfaces, algorithms and infrastructure. We’ll read books, articles, and blogs about historical and contemporary cultures of computing, from Spacewar! and phone phreaks in the 1970s to Google, Facebook, World of Warcraft, WikiLeaks, and Anonymous today. In addition, we’ll explore some of these online communities and projects ourselves and develop our own analyses of them.
One term course offered either term
Also Offered As: STSC 260
Activity: Seminar
1 Course Unit

SOCI 264 Poverty, Race and Health
This course is designed to introduce students to current literature on race/ethnic difference in health and mortality in the United States, covering such topics as explanations for why some race/ethnic groups fare better than others, how inner city poverty and residential segregation may contribute to racial/ethnic differences in health outcomes, and health of immigrants versus native-born populations. Current policy debated and recent policy developments related to health are also briefly discussed. The course is organized as a seminar with a combination of lectures and class discussions.
Taught by: Ebo
Course not offered every year
Also Offered As: URBS 264
Activity: Seminar
1 Course Unit
SOCI 266 Latinos in United States
This course presents a broad overview of the Latino population in the United States that focuses on the economic and sociological aspects of Latino immigration and assimilation. Topics to be covered include: construction of Latino identity, the history of U.S. Latino immigration, Latino family patterns and household structure, Latino educational attainment, Latino incorporation into the U.S. labor force, earnings and economic well-being among Latino-origin groups, assimilation and the second generation. The course will stress the importance of understanding Latinos within the overall system of race and ethnic relations in the U.S., as well as in comparison with previous immigration flows, particularly from Europe. We will pay particular attention to the economic impact of Latino immigration on both the U.S. receiving and Latin American sending communities, and the efficacy and future possibilities of U.S. immigration policy. Within all of these diverse topics, we will stress the heterogeneity of the Latino population according to national origin groups (i.e. Mexican, Puerto Rican, Cuban, and other Latinos), as well as generational differences between immigrants and the native born.
Taught by: Parrado, Amerta
One-term course offered either term
Also Offered As: LALS 235
Activity: Lecture
1 Course Unit

SOCI 268 Contemporary Issues in African Society
This course will deal with law and society in Africa. After surveying the various legal systems in Africa, the focus will be on how and to what extent the countries of Africa "re-Africanized" their legal systems by reconciling their indigenous law with western law and other legal traditions to create unified legal systems that are used as instruments of social change and development. Toward this end, the experiences of various African countries covering the various legal traditions will be included. Specific focus will be on laws covering both economic and social relations. This emphasis includes laws of contracts and civil wrongs, land law, law of succession, marriage and divorce and Africa's laws of International Relations, among other laws. Throughout this course a comparative analysis with non-African countries will be stressed.
Taught by: Omoaone, Zuberi
Also Offered As: AFRC 268
Activity: Lecture
1 Course Unit

SOCI 270 The Immigrant City
Immigration is among the most important phenomena shaping neighborhoods, cities, and regions. Understanding migration is fundamental to understanding urbanization, community development, and urban society today. This course examines the development of immigrant communities in United States cities and suburbs. Class readings, discussions, and visits to a variety of Philadelphia immigrant neighborhoods explore themes including labor markets, commerce, housing, civil society, racial and ethnic relations, integration, and the public sphere. We study the diverse dynamics and impacts of immigration through foundational readings and close observation of various newcomer and receiving communities. The first part of the course surveys migration and community formation among a broad range of ethnic groups in different sorts of city and suburban neighborhoods, mainly through history, sociology, and geography. The second part focuses on public policy and community and economic development practices related to migration at the local, regional, national, and transnational scales.
For BA Students: Society Sector
Taught by: Vitello, Domenic
Course usually offered in spring term
Also Offered As: LALS 273, URBS 270
Activity: Seminar
1 Course Unit

SOCI 277 Mental Illness
This course is designed to give a general overview of how sociologists study mental illness. We will be concerned with describing the contributions of sociological research and exploring how these contributions differ from those of psychology, psychiatry, and social work. This overview will be done in three parts: we will discuss (i) what "mental illness" is, (ii) precisely how many Americans are mentally ill, (iii) how social factors (e.g. race, gender, class) and social arrangements (e.g. social networks) lead to mental illness, and (iv) how we as a society respond to and treat the mentally ill. Throughout the course, we will be concerned with uncovering the assumptions behind different definitions of mental health and exploring their political, social, and legal implications.
Taught by: Schnitker
One-term course offered either term
Also Offered As: HSOC 277
Activity: Lecture
1 Course Unit
SOCI 280 Social Issues in Contemporary China
China's transition to a market-oriented society has effected fundamental changes in the lives of citizens. This class will consider pressing social concerns that China must struggle to address as it continues down the path of market reforms. Using topical problems to illustrate broader issues of social inequality along lines of gender, ethnicity, residence status, and poverty status, we will consider questions such as the following: How are women and men faring differently in China's new labor market and workplaces? Are rural peasants and the emerging underclass of urban laid-off workers being left behind by market transition? How are minorities faring in China's transition? How does the emerging digital divide play into the dichotomies of east-west and urban-rural in China? What is the plight of millions of "floaters" migrating into China's cities, with minimal legal rights and protections? Can China's rapidly-changing public health system handle emerging diseases such as SARS and AIDS? How has the one-child policy affected women, children, and society in China? Who are the "missing girls" of China, and what are the social implications of their disappearance? How was the welfare of children and adolescents changed with market reforms? The class will combine lectures, academic readings, case studies, films, and discussions.
Taught by: Hamnum
One-term course offered either term
Also Offered As: EALC 048
Activity: Lecture
1 Course Unit

Directed readings and research in areas of sociology. Permission of instructor needed.
One-term course offered either term
Activity: Independent Study
1 Course Unit

SOCI 300 Thesis Workshop
The purpose of this course is to guide senior sociology majors in writing a research proposal for a senior honors thesis. Students will learn about various research approaches, how to write a focused literature review, and kinds of data necessary to answer a wide variety of research questions, including their own. Throughout the course, students will work on designing a research question, generation memorable hypotheses, and coming up with a design for their proposed study. The final paper for this course will be a research proposal that is the basis for students' independent research project. This course satisfies the research requirement for sociology majors and is designed primarily for seniors who are planning to write an honors thesis.
One-term course offered either term
Prerequisite: SOCI 100
Activity: Seminar
1 Course Unit

SOCI 301 Thesis Workshop II
This is the second part of the Thesis Workshop course. Prerequisite: SOCI 300. Permission must be granted by the department.
Taught by: Flippen
One-term course offered either term
Prerequisite: SOCI 300
Activity: Independent Study
0.5 Course Units

SOCI 307 Race, Science & Justice

1 Course Unit

SOCI 399 Independent Study
Independent study section for senior Sociology majors working on an honors thesis. Students are assigned an advisor by the undergraduate chair.
Taught by: Sociology Faculty
One-term course offered either term
Activity: Independent Study
1 Course Unit

SOCI 410 Research Seminar in Experiments in Crime and Justice
This seminar focuses on examining data from experiments in criminology including: randomized controlled trials of criminal justice policies, "natural" experiments in crime, and other quasi-experimental studies. A series of experiments conducted by Penn scholars and elsewhere will be examined. This seminar also guides criminology majors in writing a research proposal for their thesis. Students will learn about how to formulate a research question, develop a review of the literature, and how to apply necessary empirical methods. The final paper for this course will be a research proposal that can serve as the basis for the student's senior thesis and to satisfy the senior capstone requirement. Readings will come from the disciplines of criminology, sociology, psychology, economics, and urban planning.
Taught by: Loeffler
Course usually offered in fall term
Also Offered As: CRIM 410
Activity: Seminar
1 Course Unit
SOCI 420 Perspectives on Urban Poverty
This course provides an interdisciplinary introduction to 20th century urban poverty, and 20th century urban poverty knowledge. In addition to providing an historical overview of American poverty, the course is primarily concerned with the ways in which historical, cultural, political, racial, social, spatial/geographical, and economic forces have either shaped or been left out of contemporary debates on urban poverty. Of great importance, the course will evaluate competing analytic trends in the social sciences and their respective implications in terms of the question of what can be known about urban poverty in the contexts of social policy and practice, academic research, and the broader social imaginary. We will critically analyze a wide body of literature that theorizes and explains urban poverty. Course readings span the disciplines of sociology, anthropology, urban studies, history, and social welfare. Prinacy will be granted to critical analysis and deconstruction of course texts, particularly with regard to the ways in which poverty knowledge creates, sustains, and constrains meaningful channels of action in urban poverty policy and practice interventions.
Taught by: Fairbanks

Course not offered every year
Also Offered As: HIST 233, LALS 431
Activity: Seminar
1 Course Unit

SOCI 435 Globalization & The City: Global Urbanization
In 2008, the UN estimated that the world’s population had become primarily urban, for the first time in history. According to the OECD, by the end of the century, close to 85% of the projected population will live in cities. The transition towards an urban planet is likely to have far-reaching economic, environmental, social, political, and cultural impacts on our species, many of which we cannot yet predict. But what is urbanization? Will it lead to more inequality, exploitation, conflict, resource consumption, and exposure to natural disasters and climate change, or is it an opportunity to move the world in a more sustainable and equitable direction? Taught by Chandan Deuskar and Patricio Zambrano Barragan, this course aims to explore these questions. In the first half of the semester, we will discuss various challenges associated with global urbanization and its impacts. In the second half, we will focus on responses to these challenges. The assignments will allow students to explore some of the most salient debates around global urbanization. By the end of the semester, students will be better able to understand the context for any future academic research, professional work, or business activities in the ‘developing world’. The course will help provide a foundation for any students considering graduate studies or professional work in the fields of urban planning or international development.
Taught by: Chandan Deuskar and Patricio Zambrano Barragan
Course not offered every year
Also Offered As: URBS 457
Activity: Seminar
1 Course Unit

SOCI 438 Social Science Studio: Immigrants Make the City
How do American cities grow? Studies of urban transformation have focused on anchor institutions, the growth model of big business-generated employment, and “creative class” gentrification. After decades of decline, many major cities like Philadelphia are seeing gains in population again, as well as new commercial activity and street life, spurred by the influx of new immigrant communities. Yet few scholars have asked: What role do immigrants play in the current revival of the American metropolis? In this Social Science Studio course, 16 students will work collaboratively as in a design studio to conduct research that can answer this important social-scientific question. Students will work on independent projects that engage multiple methods and fields to produce new types of knowledge. They will be introduced to multiple methods drawn from architecture, planning, anthropology and political science, including mapping, interviewing, fieldnotes, socio-economic surveys, sketching, photography and web design to develop independent projects. No prior knowledge is required but students with experience in GIS, STATA, photography, drawing or web design are encouraged to apply.
Taught by: Choudhury, Kushanava
Course not offered every year
Also Offered As: URBS 438
Activity: Seminar
1 Course Unit

SOCI 453 Metropolitan Growth and Poverty
This course analyzes the role of metropolitan regions in the U.S. and global economies, including the sources of metropolitan productivity, the ways that metropolitan structures affect residents, and analyses of public policy in metropolitan areas. The economic, political, and social forces that have shaped World War II urban and regional development are explored, including technology, demography, and government. Special attention is paid to how metropolitan change affects residents by income and race. Topics include: gentrification, schools, suburbanization, sprawl, metropolitan fragmentation, concentration of poverty, race, and various economic revitalization initiatives.
Taught by: Madden
One-term course offered either term
Also Offered As: URBS 453
Activity: Seminar
1 Course Unit

SOCI 473 Community Organizing: History and Theory
Power is the ability to create change. This course will integrate the history and theories of community organizing so that each student will be able to develop a transformational praxis. We will examine social inequality and intersectionality, and explore effective strategies in organizing for social change. This course is inter-disciplinary, involving political economy, sociology, history, social work and leadership theory. Inquiry-based and problem-posing methods will serve as the primary means of formative assessment.
Taught by: Becker
Course not offered every year
Also Offered As: URBS 473
Activity: Seminar
1 Course Unit
SOCl 488 Culture, Sexuality and Global Health
What, if anything, is global in "global health"? Whatever this field might be, it is more often than not actively produced through a range of conflicting ethical commitments of multiple expert cultures, social movements and laypersons. This course explores critical themes in the historical and sociocultural study of global health. Students will engage a number of disciplinary perspectives within the social sciences including the history, sociology, and anthropology of science, and we will pay particular attention to feminist, queer, and postcolonial science studies perspectives. Throughout, we will consider how both global and local cultural transformations have shaped the emergence of this multidisciplinary field of study. To understand the complexity of global health, students will engage with a number of theoretical and ethnographic texts while questioning its stability and coherence as a self-same object given its interdisciplinary character. In doing so, we will explore the ways in which diverse sets of interests converge to constitute as well as contest the ever-shifting boundaries of global health.
Taught by: Fiererek
Course usually offered in fall term
Also Offered As: GSWS 488
Activity: Seminar
1 Course Unit

SOCl 535 Quantitative Methods in Sociology I
This course is an introduction to the practice of statistics in social and behavioral sciences. It is open to beginning graduate students and--with the permission of the instructor--advanced undergraduates. Topics covered include the description of social science data, in graphical and non-graphical form; correlation and other forms of association, including cross-tabulation; bivariate regression; an introduction to probability theory; the logic of sampling; the logic of statistical inference and significance tests. There is a lecture twice weekly and a mandatory "lab."
Taught by: Allison, Smith
Course usually offered in fall term
Also Offered As: DEMG 535
Prerequisite: Basic algebra
Activity: Lecture
1 Course Unit

SOCl 536 Quantitative Methods in Sociology II
As the second part of a two-semester sequence, this graduate course focuses on regression analysis as used in social science research. In particular, we discuss features and assumptions of linear regression and logistic regression models. We learn how to apply regression models to real social science data using Stata and how to interpret the results.
Taught by: Allison, Kohler, Park, Schnittker, Smith
Course usually offered in spring term
Also Offered As: DEMG 536
Prerequisite: SOCl 535 or permission of instructor
Activity: Lecture
1 Course Unit

SOCl 553 Field Methods in Qualitative Research
This course is designed to introduce graduate students to basic skills and concepts in ethnographic field research, including participant observation, interviewing, field documentation, and the scholarly presentation of qualitative data. Students will learn to apply these skills and concepts through an assigned set of exercises in concert with a semester-long project based on intensive fieldwork at a research site of their choosing. In addition, we will examine exemplars of published fieldwork in both classical and contemporary sociology. Students outside of the Department of Sociology need permission of the instructor to enroll.
Taught by: Bosk, Grazian, Lareau
One term course offered either term
Activity: Seminar
1 Course Unit

SOCl 555 Pro-Seminar in Sociological Research
In the non-credit seminar students will be introduce to key areas in sociological research, and a set of professional skills necessary to navigate graduate school and a successful academic career. Students will also be introduced to faculty and resources available at Penn. This course is required for all first-year graduate students in Sociology.
Taught by: Hannum, Jacob, Kao, Leidner, Smith
Course usually offered in fall term
Activity: Seminar
0 Course Units

SOCl 556 Pro-Seminar in Sociological Research II
This graduate seminar for first-year graduate students will be a two-semester course covering the major subfields of sociology — their classical and contemporary theories, current methods and substance.
Taught by: Collins, Grazian, Hannum, Park, Schnittker, Smith, Wilde
One term course offered either term
Activity: Seminar
1 Course Unit

SOCl 561 Class Cultures and Historical Change
Studies culture as values, scripts, practice, performance, and style in the contexts of everyday life, social class, and status groups, social movements, and changes of communication technologies. Approaches politics, society, institutions, identities, and social change as dynamic processes and complex interactions at both micro/meso and meso/macro levels. Examines the production, reception, circulation and effects of signs, symbols, and stories. Readings include both classic authors (Elias, Simmel, Bakhin, Goffman, Foucault, Bourdieu, Raymond Williams, etc.) and contemporary works from sociology and communication studies.
Taught by: Yang
Course not offered every year
Also Offered As: COML 562, COMM 889

Activity: Lecture
1 Course Unit
**SOCI 596 Sociology of Education**
This graduate seminar will introduce students to some of the key theoretical and empirical work in the sociology of education. We will examine how schools work to maintain or alleviate inequality, and focus on differences in educational achievement and attainment by race, ethnicity, immigrant status, class, and gender. We will review work on the educational experiences of youth from early childhood to young adulthood.
Course not offered every year
Also Offered As: ASAM 590
Activity: Seminar
1 Course Unit

**SOCI 601 Contemporary Social Theory**
This is a graduate-level seminar structured around the main theoretical debates of contemporary sociology, including the interplay of rationality and emotion, the relationship between structure and agency, the nature of power, and the role of chance and contingency. In considering alternative positions on these debates, we will encounter the major theorists of the past fifty years, including Parsons, Merton, Goffman, Homans, Schutz, Coleman, Bourdieu, Luhmann, Habermas, Collins, and Giddens. Requirements include intensive primary source reading, writing, and participation. The course assumes, and does not provide, prior familiarity with the main theoretical perspectives, and thus does not substitute for the undergraduate theory course (SOCI 126)
Course not offered every year
Activity: Seminar
1 Course Unit

**SOCI 602 Proseminar in Classical Sociology**
This course is designed to introduce graduate students to the classical foundations of sociology by drawing on canonical readings by Marx, Engels, Durkheim, Weber, Du Bois, Addams, Simmel, Park, and Goffman, among others. We will read these texts in the context of three major sociological themes: work and social inequality, culture and social structure, and urban interaction and culture in the city. Final papers will require students to draw on classical sociological works in their analyses of contemporary empirical research in sociology.
Taught by: Grazian
One term course offered either term
Activity: Seminar
1 Course Unit

**SOCI 603 Master’s Research in Sociology**
This graduate course is intended to be helpful to students as they produce an MA thesis. The course is structured to provide social support and feedback as students move through the stages in the development of a project (i.e., data analysis, review of the literature, development of a thesis, and revision). Students should begin the semester with a data set in hand; additional data analysis will occur during the term. (In some cases, students may be finishing their data collection.) In addition, the course is intended to provide professional development opportunities for students by providing “insider” information about the publication process. Students will be given examples of journal review (including reviews that reject a paper), copies of papers as they move through the revision process, and guidelines for producing a publishable piece of work. The goal is for students to produce a manuscript that can be submitted for publication in the near future. This is a required course for second year graduate students in Sociology.
Taught by: Bosk, Grazian, Jacobs, Kao, Lareau, Leidner, Park, Schnittker
One term course offered either term
Also Offered As: DEMG 707
Activity: Seminar
1 Course Unit

**SOCI 604 Methodology of Social Research**
This course will give students familiarity with the common research methods social scientists use to conduct research. Ethnographic, interview, survey, experimental and historical/comparative research methods will be covered. Four themes will be explored: 1) the basics of solid research design, 2) the various advantages and disadvantages of each method, 3) when the use of a method is appropriate or inappropriate for the research question, and 4) how to evaluate researchers’ claims on the basis of the evidence they present. These themes will be explored by reading examples of and conducting exercises designed to give students hands-on experience in each of the methods. Students will conduct the exercises on a topic of their choice, which together will culminate in their final paper. The course is required and restricted to second year students in sociology and demography.
Taught by: Smith, Wilde, Zuberi
One term course offered either term
Also Offered As: DEMG 604
Activity: Lecture
1 Course Unit

**SOCI 607 Introduction to Demography**
A non-technical introduction to fertility, mortality and migration and the interrelations of population with other social and economic factors.
Course usually offered in fall term
Also Offered As: DEMG 607
Activity: Lecture
1 Course Unit

**SOCI 609 Basic Methods of Demography**
The course is designed to introduce students to basic concepts of demographic measurement and modeling used to study changes in population size and composition. The course covers basic measures of mortality, fertility and migration; life table construction; multiple decrement life tables; stable populations; population projections; and age patterns of vital events. Students will learn to apply demographic methods through a series of weekly problem sets.
Taught by: Elo, Guillot, Smith
One term course offered either term
Also Offered As: DEMG 609
Activity: Lecture
1 Course Unit
SOCI 611 Structural Equation Models
Statistical modeling with multiple equations and latent variables. The first part of the course will focus on linear models that could be estimated with any of the well-known SEM programs (e.g., LISREL, EQS, or Amos). Both Mplus and SAS will be used exclusively in this part of the course. The second part will focus on Mplus models for variables that are categorical, count, or censored. Maximum likelihood methods for missing data will also be covered.
Taught by: Allison
Course not offered every year
Also Offered As: DEMG 611
Activity: Lecture
1 Course Unit

SOCI 612 Categorical Data Analysis
This course deals with techniques for analyzing multivariate data which the dependent variable is a set of categories (a dichotomy or polytomy). Topics will include linear probability models, logit (logistic) regression models, probit models, logit analysis of contingency tables, cumulative logit and probit (for ordinal data), multinomial logit, conditional logit (discrete choice), unobserved heterogeneity, log-linear models, square tables, response-based sampling, and repeated measures. Methods will be illustrated using the Stata System. There will be several assignments using Stata to analyze data provided by the instructor.
Taught by: Allison, Smith
Course not offered every year
Also Offered As: DEMG 612
Activity: Lecture
1 Course Unit

SOCI 613 Event History
An applications-oriented course on statistical methods for the analysis of longitudinal data on the occurrence of events, also known as survival analysis, failure-time analysis, hazard analysis or duration analysis. Emphasis on regression-like models in which the risk of event occurrence is a function of a set of explanatory variables. Topics include accelerated failure-time models, hazard models, censoring, Cox regression models, time-dependent covariates, competing risks, repeated events, unobserved heterogeneity, discrete-time methods.
Taught by: Allison
Course not offered every year
Also Offered As: DEMG 613
Prerequisite: SOCI 536 or equivalent
Activity: Lecture
1 Course Unit

SOCI 620 Doctoral Seminar in Sociological Research II
This course is intended to aid in the selection, framing, writing and revising of sociological dissertation proposals. It is also intended to provide a forum for the presentation of dissertation research in progress. The goal is to provide a forum for the acquisition of professional socialization in sociology. We will discuss the framing of research questions, the design of research strategies, and the writing of dissertation proposals. We will discuss the process of submitting manuscripts for conferences and journals, preparing a curriculum vitae, job search strategies, and preparing for effective colloquium presentations. We will also review articles currently under review at the American Sociological Review. It is expected that third year graduate students in Sociology will enroll in this class.
Taught by: Grazian, Hannum, Jacobs, Schnittker, Wilde
One term course offered either term
Prerequisite: Third year graduate students
Activity: Seminar
1 Course Unit

SOCI 621 Mortality
The course focuses on the description and explanation of health and mortality in human populations and their variability across several dimensions such as age, time, place, social class, race, etc. The course includes general theories of health, mortality and morbidity, investigations of mortality and related processes in developing and developed countries, and discussions of future mortality trends and their implications for individual lives and the society at large.
Taught by: Ebo, Kohler
Course not offered every year
Also Offered As: DEMG 621
Activity: Lecture
1 Course Unit

SOCI 622 Fertility
The biological, social and demographic factors explaining the levels, trends and differentials in human fertility. Data, measures, and methods used in the context of the more and the less developed countries, with an emphasis on the historical and current course of the fertility transition.
Taught by: Kohler, Smith
Course not offered every year
Also Offered As: DEMG 622
Activity: Seminar
1 Course Unit
SOCI 634 Population Processes II
Population Processes II is part of a two-course sequence designed to introduce students to the core areas of demography (fertility, mortality, and migration) and recent developments in the field. PP II is divided into two parts. The first focuses on family demography and the biological, social and demographic factors explaining levels, trends, and differentials in human fertility transition with an emphasis on the historical and current course of fertility transition in developed and developing countries. The second part of the course provides a comprehensive review of theories and research on international migration. Readings examine patterns and processes of global migration during the classic age from 1800-1914 as well as during the post war period from 1945 to the present. The course also covers a history and evaluation of immigration policies around the world, and devotes significant attention to theoretical and empirical perspectives on immigrant adaptation, including the relationship between gender and migration.
Taught by: Flippen, Kohler, Parrado, Smith
Course usually offered in spring term
Also Offered As: COMM 645
Activity: Seminar
1 Course Unit

SOCI 643 Social Stratification
This is an advanced level graduate seminar where we will review contemporary research on social stratification and mobility. We will examine empirical and theoretical studies not only in the US but also in other countries to address how the pattern of social stratification varies across societies and over time. The main topics to be discussed are social mobility, occupational attainment, educational inequality, gender and race, and family processes and stratification. We will also examine studies that address how national contexts mediate social stratification. Advanced undergraduate students will be admitted with permission.
Taught by: Jacobs, Park
Course not offered every year
Also Offered As: DEMG 663
Activity: Lecture
1 Course Unit

SOCI 649 A Course on Elites
Most of the studies of inequality look at poverty and the impact of poverty. This course will be a study of those at the top of the social stratification system. We will take a broad vision of elites of to include the upper-middle class as well as those in the top 1%. The course will examine the concentration of wealth in American society. It will examine elite families. It will also look at elite education. There will be a unit on the financial industry, the 2008 debacle, and the failure of the government to regulate this important industry. We will also study the influence of race by comparing the black upper-middle-class with white upper-middle-class families. Thus, we will also look at the power of elites in a number of spheres. Finally, we will also read theoretical perspectives including the work of C. Wright Mills, Marx, and Bourdieu. Thus, in addition to the focus on social stratification, this course cuts across sociology of the family, economic sociology, cultural sociology, and race and ethnic relations.
Taught by: Lareau
Activity: Seminar
1 Course Unit

SOCI 662 Panel Data Analysis: Panel Data Analysis - Missing Data
Also Offered As: DEMG 662
Activity: Lecture
1 Course Unit

SOCI 664 Digital Media & Soc Theo
This seminar explores critical issues in contemporary society through the lens of digital media studies and social theory. Special attention will be given to how social theory may inform the theorizing and empirical analysis of digital culture, digital politics, and digital practices. We will read recent monographs on the meanings and uses of digital media in international development, international migration, state power and popular protest, symbolic violence, and the formation and contestation of identities, communities, and publics. These works will be examined alongside the social theories of Jeffrey Alexander, Ulrich Beck, Bourdieu, Judith Butler, Foucault, Giddens, Goffman, Habermas, Melucci, Victor Turner, and others. A term paper required
One term course offered either term
Also Offered As: COMM 665
Activity: Seminar
1 Course Unit

SOCI 667 Social Interaction
The dynamics of interpersonal interaction, especially in face-to-face encounters during limited short periods of time. Topics include: the theory of interaction rituals deriving from Durkheim, Goffman and their contemporary followers; conversation analysis; micro-ethnographic studies of non-verbal behavior and embodied interaction; sociology of emotions; symbolic interactionist theory and the social nature of mind, self, and inner dialogue; electronically mediated interaction and its effects on social ties; and the relationship between micro and macro sociology.
Course not offered every year
Activity: Seminar
1 Course Unit

SOCI 677 International Migration
A comprehensive review of theories and research on international migration. The course introduces the basic precepts of neoclassical economics, the new economics of labor migration, segmented labor market theory, world systems theory, social capital theory and the theory of cumulative causation. Readings examine patterns and processes of global migration during the classic age from 1800-1914 as well as during the postwar period from 1945 to the present. The course also covers a history and evaluation of immigration policies around the world, and devotes significant attention to theoretical and empirical perspectives on immigrant adaptation. Within this larger topic, we will also discuss internal migration and urbanization; the relationship between gender and migration; the spatial distribution of immigrants within the United States, immigrant communities, and ethnic enclaves; and the undocumented population in the United States.
Taught by: Flippen
Course not offered every year
Also Offered As: DEMG 677
Activity: Seminar
1 Course Unit

SOCI 690 Sociology Writing Workshop I
Taught by: Jacobs, Lareau
Also Offered As: DEMG 707, DEMG 708, SOCI 691
Activity: Seminar
1 Course Unit

SOCI 691 Sociology Writing Workshop II
Taught by: Jacobs, Lareau
Also Offered As: DEMG 707, DEMG 708, SOCI 690, SOCI 707, SOCI 708
Activity: Seminar
1 Course Unit
SOCI 707 Second-Year Research Seminar I
This course is intended to hone the skills and judgment in order to conduct independent research in sociology and demography. We will discuss the selection of intellectually strategic research questions and practical research designs. Students will get experience with proposal writing, the process of editing successive drafts of manuscripts, and the oral presentation of work in progress as well as finished research projects. The course is designed to be the context in which master’s papers and second year research papers are written. This is a required course for second year graduate students in Demography. Others interested in enrolling in only one of the courses may do so with the permission of the Chair of the Graduate Group in Demography.
Course usually offered in fall term
Also Offered As: DEMG 707
Activity: Seminar
1 Course Unit

SOCI 708 Seminar: Demographic Research II
Demography 708 is the second part of a two-course sequence designed to introduce and familiarize second year students with current norms for academic research, presentation and publishing in the field of Demography. In Dem 708 students are expected to finalize the analyses and to complete their second year research paper. This is a required course for second year demography students. Others interested in enrolling in the course may do so with the permission of the Chair of the Graduate Group in Demography.
Course usually offered in spring term
Also Offered As: DEMG 708
Activity: Seminar
1 Course Unit

SOCI 731 Advanced Demographic Methods
This course considers a variety of procedures for measuring and modeling demographic processes. We will consider both deterministic (drawn from classic demographic methods, stable population theory and the like) and stochastic (drawn from statistics) perspectives and methods, including their integration. Pre-requisites: DEMG 609 and SOCI 536 (or its equivalent).
Taught by: Smith
Course not offered every year
Also Offered As: DEMG 731
Prerequisites: DEMG 609 and SOCI 536 (or its equivalent)
Activity: Seminar
1 Course Unit

SOCI 796 Demographic, Economic, and Social Interrelations
The course investigates economic and social determinants of fertility, mortality, and migration, and it discusses the effects of population variables on economic and social conditions, including economic and social development. Topics discussed in the course include: How do economic changes affect marriage, divorce, and child bearing decisions? How do households make decisions about transfers and requests? How can economic and sociological approaches be combined in explanatory models of demography change? How does immigration to the US affect the ethnic composition of the population, the earnings of native workers, taxes on natives, and the macro-economy? What causes the aging of populations, and how will population aging affect the economies of industrial nations, and in particular, pension programs like Social Security? What accounts for the rise in women’s participation in the wage labor force over the past century? How are family composition and poverty interrelated? Does rapid population growth slow economic development with low income countries? In addition to these topics, the course also covers selected methods not included in DEMG/SOCI 535/536 and 609
Taught by: Madden; Kohler
Course not offered every year
Also Offered As: DEMG 796
Activity: Lecture
1 Course Unit

SOCI 860 Global Media Activism: the 1960s
Also Offered As: COMM 860
Activity: Seminar
1 Course Unit

SOCI 867 Media & Social Movements
Examines the meanings and roles of media and communication in social movements; analyzes media reform activism; studies both historical movements and contemporary protests around the world (Arab Spring, Indignados, Occupy, etc.); covers a broad range of theoretical perspectives, especially network and diffusion theories, political economy, narrative theory, and theories of performance. Students are required to submit a final research paper.
Taught by: Yang
Course not offered every year
Also Offered As: COMM 867
Activity: Seminar

SOCI 998 Independent readings and research
For advanced students who work with individual instructors upon permission. Intended to go beyond existing graduate courses in the study of specific problems or theories or to provide work opportunities in areas not covered by existing courses.
One-term course offered either term
Activity: Independent Study
1 Course Unit

SOCI 999 Directed Readings and Research
Primarily for advanced students who work with individual instructors upon permission. Intended to go beyond existing graduate courses in the study of specific problems or theories or to provide work opportunities in areas not covered by existing courses.
One-term course offered either term
Activity: Independent Study
1 Course Unit
South Asia Studies (SAST)

SAST 001 Introduction to Modern India
This introductory course will provide an outline of major events and themes in Indian history, from the Mughal Empire in the 16th century to the re-emergence of India as a global player in the 21st century. The course will discuss the following themes: society and economy in Mughal India; global trade between India and the West in the 17th century; the rise of the English East India Company's control over Indian subcontinent in the 18th century; its emergence and transformation of India into a colonial economy; social and religious reform movements in the 19th century; the emergence of elite and popular anti-colonial nationalisms; independence and the partition of the subcontinent; the emergence of the world's largest democracy; the making of an Indian middle class; and the nuclearization of South Asia.
For BA Students: History and Tradition Sector
Taught by: Ali
One term course offered either term
Also Offered As: HIST 089
Activity: Lecture
1 Course Unit

SAST 002 The City in South Asia
This interdisciplinary social science course examines key topics, themes, and analytic methods in the study of South Asia by focusing on significant South Asian cities. With one-fifth of the world's population, South Asia and its urban centers are playing an increasingly important role in recent global economic transformations, resulting in fundamental changes within both the subcontinent and the larger world. Drawing primarily on ethnographic studies of South Asia in the context of rapid historical change, the course also incorporates research drawn from urban studies, architecture, political science, and history, as well as fiction and film. Topics include globalization and new economic dynamics in South Asia; the formation of a new urban middle class; consumption and consumer culture; urban political formations, democratic institutions, and practices; crime and the underworld; population growth, changes in the built environment, and demographic shifts; everyday life in South Asia and ethnic, cultural, and linguistic identities, differences and violence in South Asia's urban environments.
This is an introductory level course appropriate for students with no background in South Asia or for those seeking to better understand South Asia's urban environments in the context of recent globalization and rapid historical changes. No prerequisites. Fulfills College sector requirement in Society and foundational approach in Cross-Cultural Analysis.
For BA Students: Society Sector
Taught by: Mitchell
One term course offered either term
Also Offered As: ANTH 107, URBS 122
Activity: Lecture
1 Course Unit

SAST 003 History, Culture, and Religion in Early India
This course surveys the culture, religion and history of India from 2500 BCE to 1200 CE. The course examines the major cultural, religious, and social factors that shaped the course of early Indian history. The following themes will be covered: the rise and fall of Harappan civilization, the "Aryan Invasion" and Vedic India, the rise of cities, states and the religions of Buddhism and Jainism, the historical context of the growth of classical Hinduism, including the Mahabharata, Ramayana and the development of the theistic temple cults of Saivism and Vaishnavism, processes of medieval agrarian expansion and cultic incorporation as well as the spread of early Indian cultural ideas in Southeast Asia. In addition to assigned secondary readings students will read select primary sources on the history of religion and culture of early India, including Vedic and Buddhist texts, Puranas and medieval temple inscriptions. Major objectives of the course will be to draw attention to India's early cultural and religious past and to assess contemporary concerns and ideologies in influencing our understanding and representation of that past.
For BA Students: History and Tradition Sector
Taught by: Ali
One term course offered either term
Also Offered As: HIST 086, RELS 164
Activity: Lecture
1 Course Unit

SAST 004 India's Literature: Love, War, Wisdom and Humor
This course introduces students to the extraordinary quality of literary production during the past four millennia of South Asian civilization. We will read texts in translation from all parts of South Asia up to the sixteenth century. We will read selections from hymns, lyric poems, epics, wisdom literature, plays, political works, and religious texts.
For BA Students: Arts and Letters Sector
Taught by: Patel
One term course offered either term
Also Offered As: COML 012
Activity: Lecture
1 Course Unit

SAST 005 Performing Arts in South Asia
This course is a survey of selected traditions of theater, music, and dance in India and surrounding regions. Topics include ritual practices, theater classical dance, classical music, devotional music, regional genres, and contemporary popular musics. Readings and lectures are supplemented by audio and visual materials and live performances. The aim of the course is to expose students to a variety of performance practices from this part of the world and to situate the performing arts in their social and cultural contexts. The course has no prerequisites.
For BA Students: Arts and Letters Sector
One term course offered either term
Also Offered As: MUSC 265
Activity: Lecture
1 Course Unit
SAST 006 Hindu Mythology
Premodern India produced some of the world’s greatest myths and stories: tales of gods, goddesses, heroes, princesses, kings and lovers that continue to capture the imaginations of millions of readers and hearers. In this course, we will look closely at some of these stories especially as found in Puranas, great compendia composed in Sanskrit, including the chief stories of the central gods of Hinduism: Vishnu, Siva, and the Goddess. We will also consider the relationship between these texts and the earlier myths of the Vedas and the Indian Epics, the diversity of the narrative and mythic materials within and across different texts, and the re-imagining of these stories in the modern world.
For BA Students: Arts and Letters Sector
Taught by: Patel
One term course offered either term
Also Offered As: RELS 066
Activity: Lecture
1 Course Unit

SAST 007 Introduction to Modern South Asian Literatures
This course will provide a wide-ranging introduction to the literatures of South Asia from roughly 1500 to the present, as well as an exploration of their histories and impact on South Asian society today. How are literary movements and individual works — along with the attitudes towards religion, society, and culture associated with them — still influential in literature, film, and popular culture? How have writers across time and language engaged with questions of caste, gender, and identity? We will read from the rich archive of South Asian writing in translation — from languages that include Raj, Urdu, Bangla, and Tamil — to consider how these literatures depict their own society while continuing to resonate across time and space. Topics of discussion will include the Bhakti poetries of personal devotion, the literature of Dalits — formerly referred to as the Untouchables — and the ways in which literature addresses contemporary political and social problems. Students will leave this course with a sense of the contours of the literatures of South Asia as well as ways of exploring the role of these literatures in the larger world.
No prior knowledge of South Asia is required; this course fulfills the cross-cultural analysis requirement.
Taught by: Goulding
One term course offered either term
Also Offered As: COML 013
Activity: Seminar
1 Course Unit

SAST 008 India: Culture and Society
What makes India INDIA? Religion and Philosophy? Architectural splendor? Kingdoms? Caste? The position of women? This course will introduce students to India by studying a range of social and cultural institutions that have historically assumed to be definitive India. Through primary texts, novels and historical sociological analysis, we will ask how these institutions have been reproduced and transformed, and assess their significance for contemporary Indian society.
For BA Students: Humanities and Social Science S
Taught by: Sreenivasan
One term course offered either term
Also Offered As: HIST 085, RELS 068
Activity: Lecture
0 Course Units

SAST 009 Introduction to Hinduism
This course introduces students to the history, texts, philosophies and rituals of South Asia’s oldest living religious traditions, represented today by the term “Hinduism.” At the same time, it problematizes the idea of a monolithic “Hindu Tradition”, in favor of an approach that recognizes several distinct, dynamic, yet symbiotic Hindu religious cultures. The course also places emphasis on the vitality of today’s Hinduism(s), and the various historical, ritual, cultural, and social contexts that they represent and constitute. The course is organized around six modules:
(1) Issues in the Academic Study of Hinduism; (2) Sanskrit (textual) tradition; (3) Philosophy; (4) Theology; (5) Ritual. and (6) Modernity and Contemporary Politics.
Taught by: Soneji
One term course offered either term
Also Offered As: RELS 163
Activity: Lecture
1 Course Unit

SAST 012 Spices, Gunpowder, and Pagodas: A History of Southeast Asia
This undergraduate course introduces students to the history of Southeast Asia from the earliest centuries of the Common Era to c.1950. It introduces students to Southeast Asia as religion, constituent historical societies of the region, and to the major academic literature and debates pertaining to the historical development of Southeast Asian societies and the region. Key themes explored include the origins and character of early civilizations, ideas and ideology about power and prowess, material culture, the transformation of ethnic, class, and gender relations, the impact of the arrival of world religions and early European expansion, and the nature of indigenous responses to the diffusion of new beliefs and ideas and intercultural contact.
Taught by: Soneji
Course not offered every year
Activity: Lecture
1 Course Unit

SAST 050 Introduction to Indian Philosophy
This course will take the student through the major topics of Indian philosophy by first introducing the fundamental concepts and terms that are necessary for a deeper understanding of themes that pervade the philosophical literature of India — arguments for and against the existence of God, for example, the ontological status of external objects, the means of valid knowledge, standards of proof, the discourse on the aims of life. The readings will emphasize classical Hindu, Buddhist, and Jain philosophical articulations (from 700 B.C.E. to 16th century CE) but we will also supplement our study of these materials with contemporary or relatively recent philosophical writings in modern India.
Taught by: Patel
One term course offered either term
Also Offered As: PHIL 050, RELS 155
Activity: Lecture
1 Course Unit

SAST 054 Gods, Rebels, and Devotion in South Asia
Taught by: Mohammad
Course not offered every year
Activity: Lecture
1 Course Unit
SAST 057 Planning to be Off-shore?
Freshman Seminar. In this course we will trace the economic development of India from 1947 to the present. Independent India started out as a centrally planned economy in 1949 but in 1991 decided to reduce its public sector and allow, indeed encourage, foreign investors to come in. The Planning Commission of India still exists but has lost much of its power. Many in the U.S. complain of American jobs draining off to India, call centers in India taking care of American customer complaints, American patient histories being documented in India, etc. At the same time, the U.S. government encourages highly trained Indians to be in the U.S. Students are expected to write four one page response papers and one final paper. Twenty percent of the final grade will be based on class participation, 20 percent on the four response papers and 60 percent on the final paper.
Taught by: Gangulee
Course usually offered in fall term
Activity: Seminar
1 Course Unit

Sugar and Spices. Tea and Coffee. Opium and Cocaine. Hop aboard the Indian Ocean dhows, Chinese junks, Dutch schooners, and British and American clipper ships that made possible the rise of global capitalism, new colonial relationships, and the intensified forms of cultural change. How have the desires to possess and consume particular commodities shaped cultures and the course of modern history? This class introduces students to the cultural history of the modern world through an interdisciplinary analysis of connections between East and West, South and North. Following the circulation of commodities and the development of modern capitalism, the course examines the impact of global exchange on interactions and relationships between regions, nations, cultures, and peoples and the influences on cultural practices and meanings. The role of slavery and labor migrations, colonial and imperial relations, and struggles for economic and political independence are also considered. From the role of spices in the formation of European joint stock companies circa 1600 to the contemporary cocaine trade, the course’s use of both original primary sources and secondary readings written by historians and anthropologists will enable particular attention to the ways that global trade has impacted social, cultural, and political formations and practices throughout the world.
For BA Students: Humanities and Social Science
Taught by: Mitchell
One-term course offered either term
Also Offered As: ANTH 063
Activity: Lecture
1 Course Unit

SAST 104 Beginning Tabla I
An introduction to the tabla, the premier drum of North Indian and Pakistani classical music traditions.
Taught by: Bhatti
Course usually offered in fall term
Also Offered As: MUSC 060
Activity: Lecture
1 Course Unit

SAST 105 Beginning Tabla II
A continuation of Tabla I, also open to beginning students.
Taught by: Bhatti
Course usually offered in spring term
Also Offered As: MUSC 062
Activity: Lecture
1 Course Unit

SAST 106 Beginning Sitar I
This course is an introduction to the repertoire and performance practices of the North Indian sitar. Fundamentals of sitar technique, composition, and improvisation are presented and practiced in class. Class lectures and discussions, audio and video material, and reading and assignments on selected topics supplement practice, to provide an overview of the social and historical context and the formal structures of North Indian music in general. There are no prerequisites for the course, but some experience with instrumental or vocal music is suggested. Each student is expected to put in two hours of individual practice per week, and complete reading, audio, and written assignments. The class gives a group performance at the end of the semester.
Taught by: Miner
Course usually offered in fall term
Also Offered As: MUSC 061
Activity: Lecture
1 Course Unit

SAST 107 Beginning Sitar II
This is the second semester of a performance course in the North Indian sitar. Students who have not taken the first semester but play any musical instrument are permitted to join. Principles of composition and improvisation will be explored in practice and supplemented by readings and listening. The class gives a group performance at the end of the semester.
Taught by: Miner
Course usually offered in spring term
Also Offered As: MUSC 063
Activity: Lecture
1 Course Unit

SAST 108 Intermediate Sitar I
This is a performance course open to students who have completed both semesters of Beginning Sitar, or to others by permission from the instructor. Students will work with right and left-hand techniques, study three ragas in depth, learn the contours of several other ragas, and work with concepts of tala, composition, and improvisation. Assigned readings and listenings will complement the performed material. A group performance will be given at the end of the semester.
Taught by: Miner
One-term course offered either term
Also Offered As: MUSC 161
Activity: Lecture
1 Course Unit

SAST 109 Intermediate Sitar II
This is a continuation of an intermediate performance course in the North Indian sitar. It is open to students by permission of the instructor. Students who play other instruments and have had at least a beginning level of training in Hindustani music may also join, with the permission of the instructor.
Taught by: Miner
Course usually offered in spring term

SAST 112 Religion and Cinema in India
This seminar examines key themes in the study of religion and Indian cinema. The aim of the seminar is to foreground discussions of performativity, visual culture, representation, and politics in the study of modern South Asian religions. Themes include mythological cinema, gender and sexuality, censorship and the state, and communalism and secularism. The films we will be deploying as case studies will be limited to those produced in Hindi, Telugu and Tamil (the three largest cinema cultures of India). No knowledge of any South Asian language is needed for this course however.

SAST 116 Music Cultures of North India and Pakistan
A great variety of song and instrumental genres have thrived in the Hindu and Muslim milieux of North India and Pakistan. In this course we examine a selection of urban and rural music, such as instrumental music in Baluchistan, qawwals in Delhi, the garba of Gujarat, ballad singing of Rajasthan and the urban music of Calcutta. We will explore the sounds, poetry, historical, and social contexts of chosen genres and trace aspects of continuity and adaptation in the changing environment of contemporary South Asia. Readings are supplemented by audio-visual material and live performances.

SAST 120 Literature of the South Asian City: Space, Culture, Politics
The South Asian city as a way of organizing space and social relations, as a symbol, as memories the subject of this course. Through primarily, though by no means exclusively, readings of literature in translation, we will gain a sense for the history of the city and the ways in which it is a setting for protest and nostalgia, social transformation and solidary f/mt/eurie. We will see reflections of the city in poetry recited in its homes, detective novels sold in its train stations, stories scribbled in its cafes, plays staged in its theaters, and films produced in its backlots. Readings will attempt to address urban spaces across South Asia, and will include works by writers such as Mirza Ghallib, Rabindranath Tagore, Saadat Hasan Manto, and Vijay Tendulkar. We will examine these works in the context of secondary readings, including histories and ethnological works that take up life in the modern city. Students will finish this course prepared to pursue projects dealing with the urban from multiple disciplinary perspectives. This course is suitable for anyone interested in the culture, society, or literature of South Asia, and assumes no background in South Asian languages.
Taught by: Goulding
One term course offered either term
Also Offered As: COML 114, URBS 120
Activity: Lecture
1 Course Unit

SAST 124 Narrative Across Cultures
The purpose of this course is to present a variety of narrative genres and to discuss and illustrate the modes whereby they can be analyzed. We will be looking at shorter types of narrative: short stories, novellas, and fables, and also some extracts from longer works such as autobiographies. While some works will come from the Anglo-American tradition, a larger number will be selected from European and non-Western cultural traditions and from earlier time-periods. The course will thus offer ample opportunity for the exploration of the translation of cultural values in a comparative perspective.

Also Offered As: COML 125, ENGL 103
Activity: Lecture
1 Course Unit

SAST 139 Introduction to Islam
This course is an introduction to Islam as a religion as it exists in societies of the past as well as the present. It explores the many ways in which Muslims have interpreted and put into practice the prophetic message of Muhammad through historical and social analyses of varying theological, philosophical, legal, political, mystical and literary writings, as well as through visual art and music. The aim of the course is to develop a framework for explaining the sources and symbols through which specific experiences and understandings have been signified as Islamic, both by Muslims and by other peoples with whom they have come into contact, with particular emphasis given to issues of gender, religious violence and changes in beliefs and behaviors which have special relevance for contemporary society.

Also Offered As: NELC 136, RELS 143
Activity: Lecture
1 Course Unit
SAST 142 Introduction to Buddhism
This course seeks to introduce students to the diversity of doctrines held and practices performed by Buddhists in Asia. By focusing on how specific beliefs and practices are tied to particular locations and particular times, we will be able to explore in detail the religious institutions, artistic, architectural, and musical traditions, textual production and legal and doctrinal developments of Buddhism over time and within its socio-historical context. Religion is never divorced from its place and its time. Furthermore, by geographically and historically grounding the study of these religions we will be able to examine how their individual ethic, cosmological and soteriological systems effect local history, economics, politics, and material culture. We will concentrate first on the person of the Buddha, his many biographies and how he has been followed and worshipped in a variety of ways from Lhasa, Tibet to Phrae, Thailand. From there we touch on the foundational teachings of the Buddha with an eye to how they have evolved and transformed over time. Finally, we focus on the practice of Buddhist ritual, magic and ethics in monasteries and among nuns in communities in Asia and even in the West. This section will confront the way Buddhists have thought of issues such as “Just-War” Women’s Rights and Abortion. While no one quarter course could provide a detailed presentation of the beliefs and practices of Buddhism, my hope is that we will be able to look closely at certain aspects of these religions by focusing on how they are practiced in places like Nara, Japan or Vietnam, Laos.

SAST 144 Modern Islam and Poetry
This course focuses on a basic question: How and why a modern poem turns into a narrative device to debate contemporary Islamic discourses? We begin exploring this question by taking note of how a 12th-century Persian poet Rumi became - as described by Time magazine - “the best-selling poet in the US today,” and then introduces students to poems and various social, cultural and religious moments that were key in the making of modern Islam. Although the course primarily emphasizes the study of poetry produced and circulated among various Muslim communities world-wide, it also covers a diverse set of secondary readings from the field of religious studies, anthropology and literature to outline more clearly the contours of contemporary Islam. Readings begin with internationally famous Rumi and then include poets emerging from Arabic, Persian, Urdu, and several vernacular literary cultures in both Muslim and non-Muslim countries.

Activity, Seminar
1 Course Unit

SAST 146 Islam in the Modern World
This course key issues facing Muslims in the modern world with an emphasis on gaining an understanding of how Muslims view themselves and the world in which they live. Beginning with a discussion of the impact of colonialism, we will examine Islamic ideas and trends from the late colonial period until the present. Readings include religious, political and literary writings by important Muslim figures and focus on pressing issues in the Islamic world an beyond: the place of religion in modern national politics; the changing status of women; constructions of sexuality (including masculinity); pressing issues in bioethics; Islam, race and immigration in America; the role of violence; and the manifestations of religion in popular culture.

1 Course Unit

SAST 147 Love, Sex & Power
This course explores the ways in which some of the biggest issues in human life are dealt with across religious traditions. Beginning with important questions of sexual identity, politics, religion and the individual in contemporary life, we will examine questions of eroticism, sex and love as they are reflected in religious literature, art and history. The concept of divine love and religious devotion will be explored in relation to acts of violence, including human sacrifice and self-sacrifice in the form of martyrdom seen in pre-modern concepts of saintly martyrdom and religious chivalry as well as the religious legitimacy of modern self-sacrifice of soldiers in war and terrorist suicides. The course focuses in particular on examples drawn from Christianity, Hinduism, Islam and Mesoamerican Religion, although discussions of contemporary issues will be conducted with a broader sweep. Important questions considered in this course include: how does the body function as the locus in which religion is enacted? What is the conflict between our agency over our bodies and socioreligious claims over the individual? Is violence an integral part of religion? What are religious understandings of the relationship between love and sex? How can a human being love gods erotically?

SAST 169 Merchants, Saints, Slaves and Sojourners: the Worlds of the Indian Ocean
Do oceans serve to divide and demarcate distinct cultures and regions? Or do they facilitate exchange, connection and cosmopolitanism? This course will explore the manner in which the Indian Ocean has played both roles throughout history, and how the nature of those divisions and connections has changed over time from the ancient to the modern world. We will reconstruct the intertwined mercantile, religious and kinship networks that spanned the Indian Ocean world, across the Middle East, East Africa, South Asia, Southeast Asia and China, illuminating the histories of Hinduism, Buddhism and Islam, while also considering the role of successive imperial political formations, from Rome to Britain. Throughout the semester we will seek to understand the Indian Ocean through the people who lived and worked in its milieu -from consuls and military commanders, to traders, brokers, sailors, prisoners and slaves. Course materials will draw on a variety of disciplines (anthropology, archaeology, material culture, religious studies) to construct the cultural, economic, and environmental history of the Indian Ocean.

SAST 189 Islam and the West
How did Muslims and modern South Asia interact with the West? What Islamic idioms, orientations and movements emerged in the nineteenth and twentieth centuries? Was South Asia a prominent global center of Islam? What kinds of Islamic educational institutions developed in modern South Asia? How did Muslims appropriate technologies? What materials were printed by Muslims? Were Muslims part of the British army? What was jihad in modernity? How did Muslim 'modernists' and 'traditionalists' respond to the challenges of colonialism and modernity? What was the nature of Sufism in modern South Asia? What was the nature of political Islam in South Asia? How did some Muslims demand a Muslim State? What was the Partition? How has Muslim history been remembered in Bangladesh, India and Pakistan? This is an introductory course, and aims to introduce students to a facet of the long history of Islam, Muslims, and the West.

SAST 200 Introduction to Art in South Asia
This course is a survey of sculpture, painting and architecture in the Indian sub-continent from 2300 B.C., touching on the present. It attempts to explore the role of tradition in the broader history of art in India, but not to see India as 'traditional' or unchanging. The Indian sub-continent is the source for multi-cultural civilizations that have lasted and evolved for several thousand years. Its art is as rich and complex as that of Europe, and as diverse. This course attempts to introduce the full range of artistic production in India in relation to the multiple strands that have made the cultural fabric of the sub-continent so rich and long lasting.

SAST 208 Doing Research: Qualitative Methods and Research Design
This interdisciplinary course introduces students to qualitative research methods and frameworks in the social sciences and humanities. Students will learn how to frame an effective research question, situate it in relation to existing research, select the most appropriate methods for addressing the question, and develop an effective research plan. Each week students will be introduced to a new set of frameworks for analysis, see specific examples of their application drawn from anthropological, historical, and related scholarship and have opportunities to practice applying and evaluating the strengths and weaknesses of specific methodological tools. The goals of the semester will be for each student to develop their own research proposal for a specific project. Students will be introduced to a range of textual, archival and media collections and databases available at Penn, with particular attention to South Asia and other specific regions of interest to course participants. Students will also have the opportunity to identify sources of funding for summer and/or thesis research projects, and submit applications for these opportunities as part of the course. The course is ideal for students considering summer research, an undergraduate thesis, or an application to the Fulbright or other research program. It may be taken by itself as a freestanding course, or may be sequenced with SAST 209, Writing Research, the following fall semester.

SAST 241 Religion and Poetry of South Asia
This course is designed to introduce students to the wide array of devotional and mystical literatures of pre-modern South Asia. We will focus on the texts, practices, and discourses of the religious and literary communities which create these forms of literature, placing them within social and historical contexts. Topics covered include the formation of Sufi silsila in India, Krishna bhakti and the Vais?ava sects, Kabir, Guru Nanak and the Sikhs, Tulsidas's Ramcharitmanas, and other texts in translation.

SAST 247 Gender and Sexuality in Hinduism
Issues related to gender and sexuality occupy a complex, often contradictory place in Hinduism. Sexual desire, sexual activity, and the body are simultaneously celebrated, manipulated, controlled, and restricted. This fundamental ambiguity is at the core of this course, which concerns itself with religious perspectives on the body, gender and sexual activity in Hinduism. Topics include: dharma, morality, and sexual practice; menstruation; pregnancy and childbirth; Bhakti and Tantra; same-sex relations; masculinities; hijras and the notion of the "third sex"; eroticism in the literary, visual, and performing arts; colonialism; and somatic nationalism.

SAST 249 Re-enchanting Modernity: A Guide to Sufism in South Asia
This undergraduate level course introduces students to Sufism in modern South Asia, with a particular focus on how Muslim 'mystics' and their 'mystical' methods interacted with modernity, colonialism, technological developments and globalization. This course is divided into three parts. In the first part of this course, students are provided with an overview of the theological and historical background of the dominant expression of Islam that came to be identified as 'Sufism' or 'Islamic mysticism', the historical development of Sufi institutions and spaces in South Asia, and the historical emergence of South Asia as a prominent global center of Sufism. The second and main part of this course introduces students to a range of anthropological and historical works that are revelatory about how Sufi in modern South Asia were and remain intimately connected to modern political and technological developments. Providing students with an overview of Sufi re-enchancements of modernity from the 19th to 21st century, this section of the course focuses upon Sufi movements and masters who perpetuated or defended customary Islam through sophisticated appropriations of technologies and print networks, and negotiations with non-Muslim rulers and societies. Moreover, students will be introduced to anthropological and historical scholarship on religious worlds in modern South Asia that were and remain steeped in 'customary Islam' and Sufi performances and interpretations of Islam. These sources reveal how 'mystical' methods of performing Islam through ecstasy and spiritual restoration, and interpretations of dreams and visions, have regularly interacted with contemporaneous technologies. The third part of this course introduces students to the globalization of South Asian Sufism in North America, Europe and Southeast Asia. Herein, students will be encouraged to engage with anthropological and literary works pertaining to itinerant South Asian Sufi masters and their devotional cults, and introduced to active South Asian Sufi centers in Philadelphia.

Also Offered As: RELS 249
Activity: Seminar
1 Course Unit

SAST 250 History of Hinduism
This course will explore the history of the religion(s) designated by the term 'Hinduism' from their earliest articulations down to the rise of modern reforms in the nineteenth century. The study of Hinduism is perhaps unique among the scholarly traditions on world religions in that it has no date had no serious connected account of its historical development, as scholars have preferred to take structural, sociological, phenomenological, and doctrinal approaches to the religion. The course, after a brief review of scholarly approaches to Hinduism and their interpretative legacies, will seek to develop a historical sense of the religion through attention to shifts in liturgy, ritual, theology, doctrine, sacral kingship, and soteriology. The course will include the reading of primary sources relevant to understanding these changes as well as highlight both modern and premodern traditions of their interpretation. It will also consider and assess some of the key interpretive ideas in the study of Hinduism, including, Sanskritization, Great and Little Traditions, cult formation, regional and popular religious movements, and canon formation. There will also be sustained consideration of the question of religion and socio-political power as well as relations between Hinduism and other religions like Buddhism and Islam.

SAST 251 Muslim Sainthood Practices
This course aims at introducing various classical, popular and modern Muslim saints in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will learn about the major concepts initiated and circulated by these saints and their distinctive ways of dealing with spiritual aspects. While focusing on the sainthood practices, we also study the nature of the dialogue which addresses the questions such as pluralism, localism, and a new paradigm of spirituality that continually interacts with diverse modes of everyday life in South Asia. In order to understand their impact on visual and media cultures, we also watch two documentaries and compare these visual sources with sainthood literature and practices.

Activity: Seminar
1 Course Unit

SAST 252 Music, Religion, Ritual in South and Southeast Asia
What role does music play in articulating religious identities and spaces? What is the importance of ritual musics as they persist and change in the modern world? How does music reflect and articulate religious ways of thinking and acting? In this course, we explore these and other questions about the interrelations between music, religion, and ritual in South and Southeast Asia. Focusing on India, Sri Lanka, Malaysia, and Indonesia, the course emphasizes musics from Hindu, Buddhist, Muslim and Christian traditions; nevertheless, it draws widely to touch upon sacred musics in Pakistan, Nepal, Burma, Thailand, Vietnam, and among some indigenous peoples in the region. Throughout, we explore ontologies of sound; sonic occurrences in religious structures, public processions, and pilgrimage sites; the construction of religion and ritual as ideas forged through colonial encounter and modern scholarship on religion; the politics of sacred sounds in today’s public spaces and contemporary media, such as television and online; and the surprising fluidity between popular and sacred musical genres.
Taught by: Sykes
Also Offered As: ANTH 242, MUSC 252
Activity: Lecture
1 Course Unit

SAST 262 The Making of Medieval India
This course will provide an in-depth understanding of South Asia in what is often called its ‘medieval’ period—from the rise of the great temple kingdoms until the end of the Delhi Sultanate in the sixteenth century (c. 500 CE - c. 1500 CE). This millennium is arguably one of the most transformative in South Asia’s history, a period when many of its most distinctive social and cultural features evolved. The course will provide both an overview of the period as well as an introduction to major interpretations and types of sources (textual, visual, and archaeological). The focus throughout the course will be on the heterogeneous development of states, societies and cultures with special attention to long-term processes of transformation. One set of themes explored will be largely social and economic, focusing on the development of agrarian and peasant societies, aristocracies and intellectuals, as well as the role of mercantile, pastoralist, nomadic and forest-living groups. Another set of themes will explore cultural transformation, including the development, transformation and interaction of religious practices, the emergence of cosmopolitan and regional literary cultures, and the rise of distinctive urban, courtly, and rural world views. Special themes of discussion may include violence and manners, material cultures, religious conflict, devotional religion and gender relations.

Activity: Lecture
1 Course Unit

SAST 269 Migration and the Middle East
This reading and discussion-intensive seminar examines the phenomenon of migration into, out of, within, and across the Middle East and North Africa. We will focus on the period from the late nineteenth century to the present, and will emphasize the cultural (rather than economic) consequences of migration. Along the way we will trace connections between the Middle East and other regions—notably the Americas, sub-Saharan Africa, South Asia, the Caucasus, and Western Europe. Readings are interdisciplinary and include works of history, anthropology, sociology, medical research, literature, political science, geography, and human rights advocacy. As students develop final projects on topics of their choice, we will spend time throughout the semester discussing tactics for research and writing.

Activity: Seminar
1 Course Unit
Notes: This is a topics course and will vary from year to year.
SAST 290 South Asians in the United States
This course investigates the everyday practices and customs of South Asians in America. Every immigrant group has its own history, customs, beliefs and values, making each unique while simultaneously a part of the "melting pot" or salad bowl of American society. Yet how do people define themselves and their ethnicities living in a diasporic context? By taking into account the burgeoning South Asian American population as our model, this course will explore the history surrounding the lives that immigrants are living in America, and more specifically the identity which the second generation, born and/or raised in America, is developing. South Asians in the U.S. will be divided thematically covering the topics of ethnicity, marriage, gender, religion, and popular culture. Reading and assignments will discuss a variety of issues and viewpoints that are a part of the fabric of South Asia, but will focus on the interpretation of such expressive culture in the United States.

Activity: Lecture
1 Course Unit

SAST 293 Caste & Class in South Asia
This course will explore the reality of caste and class in South Asian society, and the theories, classical and modern, that attempt to explain it. We shall survey a wide sweep of sources, from the traditional to the modern, from Sanskrit to modern vernaculars, to examine the caste system.
Our goal is to gain a nuanced and many-sided insight into a deeply pervasive phenomenon that has shaped South Asian society and culture, and religion in general (Muslim, Sikh, and Christian castes) from ancient times to the present day.
Taught by: Sreenivasan
Course not offered ever year
Also Offered As: SAST 593
Activity: Seminar
1 Course Unit

SAST 297 Nature Culture Environmentalism: Urban Water
In Spring 2018, this course is specially designed to appeal to students with interests in urban studies and environmental studies across different disciplines. We will explore the cultures, environments and environmental practices of cities by exploring the matter of urban water. Cities have long been made up of communities that are often divided by social, economic, political, and cultural factors. As the catastrophic human disasters in Houston, Florida and Puerto Rico have recently shown, these relations are today everywhere being unsettled and exacerbated by climate change. In cities as diverse as Philadelphia and Mumbai, climate change promises to exacerbate social inequalities and further squeeze non-human nature.
How is the urban environment produced, magnified, divided and shrunk with water? In these times, how might we make space for social justice and non-human natures in and along rising urban waters?
Taught by: Anand, N
Also Offered As: ANTH 297
Activity: Seminar
1 Course Unit

SAST 300 Directed Study
This course is required for all senior honors majors, and open to senior majors. Honors majors must, in addition, prepare a research paper. One-term course offered either term

SAST 340 Religious Bodies and Sex in South Asia
This graduate-level course introduces students to the writings of key religious scholars in modern South Asia who associated the regeneration of Hinduism, Islam, and Sikhism with the cultivation of bodies and sexual practices. Particular attention will be paid towards religious texts produced in modern India, Pakistan, and Bangladesh pertaining to sexual bodies, exercises and health; celibacy; body-building; the transmission of sexual knowledge; and the political roles of the 'Hindu', 'Muslim' and 'Sikh' body. This course, students will be encouraged to engage a range of sources including religious manuals, autobiographies, novels, speeches, pamphlets, official records, recipes and films. Moreover, students will be introduced to the academic literature on South Asian religious scholars and 'sex gurus' in South and Southeast Asia; religious sexuality in South Asia, Southeast Asia, the Middle East and Europe; and, the transcultural literary networks that led to the production of religiously sexual texts in modern South Asia.

SAST 400 Beginning Hindi-Urdu Online (Startalk)
This introductory, proficiency-based course covers the core content of first-year Hindi-Urdu. It is designed for students with little or no prior exposure to Hindi or Urdu. The course covers all four language skills (speaking, listening, reading, and writing), but there is a special focus on developing speaking and listening skills. Students will also develop literacy skills in one script of their choice (Hindi or Urdu script). All written materials will be provided in both scripts. All classes are interactive and students acquire the language by using it in realistic contexts. Culture is introduced through various authentic materials including Bollywood songs. This program has a special application process. Please visit our website (https://www.southasiacenter.upenn.edu/startalk) for more information on the program and how to apply.
Taught by: Pien, J.
Course usually offered summer term only
Activity: Lecture
1 Course Unit
Notes: This is a summer online course known also as Startalk.

SAST 405 Beginning Pashtu I
The first semester is focused on mastering the writing system, basic structures, and simple conversation using texts, writing samples, and numerous structure and dialogue drills. We remain within the present and future tenses only, developing vocabulary with lessons and discussions centered around greetings, family, weather, foods, and directions. Students use authentic online and textbook materials.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: PERS 111, PERS 511
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 406 Beginning Pashtu Part II
The second semester covers more advanced structures with reinforcing drills, and begin reading longer texts of an assorted variety, mostly short stories and some news articles. The past tense is introduced, as well as longer more complex texts. Topics within simple simulated contexts (taxi, hotel, restaurant, food shopping, time, family). Short writing exercises and dictations are expected at this time, as well as simultaneous translations to and from Pashto.
For BA Students: Language Course
Course usually offered in spring term
Prerequisites: Beginning Pashtu Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center.

SAST 407 Beginning Kannada Part I
This is a systematic introduction to the Kannada language and culture for beginners. The course aims at developing listening and comprehension and a real life interactive speaking ability in a variety of everyday topics. The Kannada script is introduced from the beginning and the language is presented in its socio-cultural context for achieving a meaningful and operational control of the language. Students acquire basic rules for structural and socio-cultural appropriateness. Students learn vocabulary related to a variety of topics during the semester. Class activities include watching videos, role-playing, language games and group work. Evaluation is based on class participation, performance in quizzes and tests and completed assignments.
For BA Students: Language Course
Taught by: Swaminathan
Course usually offered in full term
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 408 Beginning Kannada Part II
This is a systematic introduction to the Kannada language and culture for beginners. The course aims at developing listening and comprehension and a real life interactive speaking ability in a variety of everyday topics. The Kannada script is introduced from the beginning and the language is presented in its socio-cultural context for achieving a meaningful and operational control of the language. Students acquire basic rules for structural and socio-cultural appropriateness. Students learn vocabulary related to a variety of topics during the semester. Class activities include watching videos, role-playing, language games and group work. Evaluation is based on class participation, performance in quizzes and tests and completed assignments.
For BA Students: Language Course
Taught by: Swaminathan
Two terms. student must enter first term.
Prerequisites: Beginning Kannada Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center.

SAST 410 Beginning Marathi Part I
The first year course in Marathi begins with learning the Devagari script which is common for other important languages like Hindi and Nepali. With proper emphasis on grammar, vocabulary, and phonetics, the syllabus will see the student becoming able to speak conversational Marathi, read Marathi data from the Internet, and compose simple short essays on selected topics.
For BA Students: Language Course
Taught by: Panade
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center
SAST 411 Beginning Marathi Part II
Simple sentences in the present tense, narration (spoken as well written) of day to day activities, expressing likes & dislikes, culturally appropriate greetings and addressing, ability to describe events happening in present and present incomplete tense, consolidation of reading and writing skill acquired in the previous semester as well as proper pronunciations of common usage words and phrases. Speaking practices based upon the My Marathi Text book created by University of Mumbai.
For BA Students: Language Course
Taught by: Ranade
Course usually offered in spring term
Prerequisite: Beginning Marathi Part I or equivalent ascertained through placement test or permission of instructor
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 412 Intermediate Marathi Part I
Intermediate Marathi builds up upon the Beginning Level of Marathi. Gaining ability to speak about past and future is the most important skill in the intermediate course. Students learn the grammar, vocabulary, sentence structures to narrate and write in simple language about their experiences, short anecdotes, their observations and opinions and future plans.
For BA Students: Language Course
Taught by: Ranade
Course usually offered in fall term
Prerequisite: Beginning Marathi Part II or equivalent ascertained through placement test or permission of instructor
Activity: Seminar
1 Course Unit

SAST 413 Intermediate Marathi Part II
In the syllabus for the fourth semester Marathi course gaining language inputs regarding Marathi culture and day to day life in Maharashtra becomes one important topic. Day to day communication skills necessary to survive in Maharashtra on the street like interaction with a grocery store clerk or a vegetable sales woman in the market, a rikshaw driver, a policeman, a commoner, asking and providing directions on the street and various day to day real life situations are improvised and practiced. Vocabulary, sentence structures and associated grammar is acquired during practice and real life situations based exercises.
For BA Students: Last Language Course
Taught by: Renade
Course usually offered in spring term
Prerequisites: Intermediate Marathi Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

SAST 421 Intermediate Urdu
In Intermediate Urdu, the curriculum focuses on the development of reading, listening and speaking skills. Although there are short assignments for writing in Urdu, the emphasis on developing writing as a skill is not part of the course objectives. Authentic texts in the three skills include conversations, short stories, current events, articles, films and plays. There is a continuous emphasis on vocabulary development and students are expected to add about five hundred new words to their active vocabulary per semester. The rules of grammar for structural accuracy and social-cultural propriety are parts of the regular curriculum. Class activities include students’ short presentations, role-plays, singing and conversations. There are weekly assignments and quizzes, a mid-term and a final examination. The final evaluation will rest on class participation, performance in quizzes and tests, and completed assignments. This is a two-semester course.
Taught by: Menai
Two terms, student must enter first term.
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 425 Intermediate Pashto Part I
A more in-depth study of the Pashto language. Reading, writing, speaking, and listening comprehension are all stressed in this more advanced course which also builds on the grammar of beginning level.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: PERS 113
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center

SAST 426 Intermediate Pashto Part II
The second semester of intermediate study and a more in-depth study of the Pashto language. Reading, writing, speaking, and listening comprehension are all stressed in this more advanced course which also continues to build on grammar skills.
Two terms, student must enter first term.
Also Offered As: PERS 114, PERS 514
Prerequisites: Intermediate Pashto Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center

SAST 427 Intermediate Kannada Part I
This course continues the study of the Kannada language and culture from where the beginners II course ended. The course continues developing listening and comprehension and a real life interactive speaking ability in a variety of everyday topics. The Kannada script is learned in its socio-cultural context for achieving a meaningful and operational control of the language. Students acquire rules for structural and socio-cultural appropriateness. Students learn vocabulary related to a variety of topics during the semester. Class activities include watching videos, role-playing, language games and group work. Evaluation is based on class participation, performance in quizzes and tests and completed assignments.
For BA Students: Language Course
Taught by: Sundaram
Course usually offered in fall term
Activity: Lecture
1 Course Unit
Notes: Offered through Penn Language Center
SAST 428 Intermediate Kannada Part II
Students continue their study of Intermediate Kannada I, both in language and culture. The course aims at honing listening and comprehension and a real life interactive speaking ability in a variety of everyday topics. The Kannada script is learned in its socio-cultural context for achieving a meaningful and operational control of the language. Students acquire basic rules for structural and socio-cultural appropriateness. Students learn vocabulary related to a variety of topics during the semester. Class activities include watching videos, role-playing, language games and group work. Evaluation is based on class participation, performance in quizzes and tests and completed assignments.
For BA Students: Last Language Course
Taught by: Sundaram
Course usually offered in spring term
Prerequisites: Intermediate Kannada Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Offered through Penn Language Center.

SAST 447 Advanced Kannada: Selected Topics
Directed topics vary by semester in advanced level Kannada.
Taught by: Rajagopalan
One term course offered either term
Activity: Lecture
1 Course Unit

SAST 449 Advanced Marathi
Theater and Films, Literature and poetry, Folk Songs, Dance and Music; this one semester course will explore the rich Marathi culture as well as will work on increasing the spoken, listening, reading and written proficiency of the students. News stories from the Marathi print media as well as glimpses from Marathi Television, News as well as Serials and popular comedy shows become the authentic materials in this course. Students learn the linguistic as well as cultural aspect of the variety of material through discussions, presentations in which students acquire and use the language to describe, narrate, express their opinions, evaluate, critique and appreciate these aspects of Marathi urban and rural culture.
Taught by: Ranade
Course not offered every year
Activity: Lecture

SAST 500 Introduction to Art in South Asia
This course is a survey of sculpture, painting and architecture in the Indian sub-continent from 2500 B.C. touching on the present. It attempts to explore the role of tradition in the broader history of art in India, but not to see India as 'traditional' or unchanging. The Indian sub-continent is the source for multi-cultural civilizations that have lasted and evolved for several thousand years. Its art is as rich and complex as that of Europe, as diverse. This course attempts to introduce the full range of artistic production in India in relation to the multiple strands that have made the cultural fabric of the sub-continent so rich and long lasting.
Course not offered every year
Also Offered As: ARTH 104, SAST 200
Activity: Lecture
1 Course Unit

SAST 503 Historical Transitions In Early India
This course will focus on major historical transitions in the South Asian subcontinent until approximately AD 1200. It will focus on particularly political, social and liturgical philosophical change. It will also introduce students to the major narratives and interpretations of the ancient and early medieval periods as they bear on these questions and will also familiarize students with the sources upon which this history has been based. It will review debates, critical perspectives and recent trends in this historiography with a view toward developing a sensitivity to the theoretical problems that attend the study of pre-modern India. Its persistent themes will be historical continuity and disjuncture in the history of religious practices and ideas, the emergence of political forms and the nature of the 'state' in precolonial India, transformations of society and economy, and the relationship between discursive production and relations of power. It will be of interest to students of history, literature, religion and archaeology.

SAST 505 Topics in Indian Art
Aspects of sculpture, painting, iconography, or architecture in the Indian sub-continent. Topic varies. Fall 2016: Important as texts have been to South Asia's history, perceptions of the physical world dominate experience within South Asian cultures. Seeing and being seen, vocalizing and hearing, contribute to the construction of meaning. This pre-seminar will approach South Asia's perceptual world as expressed and tested by art, and methods to frame art as a source of knowledge.

SAST 508 Doing Research: Qualitative Methods and Research Design
This interdisciplinary course introduces students to qualitative research methods and frameworks in the social sciences and humanities. Students will learn how to frame an effective research question, situate it in relation to existing research, select the most appropriate methods for addressing the question, and develop an effective research plan. Each week students will be introduced to a new set of frameworks for analysis, see specific examples of their application drawn from anthropological, historical, and related scholarship and have opportunities to practice applying and evaluating the strengths and weaknesses of specific methodological tools. The goals of the semester will be for each student to develop their own research proposal for a specific project. Students will be introduced to a range of textual, archival and media collections and databases available at Penn, with particular attention to South Asia and other specific regions of interest to course participants. Students will also have the opportunity to identify sources of funding for summer and/or thesis research projects, and submit applications for these opportunities as part of the course. The course is ideal for students considering summer research, an undergraduate thesis, or an application to the Fulbright or other research program.

SAST 541 Religion and the Visual Image: Seeing is Believing
Seeing is Believing engages in a historical, theoretical, and cross-cultural analysis of the place of visuality in religion and of religion in visual culture. We will examine images, buildings, places, objects, performances and events. The geographical, cultural and historical scope of the material is broad, including subjects from Europe, the Islamic World, non-Muslim South Asia, the US and Latin America from the medieval period until the present. Theoretical works will be read in conjunction with representative examples to invite intellectual engagement in a socially and historically grounded way. Important issues to be covered include the relationship of visual to material culture; visual theories versus theories of vision; locating religion in human sensory experience; perception at individual and collective levels; authenticics, fakes and simulacra; iconoclasm and image veneration; aesthetics, use and utility; and things.

SAST 550 History of Hinduism
This course will explore the history of the religion(s) designated by the term 'Hinduism' from their earliest articulations down to the rise of modern reforms in the nineteenth century. The study of Hinduism is perhaps unique among the scholarly traditions on world religions in that it has to date had no serious connected account of its historical development, as scholars have preferred to take structural, sociological, phenomenological, and doctrinal approaches to the religion. The course, after a brief review of scholarly approaches to Hinduism and their interpretive legacies, will seek to develop a historical sense of the religion through attention to shifts in liturgy, ritual, theology, doctrine, sacrificial kingship, and soteriology. The course will include the reading of primary sources relevant to understanding these changes a well as highlight both modern and premodern traditions of their interpretation. It will also consider and assess some of the key interpretive ideas in the study of Hinduism, including Sanskritization, Great and Little Traditions, cult formation, regional and popular religious movements, and canon formation. There will also be a sustained consideration of the question of religion and socio-political power as well as relations between Hinduism and other religions like Buddhism and Islam.

SAST 551 Muslim Sainthood Practices
This course aims at introducing various classical, popular and modern Muslim saints in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will read the life stories of these saints and focus on their contribution to various religions in South Asia. We will learn about the major concepts initiated and circulated by these saints and their distinctive ways of dealing with spiritual aspects. While focusing on this sainthood practices, we also study the nature of the dialogue which addresses the questions such as pluralism, localism, and a new paradigm of spirituality that continually interacts with diverse modes of everyday life in South Asia. In order to understand their impact on visual and media cultures, we also watch two documentaries and compare these visual sources with sainthood literature and practices.

Activity: Seminar
1 Course Unit
SAST 560 Modern History of Pakistan
This course is designed as an introduction to the contemporary history of Afghanistan and Pakistan, with an emphasis on the intertwined history of both countries; their other regional neighbors; and global politics. The course focuses on global trends such as empire, nationalism, the Cold War, superpower competition, and transnational Islamism. At the same time, participants will explore how local people viewed their lives amidst these trends, and how local dynamics on this northwestern fringe of the Subcontinent changed the face of global politics. The readings supplement political and economic history with primary sources drawn from popular poetry, oral narrative, and memoir. Finally, we'll be following current events in the region, and placing them in their sociohistorical contexts. Therefore, there are two main goals for this course: (1) to introduce the specific history of Afghanistan and Pakistan up to present, and (2) to introduce typologies of social institutions and events, assisting class participants to develop their own frameworks for interpreting current events in the region after the end of the course.
Course not offered every year
Also Offered As: SAST 260
Activity: Seminar
1 Course Unit

SAST 562 The Making of Medieval India
This course will provide an in-depth understanding of South Asia in what is often called its 'medieval' period—from the rise of the great temple kingdoms until the end of the Delhi Sultanate in the sixteenth century (c. 500 CE - c. 1500 CE). This millennium is arguably one of the most transformative in South Asia’s history, a period when many of its most distinctive social and cultural features evolved. The course will provide both an overview of the period as well as an introduction to major interpretations and types of sources (textual, visual, and archaeological). The focus throughout the course will be on the heterogeneous development of states, societies and cultures with special attention to long-term processes of transformation. One set of themes explored will be largely social and economic, focusing on the development of agrarian and peasant societies, aristocracies and intellectuals, as well as the role of mercantile, pastoralist, nomadic and forest-living groups. Another set of themes will explore cultural transformation, including the development, transformation and interaction of religious practices, the emergence of cosmopolitan and regional literary cultures, and the rise of distinctive urban, courtly, and rural worldviews. Special themes of discussion may include violence and manners, material cultures, religious conflict, devotional religion and gender relations.

SAST 589 Islam and the West
This course introduces students to Islam in modern South Asia, with a particular focus on the development of 'new' Muslim religious idioms, orientations, pedagogies and movements in 19th and 20th century South Asia. This course is divided into three parts. In the first part of this course, students are provided with an overview of: Muslim institutions and spaces in pre-colonial South Asia, the historical emergence of South Asia as a prominent global center of Islam, and the development of Urdu as an Islamic idiom. The second and main part of this course introduces students to academic literature concerning sophisticated encounters between the Muslim elite in north India and modern political and technological developments. The intimate interactions of the 'Mullah' and the 'Englishman' from the 19th to 20th century will thus be revealed to students. This part focuses upon, on the one hand, the role of Islam and pious Muslims in the colonial army, and on the other hand, Muslim initiatives to educate an Islamic 'modernism', 'traditionalism', 'fundamentalism' and 'Sufism', and appropriate print technologies for the creation of public spheres. Students will be introduced to historical scholarship revelatory of how these Muslim pedagogies and print initiatives were based upon sophisticated transcultural networks and exchange. In the third part of this course, students will be encouraged to engage with contemporary literature on South Asian Muslim political philosophy and nationalism, and the cultural exchanges that produced key Muslim political ideologies.

Also Offered As: ANTH 189, SAST 189
Activity: Seminar
1 Course Unit

SAST 593 Caste & Class in South Asia
This course will explore the historiography and theory of caste and class in South Asia. While we will survey the evidence from the pre-modern period briefly, the primary focus of the course will be on the period between the eighteenth and twentieth centuries. We will examine the degree to which colonial rule triggered particular kinds of class-oriented and caste-oriented 'reform', and the extent to which South Asian actors themselves shaped the nature of such change. The course will also provide an introduction to the work of the Subaltern school historians who have engaged with such questions, and situate them within the wider field of South Asian historiography.

SAST 604 Neoliberalism and the City
Over fifty percent of the world’s population now lives in cities.
Neoliberalism—the ideology and accompanying policies and practices that champion the shifting of political decision making from the public sector to the private sector—has been widely recognized as having played a dramatic growth worldwide since the 1970s. It has also been widely regarded as a product of globalization. This course traces the history of neo-liberalism in global context with particular attention to neoliberalism’s relationship to cities, and exam the role that urban growth has played in spurring neoliberal policies and practices. It asks how policy makers, voters, and private interest worldwide have responded to the growth of urban poverty and slums, challenges within urban public education, unequal resource distribution, environmental pressures experienced within urban sanitation and waste disposal systems, and increased demands for municipal services like water, electricity, and transport infrastructures, and examined the rise of public-private partnerships, gated communities, initiatives to privatized education and municipal services, and efforts to relocate slum-dwellers and beautify cities as explicit strategies for attracting “global capital.” The course also asks how the recent rise of neoliberal policies and practices differs from earlier market-driven and private sector-led forms of political governance.
The British and Dutch East India Companies are two famous examples of joint stock companies that assumed administrative and political roles over their colonies. How did the rise of these colonial relationships differ from current neoliberal shifts? Readings will draw heavily from ethnographic and urban studies, scholarship on South Asia, as well as Latin America, South Africa, the Middle East, Europe, and North America, exploring what each of these specific contexts has to teach us more generally about the relationship between urbanization, global capitalism, public and private sectors, and political processes and decision making.

SAST 617 Readings in Modern Indian History
This course will introduce students to the major themes and debates of modern Indian historiography. Though the course will not provide a survey outline of events, it will be organized around themes that have a broad chronological sequence. It will touch on key topical themes like the transition to colonialism, the development of the colonial economy, the evolution and significance of colonial knowledge systems, the impact and shape of religious and social reform, the rise of nationalism and communalism, and peasant, labour and subaltern history. The goal of the course will be to provide students with an understanding of the significance of debates around key themes in modern Indian history and a familiarity with the different ‘schools’ or ‘traditions’ of historical interpretation, including Nationalist, Marxist, the so-called ‘Chicago’, and ‘Cambridge’ schools, as well as the Subaltern collective and post-Subaltern historiography.

SAST 620 Godliness, Miracles, and ‘Madness’ in Indian Ocean Port Cities
This graduate-level course introduces students to religious worlds within port cities of the modern Indian Ocean that were centered upon peripatetic Muslim, Saiva, Christian and Sikh miracle-workers, missionaries, and ‘gods’. This course will particularly consider how extant, published sources reveal how religion in 19th and 20th century cosmopolitan port cities and islands was centered upon holy men and women or spiritual beings, and intricately connected to modern economic, political and technological developments in the Indian Ocean.
This course is divided into three parts. In the first part of this course, students will be introduced, on the one hand, to the scholarship on the port cities or islands of, and religions or religious networks in, the modern Indian Ocean. On the other hand, to anthropological, historical and literary works on Muslim saints, Christian missionaries and Saiva gods in the Indian Ocean. In the second and main section of this course, students will be introduced to contemporary academic literature pertaining to the inter-linkages between itinerant miracle-workers, missionaries, ‘gods’ and devotional cults, and economic, political and technological developments in the Indian Ocean. As well as works that explore European institutions, barracks, plantations, cells and asylums, and steam travel being steeped in customary religion, carnivals, ecstasy, madness and miracle stories. Here, students will be encouraged to consider ways in which a study of religion and religious economies of modern Indian Ocean port cities can be recovered through extracts from a range of anthropological, literary and historical sources. In the third part of this course, students will be encouraged to engage with the question of whether the religion of devotional cults preoccupied with the powers of Muslim, Saiva, Christian, and Sikh miracle-workers, missionaries and ‘gods’ in cosmopolitan port cities, was a distinct product of circulations within the Indian Ocean.

SAST 623 Literary History and Aesthetics in South Asia
This seminar surveys the multiple components of literary culture in South Asia. Students will engage critically with selected studies of literary history and aesthetics from the past two millennia. In order to introduce students to specific literary cultures (classical, regional, contemporary) and to the scholarly practices that situate literature in broader contexts of culture and society, the course will focus both on the literary theories - especially from the nineteenth and twentieth centuries - that position South Asia’s literary cultures within broader disciplinary frameworks that use literary documents to inform social, historical and cultural research projects. The aim is to open up contexts whereby students can develop their own research projects using literary sources.

SAST 625 PHILOLOGY AND HISTORY: READING SOUTH ASIAN TEXTS
Taught by: Patel, D
Activity: Seminar
1 Course Unit

SAST 627 South Asia Literature as Comparative Literature
This course takes up the question of reading South Asian Literature both as a collection of diverse literary cultures, as well as the basis for a methodology of reading that takes language, region, and history into account. It takes as a starting point recent work that foregrounds the importance of South Asian language literatures, and their complex interations, to an understanding of South Asian literary history, as well as critiques of the concept of world literature that question its underlying assumptions and frequent reliance on cosmopolitan languages such as English. In what ways can we describe the many complex interactions between literary cultures in South Asia, rooted in specific historical contexts, reading practices, and cultural expectations, while maintaining attention to language and literary form? How, in turn, can we begin to think of these literatures in interaction with larger conversations in the world? With these considerations in mind, we will examine works of criticism dealing with both modern and pre-modern literatures, primarily but not exclusively focused on South Asia. Topics will include the concept of the cosmopolis in literary and cultural history, the role of translation, the transformations of literature under colonialism, and twentieth century literary movements such as realism and Dalit literature.
Readings may include works by Erich Auerbach, Frederic Jameson, Aijaz Ahmad, Gayatri Spivak, Aamir Mufti, Sheldon Pollack, David Shulman, Yigal Bronner, Shamshur Rahman Faruqi, Francesca Orosini, Subramanian Shankar, Sharan Kumar Kimble, and Torlaijatin Gajarawala. We will also examine selected works, in English and in translation, as case studies for discussion. This course is intended both for students who intend to specialize in the study of South Asia, as well as for those who focus on questions of comparative literature more broadly.

SAST 632 Hinduism and Colonial Modernity
This seminar deals with the question of modernity in South Asia, with a specific focus on the construction, dissemination, and politicization of Hinduism in nineteenth and twentieth century India. It focuses on three central heuristic lenses—namely those of European imperialism, Orientalism, and nationalism—to study modernity and its discontents. What was at stake in the encounter between colonial modernity and India's religions in nineteenth and early twentieth centuries? How did colonial and native discourses on "reform" and "revival" shape Indian religions as we understand them today? How is modern "Hinduism" inextricably hinged to early forms of cultural transnationalism, Orientalism, and incipient forms of nationalism? This seminar approaches questions such as these and others, with an eye to understanding how nineteenth and early twentieth century discourses continue to shape contemporary understandings of Hinduism in deep and highly politicized ways.

SAST 633 THE PERSIAN INTELLECTUAL TRADITION
What makes Persian culture distinctive within broader Islamic intellectual history, and what constitutes the historical and geographical boundary of the Persisanate intellectual and cultural zone? These questions lie at the center of inquiry in this seminar in which participants will read and discuss a broad range of works from the 11th to the 20th centuries. Readings will include works on philosophy and language, Sufi epic poems, religious and cultural geographies, accounts of natural and manufactured wonders, urban and political histories, as well as other kinds of texts. All readings will be in English for the regular meeting of the seminar; students with a reading knowledge of Persian and an interest in participating in an additional meeting to read the assignments in their original language should register for the higher of the two numbers listed for this course.

SAST 640 Religious Bodies and Sex in South Asia
This graduate-level course introduces students to the writings of key religious scholars in modern South Asia who associated the regeneration of Hinduism, Islam, and Sikhism with the cultivation of bodies and sexual practices. Particular attention will be paid towards religious texts produced in modern India, Pakistan and Bangladesh pertaining to sexual bodies, exercises and health; celibacy; body-building; the transmission of sexual knowledge; and the political roles of the 'Hindu', 'Muslim' and 'Sikh' body. In this course, students will be encouraged to engage a range of sources including religious manuals, autobiographies, novels, speeches, pamphlets, official records, recipes and films. Moreover, students will be introduced to the academic literature on South Asian religious scholars and "sex gurus" in South and Southeast Asia; religious sexuality in South Asia, Southeast Asia, the Middle East and Europe; and, the transcultural literary networks that led to the production of religious-sexual texts in modern South Asia.

SAST 713 Literature in Translation: South Asia and the World
This course primarily introduces how to critically read literature in light of major global developments in contemporary literary theory and aesthetics from the past century (including structuralism, semiotics, reception theory, deconstruction, Marxist approaches to literature, feminist readings of texts, translation theory, etc.). It also draws attention to scholastic practices of textual criticism, paleography, and the preparation of critical editions. In doing so, the course emphasizes specific texts and essays related to South Asian literature, literary theory, and aesthetics from the past two millennia as case studies in order to: a) supplement students’ knowledge of South Asian cultural production, b) frame social and historical questions related to art and aesthetics in contexts that have been otherwise under-explored, and c) to inspire debate about the extent to which analytical models and approaches developed within a given cultural setting are translatable to literary materials produced elsewhere. Students will develop their own projects, workshop what they have already begun, or explore new directions for studying literature and literary culture. Comparative approaches with other literary traditions are welcome and no background in South Asian languages or history is required.

SAST 762 Women in South Asia
This course on women in South Asian history has several objectives. To comprehend the genres of narratives in which South Asian women between the sixteenth and twentieth centuries have spoken and have been spoken about. To gain an understanding of evolving institutions and practices shaping women's lives, such as the family, law and religious traditions. To understand the impact of historical processes -- the formation and breakdown of empire, colonialism, nationalism and decolonization -- upon South Asian women between the sixteenth and twentieth centuries. We will read primary sources in addition to familiarizing ourselves with the historiography of women in South Asia.

1 Course Unit

SAST 769 Feminist Theory
Specific topic varies. Dissent is a key word in our world today—from the Arab Spring to the American Fall, we have seen expressions of political disobedience and protest around the world. It is more urgent than ever to consider what dissent might mean, what shapes it has taken historically, what connection might exist between it and literature, and what futures are possible. We will read key critical and theoretical works alongside some powerful, tender and controversial writings and films (largely but not exclusively produced in the postcolonial world), to inquire into the politics and poetics of governance and dissent. Students are invited to make connections with other historical and geographical contexts, and explore the different forms of dissent individual, collective, urban, rural, nationalist, pan-nationalist, religious, marxist, or feminist, to name but a few. We will pay special attention to different performances of dissent at a popular, mass or individual level. We will think about the social and cultural channels attention to different performances of dissent at a popular mass or See the English Department's website at www.english.upenn.edu for a complete description of the current offerings.

Spanish (SPAN)

SPAN 110 Elementary Spanish I
Spanish 110 is a first-semester language course that emphasizes the development of foundational listening, speaking, reading and writing skills while exploring the rich cultural mosaic of the Spanish-speaking world. Through listening activities and videotaped interviews with native speakers, your aural and oral abilities will improve at the same time that you will become familiarized with different varieties of standard spoken Spanish. You will be given ample opportunities to practice orally and in writing so that you can reinforce newly acquired vocabulary and grammatical structures. Reading strategies will facilitate your comprehension of the texts included in the course syllabus. Readings focused on a specific country or region, visual items (such as maps, photos, films) and a class project will advance your knowledge of Hispanic cultural practices and products while increasing your intercultural competence. Conducted entirely in Spanish, this class will provide you with guided practice before moving to more independent and spontaneous language production. Working in small groups and in pairs, you will participate in class activities that simulate real-life situations that will help you gain confidence communicating in Spanish. Goals: By the end of this course you can expect to handle a variety of day-to-day situations in a Spanish-speaking setting: 1) Greet and introduce people, invite people to events, accept or reject invitations, ask for directions, tell time, shop and order meals in a restaurant. 2) Talk about yourself, family, and friends regarding physical and emotional states, daily routines, leisure, preferences and plans. 3) Use the cultural information learned in class as an icebreaker to find common ground with a wide variety of Spanish speakers.

SPAN 112 Elementary Spanish I and II: Accelerated
Spanish 112 is an intensive course designed for students who have already satisfied the language requirement in another language and have not previously studied Spanish. By combining the curriculum of Spanish 110 and 120, Spanish 112 seeks to develop students’ foundational listening, speaking, reading, and writing skills while exploring the rich cultural mosaic of the Spanish-speaking world. Through listening activities and mini documentaries shown in class, students will develop their aural and oral skills at the same time that they will become familiarized with different varieties of standard spoken Spanish. Students will be given ample opportunities to practice orally and in writing so that they can reinforce newly acquired vocabulary and linguistic structures. Readings focused on a specific country or region, visual items (such as maps, photos, films) and a class project will advance students’ knowledge of Hispanic cultural practices and products while increasing their intercultural competence. Goals: By the end of this course students can expect to handle a variety of day-to-day situations in a Spanish-speaking setting such as: 1) Introduce themselves, use greetings, describe people, places and things, give instructions, tell time, go shopping, order meals in a restaurant, and make travel plans. 2) Talk about themselves, families, and friends regarding academic life, daily routines, health, work, leisure, and preferences (using the present and past tenses). 3) Use the cultural information learned in class as an icebreaker to find common ground with a wide variety of Spanish speakers.

SPAN 115 Spanish for the Medical Professions, Elementary I
Spanish 115 is a first-semester elementary Medical Spanish Language course and the first in the Spanish for Medical Professions sequence. It is designed for students with no prior coursework in Spanish. This course teaches beginning students the fundamentals of practical Spanish with an emphasis on medical situations and basic medical terminology. In this course, particular attention will be given to developing speaking and listening skills, as well as cultural awareness. It incorporates activities, vocabulary, and readings of particular interest to healthcare practitioners, while adhering to the goals and scope of Spanish 110, the first-semester Spanish language course. Students who have already taken Spanish 110 will not receive credit for Spanish 115. Although these courses have different numbers, they are at the same level. Students who have already fulfilled the language requirement (AP, SAT II, etc.) or have taken courses at the 200- and 300-level may not take basic level language courses (100-level courses) in the same language. They will not receive credit for this course (Spanish 115).

1 Course Unit

SPAN 121 Elementary Spanish I and II: Advanced Beginners
Spanish 121 is designed for students who have some prior experience in Spanish. It is an intensive elementary-level language course that in one semester covers the material studied over two semesters in our Spanish 110 and Spanish 120. The course provides a quick-paced review of material normally covered in a first-semester Spanish course and then proceeds to introduce new material so students will be prepared to take Spanish 130 during the subsequent semester. As in other Spanish courses, Spanish 121 emphasizes the development of foundational listening, speaking, reading, and writing skills while exploring the rich cultural mosaic of the Spanish-speaking world. Through listening activities and mini documentaries shown in class, students will develop their aural and oral skills at the same time that they will become familiarized with different varieties of standard spoken Spanish. Students will be given ample opportunities to practice orally and in writing so that they can reinforce newly acquired vocabulary and linguistic structures. Readings focused on a specific country or region, visual items (such as maps, photos, adn films) and a class project will advance students’ knowledge of Hispanic cultural practices and products while increasing their intercultural competence. Conducted entirely in Spanish, this class will provide you with guided practice before moving to more independent and spontaneous language production. You will participate in paired, small-group and whole-class activities that simulate real-life situations that will help you gain confidence communicating in Spanish. Goals: By the end of this course students can expect to handle a variety of day-to-day situations in a Spanish-speaking setting such as: 1) Introduce themselves, use greetings, describe people, places and things, give instructions, tell time, go shopping, order meals in a restaurant, and make travel plans. 2) Talk about themselves, families, and friends regarding academic life, daily routines, health, work, leisure, and preferences (using the present and past tenses). 3) Use the cultural information learned in class as an icebreaker to find common ground with a wide variety of Spanish speakers.

Activity: Seminar
1 Course Unit
Notes: Offered through the Penn Language Center.
SPAN 130 Intermediate Spanish I
Spanish 130, a first-semester intermediate-level course, emphasizes students' acquisition of new vocabulary and linguistic structures in a cultural and communicative context while building on their previous speaking, reading, listening and writing skills. A substantial amount of the course is devoted to learning and using the past tenses. As in other Spanish courses, students will take part in a wide range of activities, including video blogging, role-plays, film viewings, listening to music and class discussions of current social and cultural topics. Unique to this course is the creation of a "cultural journal" throughout the semester in which students pursue their own interests in the Spanish-speaking world while taking advantage of some of the rich resources within Philadelphia's own Hispanic community. Goals: By the end of this course students can expect to handle a variety of common situations in a Spanish-speaking setting such as: 1) Narrate past actions, ranging from personal anecdotes to historical events 2) Give advice, recommendations, and commands to people 3) Express their feelings and doubts when reacting to what others have said 4) Talk about their future expectations and wishes 5) Demonstrate their knowledge and understanding of Hispanic cultural practices and products

SPAN 134 Intermediate Spanish I and II: Accelerated
During the spring semester, Spanish 134 is limited to those students who have satisfied the language requirement in another language. During the summer, (at the Penn campus and the Penn-in-Buenos Aires Summer Abroad Program), Spanish 134 is open to all students. Spanish 134 is an intensive intermediate-level language course that covers the material presented in Spanish 130 and Spanish 140. The course emphasizes the development of the four canonical skills (reading, writing, listening and speaking) within a culturally based context. Class time will focus on communicative activities that combine grammatical concepts, relevant vocabulary, and cultural themes. Students will participate in pair, small-group and whole-class activities to practice linguistics skills in a meaningful context. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the past tense and major uses of the subjunctive, and the development of writing skills. Students who have previously studied Spanish must take the online placement examination. Students who have already fulfilled the language requirement in Spanish may not take basic level language courses (110-145) in the same language. Any questions about placement should be addressed to the Director of the Spanish Language Program.
For BA Students: Last Language Course
Course usually offered in spring term

Activity: Seminar
2 Course Units

SPAN 135 Spanish for the Medical Professions, Intermediate I
Spanish 135 is a first-semester intermediate-level language course that emphasizes the development of the four basic skills (reading, writing, listening, and speaking), and the acquisition of medical terminology. Students will be expected to participate in classroom activities such as role-plays based on everyday situations that they may encounter at work settings such as doctors' offices, clinics, hospitals, and emergency rooms in order to develop meaningful and accurate communication skills in the target language. Students will also review and acquire other essential tools of communication in the target language applicable both within and outside the medical field. Major course goals include: the acquisition of intermediate-level vocabulary, the controlled use of the past tense, and the development of writing skills at a paragraph level with transitions. Students who have already taken Spanish 130 will not receive credit for Spanish 135. Although these courses have different numbers, they are at the same level. Students who have already fulfilled the language requirement (AP, SAT II, etc.) or have taken courses at the 200- and 300-level may not take basic-level language courses (100-level courses) in the same language. They will not receive credit for this course (Spanish 135).
For BA Students: Language Course
Course usually offered in fall term

Activity: Seminar
1 Course Unit
Notes: Offered through the Penn Language Center.
SPAN 140 Intermediate Spanish II
Spanish 140 is a fourth-semester language course that both reinforces and enhances the communicative skills (listening, speaking, reading and writing) previously acquired while exploring the rich cultural mosaic of the Spanish-speaking world. Class activities are designed so that students can build up these four skills in order to function at an intermediate language level. Readings focused on contemporary social and political issues of the Hispanic world will advance your knowledge of Hispanic and cultural practices while increasing your intercultural competence. Unique to this course is the preparation of an oral presentation on a topic related to the Hispanic world throughout the semester and presented during the last days of classes. The purpose of this task is to help students develop their presentational competence in Spanish. Conducted entirely in Spanish, this class will provide students with ample opportunities to work in small groups and in pairs while gaining confidence communicating in Spanish. This course satisfies the language requirement at Penn. Goals: By the end of this course, students can expect to handle a variety of situations in a Spanish-speaking setting, such as: 1) Express their opinions on a variety of contemporary events and issues 2) Defend their position when presented with a hypothetical situation 3) Deliver short presentations on a chosen subject after thorough preparation 4) Demonstrate their knowledge and understanding of Hispanic cultural practices and products.
For BA Students: Last Language Course

SPAN 145 Spanish for the Medical Professions, Intermediate II
Spanish 145, the continuation of Spanish 135, is an intermediate-level integrated skills language course. It emphasizes the development of reading, writing, listening, and speaking abilities. Students will be expected to participate actively in classroom activities such as communicative activities, role-playing based on typical doctor/patient interactions as well as other medical situations. Students will also review and learn other essential tools of communication applicable both inside and outside the medical field. Students who have already taken Spanish 140 will not receive credit for Spanish 145. Although these courses have different numbers, they are at the same level. Students who have already fulfilled the language requirement (AP, SAT II, etc.) or have taken courses at the 200- and 300-level may not take basic level language courses (100-level courses) in the same language. They will not receive credit for this course (Spanish 145). This course satisfies the language requirement in Spanish.
For BA Students: Last Language Course
One-term course offered either term.

SPAN 180 Spanish Conversation
Must be a resident of the Modern Language College House.
Two terms. student must enter first term.
Prerequisite: Residence in Modern Language House
Activity: Seminar
0.5 Course Units

SPAN 202 Advanced Spanish
The purpose of this course is twofold: (a) to develop students’ communicative abilities in Spanish, that is, speaking, listening, reading and writing, and (b) to increase their awareness and understanding of Hispanic cultures and societies. Homework and classroom activities are designed to help students build their oral proficiency, expand and perfect their knowledge of vocabulary and grammatical structures, improve their reading and writing skills, and develop their critical thinking abilities.
The material for this class includes short stories, newspaper articles, poems, songs, cartoons, video clips and a novel, such as Cesar Aira’s La villa. At the completion of this course, students will feel confident discussing and debating a variety of contemporary issues (cultural and religious practices, family relationships, gender stereotypes, political events, immigration to the USA, etc.). Any questions about placement should be addressed to the Director of the Spanish Language Program.
For BA Students: Advanced Language Course
One-term course offered either term.
Prerequisite: Successful completion of Spanish 140 or equivalent
Activity: Seminar
1 Course Unit

SPAN 205 Advanced Spanish for the Medical Professions
The goal of this course is to provide advanced practice in Spanish to those students who are interested in pursuing careers in the medical and health care fields. Through readings and authentic materials on contemporary health issues, for example, i.e., H1N1 influenza, comparative healthcare systems, obesity, "chagas" disease, etc., students will acquire the vocabulary and grammatical structures needed to discuss a wide array of topics pertaining to the health-related professions. Students will also gain awareness of those health care issues affecting the Hispanic/Latino patient. Oral and written presentations will complement topics covered in class.
For BA Students: Advanced Language Course
One-term course offered either term.
Prerequisites: Successful completion of Spanish 140 or 145 or equivalent.
Activity: Seminar
1 Course Unit

SPAN 208 Business Spanish I
Spanish for Business I provides advanced-level language students with technical vocabulary and communicative skills covering business concepts as they apply to the corporate dynamics of the Spanish-speaking world, with a special emphasis on Latin America. Through readings, presentations, discussions, and video materials, we shall analyze those cultural aspects that characterize the business environment in the region as well as focus on economies and markets in light of their history, politics, resources and pressing international concerns.
For BA Students: Advanced Language Course
One-term course offered either term.
Prerequisite: Successful completion of Spanish 140 or equivalent
Activity: Seminar
1 Course Unit
SPAN 209 Business Spanish II
This course is specifically designed for advanced speakers of Spanish (e.g., native speakers, high-level heritage speakers, and students who have studied in a Spanish-speaking country for at least one semester). Students will take an in-depth look at the corporate dynamics of a number of countries in Latin America, focusing on their economies and markets, as well as on the cultural and business protocols of each region. Through the creation of an entrepreneurial project and the writing of a business plan, students will enhance their business and language skills. Any questions about placement should be addressed to the Director of the Spanish Language Program.
For BA Students: Advanced Language Course
Course usually offered in fall term
Prerequisite: Permission from the instructor
Activity: Seminar
1 Course Unit

SPAN 212 Advanced Spanish II: Grammar and Composition
Spanish 212 is an advanced-level language course that emphasizes the acquisition of the tools necessary for successful written expression in Spanish. These tools include a solid knowledge of the major points of Spanish grammar, an ample vocabulary, control of the mechanics of the language (spelling, punctuation, etc.), and a thorough understanding of the writing process. Throughout the semester, students will use these tools to analyze authentic texts and to produce a variety of written assignments. By the end of the course, students will have developed their awareness of the norms of standard Spanish and learned to incorporate these features into their own writing. The class will be conducted in Spanish and students are expected to speak in Spanish at all times. Any questions about placement should be addressed to the directors of the Spanish language program.
One term course offered either term
Prerequisite: Spanish 202 or equivalent
Activity: Seminar
1 Course Unit

SPAN 215 Spanish for the Professions
Spanish for the Professions is designed to provide advanced-level language students with a wide-ranging technical vocabulary and the enhancement of solid communicative skills within the cultural context of several developing Latin American countries. Focusing on topics such as politics, economy, society, health, environment, education, science and technology, the class will explore the realities and underlying challenges facing Latin America. Through essays, papers, articles, research, discussions, case studies, and videotapes, we shall take an in-depth look at the dynamics of Latin American societies. The course will focus on but not be restricted to Mexico, Cuba and Argentina. Any questions about placement should be addressed to the Director of the Spanish Language Program.
For BA Students: Advanced Language Course
Course usually offered in spring term
Prerequisite: Spanish 202 or equivalent
Activity: Seminar
1 Course Unit

SPAN 219 Hispanic Texts and Contexts
The primary aim of this course is to develop students' knowledge of the geographical, historical and cultural contexts in those regions where Spanish is used. At the same time that they are introduced to research techniques and materials available in Spanish, students strengthen their language skills through readings, class discussions, and frequent writing assignments. This course is designed to give students a broad understanding of Hispanic culture that will prepare them for upper-level coursework and study abroad.
For BA Students: Humanities and Social Science S
One-term course offered either term
Prerequisites: Spanish 202 or Spanish 212.
Activity: Seminar
1 Course Unit

SPAN 223 Introduction to Literary Analysis
By helping students develop skills to carefully read and analyze Spanish literary works, Spanish 223 prepares them for upper-level courses and study abroad. After reviewing the main elements and conventions of the most popular genres (narrative, poetry, theater and essay), students become familiarized with current theoretical approaches to the study of literature with the purpose of applying them to their own analytical writing. The last weeks of the semester are devoted to the reading of a well-crafted detective novel and the examination of both its formal features and its ideological underpinnings. Throughout the course, students will have ample opportunities to hone their skills through the close reading and class discussion of varied and stimulating literary works produced by canonical and non-canonical Hispanic authors.
For BA Students: Arts and Letters Sector
One-term course offered either term
Prerequisites: Spanish 202 or Spanish 212.
Activity: Seminar
1 Course Unit

SPAN 317 Spanish Phonetics and Morphology
This course is an introduction to Hispanic linguistics, with special emphasis on the Spanish sound system (phonetics and phonology) and Spanish word formation (morphology). Topics to be covered include articulatory phonetics, use of the phonetic alphabet, English and Spanish contrastive phonology, regional and social variations of Spanish pronunciation, word formation (derivation and composition), and the structure of the Spanish verb (inflection). Evaluation will be based on participation and homework, frequent quizzes, mid-term exam, and a final examination during finals week. Students will be required to write a linguistic autobiography.
Course not offered every year
Prerequisites: Spanish 219 or Spanish 223.
Activity: Seminar
1 Course Unit

SPAN 319 History of the Spanish Language
A survey treatment of the development of Latin to modern Spanish, with emphasis on relations between external history and the development of grammatical structure and vocabulary, and major sound shifts. Lectures and discussions of reading.
Course not offered every year

SPAN 606 Pedagogy Across the Spanish Curriculum
The aim of this seminar is to prepare graduate students in Hispanic Studies to teach a wide range of courses typically offered at North American universities and colleges—from the elementary Spanish language level to upper-division seminars—while familiarizing themselves with current approaches and methodological trends in foreign language instruction. By designing a content-based syllabus, including selecting and sequencing of reading materials and choosing the appropriate learning outcomes and assessment methods, graduate students will gain a greater awareness of curricular planning and development and acquire skills that will significantly ease their future teaching endeavors such as using a backward design model, incorporating their own research interests into their lessons and courses, or taking advantage of the resources available to language learners on campus. By the end of the course, graduate students will be able to talk about and reflect on their teaching in an effective and professional manner.
Course usually offered in fall term

SPAN 690 Studies in 19th- and 20th-Century Spanish American Literature
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/cr
Course not offered every year
Activity: Seminar
1 Course Unit

SPAN 692 Colonial Literature of Spanish America
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/cr
Course not offered every year
Activity: Seminar
1 Course Unit

SPAN 693 Vanguardias culturales hispanoamericanas
Topics vary. Please see the Spanish Department's website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/cr
Course not offered every year
Activity: Seminar
1 Course Unit
SPAN 694 Spanish and Latin American Cinema  
Topics vary. Please see the Spanish Department’s website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc  
Course not offered every year  
Also Offered As: CIMS 694, COML 694, LALS 694  
Activity: Seminar  
1 Course Unit

SPAN 697 Studies in Latin American Culture  
Topics vary. Please see the Spanish Department’s website for the current course description: https://www.sas.upenn.edu/hispanic-portuguese-studies/pc  
Course not offered every year  
Also Offered As: LALS 697  
Activity: Seminar  
1 Course Unit

SPAN 800 Field Exam  
PhD Exam Preparation  
Course not offered every year  
Activity: Independent Study  
1 Course Unit

SPAN 999 Independent Study  
One-term course offered either term  
Activity: Independent Study  
1 Course Unit

Statistics (STAT)

STAT 101 Introductory Business Statistics  
Data summaries and descriptive statistics; introduction to a statistical computer package; Probability: distributions, expectation, variance, covariance, portfolios, central limit theorem; statistical inference for univariate data; Statistical inference for bivariate data: inference for intrinsically linear simple regression models. This course will have a business focus, but is not inappropriate for students in the college.  
One-term course offered either term  
Prerequisite: MATH 104 or MATH 110 or equivalent; successful completion of STAT 101 is prerequisite to STAT 102  
Activity: Lecture  
1 Course Unit

STAT 102 Introductory Business Statistics  
One-term course offered either term  
Prerequisite: STAT 101  
Activity: Lecture  
1 Course Unit

STAT 111 Introductory Statistics  
Introduction to concepts in probability. Basic statistical inference procedures of estimation, confidence intervals and hypothesis testing directed towards applications in science and medicine. The use of the JMP statistical package.  
One-term course offered either term  
Prerequisites: High school algebra.  
Activity: Recitation  
1 Course Unit

STAT 112 Introductory Statistics  
Further development of the material in STAT 111, in particular the analysis of variance, multiple regression, non-parametric procedures and the analysis of categorical data. Data analysis via statistical packages.  
One-term course offered either term  
Prerequisite: STAT 111  
Activity: Lecture  
1 Course Unit

STAT 399 Independent Study  
One-term course offered either term  
Prerequisites: Written permission of instructor and the department course coordinator.  
Activity: Independent Study  
1 Course Unit

STAT 405 Statistical Computing with R  
The goal of this course is to introduce students to the R programming language and related eco-system. This course will provide a skill-set that is in demand in both the research and business environments. In addition, R is a platform that is used and required in other advanced classes taught at Wharton, so that this class will prepare students for these higher level classes and electives.  
Taught by: Stine, Waterman, Zhang  
One-term course offered either term  
Also Offered As: STAT 705  
Prerequisite: STAT 102 or STAT 112 or STAT 430  
Activity: Lecture  
0.5 Course Units

STAT 422 Predictive Analytics for Business  
This course follows from the introductory regression classes, STAT 102, STAT 112, and STAT 431 for undergraduates and STAT 613 for MBAs. It extends the ideas from regression modeling, focusing on the core business task of predictive analytics as applied to realistic business related data sets. In particular it introduces automated model selection tools, such as stepwise regression and various current model selection criteria such as AIC and BIC. It delves into classification methodologies such as logistic regression. It also introduces classification and regression trees (CART) and the popular predictive methodology known as the random forest.  
One-term course offered either term  
Also Offered As: STAT 722  
Prerequisite: STAT 102 or STAT 112 or STAT 431  
Activity: Lecture  
0.5 Course Units
STAT 424 Text Analytics
This course introduces methods for the analysis of unstructured data, focusing on statistical models for text. Techniques include those for sentiment analysis, topic models, and predictive analytics. Course includes topics from natural language processing (NLP), such as identifying parts of speech, parsing sentences (e.g., subject and predicate), and named entity recognition (people and places). Unsupervised techniques suited to feature creation provide variables suited to traditional statistical models (regression) and more recent approaches (regression trees). Examples that span the course illustrate the success of text analytics. Hierarchical generating models often associated with nonparametric Bayesian analysis supply theoretical foundations.
Taught by: Stine
One-term course offered either term
Also Offered As: STAT 724
Prerequisites: Students should be familiar with regression models at the level of STAT 102 and the R statistics language at the level of STAT 405. Familiarity with the R Studio development environment is presumed, as well as common R packages such as stringr, dplyr and ggplot. Those with more knowledge of Statistics, such as from STAT 422, or computing skills will benefit. The predominant software used in the course is R, with bits of JMP when helpful for interactive illustration. Familiarity with basic probability models is helpful but not presumed.
Activity: Lecture 0.5 Course Units

STAT 430 Probability
Discrete and continuous sample spaces and probability; random variables, distributions, independence; expectation and generating functions; Markov chains and recurrence theory.
One-term course offered either term
Also Offered As: STAT 510
Prerequisite: MATH 114 or MATH 115 or equivalent
Activity: Lecture 1 Course Unit

STAT 431 Statistical Inference
Graphical displays; one- and two-sample confidence intervals; one- and two-sample hypothesis tests; one- and two-way ANOVA; simple and multiple linear least-squares regression; nonlinear regression; variable selection; logistic regression; categorical data analysis; goodness-of-fit tests. A methodology course. This course does not have business applications but has significant overlap with STAT 101 and 102.
One-term course offered either term
Also Offered As: STAT 511
Prerequisite: STAT 430
Activity: Lecture 1 Course Unit

STAT 432 Mathematical Statistics
An introduction to the mathematical theory of statistics. Estimation, with a focus on properties of sufficient statistics and maximum likelihood estimators. Hypothesis testing, with a focus on likelihood ratio tests and the consequent development of "t" tests and hypothesis tests in regression and ANOVA. Nonparametric procedures.
Course usually offered in spring term
Also Offered As: STAT 512
Prerequisite: STAT 430 or 510 or equivalent
Activity: Lecture 1 Course Unit

STAT 433 Stochastic Processes
An introduction to Stochastic Processes. The primary focus is on Markov Chains, Martingales and Gaussian Processes. We will discuss many interesting applications from physics to economics. Topics may include: simulations of path functions, game theory and linear programming, stochastic optimization, Brownian Motion and Black-Scholes.
One-term course offered either term
Also Offered As: STAT 533
Prerequisites: STAT 430, or permission of instructor
Activity: Lecture 1 Course Unit

STAT 435 Forecasting Methods for Management
This course provides an introduction to the wide range of techniques available for statistical forecasting. Qualitative techniques, smoothing and decomposition of time series, regression, adaptive methods, autoregressive-moving average modeling, and ARCH and GARCH formulations will be surveyed. The emphasis will be on applications, rather than technical foundations and derivations. The techniques will be studied critically, with examination of their usefulness and limitations.
Taught by: Shaman
One-term course offered either term
Also Offered As: STAT 711
Prerequisite: STAT 102 or 112 or 431
Activity: Lecture 1 Course Unit

STAT 436 Introduction to Large-Scale Data Science
The course will focus on computational approaches to large-scale data analysis. The lectures will introduce the relevant concepts, and students will be asked to work on projects, implementing the methods and experimenting with large-scale datasets. The course will cover various techniques for updating models in an online fashion, as well as subsampling and dimensionality-reduction techniques. The students will experiment with neural network architectures and learn to build predictive models for modern machine learning tasks.
One-term course offered either term
Prerequisites: Linear Algebra and basic R programming
Activity: Lecture 1 Course Unit

STAT 442 Introduction to Bayesian Data Analysis
The course will introduce data analysis from the Bayesian perspective to undergraduate students. We will cover important concepts in Bayesian probability modeling as well as estimation using both optimization and simulation-based strategies. Key topics covered in the course include hierarchical models, mixture models, hidden Markov models and Markov Chain Monte Carlo.
Taught by: Jensen
Course usually offered in spring term
Prerequisites: A course in probability (STAT 430 or equivalent); a course in statistical inference (STAT 102, STAT 112, STAT 431 or equivalent); and experience with the statistical software R (at the level of STAT 405 or STAT 470)
Activity: Lecture 1 Course Unit
STAT 451 Fundamentals of Actuarial Science I
This course is the usual entry point in the actuarial science program. It is required for students who plan to concentrate or minor in actuarial science. It can also be taken by others interested in the mathematics of personal finance and the use of mortality tables. For future actuaries, it provides the necessary knowledge of compound interest and its applications, and basic life contingencies definition to be used throughout their studies. Non-actuaries will be introduced to practical applications of finance mathematics, such as loan amortization and bond pricing, and premium calculation of typical life insurance contracts. Main topics include annuities, loans and bonds; basic principles of life contingencies and determination of annuity and insurance benefits and premiums.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 451, BEPP 851, STAT 851
Prerequisites: MATH 104, STAT 430. STAT 430 can be taken concurrently with BEPP 451 or STAT 451
Activity: Lecture
1 Course Unit

STAT 452 Fundamentals of Actuarial Science II
This specialized course is usually only taken by Wharton students who plan to concentrate in actuarial science and Penn students who plan to minor in actuarial mathematics. It provides a comprehensive analysis of advanced life contingencies problems such as reserving, multiple life functions, multiple decrement theory with application to the valuation of pension plans.
Taught by: Lemaire
Course usually offered in spring term
Also Offered As: BEPP 452, BEPP 852, STAT 852
Prerequisite: BEPP 451 or STAT 451
Activity: Lecture
1 Course Unit

STAT 453 Actuarial Statistics
This course covers models for insurer’s losses, and applications of Markov chains. Poisson processes, including extensions such as non-homogeneous, compound, and mixed Poisson processes are studied in detail. The compound model is then used to establish the distribution of losses. An extensive section on Markov chains provides the theory to forecast future states of the process, as well as numerous applications of Markov chains to insurance, finance, and genetics. The course is abundantly illustrated by examples from the insurance and finance literature. While most of the students taking the course are future actuaries, other students interested in applications of statistics may discover in class many fascinating applications of stochastic processes and Markov chains.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 453, BEPP 853, STAT 853
Prerequisite: STAT 430
Activity: Lecture
1 Course Unit

STAT 454 Applied Statistical Methods for Actuaries
One half of the course is devoted to the study of time series, including ARIMA modeling and forecasting. The other half studies modifications in random variables due to deductibles, co-payments, policy limits, and elements of simulation. This course is a possible entry point into the actuarial science program. The Society of Actuaries has approved STAT 854 for VEE credit on the topic of time series.
Taught by: Lemaire
Course usually offered in spring term
Also Offered As: BEPP 454, BEPP 854, STAT 854
Prerequisites: STAT 430, STAT 431
Activity: Lecture
1 Course Unit

STAT 470 Data Analytics and Statistical Computing
This course will introduce a high-level programming language, called R, that is widely used for statistical data analysis. Using R, we will study and practice the following methodologies: data cleaning, feature extraction; web scrubbing, text analysis; data visualization; fitting statistical models; simulation of probability distributions and statistical models; statistical inference methods that use simulations (bootstrap, permutation tests).
Taught by: Buja
One-term course offered either term
Also Offered As: STAT 503, STAT 770
Prerequisites: STAT 101 and 102 or STAT 111 and 112 or STAT 431 or ECON 103 and ECON 104
Activity: Lecture
1 Course Unit

STAT 471 Modern Data Mining
Modern Data Mining: Statistics or Data Science has been evolving rapidly to keep up with the modern world. While classical multiple regression and logistic regression technique continue to be the major tools we go beyond to include methods built on top of linear models such as LASSO and Ridge regression. Contemporary methods such as KNN (K nearest neighbor), Random Forest, Support Vector Machines, Principal Component Analyses (PCA), the bootstrap and others are also covered. Text mining especially through PCA is another topic of the course. While learning all the techniques, we keep in mind that our goal is to tackle real problems. Not only do we go through a large collection of interesting, challenging real-life data sets but we also learn how to use the free, powerful software “R” in connection with each of the methods exposed in the class.
Taught by: Zhao
One-term course offered either term
Also Offered As: STAT 571, STAT 701
Prerequisite: STAT 102 or 112 or 431
Activity: Lecture
1 Course Unit

STAT 474 Modern Regression for the Social, Behavioral and Biological Sciences
Function estimation and data exploration using extensions of regression analysis: smoothers, semiparametric and nonparametric regression, and supervised machine learning. Conceptual foundations are addressed as well as hands-on use for data analysis.
Taught by: Berk
Course usually offered in spring term
Also Offered As: CRIM 474, STAT 974
Prerequisite: STAT 102 or 112 or equivalent
Activity: Lecture
1 Course Unit
STAT 475 Sample Survey Design
This course will cover the design and analysis of sample surveys. Topics include simple sampling, stratified sampling, cluster sampling, graphics, regression analysis using complex surveys and methods for handling nonresponse bias.
Course not offered every year
Also Offered As: BSTA 775, STAT 920
Prerequisite: STAT 102 or 112 or 431
Activity: Lecture
1 Course Unit

STAT 476 Applied Probability Models in Marketing
This course will expose students to the theoretical and empirical "building blocks" that will allow them to construct, estimate, and interpret powerful models of customer behavior. Over the years, researchers and practitioners have used these models for a wide variety of applications, such as new product sales, forecasting, analyses of media usage, and targeted marketing programs. Other disciplines have seen equally broad utilization of these techniques. The course will be entirely lecture-based with a strong emphasis on real-time problem solving. Most sessions will feature sophisticated numerical investigations using Microsoft Excel. Much of the material is highly technical.
Taught by: Fader
Course usually offered in spring term
Also Offered As: MKTG 476, MKTG 676, MKTG 776, STAT 776
Prerequisites: A high comfort level with basic integral calculus and recent exposure to a formal course in probability and statistics such as STAT 430 is strongly recommended.
Activity: Lecture
1 Course Unit

STAT 480 Advanced Statistical Computing
This course will build on the fundamental concepts introduced in the prerequisite courses to allow students to acquire knowledge and programming skills in large-scale data analysis, data visualization, and stochastic simulation.
Taught by: Buja
Course usually offered in spring term
Also Offered As: STAT 580, STAT 780
Prerequisites: STAT 470 or STAT 405 or equivalent background acquired through a combination of online courses that teach the R language and practical experience.
Activity: Lecture
1 Course Unit

STAT 490 Causal Inference
Questions about cause are at the heart of many everyday decisions and public policies. Does eating an egg every day cause people to live longer or shorter or have no effect? Do gun control laws cause more or less murders or have no effect? Causal inference is the subfield of statistics that considers how we should make inferences about such questions. This course will cover the key concepts and methods of causal inference rigorously. The course is intended for statistics concentrators and minors.
Taught by: Small
Course usually offered in spring term
Also Offered As: STAT 590
Prerequisite: STAT 430 is a required course for this class. One of STAT 102, STAT 112 or STAT 431 is also required for this class.
Knowledge of R such as that covered in STAT 405 or STAT 470.
Activity: Lecture
1 Course Unit

STAT 500 Applied Regression and Analysis of Variance
An applied graduate level course in multiple regression and analysis of variance for students who have completed an undergraduate course in basic statistical methods. Emphasis is on practical methods of data analysis and their interpretation. Covers model building, general linear hypothesis, residual analysis, leverage and influence, one-way anova, two-way anova, factorial anova. Primarily for doctoral students in the managerial, behavioral, social and health sciences.
Taught by: Rosenbaum
Course usually offered in fall term
Also Offered As: BSTA 550, PSYC 611
Prerequisite: STAT 102 or 112 or equivalent
Activity: Lecture
1 Course Unit

STAT 501 Introduction to Nonparametric Methods and Log-linear Models
An applied graduate level course for students who have completed an undergraduate course in basic statistical methods. Covers two unrelated topics: loglinear and logit models for discrete data and nonparametric methods for nonnormal data. Emphasis is on practical methods of data analysis and their interpretation. Primarily for doctoral students in the managerial, behavioral, social and health sciences. May be taken before STAT 500 with permission of instructor.
Taught by: Rosenbaum
Course usually offered in spring term
Also Offered As: PSYC 612
Prerequisite: STAT 102 or 112 or equivalent
Activity: Lecture
1 Course Unit

STAT 503 Data Analytics and Statistical Computing
This course will introduce a high-level programming language, called R, that is widely used for statistical data analysis. Using R, we will study and practice the following methodologies: data cleaning, feature extraction; web scrapping, text analysis; data visualization; fitting statistical models; simulation of probability distributions and statistical models; statistical inference methods that use simulations (bootstrap, permutation tests).
Taught by: Buja
One-term course offered either term
Also Offered As: STAT 470, STAT 770
Prerequisites: Two courses at the statistics 400 or 500 level.
Activity: Lecture
1 Course Unit

STAT 510 Probability
Also Offered As: STAT 430
Prerequisite: A one year course in calculus
Activity: Lecture
1 Course Unit
STAT 511 Statistical Inference
Graphical displays; one- and two-sample confidence intervals; one- and two-sample hypothesis tests; one- and two-way ANOVA; simple and multiple linear least-squares regression; nonlinear regression; variable selection; logistic regression; categorical data analysis; goodness-of-fit tests. A methodology course.
One term course offered either term
Also Offered As: STAT 431
Prerequisite: STAT 510 or equivalent
Activity: Lecture
1 Course Unit

STAT 512 Mathematical Statistics
An introduction to the mathematical theory of statistics. Estimation, with a focus on properties of sufficient statistics and maximum likelihood estimators. Hypothesis testing, with a focus on likelihood ratio tests and the consequent development of \(^*^*\) tests and hypothesis tests in regression and ANOVA. Nonparametric procedures.
Course usually offered in spring term
Also Offered As: STAT 432
Prerequisite: STAT 430 or 510 or equivalent
Activity: Lecture
1 Course Unit

STAT 515 Advanced Statistical Inference I
STAT 515 is aimed at first-year Ph.D. students and builds a good foundation in statistical inference from the first principles of probability.
Taught by: Low
Course usually offered in fall term
Prerequisites: STAT 430 and STAT 431 and MATH 114 and MATH 240 or equivalent
Activity: Lecture
1 Course Unit

STAT 516 Advanced Statistical Inference II
STAT 516 is a natural continuation of STAT 515, and the main focus is on asymptotic evaluations and regression models. Time permitting, it also discusses some basic nonparametric statistical methods.
Taught by: Ma
Course usually offered in spring term
Prerequisite: STAT 515
Activity: Lecture
1 Course Unit

STAT 520 Applied Econometrics I
This is a course in econometrics for graduate students. The goal is to prepare students for empirical research by studying econometric methodology and its theoretical foundations. Students taking the course should be familiar with elementary statistical methodology and basic linear algebra, and should have some programming experience.
Topics include conditional expectation and linear projection, asymptotic statistical theory, ordinary least squares estimation, the bootstrap and jackknife, instrumental variables and two-stage least squares, specification tests, systems of equations, generalized least squares, and introduction to use of linear panel data models.
Taught by: Shaman
Course usually offered in fall term
Prerequisites: MATH 114 and MATH 312 or equivalents, and an undergraduate introduction to probability and statistics
Activity: Lecture
1 Course Unit

STAT 521 Applied Econometrics II
Topics include system estimation with instrumental variables, fixed effects and random effects estimation, M-estimation, nonlinear regression, quantile regression, maximum likelihood estimation, generalized method of moments estimation, minimum distance estimation, and binary and multinomial response models. Both theory and applications will be stressed.
Taught by: Shaman
Course usually offered in spring term
Prerequisites: STAT 520. This is a continuation of STAT 520
Activity: Lecture
1 Course Unit

STAT 533 Stochastic Processes
An introduction to Stochastic Processes. The primary focus is on Markov Chains, Martingales and Gaussian Processes. We will discuss many interesting applications from physics to economics. Topics may include: simulations of path functions, game theory and linear programming, stochastic optimization, Brownian Motion and Black-Scholes.
One term course offered either term
Also Offered As: STAT 433
Prerequisite: STAT 510 or equivalent
Activity: Lecture
1 Course Unit

STAT 542 Bayesian Methods and Computation
Sophisticated tools for probability modeling and data analysis from the Bayesian perspective. Hierarchical models, mixture models and Monte Carlo simulation techniques.
Taught by: Jensen
Course usually offered in spring term
Prerequisite: STAT 430 or 510 or equivalent or permission of instructor
Activity: Lecture
1 Course Unit

STAT 571 Modern Data Mining
Modern Data Mining: Statistics or Data Science has been evolving rapidly to keep up with the modern world. While classical multiple regression and logistic regression technique continue to be the major tools we go beyond to include methods built on top of linear models such as LASSO and Ridge regression. Contemporary methods such as KNN (K nearest neighbor), Random Forest, Support Vector Machines, Principal Component Analyses (PCA), the bootstrap and others are also covered. Text mining especially through PCA is another topic of the course. While learning all the techniques, we keep in mind that our goal is to tackle real problems. Not only do we go through a large collection of interesting challenging real-life data sets but we also learn how to use the free, powerful software “R” in connection with each of the methods exposed in the class.
Taught by: Zhao
One term course offered either term
Also Offered As: STAT 471, STAT 701
Prerequisite: Two courses at the statistics 400 or 500 level or permission from instructor
Activity: Lecture
1 Course Unit
STAT 580 Advanced Statistical Computing
This course will build on the fundamental concepts introduced in the prerequisite courses to allow students to acquire knowledge and programming skills in large-scale data analysis, data visualization, and stochastic simulation.
Taught by: Buja
Course usually offered in spring term
Also Offered As: STAT 480, STAT 780
Prerequisites: STAT 503 or equivalent background acquired through a combination of online courses that teach the R language and practical experience.
Activity: Lecture
1 Course Unit

STAT 590 Causal Inference
Questions about cause are at the heart of many everyday decisions and public policies. Does eating an egg every day cause people to live longer or shorter or have no effect? Do gun control laws cause more or less murders or have no effect? Causal inference is the subfield of statistics that considers how we should make inferences about such questions. This course will cover the key concepts and methods of causal inference rigorously.
Taught by: Small
Course usually offered in spring term
Also Offered As: STAT 490
Prerequisites: Background in probability and statistics; some knowledge of R.
Activity: Lecture
1 Course Unit

STAT 613 Regression Analysis for Business
This course provides the fundamental methods of statistical analysis, the art and science of extracting information from data. The course will begin with a focus on the basic elements of exploratory data analysis, probability theory and statistical inference. With this as a foundation, it will proceed to explore the use of the key statistical methodology known as regression analysis for solving business problems, such as the prediction of future sales and the response of the market to price changes. The use of regression diagnostics and various graphical displays supplement the basic numerical summaries and provides insight into the validity of the models. Specific important topics covered include least squares estimation, residuals and outliers, tests and confidence intervals, correlation and autocorrelation, collinearity, and randomization. The presentation relies upon computer software for most of the needed calculations, and the resulting style focuses on construction of models, interpretation of results, and critical evaluation of assumptions.
Course usually offered in fall term
Prerequisites: The basic mathematical skills covered in STAT 611, Mathematics for Business Analysis
Activity: Lecture
1 Course Unit
Notes: Lecture and discussion, assigned exercises, data analysis project, quizzes and a final exam.

STAT 621 Accelerated Regression Analysis for Business
STAT 621 is intended for students with recent, practical knowledge of the use of regression analysis in the context of business applications. This course covers the material of STAT 613, but omits the foundations to focus on regression modeling. The course reviews statistical hypothesis testing and confidence intervals for the sake of standardizing terminology and introducing software, and then moves into regression modeling. The pace presumes recent exposure to both the theory and practice of regression and will not be accommodating to students who have not seen or used these methods previously. The interpretation of regression models within the context of applications will be stressed, presuming knowledge of the underlying assumptions and derivations. The scope of regression modeling that is covered includes multiple regression analysis with categorical effects, regression diagnostic procedures, interactions, and time series structure. The presentation of the course relies on computer software that will be introduced in the initial lectures.
Taught by: George
Course usually offered in fall term
Prerequisites: Recent exposure to the theory and practice of regression modeling.
Activity: Lecture
0.5 Course Units
Notes: Lecture and discussion, assigned exercises, data analysis, quizzes, and a final exam.

STAT 701 Modern Data Mining
Modern Data Mining: Statistics or Data Science has been evolving rapidly to keep up with the modern world. While classical multiple regression and logistic regression technique continue to be the major tools we go beyond to include methods built on top of linear models such as LASSO and Ridge regression. Contemporary methods such as KNN (K nearest neighbor), Random Forest, Support Vector Machines, Principal Component Analyses (PCA), the bootstrap and others are also covered. Text mining especially through PCA is another topic of the course. While learning all the techniques, we keep in mind that our goal is to tackle real problems. Not only do we go through a large collection of interesting challenging real-life data sets but we also learn how to use the free, powerful software “R” in connection with each of the methods exposed in the class.
Taught by: Zhao
One term course offered either term
Also Offered As: STAT 471, STAT 571
Prerequisite: STAT 613 or equivalent
Activity: Lecture
1 Course Unit

STAT 705 Statistical Computing with R
The goal of this course is to introduce students to the R programming language and related eco-system. This course will provide a skill-set that is in demand in both the research and business environments. In addition, R is a platform that is used and required in other advanced classes taught at Wharton, so that this class will prepare students for these higher level classes and electives.
Taught by: Stine, Waterman, Zhang
One term course offered either term
Also Offered As: STAT 405
Prerequisites: STAT 613 or STAT 621 or waivering the Statistics Core completely.
Activity: Lecture
0.5 Course Units
STAT 711 Forecasting Methods for Management
This course provides an introduction to the wide range of techniques available for statistical forecasting. Qualitative techniques, smoothing and decomposition of time series, regression, adaptive methods, autoregressive-moving average modeling, and ARCH and GARCH formulations will be surveyed. The emphasis will be on applications, rather than technical foundations and derivations. The techniques will be studied critically, with examination of their usefulness and limitations.
Taught by: Shamann
One-term course offered either term
Also Offered As: STAT 435
Prerequisite: STAT 613 or equivalent
Activity: Lecture
1 Course Unit

STAT 722 Predictive Analytics for Business (formerly STAT 622)
This course follows from the introductory regression classes, STAT 102, STAT 112, and STAT 431 for undergraduates and STAT 613 for MBAs. It extends the ideas from regression modeling, focusing on the core business task of predictive analytics as applied to realistic business related data sets. In particular it introduces automated model selection tools, such as stepwise regression and various current model selection criteria such as AIC and BIC. It delves into classification methodologies such as logistic regression. It also introduces classification and regression trees (CART) and the popular predictive methodology known as the random forest.
One-term course offered either term
Also Offered As: STAT 422
Prerequisite: STAT 613 or STAT 621 or having waived the statistics core completely
Activity: Lecture
0.5 Course Units

STAT 724 Text Analytics
This course introduces methods for the analysis of unstructured data, focusing on statistical models for text. Techniques include those for sentiment analysis, topic models, and predictive analytics. Course includes topics from natural language processing (NLP), such as identifying parts of speech, parsing sentences (e.g., subject and predicate), and named entity recognition (people and places). Unsupervised techniques suited to feature creation provide variables suited to traditional statistical models (regression) and more recent approaches (regression trees). Examples that span the course illustrate the success of text analytics. Hierarchical generating models often associated with nonparametric Bayesian analysis supply theoretical foundations.
Taught by: Stine
One-term course offered either term
Also Offered As: STAT 424
Prerequisites: Students should be familiar with regression models at the level of STAT 613 and the R statistics language at the level of STAT 705. Familiarity with the R-Studio development environment is presumed, as well as common R packages such as stringr, dplyr and ggplot. Those with more knowledge of Statistics, such as from STAT 722, or computing skills will benefit. The predominant software used in the course is R, with bits of JMP when helpful for interactive illustration. Familiarity with basic probability models is helpful but not presumed.
Activity: Lecture
0.5 Course Units

STAT 770 Data Analytics and Statistical Computing
This course will introduce a high-level programming language, called R, that is widely used for statistical data analysis. Using R, we will study and practice the following methodologies: data cleaning, feature extraction; web scrapping, text analysis; data visualization; fitting statistical models; simulation of probability distributions and statistical models; statistical inference methods that use simulations (bootstrap, permutation tests).
Taught by: Buja
One-term course offered either term
Also Offered As: STAT 470, STAT 503
Prerequisites: STAT 613 or STAT 621 or waiving the Statistics Core completely.
Activity: Lecture
1 Course Unit

STAT 776 Applied Probability Models in Marketing
This course will expose students to the theoretical and empirical "building blocks" that will allow them to develop and implement powerful models of customer behavior. Over the years, researchers and practitioners have used these methods for a wide variety of applications, such as new product sales forecasting, analyses of media usage, customer evaluation, and targeted marketing programs. These same techniques are also very useful for other types of business (and non-business) problems. The course will be entirely lecture-based with a strong emphasis on real-time problem solving. Most sessions will feature sophisticated numerical investigations using Microsoft Excel. Much of the material is highly technical.
Taught by: Fader
Course usually offered in spring term
Also Offered As: MKTG 476, MKTG 776, STAT 476
Prerequisites: Students must have a high comfort level with basic integral calculus, and recent exposure to a formal course in probability and statistics is strongly recommended.
Activity: Lecture
1 Course Unit
Notes: Format: Lecture, real-time problem solving

STAT 780 Advanced Statistical Computing
This course will build on the fundamental concepts introduced in the prerequisite courses to allow students to acquire knowledge and programming skills in large-scale data analysis, data visualization, and stochastic simulation.
Taught by: Buja
Course usually offered in spring term
Also Offered As: STAT 480, STAT 580
Prerequisites: STAT 770 or STAT 705 or equivalent background acquired through a combination of online courses that teach the R language and practical experience.
Activity: Lecture
1 Course Unit
STAT 851 Fundamentals of Actuarial Science I
This course is the usual entry point in the actuarial science program. It is required for students who plan to concentrate or minor in actuarial science. It can also be taken by others interested in the mathematics of personal finance and the use of mortality tables. For future actuaries, it provides the necessary knowledge of compound interest and its applications, and basic life contingencies definition to be used throughout their studies. Non-actuaries will be introduced to practical applications of finance mathematics, such as loan amortization and bond pricing, and premium calculation of typical life insurance contracts. Main topics include annuities, loans and bonds; basic principles of life contingencies and determination of annuity and insurance benefits and premiums.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 451, BEPP 851, STAT 451
Prerequisite: One semester of calculus
Activity: Lecture
1 Course Unit

STAT 852 Fundamentals of Actuarial Science II
This specialized course is usually only taken by Wharton students who plan to concentrate in actuarial science and Penn students who plan to minor in actuarial mathematics. It provides a comprehensive analysis of advanced life contingencies problems such as reserving, multiple life functions, multiple decrement theory with application to the valuation of pension plans.
Taught by: Lemaire
Course usually offered in spring term
Also Offered As: BEPP 452, BEPP 852, STAT 452
Prerequisite: STAT 851 or BEPP 851
Activity: Lecture
1 Course Unit

STAT 853 Actuarial Statistics
This course covers models for insurer’s losses, and applications of Markov chains, Poisson processes, including extensions such as non-homogeneous, compound, and mixed Poisson processes are studied in detail. The compound model is then used to establish the distribution of losses. An extensive section on Markov chains provides the theory to forecast future states of the process, as well as numerous applications of Markov chains to insurance, finance, and genetics. The course is abundantly illustrated by examples from the insurance and finance literature. While most of the students taking the course are future actuaries, other students interested in applications of statistics may discover in class many fascinating applications of stochastic processes and Markov chains.
Taught by: Lemaire
Course usually offered in fall term
Also Offered As: BEPP 453, BEPP 853, STAT 453
Prerequisite: Two semesters of Statistics
Activity: Lecture
1 Course Unit

STAT 854 Applied Statistical Methods for Actuaries
One half of the course is devoted to the study of time series, including ARIMA modeling and forecasting. The other half studies modifications in random variables due to deductibles, co-payments, policy limits, and elements of simulation. This course is a possible entry point into the actuarial science program. The Society of Actuaries has approved STAT 854 for VEE credit on the topic of time series.
Taught by: Lemaire
Course usually offered in spring term
Also Offered As: BEPP 454, BEPP 854, STAT 454
Prerequisite: One semester of probability
Activity: Lecture
1 Course Unit

STAT 899 Independent Study
One term course offered either term
Prerequisites: Written permission of instructor, the department MBA advisor and course coordinator.
Activity: Independent Study
1 Course Unit

STAT 910 Forecasting and Time Series Analysis
Fourier analysis of data, stationary time series, properties of autoregressive moving average models and estimation of their parameters, spectral analysis, forecasting. Discussion of applications to problems in economics, engineering, physical science, and life science.
Taught by: Stine
Course offered spring; odd-numbered years
Also Offered As: BSTA 852
Prerequisite: STAT 520 or 961 or equivalent
Activity: Lecture
1 Course Unit

STAT 915 Nonparametric Inference
Statistical inference when the functional form of the distribution is not specified. Nonparametric function estimation, density estimation, survival analysis, contingency tables, association, and efficiency.
Course not offered every year
Prerequisite: STAT 520 or equivalent
Activity: Lecture
1 Course Unit

STAT 920 Sample Survey Methods
This course will cover the design and analysis of sample surveys. Topics include simple random sampling, stratified sampling, cluster sampling, graphics, regression analysis using complex surveys and methods for handling nonresponse bias.
Taught by: Small
Course not offered every year
Also Offered As: BSTA 775, STAT 475
Prerequisites: STAT 520, 961 or 970 or permission of instructor
Activity: Lecture
1 Course Unit
STAT 921 Observational Studies
This course will cover statistical methods for the design and analysis of observational studies. Topics will include the potential outcomes framework for causal inference; randomized experiments; matching and propensity score methods for controlling confounding in observational studies; tests of hidden bias; sensitivity analysis; and instrumental variables.
Taught by: Small
Course usually offered in fall term
Prerequisites: STAT 520, 961 or 970 or permission of instructor
Activity: Lecture
1 Course Unit

STAT 925 Multivariate Analysis: Theory
This is a course that prepares PhD students in statistics for research in multivariate statistics and high dimensional statistical inference. Topics from classical multivariate statistics include the multivariate normal distribution and the Wishart distribution; estimation and hypothesis testing of mean vectors and covariance matrices; principal component analysis, canonical correlation analysis and discriminant analysis; etc. Topics from modern multivariate statistics include the Marcenko-Pastur law, the Tracy-Widom law, nonparametic estimation and hypothesis testing of high-dimensional covariance matrices, high-dimensional principal component analysis, etc.
Taught by: Ma
Course not offered every year
Prerequisites: STAT 930, 970 and 972 or permission of instructor
Activity: Lecture
1 Course Unit

STAT 926 Multivariate Analysis: Methodology
This is a course that prepares PhD students in statistics for research in multivariate statistics and data visualization. The emphasis will be on a deep conceptual understanding of multivariate methods to the point where students will propose variations and extensions to existing methods or whole new approaches to problems previously solved by classical methods. Topics include: principal component analysis, canonical correlation analysis, generalized canonical analysis; nonlinear extensions of multivariate methods based on optimal transformations of quantitative variables and optimal scaling of categorical variables; shrinkage- and sparsity-based extensions to classical methods; clustering methods of the k-means and hierarchical varieties; multidimensional scaling, graph drawing, and manifold estimation.
Taught by: Buja
Course not offered every year
Prerequisite: STAT 961 or permission of instructor
Activity: Lecture
1 Course Unit

STAT 927 Bayesian Statistical Theory and Methods
This graduate course will cover the modeling and computation required to perform advanced data analysis from the Bayesian perspective. We will cover fundamental topics in Bayesian probability modeling and implementation, including recent advances in both optimization and simulation-based estimation strategies. Key topics covered in the course include hierarchical and mixture models, Markov Chain Monte Carlo, hidden Markov and dynamic linear models, tree models, Gaussian processes and nonparametric Bayesian strategies.
Taught by: Jensen
Course not offered every year
Also Offered As: BSTA 854
Prerequisite: STAT 430 or STAT 510
Activity: Lecture
1 Course Unit

STAT 928 Statistical Learning Theory
Statistical learning theory studies the statistical aspects of machine learning and automated reasoning through the use of (sampled) data. In particular, the focus is on characterizing the generalization ability of learning algorithms in terms of how well they perform on "new" data when trained on some given data set. The focus of the course is on: providing the fundamental tools used in this analysis; understanding the performance of widely used learning algorithms; understanding the "art" of designing good algorithms, both in terms of statistical and computational properties. Potential topics include: empirical process theory; online learning; stochastic optimization; margin based algorithms; feature selection; concentration of measure.
Course usually offered in spring term
Prerequisites: Probability and linear algebra.
Activity: Lecture
1 Course Unit

STAT 930 Probability
Taught by: Pemantle
Course usually offered in fall term
Also Offered As: MATH 546, MATH 648
Prerequisite: STAT 430 or 510 or equivalent
Activity: Lecture
1 Course Unit

STAT 931 Stochastic Processes
Taught by: Pemantle
Course usually offered in spring term
Also Offered As: MATH 547, MATH 649
Prerequisite: STAT 930
Activity: Lecture
1 Course Unit

STAT 955 Stochastic Calculus and Financial Applications
Selected topics in the theory of probability and stochastic processes.
Course usually offered in fall term
Prerequisite: STAT 930 or equivalent
Activity: Lecture
1 Course Unit
STAT 957 Seminar in Data Analysis
Survey of methods for the analysis of large unstructured data sets; detection of outliers, Winsorizing, graphical techniques, robust estimators, multivariate problems.
Course not offered every year
Prerequisites: STAT 961, 971, 972, 925, or equivalents; permission of instructor
Activity: Seminar
1 Course Unit

STAT 961 Statistical Methodology
This is a course that prepares 1st year PhD students in statistics for a research career. This is not an applied statistics course. Topics covered include: linear models and their high-dimensional geometry, statistical inference illustrated with linear models, diagnostics for linear models, bootstrap and permutation inference, principal component analysis, smoothing and cross-validation.
Taught by: Buja
Course usually offered in fall term
Prerequisites: STAT 431 or 520 or equivalent; a solid course in linear algebra and a programming language
Activity: Lecture
1 Course Unit

STAT 962 Advanced Methods for Applied Statistics
This course is designed for Ph.D. students in statistics and will cover various advanced methods and models that are useful in applied statistics. Topics for the course will include missing data, measurement error, nonlinear and generalized linear regression models, survival analysis, experimental design, longitudinal studies, building R packages and reproducible research.
Taught by: Small
Course usually offered in spring term
Prerequisite: STAT 961
Activity: Lecture
1 Course Unit

STAT 970 Mathematical Statistics
Decision theory and statistical optimality criteria, sufficiency, point estimation and hypothesis testing methods and theory.
Taught by: Small
Course usually offered in fall term
Prerequisites: STAT 431 or 520 or equivalent; comfort with mathematical proofs (e.g., MATH 360)
Activity: Lecture
1 Course Unit

STAT 971 Introduction to Linear Statistical Models
Taught by: Ma
Course usually offered in spring term
Prerequisite: STAT 970
Activity: Lecture
1 Course Unit

STAT 972 Advanced Topics in Mathematical Statistics
A continuation of STAT 970.
Taught by: Cai
One-term course offered either term
Also Offered As: BSTA 820
Prerequisites: STAT 970 and 971
Activity: Lecture
1 Course Unit

STAT 974 Modern Regression for the Social, Behavioral and Biological Sciences
Function estimation and data exploration using extensions of regression analysis: smoothers, semiparametric and nonparametric regression, and supervised machine learning. Conceptual foundations are addressed as well as hands-on use for data analysis.
Taught by: Berk
Course usually offered in spring term
Also Offered As: CRIM 474, STAT 474
Prerequisites: Two statistics courses at the graduate school level including a solid foundation in the generalized linear model.
Activity: Lecture
1 Course Unit

STAT 991 Seminar in Advanced Application of Statistics
This seminar will be taken by doctoral candidates after the completion of most of their coursework. Topics vary from year to year and are chosen from advance probability, statistical inference, robust methods, and decision theory with principal emphasis on applications.
One-term course offered either term
Activity: Seminar
1 Course Unit

STAT 995 Dissertation
One-term course offered either term
Activity: Dissertation
1 Course Unit

STAT 999 Independent Study
One-term course offered either term
Prerequisites: Written permission of instructor and the department course coordinator.
Activity: Independent Study
1 Course Unit

Tamil (TAML)

TAML 406 Beginning Tamil Part I
This course introduces students to colloquial Tamil and formal written Tamil. A balance between production skills, namely writing and speaking, and comprehension skills, namely reading and listening, will be maintained throughout the course. Reading materials will introduce students to customs and habits of the Tamil speakers in Tamil Nadu, Sri Lanka, Malaysia, and Singapore. Lessons in the class will be based on a set of "Tamil lessons and videos made available at http://www.southasia.upenn.edu/tamil and the book by the Instructor titled "Tamil Language in Context", information available at http://www.thetamillanguage.com. By the end of the semester, students will have a working knowledge in reading Tamil text with a basic skill to write and speak the language at ACTFL's Beginner mid level.
For BA Students: Language Course
Taught by: Renganathan
Course usually offered in fall term
Activity: Lecture
1 Course Unit
TAML 407 Beginning Tamil Part II
This course is a continuation of the Beginner Tamil TAML406. It continues to teach grammar and spoken Tamil from semester I. Lessons in the class will be based on a set of Tamil learning lessons and videos made available at http://www.southasia.upenn.edu/tamil and the book by the instructor titled "Tamil Language in Context," information available at http://www.thetamillanguage.com. By the end of the seminar, students will have a working knowledge in reading Tamil text with a basic skill to write and speak the language at ACTFL's Beginner High level.
For BA Students: Language Course
Taught by: Renganathan
Course usually offered in spring term
Prerequisites: Beginning Tamil Part I or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

TAML 426 Intermediate Tamil Part I
This course develops the skills obtained either from the Beginning Tamil course or from students' prior exposure to Tamil by other means. Basic knowledge of Tamil script, reading and writing in Tamil is required to take this course. Heavy emphasis will be made on using the language in actual environments both in spoken medium and in written medium. Multimedia materials such as audio and video facilities from the book and the website Tamil Language in Context (http://www.southasia.upenn.edu/tamil) will be used to provide students an exposure to the Tamil culture and customs as followed in Tamilnadu, India. Besides improving their speech and writing, students will also be introduced gradually to Tamil literature, which has two thousand years of literary history. The learning process in this course will be facilitated by the lessons and videos as provided in the website and the book. By the end of this course, students will have ACTFL's intermediate mid level proficiency in Tamil.
For BA Students: Language Course
Taught by: Renganathan
Two terms, student must enter first term.
Activity: Lecture
1 Course Unit

TAML 427 Intermediate Tamil Part II
This course is a continuation of Intermediate Tamil I (TAML426) and it continues to develop the skills obtained either from the Beginning Tamil course or from students' prior exposure to Tamil by other means. The emphasis will be on using the language in actual environments both in spoken medium and in written medium. Multimedia materials such as audio and videos as provided in the website http://www.southasia.upenn.edu/tamil or http://www.thetamillanguage.com will be extensively used to provide students an exposure to the Tamil culture and customs as authentic as possible. Besides improving their speech and writing, students will also be introduced gradually to Tamil literature, which has two thousand years of literary history. By the end of this course, students will have ACTFL's intermediate high proficiency level.
For BA Students: Last Language Course
Taught by: Renganathan
Course usually offered in spring term
Prerequisites: Intermediate Tamil Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

TAML 446 Advanced Tamil
This course is a continuation of the Advance Tamil Course I and its primary focus is to concentrate particularly on any one of the genres of the Tamil language namely Sangam, medieval or modern Tamil, which span a vast variety of texts from Aham, Puram, religious poems along with a whole array of Tamil inscriptions. The familiarity from Advanced Tamil course will be adequately used to master in any aspect of these three genres of the Tamil language. Based on the general interests of the students who are enrolled in this course specific variety of the text to concentrate upon will be selected. In the past, we have read poems from the Sangam genre Purananuru, Ahananuru, Silappatikaram, Mahabharata etc., along with the parallel religious poems from Tirumurai, Nalayira Divya Prabandam and so on. We have also read as part of this course texts from Islam literature, Tamil inscriptions and other related kinds. Text from the instructors book (to be published), "IlakkiyapayaNangkal" will be used to give a birds eye view to students about Tamil literature and the transitions that took place from Sangam, medieval and modern period. This course will train students to have a near-native proficiency in Tamil along with a professional skill in any particular variety of the Tamil language.
For BA Students: Advanced Language Course
Course usually offered in spring term
Activity: Lecture
1 Course Unit

Telugu (TELU)

TELU 409 Beginning Telugu Part I
This course introduces students to the basic Telugu language skills, with an emphasis on practice for listening comprehension, and speaking Telugu. Combined with exposure to Andhra culture, the classroom and online work in this course will enable interested students to pursue further language study in Telugu at the intermediate level. To carry out field research in Andhra Pradesh, or to prepare them to advanced work in Telugu Studies. An introduction to Telugu like this will also be useful for students who just want to acquire basic Telugu language skills for learning a new language or being able to communicate with Telugu speaking family and friends or to enjoy Telugu music and films.
For BA Students: Language Course
Taught by: Magier
Course usually offered in fall term
Activity: Lecture
1 Course Unit

TELU 410 Beginning Telugu Part II
This course continues students to the basic Telugu language skills, with an emphasis on practice for listening comprehension, and speaking Telugu. Combined with exposure to Andhra culture, the classroom and online work in this course will enable interested students to pursue further language study in Telugu at the intermediate level. To carry out field research in Andhra Pradesh, or to prepare them to advanced work in Telugu Studies. An introduction to Telugu like this will also be useful for students who just want to acquire basic Telugu language skills for learning a new language or being able to communicate with Telugu speaking family and friends or to enjoy Telugu music and films.
For BA Students: Language Course
Taught by: Magier
Course usually offered in spring term
Activity: Lecture
1 Course Unit
TELU 429 Intermediate Telugu Part I
This course is designed to expand the students’ basic language skills in Telugu in order to allow them to function adequately in a Telugu-speaking environment, to immerse themselves in the rich Andhra culture, and to accomplish a more advanced competency in an interesting foreign language. This course is also aimed at students planning to conduct scholarly research in Telugu history, literature or society, or humanities or social science fieldwork in Telugu speaking areas.
For BA Students: Language Course
Taught by: Majer
Two terms. student must enter first term.
Prerequisites: Beginning Telugu Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Lecture
1 Course Unit

TELU 430 Intermediate Telugu Part II
This course is designed to expand the students’ basic language skills in Telugu in order to allow them to function adequately in a Telugu-speaking environment, to immerse themselves in the rich Andhra culture, and to accomplish a more advanced competency in an interesting foreign language. This course is also aimed at students planning to conduct scholarly research in Telugu history, literature or society, or humanities or social science fieldwork in Telugu speaking areas.
For BA Students: Last Language Course
Taught by: Sundaram
Prerequisites: Intermediate Telugu Part II or equivalent ascertained through placement test or permission of instructor.
Activity: Seminar
1 Course Unit

Theatre Arts (THAR)

THAR 073 Radical Arts: Literature, Visual Arts, Theater and Cinema in the Americas
Also Offered As: ARTH 299, CIMS 073, COML 073, ENGL 073, LALS 073
Activity: Lecture
1 Course Unit

THAR 076 Theatre in Philadelphia
This course will investigate the state of the contemporary, non-profit theatre culture of Philadelphia by examining the history, artistic mission, and current production work of selected city theatre companies. This course will also explore the creative process of theatre-making as undertaken by these theatres through the reading of plays being produced by them this fall, through an analysis of the collaborative contribution of the playwright, director, actors, and designers to the creation of a production, and, finally, through attendance at those productions mounted by the theatre companies under investigation. The members of the class will write individual essays responding to these productions, do research and give group presentations on other Philadelphia theatre companies, and participate daily in a spirited dialogue about the vitality, level of artistic accomplishment, and cultural/social value of contemporary theatre in Philadelphia.
Taught by: Malague and Schlatter
Course not offered every year
Activity: Seminar
1 Course Unit
Notes: Frequently offered as a Freshmen Seminar

THAR 100 Introduction to Theatre Arts
An introduction to different approaches to understanding and analyzing performance, representational theatre, and non-representational theatre, using as test cases both dramatic scripts and live performance. Different aspects of theatre art and theatrical process (acting, design, audience, musical theatre) will be taught by guest lecturers drawn from the Theatre Arts faculty and local professionals.
For BA Students: Arts and Letters Sector
Taught by: Malague and Schlatter
One term course offered either term
Activity: Lecture
1 Course Unit

THAR 101 Theatre, History, Culture I: From Classical to the Middle Classes
This course investigates the history of theatre practice in Europe and Asia from Fifth-Century Athens to roughly the end of the Eighteenth Century. In addition to analyzing major dramatic works, this course examines the evolution of production methods - scenography, acting, costuming, theatre architecture - across cultures and key socio-historical moments. Readings will be drawn from historical research, theoretical writings, plays and contemporary social documents. A particular focus will be on the integral role that the theatre plays as a cultural institution in the ongoing civic life of major cities. The course approaches theatre as broadly interdisciplinary and examines its intersection with religious practice, political developments, national identity, geography, the visual arts and the urban landscape.
For BA Students: Arts and Letters Sector
Also Offered As: ENGL 087
Activity: Lecture
1 Course Unit

THAR 102 Theatre, History, Culture II: Romantics, Realists and Revolutionaries
This course investigates the history of theatre practice from the end of the Eighteenth-Century to the present, with an emphasis on interplay of mainstream practices with the newly emerging aesthetics of acting, scenography, and theatrical theory, and the interplay of popular entertainment and audiences with the self-defined aesthetic elitism of the Avant Garde. Among the aesthetics and phenomena we will examine are romanticism and melodrama; bourgeois realism and revolutionary naturalism; emotional-realist acting; the reaction against realism; political theatre; physical theatre; theatre and media; non-dramatic theatre; and theatre that challenges long-standing categories of national identity, empire, gender, and sexuality.
For BA Students: Arts and Letters Sector
Also Offered As: ENGL 097
Activity: Lecture
1 Course Unit
THAR 114 Playwriting Workshop
This course is designed as a hands-on workshop in the art and craft of
dramatic writing. It involves the study of new plays, the systematic
exploration of such elements as storytelling, plot, structure, theme,
character, dialogue, setting, etc.; and most importantly, the development
of students' own short plays through a series of written assignments and
in-class exercises. Since a great deal of this work takes place in class -
through lectures, discussions, spontaneous writing exercises, and the
reading of student work - weekly attendance and active participation is
crucial. At the end of the semester, students' plays are read in a staged
reading environment by professional actors.
Course usually offered in spring term
Also Offered As: ENGL 114
Activity: Seminar
1 Course Unit

THAR 120 Introduction to Acting
Rooted in the system devised by Constantine Stanislavsky, but
incorporating a wide variety of approaches, including improvisation, this
course takes students step by step through the practical work an actor
must do to live and behave truthfully on stage. Beginning with relaxation
and physical exercise, interactive games, and ensemble building,
students then learn and put into practice basic acting techniques,
including sensory work, the principles of action, objectives, given
circumstances, etc. The semester culminates in the performance of a
scene or scenes, most often from a play from the Realist tradition. This
course strongly stresses a commitment to actor work and responsibility
to one's fellow actors. Practical work is supplemented by readings from
Stanislavsky and a variety of other acting theorists that may include Uta
Hagen, Robert Cohen, Stella Adler, among others. Students are required to
submit short essays over the course of the semester in response to the
readings and in preparation for their final scene project.
Taught by: Ferguson, Malague, Schlatter, and Staff
One term course offered either term
Activity: Seminar
1 Course Unit
Notes: Required of all Theatre Arts Majors

THAR 121 Introduction to Directing
This class will introduce the basic principals of stage directing, beginning
with the fundamentals of three-dimensional storytelling in script and
character analysis. The aim of this course is to provide students with a
basic knowledge of directing through an introduction to the functional
tools of the craft. Classes provide lectures and practical work in dealing
with topics such as the function of the director, analyzing a script, visual
composition, blocking, stage business, and working with actors. This
course is a prerequisite for Advanced Directing.
Taught by: Ferguson, Malague, Mazier, Schlatter and O'Hara
One term course offered either term
Prerequisite: Thar 120
Activity: Seminar
1 Course Unit
Notes: Required of all Theatre Arts Majors

THAR 125 The Play: Structure, Style, Meaning
How does one read a play? Theatre, as a discipline, focuses on the
traditions of live performance. In those traditions, a play text must be
read not only as a piece of literature, but as a kind of "blueprint" from
which productions are built. This course will introduce students to a
variety of approaches to reading plays and performance pieces. Drawing
on a wide range of dramatic texts from different periods and places, we
will examine how plays are made, considering issues such as structure,
genre, style, character, and language, as well as the use of time, space,
and theatrical effects. Although the course is devoted to the reading and
analysis of plays, we will also view selected live and/or filmed versions of
several of the scripts we study, assessing their translation from page to
stage.
Taught by: Malague and Schlatter
One term course offered either term
Also Offered As: ENGL 056
Activity: Lecture
1 Course Unit

THAR 130 Introduction to Light, Set, and Costume Design
Design for theatre (and all of the performing arts) is a dynamic,
collaborative process that engages both intellect and emotion in
staging the dramatic moment. The personal vision of the designer must
navigate the often-uncharted waters of the production process, from the
earliest personal moments of design inspiration to the opening night
performance. Design flows from creativity, is structured by research
and theory, and is realized in living form by collaboration in the dynamic
process of theatre-making. This class will integrate history, theory and
practice of stage design in the interactive setting of the Collaborative
Classroom in Van Pelt Library in this special interdisciplinary, active-
learning course offering open to all Penn students. Group and individual
projects, field visits, practical projects and guest speakers will be featured
in this newly-revised course.
Taught by: Baratta
One term course offered either term
Activity: Seminar
1 Course Unit
Notes: Required of all Theatre Arts Majors

THAR 131 Concepts of Lighting
In this course we will cover the basic concepts of the art and craft
of Stage Lighting Design. As a craft we will examine mechanics and
technology of lighting design including light sources, power distribution,
optics, and control. As an art we will explore how light ties together
all the visual elements of a production and helps create an appropriate
atmosphere that heightens the audience's understanding and enjoyment of
the play. Topics include: what light is, what it does, and how light
influences our perception and understanding of what we see. Exercises
will help the student learn how to see and to understand how light shapes
and affects the appearance people and objects on stage and in everyday
life. Projects work will emphasize design theory and practice (design
methods, script analysis, and drafting skills). Lighting design has its roots
in the theatre. The theatre continues to be a prime training ground for
lighting designers, no matter what their field.
Taught by: Whinney
Course usually offered in fall term
Activity: Seminar
1 Course Unit
THAR 132 Costume
Costume history and design provides a framework for organized study and practice in this particular facet of theatre production. It is a one-semester course, scheduled to meet once a week for a three hour session.
Course usually offered in spring term
Activity: Seminar
1 Course Unit

THAR 133 Concepts of Stage Design
In this course we will cover the basic concepts of Scenic Design for the stage. Scene Design is about the look or physical appearance of the stage for a play. It reflects the way that the stage is composed artistically in regard to props, actors, shapes and color. We will explore Scene Design and the Theatre (story telling, place and local, time and period, society and culture). Scene Design as a Visual Art (principals of design and composition, style, use of space, expression of concept) and examine how it ties together all the visual elements of a production to create an appropriate atmosphere that heightens the audience's understanding and enjoyment of the play. Topics will include: Script Analysis, Technical Production, Period Decor and Ornament, Drawing, Drafting, Model Making; and Scene Painting.
Taught by: Whinnery
Course usually offered in fall term
Activity: Seminar
1 Course Unit

THAR 170 Voice for the Actor
This introductory course is designed to help the actor find new freedom and range of expression with their voice and to connect their voice to their impulse. Our focus on relaxation, sensitivity and awareness, using Fitzmaurice Voicework techniques inspired by yoga and meditation, help the student access and develop their own authentic sound. They will learn how to support their voice in a healthy way, with a view to longevity, spontaneity and flexibility of use. In this course, these kinds of vocal exercises will be applied to short, character monologues, in order to foster sensitivity to our voices and breath and to the habits and tensions we have formed around speaking in public. For an actor, reconnecting with their authentic voice is essential for an honest, connected and compelling performance. This training is also useful for anyone who wants to speak in public with confidence, sincerity and ease.
Taught by: Doherty
Course usually offered in fall term
Prerequisites: THAR 120 or equivalent.
Activity: Seminar
1 Course Unit

THAR 171 Movement for the Actor
The study of the art of bodily expression throughout history in theory and practice, from Classical and Oriental, African and Latin forms of dance and movement theater to the contemporary dance and theater, including mime, modern dance, post modern dance, physical theater, film, and performance art.
Taught by: Fischbeck
Course usually offered in spring term
Activity: Seminar
1 Course Unit
Notes: Primarily for majors. Non-majors need permission of the instructor

THAR 214 Advanced Playwriting
This course is intended to reinforce and build upon the areas covered in Level 1 Playwriting (THAR-114) so that students can refine the skills they've acquired and take them to the next level. Topics covered will include techniques for approaching the first draft, in-depth characterization, dramatic structure, conflict, shaping the action, language/dialogue (incl. subtext, rhythm, imagery, exposition etc), how to analyse your own work as a playwright, dealing with feedback, the drafting process, techniques for rewriting, collaboration (with directors, actors etc) and the 'business of the art' - working with theatres, agents, drammaturgs etc. Students will undertake to write their own one-act plays over the course. The classes will be a mixture of lecture, discussion, study of dramatic texts, writing exercises and in-class analysis of students' work.
Course not offered every year
Also Offered As: ENGL 154
Prerequisite: THAR 114 - Playwriting Workshop or Permit of the instructor
Activity: Lecture
1 Course Unit

THAR 236 Topics in Renaissance Drama: Acting Shakespeare
This is a hands-on studio course designed to empower actors (and directors, designers and drammaturgs) to use the structure of Shakespeare's language and the conventions of Shakespeare's stage to build performance, using the skills and method of the contemporary actor. After the class works collectively on sonnets and speeches, all of the speech- and scene-work will be drawn from a single Shakespeare play (to be determined), with two reciprocal goals: to use the script to build the performance, and to use what we discover through performance to build an interpretation of the script. NOTE: the normal prerequisite for this course is THAR 120 or THAR 121 or their equivalents; but exceptions will be made by permission of the instructor.
Taught by: Mazzer
Course not offered every year
Also Offered As: ENGL 236
Prerequisite: THAR 120 or 121 or their equivalent or Permission of Instructor
Activity: Seminar
1 Course Unit
Notes: This course is not open to freshmen. Instructor permission is required.

THAR 240 Advanced Topics in Theatre History
The purpose of this course is to introduce students to the basic materials and methods of theatre history and historiography, as applied to a particular topic, organized around a specific period, national group, or aesthetic issue. This course is concerned with methodological questions: how the history of theatre can be documented; how primary documents, secondary accounts, and historical and critical analyses can be synthesized; how the various components of the theatrical event—acting, scenography, playwriting, audience composition, the financial and structural organization of the theatre industry, etc.—relate to one another; and how the theatre is socially and culturally constructed as an art form in relation to the politics and culture of a society in a particular time and place.
Taught by: Mazzer
One-term course offered either term
Also Offered As: ENGL 276
Activity: Seminar
1 Course Unit
Notes: This class is the next level up from THAR 140 - Topics in Theatre History.
THAR 250 Theatre Workshop
This course will examine a specific aspect of theatrical practice, taught by a visiting professional theatre artist. The course, with different topics, may be repeated for credit. Recent topics have included performance art, Jacques LeCoq technique, Suzuki, and Viewpoints.
Taught by: Various Theatre Professionals
Course not offered every year
Also Offered As: ENGL 276
Activity: Seminar
1 Course Unit
Notes: Cross-listings are contingent upon topics offered. For the current topics contact the Theatre Arts office.

THAR 271 American Musical Theatre
The American musical is an unapologetically popular art form, but many of the works that come from this tradition have advanced and contributed to the canon of theatre as a whole. In this course we will focus on both music and texts to explore ways in which the musical builds on existing theatrical traditions, as well as alters and reshapes them. Finally, it is precisely because the musical is a popular theatrical form that we can discuss changing public tastes, and the financial pressures inherent in mounting a production. Beginning with early roots in operetta, we will survey the works of prominent writers in the American musical theatre, including Kern, Berlin, Gershwin, Porter, Rodgers, Hart, Hammerstein, Bernstein, Sondheim and others. Class lecture/discussions will be illustrated with recorded examples.
Taught by: Fox
Course not offered every year
Also Offered As: CIMS 271, ENGL 274
Activity: Seminar
1 Course Unit

THAR 272 American Theatre and Performance
This course examines the development of the modern American theatre from the turn of the century to the present day. Progressing decade by decade the course investigates the work of playwrights such as Eugene O’Neil, Arthur Miller, Tennessee Williams, Edward Albee, David Mamet, August Wilson and Tony Kushner; theatre companies such as the Provincetown Players and the Group Theatre, directors, actors, and designers. Some focus will also be given to major theatrical movements such as the Federal Theatre Project, Off-Broadway, regional theatre, experimental theatre of the Sixties, and feminist theatre.
Taught by: Schlatter and Malague
Course not offered every year
Also Offered As: CIMS 273, ENGL 067
Activity: Lecture
1 Course Unit

THAR 274 Dramaturgy
This course will examine the functions and methods of the dramaturg—the person in the theatrical process who advises the artistic collaborators on (among other things) new play development, the structure of the script, the playwright’s biography and other writings, the play’s first production and its subsequent production history, and the historical and regional details of the period depicted in the play’s action. We will study the history of the dramaturg in the American theatre and discuss contemporary issues relating to the dramaturg’s contribution to the theatrical production (including the legal debates about the dramaturg’s contribution to the creation of RENT). And, in creative teams, the class will create dramaturgical portfolios for a season of imaginary (and, potentially, a few actual) theatrical productions.
Taught by: Mazer
Course not offered every year
Also Offered As: ENGL 256
Activity: Seminar
1 Course Unit

THAR 275 Advanced Topics in Theatre
This course will combine an intensive practical and intellectual investigation of some area of the making of theatre: performance techniques, theatrical styles, a particular period of theatre history. Please visit the Theatre Arts Program website for current topics for THAR 275 and other Theatre Arts Courses and special topics: https://theatre.sas.upenn.edu Please visit the Theatre Arts Program website each semester for information on the available THAR 275 special topics courses: https://theatre.sas.upenn.edu
Taught by: Fox, Ferguson, Malague, Mazer, O’Harra & Schlatter
Course not offered every year
Also Offered As: CIMS 225, ENGL 276, HIST 247, URBS 274
Activity: Seminar
1 Course Unit
Notes: This course, which may with different topics, be repeated for credit, will examine a specific aspect of theatrical practice. Recent topics have included performance art, Jacques LeCoq technique, improvisation, and puppetry.

THAR 279 Women in Theatre and Performance
Theatre began as a form that excluded women entirely. The plays of ancient Greece and Elizabethan England were written and performed only by men, beginning a long tradition of theatre that represented women only from male perspectives. Has that tradition been so dominant for so long that women’s voices on stage are still a novelty? This course focuses on a wide range of plays and performances by and about women; the work we read (and view) will evidence artistic attempts to represent women’s lives, experiences and perspectives on the stage. Among the issues encountered and examined in these works are the roles of love, sexuality, friendship, career, community, marriage, motherhood, family, and feminism in women’s lives - as well as the economic and political position(s) of women in society. The course will also offer contextual background on feminist theatre history, theory, and literature, as well as the diverse (and divergent) creative efforts of female artists to use use live performance as a means of creating social and political change.
Taught by: Malague
Course not offered every year
Also Offered As: ENGL 356, GSWS 279
Activity: Seminar
1 Course Unit
Notes: This is a topics class which include: Dangerous Women and Provocative Performance.
THAR 320 Scene Study
Scene Study is an advanced acting class that combines intensive script analysis with performance of scenes; material to be explored will be chosen specifically for the members enrolled in class. Open to students who have successfully completed Introduction to Acting, this course continues with greater emphasis on the actor's work with the text. We will study several plays together as a group, conducting Stanislavskian table work. We will then workshop and perform scenes from these plays in subsequent class sessions. In consultation with the instructor, students will identify individual goals, building on discoveries made in other Theatre Arts courses and/or prior stage work, exploring roles and plays that present actors with new challenges and expand their range. Depending on the number of students enrolled in the class, we are likely to perform at least three scenes and a monologue. Plays will be read alongside key theoretical texts, and class work will be complemented by attendance at selected live productions on campus and in Philadelphia.
Taught by: Malague
Course usually offered in fall term
Prerequisites: THAR 120, THAR 220
Activity: Seminar
1 Course Unit

THAR 321 Acting & Directing Lab
Taught by: O'Hara
Activity: Lecture
1 Course Unit

THAR 350 Rehearsal and Performance
Theatre Rehearsal and Performance provides students with deep intellectual and artistic immersion in the theatrical process through intensive research, rehearsal, and performance of a full-length stage piece. Students may enroll in this course as actors (by audition only) or as assistant directors, stage managers, dramaturgs, or designers (by permission of the instructor). Each semester, the play will be featured in the Theatre Arts Program production season; the class meeting times will vary, but will typically consist of 16-20 hours per week in the evening hours.
Taught by: Ferguson, Fox, Malague, Mazer and Schlatter
One-term course offered either term
Also Offered As: ENGL 256
Activity: Studio

Turkish (TURK)

TURK 021 Elementary Turkish I
This is a course for beginners who have no previous knowledge of Turkish. Using a communicative approach, Elementary Turkish introduces basic vocabulary and grammar rules and focuses on building language competencies in listening, reading, speaking and writing. By the end of the course, students will be able to participate in simple conversations, to know daily expressions, and will understand simple dialogues in day-to-day context and will be able to count and tell time. Will be able to speak about events that happened in the past and express plans for the future. Students will also develop writing strategies that will allow them to write simple letters and fill in commonly-used forms.
For BA Students: Language Course
Taught by: Hatiboglu
Course usually offered in fall term
Also Offered As: TURK 621
Activity: Lecture
1 Course Unit

TURK 022 Elementary Turkish II
This course is a continuation of TURK 021 and is designed to strengthen and extend students’ listening, speaking, reading and writing competence and to deepen an understanding of Turkish people in Turkey. By the end of this course, students will be able to handle a variety of day to day needs in Turkish-speaking settings and engage in simple conversations. Students can expect to be able to order food and drinks, purchase things, and to be able to be familiar with current social topics. Students will be able to talk about all tenses, present, future, past, past continuous, make comparisons, describe people and things in detail, make travel plans, make reservations in hotels and holiday resorts, write complaint letters. By the end of the course, students will be able to talk about their studies and their plans for the future. Also, students will develop reading strategies that should allow them to understand the general meaning of articles, and short literary texts. Students will learn practical life in Turkey and will explore Turkish culture on the internet.
For BA Students: Language Course
Taught by: Hatiboglu
Course usually offered in spring term
Also Offered As: TURK 622
Prerequisites: TURK 021, Elementary Turkish I, or equivalent.
Activity: Lecture
1 Course Unit

TURK 023 Intermediate Turkish I
A continuation of elementary Turkish, with emphasis on grammar and reading. This course is for students who have previous knowledge of Turkish or students who have completed Elementary Turkish I and II. This course is designed to improve students’ writing and speaking competence, to increase vocabulary, to deepen grammar usage and to help develop effective reading and listening strategies in Turkish. Students' Turkish language proficiency and cultural awareness and knowledge will increase by exposing to authentic materials and coursework, and in order give them cultural knowledge, students are exposed to authentic materials.

URBS 046 Urban Sound Studies
Sound is all around us and shapes almost every aspect of our everyday days, and yet, in comparison to our rich descriptions of visual culture, we often lack the explanatory power to analyze and assess the overwhelming influence of the sonic. This introduction to sound studies course will combine a rigorous conceptual and a creative, hands-on approach. We will explore how sound and auditory cultures have been theorized, how soundscapes shape built environments and transmogrify social relations, and how technologies have affected our relationships to sound. The course will focus on urban spaces. Cutting across disciplinary, historical and geographical boundaries, we will cover themes including sound reproduction and mobile technologies, sonic consumption, noise regulation, protest, the politics of listening under Trumpism. We will encounter a wide variety of materials from literary texts to mobile apps and video games, not to mention a vast range of sounds drawn from fieldwork around the world from Las Vegas to Shanghai, Paris to Johannesburg. Alongside written work, you will make fieldwork recordings on the streets of Philadelphia and develop creative projects using media of your choice to reflect upon urban sound.

URBS 050 Womanism and Identity Politics in the Realm of Hip-Hop
This course centers on the intersections of womanism, woman of color identity development, and agency within hip-hop culture. We will touch on several topics that uncover the condition of minoritized women in hip-hop media, including creating/owning space, lyrical assault, defining womanhood, sexuality, and fetishism. In exploring music, literature, advertisements, film, and television, we will discuss the ways women of color construct understandings of self, while navigating and reimagining reality within hip-hop contexts.

Activity: Seminar
1 Course Unit

URBS 103 Industrial Metropolis
Although we no longer think of most U.S. cities as industrial cities, metropolitan areas today are all products of industrial economies, technologies, and social systems. This course explores the industrialization and deindustrialization of American cities within their evolving global context from the era of European colonization to the present. It includes weekly readings and discussion, regular response papers and walking tours, in-class exercises, and a research paper using primary sources. Themes include energy and ecology, labor and production, inner city and suburban development, globalization, and economic restructuring. Ultimately, the class aims to give students a broad knowledge of 1) the history of industrial capitalism, 2) its effects on cities and regions over the past three centuries, and 3) analytical tools for understanding the past, present, and future of metropolitan economies, geography, and society.

1 Course Unit
Notes: Course is available to freshmen and sophomores

URBS 010 Homelessness & Urban Inequality
This freshman seminar examines the homelessness problem from a variety of scientific and policy perspectives. Contemporary homelessness differs significantly from related conditions of destitute poverty during other eras of our nation’s history. Advocates, researchers and policymakers have all played key roles in defining the current problem, measuring its prevalence, and designing interventions to reduce it. The first section of this course examines the definitional and measurement issues, and how they affect our understanding of the scale and composition of the problem. Explanations for homelessness have also been varied, and the second part of the course focuses on examining the merits of some of those explanations, and in particular, the role of the affordable housing crisis. The third section of the course focuses on the dynamics of homelessness, combining evidence from ethnographic studies of how people become homeless and experience homelessness, with quantitative research on the patterns of entry and exit from the condition. The final section of the course turns to the approaches taken by policymakers and advocates to address the problem, and considers the efficacy and quandaries associated with various policy strategies. The course concludes by contemplating the future of homelessness research and public policy.
Taught by: Culhane

URBS 104 The Transformation of Urban America
The course traces the economic, social, and political history of American cities after World War II. It focuses on how the economic problems of the industrial city were compounded by the racial conflicts of the 1950s and 1960s and the fiscal crises of the 1970s. The last part of the course examines the forces that have led to the revitalization of cities in recent years.

Activity: Lecture
1 Course Unit

URBS 106 Freshman Seminar
Topic varies. Fall 2017: This course will examine the fascination with ecology in artistic thinking from late Modernism to the present, with a particular attention to the developing interest in social and environmental systems in the late 1960’s and early 1970’s. From Robert Smithson’s Spiral Jetty to Rachel Carson’s Silent Spring, artists, scholars and activists of this generation were deeply invested in the interconnectedness of life in all its forms. This new sensitivity to the affinities that bind individuals, and our vulnerability to social, political and economic environments, enabled new aesthetic approaches that have continued relevance today. As part of the course, we will meet with a range of artists, curators and institutions in Philadelphia who are continuing these investigations, including the Colored Girls Museum in Germantown and the Health Ecologies Lab here at Penn. No familiarity with contemporary art is required.
Also Offered As: ARTH 100, CIMS 016, ENGL 016

URBS 112 Urban Sociology
This course is a comprehensive introduction to the sociological study of urban areas. This includes more general topics as the rise of cities and theories urbanism, as well as more specific areas of inquiry, including American urbanism, segregation, urban poverty, suburbanization and sprawl, neighborhoods and crime, and immigrant ghettos. The course will also devote significant attention to globalization and the process of urbanization in less developed countries.
Taught by: Flippin
Course not offered every year
Also Offered As: AFRC 011, SOCI 011
Activity: Seminar

URBS 120 Literature of the South Asian City: Space, Culture, Politics
The South Asian city as a way of organizing space and social relations, as a symbol, as a memory is the subject of this course. Through primarily, though by no means exclusively, readings of literature in translation, we will gain a sense for the history of the city and the ways in which it is a setting for protest and nostalgia, social transformation and solitude?meurie. We will see reflections of the city in poetry recited in its homes, detective novels sold in its train stations, stories scribbled in its cafes, plays staged in its theaters, and films produced in its backlots. Readings will attempt to address urban spaces across South Asia, and will include works by writers such as Mirza Ghalib, Rabindranath Tagore, Saadat Hasan Manto, and Vijay Tendulkar. We will examine these works in the context of secondary readings, including histories and ethnological works that take up life in the modern city. Students will finish this course prepared to pursue projects dealing with the urban from multiple disciplinary perspectives. This course is suitable for anyone interested in the culture, society, or literature of South Asia, and assumes no background in South Asian languages.
Taught by: Goulding
One term course offered either term
Also Offered As: COML 114, SAST 120
Activity: Lecture
1 Course Unit

URBS 121 Origin and Culture of Cities
The UN estimates that 2.9 of the world’s 6.1 billion people live in cities and that this percentage is rapidly increasing in many parts of the world. This course examines urban life and urban problems by providing anthropological perspectives on this distinctive form of human association and land use. First we will examine the "origin" of cities, focusing on several of the places where cities first developed, including Mesopotamia and the Valley of Mexico. We will then investigate the internal structure of non-industrial cities by looking at case studies from around the world and from connections between the cities of the past and the city in which we live and work today.

Course usually offered in fall term
Also Offered As: ANTH 121, NELC 103
Activity: Lecture
1 Course Unit
URBS 122 The City in South Asia
This interdisciplinary social science course examines key topics, themes, and analytic methods in the study of South Asia by focusing on significant South Asian cities. With one-fifth of the world's population, South Asia and its urban centers are playing an increasingly important role in recent global economic transformations, resulting in fundamental changes within both the subcontinent and the larger world. Drawing primarily on ethnographic studies of South Asia in the context of rapid historical change, the course also incorporates research drawn from urban studies, architecture, political science, and history, as well as fiction and film. Topics include globalization and new economic dynamics in South Asia; the formation of a new urban middle class; consumption and consumer culture; urban political formations, democratic institutions, and practices; criminality & the underworld; population growth, changes in the built environment, and demographic shifts; everyday life in South Asia and ethnic, and ethnic, cultural, and linguistic identities, differences, and violence in South Asia's urban environments. This is an introductory level course appropriate for students with no background in South Asia or for those seeking to better understand South Asia's urban environments in the context of recent globalization and rapid historical changes. No prerequisites. Fulfills College sector requirement in Society and foundational approach in Cross-Cultural Analysis.

URBS 136 Urban Politics in the United States
This course focuses on political responses to urbanization in the United States. Topics include local government, national urban politics, and the changing nature of cities.
For BA Students: Society Sector
Taught by: Reed
Course usually offered in spring term
Also Offered As: AFRC 136, PSCI 136
Activity: Lecture
1 Course Unit

URBS 139 Ancient Civilizations of the World
This course explores the archaeology (material culture) of early complex societies or civilizations in Egypt, Mesopotamia, and the Aegean. According to the traditional paradigm, civilization first emerged during the fourth millennium BCE in Egypt and Mesopotamia. In the Mediterranean, state-level societies first appeared in Crete and mainland Greece in the early second millennium BCE. This course investigates how and why these civilizations developed, as well as their appearance and structure in the early historic (or literate) phases of their existence. A comparative perspective will illustrate what these early civilizations have in common and the ways in which they are unique. This course will consist largely of lectures which will outline classic archaeological and anthropological theories on state formation, before turning to examine the available archaeological (and textual) data on emerging complexity in Egypt, Mesopotamia, and the Aegean. This course does not presuppose any knowledge of archaeology or ancient languages; the instructor will provide any background necessary. Because this is a course on material culture, some of the class periods will be spent at the Penn Museum of Archaeology and Anthropology. These will consist of a guided tour of a relevant gallery, as well as a hands-on object-based lab with archaeological materials selected by the instructor. This course meets the General Education Curriculums Cross Cultural Analysis foundational approach, whose aim is to help students understand and interpret the cultures of peoples (even long-dead peoples) with histories different from their own; it also fulfills the History and Tradition Sector breadth requirement.
For BA Students: History and Tradition Sector
Taught by: Zettler
Course not offered every year
Also Offered As: ANTH 139, NELC 182
Activity: Lecture

URBS 160 Race and Ethnic Relations
The course will focus on race and ethnicity in the United States. We begin with a brief history of racial categorization and immigration to the U.S. The course continues by examining a number of topics including racial and ethnic identity, interracial and interethnic friendships and marriage, racial attitudes, mass media images, residential segregation, educational stratification, and labor market outcomes. The course will include discussions of African Americans, Whites, Hispanics, Asian Americans and multiracial.

Notes: Previously URBS 214
This seminar will examine the experiences of recent African immigrants and refugees in Philadelphia in an historical framework. We will employ a variety of sources: newspapers, census data, legal briefs, literature and film, and diaspora internet sites to explore the lives, aspirations, and perceptions of Philadelphia's African residents. There will be opportunities for dialogue with high school students, teachers, and parents; with representatives of African community and business organizations; and with local government and service agencies. Students will be required to do a final project which involves volunteering with an African immigrant non-profit or business and/or conducting focused research on specific African communities in Philadelphia. 
Taught by: Cassanelli
Course not offered every year
Also Offered As: AFRC 167, AFST 167, HIST 167
Activity: Seminar
1 Course Unit

URBS 171 The Socialist City
This course will explore the ideology and politics of the socialist city in the Soviet Union, East Europe, and the Second World. We will focus on how design professionals, politicians, and residents realized utopian socialist values in the face of national design traditions, local politics, and limited resources. Beginning with the Soviet case, the course will consider how planners and architects addressed modernization, multi-family housing, and neighborhood units in new city plans. We will consider capitals, like Moscow, as well as less well-known regional centers that had strong local identities, such as Tashkent, Belgrade, and Prague. We will examine the state's use of public spaces for commemorations and preservationists' reinterpretation of existing historic sites. In addition, we will consider how everyday residents experienced the socialist city, such as multi-family housing, shopping centers, and subway systems. We will address how citizens circumvented official state channels to obtain state housing and illegally build homes for themselves, sometimes in a folk style. The course will center on Soviet and East European cities, but also address socialist cities in Cuba and Africa whose design was influenced by transnational exchanges.
Most broadly, this course explores the question, what was the socialist city? How did its planners, architects, and politicians understand it, and what did they intend to construct? And, what resulted? In the past fifteen years, North American scholars have begun to take seriously the study of the socialist city, and this course draws on the emerging scholarship on this exciting, cross-disciplinary topic. How do scholars understand the socialist city today? We will examine the shared legacies that socialist cities across East Europe shared with their Western European counterparts, as well as the particularities of design that have sparked North American scholars' debates on what distinguished the socialist city from ones that emerged in a capitalist context. In our discussions, we will seek to understand how socialist design professionals understood their work and the emerging cities at the time, as well as how North American scholars view the socialist city today. Disciplinarily, the focus of the call will fall at the intersection of architectural history and politics.

URBS 178 Faculty-Student Collaborative Action Seminar in Urban University-Community Relations
One of the goals of this seminar is to help students develop their capacity to solve strategic, real-world problems by working collaboratively in the classroom, on campus, and in the West Philadelphia community. Research teams help contribute to the improvement of education on campus and in the community, as well as the improvement of university-community relations. Among other responsibilities, students focus their community service on college and career readiness at West Philadelphia High School and Sayre High School. Students are typically engaged in academically based community service learning at the schools for two hours each week.

URBS 180 Asian American Food
You are what you eat. Asian American Food explores the history, politics, and ethnic identity of food through a cultural lens. Growing food, eating, and sharing meals serve as intimate expressions of self and community. By examining the production and consumption of food, the course investigates the ways that Asian Americans navigate traditions, gender norms, religious dietary laws, food habits, and employment as they create lives in the United States. The course overviews the history of Asian American foodways, but has a particular focus on Philadelphia’s Asian American communities.

URBS 181 Comparative Cultures of Sustainability
Sustainability is more than science, engineering, policy, and design. Surveying the world, we see that the politics and practice of sustainability play out in different ways depending on cultural factors. Some cultures are more prone to pursue ecological goals than others. Why? Do the environmental history and experience of a nation affect policy? Do nature and the environment play a crucial role in the cultural memory of a nation? Can cultural components be effectively leveraged in order to win approval for a politics of sustainability? And what can we, as residents of a country where climate change and global warming are flashpoints in an enduring culture war, learn from other cultures? This course is designed to equip undergraduate students with the historical and cultural tools necessary to understand the cultural aspects of sustainability in two countries noted for their ecological leadership and cultural innovation, Germany and the Netherlands. This hybrid course combines online instruction with a short-term study abroad experience in Berlin and Rotterdam. During the pre-trip online portion of the course, students will become acquainted with the cultural histories of German and Dutch attitudes toward sustainability and the environment through a combination of recorded lectures by the instructor, reading assignments, viewing assignments (documentary and feature films), threaded discussions, and short written assignments. The goal of the pre-trip instruction is to help students develop tools for analyzing and interpreting cultural difference, construct working models of German and Dutch concepts of sustainability, and formulate hypotheses about the relation between culture and policy in Germany and the Netherlands.
Taught by: Richter

Notes: Summer abroad course.

URBS 200 Urban Research Methods
This course will examine different ways of undertaking urban research. The goal will be to link substantive research questions to appropriate data and research methods. Computer-based quantitative methods, demographic techniques, mapping / GIS and qualitative approaches will be covered in this course. Student assignments will focus on constructing a neighborhood case study of a community experiencing rapid neighborhood change.
One-term course offered either term
Activity: Seminar
1 Course Unit
Notes: Fulfills Quantitative Data Analysis Requirement

URBS 202 Urban Education
This seminar focuses on two main questions: 1) How have US schools and urban ones in particular continued to reproduce inequalities rather than ameliorating them? 2) In the informational age, how do the systems affecting education need to change to create more successful and equitable outcomes? The course is designed to bridge the divide between theory and practice. Each class session looks at issues of equity in relation to an area of practice (e.g. lesson design, curriculum planning, fostering positive student identities, classroom management, school funding, policy planning...), while bringing theoretical frames to bear from the fields of education, sociology, anthropology and psychology. Among the theoretical frames students will learn will be the tools of systems thinking (Bertalanffy, 1968). While most of us have internalized the key lesson of the industrial revolution that to understand something we must break it into its parts; systems thinking, in contrast, is about understanding the parts in relation to whole. The power of systems thinking is that each point of connection also serves as a point of intervention. By showing the importance of decisions of those within classrooms and those outside of them, this course is well-suited to students of education, but also any who seek a role in creating a more just society.
Taught by: Michael Clapper
One-term course offered either term

URBS 203 Introduction to City Planning: Planning Urban Spaces
This course will provide a general introduction to the concepts and practice of city planning. Topics to be discussed include: the process and nature of planning - theories, methods and roles as manifested in practice; history and trends in city planning; functional planning practice; planning within constraints--a field project; planning in the international arena; present crisis in planning.
Taught by: Gorostiza
Course usually offered summer term only
Activity: Seminar
1 Course Unit

URBS 204 Urban Law
This course will focus on selected aspects of urban law that are particularly relevant to areas of high population density. After an introduction to the American judicial system, it will examine the legal issues that arise in the management of land development and use, with special attention to constitutional questions involving equal protection, due process, and the "taking" clause, and routine run-of-the-mill zoning challenges. This course meets the Cultural Diversity requirement.
Taught by: Keene
Course usually offered in fall term
Activity: Lecture
1 Course Unit
URBS 205 People and Design
The built environment of a city is more than a mere backdrop; the design can actually affect people’s experiences. Environmental design primarily focuses on the relationship between people and the built environment. It also looks at how the built environment interacts with the natural one (and the potential for greater sustainability). This course will allow students to gain a deeper understanding of how people create, perceive, and use the designed environment. We’ll approach these concepts by analyzing design at a variety of scales, from products to interior design to architecture. Finally, using that knowledge, we’ll conclude by analyzing urban spaces of the city.
Taught by: Berman
Course usually offered in spring term
Activity: Seminar
1 Course Unit

URBS 206 Public Environment of Cities: An Introduction to the Urban Landscape
This course will explore the role of public spaces - streets, boulevards, parks and squares - in cities and their social uses. With the University of Pennsylvania campus and the City of Philadelphia serving as our laboratory, we will critically examine the evolution of the movement of corridors, open space and buildings of the urban landscape and their changing uses. Case studies of social spaces on campus and public open spaces in Center City will help inform our understanding of how public environment serves, well or poorly, the varying needs of diverse users. While graphic skills are not required, graphic means as well as writing will be employed to communicate critical thought, ideas, and conclusions.
Taught by: Nairn
Course usually offered in spring term
Also Offered As: URBS 506
Activity: Seminar
1 Course Unit

URBS 207 Asian American Communities
Who is Asian American and how and where do we recognize Asian America? This interdisciplinary course explores the multiple factors that define Asian American identity and community. In order to provide a sketch of the multifaceted experience of this growing minority group, we will discuss a wide variety of texts from scholarly, artistic, and popular (film, cinematic) sources that mark key moments in the cultural history of Asia America. The course will address major themes of community life including migration history, Asian American as model minority, race, class, and transnational scope of Asian America. In combination with the readings, this class will foster and promote independent research based on site visits to various Asian American communities in Philadelphia and will host community leaders as guest lecturers.

Notes: Also fulfills General Requirement in Society for Class of 2009 and prior

URBS 213 Urban Ethnography: Capturing the Cultures of Cities
With its multi-ethnic neighborhoods and rich cultural life, Philadelphia is an ideal site for learning how to carry out urban ethnography. In the course, students will understand the ethnographic approach and learn skills to conduct their own ethnography as they explore urban life and culture in the nation’s sixth largest city. The course is structured as a seminar in which students will read ethnographic studies of Philadelphia and other urban settings. With our focus on the urban landscape, we will gain an appreciation for the macro processes, such as globalization, that shape the city. Ethnography attends to such processes as well as how humans experience them. The class will explore various themes, including the ethnic city, the gendered city, the contested city, the sacred city, the global city, and the aesthetic and expressive city. In addition to reading assignments, we will look at images, videos, and online material. Students will design and execute their own ethnographic fieldwork project on an urban topic that interests them. Through step-by-step instruction throughout the semester, students will learn qualitative research techniques such as field notes, participant-observation, interviewing, and how to interpret their own data, so that they will be able to complete their semester project.
Taught by: Saverino
Course not offered every year
Also Offered As: URBS 513
Activity: Seminar
1 Course Unit

URBS 216 Social Entrepreneurship
Amidst perceptions that public sector and philanthropic support for local communities is increasingly scarce, many community development practitioners are turning to social enterprise as a means to improve social and economic conditions in their neighborhoods. This course will do a deep dive into the segment of social enterprises addressing workforce development and job creation challenges, especially as they relate to returning citizens and other vulnerable adults, including several planned field visits. Building on their understanding of these fields, students will then divide into groups for a hands-on course project.
Taught by: Mandujano
Course not offered every year
Activity: Seminar
1 Course Unit
URBS 219 The Heart of Social Change
The Heart of Social Change: Experiments in Urban Development, Activism, and Social Entrepreneurship will seek to challenge those who desire to work for social change to consider how they may not only employ their heads and their hands, but also their hearts as they work to improve the aspects of contemporary society that mean the most to them. This seminar-based class will examine past and contemporary examples of heart-based activism, urban development and social entrepreneurship yet it will also be a space where students will be asked to experiment with ways that they too may be change agents.
Taught by: Charles Howard
Course not offered every year
Activity: Seminar
1 Course Unit

URBS 220 Jews and the City: Advanced Benjamin Franklin Seminar
Jews have always been an extraordinarily urban people. This seminar explores various aspects of the Jewish encounter with the city, examining the ways that Jewish culture has been shaped by and has helped to shape urban culture. We will examine European and American cities as well as some in Palestine/Israel, covering an expansive view of urban culture. We will consider Jewish involvement in political and cultural life, the various neighborhoods in which Jews have lived, relations with other ethnic groups, as well as many other topics. We will read some classic works in the field along with contemporary scholarship. No prior background in Jewish history is required. *This course may be applied toward the US, European, or Middle East requirements for the History Major or Minor, depending upon the research paper topic. Students must consult with the instructor to determine which geographic requirement will be fulfilled.*

URBS 236 Iraq: Ancient Cities and Empires
This course consists of an analytical survey of civilization in the ancient Mesopotamia from prehistoric periods to the middle centuries of the first millennium B.C. A strong focus is placed on Mesopotamia (Iraq, eastern Syria) proper, but it occasionally covers its adjacent regions, including Anatolia (Turkey), north-central Syria, and the Levantine coast. As we chronologically examine the origin and development of civilization in the region, various social, political, economic, and ideological topics will be explored, including subsistence, cosmology, writing, trade, technology, war, private life, burial custom, and empire. Based on both archaeological and historical evidence, these topics will be examined from archaeological, anthropological, historical and art historical perspectives. Students will be exposed to a variety of theoretical approaches and types of relevant evidence, including settlement survey data, excavated architectural remains and artifacts, and written documents. The course aims to provide students with a strong foundation for further study in Near Eastern civilization.
Taught by: Zettler
Course not offered every year
Also Offered As: ANTH 236, NELC 241
Activity: Lecture
1 Course Unit

URBS 237 Berlin: History, Politics, Culture
What do you know about Berlin’s history, architecture, culture, and political life? The present course will offer a survey of the history of Prussia, beginning with the seventeenth century, and the unification of the small towns of Berlin and koeln to establish a new capital for this country. It will tell the story of Berlin’s rising political prominence in the eighteenth century, its transformation into an industrial city in the late nineteenth century, its rise to metropolis in the early twentieth century, its history during the Third Reich, and the post-war cold war period. The course will conclude its historical survey with a consideration of Berlin’s position as a capital in reunified Germany. The historical survey will be supplemented by a study of Berlin’s urban structure, its significant architecture from the eighteenth century (i.e. Schinkel) to the nineteenth (new worker’s housing, garden suburbs) and twentieth centuries (Bauhaus, Speer designs, postwar rebuilding, GDR housing projects, post-unification building boom). In addition, we will read literary texts about the city, and consider the visual art and music created in and about Berlin. Indeed, Berlin will be a specific example to explore German history and cultural life of the last 300 years. The course will be interdisciplinary with the fields of German Studies, history, history of art, and urban studies. It is also designed as a preparation for undergraduate students who are considering spending a junior semester with the Penn Abroad Program in Berlin.

URBS 250 Urban Public Policy. Philadelphia -- A Case Study
An introduction to a broad range of substantive policy areas affecting the city, and an exploration into the complexities of policy formulation and implementation in a large and pluralistic metropolitan setting. The course subtitle, "Philadelphia -- A Case Study," describes our approach. Donna Cooper leads the region's foremost child advocacy organization focused on poverty, child welfare and education issues, she formerly served as the Deputy Mayor for Policy for the City of Philadelphia, and Secretary of Policy of the Commonwealth of Pennsylvania.
Taught by: Donna Cooper
One term course offered either term
Activity: Seminar
1 Course Unit

URBS 252 Urban Journalism
This course will examine the state of urban journalism today with special emphasis on how large newspapers are redefining themselves, and the news, in an era of dwindling readership and growing financial pressures. The course will look at online journalism, ethics, and alternative sources of news, and will explore the techniques journalists use in reporting the news. Students will report and write four pieces of their own about Philadelphia and its environs. The course is taught by Dan Biddle, the Philadelphia Inquirer's former politics editor, an award-winning journalist for 40 years.
Taught by: Biddle
Course usually offered in spring term
Activity: Seminar
1 Course Unit

URBS 253 Cities, Suburbs, Regions
This course will explore the political, economic, social, and demographic forces impacting development patterns in metropolitan areas, with a particular focus on Philadelphia. We will examine the government policies, economic forces, and social attitudes that affect the way a region grows, and the impact of these forces on poverty, equity and segregation. Specific topics to be discussed include the factors that make a region competitive, the city's changing role in the region, the impact place has on opportunity, and approaches to revitalizing and improving communities.

Course offered spring; even-numbered years
Also Offered As: SOCI 254
Activity: Seminar
1 Course Unit

URBS 264 Poverty, Race and Health
This course is designed to introduce students to current literature on race/ethnic difference in health and mortality in the United States, covering such topics as explanations for why some race/ethnic groups fare better than others, how inner city poverty and residential segregation may contribute to racial/ethnic differences in health outcomes, and health of immigrants versus native-born populations. Current policy debated and recent policy developments related to health are also briefly discussed. The course is organized as a seminar with a combination of lectures and class discussions.
Taught by: Jaeger
Course not offered every year
Also Offered As: SOCI 264
Activity: Seminar
1 Course Unit

URBS 270 The Immigrant City
Immigration is among the most important phenomena shaping neighborhoods, cities, and regions. Understanding migration is fundamental to understanding urbanization, community development, and urban society today. This course examines the development of immigrant communities in United States cities and suburbs. Class readings, discussions, and visits to a variety of Philadelphia immigrant neighborhoods explore themes including labor markets, commerce, housing, civil society, racial and ethnic relations, integration, and the public sphere. We study the diverse dynamics and impacts of immigration through foundational readings and close observation of various newcomer and receiving communities. The first part of the course surveys migration and community formation among a broad range of ethnic groups in different sorts of city and suburban neighborhoods, mainly through history, sociology, and geography. The second part focuses on public policy and community and economic development practices related to migration at the local, regional, national, and transnational scales.
For BA Students: Society Sector
Taught by: Vitello, Domenic
Course usually offered in spring term

Activity: Seminar
1 Course Unit

URBS 273 Advanced Non-Fiction Writing
Writing with a view to publication in the freelance sections of newspapers such as THE PHILADELPHIA INQUIRER and THE NEW YORK TIMES, in magazines such as THE ATLANTIC and THE NEW YORKER, and in the literary quarterlys and the journals of opinion. Among the areas likely to be considered are writing as a public act, issues of taste and of privacy, questions of ethics and of policy, methods of research and of checking, excerpting, marketing, and the realistic understanding of assignments and of the publishing world. Student papers will be the basis of weekly editorial sessions, with concentration on the language: how to render material literate, how to recognize and dispose of padding and self-indulgence, how to tighten structure and amplify substance. See the English Department's website at www.english.upenn.edu for a description of the current offerings.
Course not offered every year
Also Offered As: AFRC 145, ENGL 145
Activity: Seminar
1 Course Unit
Notes: This course is not open to freshmen. May be repeated for credit with a different instructor.
URBS 274 Advanced Topics in Theatre
This course will combine an intensive practical and intellectual investigation of some area of the making of theatre: performance techniques, theatrical styles, a particular period of theatre history. For the current topics contact the Theatre Arts office or visit the website. One section of 275 every other Spring will consist of a small number of Theatre Arts majors selected by the faculty to become members of "the Edinburgh Project." This ensemble will mount a production that will be performed at the Edinburgh Festival Fringe in August. Many of the readings and exercises in this course will be geared to prepare for production; rehearsals for the project will continue after the exam period at the end of the semester.
Taught by: Fox, Ferguson, Malague, Mazer, Schlatter
Course not offered every year
Also Offered As: THAR 275
Activity: Seminar
1 Course Unit
Notes: This course, with different topics, may be repeated for credit. Please look at the program website for the current semester's topic(s).

URBS 280 Neighborhood Dynamics of Crime
Crime varies in time, space and populations as it reflects ecological structures and the routine social interactions that occur in daily life. Concentrations of crime can be found among locations, with antisocial activities like assaults and theft occurring at higher rates because of the demographic make-up of people (e.g. adolescents) or conflicts (e.g. competing gangs), for reasons examined by ecological criminoology. Variation in socio-demographic structures (age, education ratios, and the concentration of poverty) and the physical environment (housing segregation, density of bars, street lighting) predicts variations between neighborhoods in the level of crime and disorder. Both ethnographic and quantitative research methods are used to explore the connections between the social and physical environment of areas and antisocial behavior.
Taught by: Loeffler
Course usually offered in spring term
Also Offered As: CRIM 280
Activity: Seminar
1 Course Unit

URBS 290 Metropolitan Nature
In order to understand the complex and often skewed relationship between the built and natural systems, we must think in processes and examine different scales simultaneously. The course explores urban sustainability and resilience. At its core, sustainability is a radical concept that integrates the economy, equity (social justice), and the environment. Co-opted by marketing slogans, stripped of meaning and context, it has become vague and pliable. Sustainability and resilience demand a holistic systems view of the world. The course focuses on communities such as New Orleans and Eastwick where urban development has focused on economic concerns at the expense of the environment and equity resulting in unintended, and sometimes, catastrophic consequences.
Students will have the opportunity to interact with community residents who have organized to develop strategies to address these ongoing issues.
Taught by: Naam
Course usually offered in fall term
Activity: Seminar
1 Course Unit

URBS 294 Cities of the Future: Urbanization in the Global South
This course examines the futures of urbanization in most of the world. With cities in "developing" countries set to absorb 95% of urban population growth in the next generation, the course explores the plans, spaces and social experiences of this dramatic urban century. How do proliferating urban populations sustain themselves in the cities of Latin America, Africa and Asia? What kinds of social and political claims do these populations make more just and sustainable cities? The course investigates the ongoing experiences in urban planning, infrastructure development and environmental governance in cities of the Global South.
In so doing, it imagines new forms of citizenship, development and sustainability that are currently unfolding in these cities of the future.
Taught by: Anand
Course not offered every year
Also Offered As: ANTH 294
Activity: Seminar
1 Course Unit

URBS 300 Fieldwork Seminar
Students work 15 hours per week in field placement and meet weekly with class and instructors. The class is intended to help students reflect from a variety of perspectives on the work that they are doing in their placement organizations. The class format is primarily discussion. Students are required to complete assigned readings, prepare written and oral presentations, and submit a final project.
Course usually offered in spring term
Activity: Seminar
2 Course Units
Notes: Urban Studies majors and minors only.

URBS 320 Who Gets Elected and Why? The Science of Politics
What does it take to get elected to office? What are the key elements of a successful political campaign? What are the crucial issues guiding campaigns and elections in the U.S. at the beginning of the 21st century? This class will address the process and results of electoral politics at the local, state, and federal levels. Course participants will study the stages and strategies of running for public office and will discuss the various influences on getting elected, including: Campaign finance and fundraising, demographics, polling, the media, staffing, economics, and party organization. Each week we will be joined by guest speakers who are nationally recognized professionals, with expertise in different areas of the campaign and election process. Students will also analyze campaign case studies and the career of the instructor himself, Edward G. Rendell is the former Mayor of Philadelphia, former Chair of the Democratic National Committee, and former Governor of Pennsylvania.
Taught by: Rendell
Course usually offered in fall term
Also Offered As: GAFS 509, PSCI 320
Activity: Lecture
1 Course Unit
URBS 321 Urban Ethnography: Documenting The City of Brotherly Love
How do qualitative social scientists study urban communities? What kinds of powerful tales can be told about urban lifestyles and social issues/conflicts in places like Philadelphia? This course will allow students to study various ethnographic treatments of urban communities in the United States, using films, articles, TV serials, and books as guides for the framing of their own independent research on the streets of Philadelphia. Students will also form production teams of two or three people, and these production teams will be responsible for (i) identifying and researching an important urban issue in contemporary Philadelphia and (ii) turning that research into a 15-30 minute radio documentary that will be broadcast on a local Philadelphia radio station, WURD 900AM. Mixing radio/audio journalism with ethnographic methods, will enhance their skills at archival and social research, participant observation, interviewing techniques, sound editing, and production. This course is intended to be a rigorous and exciting opportunity for students to tell empirically grounded stories using the voices of their subjects and the sounds of the city. Potential texts include: Sidewalk (a book and documentary film by Mitchell) and Mitchell Duneier), Righteous Dopefiend (a book and museum exhibit by Philippe Bourgois), and excerpts from other ethnographic work by Ana Ramos-Zayas, Elijah Anderson, Todd Wolfson, David Grazian, Seth Low, Ulf Hannerz, Leith Mullings, John Gwaltney, Dana-ain Davis, Carol Stack, Melissa Checker, Katherine S. Newman, and others. By Permission Only.
Taught by: Jackson
Also Offered As: ANTH 320
Prerequisite: COMM 220 or permission of instructor
Activity: Seminar
1 Course Unit

URBS 322 The Big Picture: Mural Arts in Philadelphia
The history and practice of the contemporary mural movement couples step-by-step analysis of the process of designing with painting a mural. In addition, students will learn to see mural art as a tool for social change. This course combines theory with practice. Students will design and paint a large outdoor mural in West Philadelphia in collaboration with Philadelphia high school students and community groups. The instructor, Jane Golden, is the founder and Director of the Philadelphia Mural Arts Program.
Taught by: Golden/Walinsky
One-term course offered either term
Also Offered As: FNAR 222, FNAR 622
Activity: Seminar
1 Course Unit
Notes: Previously URBS 222. The Undergraduate Fine Arts Department will now include a $75 fee for this course.

URBS 323 Tutoring School: Theory and Practice
This course represents an opportunity for students to participate in academically-based community service involving tutoring in a West Phila. public school. This course will serve a need for those students who are already tutoring through the West Phila. Tutoring Project or other campus tutoring. It will also be available to individuals who are interested in tutoring for the first time.
Taught by: Parker, Cheryl
Course usually offered in fall term
Also Offered As: EDUC 323
Activity: Seminar
1 Course Unit

URBS 326 Tutoring in Urban Public Elementary Schools: A Child Development Perspective
The course provides an opportunity for undergraduate students to participate in academically based community service learning. Student will be studying early childhood development and learning while providing direct, one-to-one tutoring services to young students in Philadelphia public elementary schools. The course will cover foundational dimensions of the cognitive and social development of preschool and elementary school students from a multicultural perspective. The course will place a special emphasis on the multiple contexts that influence children’s development and learning and how aspects of classroom environment (i.e., curriculum and classroom management strategies) can impact children’s achievement. Also, student will consider a range of larger issues impacting urban education embedded in American society.
The course structure has three major components: (1) lecture related directly to readings on early childhood development and key observation and listening skills necessary for effective tutoring, (2) weekly contact with a preschool or elementary school student as a volunteer tutor and active consideration of how to enhance the student learning, and (3) discussion and reflection of personal and societal issues related to being a volunteer tutor in a large urban public school.
Taught by: Fantuzzo
Course usually offered in spring term
Also Offered As: EDUC 326
Activity: Seminar
1 Course Unit

URBS 330 GIS Applications in Social Science
This course will introduce students to the principles behind Geographic Information Science and applications of GIS in the social sciences. Examples of GIS applications in social services, public health, criminology, real estate, environmental justice, education, history, and urban studies will be used to illustrate how GIS integrates, displays, and facilitates analysis of spatial data through maps and descriptive statistics. Students will learn to create data sets through primary and secondary data collection, map their own data, and create maps to answer research questions. The course will consist of a combination of lecture and lab.
Taught by: tba
Course usually offered in fall term
Also Offered As: URBS 530
Activity: Seminar
1 Course Unit
Notes: Fulfills the Qualitative Data Analysis Requirement
URBS 352 Food Habits in Philadelphia Communities: Exploring Eating and Changing Food Habits in Philadelphia Middle Schools
In this course, Penn undergraduates will explore and examine food habits, the intersection of culture, family, history, and the various meanings of food and eating, by working with a middle-school class in the Philadelphia public schools. The goal of the course will be to learn about the food habits of a diverse local community, to explore that community’s history of food and eating, and to consider ways and means for understanding and changing food habits. Middle school students will learn about the food environment and about why culture matters when we talk about food. Topics include traditional and modern foodways, ethnic cuisine in America, food preferences, and ‘American cuisine’. The course integrates classroom work about food culture and anthropological practice with frequent trips to middle school where undergraduates will collaborate with students, their teachers, and a teacher partner from the Agatson Urban Nutrition Initiative (UNI). Students will be required to attend one of two time blocks each week to fulfill the service learning requirement times TBA. Undergraduates will be responsible for weekly writing assignments responding to learning experience in the course, for preparing materials to use middle school children, being participant-learners with the middle school children, and for a final research project. The material for the course will address the ideas underlying university-community engagement, the relationships that exist between food/eating and culture, and research methods. Taught by: Kauer
One-term course offered either term
Also Offered As: ANTH 252
Activity: Seminar
1 Course Unit

URBS 359 Nutritional Anthropology
This course will explore the significance as it relates to food behaviors and nutritional status in contemporary human populations. The topics covered will be examined from a biocultural perspective and include 1) definition and functions of nutrients and how different cultures perceive nutrients, 2) basic principles of human growth and development, 3) methods to assess dietary intake, 4) food taboos, 5) feeding practices of infants and children, 6) food marketing, 7) causes and consequences of under- and over-nutrition, and 8) food insecurity and hunger. Course not offered every year
Also Offered As: ANTH 359
Activity: Seminar
1 Course Unit

URBS 367 Philadelphia, 1700-2000
Using Philadelphia as a lens, this course will examine the transformation of American cities from the colonial period to the present. Through readings, lectures, and tours, we will consider urbanization and suburbanization, race, class, and ethnicity, economic development, poverty and inequality, housing and neighborhood change, urban institutions, and politics and public policy. Taught by: Sugue
Course not offered every year
Also Offered As: HIST 367, SOCI 367
Activity: Lecture
1 Course Unit

URBS 390 Urban Agriculture
Urban Agriculture is a growing global trend. This course examines urban agriculture as an issue of sustainability, social justice, public health, and vacant land. It explores the potential of urban agriculture in both the Global North and South to provide a safe and secure source of food to city residents. Major topics include sustainable agricultural practices, operational and spatial requirements, distribution systems, and access to fresh food. Using Philadelphia as a laboratory, the course explores its robust agricultural scene of community gardens, guerilla gardens, and entrepreneurial farms, as well as its distribution system including programs such as City harvest, the emerging Common Market, and established farmers’ markets. The course will integrate lectures about sustainable agricultural practices with field trips to and hands-on work at community gardens and farms. Taught by: Nairn
Course usually offered summer term only
Activity: Seminar
1 Course Unit

URBS 400 Senior Seminar
Urban Studies senior research project
Taught by: Grossman/McGlone/Simon
Course usually offered in fall term
Prerequisite: URBS 200; URBS 300
Activity: Seminar
1 Course Unit

URBS 401 Urban Studies Honors
Students in the fall Urban Studies Senior Seminar (URBS400) whose papers are exceptional and show promise for publication will be invited to participate in the spring honors seminar. If they choose to participate, honors seminar participants will revise and refine their research papers with the goal of their work for publication in an academic journal relevant to the topic. The seminar meets periodically during the semester, structured around a set of assignments geared to facilitate the process of revision. Students will be assigned to read each other’s work and meetings take the form of a workshop with students reporting on progress and providing feedback to improve and develop each other’s papers. In addition to completing the revised paper for a grade, participants in the honors seminar are required to present their work to a wider Urban Studies audience in a special session at the end of the semester and to provide documentation that they have submitted their papers for publication. Students who successfully complete the honors seminar will graduate with distinction in the major; noted on their transcripts and in the graduation materials. Taught by: Simon
Course usually offered in spring term
Prerequisite: URBS 400
Activity: Seminar
1 Course Unit
URBS 404 Philanthropy and the City
This course will focus on how urban communities are shaped by the nonprofit sector and the billions of philanthropic dollars that fuel their work. By bridging theory and practice, the class explores what dynamics are at play to deliver vital services or programs in healthcare, education, the arts, community development, and other issues. The course will also focus on these important questions: (1) Whose responsibility is the public good? How is that responsibility shared by the public, private, and nonprofit sectors? and (2) Given that responsibility for the public good, which individuals and groups make the decisions about how to serve the public good? How are these decisions made, and who benefits from these decisions? Students will consider these questions in an interdisciplinary context that will bring a historical and philosophical perspective to the examination of the values and institutions that characterize the contemporary philanthropy and the nonprofit sector.
Taught by: Bauer/Goldman
Course usually offered in fall term
Also Offered As: NPLD 797
Activity: Seminar
1 Course Unit

URBS 405 Religion, Social Justice & Urban Development
Urban development has been influenced by religious conceptions of social and economic justice. Progressive traditions within Judaism, Christianity, Islam, Buddhism, Hinduism, Jainism, Bahai, Humanism and other religions and systems of moral thought have yielded powerful critiques of oppression and hierarchy as well as alternative economic frameworks for ownership, governance, production, labor, and community. Historical and contemporary case studies from the Americas, Europe, Africa, Asia, and the Middle East will be considered, as we examine the ways in which religious responses to poverty, inequality, and ecological destruction have generated new forms of resistance and development.
Taught by: Lamas
Course usually offered in spring term
Also Offered As: AFRIC 405, RELS 439
Activity: Seminar
1 Course Unit

URBS 412 Building Non-Profits: The Business of a Mission-Driven Organization
This course will cover the basic elements of building and growing a non-profit organization, including the development of the mission and the board; needs assessment, program design, development, and management; financial management, contract compliance and understanding an audit, fundraising, public, foundation, corporate, and individual; communication and marketing; organizational administration (including staff and volunteer selection, management and development); public policy, research and advocacy. Students will make site visits and engage role play, in addition to research and writing.
Taught by: Goldman, Greg
Course usually offered summer term only
Activity: Lecture
1 Course Unit

URBS 415 Urban Real Estate Markets
Cities evolve over time, comprised of various inputs of different sizes at different stages of urban evolution. However, as cities continue to diversify and navigate real estate market cycles, opportunities to redefine the urban context, while promoting the individual brand, become more sensitive. Projects are increasingly complex, often involving multiple partnerships among private developers, public agencies, non-profits, and community groups. Today’s development professionals need to be well-versed across a variety of disciplines and property types to effectively execute in an urban environment. As an introductory course in real estate development, this course will provide the underpinnings for critical decision-making in markets that change frequently and often unevenly - whether for financing, investing, development, public policy formulation, or asset management/disposition.
Taught by: Packard
Course usually offered in spring term
Activity: Seminar
1 Course Unit

URBS 417 Cities and Sustainability
A good idea is not enough - developing innovative and sustainable projects in cities requires understanding "how to get things done." Developing projects to promote sustainability in major US cities requires sensitivity to the political and operational context within which cities implement innovative initiatives. Cities and Sustainability uses Philadelphia as a case study to explore the issues confronting modern American metropolises as they look to manage their resources and promote environmentally friendly policies. URBS 417 will introduce students to leading Philadelphia practitioners of sustainability and municipal projects. Students will be given the tools to politically, economically and critically analyze various sustainable policy initiatives across the United States.
Taught by: Ben-Amos
Course usually offered in spring term
Activity: Seminar
1 Course Unit

URBS 419 Transportation & American Society
Transportation affects every aspect of American society; from how we get to work or school, to how we shop and play. Transportation policy at all levels of American government has serious implications for social justice and economic development. Moreover, some of today's most intense political battles center on transportation policy across America and within its cities, be it funding High Speed Rail in California or placing bike lanes in the heart of Manhattan. Transportation and American Society will expose students to the role transportation has played in the development of America and its cities as well as its impact on politics and society.
Taught by: Ben-Amos
Course usually offered in fall term
Activity: Lecture
1 Course Unit
URBS 420 Perspectives on Urban Poverty
This course provides an interdisciplinary introduction to 20th century urban poverty, and 20th century urban poverty knowledge. In addition to providing an historical overview of American poverty, the course is primarily concerned with the ways in which historical, cultural, political, racial, social, spatial/geographical, and economic forces have either shaped or been left out of contemporary debates on urban poverty. Of great importance, the course will evaluate competing analytic trends in the social sciences and their respective implications in terms of the question of what can be known about urban poverty in the contexts of social policy and practice, academic research, and the broader social imaginary. We will critically analyze a wide body of literature that theorizes and explains urban poverty. Course readings span the disciplines of sociology, anthropology, urban studies, history, and social welfare. Primacy will be granted to critical analysis and deconstruction of course texts, particularly with regard to the ways in which knowledge creates, sustains, and constrains meaningful channels of action in urban poverty policy and practice interventions.

Taught by: Faibanks
Course usually offered in fall term
Also Offered As: HIST 440, SOCI 420
Activity: Seminar
1 Course Unit

URBS 428 Undergraduate Urban Research Colloquium
A seminar run in conjunction with the Institute for Urban Research at Penn, students will learn about the range of cutting-edge topics in urbanism that Penn faculty are working on and work closely with a faculty member on current research. Students will learn about new topics and methods in interdisciplinary urban research, and get first-hand experience collecting urban data under the close supervision of an experienced researcher. Students and faculty jointly will present their findings for discussion. This course is a good introduction for how to frame and conduct an urban research project.

Course usually offered in spring term
Also Offered As: CPLN 528
Activity: Seminar
1 Course Unit

URBS 431 Mapping Philadelphia
Philadelphia is a city that was mapped before it was built, inhabited before it was developed. Founder William Penn’s original concept for the gridded city continues to inform the historical evolution of Philadelphia, even as city planners, architects, artists, and social justice activists work to transform the layers of our built environment. This class will study the city through a variety of archival maps, historical mapping practices, and emergent digital approaches to representing space and time. We will explore public history projects that seek approaches to place-making and place-keeping at neighborhood intersections, share dialogue with social practice artists who produce site-specific works, and visualize civic data through platforms such as OpenDataPhilly. Each student will pursue a final research project resulting in a close study of a particular street or intersection in the city.

Taught by: Paul Farber
Course not offered every year
Activity: Seminar
1 Course Unit

URBS 435 The Political Economy of Urban Development
This course provides an introduction to the economic and political theories that have come to shape, for better or for worse, the spatial characteristics of late 20th century urbanism. It is intended to offer a range of analytical approaches to understanding the urban structures and processes that strategies of community-based organizers and urban policy planners seek to influence. The course focuses on postwar U.S. cities (Chicago and other Midwestern/Northeast rust belt cities in particular), though a number of readings explore these issues in broader contexts. As a way to further understand postwar US urbanism, we will expand our focus briefly to the geopolitical/international scale during the weeks on neoliberalism and microfinance. Urban political economy refers to different theoretical traditions within the social sciences that explain urban development in terms of the relationship between markets, states, and community actors (or, civil society).

Part I of the course covers four different theories of modern political economy. Neoclassical, Keynesian, Marxist, and Neoliberal. Our purpose is to provide a framework for political economic analysis and an historical foundation for understanding postwar transformation. Part II of the course grounds the foundational material of Part I by tracing the economic and political forces that have shaped postwar urban development trends in Northeastern and Midwestern cities (especially Chicago, Detroit, Philadelphia and NY). Particular attention will be given to issues such as race, suburbanization, deindustrialization, welfare state retrenchment, gentrification, and public housing transformation. Part III examines a range of contemporary (post 1970) approaches to urban development, focusing on processes of neoliberalization, neo-clientalism, urban informality, sub prime mortgage lending, and microfinance.

Taught by: Faibanks
Course not offered every year
Activity: Lecture
1 Course Unit

URBS 440 Introduction to City Planning: Past, Present and Future
Orientation to the profession, tracing the evolution of city and regional planning from its late nineteenth century roots to its twentieth century expression. Field trips included.

Taught by: Vitello or Ammon
Course usually offered in fall term
Also Offered As: CPLN 500
Activity: Lecture
1 Course Unit

URBS 448 Neighborhood Displacement and Community Power
This course uses the history of black displacement to examine community power and advocacy. It examines the methods of advocacy (e.g. case, class, and legislative) and political action through which community activists can influence social policy development and community and institutional change. The course also analyzes selected strategies and tactics of change and seeks to develop alternative roles in the group advocacy, lobbying, public education and public relations, electoral politics, coalition building, and legal and ethical dilemmas in political action. Case studies of neighborhood displacement serve as central means of examining course topics.

Taught by: Palmer
Course usually offered in spring term
Also Offered As: AFRC 448
Activity: Seminar
1 Course Unit
URBS 450 Urban Redevelopment
This course will consider urban redevelopment from the early 20th century to the present day, looking at ways the economic, political, and social underpinnings of redevelopment practice have changed over that time. From the City Beautiful movement to Transit Oriented Development, the course will look at why and how the public, private, and non-profit sectors have intervened in urban neighborhoods, and will contemplate consequences - positive and negative - of those interventions. Students will be introduced to some of the technical aspects of redevelopment, including architecture/design, planning, and financing. The class will be in seminar format, mixing lecture, discussion, and guest speakers. The course requirements include a mid-term paper, an in-class charrette, and a final development project.
Taught by: Rachlin, Andrew
Course usually offered in spring term
Activity: Seminar
1 Course Unit

URBS 451 The Politics of Housing and Urban Development
This course offers an exploration of how legislative action, government policymaking, and citizen advocacy influence plans for the investment of public capital in distressed urban neighborhoods. Course topics this semester will include an evaluation of the results of City of Philadelphia development policies under the administration of former Mayor Michael A. Nutter, as well as consideration of plans being undertaken by the administration of Mayor James F. Kenney, who took office in January. The course will also include an assessment of a large-scale property acquisition and development strategy being implemented by the Philadelphia Housing Authority in North Philadelphia and a review of recent and current reinvestment proposals for Camden's waterfront and downtown-area neighborhoods.
Taught by: Kromer
Course usually offered in fall term
Also Offered As: CPLN 625, GAFL 569
Activity: Lecture
1 Course Unit

URBS 452 Community Economic Development
Community economic development concerns the revitalization of impoverished communities. As with all things economic, poor and working people may be the subjects or the objects of development. We will utilize case studies from Philadelphia and around the world in an exploration of various models of economic justice and sustainable development.
Taught by: Lamas
Course usually offered in fall term
Activity: Seminar
1 Course Unit

URBS 453 Metropolitan Growth and Poverty
This course analyzes the role of metropolitan regions in the U.S. and global economies, including the sources of metropolitan productivity, the ways that metropolitan structures affect residents, and analyses of public policy in metropolitan areas. The economic, political, and social forces that have shaped World War II urban and regional development are explored, including technology, demography, and government. Special attention is paid to how metropolitan change affects residents by income and race. Topics include: gentrification, schools, suburbanization, sprawl, metropolitan fragmentation, concentration of poverty, race, and various economic revitalization initiatives.
Taught by: Madden
Course not offered every year
Also Offered As: SOCI 453, URBS 543
Activity: Seminar
1 Course Unit

URBS 454 City Limits: The Impact of Urban Policy
This course assesses the changing role of public policy in American cities. In the past, government often believed that it could direct urban development. New realities - the rise of an informal labor market, global capital and labor flows, the flight of businesses and the middle class to the suburbs - have demonstrated that government must see itself as one - but only one - 'player' in a more complete, transactional process of policy making that crosses political boundaries and involves business, organized interest groups, and citizens. This seminar uses a case-study method to study how public policy can make a difference in the revitalization of distressed American cities. The seminar is designed for advanced undergraduates and graduate students. Seminar readings and projects will be organized around three themes: 1) history and vision, 2) data and analysis, and 3) policy and implementation. Students will be divided into project teams assigned to work on current development issues that will be reviewed by both public and private-sector experts. Extensive use will be made of real estate, economic development, and social indicator data to understand the complex forces at work in both large and small cities. Students will learn to access, analyze, and map information; to frame and interpret these data within a regional perspective; and to construct profiles of cities and neighborhoods. Students will study recent urban redevelopment initiatives in the Philadelphia region, including Philadelphia's Neighborhood Transformations Initiative and New Jersey's Camden Revitalization plans.
Taught by: Goldstein, Stern
Course usually offered in spring term
Also Offered As: SWRK 712, URBS 554
Prerequisite: Student must have taken an introduction to research methods course
Activity: Seminar
1 Course Unit
URBS 457 Globalization & The City: Global Urbanization
In 2008, the UN estimated that the world's population had become primarily urban, the first time in history. According to the OECD, by the end of the century, close to 85% of the projected population will live in cities. The transition towards an urban planet is likely to have far-reaching economic, environmental, social, political, and cultural impacts on our species, many of which we cannot yet predict. But what is urbanization? Will it lead to more inequality, exploitation, conflict, resource consumption, and exposure to natural disasters and climate change, or is it an opportunity to move the world in a more sustainable and equitable direction? Taught by Chandan Deuskar and Patricio Zambrano Barragan, this course aims to explore these questions. In the first half of the semester, we will discuss various challenges associated with global urbanization and its impacts, and in the second half, we will focus on responses to these challenges. The assignments will allow students to explore some of the most salient debates around global urbanization. By the end of the semester, students will be better able to understand the context for any future academic research, professional work, or business activities in the cities of the 'developed world.' The course will help provide a foundation for any students considering graduate studies or professional work in the fields of urban planning or international development.

Taught by: Chandan Deuskar and Patricio Zambrano Barragan

URBS 473 History & Theory of Community Organizing
Power is the ability to create change. This course will integrate the history and theories of community organizing so that each student will be able to develop a transformational praxis. We will examine social inequality and intersectionality, and explore effective strategies in organizing for social change. This course is inter-disciplinary, involving political economy, sociology, history, social work and leadership theory. Inquiry-based and problem-posing methods will serve as the primary means of formative assessment.

Taught by: Becker
Course not offered every year
Also Offered As: SOCI 473
Activity: Seminar
1 Course Unit

URBS 476 Urban Housing & Community Development Policy in America
This course examines how public policy influences housing markets and how markets influence public policy. The course reviews the development of housing policy since World War II and how shifts in policy have influenced people's ability to find suitable shelter. Topics include: poverty and affordability, residential racism, civil rights in housing, the financial crisis of 2008, mortgage foreclosures, affordable housing, and homelessness. The course focuses on the changing roles of different levels of government in housing policy and how the financial sector, the construction industry, and non-governmental organizations influence Americans' housing options.

Taught by: Stern, Goldstein
Course not offered every year
Activity: Seminar
1 Course Unit

URBS 480 Liberation and Ownership
Who is going to own what we all have a part of creating? The history of the Americas, and of all peoples everywhere, is an evolving answer to the question of ownership. Ownership is about: the ties that bind and those that separate; production, participation, and control; the creation of community and the imposition of hierarchies—racial, sexual, and others; dreams of possessing and the burdens of debt and ecological despoliation; dependency and the slave yearning to breathe free. Of all the issues relevant to democracy, oppression, injustice, and inequality, ownership is arguably the most important and least understood. Utilizing a variety of disciplinary perspectives—with a particular emphasis on radical and critical theories of liberation, and by focusing on particular global sites and processes of capitalization, students will assess and refine their views regarding ownership and liberation in light of their own social, political, religious, aesthetic, and ethical commitments.

Taught by: Lamas
Course usually offered in fall term
Also Offered As: AFRC 480
Activity: Seminar
1 Course Unit

URBS 501 Community Partnerships in Visual Arts & Education
This course will connect students with artists from the 40th Street Artist-in-Residence (AIR) program, which provides free studio space and in exchange asks residents to share their talents with the local community. This course is designated as an Agricultural-Based Service Learning (ABCS) class, meaning that students will be evaluated partly on their work in the community outreach situation. Course registration is open to advanced undergraduates.

Taught by: Epstein
Also Offered As: EDUC 501
Activity: Seminar
1 Course Unit

URBS 506 Public Environment of Cities: An Introduction to the Urban Landscape
This course will explore the role of public spaces - streets, boulevards, parks and squares - in cities and their social uses. With the University of Pennsylvania campus and the City of Philadelphia serving as our laboratory, we will critically examine the evolution of the movement of corridors, open space and buildings of the urban landscape and their changing uses. Case studies of social spaces on campus and public open spaces in Center City will help inform our understanding of how public environmental serves, well or poorly, the varying needs of diverse users. While graphic skills are not required, graphic means as well as writing will be employed to communicate critical thought, ideas, and conclusions.

Taught by: Nairn
Course not offered every year
Also Offered As: URBS 206
Activity: Seminar
1 Course Unit
URBS 513 Urban Ethnography
Using Philadelphia as the site of students' praxis, this course explores the symbolic meanings and social production of urban life and culture in the nation's fifth largest city. This course is structured as a seminar with ethnographic background readings from Philadelphia and other urban settings to introduce students to the study of the city as a site of everyday practice, as well as training in conducting an ethnographic fieldwork project. The urban landscape provides an intensification of macro processes such as globalization. Such processes and how humans experience them are more easily studied and understood in an urban setting. The class will explore social relational and cultural themes such as the ethnic city, the gendered city, the contested city, the sacred city, the global city, and the aesthetic and expressive city. A diverse range of reading assignments, images, and videos will augment our understandings of urban life. Students will design and execute their own ethnographic fieldwork projects on an urban topic that interests them. Through step-by-step instruction throughout the semester, students will learn qualitative research techniques such as field notes, participant-observation, interviewing, and how to interpret their own data, so that they will be able to complete their semester project.

Taught by: Saverino
Course not offered every year
Also Offered As: FOLK 513, URBS 213

1 Course Unit

URBS 516 Public Interest Workshop
This is a Public Interest Ethnography workshop (originally created by Peggy Reeves Sanyah - Department of Anthropology) that incorporates an interdisciplinary approach to exploring social issues. Open to graduate and advanced undergraduate students, the workshop is a response to Amy Gutmann's call for interdisciplinary cooperation across the University and to the Department of Anthropology's commitment to developing public interest research and practice as a disciplinary theme. Rooted in the rubric of public interest social science, the course focuses on: 1) merging problem solving with theory and analysis in the interest of change motivated by a commitment to social justice, racial harmony, equality, and human rights; and 2) engaging in public debate on human issues to make the research results accessible to a broad audience. The workshop brings in guest speakers and will incorporate original ethnographic research to merge theory with action. Students are encouraged to apply the framing model to a public interest research and action topic of their choice. This is an academically-based-community-service (ABCS) course that partners directly with Penn's Netter Center Community Partnerships.

URBS 524 Metro Labor Markets
This course examines contemporary labor markets through two thematic lenses. One is the growing discussion of knowledge industries and "knowledge workers" and their importance to regional innovative capacity and competitive advantage in a global economy. The other is the persistent challenge of unemployment, underemployment and working poverty within metropolitan regions. In exploring these themes, readings for the class synthesize perspectives on work, labor markets and economic growth from economics, sociology, history and political science. Class lecture and discussion, supplemented by the occasional guest practitioner, will focus on translating academic research into knowledge that can be used in local economic and community development practice.

Taught by: Wolf-Powers
Course usually offered in spring term
Also Offered As: CPLN 624
Activity: Seminar
1 Course Unit

URBS 530 GIS Applications in Social Science
This course will introduce students to the principles behind Geographic Information Science and applications of (GIS) in the social sciences. Examples of GIS applications in social services, public health, criminology, real estate, environmental justice, education, history and urban studies will be used to illustrate how GIS integrates, displays, and facilitates analysis of spatial data through maps and descriptive statistics. Students will learn to create data sets through primary and secondary data collection, map their own data, and create maps to answer research questions. The course will consist of a combination of lecture and lab.

Taught by: Hillier
Course usually offered in fall term
Also Offered As: URBS 330
Activity: Seminar
1 Course Unit
URBS 544 Public Environmental Humanities
This broadly interdisciplinary course is designed for Graduate and Undergraduate Fellows in the Penn Program in Environmental Humanities (PPEH) who hail from departments across Arts and Sciences as well as other schools at the university. The course is also open to others with permission of the instructors. Work in environmental humanities by necessity spans academic disciplines. By design, it can also address and engage publics beyond traditional academic settings. This seminar, with limited enrollment, explores best practices in public environmental humanities. Students receive close mentoring to develop and execute cross-disciplinary public engagement projects on the environment. In spring 2018, participants have the opportunity to participate in PPEH's public engagement projects on urban waters and environmental data. These ongoing projects document the variety of uses that Philadelphians make of federal climate and environmental data, in and beyond city government; they also shine light on climate and environmental challenges our city faces and the kinds of data we need to address them. Working with five community partners across Philadelphia, including the City’s Office of Sustainability, students in this course will develop data use stories and surface the specific environmental questions neighborhoods have and the kinds of data they find useful. The course hosts guest speakers and research partners from related public engagement projects across the planet; community neighborhood, open data, and open science advocates; and project partners in government in the City of Philadelphia and Commonwealth of Pennsylvania. Course assignments include: * 2 short-form essays (course blog posts); * a 12-hour research stay (conducted over multiple visits) with a community course partner to canvas data uses and desires; * authorship of 3 multimedia data stories; * co-organization and participation in a city-wide data storytelling event on May 2, 2018.

Taught by: Wiggin
Course not offered every year
Also Offered As: ANTH 543, COML 562, GRMN 544
Activity: Seminar
1 Course Unit

URBS 547 Anthropology and Education
An introduction to the intent, approach, and contribution of anthropology to the study of socialization and schooling in cross-cultural perspective. Education is examined in traditional, colonial, and complex industrial societies.

Taught by: Hall or Posecznick
One-term course offered either term
Also Offered As: ANTH 547, EDUC 547
Activity: Lecture
1 Course Unit

URBS 554 City Limits: The Impact of Urban Policy
This course examines the changing role of public policy in American cities. In the past, government often believed that it could direct urban development. New realities - the rise of an informal labor market, global capital and labor flows, the flight of businesses and the middle class to the suburbs - have demonstrated that government must see itself as one - but only one - 'player' in a more complete, transactional process of policy making that crosses political boundaries and involves business, organized interest groups, and citizens. This seminar uses a case study method to study how public policy can make a difference in the revitalization of distressed American cities. The seminar is designed for advanced undergraduates and graduate students. Seminar readings and projects will be organized around three themes: 1) history and vision, 2) data and analysis, and 3) policy and implementation. Students will be divided into project teams assigned to work on current development issues that will be reviewed by both public and private sector experts. Extensive use will be made of real estate, economic development, and social indicator data to understand the complex forces at work in both large and small cities. Students will learn to access, analyze, and map information; to frame and interpret these data within a regional perspective; and to construct profiles of cities and neighborhoods. Students will study recent urban redevelopment initiatives in the Philadelphia region - including Philadelphia's Neighborhood Transformations Initiative and New Jersey's Camden Revitalization plans.

Taught by: Goldstein, Stern
Course usually offered in spring term
Also Offered As: URBS 454
Prerequisite: Student must have taken a research methods course
Activity: Seminar
1 Course Unit

URBS 608 Urban Studies Proseminar
Open to PhD students, this scholar-oriented seminar explores how academic researchers from different disciplines define researchable questions, craft research designs, and contribute to knowledge through an examination of important and/or recently published books and monographs with an urban focus. Required of all doctoral students enrolled in the Urban Studies Graduate Certificate Program. Enrollment is limited to 15 students. Other doctoral students may enroll on a space available basis. Course requirements include completion of a major research paper on a topic selected in consultation with the instructor.

Taught by: Stern
Course usually offered in spring term
Also Offered As: CPLN 800, HIST 608
Activity: Seminar
1 Course Unit
URBS 614 Weimar Landscapes
This new course is designed for students of literature, landscape architecture and urban planning, and cultural history in general. It will explore the ideas of, and attitudes towards, landscape in selected works by Wolfgang Goethe, and consider his own considerable practical involvement in reshaping the town and gardens of Weimar. The course will provide the larger context of German literature, aesthetics and landscape taste, and politics of the later 18th and early 19th centuries. We will consider the development of new gardens and parks in a "new" style (e.g. Wöritz); they were regarded to be less formal and more "natural" than their French predecessors. We will study the English models for this movement, and offer particular attention to the major German theorist, C.C.L. Hirschfeld, who soon became famous outside Germany as well.
Taught by: Weissberg/Hunt
Course not offered every year
Also Offered As: ARTH 782, COML 615, ENGL 584, GRMN 614, LARP 770
Activity: Seminar
1 Course Unit

URBS 619 Critical Perspectives in Contemporary Urban Education
The focus of this course is the conditions for teaching and learning in urban public schools, current theories of pedagogy in urban education, and perspectives on urban reform efforts.
Taught by: Schultz
One term course offered either term
Also Offered As: EDUC 619
Activity: Lecture
1 Course Unit

URBS 706 Culture/Power/Subjectivities
This doctoral level course will introduce students to a conceptual language and theoretical tools for analyzing and explaining the complex intersection of racialized, ethnic, gendered, sexual, and classed differences and asymmetrical social relations. The students will examine critically the interrelationships between culture, power, and subjectivity through a close reading of classical and contemporary social theory. Emphasis will be given to assessing the power of various theories for conceptualizing and explaining mechanisms of social stratification as well as the basis of social order and processes of social change.
Taught by: Hall
One term course offered either term
Also Offered As: ANTH 704, COML 706, EDUC 706, FOLK 706
Prerequisite: EDUC 547
Activity: Lecture
1 Course Unit

Urdu (URDU)

URDU 401 Beginning Urdu-Hindi, Part I
This introductory course core proficiency in Hindi-Urdu up to the intermediate level. It is designed for students with little or no prior exposure to Hindi or Urdu. The course covers all four language skills (speaking, listening, reading, and writing) and all three models of communication (interpersonal, presentation, interpretive). Students will develop literacy skills in the primary script of their choice (Hindi or Urdu script). All written materials will be provided in both scripts. All meetings are interactive and students acquire the language by using it in realistic contexts. Culture is embedded in the activities and is also introduced through various authentic materials.
For BA Students: Language Course
Taught by: Pien
Two terms. student must enter first term.
Also Offered As: HIND 400, NELC 401
Activity: Lecture
1 Course Unit

URDU 402 Beginning Hindi-Urdu Part II
This introductory course core proficiency in Hindi-Urdu up to the intermediate level. It is designed for students with little or no prior exposure to Hindi or Urdu. The course covers all four language skills (speaking, listening, reading, and writing) and all three models of communication (interpersonal, presentation, interpretive). Students will develop literacy skills in the primary script of their choice (Hindi or Urdu script). All written materials will be provided in both scripts. All meetings are interactive and students acquire the language by using it in realistic contexts. Culture is embedded in the activities and is also introduced through various authentic materials.
For BA Students: Language Course
Taught by: Pien
Two terms. student must enter first term.
Also Offered As: HIND 401, NELC 402
Prerequisites: Beginning Hindi or Urdu or equivalent ascertainment through placement test or permission of instructor.
Activity: Lecture
1 Course Unit

URDU 421 Intermediate Urdu Part I
This course allows students to continue improving their Urdu proficiency while also gaining a broad foundational understanding of Urdu society and culture throughout South Asia. The course provides students the tools needed to handle a variety of authentic written and spoken Urdu sources including film, music, media reports, folk tales, and simple literature. Students will also continue to increase their speaking and writing proficiency to be able to discuss a broad range of concrete, real-world topics. The course is designed for students with one year previous Urdu or Hindi study or the equivalent proficiency. Students with speaking ability in Urdu or Hindi but without reading/writing skills are encouraged to contact the instructor for placement.
For BA Students: Language Course
Taught by: Menai
Two terms. student must enter first term.
Also Offered As: NELC 421
Prerequisites: Beginning Hindi or Urdu or equivalent ascertainment through placement test or permission of instructor.
Activity: Lecture
1 Course Unit
URDU 422 Intermediate Urdu Part II
This continuing second-year course allows students to continue improving their Urdu proficiency while also gaining a broad foundational understanding of Urdu society and culture throughout South Asia. The course provides students the tools needed to handle a variety of authentic written and spoken Urdu sources including film, music, media reports, folk tales, and simple literature. Students will also continue to increase their speaking and writing proficiency to be able to discuss a broad range of concrete, real-world topics. The course is designed for students with one year of previous Urdu or Hindi study or the equivalent proficiency.
For BA Students: Last Language Course
Taught by: Menai
Two terms. student must enter first term.
Also Offered As: NELC 422
Activity: Seminar
1 Course Unit

URDU 431 Advanced Urdu Language and Literature
This course is designed to give in-depth exposure to some of the finest works of classical and modern Urdu prose and poetry along with the historical and socio-political trends they represent. Figures covered range from Ghalib (b.1797) to Faiz, Fahmida Riaz, and post 9/11 Urdu prose and poetry. The course is open to both undergraduates and graduate students, subject to having intermediate level proficiency. The course is repeatable, and the content changes every semester. Multimedia content such as music, videos, blogs etc. will be actively incorporated. Every effort will be made to accommodate individual interests. Students are encouraged to contact the instructor with any questions, or if they are unsure about eligibility.
For BA Students: Advanced Language Course
Taught by: Menai
Course usually offered in fall term
Also Offered As: NELC 431
Prerequisite: Intermediate Urdu or equivalent ascertained through placement test or permission of instructor
Activity: Lecture
1 Course Unit
Notes: Intermediate reading, writing and speaking skills in Urdu are recommended but please contact the instructor if you are unsure of your eligibility and want to discuss further. Topic changes each semester

URDU 452 Urdu Literature in Translation
This course will look at Urdu-Hindi expressions of resistance to militant fundamentalism trends, as well as literature resisting the influence of liberal progressive thought. Through comparisons of these divergent trends, we will explore the real inceptions, comfortable comprises and contradictions that are internalized by people on the ground in developing societies. The historical and linguistic roots of resistance poetry will be studied, contrasting South Asian Urdu-Hindi poetry and prose (original and translated) with resistance movements from other parts of the world. This course provides students with the opportunity to deepen their knowledge of Urdu culture, literature, and society while expanding and refining their Urdu language skills. We will explore various social, political, and cultural issues through authentic sources such as journalism and media, prose literature and poetry, and film and music. The course is designed to be flexible to address students’ needs and interests. It targets students with two years of Urdu study or the equivalent proficiency.
Taught by: Menai
Course not offered every year
Prerequisites: Intermediate reading, writing and speaking skills in Urdu are recommended but please contact the instructor if you are unsure of your eligibility and want to discuss further.
Activity: Seminar
1 Course Unit

URDU 462 Urdu Topics Course
Topics vary by semester in advanced level Urdu.
Taught by: Menai
Course not offered every year
Prerequisites: Advanced proficiency in Urdu either through successful completion of URDU 431, Advanced URDU, or proficiency exam, or approval of instructor
Activity: Lecture
1 Course Unit

Veterinary & Biomedical Sciences (VBMS)

VBMS 601 Gross Anatomy - Structural Adaptations to Function
This course is an intensive study by dissection of the gross anatomy of the dog, cat, horse, and goat. In addition, there is one laboratory session dedicated to the chicken. Functional and clinical considerations are intercalated throughout the laboratories. The lectures elucidate selected aspects of specific organ systems under study in the laboratory, stressing theoretical, functional or comparative rather than descriptive aspects of anatomy. Radiographic anatomy is also presented in the course with the assistance of the radiology residents. All first-year students will have free access to the Easy Anatomy program, an interactive 3-D anatomy study guide for the complete canine, through the course page. Taught by Drs. Grandstaff, Orsini and Staff
Two terms. student must enter first term.
Activity: Lecture
11 Credit Hours
VBMS 602 Histological Basis of Pathology
This course covers microscopic anatomy of tissues and organ systems of mammals important in veterinary medicine, e.g. dog, cat, mouse, rat, horse and cow. The central thread in the course is light microscopic structure as observed in standard stains, but this picture is amplified by electron microscopy, special stains and histochemistry. The material is presented, through lecture and laboratory, from the point of view of experimental biology, cell function, and disease. The course reveals that the structure or histology of the tissues of an animal's body is not an arbitrary assemblage of cells but rather the structural expression of the diverse cell types that interact to carry out the functions of the body. Thus, through the microscopic study of the structure of tissues (histology) the functions of the tissues of the body may be inferred.
Taught by: Drs. M. May and O. Jacenko and Staff
Activity: Lecture
5 Credit Hours

VBMS 603 Developmental Biology
The course examines classic and modern concepts in embryonic development as they relate to veterinary medicine. The lectures are designed to cover recent advances in the field with special emphasis on stem cells, specification of cell fate, manipulation of the genome and organogenesis. Examples of pathologies associated with aberrant development of major organ systems will be presented and discussed in the context of veterinary medicine.
Taught by: Drs. J. Wang and Staff
Activity: Lecture
3 Credit Hours

VBMS 604 Introduction to the Neurosciences
This is an introductory course to the neurosciences and assumes a basic background in anatomy, cell biology, histology and biochemistry. At the cell/molecular level the course covers neurocytology, membrane bioelectrical events and their channel protein basis, neurotransmitters and their actions at the synapse. It also covers aspects of neurochemistry, neuropharmacology and focuses on neuroanatomy and function of neural systems. The latter include the somatic and autonomic components of the peripheral nervous system, the spinal cord and reflexes, primary sensory systems, motor pathways and limbic systems of the brain.
Taught by: Dr. T. Bale and Staff
Activity: Lecture
5 Credit Hours

VBMS 605 Cellular and Biochemical Foundation of Disease
This course teaches the principles of biological chemistry as applied to metabolic relationships underlying cellular and physiological processes and the molecular mechanisms of disease. The first third of the course covers the basic biochemistry of amino acids, proteins (e.g., enzymes), nucleic acids, vitamins and coenzymes, carbohydrates and lipids. Normal as well as disease-related pathways for the processing of these biological materials are discussed. Species differences in metabolic pathways and clinical relevance are pointed out, wherever pertinent. The latter part of the course includes discussions of molecular genetics, and the physiological-biochemical functioning and regulation of cellular structures, tissues and organs: membranes, endocrine glands and hormones, blood, bone and connective tissue, liver, muscle, etc. Diseases specific to these structures are discussed in the context of veterinary medicine. Also included are such topics as prostaglandins, biochemistry of growth regulation, vision, taste, cell cycle and cancer. Laboratories include clinically relevant problem-based and library research projects that relate biochemistry to veterinary medicine, and identification of reproductive and endocrine conditions by diagnostic problem solving using student generated biochemical data.
Taught by: Dr. A. Kashina and Staff
Activity: Lecture
10 Credit Hours

VBMS 606 Animal Physiology
A strong training in animal physiology is crucial for veterinary education. Extensive and profound knowledge of normal processes that maintain animal life and enable animals to cope with a changing environment provides the crucial foundation for the understanding of breakdowns in homeostasis and disease states, and of key principles underlying diagnostics and treatment of animal diseases. The course provides a brief review of relevant molecular and cell biology concepts that enhance the comprehension of physiology (including metabolism, cell membrane permeability, bioelectric potentials, active transport, etc.) and a detailed study of the functional processes in the circulatory, respiratory, digestive, endocrine, muscular, renal and reproductive systems. This course primarily focuses on normal physiologic mechanisms in mammals yet includes comparative physiology material pertinent to other vertebrates of veterinary interest. Furthermore, pathophysiological alterations of normal function and physiological principles of diagnostics and therapy are amply illustrated by clinical case examples.
Taught by: Drs. Serge Fuchs, Elizabeth Woodward and Staff
Activity: Lecture
10 Credit Hours

VBMS 607 Pharmacology & Toxicology
The major objective of this course is to help veterinary students learn the principles of pharmacokinetics, the mechanisms of drug action, the sites at which drugs act, and how drugs may interact with, and alter the activity of, various organ systems. The material will also include properties, mechanisms of action, and biological effects of various chemical substances (drugs, environmental pollutants, toxins of plant origin, etc.) that interfere with normal cell and organ function. The course is intended to deal chiefly with basic Pharmacology and Toxicology rather than clinical therapeutics, although some therapeutics and clinical material will be discussed in relevant areas.
Taught by: Dr. F. Luca and Staff
Activity: Lecture
11 Credit Hours
Veterinary Clinical Studies - Medicine Courses (VMED)

VMED 600 Introduction to Clinical Veterinary Medicine I
This course provides an introduction to clinical veterinary medicine for first year veterinary students, and includes sessions on management, restraint and physical examination of small animal patients. Laboratory sessions provide the opportunity for practicing physical examination and restraint of animals in supervised small groups. This course will be graded P/F:
Taught by: Dr. L. Waddell and Staff
Two terms, student must enter first term.
Activity: Lecture
2 Credit Hours

VMED 601 Introduction to Clinical Veterinary Medicine II
Using a case-based organ/system approach, this course provides an introduction to the practice of clinical veterinary medicine in companion animals, and provides an introduction to special species companion animal, laboratory animal, and captive and wild animal veterinary practice. The course also introduces the concept of evidence-based medicine. Laboratory sessions provide exposure to auscultation, behavior abnormalities, clinical rounds discussion, grief management, nursing techniques and special species companion animal and laboratory animal examination.
Taught by: Dr. D. Clarke and Staff
Activity: Lecture
4 Credit Hours

VMED 602 Introduction to Clinical Veterinary Medicine III
This course provides an introduction to equine and production animal veterinary medicine for first year veterinary students, and includes sessions on management, restraint and physical examination of large animal patients. Laboratory sessions provide the opportunity for practicing physical examination and diagnostic procedures on horses and production animal species.
Taught by: Dr. E. Davidson and Staff
Activity: Lecture
4 Credit Hours

VMED 603 Introduction to Radiology
This lecture course is designed to provide the fundamental principles of clinical imaging in veterinary medicine as they pertain to physics and instrumentation. The emphasis is on radiography, but principles of ultrasonography, computed tomography, magnetic resonance imaging and nuclear medicine are also discussed. Topics include production of diagnostic images, radiation safety, differences between the various imaging modalities and some features of normal radiographic anatomy of small animals (thorax and abdomen). The course includes a two-hour mandatory laboratory, focusing on case presentations with emphasis on thoracic and abdominal radiography.
Taught by: Dr. W. Mai and Staff
Activity: Lecture
2 Credit Hours

VMED 604 Veterinary Medical Genetics
The objective of this course is to provide a background for understanding the underlying mechanisms, distribution, and control of genetic disease in domestic animals. Emphasis will be on concepts and information useful on a clinical level. Problem-based learning exercises integrate the concepts presented in the course.
Taught by: Dr. P. Hennessy and Staff
Activity: Lecture
2 Credit Hours

VMED 605 Nutrition
Fundamental principles of nutrition are the background of recommendations for feeding various classes of animals. Types of foodstuffs and their nutrient composition are evaluated in relation to nutrient requirements, voluntary intake and food preferences of domestic species. Feeding programs for nutritional management of animal classes commonly encountered in veterinary medicine are discussed, and examples of clinical nutrition applications are presented.
Taught by: Dr. D. Pitta and Staff
Activity: Lecture
3 Credit Hours

VMED 606 Principles of Epidemiology
The fundamentals of descriptive, analytic, and clinical epidemiology will be covered as they relate to both population and individual animal problems in veterinary medicine. The major aims of the course are to provide an analytic basis for clinical decision making and the ability to interpret the veterinary literature for application in a practice setting. These aims will be accomplished by using examples to illustrate the epidemiologic approach to studying infectious and non-infectious disease, and in clinical decision-making.
Taught by: Dr. Gary Smith and Staff
Activity: Lecture
2 Credit Hours

VMED 607 Veterinary Public Health
This course examines the nature and scope of animal-human interactions with emphasis on the consequences of this relationship from an epidemiologic viewpoint. Included are the zoonotic diseases, those naturally transmitted from animals to man, and the role of pets in society. The traditional involvement of veterinarians in prevention and control of food borne diseases and in public health practice will also be discussed.
Taught by: Dr. Gary Smith and Staff
Activity: Lecture
3 Credit Hours

VMED 608 Introduction to Poultry, Swine, and Dairy Medicine
This course will cover clinical problem solving for disease diagnosis, treatment and control. In addition, current topics of interest in food animal medicine will be discussed. These include food safety, regulatory medicine, environmental impact, welfare issues and opportunities for food animal veterinarians. Class time will be used for both lecture and discussion. All material for quizzes will be presented in class. The grade for the course will be based on weekly quizzes.
Taught by: Dr. S. Davison and Staff
Activity: Lecture
2 Credit Hours
VMED 609 Infectious & Metabolic Diseases
A core course of lectures on infectious and metabolic diseases of domestic animals. The topics in this course include: Rabies, Lymphosarcoma, Blue Tongue, Parturient Paresis, Listeriosis, Anthrax, Botulism, Leptospirosis, Canine Distemper, and many other polysonic diseases.
Taught by: Dr. R. Sweeney and Staff
Activity: Lecture
7 Credit Hours

VMED 610 Clinical Reproduction
Course covers reproduction in large and small domestic species, and includes the estrous cycle, heat detection, pregnancy, pregnancy loss, obstetrics, parturition, the postpartum period, male and female reproductive physiology, behavior, breeding soundness examination, and fertility problems. A two-hour problem solving session with the class divided into small groups will be held to discuss clinical cases. Grades will be based on a mid-term and a cumulative final examination.
Taught by: Dr. R. Turner and Staff
Activity: Lecture
5 Credit Hours

VMED 611 Veterinary Medicine/Surgery I
Principles of diagnosis, including radiology, and medical and surgical management of infectious and noninfectious diseases of the head, neck and chest, including diseases of the oral structures, eye, ear, nose and throat, esophagus, lung, heart, pleura and chest wall. Course material is broken down in 4 sections covering ophthalmology, cardiology, diseases of the head and neck, and non-cardiac intrathoracic diseases.
An examination covering the lecture material is administered after each section.
Taught by: Dr. V. Thawley and Staff
Activity: Lecture
9 Credit Hours

VMED 612 Veterinary Medicine/Surgery II
This portion of the Medicine/Surgery core course deals with the pathophysiology, clinical features, and medical and surgical treatment of hematologic, endocrine, nephrologic, urogenital and oncologic disorders.
Taught by: Dr. B. Callan and Staff
Activity: Lecture
9 Credit Hours

VMED 613 Veterinary Medicine/Surgery III
This core course covers the important medical and surgical diseases of the gastrointestinal system and the medical aspects of neurological diseases. Specific disease topics will include noninfectious gastrointestinal disorders; hepatobiliary, pancreatic and splenic disorders; and central and peripheral neurological diseases of domestic animals.
Taught by: Dr. M. Rondeau and Staff
Activity: Lecture
8 Credit Hours

VMED 615 Dermatology
A core course of lectures discussing the infectious, ectoparasitic, allergic, autoimmune and metabolic cutaneous disorders of small animals, exotics and horses. Diseases are discussed with particular emphasis on pathogenesis, clinical recognition and treatment. Methods of diagnosis also are stressed so that the student is prepared to recognize and treat the various dermatoses met in the clinical year.
Taught by: Dr. D. Morris and Staff
Activity: Lecture
3 Credit Hours

VMED 616 Clinical Animal Behavior
Behavior problems are among the most frequent reasons for surrender and euthanasia of pets. In this course we will discuss the most common behavior problems of dogs and cats, with an emphasis on diagnosis and treatment using both behavior modification and drug therapy.
Prognosis and safety issues will also be discussed. Attention will be paid to the thought process used in working up and/or preventing behavioral disorders.
Taught by: Dr. C. Siracusa and Staff
Activity: Lecture
1 Credit Hour

VMED 617 Veterinary Ethical Issues
The course goal is to enhance students overall ethical literacy. The course involves a combination of lectures on ethical theory and methodology, and group discussions of ethical case studies drawn from various branches of veterinary practice. The course will be graded as Pass/Fail and full attendance by all students is required unless otherwise pre-authorized by the course organizer.
Taught by: Dr. J. Serpell and Staff
Activity: Lecture
1 Credit Hour

VMED 618 Introduction to Clinical Veterinary Medicine IV
This year-long course for second year veterinary students is designed as a reinforcement of the first year introduction to clinical veterinary medicine series (VMED 600, 601, 602) and as a transition to the clinical year rotations. The emphasis is on practical experiences in our hospitals that will increase your clinical and technical skills as you familiarize yourselves with the hospitals facilities, policies and operations. The course will include approximately 11 hours of lecture; 32 hours of small-group practical clinical sessions per student (NCR) and 29 hours of small-group practical clinical sessions per student (MCR/VHUP). This will be a graded course - A, B, C or F.
Taught by: Dr. C. Dougherty, Dr. L. Southwood and Staff
Two terms; student must enter first term.
Activity: Lecture
4 Credit Hours
VMED 619 Emerging and Exotic Diseases
This course will be offered on the internet through the Association of American Veterinary Medical Colleges web site. The Center for Food Security and Public Health at Iowa State University maintains the course and operates the learning management system. The course is part of a larger effort by US Department of Agriculture to improve awareness of and preparedness for foreign animal disease incursions among veterinarians and veterinary students. The ability of a veterinarian to suspect and assist in the diagnosis of a foreign animal disease in livestock or companion animals is crucial to safeguarding America animals and agricultural sector and to protecting public health. In addition, the course also aims to convey a more comprehensive understanding of the role of accredited veterinarians in world agriculture. Parts of this course will be required training for subsequent USDA veterinary accreditation of new graduates. There will be a mandatory one hour session to introduce the course site, objectives, materials and requirements. The course site comprises six overview topics; four accreditation modules; nineteen case scenarios and twenty infectious disease inquiries. There are short tests associated with the various sections and students are required to score at least an 80% on each test. Students can take the test multiple times if needed to achieve that score. In addition to the course per se, there are numerous links to supplementary materials.
Taught by Dr. H. Aceto
Activity: Lecture
3 Credit Hours

VMED 620 Introduction to Clinical Veterinary Medicine V
This course will comprise 8 hours of lecture/classroom exercises and discussion per student in addition to a series of online tutorials. Two of the 8 hours of lecture time will be devoted to orientation and trouble-shooting sessions to help students access and complete the online tutorials. Students are expected to complete the online tutorials outside of the classroom setting. The online tutorials will demonstrate how to navigate the hospital computer systems at both campuses so that students will be familiar with them prior to entering the clinics in their fourth year. The material presented in this course will build upon principles learned in previous ICVM courses, specifically by providing further instruction on and practice of written and verbal communication skills and by building upon the orientation to the teaching hospitals provided in ICVM IV. After completing this course, students should be able to: - Describe and use key aspects of client communication skills that are essential in the veterinary medical setting. - Recognize and interpret common aspects of non verbal communication and understand how their non verbal communication can be used to improve their encounters with clients. - Understand and demonstrate the basic elements of a written discharge summary. - Navigate and utilize the electronic hospital systems on both campuses.
Taught by Dr. E. Krack and Staff
Course usually offered in fall term
Activity: Lecture
2 Credit Hours

Veterinary Clinical Studies - New Bolton Center (VCSN)

VCSN 630 Equine Neonatology & Intensive Care Medicine
The objectives of this course are to: (1) Introduce students to neonatal physiology and behavior as it applies to the foal; (2) Acquaint students with the clinical signs and pathophysiologic mechanisms of diseases in neonates; and (3) Provide students experience in the neonatal intensive care unit learning monitoring techniques (e.g. noninvasive blood pressure measurements, PCV, TP, stall side blood glucose, etc.) Observing normal and abnormal neonatal behavior and neonatal/maternal interactions, learning techniques of neonatal restraint, and assisting with diagnostic and therapeutic procedures as well as general nursing. Lectures will focus on foal diseases, intensive care therapies, periparturient problems, ventilatory support, musculoskeletal disorders, pharmacology and the neonate. Seminars will be used to apply lecture and reading material to clinical case discussions. A set of clinically-oriented problems covering case presentations, blood gas analysis, nutrition formulations, fluid therapy, nursing care protocols and periparturient events will be completed during the fourth quarter. The course grade will be based upon evaluation of clinical case problems, seminar participation, and mastering clinical skills (monitoring techniques, etc.) learned during foal-sitting. Enrollment requires approval of the course organizer and satisfactory academic standing.
Taught by Dr. M. Linton and Staff
Prerequisites: Prerequisites: Satisfactory acad. performance through Q2/2nd yr.
Activity: Lecture
4 Credit Hours
Notes: Limitations: 70 students max. for foal-sitting nursing shifts. Note: YOU MUST PROVIDE YOUR OWN TRANSPORTATION TO AND FROM NEW BOLTON CENTER

VCSN 631 Ecological Epidemiology
This course is concerned with the epidemiology of infectious diseases of domestic and feral animal species. The techniques of ecological epidemiology will be used to illustrate and explain the population biology of the causative organisms and how this is relevant to the control of infectious disease. The course will consider the dynamics of epidemic and endemic infections, the relevance of herd immunity and other characteristics of the host population, and methods for assessing the likely impact of control strategies. The illustrative examples will be drawn from a wide variety of animal species. All the mathematical techniques required will be taught as an integral part of the material.
Taught by: Dr. Gary Smith and Staff
Activity: Lecture
2 Credit Hours
Notes: NOT OFFERED DURING 2017-2018. Limitations: Maximum of 16 students

VCSN 632 Diseases & Management of Sheep & Goats
This course is an introduction to small ruminant medicine and surgery. Flock and herd health programs involve control of infectious, parasitic, reproductive and metabolic disorders and provision of proper housing, feeding and reproductive management systems. Prevalent diseases and management systems of the Eastern U.S. will receive emphasis.
Taught by: Dr. M. Fecteau
Activity: Lecture
3 Credit Hours
VCSN 633 Animal Health Economics
An introduction to a variety of economic concepts and decision making techniques that relate to the business of an agricultural enterprise and to the impact of veterinary services on that enterprise. Discussion of the role of production medicine in the overall profitability of animal agriculture.
Taught by: Dr. D. Galligan and Staff
Activity: Lecture
2 Credit Hours
Notes: Conflict: Scheduled concurrently with Clinical Exercises in Quarter 1

VCSN 634 Clinical Biostatistics
This course presents a unified approach to the analysis and interpretation of clinical data. We start with a discussion of general linear models and show the types of problems to which they apply, and then move to generalized linear models, to survival models, and finally to general estimating equations. Our goal is to acquaint participants with a fairly comprehensive array of approaches to data analysis and, most particularly, to circumstances to which they apply. The objective is to prepare students for research activities, either as a career, or as a step towards "Board Certification" enabling them to plan studies, analyze data ensuing from studies, and to critically read articles in their area of interest.
Taught by: Dr. D. Stefanovski and Staff
Activity: Lecture
2 Credit Hours
Notes: Limitations: Min: 6 students/Max: 16 students

VCSN 635 Equine & Farm Animal Anesthesia
This course will discuss sedation and intravenous or inhalant anesthesia of equine, food animal and camelid patients. The lectures will review the clinical pharmacology of the commonly used anesthetic drugs and the anatomic and physiologic differences among the species and their relevance to anesthetic management. Patient preparation, drug selection, induction and intubation techniques, intra-operative monitoring and management of cardiovascular and respiratory abnormalities, post-operative analgesia and recovery complications will also be discussed. Three case-based problems with multiple questions related to various aspects of anesthesia care will be distributed during the course. The problems are take-home, open-book and students may work alone or in pairs. Time will be spent discussing the cases after the written answers are turned in.
Taught by: Dr. K. Olson and Staff
Prerequisite: Prerequisites: VSUR 604 Anesthesia
Activity: Lecture
2 Credit Hours
Notes: Note: This course is a prerequisite for VCSN 815 and VCSN 875 Large Animal Anesthesia Rotation - NBC. This course is required for Equine Majors

VCSN 636 Clinical Applications of Pharmacology
This course is focused on the clinical pharmacological management of the major problems in veterinary practice. The vast majority of lectures directly apply to companion animals but when necessary, to emphasize a drug group or specific clinical problem, there are also several large animal lectures. This is an extension of core pharmacology and not an expanded version. The lectures will be given by the clinical and basic sciences faculty in their areas of expertise. Emphasis will be on the clinical aspects of drug therapy such as dosage range, duration of therapy, evaluation of therapy, and problems encountered with current drug therapy. Pharmacological therapy in the following areas of medicine and surgery are covered: antibiotics, cardiovascular, neurology, respiratory, urinary, gastrointestinal, endocrine, emergency medicine, ophthalmology, chemotherapeutic agents, fluid therapy, anti-inflammatory, pain medications and other topics as needed for the most comprehensive clinical overview. Emphasis is on case-based approaches to drug therapy. The major objectives of this course are: (1) Provide practical information on rational drug therapy before entering the clinics and the real world of veterinary practice. (2) Provide a sound basis for rationally evaluating the presently available drugs and the drugs of the future. The course grade is based on a weekly quiz and/or mid-term/final.
Taught by: Dr. J. Orsini and Staff
Prerequisites: Prerequisites: VBMS 607 Pharmacology and Toxicology, VPTH 605 Microbiology & VPTH 604 Immunology
Activity: Lecture
4 Credit Hours

VCSN 637 Animal Production Systems
This elective course provides an overview of: (i) management and operational basics of food animal production systems (dairy, beef, swine, poultry, and aquaculture), (ii) contemporary issues concerning current practice and sustainable future of animal production systems, e.g., food safety & biotechnology, antibiotics & antimicrobial resistance, nutrient management & environmental regulations, and animal welfare & public concerns. Students will work in teams on debates from pre-arranged topics, and will complete periodic assignments. Course grades will be based on class participation (40%), homework assignments (30%), and team debate performance (30%).
Taught by: Dr. Z. Dou and Staff
Activity: Lecture
2 Credit Hours
Notes: Limitations: Capacity of classroom
VCSN 638 Introduction to Animal Welfare
This course will cover the basic principles, history, and application of animal welfare science for multiple species. Over a series of lectures, the complex issue of assessing good versus poor welfare will be addressed. The first few lectures will provide students with the background of this field, as well as key terms which define the assessment methods of animal welfare science. The multifaceted issue of poor versus good welfare will be addressed in a lecture on ethics and sociology. The background lectures will also cover the disparity in the assessment of pain, pleasure, stress, and suffering based on applying physiological versus behavioral measurements. Given the tools provided by the background lectures, the students will then learn about species-specific welfare issues in the subsequent lectures to include swine, poultry, bovine, equine, aquaculture, exotic/zoo animals, lab animals, shelter animals, companion animals and current events. Following each one-hour lecture, the students will engage in an hour of hands-on activities, and debates concerning that week’s topic. Students will also participate in one wet lab where they will have the opportunity to apply methods of welfare assessment that they have learned in class.
Taught by: Dr. M. Pierdon and Staff
Activity Lecture
4 Credit Hours
Notes: Limitations: Permission of instructor since class is capped at 25 participants

VCSN 640 Large Animal Medicine - NBC
The course is comprised of advanced lectures and discussions on medical diseases of large domestic animals. Laboratory sessions will include "hands-on" experience in performing the more common diagnostic procedures in large animal medicine, including: urethral catheterization of horses; rectal examination; ophthalmic examinations; epidural anesthesia (bovine); nasolacrimal duct flushing; cardiovascular examinations; use of ultrasound equipment; venipuncture in cattle and horses; intravenous injections in cattle, balling gun procedure for cattle; TB testing in cattle and endoscopy of the horse. Two in-course Progressive examinations and a course Final examination will be given.
Taught by: Dr. R. Nolen-Walston and Staff
Prerequisite: Prerequisites: Core Medicine Courses
Activity Lecture
7 Credit Hours

VCSN 641 Advanced Poultry Medicine - NBC
This lecture/laboratory course is designed to provide students with a working knowledge of the recognition and diagnosis of selected diseases of poultry. Lectures will include discussion of the clinical, post-mortem and technical aspects of the diagnosis of selected avian diseases. The laboratory will provide each student with an opportunity to necropsy birds. Field visits to local poultry farms may be taken. The course grade will be based on weekly quizzes and a group project.
Taught by: Dr. S. Davison and Staff
Prerequisites: Prerequisites: VPTH 602 General & Systemic Pathology & VMED 608 Introduction to Poultry, Swine, and Dairy Medicine
Activity Lecture
2 Credit Hours
Notes: Limitations: Maximum of 40 students, CONFLICT: VCSN 648 Equine Sports Medicine

VCSN 642 Dairy Cattle Nutrition - NBC
The complexity of evaluating and balancing rations requires computer models. CPM-Dairy - developed at Cornell University, The University of Pennsylvania and The William H. Miner Agricultural Research Institute - evaluates and formulates rations according to a modified National Research Council (NRC) model and according to The Cornell Net Carbohydrate and Protein System (CNCPs), CPM-Dairy will be used to describe nutrient requirements, supplies and utilization. Environmental effects on nutritional requirements will be demonstrated. The dynamics of ruminal fermentation and microbial growth will be illustrated in terms of how they affect nutrient supply. "Hands on Computer Sessions" will lead participants through ration formulation.
Taught by: Dr. L. Baker and Staff
Prerequisite: Prerequisites: VMED 605 Nutrition
Activity Lecture
3 Credit Hours
Notes: CONFLICTS: Mon. 8-10 am conflicts with VCSN646 Equine Lameness; Thurs. 4-6 pm conflicts with VCSN 647 Equine Orthopedics

VCSN 643 Large Animal Reproduction - NBC
This course covers in-depth reproductive management of cattle, horses, swine and small ruminants. Emphasis is placed on the herd or flock as a unit rather than on the individual animal. This course is the same course as VCSN644 but with one-half of the laboratory time. The course is intended for those students who intend to pursue a career that will be exclusively or predominantly companion animal. A three-hour canine reproduction laboratory is included. The laboratories include demonstrations by clinicians and hands-on practical experience for students in evaluating the male and the female reproductive status:
PATH F - female pathology, PATH M - male pathology, OB1 - obstetrics, B&R - bull and ram breeding soundness examination, DOG - dog breeding soundness examination, vaginal cytology of the bitch, MARE1 - palpation of the genital tract per rectum of mare, COW1 - physical exam of the bovine genital tract, ULTRA - ultrasonography of the genital tract of animals.
Taught by: Dr. P. Sertich and Staff
Prerequisites: Prerequisites: VMED 610 Clinical Reproduction 2
Conference Hours.
Activity Lecture
3 Credit Hours
Notes: Limitations: No Drop/Add
VCSN 644 Large Animal Reproduction - NBC
The course covers in-depth reproductive management of cattle, horses, swine, sheep and small ruminants. Emphasis is placed on the herd or flock as a unit rather than on the individual animal. Laboratories include demonstrations by clinicians and hands-on practical experience for students in evaluating the male and the female reproductive status of dogs and large domestic animals. Therapeutic information will be covered in problem-based cases that will be solved and formally presented by small student groups. Grades will be based on the therapeutic presentations, laboratory participation, mid-term exam and a comprehensive final examination. In addition to the laboratories listed in VCSN643 are the following eight laboratories: OB2 - fertility, STALL - stallion breeding soundness examination SWINE - boar semen evaluation, heat detection and AI of sows, MARE2 - mare breeding soundness examination, palpation, MARE3 - using breeding soundness examination to solve infertility case, palpation, CDW2 - bovine estrous cycle, palpation, CDW3 - pregnancy diagnosis, palpation, CDW4 - therapeutics, palpation.
Taught by: Dr. P. Sertich and Staff
Prerequisite: Prerequisites: VMED 610 Clinical Reproduction
Activity: Lecture
4 Credit Hours
Notes: Limitations: No Drop/Add. Note: This course is a prerequisite for Course VCSN 774 Large Animal Clinical Reproduction Rotation

VCSN 645 Large Animal Surgery & Surgical Exercises - NBC
Lectures given in this course will cover common surgical problems of the respiratory, the gastrointestinal, the musculoskeletal, and the urogenital systems of horses and of the gastrointestinal system of domestic ruminants. Lecture material will cover the procedures to be done in each laboratory beforehand so that ample opportunity is allowed for preoperative preparation. Lectures are given on anesthesia with special emphasis on drugs to be used during the laboratory sessions. The surgical exercises and related laboratory procedures are designed to teach surgical techniques and principles, surgical anatomy, and basic surgical procedures in horses and domestic ruminants. Students will administer general anesthetics and apply the principles and techniques of physiologic monitoring of anesthetized large animals. The importance and the application of preoperative and postoperative management will be emphasized and students take full responsibility for their patient’s progress throughout the course. The course grade is derived from performance in the laboratories, quality of patient care, participation in conferences, and one final exam.
Taught by: Dr. E. Parente and Staff
Prerequisite: Prerequisites: Core Surgery Courses
Corequisites: Post-requisite: must sign up for VCSN 870 Large Animal Surgery Clinical Rotation 7 Conference Hrs.
Activity: Lecture
4 Credit Hours
Notes: Limitations: No Drop/Add; Maximum of 30 students

VCSN 646 Equine Lameness - NBC
This course covers the principles of lameness diagnosis and treatment in horses. The course features didactic lectures, actual lameness examinations, video tape viewing, computer aided learning and a diagnostic nerve block laboratory using cadaver specimens.
Taught by: Drs. M. Ross, D. Levine and Staff
Prerequisites: Prerequisites: Core Surgery and Anatomy Courses
Activity: Lecture
4 Credit Hours
Notes: CONFLICT: Mon. 8-10 am conflicts with VCSN 642 Dairy Cattle Nutrition. Notes: This course is a prerequisite for the following clinical rotations: VCSN B12,872 Sports Medicine/Imaging and VCSN B14,874 Large Animal Radiology

VCSN 647 Equine Orthopedics - NBC
The course reviews specific techniques in equine orthopaedics, and emphasizes understanding orthopaedic principles that are applicable to all species. Topics include more detailed information on internal fixation, relevant first aid techniques, osteochondrosis and orthopedic sepsis.
Taught by: Dr. D. Richardson and Staff
Activity: Lecture
1 Credit Hour
Notes: CONFLICT: VCSN 642 Dairy Cattle Nutrition

VCSN 648 Equine Sports Medicine - NBC
This seminar course concerns the clinical application of basic physiologic and pathologic principles as they relate to the diagnosis and management of exercise-related diseases in the horse. Material will be presented in light of the demands of specific types of athletic activity. Laboratory demonstrations using the high-speed treadmill will be provided. Hands-on sessions are also provided to demonstrate the collection of arterial blood gas samples and upper airway endoscopy. Paper or oral presentation required.
Taught by: Dr. J. Slack and Staff
Prerequisites: Prerequisites: VBMS 601 Gross Anatomy, VBMS 605 Principles of Biochemistry & VBMS 606 Animal Physiology
Activity: Lecture
3 Credit Hours
Notes: CONFLICT: VCSN 641 Advanced Poultry Medicine

VCSN 649 Large Animal Diagnostic Imaging - NBC
The course consists of a series of lectures, a radiographic positioning laboratory and an ultrasound/anatomy laboratory. Plain film radiography comprises the majority of the lectures but ultrasound, scintigraphy and prepuce examination are included. A brief introduction to CT & MRI is also presented. Strong emphasis is placed on the equine species but incorporates radiography of other large animals. The course is designed to cover the basic principles of the different imaging techniques, radiographic and sonographic anatomy, and the basic interpretation of the imaging modalities.
Taught by: Dr. V. Reef and Staff
Prerequisites: Prerequisites: Core Medicine, Surgery and Radiology Courses
Activity: Lecture
3 Credit Hours
Notes: This course is a prerequisite for the following clinical rotations: VCSN B12,872 Sports Medicine/Imaging and VCSN B14,874 Large Animal Radiology
VCSN 653 Catastrophic Epidemic Infectious Disease in Animals
Goals: Students who complete this course will: 1) Understand that large scale epidemics in domestic (and wild) animals have serious consequences for human health and well being even if the infection is not zoonotic; 2) appreciate that the consequences of large scale epidemics in domestic (and wild) animals are multiple and pervasive. Students will also: 1) See examples of the way in which large scale epidemics in domestic (and wild) animals adversely affect the economy, government and history of human society; provide opportunities for criminality; bring about changes in science policy and technology; and alter human demography and survivorship. 2) See a very broad range of examples of methodologies for bringing serious epidemics under control. 3) Understand how disease control strategies are devised and why it is necessary to pay attention to the acceptability of these strategies to producers, governments, and society at large. 4) Learn why it is important to have a definition of success. 5) acquire a sound theoretical basis for understanding how infectious diseases move through populations 6) begin to develop some insight into what might be done to defend animal agriculture from deliberate attack. Case Study 1: Rinderpest (directly transmitted disease of cattle and wildlife). Case Study 2: Dourine (sexually transmitted disease of horses). Case Study 3: Foot and Mouth Disease (directly transmitted disease cattle, sheep, swine). Case Study 4: Bovine BSE (a food borne, prion disease of cattle and people). Case Study 5: Avian Influenza (infection of birds transmitted by the fecal oral route). Case Study 6: Canine Distemper (directly transmitted infection of terrestrial and marine wildlife). Case Study 7: Nipah Virus Infections (emerging disease of bats, swine, people) The examples have been chosen to illustrate 1) a wide range of transmission mechanisms, 2) both zoonotic and nonzoonotic infections, 3) and emerging disease problems. Taught by: Dr. Gary Smith and Staff
Activity: Lecture
2 Credit Hours
Notes: NOT OFFERED DURING 2017-2018

VCSN 654 Veterinary Medicine Global Health and Food Security
This elective course focuses on the diversity of needs and expanding horizons for veterinary medicine in the developing world and will serve to introduce the scope and nature of issues in veterinary public health. Students will be evaluated based on attendance, participation, group exercises and required readings. Lectures will be presented by Penn Vet faculty as well as nationally known speakers. Taught by: Drs. D. Galligan, A. Kelly and Staff
Activity: Lecture
4 Credit Hours
Notes: Note: Required for the Certificate in Public Health

VCSN 657 One Health & Global Food Security
By 2050 can the world sustain a population of over 9 billion people in the face of climate change, limited water and other natural resources, pollution, urbanization, political and income inequality, conflict, changing diets and patterns of disease? An interdisciplinary group of faculty will explore this complex question through six broad trends that affect global food sustainability and environmental health; 1) nutritional needs; 2) changing patterns of communicable and non-communicable diseases of humans and all types of animals; 3) natural resource inventory and management; 4) production technologies (intensive/extensive systems); 5) societal changes impacting production and food demand; 6) food distribution systems and access to food. The course is open to graduate and undergraduate students and will involve student participation and research.
Taught by: Drs. D. Galligan, A. Kelly and Staff
Also Offered As: ANTH 661
Activity: Lecture
4 Credit Hours

VCSN 661 Swine Neonatology - NBC
This is an introductory course for students who want to learn more about swine production and swine medicine. It aims to familiarize 2nd and 3rd year veterinary students with several important aspects of swine neonatology/farrowing room management that includes periparturient physiology and behavior of both the sow and the piglet, baby pig processing, and sow dystocia. All students will be required to attend the four hours of lecture, and four laboratory shifts. Each laboratory shift is 7 hours and available nights and weekends. Students will be required to monitor the farrowing house for sows in labor and attend the farrowings as needed to critically assess animal well-being. Students will be expected to provide appropriate sow or piglet interventions when indicated. Students will also assist with any routine management tasks such as piglet processing and vaccination. Students will be graded on their participation and success in meeting the course objectives.
Taught by: Dr. T. Parsons and Staff
Activity: Lecture
1 Credit Hour
Notes: Limitations: Permission of the Instructor. May be repeated once

VCSN 662 Swine Neonatology - NBC
This course is similar to VCSN 661, but provides students with a more intensive experience and the opportunity to pursue a higher level of proficiency in swine neonatology. The course also aims to familiarize 2nd and 3rd year veterinary students with several important aspects of swine neonatology/farrowing room management that includes periparturient physiology and behavior of both the sow and the piglet, baby pig processing, and sow dystocia. All students will be required to attend the four hours of lecture, and eight laboratory shifts. Each laboratory shift is 7 hours and available nights and weekends. Students will be required to monitor the farrowing house for sows in labor and attend the farrowings as needed to critically assess animal well-being. Students will be expected to provide appropriate sow or piglet interventions when indicated. Students will also assist with any routine management tasks such as piglet processing and vaccination. Students will be graded on their participation and success in meeting the course objectives.
Taught by: Dr. T. Parsons and Staff
Activity: Lecture
2 Credit Hours
Notes: Limitations: Permission of the Instructor; Cannot be repeated
VCSN 663 Swine Husbandry - NBC
This is the second introductory course for students who want to learn more about swine production and swine medicine. It aims to familiarize 2nd and 3rd year veterinary students with several other aspects of swine husbandry and health management. All students will be required to attend four laboratory shifts, and write a short report on an aspect of mutual interest related to swine management or disease. Each laboratory shift is 7 hours and is available nights and weekends. Students will be required to participate in all aspects of swine husbandry with special emphasis given to herd health, reproductive and nutritional management. Students will be graded on their participation and success in meeting the course objectives.
Taught by: Dr. T. Parsons and Staff
Prerequisite: Prerequisites: Swine Neonatology (VCSN 661 twice or VCSN 662 once)
Activity: Lecture
1 Credit Hour
Notes: Limitations: Permission of the Instructor; can be repeated once

VCSN 664 Swine Husbandry - NBC
This course is similar to VCSN 663, but provides students with a more intensive experience and the opportunity to pursue a higher level of proficiency in swine husbandry. This course aims to familiarize 2nd and 3rd year veterinary students with several other aspects of swine husbandry and health management. All students will be required to attend eight laboratory shifts, and write a short report on some aspect of mutual interest related to swine management or disease. Each laboratory shift is 7 hours and is available nights and weekends. Students will be required to participate in all aspects of swine husbandry with special emphasis given to herd health, reproductive and nutritional management. Students will be graded on their participation and success in meeting the course objectives.
Taught by: Dr. T. Parsons and Staff
Prerequisite: Prerequisites: Swine Neonatology (VCSN 661 twice or VCSN 662 once)
Activity: Lecture
2 Credit Hours
Notes: Limitations: Permission of the Instructor; can be repeated once

VCSN 700 Large Animal Medicine - Foundation - NBC
Students in this rotation will assist clinicians in history taking, examinations and the medical management of large animal patients presented to the hospital at New Bolton Center. Students will participate in daily ward and Medicine teaching rounds, Radiology rounds and Pathology rounds. All students, whether in core or elective, will be expected to participate in night and weekend duty on a rotating basis. All students will prepare and present one clinical case discussion for Grand Rounds. Time commitment: at least 8 hours per day plus night and weekend duty.
Taught by: Dr. R. Sweeney and Staff
Also Offered As: VCSN 770
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours

VCSN 701 Large Animal Emergency/Critical Care - Foundation Rotation - NBC
This rotation is designed to teach students basic principles of large animal emergency medicine and surgery as well as the daily management of critically ill equine patients. Students will be involved in a variety of large animal emergency admissions including diagnostic procedures and surgery as well as post-operative or post-admission case management of horses with gastrointestinal disease. Students will attend regular 8 am morning rounds (see course description for Large Animal Surgery, VCSN 800), followed by morning case-based discussion rounds. The day will be spent either on emergency admissions or procedures and management of in-house patients. Daily afternoon rounds will be topic-based, and may be selected from the following topics: Laceration Repair, Emergency Stabilization of Fractures, Acute Abdomen (colic), Diarrhea, Fluid Therapy, Respiratory Distress, Acute Blood Loss/Hemorrhagic Shock, Food Animal Emergencies, Blood Gas Interpretation, Acute Neurologic Patient, Monitoring the Critically Ill Patient, Reproductive Emergencies, Management of Rectal Tears, Critical Care Journal Club.
Taught by: Dr. L. Southwood and Staff
Also Offered As: VCSN 873
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours

VCSN 712 Food Animal Reproduction - NBC
The course is designed for those students anticipating entering large animal or mixed practice. Students will participate in the diagnosis and treatment of clinical reproductive cases in the hospital. Students will be responsible for the daily treatment and examination of all hospitalized cases at the Hofmann Center. Students will also assist in the management of reproductive problems of Widener Hospital patients. Exposure will vary due to fluctuations in case load. Additional "hands-on" practice of reproductive procedures will occur by the use of teaching animals. Organized laboratories will allow the student to become comfortable with diagnostic techniques of large animal species. On-call, weekend, and night duty are required. Students will be required to give a 15 minute presentation during the rotation and prepare two case letters/discharge instructions on animals they evaluated during the rotation. If student interest and time permit, students may go on field trips to breeding farms.
Taught by: Dr. T. Dobbie and Staff
Also Offered As: VCSN 772
Prerequisite: Prerequisites: VCSN 644 Large Animal Reproduction
Activity: Clinical Rotation Dental & Vet school
3 Credit Hours
Notes: Satisfies requirement for: EQ, FA, LA. Limitations: 2-6 students/rotation. Priority: FA

2018-19 Catalog | Generated 02/28/19
VCSN 713 Field Service - NBC
Students in this rotation will assist staff doctors in history taking, physical examinations, and the medical management of patients seen on the Field Service activities of the School's large animal practice. The student is required to attend the appropriate 8:00 a.m. daily rounds at New Bolton Center. The remainder of the day will be spent on field calls. The student will be required to be on night and weekend duty. Night duty will be divided equally among field service students in the rotation. Students on emergency duty are required to be within 15 minutes from New Bolton Center while on duty. Case presentations will be given by students on the second Wednesday of the rotation. Boots and coveralls are essential for this rotation.
Taught by: Dr. B. Smith and Staff
Also Offered As: VCSN 773
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Required: SALA

VCSN 715 Diagnostic Ultrasound in Large Animals - NBC
This rotation will provide students with experience in the diagnosis and treatment of large animal cardiac diseases and the use of M-mode, 2-dimensional real-time, pulsed wave, color flow and continuous wave Doppler echocardiography and exercising electrocardiography. Students will also gain experience in the use of diagnostic ultrasonography in the evaluation of tendon and ligament injuries, diseases of the thorax and abdomen, and the evaluation of masses, swellings, neoplasms and high-risk pregnancies. Students will also gain experience in patient preparation; obtaining a quality ultrasonographic or echocardiographic image and cardiac Doppler studies; and in interpretation of these images and studies with staff and faculty supervision. Students will be responsible for patient care of animals presented to the Heart Station/Ultrasound Service during the rotation.
Taught by: Dr. V. Reef and Staff
Also Offered As: VCSN 775
Prerequisites: Prerequisites: Core Medicine and Surgery
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: 2 students/week in VCSN 776, VCSN 775 combined. Satisfies imaging requirement: EQ, FA, LA. Satisfies cardiology requirement: SALA. Notes: Not offered during VCSN 812,872 Sports Medicine/Imaging

VCSN 716 Ultrasonography in Large Animals - NBC
For full course description see VCSN 715.
Taught by: Dr. V. Reef and Staff
Also Offered As: VCSN 776
Prerequisites: Prerequisites: Core Medicine and Surgery
Activity: Clinical Rotation Dental & Vet school
2 Credit Hours
Notes: Limitations: 2 students/week in VCSN 106,776, VCSN 715,775 combined. Satisfies requirement for: EQ, FA, LA. Note: Not offered during VCSN 812,872 Sports Medicine/Imaging

VCSN 770 Large Animal Medicine Clinic - NBC
Students participating in this elective rotation will be assigned with the core students in VCSN700 in the Medicine Section. These elective students will participate in the same manner as core students, although attempts will be made, when possible, to allow them to focus more on some cases or diseases of particular interest to them. They are expected to participate, to the same extent as core students, in all emergency duties including night and weekend on-call duty. At least eight hours per day, plus duty hours.
Taught by: Dr. R. Sweeney and Staff
Also Offered As: VCSN 700
Prerequisite: Prerequisites: Core Medicine Courses
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSN 772 Food Animal Reproduction - NBC
The course is designed for those students anticipating entering large animal or mixed practice. Students will participate in the diagnosis and treatment of clinical reproductive cases in the hospital. Students will be responsible for the daily treatment and examination of all hospitalized cases at the Hofmann Center. Students will also assist in the management of reproductive problems of Widener Hospital patients. Exposure will vary due to fluctuations in case load. Additional "hands-on" practice of reproductive procedures will occur by the use of teaching animals. Organized laboratories will allow the student to become comfortable with diagnostic techniques of large animal species. On-call, weekend, and night duty are required. Students will be required to give a 15 minute presentation during the rotation and prepare two case letters/discharge instructions on animals they evaluated during the rotation. If student interest and time permit, students may go on field trips to breeding farms.
Taught by: Dr. T. Dobbie and Staff
Also Offered As: VCSN 712
Prerequisite: Prerequisites: VCSN 644 Large Animal Reproduction
Activity: Clinical Rotation Dental & Vet school
3 Credit Hours
Notes: Limitations: 2-6 students/rotation. Priority: FA

VCSN 773 Field Service - NBC
This is an elective rotation equivalent to course VCSN 713.
Taught by: Dr. B. Smith and Staff
Also Offered As: VCSN 713
Prerequisite: Prerequisites: Core Medicine Courses
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Based on Hospital Needs
VCSN 774 Large Animal Clinical Reproduction - NBC
The course is designed for those students anticipating entering large animal or mixed practice. Students will participate in the diagnosis and treatment of clinical reproductive cases in the hospital. Students will be responsible for the daily treatment and examination of all hospitalized cases at the Hofmann Center. Students will also assist in the management of reproductive problems of Widener Hospital patients. Exposure will vary due to fluctuations in case load. Additional "hands-on" practice of reproductive procedures will occur by the use of teaching animals. Organized laboratories will allow the student to become comfortable with diagnostic techniques of large animal species. On-call, weekend, and night duty are required. Students will be required to give a 15 minute presentation during the rotation and prepare two case letters/discharge instructions on animals they evaluated during the rotation. If student interest and time permit, students may go on field trips to breeding farms.
Taught by: Dr. P. Sertich and Staff
Prerequisite: Prerequisites: VCSN 644 Large Animal Reproduction
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: 2-5 students/rotation. Priority: EQ, FA, LA Majors

VCSN 775 Diagnostic Ultrasound in Large Animals - NBC
This is an elective rotation equivalent to course VCSN 715.
Taught by: Dr. V. Reef and Staff
Also Offered As: VCSN 715
Prerequisites: Prerequisites: Core Medicine and Surgery
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: 2 students/week in VCSN 775, VCSN 775 combined.
Note: Not offered during VCSN 872 Sports Medicine/Imaging

VCSN 776 Ultrasonography in Large Animals - NBC
For full course description see VCSN 715.
Taught by: Dr. V. Reef and Staff
Also Offered As: VCSN 716
Prerequisites: Prerequisites: Core Medicine and Surgery
Activity: Clinical Rotation Dental & Vet school
2 Credit Hours
Notes: Limitations: 2 students/week in VCSN 776, VCSN 775 combined.
Note: Not offered during VCSN 872 Sports Medicine/Imaging

VCSN 777 Large Animal Neonatal Intensive Care Rotation - NBC
This elective provides students with experience in the management of critically ill large animal neonates and dams with periparturient complications. Daily rounds emphasize the use of monitoring techniques (e.g. capnography, ECG, BP monitor, fetal and neonatal ultrasonography), and various treatment modalities (e.g. parenteral nutrition, positive pressure ventilation, and fluid therapy) required in the management of critically ill neonatal foals and late-term pregnant mares. Students will have the opportunity to master the following manual and theoretical skills: arterial puncture and arterial blood gas analysis, calculation and application of parenteral and enteral nutrition formulations, catheterization techniques for veins and bladder, principles of fluid therapy as applied to patients with septic shock and patients requiring maintenance fluids, radiographic interpretation of neonatal thoracic and musculoskeletal disease, interpretation of fetal and neonatal sonograms, familiarity with different types of respiratory support and resuscitation protocols, and a working knowledge of a wide variety of pharmacologic agents including antibiotics, anticonvulsives, sedatives, analgesics, pressors and inotropic agents.
Taught by: Dr. J. Palmer and Staff
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: 4 students min; 8 students maximum

VCSN 780 Ration Evaluation and Formulation - NBC
This course is intended to provide students with practical experience in evaluating dairy feeding programs and formulation of rations. Students will visit dairy farms, inspect feed storage and delivery systems, obtain representative samples of feedstuffs for analysis, examine production records, and assess animal body condition. Students will then evaluate the nutritional and economic adequacy of the whole feeding program, suggest recommendations for its improvement and prepare producer reports for discussion with faculty prior to implementation.
Taught by: Dr. L. Baker and Staff
Prerequisite: Prerequisites: VCSN 642 Dairy Cattle Nutrition
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Minimum of 3 students
VCSN 800 Large Animal Surgery-Foundation - NBC
Students rotating through Large Animal Surgery at NBC will participate in all aspects of examination and diagnosis, including lameness evaluation and endoscopy, medical and surgical treatment and daily patient care of large animals. During one week of the two-week rotation, each student will be assigned to treat cattle, other domestic farm animals and horses, and during the other week, horses only. Night, weekend and holiday assignments, including treatments and emergency work, will be made according to the requirements of the overall hospital operation during a given session. Students usually are exposed to both surgical procedures (general soft tissue, abdominal, orthopedic, etc.) during any one rotation. During the rotation, students may gain experience with horses being examined on the High Speed Treadmill or undergoing imaging in the Nuclear Scintigraphy Unit. Students will also participate in a variety of didactic teaching rounds, barn rounds and teaching laboratories as described: Monday, Tuesday, Wednesday, Friday 4:55 pm - Surgery Teaching Rounds. Thursday 3:5-5 pm - Surgery Teaching Laboratory (Wet labs). Monday 8:00-9:00 am Radiology Rounds (case-based discussion led by surgery faculty). Tuesday 8:00-9:00 am - Lameness Rounds (case-based discussion led by Sports Medicine faculty). Wednesday 8:00-9:00 am - Radiology Rounds (case-based discussion led by radiology faculty). Thursday 8:00-9:00 am - Grand Rounds (student case presentations). Friday 8:00-9:00 am - Medicine Teaching Rounds (case-based discussion with Medicine faculty and house officers).

Taught by Dr. D. Richardson and Staff
Also Offered As: VCSN 870
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours

VCSN 812 Sports Medicine/Imaging - NBC
Goals of this rotation are to provide the students with the opportunity to obtain diagnostic skills through the use of different modalities and to incorporate these techniques into the decision-making process during the diagnosis and treatment of horses with performance problems. Students in this rotation will take more responsibility for their cases and follow them through the different specialties without being drawn away to the next case in their assigned area. Each student will spend his/her time in the following areas: 1 week - Ultrasound/Cardiology. 1 week - Nuclear Scintigraphy/Radiology/MRI. 1 week - Treadmill/Podology. 1 week - Poor performance clinic (lameness)

Taught by Dr. E. Davidson and Staff
Also Offered As: VCSN 872
Prerequisites: Prerequisites: VCSN 649 Large Animal Diagnostic Imaging and VCSN 646 Equine Lameness
Activity: Clinical Rotation Dental & Vet school
10 Credit Hours
Notes: Limitations: Maximum of 4 students per rotation Notes: Offered Rotations 1-8, possibly 9-10; Individual rotations in Sports Medicine Clinic, LA Radiology, LA Ultrasound and Podology are not offered during this time period. Satisfies imaging requirement: EQ, LA, FA

VCSN 814 Large Animal Radiology - NBC
In this rotation, students will gain experience in making and interpreting large animal radiographic examinations. They will assist the radiology technicians in taking and processing routine radiographs, attend film reading sessions, daily hospital rounds and review large animal radiographs independently and under supervision. Students will be required to write radiology reports.

Taught by: Dr. K. Wulster and Staff
Also Offered As: VCSN 874
Prerequisite: Prerequisites: VCSN 649 Large Animal Diagnostic Imaging
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: 2 students/rotation. Satisfies imaging requirement: EQ, FA, LA, SALA. Note: Not offered during VCSN 812.872 Sports Medicine/Imaging

VCSN 815 Large Animal Anesthesiology Service - NBC
During the Large Animal Anesthesia Service Rotation, students will gain experience in: (1) anesthetizing equine and other farm animal patients for elective and emergency procedures; (2) alleviating pain in animals; (3) maintaining adequate vital functions during anesthesia and (4) managing fluid, electrolyte and acid-base disturbances in the perioperative period. In addition, the course offers the opportunity to apply the clinical pharmacology of perianesthetic drugs in various farm animal species. Students are requested to attend Anesthesia Service rounds on Mondays and Fridays (8-9:00 am) during their clinical rotation, which will also offer the opportunity to discuss anesthesia cases. Night and weekend emergency duty is mandatory and shared with veterinary technician students. The maximum emergency duty is 4 weekday nights and one 24-hour weekend day. Students are expected to report to the Sports Medicine Conference Room or Anesthesia Office promptly at 8:00 am on the first Monday morning of the 2-week rotation with scrubs, stethoscope and calculator. Students are requested to review the information contained in the class notes of the following courses for appropriate sections prior to entering the rotation: General Pharmacology and Toxicology (VBMS 607), Animal Physiology (VBMS 606), Anesthesia (VSUR 604), and the Equine and Farm Animal Anesthesia Elective (VCSN 635). Students should also be familiar with dosages of commonly used drugs and their clinical pharmacology and technical aspects of the practice of large animal anesthesia.

Taught by: Dr. B. Driessen and Staff
Also Offered As: VCSN 875
Prerequisites: Prerequisites: VCSN 635 Equine and Farm Animal Anesthesia
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: 2 students/rotation, not Early Entry. Required: EQ. Satisfies anesthesia/pain management requirement: FA, LA, SALA
VCSN 816 Food Animal Anesthesiology Service - NBC  
In this rotation, students will gain experience in planning and performing sedation and anesthesia in small ruminants, swine and camels. Specific clinical objectives during the five-day rotation include physical and chemical restraint, regional and general anesthesia techniques in various food and fiber producing animals, and operation and use of various anesthetic monitoring devices. Emphasis is on techniques and drugs commonly used in the field. Students will formulate plans for sedation and/or short term anesthesia in sheep/goats, pigs and camels and will then carry them out on teaching animals. Techniques for regional anesthesia for flank surgery in the bovine will be performed at Marshak Dairy.  
Taught by: Dr. K. Olson and Staff  
Also Offered As: VCSN 876  
Activity: Clinical Rotation Dental & Vet school  
3 Credit Hours  
Notes: Limitations: 2-4 students/rotation, not Early Entry. Priority: Food Animal Majors. Satisfies anesthesia/pain management requirement: FA, LA

VCSN 870 Large Animal Surgery Clinic - NBC  
This is an elective clinical rotation equivalent to VCSN 800. Students electing VCSN 645 during Large Animal Block are required to take this rotation in addition to VCSN 800 in their fourth year.  
Taught by: Dr. D. Richardson and Staff  
Also Offered As: VCSN 800  
Prerequisite: Prerequisites: Core Surgery Courses  
Activity: Clinical Rotation Dental & Vet school  
6 Credit Hours  
Notes: Limitations: Based on Hospital Needs. Note: This rotation is a postrequirement of VCSN645 Large Animal Surgery and Surgical Exercises

VCSN 871 Equine Surgery Clinic - NBC  
This elective is specifically designed to provide students interested in equine practice after graduation with additional exposure to a variety of orthopedic and soft tissue surgical problems of horses. Students will actively participate in all aspects of lameness and soft tissue diagnosis, treatment, surgery and patient care. Teaching rounds will involve daily barn rounds, daily didactic presentations and/or wet labs covering surgical topics. Laboratories include internal fixation of fractures, wound repair, arthroscopy, intestinal surgical techniques, laser surgery, head and neck surgery, video analysis of lameness and field anesthesia. Every effort is made to have students in this course perform field castrations with local veterinarians. Students will be expected to participate in after-hours treatments and surgical emergencies of horses; however, students will not be assigned to food animal patients during this rotation.  
Taught by: Dr. D. Richardson and Staff  
Prerequisite: Prerequisites: VCSN 800 Large Animal Surgery-Foundation  
Activity: Clinical Rotation Dental & Vet school  
6 Credit Hours  
Notes: Limitations: 6-10 students. Priority: Equine Majors

VCSN 872 Sports Medicine/Imaging - NBC  
This is an elective rotation equivalent to course VCSN 812.  
Taught by: Dr. E. Davidson and Staff  
Also Offered As: VCSN 812  
Prerequisites: Prerequisites: VCSN 649 Large Animal Diagnostic Imaging and VCSN 646 Equine Lameness  
Activity: Clinical Rotation Dental & Vet school  
10 Credit Hours  
Notes: Limitations: Maximum of 4 students per rotation. Notes: Offered Rotations 1-8, possibly 9-10; Individual rotations in Sports Medicine Clinic, LA Radiology, LA Ultrasound and Podology are not offered during this time period

VCSN 873 Large Animal Emergency/Critical Care Service - NBC  
This rotation is designed as a supplement to the Foundation Emergency / Critical Care rotation, for students with a specific interest in this field or those desiring more large animal exposure. The format will follow that outlined for the Foundation rotation (VCSN 701), with emphasis on more advanced critical care topics. Elective students will not be required to complete a Grand Rounds presentation.  
Taught by: Dr. L. Southwood and Staff  
Also Offered As: VCSN 701  
Activity: Clinical Rotation Dental & Vet school  
6 Credit Hours

VCSN 874 Large Animal Radiology - NBC  
This is an elective rotation equivalent to course VCSN 814  
Taught by: Dr. K. Wulster and Staff  
Also Offered As: VCSN 814  
Prerequisite: Prerequisites: VCSN 649 Large Animal Diagnostic Imaging  
Activity: Clinical Rotation Dental & Vet school  
5 Credit Hours  
Notes: Limitations: 2 students/rotation. Note: Not offered during VCSN 812, 872 SportsMedicine/Imaging

VCSN 875 Large Animal Anesthesiology Service - NBC  
This is an elective rotation equivalent to course VCSN 815  
Taught by: Dr. B. Driessen and Staff  
Also Offered As: VCSN 815  
Prerequisites: Prerequisites: VCSN 635 Equine and Farm Animal Anesthesia  
Activity: Clinical Rotation Dental & Vet school  
6 Credit Hours  
Notes: Limitations: 2 students/rotation, not Early Entry

VCSN 876 Food Animal Anesthesiology Service - NBC  
This is an elective rotation equivalent to course VCSN 816  
Taught by: Dr. K. Olson and Staff  
Also Offered As: VCSN 816  
Activity: Clinical Rotation Dental & Vet school  
3 Credit Hours  
Notes: Limitations: 2-4 students/rotation, not Early Entry. Priority: FA Majors
VCSN 877 Food Animal Medicine and Surgery Clinic - NBC
This elective rotation is designed to provide additional experience in food animal medicine and surgery to students who are likely to pursue bovine practice following graduation. Students will participate in the diagnosis and treatment of food animal (primarily dairy cattle) medical and surgical diseases. Teaching rounds will involve daily barn rounds, didactic presentations and wet labs covering medical and surgical topics. The emphasis will be on individual animal (as opposed to herd health) problems. Students will be responsible for after-hours treatments and emergencies of food animals only; students will not work with equine patients during this rotation. Each student will have three weeknights and one 24-hour weekend shift during the rotation (based on 8 students enrolled). Note: students that desire further experience in medical or surgical problems of all large animal species should elect either VCSN 770 or VCSN 870.

Taught by: Dr. R. Sweeney and Staff
Prerequisites: Prerequisites: Large Animal Medicine and Surgery Rotations. Additional prerequisites for non-food animal majors: VCSN 640 Large Animal Medicine, VCSN 645 Large Animal Surgery and Surgical Exercises, and VCSN 644 Large Animal Reproduction
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Maximum of 8 students, not Early Entry Priority: FA majors. First priority to students who are taking VCSN 810,880 Dairy Production Medicine Clinic

VCSN 878 Sports Medicine Clinic - NBC
The Sports Medicine Clinic provides exposure to many types of problems facing the equine practitioner, concentrating on lameness and performance evaluations. While part of the course stresses traditional lameness evaluation and clinical diagnoses, high-speed treadmill evaluations and nuclear scintigraphy enable the student to participate in more intricate problems affecting sport horses. The course will provide students with the opportunity to develop techniques of examination and diagnosis, and permit direct contact with clients. Students are expected to perform in all areas and participate to the maximum of their ability. Duties may include care and SOAPs of in patients and may include care over a weekend. There is NO emergency duty. In order to participate students are required to have satisfactorily completed the prerequisite courses.

Taught by: Dr. E. Davidson and Staff
Prerequisites: Prerequisites: VCSN 646 Equine Lameness and VCSN 649 Large Animal Diagnostic Imaging
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: 2 students/rotation. Notes: Not offered during VCSN 812,872 Sports Medicine/Imaging

VCSN 879 Equine Podology - NBC
This course covers the principles of both normal and corrective shoeing as well as examining the current theories of hoofcare. The student will attend surgery rounds beginning in radiology each morning; and work with the resident farrier and equine clinicians on the various lameness problems presented to the clinic. Foot anatomy and physiology will be stressed. While the students will not be required or expected to manually make or nail on a shoe, they will be required to participate in and observe the procedures utilized. Procedures expected of Equine veterinarians such as removing shoes and debriding the sole will be covered in detail. Additional specialties such as the application of extensions to foal hooves can be incorporated into the rotation if requested.

Taught by: P. Reilly and Staff
Activity: Clinical Rotation Dental & Vet school
2 Credit Hours
Notes: Limitations: 2 students/rotation. Note: Not offered during VCSN 812,872 Sports Medicine/Imaging

VCSN 880 Dairy Production Medicine Clinic - NBC
This program is an integrated curriculum sponsored by the Sections of CAHP, Field Service and Reproduction as a part of the Food Animal Majors Program of the School of Veterinary Medicine. Curriculum begins with an overview of the "Economic Reality" of dairy production progressing through "Quantitative Skills" - T test, Chi Square, and Proportions; "Semen Selection" - visit stud, concepts in genetics semen selection and allocation and linear programming approaches; "Heifer Rearing" - systems view of heifer rearing, evaluation of heifer weight gain and evaluation of heifer reproduction; "Dairy Herd" - vaccination programs through body condition scoring; "Milk Quality" - principles of milking machine, procedures evaluation, mastitis control programs, DHIA, SCC monitoring programs, microbiology and quality assurance Reproduction - traditional programs, new programs and evaluation and interpretation of infertility and pregnancy loss; "Monitoring Reproduction" - current measures, heat detection, breeding intervals, developing a heat detection program; "Record Systems" - DHIA records, paper records, DAIRY COMP 305 (down loading data); "Dairy Nutrition" - ration evaluation using Spanan, interaction with reproduction, MUN interpretations; "Culling" - basic economic concepts and sample applications; "Facilities Evaluation" - ventilation and free stalls; "Computer Data Bases" - DairyL, AABPL, Merck Diagnostic Program, Cornell Diagnostic Program and Internet sites; "Laboratories" - obstetrics/fetotomy, special procedures, follow the estrus cycle in a cow (2 students/cow), milk progesterone kits and breeding soundness examination; "Herd visits with private practitioners"

Taught by: Dr. D. Galligan, M. Kristula and Staff
Also Offered As: VCSN 810
Activity: Clinical Rotation Dental & Vet school
24 Credit Hours
Notes: Limitations: 10 students. Priority: FA Majors
VCSN 881 Food Safety and Quality Assurance - NBC
The purpose of this course is to prepare the student to: 1) Identify human health hazards in food of animal origin. 2) Define some of the roles of the veterinarian in preventing/reducing the introduction of biohazards into the food chain. 3) Discuss the principles of safe food practices for both animals and humans. 4) Recognize and describe where laboratory studies (microbiology, toxicology, chemistry) would help define real or potential problems. 5) Define the appropriate times to utilize laboratory evaluations and become familiar with interpretive criteria. 6) Participate in field trips to learn about different practices and processes. Assess sites in terms of HACCP criteria. 7) Interact with representatives from local and federal agencies concerning policies, application of technology and recommendations concerning problem solving issues. 8) Discuss intervention actions that can be initiated during acts of bioterrorism and/or naturally-occurring disasters (using recent events as models for discussion). Case studies will be introduced as problem solving activities.
Taught by: Dr. C. Benson and Staff
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: Maximum of 10 Students. NOT OFFERED UNTIL FURTHER NOTICE

VCSN 882 Swine Production Medicine - NBC
On-farm problem solving and client communications will be emphasized in this course. Students will be required to interact with producers. Students will write a follow-up report describing the findings and recommendations from the farm visit. Each student will also be assigned a case that will require collation of careful history taking, judicious performance of diagnostic tests and critical analysis of computerized production records to reach their diagnosis. Students will visit farms and other allied industries to survey production systems and collect data to be analyzed in the course. Various production systems and cycles will be reviewed, performance targets will be explained, and their elasticity and economic prioritization will be discussed. Records and data will be analyzed and students will learn how to identify significant production deficiencies and associate these with disease processes - either non-infectious, management-related, or infectious. Strategies for dealing with specific deficiencies will be outlined and the benefits of intervening to improve productivity will be compared to the costs of disease and used in developing a recommendation for action by the producer.
Taught by: Dr. M. Pierdon and Staff
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: 2-6 students. Note: Students are required to have no other contact with swine for the duration of the course

VCSN 883 Advanced Swine Production Medicine - NBC
A new role for swine veterinarians is emerging in large scale swine production. So-called "corporate veterinarians" are employed by a single company and have the challenge of overseeing the production and health care concerns of the animals owned or managed by their employer. This course provides students with the opportunity to gain exposure to this emerging discipline in swine veterinary medicine. Principles of epidemiology, economics and health care delivery systems and their application to optimizing swine health and production will be provided. Students will work closely with selected professionals who are in a leading role in defining the veterinarians place in large scale, vertically integrated swine production. This course extends the offerings in VCSN 882. Students will be expected to complete a small project or investigation during their visit.
Taught by: Dr. G. Althouse and Staff
Prerequisites: Prerequisites: VCSN 882 Swine Production Medicine and permission of instructor.
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Note: Students are required to have no other contact with swine for the duration of the course

VCSN 884 Swine Production - NBC
Veterinarians today cannot make useful contributions to the swine industry without an intimate understanding of swine production. The successful practice of modern swine production medicine depends on the ability of the veterinarian to interweave their traditional training in medicine with the intricacies of swine husbandry. This course provides students with the opportunity to gain hands-on experience in modern swine production systems and/or swine production medicine practices. Students will learn through immersion the basic management, husbandry and/or production medicine practice by working with a practice or a farm in specific phases of swine production at a few selected, nationally recognized swine companies. Permission of instructors required.
Taught by: Dr. G. Althouse and Staff
Prerequisites: Prerequisites: VCSN 882 Swine Production Medicine and permission of instructor.
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Note: Students are required to have no other contact with swine for the duration of the course
VCSN 885 Equine Ophthalmology - NBC
This course is designed to provide students with ophthalmology experience to supplement what they obtain in the Large Animal Medicine foundation rotation, and, if taken, the Small Animal Ophthalmology elective. It is intended both for students with a special interest in ophthalmology, to broaden their exposure to include equine ophthalmology, and for equine students, to provide them with ophthalmology training that will benefit their equine patients in either general or specialty practice. This latter is particularly important given that most equine students do not take the Small Animal Ophthalmology elective and so graduate without clinical ophthalmology experience. Students will participate in the diagnosis and treatment of clinical ophthalmology cases in the hospital. Students will assist with evaluation of new cases, both inpatient and outpatient, and will be responsible for the daily treatment and examination of all hospitalized ophthalmology cases. Students will handle communication with clients and construct discharge summaries when appropriate. Exposure will vary due to fluctuations in case load. Organized laboratories in slit-lamp biomicroscopy, indirect ophthalmoscopy, and tonometry will allow the student to become comfortable with ophthalmic diagnostic techniques.
Taught by: Dr. N. Scherrer and Staff
Prerequisite: Prerequisites: Completion of Large Animal Medicine rotation
Activity: Lecture
6 Credit Hours
Notes: Limitations: This rotation offered two times throughout the year, with a maximum of three students per rotation. No minimum. Priority: The course is open to any student wishing to obtain more ophthalmology experience. A lottery may be necessary if interest exceeds availability

VCSN 890 Large Animal Medicine and Surgery Holiday Emergency Rotation - NBC
Students will assist emergency clinicians and house officers in history taking, examinations, and the medical and surgical management of large animal patients presented on an emergency basis to the hospital at New Bolton Center. Students will also be responsible for the care and treatment of medical and surgical patients hospitalized at New Bolton Center. This rotation will consist of two 12-hour shifts per day including the weekends and any holidays (example Christmas and New Year's Day). All students will be expected to participate in night, weekend, and holiday duty on a rotating basis. Students in this rotation will be responsible for five 12-hour shifts each during the one-week rotation. Students are expected to be on the premises during their duty shifts. Rounds to acquaint students with the hospitalized patients will be held daily during each shift with the emergency clinician/house officer/nursing staff on duty, but no formal teaching or Grand Rounds will occur during this rotation.
Taught by: Dr. B. Dallap Schaer and Staff
Activity: Clinical Rotation Dental & Vet school
3 Credit Hours
Notes: Limitations: preferred minimum 14 students / rotation

Veterinary Clinical Studies - Surgery Courses (VSUR)

VSUR 601 Surgical Principles
This Core lecture/laboratory/computer course emphasizes the basic principles of surgery and the application to surgical diseases of domestic animals. Attendance at laboratories for this course is mandatory. Missed laboratories will result in the grade of incomplete for the course. Missed laboratories will be made up during the next time the missed laboratory becomes available. Clinical Exercises, Course VSUR 602, in Quarter 1 cannot be taken until all course requirements for Surgical Principles have been completed.
Taught by: Drs. M. Ross, Ortved and Staff
Activity: Lecture
4 Credit Hours

VSUR 602 Clinical Exercises
Taught by: Dr. D. Holt & Dr. G. Gianotti and Staff
Prerequisites: Prerequisites: Passing grades in VSUR 601 Surgical Principles and VSUR 604 Anesthesia
Activity: Lecture
1 Credit Hour

VSUR 603 Clinical Orthopedics
This course presents the basic principles of orthopedic surgery and orthopedic disease. Course material includes small animal orthopedics, large animal orthopedics and orthopedic radiology. Laboratories include two radiograph reading sessions, one splint lab, and a lab pining and wiring plastic bones.
Taught by: Dr. K. Agnello and Staff
Activity: Lecture
4 Credit Hours

VSUR 604 Anesthesia
This course reviews basic physiologic and pharmacologic aspects and their relationship to clinical application of general anesthesia. Uptake of anesthetic agents and distribution to various organ systems are discussed as are the changes in acid-base balance produced by the state of anesthesia. Effects of anesthesia on pulmonary gas exchange and cardiovascular function are emphasized. The clinical aspects of pre-anesthetic medications, the choice of anesthesia, equipment and techniques, cardiopulmonary resuscitation, and the management of specialized cases are discussed. One progressive examination is given, and the final exam is comprehensive.
Taught by: Dr. J. Pavez and Staff
Activity: Lecture
4 Credit Hours
Veterinary Clinical Studies and Advanced Medicine - Philadelphia (VCSP)

VCSP 630 Hematopoiesis
This course aims to correlate clinical and basic science in comparative hematology. Faculty from the Veterinary and Medical Schools will present recent developments in clinical medicine and basic research of disorders of blood cells, including transfusion medicine, erythrocyte defects, myelodyplasia, transplantation, cytokines, etc. Informal lecture presentations will allow for ample discussions with instructors. Attendance, participation in class and a paper on a suitable topic of hematology submitted at the end of the course will make up part of the grade for this course. The written review and discussion of an original study paper will serve also as one of the clinical competency requirements.

Taught by: Dr. U. Giger and Staff
Prerequisites: Prerequisites: 1st and 2nd year core courses
Activity: Lecture
2 Credit Hours
Notes: NOT OFFERED DURING 2017-2018

VCSP 632 Diagnosis of Common Veterinary Intoxications
The diagnosis of poisoning in small animals has become an important part of Veterinary Medicine. All parts of Veterinary education are used in making diagnoses and formulating treatment of the poisoned animal patient. Thus, the course involves the integration of preclinical and clinical subjects, rather than simply the study of toxicology. The instructors will provide detailed descriptions of cases from the Emergency Service files, integrated with the more typically academic aspects of toxicology. A variety of common toxins will be discussed including ethylene glycol, lead, zinc, organophosphates, rodenticide anticoagulants, cholecalciferol and non-steroidal anti-inflammatory drugs. The format for this course will be creative and include interactive lectures and discussions. The major emphasis of the course will be the clinical diagnosis and clinical management of intoxicated patients utilizing basic physiological and pharmacologic principles.

Taught by: Dr. K. Drobatz and Staff
Activity: Lecture
2 Credit Hours
Notes: Limitations: Minimum of 10 students

VCSP 635 Introduction to Companion Avian Medicine
This course is designed to provide the future veterinarian with the tools to evaluate, diagnose, and treat pet avian species in clinics and beyond. Although the course will mainly focus on common psittacine species kept as pets, information on columbiform and passerine species will be provided as well. Topics covered will include pet parrot taxonomy, husbandry, nutrition, clinical examination, common infectious diseases, and practical diagnostic and surgical techniques. The final grade is based on attendance (students with 3 unexcused absences will receive a penalty to their grade) and completion of an in-class final examination. Submission of a course evaluation at the end of the course is required for a grade.

Taught by: Dr. N. Wyre and Staff
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses
Activity: Lecture
2 Credit Hours

VCSP 636 Introduction to Reptile and Amphibian Medicine
This course is designed to provide the future veterinarian with the tools to evaluate, diagnose, and treat captive reptiles and amphibians in clinics and private practice, zoological institutions, and herpetological collections. This course will focus on the more common species kept as pets. Topics covered will include captive husbandry, basic herpetology, nutrition, clinical examination, common infectious and noninfectious diseases, surgery and anesthesia, diagnostic and treatment techniques. The final grade is based on attendance (students with 3 unexcused absences will receive a penalty to their grade) and completion of an in-class final examination. Submission of a course evaluation at the end of the course is required for a grade.

Taught by: Dr. L. Latney and Staff
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses
Activity: Lecture
2 Credit Hours

VCSP 637 Professional Foundations
Includes: 1) making the transition from student to employed veterinarian (resumes, cover letters/letters of intent, interviews, and job selection); 2) personal finance and investment strategies; 3) negotiation skills; 4) stress management; 5) evaluating disability insurance and understanding basic retirement planning options to know what to ask in an interview as part of your benefit plan; 6) time management & goal planning and 7) workshops on obtaining internships or a residency, and (b) Interview Role-Playing/Communication skills. Students are required to submit detailed personal budgets for their first year after graduation and a typewritten resume or curriculum vitae. To receive an "A" students also must submit a 3-year personal, professional, and financial plan. Course notes will be distributed at the first class session.

Taught by: Dr. M. Bryant and Staff
Activity: Lecture
2 Credit Hours

VCSP 638 Legal Issues for Veterinarians
Course is a broad overview of the legal issues veterinarians face on a daily basis, including legal constraints on practice; overview of laws regulating animals (including laws specific to Pennsylvania); divorce and custody battles; illegal drug compounding; internet pharmacies; lemon laws; pet health insurance; vaccination and liability; negotiating and understanding the employment relationship; veterinary malpractice and state board investigations; responding to client complaints; importance of medical records/informed consents; and, applied professional ethics with clients and colleagues including study of social media. A course hand-out will be provided. Testing of students will be through the use of 2 homework assignments. Attendance mandatory.

Taught by: Dr. C. Lacroix and Staff
Activity: Lecture
2 Credit Hours
VCSP 641 Small Animal Pediatrics
The objective of this course is to further familiarize the student with the small animal pediatric patient and the proper approach to clinical diagnosis. Lectures are complemented with case reports which serve as a basis for small group discussions. Emphasis is placed on integration of new and previously acquired knowledge to construct differential diagnoses when presented with appropriate historical data and physical as well as laboratory findings. Diagnostic tests and therapeutic regimes for various conditions are discussed in the context of these cases. Grading is based upon attendance, participation in case discussions and performance at a final take home exam.
Taught by: Dr. M. Casal and Staff
Prerequisite: Prerequisites: 1st-3rd Year Core Medicine Courses Activity: Lecture
2 Credit Hours
Notes: Limitations: 40 Students

VCSP 642 Topics in Neurology
This seminar series will stress broad topics, the majority to be selected by the students, which relate to clinical neurology or neuroscience in general. Seminar topics will be selected and presented by students. The course grade (Pass/Fail) is based on class participation. Taught by: Dr. C. Vite and Staff
Prerequisites: Prerequisites: 1st, 2nd, 3rd Year Core Medicine Courses Activity: Lecture
2 Credit Hours
Notes: Limitations: Min. 8 students; Max. 20 students. CONFLICT: Possible conflict with VPTH641 Laboratory Animal Medicine

VCSP 643 Small Animal Clinical Nutrition
The first half of the small animal nutrition course will be devoted to: (1) information on feeding normal dogs and cats for maintenance and the prevention of disease and (2) the pet food industry, including labeling, regulation and laboratory on the evaluation of pet foods. The second half of the course will examine the role of dietary manipulation in the management of a wide variety of canine and feline diseases. The course format utilizes a combination of individual and group exercises, discussion, cases, and lectures some of which will require preparation outside of scheduled class time. Grading will be pass/fail and based on attendance, class participation and an individual take-home project. Taught by: Dr. K. Michel and Staff
Prerequisite: Prerequisites: Core Nutrition Course Activity: Lecture
2 Credit Hours

VCSP 646 Small Animal Surgery
This course will cover selected topics of advanced surgical procedures in dogs and cats. Emphasis will be given to diseases and conditions where treatment usually requires elaborate procedures. Material presented will involve major organ systems such as the gastrointestinal tract, the respiratory tract and the urogenital tract. Furthermore, the skin, the endocrine system, and the peritoneal and pleural cavities will be given special consideration. Minimally invasive surgery as well as advanced surgical tools and equipment will also be discussed. The course will be restricted to what is generally understood as soft tissue surgery. Taught by: Dr. L. Aronson and Staff Activity: Lecture
3 Credit Hours

VCSP 647 Small Animal Surgery/Anesthesia Laboratory
The class is divided into 2 groups. Building on the Core Anesthesia and Surgery laboratory course, this course provides the student with experience as assistant surgeon, surgeon and anesthetist while performing exploratory laparotomy and hysterectomy in cats. The cats are provided by an animal shelter and are returned to the shelter for adoption following surgery. Students enrolled in the course, working in teams of three, are responsible for examination and veterinary care (under supervision) at least daily while the cats are at the Veterinary School. There are two additional laboratory sessions. One is a session during which enterotomy, intestinal anastomosis and other soft tissue procedures will be performed by each student on tissues. The other is an orthopedic procedure session during which pinning and plating techniques are performed by each student on models. Taught by: Dr. J. Runge and Staff
Prerequisites: Prerequisites: Passing grade in Core Surgery and Anesthesia Courses Corequisite: Postrequirements: Students taking this course must take Small Animal Orthopedic Surgery Rotation VCSP 811 or VCSP 871 Activity: Lecture
2 Credit Hours
Notes: Limitations: No Add/Drop period; max. of 24 students

VCSP 648 Small Animal Anesthesia
This lecture and discussion course will stress the application of physiology, pharmacology, clinical pharmacology, and economics to the problems encountered during the clinical administration of anesthesia. Taught by: Dr. Juan Pavaz and Staff
Prerequisite: Prerequisites: VSUR604 Anesthesia Activity: Lecture
1 Credit Hour

VCSP 649 Emergency/Critical Care Medicine
Small group case-based discussions pertain to the clinical evaluation and management of small animal emergency and critical care patients. Life-threatening abnormalities of the nervous, cardiovascular, respiratory, endocrine, gastrointestinal, and urinary systems are presented in a problem-oriented manner. Actual clinical case material is used to illustrate principles with emphasis placed on the physiology and pathophysiology of the presenting problem. Monitoring and therapeutic procedures (both conservative and non-conservative) will be presented. The grade will be based on a final examination given to small groups at the end of the course. The examination will be a clinical problem similar to all the other clinical problems presented in the course. Everyone in the same group will receive the same grade. Taught by: Dr. E. Reineke and Staff
Prerequisites: Prerequisites: 1st, 2nd and 3rd Year Core Courses Activity: Lecture
3 Credit Hours

VCSP 650 Small Animal Dentistry and Oral Surgery
Building on the dentistry and oral surgery information presented in VMED611, Med/Surg I the lectures cover the spectrum of dental and oral diseases and procedures seen and practiced in small animals. The course is integrated with oral surgery lectures presented in VCSP 648, Small Animal Surgery elective. Although there are normally no laboratory practice sessions included in this course, laboratory practice sessions based on material in this course are included in the Small Animal Dentistry and Oral Surgery clinical rotation (VCSP 817,VCSP 877). Taught by: Dr. A. Reiter and Staff
Prerequisites: Prerequisites: Core Medicine and Surgery Courses Activity: Lecture
2 Credit Hours
VCSP 651 Practice Management
Includes establishing a realistic fee schedule; effectively marketing veterinary services; determining how much income a practice owner really makes; the veterinary client’s perception of value; establishing a small or mixed animal practice; medical records as a legal defense and to generate income; understanding the vet-pet-client relationship to develop a bond-centered practice; introduction to personnel management and employment law; understanding the Internal Revenue Code, the payment of taxes, and the need for a schedule C to reduce one’s tax liability; successfully organizing one’s basic business management strategies; and marketing veterinary services. A 300-page notebook and 150 page hard cover book entitled The Art of Veterinary Practice Management will accompany this course and be provided at no charge by a corporate sponsor. The final examination consists of a group project to be completed by 2-4 people using a typical practice management “headache” as the problem to be resolved. Four guest speakers will participate in this course.
Taught by: Dr. D. Eigner and Staff
Activity: Lecture
3 Credit Hours

VCSP 652 Introduction to Shelter Animal Medicine
This course is designed to complement the senior year Shelter Animal Medicine rotation by introducing students to some of the particular problems and issues facing veterinarians who work with animal shelters and animal control facilities. The course will combine lectures and discussion periods, and will involve significant out-of-course reading assignments. Topics covered will include: husbandry and disease management, pet population dynamics and control, behavior and behavior problems, feral cats, and animal cruelty & neglect. Course grades will be determined by attendance, participation in discussions and a final take home exam.
Taught by: Dr. B. Watson and Staff
Activity: Lecture
2 Credit Hours
Notes: CONFLICT: VPTH 635 Introduction to Fish Diseases

VCSP 654 Small Animal Critical Care Medicine
This course offers a comprehensive overview of several key aspects of critical care medicine. Lectures will primarily use a "case-based" approach with discussion of the physiology of organ function and the pathophysiology of disease, and will highlight state-of-the-art concepts for these exciting patients. The final session will be a "hands-on" laboratory in which the students will work with the monitoring instruments that have been discussed during the course. Evaluation will be based on a take home examination.
Taught by: Dr. D. Silverstein and Staff
Prerequisites: Prerequisites: Core Medicine and Surgery Courses
Activity: Lecture
2 Credit Hours

VCSP 655 Introduction to Wildlife Medicine I
This course is designed to provide an overview of the field of wildlife medicine for first year veterinary students through lectures from veterinarians working in various aspects in wildlife medicine. Wildlife Medicine I will present current issues in environmental monitoring, emerging diseases and public health, disease surveillance and prevention, disease outbreaks and control, captive propagation and species re-introduction, disaster medicine, and wildlife rehabilitation. The format will consist of eight lectures, each approximately one hour in length, and a required two-hour wet lab held at Tri-States facility, the Frink Center for Wildlife, in Newark, DE. Optional lectures may be scheduled during the semester based on student interest and speaker availability. Students are expected to attend all required lectures and participate in the wet lab to receive credit for the course. Grades will be based on attendance (50%) and on three worksheets (50%); a five-page paper may be substituted with the approval of the instructor. Opportunities for clinical experience at the Frink Center for Wildlife will be scheduled during the semester; students are expected to sign up in advance and are responsible for their own transportation.
Taught by: Dr. S. Welte and Staff
Activity: Lecture
1 Credit Hour
Notes: Note: This course is a prerequisite for Course VCSP 656 Introduction to Wildlife Medicine II. This course is graded Pass/Fail

VCSP 656 Introduction to Wildlife Medicine II
This course is designed to provide an introduction to the clinical aspects of wildlife medicine for first year veterinary students through a lecture and wet lab format. Lecture and/or laboratory topics will include zoonotic diseases, diseases of native mammals, marine mammals, reptiles and birds; pathology, physical examination techniques, and introductions to necropsy techniques, fracture immobilization, and emergency care. The format will consist of six lectures, each approximately one hour in length, and three two-hour wet labs. Optional lectures may be scheduled during the semester based on student interest and speaker availability. Students are expected to attend all lectures and participate in the wet labs to receive credit for the course. Grades will be based on attendance (50%) and on three worksheets (50%); a five-page paper may be substituted with approval of the instructor. Opportunities for clinical experience at the Frink Center for Wildlife will be scheduled during the semester; students are expected to sign up in advance and are responsible for their own transportation.
Taught by: Dr. S. Welte and Staff
Prerequisite: Prerequisite: VCSP 655 Introduction to Wildlife I
Activity: Lecture
1 Credit Hour
Notes: Limitations: Maximum of 72 students. This course is graded pass/fail. Note: In case of over enrollment, permission of course organizer is required
VCSP 657 Case Studies in Exotic Companion Animals
This course is designed to allow the student to use what they have learned about special species and put all of the information together to work through a clinical case. The first three weeks will be spent discussing topics in special species medicine. Week one will include ethical dilemmas in special species medicine. The second and third week will be reviewing and critiquing journal articles in special species medicine. Thereafter, each week, a case history will be posted on the courses website and the students will come to class to discuss that case. The course instructor will lead the discussions including how to ask the correct history questions and how to interpret the physical examination findings. The class will decide on rule outs, diagnostic testing, and treatment options. During the second to last class, the students will be divided into groups and will be given an unknown case to work out on their own. At the last class meeting, each group will present their findings. Attendance is mandatory since this is a case-discussion class. Missed classes cannot be made up; for each missed class the grade will be lowered. Grades will be based on attendance and participation in the unknown case presentation.
Taught by: Dr. N. Wyre and Staff
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses
Activity: Lecture
2 Credit Hours
Notes: Limitations: Limited to 20 students

VCSP 658 Pet Small Mammal Med/Surg
This introductory course will mainly cover pet rabbits and ferrets with some discussion of rodents and other small mammals seen in veterinary practice. Husbandry, physical examination, diagnostic testing, and treatment techniques of these animals will be presented. The most common health problems and surgeries will be discussed. After this course, the student should be better prepared to see these patients during their clinical rotations and in practice. Student evaluation will be based on a final exam.
Taught by: Dr. L. Latney and Staff
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses
Activity: Lecture
2 Credit Hours

VCSP 659 Small Animal Advanced Cardiology
This course will build on the core cardiology curriculum by introducing a wider range of topics involving cardiovascular disease, treatment, and research in small animals. In-depth topics include diagnosis and treatment of cardiac arrhythmias, correction of congenital heart defects using minimally invasive catheter-based therapies, echocardiography of feline cardiomyopathy, clinical pathophysiology of degenerative valve disease, and a review of the clinical trial evidence that forms the basis of standard treatment recommendations for congestive heart failure. The course is designed for a relatively small number of students so that discussion and interaction with the instructor(s) is facilitated. The course is suitable for students that might be interested in cardiology specialization or research careers as well as for future general practice veterinarians that wish to provide a high level of cardiac care for their patients.
Taught by: Dr. M. Oyama and Staff
Activity: Lecture
1 Credit Hour
Notes: Maximum enrollment 20 students

VCSP 660 Advanced Small Animal Electrocardiography and Arrhythmias
This course will build on the core cardiology curriculum by providing practical experience involving electrocardiographic (ECG) interpretation and the diagnosis and treatment of cardiac arrhythmias in small animals. Specific topics include diagnosis of both supraventricular and ventricular arrhythmias as well as proper selection of antiarrhythmic therapy and an introduction to artificial pacemaker implantation. The course is designed for a relatively small number of students so that discussion and interaction with the instructor(s) is facilitated. The course includes 6 hours of laboratory where students will work through ECG cases in a small group setting. The course is suitable for students that might be interested in cardiology specialization as well as for future general practice veterinarians that wish to provide a high level of cardiac care for their patients.
Taught by: Dr. M. Oyama and Staff
Activity: Lecture
2 Credit Hours

VCSP 666 Shelter Surgical Opportunities I
This course is an introduction to High Quality High Volume (HQHV) surgery in the shelter environment and is based on the Association of Shelter Veterinarians veterinary medical care guidelines for spay-neuter programs. Lecture topics and examinations are delivered online and include an overview of HQHV surgery, patient handling, anesthesia and pain management in the shelter environment, partner protocols, patient monitoring, patient pre-surgical preparation, basic surgical principles and sterilization of the male cat. The lab component of this course consists of two hours of knot laboratory and knot certification followed by six hours at a partner shelter participating in the pre-operative activities, organized as stations, which include physical exam, induction, patient preparation and recovery. The final eight hours are devoted to rotation through the stations and performance of cat castrations under direct supervision. This course is designed to prepare students to pursue castration certification (certification that a student can castrate a male cat with direct supervision, required for Shelter Surgical Opportunities II). This elective can be taken after the Spring semester of first year, including the summer, and grading is pass/fail.
Taught by: Dr. Brittany Watson
Activity: Lecture
1 Credit Hour
Notes: Notes: Ongoing (may be taken after the Spring semester of the 1st year, including summer)
VCSP 667 Shelter Surgical Opportunities II
This course is designed to be a continuation of Shelter Surgical Opportunities I and consists of six hours of online lectures/exam that cover inhalant anesthesia, more advanced knots and suture patterns, sterilization of the female cat, special sterilization cases, emergency procedures in the shelter environment and surgical instruments and pack preparation. Eighteen hours of on-site work at a partner shelter will be devoted to learning to spay and participate in peri-operative activities. Spay participation is designed to incrementally build surgical skills and confidence through the process of students scrubbing into a cat spay and performing one portion of the spay surgery. This permits students to achieve competency with the spay procedure over the course of multiple surgeries, eventually allowing a student to seek spay certification (certification that the student can perform an entire cat spay without direct supervision, required for Shelter Surgical Opportunities III). This course can be taken any time, including the summer after passing VSUR 601 Surgical Principles (offered as part of the core curriculum in the first quarter of second year), passing Shelter Surgical Opportunities I and achieving castration certification. Grading is pass/fail. Taught by Dr. Brittany Watson
Prerequisites: Prerequisites: VSUR 601 Surgical Principles, Shelter Surgical Opportunities I, Castration Certification
Activity: Lecture
1 Credit Hour
Notes: Ongoing (may be taken after the Spring semester of the 1st year, including summer)

VCSP 668 Shelter Surgical Opportunities III
This course is designed to be a continuation of Shelter Surgical Opportunities II and is an advanced elective offered to students who wish to achieve spay certification (if not previously spay certified) and pursue additional surgical opportunities. Four hours of didactic instruction will be offered online covering sterilization surgeries of adult and pediatric dogs as well as specialty surgeries such as enucleation, amputation, wound repair and mass removal. At least six hours of the 20 clinical hours will be spent at a partner shelter that provides opportunities to perform surgery on dogs. It is anticipated that students will perform 15-30 sterilization surgeries in this elective. Every effort will be made to allow students to meaningfully participate in non-sterilization surgeries such as mass removal, enucleation, amputation and wound repair after they are spay certified, although achievement of this goal may require an on-call option depending on caseload and individual student interest. This course can be taken any time, including the Summer after passing Shelter Surgical Opportunities II and grading is pass/fail. Taught by Dr. Brittany Watson
Prerequisite: Prerequisites: Shelter Surgical Opportunities II
Activity: Lecture
1 Credit Hour
Notes: Ongoing (may be taken after the Spring semester of the 1st year, including summer)

VCSP 700 Small Animal Internal Medicine-Foundation
The Internal Medicine rotation involves clinical training in all core medicine disciplines including endocrinology, gastroenterology, hematology, infectious disease, nephrology, oncology and pulmonary medicine. Fourth year students will assist doctors in history taking, physical examinations and the medical management of patients presented to the Matthew J. Ryan Veterinary Hospital of the University of Pennsylvania. Students will also have directed supervision on nutritional aspects of internal medicine cases by a board-certified clinical nutritionist. Emphasis will be placed on problem solving, understanding of pathophysiology and integration and utilization of principles of medicine. As experience is gained, students will assume more responsibility in patient management. Students and staff will participate in daily rounds and conferences. Taught by Dr. M. Rondeau and Staff
Activity: Clinical Rotation Dental & Vet school
12 Credit Hours

VCSP 710 Small Animal Internal Medicine
Fourth year students will assist the faculty and house officers in history taking, physical examination, and medical management of patients presented to the Matthew J. Ryan Veterinary Hospital of the University of Pennsylvania. Clinical teaching will emphasize a problem-solving approach to disease associated with the endocrine, gastrointestinal, hematologic, pulmonary and urogenital systems. Interpretation of clinical pathology data will be an integral part of this exercise. As experience is gained, the student will assume more responsibility in patient management. Students, faculty and house officers will participate in medicine rounds and conferences on a daily basis. Taught by Dr. M. Rondeau and Staff
Also Offered As: VCSP 770
Prerequisite: Prerequisites: VCSP 700 Small Animal Internal Medicine-Foundation
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Required: SA
VCSP 712 Small Animal Intensive Care Medicine Service
The ICU rotation provides a good medical approach to the management of critical and often very unstable patients. Since these cases are often very challenging diagnostically, and also very dynamic, they provide an excellent learning experience, with ample opportunity for one-on-one discussion with the clinician, and for background reading. Students have an opportunity to become familiar with use and interpretation of the advanced technical equipment available in the ICU, and are also encouraged to perform and perfect technical skills such as catheterization of blood vessels and urinary bladder, obtaining arterial blood samples, etc. During the rotation, we encourage integration and a team approach among the students, the ICU clinicians, and the nursing staff. Students on the ICU service start daily at or before 7:00 a.m, and stay until their cases are stable and all of the proposed diagnostics have been completed (usually 6-7 p.m). Students are expected to SOAP the cases daily including weekends, to be closely involved in decision-making, diagnostics and therapeutics, and to present and discuss the cases at daily rounds. Students are internally scheduled to assist in treatments in the Intensive Care Unit; patient care shifts may include evening and overnight responsibilities. Weekend duties are distributed equitably among all assigned students. Cage rounds are held daily at approximately 2 PM. Student teaching rounds are held most weekdays at approximately 2.30 PM.

Taught by: Dr. D. Silverstein and Staff
Also Offered As: VCSP 772
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: 3-4 students per rotation. Required: SA

VCSP 715 Small Animal Cardiology Service
Students will participate in outpatient and inpatient cardiovascular examinations and treatments. Cardiology Clinic days are currently Wednesday/Thursday/Friday, but are subject to change. Cardiology invasive procedures are performed on Tuesdays. Cardiology also provides consultation to other services and accepts transfer of Cardiology cases for primary care. Student responsibilities include obtaining a complete medical history and performing a thorough physical examination with emphasis on the cardiovascular system. After an orientation period on the first day, students are responsible for recording and interpreting electrocardiograms as well as interpreting thoracic radiographs and pertinent clinical laboratory data. Students assist with recording echocardiograms and are expected to become familiar with echo image recognition and common measurement techniques. Students are also expected to summarize pertinent findings in cases under their care at daily rounds and be able to discuss their significance. Completion of the medical case record for review by the attending cardiologist is required. The group captain will develop a schedule for the daily examination and morning treatments (seven days/week) of all hospitalized cases for which the cardiology service is responsible. A quiz is administered the final day of the rotation and determines 15% of the students grade for the rotation. Students should review notes for VMED 611 and the small animal cardiology computer assisted learning site prior to beginning the rotation.

Taught by: Dr. M. Oyama and Staff
Also Offered As: VCSP 775
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Note: satisfies requirement: SALA. Required: SA

VCSP 716 Dermatology & Allergy Service
This course exposes the student to case material presented to the Dermatology and Allergy Clinic at the small animal. This course exposes the student to case material presented to the Dermatology and Allergy Clinic at the small animal hospital, and may include case material presented to the large animal hospital at New Bolton Center. Special emphasis is given in the discussion of each patient to the etiopathogenesis, diagnosis, and treatment of disease. Attendance during receiving of large animal cases at NBC may be required on one Wednesday of each block, although volunteers will be sought first.

Taught by: Dr. C. Cain and Staff
Also Offered As: VCSP 776
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Required: SALA; SA

VCSP 717 Comprehensive Cancer Care Service
This rotation will expose students to a comprehensive approach to clinical oncology in small animals, including cancer diagnosis, staging, treatment, and palliative care. This service is primarily comprised of faculty and staff from Medical Oncology, Surgery, and Radiation Oncology. Other services, such as Interventional Radiology and Dentistry and Oral Surgery, will also be involved. Students are expected to participate in the care of outpatient and hospitalized cases (including pre and post-operative care for Surgical Oncology patients) and in patient care rounds in the morning and afternoon. Weekend duties include morning and afternoon treatments for hospitalized patients. Each student will present and discuss a journal article or relevant tumor topic once during the rotation.

Taught by: Dr. J. Mahoney and Staff
Also Offered As: VCSP 777
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Maximum 5-6 students per rotation

VCSP 721 Primary Care Services
This rotation will offer students the opportunity to evaluate cases scheduled with the Primary Care Service (PCS). The Primary Care Service is designed to give students first-hand experience in dealing with common general practice clinical cases and with client communication. The main objective is for students to have the opportunity to be the vet while working under the guidance and supervision of a PCS veterinarian.

Taught by: Dr. G. Mengel
Also Offered As: VCSP 781
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: Minimum of 3 and maximum of 5 students per rotation. Required for: SA, SALA
VCSP 722 Small Animal Pediatrics/Genetics/Reproduction
The Small Animal Pediatrics-Genetics-Reproduction Clinic is run under the supervision of two board-certified faculty and two residents and emphasizes the unique care of pediatric patients, the approach and management of hereditary diseases, and reproductive problems. Pediatric and genetics clinics are held on Mondays and Tuesdays, and reproduction appointments are seen any day of the week. In addition to the clinical appointments, there is opportunity to see several unique genetic diseases in dogs and cats and handle the youngest of pediatric patients in the animal colonies, as well as get an appreciation for the specialty diagnostic laboratories. The clinical rotation deals with the initial yet crucial pediatric wellness visits including nutrition, socialization and preventive care and disease issues specific to this age group. The clinic highlights the evaluation of normal development and diagnosis of diseases of puppies and kittens (<1 year). Moreover, kittens and puppies with known or suspected inherited disorders are examined for which genetic counseling or special diagnostic studies are required. It provides experience with routine immunizations, treatment and prevention of parasitism, and nutritional and spay/neuter counseling.
Taught by: Dr. M. Casal and Staff
Also Offered As: VCSP 782
Activity: Clinical Rotation Dental & Vet school
2 Credit Hours
Notes: Required for: SA; Recommended for SALA

VCSP 770 Small Animal Internal Medicine Clinic
The elective rotation in small animal internal medicine will provide further contact and experience in problems of internal medicine (diseases of the endocrine, gastrointestinal, hematologic, pulmonary, and urogenital systems). Students in the elective rotation will be assigned more complex cases, and they will be expected to assume more responsibility for patient management and decision-making.
Taught by: Dr. M. Rondeau and Staff
Also Offered As: VCSP 710
Prerequisite: Prerequisites: VCSP 700 Small Animal Internal Medicine-Foundation
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 772 Small Animal Intensive Care Medicine
This is an elective clinical rotation equivalent to VCSP 712.
Taught by: Dr. D. Silverstein and Staff
Also Offered As: VCSP 712
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Based on Hospital Needs; 3-4 students per rotation

VCSP 775 Small Animal Cardiology Service
This is an elective clinical rotation equivalent to VCSP 715 for Equine, Food Animal and Larger Animal Majors or as a second rotation in Cardiology for Small Animal or Small Animal/Large Animal Majors.
Unless a student electing a second clinical rotation through the Heart Station makes special arrangements with the cardiology faculty on service, there is no distinction between this elective rotation and VCSP715. However, if a student has objectives for the elective rotation beyond the opportunity to see additional case material, an attempt will be made to accommodate proposals for a more individualized rotation to the extent that the regularly scheduled Heart Station activities are not compromised. A quiz is administered the final day of the rotation and determines 15% of the students grade for the rotation.
Taught by: Dr. M. Oyama and Staff
Also Offered As: VCSP 715
Prerequisite: Prerequisites: Core Medicine Courses
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 776 Dermatology & Allergy Service
This is an elective clinical rotation equivalent to VCSP 716.
Taught by: Dr. C. Cain and Staff
Also Offered As: VCSP 716
Prerequisite: Prerequisites: Core Medicine Courses
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 777 Comprehensive Cancer Care Service
Taught by: Dr. J. Mahoney and Staff
Also Offered As: VCSP 717
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours

VCSP 778 SA Neurology
A two week long clinical rotation which will include: 1) Participation in receiving outpatients, 2) Participation in diagnosis, treatment/care and discharge of hospitalized patients, 3) Participation in all aspects of in-hospital patient consultations, 4) Students should anticipate having independent library research projects for subsequent small group discussion, 5) Students will be expected to participate in all aspects of weekend duty which is typically (but not necessarily) 8:00 am to Noon each Saturday and Sunday. Primary emphasis will be placed on the student learning to perform and interpret the results of the neurologic examination. Reviewing the description of the examination procedures in any standard veterinary neurology textbook will be extremely valuable. The course will provide opportunity for the student to become familiar with various diagnostic methods. The student will be expected to have reviewed and know the contents of classroom notes. Faculty method of evaluation: Students will be judged on their knowledge, commitment, contribution and accomplishment.
Taught by: Dr. E. Galban and Staff
Also Offered As: VCSP 718
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: 4 students maximum. Recommended: SA and SALA majors
VCSP 781 Primary Care Services
This is an elective clinical rotation equivalent to VCSP 721.
Taught by: Dr. G. Mengel
Also Offered As: VCSP 721
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: Minimum of 3 and maximum of 5 students per rotation

VCSP 782 Small Animal Pediatrics/Genetics/Reproduction Clinic
The Peds/Gen/Repro Clinic and their board certified faculty will emphasize aspects of pediatrics such as preventative health care programs, clinical evaluation of normal development, and diagnosis and management of diseases in puppies and kittens. The Clinic will also cover examination and management of animals with known or suspected inherited disorders in young and adult animals for which genetic counseling or special diagnostic studies are required. Reproduction issues such as infertility and semen evaluation will be addressed. Breeding timing with clinical hormonal assays and vaginal cytology, artificial insemination (vaginal, transcervical, and surgical), pregnancy diagnosis with ultrasound and radiographs, and the occasional Caesarian section will also be performed. The practical information and hands-on experience provided by the Peds practice. This rotation can be paired with VCSP 876-SA Behavior. Alternatively, students may appreciate the extra time off the rest of the week (no evening, weekend and holiday coverage).
Taught by: Drs. Casal, Giger and Staff
Also Offered As: VCSP 722
Activity: Clinical Rotation Dental & Vet school
2 Credit Hours
Notes: Limitations: Minimum of 3 and maximum of 4 students per rotation. Required: SA

VCSP 790 Small Animal Medicine Holiday Rotation
The holiday internal medicine rotation will be a *learning on your feet* experience. Students will have similar responsibilities as during the core medicine rotations. Clinic appointments will be scheduled only for the first part of week one. Students will be assigned out patients and ES transfers and will evaluate these patients, formulate problem lists and appropriate diagnostic plans, participate in diagnostic procedures (e.g., bone marrow aspirate, tracheal wash), and perform treatments. Formal teaching rounds may not be held, but students will discuss patients on an individual basis with clinicians. The hours of the rotation shifts will be 6AM to 6PM and 12 noon to 12 midnight. Each student will be assigned to five shifts and will likely cover four 6AM to 6 PM shifts and one noon to midnight shift.
Taught by: Dr. M. Ronceau and Staff
Prerequisite: Prerequisites: Satisfactory completion of VCSP 700 - SA Medicine Foundation rotation
Activity: Clinical Rotation Dental & Vet school
3 Credit Hours
Notes: Limitations: preferred minimum 7 students, preferred maximum 10 students/rotation. (Maximum may vary between H1 and H2)

VCSP 798 Small Animal Neurology Holiday Rotation
Two one-week rotations will be offered during the Holiday period, each for 3 credits. Each rotation will consist of half of the Holiday period. This holiday rotation will have similar responsibilities as during the core neurology rotation. Clinic appointments will be scheduled for the first week only. Students will be assigned out patients, ES transfers, and will participate in neurology consultations for other services. Students will evaluate these patients, formulate problem lists and appropriate diagnostic plans, participate in diagnostic procedures (electrodiagnostic testing, CSF taps, imaging), and perform treatments that may include surgery. Formal teaching rounds may not be held, but students will discuss patients on an individual basis with clinicians.
Taught by: Dr. E. Galban and Staff
Prerequisite: Prerequisites: Satisfactory completion of VCSP 778 - Small Animal Neurology Service
Activity: Clinical Rotation Dental & Vet school
3 Credit Hours
Notes: Limitations: preferred minimum of 2 students; preferred maximum of 3 students per rotation. (Maximum may vary between H1 and H2)

VCSP 800 Small Animal Soft Tissue Surgery-Foundation
Students rotate through the Soft Tissue Surgery Service and are responsible for the diagnosis, preoperative, operative and postoperative care of animals presented to this service under the supervision of Surgery staff. Night and weekend duties will be scheduled. Ward rounds (informal case discussions) are conducted regularly. A neuter service is scheduled each week. Every effort will be made to provide at least one opportunity for each student during the 2-week rotation to have primary responsibility as surgeon to spay or castrate a dog or a cat. CONFERENCE HOURS: 3 hrs/day of clinics (5) = 15 hours. 2-4 hrs/day of surgery (5) = 10-20 hours.
1 hr/weekend morning (4) = 4 hour. TOTAL 29.39 hours.
Taught by: Dr. M. Mison and Staff
Also Offered As: VCSP 810, VCSP 870
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours

VCSP 811 Small Animal Orthopedic Surgery
Students rotate through the Orthopedic Surgery Service and are responsible for the diagnosis, pre-operative, operative and post-operative care of animals presented to this service under the supervision of Surgery staff. Night and weekend duties will be scheduled. Ward rounds (informal case discussions) are conducted regularly. CONFERENCE HOURS: 4-5 hrs/day of clinics (4) = 16-20 hours. 6-8 hr/day of surgery (6) = 42-48 hours. 2-3 hr/weekend day (4) = 8-12 hours. TOTAL 70-80 hours. Emergency call - varies depending on the number of students and number of emergencies.
Taught by: Dr. M. Mison and Staff
Also Offered As: VCSP 871
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Required: SA
VCSP 813 Small Animal Emergency Service
Students are assigned to a busy 24-hour, 7-day per week emergency service on a shift system. The students are responsible for diagnosis and management of animals presented to the service under the supervision of Emergency Service staff. Emergency Service rounds are held Monday through Thursday inclusive, and include topics related to emergency medicine and surgery centered around case discussion.
Taught by: Dr. K. Drobotz and Staff
Also Offered As: VCSP 873
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Note: Satisfies SA requirement. Required: SALA, SA

VCSP 814 Small Animal Radiology Service
This course primarily offers experience in small animal diagnostic radiology with some exposure to diagnostic ultrasound. Principles of radiographic interpretation teaching rounds are held daily. Students will assist in the positioning of animals and taking of routine and special procedure radiographic examinations and will observe and assist with ultrasonographic examinations of Ryan Hospital clinic cases. Students will also interact with the radiologist or radiology resident during their interpretation of the clinic cases. A 2-hour examination is given on the last day of the rotation. See Learn.vet for information on clinical competencies to be assessed in this rotation and to access additional study materials.
Taught by: Dr. J. Suran and Staff
Also Offered As: VCSP 874
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Required: SA. Satisfies SALA Imaging Requirement

VCSP 815 Small Animal Anesthesiology Service
Students are responsible for anesthetizing animals presented to the anesthesia service under the supervision of the Anesthesia staff. During the day, students will work closely with either the anesthesiologist on duty or a senior technician. Students will be scheduled with a technician for “on-call” night and weekend duty. On-call duties begin the first Tuesday (or second day) of the rotation and continue through to the last Sunday (or last day before the next rotation). The anesthesia service provides on-call services from 8 pm until 8 am during weekdays, and from Friday 8 pm until Monday 8 am over the weekend. In general, students schedule themselves for the on-call duties. Most rotations assign one student on-call per night during weekdays and split the weekend into 8 or 12-hour shifts. Anesthesia student rounds are conducted Mondays, Wednesdays, Thursdays, and Fridays. The first rounds on the first day of the rotation (usually a Monday) will occur at 9 am. Rounds on Wednesdays are at 8 am. Rounds on Thursdays and Fridays are at 7:30 am. Students are expected to attend grand rounds on Tuesdays. It is highly recommended that students prepare for their rotation by reviewing the course notes from the anesthesia core course and student surgery labs. The anesthesia handout will be given to students on the first day of the rotation. The rounds schedule and topics will be presented in more detail then.
Taught by: Dr. G. Gianotti and Staff
Also Offered As: VCSP 875
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Required: SA. Satisfies anesthesia/pain management requirement: SALA

VCSP 817 Small Animal Dentistry and Oral Surgery
Students participate in the client communication (including assessment of medical history), clinical examination, diagnostic testing (including patient restraint for intravenous catheter placement), treatment planning and treatment of animals presented with dental and oral diseases, including periodontal, endodontic, restorative and occlusal problems and oral and maxillofacial inflammation, infection, malformation, trauma and cancer. Mondays and Wednesdays are clinic appointment days, with rounds and a teaching laboratory or treatment procedures in the afternoons. Tuesdays, Thursdays and Fridays are treatment days. Occasionally, cases are hospitalized into Saturdays, and emergency cases may be referred from ES on Saturdays and Sundays. Responsibility for Saturday and Sunday patient care will be one to maximum two weekend days per student during the two-week rotation, and will most often consist of being on-call. Typically, Mondays and Wednesdays run from 8.30am-5.30pm (only rarely are there cases to SOAP on these mornings), and Tuesdays and Thursdays from 7am-6.30pm. One student will be assigned to early-call (7am) on Fridays (other students will have an 8.30am start); Friday responsibilities typically extend to 4pm, except for one late-call student.
Taught by: Dr. A. Reiter and Staff
Also Offered As: VCSP 877
Prerequisites: Prerequisites: Core surgery lecture courses.
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: 2-4 students/rotation in VCSP 817,VCSP 877 combined. Required: SA

VCSP 870 Small Animal Soft Tissue Surgery
This is an elective clinical rotation equivalent to courses VCSP 800.
Taught by: Dr. M. Mison and Staff
Also Offered As: VCSP 800, VCSP 810
Prerequisite: Prerequisites: Core Surgery Courses
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 871 Small Animal Orthopedics
This is an elective rotation equivalent to SA Orthopedic Surgery VCSP 811.
Taught by: Dr. M. Mison and Staff
Also Offered As: VCSP 811
Prerequisite: Prerequisites: Core Surgery Courses
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Based on Hospital Needs
VCSP 872 Small Animal Ophthalmology
The goals of this clinical rotation are to ensure that students achieve proficiency in performing a complete ophthalmic examination and become familiar with recognizing and treating common problems in small animal ophthalmology practice. All students are required to meet at 7:30 am on the first day, and then at 8:00 am on subsequent days of the rotation. Attendance is not required on Friday of each week but the free time is expected to be dedicated to independent study in ophthalmology. An introduction to the service will be given on the first day of the rotation which will include a graded, short quiz. It is recommended that students prepare for the clinical rotation by reviewing their course notes in ophthalmology. Clinical rounds will take place several times weekly. Topic rounds and a cadaver (pig eye), surgery wet lab will be included if time permits. Outpatient service (each day of the rotation): Students are responsible for history taking, clinical examination, treatment planning, preparation of client discharge instructions and some client communication. Surgery patients (each day of the rotation): Students assigned a patient for surgery will be responsible for helping with the patients admission (7:30am the day of surgery). In preparation for surgery, the student must have reviewed the surgical technique, performed a complete physical examination and reviewed pertinent bloodwork, SOAPS, a surgical report and client communication following the procedure are also expected. There will be an opportunity to assist with some of the surgical procedures.
Taught by: Dr. Elaine Holt and Staff
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitation: maximum 3 students per rotation; minimum two students

VCSP 873 Small Animal Emergency Service
This is an elective clinical rotation equivalent to course VCSP 813.
Taught by: Dr. K. Drobats and Staff
Also Offered As: VCSP 813
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 874 Small Animal Radiology Service
If this rotation is a first experience in small animal radiology (8721, e.g., equine, large animal or food animal majors), it is identical to course VCSP 814 and a two-hour final examination is given. If this represents a repeat experience in the small animal radiology service, and you have satisfied the clinical competencies in your previous radiology rotation, you are exempt from these clinical competency assessments in the elective rotation.
Taught by: Dr. J. Suran and Staff
Also Offered As: VCSP 814
Prerequisite: Prerequisites: Core Radiology Courses
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 875 Small Animal Anesthesiology Service
Students are responsible for anesthetizing animals presented to the anesthesia service under the supervision of the Anesthesia staff. During the day, students will work closely with either the anesthesiologist on duty or a senior technician. Students will be scheduled with a technician for “on-call” night and weekend duty. On-call duties begin the first Tuesday (or second day) of the rotation and continue through to the last Sunday (or last day before the next rotation). The anesthesia service provides on-call services from 8 pm until 8 am during weekdays, and from Friday 8 pm until Monday 8 am over the weekend. In general, students schedule themselves for the on-call duties. Most rotations assign one student on-call per night during weekdays and split the weekend into 8 or 12-hour shifts. Outpatient service (each day of the rotation): Anesthesia student rounds are conducted Mondays, Wednesdays, Thursdays, and Fridays. The first rounds on the first day of the rotation (usually a Monday) will occur at 9 am. Rounds on Wednesdays are at 8 am. Rounds on Thursdays and Fridays are at 7:30 am. Students are expected to attend grand rounds on Tuesdays. It is highly recommended that students prepare for their rotation by reviewing the course notes from the anesthesia core course and student surgery labs. The anesthesia handout will be given to students on the first day of the rotation.
Taught by: Dr. G. Gianotti and staff
Also Offered As: VCSP 815
Prerequisite: Prerequisites: Core Anesthesia Courses
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Based on Hospital Needs

VCSP 876 Small Animal Behavior Clinic
This is an elective clinical rotation in small animal behavioral medicine. Clinics are Wednesday and Thursday. Appointments are also seen on Fridays, and students are invited, but not required, to join us. Outpatient behavior clinic appointments are scheduled at approximately 3-4 hour intervals. Each student is responsible for reviewing behavior notes from VMED 616 (9005), prior to his/her first scheduled clinic. Students are required to attend all case rounds (twice per day), review records before rounds, and be prepared to present all cases. Students will assist with medical and behavioral history-taking, physical examination and diagnosis, and are responsible for a selecting handouts and writing discharge letter summarizing the recommendations made. Behavioral topics and volunteer training sessions are offered, when possible, between afternoon appointments and rounds.
Taught by: Dr. C. Siracusa and Staff
Prerequisite: Prerequisites: VMED 616 Clinical Animal Behavior
Activity: Clinical Rotation Dental & Vet school
3 Credit Hours
Notes: Limitations: Based on hospital needs. Note: Not offered every rotation

VCSP 877 Small Animal Dentistry and Oral Surgery
This is an elective clinical rotation equivalent to VCSP 817.
Taught by: Dr. A. Reiter and Staff
Also Offered As: VCSP 817
Prerequisite: Prerequisites: Core surgery lecture courses
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: 2-3 students/rotation in VCSP 817, VCSP 877 combined
VCSP 878 Exotic Companion Animal Medicine/Surgery
The purpose of this rotation is to introduce the student to exotic companion animal medicine and surgery. Students will gain knowledge of these animals by hands-on experience and participation in rounds. The student will be expected to maintain the schedule as outlined and cases are transferred from the emergency service. There will be a Monday through Thursday schedule and appointments are seen 7 days a week. Additionally, students are expected to be "on-call" for night and daytime emergencies with a clinician. Students should expect the typical day to run from 8:00 AM - 7:00 PM.
Taught by: Dr. Latney and Staff
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours

VCSP 879 Working Dog Medicine
To gain experience with all aspects of working dog medicine: Students will handle working dogs to perform general physical examinations as well as specialized assessments including but not limited to breeding soundness exams to assess dogs value in reproduction, dental examinations, and fitness evaluations. Student's examinations and handling will be incorporated into behavioral training of dogs to being handled and touched on all areas of their body. Students will participate in routine preventive care and assess and treat injuries or illnesses that occur in the WDC working dogs. Students will gain experience in behavior and sports medicine through participation in impulse control, search work, fitness and conditioning exercises. Students may incorporate other aspects of working dog medicine into their rotations depending on their interests. These areas include sports nutrition, dentistry, and various aspects of research.
Taught by: Dr. Otto and Staff
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: permission of instructor required. Note: Not offered every rotation. Location: Penn Vet Working Dog Center; 3401 Grays Ferry Ave, Philadelphia PA 19146

VCSP 880 Shelter Animal Medicine
This rotation gives a comprehensive overview of the field of shelter medicine and community outreach by partnering with service-learning model with open and closed admission shelters, HQHV surgical clinics, schools, and outreach organizations like Pets for Life. A typical rotation focuses on authentic hands-on learning including four surgical days, mentored primary case management of medical cases and shelter population rounds, public clinical outreach, herd health management, training and behavioral assessment, and providing veterinary CE for shelter staff. Rounds and tour topics include cruelty investigation and humane law enforcement, behavior, ethics, exotics, and risk analysis. Dentistry, necropsies, consults, special procedures, and outreach to local middle schools can also be included as part of the rotation depending on the week.
Taught by: Dr. B. Watson and Staff
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: 4 students

VCSP 890 Small Animal Surgery Holiday Rotation
This rotation will be similar to a regular surgery rotation with some modifications dictated by the holiday schedule. Students will assist surgery faculty and house officers in history taking, examinations, and the surgical management of small animal patients presented on an emergency basis to the Veterinary Hospital of the University of Pennsylvania. Students will be responsible for the daily care of surgical patients hospitalized at Ryan Hospital. They will also assist in surgery and perform treatments. All students will be expected to participate in night, weekend, and holiday duty on a rotating basis. Two students will be assigned to On Call duty each night and perform treatments until midnight and assist with cases needing surgery in the night and evening hours. Assignments will be made the first day of the rotation. Rounds to acquaint students with the hospitalized patients will be held each morning and as time permits with the emergency clinician/house officer/nursing staff on duty, but formal teaching or rounds will occur as time permits during this rotation.
Taught by: Dr. L. Aronson and Staff
Prerequisite: Prerequisite: Satisfactory completion of the Small Animal Soft Tissue or Orthopedics rotation
Activity: Clinical Rotation Dental & Vet school
3 Credit Hours
Notes: Limitations: preferred minimum 6 students, preferred maximum 10 students / rotation. (Maximum may vary between H1 and H2)

VCSP 893 Small Animal Emergency Service Holiday Rotation
This rotation will be very similar to the Emergency Medicine clinical rotation elective course. Students will be involved in triage, patient stabilization, history and physical examination, diagnostic workup and treatment of patients seen in the emergency room. (We want students who have an interest in learning more about emergency medicine!) Specific time will not be set aside during the rotation for student rounds; however, teaching on a case-to-case basis will be stressed. Rotation shifts will be 8 AM to 8 PM and 8 PM to 8 AM. Each student will be assigned to 5 shifts during the rotation. There will be at least two students assigned to each shift.
Taught by: Dr. Drobatz and Staff
Prerequisite: Prerequisites: Satisfactory completion of the Small Animal Emergency Medicine rotation
Activity: Clinical Rotation Dental & Vet school
3 Credit Hours
Notes: Limitations: preferred minimum 6 students, preferred maximum 9 students / rotation. (Maximum may vary between H1 and H2)

VCSP 894 Small Animal Radiology Service
Taught by: Dr. J. Suran and Staff
Prerequisites: Prerequisite: VCSP 814, 841 SA Radiology
Activity: Clinical Rotation Dental & Vet school
3 Credit Hours
Notes: Limitation: 0 - 2 students per 1 week rotation
Veterinary Independent Study & Research (VISR)

VISR 648 Computer-Aided Learning
Independent study working on computer assisted learning (CAL) projects for the summer. Students work with Linda Lewis and various faculty members depending on the projects available. CAL students must be self-motivated and self-disciplined and able to stay on task with minimal supervision. Students will need their own laptop and internet access or can work on either campus. Students should be comfortable working with computers, using Microsoft Office, and browsing the web. Experience editing images, videos, and websites are helpful. Students may need to travel to NBC occasionally through the summer. Students work individually and as part of a team and typically work 40 hours/week for 10 weeks.
Taught by: L. Lewis
Activity: Lecture
5 Credit Hours

VISR 699 Independent Study and Research
This course enables student to undertake a self-directed study on a topic in Veterinary Medicine, under the supervision of a faculty member. Students are required to submit an Independent Study & Research (ISR) application to the Registrar Manager in the Office for Students. Credit may vary.
Taught by: Instructors Vary
Activity: Seminar
1 Credit Hour

Veterinary Pathobiology (VPTH)

VPTH 550 One Health Study Design Seminar
This course number is cross-listed with VPTH 660 and therefore shares the same schedule and course description. It exists for Penn students who wish to enroll and are not Vet students. Eligible students: Penn students who have completed one year of graduate or professional school and who have an interest in addressing problems related to human, animal, and environmental health. Students from the Med, Dental, Nursing, Social Policy, MPH, MES and Wharton programs are encouraged to apply. This seminar course will introduce students to One Health approaches that address critical local, regional and global health problems. Students will work in interdisciplinary teams to review case studies and analyze past and current literature where One Health approaches have been applied. The course is specifically designed to foster the development skills that allow students to think and communicate across professional disciplines. It will also help students develop transdisciplinary connections that might serve them in their professional futures. Students will be assigned a transdisciplinary team. Grading will be based on team-led presentations and analysis of literature, participation and discussion, and a final capstone project (One Health in Practice Plan) in the form of both a paper and presentation.
Taught by: Drs. S. Rankin, S. Cole, and J. Punt
Also Offered As: VPTH 660
Activity: Lecture
1 Course Unit
Notes: Limitations: 15 students. Penn students who have completed one year of graduate or professional school and who have an interest in addressing problems related to human, animal, and environmental health. Students from the Med, Dental, Nursing, Social Policy, MPH, MES, and Wharton programs are encouraged to apply. Please contact the Registrar at the School of Veterinary Medicine at vetregistrar@vet.upenn.edu if you wish to enroll.

VPTH 602 General and Systemic Pathology
The course includes general pathology and systemic pathology. The general principles and mechanisms of disease are discussed through the basic principles of cell and tissue reactions to injury, including degeneration, necrosis, pathological pigmentation, disturbances of circulation, disturbances of growth, inflammation and neoplasia. This course completes the systemic pathology of domestic animals with emphasis on the etiology, pathogenesis, gross and microscopic lesions, and diagnosis of diseases of the organs in the body. Formal classroom lectures are complemented with laboratory classes, gross pathology demonstrations and Moodle-based exercises all aimed at interpretation of gross and microscopic lesions.
Taught by: Dr. A. Durham and Staff
Activity: Lecture
16 Credit Hours

VPTH 603 Parasitology
This core course is concerned with fundamentals of the morphology and developmental cycles of helminth, arthropod and protozoan parasites of animals and those that are transmissible from animals to man. The epidemiology and control of the infections are stressed along with pathogenesis, pathology and immunology. Lectures are supplemented by demonstrations of living and fixed materials and by exercises in identification and diagnosis. Laboratory exercises are supplemented by independent work on case studies of clinical parasitisms.
Taught by: Dr. J. Farrell and Staff
Activity: Lecture
8 Credit Hours
VPHT 604 Immunology
This course aims to educate students in Veterinary Medicine on fundamental aspects of immunology, including functional anatomy of the immune system, mechanisms of innate and adaptive immunity, immunological mechanisms of disease, and principles of vaccination. Taught by Dr. C. Lopez and Staff
Activity: Lecture
4 Credit Hours

VPHT 605 Microbiology
This course presents the fundamentals of medical microbiology (bacteriology, mycology, virology) and the applied art of diagnostic bacteriology. Emphasis is placed on the microbial agents of veterinary disease, their biology, mode of pathogenesis, and control with some introductory material concerning treatment and recognition. This course is presented as prerequisite to a later study of infectious disease. Taught by Dr. R. Harty and Staff
Activity: Lecture
7 Credit Hours

VPHT 606 Clinical Pathology
Appropriate test selection and interpretation are essential to diagnostic evaluation. This course is an introduction to Clinical Pathology presented via case-based learning. Topics include hematology, serum chemistries, urinalysis, cytopathology, clinical endocrinology and blood banking. Within each topic, discussion will cover indications, limitations and interpretation of specific tests, but the emphasis will focus on integrating this information in the context of laboratory panels. Laboratory exercises provide the opportunity to perform and demonstrate basic competency in urinalysis, blood smear preparation and evaluation, and blood banking, as well as to evaluate clinical cases individually and in groups. A microscope is needed for the laboratories.
Taught by Dr. N. Weinstein and Staff
Activity: Lecture
6 Credit Hours

VPHT 615 Introduction to Comparative Medical Research
This course will review the broad scope of animal involvement in contemporary biomedical and veterinary research, with specific discussions of unique species (rodents, nonhuman primates) and laboratory animal medicine and science. Goals for the course are to gain a strong appreciation for the role of research in furthering the practice of veterinary and human medicine, as well as for importance of the humane care, welfare and responsible use of laboratory animals. Completion of this course will permit students to readily participate in biomedical research opportunities available at the University. Grades will be determined by attendance, completion of compliance training, an out-of-class writing exercise and a final exam.
Taught by Dr. J. Marx and Staff
Activity: Lecture
2 Credit Hours

VPHT 633 Ecotoxicology for Veterinarians
The major goal of this course is to provide an introduction to ecotoxicology, the science of assessing the effects of toxic substances on ecosystems with the goal of protecting entire ecosystems. The course will present lectures about various research and career opportunities involving ecotoxicology, such as measuring the effects of pollutants on ecosystems, wildlife serving as monitors of environmental quality, important environmental pollutants such as pesticides, petroleum hydrocarbons and metals, and approaches to rehabilitating damaged ecosystems. Students will research, plan, and present a PowerPoint presentation on a topic relevant to ecotoxicology. The course grade will be based on attendance, the group presentation, and student participation in class discussions.
Taught by Dr. L. Murphy and Staff
Activity: Lecture
2 Credit Hours

VPHT 634 Microbial Pathogenesis
The goal of this course is to provide the student with a conceptual framework regarding the mechanisms of microbial pathogenesis. A range of host-microbe interactions will be studied to illustrate how different microbes breach host lines of defense and lead to infections. Transmission, etiological diagnosis, as well as prophylactic and therapeutic approaches against infectious agents will be discussed with examples related to viral and bacterial pathogens, including zoonotic and Category A select agents.
Taught by Dr. D. Schifferli and Staff
Prerequisites: Prerequisites: VPHT 604 Immunology and VPHT 605 Microbiology
Activity: Lecture
2 Credit Hours
Notes: Limitations: Maximum of 20 students

VPHT 635 Introduction to Fish Diseases
This course is intended to introduce veterinary students to the biology and medicine of teleost fish. The first few lectures will provide a foundation in the classification, gross anatomy and immunology of fish, including practical laboratory classes. The remainder of the course will be more clinically oriented, and will present the most prevalent diseases of fish, emphasizing both the pathology and etiology of the diseases. In addition, the course will also focus on health maintenance through the control of water quality and treatment of diseases in fish. This part of the course will include some practical laboratory demonstrations. Grades will be determined on the basis of class participation and a 5-6 page research paper on a topic of the students choice.
Taught by Dr. O. Sunyer and Staff
Prerequisites: Prerequisites: 1st and 2nd Year Core Courses
Activity: Lecture
2 Credit Hours
VPTh 640 Large Animal Pathology & Toxicology
The first goal of this course is to introduce large animal autopsy techniques for the purposes of identification of common postmortem lesions and review of clinical-oriented anatomy. The second goal is to provide a systems-based approach to domestic and global diseases commonly encountered large animal species, including horses, cattle and small ruminants, swine, camels and cervids. The course requires students to recognize pertinent gross and microscopic lesions correlated with clinical history in order to formulate appropriate differential diagnoses and promote in-depth knowledge of non-infectious and infectious etiopathogenesis, including zoonoses and domestic and foreign reportable diseases. Components of this course include lecture, gross autopsy demonstration and laboratories that involve inspection of fresh gross specimens, and interactive small group seminars pertaining to toxicology and species-specific lesions. Grades will be determined by two homework assignments, one final exam, and attendance to laboratories and small group seminars. Taught by Dr. J. Engles and Staff
Prerequisites: Prerequisites: VPTh 602 General and Systemic Pathology Activity: Lecture
3 Credit Hours
Notes: Limitations: Maximum of 75 students

VPTh 641 Laboratory Animal Medicine
Note: This course is encouraged as a prerequisite for VPTh 789 ULAR - Laboratory Animal Medicine Clinical Rotation. This course is designed to provide further information about laboratory animal medicine to those students with a potential interest in the field. Issues of pain and distress, facility design, regulatory issues, and special procedures involving rodents and rabbits are addressed. Students will also be introduced to the mechanism of an Institutional Animal Care and Use Committee and will be primary participants in a "mock" meeting with visiting members of the committee here at Penn and actual research protocols. Grades will be determined by class participation and a short paper on a topic relevant to laboratory animal medicine. Taught by Dr. J. Marx and Staff
Activity: Lecture
2 Credit Hours
Notes: Limitations: Allergies to lab animals

VPTh 650 One Health Study Design Seminar
This seminar course will introduce students to One Health approaches that address critical local, regional and global health problems. Students will work in interdisciplinary teams to review case studies and analyze past and current literature where One Health approaches have been applied. The course is specifically designed to foster the development of skills that allow students to think and communicate across professional disciplines. It will also help students develop transdisciplinary connections that might serve them in their professional futures. Students will be assigned a transdisciplinary team. Grading will be based on team-led presentations and analysis of literature, participation in discussion, and a final capstone project (One Health in Practice Plan) in the form of both a paper and presentation. Taught by Drs. S.Rankin, S. Cole, and J. Punt
Also Offered As: VPTh 550
Activity: Lecture
6 Credit Hours
Notes: Limitations: 10 students

VPTh 710 Small Animal Diagnostic Services
The course in the Small Animal Section consists of exposure to the Diagnostic Services of MJR-VHUP, namely clinical pathology, anatomic pathology (necropsy service), parasitology and microbiology. The course is focused on development of clinical pathology and necropsy skills and will include a practicum of necropsy techniques. A portion of the rotation is also focused on biopsy, parasitology and microbiology. Furthermore, students will be exposed large animal necropsy by spending time at PADLS at New Bolton Center. The bioanalytical pathology portion, which comprises clinical pathology, parasitology and microbiology, will be divided into microscopy, discussion, and online interactive lesson sections. During the microscopy section, students will work with the supervising clinical pathologist or resident in the evaluation, interpretation, and reporting of cytologic specimens and blood film reviews. Discussions involving parasitology and microbiology will also include treatment options and best practices. Online lessons include work in parasitology, clinical pathology and microbiology. Students are also required to perform necropsies, write necropsy reports and to familiarize themselves with the pathophysiology, histopathology and the clinical manifestations of various disorders encountered. Participation of students in presentation and discussion of cases is required. Students will be evaluated based upon enthusiasm, effort, ambition, and advancement in pathology knowledge as evaluated through the directed group discussions, necropsies, microscopy sessions and clinical competency outcomes assessments. A short paper is required. Taught by Dr. C. Bradley and Staff
Also Offered As: VPTh 770
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: 4 students/rotation - Required: SA - Satisfies pathology requirement: SALA
VPTH 711 Fam Animal Pathology-NBC
The course will provide students with experience in farm animal and companion animal autopsies and biopsies including interpretation of gross and microscopic lesions in the context of clinical history, and proper collection of samples for histology and ancillary diagnostics (e.g. microbiology, parasitology, cytology and toxicology). Students will participate in the diagnostic services provided by the Pennsylvania Animal Diagnostic Laboratory System (PADLS) at New Bolton Center. Multiple species commonly encountered at our diagnostic laboratory (horses, cattle and small ruminants, swine, camelids and cervids, small animals and exotics) will be utilized to illustrate the pathogenesis of infectious and non-infectious disease, and the principles of gross and microscopic description with formulation of morphologic diagnoses. Students will be evaluated based upon enthusiasm, effort, ambition, and advancement in pathology knowledge as evaluated through diagnostic autopsy technique, directed group discussions, microscopy sessions and clinical competency outcomes assessments. A short paper providing a succinct scientific review of a select topic pertaining to large animal pathology is required. Although gross pathology will be emphasized, exposure to histopathology and occasionally cytology will be included. Although there is no lecture component to this course, there is a web-based introduction to VPTH 711 Diagnostic Services and VPTH 771 Diagnostic Services Elective, which students must review prior to the start of their rotation. Students may find this introduction by logging in to https://learn.vet.upenn.edu with their Penn Key and Vet Domain password.
Taught by: Dr. J. Engiles and Staff
Also Offered As: VPTH 771
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Required: EQ - Satisfies pathology requirement: SALA, LA, FA

VPTH 718 Poultry Production Medicine-NBC
This course is designed to provide students with a working knowledge of the management and production of poultry from hatchery to processing. The course will involve multiple field trips to a hatchery, grow out pullet house, layer house, breeder house, processing plant and a feed mill. There will also conduct necropsies on cases submitted to the diagnostic laboratory and learn the diagnostic procedures such as serology, virology and PCR testing.
Taught by: Drs. S. Davison and Staff
Also Offered As: VPTH 780
Prerequisites: Prerequisites: VMED 608 Introduction to Poultry, Swine, and Dairy Medicine
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: 1 student/rotation - Satisfies pathology requirement: FA, LA

VPTH 770 Small Animal Diagnostic Services
There is a web-based introduction to VPTH 710 SA Diagnostic Services and VPTH 770 Small Animal Diagnostic Services Elective, which students must review prior to the start of their rotation. Students may find this introduction by logging in to https://learn.vet.upenn.edu with their Penn Key and Vet Domain password. Please note that it will take approximately 2 to 3 hours to review the video and written materials on the website.
Taught by: Dr. C. Bradley and Staff
Also Offered As: VPTH 710
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: 4 students/rotation - This is an elective rotation equivalent to VPTH 710

VPTH 771 Fam Animal Pathology-NBC
There is a web-based introduction to VPTH711 Diagnostic Services and VPTH 771 Diagnostic Services Elective, which students must review prior to the start of their rotation. Students may find this introduction by logging in to https://learn.vet.upenn.edu with their Penn Key and Vet Domain password.
Taught by: Dr. J. Engiles and Staff
Also Offered As: VPTH 711
Activity: Clinical Rotation Dental & Vet school
6 Credit Hours
Notes: Limitations: Based on Hospital Needs - This is an elective rotation equivalent to VPTH 711

VPTH 780 Poultry Production Medicine-NBC
Taught by: Drs. S. Davison and Staff
Also Offered As: VPTH 718
Prerequisites: Prerequisites: VMED 608 Introduction to Poultry, Swine, and Dairy Medicine
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: 1 student/rotation - This is an elective rotation equivalent to VPTH 718

VPTH 789 ULAR-Laboratory Animal Medicine
This rotation will provide an opportunity to work with the wide variety of animal species used in biomedical research at the University of Pennsylvania, including nonhuman primates, small rodents, guinea pigs, rabbits, dogs, cats, pigs, and sheep. The students will participate in all aspects of the care and treatment of these animals across the facilities at the University of Pennsylvania. Participation may include handling, husbandry, diagnosis, treatment, anesthesia, and assistance with surgery. Students will perform daily rounds with the veterinary practitioners and other staff members. The student may have the opportunity to observe ongoing interdisciplinary research programs including cardiovascular bypass, organ transplantation, gene therapy, device implantations, and metabolic disease progression. Students will participate in clinical rounds, didactic training classes, and related seminars and journal clubs as scheduled. Participation in necropsies of clinical cases, sentinel animals, and study animals is expected. A brief assignment on aspects of lab animal medicine will be required prior to completion of the rotation. Depending upon scheduling, the students will have an opportunity to attend a meeting of the Institutional Animal Care and Use Committee. A recent (within 6 months) negative skin test against tuberculosis is required by the first day of the rotation.
Taught by: Dr. J. Marx and Staff
Prerequisite: Prerequisite: Successful completion of VPTH 641 Laboratory Animal Medicine is encouraged but not required
Activity: Clinical Rotation Dental & Vet school
5 Credit Hours
Notes: Limitations: Maximum 2 students/rotation - Notes: The focus of this rotation is the humane care and use of animals in biomedical research. Students should have interest in the specialty of Laboratory Animal Medicine
Vyth 790 Small Animal Pathology Holiday Rotation
This is an elective rotation similar to the necropsy component of the
Diagnostic Services Rotation, VPTH 710,770. The rotation consists of
practicums in performing necropsies and interpreting findings.
Students are required to perform necropsies, write necropsy reports and
to familiarize themselves with the pathophysiology, histopathology and
the clinical manifestations of various disorders encountered. There will
be two one-week rotations over the Holiday period, each for 2 credits.
Each rotation will consist of half of the Holiday period and will not meet
on either Christmas Day (week one) or New Years Day (week two). There
is no clinical pathology, parasitology or microbiology component to this
rotation. No paper is required for this rotation.
Activity: Clinical Rotation Dental & Vet school
Notes: Limitations: 2 students/rotation

Viper (VIPR)

VIPR 120 Vagelos Integrated Program in Energy Research (VIPER)
Seminar, Part I
This is the first part of the two-semester seminar designed to introduce
students to the VIPR program and help them prepare for energy-related
research. Research articles on various energy-related topics will be
discussed, and students will be guided toward their research topic
selection. Library research, presentation of data, basic research methods,
research ethics, data analysis, advisor identification, and funding options
will also be discussed. Sample energy topics discussed will include:
Applications of nanostructured materials in solar cells; Solid oxide fuel
cells; Global climate modeling; Radiant heat transfer; Nanocrystal-based
technologies for energy storage; Photo-bioreactor systems for mass
production of micro-algae; Advanced rare earths separations chemistry;
Modeling of oxides for solar energy applications; and Electronic transport
in carbon nanomaterials.
Taught by: John M. Vohs, Andrew M. Rappe and Kristen L. Hughes
Course usually offered in spring term
Prerequisite: Admission to VIPR program.
Activity: Seminar
0.5 Course Units

VIPR 121 Vagelos Integrated Program in Energy Research (VIPER)
Seminar, Part II
This is the second part of the two-semester seminar designed to
introduce students to the VIPR program and help them prepare for
energy-related research. In this semester we will continue to discuss
research articles on various energy-related topics, best practices for
library research, presentation of data, basic research methods, research
ethics, data analysis, and funding options. A large focus of the course will
also be on presenting (in both written and oral form) the work from the
students' summer research internships.
Taught by: Andrew M. Rappe, John M. Vohs, and Kristen L. Hughes
Course usually offered in fall term
Prerequisite: VIPR 120
Activity: Seminar
0.5 Course Units

Visual Studies (VLST)

VLST 101 Eye, Mind, and Image
Visual Studies 101 provides an introduction to the collaboration of eye,
mind, and image that produces our experience of a visual world. How
and what do we see? How do we perceive color, space, and motion?
What is an image? Does seeing vary across cultures and time? What
can art tell us about vision? Is there a 21st-century form of seeing? This
course combines different approaches to the study of vision, drawing
from psychology, cognitive science, philosophy, history of art, and fine
art. Professors representing two or three disciplines present lectures
that demonstrate the methods of their disciplines and draw connections
across fields. This course combines different approaches to the study of
vision, drawing from psychology, cognitive science, philosophy, history of
art, and fine art. Professors representing two or three disciplines present
lectures that demonstrate the methods of their disciplines and draw
connections across fields.
For BA Students: Hum/Soc Sci or Nat Sci/Math Sector
Taught by: Hatfield/Leja
One-term course offered either term
Activity: Lecture
1 Course Unit
Notes: Fulfills General Education in Sectors IV (Humanities and Social
Sciences) and VII (Natural Science and Mathematics). This course is
required of all Visual Studies Majors (stage 1).

VLST 102 Form and Meaning
This course will introduce students to the theory and practice of image
making, focusing on the development of observational skills and
analytical thinking. We will look at conventions of artistic representation
across time and cultures; discuss types of visual information and modes
of formal language; explore visual narrative techniques; and seek to
expand our understanding of the role images play in our culture. We
will look at conventions of pictorial representation across time and
cultures; discuss types of visual information and modes of formal
language; explore visual narrative techniques; and seek to expand our
understanding of the role images play in our culture.
Taught by: Bendtsen/Hyland
One-term course offered either term
Activity: Studio
1 Course Unit
Notes: This course is required of all Visual Studies Majors (stage 1 or 2).
VLST 103 3 Dimensions: Time and Space
Through studio projects, readings and class discussion, this class will begin to address, both conceptually and physically, basic 3D structures and translations between 3D and 2D, as well as materiality, experiential phenomena, light and time-based processes. The interconnection between mediums in our cultural climate employs a wide range of tools, processes, and ideas. It is imperative that visual studies students recognize and think through these connections. The work produced and ideas confronted in this class will facilitate discussions and constructive criticism on the fundamentals of space and time via the experiential, conceptual, and the formal as essential elements of meaning. The interconnection between mediums in our cultural climate employs a wide range of tools, processes, and ideas. It is imperative that visual studies students recognize and think through these connections. The work produced and ideas confronted in this class will facilitate discussions and constructive criticism on the fundamentals of space and time via the experiential, conceptual, and the formal as essential elements of meaning.
Taught by: Freedman/Neighbor
One term course offered either term
Activity: Studio
1 Course Unit
Notes: This course is required of all Visual Studies Majors (stage 1 or 2).

VLST 211 Perception
One term course offered either term
Also Offered As: PSYC 111
Activity: Lecture
1 Course Unit
Notes: Topics for this course vary each semester. Dept permission required. This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 212 Research Experience in Perception
In this research course, students will begin by first replicating earlier experiments to measure human visual memory capacity. After several class discussions to discuss ideas, each student will design and conduct their own experiment to further investigate visual and/or familiarity memory.
Taught by: Rust
One term course offered either term
Also Offered As: PSYC 311
Prerequisites: One semester of statistics, and one of the following: PSYC 111, 149, 151, 217, or permission of instructor.
Activity: Seminar
1 Course Unit
Notes: Dept permission required. Undergraduates only. This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 217 Visual Neuroscience
An introduction to the scientific study of vision, with an emphasis on the biological substrate and its relation to behavior. Topics will typically include physiological optics, transduction of light, visual thresholds, color vision, anatomy and physiology of the visual pathways, and the cognitive neuroscience of vision.
Taught by: Stocker
Course usually offered in spring term
Also Offered As: BI/BB 217, PSYC 217
Prerequisites: PSYC 001, COGS 001, or VLST 101
Activity: Lecture
1 Course Unit
Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 221 Introduction to Philosophy of Mind
In this course, we will explore philosophical questions concerning the nature of minds. In seeking to understand the nature of minds, philosophers and psychologists have often used metaphors drawn from the forms of technology available to them. Leibniz once described the mind as a mill, while Freud compared the mind to a hydrolytic and electromagnetic system. In our own time, many have followed Alan Turing's proposal and have viewed the mind as a special kind of computer; indeed, this "Computational Theory of Mind" forms the foundation for much work in contemporary cognitive science. In this class, we will explore the extent to which the computational theory of mind can adequately characterize the distinctive capacities involved in representing an external environment and having conscious experiences that is displayed by minds in general and human minds in particular. Although an introductory class in philosophy or logic will aid students' understanding, no prior familiarity with the philosophy of mind or cognitive science will be presumed.
Taught by: Domotor, Miracchi
Also Offered As: PHIL 244, PPE 244
Activity: Seminar
1 Course Unit
Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 222 Philosophy of Perception
Taking our perceptual experience as a given, what causes it? In a realistic mood, we accept that objects in the environment, or in the "external world," cause us to have the perceptual experiences that we do (as of a table with food, or as of a garden with flowers in it). Yet on this realistic view, our perception is the result of a causal chain that leads from object to eye to brain to experiences, and we are only given the last element: the experience. So how do we really know how our experiences are caused, and where do we get the idea that they are caused by an external world of physical objects? The seminar will focus on the problem of the external world as examined by David Hume, Thomas Reid, G. E. Moore, and Bertrand Russell, along with recent authors.
Taught by: Hatfield
Course not offered every year
Also Offered As: PHIL 330
Activity: Seminar
1 Course Unit
Notes: Department Majors Only. This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.
VLST 223 Philosophy and Visual Perception
Central issues in the philosophy of perception from the modern period, including: what we perceive, the meaningful content of perception, and its relation to a mind-independent external world. Additional topics may include: (1) color perception and color metaphysics; (2) object perception in its interplay between Gestalt organizational factors and background knowledge; (3) the role of ecological regularities in the formation of our visual system and in the ongoing tuning of the system to the environment; (4) the geometry of visual space and the phenomenology of visual appearances of size and shape; (5) the problem of how visual scenes are experienced by means of images. Readings from authors such as Bertrand Russell, R. W. Sellars, Tim Crane, Evan Thompson, Robert Swartz, Wolfgang Metzger, Nelson Goodman, Richard Wollheim, and William Hopp, among others.

Taught by: Hatfield, Connolly
One-term course offered either term
Also Offered As: PHIL 223, PHIL 423
Activity: Seminar
1 Course Unit
Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 232 Renaissance to Contemporary: Introduction to Western Art, 1400 to the Present
This course is an introduction to the visual arts including painting, sculpture, print culture, and new media such as photography, film, performance and installation art in Europe and the United States from 1400 to the present. It offers a broad historical overview of the key movements and the artists of the period, as well as an investigation into the crucial themes and contexts that mark visual art production after the middle ages. Such themes include the secularization of art; the (gendered) role of the artist in society; the sites of art production and consumption such as the artist's studio, the royal courts and the art exhibition; the materials of art; the import of technology and science to art's making, content and distribution; the rise of art criticism; and the socio-political contexts of patronage and audience; among others.
For BA Students: Arts and Letters Sector
Taught by: Dombrowski, Kim, Shaw
Course usually offered in spring term
Also Offered As: ARTH 102
Activity: Lecture
1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 233 Art and Civilization in East Asia
Introduction to major artistic traditions of China and Japan and to the methodological practices of art history. Attention given to key cultural concepts and ways of looking, in such topics as: concepts of the afterlife and its representation; Buddhist arts and iconography; painting styles and subjects; and more broadly at the transmission of styles and cultural practices across East Asia. Serves as an introduction to upper level lecture courses in East Asian art history cultures. If size of class permits, certain sessions will be held in the University Museum or the Philadelphia Museum of Art.
For BA Students: Arts and Letters Sector
Taught by: Davis/Steinhardt
Course not offered every year
Also Offered As: ARTH 103, EALC 013
Activity: Lecture
1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 234 Introduction to Art in South Asia
This course is a survey of sculpture, painting and architecture in the Indian sub-continent from 2300 B.C., touching on the present. It attempts to explore the role of tradition in the broader history of art in India, but not to see India as 'traditional' or unchanging. The Indian sub-continent is the source for multi-cultural civilizations that have lasted and evolved for several thousand years. Its art is as rich and complex as that of Europe and diverse. This course introduces the full range of artistic production in India in relation to the multiple strands that have made the cultural fabric of the sub-continent so rich and long lasting.
For BA Students: Arts and Letters Sector
One term course offered either term
Also Offered As: ARTH 104
Activity: Lecture
1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 235 Introduction to Visual Culture of the Islamic World
A one-semester survey of Islamic art and architecture which examines visual culture as it functions within the larger sphere of Islamic culture in general. Particular attention will be given to relationships between visual culture and literature, using specific case studies, sites or objects which may be related to various branches of Islamic literature, including historical, didactic, philosophical writings, poetry and religious texts. All primary sources are available in English translation.
For BA Students: Humanities and Social Science S
Taught by: Holod
One-term course offered either term
Also Offered As: AAMW 635, ARTH 235, ARTH 635, NELC 285, NELC 685
Activity: Lecture
1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 236 Art Now
One of the most striking features of today's art world is the conspicuous place occupied in it by the photographic image. Large-scale color photographs and time-based installations in projections are everywhere. Looking back, we can see that much of the art making of the past 60 years has also been defined by this medium, regardless of the form it takes. Photographic images have inspired countless paintings, appeared in combines and installations, morphed into sculptures, drawings and performances, and served both as the object and the vehicle of institutional critique. They are also an increasingly important exhibition site: where most of us go to see earthworks, happenings and body-art.
This course is a three-part exploration of our photographic present.
Taught by: Silverman
Course not offered every year
Also Offered As: ARTH 294, ARTH 694, ENGL 059, GSWS 294
Activity: Lecture
1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.
VLST 250 Introduction to Printmaking
The course offers an introduction to several forms of printmaking including: intaglio, screen printing, relief, and monoprinting. Through in-class demonstrations students are introduced to various approaches to making and printing in each medium. The course enhances a student’s capacity for developing images through two-dimensional design and conceptual processes. Technical and conceptual skills are developed through discussions and critiques.
Course usually offered in spring term
Also Offered As: FNAR 250, FNAR 550
Activity: Studio
1 Course Unit

VLST 251 Introduction to Photography
This course is an introduction to the basic processes and techniques of black & white photography. Students will learn how to expose and process 35mm film, SLR camera operation, darkroom procedures & printing, basic lighting and controlled applications. It begins with an emphasis on understanding and mastering technical procedures and evolves into an investigation of the creative and expressive possibilities of making images. This is a project-based course, where students will begin to develop their personal vision, their understanding of aesthetic issues and photographic history. Assignments, ideas and important examples of contemporary art will be presented via a series of slide lectures, critiques and discussion. No previous experience necessary. 35mm SLR cameras will be available throughout the semester for reservation and checkout from the photography equipment room.
One-term course offered either term
Also Offered As: FNAR 271, FNAR 571
Activity: Studio
1 Course Unit

VLST 252 Sculpture Practices
As an introduction to traditional and contemporary three-dimensional practice, this course is concerned with the concepts and methodologies surrounding three-dimensional art making in our time. Students experiment with a variety of modes of production, and develop some of the fundamental techniques used in sculpture. In addition to these investigations, assignments relative to the history and social impact of these practices are reinforced through readings and group discussion. Processes covered include use of the Fab Lab, wood construction, clay, paper, mixed media, and more.
One-term course offered either term
Also Offered As: FNAR 145, FNAR 545
Activity: Studio
1 Course Unit

VLST 253 Drawing I
This course is designed to develop visual awareness and perceptual acuity through the process of drawing. Students learn to sharpen perceptual skills through observational drawing, and to explore the expressive potential of drawing. A variety of problems and media will be presented in order to familiarize students with various methods of working and ways of communicating ideas visually. Subject matter will include object study, still life, interior and exterior space, self-portrait and the figure. Different techniques and materials (charcoal, graphite, ink, collage) are explored in order to understand the relationship between means, material and concept. Critical thinking skills are developed through frequent class critiques and through the presentation of research into historical and contemporary precedent in drawing.
Two terms. student may enter either term.
Also Offered As: FNAR 123, FNAR 523
Activity: Studio
1 Course Unit

VLST 260 Photography Practices
This course is an introduction to the basic principles, strategies and processes of photographic practice. It is designed to broaden the student’s aesthetic explorations and to help the student develop a visual language based on cross-disciplinary artistic practice. Through a series of projects and exercises students will be exposed to a range of camera formats, techniques and encouraged to experiment with the multiple modes and roles of photography - both analogue and digital. Attention will also be given to developing an understanding of critical aesthetic and historical issues in photography. Students will examine a range of historical and contemporary photowork as an essential part of understanding the possibilities of image making.
One-term course offered either term
Also Offered As: FNAR 150
Activity: Studio
1 Course Unit

VLST 261 Video I
This course provides students with the introductory skills and concepts related to producing short works that explore the language of the moving image. Students will learn the basics of cinematography and editing through a series of assignments designed to facilitate the use of the medium for artistic inquiry, cultural expression and narrative storytelling, through both individual and group projects.
For BA Students: Humanities and Social Science S
One-term course offered either term
Also Offered As: CIMS 061, FNAR 061, FNAR 661
Activity: Seminar
1 Course Unit
VLST 264 Art, Design and Digital Culture
This course is an introduction to the fundamental perception, representation, aesthetics, and design that shape today's visual culture. It addresses the way artists and designers create images; design with analog and digital tools; communicate, exchange, and express meaning over a broad range of media; and find their voices within the fabric of contemporary art, design, and visual culture. Emphasis is placed on building an extended form of visual literacy by studying and making images using a variety of representation techniques; learning to organize and structure two-dimensional and three-dimensional space, and designing with time-based and procedural media. Students learn to develop an individual style of idea-generation, experimentation, iteration, and critique as part of their creative and critical responses to visual. For BA Students: Humanities and Social Science S
One-term course offered either term
Also Offered As: FNAR 264, FNAR 636
Activity: Studio
1 Course Unit

VLST 265 Digital Photography
This class offers an in-depth technical and conceptual foundation in digital imagery and the opportunity to explore the creative, expressive possibilities of photography. Students will become proficient with the basic use of the camera, techniques of digital capture, color management and color correction. They will also develop competency in scanning, retouching, printing and a variety of manipulation techniques in Photoshop. Through weekly lectures and critiques, students will become familiar with some of the most critical issues of representation, consider examples from photo history, analyze the impact of new technologies and social media. With an emphasis on structured shooting assignments, students are encouraged to experiment, expand their visual vocabulary while refining their technical skills. No previous experience is necessary. Although it is beneficial for students to have their own Digital SLR camera, registered students may reserve and checkout Digital SLR cameras and other high-end equipment from the department.
One-term course offered either term
Also Offered As: FNAR 340, FNAR 640
Activity: Studio
1 Course Unit

VLST 301 What is Visual Studies?
Visual Studies 301 is a seminar-format course that challenges students to develop independent ideas about how the eye, the mind, and the image that is created therein, all work together to inform our conception of the world at large. Rather than present a unified viewpoint, the course asks the question, "What is visual studies?" by examining parallel and sometimes antagonistic approaches to the ways that human beings understand sight and the concept of visuality. Over the course of the semester, students will discuss and write about various approaches to vision, examining this contested field through the lenses of several disciplines — including psychology, philosophy, and art history. By parsing and assimilating diverse ideas, students will decide for themselves what are the most pertinent and relevant approaches to the various avenues of research that present themselves in the emerging interdisciplinary field of Visual Studies.
One-term course offered either term
Also Offered As: VLST 501
Prerequisite: VLST 101 or Instructor Permission
Activity: Seminar
1 Course Unit
Notes: This course is required of all Visual Studies Majors (Stage 2).

VLST 303 The Rise of Image Culture: History and Theories
Images are ubiquitous in the cultural life of the 21st century, yet only two centuries ago they were rare. When and how did pictures come to permeate daily life? How has ordinary experience—psychological, social, cultural—changed as a result? This seminar addresses these questions through close reading of influential historical and theoretical writings about the rise of image culture and its effects, including Benjamin, Debord, McLuhan, Mitchell.
Taught by: Leja
Also Offered As: VLST 503
Activity: Seminar
1 Course Unit
Notes: This course can count toward Sector B, (Stage 2 or 3) of the Visual Studies Major.

VLST 305 What is an Image?
The course explores various concepts of images. It considers natural images (as in optics), images as artifacts, virtual images, images as representations, and works of art as images. Themes to include: the image controversy in cognitive science, which asks whether some cognitive representations are irreducibly imagistic; the question of whether some images resemble what they represent; the development of the concept of the virtual image and of three-dimensional images; the notions of pictorial representation and non-representational images in art. Readings from C. S. Peirce, Nelson Goodman, Robert Hopkins, Dominic Lopes, W. J. T. Mitchell, John Kulvicki, and Mark Rollins, among others.
Taught by: Verstegen
Also Offered As: VLST 505
Activity: Seminar
1 Course Unit
Notes: This course can count toward Sector A, (Stage 2 or 3) of the Visual Studies Major.

VLST 309 Investigative Photography for Scientists and Artists
Artists and scientists are likeminded when they make an image in pursuit of new insights. Pictures can reveal the composition of a specimen, expose a person's character, capture a place's distinctiveness, or produce a new occasion for intimacy. Rosalind Franklin's famous "Photograph 51" of DNA resulted from a desire to see the physical shape of heredity. The artist Shimpei Takeda places film directly on the ground in Fukushima to create a blind measurement of the radioactivity that remains in the earth. This course will introduce photography as an investigative medium for art and science. We will begin with learning the fundamentals of photography while considering ways in which photographs have changed and continue to change the way we perceive space and time. As the class progresses, students from the arts and sciences will work together to learn specialized photographic techniques and complete assignments that explore photography as an investigative medium.
Taught by: Vershbow
Course usually offered in spring term
Prerequisites: Access to a digital camera and a computer with imaging software.
Activity: Seminar
1 Course Unit

VLST 395 Senior Project
Permission of Instructor Required.
Two terms. Student must enter first term.
Activity: Seminar
0.5 Course Units
Notes: This course is required of all Visual Studies Majors. (Stage 4) Seniors only.
VLST 399 Independent Study
Activity: Independent Study
1 Course Unit
Notes: See department for appropriate section numbers

VLST 501 What is Visual Studies?
Visual Studies 301 is a seminar-format course that challenges students to develop independent ideas about how the eye, the mind and the image is created therein, all work together to inform our conception of the world at large. Rather than present a unified viewpoint, the course asks the question, "What is visual studies?" by examining parallel and sometimes antagonistic approaches to the ways that human beings understand sight and the concept of visuality. Over the course of the semester, students will discuss and write about various approaches to vision, examining this contested field through the lenses of several disciplines – including psychology, philosophy, and art history. Wharton Undergraduate (WH)

WH 101 Business and You
WH 101 is the first step of the Leadership Journey at Wharton. The course is designed to fuel students’ unique interests in academic, research, and professional pursuits; to raise awareness of the complexity of business; and to increase understanding of the interrelatedness of business disciplines. Students will also acquire greater awareness of their strengths and leadership potential as members of the Wharton community and as future professionals. Students will come to appreciate that leadership is an act and best developed through study, feedback from trusted colleagues and peers, and stretch experiences that stimulate growth and development. Students will also begin to hone skills essential to the pursuit of personal, academic, and professional goals: thinking creatively, analyzing problems, applying what you have learned, and reflecting on learnings. A case-analysis project will engage students with the community through helping local agencies examine business challenges that they face.
Taught by: Rosenkopf; Greenhalgh; Romeika
Course usually offered in fall term
Activity: Recitation
0.5 Course Units

WH 150 Evaluating Evidence
WH 150 provides an introduction to all stages of the research process for business topics. In the first third of the course, we discuss theory building, hypothesis development, and research design choices particularly in casual research. In the second third, we discuss data collection methods (e.g., surveys, experiments, case studies and fieldwork) and the use of archival databases. This part of the course emphasizes the interplay between research design and sampling/data collection methods. In the final third of the course, we introduce data analysis and interpretation, including methods for converting raw data into measurable constructs suited to statistical analysis.
One term course offered either term
Activity: Seminar
1 Course Unit

WH 201 Management Communication: Persuasive Speaking and Writing for Business
WH 201 is the second step of the Leadership Journey at Wharton. The objective of the course is to ensure that students become more confident and effective speakers and writers. Students will learn the fundamentals of persuasion and apply those concepts to increasingly challenging business contexts. Students will present in-class speeches and submit writing assignments that are evaluated by instructors. The speaking component of the course will begin with the fundamentals of public speaking and persuasion, and then move to settings in which managers face higher stakes with less time to respond. For the writing component, students will write on various topics for the first few weeks of the course. For the last half of the course, speaking and writing assignments will be integrated, allowing students to offer in-depth analysis through their written recommendations. All assignments will reinforce the overarching theme of clear, concise, persuasive communications.
One term course offered either term

WH 298 Wharton International Program
This short-term international business course gives undergraduate students an amazing global opportunity featuring business-site visits, lectures at partner schools, cultural excursions, and networking opportunities with undergraduate students and business contacts from the destination countries. In addition to learning about another country’s business environment and culture, students earn 0.5 course units that can be used towards business-breadth or elective credits.
Activity: Seminar
0.5 Course Units

WH 299 Honors Thesis
This seminar takes place over two semesters and provides students with the skills to perform their own research under the guidance of a Wharton faculty member. At the conclusion of the fall semester, students will produce a thesis proposal including literature review, significance of the research, methodology, and exploratory data if relevant. Throughout the fall semester faculty guests from a range of disciplines will present on their research in class, highlighting aspects that are relevant to the work students are engaging in at that point. During the second semester, students will collect and analyze data and write up the results in close collaboration with their faculty mentor. At the end of the spring semester, each student will present their research in a video presentation. Throughout the course, students will work individually, in small groups, and under the mentorship of a Wharton faculty member. The goal is to become capable independent researchers who incorporate feedback and critical (self) analysis to take their research to the next level.
Two terms, student must enter first term.
Also Offered As: WH 399
Activity: Seminar
0.5 Course Units

WH 301 Teamwork and Interpersonal Influence
This course develops students’ abilities to work productively in diverse teams and includes discussion and application of research-based best practices for maximizing team performance.
One-term course offered either term
Also Offered As: MGMT 301
Activity: Lecture
0.5 Course Units

WH 398 Senior Capstone
Wharton 398 is a for-credit, interactive business simulation that provides Wharton seniors the opportunity to draw on their business knowledge - finance, management, marketing, leadership, and social responsibility - while formulating and executing business strategy in a competitive, team-based environment. Utilizing real-time problem solving within a dynamic simulation environment, teams design and implement strategic plans, integrate feedback from the consequences of those decisions, and interact with other teams to create shareholder and social value. Students must apply to participate in this course.

Yiddish (YDSH)

YDSH 101 Beginning Yiddish I
The goal of this course is to help beginning students develop skills in Yiddish conversation, reading and writing. Yiddish is the medium of a millennium of Jewish life. We will frequently have reason to refer to the history and culture of Ashkenazic Jewry in studying the language.
For BA Students: Language Course
Course usually offered in fall term
Also Offered As: JWST 031, YDSH 501
Activity: Lecture
1 Course Unit

YDSH 102 Beginning Yiddish II
In this course, you can continue to develop basic reading, writing and speaking skills. Discover treasures of Yiddish culture: songs, literature, folklore, and films.
For BA Students: Language Course
Course usually offered in spring term
Also Offered As: JWST 032, YDSH 502
Prerequisite: YDSH 101 or permission of the instructor
Activity: Lecture
1 Course Unit

YDSH 103 Intermediate Yiddish I
The course will continue the first year’s survey of Yiddish grammar with an additional emphasis on reading Yiddish texts. The course will also develop conversational skills in Yiddish.
For BA Students: Language Course
Course not offered every year
Also Offered As: JWST 033, YDSH 503
Prerequisite: YDSH 102 or permission of the instructor
Activity: Lecture
1 Course Unit
YDSH 104 Intermediate Yiddish II
Continuation of YDSH 103. Emphasis on reading texts and conversation.

For BA Students: Last Language Course
Course not offered every year
Also Offered As: JWST 034, YDSH 504
Prerequisite: YDSH 103 or permission of the instructor
Activity: Lecture
1 Course Unit

YDSH 108 Readings in Modern Yiddish Literature
This course will survey modern Yiddish literature through readings of Yiddish prose and poetry from the end of the 19th century through the late 20th century. The class will be conducted in both Yiddish and English. Reading knowledge of Yiddish is required, although some texts will be available in English translation. Authors include I.L. Peretz, Isaac Bashevis Singer, Moyshe-Leyb Halpern, and Kadya Molodowsky.

Taught by: Hellerstein
Course not offered every year
Also Offered As: JWST 438, YDSH 108
Prerequisite: Reading knowledge of Yiddish
Activity: Lecture
1 Course Unit

YDSH 501 Beginning Yiddish I
The goal of this course is to help beginning students develop skills in Yiddish conversation, reading and writing. Yiddish is the medium of a millennium of Jewish life. We will frequently have reason to refer to the history and culture of Ashkenazie Jewry in studying the language.

YDSH 502 Beginning Yiddish II
For BA Students: Language Course
Course usually offered in spring term
Also Offered As: JWST 032, YDSH 102
Prerequisite: YDSH 101 or permission of the instructor
Activity: Lecture
1 Course Unit

YDSH 503 Intermediate Yiddish I
The course will continue the first year’s survey of Yiddish grammar with an additional emphasis on reading Yiddish texts. The course will also develop conversational skills in Yiddish.

For BA Students: Language Course
Course not offered every year
Also Offered As: JWST 033, YDSH 103
Prerequisite: YDSH 102 or permission of the instructor
Activity: Lecture
1 Course Unit

YDSH 504 Intermediate Yiddish II
Continuation of YDSH 503. Emphasis on reading texts and conversation.

For BA Students: Last Language Course
Course not offered every year
Also Offered As: JWST 034, YDSH 104
Prerequisite: YDSH 503 or permission of the instructor
Activity: Lecture
1 Course Unit

YDSH 508 Readings in Modern Yiddish Literature
This course will survey modern Yiddish literature through readings of Yiddish prose and poetry from the end of the 19th century through the late 20th century. The class will be conducted in both Yiddish and English. Reading knowledge of Yiddish is required, although some texts will be available in English translation. Authors include I.L. Peretz, Isaac Bashevis Singer, Moyshe-Leyb Halpern, and Kadya Molodowsky.

Taught by: Hellerstein
Course not offered every year
Also Offered As: JWST 438, YDSH 108
Prerequisite: Reading knowledge of Yiddish
Activity: Lecture
1 Course Unit

YDSH 509 Topics in Yiddish Literature.
One version of this seminar considers works by Jewish women who wrote in Yiddish, Hebrew, English, and other languages in the late 19th through the 20th century. The texts, poetry and prose, will include both belles lettres and popular writings, such as journalism, as well as private works (letters and diaries) and devotional works. The course will attempt to define "Jewish writing," in terms of language and gender, and will consider each writer in the context of the aesthetic, religious, and national ideologies that prevailed in this period. Because students will come with proficiency in various languages, all primary texts and critical and theoretical materials will be taught in English translation. However, those students who can, will work on the original texts and share with the class their expertise to foster a comparative perspective. Because we will be discussing translated works, a secondary focus of the course will, in fact, be on literary translation's process and products. Another version of this seminar presents Jewish modernism as an international phenomenon of the early 20th century. The course will attempt to define "Jewish modernism" through the prism of poetry, which inevitably, given the historical events in Europe and America during this time, grapples with aesthetic, religious, and national ideologies and methods. The syllabus will focus mainly on poetry written in Yiddish and English, and will also include German, Russian, and Hebrew verse. All poetry, critical, and theoretical materials will be taught in English translation, although students who know the languages will work on the original texts and will bring to the table a comparative perspective. Because we will be discussing translated poems, a secondary focus of the course will, in fact, be on literary translation's process and products.

Taught by: Hellerstein
Course not offered every year
Also Offered As: COML 509, GRMN 509, GSWS 509, JWST 509
Activity: Seminar
1 Course Unit

Notes: "Jewish Women Writers" is a graduate seminar also be open to advanced undergraduates. Based in the Department of Germanic Languages and Literatures, this course will be cross-listed with Comparative Literature, English, Gender, Sexuality Women's Studies, and Jewish Studies. Topics vary annually.

PENNBOOK

The Pennbook is a collection of policies that relate to student life at the University of Pennsylvania. These policies govern academic activities such as grading and exams, provide guidance on the use of campus resources, and explain expectations for membership in the university community.

The two most important policies in the Pennbook are the Code of Student Conduct (p. 1511) and the Code of Academic Integrity (p. 1510). These two policies outline the general responsibilities of being a student at Penn. All students are expected to have read and understood both policies before coming to campus.

If you live on campus, consult the Residential Handbook (https://www.collegehouses.upenn.edu/resources/policies) for the policies, rules, and regulations that govern living in Penn’s residential community.

For policies governing faculty, please consult the Penn Faculty Handbook (https://provost.upenn.edu/policies/faculty-handbook). For those governing Penn employees, see the Human Resources Policy Manual (https://www.hr.upenn.edu/policies-and-procedures/policy-manual).

Academic Policy for Participation in Intercollegiate Athletics
To be certified academically eligible to participate (practice and/or compete) in intercollegiate athletics at the University of Pennsylvania, a student:

• Shall not have been awarded a baccalaureate degree, and
• Shall be in a specific baccalaureate degree program by beginning of the fifth term of full-time enrollment (at Penn or anywhere), and
• Shall be enrolled for a full-time course load of academic study for the current semester, and
• Shall have been awarded a minimum of 1.5 course units for each semester of full-time enrollment (beginning with the first semester of participation in intercollegiate athletics [anywhere]), and
• Shall satisfy requirements in the following areas:
  a. NCAA Initial Eligibility (Freshman Only)
  b. Completion of academic course work (course units awarded)
  c. Grade-point average
d. NCAA percentage of degree requirement

Note: The calculation of the percentage of degree, which is be based upon the information found in a student-athlete’s official academic worksheet has been automated effective with the 2005-06 academic year. A percentage cannot be calculated when a worksheet does not exist or is not official. It is the responsibility of the student-athlete to ensure that academic worksheet is official and current as to the student-athlete’s major and/or concentration and that all courses have been correctly slotted under the applicable requirement field. Student-athletes are to have academic worksheets made official by end of the fourth semester.

Transfer student-athletes and student-athletes participating in study abroad programs are not exempted from the percentage of degree requirement.

Provisional eligibility may be granted onetime only to a student-athlete who does not satisfy the prescribed norms for progress — being awarded an average of four (4) course units of academic credit per full-time semester or the good standing — a cumulative GPA of 2.00 provided all other applicable requirements are satisfied. Provisional eligibility, when granted, shall terminate at the conclusion of the academic year in which it is granted or at the start of the spring semester should the student-athlete’s academic performance for the fall semester not meet the NCAA term progress and/or GPA requirement.

In observance of NCAA legislation, certification of satisfaction of academic requirements is required prior to competition in each semester. Additionally, senior student-athletes or student-athletes
who are exhausting their athletic eligibility must be recertified prior to participation in postseason competition occurring between semesters – fall to spring as well as spring to fall.

Information for:

- Incoming Freshman (p. 1482)
- Rising Sophomores (p. 1482)
- Rising Juniors (p. 1482)
- Rising Seniors (p. 1483)
- Fifth Year Students (p. 1484)

I. Incoming Freshmen (or students who are enrolling as full-time college students for first time):

All students who are in their first or second semester of full-time college enrollment (anywhere) must be registered in a full-time course load of study. Additionally, a student participating in a NCAA sponsored sport is required to be certified by the NCAA Initial Eligibility Clearinghouse as having satisfied the applicable academic requirements for participation in intercollegiate athletics during a student’s first-year of college matriculation.

This means if you are a freshman, to be academically eligible you must be:

- A full-time student, and
- Certified eligible by the NCAA Clearinghouse (except freshmen participating in non-NCAA sponsored sports)

II. Rising Sophomores (or students who have completed two full-time semesters (or equivalent) of college enrollment (including transfer student-athletes):

By the beginning of the third semester of enrollment (start of sophomore year for most student-athletes) a student must have achieved a minimum cumulative grade-point-average of 2.00, earned a minimum of one and one half (1.5) course units for the prior academic semester (not summer term) and the student’s transcript must display a minimum of eight (8) course units as having been awarded for the period commencing with the student’s first full-time semester and ending with the second full-time semester (including applicable summers). A minimum of four and one half (4.5) of the eight (8) course units awarded must be from academic course work completed in the first two full-time semesters (at Penn or elsewhere). Additional course units may be awarded from the first two full-time semesters and/or from any of the following: advanced placement credit, Penn’s Pre-Fresh Program credit, summer and/or transfer credit, all of which must be displayed on the student’s transcript at the time of eligibility evaluation.

This means if you are a sophomore, to be academically eligible you must:

- Be a full-time student, and
- Have a minimum cumulative GPA of 2.00, and
- Have 8 course units (on transcript at time of eligibility evaluation),
  - A minimum of 4.5 of the 8 course units must be for academic work completed in the first two full-time semesters (excluding summer), and
  - A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer),

New transfer students (matriculating at Penn for first time), to be academically eligible you must:

- Be a full-time student, and
- Have been awarded 24 course units of course work (equivalent of 6 Penn course units) at your former school.
- A minimum of 18 of the 24 course units must be for academic work completed in the first two full-time semesters (excluding summer), and/or
- Have 3 course units of transfer credit that is Penn degree applicable per term of full-time enrollment from the two-year college previously attended. Transfer credits must be displayed on transcript at time of eligibility evaluation.

Provisional Eligibility – After two full-time semesters.

If by the beginning of the third full-time semester a student-athlete satisfies all of the above requirements except for the cumulative GPA of at least 2.00 and/or eight (8) awarded course units on the transcript, the student-athlete may be considered for provisional eligibility.

- Minimum cumulative GPA for provisional eligibility consideration is 1.85.
- Minimum total number of awarded course unit credit is 6 CUs.
- A minimum of 4.5 of the 6 course units must be for academic work completed in the first two full-time semesters (excluding summer).

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school. The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

III. Rising Juniors (including transfer student-athletes):

By the beginning of the junior year (fifth and sixth semesters), a student must be in a degree program, have satisfied forty (40) percent of degree requirements, achieved a minimum cumulative grade-point-average of 2.00, earned a minimum of one and one half (1.5) course units for the prior full-time semester (not summer term) and the student’s transcript must display an average of four (4) course units as having been awarded for each full-time semester of Penn enrollment. (A rising junior (unless a transfer student-athlete) must have a minimum of sixteen (16) awarded course units on his or her transcript) with a minimum of six (6) awarded course units being for work completed in the two most recently completed full-time semesters (including summer sessions). A minimum of four and one half (4.5) of these six course units must be from academic course work completed in the prior two full-time semesters (not including summer) with the additional one and one half (1.5) course units coming from academic work completed in the prior two full-time semesters and/or summer (including course units awarded for transfer credit), all of which must be displayed on the student’s transcript at the time of the eligibility evaluation.

This means if you are a junior, to be academically eligible you must:
• Be a full-time student, and
• Be in a degree program (have an approved major, if applicable), and
• Have an official academic worksheet, and
• Have completed 40% of the requirements for your specific Penn degree, and
• Have a minimum cumulative GPA of 2.00, and
• Have a minimum of 16 course units (on transcript at time of eligibility evaluation),
  • A minimum of 6 course units awarded must be for academic work completed in the prior two full-time semesters and/or previous summer sessions,
  • A minimum of 4.5 course units awarded, must be for academic work completed in the prior two full-time semesters (excluding summer sessions),
  • A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer sessions),

New transfer students (matriculating at Penn for first time), to be academically eligible you must:
• Be a full-time student, and
• Be in a degree program (have an approved major, if applicable), and
• Have an official academic worksheet, and
• Have completed 40% of the requirements for your Penn degree
  • Thus, you will be required to have a sufficient number of awarded Penn and/or transfer credit on your transcript at the time of the eligibility review to satisfy the 40% percentage of degree requirement.

Provisional Eligibility – After four full-time semesters.
If by the beginning of the fifth full-time semester a student-athlete satisfies all of the above requirements except for the cumulative GPA of at least 2.00 and/or sixteen (16) awarded course units on transcript, the student-athlete may be considered for provisional eligibility.
• Minimum cumulative GPA for provisional eligibility consideration is 1.90,
• Minimum total number of awarded course unit credit is 14 CUs.

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school. The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

IV. Rising Seniors (including transfer student-athletes):
By the beginning of the senior year (seventh and eighth semesters), a student must be in a degree program, have satisfied sixty (60) percent of degree requirements, achieved a minimum cumulative grade point-average of 2.00, earned a minimum of one and one half (1.5) course units for the prior Penn academic semester (not summer term) and the student’s transcript must display an average of four (4) course units as having been awarded for each full-time semester of Penn enrollment. A rising senior (unless a transfer student-athlete) must have a minimum of twenty-four (24) awarded course units on the transcript with a minimum of six (6) awarded course units being for work completed in the most recently completed two full-time semesters (including summer sessions). A minimum of four and one half (4.5) of these six course units must be from academic course work completed in the prior two full-time semesters (not including summer) with the additional one and one half (1.5) course units coming from academic work completed either in the prior two full-time semesters and/or summer (including course units awarded for transfer credit), all of which must be displayed on the student’s transcript at the time of the eligibility evaluation.

This means if you are a senior, to be academically eligible you must:
• Be a full-time student (unless you satisfy the criterion for a NCAA exception), and
• Be in a degree program (have an approved major, if applicable), and
• Have an official academic worksheet, and
• Have completed 60% of the requirements for your specific Penn degree, and
• Have a minimum GPA of 2.00, and
• Have a minimum of 24 course units (on transcript at time of eligibility evaluation),
  • A minimum of 6 course units awarded must be for academic work completed in the prior two full-time semesters and/or previous summer), and
  • A minimum of 4.5 course units awarded, must be for academic work completed in the prior two full-time semesters (excluding summer), and
  • A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer)

New transfer students (matriculating at Penn for first time), to be academically eligible you must:
• Be a full-time student, and
• Be in a degree program (have an approved major, if applicable), and
• Have an official academic worksheet, and
• Have completed 60% of the requirements for your Penn degree
  • Thus, you will be required to have a sufficient number of awarded Penn and/or transfer course units on your transcript at the time of the eligibility review to satisfy the 60% percentage of degree requirement.

Provisional Eligibility – After six full-time semesters.
If by the beginning of the seventh full-time semester a student-athlete satisfies all of the above requirements except for having the twenty-four (24) course units awarded, the student-athlete may be considered for provisional eligibility provided a graduation audit has been completed.
• Minimum cumulative GPA for provisional eligibility consideration is 2.00.
• Minimum total number of awarded course unit credit is 22 CUs.

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school.
The student athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

**V. Fifth Year Students** (including transfer student-athletes):

By the beginning of fifth year (ninth and tenth semesters), a student must be in a degree program, have satisfied eighty (80) percent of degree requirements, achieved a minimum cumulative grade-point average of 2.00, earned a minimum of one and one half (1.5) course units for the prior Penn academic semester (not summer term) and the student’s transcript must display an average of four (4) course units as having been awarded for each full-time semester of Penn enrollment. A rising senior (unless a transfer student-athlete) must have a minimum of thirty-two (32) awarded course units on transcript with a minimum of six (6) awarded course units being for work completed in the most recently completed two full-time semesters (including summer sessions). A minimum of four and one half (4.5) of these six course units must be from academic work completed in the prior two full-time semesters (not including summer) with the additional one and one half (1.5) course units coming from academic work completed in the prior two full-time semesters and/or summer sessions (including course units awarded for transfer credit), all of which must be displayed on the student’s transcript at the time of the eligibility evaluation.

This means if you are a 5th year student, to be academically eligible you must:

- Be a full-time student (unless you satisfy the criterion for a NCAA exception), and
- Be in a degree program (have an approved major, if applicable), and
- Have an official academic worksheet, and
- Have completed 80% of the requirements for your specific Penn degree, and
- Have a GPA of a minimum of 2.00, and
- Have a minimum of 32 course units (on transcript at time of eligibility review),
  - A minimum of 6 course units awarded must be for academic work completed in the prior two full-time semesters and/or previous summer, and
  - A minimum of 4.5 course units awarded, must be for academic work completed in the prior two full-time semesters (excluding summer), and
  - A minimum of 1.5 course units must be for academic work completed in the previous full-time semester (excluding summer).

New transfer students (matriculating at Penn for first time), to be academically eligible you must:

- Be a full-time student, and
- Be in a degree program (have an approved major, if applicable), and
- Have an official academic worksheet, and
- Have completed 80% of the requirements for your Penn degree
  - Thus, you will be required to have a sufficient number of awarded Penn and/or transfer course units on your transcript at the time of the eligibility review to satisfy the 80% percentage of degree requirement.

**Provisional Eligibility – After eight full-time semesters.**

If by the beginning of the ninth full-time semester a student-athlete satisfies all of the above requirements except for having thirty-two (32) course units awarded, the student-athlete may be considered for provisional eligibility provided a graduation audit has been completed.

- Minimum cumulative GPA for provisional eligibility consideration is 2.00.
- Minimum total number of awarded course unit credit is 30 CUs.

Provisional eligibility, if approved shall be for one semester only but may be extended for a second semester upon recommendation from the school eligibility officer.

To be considered for provisional eligibility a student-athlete shall meet with the school eligibility officer to discuss the academic deficiency and to develop an Academic Enhancement Plan (AEP) which shall record the plan for academic improvement and agreed upon conditions of provisional eligibility between the student-athlete and the school. The student-athlete shall then review the AEP with the Assistant Director of Athletics for Academic Services who may add additional stipulations. Following these two meetings, the student-athlete shall acquire signatures (in sequence) endorsing the AEP from the sport’s head coach and DRIA compliance coordinator.

**Academic Rules for PhD Programs**

The doctor of philosophy degree is conferred in recognition of marked ability and high attainment in a specific branch of learning. The Ph.D. degree is granted by the Trustees of the University of Pennsylvania upon the approval of the Graduate Council of the Faculties and upon satisfaction of all degree requirements, including acceptance of the dissertation by the student’s Dissertation Committee. Students may enroll in more than one degree program with prior permission of both schools/programs; only one Ph.D. is earned.

The University’s standards, set forth below, are to be viewed as minimum requirements. The school or the graduate group has the right to establish additional requirements and to refuse to examine any student who is not qualified according to its standards. If there are additional program or school requirements, that information must be communicated and available to all students.

**Curriculum**

Graduate groups determine the curricular requirements for their programs. The course of study can include a combination of specific required courses, electives, teaching, independent study or laboratory rotations, colloquia, and demonstration through examination of comprehensive knowledge in the major field.

A student who enters the Ph.D. program with a bachelors degree will be expected to spend two to three years taking 34 course units a semester before satisfying the graduate group’s academic requirements, passing the required examinations and being advanced to candidacy. Graduate groups may require more extensive preparation through additional work, especially those programs with substantial language requirements. Students in some programs, such as those in science fields, may begin dissertation-related research before advancing to candidacy. Students who enter with a masters degree or other transfer credit may satisfy
the formal course requirements more quickly. Graduate groups have flexibility to establish the optimal timetable and requirements for their own students and to respond to the specific academic needs of individual students.

The customary maximum load for a Ph.D. student is four course units each semester; exceptions for a fifth course unit may be made in extraordinary cases upon approval of the graduate dean.

Graduate groups may establish examination requirements in addition to the University’s standards described below.

Evaluations and Examinations
A Qualifications Evaluation of each student is conducted in the first two years. The evaluation is designed by the graduate group and may be based on an examination or on a review of a student’s overall academic progress. Satisfaction of this requirement is necessary in order to continue in the graduate program and is recorded in the student’s academic record. The student and the school’s graduate office must be notified of the outcome of the evaluation.

A Candidacy Examination on the major subject area is required. This examination is normally held after the candidate has completed all required courses and may be satisfied by the successful defense of a dissertation proposal. It may be oral, written, or both, at the discretion of the graduate group. Feedback will be provided to the student within one month. Satisfactory completion of the Candidacy Examination requirement is recorded in the student’s academic record. Upon successful completion of the Candidacy Examination, the student is advanced to candidacy. Normally, a student should advance to candidacy by the end of the third year. The maximum time limit for a student to be advanced to candidacy is five years, after which time the student will be dropped from the rolls.

Dissertation
The student and dissertation supervisor meet regularly (at least twice a year and, in many cases, much more frequently) to establish expectations and review the progress of the student's research.

Dissertation Committee Composition and Meetings
Upon advancement to candidacy, each student has a Dissertation Committee consisting of at least three faculty members (including at least two members of the graduate group). At least half of the members of the dissertation committee must be members of the graduate group at the time of appointment to the committee. Faculty who are not members of the graduate group may serve only with the written approval of the graduate group. The authority to approve membership on committees may be delegated to the graduate chair. A graduate group may establish additional requirements, such as a requirement for outside reviewers on the dissertation committee.

The Chair of the Dissertation Committee must be a member of the Standing Faculty in the graduate group. If the Chair of a dissertation committee leaves the Standing Faculty before the dissertation is completed, then a new chair from the Standing Faculty in the Graduate Group must be appointed as chair. The dissertation committee chair is responsible for convening committee meetings, advising the student on graduate group and university expectations, and assuring the graduate group chair that the group’s requirements have been met.

The Dissertation Supervisor may serve as Chair of the Dissertation Committee, but is not required to do so.

The Dissertation Supervisor is the person primarily responsible for overseeing the student’s dissertation research. A student may have both a Dissertation Supervisor and a Dissertation Co-Supervisor, or two Dissertation Co-Supervisors, if that responsibility is shared equally.

Dissertation Supervisors, and Dissertation Co-Supervisors, must be members of the Standing Faculty at Penn, with special approved exceptions. A member of the Associated Faculty (such as Research Faculty or Adjunct Faculty) may be permitted to serve as a Dissertation Supervisor with prior approval of the Vice Provost for Education on a case by case basis. The Graduate Group Chair may petition the Vice Provost for Education, in advance, for an exception. In such cases, a member of the Standing Faculty in the graduate group must be appointed as the Dissertation Committee Chair.

The Dissertation Committee meets at least once annually with the student to review the student’s progress. The student prepares an Annual Dissertation Progress Report and the committee gives timely feedback (within one month) and confirms whether progress is satisfactory. A copy of the signed progress report is submitted to the Supervisor/Advisor and Graduate Group Chair and is documented by the school in the student’s PhD Worksheet.

Dissertations based on joint work with other researchers are allowed, provided that, in such cases, a unique and separate dissertation is presented by each degree candidate. The candidate must include a concise account of his or her contribution to the whole work. Authorship of a dissertation by more than one degree candidate is not allowed.

Public Presentation and Defense Examination
A public, oral presentation of the dissertation is required. The presentation may take the form of a workshop based on a complete draft of the dissertation, or it may be based on the final version of the dissertation, depending on the rules of the graduate group. In either case, the presentation must either include or be followed by an oral examination. This examination may be private if specified by the rules of the graduate group.

At least three members of the dissertation committee must participate in the defense. Participation of one of the three may be via video or audio.

In exceptional and compelling circumstances, and with the permission of the Graduate Group Chair, a student may defend the dissertation using video conferencing (e.g., Skype, Google Chat, FaceTime).

Acceptance
By the prescribed deadline, the graduate group shall report to the Graduate Division Office of the School of Arts and Sciences regarding acceptance of the dissertation and its suitability for immediate publication. The report shall include the date and location of the oral presentation or the date of the meeting of the dissertation committee, the names of the dissertation committee members, and whether they individually approve the dissertation. The student and the Advisor/Supervisor will also be given a copy of the report.
Publication and Submission

Dissertations must follow the format prescribed in the Dissertation Manual. Candidates also should familiarize themselves with any special requirements imposed by the graduate groups under which they are working.

The dissertation is, essentially, a manuscript. In some fields, the dissertation may consist of articles published by the student during the course of the PhD program, accompanied by a narrative explaining the context and significance of the collected works. Essential supplementary mixed media files, such as photographs, audio recordings, and film may be submitted to augment the written text.

All Penn PhD dissertations are published by ProQuest and a hard copy is placed in the Penn Library once the student graduates. Beginning in fall 2015, Penn will also require open access publication of dissertations in the institutional repository, Scholarly Commons. Students should discuss with their advisor whether a delay in publication is necessary or advisable. Students may apply for delay in publication by Proquest and in Scholarly Commons as follows: A request for a three-year delay is approved automatically. A request for a delay of an additional three years requires approval by the Graduate Group Chair. In the event that a further delay is needed, the graduate should petition his or her School’s Graduate Dean (or Associate Dean for Graduate Studies) for an extension.

All PhD dissertations must be submitted in digital format through ProQuest’s ETD Administrator module.

Regarding Tutoring Students for Compensation

Many PhD programs have an academic requirement that students teach for one or more semesters. Teaching assistantships and teaching fellowships are done under the supervision of the faculty instructor. The Center for Teaching and Learning is a valuable resource for all graduate students interested in improving their professionalism as teachers – even those who do not have the opportunity to serve as a TA.

A Teaching Assistant (or Teaching Fellow) shall not be allowed to tutor for compensation any student that s/he is grading or has influence in assessing.

Research Abroad

A student who will conduct dissertation research abroad for the semester registers for Dissertation Research Abroad status. Full tuition is charged to students in years 1-5, reduced tuition to students in years 6-10; a reduced general fee is charged for students on Dissertation Research Abroad regardless of their year.

Time Limits

As of 2010-11, the University’s maximum time limit for completion is ten years after matriculation; some graduate groups and schools have established more stringent criteria. Graduate students who have been dropped after ten years may petition the graduate group to return as a student for a maximum of one year in order to achieve recertification and defend the dissertation. (See sections below on Petition for Readmission and Recertification.)

Combined degree students (e.g., M.D.-Ph.D.s) typically enroll full-time in medical school during the first two years of study and do not begin full-time Ph.D. course work until the third year; for these students, the ten-year time limit begins at the start of full-time Ph.D. study.

Petition for Readmission After Reaching the Maximum Time To Degree

A student who has been dropped after reaching the maximum time limit may petition the graduate group to return as a student for a maximum of one further year in order to achieve recertification and complete and defend the dissertation. Faculty members have no obligation to continue working with a student who has been dropped, nor is there any presumption that a graduate group will respond favorably to a petition for re-admission. If a graduate group wishes to recommend re-admission, it must present to the graduate dean a list of faculty members willing to serve as a dissertation committee and a detailed, realistic plan of how the student will, within one year of reenrollment, achieve recertification, pass the dissertation examination, and submit the final copy of the dissertation. If re-admission is approved by the graduate dean, the student must pay Reduced Tuition for two semesters, unless all requirements are completed within one semester. A student may petition for readmission at the time s/he is dropped from the program, or at a later date. The student should be fully ready and committed to completing within a one-year timeframe; enrollment will not be extended beyond that final year, and no further petition for readmission will be considered by the University.

Recertification

If the graduate group and graduate dean approve the petition for readmission, the student must immediately be recertified. In order to ensure that a student’s dissertation research remains at the frontier of current research in the field, the student must retake and pass the Candidacy Examination, or satisfy alternative recertification criteria designed by their graduate group and approved by the Graduate Council of the Faculties. The new deadline for completion of all requirements for the Ph.D., including recertification, shall be within one year.

Approved Individual Graduate Group Recertification Policies

The following policies have been approved by the Graduate Council of the Faculties and supplement the University’s Recertification Policy.

Anthropology (Revised July 2010)

Students who have not completed the dissertation within the University’s maximum time limit may apply for readmission, but must then complete all requirements for the PhD, including deposit of the dissertation, within one year. In order to reapply, the student should have a complete draft of their dissertation that has been approved by their advisor. At that point, the student should meet with the graduate chair, who will then bring the student’s case before the graduate group for a vote. Should the vote support the student’s readmission, the graduate chair will present the case to the graduate dean, outlining the student’s outstanding requirements and a timetable for completing them. In some cases, the student may be asked to repeat the Candidacy Examination in order to demonstrate a satisfactory grasp of current scholarship in the field. The graduate dean then reviews the case, and if it is approved, writes a letter formally spelling out the arrangements, and the tuition and fees that the student will be expected to pay.
Communication (Revised June 2010)

Students who have not completed all requirements for the Ph.D., including the deposit of the dissertation, within ten years of matriculating must submit all written work they have completed on their dissertation to a committee comprised of a minimum of three members of the Communications standing faculty. This committee may be the student’s dissertation committee or, if that committee is not intact, an Ad Hoc committee appointed by the Committee on Graduate Studies. The committee members will evaluate this material (they may, at their discretion, meet with the student), and take one of the following actions:

1. require the student to take all or part of the Comprehensive Examination (if the committee believes there is a question about the continued currency of the student’s research);
2. impose other conditions such as the committee believes will ensure the currency and timely completion of the student’s work toward the Ph.D.;
3. recommend to the Committee on Graduate Studies that the student be disqualified from continued doctoral candidacy (if the committee believes the written work provides insufficient evidence of progress toward the completion of an adequate doctoral dissertation).

In the case of (1) or (2), above, the committee will report its decisions and actions to the Committee on Graduate Studies. Upon satisfactory re-certification, the student must complete all requirements for the Ph.D., including deposit of the dissertation, within one year.

Comparative Literature (Revised July 2010)

Students who have not completed all requirements for the Ph.D., including the deposit of the dissertation, within the University’s maximum time limit must retake the dissertation prospectus exam (also known as the “final exam”). This exam will involve submitting an updated version of the prospectus to the student’s committee; the committee must approve the new prospectus in order for the student to satisfy the recertification requirement. Upon satisfactory re-certification, the student must complete all requirements for the PhD, including deposit of the dissertation, within one year.

Economics (Revised July 2010)

Students who have not completed all requirements for the Ph.D., including the deposit of the dissertation, within the University’s maximum time limit must retake the Dissertation Proposal Defense Exam; and write and submit a review of the most recent literature on the dissertation topic, to be formally approved by the dissertation committee (which also conducts the proposal defense). Upon satisfactory re-certification, the student must complete all requirements for the PhD, including deposit of the dissertation, within one year.

Education (Revised July 2010)

Ph.D. students in the Graduate Group in Education who have not completed all their degree requirements within the University’s maximum time limit must submit a progress report and plan to his or her dissertation committee. The purpose of this report/plan is:

- to document which degree requirements the student has completed;
- to provide a rationale for why he or she has been unable to complete all the requirements within the time limit and to provide a timeline/schedule of steps for completion of the remaining requirements within a one-year extension.

The student’s chair and a majority of his or her dissertation committee must review and approve the progress report and plan. The student must then submit the progress report and plan to the Committee on Degrees for their review and approval. The student must re-take a preliminary exam that documents familiarity with the current status of their field.

Hispanic Studies (Revised October 2017)

Students who have not completed all requirements for the Ph.D., including the deposit of the dissertation, within the University’s maximum time limit must 1) submit an updated version of the prospectus and 2) submit a review of the most recent literature on the dissertation topic. The student’s committee must approve the new prospectus and review of literature in order for the student to satisfy the recertification requirement. Upon satisfactory re-certification, the student must complete all requirements for the PhD, including deposit of the dissertation, within one year.

Linguistics (Revised July 2010)

A student can be re-certified by submitting a revised dissertation proposal reflecting current scholarship on the topic and then undergoing a new dissertation proposal defense, following the usual procedures for the Graduate Group. Upon satisfactory re-certification, the student must complete all requirements for the Ph.D., including deposit of the dissertation, within one year or less as determined by the Graduate Group.

Near Eastern Languages and Civilizations (Revised October 2010)

For Near Eastern Languages and Civilizations, students who apply to be re-enrolled in the Ph.D. program must pass a recertification examination demonstrating satisfactory grasp of current scholarship in their field. The Graduate Group Chair and the dissertation committee will constitute the recertification committee for this purpose. After an initial oral examination, the committee may, at its discretion, require that the student retake the Candidacy Examination and/or submit a revised dissertation proposal prior to recertification. Upon satisfactory re-certification, the student must complete all requirements for the PhD, including deposit of the dissertation, within one year.

Political Science (July 2010)

All students who have not completed all requirements for the Ph.D. (including deposit of the dissertation) within the University’s maximum time limit must submit to their full dissertation committee (i.e., the supervisor and two readers) a copy of all written work they have completed on their dissertation. The committee members will evaluate this material, and report to the whole group, recommending that one of the following actions be taken:

The student is required to retake the qualifying examination (if the committee believes there is a question about the continued currency of the student’s research). The student is disqualified from continued doctoral candidacy (if the committee believes the written work provides insufficient evidence of progress toward the completion of an adequate doctoral dissertation). Other conditions are imposed on the student’s dissertation research, such as the committee believes will ensure the currency and timely completion of the student’s work toward the Ph.D. within one year of recertification.

Social Welfare (Revised July 2010)

Ph.D. students who have not completed all their degree requirements within the University’s maximum time limit may apply for recertification. The standards for granting an extension are:
Continuous Registration

Continuous registration as a graduate student is required unless a formal leave of absence is granted by the dean of the student's school. A leave of absence will be granted for military duty, medical reasons, or family leave; this leave is typically for up to one year and "stops the clock" on time to completion. Personal leave for other reasons may be granted for up to one year with the approval of the Graduate Dean, but it does not automatically change the time limit. Leave should not be granted for the purpose of evading tuition charges. Additional requirements for return may be imposed by the Graduate Dean. No language or other degree examinations may be taken while a student is on leave of absence. A student without an approved leave of absence who fails to register each semester will be considered to have withdrawn from candidacy for the degree; approval by the Graduate Dean and recertification are required for reinstatement.

Dissertation registration takes place in the fall and spring semesters. Dissertation students who are candidates for August degree remain full-time students through August 31st without summer registration.

Extramural Research

If graduate credit is sought for research work pursued at laboratories not officially a part of the University of Pennsylvania (for example, where the investigator is not a member of the graduate group), the student must obtain prior permission from the graduate chair. University policies regarding intellectual property apply in the case of research conducted in extramural settings.

Copyright and Patent Policies

A dissertation submitted as part of the requirements for a degree is the property of the University. Any copyrights or patent rights arising therefrom shall be governed by the policies of the University of Pennsylvania, including the Patent and Tangible Research Property Policies and Procedures and the Policy Relating to Copyrights and Commitment of Effort for Faculty.

New Parent Accommodation

A student in a Ph.D. program at Penn is eligible for time off of eight weeks for the birth or adoption of a child. The student must complete the online New Parent Accommodation/Family Leave Request Form (https://provostawards.wufoo.com/forms/72patf10x6vxtk) at least 60 days prior to the anticipated start date of the leave so that appropriate arrangements can be made to cover any teaching/research responsibilities.

The graduate group chair and dissertation advisor will be notified via email of the details of the student's accommodation request. The graduate group is responsible for making the necessary arrangements within their department and school.

A. Normally the "Time Off" period commences within two weeks of the birth or adoption.

B. During the "Time Off" period, the student remains enrolled full-time. In order to facilitate a rapid return, s/he may participate in the program as fully as s/he deems appropriate. By remaining on full-time status, student visa status and loan repayment schedules, if any, will remain unchanged.

C. The student is entitled to academic accommodation including relief from academic requirements, such as postponement of exams and course requirements.

Transfer Credit

Credit may be transferred toward the Ph.D. from a masters degree or other work completed in a post-baccalaureate degree program, upon recommendation by the graduate chair and approval of the graduate dean, reducing full tuition registration by up to two years. No work done as an undergraduate, whether at this institution or at any other, will be counted toward a Ph.D., A.M., or M.S., with the following exception: graduate courses completed by undergraduates as submatriculants in a graduate group may be counted toward graduate degree requirements.

Tuition

Beginning in fall 2008, Ph.D. students will be charged full tuition until they have completed five years of full-time study or the equivalent of approximately 30 course units. The time may be as brief as three years if a student enters with credits from a post-baccalaureate degree program or successfully completes the Ph.D. in fewer than five years.

If the student has not earned the Ph.D. degree by the end of five years, the student will be charged reduced tuition until the degree is awarded, or for a maximum of five additional years. Continuous enrollment is required through year ten (or until graduation), with an exception for approved leave (for family leave, military, medical reasons). After a maximum of five years at reduced tuition, the student ceases to be enrolled. With permission and recertification from the graduate group, a student may re-enroll for a final year in order to defend and deposit the dissertation. Such a student must pay reduced rate tuition for a final two semesters, unless all requirements are completed within one semester.

A student engaged in research overseas may be registered for Dissertation Abroad; charges are posted for Reduced Tuition and Reduced General Fee.

There is a full committee working with a student on a dissertation;
• the student's dissertation work represents an extension of preliminary degree work and is conducted in constant consultation with the dissertation chair and committee;
• a plan for completion within one year is realistic, particularly in relation to the student's prior diligence in completing work;
• the Dissertation Committee Chair supports the student's plan for completion of the dissertation.
D. A student receiving stipend support is entitled to continuation of support during the “Time Off” period as follows:
1. Students receiving stipends from University/school funds are entitled to draw support for eight weeks during the academic year.
2. Students funded by government grants or other external funding sources are entitled to benefits as determined by the funding agency.

Family Leave of Absence Policy
A student in the Ph.D. program at Penn may take an unpaid Family Leave of Absence for the birth or adoption of a child, child care, or care of an immediate family member (spouse, domestic partner, child, or parent) with a serious health condition. The graduate group chair and dissertation advisor will be notified via email of the details of the student’s leave request. The graduate group is responsible for making the necessary arrangements within their department and school.

A. Students may take a Family Leave of Absence for one semester or for two semesters.
B. The student must complete the online New Parent Accommodation/Family Leave Request Form (https://provostawards.wufoo.com/forms/r72pat10x6vtl/) at least 60 days prior to an anticipated leave so that appropriate arrangements can be made to cover any teaching/research responsibilities. In unanticipated and/or emergency situations, students should fill out the form as soon as possible.
C. Family Leave “stops the clock” on the student’s academic requirements, including service requirements, for the duration of the leave.
D. During the period of Family Leave, the student may arrange to continue Student Health Insurance, but is responsible for the payment of his or her own premiums. Upon paying a fee, students on approved Family Leave will retain their PennCard, e-mail accounts, library privileges, and building access.
E. Funding commitments from the institution are deferred until the student returns from Family Leave. Students receiving funding from external sources, such as government grants, are subject to the conditions established by the funding source.
F. Service requirements (e.g., teaching, research) will be met by the student following return from Family Leave.
G. Requests for extension of Family Leave beyond one year, or for repeated Family Leaves, may be made. Approval of an extension, deferral of funding, and continued academic accommodation is at the discretion of the Graduate Dean.

Important: If you anticipate adding a dependent (e.g., newborn) to your Penn Student Insurance Policy while on Family Leave, you must remain in active student status at the start of the fall semester. Students should arrange with their school/division to maintain full-time student status for at least 31 days from the start of fall classes, after which time the Family Leave status can be recorded in the Student Records System. After the birth/adoption, contact the SHS Insurance Coordinator to enroll the dependent. The premium for dependent coverage is payable directly to Aetna Student Health.

Graduate Grades and Academic Standing
The grading system is as follows:
- A, excellent;
- B, good;
- C, fair;
- D, poor but passing; and
- F, failure.

At the graduate level, the grade of C, while passing, does not constitute satisfactory performance. Letter grades may be modified by a plus (+) or minus (-) sign at the discretion of the school. The minimum standard for satisfactory work for the graduate faculties is a B average in each academic year, but the graduate group may set additional requirements that determine advancement; these requirements may require a student to withdraw despite a satisfactory grade average, if the quality of the student’s work is not at a level that predicts successful dissertation research.

The mark of S is used to indicate satisfactory “progress”. It may be used as a permanent grade for 999 courses only. It is a temporary grade for all other courses.

The mark of I is used to designate “incomplete.” A student who fails to complete a course and does not withdraw or change his/her status to auditor within the prescribed period shall receive at the instructor’s discretion either a grade of I (incomplete) or F (failure). It is expected, in general, that a student shall complete the work of a course during the term in which that course is taken. The instructor may permit an extension of time up to one year for the completion of the course. In such cases, any course which is still incomplete after one calendar year from its official ending must remain as “incomplete” on the student’s record and shall not be credited toward a degree.

Auditors
A student who desires to attend a course without performing the work of the course must first secure the consent of the instructor. He or she must register in order for the audited course to appear on the transcript; no credit will be received for the audited course. A teaching fellow registered for three course units may register as auditor for one additional course with permission of the graduate group chair.

A student may request that the school graduate office change his or her status in a course to auditor, provided that the request is endorsed by the chairperson of his or her graduate group and the instructor giving the course and is submitted to the graduate office no later than the end of the second week of the term.

Change of a Graduate Group
A student who wishes to change his or her graduate group must submit an application for admission to the new graduate group.

Institutional Courtesy/Exchange Programs
The Exchange Scholar Program allows Penn Ph.D. students to apply to study for a semester or academic year at one of ten other participating institutions:
- Brown,
- Columbia,
- Cornell,
• Harvard,
• MIT,
• Princeton,
• Stanford,
• University of California-Berkeley,
• University of Chicago, and
• Yale.

Through cooperative arrangements with Bryn Mawr College, Haverford College, and Swarthmore College, University of Pennsylvania students may, upon presentation of the proper credentials and with the permission of the instructor concerned, enroll for courses in these institutions. The University of Pennsylvania will accept toward a masters or Ph.D. degree up to the equivalent of three course units for work completed under this arrangement.

Through a cooperative arrangement between the Annenberg School for Communication and Johns Hopkins University, students selected as exchange scholars from the Annenberg School for Communication may count up to one academic year of study at John Hopkins (taken while registered at Penn), subject to the approval of the graduate group toward the Ph.D. degree at the University of Pennsylvania.

Ph.D. and research masters students enrolled in Anthropology, or History of Art may, upon approval of their graduate group and the instructor, enroll for a maximum of two courses in the Department of Art Conservation at the University of Delaware. The University of Pennsylvania will accept credits completed under this agreement for a masters or Ph.D. degree.

Ph.D. students enrolled in Ancient History, Classical Studies, Religious Studies, Germanic Languages and History may, upon approval of their graduate group and the instructor at the host institution, enroll for a maximum of four courses for graduate credit at the Lutheran Theological Seminary in Philadelphia.

Ph.D. students enrolled for at least one full academic year in the Graduate Groups in Ancient History, Classical Studies, Art and Archaeology of the Mediterranean World, History of Art, Religious Studies, German, Political Science or History may, subject to the approval of their graduate group and the instructor, enroll for a maximum of four courses at the Jewish Theological Seminary.

Each year, up to two English Ph.D. students (one in film and one in poetics) may, upon approval of the graduate group and the instructor at the host institution, take one course each offered by Temple University’s Department of Film and Media Arts and in English.

Under the terms of the PhD Student Exchange Program with Rutgers University, PhD students in all fields may take up to four courses at Rutgers University upon approval of their graduate group chair.

Details regarding the institutional exchange agreements are available from the Office of the Vice Provost for Education.

Updated January 24, 2018

---

Academic Rules for Research Master’s Programs

The master’s degree represents the successful completion of at least a full academic year (two terms) of graduate work including some training in research.

Course Requirements

A minimum of eight course units is required for the master’s degree. Additional work may be prescribed in individual cases. Any student registered for the full amount of four course units may register as an auditor for one additional course with the permission of the graduate dean. No more than four course units in any one term may be counted toward the minimum requirement of eight course units. No course may be counted toward degree requirements if it has been used toward the requirements for more than one other degree.

Major Subject

A prospective candidate for a master’s degree must complete at least four course units in the field of the major, and the work as a whole shall be directed by the chairperson of the graduate group concerned.

In the case of a research requirement (thesis, seminar or laboratory course), the candidate shall also:

1. prepare a thesis in the field of the major subject; or
2. complete a course of research character or engage in supervised research, as the graduate group shall direct, which, in either case, shall be of at least one term in duration and shall include the preparation of at least one comprehensive scholarly or scientific paper.

A thesis or research paper based on joint work with other researchers is allowed, provided that, in such cases, a unique and separate document is presented by each degree candidate. The candidate must include a concise account of his or her contribution to the whole work. Authorship of a master’s thesis or research paper by more than one degree candidate is not allowed.

If a thesis is required, two printed copies shall be deposited in the Graduate Division Office by the date specified in the degree calendar for that term. Specific information regarding the form in which the master’s thesis manuscripts are to be prepared must be obtained from the Graduate Division Office.

General Examination

A general examination by the graduate group in the major subject is required in addition to all other examinations. The purpose of this examination is to test the candidate’s knowledge of his or her major subject in its broader aspects and proficiency in the particular courses he or she has taken. This examination may be oral, written, or both, at the discretion of the graduate group. The mere satisfaction of minimum requirements does not entitle the student to be admitted to this examination.

With the approval of the Graduate Council of the Faculties, the graduate group may substitute other assessment procedures for the general examination as a means of assuring that master’s students have broad knowledge of the field.
Transfer of Credit

At least eight course units of the total program required for the master's degree must be completed in a graduate program at the University of Pennsylvania or through an approved program at another school. Where more than eight course units are required, graduate work done at other universities may be accepted for the balance of the course requirements, if approved by the graduate dean. A student may transfer courses completed at other graduate schools of the University with the approval of the appropriate graduate dean. No work done as an undergraduate, whether done at this institution or at any other, will be counted toward a higher degree. (Graduate courses completed by an undergraduate as part of submatriculation in a graduate group count as graduate courses and, therefore, may be counted toward graduate degree requirements.) Credit towards satisfaction of the minimum course requirements for a post-baccalaureate degree can be given for a maximum of four course units of work completed while registered in the College of Liberal and Professional Studies.

Time Limits

The minimum requirement of eight course units must be completed within six consecutive years with the understanding that one additional year will be allowed for the completion of a thesis if required.

Registration

Registration takes place in the fall and spring semesters. Research masters students who are candidates for an August degree remain full-time students through August 31st without summer registration.

Leave of Absence

A student who wishes a leave of absence must submit a written request to his or her graduate group chairperson for initial approval and then to the appropriate dean for final approval. The granting of a leave of absence does not automatically change the time limit. Time spent in military service does not count under the time limit.

Alcohol and Other Drug Policy

I. Introduction

The University Alcohol and Other Drug Policy, like other standards of conduct applicable to the University community, is intended to further the educational mission of the University of Pennsylvania. The University is committed to fostering an environment that promotes the acquisition of knowledge and nurtures the growth of the individual. Each member of our intellectual community is responsible for his or her own actions and is expected to contribute to the Penn community and to respect the rights of others to participate in the academic and social life of the University. The following Alcohol and Other Drug Policy, with its emphasis on individual and shared responsibility, healthy and informed decision-making, maintaining a caring environment, and the promotion of genuine dialogue, is adopted in this spirit. Students, staff and faculty may be subject to additional requirements and procedures set forth by their respective schools or departments, and which may be stated in handbooks generated by those entities.

II. Standards of Conduct

Drugs [See Summary of Controlled Substance Statutes in Appendix]

The University of Pennsylvania prohibits the unlawful manufacture, distribution, dispensation, sale, possession or use of any drug by any of its students, employees in its workplace, on its premises or as part of any of its activities. This includes the unlawful sale, distribution, dispensation, possession, or use of any prescription drug. Use or possession of marijuana is prohibited on University premises, per federal law, which supersedes Pennsylvania laws governing the use and possession of marijuana and marijuana products on university campuses. This policy is intended to supplement and not limit the provisions of the University's Drug-Free Workplace policy (https://www.hr.upenn.edu/policies-and-procedures/policy-manual/performance-and-discipline/drug-free-workplace).

Alcohol [See Summary of Alcohol Statutes in Appendix]

A. General Rules Governing the Use of Alcohol

The University of Pennsylvania seeks to encourage and sustain an academic environment that respects individual freedom and promotes the health, safety and welfare of all members of its community. In keeping with these objectives, the University has established the following policy governing the possession, sale and consumption of alcoholic beverages by members of the University community, and conforming to the laws of the Commonwealth of Pennsylvania. Penn's alcohol policy and programs are intended to encourage its members to make responsible decisions about the use of alcoholic beverages, and to promote safe, legal, and healthy patterns of social interaction.

1. The University of Pennsylvania prohibits:

a. The possession and/or consumption of alcoholic beverages by persons under the age of twenty-one on property owned or controlled by the University or as part of any University event or meeting organized by a University department, organization or group.

b. The intentional and knowing selling, or intentional and knowing furnishing (as defined by Pennsylvania law) of alcoholic beverages to persons under the age of twenty-one or to persons obviously inebriated on property owned or controlled by the University or as part of any University event or meeting organized by a University department, organization or group. Pennsylvania law currently defines "furnish" as "to supply, give, or provide to, or allow a minor to possess on premises or property owned or controlled by the person charged."

c. The consumption of alcoholic beverages by all University students and employees so as to adversely affect academic or job performance and/or endanger the physical well-being of other persons and/or oneself, and/or which leads to damage of property.

d. The possession, sale, distribution, promotion, or consumption of an alcoholic beverage in a manner that constitutes a violation of federal, state or local law, including the sale, directly or indirectly, of any alcoholic beverages at a premises or by an entity not licensed for such sales on property owned or controlled by the University or as part of any University event or meeting organized by a University department, organization or group.
e. When an entity without a liquor license is providing service of alcohol, the following is prohibited per Pennsylvania law:

- Sales of alcoholic beverages at a cash bar
- Sales of tickets or entrance fees to an event where alcohol is served
- Donations or reimbursements to support the cost of an event where alcohol is served
- Sales of drink tickets or inclusion of drink tickets in entry fees at events where alcohol is served

2. The University of Pennsylvania permits the lawful keeping and consumption, in moderation, of alcoholic beverages on its property or property under its control by persons of legal drinking age (21 years or older).

3. In cases of intoxication and/or alcohol poisoning, the primary concern is the health and safety of the individual(s) involved. Individuals are strongly encouraged to call for medical assistance for themselves or for a friend/acquaintance who is dangerously intoxicated. No student seeking medical treatment for an alcohol or other drug-related overdose will be subject to University discipline for the sole violation of using or possessing alcohol or drugs. This policy shall extend to another student seeking help for the intoxicated student.

4. Vice Provosts, Vice Presidents, Deans, and heads of administrative and residential units have the authority and responsibility to govern the use of alcohol in areas they control, both indoors and out, and to approve or disapprove of plans designed to ensure that (at events where alcohol will be served in such areas) only legal age individuals will have access to such alcohol. Further, those hosting such events must take reasonable steps to ensure that the acquisition, distribution, and consumption of alcohol otherwise complies with applicable law and University policy.

5. At any event at which alcohol will be served, sufficient quantities of non-alcoholic beverages and food must also be available to guests without cost.

6. Consistent with Pennsylvania law, advertisements of social events shall not promote nor describe the availability of alcoholic beverages; nor shall such advertisements promote the consumption of alcohol by minors.

7. Ordinarily, consumption of alcoholic beverages in outdoor public areas such as walkways, building steps and porches, unenclosed patios, green spaces, and the like is not permitted regardless of the age of the drinker. However, appropriate administrators and University of Pennsylvania Police (UPPD) may grant exceptions to this guideline on an event-by-event basis. Exceptions will be granted only for those events where an overwhelming majority of those reasonably expected to attend an event are of legal drinking age. Events for which exceptions have been granted must be limited to areas that are clearly demarcated and in which it is possible to exercise adequate control of access to and consumption of alcohol. Event hosts must ensure that barriers and other alterations to the outdoor venue which are required by the UPPD and/or the manager of the venue are in place.

8. Kegs of any amount of beer are not permitted at student-run events and are not allowed in any University-managed undergraduate residence. Kegs are permitted at University-sponsored, staff-run events only.

B. Rules Governing Alcohol Use at Registered Undergraduate Social Events

In order to minimize the risk of alcohol abuse, promote compliance with the law, and encourage students to make responsible decisions about the use of alcohol, the following rules are designed to control the volume and nature of alcohol products available and, ultimately, reduce the risk of alcohol-related incidents that pose a threat to the health and welfare of students and colleagues.

1. Undergraduate student groups—those recognized, registered, or identified as an organization by the University—which intend to sponsor events to be held at an on-campus space, an off-campus residence, or a third-party venue, and where alcohol will be served and consumed, must register the event with the Office of Alcohol and Other Drug Program Initiatives (AOD) and with their organization’s advising office (where applicable) at least ten days in advance of the event. Failure to register an event at which alcohol is served does not exempt student organizations from the applicability of these rules. Registration of an event with AOD does not relieve the sponsor(s) of the event from complying with applicable codes and/or life safety standards.

2. Approval from UPPD must be obtained for any events, including alcohol-free events, which will have:

   a. More than 400 guests,
   b. Outside area/yard, and/or
   c. Live music outside.

The party organizers must contact UPPD for approval as part of the event registration process with the Office of Alcohol and Other Drug Program Initiatives.

3. Professional security must be hired to check age identification of all attendees and wristbands must be distributed to guests who are of legal age to consume alcohol. Security will be coordinated by AOD or by the venue.

4. Hard alcohol, distilled liquor with an alcohol content of more than 15%, is prohibited at all registered on-campus undergraduate events, except at events with a set guest list of 150 attendees or fewer. A guest list must be supplied to AOD prior to the event. At such events, no more than two types of hard alcohol may be provided, and must be provided in single-shot drinks only. Shots or multiple-shot beverages are prohibited.

5. Service of alcohol at all on-campus registered events must end no later than 1 a.m.; events may continue until 2 a.m.

6. Undergraduate student organizations hosting events at an on-campus space, an off-campus residence, or a third-party venue, at which alcohol is served are responsible for assuring that alcohol is served and consumed lawfully and safely. To comply with this expectation undergraduate student organizations must adhere to the following conditions:

   a. No oversized or common source containers of any sort [including but not limited to kegs, punchbowls, beer balls, party balls] are permitted at any on-campus event;
   b. Only individuals with valid proof of legal drinking age may be served alcohol; alcohol may not be served to any visibly intoxicated person, regardless of age;
   c. Alcohol may be served only from a controlled, designated area by University-approved, sober, trained, of-age bartenders who are unaffiliated with the host organization;
   d. For the duration of registered events, individual members of host organizations may not entertain guests in private areas, including
private bedrooms. Party attendance is restricted to the public area designated for the party. This means that individual members of a host organization may not serve alcohol in their private rooms for the duration of registered events, even if those in the room are of legal drinking age;

e. No University funds may be used to purchase alcohol for any event sponsored by an undergraduate organization;

f. Drinking contests or games of any sort are expressly prohibited.

* The amount of alcohol available at an event should not exceed a ratio of more than four (4) alcoholic drinks (premium beer, table wine, or wine coolers) per of-age person attending the event. One drink = 12 ounces of premium beer (alcohol content of less than 6% by volume) or 45 ounces of (unfortified) table wine or a standard serving size wine cooler (usually 10 ounces).

7. All registered events held at an on-campus space, an off-campus residence, or a third-party venue must have appropriately trained bartenders who are unaffiliated with the host organization and who are at least 21 years of age.

8. At all registered events, whether held at an on-campus space, an off-campus residence, or a third-party venue, the host organization must identify trained, host monitors who may not consume any alcoholic beverages during or immediately prior to the event. There shall be at least one such host monitor for each 30 guests at an on-campus venue or off-campus residence, or one monitor for each 50 guests at an off-campus third-party venue. Sober host monitors must be designated in advance of each event during the event registration process. Sober hosts must remain sober for the duration of the event. Each academic year, organizations hosting events with alcohol must demonstrate to the Director of the Office of Alcohol & Other Drug Program Initiatives that they have a clear understanding of the function of the sober host monitors and the University’s alcohol and other drug policies and that they have participated in training or taken other steps to develop the ability to, wherever possible, (1) handle emergency situations, (2) respond to alcohol-related medical concerns, (3) identify and intervene with overly intoxicated guests, whether or not they require medical treatment, (4) and take any necessary steps to protect the health and safety of guests.

9. University-trained and appointed monitors will assist in ensuring that University policy is followed at all on-campus events.

10. The organizers of events must properly dispose of partially filled and empty alcohol containers at the conclusion of the event.

11. The University supports the enforcement of all University, local, state and federal policies and laws by retail and wholesale distributors of alcohol on or near campus.

12. It is understood that in addition to University policy and state law, many University undergraduate student organizations are subject to policies regarding the possession and consumption of alcohol imposed by a parent organization. If the policies governing an individual organization impose more restrictive regulations regarding alcohol possession and consumption it will be necessary for that organization to follow its parent organization’s policies or risk sanctions. If, however, the parent organization permits the possession or consumption of alcohol where otherwise prohibited by University policy, the organization must comply with the University’s policy, notwithstanding its parent organization’s rules.

C. Rules Governing Alcohol Use at Registered Graduate and Professional Student Social Events

1. Graduate and professional student organizations which intend to sponsor on-campus or off-campus third-party venue events at which it is anticipated alcohol will be served and consumed must have their event plans approved by the appropriate administrators in their school, department, or center.

a. If the event is to be held within facilities managed by the student organization’s school, department, or center, the event plan must be approved by the appropriate administrators within that space. The event must follow all policies for events with alcohol outlined by the administrators overseeing the student organization and venue.

b. If the event is to be held in another on-campus venue, such as a Perelman Quadrangle space or an outdoor area, or at an off-campus third-party venue, the event plan will require additional approval by the appropriate administrator responsible for that space and by the Office of Alcohol and Other Drug Program Initiatives. UPD approval must be obtained for any events taking place outdoors or that will feature live music. The event must follow the rules governing the use of alcohol in that particular space.

2. In order to minimize the risk of alcohol abuse, promote compliance with the law, and encourage students to make responsible decisions about the use of alcohol, the following rules are designed to control the volume and nature of alcohol products available and, ultimately, reduce the risk of alcohol-related incidents that pose a threat to the health and welfare of students and colleagues.

a. Individuals under the age of 21 may not be served alcohol.

b. Service of alcohol must be managed by a licensed bartender.

c. Security must be present at the event or at the entrance to the building in which the event is to be held.

d. Food and non-alcoholic beverages must be provided at events where alcohol is served.

e. Sober hosts affiliated with the host organization must be present at the event to ensure that rules related to the service of alcohol and use of facilities are followed.

f. Drinking games or contests are prohibited.

g. Kegs are prohibited except at University-sponsored, staff-run events.

h. No funds can be exchanged for alcoholic beverages or for admission to events where alcohol is served except where an entity with a liquor license is controlling the service of alcohol.

III. Penn’s Commitment to Health Education and a Supportive Environment

Consistent with its educational mission, the University sponsors programs which help eradicate misperceptions about alcohol use among peers, create opportunities for open, honest dialogue about alcohol use and abuse, and promote awareness of the physical and psychological, social and behavioral effects of alcohol consumption. The University, along with its students, is committed to the creation of
multiple recreational opportunities to help promote a wider variety of social experiences for undergraduates.

1. The University is committed to providing every Penn undergraduate student and parent or guardian with alcohol education from multiple sources when students are pre-freshman, during New Student Orientation, and during the course of the student's undergraduate education.

2. The University is committed to supporting continuous and expanded peer education, to creating opportunities for the integration of alcohol and drug related issues in its undergraduate co-curricular programs and maintaining an effective, coordinated and responsive alcohol abuse prevention plan implemented by the University's Director of the Office of Alcohol & Other Drug Program Initiatives.

3. In order to promote responsible group behavior regarding alcohol use, each student organization having more than 10 members and recognized by Division of Recreation and Intercollegiate Athletics, Vice Provost for University Life, Office of Fraternity and Sorority Life, Student Activities Council, Office of Student Affairs, Graduate and Professional Student Assembly, one of Penn's 12 schools, on-campus residential facilities and/or the College Houses is expected to meet the following requirements:

   Each organization or group that intends to host registered events with alcohol (both on-campus and off-campus third-party venues), must design and implement an individualized plan to demonstrate competency in managing risk related to alcohol consumption. Such a plan would identify the methods through which the organization will control service of alcohol, promote moderate alcohol consumption, and respond to alcohol-related medical concerns. Each organization must specifically identify appropriate strategies for creating an environment in which alcohol use is secondary to the event itself and which emphasizes food and activities not related to alcohol so as to minimize the risk associated with its presence. This plan will be reviewed as part of event registration prior to each event with alcohol.

   Failure to meet this requirement could result in the loss of University recognition and/or support.

4. Organizations not officially recognized by the University are expected to undertake similar efforts to ensure that high risk drinking and substance abuse are appropriately addressed.

IV. Consequences for Policy Violations

All members of the University community and all University organizations are expected to comply with applicable local, state and federal laws regarding the possession, use or sale of alcohol or other drugs, whether on or off-campus, and are expected to comply with all University regulations regarding alcohol possession or use. Individuals and organizations which violate this policy may be subject to appropriate disciplinary action.

1. Any student or employee who violates University policies or applicable law may be subject to disciplinary actions and/or referral for prosecution. Disciplinary actions for students may include, but are not limited to, sanctions by the Office of College Houses & Academic Services and the Office of Residential Services, sanctions as set forth in the Charter of the University of Pennsylvania Student Disciplinary System, procedures outlined in the Fraternity and Sorority Advisory Board Judicial Charter, and other formal University consequences, as well as possible civil and criminal penalties. The severity of the sanctions will depend, in part, on whether there have been repeated violations and on the seriousness of the misconduct. Faculty, staff, and other non-students found to be in violation of this policy or applicable law may be subject to University disciplinary procedures which may impose sanctions up to and including termination of employment and/or referral for prosecution. The University also supports enforcement, by applicable law enforcement agencies, of all local, state and federal laws.

2. Along with disciplinary consequences, the University is committed to providing resources and education as appropriate to assist members of the community.

V. Resources in the Penn Community for Information and Counseling Related to Alcohol and Other Drug Use

The University provides services and resources for community members who experience alcohol and/or other drug related difficulties. The following programs are available for students, staff, and faculty:

1. Office of Alcohol & Other Drug Program Initiatives (https://www.vpul.upenn.edu/alcohol)
The Office of Alcohol & Other Drug Program Initiatives is responsible for ensuring the efficient and productive coordination of all relevant, alcohol-related campus services. Assistance is available by calling (215) 573-3525.

2. Employee Assistance Program (https://www.hr.upenn.edu/PennHR/wellness-worklife/counseling-and-employee-assistance-program)
The Employee Assistance Program is a free, confidential one-on-one counseling service provided by the University for Penn faculty and staff and their family members. This program can offer assistance with serious life issues 24 hours a day, seven days a week by calling 1-888-321-4433. Services are available at over 450 locations throughout the Delaware Valley, including an on-campus office at 36th and Market Streets.

3. Additional Resources
The following offices provide information, education and services related to alcohol and other drug concerns. All services are provided free of charge and are available to students, faculty and staff at the University of Pennsylvania. If you are concerned about your own or someone else's use of substances, please contact one of these offices.

   Office of Affirmative Action and Equal Opportunity Programs (http://www.upenn.edu/affirm-action) (Faculty, Staff, & Students)
   Franklin Building, 4th Floor, Room 421
   3451 Walnut Street

1. The amount of alcohol available at an event should not exceed a ratio of more than four (4) alcoholic drinks (premium beer, table wine, or wine coolers) per of-age person attending the event. One drink = 12 ounces of premium beer (alcohol content of less than 6% by volume) or 4-5 ounces of (unfortified) table wine or a standard serving size wine cooler (usually 10 ounces).

Appendix
I. Legal Sanctions
The following is a brief review of the legal sanctions under local, state, and federal law for the unlawful possession or distribution of illicit drugs and alcohol:

A. Drugs

1. The Controlled Substance, Drug, Device and Cosmetic Act, 35 Pa. C.S.A. 780-101 et seq., sets up five schedules of controlled substances based on dangerousness and medical uses. It prohibits the manufacture, distribution, sale or acquisition by misrepresentation or forgery of controlled substances except in accordance with the Act as well as the known possession of controlled substances unlawfully acquired. Penalties for first-time violators of the Act range from thirty days imprisonment, $500 fine, or both for possession or distribution of a small amount of marijuana or hashish, not for sale, to fifteen years or $250,000 or both for the manufacture or delivery of a Schedule I or II narcotic. A person over eighteen years of age who is convicted for violating The Controlled Substance, Drug, Device and Cosmetic Act, shall be sentenced to a minimum of at least one year total confinement if the delivery or possession with intent to deliver of the controlled substance was to a minor. If the offense is committed within 1,000 feet of the real property on which a university is located, the person shall be sentenced to an additional minimum sentence of at least two years total confinement.

2. The Pharmacy Act of 1961, 63 Pa. C.S.A. 390-8 makes it unlawful to procure or attempt to procure drugs by fraud, deceit, misrepresentation or subterfuge or by forgery or alteration of a prescription. The first offense is a misdemeanor, with a maximum penalty of one year's imprisonment, a $5,000 fine, or both.

3. The Vehicle Code, 75 Pa. C.S.A. 3101 et seq., which was amended effective July 1, 1977, prohibits driving under the influence of alcohol or a controlled substance, or both, if the driver thereby is rendered incapable of safe driving. A police officer is empowered to arrest without a warrant any person whom he or she has probable cause to believe has committed a violation, even though the officer may not have been present when the violation was committed. A person so arrested is deemed to have consented to a test of breath or blood for the purpose of determining alcoholic content, and if a violation is found it carries the penalties of a misdemeanor of the second degree, which includes imprisonment for a maximum of thirty days.

4. Federal drug laws, the Controlled Substances Act, 21 U.S.C. 801 et seq., are similar to the Pennsylvania Controlled Substance, Drug, Device, and Cosmetic Act, but contain, for the most part, more severe penalties. Schedules of controlled substance are established, and it is made unlawful to knowingly or intentionally to manufacture, distribute, dispense, or possess with intent to distribute or dispense a controlled substance. If the quantity of controlled substance is large (e.g. 1,000 kg of a mixture or substance containing marijuana), the maximum penalties are life imprisonment, a $4,000,000 fine, or both. Lesser quantities of a controlled substance (e.g. 100 kg of a mixture or substance containing marijuana) result in maximum penalties of life imprisonment, a $2,000,000 fine, or both. The distribution of small amounts of marijuana for no remuneration or simple possession of a controlled substance carries a maximum of one year's imprisonment, a $5,000 fine, or both, with the penalties for the second offense doubling. Probation without conviction is possible for first offenders. Distribution to persons under the age of twenty-one by persons eighteen or older carries double or triple penalties. Double penalties also apply to the distribution or manufacture of a controlled substance in or on or within 1,000 feet of the property of a school or college.

5. Students who have been convicted under state or federal law involving the possession or sale of a controlled substance, are ineligible for federal student aid for specific periods (ranging from one year to an indefinite period depending on the nature of the offense and whether the student is a repeat offender).

B. Alcohol

The Pennsylvania Liquor Code, 47 Pa. C.S.A. 1-101 et seq., controls the possession and sale of alcoholic beverages within the Commonwealth. The Code as well as portions of the Pennsylvania Statutes pertaining to crimes and offenses involving minors, 18 Pa. C.S.A. 6307 et seq., provide the following:

1. It is a summary offense for a person under the age of twenty-one to attempt to purchase, consume, possess or knowingly and intentionally transport any liquor or malt or brewed beverages. Penalty for a first offense is suspension of driving privileges for 90 days, a fine up to $500 and imprisonment for up to 90 days; for a second offense, suspension of driving privileges for one year, a fine up to $1,000, and imprisonment for up to one year; for subsequent offenses, suspension of driving privileges for two years, a fine up to $1,000 and imprisonment for up to one year. Multiple sentences involving suspension of driving privileges must be served consecutively.

2. It is a crime intentionally and knowingly to sell or intentionally and knowingly to furnish or to purchase with the intent to sell or furnish, any liquor or malt or brewed beverages to any minor (under the age of twenty-one). "Furnish" means to supply, give or provide to, or allow a minor to possess on premises or property owned or controlled by the person charged. Penalty for a first violation is
$1,000; $2,500 for each subsequent violation; imprisonment for up to one year for any violation.

3. It is a crime for any person under twenty-one years of age to possess an identification card falsely identifying that person as being twenty-one years of age or older, or to obtain or attempt to obtain liquor or malt or brewed beverages by using a false identification card. Penalties are stated in (2) above.

4. It is a crime intentionally, knowingly or recklessly to manufacture, make, alter, sell or attempt to sell an identification card falsely representing the identity, birth date, or age of another. Minimum fine is $1,000 for first violation; $2,500 for subsequent violations; imprisonment for up to one year for any violation.

5. It is a crime to misrepresent one’s age knowingly and falsely to obtain liquor or malt or brewed beverages. Penalties are as stated in (2) above.

6. It is a crime knowingly, willfully and falsely to represent that another is of legal age to obtain liquor or malt or brewed beverages. Penalty is a minimum fine of $300 and imprisonment for up to one year.

7. It is a crime to hire, request or induce any minor to purchase liquor or malt or beverages. Penalty is a minimum fine of $300 and imprisonment for up to one year.

8. Sales without a license or purchases from an unlicensed source of liquor or malt or brewed beverages are prohibited.

9. It is unlawful to possess or transport liquor or alcohol within the Commonwealth unless it has been purchased from a State Store or in accordance with Liquor Control Board regulations.

10. The use in any advertisement of alcoholic beverages of any subject matter, language or slogan directed to minors to promote consumption of alcoholic beverages is prohibited.

11. The Pennsylvania Liquor Code prohibits advertisements of alcoholic beverages, either directly or indirectly, in any booklet, program, book, yearbook, magazine, newspaper, periodical, brochure, circular, or other similar publication, published by, for, or on behalf of any educational institution. In Pitt News v. Pappert, 379 F.3d 96 (2004) this prohibition was constricted to restrict constitutionally protected speech and the current applicability of these Liquor Code prohibitions is limited. Please note that University policies regarding advertisement of alcoholic beverages in University publications, which are more restrictive than those contained in the Liquor Code, govern.

The University will cooperate with the appropriate law enforcement authorities for violations of any of the above-mentioned laws by an employee in the workplace or student.

II. Health Risks

Consistent with its mission to promote wellness and reduce the harm of alcohol and other drug use, the University is committed to providing education on the health risks associated with alcohol and other drug use, and providing counseling and support services to students. The list below is not a complete list of substances that are regulated or illegal, or that have health risks. More information can be found on the website of the Office of Alcohol and Other Drug Program Initiatives (http://www.vpul.upenn.edu/alcohol).

Alcohol. Alcohol consumption causes a number of changes in behavior and physiology. Even low doses significantly impair judgment, coordination, and abstract mental functioning. Statistics show that alcohol use is involved in a majority of violent behaviors on college campuses, including acts of violence, vandalism, and incidents of drinking and driving. Continued abuse may lead to alcohol use disorder, which can lead to permanent damage to vital organs and deterioration of a healthy lifestyle.

Amphetamines. Amphetamines can cause a rapid or irregular heartbeat, tremors, loss of coordination, collapse, and death. Use can lead to erratic behavior.

Cannabis (Marijuana, Hashish). The use of marijuana may impair or reduce short term memory and comprehension, alter sense of time, and reduce coordination and energy level. Frequent users often have a lowered immune system and an increased risk of lung cancer. The active ingredient in marijuana, THC, is stored in the fatty tissues of the brain and reproductive system for a minimum of 28 to 30 days.

Cocaine/ Crack. The immediate effects of cocaine use include dilated pupils and elevated blood pressure, heart rate, respiratory rate, and body temperature, followed by depression. Crack, or freebase rock cocaine, is extremely addictive and can cause delirium, hallucinations, blurred vision, severe chest pain, muscle spasms, convulsions, and even death.

Hallucinogens. Lysergic acid (LSD), mescaline, and psilocybin cause illusions and hallucinations. The user may experience panic, confusion, suspicion, anxiety, and loss of control. Delayed effects, or flashbacks, can occur even when use has ceased. Phencyclidine (PCP) affects the section of the brain that controls the intellect and keeps instincts in check. Because the drug blocks pain receptors, violent PCP episodes may result in self-inflicted injuries.

Updated March 20, 2018

Antihazing Regulations

The University of Pennsylvania is a scholarly community. Each member of our community is expected to respect the rights of others to participate in the academic and social life of the University. Hazing is inconsistent with the goals and purposes of the University and is explicitly forbidden. The following Regulations apply to all University students and student groups, irrespective of whether those groups are recognized, registered, or identified as being affiliated with the University.

I. Hazing: Definition

A. For purposes of these Regulations, and consistent with the Anti-Hazing Law of Pennsylvania, hazing means any action or situation (1) which recklessly or intentionally endangers the mental or physical health or safety of a student or (2) which willfully destroys or removes public or private property for the purpose of initiation or admission into or affiliation with, or as a condition for continued membership in, an organization operating under the sanction of, or recognized, registered, or identified by the University including, without limitation, fraternities and sororities ("organization"). For purposes of these Regulations, any activity as described herein upon which the initiation or admission into or affiliation with or continued membership in an organization is directly or indirectly conditioned, regardless of whether that organization is recognized by or registered with the University, shall be presumed to be
"forced" activity, the willingness of an individual to participate in such activity notwithstanding.

B. Examples of types of prohibited behavior follow. These examples are merely illustrative of specific forbidden practices and are not intended to be all inclusive.

1. Any brutality of a physical nature, such as whipping, beating, branding, forced calisthenics or exposure to the elements.

2. Forced consumption of any food, liquor, drug, or other substance, or any other forced physical activity which could adversely affect the physical health and safety of the individual.

3. Any activity which would subject the individual to extreme mental stress, such as sleep deprivation, forced exclusion from social contact, forced conduct which could result in extreme embarrassment, or any other forced activity which could adversely affect the mental health or dignity of the individual.

4. Any willful destruction or removal of public or private property.

5. Placing a member or pledge in a situation of actual or simulated peril or jeopardy.

6. Undignified stunts or methods, either private or public and/or any ordeal that is in any respect indecent or shocking to moral or religious scruples or sensibilities.

C. There are time and place limitations on all organization activities related to new member orientation, pledging, and initiation. For purposes of this section, orientation or pledging activities include anything expected or required of an applicant or new member in an organization.

1. There shall be no orientation or pledging activities between midnight and 8:00 a.m. Sunday through Thursday. This rule will be strictly enforced.

2. Orientation and pledging activities shall not occupy more than ten hours per week, excluding study hours and community service.

3. Orientation or pledging activities must not disrupt educational and other activities of the University community nor damage University property.

Fraternity and sorority pledging activities must follow these additional limitations:

1. The length of pledging shall be limited to six weeks according to a calendar set by the Office of Fraternity and Sorority Life.

2. Pledging practices such as raids, treasure hunts and scavenger are prohibited. The College Houses, in particular, are off limits to the pledge activities of organizations.

Pledges may not travel as part of pledging activities. The Director of Fraternity and Sorority Life must approve in writing any exceptions. Approval may be granted only when the trip has been sanctioned by a national office (or national/ regional designee) of the fraternity or sorority, when adequate funds, transportation and supervision are provided, and when the purpose of the trip is of a constructive nature.

II. Penalties

Penalties for engaging in hazing activities include University sanctions against individuals and organizations, and criminal sanctions under state law.

A. Individuals

All students, whether or not they are affiliated with an organization, are governed by the Guidelines on Open Expression and the Code of Conduct.

Infractions of the Anti-Hazing Regulations are subject to sanctions described in the Charter of the Student Disciplinary System. These sanctions include the following: warning, reprimand, fine, restitution, disciplinary probation for a specified period, withdrawal of privileges, indefinite probation (i.e., probation whenever and as long as the respondent is a full- or part-time student at the University), term suspension (ordinarily not to exceed two years), indefinite suspension with no automatic right of readmission, or expulsion.

B. Organizations

1. All organizations are subject to sanctions including loss of University facility use privileges, loss of Student Activities Council recognition and funding, and referral to the Office of Student Conduct.

2. In addition, all fraternities and sororities are governed by the University policy entitled "Recognizing and Governance of Undergraduate Social Fraternities and Sororities" (the "Recognition Policy") (p. 1567). For infractions of the Anti-Hazing Regulations above, the fraternity or sorority is subject to sanctions as set forth in the Recognition Policy. These sanctions include administrative warning, chapter probation, suspension of University recognition, and withdrawal of University recognition. The national fraternity of any chapter found to have violated these Anti-Hazing Regulations will be notified.

C. Criminal and Civil Liability

In addition to the sanctions described above, a student or organization may be subject to civil liability or to criminal liability under Pennsylvania’s Anti-Hazing or other laws.

Updated March 20, 2018

Bicycle Policy

Preamble

The University recognizes that concerns exist within the University community regarding the safe use of bicycles on and about the campus. Pedestrians are concerned that they must be overly vigilant to avoid physical encounters with cyclists, particularly in heavy traffic areas. They argue that, to prevent a possible injury, walking a short distance should not be a hardship on the cyclist. Many University community members have concerns about bicycles impeding the free ingress/egress of buildings, especially in the event of an emergency. Additionally, some experience extreme difficulty using the stairs when the handrails are not accessible. Many are concerned about the disorderly appearance of campus when bicycles are secured to trees, trip rails and other inappropriate fixed objects.

Cyclists have legitimate concerns of their own. Their concerns are that regulatory reaction by the University might impair their functional use of bicycles for transportation to and about campus, that there are an insufficient number of reliable bicycle racks available, and that they are victimized by the theft of their bicycles or component parts.

In order to address the concerns of the entire community, the University has adopted the following bicycle use policy which, we believe, balances and provides for the needs of all concerned parties. Enforcement of the policy is authorized by the Pennsylvania Vehicle Code, the Philadelphia

2018-19 Catalog | Generated 02/28/19
Code and the Philadelphia Fire Code. However, like most policies, it relies on the thoughtfulness, cooperation and consideration of the entire University community.

I. Purpose
1. To enhance pedestrian and rider safety within the inner campus during peak traffic periods.
2. To provide for the safe and free ingress/egress to and from all the University buildings and facilities.
3. To reduce bicycle theft losses.
4. To identify, establish and publish written guidelines and regulations to facilitate the movement of bicycle traffic to and about the campus while safeguarding the needs of the community population at large.

II. Scope
This policy applies to all University faculty, staff and students who own, operate or store any pedal drive, human powered vehicles, on or about the building, grounds or premises of the University of Pennsylvania, West Philadelphia campus.

III. Policy defined
A. Registration
The University recommends that every bicycle owned, operated or stored on or about the campus, should be registered with the University Division of Public Safety. The advantages of bicycle registration are:

1. Police will have a quick means to establish the ownership of a bicycle that has been removed from your control. Return of the property, and if appropriate, the arrest of a thief or receiver of stolen property will be greatly enhanced.
2. If your bicycle is lost or stolen the University Police (UPPD) will verify the existence of that bicycle to your insurance carrier if requested. If the bicycle is not registered UPPD will take your report of lost or stolen property; however, no verification of the prior existence of that bicycle, as your property, can be affixed to that report when forwarded to your insurance carrier.
3. Bicycles remaining in UPPD custody without identification of ownership are periodically sold at public auction. Dates, times, and places of registration for bicycles will be widely advertised throughout each academic year with periodic reminders as may be appropriate with changes in the University population such as the beginning of the spring semester and the summer sessions.

B. Synopsis of Pennsylvania and Philadelphia Law
1. Human-powered, pedal cycles are vehicles according to the Pennsylvania Vehicle Code.
2. Vehicles, as indicated in #1 above are subject to the provisions of the vehicle code when operated on the highways and may not stop, stand or park where prohibited or where controlled by official traffic control devices to include firelanes, handicapped zones, etc.
3. The Philadelphia Code prohibits any person above the age of 12 from riding a cycle on any sidewalk or pedestrian pathway in a business district. The Penn Campus area meets the definition of a business district.
4. A person walking a bicycle is considered a pedestrian.

5. The Philadelphia Fire Code requires clear passage from all exits and stairways at all times. No obstruction shall be permitted.
6. University Police are authorized to enforce both the Pennsylvania Vehicle Code and City of Philadelphia Ordinances.

C. Riding restricted by time or place
In order to provide the opportunity for the accident-free passage of both pedestrians and cyclists the following riding restrictions are instituted:

1. Cyclists can ride their vehicles on Locust, Smith, and Hamilton Walks only between the hours of 5:30 p.m. and 8:30 a.m. If heavy pedestrian traffic occurs it is expected that riders will dismount in deference to pedestrians.
2. Cyclists will walk their vehicles on Locust, Smith, and Hamilton Walks between the hours of 8:30 a.m. and 5:30 p.m.
3. The ride/walk provisions of 1 and 2 above, also apply to the pedestrian feeders to Locust Walk from Walnut and Spruce streets via 36th and 37th streets.
4. University Police on bicycles will be exempt from the above described restrictions in order to provide enforcement, efficient patrol service and emergency response. Police, consistent with their specialized training and the guidance of their supervisors, will operate bicycles in a responsible manner.

D. Parking and Securing of Bicycles
In order to reduce the opportunity for theft the University has significantly increased the number of structurally sound bicycle security racks distributed at convenient locations throughout inner campus. University Police are particularly attentive to these concentrations of security racks during their patrols.

1. Bicycles should be secured to a bike rack every time they must be left unattended on campus, even if it is to be left for a moment.
2. Bicycles shall not be locked, secured, or otherwise parked to handrails, fences, trees, trip rails, or to, or in any other location that, in any manner, obscures the free ingress/egress of any building, stairway, pathway, or in such a manner as to interfere with the access to facilities as required by the U.S. Americans with Disabilities Act.

3. Locking Devices and Methods.
   a. The U-shaped Kryptonite-type bicycle locks appear to be among the best type of locking devices.
   b. When physically possible secure the main frame to the security rack.
   c. If wheels are of the quick-release type, attempt to secure lock through the security rack, the bike frame and the wheel. If necessary, use an additional lock with a long shackle or a cable and lock to secure all the parts together.
   d. If the bicycle is equipped with a quick-release seat adjustment, consider removing the seat and taking it with you.
   e. Never secure a bicycle to an object which can, itself, be disassembled, cut or removed.
f. Use the bicycle security racks on the inner campus.

E. Enforcement

In order to preserve the intent and the integrity of any policy there must always be a means to ensure compliance. The University's Division of Public Safety Police Department is charged with enforcement action.

1. Parking and Securing of Bicycles. Owners or operators of bicycles parked in violation of Para. D, section 2, of this policy will be subject to the following sanctions:

   a. UPPD officers will confiscate the bicycle by removal to their headquarters or by adding a UPPD lock.

   b. A confiscated bicycle will be released upon proof of ownership and the payment of a $5 fee. For a second confiscation in the same academic year (September 1 to August 31), a fee of $15 will apply.

   c. Third and subsequent confiscations in the same academic year will generate a report to the appropriate University authority with a request for sanction(s). A $25 fee will apply.

   d. A pattern of noncompliance extending over multiple academic years will be addressed by the Commissioner of the Division of Public Safety, with those University officials deemed most appropriate to bring about compliance.

   e. When the bicycle is also parked in violation of the Vehicle Code or City Ordinance the officer may, at his/her discretion, issue a Parking Violation Report or a Traffic Citation each of which requires payment of a fine and costs to civil authorities.

2. Operation of Bicycles When/Where Prohibited

   a. Cycles operated in violation of Para. C, sections 1, 2, & 3, of this policy qualify under the Vehicle Code for issuance of a Traffic Citation.

   b. Violation as in a. immediately above, could also qualify for issuance of a Non-Traffic Criminal Citation under City Ordinances. Only one of these can be issued for the same offense. Normally the Traffic Citation will be used.

   c. In addition, disregard for traffic control devices, operation of the bicycle in such a manner as to be considered reckless, or to reasonably be considered to have caused damage or injury by negligent operation are some of the more common provisions of the Pennsylvania Vehicle Code which will also qualify for the issuance of a Traffic Citation.

   d. All citations require payment of a fine and costs to civil authorities upon conviction.

Appropriate authorities are:

1. JIO for undergraduate students.
2. Dean of a School for graduate students.
3. Office of the Provost for faculty.
4. Department Director w/copy to Vice President of Human Resources for employees.

Canvassing

Canvassing or solicitation for funds, sales, or subscriptions in University buildings is prohibited unless written permission is granted by the building administrator. Soliciting or selling goods and services in areas of the residential buildings not designated for such purposes is not permitted. Permission to raise funds or conduct sales in designated areas of the campus to support the activities of student groups may be granted by the Office of Student Life Activities and Facilities in accordance with the Campus Vending Policy.

Charter of the University of Pennsylvania Student Disciplinary System

Preamble

In response to increasing concern about sexual assault and its consequences, the U.S. Department of Education, Office for Civil Rights (OCR) issued a new "guidance" document concerning compliance with Title IX of the Education Amendments of 1972. Title IX prohibits discrimination on the basis of sex in educational programs, including sexual misconduct. In this context, the Office of Student Conduct and the Office of the General Counsel, working closely with other University student affairs professionals, prepared amendments to the Charter of the Student Disciplinary System. As required by the Charter, the amendments have been approved by the Council of Deans, the Faculty Senate and the Provost and are in effect as of April 10, 2012.

Changes

The significant points of OCR's guidance include the following:

- Once a school knows or reasonably should know of possible sexual misconduct, it must take immediate and appropriate action to investigate or otherwise determine what occurred.
- If sexual misconduct has occurred, a school must take prompt and effective steps to end the sexual violence, prevent its recurrence, and address its effects, whether or not the sexual violence is the subject of criminal investigation.
- A school must take steps to protect the complainant as necessary, including interim steps taken prior to the final outcome of the investigation.
- A school must provide a procedure for students to file complaints of sex discrimination, including complaints of sexual misconduct. These procedures must include an equal opportunity for both parties to present witnesses and other evidence and the same appeal rights.
- A school's procedures must use the preponderance of the evidence standard to resolve complaints of sexual misconduct.1

With the guidance in mind, we developed some special procedures for handling sexual misconduct cases and added a section in the Charter describing these. For the full text of these amendments, please refer to Section II.J. (p. 1) of the amended Charter. The amendments also include other minor clean-up revisions, such as correction of scrivener's errors.
The Charter of the Student Disciplinary System sets forth the procedures under which alleged violations of the University’s Code of Student Conduct, Code of Academic Integrity, and other policies, rules, and regulations are resolved.

The Code of Student Conduct sets forth the responsibility of all students at the University of Pennsylvania to exhibit responsible behavior regardless of time or place. This responsibility includes, but is not limited to, the obligation to comply with all provisions of the Code of Student Conduct; with all other policies and regulations of the University, its Schools, and its Departments; and with local, state, and federal laws.

The Code of Academic Integrity, and similar codes adopted by some of the University’s Schools, set forth the standards of integrity and honesty that should be adhered to in all student academic activities at the University of Pennsylvania.

Violations of the Code of Academic Integrity or School regulations are also violations of the University’s Code of Student Conduct. Further, violations of local, state, and federal laws may be violations of the Code of Student Conduct. Therefore, throughout the Charter references to violation(s) or alleged violation(s) of the Code of Student Conduct include violations of these other policies and laws.

The University disciplinary process at Penn may involve the following stages:

- Bringing a Complaint to the Office of Student Conduct
- Resolving a Complaint by Mediation
- Investigating a Complaint
- Filing Charges by the University against a Student
- Resolving Charges by Voluntary Agreement to Sanctions
- Resolving Charges by Disciplinary Hearing
- Appealing the Decision of a Hearing Panel
- Imposing Sanctions on a Student
- Fulfilling Sanctions Imposed by the University

Under the University’s Student Disciplinary System, charges are brought on behalf of the University, not on behalf of the complainant(s) who brought the matter to the Office of Student Conduct (OSC) or the party(ies) who may have been directly or indirectly harmed by the alleged violation of University regulations. Therefore, complainants who wish to maintain greater control over their complaints, such as is sometimes appropriate in cases involving serious cultural or communicative differences, or those who wish merely to create a record of their complaint without necessarily beginning a formal disciplinary process, may wish to bring their complaint to other University resource offices, particularly the Office of the Ombudsman, which are equipped to handle cases in this manner. Such offices may, when appropriate and helpful in an individual case, consult with relevant campus communities or other resource offices in the process of resolving a complaint and are able to work closely with both complainants and respondents in resolving such matters. If such efforts fail to arrive at a satisfactory resolution, the complainant still has the option of bringing a complaint to the OSC.

Through the University Honor Council, students play a major role in the Student Disciplinary System by advising the Director of the Office of Student Conduct and the Provost on matters of policy and the operation of the System and by sitting as members of disciplinary hearing panels. Students also serve as advisors and mediators within the System.

The System places great emphasis on the mediation of disputes, as is appropriate in a University Community.

I. The Student Disciplinary System

A. Statement of Purpose

The purpose of the Student Disciplinary System is to further the educational mission of the University of Pennsylvania by providing a fair and effective mechanism for investigating and resolving disputes involving students and alleged violations by students of the University’s rules, regulations, and policies.

B. Jurisdiction of the Student Disciplinary System

1. Through the Office of Student Conduct (OSC), the Student Disciplinary System handles complaints from members of the University community—trustees, faculty, staff or registered students—about alleged violations of the Code of Student Conduct, the Code of Academic Integrity, or other University policies. Persons outside the University community may also bring complaints of alleged violations of the Code of Student Conduct and other University policies to OSC. The Director of OSC will make a case-by-case determination of whether it is appropriate to handle such complaints under the Student Disciplinary System. Among other factors, the Director will consider whether the alleged conduct affects a substantial University interest or whether the conduct may present a threat or danger to the community. When OSC undertakes to handle such complaints, the procedures described in this Charter will apply.

2. Except as provided below, the Student Disciplinary System has jurisdiction in all disciplinary matters arising under the regulations of the University against registered students, whether they be undergraduate, graduate or professional students, or others, including students who are on unexpired leaves of absence. Approved or unapproved absence from the University is not a bar to the conduct or completion of disciplinary proceedings under this Charter.

3. In general, a student is any individual who has been admitted, matriculated, enrolled, or registered in any academic program or other educational activity provided by the Trustees of the University of Pennsylvania.

4. The Student Disciplinary System does not handle complaints against graduate and professional students when such cases lie within the jurisdiction of a hearing board or other disciplinary body established by the School of the University in which the student is enrolled. When such a School-based disciplinary procedure exists, it should be the recourse of first resort for the resolution of an alleged violation of University or School regulations, unless the OSC decides, in consultation with the Provost, that it is appropriate in light of the circumstances for the Student Disciplinary System to handle the matter. Schools with such procedures are encouraged to refer disciplinary matters (excluding academic integrity matters) to the University Mediation Program whenever appropriate. When an alleged violation of University regulations by a graduate or professional student is not within the jurisdiction of a disciplinary system established by the student’s School, the Student Disciplinary System will have jurisdiction over the matter.

5. The Student Disciplinary System does not handle alleged violations of the University’s parking regulations.
6. Alleged violations of the University’s Residential Living policies and contracts are ordinarily handled under the procedures of the Department of Residential Living but, if serious enough to warrant sanctions beyond those which the Department of Residential Living is authorized to impose, may be referred by the Director of Residential Living to the OSC. The fact that proceedings have been held and sanctions imposed under Residential Living policies does not preclude proceedings under this Charter.

7. The Director of the Office of Student Conduct decides all questions of jurisdiction of the Student Disciplinary System arising under this Charter, consulting with the Provost (or designee) and with the University’s General Counsel when necessary. When appropriate, the OSC may refer a complaint to another University office or disciplinary process.

C. General Principles of the Disciplinary System

1. The University’s Student Disciplinary System is not a legal system, and University disciplinary proceedings are not civil or criminal litigation. Thus, they operate under different rules, standards, and procedures, and seek to achieve ends different from criminal or civil proceedings.

2. Any member of the University community may bring a complaint about student conduct or academic integrity to the attention of the Office of Student Conduct. Doing so in no way limits a complainant’s rights or obligations to bring such matters to the attention of other University offices, officers, or resources, including the Office of the Ombudsman and appropriate Deans, or to seek recourse outside the University through civil or criminal legal proceedings.

3. In all cases, the University reserves the right to determine how to process a disciplinary complaint. Once a complaint is brought to the attention of the Office of Student Conduct, the OSC, on behalf of the University, will decide how the complaint will be handled, including whether disciplinary charges should be brought against a student.

4. Complainants in sexual misconduct cases have rights and responsibilities similar to respondents under this Charter. In addition, certain special procedures apply in sexual misconduct cases (see section II.J. (p. )).

5. Except as otherwise specified in this Charter, when appropriate and if all parties agree, a matter brought to the OSC may be resolved through mediation and will not result in charges or disciplinary hearings. Because of their seriousness within an academic community, alleged violations of the Code of Academic Integrity will not be referred for mediation. Thus, except in academic integrity matters and matters that warrant treatment as serious violations of the Code of Student Conduct or other University policies, the initial response by the OSC may be to refer the complainant and respondent to the University’s Mediation Program. If mediation fails or is inappropriate, the OSC will begin the more formal disciplinary processes outlined in this Charter.

6. All members of the University community are required to cooperate with the Student Disciplinary System. Those individuals who may be interviewed or called as witnesses in a disciplinary matter (including respondents and complainants) are obligated to provide honest and complete statements to the OSC and to the Hearing Panel. While in some circumstances a respondent may choose not to answer questions or provide information because of pending civil claims or criminal charges arising out of the same or other events, the respondent’s decision not to answer questions or provide information will not be a reason to delay or defer an investigation or proceedings under this Charter. A student who fails, without good cause, to appear for a hearing after receiving notice, or to cooperate with the investigation conducted by the OSC, may be charged with a violation of the Code of Student Conduct. Repeated disruption of disciplinary hearings or the disciplinary process by a student or the student’s advisor may result in charges against the student of non-cooperation with the Student Disciplinary System or exclusion of the student or advisor from disciplinary proceedings, including disciplinary hearings. Such exclusion is not a bar to the completion of disciplinary proceedings involving that student.

D. Organization of the Disciplinary System

1. Office of Student Conduct
The Office of Student Conduct is the central office responsible for resolving alleged violations of University policies by students. The duties of the OSC include determining whether complaints warrant action by the OSC, referring complaints for mediation or resolution by other University offices, investigating complaints, determining whether to charge a student with violations of University policies, resolving complaints by voluntary agreements to sanctions, bringing charges of violations to a disciplinary hearing, presenting evidence at hearings, monitoring and enforcing the fulfillment of sanctions imposed pursuant to voluntary agreements or after disciplinary hearings, maintaining records of all disciplinary matters, providing administrative support for all aspects of the disciplinary process (including hearings), and preparing reports and compiling statistics.

2. University Mediation Program
The University Mediation Program (UMP) may use the volunteer services of faculty, students, and staff members who have been trained in mediation and dispute resolution and may also use resources available in the University’s Law School, in University resource offices such as the Office of the Ombudsman, or outside the University.

3. University Honor Council
   a. The University Honor Council (UHC) provides independent advice to the Provost and the OSC regarding the operation of the Student Disciplinary System in the area of academic integrity and student conduct, the general handling of academic integrity and conduct violations, appropriate sanctions for various types of academic integrity and conduct violations, and the effectiveness and implementation of the University’s Code of Student Conduct and Code of Academic Integrity. Members of the UHC also sit on Disciplinary Hearing Panels. The UHC meets regularly with the Director of the Office of Student Conduct and may also discuss academic integrity and conduct issues with appropriate administrators and student, faculty, or administrative groups or committees. In addition, the UHC initiates and participates in educational programs about academic integrity and student conduct and works to help students understand and respect the academic and behavioral standards of the University community.
   b. The UHC consists of a minimum of 13 undergraduate students, chosen by current members of the UHC. The UHC is encouraged to ensure that nominees represent a broad cross-section of the undergraduate student body. The UHC selects a chair from among its members by a majority vote of the current members. Faculty members and graduate students designated by the Faculty Senate or Graduate and Professional Students Assembly (GAPSA) to sit on Disciplinary Hearing Panels may participate in the work of the UHC if the UHC so desires.

4. Disciplinary Hearing Officer
Every two years, the Provost, after consultation with the UHC, and the chairs of the Faculty Senate, will appoint a tenured member of the
Standing Faculty of the University of Pennsylvania as Disciplinary Hearing Officer (DHO), preferably from among those faculty who have experience with the Student Disciplinary System. The DHO (or designee) selects members to serve on Disciplinary Hearing Panels and determines the time, location, etc., of hearings. The DHO presides over all disciplinary hearings held under this Charter. The DHO is responsible for overseeing the procedural integrity of disciplinary hearings. The DHO will, for example: consider and resolve pre-hearing challenges to the authority or procedures of a Disciplinary Hearing Panel; rule on all disqualification requests and objections to individual panel members; assist parties to adhere to the basic principles of fairness prior to, during, and subsequent to disciplinary proceedings; and may consult at any time with students, faculty members, the University's General Counsel or others about procedural issues. The DHO also participates in the training of prospective faculty and student members of Disciplinary Hearing Panels. The DHO serves and may be reappointed at the discretion of the Provost, but his or her removal or reappointment may not occur without prior consultation with the UHC and the chairs of the Faculty Senate.

5. Disciplinary Appellate Officer
Every two years, the Provost, after consultation with the UHC, and the chairs of the Faculty Senate, will appoint a tenured member of the Standing Faculty of the University of Pennsylvania as a Disciplinary Appellate Officer (DAO), preferably from among faculty who have experience with the Student Disciplinary System. The DAO decides appeals of findings and recommended sanctions made by Disciplinary Hearing Panels based on the record of such proceedings and written submissions from the relevant parties. The DAO serves and may be reappointed at the discretion of the Provost, but his or her removal or reappointment may not occur without prior consultation with the UHC, and the chairs of the Faculty Senate.

6. Disciplinary Hearing Panels
a. Disciplinary matters are heard by Disciplinary Hearing Panels of five members each. The Disciplinary Hearing Officer (or designee) randomly selects the undergraduate members of Disciplinary Hearing Panels from the membership of the University Honor Council for hearings involving undergraduate respondents. For hearings involving graduate students, the Disciplinary Hearing Officer (or designee) randomly selects the graduate and professional student members of Hearing Panels from lists of 13 or more graduate and professional students provided annually to the DHO by GAPSA. The Disciplinary Hearing Officer (or designee) randomly selects the faculty members of Hearing Panels from lists of 13 or more faculty provided annually to the DHO by the Faculty Senate Executive Committee. GAPSA and the Faculty Senate Executive Committee are encouraged to ensure that nominees represent a broad cross-section of graduate and professional students and faculty, respectively.

b. In all disciplinary matters, except those involving alleged violations of the Code of Academic Integrity, the Disciplinary Hearing Panel is composed of two faculty members and three students of the same category (undergraduate or graduate) as the respondent. If a disciplinary matter involves both undergraduate and graduate respondents, the panel will consist of one undergraduate student, one graduate student, and three faculty members.

d. Except for participation on the University Honor Council, no one designated to serve on Disciplinary Hearing Panels may serve simultaneously in any other capacity within the Student Disciplinary System.

e. If any nominating body chooses fewer than 13 members to serve on Disciplinary Hearing Panels or cannot make additional members available when needed, the Provost will make the necessary appointments to fill the complement of the appropriate group. If any member is unable to serve for any reason, a replacement is selected in the same manner that the original member was chosen.

f. Student members of Disciplinary Hearing Panels must be in good academic and disciplinary standing, as defined by their Schools. The UHC, as appropriate, by a vote of two-thirds of its members, may remove a member who fails to perform his or her duties. When a member ceases to be in good standing or is removed by the UHC, a replacement from the same category will be chosen in the same manner that the original member was chosen.

7. Advisors
a. Advisors help students involved in disciplinary proceedings to understand the disciplinary process, respect and comply with the provisions of this Charter, and deal with all aspects of the process. Any University faculty member, staff member, or student in good academic and disciplinary standing may serve as an advisor. The OSC maintains lists of individuals who are willing to serve as advisors and who have received training in the operation of the Student Disciplinary System.

b. Upon receiving notice of a complaint and the accompanying list of trained advisors, a respondent may select an advisor from this list or choose any other University faculty member, staff member, or student in good academic and disciplinary standing to advise the respondent during the disciplinary process. If criminal charges are pending against a respondent or, in the judgment of the Office of the University's General Counsel, are reasonably in prospect, the respondent's advisor may be an attorney who is not a member of the University community. In such instances, the attorney will be expected to observe the procedures of this Charter and comply fully and promptly with decisions of the DHO or other University officials or bodies charged with the administration of this Charter in the same manner expected of members of the University community.

c. An advisor may accompany any complainant, witness, or respondent to, and may participate in, any meeting regarding a disciplinary complaint. Advisors also may accompany complainants, respondents, and witnesses to hearings, but generally may not participate directly in such hearings (except as provided in section II.F.4.f and g. (p. ) below). Advisors may, however, quietly provide advice during the hearing and may also make a brief statement at the conclusion of the hearing before the panel begins its deliberations.

d. Any advisor who fails to observe the procedures of this Charter or comply fully and promptly with decisions of the DHO may, after appropriate warning, be disqualified by the DHO from continuing to serve. In the event of such disqualification, the hearing may proceed whether or not a replacement advisor is available or it may be rescheduled at the sole discretion of the DHO. Any person disqualified from serving as an advisor will be ineligible to serve
as an advisor for a period of two years. Repeated disruption of disciplinary hearings or the disciplinary process by an advisor may result in charges against the advisee of non-cooperation with the Student Disciplinary System. If the advisor is a member of the student body, faculty, or staff or the University, disciplinary charges may be brought against the advisor in the appropriate forum.

II. The Disciplinary Process

A. Bringing a Complaint to the Office of Student Conduct

1. Any member of the University community, who believes that a student has violated University rules, regulations or policies may file a complaint, which must be in writing, with the OSC. Students, faculty, staff members and trustees also may consult informally with the OSC staff to determine whether they wish to file a complaint. Others should consult with the Director about whether they may file a complaint under the Student Disciplinary System. Complaints made to other University offices or personnel also may be referred to the OSC. A complaint asks the OSC to consider the matter for possible referral or investigation.

2. The OSC promptly evaluates each complaint it receives to determine whether the University’s Code of Student Conduct, Code of Academic Integrity, or other applicable rules, regulations or policies may have been violated. When the OSC determines that no such violation may have occurred, it may dismiss the matter without further investigation, or it may refer the parties to the University Mediation Program or elsewhere to resolve their dispute. When the OSC determines that a violation may have occurred, it may refer the matter for mediation or undertake an investigation that may lead to the filing of formal charges against a student or students.

3. A complaint is not a charge that a student has violated University regulations. Charges against a student are only made by the University (not by complainants) following an investigation. Until there is a determination to the contrary by voluntary agreement to sanctions or by a Disciplinary Hearing Panel, there is a presumption that an accused student has not violated University rules, regulations, or policies.

4. When a complaint is filed, the OSC promptly gives written notice of the complaint and its allegations to the student(s) alleged to have violated University rules. A copy of the Charter will be included with the notice, as well as a list of potential advisors who have received training from the OSC.

B. Resolving a Complaint by Mediation

1. The University encourages informal mediation whenever practical and appropriate. If the parties agree, at any time the OSC may refer any disciplinary matter other than an alleged violation of the Code of Academic Integrity to the University Mediation Program (UMP) or other resources for mediation. Members of the University community may also contact the University Mediation Program directly.

2. It is within the sole discretion of the OSC to determine whether a disciplinary complaint is suitable for mediation. If mediation fails or new information comes to light about an unresolved matter then in mediation, the OSC may proceed with an investigation and the filing of disciplinary charges. The OSC may also set a date after which it will begin to investigate the original complaint or file charges if a matter has not been successfully mediated.

3. If the OSC refers a complaint for mediation and both parties to the dispute agree to participate, the UMP will assign a trained mediator and advise the complainant(s) and respondent(s) in advance of the date, time and place set for mediation. In order to resolve a disciplinary matter by mediation, both the complainant and the respondent must agree, first, to participate in the mediation and, second, to the proposed resolution.

4. If a student fails to comply with the terms of a mediation agreement, the OSC may take steps to enforce the agreement (including use of a Disciplinary Hold or the filing of new charges under the Code of Student Conduct) or may investigate the original complaint and bring disciplinary charges under this Charter.

C. Investigating a Complaint

1. If, after a preliminary evaluation of a complaint, the OSC determines that a violation of the Code of Student Conduct may have occurred and if the complaint is inappropriate for mediation or mediation fails, the OSC then will investigate the complaint and determine whether to bring charges of a violation.

2. In the course of its investigation, the OSC may interview any witnesses, including the respondent(s) or potential respondent(s). The OSC will inform each witness that anything they say in such interviews may be introduced as evidence at a hearing.

3. Except in extraordinary circumstances, or if the complainant makes a request of the OSC to delay the investigation based on good cause, the OSC will make every effort to complete its investigation within 60 days of the filing of the complaint.

D. Filing Charges by the University Against a Student

In light of its investigation of a complaint, the OSC may file charges against a student(s) or violation(s) of the University’s Code of Student Conduct, Code of Academic Integrity, or other University rules, regulations, or policies. The OSC also may add charges beyond the scope of the original complaint, may add additional students as respondents, or may dismiss the original complaint as unfounded. If the OSC decides to charge a student with a violation of University regulations, the OSC must inform the respondent(s) of the charges in writing, identifying the University rules, regulations, or policies alleged to have been violated. The OSC will inform both respondent(s) and complainant(s) whether charges have been filed.

E. Resolving Charges by Voluntary Agreement to Sanctions

1. Following the notice that charges have been filed against a student, the OSC may discuss with the respondent and the respondent’s advisor what disciplinary sanction(s) would be appropriate to resolve the matter by voluntary agreement to sanctions. The respondent may accept, reject, or propose an alternative to the proposed sanction(s) and may be accompanied and assisted by an advisor, who may participate in these discussions. Statements made during discussions about whether a respondent will enter into a voluntary agreement to sanctions may not be introduced as evidence at any subsequent hearing, but may provide a basis for further investigation by the OSC.

2. A resolution by voluntary agreement to sanctions may be entered into by written agreement at any time after a complaint has been filed and prior to a disciplinary hearing. All sanctions allowed under this Charter are available to the OSC as part of a resolution by voluntary agreement to sanctions. By agreeing to such a resolution, a respondent waives further proceedings under this Charter.

3. Complainants and complainants’ advisors are not parties to voluntary agreements to sanctions.
4. If, in the judgment of the OSC, a voluntary agreement to sanctions is not reasonably in prospect, or if the respondent(s) reject(s) a proposed sanction, the OSC may bring the disciplinary matter to a hearing.

F. Resolving Charges by Disciplinary Hearing

1. Scheduling Disciplinary Hearings
   a. If disciplinary charges are not resolved by a voluntary agreement to sanctions, the Disciplinary Hearing Officer (or designee) promptly begins the process of scheduling the Disciplinary Hearing, with due regard for the time required for all parties to prepare for the hearing. The DHO will provide reasonable advance notice in writing to the complainant(s), respondent(s), and witnesses of the date, time, and place of the hearing and of the names of the panel members assigned to hear the disciplinary matter.
   b. Hearings normally take place as soon as possible after the filing of charges, ordinarily within 30 days of the respondent's request for a hearing or OSC's decision to bring the matter to a hearing. Upon a showing of good cause by a party, the DHO may grant a reasonable extension of any time limit relating to a disciplinary hearing set forth in the Charter.
   c. The DHO may expedite a Disciplinary Hearing in appropriate circumstances, including disciplinary matters involving students who have been placed on mandatory temporary leave of absence or conditional attendance, graduating students, or students who are about to take a leave of absence or to leave campus to study elsewhere.

2. Disqualification of Hearing Panel Members
   a. Members of the Hearing Panel selected by the DHO (or designee) should disqualify themselves from hearing a disciplinary matter if they believe in good faith that their capacity for making an objective judgment in the disciplinary matter is, or may reasonably appear to be, impaired. Members should not disqualify themselves for any other reason.
   b. The respondent(s) or the OSC may object for specific cause to any panel member selected by the DHO. The objection must be in writing and must be received by the DHO at least 48 hours in advance of the date and time set for the hearing.
   c. The DHO will rule upon all disqualification requests and objections to panel members. If the DHO decides that a challenge is valid, or if there is a voluntary disqualification, the DHO, after notifying the respondent(s) and the OSC, will replace the disqualified member with another panel member randomly selected from the same category.

3. Pre-Hearing Exchanges and Testimony
   a. Within a reasonable time before the hearing or any other time frame specified by the DHO, the OSC and the respondent(s) will exchange among themselves and with the DHO copies of all exhibits to be presented, the names of witnesses to be called, and a brief summary of the substance of testimony expected to be presented to the Hearing Panel.
   b. When the DHO believes that it will contribute to the expedition and fairness of a Disciplinary Hearing, he or she may (but need not) ask the OSC to prepare a written statement of its case against the respondent(s) and give the respondent(s) a reasonable opportunity to prepare a written response. The OSC and the respondent(s) may also submit statements at their own initiative. The statements and any accompanying exhibits may be considered by the Hearing Panel, in addition to testimony, arguments, or evidence presented at the actual hearing.

4. Conduct of Hearings
   a. Disciplinary hearings are not trials, and they are not constrained by technical rules of procedure, evidence, or judicial formality. They are designed to encourage open discussion among the participants that promotes the Hearing Panel's understanding of the facts, the individuals involved, the circumstances under which the incident occurred, the nature of the conduct, and the attitudes and experience of those involved. The rules of evidence applicable to legal proceedings do not apply to disciplinary hearings. Information, including hearsay evidence, may be considered if it is relevant, not unduly repetitious, and the sort of information on which responsible persons are accustomed to rely in the conduct of serious affairs.
   b. The DHO presides over all hearings and decides all questions about the admissibility of evidence and the conduct of hearings. While the DHO may be present for the Hearing Panel's discussions to answer procedural questions, the DHO does not deliberate or vote with the Panel regarding its findings or its recommendation of sanctions.
   c. Disciplinary hearings are held in private unless the respondent(s) and the complainant(s) agree in writing to an open hearing. The DHO may limit attendance at a hearing to ensure fair and orderly proceedings. If a hearing is opened in accord with this procedure, the DHO may, when necessary to maintain order or to protect the rights of participants, declare the hearing closed to the public. In a case involving important privacy interests, the DHO may close a hearing or part of a hearing that has been opened upon determining that the privacy rights of a participant may be jeopardized.
   d. Upon a showing that the required notice was provided, the hearing against a respondent(s) may proceed in her or his absence.
   e. At the hearing, the OSC presents the results of the OSC's investigation of the complaint, calls witnesses to testify and presents the University's evidence against the student(s). Members of the Hearing Panel may also call witnesses to testify and may question any witness appearing before it. Respondents may also call witnesses to testify and ask questions of all witnesses.
   f. A respondent is responsible for presenting his or her own case before the Hearing Panel. However, at the discretion of the DHO, the respondent's advisor may be permitted to question witnesses on behalf of a respondent or to address the Hearing Panel. The DHO's exercise of discretion in this matter will be guided by the principles that govern disciplinary hearings, specifically fairness, the need for orderly procedures, and the Hearing Panel's duty to understand the facts and parties in the disciplinary matter.
Complainants may attend the hearing, testify if they wish to do so, and may be accompanied by an advisor. Except as described in section II.J. (p. ___) of this Charter, neither complainants nor their advisors may call witnesses or present evidence or arguments.

At the conclusion of the hearing, the OSC and the respondent(s) or their advisor(s) may make brief statements. At the discretion of the Disciplinary Hearing Officer, the complainant(s) or their advisor(s) may be permitted to make a brief statement. The time allowed for such statements will be set by the DHO.

The OSC will arrange for a verbatim transcript or recording to be made of all disciplinary hearings. The transcript or recording is the property of the University of Pennsylvania and becomes part of the record of the disciplinary proceedings.

5. Findings and Recommendations of the Hearing Panel
   a. Only evidence presented at the hearing will be considered by the Hearing Panel. The Hearing Panel will presume a respondent innocent unless proven responsible for a violation by clear and convincing evidence. All decisions of the Hearing Panel require a majority vote.
   b. Following the hearing, the members of the Hearing Panel meet to discuss in private their findings, which consist of two parts:
      1. a determination of whether the respondent is responsible for any violation; and
      2. if so, a recommendation of sanction(s).
   c. The OSC may recommend to the Hearing Panel a sanction to be imposed if the Hearing Panel finds the respondent(s) responsible for a violation. The respondent(s) may respond to the OSC's proposed sanction(s). Before the Hearing Panel makes its recommendation on sanctions, it will review any previous disciplinary offenses by and sanctions against the respondent(s) and sanctions imposed in other similar cases.
   d. If the Hearing Panel determines that the respondent(s) is not responsible for a violation, no sanction may be recommended against the respondent(s) and the respondent may not be subject to further proceedings under this Charter on the same charge(s).
   e. If the Hearing Panel finds that a student is responsible for a violation of University rules or regulations, it will recommend to the Provost appropriate sanctions. Only the Provost (or designee), acting on behalf of the University, may actually impose a sanction on a student. The Provost (or designee) will not impose a sanction until after any appeal of the Hearing Panel's decision has been decided by the DAO.

6. Notice of Hearing Panel Decision
   The Hearing Panel will promptly transmit its decision, including its findings and recommendation regarding sanctions, in writing to the DHO, the OSC, the respondent(s) and the Provost as soon as possible after the end of the hearing.

G. Appealing a Hearing Panel's Decision
   1. The Disciplinary Appellate Officer (DAO) has exclusive jurisdiction to decide appeals. Appeals are based solely on the record of the disciplinary hearing and the written submissions and responses of the respondent(s) and the OSC.
   2. Only respondent(s) may appeal the Hearing Panel's findings of responsibility except where applicable laws or regulations may extend this right to complainants. Both the respondent(s) and the OSC may appeal the Hearing Panel's recommendation of sanction(s).

An appellant must submit any appeal to the DAO in writing within 10 days after the Hearing Panel has rendered its opinion. The appeal must state in detail the specific grounds upon which it is based and must be sent to the OSC and respondent(s), as appropriate.

3. When the appeal is received, the OSC provides the DAO with a copy of the respondent's charge letter, a copy of the Hearing Panel's findings, a verbatim transcript or tape recording of the Disciplinary Hearing, and any exhibits considered by the panel in reaching its recommendations. A response to an appeal must be in writing and must be submitted to the DAO within 10 days from the date the appeal is filed.

4. Appellate review is limited to allegations of material and prejudicial procedural error in the conduct of hearings, error in the interpretation or application of relevant University regulations, consideration of new evidence sufficient to alter the Hearing Panel's findings or severity of the recommended sanctions. If the DAO finds sufficient basis, he or she may reverse or modify the Hearing Panel's findings or proposed sanctions, or may remand the disciplinary matter for further investigation by the OSC or a new hearing before a new Hearing Panel. However, the DAO may not recommend a more severe sanction(s) unless the OSC has appealed the sanction(s) recommended by the Hearing Panel.

5. After considering an appeal, the Disciplinary Appellate Officer will promptly issue his or her decision in writing and will provide copies to the OSC, the DHO, the Provost, the respondent(s) and other appropriate parties.

H. Imposing Sanctions on a Student
   1. Sanctions recommended against a respondent by a Hearing Panel or the DAO are imposed by the Provost (or designee) and may include any reasonable sanction, including, but not limited to, the following:
      • Warning: A Warning is a written admonition given by the OSC on behalf of the University in instances of minor misconduct.
      • Reprimand: A Reprimand is written censure for violation of the University's rules, regulations, or policies, given by the OSC on behalf of the University, which includes notice to the student that continued or repeated conduct violations will result in the imposition of more serious sanctions.
      • Fine: A monetary Fine may be levied as a disciplinary sanction and is payable to the Trustees of the University of Pennsylvania. (Not appropriate in cases of academic integrity violations.)
      • Restitution: Restitution is reimbursement for the damage, loss, or misappropriation of University, private or public property or compensation for injury to individuals. Restitution may take the form of monetary payment, property, or other appropriate service. (Not appropriate in cases of academic integrity violations.)
      • Disciplinary Probation: Disciplinary Probation may be imposed for a specified period or indefinitely (i.e., for as long as and whenever a student is a full- or part-time student at the University of Pennsylvania). Probation may be imposed for a single instance of misconduct or for repeated minor misconduct. Any future conduct or academic integrity violation by a student on Disciplinary Probation, found to have occurred during the probationary period, may be grounds for suspension or in especially serious instances, expulsion from the University.
      • Withdrawal of Privileges: Withdrawal of Privileges is the denial of specified privileges or the ability to participate in specified activities for a designated period of time.
      • Suspension: Suspension is the termination of student status and separation from the University until a specified date.
Suspension means the loss of all rights and privileges normally accompanying student status. While on disciplinary suspension, students may not obtain academic credit at the University or elsewhere toward completion of a University of Pennsylvania degree. Students are eligible to return to the University after the specified suspension term has elapsed. Suspension is imposed in instances of serious misconduct; it generally the minimum sanction imposed for a violation of the Code of Academic Integrity.

- **Indefinite Suspension**: An Indefinite Suspension is termination of student status and separation from the University for an unspecified period, without an automatic right of return to the University as a student (though specific conditions for return as a student may be specified). When the conditions of an Indefinite Suspension have been fulfilled, the student must make a formal request, as specified in the conditions, to return to student status. Indefinite suspension is imposed in instances of extremely serious misconduct or in instances of continued serious misconduct following the imposition of probation or suspension for a specified period.

- **Expulsion**: Expulsion is a permanent termination of student status and permanent separation from the University of Pennsylvania. Expulsion is imposed in instances of the most serious misconduct or in instances of continued serious misconduct following the imposition of probation or suspension.

2. In addition to the sanctions defined above, students may be required to perform a designated number of hours of community service or to utilize University or other educational or counseling services related to the nature of the misconduct.

3. Sanctions may be imposed alone or in combination with other sanctions. The Disciplinary Hearing Panel or the DAO may recommend whether the sanctions should appear on the transcript of a respondent and if so, for how long.

4. After the imposition of sanctions, a faculty member involved in an academic integrity matter will be informed of the outcome of the disciplinary proceedings. If the student has been found not to be responsible for an academic integrity violation, the instructor should assign a grade (which may differ from the grade originally assigned) based on the student's academic performance in the course. If the student has been found responsible for an academic integrity violation, the instructor may assign any grade the instructor deems appropriate. In the event that the student believes the final grade is unfair or fails to take account of the outcome of the disciplinary proceeding, the student may appeal the grade through the existing academic grievance procedure for the evaluation of academic work established by each School and academic department.

I. **Fulfilling Sanctions Imposed by the University**

1. Under the Code of Student Conduct, students are required to comply with all disciplinary sanctions. Failure to do so constitutes a violation of the Code and is itself subject to disciplinary proceedings by the OSC.

2. The OSC monitors the implementation and fulfillment of sanctions. In performing this duty, the OSC will have the cooperation of the Division of University Life, the respondent's Dean, and other appropriate University offices. No sanction will be enforced while an appeal is pending.

J. **Special Procedures for Sexual Misconduct Cases**

In sexual misconduct and other sex discrimination cases, the OSC will follow applicable federal law, including Title IX of the Higher Education Amendments of 1972, as amended.

The complainants in sexual misconduct cases have rights and responsibilities similar to the respondents under this Charter. The time frames set for respondents also apply to complainants and when notice is required to be provided to the respondent, similar notice will be provided to the complainant.

1. **Specified Rights of Complainants in Sexual Misconduct Cases**

   - a. An OSC staff member will ordinarily meet with the complainant to hear or clarify his or her account of the incident and to review the disciplinary process. To initiate a formal complaint, the complainant must submit a written complaint.

   - b. OSC will make every effort to complete its investigation within 60 days from the filing of a formal complaint. In extraordinary cases, such as when the gathering of information is completely under the control of law enforcement, OSC's investigation may be delayed. In the event of such delay, OSC will advise the complainant of the reason for the delay. An investigation may also be delayed upon the complainant's request based on good cause.

   - c. During the investigation, and until resolution of the matter, interim restrictions, including restrictions on contact between the complainant and the respondent, may be imposed by OSC. Nothing in this Charter precludes other University officials from taking appropriate interim measures before a disciplinary matter is resolved.

   - d. The complainant will be notified of the outcome of the investigation. Further, if there is a voluntary agreement to sanctions, the complainant will be informed of the provisions of the agreement that directly relate to the complainant.

   - e. Subject to any Family Educational Rights and Privacy Act (FERPA) limitations, the complainant will have a similar opportunity as the respondent to review evidence to be presented at the hearing.

2. **Investigation and Pre-Hearing Stages**

   - a. An OSC staff member will ordinarily meet with the complainant to hear or clarify his or her account of the incident and to review the disciplinary process. To initiate a formal complaint, the complainant must submit a written complaint.

   - b. OSC will make every effort to complete its investigation within 60 days from the filing of a formal complaint. In extraordinary cases, such as when the gathering of information is completely under the control of law enforcement, OSC's investigation may be delayed. In the event of such delay, OSC will advise the complainant of the reason for the delay. An investigation may also be delayed upon the complainant's request based on good cause.

   - c. During the investigation, and until resolution of the matter, interim restrictions, including restrictions on contact between the complainant and the respondent, may be imposed by OSC. Nothing in this Charter precludes other University officials from taking appropriate interim measures before a disciplinary matter is resolved.

   - d. The complainant will be notified of the outcome of the investigation. Further, if there is a voluntary agreement to sanctions, the complainant will be informed of the provisions of the agreement that directly relate to the complainant.

   - e. Subject to any Family Educational Rights and Privacy Act (FERPA) limitations, the complainant will have a similar opportunity as the respondent to review evidence to be presented at the hearing.

3. **Disciplinary Hearings**

   - a. The complainant will have a similar opportunity as the respondent to object to panel members for cause. In addition, the complainant will have an equal opportunity to prepare a written statement in advance of the hearing and to respond to any written statement prepared by the respondent or OSC before the hearing.

   - b. The complainant's advisor (who must be a member of the University community) may participate in a hearing to the same extent as the respondent's advisor. At the discretion of the DHO, a complainant's advisor may be permitted to question witnesses.
c. Alternative testimony options will be offered to complainants, such as placing a privacy screen in the hearing room or allowing the complainant to testify from another room via closed circuit television. Generally, questions between the complainant and the respondent will be relayed through the DHO, but if both agree, they can address each other directly. The DHO reserves the right to exclude questions he/she deems irrelevant or duplicative.

d. The complainant may call witnesses (including character witnesses) at the hearing, ask questions of all witnesses, and present evidence.

e. The hearing panel will presume the respondent not responsible unless proven responsible by a preponderance of the evidence.

f. The complainant may respond to the proposed sanctions OSC submits to the hearing panel.

4. Appeal of a Hearing Panel Decision
   a. The complainant may appeal the hearing panel’s findings and/or recommended sanctions. In addition, the complainant may respond to an appeal by the respondent or OSC.
   b. The complainant will be provided with written notice of the outcome of the appeal at the same time as the respondent.

III. Additional Matters

A. Administration of the Disciplinary System

1. The Provost is responsible for implementation of this Charter, administrative oversight of the Student Disciplinary System, including the OSC, and ensuring that the Student Disciplinary System functions fairly in and for the educational mission of the University. The Provost may instruct the OSC regarding the handling of specific cases, but he or she may not so instruct the DHO, the DAO, or the members of Disciplinary Hearing Panels.

2. When circumstances warrant, the OSC may take such administrative steps as may be necessary and feasible to effect the prompt resolution of a disciplinary matter, including, but not limited to, tape recording the testimony of witnesses who may be unavailable at the time of hearing, making special arrangements to ensure the attendance of complainants, respondents, witnesses, or other participants at a hearing and scheduling hearings outside of the normal academic year.

3. In any disciplinary matter in which a member of the Student Disciplinary System cannot perform her or his duties under this Charter, an alternate may be designated by the Provost using the procedures appropriate to that individual’s position in the system. In addition, when the Provost determines that circumstances warrant, such as (but not limited to) when a conflict of interest or a particularly complex or controversial disciplinary matter arises, the Provost may appoint a special OSC staff member, a special Disciplinary Hearing Officer, or a special Disciplinary Appellate Officer using the procedures appropriate to the position.

B. Reports to the University Community

1. Subject to the limitations imposed by law and the University’s policies on the confidentiality of student records and information, the OSC and the University Honor Council, in consultation with the Provost, will make periodic reports to inform the University community about the character and extent of the work of the Disciplinary System, including the nature of violations of University rules and regulations and the sanctions imposed. The reports of the OSC will deal both with disciplinary matters that go to hearing and with disciplinary matters that are resolved before hearing, and will include such information as the total number of disciplinary matters handled during the preceding year broken down by type of resolution (e.g., mediation, voluntary agreement to sanctions, hearing, etc.), by type of violation, by type of sanction(s) imposed, by whether or not the respondent(s) were found responsible for a violation, and so forth.

2. With the approval of the Provost, the OSC may also make extraordinary reports to the University community concerning the outcome of certain exceptional disciplinary matters, subject to the limitations imposed by law and the University’s policies on the confidentiality of student records and information.

C. Disciplinary Hold

At any time after the filing of a complaint, the OSC, after consulting with the student’s academic dean, may place a “Disciplinary Hold” on the academic and/or financial records of any student for the purpose of preserving the status quo pending the outcome of proceedings, enforcing a disciplinary sanction, or ensuring cooperation with the Student Disciplinary System. A Disciplinary Hold may prevent, among other things, registration, the release of transcripts, and the awarding of a degree.

D. Mandatory Leave of Absence and Conditional Attendance

In extraordinary circumstances, when a student’s presence on campus is deemed by the University to be a threat to order, health, safety, or the conduct of the University’s educational mission, the Provost (or designee), in consultation with the student’s Dean or Associate Dean, may place the student on a mandatory temporary leave of absence or impose conditions upon the student’s continued attendance, pending a hearing of disciplinary charges. When reasonably possible, the student will be provided with an opportunity to be heard before a decision is made by the Provost (or designee) to impose a mandatory temporary leave of absence or conditions on the student’s attendance. At the respondent’s request, and where feasible, the OSC may expedite the investigation of a complaint and the disciplinary hearing against a student placed on a mandatory temporary leave of absence or conditional attendance.

E. Civil or Criminal Proceedings

The University may proceed with disciplinary proceedings against a student under this Charter regardless of possible or pending civil claims or criminal charges arising out of the same or other events. The OSC, with the concurrence of the Provost and after consultation with the University’s General Counsel, will determine whether to proceed with charges against a student who also faces related charges in a civil or criminal tribunal. If the University defers proceeding with disciplinary charges against a student in light of related charges in a civil or criminal tribunal, the University may at any subsequent time proceed with disciplinary proceedings against that student under this Charter irrespective of the time provisions set forth in this Charter.

F. Disciplinary Records

1. Maintenance of Records
   
   Except as may be otherwise provided by applicable law, records of all complaints, disciplinary proceedings, mediations, and voluntary agreements to sanctions are maintained by the OSC in accordance with the University’s Protocols for the University Archives and Records Center and University policies on the confidentiality and maintenance of student records.

2. Confidentiality
Except as may be otherwise provided by applicable law, all disciplinary proceedings, the identity of individuals involved in particular disciplinary matters, and all disciplinary files, testimony, and findings are confidential, in accordance with University policies and federal law concerning the confidentiality of student records. However, no provision of this Charter or the University’s policies on confidentiality shall be interpreted as preventing a student from seeking legal advice.

3. Policy Violation of Confidentiality
Failure to observe the requirement of confidentiality of a disciplinary hearing by any member of the University community, other than the respondent, constitutes a violation of University rules and may subject the individual to the appropriate procedures for dealing with such violations. The respondent may disclose confidential information pertaining to him- or herself but may not violate the confidentiality of others. If the respondent discloses, causes to be disclosed, or participates in the disclosure of information that is confidential, any person whose character or integrity might reasonably be questioned as a result of such disclosure shall have the right to respond in an appropriate forum, limited to the subject matter of the initial disclosure.

G. Release of Information on Disciplinary Proceedings
1. To provide students involved in disciplinary matters with appropriate liaison with their School offices in regard to their academic work, the Dean or appropriate Associate Dean of the School(s) of the respondent(s) will be confidentially informed when a complaint is filed, when a sanction is imposed, or when a disciplinary complaint is otherwise resolved by the Student Disciplinary System. When a sanction is imposed, the Director of Career Planning and Placement may be informed by the OSC if the sanction(s) is reportable outside the University. When a transcript notation is required as part of a sanction, the University Registrar is also informed and required to implement the sanction as directed by the OSC on behalf of the Provost.

2. As required by law, in disciplinary matters involving allegations of sexual offenses, the complainant(s) will be informed of the outcome of the proceeding, including voluntary agreement to sanctions.

H. Reportability of Sanctions
1. Subject to applicable law and the University’s policies on the confidentiality of student records and information, any disciplinary sanction may be reportable outside the University of Pennsylvania, subject to specific policies governing the reporting of sanctions adopted by the Council of Undergraduate Deans for undergraduate students and the Council of Graduate Deans for graduate and professional students.

2. Resolution of disciplinary charges by voluntary agreement to sanctions is treated like a finding of responsibility and is reportable in the same manner as sanctions imposed following a Disciplinary Hearing.

I. Amendment of the Charter
Amendments to this Charter may be recommended by the UHC, OSC, University Council, Faculty Senate Executive Committee, or other appropriate members of the University community and proposed by the Provost. Amendments take effect upon the approval of the Council of Deans, except that the Council of Deans may at its discretion refer proposed amendments to the Deans and faculties of the individual Schools for approval.

Classroom Guidelines

No Eating, Drinking or Smoking
Based on recommendations that were made by the Classroom Facilities Review Committee in their report on February 11, 1992 (Almanac, March 17, 1992), we are currently upgrading the conditions of the central-pool classrooms throughout the University. That report also underscored the need for the University Community to adhere to University guidelines that encourage everyone NOT to eat, drink or smoke in a University classroom.

Faculty and teaching assistants should take responsibility for the classrooms in which they teach. This responsibility includes:

• making sure that food and drink never enter the classroom;
• not allowing anyone to smoke in the classroom;
• seeing that students remove any personal items they bring into the classroom; and
• reporting to the building administrator any classroom in need of maintenance, housekeeping, or equipment repairs.

Classrooms can only be maintained at an acceptable level if the above guidelines are maintained and enforced.

Closed Circuit Television Monitoring and Recording of Public Areas for Safety and Security Purposes

I. Purpose
The purpose of this policy is to regulate the use of closed circuit television (CCTV) cameras to monitor and record public areas for the purposes of safety and security.

II. Scope
This policy applies to all personnel, UPHS, schools and centers of the University, in the use of CCTV monitoring and recording. Legitimate uses of this technology related to research are covered by University policies governing research with human subjects and, therefore, excluded from this policy.

III. General Principles
1. The Division of Public Safety is committed to enhancing the quality of life of the campus community by integrating the best practices of public and private policing with state-of-the-art technology. A critical component of a comprehensive security plan using state-of-the-art technology is closed circuit television (CCTV).

2. The purpose of CCTV monitoring of public areas by security personnel is to deter crime and to assist the Penn Police in protecting the safety and property of the University community. Any diversion of security technologies and personnel for other purposes (e.g., CCTV monitoring of political or religious activities, or employee and/or student evaluations) would undermine the acceptability of these
resources for critical safety goals and is therefore prohibited by this policy.

3. Video monitoring for security purposes will be conducted in a professional, ethical and legal manner. Personnel involved in video monitoring will be appropriately trained and continuously supervised in the responsible use of this technology. Violations of the Code of Procedures for video monitoring referenced in this policy will result in disciplinary action consistent with the rules and regulations governing employees of the University.

4. Information obtained through video monitoring will be used exclusively for security and law enforcement purposes. Information obtained through video monitoring will only be released when authorized by the Vice President of Public Safety according to the procedures established in this policy.

5. Video monitoring of public areas for security purposes will be conducted in a manner consistent with all existing University policies, including the Non-Discrimination Policy, the Sexual Harassment Policy, Open Expression Guidelines and other relevant policies. The code of practice for video monitoring prohibits monitoring based on the characteristics and classifications contained in the Non-Discrimination Policy (e.g., race, gender, sexual orientation, national origin, disability, etc.)

6. Video monitoring of public areas for security purposes at the University is limited to uses that do not violate the reasonable expectation to privacy as defined by law.

7. To maintain an informed University community, the Division of Public Safety will periodically disseminate written materials describing the purpose and location of CCTV monitoring and the guidelines for its use. The location of outdoor CCTV cameras monitored by the Division of Public Safety will be published in Almanac.

8. Information obtained in violation of this policy may not be used in a disciplinary proceeding against a member of the University faculty, staff or student body.

9. All existing uses of video recording must comply with this policy.

IV. Responsibilities

1. The Division of Public Safety is the department authorized to oversee and coordinate the use of CCTV monitoring for safety and security purposes at the University. All University areas using CCTV monitoring are responsible for implementing this policy in their respective operations. Public Safety has primary responsibility for disseminating the policy and assisting other units in implementing the policy and procedures.

2. The Vice President of Public Safety has the responsibility to authorize all CCTV monitoring for safety and security purposes at the University. All new installations will follow the Division of Public Safety operating principles. All existing CCTV monitoring systems will be evaluated for compliance with this policy.

3. The Division of Public Safety will monitor new developments in the relevant law and in security industry practices to ensure that CCTV monitoring at the University is consistent with the highest standards and protections.

4. A CCTV Monitoring Committee will be established to assure that the Division of Public Safety adheres to established policy and procedures in the use of CCTV and to review camera locations and request for release of recorded video images.

   a. The CCTV Monitoring Committee will consist of seven members who will serve for a term of one year.

The Chairperson of the University Council's Committee on Campus & Community Life or his/her designee will serve as chair. Two faculty members appointed by the Chair of the Faculty Senate
One member appointed by the President
One student member
One staff member
Representative of the Office of Audit & Compliance & Privacy

An individual may appeal an adverse decision by the CCTV Monitoring Committee through existing University appeal mechanisms such as the Committee on Open Expression or the University Ombudsman.

b. The CCTV Monitoring Committee will review camera locations to ensure the perimeter of view of public cameras conforms to this policy.

The proposed location of permanent CCTV cameras will be provided to the CCTV Monitoring Committee for review and published in the Almanac before installation. A list of all University-owned or controlled camera locations will be published semi-annually in Almanac and made available by the Division of Public Safety to anyone requesting the list.

The locations of temporary cameras to be used for special events will be reviewed by the CCTV Monitoring Committee for approval and published in Almanac before the event if possible.

(Note: "Temporary cameras" does not include mobile video equipment or hidden surveillance cameras used for criminal investigations.)

Included with the list of CCTV camera locations will be a general description of the technology employed and the capabilities of the cameras.

Students and staff entering certain sensitive locations on campus may have an increased concern for privacy or confidentiality. In order to prevent a possible chilling effect on the use of service at these locations, concerned persons may petition the CCTV Monitoring Committee to forgo the installation of a proposed camera or for the removal of an existing camera. The CCTV Monitoring Committee will determine the appropriateness of an installation weighing the concerns of the person(s) making the requests and the safety and security of the entire community.

In recognizing students may also have an enhanced expectation of privacy in the hallways and lounges of residence facilities, CCTV monitoring for safety and security purposes will not be used in residential hallways and lounges unless the Vice President of Public Safety determines a specific safety/security risk exists.

The CCTV Monitoring Committee will review complaints regarding camera locations and determine whether the CCTV Monitoring Policy is being followed. The panel should weigh whether the potential increment in community security outweighs any likely infringement of individual privacy.

c. The CCTV Monitoring Committee, with the Vice President of Public Safety, will review all requests received by the Division of Public Safety to release recorded video images obtained through CCTV monitoring. No releases of recorded video images will occur without authorization by the Vice President and the CCTV Monitoring Committee. Excluded from review by the CCTV
Monitoring Committee are releases of recorded video images directly related to a criminal investigation, arrest or subpoena. The CCTV Monitoring Committee may also approve release of recorded video images only for legitimate purposes, such as to protect the University and its members from harm or liability. Five affirmative votes are necessary to approve the release of recorded video images. Any release of recorded video images will be recorded on a written log.

d. Any member of the CCTV Monitoring Committee may audit the Division of Public Safety’s CCTV monitoring operations, including video storage, at any time without prior notice.

e. The Chair of University Council’s Committee on Campus & Community Life will report to the CCTV Monitoring Committee at least once a year describing all requests for camera locations and release of recorded video images and disposition of those requests.

f. The CCTV Monitoring Committee will review this policy annually and recommend revisions if needed.

V. Procedures

1. All operators and supervisors involved in video monitoring of public areas will perform their duties in accordance with the Code of Practice consistent with this policy developed by the Division of Public Safety.

2. Division of Public Safety Management will assure that responsible and proper camera monitoring practices by control operators is continuous.

3. The Division of Public Safety has posted signage at appropriate locations. Signage states: “This area is subject to Video Monitoring by the University of Pennsylvania Police Department.”

4. The Division of Public Safety will limit camera positions and views of residential housing. Any view given to the housing will be no greater than what is available with unaided vision. Furthermore, the view of a residential housing facility must not violate the standard of “reasonable expectation of privacy.”

5. The Division of Public Safety Central Monitoring Center and other central monitoring centers will be configured to prevent camera operators tampering with or duplicating recorded video information.

6. Recorded video will be stored for a period not to exceed 30 days and will then be erased, unless retained as part of a criminal investigation or court proceedings (criminal or civil), or other bona fide use as approved by the Vice President of Public Safety and the CCTV Monitoring Committee.

7. Recorded video images will be stored in a secure location with access by authorized personnel only.

8. Camera control operators will conduct video observation of areas only in plain view of others situated in the public area viewable to the public.

9. Camera control operators will be trained in the technical, legal and ethical parameters of appropriate camera use.
   a. Camera control operators will receive a copy of this policy and provide written acknowledgement that they have read and understood its contents.
   b. Camera control operators will receive training in cultural awareness.

10. Camera control operators will not monitor individuals based on characteristics of race, gender, ethnicity, sexual orientation, disability, or other classifications protected by the University’s Non-Discrimination Policy. Camera control operators will monitor based on suspicious behavior, not individual characteristics.

11. Camera control operators will not spot and continuously view people becoming intimate in public areas.

12. Camera control operators will not view private rooms or areas through windows.

13. Mobile video equipment may be used in criminal investigations. Mobile video equipment will only be used in non-criminal investigations in specific instances creating significant risk to public safety, security, and property as authorized in writing by the President to the Division of Public Safety and the Open Expression Committee. Portable hidden cameras with recording equipment will only be used for criminal investigation by the University Police Detective Unit with the approval of the Vice President of Public Safety.

Examples of Video Monitoring and Recording of Public Areas

Legitimate safety and security purposes include, but are not limited to the following:

- Protection of buildings and property
- Building perimeter, entrances and exits, lobbies and corridors, receiving docks, special storage areas, laboratories, cashier locations, etc.
- Monitoring of Access Control Systems
- Monitor and record restricted access transactions at entrances to buildings and other areas.
- Verification of security alarms
- Intrusion alarms, exit door controls, hold-up alarms
- Video Patrol of Public Areas
- Transit Stops, parking lots, public streets (enclosed and unenclosed), shopping areas and vehicle intersections, etc.
- Criminal Investigation
- Robbery, burglary, and theft surveillance
- Protection of pedestrians
- Monitoring of pedestrian and vehicle traffic activity

Code of Academic Integrity

Since the University is an academic community, its fundamental purpose is the pursuit of knowledge. Essential to the success of this educational mission is a commitment to the principles of academic integrity. Every member of the University community is responsible for upholding the highest standards of honesty at all times. Students, as members of the community, are also responsible for adhering to the principles and spirit of the following Code of Academic Integrity.

Academic Dishonesty Definitions

Activities that have the effect or intention of interfering with education, pursuit of knowledge, or fair evaluation of a student's performance are prohibited. Examples of such activities include but are not limited to the following definitions:

A. Cheating: using or attempting to use unauthorized assistance, material, or study aids in examinations or other academic work or preventing, or attempting to prevent, another from using authorized assistance, material, or study aids. Example: using a cheat sheet in a
Code of Student Conduct

I. Preamble

When Benjamin Franklin founded the Pennsylvania Academy, he defined its mission as “education for citizenship.” In pursuit of this mission, the University of Pennsylvania is committed to achieving academic excellence, to creating an environment for inquiry and learning, and to cultivating responsible citizenship in the larger society.

The University of Pennsylvania is a community in which intellectual growth, learning from others, mutual tolerance, and respect for freedom of thought and expression are principles of paramount importance. In an environment that promotes the free interchange of ideas, cultural and intellectual diversity, and a wealth of social opportunities, Penn students take advantage of the academic and non-academic opportunities available to them, deepening their intellectual insights through formal instruction, and expanding their educational experience beyond their academic programs. Members of the Penn community participate actively in the greater Philadelphia, state, national, and international communities in which they reside. “Citizens” of the University community include students, faculty, staff and those otherwise affiliated with the University.

Accepting membership into the University of Pennsylvania community as a student entails an obligation to promote its welfare by assuming the rights and responsibilities listed below. Each individual member of this community is responsible for his or her own actions and is expected to respect the rights of others.

II. Rights of Student Citizenship

Membership in the University of Pennsylvania community affords every student certain rights that are essential to the University’s educational mission and its character as a community.

a. The right to have access to and participate in the academic and non-academic opportunities afforded by the University, subject to applicable standards or requirements.

b. The right to freedom of thought and expression.

c. The right to be free from discrimination on the basis of race, color, gender, sexual orientation, religion, national or ethnic origin, age, disability, or status as a disabled or Vietnam Era veteran.

d. The right to fair University judicial process in the determination of accountability for conduct.

III. Responsibilities of Student Citizenship

Students are expected to exhibit responsible behavior regardless of time or place. Failure to do so may result in disciplinary action by the University. Responsible behavior is a standard of conduct which reflects higher expectations than may be prevalent outside the University community. Responsible behavior includes but is not limited to the following obligations:

a. To comply with all provisions of the University’s Code of Academic Integrity and academic integrity codes adopted by the faculties of individual schools.

b. To respect the health and safety of others. This precludes acts or threats of physical violence against another person (including sexual violence) and disorderly conduct. This also precludes the possession of dangerous articles (such as firearms, explosive materials, etc.) on University property or at University events without University authorization.

c. To respect the right of fellow students to participate in University organizations and in relationships with other students without fear, threat, or act of hazing.

d. To refrain from conduct towards other students that infringes upon the Rights of Student Citizenship. The University condemns hate speech, epithets, and racial, ethnic, sexual and religious slurs. However, the content of student speech or expression is not by itself a basis for disciplinary action. Student speech may be subject to discipline when it violates applicable laws or University regulations or policies.

e. To refrain from stealing, damaging, defacing, or misusing the property or facilities of the University or of others. This also precludes the disruption of University computing services or interference with the rights of others to use computer resources.

f. To be honest and truthful in dealings with the University, about one’s own identity (e.g., name or Social Security number), and in the use of University and other identification.

g. To cooperate fully and honestly in the Student Judicial System of the University, including the obligation to comply with all judicial sanctions.

h. To comply with all contracts made with the University, such as Residential Living Occupancy Agreements and Dining Services contracts.

(Source: Almanac, September 10, 1996, Volume 43, No. 3) (http://www.upenn.edu/almanac/v43/n03/codechar.html)
i. To comply with policies and regulations of the University and its departments (e.g., the University’s Guidelines on Open Expression, Anti-Hazing Regulations, Drug and Alcohol Policies, Sexual Harassment Policy, etc.).

j. To comply with federal, state and local laws.

(Source: Almanac, September 27, 1994, Volume 41, No. 5 (https://almanac.upenn.edu/archive/v41/pdf/n05/092794.pdf))

Concerts Policy

The Social Planning and Events Committee (SPEC) is responsible for University concerts and other major events that involve artists’ fees, except those that are related to an academic program or to the program of the Annenberg Center. SPEC also is responsible for coordinating the scheduling of such events. Student organizations or other campus groups planning a major ticketed event such as a concert, comedy show, or other event that involves the payment of professional artists’ fees should contact the Office of Student Affairs for more information.

Major ticketed events such as concerts, comedy shows, or other events that involve the payment of professional artists’ fees cannot be used for fund-raising purposes. The University does not have the staff or the facilities to accommodate concerts or other major ticketed events for purposes other than academic or campus activities programming. Exceptions to this policy must be approved in writing, in advance, by the Office of Student Affairs.

All funds from ticket sales for concerts and other major ticketed events sponsored by student organizations must be deposited in a University account and disbursed in accordance with established student activities guidelines.

(Source: Almanac April 26, 2011, Volume 57, No. 31 (https://almanac.upenn.edu/archive/volumes/v57/n31/contents.html))

Confidentiality of Student Records

I. Statement of Purpose

The purpose of this policy is to describe the rights and responsibilities of students, faculty and staff regarding the confidentiality of student records, including as specified under the Family Educational Rights and Privacy Act (“FERPA”).

II. Scope

A. Information

This policy pertains to personally identifiable information contained in education records. The term “education records” generally includes records that are directly related to a student and maintained by the University or a party acting for the University.

Exceptions:

1. Sole possession of the maker. This policy does not apply to records kept in the sole possession of the maker and used only as a personal memory aid and not accessible to any other individual except a temporary substitute of the maker of the record.

2. Peer graded papers. This policy does not apply to grades on peer-graded papers/assignments before they are collected and recorded by a teacher.

3. Law enforcement records. This policy does not apply to records created and maintained by a law enforcement unit, including the Penn Police, for law enforcement purposes.

4. Employment records. This policy does not apply to records relating exclusively to an individual in his or her capacity as an employee except that records regarding an individual in attendance who is employed as a result of his or her status as a student.

5. Treatment-related records. This policy does not apply to records made or maintained by a healthcare professional that are used only in connection with treatment of the student and disclosed only to individuals providing treatment.

6. Other FERPA exceptions. This policy does not apply to any records or information specifically exempted from the term “education records” under FERPA and its implementing regulations, as they may be amended.

B. Individuals

1. Individuals in attendance. This policy applies to students who are or have been in attendance at the University.

2. Alumni. In general, this policy does not apply to records that contain only information about an individual after he or she is no longer a student at the University. However, if the record relates back to the student’s attendance at the University, it is still an “education record.” A separate policy protecting the privacy of alumni records may be found at http://www.upenn.edu/privacy.

3. Deceased individuals. Neither FERPA nor this policy applies to records of deceased persons. The person responsible for such records, however, should exercise informed discretion in responding to requests for disclosures and should ensure that the person making the request has a legitimate interest in the information and that the privacy interests of the deceased and third parties are considered.

4. Applicants. This policy does not apply to applicants for admission. However, the admission-related records of applicants who become students at the University are subject to the policy.

III. Notice

Penn will annually inform individuals in attendance of their rights under FERPA, including the right to consent to disclosure of personally identifiable information contained in their education records, the right to opt out of the disclosure of “directory information,” the right to review and seek correction of education records, and the right to file a complaint with the Department of Education concerning the University’s alleged failure to comply with FERPA.

IV. Disclosure of Education Records

A. Consent Required

As a general rule, personally identifiable information from education records may not be disclosed to other parties without the student’s prior written or electronic consent. Such consent shall be signed (on paper or using an appropriate electronic signature method) and dated and specify records or information to be disclosed, the purpose(s) of the disclosure, and the party or class of parties to whom disclosure may be made.

B. Consent Not Required

In certain cases (some of which are described below) personally identifiable information from education records may, and in some cases must, be disclosed from the records of a student without that individual’s prior written consent. If such disclosure is made, it should be limited to that information necessary for the purpose of the disclosure. Note
also that specific requirements and qualifications may apply to these exceptions.

1. To “school officials” with “legitimate educational interests.”
   a. “School officials” means employees of the University, including faculty and staff, as well as certain individuals such as vendors or contractors, performing work for the University under proper authorization.
   b. A school official has “legitimate educational interests” in personally identifiable information in the records of a student if the information in question is required or would be helpful to the official in the performance of his or her duties.
   c. A contractor, consultant, volunteer, or other party to whom the University has outsourced services may be considered a school official provided that the outside party
      1. performs a service for which the University would otherwise use its employees
      2. is under the direct control of the University with respect to the use and maintenance of education records and
      3. is subject to FERPA requirement governing the use and redisclosure of personally identifiable information from education records.
   d. The University must use reasonable methods to ensure that school officials obtain access to only those education records in which they have legitimate educational interests. Custodians of records will establish control procedures to ensure that these limitations are observed. If the custodian does not use physical or technological access controls, the custodian must ensure that its administrative policy for controlling access to education records is effective.

2. To another school where the student seeks or intends to enroll or where the student is already enrolled so long as the disclosure is for purposes related to the student’s enrollment or transfer and the University has provided notice of the disclosure or annual notice of its policy to make such disclosures.

3. In connection with financial aid for which a student has applied, or which he or she has received, but only for such purposes as determining eligibility for financial aid, the amount of financial aid, and the conditions that will be imposed, or for enforcing the terms or conditions of financial aid.

4. To comply with a judicial order or lawfully issued subpoena provided that the University makes a reasonable effort to notify the student whose records are involved in advance of disclosing the information. Prior notification may be prohibited in certain situations. All subpoenas and court orders should be directed to the Office of General Counsel and disclosure in response to them must be approved by that office.

5. In connection with an emergency, to appropriate persons if knowledge of the information is necessary to protect the health or safety of the student or other individuals.

6. To parents as described in Section IV.(c) (p. 1513) below.

7. Regarding directory information as described in Section IV.(d) (p. 1513) below.

8. Other circumstances as authorized by FERPA and its implementing regulations, as they may be amended or otherwise required by law. Questions about legal requirements should be directed to the Office of General Counsel.

C. Parental Notification – Consent Not Required

The University’s policy regarding disclosure of student information to parents is based both upon legal requirements and the University’s philosophy that students should be treated as adults. The University generally will not share personally identifiable information (other than directory information) from a student’s education records with third parties, including parents or guardians, without student consent, except in limited circumstances where such disclosure is permitted under FERPA (described below) and where the University determines in its discretion that disclosure is appropriate.

1. In connection with an emergency if knowledge of the information is necessary to protect the health or safety of the student or other individuals.

2. To the parent or legal guardian of a student under the age of 21, information regarding the student’s violation of a University policy governing the use or possession of alcohol or drugs.

3. To a person who submits a written affirmation that he or she is the parent or legal guardian of a student and that the student is a dependent within the meaning of Section 152 of the Internal Revenue Code of 1954.

4. In other limited circumstances as allowed under FERPA and its implementing regulations, as they may be amended.

In cases involving a health or safety emergency or a violation of a University policy regarding the use or possession of alcohol or drugs, a decision to notify parents or guardians about information contained in an education record – and the actual communications to the parents or guardians – will be made by the Office of the Vice Provost for University Life or another senior student affairs officer, in each case after consultation with the student’s school office and other appropriate offices. Whenever practicable, a student whose parents or guardians are to be notified will be informed before such notification occurs and given an opportunity to initiate contact with his or her parents or guardians.

D. Consent Not Required – Directory Information

“Directory Information” is generally regarded to be less sensitive than other types of information in a student’s education record. The University designates as “directory information,” which may be disclosed from records relating to a student without his or her consent if the student has not “opted out” of allowing such disclosure, the following categories of information: a student’s name, address (local, home or electronic mail), telephone number, date and place of birth, Penn ID number, major field of study, participation in officially recognized activities (including social and honorary fraternities and sports), weight and height if a member of an athletic team, dates of attendance, degrees and awards received, and previous educational institutions attended.

Each year, a notice will be given to students concerning these categories and their right to refuse to permit the University to make any or all of them available (i.e., “opt out”). Failure to respond to the annual notice in certain cases may result in the routine disclosure of one or more of the designated categories of personally identifiable information. The University will continue to exercise informed discretion in responding to requests for directory information.

E. Limitation on Redisclosure

As required by FERPA, the University will inform a party to whom a disclosure of personally identifiable information from the records of a student is made; that disclosure is made only on the condition that the party will not disclose the information to any other party without the
student’s prior written consent. Exceptions to this requirement include disclosure of directory information, disclosures to the student, to parents under appropriate circumstances, to victims of certain disciplinary matters, and disclosures pursuant to court orders and valid subpoenas.

F. Verification of Identity and Authority

Before disclosing personally identifiable information from education records, University employees must take reasonable steps to verify the identity of the requesting party as well as their authority to have access to the information.

V. Maintaining a Record of Disclosures

As required by FERPA, the University will maintain a record of requests for and/or disclosures of personally identifiable information from a student’s education records. The record must include the identities of the requesters and recipients and the legitimate interests they had in the information. This record should be maintained with records for as long as the records themselves are maintained and may be inspected by the student.

These recordkeeping requirements do not apply to requests from or disclosures to:

1. the student;
2. a school official with a legitimate educational interest;
3. a person with written consent from the student;
4. a person seeking directory information; or
5. a federal grand jury or law enforcement agency in connection with an order or subpoena requiring nondisclosure of its existence or contents.

VI. Right to Review Education Records & Seek Correction

A. Individuals who are or have been in attendance at the University are entitled to inspect and review their education records upon a written request. The request to inspect or review records must be honored within 45 days after the University has received the request. The request should be directed to the office that maintains the record and such office may charge a reasonable fee for copies.

B. A student does not have a right to inspect or review the following:

1. Financial records and statements of the student’s parent(s), except with the written permission of the parent(s).

2. Confidential letters and statements of recommendation related to admission to an educational institution, application for employment, or the receipt of an honor or honorary recognition that were placed in a student’s records after January 1, 1975, and as to which the student has executed a written waiver of his or her right to inspect and review; provided that the University uses the letters and statements only for the purpose for which they were originally intended and notifies the student upon request of the names of all individuals providing such letters and statements.

3. Other records as to which the student has executed a written waiver of his or her right to inspect and review. The University may not require a student to waive his or her rights under FERPA or this policy.

4. Those portions of records that contain information on other students.

5. Other exceptions as prescribed by FERPA and its implementing regulations, as they may be amended.

C. Opportunity to Seek Correction

1. A student who believes that information contained in his or her education records is inaccurate or misleading or violates his or her privacy rights may request that the University amend them, and the University will decide whether to do so within a reasonable period of time.

2. If the University decides that the information is inaccurate or misleading or otherwise in violation of the privacy rights of a student, the University will amend the record and inform the student of the amendment in writing.

3. If the University declines to amend the student’s records, it will so inform the student and inform him or her of the right to request a hearing to challenge the information believed to be inaccurate, misleading or in violation of his or her privacy rights. A hearing, however, may not be requested by a student to contest the appropriateness of a grade.

4. The hearing will be conducted by an individual who does not have a direct interest in the outcome of the hearing and will provide the student an opportunity to present evidence, relevant to the request to amend the student’s records. The University will provide a written decision within a reasonable period of time after the hearing based on the evidence presented at the hearing. The decision will include a summary of the evidence and the reasons for the decision. Additionally, information regarding hearing procedures will be provided when the student receives notice of his or her rights.

5. If, after a hearing, the University determines that a student’s challenge is without merit it will notify the student of the right to place in his or her records a statement commenting on the challenged information and/or setting forth reasons for disagreeing with the University’s decision. The University will maintain such statement with the student’s record and disclose the statement whenever it discloses the portion of the record to which the statement relates.

VII. Right to File Complaint

Students have a right to file a complaint concerning any alleged failure by the University to comply with the requirements of FERPA and its implementing regulations. A complaint may be filed with the federal office that administers FERPA:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5901

A complaint may be filed internally via the University’s Compliance and Reporting Line by phone at 215-726-6759, or online at www.upenn.edu/215pcomply.

VIII. Waiver of Rights

A student may waive any of his or her rights under FERPA and this policy, provided that the waiver is made in writing and signed by the student. The University may not require a student to waive his or her rights under FERPA or this policy.
The term “personally identifiable information” includes, but is not limited to, the name of the student or family member, the address of the student or family member, identification number, biometric record, indirect identifier (such as date of birth or mother’s maiden name) or other information that, alone or in combination, is linked to the student and would allow a reasonable person in the school community, without personal knowledge of relevant circumstances, to identify the student with reasonable certainty.

(Source: Almanac, March 16, 2010, Volume 56, No. 25 (http://www.upenn.edu/almanac/volumes/v56/n25/confidentiality.html))

### Confiscation of Publications

The confiscation of publications on campus is inconsistent with the University’s policies and procedures, and with the ideals of the University. It is inconsistent with the University’s Guidelines on Open Expression, and could violate contractual arrangements between the University and other parties.

Members of the University community who are responsible for confiscating publications should expect to be held accountable.

(Source: Almanac, July 18, 1989 (https://almanac.upenn.edu/archive/v36pdf/n01/071889.pdf))

### Consensual Sexual Relations Between Faculty and Students

The relationship between faculty and student is central to the academic mission of the University. No non-academic or personal ties should be allowed to interfere with the integrity of the faculty-student relationship. Consensual sexual relations between faculty and student can adversely affect the academic enterprise, distorting judgments, or appearing to do so to others, and providing incentives or disincentives for student-faculty contact that are inappropriate.

For these reasons, any sexual relations or dating relationships between a faculty member and an undergraduate student enrolled at the University are prohibited. The prohibition extends to all academic advisors and program directors, including those based in the College Houses and other University-owned or administered housing. The prohibition also extends to graduate, professional, or undergraduate student assistants, but, in their case, only with respect to those undergraduate students over whom they have academic responsibility.

Although this policy does not categorically prohibit consensual sexual relations or dating relationships between faculty and graduate or professional students, the University strongly discourages all sexual relations or dating relationships between faculty and graduate or professional students.

Furthermore, sexual relations or dating relationships between a faculty member and a graduate or professional student during the period of the faculty/student relationship are prohibited. The prohibition extends to sexual relations or dating between a graduate or professional student and other students for whom they have some supervisory academic responsibility between department chairs and students in that department, and between graduate group chairs and students in that graduate group. Likewise, sexual relations and dating relationships are prohibited between a graduate or professional student and academic advisors, program directors, and all others who have any supervisory responsibility for that student.

Faculty and academic supervisors who are or have been sexually involved with or dating students must decline to participate, either formally or informally, in any evaluative or supervisory academic activity with respect to those students.

The Provost, Deans, Department Chairs, and other administrators should respond to reports of prohibited sexual relations that are brought to them by investigating and, if warranted, initiating appropriate disciplinary action or remedial measures against the faculty member or supervisor involved. Violators of this policy will be subject to sanctions ranging from written reprimand to tenure revocation and/or termination of employment or expulsion.

### Contracts

No student may sign a contract on behalf of the University. All contracts for lectures, performing arts activities, programs and services sponsored by student organizations must be reviewed by the Associate Director of Student Life and signed by the Vice Provost for University Life or her/his approved designate.

### Dean's List

The Dean’s List citation appears on the transcript and is awarded annually to any student who achieves a combined GPA of 3.7 for the fall and spring semesters, provided that during those two semesters, he or she has:

- Completed 6 or more credit units for letter grades
- Received no grades lower than C
- Completed all courses on time with no Incompletes, NRs, or GRs

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Dean’s List in the academic year in which the violation occurred. The Dean’s List citation will be removed from the transcript.
Drug Free Workplace

Prohibited Drug Activity

The University of Pennsylvania prohibits the unlawful manufacture, distribution, dispensation, sale, possession, or use of any drug by its employees in its workplace. Each University employee agrees as a condition of employment to abide by this policy and to notify his or her supervisor no later than five (5) days after any conviction under a criminal drug statute for a violation that occurred in the workplace.

Sanctions

Any University employee who violates the University’s policy or who is convicted under a criminal drug statute for a violation occurring in the workplace will be subject to the University’s disciplinary procedures, up to and including dismissal, and may be required to participate satisfactorily in a drug abuse assistance or rehabilitation program.

Drug-Free Workplace Program

The University of Pennsylvania has established a drug-free awareness program to inform employees about:

- The dangers of drug abuse in the workplace through such activities as “Drug Awareness Week” and training programs for supervisors;
- The University’s policy of maintaining a drug-free workplace through distribution of the policy to all employees;
- Available drug counseling, rehabilitation and employee assistance programs such as those provided through the Employee Assistance Program and Worklife Benefits; and
- The penalties that may be imposed upon employees for drug abuse violations in the workplace.

Each University employee will be given a copy of the University Drug-Free Workplace Policy.

Each employee, as a condition of employment, must agree to abide by the University’s Drug-Free Workplace Policy and to notify his or her supervisor no later than five (5) days after any conviction under a criminal drug statute for a violation that occurred in the workplace. When a supervisor is notified by an employee of such a conviction, he/she shall immediately notify the Vice President for Human Resources (or designee) and, if the employee is paid in whole or part from a federal grant, contract or cooperative agreement, the Executive Director for Sponsored Programs. The Executive Director for Sponsored Programs will notify the appropriate federal agency within ten (10) days of receiving notice of such conviction.

An employee who violates the University policy or who is convicted under a criminal drug statute for a violation occurring in the workplace will be subject to the University’s disciplinary procedures, up to and including dismissal, and may be required to participate satisfactorily in a drug abuse assistance or rehabilitation program.

The University will make a good faith effort to continue to maintain a drug-free workplace through implementation of the above program.

For information on substance abuse and addiction treatment and support services, visit the EAP website (http://www.healthadvocate.com/upenn) or call 1-866-799-2329.

Equal Opportunity and Affirmative Action Policy

The University of Pennsylvania’s special character is reflected in the diversity of the Penn community. Diversity is prized at Penn as a central component of its mission and helps create an educational and working environment that best supports the University’s commitment to excellence in teaching, research, and scholarship. We seek talented faculty, students and staff who will constitute a vibrant community that draws on the strength that comes with a substantive institutional commitment to diversity along dimensions of race, ethnicity, gender, sexual orientation, age, religion, disability, veteran status, interests, perspectives, and socioeconomic status.

Grounded in equal opportunity, nondiscrimination, and affirmative action, Penn’s robust commitment to diversity is fundamental to the University’s mission of advancing knowledge, educating leaders for all sectors of society, and public service. The University of Pennsylvania prohibits unlawful discrimination based on race, color, sex, sexual orientation, gender identity, religion, creed, national or ethnic origin, citizenship status, age, disability, veteran status, or any other legally protected class.

Penn is committed to ensuring that its academic, social, recreational programs, and services as well as opportunities for admission and employment are available on an equitable and nondiscriminatory basis without regard to an individual’s legally protected class status. Penn also has written affirmative action programs to address any underrepresentation of women, minorities, people with disabilities, and qualified covered veterans. The Office of Affirmative Action and Equal Opportunity Programs, in collaboration with the Division of Human Resources and the Office of the Provost, oversees the implementation and administration of the University’s equal opportunity, affirmative action, and nondiscrimination policies and programs.

The University recognizes the right of members of the community to raise questions and pursue complaints of discrimination and adheres to a strict policy that prohibits retaliation for doing so. Questions, complaints of alleged discrimination, or concerns regarding these policies or their implementation may be directed to the

Executive Director
Office of Affirmative Action and Equal Opportunity Programs
Sansom Place East, Suite 228

University of Pennsylvania Nondiscrimination Statement

(to be used in University publications)
The University of Pennsylvania values diversity and seeks talented students, faculty, and staff from diverse backgrounds. The University of Pennsylvania does not discriminate on the basis of race, color, sex, sexual orientation, gender identity, religion, creed, national or ethnic origin, citizenship status, age, disability, veteran status or any other legally protected class status in the administration of its admissions, financial aid, educational or athletic programs, or other University-administered programs or in its employment practices. Questions or complaints regarding this policy should be directed to the

Evaluation and Certification of the English Fluency of Undergraduate Instructional Personnel

In 1990, the Commonwealth of Pennsylvania enacted legislation requiring that every member of an institution of higher learning who teaches undergraduates be certified as fluent in the English language, if it is not his or her first language. In order to comply with this legislation, Penn instituted a set of requirements that are enforced through training and teaching performed by the Office of English Language Programs.

I. Undergraduate Instructional Personnel

All persons hired on or after July 1, 1997, as members of the Standing or Associated Faculties, Academic Support Staff, graduate and professional student teaching staff, or as tutors, or for other undergraduate instructional duties (including, for example, leading laboratory or discussion sections or holding office hours), regardless of rank or title, in the Schools of Arts and Sciences, Engineering and Applied Science, Nursing, Wharton or the School of Design, the Annenberg School for Communication, and the Graduate School of Education, must be evaluated and certified as having met the University’s standard of English fluency in the classroom before completion of the hiring process. In addition, all individuals who hold appointments elsewhere in the University and who are to be engaged in the teaching, tutoring, or other instruction of undergraduates must also be evaluated and certified before appointment.

Only members of the Visiting Faculty, instructional personnel whose entire undergraduate instruction (including office hours) will be conducted in a language other than English, and graduate students who have no direct instructional contact (including office hours) with undergraduates (e.g., some grader or research assistants) are exempt from this requirement.

II. Standard of English Fluency in the Classroom

To be certified by the University of Pennsylvania as “fluent in the English language in the classroom,” a speaker must always be intelligible to a non-specialist in the topic under discussion, despite an accent or occasional grammatical errors. General and field-specific vocabulary must be broad enough so that the speaker rarely has to grope for words. Listening comprehension must be sufficiently high so that misunderstandings rarely occur when responding to students’ questions or answers. While teaching, the speaker should be able to use transitions to show the relationships between ideas, and to set main points apart from added details. When asked an ambiguous question, the speaker should be able to clarify the question through discussion with the student. When asked to restate a main point, the speaker should be able to paraphrase clearly. When challenged, the speaker should be able to defend his or her position effectively and appropriately.

Prospective instructional personnel, regardless of rank or title, who do not meet the above criteria shall not be certified and may not be assigned to any undergraduate instructional responsibilities.

III. Certification Procedures

A. Newly-Hired Faculty Members

Prospective members of the Standing or Associated Faculties, or of the Academic Support Staff, regardless of rank or title, shall be evaluated and certified by their department chairperson as to their English fluency in the classroom based on one of the methods of evaluation listed in section IV below. The department chairperson shall certify their English fluency in the classroom to their dean, or to the dean’s designee and the dean shall certify the same to the Provost. In schools having no departments, evaluation and certification shall be carried out by the dean or the dean’s designee.

B. Native English-Speaking Graduate Teaching Assistants

Prospective graduate teaching assistants whose native language is English shall be evaluated and certified by their department chairperson as to their English fluency in the classroom on the basis of one of the methods of evaluation listed in section IV, below. The department chairperson shall certify their English fluency in the classroom to their dean, or to the dean’s designee and the dean shall certify the same to the Provost. (This procedure applies to all native English-speaking graduate and professional student teaching staff, including those undertaking instructional duties as tutors, leading laboratory or discussion sections, graders, or holding office hours.) In schools having no departments, evaluation and certification shall be carried out by the dean or the dean’s designee.

C. Non-native English-Speaking Graduate Teaching Assistants

Prospective graduate teaching assistants whose native language is other than English who have not taken either the Test of Spoken English (TSE) or the ACTFL Oral Proficiency Interview, or who score 55 or below on the TSE or below Superior on the ACTFL, shall be referred by their department chairperson to the English Language Programs (ELP) for professional evaluation of their English fluency in the classroom.

It is anticipated that most graduate students whose native language is not English shall not be sufficiently fluent in the use of English in the classroom to undertake undergraduate instructional responsibilities during their first year of graduate enrollment at Penn. Such individuals may be able to acquire fluency in English in the classroom by enrolling in the ELP’s summer International Teaching Assistants Training Program, or during the academic year, by enrolling in the Graduate Division of Arts and Sciences course GAS 600 (fall semester) or the ELP’s intensive English language and cultural familiarization courses, or through alternative programs appropriate to the student’s needs. Graduate students placed
in any of the above programs must be re-evaluated by the ELP before the Director may certify to the Provost that they are fluent in English in the classroom.

D. All Other Undergraduate Instructional Personnel
All other undergraduate instructional personnel, regardless of rank or title, shall be evaluated and certified by their department chairperson as to their English fluency in the classroom based on one of the methods of evaluation listed in section IV, below. The department chairperson shall certify their English fluency in the classroom to their dean, or to the dean’s designee, and the dean shall certify the same to the Provost. In schools having no departments, evaluation and certification shall be carried out by the dean or the dean’s designee.

IV. Evaluation and Testing
A. Methods of Evaluation
Department chairpersons and deans shall certify only those prospective instructional personnel whose English fluency in the classroom has been evaluated using one or more of the means of evaluation listed below and has been found to meet or exceed the standard set forth in Section II., above. The following methods of evaluation may be used as the basis for a departmental certification:

- A score above 55 on the ETS Test of Spoken English or a score of 27 or above on the Speaking Section of the ETS IBT TOEFL.
- A score of Superior on the ACTFL Oral Proficiency Interview
- Academic presentation and discussion (such as a colloquium, lecture, seminar, or scholarly conference presentation) evaluated by two or more members of the standing faculty and/or the English Language Programs staff.
- Extended, in-person discussion with one or more members of the standing faculty, and/or English Language Programs staff on a topic related to the candidate’s research interests, teaching plans and/or experience.
- Observation and evaluation of teaching performance in the classroom by two or more members of the standing faculty and/or the English Language Programs staff.
- Videotape of classroom teaching or academic presentation evaluated by two or more members of the standing faculty and/or the English Language Programs staff.

All prospective graduate teaching assistants whose native language is other than English shall be referred by their department chairperson to the English Language Programs for professional evaluation of their English fluency in the classroom, using the SPEAK Test (Penn’s institutional version of the TSE) or future replacements, the advisory ACTFL Oral Proficiency Interview, or the Interactive Performance Test (IPT) administered by the English Language Programs (described in V.B., below).

B. Referral to and Consultation with the English Language Programs
Using one of the methods listed above, department chairpersons and deans (or the dean’s designee) shall either certify to the Provost that a prospective faculty member or other undergraduate instructional personnel is fluent in English in the classroom or refer them to the English Language Programs for further evaluation before they undertake any undergraduate instructional duties. It should be borne in mind that, at the discretion of the department chairperson or the deans, both native and non-native speakers of English may be referred to the English Language Programs for further evaluation before certification of their English fluency.

The department chairperson or deans may find it useful, especially where the native language of prospective faculty members or instructional personnel is other than English, to consult with the directors of the English Language Programs regarding the advisability of further evaluation or the most appropriate method of evaluation before certification of their English fluency. Prospective graduate teaching assistants with questions regarding the evaluation or certification of their English fluency in the classroom should consult with their department or graduate group chairperson, or the English Language Programs staff, 110 Fisher-Bennett Hall, 215-898-8681.

V. Further Evaluation and Appeals
C. Further Evaluation by the English Language Programs
Prospective instructional personnel who are not certified under section III, above, shall be referred to the University’s English Language Programs for further evaluation.

D. Interactive Performance Test
Graduate students whose native language is not English and who receive scores on the Test of Spoken English (or Penn’s SPEAK Test) of between 45 and 55 inclusive may be certified for classroom instruction by passing the Interactive Performance Test (IPT) administered by the English Language Programs. The IPT consists of a 10-minute mini-lecture with a question and answer component on a topic in the candidate’s academic discipline.

E. Evaluation and Certification as Graders with Limited Office Hours
Alternately, and upon the written referral of the graduate group chair, graduate students whose native language is not English and who receive scores on the Test of Spoken English (or Penn’s SPEAK Test) of between 45 and 55 inclusive may be certified as graders with limited office hours by passing the Grader Exam administered by the English Language Programs. Graders with limited office hours are defined as graduate students who are responsible for grading exams and assignments and holding individual appointments with undergraduate students for explaining grades and answering questions or assignments. Graders with limited office hours can have no responsibility for classroom teaching, tutoring, recitation, or laboratory sessions. Passing of this exam, which is tailored to one-on-one questions and answers, shall certify graduate students as sufficiently fluent in English to serve as graders with limited office hours, but does not certify them to undertake other instruction duties at a later date.

F. Appeals of Certification Decisions
Appeals of certification decisions made by department chairpersons may be directed to the appropriate dean and appeals of certification decisions made by deans or by the Directors of English Language Programs may be directed to the Provost.

VI. Deadlines for Certification and Reporting
In the case of appointment to the Standing or Associated Faculties, all submissions to the Provost’s Staff Conference or Mini-Conference for appointments in Arts and Sciences, Engineering and Applied Science, Nursing, Wharton, Design, the Annenberg School for Communication and the Graduate School of Education, and for any faculty members in other
schools who will ever teach undergraduates, shall include in the required
documentation a certification by the dean stating that the candidate’s
fluency in the English language in the classroom has been evaluated and
found to meet or exceed the University’s standard of fluency. The dean’s
certification shall also include a brief description of the means used to
evaluate such fluency and the results of such evaluation.

In all other cases, including graduate teaching assistants and academic
support staff, the certification of fluency must be approved by the
Provost before final approval of the appointment in the school or
department and prior to the start of the term for which the individual
is first hired for undergraduate instructional duties (specifically, by
September 1 for the Fall term, by January 1 for the Spring Term, and by
May 1 for the Summer term).

Each dean shall report to the Provost, no later than August 1 of each
year, that all faculty and other undergraduate instructional personnel (as
defined in section I, above) hired since the dean’s previous certification
have been evaluated for English fluency in the classroom prior to their
appointment and were found to meet or exceed the University’s standard
of fluency.

VII. Monitoring and Reporting of
Complaints
Each school shall put in place one of the following procedures for the on-
goig monitoring of English fluency in the classroom of all undergraduate
instructional personnel:

- A systematic program of classroom observation of both faculty
and teaching assistants by faculty members or English language
specialists.
- Inclusion of a question about communication with the instructor on
the student course evaluations of all faculty, teaching assistants, and
laboratory or recitation instructors each term. (Student evaluations
may also be supplemented by peer, alumni, or other teaching
evaluation mechanisms.
- Other monitoring mechanisms proposed by the dean and approved by
the Provost.

In addition, each school shall ensure that all complaints regarding
the English fluency of instructional personnel are reported (with the
chairperson’s evaluation of the complaint) to the dean and undergraduate
dean, and by the dean (with a description of the resolution of the
complaint) to the Provost, via the Associate Provost for Faculty Affairs in
the case of faculty, and via the Vice Provost for Education in the case of
graduate students.

VIII. Review of English Fluency Standards
and Procedures
These standards and procedures shall be reviewed periodically by
the Provost’s Council on Undergraduate Education, and in the light of
Pennsylvania Department of Education regulations, when issued. It also
should be noted that each school, at its option, may institute English
fluency requirements more stringent than the minimum standards
outlined above.

Faculty Authority to Assign Grades
and Academic Integrity
The Student Disciplinary Charter is based on the assumption that it is the
obligation and right of faculty members to assign grades for academic
work submitted to them by students under their supervision and that
faculty members should grade student work, using their best judgment
about the quality and propriety of that work, independently of disciplinary
procedures. The present statement makes clear the relationship between
grading and disciplinary action in cases in which a faculty member
believes that a student did not fulfill an assignment in accord with the
Code of Academic Integrity.

The Disciplinary Charter rests on the principle that faculty members
have wide authority to judge the academic work of students and have a
general responsibility for the academic progress of students, so much
as lies within the power of faculty. Furthermore, the charter assumes
that violations of the norms of academic integrity fall along a continuum
from minor to major and that not all violations need to be treated as
disciplinary cases. The authority and responsibility of faculty members
require them to judge the relative severity of a violation. Good individual
judgment and institutional practice will help faculty members make the
judgment about when to treat a case as requiring disciplinary action.

The distinction between academic evaluation and disciplinary action is
also important. Faculty members have the authority to make academic
judgments in relation to their students and to make decisions in the
interests of furthering their students’ education. Only the institution,
acting through its formal processes, may discipline a student. Grades
are not sanctions, even if they arise from a judgment that a student
has violated a norm of academic integrity. In such cases, the grade
may reflect the faculty member’s view that a piece of work was done
inappropriately, but it represents a judgment of the quality of the work,
not a record of discipline for the behavior. There are many ways to do
work inappropriately or badly, resulting in low or failing grades. The policy
of the charter is to preserve the faculty member’s right to grade work
on the basis of all of its qualities and to make the decision to pursue
disciplinary action a separate matter.

Students who believe that they have been graded unfairly have recourse
of appeal through the grade appeal procedures established by each
school. The charter explicitly recognizes the right of students to appeal
grades. The appeal of a grade given because a faculty member believed
that the student violated the norms of academic integrity is, for the
purposes of the charter, no different from other grade appeals.

www.upenn.edu/almanac/v43/n03/codechar.html#faculty)

Fairness of Authorship Credit in
Collaborative Faculty-Student
Publications for PhD, AM, and MS
Students
The Graduate Council of the Faculties has unanimously approved a policy
on authorship credit in collaborative faculty-student publications. The
intent of the policy is to avoid situations in which graduate students
or faculty feel that their contribution to published work has not been
fairly recognized. Our intent in the distribution of this policy statement
to faculty and graduate students is to make authorship discussions a routine part of conversations about intellectual collaboration.

**Why is a policy needed?**

1. For students who intend to pursue academic and/or research careers, scholarly publications that reflect the product of their research work are essential to being considered for a job and establishing a career.
2. Faculty members are almost always directly involved in the student’s scholarly work as mentors, employers, collaborators, or consultants.
3. When publications emerge from collaborative faculty-student effort, it is not always clear who should be given authorship credit, and in what order the authors’ names should appear on the published work.
4. The Vice Provost, the Council of Graduate Deans and the Graduate Council of the Faculties have been made aware over the years that there is widespread uncertainty among graduate students about what constitutes fair practices for the determination of authorship. Practices vary widely between and within departments at Penn.
5. Graduate students are understandably reluctant to raise issues of authorship at the beginning of projects, and skeptical about the efficacy of raising issues once the work has been completed. Students feel that authorship credit is a difficult issue to raise, because their questioning of the arrangements can be interpreted as a challenge to the mentor on whom the student depends for intellectual and/or financial support as well as future letters of recommendation.
6. The lack of clarity concerning fairness in authorship is evident not only among graduate students. Faculty members, too, are often uncertain about fair practices. Some feel that their intellectual and written contribution to a student’s published work has not been sufficiently acknowledged.
7. As part of their appropriate professional education, young scholars need to learn about how questions of joint-authorship are decided. Guidelines can facilitate discussions between students and their faculty mentors which further such learning.

**Diversity of Practices in Different Disciplines and Departments**

In considering the task of formulating a university-wide policy on Fairness in Authorship Credit, the Graduate Council of the Faculties is aware that different traditions of joint authorship exist in different disciplines and departments.

- In some fields, the Principal Investigator of the lab is first author of all publications.
- In some fields, faculty members rarely or never receive authorship credit on student publications, no matter what their contribution to the project or the product.
- In some fields, authorship depends on intellectual leadership and actual contribution to the ideas for the project and the written product.
- In some fields, authorship rules are clear; in others they are subject to negotiation.
- In some fields, research assistants and research fellows are automatically included as authors when the outcome results from paid work. In other fields, these students are automatically excluded as authors when the outcome results from paid work.

**A University-wide Process for Establishing Authorship Credit**

In light of the variability, ambiguity, and uncertainty regarding faculty-student authorship of published work, there are no specific rules that can be enunciated by the Graduate Council of the Faculties that will address the situation in all departments and academic disciplines. Instead, the Graduate Council of the Faculties is mandating a set of processes within each graduate group that will clarify expectations concerning authorship for each student and faculty member.

**A. Graduate Group, School, and University-wide Policies**

Graduate groups must publish and publicize general guidelines concerning authorship and make them available to all graduate students. School-wide policies have been established for the programs in Biomedical Graduate Studies (https://webdev.med.upenn.edu/contribute/bgs/documents/BGSauthorshippolicy_May18_2012.pdf) and Wharton Doctoral Programs (https://provost.upenn.edu/uploads/media_items/2014-2015-final-wharton-doctoral-policies-procedures-original_original.pdf). For individual Graduate Group policies see the alphabetical listing. In the absence of School or individual policies, the University-wide policy applies:

**University-wide Policy**

**Humanities**

1. The graduate group expects students and faculty to produce individual scholarship and to cite all contributions to their work accordingly.
2. All student work for the fulfillment of degree requirements is student work and the property of the student, with due citation and acknowledgment of contributions from others.
3. Students have the right to publish their work.
4. Any joint project will be publicly presented as such from the outset and the collaborators will agree from the beginning that their joint efforts will be presented publicly under both names.
5. If there is any dispute as to propriety in joint work, the matter should be brought to the attention of the graduate chair and then handled within the graduate group with appropriate consultation with other members of the graduate faculty.

**Science**

1. Qualifications for Authorship. Authorship should be based on any of the following:
   - Initiating the scientific ideas addressed in the paper; qualify that person for authorship.
   - Significant contribution to building the experimental apparatus.
   - Significant contribution to the data taking.
   - Major contribution to the data analysis.
   - Important role in writing the paper and reviewing its scientific content.

Authorship should not be based on the following:

- Participation in obtaining funding or general supervision of the group but not participating in the general intellectual activity of the group does not qualify that person for authorship.
2. Authorship Order. The person making the greatest scientific contribution is the first author. It is usually clear who has done this. Subsequent authors are listed in order of decreasing scientific contribution.

3. When Conflicts Arise. Sometimes, even when the rules have been followed, a student may feel unfairly treated. The best possible solution is for the faculty advisor and the student to discuss and hopefully resolve the conflict. If that does not work, a student and faculty advisor may ask the graduate chair to arbitrate. The graduate chair may ask the department chair for assistance.

Social Science

1. It is to everyone’s benefit if there is a clear understanding about potential joint authorship roles whenever there is research collaboration among faculty and students, whether the latter are assigned as apprentices, students in a class, hired assistants, or any other role. Initial arrangements can always be discussed again should circumstances change, for example if the student contributes more to the project than originally anticipated.

2. Authorship is not presumed to be a right obtained by association with a research project. Hence the need for prior understandings, as stated above.

3. In general authorship implies that the person made a major substantive contribution to the research being reported.

4. Data gathered for a research project or program of research under a Principal Investigator [under a grant or otherwise] are the property of that investigator. It is an academic tradition that such data are not used without the PI’s permission, unless they have been made part of a public archive. In either case, proper acknowledgements are expected.

5. It is the presumption that the person who conceptualized the project, secured the funding, developed the research instruments, etc., should review any publications or other public presentations from the project and give his or her permission if something from the project is to be published without his or her name on it.

6. A student is presumed to have authorship of his or her masters thesis and/or doctoral dissertation and is encouraged to publish any parts or all of the approved thesis or dissertation unless there have been some prior restrictions to which the student has agreed, e.g. that authorship must be shared with others contributing to the project or to wait for a jointly authored or edited book combining several theses.

7. Authorship Order. The order of names should be mutually agreed, preferably at the outset. The person making the greatest scientific contribution is the first author. Subsequent authors are listed in order of decreasing scientific contribution. If contributions are spread equally, the order of authors is usually alphabetical.

8. It is impossible to anticipate all potential problems. We believe that mutual respect, trust and clear communication will forestall difficulties. However, if disagreements about authorship do arise and cannot be resolved by the people involved, it is recommended that the matter be referred to the Chair of the Graduate Group for prompt consideration and suggested resolution.

B. Faculty-Student Level

Individual mentors should conform to the graduate group policy on authorship credit. Mentors are responsible for anticipating possible disagreements concerning authorship credit regarding specific collaborative projects and should initiate clarifying discussions before students have invested substantial time on such projects. These discussions should be reopened if relative contributions change.

C. Appeals Process

No policy can prevent the occurrence of all instances of actual or perceived unfair treatment. Although inequities can occur to either faculty or graduate students, we believe that graduate students are usually more vulnerable to faculty practices and less able to act when they feel that fairness has been violated.

In cases of disagreements about authorship, the following steps should be taken:

1. Students who feel that they have been mistreated should raise the issue with their mentor and their graduate chair.

2. If the disagreement is not resolved to all participants’ satisfaction, an appeal can be made to the Dean of the School, who should convene a committee of faculty and graduate students to hear the disagreement and attempt to resolve it. Cases will be decided in the context of the published norms and guidelines of the graduate group.

Family Friendly Policies for PhD Students

New Parent Accommodation

A student in a Ph.D. program at Penn is eligible for time off of eight weeks for the birth or adoption of a child. The student must complete the online New Parent Accommodation/Family Leave Request Form (https://provostawards.wufoo.com/forms/rt72pat10x6xv1k) at least 60 days prior to the anticipated start date of the leave so that appropriate arrangements can be made to cover any teaching/research responsibilities.

The graduate group chair and dissertation advisor will be notified via email of the details of the student’s accommodation request. The graduate group is responsible for making the necessary arrangements within their department and school.

A. Normally the “Time Off” period commences within two weeks of the birth or adoption.

B. During the “Time Off” period, the student remains enrolled full-time. In order to facilitate a rapid return, s/he may participate in the program as fully as s/he deems appropriate. By remaining on full-time status, student visa status and loan repayment schedules, if any, will remain unchanged.

C. The student is entitled to academic accommodation including relief from academic requirements, such as postponement of exams and course requirements.

D. A student receiving stipend support is entitled to continuation of support during the “Time Off” period as follows:

1. Students receiving stipends from University/school funds are entitled to draw support for eight weeks during the academic year.

2. Students funded by government grants or other external funding sources are entitled to benefits as determined by the funding agency.
**Family Leave of Absence Policy**

A student in the Ph.D. program at Penn may take an unpaid Family Leave of Absence for the birth or adoption of a child, child care, or care of an immediate family member (spouse, domestic partner, child, or parent) with a serious health condition.

The graduate group chair and dissertation advisor will be notified via email of the details of the student’s leave request. The graduate group is responsible for making the necessary arrangements within their department and school.

A. Students may take a Family Leave of Absence for one semester or for two semesters.

B. The student must complete the online New Parent Accommodation/Family Leave Request Form (https://provostawards.wufco.com/forms/r72pat1Dx6xtk) at least 60 days prior to an anticipated leave so that appropriate arrangements can be made to cover any teaching/research responsibilities. In unanticipated and/or emergency situations, students should fill out the form as soon as possible.

C. Family Leave “stops the clock” on the student’s academic requirements, including service requirements, for the duration of the leave.

D. During the period of Family Leave, the student may arrange to continue Student Health Insurance, but is responsible for the payment of his or her own premiums. Upon paying a fee, students on approved Family Leave will retain their PennCard, e-mail accounts, library privileges, and building access.

E. Funding commitments from the institution are deferred until the student returns from Family Leave. Students receiving funding from external sources, such as government grants, are subject to the conditions established by the funding source.

F. Service requirements (e.g., teaching, research) will be met by the student following return from Family Leave.

G. Requests for extension of Family Leave beyond one year, or for repeated Family Leaves, may be made. Approval of an extension, deferral of funding, and continued academic accommodation is at the discretion of the Graduate Dean.

*Important: If you anticipate adding a dependent (e.g., newborn) to your Penn Student Insurance Policy while on Family Leave, you must remain in active student status at the start of the fall semester. Students should arrange with their school/division to maintain full-time student status for at least 31 days from the start of fall classes, after which time the Family Leave status can be recorded in the Student Records System. After the birth/adoption, contact the SHS Insurance Coordinator to enroll the dependent. The premium for dependent coverage is payable directly to Aetna Student Health.

Updated April 12, 2018

---

**Financial Policies**

**Payment of Tuition, Fees, and Other Charges**

All amounts billed to students are due on the due date indicated on the bill. You will receive an email notification each month when a new billing statement is available on PennPay (Penn’s electronic billing service). Students whose parents or other payers are making payments are reminded that you (the student) must invite them to be an ‘other payer’ on PennPay so that they can both view and pay your bill. Payments must be made on or before the due date. Payments can be made online, by check, wire transfer or in person. Please refer to the Student Financial Services web site at http://www.sfs.upenn.edu/paymybill/index.htm. Balances remaining beyond the due date are subject to a late payment penalty of 1.5% per month, which will appear on the next statement. A student could be placed on Financial Hold if bills remain unpaid which will jeopardize continuing enrollment and future registration.

**Failure to Pay**

The University reserves the right to withhold registration, transcripts, diplomas and all other information regarding the record of any student who is in arrears in the payment of tuition, fees, or any other charges, including student loans. The enforcement of this policy shall not relieve the student of the obligation to pay any outstanding fees and charges.

**Withdrawal/Leave of Absence: Reduction of Tuition and Fees**

A student who withdraws from the University (or who is requested to withdraw for failure to maintain a satisfactory scholastic standing) or who is granted a leave of absence from a full-time division of the University during either term of the academic year will be eligible for a reduction in tuition and fees in accordance with the conditions set forth below.

The effective date of separation from the University is the date the student files a written request for withdrawal or leave of absence.

A student who is required to withdraw because of a violation of University regulations shall receive no tuition refund.

For all other students, term charges will be adjusted as follows:

<table>
<thead>
<tr>
<th>If you leave within the:</th>
<th>Percentage Reduction in Tuition and Fees</th>
</tr>
</thead>
<tbody>
<tr>
<td>First two weeks of class</td>
<td>100%</td>
</tr>
<tr>
<td>Third and fourth weeks of class</td>
<td>50%</td>
</tr>
<tr>
<td>Thereafter</td>
<td>0%</td>
</tr>
</tbody>
</table>

In the case of students receiving financial aid, eligibility for the term will be determined based on actual charges and prorated allowances for living expenses.

For rules regarding reductions in residence and meal contract charges, see the current year’s Residential Handbook (http://www.business-services.upenn.edu/housing/assets/pdf/handbook0910.pdf) and the terms and conditions of meal plans (http://www.business-services.upenn.edu/dining).
Note: Please contact your home school representative regarding rules for Graduate, Professional, LPS and other Special Programs.

First-Year Housing and Dining Requirement

The College Houses are unique residential communities for Penn undergraduates that connect the academic life of the University to the residential experience. They foster smaller, intimate communities that students call home and from which they are supported in pursuing their academic goals and in navigating the complexities of university life. The College Houses provide academic and personal support to residents and promote social interaction, engagement, accountability and leadership within a setting that honors the diverse needs and backgrounds of the Penn community.

The College House experience is a central component of a student’s successful transition to and mastery of the rigor of university life at Penn. To support our undergraduates in their academic and personal endeavors, and to engage them with each other and the larger Penn community, we require all first-year transfer and exchange students1 to live on campus in a College House and participate in a meal plan during their first year of enrollment.

1 Students enrolled in the College of Liberal Studies or in the Penn Nursing BSN Second Degree Program, or are married, living with a dependent, or in a University-recognized domestic partnership, are exempt from this policy.

Fraternity / Sorority Advisory Board Disciplinary Chapter

Statement of Purpose

To acknowledge and strengthen the contributions of fraternities and sororities to the University of Pennsylvania, the Fraternity and Sorority Advisory Board Disciplinary Charter was established. This Charter is intended to establish a framework for fraternity/sorority governance, and to hold fraternities and sororities accountable to standards of conduct. There is a fundamental difference between the proceedings detailed herein and those of a court of law. This judicial charter is within the University community and is part of the educational process. To the greatest degree possible, the process detailed herein should remain informal, non-adversarial, and directed towards achieving fundamental fairness for all parties involved.

As outlined in the Charter, the Fraternity and Sorority Advisory Board is to be a fair and impartial board which will recommend to the Vice Provost for University Life actions necessary to ensure the commitments and obligations of both the fraternities/sororities and the University are being maintained (as outlined in the policy on “Recognition and Governance of Undergraduate Social Fraternities and Sororities” (Recognition Policy). Each recognized fraternity or sorority, and its associated sponsoring body, agrees to abide by the basic principles applied to any University affiliation with an externally incorporated organization, including commonality of goals and standards, disclosure of principals, mechanisms for accountability, and provisions for the discontinuance of the affiliation should goals diverge or standards decline in ways that would expose the University to liability or loss of reputation. To accomplish this, each fraternity and sorority will be held collectively responsible for the well being of its members, the chapter’s performance, as well as the reputation of the organizations within the University community.

The University recognizes that fraternities and sororities are associations of students, operated to enhance the educational experience. It is appropriate that the University provide support services that will help the chapters function effectively and will protect their stability given the inherent turnover of membership and leadership.

The following document defines the judicial system for cases involving collective responsibility of fraternities and sororities. This document details the required procedures for the resolution of violations of the Recognition and Governance of Undergraduate Social Fraternities and Sororities at the University of Pennsylvania (the “Recognition Policy”) within the fraternity and sorority system and between these Organizations and the Community. In addition, should a conflict come to the attention of OFSA, the Director has the authority to mediate conflicts prior to engaging in any formal judicial process.

I. Fraternity/Sorority Advisory Board

A. Jurisdiction

1. There shall be a University-wide board of original jurisdiction to be known as the Fraternity/Sorority Advisory Board (the “Advisory Board”). The Advisory Board shall have exclusive original jurisdiction in all cases arising under the policy entitled Recognition and Governance of Undergraduate Social Fraternities and Sororities at the University of Pennsylvania (the “Recognition Policy”), as amended from time to time, involving University recognized fraternities and sororities as defined by the Recognition Policy. The Advisory Board shall have no jurisdiction over complaints brought against individual students under the Charter of the University Student Disciplinary System except to the extent a complaint arising out of the same activity or event is also brought against a fraternity or sorority.

2. The Advisory Board will also hear appeals regarding sanctions levied by the Interfraternity and Panhellenic Judicial Inquiry Boards (JIB). Such appeals shall be made to the Advisory Board in accordance with the IFC or Panhellenic JIB Charters. (As used in this Judicial Charter for the Advisory Board, the term “respondent” or respondent chapter shall mean a University-recognized fraternity or sorority as more fully described in Section B of the Recognition Policy entitled “Framework for Recognition – Applicability of Recognition Policy”)

B. Composition

1. The Advisory Board will be composed of:
   4 faculty (one of whom shall serve as chair)
   3 Greek students (one from Panhellenic, BIG-C and IFC each)
   1 non-Greek student
   2 members from the Greek Alumni Council
   2 non-voting administrators
      a. Faculty members will be selected by the Faculty Senate Executive Committee. The communication to the faculty selected should be clear that we need their participation in this role.
      b. The three Greek students will be selected by each organization’s respective president with the approval of their Executive Board. Interested students will apply in writing and be interviewed by the Interfraternity, Panhellenic, and Biocultural InterGreek Councils.
      c. The non-Greek student will be appointed by the Nominations and Election Committee of the Undergraduate Assembly.
      d. The Greek Alumni Council (GAC) members will be selected from the general membership of the GAC. The appointee must have
been an active member of the GAC for the year preceding his/her appointment.

e. The two non-voting administrators (one being the Director of Fraternity and Sorority Affairs) will be appointed by the Vice Provost for University Life.

C. Responsibility

1. Monitor the efforts of the IFC/Panhellenic/BIG-C in achieving the goals and objectives of their strategic plans.

2. Audit each chapter at least once annually based on the required paperwork that each chapter submits annually to the Office of Fraternity and Sorority Affairs (OFSA). Assign specific goals for quality improvement of each chapter based on these annual reviews.

3. Support the offices of OFSA to improve compliance of chapters with University policies.

4. Meet with all chapters that are in violation of established University rules that are non-compliant with expected performance standards, or that are sub-optimal in achieving their target goals of performance.

5. Address, as outlined in this charter, any incidents of misconduct related to fraternities and sororities, especially those that result in injury, illness, psychological harm, or property damage.

6. Meet at least seven times during the academic year to conduct the audit review and attend to hearing of misconduct, and to monitor progress on probationary agreements.

This committee should report on an annual basis to the Provost, the President, the Chair of the Faculty Senate, and the Undergraduate Assembly.

D. Conflict of Interest

1. Definition

On occasion, the presence and/or participation of a particular Advisory Board member may be deemed as representing a conflict of interest with the role of the Advisory Board. Such "conflict of interest" shall be defined as either

a. membership in a fraternity or sorority involved in a disciplinary incident under Advisory Board review, or

b. involvement or affiliation with a particular incident or its participants which may impair his or her ability to consider objectively and impartially the facts of any situations or any Advisory Board review.

2. Procedures

Alleged conflicts of interest must be brought to the director of Fraternity and Sorority Affairs by any member of the Advisory Board, any member of the University community, or any representative of the fraternity or sorority under review at least forty-eight hours prior to the review proceedings. In instances of conflict of interest, it is an Advisory Board member’s obligation to withdraw from the Advisory Board prior to the convening of the review. In addition, at the beginning of any review the Chair shall ask all Advisory Board members if there are any conflicts of interest involved in the review. The Chair shall then conduct discussion. Final determination of conflict of interest shall be made by a majority vote of the Advisory Board members present for the review (excluding ex-officio members and the advisory Board member who is the subject of the conflict of interest vote). The chair (as defined in Section II. A.1. below) shall vote only to break a tie vote. To facilitate such determinations, the fraternity or sorority under review shall present to the Director a full list of all participating fraternity or sorority representatives and witnesses and their roles and affiliations at least five calendar days prior to the date of the Advisory Board’s review; information concerning the composition of the Advisory Board shall be given to the fraternity/sorority at least ten calendar days prior to the review. The minutes shall reflect any withdrawal due to conflict of interest.

3. Implementation

Any Advisory Board member who is deemed to have a conflict of interest by the Advisory Board shall not be present at internal Advisory Board discussions, shall not vote on any issue relating to the review in question, and shall not receive Advisory Board minutes or other confidential written materials pertaining to the review in question. The individual shall be permitted to participate in the review on behalf of the fraternity/sorority or on behalf of the Administration.

4. Disqualification of Advisory Board Members

Members of the Advisory Board may disqualify themselves from hearing the case if they believe, in good faith, that their capacity for making an objective judgment in the case is or may appear to be impaired.

E. Quorum

1. The quorum required to start a meeting/review will consist of at least one GAC member, three faculty members, and two student members (excluding any ex-officio member or any individual disqualified because of conflict of interest). The members attending the first meeting of any review shall be termed the "original quorum."

2. The quorum required for continuing the review is five members, including at least two members who have been present at all preceding reviews and constituted part of the "original quorum". The Chair (as defined in Section II.A.1. below) shall vote only to break a tie vote. All decisions require a majority vote of those present and eligible to vote.

F. Operation of the System

1. The Office of Fraternity and Sorority Affairs (OFSA) shall provide administrative support for the Advisory Board: verify student standing, schedule hearings, take and prepare minutes, and process all other paperwork for the Advisory Board.

2. To calculate days as required in this charter, only the fall and spring semesters shall be considered. Days shall be counted on a calendar basis, including Saturdays, Sundays, and holidays when the University is in session. No days will be counted when the University is not in session, except with agreement from the complainant.

G. Confidentiality of Judicial Records and Process

1. The identity of individuals in particular cases before the Director of OFSA, the Director of the Office of Student Conduct, the FSAB, or the VPUL, and all files and testimony as to individuals, are confidential, in accordance with University guidelines concerning the confidentiality of student records pursuant to the Family Educational Rights and Privacy Act of 1974, as amended.

2. Sanctions against chapters are not confidential.

II. Staff

A. Chair

1. The Faculty member with the most experience with the FSAB shall serve as Chair. The Chair shall administer this Chapter and preside at all meetings and reviews. The Chair is responsible for overseeing the procedural integrity of this Advisory Board. The Chair will, for example, consider and resolve pre-review challenges to procedures. Such decisions by the Chair will be affirmed by the Advisory Board
at the beginning of each review (see Section III.D.6.b). The Chair will also alert Advisory Board of inconsistencies between the demands of fairness and its actions at any point procedural issues and convey their advice, together with his or her own recommendations, to the Advisory Board.

2. In cases where a "conflict of interest" (as previously defined) arises that disqualifies the Chair, or when the Chair is otherwise absent, the Faculty member present who is next most senior with respect to continuous tenure of service on the Advisory Board shall act as Chair.

3. The Chair will advise respondents, complainants, and their advisors, of procedural matters.

4. The Chair may confer with appropriate University officials regarding the provisions of this Charter.

5. In the event the appointed Chair cannot be present at a meeting of the Advisory Board, an Acting Chair shall assume the responsibilities of the Chair. The Faculty member present who is most senior with respect to continuous tenure of service on the Advisory Board shall serve as Acting Chair.

B. Director of Fraternity and Sorority Affairs (Director)

The Director shall be a University employee and shall be appointed by the VPUL. The duties of the Director of Fraternity and Sorority Affairs under this Charter will be to resolve by agreement changes against the chapters; to present history and information about the chapter in reviews before the Advisory Board after a determination of collective responsibility; to ensure that agreements and sanctions are enforced; to perform all other responsibilities specified in this Charter.

C. Director, Office of Student Conduct (OSC)

The duties of the Director of OSC under this Charter will be to investigate complaints against chapters under the regulations of the University and the Recognition Policy; to help determine whether charges involve a chapter's collective responsibility and subject the chapter to the jurisdiction of this charter and whether such charges should be brought before the Advisory Board; to present at the review relevant evidence concerning the charges. The Director of OSC can testify; call witnesses, present documents before the Advisory Board, and recommend appropriate sanctions.

III. Procedures

A. The Complaint and Investigation

1. Any person who believes that a fraternity or sorority chapter has violated University rules or regulations may file a complaint with the Office of Fraternity and Sorority Affairs (OFSA). OFSA may conduct preliminary fact-finding before a case is forwarded to the OSC for in-depth investigation. The complaint may also be filed with a University office other than OFSA (e.g., Public Safety, OSC, VPUL). The OSC may also bring charges against a chapter on behalf of a complainant who requests anonymity or on behalf of the University in general. Office of Fraternity and Sorority Affairs should be notified of these complaints.

2. The OSC will investigate complaints within the jurisdiction of the Advisory Board and shall decide, after consultation with the Director, if there is reasonable cause to believe that a chapter has violated the Recognition Policy. The OSC shall make the determination of reasonable cause ordinarily after conducting a preliminary investigation. The OSC may interview any appropriate witnesses, including members of a potential respondent chapter. All witnesses have the right to consult with a University advisor, as defined elsewhere in this Chapter, while being interviewed, and the OSC shall inform them that anything they say may later be introduced as evidence at a review.

3. The Director and/or the Advisory Board may proceed under this Charter regardless of possible or pending civil, criminal, or individual Student Disciplinary proceedings arising out of the same or other events. The Director, with concurrence of the VPUL, and other appropriate University officials, shall determine whether the Advisory Board shall, in fact, proceed with the hearing of the charges against a respondent whose members also may face related charges in OSC/Student Disciplinary, civil or criminal proceedings. If the Director defers proceeding with the charges against a respondent in light of related charges, the Director, with concurrence of the VPUL, after consultation with the General Council, may subsequently proceed under this Charter at any time before or after resolution of the other charges.

B. Procedures for Judicial Reviews

1. Notice of Investigation

Within a reasonable time after the OSC receives a complaint and determines that there is reasonable cause that a chapter may be held collectively responsible, s/he will inform the Director of OFSA. The Director will then promptly notify the chapter, and the chapter advisory of record, that an investigation is in progress involving allegations of collective responsibility. At this time and at the Director’s discretion, a letter of Administrative Warning may be issued to the respondent chapter or is consistent with the Recognition Policy.

2. Issuing of charges

At the investigation's conclusion, the OSC, after consultation with the Director of OFSA, will make a preliminary determination of whether an incident or event involves collective responsibility. If such a determination is made, then the Office of Fraternity and Sorority Affairs will send to the respondent chapter, the chapter advisory of record, as well as the chapter's national office, a statement of the charges against the respondent and a copy of the chapter status report.

a. The statement will cite the regulation, rules or policies alleged to have been violated and will describe the alleged acts, or failures to act, constituting the violations(s). The statement will also enclose a copy of this Charter and a copy of the regulations, rules or policies alleged to have been violated. The cover letter for the charges should outline the time line for settlement.

b. Additionally, if the Director anticipates that there will be a formal review of the chapter and the violations by the FSAB, the Director of 9OFSA will prepare and include a copy of the chapter status report. The Chapter States Report will be a summary of both positive and negative chapter activity within the fraternal and University communities: financial health, scholarship, IFC/PHNL/BIGC involvement and support, leadership, alumni(æ) involvement within the chapter and University (GAC/Advisory Board), membership data, faculty affiliation, community development program, and the comprehensiveness of the pledge/membership education program, and may cite any laws, which might have been violated. The report will not be given to the Advisory Board until the sanctioning portion of their deliberations. (The Chapter will have the ability to respond to this report, See Section III.D.3.b.).
C. Agreement of Responsibility

1. The Director, in consultation with the OSC, the National Headquarters, the alumni advisory (whenever possible) and the respondent, may resolve (settle) the complaint by way of an Agreement of Responsibility at any time after the charges have been served and before final disposition by a review of charges by the Advisory Board.

2. After the charges are served, the respondent chapter must promptly schedule a conference with the Director of OFSA to discuss a potential Agreement of Responsibility, otherwise a review will be scheduled in accordance with Section III.D.3 of this Charter. If an Agreement of Responsibility has not been reached within a reasonable amount of time from the date the charges were served, or the Director of OFSA determines an impasse in the resolution has occurred, a review may be scheduled in accordance with Section III.D.3 of this Charter.

3. If the respondent chapter chooses to schedule a conference with the Director of OFSA, the Director will notify appropriate officers from the appropriate JIB (Interfraternity or Panhellenic) that charges have been served against a chapter. A meeting will be scheduled with JIB officers within a reasonable time after the charges have been served to discuss options for resolution. Any JIB Officer who is a member of a respondent chapter, is a complainant, or is in any other way involved or affiliated with a particular incident or its participants so that it would impair his or her ability to consider resolution options objectively and impartially, shall be excluded to avoid a conflict.

4. Agreement of Responsibility will be written and signed by the Director, the respondent’s President, the respondent’s chapter advisor of record, a representative of the respondent’s national office, and all members of the respondent chapter. Upon receipt of the signed agreement, the Chair of the FSAB will be notified that an agreement has been reached.

5. When a determination of collective responsibility has been found and a previous agreement of responsibility exist which includes provisions for further violations, the Advisory Board must uphold the agreement of responsibility and may impose further sanctions, extend the probation or other elements of the previous agreement of responsibility with an amendment to that original agreement.

D. Review

1. Scheduling Disciplinary Hearings

   a. If disciplinary charges are not resolved by an agreement of responsibility, the Director of OFSA in coordination with the Chair of the FSAB promptly begins the process of scheduling an FSAB review, with due regard for the time required for all parties to prepare for the hearing. The Director of OFSA will provide reasonable advance notice in writing to the complainant(s), respondent(s), and witnesses of the date, time, and place of the hearing and of the names of the panel members assigned to hear the disciplinary matter.

   b. Reviews normally take place as soon as possible after the filing of charges. Upon a showing of good cause by the FSAB, OSC or the respondent(s), the Director of OFSA may grant a reasonable extension of any time limit set forth in the Charter.

2. Pre-Hearing Exchanges and Testimony

   a. Before the review and through the Director of OFSA and the FSAB, the OSC and the respondent(s) will exchange copies of all exhibits to be presented, the names of witnesses to be called, and a brief summary of the substance of testimony expected to be presented at the Hearing Panel.

   b. When the Director of OFSA and Chair of the FSAB believe that it will contribute to the expedition and fairness of a Disciplinary Hearing, he or she may (but need not) ask the OSC to prepare a written statement of its case against respondent(s) and give the respondent(s) a reasonable opportunity to prepare a written response. The OSC and respondent(s) also may submit statements at their own initiative. The statements and any accompanying exhibits may be considered by the FSAB, in addition to testimony, arguments, or evidence presented at the actual hearing.

   c. In exceptional circumstances, when a witness or exhibit does not become known or available until immediately before the hearing, the Chair of the FSAB may, at her or his discretion, permit the evidence to be presented or may reschedule the hearing to a later time.

   d. If a respondent or the OSC anticipates that a key witness will be unavailable for a hearing, they may ask the Director of OFSA and/ or Chair of the FSAB to preserve the testimony of the witness on tape and present it as evidence at the hearing. The OSC and the respondent(s) must be notified in advance of the date, time and place of the taping. All parties who would be permitted to question such a witness at a hearing may question the witness at the taping.

3. Conduct of Reviews

   a. Disciplinary hearings are not trials, and they are not constrained by technical rules of procedure, evidence, or judicial formality. They are designed to encourage open discussion among the participants that promotes the Advisory Board’s understanding of the facts, the individuals involved, the circumstances under which the incident occurred, the nature of the conduct, and the attitudes and experience of those involved. The rules of evidence applicable to legal and legal proceedings do not apply to disciplinary hearings. Information, including hearsay evidence, may be considered if it is relevant, not unduly repetitious, and the sort of information on which responsible persons are accustomed to rely in the conduct of serious affairs.

   b. The Chair of the FSAB presides over all hearings and decides all questions about the admissibility of evidence and the conduct of hearings.

   c. Reviews are held in private unless the respondent(s) and the complainant(s) agree in writing in an open hearing. The Chair of the FSAB may limit attendance at a hearing to ensure fair and orderly proceedings. If a hearing is opened in accord with this procedure, the Chair of the FSAB may, when necessary to maintain order or to protect the rights of participants, declare the hearing closed to the public. In a case involving important privacy interests, the Chair of the FSAB may close a hearing or part of a hearing that has been opened upon determining that the privacy rights of a participant may be jeopardized.

   d. Upon a showing that required notice was provided, the hearing against a respondent(s) may proceed in her or his absence.

   e. At the hearing, the OSC presents the result of the OSC’s investigation of the complaint, calls witnesses to testify and presents the University’s evidence against the student(s). Members of the Hearing Panel may also call witnesses to testify and may question any witness appearing before it. Respondents may also call witnesses to testify and ask questions of all witnesses.

   f. A respondent is responsible for presenting his or her own case before the Advisory Board. However, at the discretion of the
Chair of the FSAB, the respondent's advisor may be permitted to question witnesses on behalf of a respondent or to address the Advisory Board. The Chair of the FSAB may exercise discretion in this matter will be guided by the principles that govern disciplinary hearings, specifically, fairness, the need for orderly procedures, and the Hearing Panel's duty to understand the facts and parties in the disciplinary matter.

g. Complainants may attend the hearing, testify if they wish to do so, and may be accompanied by an advisor. Neither complainants nor their advisors may call witnesses or present evidence or arguments.

h. At the hearing's conclusion, the OSC and the respondent(s) or their advisor(s) may make brief statements. At the discretion of the Chair of the FSAB, the complainant(s) or their advisor(s) may be permitted to make a brief statement. The time allowed for such statements will be set by the Chair of the FSAB.

i. The OSC will arrange for a verbatim transcript or recording to be made of all disciplinary hearings. The transcript or recording is the property of the University of Pennsylvania and becomes part of the record of the disciplinary proceedings.

4. Findings and Recommendations of the Advisory Board
   a. Following the hearing, the members of the Advisory Board meet to discuss in private their findings, which consist of two parts:
      i. a determination of whether the respondent chapter is responsible for any violation; and
      ii. if so, a recommendation of sanction(s).

b. Only evidence presented at the hearing will be considered by the Advisory Board for a decision on this incident and possible violations of law or University policy. The Advisory Board will presume a respondent innocent unless proven responsible for a violation by clear and convincing evidence. All decisions of the Advisory Board require a majority vote.

c. The OSC may recommend to the Advisory Board a sanction to be imposed if the Advisor Board finds the respondent chapter(s) responsible for a violation. The respondent chapter(s) may respond to the OSC's proposed sanction(s). Before the Advisory Board makes its recommendations on sanctions, it will review any previous disciplinary offenses by and sanctions the respondent(s) and the chapter status report (as outlined in Section III.B.2b).

d. If the Advisory Board determines that the respondent chapter(s) is not responsible for a violation, no sanction may be recommended against the respondent(s), and the respondent may not be subject to further proceedings under this Charter on the same charge(s).

e. If the Advisory Board finds that a respondent chapter is responsible for a violation of University rules or regulations, it will recommend to the Vice Provost for University Life appropriate sanctions. Only the Vice Provost for University Life (or designee), acting on behalf of the University, may actually impose a sanction on a chapter The Vice Provost for University Life (or designee) will not impose a sanction until after any appeal of the Advisory Board's decision has been decided by the Vice Provost for University Life.

5. Notice of Advisory Board Decision
   The Director of OFSA will promptly transmit its decision, including its findings and recommendation regarding sanctions, in writing to the Advisory Board, the OSC, the respondent(s) and the Vice Provost for University life as soon as possible after the end of the hearing.

E. Advisors to the Respondent and the Complainant
   1. At hearings before the Advisory Board, each respondent and complaint may be accompanied by an advisor who is a member of the University community (student, faculty, or staff) or of a national or local alumni sponsoring organization; advisors ay address the Board.
   2. Attorneys may not serve as advisors unless the previously designated alumnus/a chapter advisor is an attorney by profession. If criminal charges are pending against a respondent or its members, the chapter may be accompanied and advised by an attorney; however, the attorney may not address the Advisory Board or directly participate in the hearing.
   3. Advisors are obligated to acquaint themselves thoroughly with the University's policies, regulations, and procedures, and must hold confidential any information which they learn through their participation in the proceedings.
   4. At least five calendar days before the hearing the complainant and/or respondent will notify the OFSA of the name, address, title and relationship of their advisor who will be present.

F. Failure to Appear, Cooperate, or Comply
   1. A fair, conclusion adjudication of a dispute under this Charter depends on the cooperation of all involved persons, including complainants, respondents, and witnesses. Therefore, all community members who may be interviewed are obliged to provide honest, complete statements to the Director, the OSC, and the Advisory Board in order that dispute may be equitably resolved as quickly as possible.
   2. If the Advisory Board determines that a witness failed to appear or cooperate with the investigation and/or review, the Advisory Board may serve as complaint seeking, disciplinary sanctions described in the Charter of the University Student Disciplinary System (Section IV.C.7b).

   3. The failure of a respondent chapter or its individual members to comply with sanctions shall be a violation of this Charter and the University's Policies and Procedures.

Fundraising Guidelines

I. University Organizations
   1. Student organizations are permitted to raise funds for their own group activities and for non-University charities. All fundraising events and activities by student organizations recognized by the Student Activities Council (SAC), funded by the Graduate and Professional Student Assembly (GAPSA), or sponsored by the Undergraduate Assembly (UA) must be approved, in advance, by the Executive Director of the Office of Student Affairs. All fundraising events and activities by “School Affiliated” student organizations must be approved, in advance, by the relevant School student affairs administrator. Approval will only be granted for fundraising on behalf of charities which are nonprofit, tax exempt organizations.
   2. The procedures for reserving and using University facilities apply to fundraising activities by University organizations. See also the Concert Policy (p. 1512).
   3. Student fundraising activities must comply University, municipal, state, and federal policies.
   4. All checks received by student organizations in support of their own group activities must be made payable to the Trustees of the University of Pennsylvania and must be immediately endorsed with “For deposit only to the account of the Trustees of the University of Pennsylvania.”
Pennsylvania” on the back of the check. Checks received in response to charitable projects for non-University charities must be made payable to the non-University charity.  
5. Student organizations should follow reasonable procedures for safeguarding cash. The number of individuals authorized to receive and handle cash should be limited. The individuals who receive cash should prepare a log of all receipts, broken down by cash, checks payable to the University, and checks payable to the non-University charity, including the dates and amounts received, with totals for each category. Currency and checks should be kept in a secure location, and stored in a safe or other locked secure place with restricted access until deposited by the University or delivered to the non-University charity.  
6. Funds raised by student organizations for their own group activities must be deposited in a University account and disbursed in accordance with established student activities guidelines. SAC recognized, GAPSA funded and UA sponsored student organizations should hand deliver all checks made payable to the University and all cash to the Office of Student Affairs Business Office Manager. The Office of Student Affairs should compare the record of the cash receipts and checks with the amount to be deposited. School Affiliated student organizations should hand deliver all checks and cash to their respective School Business Offices. Student organizations should not use cash received to pay expenses.  
7. Checks made payable to a non-University charity should be sent by the student organization directly to the charity. The University will not issue gift receipts on behalf of non-University charities. Student organizations should contact non-University charities to determine whether the charities will provide gift receipts directly to donors.  

II. Non-University Groups  
Non-University groups must follow the procedures for reserving and using University facilities at Perelman Quad.  

(From: Almanac - April 26, 2011, Volume 57, No. 31 (http://www.upenn.edu/almanac/volumes/v57/n31/fundraising.html)  

Graduation Honors  
In recognition of distinguished academic achievement and high standards of academic integrity, the University of Pennsylvania awards Latin honors to undergraduate students based on the cumulative GPA on their transcripts at the time of graduation:  
- **Summa Cum Laude**: 3.80 or higher  
- **Magna Cum Laude**: 3.60 or higher, but less than 3.80  
- **Cum Laude**: 3.40 or higher, but less than 3.60  

A student who has received a sanction of probation or greater for a violation of the Code of Academic Integrity, the Code of Student Conduct, or the Sexual Violence, Relationship Violence, and Stalking Policy is not eligible for Latin honors. Notation of Graduation Honors will be removed from the transcript if the finding occurs after this honor has been posted.  

(Source: Almanac, April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html), updated May 3, 2016, Volume 62, No. 33 (http://www.upenn.edu/almanac/volumes/v62/n33/changes-to-policies.html)  

Guidelines for Addressing Academic Issues of Students with Disabilities  
The University of Pennsylvania is committed to providing access and equal educational opportunities to all students, including students with disabilities. Penn does not discriminate against students with disabilities. The University provides reasonable accommodation to a student’s known disability in order to afford that student an equal opportunity to participate in University-sponsored academic and extracurricular programs, activities and services.  

Reason for Policy Guidance  
This guidance, known as the Provost’s Memorandum, serves two purposes:  
- To provide guidance to faculty and staff so that they may reasonably accommodate and support students with disabilities without compromising academic standards and requirements;  
- To assure students with disabilities that the University will provide access to all University-sponsored programs, benefits and activities through reasonable accommodation and program accessibility as required under the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, as amended (“ADA”).  

Protection from Discrimination  
The Rehabilitation Act and the ADA prohibit discrimination against people with disabilities by institutions like Penn that receive or benefit from federal financial assistance. These and other laws require that reasonable accommodations be provided to otherwise qualified individuals with a disability.  

Some Key Definitions  
**Disability** — A person with a disability is defined as an individual who  
1. has a physical or mental impairment that substantially limits one or more major life activities,  
2. has a record of such an impairment, or  
3. is regarded as having such an impairment.  

Examples of recognized disabilities include, but are not limited to, blindness, deafness, paralysis, diabetes, epilepsy, lupus, bipolar disorder, generalized anxiety disorder, HIV/AIDS, specific learning disabilities, autism spectrum disorder and Attention Deficit Hyperactivity Disorder (ADHD).  

**Reasonable Accommodation** — A reasonable accommodation is a modification or adjustment that enables an otherwise qualified individual with a disability full access to participation in University-sponsored programs. These modifications should not fundamentally alter the purpose or requirements of the course or program. Reasonable accommodations are determined on an individual basis and take into account the functional limitations of the impairment. Accommodations may vary from class to class depending upon course content and format. They are intended to be effective and reasonable; they may not be exactly what the student wishes or requests.  

**Appropriate Documentation** — Appropriate documentation is a written evaluation or report provided by a clinician in a specific profession or area of expertise who is considered qualified to make the diagnosis. The documentation must be current and comprehensive and may
include clinical and social histories from parents, counselors and specialists. A diagnosis must be included. Documentation must identify the student's specific functional limitations within the academic setting and must show substantial limitation compared to most people. The documentation should conform to well-established practices in specific area(s)/field(s). For more information, see Documentation Guidelines on the Student Disabilities Services website at the following link: http://www.vpul.upenn.edu/lrc/sds/ps_documentation_guidelines.php.

Responsible University Office

Students with disabilities and temporary conditions are served by the Office of Student Disabilities Services (SDS). The office is located in the Weingarten Learning Resources Center (WLRC), a department under the Office of the Vice Provost of University Life. SDS is responsible for assessing all student requests for accommodations and determining reasonable accommodations for students with disabilities.

The Office of Student Disabilities Services is available to assist faculty and professional staff with the provision of academic accommodations and for consultation regarding students with disabilities.

Phone: (215) 573-9235
TTY: (215) 746-6320
Fax: (215) 746-6326
E-mail: sdsmail@zimbra.upenn.edu

Accommodation Procedures

Responsibilities of Students

Students with disabilities who seek accommodation at Penn are responsible for self-identifying with SDS. Identification may take place upon admission or at any time during the student’s course of study.

Students requesting accommodations are responsible for providing documentation, at their own expense, according to the guidelines published on the SDS website: http://www.vpul.upenn.edu/lrc/sds/ps_documentation_guidelines.php. SDS may request additional information if the documentation provided does not support the existence of a disability or the need for the accommodations requested.

The SDS Documentation Review Committee thoroughly reviews the documentation and accommodations are determined through an interactive process with input from the student. Consultation with faculty may be important in determining how to best accommodate a student in a specific course. A determination from the Committee may take four to six weeks, or longer if additional information is needed. For examples of reasonable accommodations, please see the SDS website: http://www.vpul.upenn.edu/lrc/sds/academic_accommodations.

Students who are approved for accommodations must authorize SDS to inform professors about their approved accommodations. They must also make online requests to SDS for individual exam accommodations each semester. Students are encouraged to introduce themselves to professors to initiate a dialogue about their particular needs.

Responsibilities of Faculty and Staff

Faculty and staff are responsible for ensuring equity and access in their programs and classrooms. The SDS approved accommodations should not fundamentally alter the academic requirements essential to a course or program of study or to licensing prerequisites. It is also important to recognize that students with disabilities must reach the same performance standards to fulfill degree requirements as their non-disabled peers. Accommodations provide students with disabilities equal access, not an unfair advantage.

Instructors are required to accommodate students only after receiving an email from SDS indicating the accommodations that have been approved. A statement about services for students with disabilities should be included in the syllabus for each course. Below is a sample syllabus statement:

Sample Syllabus Statement

The University of Pennsylvania provides reasonable accommodations to students with disabilities who have self-identified and received approval from the Office of Student Disabilities Services (SDS). If SDS has approved your request for accommodations, please make an appointment to meet with me as soon as possible in order to discuss the arrangements for your accommodations.

If you have not yet contacted Student Disabilities Services, and would like to request accommodations or have questions, you can make an appointment by calling (215) 573-9235. The office is located in the Weingarten Learning Resources Center at Stouffer Commons, 3702 Spruce Street, Suite 300. Please visit the SDS website at http://www.vpul.upenn.edu/lrc/sds/index.php.

SDS services are free and confidential.

Accommodated Exams

In order to effectively manage the logistics of exam accommodations, instructors are expected to respond promptly to SDS emails requesting information about exam accommodations. Although the exam may not be written until shortly before the exam date, other details are needed by the SDS accommodations staff as early as possible in order to arrange for exam administration and inform students of the arrangements. Professors are encouraged to provide SDS with exams as early as possible prior to the exam to allow SDS time to prepare exam materials. Exams are locked in a secure location until the exams are being administered.

In the event that questions arise during the administration of the exam at SDS, it is important that SDS has contact information for the instructor or TA (phone, text and/or email).

The Standards for Accommodating Exams for Students with Disabilities is available on the SDS website: http://www.vpul.upenn.edu/lrc/sds/StandardsforAccommodatingExams.php. This document provides guidelines for accommodated exams that are administered by faculty or their designees.

Note-taking Announcements

Faculty may be asked to assist SDS by identifying note-takers through an announcement or email to the class and referring interested note-takers to SDS. A template for the email will be included when SDS contacts faculty regarding note-taker accommodations.

Accessibility of Information and Course Materials

Faculty should collaborate with their department offices and SDS to ensure that their course materials, presentations, audio-visual materials and exams are available in an accessible format for students with sensory and print disabilities.
Confidentiality

All disability documentation provided by the student is confidential and remains in the Office of Student Disabilities Services for the purpose of determining reasonable accommodations. Students may not request accommodations from faculty that have not been approved by SDS. If documentation is provided to the instructor, it should be returned to the student and the student should be referred to SDS.

Faculty should refrain from discussing a student’s disabilities and accommodations in front of the class, in the presence of other students or to faculty or staff not directly involved in the accommodation process.

Reconsideration Process

Students may request reconsideration of the SDS accommodation determination through the SDS Reconsideration Process found on the website at http://www.vpul.upenn.edu/lrc/sds/reconsiderationprocess.php.

Concerns and Complaints

The Office of Affirmative Action and Equal Opportunity Programs is responsible for overseeing the University’s implementation of its equal opportunity and nondiscrimination obligations arising under Federal, Commonwealth, and local laws. Any concerns or complaints should be addressed to:

Office of Affirmative Action and Equal Opportunity Programs
Sansom Place East
3600 Chestnut Street, Suite 228
Philadelphia, PA 19104-6106
(215) 898-6993 (voice) or (215) 746-7088 (fax)
http://www.upenn.edu/affair-action/discrimination.html

Additional Information

Related policies and procedures are available on the SDS website (http://www.vpul.upenn.edu/lrc/sds/) in the section for Faculty and Staff.

This Memorandum is available in alternate format upon request.

Guidelines for Student Protection in Sponsored Research Projects

Participation in sponsored research may be an important part of a student’s undergraduate or graduate education, as well as an important source of his or her financial support. The University recognizes that the student must be protected in cases where the terms of the research project conflict with the student’s academic progress, and affirms that the student has the right to reject such funding if he or she chooses to do so. The University recognizes the sensitivity of these issues, since they pertain directly to the relationship of personal trust which exists between a student and his or her faculty sponsor; they are also fundamental to the development of the student’s intellectual and moral integrity. Therefore, the University adopts the following policy:

1. The University recognizes the central role of sponsored research in fostering educational opportunities for students at all levels and in every discipline and encourages the involvement of students in research projects. On rare occasions, the terms of a research agreement may contain limitations which may inhibit the
participation of students, such as delays in publication of results which might conflict with a student’s academic schedule. In such cases, the University requires that careful consideration be given to the appropriateness of student participation and that the Faculty Sponsor or Principal Investigator assures in advance that students are fully aware of any such restrictions.

2. The University affirms the student’s right to know the source(s) of financial support for his or her educational and living expenses, individual research projects, or the research activities of a faculty sponsor in which the student is involved and from which the student obtains financial support. It is the responsibility of the faculty sponsor to make this information known to the student.

3. Should a student choose to reject financial assistance, the University affirms and upholds the student’s right to do so.

Guidelines for the Operation of Unmanned Aircraft Systems at the University of Pennsylvania

The University of Pennsylvania establishes the following Guidelines to govern the operation by any person of an Unmanned Aircraft System (UAS) on or above the University of Pennsylvania’s campus or properties. These guidelines are established to support the use of Unmanned Aircraft Systems in ways that ensure the safety and protect the privacy of all members of the University community and promote compliance with all applicable federal and state laws. These guidelines cover the University of Pennsylvania Campus, Morris Arboretum, New Bolton Center, and Pennovation Works.

The University of Pennsylvania, consistent with the regulations and guidance from the Federal Aviation Administration, allows the operation of a UAS on or above the Penn campus for permitted educational and recreational purposes (for which a Section 107 Remote Pilot in Command Certification is optional) and research or UAS-dedicated curriculum purposes (for which a Section 107 Remote Pilot In Command Certification is mandatory) provided that all operations are in compliance with the following guidelines:

- The operation of the UAS is a component of research, science, technology, communication, art, or aviation-related coursework at Penn, or 2) recreational and hobby use is conducted at the designated location for UAS operation at Penn, Penn Park South Field, Attachment A. Scheduled hours for operation are set monthly, and can be found at http://www.pennathletics.com/page/athletic-facilities-schedules under the South Field schedule. The University of Pennsylvania reserves the right to restrict use to Penn-affiliated persons.
- Operation of the UAS aircraft must adhere to these restrictions:
  - Flights must be below 200 feet and clear of surrounding obstacles.
  - Flights may not exceed 100 mph.
  - UAS must be in visual sight of its operator at all times.
  - UAS may not operate over any persons not participating in the operation or in a building or other covered structure.
  - UAS must remain clear of all manned aircraft operations. Note: Penn Hospitals have frequent medical helicopter flights coming and going and all UAS operations must not be in proximity to or interfere with medical helicopter flights.
  - Anyone intending to operate a UAS at the University of Pennsylvania must notify the PennSTAR Communications Center, 215-662-7736 (primary) or 215 662-7737 (alternate), at least one hour prior to the flight and provide flight location and duration.
  - Individual notification is not required for flights at the designated Penn South Field UAS location during scheduled flight hours.

- No flights are allowed in proximity of large gatherings of people or sporting events.
- No flights are allowed 30 minutes before official sunset to 30 minutes after official sunrise.
- UAS must weigh less than 55 pounds.
- No reckless operation.
- UAS may not be used to photograph, video, record or monitor areas or locations where members of the University of Pennsylvania community or members of the general public would have a reasonable expectation of privacy.
- The operator must safely ground and suspend operations of any UAS when ordered by a University of Pennsylvania Police Officer or public safety official.
- UAS use must comply with all federal, state, and local laws and guidelines.
  - The operator of a UAS weighing between .55 to 55 pounds must register the UAS with the FAA.
  - Information on FAA rules and online registration can be accessed at: http://www.faa.gov/avs/registration.
  - Registration of a UAS aircraft under .55 pounds is not required, but all other safety restrictions apply.
- Recreational and educational operators may not receive any compensation (including cost reimbursement, honorarium, or pay) directly or indirectly related to operation of the UAS.
- Any use for instructional, research, or commercial purposes by Penn faculty, students, and staff must comply with all FAA Part 107 or Section 333 requirements. (https://www.faa.gov/avs/media/Part_107_Summary.pdf, https://www.faa.gov/avs/beyond_the_basics/section_333/333_authorizations/media/University-of-Pennsylvania-14755.pdf. Flight restrictions in these guidelines may be modified through compliance with the FAA waiver application and approval process.
- Commercial Operation of UAS
  - All civil commercial UAS use must comply with all federal, state and local laws and guidelines and operators must obtain a Part 107 Certification, a Section 333 Exemption, or a “Special Airworthiness Certificate” issued by the FAA.
  - Commercial use of a UAS from or above University of Pennsylvania property is permitted only for educational, research, or University-related purposes.
  - A commercial UAS operator must provide proof of $5 Million in general liability insurance on an occurrence basis, with a certificate of insurance naming the Trustees of the University of Pennsylvania as an additional insured. Proof of insurance shall be submitted to the University of Pennsylvania risk management department prior to flight operations.
A commercial UAS operator must be accompanied by a representative of the University of Pennsylvania at all times when operating a UAS on University property.

Penalties for Violation of University UAS Guidelines

Any violation of law (trespassing, illegal surveillance, reckless endangerment, etc.) or violation of this policy may subject the individual responsible for the violation to disciplinary action and/or prosecution.

Any damages or injuries to property or individuals during the operation of a UAS on University of Pennsylvania property, other than for a University of Pennsylvania authorized research or educational use, shall be the sole financial responsibility of the UAS operator. However, an operator shall be solely liable for negligent or intentional use outside of the authorized research or educational use.

For questions regarding the operation of a UAS at the University of Pennsylvania, you may contact:

Division of Public Safety 215-573-3333

1 This restriction does not apply to UAS operations in secured UAS research and development areas such as those at SEAS and Pennovation.

2 This restriction does not apply to UAS operations in secured UAS research and development areas such as those at SEAS and Pennovation.

Guidelines on Open Expression

I. Principles

A. The University of Pennsylvania, as a community of scholars, affirms, supports and cherishes the concepts of freedom of thought, inquiry, speech, and lawful assembly, the freedom to experiment, to present and examine alternative data and theories, the freedom to hear, express, and debate various views; and the freedom to voice criticism of existing practices and values are fundamental rights that must be upheld and practiced by the University in a free society.

B. Recognizing that the educational processes can include meetings, demonstrations, and other forms of collective expression, the University affirms the right of members of the University community to assemble and demonstrate peaceably in University locations within the limits of these Guidelines and undertakes to ensure that such rights shall not be infringed. In keeping with the rights outlined in I.A. (p. 1532) above, the University affirms that the substance or the nature of the views expressed is not an appropriate basis for any restriction upon or encouragement of an assembly or a demonstration. The University also affirms the right of others to pursue their normal activities within the University and to be protected from physical injury or property damage. The University shall attempt to ensure that, at any meeting, event or demonstration likely to be attended by non-University law enforcement authorities, the rights provided by these Guidelines are not infringed.

C. The University shall be vigilant to ensure the continuing openness and effectiveness of channels of communication among members of the University community on questions of common interest. To further this purpose, a Committee on Open Expression has been established as a standing Committee of the University Council. The Committee on Open Expression has as its major tasks: participating in the resolution of conflicts that may arise from incidents or disturbances implicating these Guidelines; mediating among the parties to prevent conflicts and violations of these Guidelines; interpreting these Guidelines; advising administrative officers when appropriate; and recommending policies and procedures for the improvement of all levels of communication.

II. Definitions

A. For the purposes of these guidelines, the “University community” shall mean the following individuals:

1. Persons who are registered as students or who are on an unexpired official leave of absence.

2. All persons who are employed by the University.

3. Trustees and associate trustees of the University and members of Boards of Overseers or other bodies advisory to the University.

B. For the purposes of these Guidelines, “meeting” and “event” designate a gathering of persons in a University location previously reserved for that purpose. Unless designated as public, meetings are considered to be private. Events are considered to be public. “Demonstration” designates the presence of one or more persons in a University location with the intent to express a particular point of view in a manner that attracts attention, as in protest, rallies, sit-ins, vigils, or similar forms of expression. “University location” designates:

1. The campus of the University;

2. Any location owned, leased or used by the University, when used by members of the University community; and

3. Areas immediately adjacent thereto.

III. Standards

A. The University, through the President, the Provost, and the Vice Provost for University Life, shall act to encourage and facilitate free and open expression within these Guidelines.

1. The University shall publish these Guidelines at least once each academic year in a manner that brings them to the attention of members of the University community. The University shall publish the rules adopted pursuant to IV.B.1 (p. 1533) by the Committee on Open Expression at least once each academic year in a manner that brings them to the attention of members of the University community.

2. The University shall establish standards for the scheduling of meetings and events. This shall involve:

a. Publishing policies and procedures whereby members of the University community, upon suitable request, can reserve and use designated spaces within University buildings for public or private meetings or events;

b. Publishing policies and procedures whereby members of the University community, upon suitable request, can reserve and use designated outdoor spaces on the University campus for public meetings or events;

c. Publishing policies and procedures that specifically address requests involving groups composed entirely or predominantly of persons who are not members of the University community (see Section VI (p. 1535));
d. Consulting with the Committee on Open Expression with regard to the substance of the policies and procedures and the manner of their publication; and, if practicable, consulting with the Committee on Open Expression before denying a request for use of a room, facility, or space by an organization recognized by the University for a reason other than prior assignment of the room, facility, or space. In any event, any such denial must be reported promptly to the Committee.

c. Individuals or groups complying with the Vice Provost's or delegate's order may request that the Committee on Open Expression determine if the Guidelines were properly interpreted and applied to their conduct.

IV. Committee on Open Expression

A. Composition

1. The Committee on Open Expression consists of seventeen members: eight faculty members named by the Faculty Senate Executive Committee, two representatives of the Penn Professional Staff Assembly, one representative of the Weekly-Paid Professional Staff Assembly, and three undergraduate students and three graduate/professional students selected by the appropriate student governance organizations (currently the Nominations and Elections Committee of the Undergraduate Assembly and the Graduate and Professional Student Assembly).

2. Members of the Committee are appointed for the following terms:
   a. The faculty and representatives of the Penn Professional Staff Assembly are appointed to two-year terms, staggered so that in each year either two or three faculty members are appointed and one representative of the Penn Professional Staff Assembly is appointed.
   b. The representative of the Weekly-Paid Professional Staff Assembly is appointed for a two-year term.
   c. The undergraduate and graduate/professional student members are appointed to one-year terms.
   d. Vacancies shall be filled for the unexpired term by the appropriate nominating body or persons.

3. The Chair of the Committee shall be selected by the Committee on Committees from among the members of the Committee on Open Expression.

B. Jurisdiction

The Committee has competence to act in issues and controversies involving open expression in accordance with these Guidelines. The Committee’s responsibilities are the following:

1. Issuing rules to interpret or give more specific meaning to the Guidelines. Before adopting a rule, the Committee must hold an open hearing on the proposed rule and receive the views of individuals or groups. An affirmative vote of eight members is required for adoption, modification or revision of a rule to be effective.

2. Recommending to the University Council proposals to amend or repeal the Guidelines. An affirmative vote of seven members is required to make such recommendations.

3. Giving advisory opinions interpreting the Guidelines at the request of a member of the University community for the purpose of advising that person or the University community. Such advice is provided to guide future action. If the Committee does not give a requested opinion, it must indicate its reasons for not doing so. The Committee must respond to such requests as soon as feasible but in any event not later than within one month of the receipt by the Chair of the Committee.

4. Giving advisory opinions interpreting the Guidelines at the request of administrative officials with responsibilities affecting freedom of expression and communication. Such advice is provided for the purpose of guiding future action.
5. Mediating in situations that involve possible violations of the Guidelines. Those Committee members available at the time may act on behalf of the Committee. In carrying out the mediation function, the Committee or those members present may advise the responsible administrative officials and any other person with respect to the implementation of the Guidelines. Those Committee members who have acted on behalf of the Committee must report on their activities to the full Committee.

6. Reviewing the following administrative decisions for the purpose of providing advice on future actions.
   a. At the discretion of the Committee, administrative decisions involving these Guidelines made without consultation with the full Committee.
   b. All instructions by the Vice Provost or delegate to modify or terminate behavior under Section III.B.3 (p. 1533) of these Guidelines.

7. Investigating incidents involving the application of these Guidelines to aid the Committee in its functions of rule making, recommending changes in the Guidelines or issuing advisory opinions. Such functions provide guidance to the University community for future action. The results of Committee investigations for these purposes shall not be a part of the initiation, consideration or disposition of disciplinary proceedings, if any, arising from the incidents.

8. Adopting procedures for the functions of the Committee, varied to suit its several functions, consistent with these Guidelines. Procedures that are not wholly matters of internal Committee practice must be made public in advance of implementation. Except as otherwise provided, the Committee may determine its own voting procedures.

9. Submitting an annual report to the Council and the University on the status of the Committee’s work in the University journal of record.

C. Procedures

1. Except as provided with respect to the mediation function in Section IV.B.5 (p. 1534), seven members of the Committee constitute a quorum.

2. The Committee can authorize subcommittees, selected from its own members, to act for the Committee in any matter except the issuance of rules interpreting or implementing the Guidelines or the making of recommendations to amend or repeal the Guidelines.

3. The Committee shall respect the privacy of individuals as its general policy and shall maintain the right to declare the confidentiality of its proceedings.
   a. If a person appearing before the Committee requests that his or her testimony or information be kept confidential, the Committee shall consider such a request. The Committee shall determine whether honor that request and shall inform that person of its decision before testimony is given.
   b. Minutes of particular Committee meetings may be declared confidential by the Committee or be so declared at the discretion of the chair subject to review by the Committee.
   c. All Committee documents containing confidential material, as determined by the chair, shall be clearly marked "confidential" and shall carry a warning against unauthorized disclosure.

V. Responsibilities for Enforcement

A. It is the responsibility of the Vice Provost for University Life (hereafter referred to simply as the "Vice Provost") to protect and maintain the right of open expression under these Guidelines.

B. Observation of meetings, events or demonstrations, when deemed necessary by the Vice Provost to protect and maintain open expression, shall be the responsibility of the Vice Provost, who may delegate such responsibility. This delegate shall have full authority to act in the name of the Vice Provost under these Guidelines.

1. The observer (Vice Provost or delegate) shall identify himself or herself to those responsible for the meeting or event or to the leaders of the demonstration.

2. The Vice Provost shall attempt to inform the chair of the Committee on Open Expression of meetings, events or demonstrations to which an observer will be sent. The chair may designate a member or members of the Committee to accompany and advise the observer. Such a Committee representative shall also be identified to those responsible for the meeting or event or to the leaders of the demonstration.

3. Except in emergencies, the Vice Provost’s authority under these Guidelines shall not be delegated to employees of the University’s Department of Public Safety. The role of public safety personnel at a meeting, event or demonstration is defined below, in Section V.C.3 (p. 1535).

4. Any observer or Committee representative who attends a meeting, event or demonstration shall respect the privacy of those involved. If there has been no violation of these Guidelines, other University regulations, or applicable laws, an observer, committee representative, or public safety employee who attends a meeting, event or demonstration shall not report on the presence of any person at such meeting, event or demonstration.

C. The Vice Provost or delegate is responsible for enforcing Section III.B (p. 1533), and may instruct anyone whose behavior is violating or threatens to violate these Guidelines to modify or terminate such behavior. The instruction shall include notice that failure or refusal to comply is a further violation according to Section III.B (p. 1533) of these Guidelines. However, an instruction or warning by the Vice Provost or delegate is not a prerequisite for a finding that a violation has occurred.

1. When the Vice Provost or delegate declares that an individual or a group has violated the Guidelines, he or she may request to examine their University identification.
   a. Failure to comply with this request is in violation of the Guidelines.
   b. In the event that any person(s) are deemed by the Vice Provost or delegate, in consultation with available members of the Committee on Open Expression, to have violated the Guidelines and such person(s) refuse to show University or other identification, the Vice Provost or delegate shall if practicable inquire of other individuals present as to the identity of the claimed violator(s). Identification by two other individuals shall suffice to establish identity. Should it not be possible to establish identity in this way, the Vice Provost or delegate may direct that photographs be taken of the participant(s) in the claimed violation. The Vice Provost or delegate must warn the individual(s) that their photographs will be taken unless identification is presented. Photographs and videotapes obtained without such warning may not be used as evidence in disciplinary proceedings. It is preferred...
that a member of the Committee on Open Expression take any such photographs; however, if no such person is able or willing to do so, another member of the University community may be requested to do so. As soon as safely practicable, all such photographs shall be turned over to the Vice Provost or delegate. Any photographs taken (including videotapes and negatives) shall be used solely by the Office of Student Conduct for the purpose of investigation of alleged violations and possible identification of alleged violators of these Guidelines. If it is determined that no violation has occurred, the Vice Provost or delegate shall destroy the photographs. If a violation is found to have occurred, after identification has been made and the case has been adjudicated, the Vice Provost or delegate shall destroy the photographs. None of the photographs shall be published. After each incident at which photographs are taken, the Committee on Open Expression shall report on the incident to the University Council, via the chair of the University Council Steering Committee, regarding what happened in the incident, which individuals saw the photographs, and the disposition of the photographs.

2. In carrying out this responsibility for safeguarding the right of open expression, the Vice Provost shall obtain the advice and recommendation of the representatives of the Committee on Open Expression whenever feasible.

3. The Vice Provost or delegate may request members of the University Police to attend meetings, events or demonstrations to help protect the open expression of those involved.
   a. Any person acting as an agent of the Division of Public Safety who attends a meeting, event or demonstration in a University location shall be clearly identifiable as such and in normal duty uniform. (Arms may be carried if they are part of "normal duty uniform").
   b. Public Safety personnel also may attend meetings, events or demonstrations when requested to do so by the person or group responsible for the event, when prominent public figures are involved, or when the Commissioner of Public Safety or delegate determines that there exists an imminent danger of violence at the event.

4. Terminating a meeting, event or demonstration by force is a most serious step, as this action may exacerbate existing tensions and may lead to personal injury and property damage.
   a. Avoidance of injury to persons by the continuation of a meeting, event or demonstration is a key factor in determining whether it should be forcibly terminated. Property damage and significant interference with educational processes are also factors to be considered and may be of sufficient magnitude to warrant forcible termination.
   b. Whenever possible, the Vice Provost or delegate should consult with the Committee on Open Expression before seeking a court injunction against those involved in a meeting, event or demonstration or calling for police action.
   c. The Vice Provost or delegate shall inform those involved that he or she intends to seek an injunction or call for police intervention before he or she does so.
   d. When a meeting, event or demonstration is forcibly terminated, a full statement of the circumstances leading to the incident shall be publicized by the Vice Provost within the University.

D. 1. Cases involving undergraduate students are referred to the Office of Student Conduct who investigates the event and decides what disciplinary proceedings, if any, to pursue.
2. Cases involving graduate or professional students are referred to the Office of Student Conduct or to the established disciplinary body of the school in which the student is enrolled.
3. Cases involving faculty are referred to the appropriate Dean or to the Provost.
4. Cases involving University staff or administrators are referred to that individual’s supervisor or any other person with supervisory responsibility over that individual.
5. Cases involving trustees and associate trustees of the University and members of the Boards of Overseers or other bodies advisory to the University are referred to the Executive Committee of the Trustees.

E. The Division of Public Safety shall not collect or maintain information about members of the University community, except in connection with alleged crimes, violations of University regulations, or as specifically authorized in writing by the President (to Public Safety and the Open Expression Committee). This regulation shall not affect personnel information concerning current, past or prospective employees of the Division of Public Safety.

VI. Non-University Persons

These Guidelines address themselves explicitly to forms of individual and collective expression in a University location by members of the University community. The extent to which the privileges and obligations of these Guidelines may be made applicable in particular circumstances to individuals who are not members of the University community shall be determined by the Vice Provost or delegate. Participants in meetings, events and demonstrations in a University location are required to comply with the instructions of the Vice Provost or delegate. (See III.A.2.c (p. 1532).)

1 An "unreasonable noise level" is defined as sound above 85 decibels measured by a calibrated sound-level meter at an "A" weighting on "slow" response ten feet away from and directly in front of the source, amplifier or loudspeaker when the latter is within 50 feet of a building.

2 Videotaped or closed circuit television information collected by posted, fixed location cameras is excluded, as long as it is in conformance with the rules of the CCTV policy as of January 13, 1999.

(Source: Almanac, March 16, 1993 (https://almanac.upenn.edu/archive/v39pdf/n25/031693.pdf))

These are interpretative guidelines adopted by the members of the 2014-15 Committee on Open Expressions of the University Council, pursuant to Guidelines on Open Expression, Section IV.B.

I. Inviting Speakers to Campus

A. The Guidelines clearly express the foundational value of free speech at Penn (I.A.); "The University of Pennsylvania, as a community of scholars, affirms, supports and cherishes the concepts of freedom of thought, inquiry, speech, and lawful assembly. The freedom to
experiment, to present and examine alternative data and theories; the freedom to hear, express, and debate various views; and the freedom to voice criticism of existing practices and values are fundamental rights that must be upheld and practiced by the University in a free society." These values are of paramount importance: "In case of conflict between the principles of the Guidelines on Open Expression and other University policies, the principles of the Guidelines shall take precedence" (I.D).

By allowing a controversial speaker to speak or a group to organize and invite a speaker or hold an event, the University of course in no way endorses that speaker’s or event organizer’s content or viewpoint; rather, it affirms the value of creating a robust marketplace of ideas and fostering reasoned disagreement and discourse.

B. The Guidelines on Open Expression already unambiguously forbid discriminating against particular content and viewpoints (I.B): "the substance or nature of the views expressed is not an appropriate basis for any restriction upon or encouragement of an assembly or demonstration." The unpopularity of a speech’s content or viewpoint is not a reason to suppress speech. Objectors may not have a "heckler’s veto" over speech with which they disagree. Allowing threats of protests or violence to suppress speech in any way would encourage protesters to make such threats. In keeping with this foundational principle, the University has never revoked a commencement speaker’s invitation to speak based upon the substance of the speaker’s views, including any controversy they might generate.

Most speakers at Penn are invited not by the University itself, but by particular organizations, departments, schools, and individuals at Penn. The Guidelines protect members of the entire University community against official reprisals for hosting controversial speakers and events. An event organizer is at liberty to change its mind freely, without duress, and to cancel an event or a speaker invitation. Other members of the University community likewise have the right to criticize a proposed speaker’s or event’s substance or viewpoint, or even to call upon the event organizer to cancel an event or rescind an invitation. But they may not go beyond criticism to exert any duress on the event organizer or speaker to withdraw. Duress includes any express or implied threat—by an administrator, a member of an administrative staff, a student leader, or a faculty member or teaching assistant in a supervisory or hierarchical relationship to an event organizer or speaker (particularly one within the same department or school)—to an organization’s or speaker’s or event’s safety, recognition, registration, budget, funding, or access to venues or security, or to any faculty, student, administrator, or staff member’s employment, tenure candidacy, funding, grades, honors, academic standing, or other status within the University, or a threat of violence or similar unlawful conduct. Any such duress, express or implied, gives rise to the natural inference that the actor is seeking to suppress speech because it is controversial or unpopular. That would amount to "any restriction upon" "the substance or nature of the views expressed," in violation of the Guidelines (I.B).

C. The norm at the University is to allow reservations of rooms and other venues on a first-come, first-served basis. Denying a room-reservation request on any other basis, or worse rescinding an existing reservation of a room or other venue, raises the almost inescapable inference that the denial or rescission is based on "the substance or nature of the views expressed" (I.B). Thus, the Guidelines already require, "if practicable, consulting with the Committee on Open Expression before denying a request for use of a room, facility, or space by an organization recognized by the University for a reason other than prior assignment of the room, facility, or space. In any event, any such denial must be reported promptly to the Committee" (III.A.2.d).

The same principle, in keeping with the Guidelines’ letter and spirit, applies to the authorization of events and to the provision of security, audiovisual, publicity, and other logistical support. An organization must of course have a budget sufficient to defray the necessary expenses and must reserve any such resources sufficiently in advance to allow the University to provide them on a first-come, first-served basis. Once such reservations have been made with adequate funding and advance planning, however, and particularly once a student group, faculty member, school, department, or organization has formally invited a speaker, whether by contract or other formal invitation such as one on University letterhead, any rescission or compelled modification of existing reservations or security arrangements raises the strong inference that the rescission or modification is based on "the substance or nature of the views expressed" (I.B). “[If practicable, [any member of the University community must thus] consult] with the Committee on Open Expression before denying [such] a request [or rescinding or forcibly modifying such a reservation] . . . for a reason other than prior [reservation of the scarce resource at issue]. In any event, any such denial [including a rescission or compelled modification] must be reported promptly to the Committee” (III.A.2.d).

D. “[T]o ensure the continuing openness and effectiveness of channels of communications” at Penn, the Guidelines establish the Committee on Open Expression (I.C). The Committee is expressly charged with "its major tasks" of "interpreting these Guidelines" and recommending policies and procedures for the improvement of all levels of communication" (I.C). The Committee is also expressly charged with preventing, mediating, and resolving conflicts related to open expression (IV.B).

Penn’s tradition strongly encourages consulting with interested stakeholders across campus. On issues involving open expression, such consultation ought to include the Committee on Open Expression and the Office of the Vice Provost for University Life. The Committee strongly encourages students, faculty, staff, and campus organizations and groups to raise such issues at the earliest possible opportunity. If a student group or other University of Pennsylvania affiliate believes that a member of the University community is violating or attempting to violate the Guidelines on Open Expression, including any of the foregoing provisions, it may ask the Office of the Vice Provost for University Life to mediate to resolve the issue. If the mediation does not produce a mutually satisfactory resolution, the aggrieved party may file a complaint with the Committee on Open Expression, or with the chair, administrative liaison, or members of the committee if a quorum is not immediately available.

II. Open Expression in Electronic Media and Cyberspace

The University's Guidelines on Open Expression were originally drafted decades before the spread of email and the Internet and well before the creation of social media, and therefore do not expressly mention electronic forms of communication. But their principles apply equally online.
The value of free and open expression and vigorous debate apply with equal force to newer forms of communication, including emails, web sites, social media, and other technologies and communication media. As the University's Information Systems and Computing Department's Policy on Acceptable Uses of Electronic Resources puts it, "The University's commitment to the principles of open expression extends to and includes the electronic information environment, and interference in the exercise of those rights is a violation of this policy and of the Guidelines on Open Expression". Whether communications occur on Locust Walk or in cyberspace, open expression remains equally valuable to the University and equally protected to the same extent, under the same principles, and subject to the same limitations as non-digital forms of communication.

Involuntary Leave of Absence Policy

I. Introduction

The University of Pennsylvania provides a wide range of services to support and address the mental and physical health needs of students. Our first concern is for the health and welfare of each individual in our community. Our goal is to enable all of our students to participate fully as members of Penn's academic community. However, students whose psychiatric, psychological, or other medical condition causes them to pose a threat to themselves or others, or causes them to significantly disrupt the educational and other activities of the University community, may be required to take a leave of absence from the University. Under these circumstances, students will be given the opportunity to take a voluntary leave through the process in place in their school. Should a student decline to take a voluntary leave, the University may determine that the student's health and welfare, and/or the needs of the community, require a period of involuntary leave of absence. The following policy establishes the protocol under which an involuntary leave of absence may occur and the process for return from leave.

II. Guidelines

The University may place a student on an involuntary leave of absence or require conditions for continued attendance under the following circumstances when the student exhibits behavior resulting from a psychological, psychiatric, or other medical condition that:

- threatens, harms, or has the potential to harm the health or safety of the student or others;
- causes or threatens to cause significant property damage; or
- significantly disrupts the educational and other activities of the University community.

The process for withdrawal and return from leave is set forth below.

III. Withdrawal Process

When a student exhibits any of the behaviors described above, the matter should be brought to the attention of the Office of the Vice Provost for University Life who will be responsible for informing the Vice Provost for Education (or such person who holds those responsibilities at the time) that an involuntary leave may be warranted. The Office of the Vice Provost for University Life will manage the process, convene case conferences, and work with University and School offices to coordinate the delivery of services. In most cases, the student will be required to undergo an immediate assessment of his or her psychological, psychiatric or other medical condition. This assessment will be performed by Counseling and Psychological Services (CAPS), the Student Health Service, or other appropriate professionals.

The student will be notified that the Provost's Office is seeking to determine whether he or she should be required to take a leave of absence. When reasonably possible, the student will be given the opportunity to confer with the Vice Provost for Education or his/her designee to provide additional information for consideration.

In consultation with the School Dean and the Office of the Vice Provost for University Life, the Vice Provost for Education will review the available information and make a decision that may include the following:

- that the student remain enrolled with no conditions;
- that the student remain enrolled subject to conditions (including a description of those conditions); or
- that the student be placed on an involuntary leave of absence.

If the University's decision is to allow the student to remain enrolled subject to conditions, then the student's failure to comply with the conditions may, after appropriate consideration, result in the imposition of an involuntary leave.

If the University's decision is to require an involuntary leave of absence, the decision will also indicate the length of the leave and, in consultation with the student's school, describe the conditions (if any) under which the student may seek to return from leave.

The student shall be informed in writing by the Vice Provost for Education of the leave decision and the basis for the decision, the effective date of the leave, and conditions for return (if applicable). If a student is permitted to remain enrolled subject to conditions, the student shall be informed in writing of the effective date and the duration of the modified attendance.

IV. Appeal

A student subject to this policy may appeal any decision of the Vice Provost for Education to the Provost. A student who wishes to appeal must submit a written letter of appeal to the Provost within three (3) days of receipt of the Vice Provost for Education's decision. The letter of appeal must state why the student believes that the Vice Provost's decision was unwarranted under the circumstances. After reviewing the appeal letter the Provost may meet with the student, as the Provost determines appropriate. In addition, the Provost may review relevant documents and confer with University officials before reaching a decision on the appeal. The Provost will render a decision upholding, rejecting, or modifying the determination of the Vice Provost for Education.

In addition to the appeal process described above, a student subject to this policy may also seek a resolution of concerns through the grievance procedures described in the Penn Book.

V. Temporary Removal

If the Vice Provost for Education has reason to believe, based on the information available, and in consultation with professionals with appropriate expertise, that the student's continued presence on campus poses an imminent threat of significant harm to him or herself or to others in the community, the Vice Provost for Education may take immediate action to remove the student from campus pending receipt and review of relevant information and a determination. At the Vice Provost for Education's discretion, this temporary removal may remain in place pending completion of any appeal process.

VI. Process for Return from Leave

A student seeking a return from leave must apply in writing to the Office of the Vice Provost for University Life. Such a request must be submitted...
no less than 30 days before the beginning of the semester in which the student seeks to reenroll. The student must demonstrate that he/she has met any conditions for return specified by the University.

The University may require any documentation or evaluation it deems appropriate. (Reports from health professionals should be directed to the director of CAPS or Student Health Services.) In addition, the University may require a release from the student to enable CAPS or SHS to discuss the student's condition with his/her treating health professional.

In consultation with the School Dean and the Office of the Vice Provost for University Life, the Vice Provost for Education will review the request and other relevant information, including the student's compliance with specified conditions for return from leave and the assessments of CAPS or Student Health Services and other health professionals, and make a determination of whether it is appropriate for the student to return.

If the Vice Provost for Education denies the request to return from leave, the student may challenge that decision by submitting a written appeal to the Provost within 5 days of receipt of the Vice Provost's decision.

VII. Confidentiality

All records concerning involuntary leaves of absence will be kept in accordance with the University confidentiality policy and other applicable policies. The student's transcript will indicate only the notation of "leave of absence."

Note: A student on leave may not participate or hold a leadership position in a registered University organization.

VIII. Administration of the Process

Administrative duties with respect to convening this leave process and maintaining its records will be the responsibility of the Office of the Vice Provost for University Life.

Missing Students Notification Policy

Any member of the University community, including parents, who believes that a Penn student is missing should notify the University of Pennsylvania Police Department (UPPD) in the Division of Public Safety. To report a missing person, dial 5-1-1 from a campus telephone, use one of the blue light emergency telephones on campus and in the surrounding neighborhood, or dial (215) 573-3333 from an off-campus or cell phone.

In addition, the person should notify the Office of the Vice Provost for University Life (VPUL). VPUL and the Division of Public Safety are responsible for coordinating efforts in response to a report of a missing student. Any other University office that receives a report of a missing student is responsible for promptly notifying UPPD and VPUL of such report.

When a Penn student is reported to be missing, the University will take steps to try to locate the student or to determine why the student has not been seen. If UPPD determines that a police investigation is warranted, the University will support the investigation by providing information relevant to the search for the student, including photos, schedules, etc.

All students are strongly encouraged to provide the University with a confidential contact whom the University will notify in the event that the student is determined to be missing. This contact information, which will be maintained in the University's Management Information Services (UMIS) database and Advisor-in-Touch, will be accessible only to authorized campus officials and law enforcement authorities and will be used only in connection with responding to a report that the student is missing.

To register a contact person, a student should go to the Penn Portal home page, and under "Action items for all students" click on the link "Emergency Contact." This will direct the student to the "Penn-in-Touch Emergency Contact" page (using Penn Key and password) where the student should select the tab for "Emergency or Missing Person Contact(s)" and provide the information requested.

If a student has been missing for more than twenty-four (24) hours, the Division of Public Safety or the University, through VPUL, will notify the student's designated missing persons contact. UPPD will also notify the Philadelphia Police or other appropriate local police. If the missing student is under 18 years old and is not emancipated, the Division of Public Safety will notify the student's custodial parent or guardian and/or any other designated contact within 24 hours of the determination that the student is missing. In addition, UPPD will enter the missing student into the National Crime Information Center database. For students over 18 years of age who have not designated a missing person contact, UPPD may notify the law enforcement agency where the student's primary residence is located.

With respect to any student determined to be missing, the Division of Public Safety and/or VPUL may notify others at the University as appropriate—including, but not limited to, RAs, Deans, the Office of Student Affairs/Fraternity Sorority Life (in the case of a student residing in a fraternity or sorority) and the Office of International Programs (in the case of an international student). In addition, VPUL may contact parents and others if the student is not located within a reasonable period.

Parking Regulations

General Information

These regulations are intended to facilitate the work of the faculty, staff, students, and visitors through control of the parking and movement of motor vehicles of these individuals while on campus. The fact that a person parks in violation of any regulations and is not towed does not mean that the regulation is no longer in effect.

The University is not responsible for loss or damage to your car or personal property within it while it is parked on University facilities. To avoid losses and the inconvenience they cause, park your car carefully so that it will not be struck by others, lock your car and avoid leaving personal items inside. Individuals are particularly encouraged not to leave citizen band radios and tape players visible. These should be disconnected and locked in the trunk of the car. Any car not displaying a parking sticker will be towed away at owner's expense.

The Department of Transportation and Parking also coordinates a van pool program and car pool matching service. Information about these functions may be obtained by calling 898-8667.

Towing Policy

Motor vehicles in University facilities (including parking garages and lots) without the appropriate parking permit sticker are towed by a private contractor. The towing fee and designated location to recover towed cars are posted at all University parking facilities. The contractor is bonded and is responsible for any damage that may occur to a car in the process. The contractor's personnel will release, to its owner, a car
that has been towed upon payment of towing fee plus storage charge. If an owner finds his car about to be towed away, he may pay the tow truck operator a drop fee (and have his car released immediately) to reimburse the operators for the time that has been expended in coming to get the violating vehicle. The contractor requires payment in cash before releasing a towed car or about to be towed car. If in doubt as to the location where towed vehicles may be claimed, please call Public Safety at 898-7297 or 7298.

Private Streets
Several streets within the University campus have been designated as private streets under the control of the Department of Public Safety. These include all roads bordered by Walnut, 33rd and 40th Streets except 38th and 34th Streets. Parking is specifically forbidden on all private thoroughfares. Illegally parked vehicles on the streets will be ticketed and/or towed by a private contractor.

Permits
Faculty, staff, and students must apply for a parking permit for all motor vehicles (including two- and three-wheeled vehicles) if they park or expect to park on the University grounds. Fees will be charged and decals issued which will allow vehicles to be parked in specific parking areas assigned to them. For information call the Parking Office (898-8667).

Registration is considered completed when decals are affixed to vehicles being registered. Decals are not transferable. Replacement decals may be obtained at the Parking Office, Suite 447A, 3401 Walnut Street.

Towing Appeals
A towed vehicle is only released after the fee has been paid to the towing contractor. When a student or employee feels that her or his vehicle has been unjustly towed, she or he may appeal to the Parking Violations Board for a refund. The appeal should be in writing, state the relevant facts, and be addressed to:

Attn: Associate Director for Housing Operations
Parking Violations Board
Housing and Conference Services
3702 Spruce St.
Stouffer Commons
Philadelphia, PA 19104

A fee refund is made when the Board decides in the complainant’s favor.

Patent and Tangible Research Property Policies and Procedures
(Note: Words appearing in capital letters are defined in Article 5 unless defined in the document itself.)

The University periodically revises and updates its policies and procedures regarding patents and tangible research property, to help ensure that such policies and procedures keep pace with best practices and national trends in this highly significant area. Such revisions have been the subject of previous resolutions presented to the Board of Trustees in 2010, 2005 and 1993. In 2014, the Vice Provost for Research undertook a review of the existing Patent Policy and advanced revisions designed to keep the University at the leading edge of the rapidly changing landscape around commercialization of university research. The proposed revisions were discussed and approved by the Council of Deans, the Academic Planning and Budget Committee, the Provost’s Council on Research, the Faculty Council on Innovation, the Center for Innovation Steering Committee, the Faculty Senate Committee on Faculty and the Administration, and the Faculty Senate Executive Committee. The proposed revised policy was published for Comment in Almanac (January 20, 2015), and all comments were taken under advisement. The final revised policy was adopted by the Board of Trustees at its meeting of February 25, 2015 and made effective as of July 1, 2015.

—Vincent Price, Provost
—Dawn Bonnell, Vice Provost for Research

Article 1. Preamble
1.0 The Trustees of the University of Pennsylvania affirm the following principles as the basis for governing the intellectual property created by faculty, employees, students and guest scholars of the University.

1.1 The mission of the University includes the stimulation of basic and applied research activities of faculty, employees and students of the University, and the dissemination of the results of their research for the purpose of adding to the body of knowledge and serving the public interest.

1.2 The purpose of this policy is to encourage and enable faculty, employees and students to translate new knowledge into social good and provide a framework within which the University can support and facilitate these actions.

1.3 The University endeavors, where it deems appropriate, to secure intellectual property protection for the products of such research and to encourage commercial investment in and development of University intellectual property for the benefit of the public.

1.4 The community has endowed the University with certain privileges, resources and assets in the expectation that no single party will derive sole benefit or be unjustly enriched from what the community has endowed to the University.

1.5 The University as a non-profit organization endeavors to marshal its resources and exploit its assets to serve the public interest, and in so doing reinvests in the research enterprises of its faculty, employees and students. Members of the University community share in the University’s responsibility to serve the public interest, and have a duty to disclose and assign their inventions.

1.6 The University is regularly the recipient of grants from the government, foundations or commercial enterprises for the support of research, and is subject to legal and contractual obligations imposed by these entities.

1.7 The University wishes to share the economic benefits of inventions or other intellectual property with the creators of such works in a way that is consistent with the research and educational mission of the University, and conforms to the University’s obligations to regulatory authorities, research sponsors and licensees.

1.8 In protecting and managing its intellectual property assets, the University insists that the academic freedom of its faculty and students be preserved, and that collegiality and the open expression of ideas by and among members of the University community be encouraged.
Article 2. Policy and Procedures on Inventions and Patents

2.0 Policy Statement on Inventions and Patents

It is the policy of the University that all INVENTIONS, together with associated MATERIALS, which are conceived or reduced to practice by INVENTORS in the course of employment at the University, or result from work directly related to professional or employment responsibilities at the University, or from work carried out on University time, or at University expense, or with SUBSTANTIAL USE OF UNIVERSITY RESOURCES under grants or otherwise, are the property of the University, effective immediately as of the time such INVENTIONS are conceived or reduced to practice. INVENTORS hereby irrevocably assign to the University all right, title and interest in and to the INVENTIONS, MATERIALS and related patent applications and patents, and shall cooperate fully with the University in the preparation and prosecution of patent applications and patents. Patents, as they may be available on such INVENTIONS, may be applied for in any country by the University. The University will exercise its ownership and management of such INVENTIONS, with or without economic benefit, with due regard for the principles set forth in the Preamble of this Policy. Procedures for implementation of this Policy, including a PARTICIPATION AGREEMENT, shall be developed and promulgated by the President of the University.

2.1 Procedures for the Administration and Management of Inventions and Patents

The following procedures have been approved by the President as of the EFFECTIVE DATE:

2.1.1 Participation Agreement

All faculty, emeritus faculty, visiting faculty or other visitors using research facilities (including but not limited to individuals on sabbatical from another university or research facility), researchers, adjunct faculty, postdoctoral employees and trainees, graduate students, and undergraduate students participating in research as employees or otherwise, and all salaried employees, shall execute a PARTICIPATION AGREEMENT (Appendix A) as a condition of employment, matriculation, participation in research, or use of University resources. Notwithstanding the above, an individual acknowledges that he or she is bound by this Policy by accepting or continuing University employment or by using University resources or facilities, and acknowledges that he or she hereby irrevocably assigns all right, title and interest in and to INVENTIONS, together with associated MATERIALS, and patent applications and patents which may be issued, effective as of his or her first date of employment, matriculation, participation in research, or use of any University resources, whichever occurs first, regardless of whether he or she executes or executes a PARTICIPATION AGREEMENT. All students shall be advised of the University's intellectual property policies and procedures through publication and dissemination in the Penn Book: Resources, Policies and Procedures Handbook, and elsewhere.

2.1.2 Disclosure and Review

INVENTORS shall file INVENTION DISCLOSURES for all INVENTIONS covered by the PATENT POLICY promptly with the PENN CENTER FOR INNOVATION (PCI) at the University. PCI shall direct the review and management of the INVENTIONS under procedures and practices monitored by the EXECUTIVE COMMITTEE. PCI will undertake the review of the INVENTION DISCLOSURE within thirty (30) business days after the submission is completed, or if requested by one or more INVENTORS, PCI will use reasonable efforts to undertake the review sooner if necessary to facilitate an upcoming publication, presentation, or other public disclosure which could adversely affect whether to pursue patent protection. PCI will convey its determination whether the University wishes to retain title to and pursue a patent application on an INVENTION as soon as practicable, in writing, after completing its review of a completed INVENTION DISCLOSURE submission, and use reasonable efforts to convey such decision to all INVENTORS within three (3) months after receiving a complete INVENTION DISCLOSURE submission.

If the University wishes to retain title to an INVENTION, upon the request of the INTELLECTUAL PROPERTY ADMINISTRATOR (IPA), an INVENTOR shall sign all documents necessary for the University to protect an INVENTION, file patent application(s), comply with applicable law in connection with such INVENTION, and confirm in writing the INVENTOR's prior assignment to the University of all right, title and interest in and to such INVENTION.

2.1.3 Inventions Outside the Policy

If a faculty member, emeritus faculty, visiting faculty, other visitor using research facilities, researcher, adjunct faculty, postdoctoral employee or trainee, graduate student, undergraduate student, or salaried employee (an "INDIVIDUAL") believes that a given INVENTION was made outside the scope of the PATENT POLICY, he or she shall provide the IPA with a written statement of the circumstances leading to the making of the INVENTION. If, after reviewing the facts, the IPA determines that the INVENTION falls outside the scope of the PATENT POLICY, the IPA shall confirm in writing within thirty (30) days after receiving such written statement that the University has no right, title and interest to the INVENTION. If the facts are equivocal, or if the IPA believes that such INVENTION falls under the PATENT POLICY, the matter of ownership will be referred by the IPA or the INDIVIDUAL to the APPEALS BOARD, and the APPEALS BOARD shall make a recommendation to the President concerning ownership. Nothing in this PATENT POLICY is intended to imply or assume that an emeritus faculty member is making or has made a SUBSTANTIAL USE OF UNIVERSITY RESOURCES, or imply or assume that his or her invention falls under or outside the scope of this PATENT POLICY.

If an INDIVIDUAL makes an INVENTION which is outside the scope of the PATENT POLICY, and the IPA (or, if appealed, the President) agrees that such INVENTION is outside the scope of the PATENT POLICY, such INDIVIDUAL may request in writing to use the services of PCI in connection with the assessment, protection, and/or commercialization of such INVENTION. PCI, in its sole discretion, may decline, or may elect to use its personnel and services with respect to such INVENTION, on the condition that:

1. the INDIVIDUAL makes ASSIGNMENT to the University in a writing deemed sufficient by PCI; and
2. the INDIVIDUAL shall be deemed to be an INVENTOR and such invention shall be deemed to be an INVENTION within the scope of this PATENT POLICY for all purposes (including but not limited to distributions), effective as of the date of ASSIGNMENT.

The use of PCI shall be deemed to be a SUBSTANTIAL USE OF UNIVERSITY RESOURCES. PCI's decision to decline shall not be reviewable by the APPEALS BOARD.
2.1.4 Student Inventions.

2.1.4.1 INVENTIONS made by students will remain the property of the students except:

1. when an INVENTION is made in the course of employment at the University, or
2. when an INVENTION results from work directly related to employment responsibilities at the University, or
3. when an INVENTION results from work or research performed under a grant or other sponsorship where the grant or sponsorship requires ASSIGNMENT to the University, or
4. when an INVENTION is created with another INVENTOR who has a duty to make or has made ASSIGNMENT to the University.

In such instances, students are hereby deemed to have irrevocably transferred and assigned all of their right, title and interest in and to such INVENTION, effective as of the first date conceived or reduced to practice, regardless whether or when such student executes a PARTICIPATION AGREEMENT or other written agreement confirming assignment, and such undergraduate student shall be deemed an INVENTOR for purposes of sharing in distributions and otherwise pursuant to this Policy.

2.1.4.2 INVENTIONS created by or resulting from research carried out in University laboratories as part of a post-baccalaureate or postdoctoral degree or non-degree program shall be subject to this PATENT POLICY. In such instances, the individual shall be deemed to have hereby irrevocably made ASSIGNMENT to the University effective as of the first date of matriculation, and will be deemed an INVENTOR for purposes of distributions and otherwise pursuant to this PATENT POLICY, regardless of whether or when such individual executes or executed a PARTICIPATION AGREEMENT or other written agreement confirming assignment.

2.1.5 Return of Inventions

2.1.5.1 Inventions Made without Outside Sponsorship. If an INVENTION is made without sponsorship of the federal government or other sponsor, and the University does not wish to pursue a patent application in the United States or other jurisdiction, or elects to abandon a pending patent application, or does not wish to own an issued patent on a given INVENTION, the IPA may, after consultation with and subject to the approval of the Vice Provost for Research, return all of the University's right, title and interest to the INVENTION, patent application or issued patent to the INVENTORS, subject to any other rights retained by the United States Government or other sponsors, and subject to and upon the terms and conditions set forth in Section 2.1.5.3. If the INVENTION was made with sponsorship of the federal government, the INVENTORS are responsible for obtaining written approvals from the appropriate federal government representatives allowing the University to transfer the University's right, title and interest to the INVENTION to the INVENTORS, and providing such written approvals to PCI prior to any return to the INVENTORS. If the INVENTION was made with sponsorship of the federal government, to the extent applicable under then-current law, the INVENTOR shall use reasonable efforts to arrange for development and commercialization opportunities for the INVENTION, and otherwise comply with all laws regarding the INVENTION and any additional requirements imposed by the federal government when approving the transfer to the INVENTORS.

2.1.5.3 Conditions Regarding Return of Inventions. Prior to the University transferring its right, title and interest to an INVENTION and any related patent(s) and/or patent application(s), each INVENTOR and PCI shall enter into a written agreement including at least the following terms:

2.1.5.3.1 If the University elects to return an INVENTION made by more than one INVENTOR, the University will return an undivided interest in the whole, as defined by prevailing United States patent law, to each INVENTOR, unless directed otherwise in writing by all INVENTORS.

2.1.5.3.2 In every case in which an INVENTION is returned to an INVENTOR, the University hereby reserves a royalty-free, non-exclusive, irrevocable right to practice the INVENTION for research, educational and clinical care purposes, and to permit other academic institutions and not-for-profit research institutions to do the same.

2.1.5.3.3 The University may seek reimbursement for any INVENTION ASSESSMENT COSTS incurred before the return from the INVENTOR. After the effective date of the return of the INVENTION, the University shall not be responsible for paying any ongoing INVENTION ASSESSMENT COSTS or other costs or expenses in connection with the returned INVENTION and any patents or patent applications for the returned INVENTION.

2.1.5.3.4 The INVENTOR or INVENTORS jointly and severally, shall pay the University five percent (5%) of all GROSS COMPENSATION, and report nonconfidential information at least annually to PCI regarding efforts to commercialize the returned INVENTION and GROSS COMPENSATION received.

2.1.5.3.5 Each INVENTOR shall represent and warrant that the INVENTOR has disclosed to PCI, as part of the INVENTION DISCLOSURE or otherwise: the best mode contemplated by the INVENTOR for carrying out the INVENTION; all facts and circumstances relevant to assessing the INVENTION DISCLOSURE and INVENTION; and has answered each question or inquiry from PCI about the INVENTION DISCLOSURE and INVENTION.
truthfully, to the best of the INVENTOR's knowledge and belief.

2.1.5.3.6 INVENTORS have the obligation to disclose to the IPA, and make ASSIGNMENT of, improvements on returned INVENTIONS at the time such improvements are conceived or reduced to practice, if such improvements are conceived or reduced to practice under circumstances subject to the PATENT POLICY.

2.1.5.3.7 Each INVENTOR shall acknowledge that the transfer of the University's interest in the INVENTION may raise issues under applicable University policies, including without limitation its conflict of interest policies and restrictions on use of University facilities and assets for private purposes, and that the return of an INVENTION does not constitute a waiver of any term in any University policy or its applicability to the INVENTOR. The INVENTOR will agree not to use University resources, personnel, time, facilities or assets to further develop, protect or commercialize the returned INVENTION, unless permitted after review by the University's Conflict of Interest Standing Committee, and approved by the Vice Provost of Research.

2.1.5.3.8 Each INVENTOR will, and will cause any licensees or third persons participating in the development and commercialization of the INVENTION, to indemnify the University from any claims arising out of or resulting from or in connection with the INVENTION and its development and commercialization. The University will transfer its right, title and interest as is, without warranties.

2.2 Conveyance of Rights to Inventions.

2.2.1 Licensing.
The University may convey rights to its INVENTIONS through license agreements under the terms of which the University retains all right, title and interest in and to its INVENTIONS, while granting to a commercial entity the right to make, use, and/or sell products based on the INVENTION(S).

2.2.1.1 INVENTORS or other University faculty or employees involved in the licensing of an INVENTION to a prospective licensee shall disclose any fiduciary or financial interest in or contractual relationship with the prospective licensee to their Deans and Chairs, or their relevant administrative supervisor, in accordance with the applicable University policy on conflicts of interest. In addition, INVENTORS or other University faculty or employees involved in the licensing of an INVENTION to a prospective licensee shall disclose any fiduciary or financial interest in that prospective licensee to the IPA, who shall refer consideration of the matter to the EXECUTIVE COMMITTEE.

2.2.1.2 PCI will notify INVENTORS of prospective licensees in an early stage of the negotiation process. The final decision on whether to license an INVENTION, to whom to license an INVENTION, the terms in the agreements, and otherwise how to proceed with the license rests with PCI, and is not appealable to the APPEALS BOARD or otherwise.

2.2.2 Exceptions to Licensing.
Exceptions to the requirement that rights be conveyed through a license agreement shall be considered only in extreme or unusual circumstances and shall require approval by the President of the University.

2.3 Distributions.
(For a hypothetical illustration of the distributions set forth in Sections 2.3.1 and 2.3.2, see Appendix C. Definitions for ADJUSTED PCI REVENUES FOR AN INVENTION, NET PCI INCOME FOR AN INVENTION, and other key definitions are in Article 5.)

2.3.1 Distribution of Adjusted PCI Revenues.
Unless otherwise required by law or contract, ADJUSTED PCI REVENUES for the INVENTION (defined in Section 5.0.1, but generally described as the PRO RATA SHARE of GROSS PCI REVENUES [defined in Section 5.0.13] minus the INITIAL DEDUCTION [defined in Section 5.0.14]), shall be distributed as follows:

2.3.1.1 The INVENTORS PERSONAL SHARE shall be thirty percent (30%) of the ADJUSTED PCI REVENUES for the INVENTION (See Sec. 2.3.4).

2.3.1.2 The INVENTORS RESEARCH ACTIVITY SHARE shall be twelve and one-half percent (12.5%) of the ADJUSTED PCI REVENUES for the INVENTION (See Sec. 2.3.5).

2.3.2 Distribution of Net PCI Income.
NET PCI INCOME for the INVENTION (defined in Section 5.0.22, but generally described as the amount remaining after distributions in Section 2.3.1, minus the PRO RATA SHARE of AGGREGATE PCI OPERATING COSTS [defined in Section 5.0.3]) shall be distributed as follows:

2.3.2.1 The DEPARTMENTS OF INVENTORS SHARE shall be twenty percent (20%) of the NET PCI INCOME for the INVENTION (See Sec. 2.3.6).

2.3.2.2 The SCHOOLS OF INVENTORS SHARE shall be forty percent (40%) of the NET PCI INCOME for the INVENTION (See Sec. 2.3.7)

2.3.2.3 The UNIVERSITY RESEARCH SHARE shall be forty percent (40%) of the NET PCI INCOME for the INVENTION (See Sec. 2.3.8)

2.3.3 Allocation of the EQUITY POOL.
(Procedures governing licensing transactions for EQUITY are set forth in Appendix B). Under license agreements for which the University has negotiated an EQUITY POOL, where, in accordance with Appendix B.A, EQUITY will be issued directly to the INVENTOR(S), the INVENTORS shall receive thirty percent (30%) of the EQUITY POOL, unless one or more INVENTOR receives EQUITY from the licensee outside of the EQUITY POOL. An INVENTOR who receives EQUITY from the licensee outside of the EQUITY POOL shall not receive EQUITY from the EQUITY POOL except with approval of the University. The IPA shall make a recommendation in this regard to the Vice Provost for Research, who shall make a determination in consultation with the relevant Deans. Furthermore, if one or more INVENTOR receives EQUITY outside of the EQUITY POOL the portion of the EQUITY POOL to be received by the other INVENTORS shall be reduced in proportion to the contribution to
the licensed INVENTIONS, as determined by PCI, made by the INVENTORS who receive EQUITY outside of the EQUITY POOL.

2.3.3.1 INVENTORS receiving EQUITY from the EQUITY POOL or outside the EQUITY POOL may also receive INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES for the INVENTION. An exception to this may arise in certain circumstances, such as when INVENTORS receive founders EQUITY, EQUITY for consulting services or other consideration from the licensee. In such cases, the University may determine that such INVENTORS shall not receive some or any of the INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES for the INVENTION. The IPA shall make a recommendation in this regard to the Vice Provost for Research, who shall make a determination in consultation with the relevant Deans.

2.3.3.2 Non-cash component of License. Any tangible, non-cash considerations (except EQUITY) in licenses will be distributed by PCI on a case by case basis, in consultation with the INVENTOR(S), Vice Provost for Research, and the relevant Dean(s).

2.3.4 Rules Governing the Inventors Personal Share.
The INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES for the INVENTION, under Section 2.3.1.1, shall be distributed among all INVENTORS (if more than one), as the INVENTORS unanimously designate in writing to the IPA. If the INVENTORS fail to make such unanimous written designation before the license agreement is executed, the INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES shall be distributed among all INVENTORS as PCI, in its sole discretion, shall designate. The INVENTORS share of the EQUITY POOL under Section 2.3.3 shall be distributed among all INVENTORS entitled to share in the EQUITY POOL (if more than one), as such INVENTORS unanimously designate in writing to the IPA. If the INVENTORS entitled to share in the EQUITY POOL fail to make such unanimous written designation before the license agreement is executed, the INVENTORS share of the EQUITY POOL shall be distributed among INVENTORS entitled to share in the EQUITY POOL as PCI, in its sole discretion, shall designate.

2.3.4.1 If an INVENTOR ceases employment at and association with the University, his or her designated portion of the INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES under Section 2.3.1.1 and of the INVENTORS share of the EQUITY POOL under Section 2.3.3 shall remain payable to such INVENTOR. If an INVENTOR dies, his or her designated portion of the INVENTORS PERSONAL SHARE shall remain payable to his or her estate.

2.3.5 Rules Governing the Inventors Research Activity Share.
The INVENTORS RESEARCH ACTIVITY SHARE, when the INVENTORS are faculty, shall be used only for research purposes approved by the Department Chair(s) of the relevant Department(s).

2.3.5.1 The INVENTORS RESEARCH ACTIVITY SHARE shall be divided among the INVENTORS (if more than one) in the same proportion as the INVENTORS PERSONAL SHARE is divided among the INVENTORS (the "DESIGNATED PROPORTION"), unless the INVENTORS unanimously request in writing, and the Dean(s) of the relevant School(s) and Vice Provost for Research approve, some other distribution.

2.3.5.2 If a sole faculty INVENTOR is no longer employed by or associated with the University, the INVENTORS RESEARCH ACTIVITY SHARE shall be distributed to the INVENTOR's School at the University to support research in the School. If there is more than one faculty INVENTOR, and one of those INVENTORS is no longer employed by or associated with the University, that share shall be distributed evenly to support the research activity of the INVENTORS who remain. If no faculty INVENTORS remain employed by or associated with the University, the INVENTORS RESEARCH ACTIVITY SHARE will be distributed to the INVENTORS School(s) to support research in the School(s).

2.3.5.3 When an INVENTOR is an undergraduate student, the INVENTORS RESEARCH ACTIVITY SHARE shall be distributed to the University's Center for Undergraduate Research and Fellowships (CURF) or its successor organization, or if no successor organization, to the Provost's Office to be used to further and support research by undergraduate students, through a budget approved by the Provost. When INVENTORS are graduate students or postdoctoral employees or trainees, the corresponding INVENTORS RESEARCH ACTIVITY SHARE shall be distributed to the laboratory to which they are primarily assigned or in which they primarily conducted the research leading to the INVENTION. If such INVENTORS do not have a primary laboratory affiliation, their corresponding INVENTORS RESEARCH ACTIVITY SHARE shall be distributed to their Department. Amounts so distributed shall be used to further the education and research activity of the INVENTOR while at the University and/or for other research purposes through a budget approved by the Department Chair(s) of the relevant Department(s).

2.3.5.4 When an INVENTOR is an emeritus faculty member at the time of the INVENTION, the INVENTORS RESEARCH ACTIVITY SHARE shall be distributed equally between the INVENTOR's last SCHOOL and the INVENTOR's last Department before assuming emeritus status, unless that emeritus faculty INVENTOR, and his/her Dean and Department Chair, agree in writing upon a different distribution, after a meeting with participation by the IPA and a representative from the Vice Provost for Research's Office. Such different distribution may include, without limitation, payment of all or a portion of such INVENTORS RESEARCH ACTIVITY SHARE to the emeritus faculty as part of his or her INVENTORS PERSONAL SHARE. Any such proposed different distribution of an INVENTORS RESEARCH ACTIVITY SHARE for an emeritus faculty INVENTOR is subject to review and approval by the Vice Provost for Research. The emeritus faculty INVENTOR may appeal the inability to reach an agreement upon a different distribution, or any disagreement by the Vice Provost for Research, to the Appeals Board. Amounts received by the School and/or the Department shall be used for research purposes only through a budget approved by the Dean(s) of the relevant School(s).

2.3.6 Rules Governing the Departments of Inventors Share.
The DEPARTMENTS of INVENTORS SHARE shall be used only for research purposes through a budget approved by the Dean(s) of the relevant School(s).

2.3.6.1 If an INVENTION is made by INVENTORS within a Division, Research Center, or Institute, the Department(s)
of the INVENTORS may make an equitable distribution of income to that Division, Research Center, or Institute from the DEPARTMENTS OF INVENTORS SHARE.

2.3.6.2 If an INVENTION is made by INVENTORS from different Departments, the DEPARTMENTS OF INVENTORS SHARE shall be divided among the Departments in the DESIGNATED PROPORTION. A Department shall retain its portion of the DEPARTMENTS OF INVENTORS SHARE if an INVENTOR from that Department is no longer employed by or associated with the Department or the University.

2.3.7 Rules Governing the Schools of Inventors Share.
The SCHOOLS OF INVENTORS SHARE may be used for any research purpose designated by the Dean(s) of the School(s). At the discretion of the Dean(s), any portion of the SCHOOLS OF INVENTORS SHARE may be distributed to Department(s) of the INVENTORS or used to support the research activity of the INVENTORS.

2.3.7.1 If an INVENTION is made by INVENTORS from different Schools, the SCHOOLS OF INVENTORS SHARE shall be divided among the Schools in the DESIGNATED PROPORTION. A School will retain its portion of SCHOOLS OF INVENTORS SHARE if an INVENTOR from that School is no longer employed by or associated with the School or the University.

2.3.8 Rules Governing the University Research Share.
The UNIVERSITY RESEARCH SHARE shall be used for the general support of research at the University as determined by the Provost. The Provost will release periodic reports describing the use of these funds.

2.3.9 Periodic Reports of Use of Funds to Support Research.
The Deans of each School that receives funds during the Fiscal Year as SCHOOLS OF INVENTORS SHARES or DEPARTMENTS OF INVENTORS SHARES shall release a report to the Vice Provost for Research at least once during the subsequent Fiscal Year describing the use of these funds for research purposes and the support of research.

2.3.10 Invention Revenue Distribution for Non-Academic Inventors.
When an INVENTOR is other than a faculty member, emeritus faculty, employee of an academic laboratory, student or postdoctoral employee or trainee, the distribution of ADJUSTED PCI REVENUES FOR THE INVENTION (other than the INVENTORS PERSONAL SHARE) and NET PCI INCOME for the INVENTION shall be determined by the President on a case-by-case basis with a recommendation from the IPA together with the Executive Vice President, the Vice Provost for Research, the Chief Executive Officer of the Medical Center (where applicable), relevant Deans, and/or other involved administrative heads.

2.3.11 INVENTORS with Joint Appointments.
If an INVENTOR has joint appointments in two or more Schools or Departments and there is no primary appointment (for example, a Penn Integrates Knowledge professor), the Deans shall determine an equitable apportionment of that INVENTOR’s portion of the INVENTORS RESEARCH ACTIVITY SHARE, DEPARTMENTS OF INVENTORS SHARE, and SCHOOLS OF INVENTORS SHARE, unless the Deans of such Schools had previously agreed on an allocation for such INVENTOR.

2.4 Implementation of Procedures for Distributions.
2.4.1 Inventions Disclosed and Licensed After the Effective Date.
Distributions from all INVENTIONS disclosed and licensed on or after the EFFECTIVE DATE shall be governed by the procedures in Section 2.3.

2.4.2 Inventions Disclosed Before the Effective Date, but Licensed After the Effective Date.
Distribution of income from all INVENTIONS disclosed before the EFFECTIVE DATE, but not yet subject to a license agreement as of the EFFECTIVE DATE, shall be governed by the procedures in Section 2.3.

2.4.3 Inventions Disclosed and Licensed Before the Effective Date.
All distributions during and after the fiscal year that the revised policy becomes effective, including distributions for an INVENTION whose disclosure or licensing was completed prior to the EFFECTIVE DATE of the revised policy, will be made according to the revised policy, and shall thus be governed by the procedures in Section 2.3.

2.5 Administration of Distributions and Reporting.
Distributions, with a report outlining how the amounts were calculated, shall be made to each recipient within forty-five (45) days after the end of the FISCAL YEAR. The University will not pay interest on amounts received and held by the University pending distribution.

2.6 Use of Outside Facilities.
Faculty members, employees or students who use research facilities at another institution or a corporation (including, without limitation, when on sabbatical from the University or as visiting faculty or visiting researchers) shall contact the IPA prior to commencing such use, for assistance in evaluating the policies of the host institution or corporation as appropriate. Graduate students who are conducting research in commercial research facilities should obtain a written assurance of their right to publish the results of their research. Faculty members, employees or students who engage in outside employment or consulting agreements are referred to Article 3.

Article 3. Policy and Procedures Relating to Consulting and Outside Activities

3.1 Consulting Policy.
As stated in the University policy entitled “Conflict of Interest Policy for Faculty Members” (Section II.E.10 of the Handbook for Faculty and Academic Administrators), the University recognizes the value to the institution and to its faculty of permitting the faculty to engage in extramural consulting activities. These activities offer the potential of strengthening the competence and expertise of the faculty as scholars, as well as the potential of developing the intellectual property owned by the University. In all circumstances where consulting activities may result in the creation of an INVENTION, the following procedures and principles apply:

3.1.1 To ensure that the consulting activities are consistent with faculty members’ professional obligations to the University, responsibilities with respect to the avoidance of conflicts of
interest, and to their commitments for teaching and research, faculty members should comply with the provisions of Section 11.6.10 of the Handbook which include both the prospective disclosure of the potential consulting activities to their Department Chairs and School Deans, as well as written reports on such activities as set forth in the Handbook, or other related procedures established by their School or Department.

3.1.2 In any case where the faculty member, Department Chair, or Dean believes that there is a potential conflict of interest or conflict of commitment, the matter shall be referred to the University Conflict of Interest Standing Committee. The Committee shall review the matter and make recommendations to the Provost, or his/her designee, who has the authority to approve, modify, or disapprove any consulting arrangement that raises a potential conflict. In determining whether review by the Conflict of Interest Standing Committee is appropriate, the faculty member, Department Chair, or Dean may consult with the General Counsel.

3.1.3 In all consulting relationships, faculty members have the duty to protect any intellectual property owned by the University and the ability of the University to fulfill its obligations to government funding agencies and commercial and non-commercial sponsors of research.

3.2 Consulting Agreements.

Except to the extent set forth in Section 3.4 below, faculty members contemplating entering into a consulting agreement shall ensure that his/her obligations under the PATENT POLICY are not compromised and the University’s rights are protected. Specifically, faculty members have the responsibility to ensure that the following terms are not part of any consulting agreement:

1. confidentiality provisions that prevent the individual from publishing research or from reporting results of University research to research sponsors;
2. confidentiality provisions that prevent the individual from providing TANGIBLE RESEARCH PROPERTY or other deliverables to a University research sponsor or other entity as required by federal law, federal regulation, or by sponsor agreement;
3. intellectual property provisions that preclude the consultant from assigning any inventions that arise out of the consulting relationship to the University; and
4. any provisions that are designed to circumvent University policies and procedures for the disclosure, review and approval of sponsored research projects or other University policies concerning intellectual property.

Moreover, in the context of academic research, it may be difficult to avoid commingling of research activity or resources with services provided under the consulting agreement. It is the obligation of the faculty member in negotiating the consulting agreement to ensure that any consulting relationship entered into protects against any such commingling of research or resources.

3.2.1 Faculty members may seek the assistance of the IPA in determining whether a proposed agreement conforms to these guidelines. Such assistance should not be construed to be advice or counsel as to the faculty member’s personal interests in the consulting agreement.

3.3 Consulting Activity with a Company Providing Sponsored Research.

In addition to the procedures set forth above, if a faculty member contemplates a consulting relationship with a company that sponsors research for that individual at the University, the proposed consulting agreement shall be disclosed to the IPA, along with an explanation of the nature and scope of the individual’s anticipated activities. The IPA shall refer the matter to the University Conflict of Interest Standing Committee, with copies of all applicable documentation to relevant Deans, Department Chairs and the General Counsel, or his/her designee, for review. The Committee shall make recommendations to the Provost, or his/her designee, who shall have the authority to approve, modify or disapprove any such proposed agreements.

3.4 Exception to the General Consulting Policy.

Notwithstanding the policies articulated in Article 2.0 above, and in the general consulting policy set forth above, the University recognizes that faculty members may seek to undertake consulting engagements, at the direction of a firm or entity other than the University, that may require that any resulting INVENTIONS be assigned to the sponsor of the engagement. While not providing the University with ownership of the INVENTION, these consulting engagements may nevertheless provide significant benefits to faculty members and to the University. For this reason, it is the policy of the University to authorize a Dean, in his or her discretion, to permit these consulting engagements, without claiming any ownership interest in the INVENTION for the University, under the following conditions.

3.4.1 Conditions for Consulting Engagements.

In order for a faculty member and his or her particular proposed consulting engagement to be eligible for consideration under this exception to the consulting policy:

1. The engagement must be consistent with the policy on “Conflict of Interest Policy for Faculty Members” (Handbook for Faculty and Academic Administrators, II.10);
2. no undergraduate or graduate students may be involved in the engagement;
3. the faculty member must be compensated in cash, and the compensation must be fixed and not variable, must reflect the fair market value of the consulting to be performed, and must not vary according to the perceived value of INVENTIONS assigned. (The faculty member may not be compensated with EQUITY or any form of contingent or variable compensation, including but not limited to options, warrants, royalties, or a payment that varies based upon the sales, revenues or other perceived success of an INVENTION or product or service based upon such INVENTION);
4. the faculty member may not have a SIGNIFICANT EQUITY INTEREST in the sponsoring entity or an affiliate of that entity;
5. performance of the engagement may not involve the use of any University facilities, personnel, equipment or assets, except for de minimus amounts or uses; and
6. the terms of the engagement must not conflict with any existing commitments under sponsored research or otherwise for ownership of resulting inventions, and shall not make assignment of ownership of any future INVENTION not conceived and reduced to practice during
the term of, and as a direct and sole result of performing, the consulting engagement.

3.4.2 Procedures for Disclosing Consulting Engagements.
To qualify for consideration under Section 3.4 and allow for meaningful advance review, the specific terms of the proposed agreement must be disclosed to the Department Chair and the Dean at a reasonable time prior to the commencement of the engagement and, in all circumstances, prior to the faculty member entering into any legally binding agreement to engage in the engagement. The engagement and its terms must be reported to the Department Chair and the Dean, in writing, on an annual basis. If the Dean determines, after consultation with the Department Chair and the IPA that criteria set forth in Section 3.4.1 have been met, the Dean may approve the engagement, in his or her discretion, but is not required to approve the engagement. If the Dean determines that the criteria set forth in Section 3.4.1 have not been met, or otherwise declines to approve the engagement, the Dean should notify the faculty member, who may then seek review of the decision by the APPEALS BOARD. The Dean should notify the faculty member of his or her decision promptly, and if possible, within thirty (30) days of receipt of the disclosure.

3.4.3 Procedures for Waiver of Conditions.
Should a faculty member seek to undertake a consulting engagement that is neither within the general consulting policy, nor satisfies the criteria of Section 3.4.1, the faculty member may request a waiver from the Dean to permit the faculty member to enter into the consulting arrangement. In order to request a waiver, the faculty member must comply with Section 3.4.2 as well as disclose the proposed consulting engagement to the Conflict of Interest Standing Committee (CISC) as required under the Policy on Conflicts of Interest Related to Research. After the review by CISC, the Dean, in consultation with the General Counsel, the Provost or his/her designee and the IPA—may grant the waiver. If the Dean determines that, under the facts and circumstances of the particular case, the waiver would undermine the principles underlying the PATENT POLICY, violate any legal or regulatory requirement, present an unmanageable conflict of interest or otherwise violate University policy, he or she should deny the waiver and notify the faculty member. The decision should be made and communicated to the faculty member as promptly as possible, generally within fifteen (15) days of receipt of the waiver request. Should the waiver be denied, the faculty member may appeal the decision to the APPEALS BOARD. Approval of a waiver under the PATENT POLICY shall not constitute approval under or waiver of other University policies, such as the Policy on Conflicts of Interest Related to Research. Waivers will ordinarily be granted to allow for EQUITY compensation in cases in which the amount of EQUITY is fixed based on the fair market value of the consulting services at the time delivered, and it does not involve a form of contingent or variable compensation, including but not limited to options, warrants, or a conditional grant of EQUITY that varies based upon the sales, revenues or other perceived success of an INVENTION or product or service based upon an INVENTION.

3.4.4 Liability when Consulting.
Faculty members entering into consulting engagements should understand that they are undertaking personal responsibilities and may be assuming certain personal risks of liability. For that reason, all faculty members may wish to seek personal legal counsel at their own expense, for the purpose of reviewing proposed consulting agreements so as to protect their personal interests. To the extent, however, that faculty members are availing themselves of this exception to the PATENT POLICY, they are doing so entirely at their own risk and are not, in any way, protected by the University. For this reason, faculty members are well advised to seek personal legal advice before entering into such a consulting relationship.

3.5 Application of the Consulting Policy and Procedures to Administrators and Staff.
The University recognizes the value to the institution and of permitting administrators and staff, as well as faculty, to engage in extramural consulting activities, under certain circumstances. Except as specifically set forth below, the above policy applies to administrators and staff who seek to enter into consulting engagements.

3.5.1 Staff and administrators who contemplate entering into consulting engagements are subject to the “Guidelines for Extramural Activities, Associations, and Interest for Staff” (Human Resources Policy Manual, Policy No. 006, effective 2/1/1990) and should follow the procedures for disclosure and clearance of potential conflict of interest issues set forth in those guidelines.

Article 4. Policy and Procedures Relating to Tangible Research Property

4.0 Policy Statement on Tangible Research Property.
TANGIBLE RESEARCH PROPERTY made by INVESTIGATORS in the course of employment at the University, or work or research directly related to professional, educational or employment responsibilities, or work or research carried out on University time, or at University expense or with SUBSTANTIAL USE OF UNIVERSITY RESOURCES under grants or otherwise, is the property of the University. INVESTIGATORS hereby irrevocably assign to the University all right, title and interest in and to the TANGIBLE RESEARCH PROPERTY and shall cooperate fully with the University in the preparation and prosecution of patents or other intellectual property protection, if available and applicable. The University and INVESTIGATORS will endeavor to make such property available to the research community on a reasonable basis, consistent with other University policies, procedures and legal obligations, and pursuant to a written agreement in a form approved by the Office of the General Counsel, including but not limited to a materials transfer agreement, license agreement, deposit to a research or data bank repository, or other form of agreement.

4.1 Disclosure to PCI.
INVESTIGATORS shall disclose new TANGIBLE RESEARCH PROPERTY promptly to PCI.

4.2 Revenues from Transfer of Tangible Research Property.
Unless otherwise required by law or contract, for TANGIBLE RESEARCH PROPERTY which is defined as an INVENTION, distributions will be calculated in accordance with Section 2.3 For TANGIBLE RESEARCH PROPERTY which is not defined as an INVENTION, distributions will be calculated as follows, unless otherwise required by law or contract: PCI shall determine the GROSS PCI REVENUES for the TANGIBLE RESEARCH PROPERTY. Then, PCI shall determine, in conjunction with the INVESTIGATORS and the appropriate University staff, the applicable TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS. The TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS shall be reimbursed to the University account(s) of the INVESTIGATOR(S) and/or such other School, Department or other accounts from which
portions of the TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS were paid. The amount remaining, if any, after deducting the TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS from the GROSS PCI REVENUES for the TANGIBLE RESEARCH PROPERTY, and after deducting the applicable INITIAL DEDUCTION, shall be defined as the ADJUSTED PCI REVENUES for such TANGIBLE RESEARCH PROPERTY. The ADJUSTED PCI REVENUES for the TANGIBLE RESEARCH PROPERTY or NET PCI INCOME for the TANGIBLE RESEARCH PROPERTY (as the case may be) shall be distributed in accordance with Section 2.3 above (substituting the INVESTIGATOR(S) for the INVENTOR(S) and the TANGIBLE RESEARCH PROPERTY for the INVENTION, where applicable in applying this PATENT POLICY):

4.2.1 Thirty percent (30%) of ADJUSTED PCI REVENUES for the TANGIBLE RESEARCH PROPERTY as the INVESTIGATORS PERSONAL SHARE (see Sec. 2.3.4)

4.2.2 Twelve and one-half percent (12.5%) of ADJUSTED PCI REVENUES for the TANGIBLE RESEARCH PROPERTY as the INVESTIGATORS RESEARCH ACTIVITY SHARE (see Sec. 2.3.5)

4.2.3 Twenty percent (20%) of NET PCI INCOME for the TANGIBLE RESEARCH PROPERTY as the DEPARTMENTS OF INVESTIGATORS SHARE (see Sec. 2.3.6)

4.2.4 Forty percent (40%) of NET PCI INCOME for the TANGIBLE RESEARCH PROPERTY as the SCHOOLS OF INVENTORS SHARE (see Sec. 2.3.7)

4.2.5 Forty percent (40%) of NET PCI INCOME for the TANGIBLE RESEARCH PROPERTY as the UNIVERSITY RESEARCH SHARE (see Sec. 2.3.8).

4.3. Program Income and Sponsored Awards.

INVESTIGATORS and PCI shall report any GROSS PCI REVENUES from TANGIBLE RESEARCH PROPERTY to the Office of Research Services for a determination whether such revenues must be reported to a funding agency or sponsor as program income. In those circumstances in which GROSS PCI REVENUES from the TANGIBLE RESEARCH PROPERTY may be considered program income under federal law, or grant, award or contract terms, or where the distribution formula set forth in Sections 4.2. would be prohibited by law or applicable contract, the UNIVERSITY will equitably share any ADJUSTED PCI REVENUES for such TANGIBLE RESEARCH PROPERTY, if any, while remaining in compliance with its legal obligation.

Article 5. Definitions and Miscellaneous.

5.0.1 TOTAL ADJUSTED PCI REVENUES means GROSS PCI REVENUES minus the INITIAL DEDUCTION. ADJUSTED PCI REVENUES FOR AN INVENTION means the PRO RATA SHARE of the TOTAL ADJUSTED PCI REVENUES.

5.0.2 ADJUSTED PROCEEDS FOR AN INVENTION means ADJUSTED PCI REVENUES FOR AN INVENTION, minus the INVENTORS PERSONAL SHARE and minus the INVENTORS RESEARCH ACTIVITY SHARE.

5.0.3 AGGREGATE PCI OPERATING COSTS means all of PCI’s internal or out-of-pocket expenses to operate PCI, as allocated to and determined by the University, during a Fiscal Year, including, without limitation: salaries, benefits and other personnel costs; expenses related to licensing and distribution, and attempts to license and/or distribute, INVENTIONS, TANGIBLE RESEARCH PROPERTY, copyrightable works, and trademarks; fees and expenses paid to third persons (excluding any amounts included within IP EXPENSES); overhead expense; finder’s fees or commissions; EQUITY or other consideration paid or due to patent management organizations; expenses in connection with the sale, investment or management of EQUITY or the EQUITY POOL; litigation or dispute resolution costs and expenses (not otherwise included within IP EXPENSES); and consideration paid or due third persons as a result of settlement of or judgment in a dispute; applicable taxes (if any), and other operating expenses the University allocates to PCI. AGGREGATE PCI OPERATING COSTS includes all UNREIMBURSED IP EXPENSES that exceed the amounts deducted as the INITIAL DEDUCTION.

5.0.4 The APPEALS BOARD is empowered to resolve disputes arising from the interpretation or administration of this PATENT POLICY, as described in Section 5.2. The APPEALS BOARD comprises nine (9) voting members (seven [7] standing members and two [2] ad hoc members). The seven standing members shall be comprised of:

• one (1) voting Chair, appointed by the Faculty Senate and who shall be a Standing Faculty member;
• four (4) administrators (each appointed by the Vice Provost for Research); and
• two (2) term faculty appointed by the Faculty Senate.

The two (2) ad hoc members shall be faculty selected for expertise by the Dean(s) of the relevant School(s) or the Chair(s) of the relevant Departments(s), except that if one or more of the individuals involved in the appeal is an emeritus faculty, the two ad hoc voting members selected by the Dean(s) or Department Chair(s) shall be emeritus faculty, and if one or more of the individuals involved in the appeal is a graduate student, the two ad hoc voting members selected by the Dean(s) or Department Chair(s) shall be graduate students. In addition, the APPEALS BOARD shall include one nonvoting member ex officio, who shall be an attorney from the Office of the General Counsel and appointed by the General Counsel. The APPEALS BOARD shall be staffed by the Office of the Vice Provost for Research.

5.0.5 ASSIGNMENT means the execution of a written agreement by an INVENTOR assigning all of the INVENTOR’S right, title and interest in and to an INVENTION or TANGIBLE RESEARCH PROPERTY. INVENTIONS are deemed automatically and irrevocably assigned, effective as of the time they are conceived or reduced to practice, regardless of whether or when such individual executes a PARTICIPATION AGREEMENT or other written agreement confirming assignment.

5.0.6 PENN CENTER FOR INNOVATION (PCI) means the administrative unit, under the direction of the INTELLECTUAL PROPERTY ADMINISTRATOR, which is responsible for the receipt, review, management and administration of intellectual property matters of the University.

5.0.7 EFFECTIVE DATE means the earlier of July 1, 2015 or the date this version of this PATENT POLICY was adopted by the Trustees of the University.

5.0.8 EQUITY means ownership interests or securities, including but not limited to shares of stock or securities; stock options; warrants or any other rights to purchase stock or securities;
debt instruments; partnership interests in a general or limited partnership; or membership interests in a limited liability company or partnership.

5.0.9 EQUITY POOL means the total allotment of EQUITY negotiated by the University as consideration for a license of the University's interests in an INVENTION or TANGIBLE RESEARCH PROPERTY.

5.0.10 EXECUTIVE COMMITTEE provides oversight and steering of the technology transfer process, including assisting in setting the operating budget for the PCI. The EXECUTIVE COMMITTEE is appointed by the Provost in consultation with the Vice Provost for Research, and chaired by the Vice Provost for Research. The EXECUTIVE COMMITTEE is comprised of the INTELLECTUAL PROPERTY ADMINISTRATOR, ex officio; the Vice Provost for Research; the Dean of the School of Medicine or his/her designee; one faculty from each of the School of Arts and Sciences and the School of Engineering and Applied Science; one at-large faculty; and an attorney from the Office of the General Counsel selected by the General Counsel, who shall be non-voting and ex officio.

5.0.11 FISCAL YEAR means the period from July 1 through June 30 (or, should the University adjust its fiscal year, the same period as the University's then-current fiscal year for federal tax purposes.)

5.0.12 GROSS COMPENSATION means all cash or other compensation received or to which someone is entitled due to or arising out of or related to or in connection with the licensing, sale, development, commercialization, or other exploitation of the INVENTION, including without limitation royalties, sales receipts, upfront payments, option fees, milestone payments, equity proceeds, other securities or investments, infringement or settlement proceeds, or other forms of monetization or compensation.

5.0.13 GROSS PCI REVENUES means all gross revenues actually received by PCI during the Fiscal Year from all agreements arising out of or related to or in connection with the licensing, development, commercialization, or other exploitation of an INVENTION or TANGIBLE RESEARCH PROPERTY; or intellectual property related to an INVENTION or TANGIBLE RESEARCH PROPERTY, whether involving patents, know-how, trademarks, copyrights, and/or other forms of intellectual property, but excluding:

1. payments made to the University under sponsored research agreements or research awards, grants and contracts;
2. revenues payable to a third party sponsor or funder pursuant to a funding agreement, where performance of the sponsored or funded research directly gave rise to the INVENTION or TANGIBLE RESEARCH PROPERTY;
3. revenues related to the licensing of a University or Penn Medicine trademark (e.g., trademark royalties in connection with Penn-branded apparel, etc.) and unrelated to the licensing, development or other exploitation of an INVENTION or TANGIBLE RESEARCH PROPERTY;
4. consideration payable to a university or other third party related to co-inventor(s) or contributors to INVENTIONS or TANGIBLE RESEARCH PROPERTY having a duty to assign to such university or other third party (for example only, revenues payable to another institution due to joint inventorship or inter-institutional arrangements); and
5. accrued interest.

GROSS PCI REVENUES includes, without limitation: license fees; license maintenance fees; minimum royalties; sublicense payments; milestone payments; option fees; royalties on sales of products and services; proceeds realized from the sale or other disposition of EQUITY from an EQUITY POOL; dividends and other monetary distributions related to EQUITY from an EQUITY POOL; and settlements of lawsuits or intellectual property disputes with third parties related to an INVENTION DISCLOSURE, INVENTION or TANGIBLE RESEARCH PROPERTY. GROSS PCI REVENUES does not include REIMBURSED IP EXPENSES.

5.0.14 INITIAL DEDUCTION means eighteen percent (18%) of GROSS PCI REVENUES for an INVENTION, and five percent (5%) of GROSS PCI REVENUES for TANGIBLE RESEARCH PROPERTY which is not defined as an INVENTION. The percentage amount of the INITIAL DEDUCTION will be reviewed, and may be adjusted, at least once each five (5) years, by the EXECUTIVE COMMITTEE. The EXECUTIVE COMMITTEE may recommend adjusting the INITIAL DEDUCTION percentage to an amount no greater than twenty-five percent (25%) and not less than ten percent (10%) for INVENTIONS, and/or an amount no greater than seven percent (7%) and not less than three percent (3%) for TANGIBLE RESEARCH PROPERTY which is not defined as an INVENTION. Any adjustment to the INITIAL DEDUCTION recommended by the EXECUTIVE COMMITTEE and approved by the President will take effect as of the first day of the Fiscal Year following the President's approval, and will be announced broadly prior to the start of such Fiscal Year.

5.0.15 INTELLECTUAL PROPERTY ADMINISTRATOR (IPA) means the Executive Director of PCI (or his or her successor, as designated by the Vice Provost for Research).

5.0.16 INVENTION means and includes discoveries and inventions, and related technical information, trade secrets, developments, know-how, methods, techniques, formulae, data, and processes; TANGIBLE RESEARCH PROPERTY upon which a patent has issued or a patent application has been filed and is still pending; and other proprietary matter.

5.0.17 INVENTION DISCLOSURE means the written submission to the IPA, on standard invention disclosure forms available from PCI, of a written description of any INVENTION that an INVENTOR believes he or she has made.

5.0.18 INVENTORS means University faculty, emeritus faculty, visiting faculty or researchers, adjunct faculty, postdoctoral employees or trainees, or other employees, or students, or others who individually or jointly make an INVENTION subject to the PATENT POLICY and who meet the criteria for inventorship under United States patent laws and regulations.

5.0.19 INVENTION ASSESSMENT COSTS means all historic out-of-pocket costs and expenses related to the review, assessment and protection of the INVENTION DISCLOSURE and the INVENTION, including without limitation patent and copyright application costs and expenses, legal fees, filing fees, search fees, fees for legal opinions, patent maintenance fees, IP EXPENSES, and any other out-of-pocket transactional costs attributable to the INVENTION DISCLOSURE and the INVENTION.

5.0.20 INVESTIGATOR means any University faculty member, emeritus faculty, visiting faculty or researcher, adjunct faculty,
postdoctoral employee or trainee, or other employee, or an undergraduate or graduate student engaged in sponsored or unsponsored research.

5.0.21 **IP EXPENSES** means all out-of-pocket expenses incurred or accrued during the Fiscal Year by PCI arising out of or related to or in connection with the review, assessment, protection, licensing, defense, enforcement, or audit of intellectual property rights related to INVENTION DISCLOSURES, INVENTIONS, TANGIBLE RESEARCH PROPERTY, and copyrightable works, or the defense, enforcement or audit of licenses or other agreements related to INVENTION DISCLOSURES, INVENTIONS, TANGIBLE RESEARCH PROPERTY, or copyrightable works, including but not limited to: outside legal and patent agent fees and expenses; search fees and expenses; application fees; fees for legal opinions; government filing and maintenance fees; legal fees to defend or enforce intellectual property, license agreements, option agreements, confidentiality agreements, or other agreements related to the INVENTION DISCLOSURE, INVENTION, TANGIBLE RESEARCH PROPERTY or copyrightable works; fees and expenses to audit licensees and related agreements; and other out-of-pocket transactional costs related to patent, copyright, trademark and other intellectual property protection or licensing anywhere in the world. **REIMBURSED IP EXPENSES** means IP EXPENSES for which PCI received or accrued payment or reimbursement from a licensor, INVENTOR or third person before the end of the Fiscal Year. **UNREIMBURSED IP EXPENSES** means all of the IP EXPENSES minus the REIMBURSED IP EXPENSES at the end of the Fiscal Year, as shown in the accounting records of PCI (excluding accrued payments or reimbursements).

5.0.22 **MATERIALS** means lab notebooks, records, drawings, sketches, photographs, radiographs or other images, models, biological specimens, chemical samples, or other materials needed to support the preparation, submission, prosecution, defense or enforcement of a patent in the United States or other applicable jurisdictions.

5.0.23 **NET PCI INCOME FOR AN INVENTION** means the ADJUSTED PROCEEDS FOR AN INVENTION, minus the PRO RATA SHARE of the AGGREGATE PCI OPERATING COSTS. If zero or a negative number, then there is no NET PCI INCOME FOR AN INVENTION. (As an example, if the ADJUSTED PROCEEDS FOR AN INVENTION equals $273,125, the PRO RATA SHARE is five percent (5%), and the AGGREGATE PCI OPERATING COSTS equals $4,500,000, the NET PCI INCOME FOR AN INVENTION equals $273,125 minus (0.05 x $4,500,000)), or $48,125.)

5.0.24 **PATENT POLICY** means this Patent and Tangible Research Property Policies and Procedures of the University of Pennsylvania, with any amendments.

5.0.25 **PARTICIPATION AGREEMENT** means a written agreement substantially in the form of Appendix A to the PATENT POLICY, setting out rights and responsibilities of University faculty, emeritus faculty, visiting faculty and researchers, adjunct faculty, postdoctoral employees and/or other salaried employees, students, and others under the University’s policies and procedures, and confirming the automatic assignment of ownership of INVENTIONS covered under the PATENT POLICY, to the University.

5.0.26 **PRO RATA SHARE** means the ratio (expressed as a percentage) of the GROSS PCI REVENUES directly generated by and attributable to an INVENTION and/or TANGIBLE RESEARCH PROPERTY, as determined by PCI, compared to the entire GROSS PCI REVENUES, during a Fiscal Year. (As an example, if the GROSS PCI REVENUES directly generated by and attributable to an INVENTION total $600,000 in a Fiscal Year, and the GROSS PCI REVENUES total $12,000,000 in a Fiscal Year, the PRO RATA SHARE is five percent (5%).)

5.0.27 **SIGNIFICANT EQUITY INTEREST** means any EQUITY or other financial interest that when aggregated for the individual and the individual’s spouse and dependent children exceeds $25,000 in value, as determined through reference to public prices or other reasonable measures of fair market value, and does not represent more than five percent (5%) ownership interest in any single entity.

5.0.28 **STAKEHOLDERS** means shareholders, owners, members, general partners, limited partners, or other owners or investors in an entity.

5.0.29 **SUBSTANTIAL USE OF UNIVERSITY RESOURCES** means the use of University funds, facilities, equipment, or other resources significantly in excess of the norm for educational and research purposes in the Department or School in which the faculty member(s) holds his or her (their) primary appointment(s) or in which a staff member or student is enrolled or employed. Academic year salary, office, usual library resources, usual secretarial and administrative staff resources or usual computer equipment, among other things, are not regarded as constituting “substantial use of University resources.” Any question about what constitutes substantial use of University resources should be referred to the Vice Provost for Research.

5.0.30 **TANGIBLE RESEARCH PROPERTY** means unique research products or tools, such as biological materials or chemical moieties, whether or not patentable or otherwise protectable using intellectual property laws. Categories of biological material include organisms, cells, viruses, cell products, cloned DNA, as well as DNA sequences, mapping information and crystallographic coordinates. Some specific examples of biological materials include specialized and/or genetically defined cells, including normal and diseased human cells; monoclonal cell lines; hybridoma cell lines; microbial cells and products; viruses and viral products; recombinant nucleic acid molecules; DNA probes; nucleic acid and protein sequences; and transgenic mice or other animals. Categories of chemical moieties or engineered products include sample compounds, reagents, intermediates, models, sensors, devices, equipment, computer hardware or firmware, diagrams, or computer media.

5.0.31 **TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS** means all of the documented and verifiable direct costs and expenses attributable or allocated to the generation of the quantities of TANGIBLE RESEARCH PROPERTY distributed which led to the receipt of GROSS PCI REVENUES from such TANGIBLE RESEARCH PROPERTY. As an example only, the costs of raw materials, supplies, re-agents, specialized equipment, and other direct costs and expenses necessary to generate the quantity of TANGIBLE RESEARCH PROPERTY constitutes TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS. Salaries, overhead, and equipment which is otherwise used for teaching or numerous research purposes is not part of TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS. (Any disagreement among the INVESTIGATORS and PCI regarding the calculation of...
TANGIBLE RESEARCH PROPERTY DIRECT GENERATION COSTS may be appealed to the APPEALS BOARD.)

5.1 Review of Policies and Procedures. The EXECUTIVE COMMITTEE together with the Vice Provost for Research shall review the PATENT POLICY (including Appendix B), from time to time to determine whether it is accomplishing its intended purposes and is in conformity with applicable laws and regulations, including intellectual property laws. The EXECUTIVE COMMITTEE shall make recommendations for amendments or other changes to the Provost and the Faculty Senate, who shall confer with the President. The President may amend the patent policy as provided in 5.014 upon consultation with Faculty Senate, the Office of General Counsel and the Vice Provost for Research.

5.2 Disputes Under Policies and Procedures. Except as expressly set forth otherwise in this PATENT POLICY, disputes arising from the interpretation or administration of the PATENT POLICY may be referred by any interested party to the Chair of the APPEALS BOARD and the Office of the Vice Provost for Research, who will promptly notify the IPA. The APPEALS BOARD shall first determine whether it has jurisdiction to hear any such dispute before proceeding. The APPEALS BOARD shall provide an equitable mechanism for the review and resolution of disputes brought before it, and shall have the authority to make a judgment with respect to such disputes. The APPEALS BOARD shall use reasonable efforts to make a judgment with respect to any dispute within thirty (30) days after having any such dispute referred to it. Any judgment of the APPEALS BOARD may be appealed by any interested party to the Vice Provost for Research. The Vice Provost for Research shall consider the matter de novo, and shall use reasonable efforts to review any such appeal and make a judgment with respect to any appeal, within thirty (30) days after having any such dispute referred to him or her. Any judgment of the Vice Provost for Research may be appealed to the President, who will make a final decision for the University.

5.3 No Change to Relationships. Nothing in this PATENT POLICY or the actions taken in connection with INVENTIONS, TANGIBLE RESEARCH PROPERTY, or EQUITY, is intended to or shall be interpreted or deemed to create a fiduciary, trust, or agency relationship between the University or any of its units or personnel, and any faculty, staff, student or INVENTOR.

Appendix A. Participation Agreement

In order that the University may fulfill legal and contractual obligations to sponsors of research, including but not limited to the federal government, and in consideration of my employment by the University, or my participation in sponsored research, or my use of funds, facilities, or other resources provided by the University, I hereby agree as follows:

1. I have read, and I understand and agree that I am bound by the terms of the Patent and Tangible Research Property Policies and Procedures of the University of Pennsylvania, as well as by the terms of any revisions or amendments adopted by the President and/or the Trustees of the University of Pennsylvania (collectively, the "Patent Policy"), effective retroactively to the first date of my employment, appointment or matriculation, and/or participation in sponsored research, and/or SUBSTANTIAL USE OF UNIVERSITY RESOURCES ("Start Date"). I understand that words appearing as all capitalized letters in this Agreement are used as defined in the Patent Policy.

2. I agree to report to the INTELLECTUAL PROPERTY ADMINISTRATOR ("IPA") any INVENTION which is conceived or reduced to practice in the course of my employment at the University, or from work directly related to professional or employment responsibilities at the University, or from work carried out on University time, or at University expense, or with SUBSTANTIAL USE OF UNIVERSITY RESOURCES under grants or otherwise. I hereby irrevocably assign to The Trustees of the University of Pennsylvania all right, title and interest in and to any and all such INVENTIONS, effective retroactively to my Start Date.

3. I acknowledge that any TANGIBLE RESEARCH PROPERTY, whether or not patentable, which is made in the course of employment at the University or from work directly related to professional or employment responsibilities at the University, or from work carried out on University time, or at University expense, or with SUBSTANTIAL USE OF UNIVERSITY RESOURCES under grants or otherwise is the property of the University. I hereby irrevocably assign to The Trustees of the University of Pennsylvania all right, title and interest in and to any and all such TANGIBLE RESEARCH PROPERTY, effective retroactively to my Start Date.

4. I understand that the University incurs binding obligations to sponsors under the terms of sponsored research agreements. When I participate in sponsored research, I understand that it is my responsibility to ascertain and abide by the terms of the sponsored research agreement as it relates to me. In particular, when engaged in outside activity, such as consulting, I recognize my duty to protect the University's obligations to its research sponsors and its rights pursuant to the PATENT POLICY.

5. I also understand that on occasion University policy or the University's obligations to research sponsors may require that I assign my interest in copyrightable materials to the University. In such cases, I hereby irrevocably assign all right, title and interest in and to such materials and the copyrights therein, if any, to The Trustees of the University of Pennsylvania, effective retroactively to my Start Date. I further understand that, in agreements with research sponsors, the University seeks to retain copyrights for its faculty.

6. I will cooperate fully with the University in the preparation, filing and prosecution of patents, in the registration of copyrights and in the preparation and execution of all documents necessary or incidental thereto, including but not limited to any additional written assignments deemed desirable by the University to further evidence my legal assignment of ownership or otherwise facilitate protection of the intellectual property.

7. I accept the provisions for the sharing of amounts and EQUITY in the PATENT POLICY and the then-current Policy Relating to Copyrights and Commitment of Effort for Faculty (the "Copyright Policy").

8. I am under no obligation to any person, organization or corporation with respect to any INVENTION(S), TANGIBLE RESEARCH PROPERTY or copyrightable materials which are, or could be reasonably be construed to be, in conflict with this Agreement, except as set forth in the signed attachment to this letter (if any).

9. This Agreement and the assignments and obligations are effective as of my Start Date and apply to any INVENTION(S), TANGIBLE RESEARCH PROPERTY, and copyrightable materials made during the time I am employed by the University, hold an appointment, continue to matriculate, participate in sponsored research or otherwise make a SUBSTANTIAL USE OF UNIVERSITY RESOURCES.

Appendix B. Rules Governing EQUITY Transactions

B.1 Licenses in Consideration of EQUITY.

The principal purpose of licensing by the University is to promote the development of technologies to serve the public interest. If after a diligent effort to identify prospective licensees, the IPA determines that the public interest is best served by a license in consideration of EQUITY, the IPA may negotiate such a license on behalf of the University, following consultation with the Vice Provost for Research, the INVENTORS, the General Counsel (or his/her designee), the Treasurer (or his/her designee), and the University Conflict of Interest Standing Committee. The IPA should be satisfied that the licensee can demonstrate management and technical capability, and that it has the financial resources necessary to meet its developmental objectives and its obligations to the University. The IPA may accept EQUITY in the license for the University in lieu of or in addition to license or other fees, provided that the EQUITY represents a fair valuation for the technology. The IPA shall include in each license measures of performance that must be met in order to maintain the license granted by the University.

B.2 Disclosure of EQUITY.

The University will require the prospective licensee to disclose all EQUITY offered to the University (and other institutions or individuals which may co-own an INVENTION with the University) in consideration for the license agreement. In addition, the prospective licensee will be required to disclose in writing to the IPA and the Treasurer the specific terms and conditions associated with such EQUITY and the current and pro forma capital structure of the venture. Furthermore, the prospective licensee and the INVENTORS must disclose to the IPA and the Treasurer in writing the EQUITY to be issued to INVENTORS for their role as founders, consultants or otherwise.

B.3 Conflicts of Interest in License Agreements Involving EQUITY.

License agreements involving EQUITY must be structured to protect the University and faculty members from liability and to avoid conflicts of interest. Prior to the University executing any agreement, the INVENTOR(S) shall disclose to the IPA and the University Conflict of Interest Standing Committee, any existing or proposed consulting agreement between the INVENTOR(S) and the prospective licensee or any other consulting agreements with other entities that have potential for conflicts of interest. Upon the recommendation of the Vice Provost for Research, the University and the relevant Deans may impose limitations on the proposed license agreement, associated sponsored research agreements, consulting agreements between the INVENTOR(S) and the licensee or other agreements. In addition, the University, Deans or Chairpersons may create an oversight mechanism for the relevant INVENTORS.

B.3.1 Board Participation and Fiduciary Roles.

In general, the University will not accept a position on the board of directors (or other comparable governing entity) of the licensee but may accept and exercise observer rights on such boards or comparable governing entities. Exceptions to this policy require the approval of the Executive Vice President of the University in consultation with the IPA and the General Counsel. As a matter of policy, INVENTORS may not serve on the board of directors (or other comparable governing entity) of the licensee, or in any other fiduciary capacity during the time their University research is sponsored by the licensee. In general, INVENTORS may accept a seat on scientific advisory boards providing that membership on such a board does not create a fiduciary responsibility to the licensee or any of its STAKEHOLDERS.

B.3.2 Minority Ownership.

The INVENTORS (and members of their families) together may not be majority STAKEHOLDERS of the venture at the time that the license agreement is negotiated and thereafter.

B.3.3 Licensee Representation.

In license negotiations with the University, the prospective licensee must be represented by a party other than an INVENTOR or a member of the INVENTOR’s family.

B.4 Direct Personal Ownership of EQUITY.

The University generally requires that the EQUITY provided to INVENTORS from the EQUITY POOL must be issued directly to the INVENTORS at the time the EQUITY is issued. The INVENTORS will be responsible for retaining their own business advisors, legal counsel and tax counsel. INVENTORS are responsible for all financial, tax and legal consequences related to the EQUITY they receive. The University Conflict of Interest Standing Committee reserves the right to require that any EQUITY issued to INVENTORS by the licensee be held in a “blind trust” for a defined period of time. An INVENTOR who receives EQUITY from the EQUITY POOL or from the licensee outside of the EQUITY POOL generally will receive a reduced INVENTORS PERSONAL SHARE of ADJUSTED PCI REVENUES for the INVENTION, pursuant to Section 2.3.3.1 above, to avoid an unintended incentive to structure transactions whereby the INVENTORS retain 100% of the proceeds from their share of the EQUITY POOL, and obtain 30% of the proceeds to the University when the University liquidates EQUITY held by the University. Under rare circumstances, the University may agree to accept all shares of the EQUITY POOL including INVENTORS shares, providing that all INVENTORS and other institutions release the University in writing from any liability associated with the management, investment and ownership of the EQUITY. In such cases, the Investment Board of the University will control the EQUITY. Any income received by the University from EQUITY held on behalf of INVENTORS will be distributed among INVENTORS in accordance with Section 2.3.4 of the Patent and Tangible Research Policies and Procedures.

B.5 Management of EQUITY.

Any EQUITY received by the University under a license agreement will be held by the Office of the Treasurer until such time that the University’s Investment Board decides to liquidate such EQUITY.

APPENDIX C: HYPOTHETICAL EXAMPLE

GROSS PCI REVENUES for FY 2016 equals $12,000,000

The PRO RATA SHARE equals 5% ($600,000 divided into $12,000,000 equals 0.05)

The INITIAL DEDUCTION equals 18% of GROSS PCI REVENUES, or $2,160,000 (0.18 times $12,000,000 equals $2,160,000)

Thus, TOTAL ADJUSTED PCI REVENUES equals $9,840,000 ($12,000,000 minus the INITIAL DEDUCTION of $2,160,000 equals $9,840,000).
The PRO RATA SHARE of the INITIAL DEDUCTION attributable to the XYZ INVENTION equals $108,000 (0.05 times $2,160,000 equals $108,000).

Thus, the ADJUSTED PCI REVENUES for the XYZ INVENTION equals $492,000 ($600,000 minus $108,000 equals $492,000).

The INVENTORS PERSONAL SHARE equals 30% of ADJUSTED PCI REVENUES for the XYZ INVENTION, or $147,600. ($492,000 times 0.3 equals $147,600).

The INVENTORS RESEARCH ACTIVITY SHARE equals 12.5% of ADJUSTED PCI REVENUES for the XYZ INVENTION, or $61,500. ($492,000 times 0.125 equals $61,500).

The ADJUSTED PROCEEDS for the XYZ INVENTION equals $282,900 ($492,000 minus $147,600 and minus $61,500).

AGGREGATE PCI OPERATING COSTS for FY 2016 equals $4,500,000.

The PRO RATA SHARE of AGGREGATE PCI OPERATING COSTS attributable to the XYZ INVENTION equals $225,000 (0.05 times $4,500,000 equals $225,000).

Thus, the NET PCI INCOME for the XYZ INVENTION equals $57,900 ($282,900 minus $225,000).

The DEPARTMENTS OF INVENTORS SHARE equals 20% of the NET PCI INCOME or the XYZ INVENTION, or $11,580 ($57,900 times 0.2 equals $11,580.)

The SCHOOLS OF INVENTORS SHARE equals 40% of the NET PCI INCOME for the XYZ INVENTION, or $23,160 ($57,900 times 0.4 equals $23,160.)

The UNIVERSITY RESEARCH SHARE equals 40% of the NET PCI INCOME for the XYZ INVENTION, or $23,160 ($57,900 times 0.4 equals $23,160.)

Photocopying for Educational Purposes

The enactment of a federal Copyright Act, effective January 1, 1978, has produced much misunderstanding among teachers regarding the permissible amount of photocopying for educational purposes. Only copyrighted works are protected by the act. This elemental point is often overlooked. Court opinions, legislative hearings and other government documents are not copyrighted, and may be freely photocopied. The same is true of works for which the copyright has expired, and of works which prior to January 1978 were sold or disseminated without proper notice of copyright.

There is a danger, however, of acting unlawfully when one photocopies without permission works which are covered by the act. The act applies to all "original works of authorship" in written (or other tangible) form, from the moment the work is created, whether it was created before or after January 1, 1978 and whether or not it has been published.

But even copyrighted materials may be photocopied without permission from, or payment to, the copyright owner, if it is a "fair use," a doctrine recognized by American courts for nearly a century and a half whose principal purpose is to protect the public interest in the dissemination of knowledge. This doctrine is endorsed in the text of the act, which explicitly refers to the allowable reproduction of copyrighted works for purposes, such as "criticism, comment, news reporting, teaching (including multiple copies for classroom use), scholarship, or research."

Congress appreciated the impossibility of announcing in a statute an exact quantitative measure that would distinguish copying which is a fair use from copying which is an infringement. Rather, the act provides factors to be considered:

1. the purpose and character of the use, including whether such is of a commercial nature or is for non-profit educational purposes;
2. the nature of the copyrighted work;
3. the amount and substantiality of the portion used in relation to the copyrighted work as a whole; and
4. the effect of the use upon the potential market for or value of the copyrighted work.

The making of a single copy of copyrighted material for a teacher's personal use in teaching, scholarship or research will almost always be a fair use. More difficult questions arise when multiple copies are made for distribution to students. Certainly, the risk of infringement increases in proportion to the amount of copyrighted material which is photocopied and the extent that the photocopying replaces what would otherwise be a purchase of copies of the work from trade sources by (or for) the students. Thus, the making of multiple photocopies of an entire or a substantial part of an article will raise serious question as to whether such use is "fair" while the reproduction of five pages of an article of 25 or 30 pages will generally be regarded as privileged. A teacher should try to avoid making multiple photocopies of copyrighted material which is not truly important for that teacher's pedagogical needs. In any event, students receiving such photocopied material should be charged no more than is necessary to cover the cost of photocopying and processing.

During congressional deliberations on the act, a group of educational associations and commercial publishers developed a set of guidelines which purport to announce the minimum reach of the fair use doctrine as applied to educational photocopying. The guidelines are set forth below. In the report by the House committee submitting the copyright bill, these guidelines were said to constitute a "reasonable" construction of the fair use doctrine. Several misconceptions about these guidelines have developed and should be dispelled.

Although some have read the guidelines as imposing limits upon educational photocopying, in fact they prohibit nothing. They purport to state only the minimum protection of the fair use doctrine and announce a "safe harbor" within which a teacher is assured of protection against claims of infringement. The guidelines acknowledge that there may be allowable photocopying beyond that which is set forth; they do not purport to state where the fair use privilege ends.

Although some have treated the guidelines as though they have the status of legislation, that is not true, either. The text of the act, strengthened in committee deliberations, explicitly adverts to "teaching (including multiple copies for classroom use)" as a classic situation in which the fair use doctrine applies. This is the statutory text Congressmen had before them when they voted, and it is the statutory text which the courts will construe. The extent to which the privately developed "guidelines" will pre-empt other "reasonable" interpretations of fair use is a judicial question.

A teacher should consider the potential consequences of an incorrect decision. If the teacher elects not to photocopy in circumstances constituting fair use, students must find the material in the library or elsewhere. Techniques for increasing student access to limited materials will vary; the question of permissible library photocopying for "reserve" purposes raises issues not addressed here.
If a teacher decides to photocopy for classroom use, the possible legal sanctions for an incorrect decision must be appreciated. Book publishers have declared and demonstrated their intention to sue faculty members, universities and copy centers for copyright infringement. As a general rule, a copyright infringer is liable for damages, measured by the loss of profits to the copyright owner and any additional profits acquired by the infringer. Since in the academic setting there will not generally be profits to the teacher or school, damages will be measured by the likely loss in sales of the copyrighted work, normally an uncertain figure. For this reason, the act permits the copyright owner to sue for “statutory damages” in lieu of actual damages, and the court is given discretion to enter an award between $250 and $10,000 (which may be increased to $50,000 for willful violations). If, however, a teacher had reasonable grounds to believe that the photocopying was a fair use, he or she is not liable for statutory damages (although he or she may be liable for actual damages). In all cases, the court may issue an order against the teacher or the educational institution barring future infringements.

Without regard to legal implications, a teacher should be sensitive to the dictates of good practice and courtesy in the use of copyrighted material. Authors and copyright owners appreciate notification that uses are being made of their work. It is common for the copyright owner to permit substantial photocopying for educational purposes, provided that the author and copyright owner are identified and proper copyright notice is affixed.

Questions regarding the application of the Copyright Act in specific situation should be addressed to the Office of the General Counsel.

I. Guidelines

A. Single Copying for Teachers

A single copy may be made of any of the following by or for a teacher at his or her individual request for his or her scholarly research or use in teaching or preparation to teach a class:

1. A chapter from a book;
2. An article from a periodical or newspaper;
3. A short story, short essay or short poem whether or not from a collective work;
4. A chart, graph, diagram, drawing, cartoon or picture from a book, periodical, or newspaper.

B. Multiple Copies for Classroom Use

Multiple copies (not to exceed in any event more than one copy per pupil in a course) may be made by or for the teacher giving the course for classroom use or discussion provided:

1. The copying meets the tests of brevity and spontaneity as defined below; and,
2. Meets the cumulative effect test as defined below; and,
3. Each copy includes a notice of copyright.

II. Definitions

A. Brevity

1. Poetry:
   a. Either a complete article, story or essay of less than 2,500 words, or
   b. An excerpt from any prose work of not more than 1,000 words or 10% of the work, whichever is less, but in any event a minimum of 500 words.
   (Each of the numerical limits stated in 1 and 2 above may be expanded to permit the completion of an unfinished line of a poem or an unfinished prose paragraph.)

3. Illustration: One chart, graph, diagram, drawing, cartoon or picture per book or per periodical issue.

4. “Special” works: Certain works in poetry, prose or in “poetic prose” which often combine language with illustrations and which are intended sometimes for children and at other times for a more general audience, fall short of 2,500 words in their entirety. Paragraph “b” above notwithstanding, such “special works” may not be reproduced in their entirety; however, an excerpt comprising not more than two of the published pages of such special work and containing not more than 10 percent of the words found in the text thereof, may be reproduced.

B. Spontaneity

1. The copying is at the instance and inspiration of the individual teacher; and
2. The inspiration and decision to use the work and the moment of its use for maximum teaching effectiveness are so close in time that it would be unreasonable to expect a timely reply to a request for permission.

C. Cumulative Effect

1. The copying of the material is for only one course in the school in which the copies are made.
2. Not more than one short poem, article, story, essay or two excerpts may be copied from the same author, not more than three from the same collective work or periodical volume during one class term.
3. There shall not be more than nine instances of such multiple copying for one course during one class term.

(The limitations stated in “b” and “c” above shall not apply to current news periodicals and newspapers and current news sections of other periodicals.)

III. Prohibitions as to the above.

Notwithstanding any of the above, the following shall be prohibited:

1. Copying shall not be used to create or to replace or substitute for anthologies, compilations or collective works. Such replacement or substitution may occur whether copies of various works or excerpts therefrom are accumulated or are reproduced and used separately.
2. There shall be no copying of or from works intended to be “consumable” in the course of study or of teaching. These include workbooks, exercise, standardized tests and test booklets and answer sheets and like consumable material.
3. Copying shall not:
   a. Substitute for the purpose of books, publisher’s reprints or periodicals;
   b. Be directed by higher authority;
Policy on Acceptable Use of Electronic Resources

Summary
This policy defines the boundaries of "acceptable use" of limited University electronic resources, including computers, networks, electronic mail services and electronic information sources, as detailed below. It includes by reference a self-contained compilation of specific rules that can be modified as the electronic information environment evolves.

The policy is based on the principle that the electronic information environment is provided to support University business and its mission of education, research and service. Other uses are secondary. Uses that threaten the integrity of the system; the function of non-University equipment that can be accessed through the system; the privacy or actual or perceived safety of others; or that are otherwise illegal are forbidden.

By using University electronic information systems, you assume personal responsibility for their appropriate use and agree to comply with this policy and other applicable University policies, as well as City, State and Federal laws and regulations, as detailed below.

The policy defines penalties for infractions, up to and including loss of system access, employment termination or expulsion. In addition, some activities may lead to risk of legal liability, both civil and criminal.

Users of electronic information systems are urged in their own interest to review and understand the contents of this policy.

Purposes
The University of Pennsylvania makes computing resources (including, but not limited to, computer facilities and services, computers, networks, electronic mail, electronic information and data, and video and voice services) available to faculty, students, staff, registered guests, and the general public to support the educational, research and service missions of the University.

When demand for computing resources may exceed available capacity, priorities for their use will be established and enforced. Authorized faculty and staff may set and alter priorities for exclusively local computing/networking resources.

The priorities for use of University-wide computing resources are:

Highest: Uses that directly support the educational, research and service missions of the University.

Medium: Other uses that indirectly benefit the education, research and service missions of the University, as well as and including reasonable and limited personal communications.

Lowest: Recreation, including game playing.

Forbidden: All activities in violation of the General Standards or prohibited in the specific rules interpreting this policy.

The University may enforce these priorities by restricting or limiting usages of lower priority in circumstances where their demand and limitations of capacity impact or threaten to impact usages of higher priority.

Implied consent
Each person with access to the University’s computing resources is responsible for their appropriate use and by their use agrees to comply with all applicable University, School, and departmental policies and regulations, and with applicable City, State and Federal laws and regulations, as well as with the acceptable use policies of affiliated networks and systems.

Open Expression in the Electronic Information Environment: The rights to freedom of thought, inquiry and expression, as defined in the University’s Guidelines on Open Expression (http://provost.upenn.edu/policies/pennbook/2013/02/15/guidelines-on-open-expression), are paramount values of the University community. The University’s commitment to the principles of open expression extends to and includes the electronic information environment, and interference in the exercise of those rights is a violation of this policy and of the Guidelines on Open Expression. As provided in the Guidelines, in case of conflict between the principles of the Guidelines on Open Expression and this or other University policies, the principles of the Guidelines take precedence.

General Standards for the Acceptable Use of Computer Resources: Failure to uphold the following General Standards for the Acceptable Use of Computer Resources constitutes a violation of this policy and may be subject to disciplinary action.

The General Standards for the Acceptable Use of Computer Resources require:

- Responsible behavior with respect to the electronic information environment at all times;
- Behavior consistent with the mission of the University and with authorized activities of the University or members of the University community;
- Respect for the principles of open expression;
- Compliance with all applicable laws, regulations, and University policies;
- Truthfulness and honesty in personal and computer identification;
- Respect for the rights and property of others, including intellectual property rights;
- Behavior consistent with the privacy and integrity of electronic networks, electronic data and information, and electronic infrastructure and systems; and
- Respect for the value and intended use of human and electronic resources.

Enforcement and Penalties for Violation: Any person who violates any provision of this policy, of the Specific Rules interpreting this policy, of other relevant University policies, or of applicable City, State, or Federal laws or regulations may face sanctions up to and including termination or expulsion. Depending on the nature and severity of the offense, violations can be subject to disciplinary action through the Student Disciplinary System or disciplinary procedures applicable to faculty and staff.
It may at times be necessary for authorized systems administrators to suspend someone’s access to University computing resources immediately for violations of this policy, pending interim resolution of the situation (for example by securing a possibly compromised account and/or making the owner of an account aware in person that an activity constitutes a violation). In the case of egregious and continuing violations suspension of access may be extended until final resolution by the appropriate disciplinary body. System owners, administrators or managers may be required to investigate violations of this policy and to ensure compliance.

Amendment

Formal amendment of the General Standards of Acceptable Use of Computing Resources or other aspects of this policy may be promulgated by the Provost following consultation with the University Council Committee on Communications, publication “For Comment” in Almanac, a reasonable waiting period, and publication “Of Record” in Almanac.

Interpreting this Policy

As technology evolves, questions will arise about how to interpret the general standards expressed in this policy. The Vice President for Information Systems and Computing shall, after consultation with the University Council Committee on Communications, and subject to the same waiting period and publication provisions as above, publish specific rules interpreting this policy.

Waiver

When restrictions in this policy interfere with the research, educational or service missions of the University, members of the University community may request a written waiver from the Vice President for Information Systems and Computing (http://www.upenn.edu/computing/isc) (or designee).

Further Information

For further information about University computing regulations or Commonwealth of Pennsylvania and Federal computing laws, contact the University Information Security Officer at (215) 898-2172 or send email to:

Specific Rules Interpreting the Policy on Acceptable Use of Electronic Resources

The following specific rules apply to all uses of University computing resources. These rules are not an exhaustive list of proscribed behaviors, but are intended to implement and illustrate the General Standards for the Acceptable Use of Computer Resources (http://provost.upenn.edu/#general), other relevant University policies, and applicable laws and regulations. Additional specific rules may be promulgated for the acceptable use of individual computer systems or networks by individual Schools, departments, or system administrators.

Content of Communications

- Except as provided by applicable City, State, or Federal laws, regulations or other University policies, the content of electronic communications is not by itself a basis for disciplinary action.
- Unlawful communications, including threats of violence, obscenity, child pornography, and harassing communications (as defined by law), are prohibited.
- The use of University computer resources for private business or commercial activities (except where such activities are otherwise permitted or authorized under applicable University policies), fundraising or advertising on behalf of non-University organizations, or the reselling of University computer resources to non-University individuals or organizations, and the unauthorized use of the University’s name, are prohibited. The Vice President for Information Systems (or designee) may specify rules and specific forums where limited use of University resources for non-recurring exchange and sale of personal items is permitted.

Identification of Users

Anonymous and pseudonymous communications are permitted except when expressly prohibited by the operating guidelines or stated purposes of the electronic services to, from, or through which the communications are sent. However, when investigating alleged violations of the Guidelines on Open Expression (http://provost.upenn.edu), the Committee on Open Expression may direct the University’s Information Security Officer, or an authorized system administrator, to attempt to identify the originator of anonymous/pseudonymous messages, and may refer such matters to appropriate disciplinary bodies to prevent further distribution of messages from the same source.

The following activities and behaviors are prohibited:
- Misrepresentation (including forgery) of the sender’s identity or an electronic communication’s source;
- Acquiring or attempting to acquire passwords of others;
- Using or attempting to use the computer accounts of others;
- Alteration of the content of a message originating from another person or computer with intent to deceive; and
- The unauthorized deletion of another person’s news group postings.

Access to Computer Resources

The following activities and behaviors are prohibited:
- The use of restricted-access University computer resources or electronic information without or beyond one’s level of authorization;
- The interception or attempted interception of communications by parties not explicitly intended to receive them;
- Making University computing resources available to individuals not affiliated with the University of Pennsylvania without approval of an authorized University official;
- Making available any materials the possession or distribution of which is illegal;
- The unauthorized copying or use of licensed computer software;
- Unauthorized access, possession, or distribution, by electronic or any other means, of electronic information or data that is confidential under the University’s policies regarding privacy or the confidentiality of student, administrative, personnel, archival, or other records, or as defined by the cognizant Data Steward;
- Intentionally compromising the privacy or security of electronic information; and
- Intentionally infringing upon the intellectual property rights of others in computer programs or electronic information (including plagiarism and unauthorized use or reproduction).

Operational integrity

The following activities and behaviors are prohibited:
• Interference with or disruption of the computer or network accounts, services, or equipment of others, including, but not limited to, the propagation of computer “worms” and “viruses,” the sending of electronic chain mail, and the inappropriate sending of “broadcast” messages to large numbers of individuals or hosts;
• Failure to comply with requests from appropriate University officials to discontinue activities that threaten the operation or integrity of computers, systems or networks, or otherwise violate this policy;
• Revealing passwords or otherwise permitting the use by others (by intent or negligence) of personal accounts for computer and network access;
• Altering or attempting to alter files or systems without authorization;
• Unauthorized scanning of networks for security vulnerabilities;
• Attempting to alter any University computing or networking components (including, but not limited to, bridges, routers, and hubs) without authorization or beyond one’s level of authorization;
• Unauthorized wiring, including attempts to create unauthorized network connections, or any unauthorized extension or re-transmission of any computer or network services;
• Intentionally damaging or destroying the integrity of electronic information;
• Intentionally disrupting the use of electronic networks or information systems;
• Intentionally wasting human or electronic resources; and
• Negligence leading to the damage of University electronic information, computing/networking equipment and resources.

Appendices

Relevant University Policies

This Acceptable Use Policy incorporates and supersedes the earlier Policy on Acceptable Use of Electronic Resources (http://www.upenn.edu/provost/images/PolicyonAcceptableUseofElectronicResources/PolicyonAcceptableUseofElectronicResources.htm). The use of computing resources is also required to conform to the following University policies:

• Code of Student Conduct (http://www.upenn.edu/provost/PennBook/conduct_code_of_student)
• Guidelines on Open Expression (http://www.upenn.edu/provost/PennBook/guidelines_on_open_expression)

In addition, specific policies of the University’s Schools, departments, computer systems and networks, and other general University policies and regulations are also applicable to the use of computer resources. These policies include, but are not limited to, the following:

• Patent Policy (http://www.upenn.edu/almanac/volumes/v51/n22/patent_policy.pdf)
• Copyright Policy (http://www.upenn.edu/assoc-provost/handbook/v_0_d.html)
• Computer Software Policy (http://www.upenn.edu/almanac/v45/n08/copy.html)
• Policy on the Uses of University Resources (http://www.hr.upenn.edu/policy/policies/003.asp)

• Code of Academic Integrity (http://www.upenn.edu/almanac/v43/n03/codechar.html#code)
• Protocols for human subjects research: any research involving human subjects must be approved by the Committee on Studies Involving Human Beings
• Acceptable Use Policies of individual Schools, departments, computer systems, and networks
• Guidelines for Administrators of Penn E-mail Systems (http://www.upenn.edu/computing/email/admin-guidelines.html)

Applicable Laws

Computer and network use is also subject to Pennsylvania and Federal laws and regulations. Suspected violations of applicable law are subject to investigation by University and law enforcement officials. Among the applicable laws are:

• Federal Copyright Law: U.S. copyright law grants authors certain exclusive rights of reproduction, adaptation, distribution, performance, display, attribution and integrity to their creations, including works of literature, photographs, music, software, film and video. Violations of copyright laws include, but are not limited to, the making of unauthorized copies of any copyrighted material (such as commercial software, text, graphic images, audio and video recordings) and distributing copyrighted materials over computer networks or through other means.
• Federal Wire Fraud Law: Federal law prohibits the use of interstate communications systems (phone, wire, radio, or television transmissions) to further an illegal scheme or to defraud.
• Federal Computer Fraud and Abuse Law: Federal law prohibits unauthorized access to or modification of information in computers containing national defense, banking, or financial information.
• Federal and Pennsylvania Child Pornography Laws: Federal and Pennsylvania laws prohibit the creation, possession, or distribution of graphic depictions of minors engaged in sexual activity, including computer graphics. Computers storing such information can be seized as evidence.
• Pennsylvania Computer Crime Law: Pennsylvania law prohibits access to any computer system or network with the intent to interrupt an organization, or to perpetrate a fraud including the intentional and unauthorized publication of computer passwords.
• Pyramid Schemes/Chain Letters: It is a violation of the Federal Postal Lottery Statute to send chain letters which request sending money or something of value through the US mail. Solicitations through electronic messaging are also illegal, if they require use of US mail for sending money/something of value.
• Defamation: Someone may seek civil remedies if they can show that they were clearly identified as the subject of defamatory messages and suffered damages as a consequence. Truth is a defense against charges of defamation.
• Common law actions for invasion of privacy: Someone may take seek civil remedies for invasion of privacy on several grounds.
• Public disclosure of private facts: the widespread disclosure of facts about a person, even when true, may be deemed harmful enough to justify a lawsuit.
• False light: a person wrongfully attributes views or characteristics to another person in ways that damage that person’s reputation.
• Wrongful intrusion: the law often protects those areas of a person’s life in which they can reasonably expect they will not be intruded upon.

(Source: Almanac, April 29, 1997 (http://www.upenn.edu/almanac/v43/n32/accept.html))

Policy on Class Meeting Times

To allow travel time between classes, each one-hour class session is actually 50 minutes long, each hour and a half session is actually 80 minutes long, and each three-hour session is 2 hours and 50 minutes long, usually with a 10 minute break.

Examples: (class meeting times as listed in the Course Timetable)
• T 2.5 - class begins at 2:00 PM and ends at 4:50 PM
• MWF 1-2 - class begins at 1:00 PM and ends at 1:50 PM
• TR 10:30-12 - class begins at 10:30 AM and ends at 11:50 AM

Policy on Common Midterm Examinations

Instructors teaching a course with multiple sections who plan to schedule a common midterm examination outside the class’s regular meeting time must notify students of this event during the first week of the semester and be prepared to offer one or more make-up examinations to accommodate any student who is enrolled in a course that meets at the time of the common examination.

Students enrolled in a course that conflicts with the time of a common midterm examination must notify the instructor administering the common midterm examination of the conflict by the end of the course selection (add) period. Students may not be required to miss their regularly scheduled class.

(Source: Almanac – April 20, 2010, Volume 56, No. 30 (http://www.upenn.edu/almanac/volumes/v56/n30/provost.html))

Policy on Military Leave

If a student who has not received full academic credit for the term is called to service through enrollment in a military reserve unit, or through enlistment in the military service, the student’s tuition and mandatory fees for the term shall be cancelled, provided a request, substantiated by the proper evidence, is filed with the dean of the school in which he or she is registered.

Policy on Privacy in the Electronic Environment

I. Preliminary Observations

The University affirms that the mutual trust and freedom of thought and expression essential to the academic mission of a university rest on an expectation of privacy, and that the privacy of those who work, study, teach, and conduct research in a university setting will be respected. The University recognizes that as faculty, staff and students create, use and store more information in electronic form, there is growing concern that information the user or creator considers private may be more vulnerable to invasion than information stored in more traditional media. This policy is intended to highlight some general principles that should help to define the expectations of privacy of those in the University community. While no document addressing the fluid issue of technology can be exhaustive or inflexibly dictate outcomes in all circumstances, this policy attempts to articulate current practices and provide guidance, so that individuals may make informed and appropriate decisions concerning their various interactions in the electronic environment.

Before addressing these issues, it should also be noted that in carrying out their operations, various departments of the University accumulate information about members of its community, e.g., for purposes of payroll, employment or enrollment. Data are also created, though not necessarily compiled or retained on a personally identifiable basis, as an incident to the use of technology, e.g., the charging of purchases on Penn Card or the borrowing of library books. The University does not condone disclosure or release of such personal information stored or transmitted through University systems, except for legitimate University purposes as outlined in this policy.

Those responsible for maintaining the University’s computers and electronic networks have an important and special responsibility to recognize when they may be dealing with sensitive or private information. They may access such information without the user’s consent and without obtaining higher level approval, but only when necessary to fulfill their official responsibilities, and they are expected to carry out their duties in ways that are not unreasonably intrusive. They will be subject to disciplinary action if they misuse their access to personally identifiable data or to individuals’ personal files, e-mail and voice mail or otherwise knowingly act in ways counter to University policies and applicable laws.

Finally, this policy should be understood in light of the many other University policies and laws that bear on individuals’ rights to privacy and the institution’s responsibilities with respect to information in its possession about individuals. Examples of applicable laws include the Family Educational Rights and Privacy Act of 1974 (the “Buckley Amendment”), the Electronic Communications Privacy Act of 1986, and medical records regulations promulgated under the Health Insurance Portability and Accountability Act of 1996. Examples of applicable University policies include the Acceptable Use Policy for the Electronic Environment, Administrative Computing Security Policy, Policy for Closed Circuit Television Monitoring and Recording of Public Areas for Safety and Security Purposes and policies on Records Confidentiality and Safeguarding University Assets.

II. Policy on Information Created, Stored or Transmitted Through University Electronic Media

A. In General:

The University provides computers, computer and e-mail accounts, networks and telephone systems to faculty members, staff and students for furthering the University’s academic mission and conducting University business. While incidental and occasional personal use of such systems, including e-mail and voice mail, is permissible, personal communications and files transmitted over or stored on University systems are not treated differently from business communications; there can be no guarantee that such personal communications will remain private or confidential (see Appendix).

As is the case for information in non-electronic form stored in University facilities, the University’s need for information will be met in most
situations by simply asking the author or custodian for it. The University reserves the right, consistent with this policy, to access, review and release electronic information that is transmitted over or stored in University systems or facilities. When questions arise about such access, review or release of information, the University commits to treat electronic information no differently from non-electronic information. As with paper information, it is often the case by custom or rule that electronic files are shared and properly accessible by multiple parties in office settings. Where that is the case, the special provisions for access and notification outlined here need not be followed. In other cases, properly authorized University officials including the Vice President for Audit and Compliance and the Information Security Officer may access e-mail, voice mail or computer accounts without the consent of the assigned user when there is a reasonable basis to believe that such action

1. Is necessary to comply with legal requirements or process, or
2. May yield information necessary for the investigation of a suspected violation of law or regulations, or of a suspected serious infract
   tion of University policy (for example alleged research misconduct, plagiarism or harassment), or
3. Is needed to maintain the integrity of University computing systems, or
4. May yield information needed to deal with an emergency, or
5. In the case of Staff, will yield information that is needed for the ordinary business of the University to proceed.

Except as may otherwise be dictated by legal requirements, individuals will be notified of access to, or disclosure of, the contents of their e-mail, voice mail or their computer accounts as soon as practicable. In cases where such notification might jeopardize an ongoing investigation of suspected wrongdoing it may be delayed until the conclusion of the investigation. The Office of General Counsel is responsible for maintaining an official record of e-mail searches performed by authorized parties.

B. Faculty:

The University has the utmost respect for the freedom of thought and expression that are at the core of Penn’s academic mission. Whenever possible, therefore, the University will resolve any doubts about the need to access a University computer or other systems in favor of a faculty member’s privacy interest. Computer files, e-mail and voice mail created, stored, transmitted or received by faculty will be afforded the same level of privacy as the contents of their offices. The Policy on Safeguarding University Assets governs access to faculty records in connection with investigations carried out by the University’s Office of Audit and Compliance, and provides for prior consultation with the Provost and Faculty Senate and for notifying the subject of a search of any files or materials taken during an investigation. Except as may otherwise be dictated by legal requirements, the procedures outlined in that policy will be followed with respect to a faculty member’s computer files, e-mail or voice mail in connection with other investigations or proceedings.

C. Staff:

It is generally not University policy to access staff members’ electronically stored information. As noted above, the University’s need for information will normally be met by asking an employee for it. Properly authorized University officials, including supervisors acting with the consent of their management, may, however, access, review and release the contents of staff computer files, e-mail or voice mail transmitted over or stored on University systems when, for example, an employee is absent or has left the University and the information is not available elsewhere, or in other situations in which it is necessary if the ordinary business of the University is to proceed. In more complicated situations—where, for example, a supervisor believes University resources are being misused—she or he should consult with senior administrators, the Division of Human Resources, or the Office of General Counsel.

D. Students:

Students are provided e-mail and computer accounts for use primarily in connection with their academic activities. While the University does not generally monitor or access the contents of a student’s e-mail or computer accounts, it reserves the right to do so. However, access to and disclosure of a student’s e-mail messages and the contents of his or her computer accounts may only be authorized by any one of the Dean of the student’s School or his/her designee, the Vice Provost for University Life, the Office of Audit and Compliance, in consultation with the Office of General Counsel.

E. Multiple Affiliation:

Some individuals have multiple University affiliations (e.g., students employed by the University). When the need for access to information arises from a particular status, the provisions above for that status will be applied. In other cases, the provisions for the individual’s primary status will be applied.

III. Violations of this Policy

Members of the University community who believe that this policy has been violated with respect to their privacy should attempt initially to resolve the issue within their unit or department, if necessary with the mediation of the leadership of their representative assembly or the University Ombudsman. Others who become aware of violations of this policy should report them to the University Information Security Officer, Office of General Counsel, Division of Human Resources or the Office of Audit and Compliance. All University offices that substantiate such violations should report them to the University Information Security Officer, who will monitor them for repeat instances and patterns. Those who violate this policy may be subject to disciplinary procedures up to and including dismissal.

Appendix: Special Note on E-mail Privacy

Despite the best intentions of users and the University or other system operators, it is difficult, if not impossible, to assure the privacy of e-mail. E-mail is not a good medium to use for sensitive matters that you would not want disclosed. There are numerous ways that plain text e-mail may be disclosed to persons other than the addressee, including:

- Recipient’s address is mistyped; message is sent to someone else.
- Recipient forwards e-mail to someone else.
- Intruders break into e-mail system and read/disclose messages.
- Despite owner’s belief that s/he deleted it, e-mail continues to exist on computer hard drive or a copy is archived on tape backup; disclosure of such copies may be required in connection with judicial or administrative proceedings or government investigations.
- E-mail is observed as it travels over public networks like PennNet and the Internet.
- In addition, e-mail users may want to consider routinely or periodically deleting old messages, and encrypting personal messages. Systems administrators should consider shorter retention of backup tapes, consistent with data integrity requirements.
Policy on Secular and Religious Holidays

1. The University recognizes/observes the following secular holidays: Martin Luther King, Jr. Day, Memorial Day, July 4, Thanksgiving and the day after, Labor Day, and New Year’s Day.

2. The University also recognizes that there are several religious holidays that affect large numbers of University community members, including Christmas, Rosh Hashanah, Yom Kippur, the first two days of Passover, and Good Friday. In consideration of their significance for many students, no examinations may be given and no assigned work may be required on these days. Students who observe these holidays will be given an opportunity to make up missed work in both laboratories and lecture courses. If an examination is given on the first class day after one of these holidays, it must not cover material introduced in class on that holiday.

Faculty should realize that Jewish holidays begin at sundown on the evening before the published date of the holiday. Late afternoon exams should be avoided on these days. Also, no examinations may be held on Saturdays or Sundays in the undergraduate schools unless they are also available on other days. Nor should seminars or other regular classes be scheduled on Saturdays or Sundays unless they are also available at other times.

3. The University recognizes that there are other holidays, both religious and secular which are of importance to some individuals and groups on campus. Such occasions include, but are not limited to, Sukkot, the last two days of Passover, Shavuot, Shemini Atzeret and Simchat Torah, Chinese New Year, the Muslim New Year, Diwali, Navanatri, Rama Navami, Paryushan, and the Islamic holidays Eid Al-Fitr and Eid Al-Adha. Students who wish to observe such holidays must inform their instructors within the first two weeks of each semester of their intent to observe the holiday even when the exact date of the holiday will not be known until later so that alternative arrangements convenient to both students and faculty can be made at the earliest opportunity. Students who make such arrangements will not be required to attend classes or take examinations on the designated days, and faculty must provide reasonable opportunities for such students to make up missed work and examinations. For this reason it is desirable that faculty inform students of all examination dates at the start of each semester. Exceptions to the requirement of a make-up examination must be approved in advance by the undergraduate dean of the school in which the course is offered.

Updated August 29, 2017

Policy on Undergraduate Students, High School Students and Non-affiliates Participating in Research in Penn Research Facilities

For the purpose of this policy, non-affiliates are individuals who are not University of Pennsylvania faculty, staff, graduate students or post-doctoral trainees. The Principal Investigator is responsible for assuring that all students and non-affiliates working in his/her laboratory are appropriately trained, supervised and comply with the requirements of this policy. At a minimum this training must include Profiler and all training determined by Profiler such as EHRS, HIPAA, IACUC, etc.

- Students who are not yet in High School are not permitted to participate in laboratory activities.
- Non-affiliates may not serve in laboratories as unpaid volunteers or trainees without University approval.

This policy applies to the three categories listed below.

A. High School Students (HSS): HSS are permitted to participate in laboratories at Penn provided that all of the following conditions are met and none of the prohibitions set forth in item (7) are violated.

1. All programs for HSS must comply with the requirements described in the Vice Provost for University Life current year’s “Special Summer Programs Protocols.”
2. Each HSS must have a Principal Investigator or Sponsor who agrees to supervise and be responsible for the HSS while the student is present in the laboratory. The HSS must be appropriately supervised at all times when in the laboratory.
3. HSS may not be employed in laboratories nor perform the duties and responsibilities of an employee. (HSS participating as trainees in officially sanctioned and approved programs may receive a stipend in connection with the program.)
4. A Consent/Signature sheet must be submitted to the Principal Investigator/Sponsor with signatures from the HSS and his/her parents.
5. The Principal Investigator/Sponsor must provide the HSS with hazard specific information and appropriate personal protective equipment and instruct the student in its use and disposal.
6. Each HSS must attend Laboratory Safety training provided by EHRS before the laboratory activity begins. If a student is working in a lab where radioactive materials are used, Radiation Safety Training is also required.
7. HSS are not permitted to participate in the following activities in laboratories:
   i. Any laboratory or facility designated as BSL-3
   ii. Any laboratory or facility in which Select Agents or Explosives (as defined in OSHA Hazard Communication Standard Appendix B) are used or stored.
   iii. Work with acutely toxic substances or reproductive hazards (as defined in OSHA Hazard Communication Standard Appendix A).
   iv. Operate farm machinery
   v. Work in machine shops
8. HSS are permitted to participate in the following activities only after completing specialized training:
   i. Work with recombinant or synthetic DNA (EHRS r-s-DNA online training)
ii. Limited work with radioactive materials is permitted. Work must be performed under the supervision and in the physical presence of a trained radiation worker. Only H-3, C-13, P-32 and S-35 in amounts less than 100 uCi may be used.

iii. HSS who will work with live animals must be associated with a specific ARIES animal research protocol, have their qualifications or training described in the specific procedures that they will be performing/assisting identified. Prior to working with animals, HSS must complete all necessary IACUC-related training associated with the HSS' role on the protocol.

iv. HSS who will work with non-human primates or tissue/body fluids from non-human primate must complete specialized IACUC-related training in addition to standard training for other species.

B. Undergraduates (UG): UG from Penn or from other institutions are permitted to participate in laboratories at Penn provided that all of the following conditions are met and none of the prohibitions set forth in Item (4) are violated.

1. Each UG must have a Principal Investigator/Sponsor who agrees to supervise and be responsible for the UG while the student is present in the laboratory.

2. The Principal Investigator/Sponsor must provide the UG with hazard specific information and appropriate personal protective equipment and instruct the student in its use and disposal.

3. Each UG must attend Laboratory Safety training provided by EHRS before the laboratory activity begins. If a student is working in a lab where radioactive materials are used, Radiation Safety Training is also required.

4. UGs are not permitted to participate in the following activities in laboratories:
   i. Any laboratory or facility designated as BSL-3
   ii. Any laboratory or facility in which Select Agents or Explosives (as defined in OSHA Hazard Communication Standard Appendix B) are used or stored.

5. UGs are permitted to participate in the following activities in laboratories after completing specialized training:
   i. Work with recombinant DNA
   ii. Operate farm machinery
   iii. Work in machine shops
   iv. Work with radioactive material if over age 18. Undergraduate students under the age of 18 must follow the same restrictions as High School Students for this component.

6. UGs who will work with live animals must be associated with a specific ARIES animal research protocol, have their qualifications or training described and the specific procedures that they will be performing/assisting identified. Prior to working with animals, UGs must complete all necessary IACUC-related training associated with the UGs’ role on the protocol.

7. UGs who will work with non-human primates or tissue/body fluids from non-human primate must complete specialized IACUC-related training in addition to standard training for other species.

C. Non-Affiliates (NA) with undergraduate degrees: Post graduates including visiting scholars and trainees (not Penn faculty, staff or students)

1. NA must have a Principal Investigator/Sponsor who agrees to supervise the NA while he/she is present in the laboratory.

2. The Principal Investigator/Sponsor must provide the NA with hazard specific information and appropriate personal protective equipment and instruct the NA in its use and disposal.

3. Each NA must affirm that he/she completed a Laboratory Safety course at his/her home institution or complete relevant Laboratory Safety training offered by EHRS before the laboratory activity begins.

4. A NA is permitted to participate in the following activities after completing specialized training:
   i. A laboratory or facility designated as BSL-3 or ABL-3
   ii. A laboratory or facility in which Select Agents (DHHS Security Risk Assessment Approval required) or Explosives are used or stored.
   iii. Work with recombinant DNA
   iv. Work with radioactive materials
   v. Operate farm machinery
   vi. Work in machine shops.

5. NAs who will work with live animals must be associated with a specific ARIES animal research protocol, have their qualifications or training described and the specific procedures that they will be performing/assisting identified. Prior to working with animals, NAs must complete all necessary IACUC-related training associated with the NAs’ role on the protocol.

6. Work with non-human primates or tissues/body fluids from non-human primates requires specialized IACUC-related training in addition to standard training for other species.

Policy on University Drivers and Mandatory Safety Training

Effective immediately, the Offices of Risk Management and Fire and Occupational Safety have instituted a mandatory drivers’ safety program for all University staff, faculty, and students who are assigned by a division or department to operate a vehicle loaned to, leased or owned by the University or University-related business. Departments and divisions will be given a reasonable opportunity to schedule such drivers to attend a basic drivers’ safety program sponsored by our offices and conducted by a National Transportation Safety expert. Thereafter, any department or division which sustains collision damage to a vehicle operated by a driver who has not attended this program will incur a 100% deductible for replacement of or repairs to the vehicle.

Programs will be offered throughout the summer and fall in a central location on campus and at various times to accommodate our staff, faculty, and student drivers. The program is four hours long and includes a lecture, a film, and demonstration on safe vehicle operation and maintenance and on accident management. Materials will be provided to attendees, including a Pennsylvania Driver’s Manual and vehicle accident kit. Following the program, attendees will receive a certificate of attendance which will be delivered to their supervisor or department head. The cost for the presentation and materials are borne by Risk Management and Safety Offices.

It is the responsibility of departmental and division supervisors to ensure compliance with this program. All scheduling should be conducted by the supervisors who must account for attendance to the program in the event of a vehicle accident for which a claim for reimbursement is made to the Office of Risk Management. This policy does not relieve a department or division from the responsibility for reporting all incidents involving University vehicles and the property or vehicles of others, regardless of
the status of the drivers. The Office of Risk Management must receive an incident report with verification of all drivers and witnesses, as well as copies of police reports. The failure to report all such incidents may result in the loss of insurance coverage, including liability protection, to the University and its representatives.

Questions regarding this policy should be addressed to Risk Management Ext 8-6236. Please also read Safety Bulletin #62 regarding motor vehicle operation, available by calling Ext 8-6921, and address any questions concerning this bulletin to that office. (Source: Almanac, September 22, 1992 [https://almanac.upenn.edu/archive/v39pdf/n04/092292.pdf])

Policy on University Recognition of Undergraduate Honor Societies

The University through its faculty in schools and academic departments alone reserves the right to bestow academic honors on its undergraduate students and to report such honors on students' transcripts. Academic honors of various types are established and awarded by the relevant faculty body. The relevant body depends on the nature of the honor.

- In the case of honors for which students in a particular major are uniquely eligible, the authorizing body is the academic department or interdisciplinary program committee responsible for that major.
- In the case of honors for which students in a particular school are uniquely eligible, the authorizing body is the faculty of that school.
- In the case of honors for which all undergraduates are eligible, the authorizing body is the Council of Undergraduate Deans acting with the consent of the faculties of the separate undergraduate schools.

Release of Student Academic Status Information for Honor Society Selection

Student academic status information (e.g., GPA, term standing, class rank/percent) may be released only in accordance with the University's Policy On Confidentiality Of Student Records, particularly regarding designated directory information.

Student academic status information is not to be released to honor societies for recruiting purposes. This includes cohort information such as "names of students with a 3.2 or higher GPA." Student academic status information may be utilized internally for selection purposes by Schools, Centers, or other University departments under the auspices of an officially designated selection committee and following the University's Policy On Confidentiality Of Student Records.

Policy Regarding Human Subject Research in the Sociobehavioral Sciences

Scope

This policy is applicable to all employees, students, trainees, faculty, and other persons working for or in facilities owned and operated by the University of Pennsylvania and conducting sociobehavioral research. This policy is meant to apply University-wide to all research involving human subject data, and inclusive of biomedical research protocols applying sociobehavioral techniques (e.g., survey research). Depending on the type of research, other policies (e.g., those pertaining to biomedical research) may apply as well. Relevance is determined by the involvement of living human subjects in observational or experimental research, or in the use of records or specimens that may conceivably place the subjects of these records at risk, as per the Common Rule.¹

The term "sociobehavioral sciences" (or the term "social and behavioral sciences") must be understood as a shorthand term for the set of inquiries involving human subjects not otherwise subsumed under the biomedical sciences. It includes fields of research specifically defined as behavioral and social sciences in federal manpower reports,² that is, "anthropology, demography, the non-clinical fields of psychology, sociology, and the speech and hearing sciences." It also includes human subject research in economics, business, education, and history, among others (see the Common Rule³). Thus, the proposed policy applies to all sociobehavioral research irrespective of its institutional setting within the University or its source of funding. Note that disciplinary predictions—for example, rejection of the rubric "science"—are insufficient warrant for self-abstention from the policy promulgated here.

Regulatory Background

In the context of Institutional Review Board (IRB) oversight of human subject research, the Common Rule specifies three levels of review of proposed research,¹ which can be summarized as follows:

1. full board review—a convened IRB committee must approve the proposed research, applying criteria set forth in the Common Rule, before the research can be conducted;
2. expedited review—certain kinds of research involving no more than minimal risk, as well as minor changes in approved research, can be approved by an administrative mechanism not requiring a convened IRB committee;
3. exempt from review—minimal risk research activities in a number of specified categories,³ involving human subjects not from vulnerable populations,⁴ are exempt from full review as per the Common Rule.

These three levels of review require submission of a research protocol to the IRB. Specific submission requirements for each category can be found at the IRB website.⁵

At the University of Pennsylvania, "expedited review" is typically performed by Office of Regulatory Affairs personnel. The University is also required to have a mechanism in place for determining whether a proposed research protocol is "exempt from review." As per the federal-wide assurance (FWA) that the University has in place, this determination is made by an administrative mechanism⁶ similar to that for "expedited review." In addition, there are certain kinds of research not covered by the Common Rule. Such research does not require any involvement of the IRB, even at the level of "exempt from review.

This policy clarifies that specific activities in the social behavioral sciences do not require IRB involvement. As a category distinct from "exempt from review," it is referred to as "not under the purview of the IRB:"

Implementation

Implementation of the policy outlined below will be the responsibility of the Office of the Vice Provost for Research. In consultation with the Schools and their faculty, the Vice Provost will create a training program, and a certification process documenting successful completion of the training program. Any sociobehavioral research activities involving human subjects or human subject data will require prior official certification once this policy becomes effective.
Policy

Education and Certification

This policy extends to the sociobehavioral sciences a requirement currently in place in the School of Medicine that has been enforced outside of the School of Medicine only for key personnel submitting grants to federal agencies. The requirement now becomes University-wide, covers sociobehavioral research, and is not restricted to federal grant activity.

1. All personnel—faculty, research fellows, students and staff—engaging in sociobehavioral research must have documented discipline-appropriate education regarding human subject protection, in accordance with certification standards defined by the Vice Provost for Research.

The training program and certification process are to be kept current under the auspices of the Vice Provost for Research and in consultation with the Schools and their faculty.

Survey Research

Survey research, which includes face-to-face or telephone interviewing, or self-administered questionnaires (as through the mail or via the Internet), generally has a low cost of participation, since it usually requires only a small amount of subjects’ time. According to the Common Rule, such research is “exempt from review” and does not require written consent, as clarified below.

2a. Survey research is exempt from review if the survey is anonymous or protection of the confidentiality of research subjects is adequately demonstrated, and if all other applicable criteria for exempt from review are fulfilled (e.g., research must not involve vulnerable populations or put subjects at more than minimal risk).

2b. For research that is exempt from IRB review, human subjects responding to a survey are automatically considered to have given informed consent.

In order to qualify for a default waiver of written consent as per policy item 2b, an exemption form must be presented to the IRB showing that:

i) human subjects will be informed of all applicable elements of consent prior to responding to the survey; and

ii) all criteria for “exempt from review” are fulfilled.

Secondary Data Analysis

Secondary data analysis is the (usually statistical) investigation of individual-level data records collected in another study, with the following characteristics: (1) no direct contact with or experimental manipulation of human subjects; (2) no new data collection; and (3) no identification of individual research subjects. In agreement with recommendations 1 and 6 of the Draft Recommendations Regarding Public Use Data Files issued by the National Human Research Protections Advisory Committee (NHRPAC), this policy states that such research may either be “exempt from review” or “not under the purview of the IRB,” as clarified below.

3a. Research on a public use data file, which contains only non-identifiable data or data for which a breach of confidentiality is not an issue (e.g., public business statements), is not considered human subject research for the purpose of IRB review and as such is not under the purview of the IRB.

3b. Research on a non-public use data file—that is, non-identifiable data in a non-publicly available or proprietary file—is exempt from review, unless vulnerable populations are involved. Non-public use data files may be submitted by a School to the IRB for approval. If approved, with the appropriate maintenance of safeguards, studies using these data sets are no longer human subject research and as such are not under the purview of the IRB.

Investigators must agree not to attempt to re-identify the human subjects.

Investigators planning to study non-public use data files must demonstrate to the IRB that confidentiality of research subjects is protected, by providing direct evidence of protection procedures or by showing that the data supplier already received IRB approval in which non-identifiability was considered and confirmed. The latter does not necessarily require submitting to the IRB the survey instrument or consent form used in the research that yielded the data.

Researchers operating in one of the categories of the Health Insurance Portability and Accountability Act (HIPAA) should refer to the HIPAA regulations that contain a definition of identifiability.

Evolving Research

Evolving research is a class of research in the sociobehavioral sciences in which the questions that are posed evolve in the course of investigation. An example is ethnography, where research questions may only be clarified after a period of observation and where current findings drive the next steps in the study. This class of research typically involves studying human behavior in non experimental settings, with or without active participation by the investigator; but it can also occur in more structured observational settings (e.g., oral histories, focus groups). In specific cases, such research does not pose more than minimal risk to human subjects and is considered to be “exempt from review,” as stated below. An approved mechanism is necessary for presenting to the IRB a research protocol that will evolve in the course of investigation. This policy institutes such a mechanism via certification.

4a. Research involving only non-interventionist observation of behavior occurring in public (including domains of the Internet clearly intended to be publicly accessible), for which no identifying information is recorded, is exempt from review.

4b. Investigators are allowed to use their certification, as per policy item 1, as a reference for describing evolving research activities to the IRB in lieu of a fixed research protocol.

This policy eliminates the need for investigators doing evolving research to spell out the details of a dynamic research protocol. The IRB can be assured that the research will be conducted in an ethically appropriate fashion, with full protection of human subjects, when certified investigators attest that their pre-registered research plan will be conducted within the ethical framework laid out in the training program for which they are certified.

Note that different studies by the same investigator(s) must be submitted to the IRB as separate research protocols. These must not be viewed as a single study evolving from one investigation into another.

Feasibility Assessment

Feasibility assessment (or exploratory research) is understood to involve the conceptualization or refinement of a research question through harmless observation, casual conversation, and browsing of extant data. The Common Rule applies only to generalizable research. Therefore, feasibility assessment is “not under the purview of the IRB” if a number of strict conditions are met, as specified below.
5. Feasibility assessment is not under the purview of the IRB, if and only if the following conditions are met:

(a) the assessment involves no more than minimal risk;

(b) the assessment does not involve any vulnerable populations, including prisoners, minors, pregnant women and fetuses, mentally impaired or disabled persons, terminally ill patients, the very elderly, and anyone incapable of self-determination;

(c) the human subjects are not identifiable from any of the information acquired;

(d) the assessment does not involve any deceptions;

(e) the assessment data and results are not disclosed or published;

(f) there is no systematic collection of data, or any systematic data collection serves only to calibrate a research instrument that involves no more than minimal risk.

If at any time any of these conditions cannot be satisfied, the project must be submitted to the IRB for review.

**Adverse Effects**

This policy prescribes the documentation of possible negative effects on human research subjects and how they can be reversed.

6. For research involving manipulations or deceptions of human subjects that may cause harmful or undesirable effects, research protocols submitted to the IRB must specifically describe the recovery or debriefing procedures of the study, and address how the effectiveness of these procedures will be assessed.

When a research study may have foreseeable untoward effects on human subjects, the investigator must explain in the research protocol how these effects will be mitigated.

The IRB must be informed of the occurrence of any adverse events that take place during the research study or as a result of the research study. For research protocols that are reviewed by the IRB in one of the three review categories (full board review, expedited review, or exempt from review), adverse events must be reported for the annual continuing review. Research protocols "not under the purview of the IRB" require reporting of any adverse events within a month of occurrence, as such events may change the review status of the study. Unanticipated events or effects on human subjects that may change the interpretation of the risk of the protocol must be reported to the IRB as soon as they are identified.

---

1. [http://www.hhs.gov/ohrp/humansubjects/guidance/45cfr46.htm](http://www.hhs.gov/ohrp/humansubjects/guidance/45cfr46.htm)

3. Briefly, these include research conducted in established or commonly accepted educational settings involving normal educational practices; certain research involving the use of educational tests; certain research on elected or appointed public officials or candidates for public office; research involving the collection or study of publicly available or non-identifiable existing data; certain research on public benefit or service programs; and certain taste and food quality evaluation and consumer acceptance studies.

4. According to the Common Rule, vulnerable populations include minors, prisoners, pregnant women, mentally disabled persons, and economically or educationally disadvantaged persons. Other categories of human subjects may be considered vulnerable depending on the research activities.

7. Demonstrating adequate protection of the confidentiality of research subjects does not necessarily imply a requirement to submit the survey instrument to the IRB.

8. For survey research, pregnant women are not considered a vulnerable population.

9. [http://www2.ans.org/footnotes/feb02/index.html](http://www2.ans.org/footnotes/feb02/index.html)

(Source: Almanac, October 3, 2006, Volume 53, No. 6) [https://almanac.upenn.edu/archive/volumes/v53/n06/or-hsresearch.html](https://almanac.upenn.edu/archive/volumes/v53/n06/or-hsresearch.html)

**Political Candidates**

University students are frequently involved in political events and activities on behalf of candidates for political office. Students are, of course, free to sponsor or participate in campaign-related activities as long as they do not use University resources. When engaging in partisan political activities, students should not imply that the University itself endorses or opposes any candidate for political office.

The following rules apply to student groups.

1. No group, whether recognized or not, that plans to campaign for a particular candidate can receive an allocation from the Student Activities budget.

2. Facilities that customarily are made available to student groups may, on a very limited basis, be used by student groups supporting candidates if such use does not preclude the use of facilities by nonpolitical groups. Fees normally charged for use of facilities must be paid in advance. Under no circumstances may groups supporting candidates use University space to establish a campaign headquarters nor can such groups be assigned permanent office space.

3. No group that supports a candidate for public office may sponsor events in University facilities to raise money for the candidate's campaign. Advance ticket sales or admissions charges at the door for campaign fund raising are not permitted.

**Poster Policy**

**Posting Notices in Outdoor Areas**

1. Groups should restrict posters to kiosks.

2. Each activity will be limited to two posters per kiosk per event.

3. No poster or notice may be larger than 14" x 17".

4. All activities found in violation of these policies will pay a fine of at least $1.00 per poster.

5. Mounting of posters or use of paint on walls, sidewalks, trees, benches, or other surfaces not intended for posting is prohibited. Posting of notices with adhesive which damage surfaces also is prohibited. The cost of removal of this type of publicity will
automatically be charged to the group and/or individuals who posted said publicity.

**Posting Notices in Indoor Areas**

1. Posters may only be placed in those areas designated for posting.
2. Groups wishing to mount posters in University buildings should contact the appropriate building administrator’s office to ascertain the proper locations for posters.

**Sanctions**

Groups failing to adhere to the poster policy may be denied use of funds allocated to them by the Activities Council and/or be denied further use of University facilities until such time as corrective action is taken and payment for damages, if any, is received.

All fines will go into the budget of the Student Activities Council.

**Policy for Locust Walk Banners**

Any registered organization may reserve one of 16 locations and sets of poles for banner display along Locust Walk between 36th & 37th Streets.

Reservations may be made via the online reservation portal (http://www.vpul.upenn.edu/osa/LocustBannerTable). Poles and locations may be reserved for a maximum of one week after which the reservation must be made again for the next week.

Reserved poles may be picked up in the OSA, as early as 9:00am on the first day of a reservation (a group must have received an APPROVED reservation email from the OSA in order to have a confirmed reservation).

At the time the poles are picked up, a cash deposit of $25.00 must be made. This deposit will be returned to the reserving group when the poles are returned to the OSA at the end of the reservation period.

**Failure to Return Reserved Poles by the End of the Reservation Period (Friday afternoon at 4:00 PM of the week for which the reservation was made), return of damaged poles, and/or failure to return poles because they were lost or stolen will result in forfeiture of the $25.00 security deposit and an automatic $1.00 fine taken from the organization’s university account.** Poles still need to be returned even if the deposit is forfeited.

Any poles found in sleeves that have not been reserved ahead of time, or for which there is no deposit on record, will be removed. The deposit will not be returned.

If a group fails to return its poles once in one year, it forfeits all rights to use the poles for four academic months from the day the poles were due.

Poles and the spaces in which to place them are the only things obtainable through the OSA. Neither twine, string, rope, tape, scissors, ladders nor any other materials will be provided. Such items must be provided by the reserving groups.

Facilities Services personnel have been authorized to remove any banners hung in unauthorized locations, i.e. any location unmarked on the schematic diagram mentioned previously in this document and/or the absence of the use of University provided poles.

Failure to abide by any of the guidelines listed in this policy may result in the loss of a group’s permission to reserve poles and locations on Locust Walk for the balance of the academic year.

**Office of College Houses and Academic Services Poster and Flyer Policies**

**Instructions for Residential Posting:**

This policy covers posting within the Penn College Houses. Posting elsewhere in the University is covered by the University Poster Policy. Posting on floors or in lobbies requires the approval of each House Office. Postings and notices in these areas are reserved for the College House, CHAS, Residential Services, and Facilities. Any exceptions to this may only be granted by College House staff.

**If interested in posting on floors or in lobbies, you have three options:**

**Option #1:** Bring the following number of flyers or posters to the appropriate House Office for posting by staff:

- Du Bois: 8
- Fisher-Hassenfeld: 24
- Gregory: 12
- Harrison: 24
- Harnwell: 24
- Hill: 17
- Kings Court Eng: 16
- New: 10
- Riepe: 22
- Rodin: 24
- Sansom West: 15
- Stouffer: 13
- Ware: 25

**Option #2:** Bring 234 posters to the CHAS Central Office in Stouffer Commons for dissemination to all House Offices. The front desk will pass on the items.

**Option #3:** Open posting by students and groups is available only in certain locations and on designated public boards:

- Du Bois: upper lobby bulletin board
- Gregory: no open posting at this time
- Hill: no open posting at this time
- Kings Court English: boards facing mailboxes on first floor; board near bike rack; boards on ground floors facing elevators
- High Rises (Harnwell, Harrison, Rodin, and Sansom West): residential floors including roof top lounge on the designated side of the elevator bays
- New: dining center bulletin board
- Quad (Fisher-Hassenfeld, Riepe and Ware): all exterior (courtyard) bulletin boards
- Stouffer: no open posting at this time

**A few general guidelines:**

- Leafleting under doors and soliciting are prohibited within all residences.

*2018-19 Catalog | Generated 02/28/19*
• No more than one or two copies of a poster may be placed on an open board and should be promptly removed when information is outdated.
• Posters should not exceed the size of 11 x 17 inches.
• Posters may not be placed on top of existing posters.
• Posting is not allowed in stairwells and elevators.

* Think before you post. College Houses defend the right of free speech and expression on campus and actively promotes the civil exchange of ideas. In the spirit of the latter aim, students are urged to reconsider creating and distributing posters or flyers containing material or language that could be construed as malicious toward or dangerous to other responsible members of the University community.

** Unauthorized posters may, at the discretion of residential staff, be removed.** In all cases, the above policy will be implemented within the framework and spirit of the Code of Student Conduct, which defines the general rights and responsibilities of student citizenship in the Penn community, and where appropriate, the Charter of the University of Pennsylvania Student Disciplinary System, which sets forth the processes for disciplinary action against students and organizations. Pursuant to the Code of Student Conduct (Sec. III. d ), "the content of student speech or expression is not by itself a basis for disciplinary action," and no posters shall be prohibited or restricted solely on the basis of their content, except when they may violate other applicable laws or regulations.

(updated December 2016)

Procedures Regarding Misconduct in Research for Nonfaculty members of the Research Community

Introduction

The University relies on all members of its research community to establish and maintain the highest standards of ethical practice in academic work, including research. Misconduct in research is prohibited and represents a serious breach of both the rules of the University and the customs of scholarly communities.

The following procedures are applicable to nonfaculty members of the University of Pennsylvania research community including students, postdoctoral fellows, and staff.

Research Misconduct Defined

Research misconduct is defined as fabrication, falsification, plagiarism, or other serious deviation from accepted practices in proposing, performing, or reviewing research, or in reporting research results.

• Fabrication is making up data or results and recording or reporting them.
• Falsification is manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record.
• Plagiarism is the appropriation of another person's ideas, processes, or results, or works without giving appropriate credit.
• Serious deviation from accepted practices includes but is not limited to stealing, destroying, or damaging the research property of others with the intent to alter the research record; and directing or encouraging others to engage in fabrication, falsification or plagiarism. As defined here, it is limited to activity related to the proposing, performing, or reviewing of research, or in the reporting of research results and does not include misconduct that occurs in the research setting but that does not affect the integrity of the research record, such as misallocation of funds, sexual harassment, and discrimination, which are covered by other University policies.

The research record is the record of data or results that embody the facts resulting from scientific inquiry, and includes, but is not limited to, research proposals, laboratory records, both physical and electronic, progress reports, abstracts, theses, oral presentations, internal reports, and journal articles.

Some forms of misconduct, such as failure to adhere to requirements for the protection of human subjects or to ensure the welfare of laboratory animals, are governed by specific federal regulations and are subject to the oversight of established University committees. However, violations involving failure to meet these requirements may also be covered under this policy or possibly by other University policies when so determined by the responsible committees or institutional officials.

Research misconduct does not include honest error or differences of opinion.

Findings of Research Misconduct

A finding of research misconduct requires that:

• There be a significant departure from accepted practices of the relevant research community; and
• The misconduct be committed intentionally, or knowingly, or recklessly; and
• The allegation be proven by a preponderance of evidence.

Jurisdiction and Applicable Process

There are a number of University policies and procedures for responding to allegations of misconduct by students, postdoctoral fellows, or staff. This policy is intended to be invoked only in instances where research misconduct (i.e. activity related to the proposing, performing, or reviewing of research, or in the reporting of research results and which therefore may have an impact on the integrity of the research record) is involved. Questions of jurisdiction and the applicability of the appropriate University procedure will be decided by the responsible administrative entity (such as the Office for Student Conduct, Office for Postdoctoral Programs, or the Office of Human Resources), in consultation with the Vice Provost for Research. Allegations of misconduct not involving the research process or the integrity of the research record will be resolved by the disciplinary process ordinarily applicable.

1. Inquiry

1.1 Allegations of research misconduct should be directed in the first instance to the Vice Provost for Research who, along with the responsible administrative entity, will determine jurisdiction and which process is applicable to resolve the allegation. If the Vice Provost determines that this process is properly invoked, the Vice Provost will forward the complaint—which must be in writing—to the Dean of the School where the research is being performed.

1.2 Upon receipt of a properly documented complaint, the Dean will inform the respondent of the nature of the charges, and will provide the
respondent with a copy of these procedures. The Dean will also take steps to secure relevant documents, data and other materials

The Dean will appoint one or more unbiased, impartial individuals with appropriate expertise who will conduct a preliminary inquiry to determine whether a full investigation is warranted.

1.3 The inquiry committee will gather information and determine whether there is sufficient, credible basis to warrant a formal investigation. The committee shall offer the respondent an opportunity to provide them with relevant information regarding the allegations. The committee will submit a written report of its assessment to the Dean and the respondent, and to the complainant where appropriate. The report should state what evidence was reviewed, summarize relevant interviews, and include the committee’s recommendation. This report will ordinarily be submitted within 30 calendar days of receipt of the written complaint by the Dean.

1.4 If the report of the inquiry committee determines that a formal investigation is not warranted, the Dean may (i) drop the matter or (ii) not initiate a formal investigation, but take such other action as the circumstances warrant, or (iii), in extraordinary circumstances, nonetheless initiate a formal investigation. The Dean will inform the concerned parties of the decision.

1.5 If the inquiry committee determines that a formal investigation is warranted, the Dean will initiate a formal investigation as provided in Section 2. The Provost (Vice Provost/designee) will inform the appropriate government agency or source funding the research, in writing, that a formal investigation has been initiated and will identify the respondent to the agency or source (1).

2. Formal Investigation

2.1 To initiate a formal investigation, the Dean will appoint a formal investigation committee of not less than two disinterested individuals with sufficient expertise, one or more of whom may have served on the preliminary inquiry committee.

2.2 Investigation. The formal investigation committee will be provided with copies of the complaint, the report of the initial inquiry and any other materials acquired during the preliminary inquiry. The formal investigation committee will undertake a thorough examination of the allegations, including without limitation, a review of relevant research data and proposals, publications, correspondence, and records of communication in any form. Experts within or outside the University may be consulted. The Committee shall have authority to investigate, pursue and document any related research misconduct by their respondent, even if such misconduct was not covered by the initial complaint. Whenever possible, interviews will be conducted with the complainant, as well as with others having information regarding the allegations. The Committee must allow the respondent an opportunity to be interviewed at this formal investigation stage. When being interviewed by the committee the respondent and the complainant may each be accompanied by an adviser, who may be a lawyer but who may not participate directly in the proceedings except when and as requested to do so by the committee.

2.3 Reporting the findings. Following its investigation, the formal investigation committee will prepare and provide a written report of its findings to the respondent, to the Dean, to the Provost, and, if appropriate, to the complainant. The report will describe the allegations investigated, how and from whom information was obtained, the findings and basis of the findings, and will include texts or summaries of the interviews conducted by the committee. The report will conclude with a clear statement regarding which charges have been considered and what its findings are with respect to each charge the committee considered. If the committee finds that a violation of University policy in addition to or other than research misconduct might have been committed, a description of the possible violation will be included.

The committee will indicate whether each charge considered during the course of its proceedings is unsubstantiated or substantiated by a preponderance of evidence. If the matter involves a respondent who would be subject to University sanctions for misconduct only if the evidence met a clear and convincing standard, the Committee will make an additional determination as to whether that standard has also been met (2).

The final report will ordinarily be submitted within 90 days of the appointment of the formal investigation committee. The respondent will be permitted to make a written reply to the Dean with a copy to the Provost, and Vice Provost for Research, within 15 calendar days of submission of the report. The Dean may ask the committee to respond in writing to any replies from the respondent. The Dean may also ask the complainant to respond to the report if deemed appropriate. All such responses and replies will be incorporated as appendices to the report of the formal investigation committee.

3. Disposition of Final Report and Findings

3.1 The Dean will consider the final report and replies. Upon acceptance of the report by the Dean, the Provost (Vice Provost/designee) will submit a copy of the report containing the outcome of the investigation to the appropriate government agency or source funding the research, if such action is required by regulation or otherwise appropriate. The entire formal investigation process should be completed within 120 calendar days of its initiation, unless documented circumstances warrant a delay.

3.2 If the final report of the formal investigation committee finds the charges of research misconduct against a respondent not to be substantiated, the research misconduct proceeding is terminated and the concerned parties will be informed. A finding that a charge of research misconduct has not been substantiated shall not preclude the University from taking other appropriate action against the respondent if the respondent’s behavior or actions violate another University policy or rule.

3.3 If the report of the formal investigation committee finds the charges of research misconduct against a respondent to be substantiated, the matter will then be referred to the responsible administrative entity within the University to determine the appropriate University sanctions, if any, to be imposed for the misconduct (3).

4. Other Actions and Procedures

4.1 The Dean in consultation with the Provost will, during the course of the inquiry or formal investigation, take administrative action, as appropriate to protect the welfare of animal or human subjects.

4.2 At any time during the inquiry or formal investigation, the Dean and Provost will immediately notify the relevant funding agency(ies) if public health or safety is at risk; if agency resources or interests are threatened; if research activities should be suspended; if there is reasonable indication of possible violations of civil or criminal law; if Federal action is required to protect the interests of those involved in the investigation; if the University believes the inquiry or formal investigation may be made public prematurely so that appropriate steps can be taken to safeguard evidence and protect the rights of those involved; or if the research community or public should be informed.
4.3 If the final report of the formal investigation committee finds charges have been substantiated, the Provost or Dean will take appropriate steps to correct any misrepresentations resulting from the misconduct. If, at any time during the inquiry or investigatory stages, the respondent admits to the alleged misconduct, the Dean will take the necessary steps to complete the inquiry in order to correct the scientific record. If misrepresented results have been submitted for publication, already published, or otherwise disseminated into the public domain, appropriate journals and other sponsors will be notified. In addition, collaborators, and other affected individuals, organizations, institutions, and sponsors will be informed.

4.4 Complete records of all relevant documentation on cases treated under the provisions of this policy will be preserved by the offices of the Dean and the Provost in a manner consistent with the Protocols for the University Archives and Record Center. In cases adjudicated under Section 3, records will be preserved for a minimum of ten years following completion of all proceedings. Records of cases which are dropped will be preserved for at least three years following the initial inquiry. When students are involved in these procedures, the confidentiality provisions applicable to educational records will govern the disclosure of the records.

4.5 The University may act under these procedures irrespective of possible civil or criminal claims arising out of the same or other events. The Dean, in consultation with the Provost and the general counsel, will determine whether the University will proceed against a respondent who also faces related charges in a civil or criminal tribunal. If the University defers proceedings, it may subsequently proceed irrespective of the time provisions set forth in these procedures.

Endnotes
1. The decision to initiate a formal investigation must be reported to the Office of the Provost, Department of Health and Human Services, if the research has been supported by a grant from DHHS, according to DHHS regulations.
2. There is a discrepancy between University regulations, which use the standard of "clear and convincing" evidence, and regulations of the Office of Research Integrity, which use the lower standard of "preponderance of evidence". Therefore, if there is a finding of fault, the inquiry must explicitly state whether the higher University standard is met, to inform the University administrative entity which is responsible for determining possible sanctions.
3. The intent of this policy is that the appropriate administrative entity will take responsibility for determining and implementing sanctions.

For instance, if the respondent is an undergraduate student any disciplinary sanctions will be determined by the Office of Student Conduct in accordance with its amended Charter procedures dealing with research misconduct findings. In order to determine sanctions, the findings and accompanying documents should be forwarded to the Office of Student Conduct. Upon review of all findings, including all submissions by the respondent etc., the Office of Student Conduct will propose appropriate sanctions to the respondent. The respondent would then have an opportunity to accept, reject or propose alternative sanctions. If either the original sanction or an alternative sanction is accepted and agreed upon, the OSC then has primary responsibility for implementing and monitoring sanctions. If the respondent rejects the sanction, the respondent may appeal the nature and severity of the sanction only to the Disciplinary Appellate Officer within the Student Disciplinary System. If the decision of the appellate officer is to uphold the proposed sanction, the sanction will be imposed, with no further levels of review.

Likewise, if the respondent is a graduate student, postdoctoral fellow, or staff member, the responsible administrative entity would consider the information and determine sanctions.

Recognition and Governance of Undergraduate Social Fraternities and Sororities

The University of Pennsylvania values collegiate fraternities and sororities as an important component of the undergraduate student experience at the University. Fraternal organizations have existed at the University since 1849. These organizations complement the academic and non-academic aspects of the campus life by serving as a source of cultural, academic and social support as their members pursue their educational goals.

This policy
1. describes the relationship between individual fraternity/sorority colonies/chapters ("chapters") and the University,
2. outlines the framework for governance,
3. affirms the University's commitment to recognized chapters and
4. describes the responsibilities of each chapter and its sponsoring organization.

The Office of Fraternity and Sorority Life ("OFSL"), with input from the Interfraternity Council ("IFC"), Intercultural Greek Council ("ICG") and Panhellenic Council ("Panhellenic") (each a "Governing Council") and Greek Alumni/Advisory Council ("GAC"), is responsible for overseeing the implementation of this policy.

I. Framework for Recognition

A. General Principles
1. Recognition is the formal process by which the University of Pennsylvania agrees that a fraternity or sorority may function on the campus, enroll members from the student body through recruitment and/or intake activities and identify its chapter with the University.
2. Only chapters of an inter/national independently incorporated organization ("National Sponsoring Body") are eligible for University recognition. The University's recognition is premised on the same basic principles that apply to the University's affiliation with external organizations: there must be commonality of goals and standards, mechanisms for accountability and provisions for the discontinuation of the affiliation should goals diverge or standards decline.
3. For colony and chapter recognition, it is critical that a local network of alumni/ae ("Alumni Sponsor") exists to work with the colony/chapter. The Alumni Sponsor is a critical element for the success of any colony/chapter. The Alumni Sponsor will consist of an identified group of alumni/ae or other adults who have agreed to provide mentoring and guidance to the chapter and its members to ensure long term functioning and organizational stability. The Alumni Sponsor also is tasked to ensure that all actions of the chapter are consistent with the mission and values of the University and the National Sponsoring Body. The Alumni Sponsor may be organized as
II. The Recognition Process

A. Overview

1. Recognition is a multi-step process through which the University, in consultation with a National Sponsoring Body and an Alumni Sponsor, determines that a chapter meets the criteria established by this policy for affiliation with the University.

2. City-wide fraternities and sororities which, by charter of the National Sponsoring Body, are authorized to draw membership from more than one college/university within the greater Philadelphia area may be recognized under this policy, subject to the following additional conditions: only the membership drawn from the University of Pennsylvania will be recognized as the official fraternity/sorority chapter; participants from outside of the University will be considered "guests" of the chapter and the chapter will be held accountable for the actions of guests.

3. The recognition process begins with informal consultation among the OFSL, the Office of the Provost and other University offices identified by the Office of the Provost to assess how the possible addition of a chapter would affect the University community's social, cultural, and academic environment.

4. Following a favorable recommendation upon the conclusion of the consultative process described in section II. A.3, a chapter seeking recognition and its National Sponsoring Body shall make a written application and submit all information specified in application guidelines provided by OFSL. This information will generally include: a written pledge of sponsorship by a National Sponsoring Body; identification of an Alumni Sponsor who will supervise the chapter on an ongoing basis; and specific information about the chapter's governance structure and financial plan.

5. A chapter seeking to operate a chapter house must also provide a detailed housing plan, which must include a description of the contractual arrangements for providing housing to students. Further, all chapter houses must conform to the University's requirements regarding safety, insurance coverage and financial accountability.

B. Approval Process

1. Provisional Recognition is the first step in the recognition process. To be eligible for Provisional Recognition, a fraternity or sorority chapter must:
   a. secure a commitment for affiliation from a National Sponsoring Body; and
   b. identify an Alumni Sponsor.

   The chapter must also obtain approval from the appropriate undergraduate Governing Council, the GAC and OFSL.

2. The Director will submit each application to the appropriate Governing Council, as requested by the chapter, and the Governing Council will make a decision on the application in accordance with its policies and procedures.

3. If the chapter receives the approval of a Governing Council, the application for recognition will be forwarded to the GAC. After the chapter receives the approval of both the applicable Governing Council and the GAC, OFSL will complete its review of the application.

4. Provided that the information submitted by the chapter is acceptable to the University, the Director will issue an Offer of Provisional Recognition letter, which will include any special terms or conditions that apply to the chapter. The National Sponsoring Body, the Alumni Sponsor and the chapter seeking recognition must accept the offer.

B. Levels of Recognition

1. Provisional Recognition

   Provisional Recognition is the University's conditional approval of affiliation with a local chapter for a specified period, usually no shorter than one year, after an organization meets the criteria for recognition. To be eligible for Provisional Recognition, a chapter must meet all of the criteria described in section III. B. At the end of the period of Provisional Recognition, OFSL will conduct a review of the chapter and consult with the Fraternity and Sorority Advisory Board ("FSAB") and the Vice Provost for University Life ("VPUL"). The Director of OFSL ("Director") will determine whether the chapter qualifies for Full Recognition or continued Provisional Recognition, or should have its recognition revoked or altered. Ordinarily, Provisional Recognition will apply during the establishment of a new chapter or the reestablishment of a formerly active chapter. In addition to meeting all requirements described in sections II and III.B, formerly active chapters seeking to re-establish must also meet any additional conditions set by the Director. A chapter in Provisional Recognition status may only participate in University-wide rush/membership selection processes to the extent permitted by the IFC, Panhellenic or IGC.

2. Full Recognition

   Full Recognition accords a fraternity/sorority all of the privileges and resources described in section III. A of this policy while also establishing the fraternity/sorority's responsibilities under this policy, including those set forth in section III. B. If the University believes that the activities of a chapter are inconsistent with its policies or goals, the University reserves the right to change or revoke the chapter's recognition through the appropriate process.

3. Probationary Recognition

   Probationary Recognition is a reduced level of recognition resulting from the University's withdrawal of certain privileges for a set time period. This status may be applied to a chapter that has failed to abide by applicable University policies and/or state, local or federal law. Before the end of the probationary period, the chapter's officers, National Sponsoring Body and Alumni Sponsor will be required to produce a written plan regarding corrective action to bring the chapter into full compliance with the policies and/or legal requirements that affected the chapter's status. At the end of the probationary period, OFSL will conduct a review of the chapter in consultation with the FSAB. Based on this review, the Vice Provost for University Life will determine whether the chapter will regain Full Recognition, continue Probationary Recognition or have its recognition revoked or altered.

a separate legal entity, and may be the legal fraternity entity identified as a responsible party in agreements between the University and the fraternity relating to disciplinary action against a chapter or to a chapter's use and occupancy of University-owned property as a residential chapter house. For all residential fraternities, the Alumni Sponsor must also help to promote the financial viability of the chapter and will, to the extent individuals with the requisite expertise are available to the Alumni Sponsor, assist in developing and implementing plans for the management of and improvements to the chapter house. Continued recognition of a chapter requires ongoing active involvement by an Alumni Sponsor.

4. Because fraternity and sorority chapters should enhance the educational experience of students, it is appropriate for the University to provide support services that will help the chapters to function effectively for their members and enhance their stability over time.
of recognition in writing through their respective authorized officers before a chapter can be granted Provisional Recognition.

5. After a chapter has satisfied requirements contained in the Offer of Provisional Recognition as well as any other prerequisites to Full Recognition established by the University and the National Sponsoring Body, it may seek Full Recognition from the University. Both its National Sponsoring Body and its Alumni Sponsor must certify in writing that a chapter seeking Full Recognition has complied with all requirements for Full Recognition contained in the Offer of Provisional Recognition.

6. If the Director confirms that
   a. all requirements for Full Recognition contained in the Offer of Provisional Recognition have been satisfied and
   b. the chapter meets generally applicable criteria for Full Recognition, the Director will issue a letter awarding the chapter Full Recognition status.

III. Privileges and Responsibilities of Recognition

A. Privileges

In general, Full Recognition affords a fraternity/sorority the following privileges:

1. Identification of the chapter with the University and, subject to approval of OFSL, use of the University’s name along with, but not in place of, identification with the National Sponsoring Body.

2. Advice and assistance of OFSL and other appropriate University offices in the conduct of the chapter’s business affairs, operation of its house, if any, and its short-term and long-term financial planning.

3. Assistance and support of various University resources, such as the Division of Public Safety and the Division of Facilities and Real Estate Services, regarding safety and facilities-related issues.

4. Assistance from University offices, such as the Office of Development, Alumni Relations and Annual Giving, in communicating with the University’s alumni of the local chapter.

5. Access to University facilities for official chapter functions, subject to the approval of OFSL and/or other appropriate University offices and subject to applicable charges.

6. Participation in the University’s fraternity/sorority governance system, through IFC, Panhellenic or IGC and GAC.

7. Participation in official University-wide recruitment or membership solicitation programs, facilitated by the IFC, Panhellenic, IGC and/or GAC.

8. Participation in athletic, social and educational programs and activities provided for fraternal organizations.

B. Responsibilities of All Chapters

Each chapter, regardless of its level of recognition or residential status, assumes the following obligations:

1. The chapter and its members must comply with all applicable laws and University policies as well as the requirements of its National Sponsoring Body organization.

2. The chapter must cooperate with University administrators, including, but not limited to, emergency response and law enforcement officials.

3. The chapter, collectively, must maintain a satisfactory cumulative grade point average and each of its individual members must remain in good standing. A student who is not in good standing with his or her school may not retain membership status or reside in the chapter house.

4. The chapter must notify OFSL, in a timely fashion, of any changes in the persons responsible for the chapter’s operation (including, but not limited to, chapter officers and Alumni Sponsor and/or National Sponsoring Body representatives).

5. At least once per semester, the chapter must review with the Director its general progress and contributions during the previous term regarding chapter viability, compliance with University standards, issues of collective responsibility, projected planning and programming needs and any specific need for advisory services from the University.

6. The chapter must prepare an annual report for its National Sponsoring Body and Alumni Sponsor regarding the status of the undergraduate membership. The National Sponsoring Body must communicate at least once per semester with OFSL regarding its evaluation of the chapter.

7. The chapter must comply with the insurance and risk management requirements established by the University for residential chapter houses, set forth in the University’s Policy Establishing Insurance Coverage Requirements and Indemnity Obligations for Residential Fraternities and Sororities.

8. The chapter must accept collective responsibility for activities of the chapter that violate the University’s Code of Student Conduct or other policies and for violations of the University’s rules by individual members and guests when such violations are approved or tolerated by the chapter, its leadership or members.

9. The chapter must maintain chapter viability through sound financial management and supervision.

10. The chapter must maintain participation in the University’s fraternity and sorority governance system through active membership in the IFC, Panhellenic or IGC, and the GAC.

11. The chapter must contribute positively to the University community and to the development of individual chapter members in their role as students at the University.

C. Safety and Risk Management Standards for Residential Chapters Operating in Chapter Houses That Are Not Owned or Managed by the University

Each residential chapter must meet the following additional requirements for initial and continued recognition:

1. The chapter must provide accommodations that are equal in safety and comfort to University dormitory housing. Chapter house accommodations are subject to the same University regulations, guidelines and standards applied to University dormitories and other residential facilities.

2. Chapter house accommodations must comply, on an ongoing basis, with the standards established in the University of Pennsylvania Life Safety Standards for Residential Fraternity/Sorority Chapter Houses.

3. Chapter house accommodations must be structurally sound and maintained in safe, sanitary and tenantable condition.

4. The chapter must submit to regular safety and compliance inspections, as set forth in the University of Pennsylvania Life Safety Standards for Residential Fraternity/Sorority Chapter Houses. All required certifications must be issued by third party service providers approved by the University and must provide evidence of life safety system functionality required by governmental authorities. The
Alumni Sponsor will ensure that any identified deficiencies in the condition or operation of the chapter house are promptly corrected.

D. Chapter Houses in University-Owned Property

1. Chapters that occupy University-owned properties are governed by two separate agreements. The Dormitory Agreement is a long-term agreement between the University and the National Sponsoring Body and/or the Alumni Sponsor that sets forth the structure and conditions under which a chapter may occupy a specific property. The Dormitory Agreement affirms that the governing principle of chapter house occupancy is the property’s status as a University dormitory, and the operational and management relationship between the University and Sponsoring entity will be consistent with that concept. A Dormitory Agreement may be for any number of years, although usually these agreements have a term of 10 to 25 years, assuming all necessary conditions for continued occupancy are met. As constituent units of the University’s system of dormitory housing, chapter houses must submit to regular safety and compliance inspections as set forth in the University of Pennsylvania Life Safety Standards for Residential Fraternity/Sorority Chapter Houses. They also must promptly correct any safety or compliance violations caused by chapter house residents or chapter activities.

2. Additionally, residents of all University-owned chapter houses sign an Occupancy Agreement, between each individual occupant and the University, lasting for not more than one academic year. The Occupancy Agreement reaffirms the chapter house resident’s obligations, including the obligation to comply with the safety and behavioral standards that apply to every University student occupying dormitory housing.

IV. Mechanisms for Accountability

Once a chapter receives Full Recognition by the University, the chapter will continue in that status as long as it meets all of the expectations articulated in this policy. On an annual basis, OFSL will review each chapter’s compliance with these standards. If it is determined that a chapter has failed to meet its responsibilities under this policy, the University may implement alterations in the chapter’s status in accordance with the appropriate process.

The process for addressing a chapter’s violation of this or other University policy will depend on the nature and severity of the violation. The procedural options are described below.

A. Administrative Warning

1. The Director, in consultation with University colleagues, may issue an administrative warning to address minor violations of this policy. Such a warning may be issued by OFSL following agreement between OFSL and the chapter about a course of corrective action to remedy the violation(s) at issue. Ordinarily, the time frame for corrective action will not extend beyond one month.

2. Before issuing an administrative warning, the Director or his designee should meet with the president and/or appropriate officers of the chapter to discuss the violation(s). If the Director and the chapter do not agree on a course of corrective action, the Director may refer the matter for formal discipline. In addition, if the chapter fails to take required corrective action after reaching an agreement with OFSL, the University reserves the right to refer the chapter to the formal disciplinary process.

B. Temporary Suspension Status

1. The University may impose a temporary suspension status upon a chapter pending the outcome of the formal disciplinary process when it has reason to believe that the conduct or activities of a chapter poses a risk to safety or has caused or threatens to cause significant harm to person or property. Such a suspension may be imposed only after consultation between the Director or his or her designee and at least one senior member of the central VPUL administration and the Director of the Office of Student Conduct (OSC).

2. OFSL must provide prompt written notice to the chapter’s president, the Alumni Sponsor and the National Sponsoring Body outlining the reason(s) for the temporary suspension status, and any restrictions or conditions attached to it.

3. Ordinarily, during a temporary suspension, a chapter will not be able to conduct any chapter activities and the chapter members may be required to vacate the chapter house.

4. A temporary suspension does not eliminate the possibility of other, more permanent, modifications of a chapter’s recognition status.

C. Process for Addressing Violations of Safety and Risk Management Standards for Residential Chapters

1. If the University determines that a chapter has failed to comply with any of the Safety and Risk Management Standards established under section III.C or section III.D of this policy, the VPUL, after consulting with the Division of Public Safety, the Office of Risk Management and Insurance and the Division of Facilities and Real Estate Services, may impose restrictions on chapter house activities up to and including requiring that the chapter house be vacated until the condition is remedied and the non-compliance is corrected.

2. If, after reasonable notice and an opportunity to address the violation, a chapter fails to remedy a violation of any Safety and Risk Management Standard established under section III.C or III.D of this policy, the VPUL, in consultation with appropriate University offices, such as OFSL and the Division of Facilities and Real Estate Services, will determine whether a safety violation merits a change in the chapter’s recognition status. Whenever practicable, the chapter will have an opportunity to be heard before a determination is made. If VPUL determines that a change in recognition status is appropriate, the chapter may be subject to suspension or withdrawal of its recognition.

3. Ordinarily, OFSL will advise the chapter as well as its National Sponsoring Body and the Alumni Sponsor in writing of the Safety and Risk Management Standards violation(s) under section III.C or III.D of this policy and the expected timeline for addressing them. If the chapter fails to meet the University’s timeline, or if safety concerns are so significant as to merit such action, the University may take immediate action, up to and including
   a. requiring that the chapter house be vacated immediately and
   b. alteration of the chapter’s recognition status.

4. A chapter may appeal a determination to alter its status based on a violation of Safety and Risk Management Standards under section III.C or III.D of this policy by writing to the Provost within 10 days after the determination is made.

D. The FSAB Process

The procedures outlined in the Fraternity and Sorority Advisory Board Judicial Charter will apply to violations other than violations of Safety and Risk Management Standards established under section III.C and III.D of this policy. The University reserves the right to place a chapter on
administrative warning in lieu of formal discipline or to place a chapter on temporary suspension status pending completion of the disciplinary process.

V. Changes in Recognition Status
A. Probationary Recognition
1. The University may impose Probationary Recognition upon a chapter if it determines that the chapter has violated this or other University policy. A chapter may be placed on probation only after initiation of the procedures described in the FSAB Judicial Charter. Probationary Recognition status can be imposed through an agreement of responsibility (which must be signed by OFSL, all members of the chapter, its Alumni Sponsor and appropriate representatives of the National Sponsoring Body), or following a hearing. Failure to comply with the terms of probation or additional violations during the probationary period will subject a chapter to more severe discipline, up to expulsion.

2. Probationary Recognition will be for a specified period. At the end of the probationary period, OFSL will review the status of the chapter in consultation with the FSAB. Based on this assessment, the Vice Provost for University Life will determine whether the chapter will regain Full Recognition, continue in Probationary Recognition status or be subject to suspension or expulsion.

B. Suspension of Recognition
1. The University may suspend a chapter’s recognition when it determines that the chapter has violated this or other University policy and the chapter’s conduct was serious enough to warrant the chapter’s separation from the University for a period of time. In addition, suspension of a chapter by its National Sponsoring Body will automatically result in suspension of recognition by the University without further process.

2. Except for a temporary suspension, described above, a chapter’s recognition may be suspended only following the initiation of the procedures described in the FSAB Judicial Charter. Suspension can be imposed through an agreement of responsibility or following a disciplinary hearing. Suspension of recognition will be for a specified period.

3. During the period of suspension, all activities of a chapter are suspended and all of its privileges revoked. During this period the National Sponsoring Body working with the Alumni Sponsor, will be required to develop and submit a written plan of corrective action to bring the chapter into full compliance with this policy. If a chapter house is maintained, the Alumni Sponsor must cease its operation of the chapter house and the chapter and all residents must vacate the chapter house.

4. After the completion of a term of suspension, chapter members in good standing may be authorized to live in the chapter house and may be granted permission to resume participation in chapter activities and programs. Alternatively, the suspended chapter may be reorganized with newly recruited members. If a chapter has been suspended for three years or more, it must go through the process for seeking Provisional Recognition, outlined in section II of this policy.

C. Withdrawal of Recognition
1. A chapter’s recognition may be withdrawn when it is determined to be incapable of meeting its obligations under the terms of this policy for any reason. If a chapter house is maintained, the Alumni Sponsor must cease its operations of the chapter house, the chapter and all residents must vacate the chapter house and the National Sponsoring Body must revoke all privileges and authority for the chapter to function. Withdrawal of recognition terminates all previously established agreements between the University and the chapter.

2. If a chapter’s charter is suspended or withdrawn by its National Sponsoring Body, the University will withdraw the chapter’s recognition immediately without further process.

3. A chapter’s recognition may be withdrawn following initiation of the procedures described in the FSAB Judicial Charter even if no action has been taken by the National Sponsoring Body. If a chapter’s recognition is withdrawn through the FSAB process, the FSAB will ordinarily make a recommendation as to when the National Sponsoring Body may be allowed to seek recolonization at the University.

D. Voluntary Withdrawal of Recognition
1. A chapter may voluntarily relinquish its recognition for a specific period of time or indefinitely. The circumstances under which voluntary withdrawal might be appropriate include, but are not limited to, inadequate financial management, inadequate alumni support, overall lack of viability and inability to comply with the conditions of a chapter’s Probationary Recognition.

2. In the event of voluntary withdrawal of recognition, the Alumni Sponsor must cease operations of the chapter house, the chapter and all residents must vacate the chapter house and the National Sponsoring Body must revoke all privileges and authority for the chapter to function.

E. Expulsion
1. The University may expel a chapter when it determines that the chapter has violated this or other University policy in such an egregious manner as to warrant permanent separation from the University.

2. Expulsion means permanent closure of a chapter and terminates all agreements and relationships between the University and the chapter. At the time of expulsion, the Alumni Sponsor must cease operations of the chapter house, the chapter and all residents must vacate the chapter house and the National Sponsoring Body must revoke all privileges and authority for the chapter to function.

3. A chapter may be expelled only following the initiation of disciplinary procedures described in the FSAB Judicial Charter.

VI. Amendments
Recommendations for amendments to this policy may originate with the IFC, Panhellenic, IGC, the GAC, the FSAB or OFSL. Any amendments to this policy will be issued in writing by the Vice Provost for University Life, with a reasonable period for chapters already in recognition status to comply with new requirements.

Resources for Student Bereavement
Penn recognizes that its students may experience the loss of a loved one during their time at Penn, and that grief impacts us all differently. The following guidelines are meant to describe the resources Penn has in place to help students navigate through this difficult time; students should work with their academic advisors to determine the best course of action for their individual needs.

For emergency assistance, call 511 or the Division of Public Safety at 215-573-3333. Help is available 24/7.
If you are grieving or have experienced a death of a loved one, one of the first questions you may have is about missing class. Class attendance policies vary by course, and if you feel overwhelmed about how to get in touch with your instructors, your academic advisor can help.

If you are not sure how to contact your academic advisor, or if you are unable to reach your advisor or would prefer to talk to someone else, please contact your school’s advising office.

If you are a family member or a friend who is concerned about a Penn student suffering a loss, please feel free to contact the student’s school advising office as well.

In addition to speaking to an academic advisor, Penn offers a number of other resources to support grieving students:

**University Offices**

Counseling and Psychological Services (http://www.vpul.upenn.edu/caps) (CAPS) offers free and confidential services to all undergraduate, graduate, and professional students at Penn. CAPS’ trained clinicians offer both individual and group therapy. Students can make an appointment or discuss available options by calling CAPS at 215-898-7021, 24 hours a day, 7 days a week.

Student Intervention Services (http://www.vpul.upenn.edu/intervention.php) (SIS) assists the University community in handling emergencies or critical incidents involving the welfare and safety of students. The SIS team works in partnership with CAPS, the Chaplain’s Office, and Special Services in the Division of Public Safety to manage cases involving major critical incidents. The SIS team utilizes a network of University resources and administrators to support the direct provision of services to students and others impacted by an emergency or crisis situation and provide case management and collaborative follow-up services as needed. SIS can be contacted at 215-898-6081 during regular office hours, or on nights or weekends, please call the Department of Public Safety at 215-573-3333.

The Office of the Chaplain (http://www.upenn.edu/chaplain) is available to students for pastoral support and guidance. The office also serves and supports a wide range of student organizations, fellowships and religious communities on Penn’s campus. If you need to reach someone in the Chaplain’s Office immediately, please call 215-898-8456 or email the chaplain (choward@pobox.upenn.edu) or the associate chaplain (skocher@pobox.upenn.edu).

**Student Groups on Campus**

Actively Moving Forward (AMF) at Penn is a student organization/Support Network for students at Penn grieving the illness or death of a loved one. The organization includes a peer-led Grief Support Group for Penn students who are coping with the illness or death of a loved one to connect with others “who get it,” and a Service Group open to all students to go to service events together throughout the Philadelphia area. Visit AMF’s website page to learn more at http://pennstudentsofamf.weebly.com/, or you can visit their Facebook page at https://www.facebook.com/AMFatUPenn/.

**Rules Governing Final Examinations**

1. No instructor may hold a final examination or require the submission of a take-home final exam except during the period in which final examinations are scheduled. When necessary, exceptions to this policy may be granted for postponed examinations (see 3 and 4}
No final examinations may be scheduled during the last week of classes or on reading days.

2. No student may be required to take more than two final examinations on any calendar day during the period in which final examinations are scheduled. If more than two are scheduled, the student may postpone the middle exam. If a take-home final exam is due on a day when two final examinations are scheduled, the take-home exam shall be postponed by one day.

3. Examinations that are postponed because of conflicts with other examinations, or because more than two examinations are scheduled in the same day, may be taken at another time during the final examinations period if the faculty member and student can agree on that time. Otherwise, they must be taken during the official period for postponed examinations.

4. Examinations that are postponed because of illness, a death in the family, for religious observance, or some other unusual event may be taken only during the official periods: the first week of the spring and fall semesters. Students must obtain permission from their Dean's office to take a postponed exam. Instructors in all courses must be willing to offer a make-up examination to all students who are excused from the final examination.

5. No instructor may change the time or date of a final exam without permission from the appropriate Dean.

6. No instructor may increase the time allowed for a final exam beyond the scheduled two hours without permission from the appropriate Dean.

7. No classes or required class activities may be held during the reading period.

8. The first examination of the day begins at 9 a.m. and the last examination concludes by 8 p.m. There will be one hour between exam time blocks.

9. All students must be allowed to see their final examination. Exams should be available as soon as possible after being graded with access ensured for a period of at least one regular semester after the exam has been given. To help protect student privacy, a student should have access only to his or her own exam and not the exams of other students. Therefore, for example, it is not permissible to leave student exams (or grades or papers) in publicly accessible areas.

10. Students may not be asked for their Social Security Numbers. Instructors may not publicly display a student's Penn ID or any portion of the Social Security Number. nor use names, initials, or any personally identifiable information to post grades. Even when an identifier is masked or absent, grades may not be posted in alphabetical order, to protect student privacy.

11. Final exams for College of Liberal and Professional Studies (LPS) courses must be given on the regular class meeting night during the week of final examinations. No change in scheduling is permitted without unanimous consent of all students in the class and the director of LPS. LPS final exams may not be administered during the last week of class or on a reading day.

In all matters relating to final exams, students with questions should first consult with their Dean’s offices. Faculty wishing to seek exceptions to the rules also should consult with their Dean’s offices. Finally, the Council of Undergraduate Deans and Student Committee on Undergraduate Education (SCUE) urge instructors to see that all examinations are actively proctored.

Sexual Harassment Policy

I. Purposes

The University of Pennsylvania’s commitment to freedom of thought, discourse and speech is founded on trust and respect among members of the University community. It is the responsibility of each member of the Penn community to respect the personal dignity and worth of others.

The University has established policies on behaviors that interfere with its mission. The University’s Equal Opportunity and Affirmative Action Policy prohibits discrimination on the basis of race, color, sex, sexual orientation, gender identity, religion, creed, national or ethnic origin, citizenship status, age, disability, veteran status or any other legally protected class or status. Policies and regulations implementing this commitment also include the Statement on Academic Freedom and Responsibility, the Guidelines on Open Expression and the Code of Academic Integrity.

The University has also adopted the following policy concerning sexual harassment. Sexual harassment in any context is unacceptable and is a matter of particular concern to an academic community in which students, faculty and staff must rely on strong bonds of intellectual trust and dependence. Sexual harassment is not tolerated at Penn.

II. Definitions

For the purposes of University policy, the term “sexual harassment” refers to any unwanted conduct that is based on an individual’s sex, sexual orientation, gender identity and/or gender expression and that:

1. Involves a stated or implicit threat to the individual’s academic or employment status;
2. Has the purpose or effect of interfering with the individual’s academic or work performance; and/or
3. Creates an intimidating or offensive academic, living or work environment.

The University regards such behavior as a violation of the standards of conduct required of all persons associated with the institution. Accordingly, as noted in the Handbook for Faculty and Academic Administrators, the Human Resources Policy Manual, the Pennbook and other University publications, persons engaged in such harassment within the University setting are subject to the full range of internal disciplinary actions, including separation from the institution. The same range of disciplinary actions will be applied in the event of retaliation against an individual who in good faith makes an allegation of sexual harassment, who cooperates in an investigation into such allegations or who opposes any act of sexual harassment as defined in this Policy.

Not every act that might be offensive to an individual or a group necessarily will be considered as harassment and/or a violation of the University’s standard of conduct. In determining whether an act constitutes harassment, the totality of the circumstances surrounding the conduct must be carefully reviewed. Due consideration must be given to the protection of individual rights, freedom of speech, academic freedom and open expression.

2018-19 Catalog | Generated 02/28/19
III. Resources

Schools and Centers should make known to all of their members the available resources for information, counseling and support, as well as the informal and formal procedures for resolving complaints of sexual harassment within the appropriate School or Center or at the University level. These resources include the following:

A. Confidential Resources for Information, Counseling and Support

The following University resources are available to members of the University community who seek information and counseling about University policies on sexual harassment, standards of behavior, informal and formal mechanisms for resolving complaints and resources for complainants and respondents. These resource offices are also available to assist members of the University community with making an informal or formal complaint. The resources listed below are considered confidential, which means that the information shared with these resources generally will be held in confidence, consistent with the University's obligation to address complaints of sexual harassment, unless the person sharing the information gives his or her consent to the disclosure of that information. The commitment to confidentiality does not preclude the sharing of information among responsible University administrators as needed, including to keep members of the University community safe.

- African-American Resource Center (https://www.upenn.edu/aarc) (resource for students, staff or faculty)
- Counseling and Psychological Services (http://www.vpul.upenn.edu/caps) (resource for students)
- Employee Assistance Program (https://www.hr.upenn.edu/myhr/worklife/healthy/eap) (resource for staff or faculty)
- Lesbian Gay Bisexual Transgender Center (http://www.vpul.upenn.edu/lgbtc) (resource for students, staff or faculty)
- Office of the Chaplain (http://www.upenn.edu/chaplain) (resource for students, staff, faculty or visitors)
- Office of the Ombudsman (http://www.upenn.edu/ombudsman) (resource for students, staff or faculty)
- Office of Sexual Violence Prevention and Education (https://secure.www.upenn.edu/vpul/pvp) (resource for students, staff or faculty)
- Penn Women's Center (http://www.vpul.upenn.edu/pwc) (resource for students, staff or faculty)
- Special Services Department, Division of Public Safety (https://www.publicsafety.upenn.edu/about/special-services) (resource for students, staff, faculty or visitors)
- Student Health Service (http://www.vpul.upenn.edu/shs) (resource for students)

B. Additional Resources and Informal Mechanisms for Resolution

There are other resources available to the University community for information, counseling and support. These resources are also available to assist in the informal resolution of complaints, as are the confidential resources listed above.

- College Houses and Academic Services (https://www.collegehouses.upenn.edu) (complaints regarding College House residents)
- Dean's Offices and Department Chairs (complaints regarding faculty and staff in their respective Schools or Departments)
- Division of Human Resources (https://www.hr.upenn.edu/myhr), Office of Staff and Labor Relations (complaints regarding staff)
- Office of Affirmative Action and Equal Opportunity Programs (http://www.upenn.edu/affirm-action) (complaints regarding faculty, staff, students or visitors)
- Office of Student Conduct (https://www.osc.upenn.edu) (complaints regarding students)
- Office of the Vice Provost for Faculty (https://provost.upenn.edu/faculty) (resource for faculty)
- Student Intervention Services (http://www.vpul.upenn.edu/intervention.php) (resource for students)

C. Formal Mechanisms for Complaint Resolution

When informal resolution is not chosen, is unsatisfactory or is not appropriate, the formal mechanisms described below should be used.

Please note that these mechanisms are intended for sexual harassment complaints that do not involve allegations of sexual violence, domestic violence, relationship violence or stalking. Refer to the Sexual Violence, Relationship Violence and Stalking Policy for information about making formal complaints involving incidents of sexual violence, domestic violence, relationship violence and/or stalking.

Members of the University community who would like assistance with making a formal complaint may contact any of the confidential resources identified above.

1. A complaint of sexual harassment (excluding complaints involving sexual violence, domestic violence, relationship violence and/or stalking) against a faculty member, instructor or teaching assistant may be brought by a student, staff member faculty member or visitor to the department chair or Dean of the faculty member. If the complaint is made to a department chair, the department chair is responsible for informing the Dean. If the Dean is the subject of the complaint, then the complaint should be made to the Provost (or his/her designee). The Dean or the Provost (or his/her designee) is then charged with taking appropriate action. If the matter is not resolved informally, the Dean or the Provost (or his/her designee) conducts an investigation. If based on the results of the investigation the Dean or Provost (or his/her designee) determines that action should be taken in response to the complaint, the Dean or Provost (or his/her designee) will determine what that action should be and the appropriate process for taking that action. For standing faculty, the procedures described in the Procedure Governing Sanctions Taken Against Members of the Faculty, Handbook for Faculty and Academic Administrators, part II.E.16 will be followed, if applicable.

A member of the standing faculty, associated faculty or academic support faculty who believes she or he has been subjected to sexual harassment may file a grievance under the Faculty Grievance Procedure, Handbook for Faculty and Academic Administrators, part II.E.12, provided the complaint constitutes a grievance as defined in Section I of the Procedure. This procedure is administered by the Faculty Grievance Commission. The panel makes its recommendations to the Provost. In cases that involve reappointment, promotion or tenure, and in which the Provost has declined or failed to implement the recommendations of the panel to the satisfaction of the grievant, the grievant may seek to obtain a hearing before the Senate Committee on Academic Freedom and Responsibility on the actions of the Provost.

2. A complaint of sexual harassment (excluding complaints involving sexual violence, domestic violence, relationship violence and/or stalking) against a staff member may be brought by a student,
staff member, faculty member or visitor to the supervisor of the person complained against, to the next level supervisor, to Human Resources (either to the Office of Staff and Labor Relations or to the Human Resources Director for the school or center) or to the Office of Affirmative Action and Equal Opportunity Programs (OAA/EOP). If the complaint is made to a supervisor, that individual is responsible for notifying either Human Resources (either the Office of Staff and Labor Relations or the Human Resources Director for the School or Center) or the Office of Affirmative Action and Equal Opportunity Programs. Either Human Resources or the Office of Affirmative Action and Equal Opportunity Programs will take responsibility for pursuing the matter. If the matter is not resolved informally, either Human Resources or the Office of Affirmative Action and Equal Opportunity Programs will conduct an investigation. If based on the results of that investigation it is determined that the policy was violated, then appropriate action will be taken.

3. A complaint of sexual harassment (excluding complaints involving sexual violence, domestic violence, relationship violence and/or stalking) may be brought against a student by a student, staff member, faculty member or visitor by filing a complaint with the Office of Student Conduct, which will handle the complaint pursuant to the Charter of the Student Disciplinary System. If the complaint relates to a graduate or professional student enrolled in a School which has established a hearing board or other decision-making body, a complaint should be filed with that body. Refer to the Office of Student Conduct website for a list of these graduate schools and programs.

4. A complaint of sexual harassment (excluding complaints involving sexual violence, domestic violence, relationship violence and/or stalking) may be brought by a visitor or guest of the University against an enrolled student, staff member or faculty member by contacting the Office of Affirmative Action and Equal Opportunity Programs which will handle the matter or make the appropriate referral.

D. Central Reporting of Sexual Harassment

The University’s decentralized system of resources is designed to encourage the reporting and resolution of complaints of sexual harassment. However, in order to enable the administration to identify any patterns or trends of sexual harassment, the Executive Director of the Office of Affirmative Action and Equal Opportunity Programs shall, on a semi-annual basis, convene a meeting of representatives from the offices and Centers listed in Section A to review and report on sexual harassment across the University based upon the reports or complaints of sexual harassment that they have handled formally or informally within their areas. Confidentiality regarding the identity of the parties involved in each complaint will be maintained to the extent possible.

E. Education and Prevention

The prevention of sexual harassment and the establishment of effective procedures with due concern for all parties require a thoughtful educational program.

1. University resource offices will provide to the community information on available informal and formal resolution resources and resources for support and information for complainants and respondents.
2. Deans and heads of centers and departments are encouraged to discuss this policy and issues of sexual harassment at meetings of faculty and staff.
3. Training programs for faculty, staff and students who work in the College Houses and others who assist students in crisis situations and serve in an advisory capacity to students will include training about referrals, resources and methods for handling complaints of sexual harassment.
4. Students will be provided with information about sexual harassment and available resources during new student orientations and throughout the academic year.
5. The University will publish this policy statement annually, including information about the resources available to advise, counsel and assist in the informal and formal resolution of sexual harassment complaints. Information will explain how and where to contact University-wide and school- and division-specific resources and will be posted on appropriate University websites. All members of the University community have a responsibility to aid in the prevention of sexual harassment and are encouraged to report concerns to appropriate University resources promptly.

F. Policy Against Retaliation

University policy expressly prohibits retaliation against faculty, staff or students who in good faith make reports of violations of this policy. In addition, knowingly and intentionally making a false report of a violation of this policy is prohibited. Members of the Penn community who take adverse action against someone who reports a violation of this policy, intimidate, threaten or otherwise engage in retaliation are subject to disciplinary action, up to and including termination of their employment or expulsion from the University.

1 The terms “harassment” and “sexual harassment” as used throughout are defined as a matter of University policy, and are not necessarily identical or limited to the uses of that term in external sources, including governmental guidelines, laws, regulations or legal decisions.
2 Where sexual harassment involves sexual violence, relationship violence, domestic violence and/or stalking, refer also to the University’s Sexual Violence, Relationship Violence and Stalking Policy.

(1 Source: Almanac, July 1, 2016, Supplement (http://www.upenn.edu/almanac/between/2016/070116-of-record.html))

Sexual Violence, Relationship Violence, and Stalking Policy

Thank you to those who submitted comments and suggestions regarding the proposed revision of the University’s Sexual Harassment and Sexual Violence, Relationship Violence and Stalking Policies. After careful consideration of the comments received, the policies that appear in this supplement have been adopted, effective on July 1, 2016. In addition to the resource information contained in the policies, the Penn Violence Prevention (https://provost.upenn.edu/uploads/media_items/pvp-resource-guide.original.pdf), Title IX and Sexual Misconduct Reporting for Faculty (https://provost.upenn.edu/uploads/media_items/sexualviolencesources.original.pdf) and the Title IX at Penn (http://www.upenn.edu/affirm-action/titleix.html) websites provide information and guidance regarding our collective responsibilities for the prevention of sexual harassment and sexual violence. Information regarding making informal and formal complaints is contained in the policies and on the websites referenced above among others. The new policies will be widely publicized at the beginning of the fall semester. The Offices of Affirmative Action and Equal Opportunity Programs, Staff and Labor Relations in the Division of Human Resources and the Vice Provost for Faculty are among those available to respond to questions or provide additional information.
Sexual Violence, Relationship Violence, and Stalking Policy

—Amy Gutmann, President
—Vincent Price, Provost
—Craig R. Carnaroli, Executive Vice President
—J. Larry Jameson, Executive Vice President for the Health System and Dean, Perelman School of Medicine

I. Introduction
This policy, which prohibits behaviors that are more generally addressed by the University’s Sexual Harassment Policy, applies to faculty, students, staff, and visitors to the University campus and facilities. All forms of sexual violence, relationship violence and stalking and attempts to commit such acts are considered to be serious misconduct and may result in disciplinary action up to and including expulsion or termination of employment. In addition, such acts may violate federal, state and local laws and perpetrators of such acts may be subject to criminal prosecution.

II. Definitions
Sexual violence, relationship violence and stalking in any form, including sexual assault and rape, are prohibited by University policy. Important definitions appear below.

Sexual violence includes a range of behaviors in which an act of a sexual nature is taken against another individual without that person’s consent or when the individual is unable to consent. There are various types of sexual violence, including but not limited to sexual assault and rape (defined below).

Sexual assault (including but not limited to rape) is defined as having committed any of the following acts:

- Any physical sexual contact that involves the use or threat of force or violence or any other form of coercion or intimidation;
- Any physical sexual contact with a person who is unable to consent due to incapacity or mental or physical impairment. “Incapacity” or “impairment” include but are not limited to being under the influence of alcohol or drugs or being too young to consent.

Rape is defined as sexual assault involving an act of penetration and includes acquaintance rape (assailant and victim know each other).

Non-forcible sex acts include unlawful sex acts where consent is not relevant, such as sexual contact with an individual under the statutory age of consent as defined by Pennsylvania law.

Consent is an affirmative decision to engage in mutually agreed upon sexual activity and is given by clear words or actions. Consent may not be inferred from silence, passivity or lack of resistance alone. Furthermore, consent to one form of sexual activity does not imply consent to other forms of sexual activity and the existence of a current or previous dating, marital or sexual relationship is not sufficient to constitute consent to additional sexual activity. Assent shall not constitute consent if it is given by a person who, because of youth, disability, intoxication or other condition, is unable to lawfully give his or her consent.

Relationship Violence, also commonly known as dating violence, is defined as an act or a pattern of abuse committed by a person involved in a social, sexual or romantic relationship, past or present, with the victim. Relationship violence can encompass a broad range of behaviors that may include physical violence, sexual violence, emotional violence and economic violence.

Domestic Violence is defined as abuse committed against an adult who is a spouse or former spouse, cohabitant or someone with whom the abuser has a child, has an existing dating or engagement relationship or has had a former dating or engagement relationship.

Stalking means engaging in a course of conduct directed at specific person(s) that would cause a reasonable person to fear for his or her safety or the safety of others, or to suffer substantial emotional distress.

In determining whether the alleged conduct violates this policy, consideration will be given to the totality of the circumstances, including the nature of the conduct and the context in which the alleged incident occurred.

III. Resources
A. Confidential Resources for Information, Counseling and Support
Resource offices are available to assist members of the Penn community and visitors to the campus who have been, or know someone who has been, the victim of sexual violence, relationship violence or stalking. The staff of these offices are available to provide counseling and support, as well as information about and assistance with making a complaint.

The information shared with the resources listed below generally will be held in confidence, consistent with the University’s obligation to address complaints of sexual violence, unless the person sharing the information gives his or her consent to the disclosure of that information. Confidential resources are not obligated to share identifying information with the Title IX Coordinator when an incident of sexual violence is shared with that resource. However, the commitment to confidentiality does not preclude the sharing of information among University administrators as appropriate to keep members of the University community safe. In addition, confidential resources may submit non-identifying information about incidents of sexual violence to the Title IX Coordinator or to the Division of Public Safety for purpose of crime statistics reporting under the Clery Act. (For additional information regarding Clery Act reporting, see the Clery Act & Crime Reporting page on the Division of Public Safety website at https://www.publicsafety.upenn.edu/clery/)

- African-American Resource Center (http://www.upenn.edu/aarc/staff.html) (resource for students, staff or faculty)
- Counseling and Psychological Services (http://www.vpul.upenn.edu/caps) (resource for students)
- Employee Assistance Program (https://www.hr.upenn.edu/myhr/worklife/healthy/eap) (resource for staff or faculty)
- Lesbian Gay Bisexual Transgender Center (http://www.vpul.upenn.edu/lgbtc) (resource for students, staff or faculty)
- Office of the Chaplain (http://www.upenn.edu/chaplain) (resource for students, staff, faculty or visitors)
- Office of the Ombudsman (http://www.upenn.edu/ombudsman) (resource for students, staff or faculty)
- Office of Sexual Violence Prevention and Education (https://secure.www.upenn.edu/vpul/pvp) (resource for students)
- Penn Women’s Center (http://www.vpul.upenn.edu/pwc) (resource for students, staff or faculty)
• Special Services Department (https://www.publicsafety.upenn.edu/about/special-services), Division of Public Safety (resource for students, staff, faculty or visitors)
• Student Health Service (http://www.vpul.upenn.edu/shs) (resource for students)

B. Additional Resources for Information, Counseling and Support and Informal Complaint Resolution

There are other resources available to the University community for information, counseling and support. These resources are also available to assist in the resolution of complaints, as are the confidential resources listed above. Please note that these resources are not confidential. Unlike the confidential resources, these resources are obligated to notify the Title IX Coordinator when an incident of sexual violence is shared with that resource person and to provide sufficient information so that the University can take appropriate action. (For a full discussion of reporting obligations, see the Reporting and Monitoring section below.)

• College Houses and Academic Services (https://www.collegehouses.upenn.edu) (resource for College House residents)
• Dean's Offices and Department Chairs (resource for students, faculty or staff in their respective Schools and Departments)
• Division of Human Resources (https://www.hr.upenn.edu/myhr), Office of Staff and Labor Relations (resource for staff)
• Office of Affirmative Action and Equal Opportunity Programs (http://www.upenn.edu/affirm-action) (resource for faculty, students, staff or visitors)
• Office of the Vice Provost for Faculty (https://provost.upenn.edu/faculty) (resource for faculty)
• Student Intervention Services (http://www.vpul.upenn.edu/intervention.php) (resource for students)

C. Formal Complaint Resolution Resources

A formal complaint against a member of the University's faculty or instructional staff should be initiated by contacting the Office of the Sexual Violence Investigative Officer. The complaint will be handled consistent with the Procedures for Resolving Complaints Against Faculty of Sexual Assault, Sexual Violence, Relationship Violence and Stalking.

A formal complaint against an enrolled University student should be initiated by contacting the Office of the Sexual Violence Investigative Officer. The complaint will be handled consistent with the Student Disciplinary Procedures for Resolving Complaints of Sexual Assault, Sexual Violence, Relationship Violence and Stalking.

A formal complaint against a University staff member should be initiated by contacting the Office of Affirmative Action and Equal Opportunity Programs (OAA/EOP). The complaint will be handled consistent with that office's complaint resolution procedures.

IV. Reporting and Monitoring

The University is committed to ensuring that members of the University community who share information regarding incidents of sexual violence get the information, counseling and support that they need and are aware of the process for making a formal complaint. The University is also committed to monitoring reports and complaints of sexual violence so that any patterns or systemic problems revealed by such reports and complaints can be addressed.

Consistent with these commitments, the University has determined that the Title IX Coordinator must be advised when incidents of sexual violence are reported to the Office of the Sexual Violence Investigative Officer, to any of the offices listed above (except those identified as confidential resources), to any member of the faculty or to any University staff member in a leadership or supervisory position or who has significant responsibility for the welfare, guidance or advising of students or staff, including the President, Provost, Vice Presidents, Vice Provosts, Deans, Vice Deans, Associate Deans, Assistant Deans and Academic Advisors, as well as appropriate staff in the following offices: College Houses and Academic Services (CHAS), Division of Public Safety (DPS), Division of the Vice Provost for University Life (VPUL) except those identified as confidential resources, Division of Human Resources (as well as Human Resources staff in the Schools/Centers), Office of Affirmative Action and Equal Opportunity Programs (OAA/EOP), Graduate Student Center (GSC), Division of Recreation and Intercollegiate Athletics (DRIA) and student life and academic services units in the University's Schools and Centers.

When an incident of sexual violence is reported to the Title IX Coordinator, the Title IX Coordinator will take appropriate steps to ensure that the individual who reported the incident has been advised of the resources available to him or her and the process for making a formal complaint. The Title IX Coordinator should be provided with sufficient information to enable the University to identify patterns. Such information includes the name of the person reporting the incident, the date, time and location of the incident, the identities of those involved in the incident and a brief description of the behavior alleged to have occurred, to the extent this information is known to the individual making the report. If there has been a request for confidentiality, this should also be shared with the Title IX Coordinator, who will consider the request. Even if confidentiality cannot be granted, information will be disclosed only to those who, in the judgment of the Title IX Coordinator, have a need to know. Decisions regarding how to proceed following a report of sexual violence to the Title IX Coordinator will be made on a case-by-case basis. A report to the Title IX Coordinator will not necessarily result in a formal complaint to the Sexual Violence Investigative Officer (for complaints against enrolled students or faculty) or to the Office of Affirmative Action and Equal Opportunity Programs (for complaints against staff).

For those members of the University community who have crime statistics reporting obligations under the Clery Act, notifying the Title IX Coordinator regarding an incident of sexual violence does not replace the obligation to report the matter to the Division of Public Safety. For additional information about Clery Act reporting or to make a report, refer to the Clery Act & Crime Reporting page on the Division of Public Safety website at https://www.publicsafety.upenn.edu/clery/

V. Rights of Complainants and Respondents

Persons who make a complaint and those who are responding to complaints have the following rights:

• The option to notify law enforcement
• The option to have another member of the University community present during interviews that are part of a University-initiated investigation;
• To be notified of counseling and support services available; and
• To be notified of options to change academic, living or work arrangements.
VI. Policy Against Retaliation

University policy expressly prohibits retaliation against faculty, staff or students who in good faith make reports of violations of this policy. In addition, knowingly and intentionally making a false report of a violation of this policy is prohibited. Members of the Penn community who take adverse action against someone who reports a violation of this policy intimidate, threaten or otherwise engage in retaliation are subject to disciplinary action up to and including termination of their employment or expulsion from the University.

Student Activities Council Funding Policies and Guidelines for Student Groups

Funding Policies for Student Groups
(The following policies are binding and must be adhered to by the Student Activities Council Executive Committee)

1. While determination may be made that organizations or activities are not eligible for funding, decisions on whether or not an organization or activity is denied funding will not be based on the content of the speech or expression of such organization or activity.
2. A student activity or program that is designed to support or oppose a particular party or candidate or to influence legislation will not be funded.
3. In accordance with University guidelines, Student Activities or programs designed to elicit support for religious ideologies and promote membership in sectarian groups will not be funded.
4. All activities must file and maintain complete capital equipment inventories with the Office of Student Life. This should be submitted in the beginning of the year with the annual registration form.
5. All activities are held responsible for full disclosure of all financial actions of the group to the Executive Committee (especially changes or planned changes in usage of allocated funds) upon penalty of immediate forfeiture of all funds remaining in their accounts.
6. All funded activities must maintain their own set of books upon penalty of immediate forfeiture of all funds remaining in their accounts. These should be available to the Executive Committee upon request.
7. Executive Committee members intimately connected with a student organization must declare their affiliations with these activities and may not vote on the allocations of that particular student activity. Furthermore, they may not attempt to influence the other Executive Committee members. They may function only as resource people.
8. No organization shall enter into any contract without the written consent of the Director of OSL or designee. Moreover, all monies involved must first be approved by the Executive Committee.
9. All activities must submit reports on the activities sponsored by the organizations during the previous year as a part of their annual budget requests.

Examples of programs or activities not eligible for funding under these criteria include:

1. College Democrats, College Republicans, or other groups designed to support a political party;
2. A student activity that is designed to or does in fact campaign on behalf of a candidate for public office or participate in a political campaign. For example, Students for Smith for Congress;
3. An activity designed to influence legislation.

These criteria would not prohibit funding a political forum at which different viewpoints are expressed.

Funding Guidelines for Student Groups
(These guidelines are not binding on the Student Activities Council Executive Committee)

1. Duplication in activities will be eliminated; the better program in the Committee's judgment will be funded.
2. No mailings (summer or otherwise) will be funded.
3. Meal subsidies for members of student activities will not be funded.
4. Publications will be required to collect 25% of their total budgeted operation through advertising or other revenue. If this is not done, the Executive Committee will freeze the account. Any changes in the status of a publication (e.g., dates, issue size, copies printed) must be reported to the Executive Committee liaison.
5. All publications printing more than one issue per academic year must submit a schedule of distribution dates to the Executive Committee with their annual budget request. Complete copy for each issue must be submitted to the printer at least three weeks prior to the date of distribution. Failure to meet this requirement will result in the cancellation of one issue. Under no circumstances may a publication submit copy after April 1st or distribute an issue after the third week of April.
6. No individual can be paid a salary or wage for services which can or should be rendered by a student.
7. All capital equipment allotted to an activity must be stored in a University facility.
8. Concerning conferences and travel for non-competitive groups, travel will be funded ONLY if a group provides proof that said travel is essential to the operation of that group (e.g., required by national charter or necessary for national membership). In this case, only one-half of all travel and lodging will be funded. In this case, only one-half of all travel and lodging or $250 per person for travel and lodging will be funded.
9. No funding will be given for SAC student-run conferences. All cost must be covered in the conference registration fees (or by other sources of income).
10. The cost of printing tickets for all events should be covered in the price of the tickets.
11. No funding will be given for printing of Newsletters.
12. If a SAC-paid director or coach requests his/her salary before the normal end of semester pay date, he/she may be paid 20% of the total semestery salary. The remaining 80% will be paid at the semester's end.
13. Any group seeking to bring a speaker must approach Connaissance for co-sponsorship before approaching the Executive Committee. The Executive Committee will not fund speakers if the speaker is specific only to the group's members and is not appropriate or relevant to the whole University community. Honoraria request to the Executive Committee must not exceed $100.
14. The Executive Committee may decide to reconsider a request denied to an organization if
   a. legitimate factors (e.g., number of members) have changed to
      make the original circumstances regarding the decision no longer
      valid, OR
   b. the parties involved (e.g., SAC Representative, Executive
      Committee, Executive Liaison) feel strongly that an honest
      misunderstanding took place regarding the facts and figures of
      the particular case.

15. The Executive Committee does not fund international travel for
    competitive groups. This differs from national championships/
    tournaments which may be funded upon request and demonstration
    of appropriate need by the competitive group.

16. Any program which is considered campus wide, social, shall be
    referred to SPEC.

17. If a program is being partially funded by the Social Planning and
    Events Committee, it will not be funded by the Student Activities
    Council.

18. No funding will be given retroactively.

19. Membership dues to national organizations will only be funded if
    deemed essential for the group's existence as a group in the Penn
    community and/or for the proper functioning of the group and then
    only for the absolute minimum number of members required to
    achieve and maintain membership in the national organization.

20. Any budgets (excluding contingency request) submitted after the
    allocation process has been completed in February/March of the
    spring semester will be subject to a 25% budget reduction.

Student Disciplinary Procedures for Resolving Complaints of
Sexual Assault, Sexual Violence, Relationship Violence and Stalking

Introduction

The University of Pennsylvania is committed to providing a safe and
healthy environment, free of gender-based misconduct, to all members of
our community and visitors to our community. As such, sexual assault,
sexual violence, relationship violence, and stalking will not be tolerated. In
order to ensure the creation of a climate where students are able to thrive
and achieve their full potential, the University has developed a wide range
of policies, educational programs, broad-based resources, support, and
reporting systems. This amendment to the Student Disciplinary Charter
supplements these other policies and initiatives, addressing the process
by which complaints against an enrolled University student for a violation of
the Sexual Violence, Relationship Violence and Stalking Policy ("Sexual
Violence Policy") will be adjudicated and resolved.

Confidentiality

Confidentiality is of critical importance in ensuring that these sensitive
matters are handled appropriately. The University has an obligation to
address complaints with respect to the violation of the Sexual Violence
Policy as fairly and expeditiously as possible as soon as it becomes
aware of an allegation that the Policy has been violated. To that end, if
any University official is informed of an allegation that the Policy has
been violated, the University is required to respond, unless the informed
official is serving in a privileged capacity (designated confidential
resource, therapists, clergy, or medical providers).

The response to the complaint, however, including seeking a resolution
under this procedure, should be treated as confidential, to the extent
consistent with the requirements of law. University staff and faculty may
share information with others who have a legitimate need to know in
order to fairly and effectively address complaints, but the information
should be considered confidential and should be protected to the extent
possible consistent with legal obligations. Such administrators may
include, for example, the Office of the Vice Provost for University Life,
the Office of the Sexual Violence Investigator, the Title IX Officer, Public
Safety, the Office of General Counsel, Counseling and Psychological
Services, Student Health, and academic advising offices.

I. Reporting Complaints of Violation of the
Sexual Violence Policy

A. Office of the Sexual Violence Investigative Officer

The Office of the Sexual Violence Investigative Officer (OVO) will be
responsible for managing all complaints made against an enrolled
University student alleging a violation of the Sexual Violence Policy.

Complaints must either be presented in writing, or based upon
information provided by the complainant to the OVO who will then
memorialize the allegations in writing and have the allegations confirmed
by the complainant. Complainants may include University students or
others both within and outside the community alleging a violation against
a University enrolled student.

B. Office of the District Attorney and Office of Civil
Rights

Complainants may also choose to file a report with the District Attorney
or with the Office of Civil Rights of the U.S. Department of Education.
The University system and the legal system work independently from
one another, but will coordinate efforts to the extent possible. The
University will not unilaterally defer its proceeding pending the outcome
of any criminal process, nor will the outcome of any legal process be
determinative of the University result. Rather, the University has its own
interest in, and responsibility for, ensuring the enforcement of its Sexual
Violence Policy.2 The University will, however, comply with reasonable
requests by law enforcement for cooperation, and will upon reasonable
request temporarily suspend its fact-finding process in a sexual assault
investigation so as not to impede the law enforcement process.

C. Support, Counseling and Advice

In making a decision about how to proceed with a complaint,
complainants may seek support, counseling, and advice from other
offices on campus, including the Special Services Unit in the Division of
Public Safety, the Sexual Violence Educator, the Office of the Chaplain, the
Penn Women's Center, Counseling and Psychological Services, Student
Intervention Services, and the Lesbian Gay Bisexual and Transgender
Center. A list of these offices is provided in Section III below. Should
the complainant determine to proceed with an on campus disciplinary
process against an enrolled University student, the Office of the Sexual
Violence Investigative Officer will be the single place to initiate the
process.3

D. Timeframe for Submitting a Complaint

The University does not limit the timeframe for filing a report of a
violation of the Sexual Violence Policy. Reports may be filed at any time,
although the University’s ability to investigate or take any action may be limited by the passage of time or the matriculation status of the alleged respondent.

E. Complainant Request for Confidentiality

The University is required by Title IX to weigh the complainant’s request for confidentiality/privacy with the University’s commitment to provide a reasonably safe and nondiscriminatory environment. In situations where a complainant requests privacy, the University’s ability to investigate and respond to the allegations may be limited.

The IO will notify the complainant if the University cannot, in unusual cases, maintain the complainant’s confidentiality/privacy. The complainant’s and respondent’s identities will only be revealed to those individuals who need to know their names in order to investigate or adjudicate the complaint or provide interim measures.

In situations where the University becomes aware of a pattern of behavior by one or more respondents, the University will take appropriate action in an attempt to protect the University community.

II. Investigation and Resolution of Complaints

A. Timely Resolution

The process of resolving complaints, exclusive of any appeal, should be completed, unless there are special circumstances, within 60 business days of the filing of the written complaint. The appeal should be completed, absent special circumstances, within 30 business days of the filing of the appeal.

In the event that a Hearing Panel is convened, the complainant and the respondent will both be provided with a copy of the decision of the Panel and given 10 business days to file an appeal.

B. Rights and Protections for Complainant and Respondent

1. The complainant and respondent have the right to a process that is fundamentally fair, and free of bias or prejudice.
2. The complainant and respondent have the right to be treated with respect, dignity, sensitivity, and fairness throughout the entire process. They are both entitled to seek support from the University and to be informed about the process both before the process is initiated and throughout the process as it unfolds.
3. Both parties have the right to participate in the process, or to refrain from participation. The failure to participate will not be used as evidence against either party, but also will not prevent the process from proceeding unless the complainant determines to withdraw the complaint and the University determines to abide by that request.
4. Both parties may have a lawyer or other advisor present when being interviewed by the Investigative Team and the Hearing Panel, but the lawyer or other advisor will not be permitted to present statements, seek the production of evidence, or question any witnesses.
5. Evidence of prior sexual conduct by the complainant or respondent with other partners will not be considered in the process, and any evidence of a prior sexual relationship between the parties will not be determinative of the issue of consent. If there is credible evidence of a pattern of violations of the Sexual Violence Policy, that evidence may be considered by the Hearing Panel.
6. While the process is underway, the Vice Provost for University Life (VPUL) will work with the complainant and respondent, ensuring support is provided to both parties. VPUL will also be responsible for implementing interim measures to protect the parties, or any of the witnesses, consistent with principles of fairness, including implementing measures regarding housing, academic accommodations and scheduling changes, no contact orders, and any other appropriate actions to protect the parties or any of the witnesses.

C. Preliminary Determination

Upon receiving a complaint, the IO will make a preliminary determination as to whether the complaint falls within the purview of the Sexual Violence Policy and whether, on its face, there appears to be a sufficient basis to conduct a full investigation. In making this determination, the IO may interview the complainant and the respondent and conduct whatever preliminary investigation the Officer deems necessary to determine if the actions alleged in the complaint would, if true, constitute a violation of the University’s Sexual Violence Policy and there is a reasonable basis for investigating the charges. If the IO concludes there is insufficient basis to proceed, the matter will be concluded and the parties so advised.

D. Investigation

If the IO makes the determination that there is a sufficient basis to proceed, the Officer will issue a Statement of Charge Letter, based on the complaint and any preliminary investigation conducted. The Charge Letter will be provided to the complainant and the respondent. The respondent will be provided the opportunity to respond in writing to the Charge, and any response will be shared with the complainant.

The IO will lead a thorough and fair investigation, assisted by one or more co-investigators who may come from the school of the complainant or respondent or from elsewhere in the University (the "Investigative Team"). The co-investigator(s) will be University administrators or faculty members appropriately trained as investigators in handling sexual violence cases, and will be selected for individual cases by the IO. The investigation will include interviews of the complainant and respondent, interviews of witnesses, and review of documentation, physical evidence, and any other relevant evidence.

Prior to interviews, the complainant, the respondent, and any relevant witnesses will be informed by the IO that statements they make during the process may be admissible in concurrent or subsequent civil or criminal court proceedings, and will accordingly also be informed of their rights as outlined in Section B above. They will also be reminded of the consequences of making false statements to the IO under the Code of Student Conduct and the Charter of the University of Pennsylvania Student Disciplinary System. The complainant and respondent may have their advisors’ and/or outside counsel present for their interviews, but the advisors or outside counsel will not be permitted to participate in the interview other than to provide advice to the student, and they may be excluded from the interview for disruptive behavior.

In conducting the investigation, the Investigative Team may, as appropriate, also consult with other campus officials including but not limited to administrators in the relevant School, Public Safety, the Title IX Officer, or the Vice Provost for University Life. The Investigative Team may also consult with the Office of General Counsel, who may determine in particular cases to engage outside counsel to assist the University throughout this process. The Investigative Team may engage forensic and other experts, as needed.
E. Investigative Report
At the conclusion of the investigation, the Investigative Team will prepare a draft factual investigative report, including assessments of credibility, a recommended finding as to responsibility, and recommended sanctions, if appropriate. In making the responsibility determination, the Investigative team will use a “preponderance of the evidence” standard. In other words, to find a student responsible for violating the Sexual Violence Policy, the Investigative Team must be convinced that it is more likely than not that a violation of the Sexual Violence Policy has occurred.

1. Opportunity for Review and Comment
The draft investigative report will be provided to both the complainant and respondent for review and comment, under strict instructions that the draft report is confidential, and not to be shared with anyone other than their families and advisors, who must be members of the University community and/or outside counsel, as described above. Sharing of the report by either party, their families, advisors or outside counsel with any add person will be strictly prohibited. The complainant and respondent will also be provided the opportunity to review the underlying evidence and witness statements with their advisors, but they will not be provided copies.

2. Final Report
As a result of the response and comments received, the Investigative Team may conduct a further investigation and/or amend the draft report, if the Team determines either action to be warranted. A final investigative report will be prepared, incorporating any changes, and shared with the complainant and the respondent. The complainant and respondent may submit formal objections or comments to the final report, which will become part of the final report of the matter.

F. Resolution Without a Hearing
The matter may be resolved at this stage if both parties agree to the recommendations of the Investigative Team with respect to responsibility and, if applicable, sanctions, or if the parties otherwise reach a mutually acceptable resolution. The University, however, will not compel either the complainant or the respondent to engage in face-to-face mediation or to accept the recommendations of the Investigative Team.

G. Hearing Panel
If the matter is not resolved at this stage in a mutually acceptable manner, the IO will present the final investigative report, together with any comments provided by the complainant and/or respondent, to a Hearing Panel ("Panel").

1. Panel Membership
The Panel will be comprised of three (3) faculty members and the Disciplinary Hearing Officer (DHO), who will be a non-voting member. The DHO will make all decisions about the organization of the Panel, including decisions regarding the admissibility of evidence, witnesses to appear before the panel, or any additional decisions regarding the administration of the hearing process. Membership of the Panel, including the DHO, will observe the following guidelines:

i. Members will be selected from a pool of faculty who have agreed to serve for a term of one or more years.

ii. Only mixed-gender panels that have training and experience in handling complaints involving sexual misconduct will hear sexual misconduct cases.

iii. Faculty comprising the Panel should be from academic departments in which neither of the parties is enrolled in a course of study, and no faculty member should serve on the Panel who has a mentoring relationship or other personal relationship with either of the parties.

iv. Faculty asked to serve should recuse themselves or be dismissed if they have any personal ties to either of the parties or to individuals with whom the parties are closely associated. Nor may they have prior personal knowledge of the alleged incident of sexual misconduct.

v. The University will train members of the pool to fulfill their responsibilities as adjudicators according to the procedures and policies outlined here and to ensure compliance with Title IX and other applicable state and federal guidelines. In addition, the Panel will be provided with “just in time” training on adjudicating sexual violence cases.

vi. The IO may not serve on the Panel, however the IO may testify before the Panel regarding his or her investigation and may assist the DHO as needed in organizational and administrative matters related to the Panel.

vii. The complainant and respondent will be notified of the membership of the Panel in advance of the Hearing. Any challenges for cause against individual Panel members must be made promptly so as not to delay the conduct of the Hearing, and will be given serious consideration by the DHO to ensure impartiality of the proceedings.

viii. All proceedings must be kept strictly confidential among the parties, witnesses and members of the panel. All individuals involved in such hearings must agree to such conditions of confidentiality.

2. Hearing Procedures
Hearings must be prompt, fair, and impartial, affording the complainant’s allegations and the respondent’s defenses all due consideration and protecting the rights of both parties. The Panel will review the Investigative Team’s final report, including any response, objections, or comments provided by the complainant or respondent. The Panel will also carefully review the evidentiary record, including witness statements, documents, and physical evidence.

i. Hearing Panel Interviews
The Panel will interview separately the IO (and co-investigator(s) if the Panel so chooses), the complainant, and the respondent. The Panel will, whenever possible, provide the complainant and respondent with at least five days advance notice of the Hearing. If reasonably possible, interviews will be conducted on one day, but if such scheduling would require an unreasonably long day, or if such scheduling would unreasonably delay the proceeding, the hearing may be scheduled over multiple days.

The Panel may seek additional evidence from the IO and interview key witnesses on whom the IO relied in drawing his or her conclusions, as well as request additional evidence from the IO to clarify the evidentiary record, provided that it can do so without unreasonably delaying the process. In the event that a new witness comes forward during the Hearing who was not originally interviewed by the IO, or new evidence discovered after the IO has issued his or her report, the DHO may allow that witness to testify or admit the evidence to the hearing, but only if the DHO judges the new witness or evidence to be highly relevant to an accurate and fair determination of the outcome.

ii. The Hearing will be held in private, and only the Panel may conduct interviews. Only the person interviewed (and that person’s advisor or outside counsel, as applicable) will be present at the Hearing during interviews. The complainant or respondent (and their advisor or outside counsel, as applicable) will be able to view testimony from separate rooms, upon request, via closed-circuit television or similar video transmission.
b. Subject to the Protections set forth in Section B above, the Panel has wide latitude when questioning the complainant, the respondent and any witnesses in order to determine the accuracy of the report.

c. The complainant and respondent may propose witnesses and provide specific questions in advance that they believe important to ask of other parties or witnesses. The DHO, in consultation with the Panel, will determine the relevance as well as the appropriateness of witnesses and questions, and may accordingly place restrictions on, include, or exclude witnesses or other information.

d. When the Panel is conducting the interview of the complainant and respondent, each student may bring an advisor or outside counsel with them to provide advice and support, but the advisor or outside counsel will not be permitted to participate in the interview other than to provide advice to the student and may be excluded from the interview by the DHO for disruptive behavior.

e. The interviews by the Panel will be recorded (audio only). No observers will be permitted to make any audio or video recordings.

III. Resource Offices

A. Confidential Resources

The following can be contacted for support, counseling, and advice:

Special Services Unit, Division of Public Safety
24-hour Helpline: 215.898.6600
4040 Chestnut Street

Counseling & Psychological Services (CAPS)
Main Number: 215.898.7021
After hours emergency number: 215.349.5490
133 South 36th Street, 2nd Floor

Penn Women's Center (PWC)
Main Numbers: 215.898.8611 and 215.898.6500
3643 Locust Walk

Student Health Service (SHS)
Main Number: 215.746.3535
3539 Market Street, Suite 100

Lesbian Gay Bisexual Transgender Center
Main number: 215.898.5044
3901 Spruce Street

Office of the Chaplain
Main Number: 215.898.8456
240 Houston Hall, 3412 Spruce Street

Director, Sexual Violence Prevention & Educator
VPUL, 3611 Locust Walk
215.898.6081

B. Official Reporting Offices

The following are official reporting offices for violations of the Sexual Violence Policy:

Office of the Sexual Violence Investigator
227 Sansom Place East
3600 Chestnut St.
Philadelphia, PA 19104-6106
215.898.2887

Title IX Officer and Office of Affirmative Action and Equal Opportunity Programs (OAA/EOP)
3600 Chestnut Street, Sansom Place East, Suite 228
215.898.6993

Student Intervention Services, VPUL
3611 Locust Walk
215.898.6081
215.768.6527 Nights/Weekends

Office of Student Conduct
207 Duhring Wing
215.898.5651

Division of Human Resources
3401 Walnut Suite 527A
215.898.7281

H. Appeal of Hearing Panel Decision

The Panel decision is subject to appeal by either party in writing to a Disciplinary Appellate Officer (DAO), a faculty member with exclusive jurisdiction to decide appeals. In keeping with guidelines for timely resolution as provided in Section A above, appeals should be submitted within 10 business days after the decision of the Panel. Letters of appeal should specifically state whether the objection is to the judgment of responsibility, the sanction, or both, and explain in detail the grounds for appeal.

1. The DAO will review the report of the Investigative Team and supporting evidence, the audio record from the Panel Hearing in the discretion of the Appellate Officer, and any other material the DAO deems relevant, in addition to the decision of the Panel in order to ensure that the process was consistent with University policy and that the result was not arbitrary or capricious.

2. After considering the appeal, the DAO will promptly issue his or her decision in writing and will provide copies to the DHO, the Provost, the Vice President for Institutional Affairs, the respondent(s) and other appropriate parties.
Office of Affirmative Action & Equal Opportunity Programs

The Office of Affirmative Action & Equal Opportunity Programs monitors the University’s equal opportunity/affirmative action policies and programs. The Office also is responsible for coordinating complaints with non-discrimination laws (including investigating complaints and coordinating programs for the disabled). The OAA staff is available to consult with faculty, staff, students, and members of the community who have questions or concerns regarding the application or possible violation of these policies, Title VI or Title IX. The Office is located at 3600 Chestnut Street
Sansom Place East
Suite 228
Philadelphia, PA 19104
215-898-6993

In addition to the description of duties given earlier, the Office of Affirmative Action is also responsible for coordinating complaints with non-discrimination laws, including investigating complaints and coordinating programs for the disabled. The OAA staff is available to consult with faculty, staff, students, and members of the community who have questions or concerns regarding the application or possible violation of these policies, Title VI or Title IX.

Other Grievance Procedures

Academic Grievances

Schools and academic departments within the University have established procedures for the resolution of student grievances concerning academic matters. Students should contact the Dean’s Office of the particular school for a copy of the appropriate procedures and for guidance regarding the grievance process. A student who wishes to register a grievance regarding the evaluation of his/her academic work shall follow the academic grievance procedure applicable in the school or department in which the academic work was performed.

- School of Arts and Sciences (https://www.sas.upenn.edu/graduate-division/resources/academic-grievance-procedure) & Professional and Liberal Education
- Biomedical Graduate Studies (http://www.med.upenn.edu/bgs/documents/ExpectationsofStudents2015.pdf)
- PSOM Section V
- School of Engineering and Applied Science (http://www.seas.upenn.edu/graduate/handbook/student-ethics.php) Part D
- School of Law (https://www.law.upenn.edu/students/policies/grades-review-of-courseseminar-requirements.php)
- School of Nursing (https://www.nursing.upenn.edu/student-services/resources/handbooks-forms-policies/phd-handbook)
- School of Social Policy and Practice (http://www.sp2.upenn.edu/resources/masters-student-handbook/student-rights-and-responsibilities)
Administrative and Employment Grievances

Students with administrative grievances should contact the Office of the Vice Provost for University Life, 3611 Locust Walk, 215-898-6081. Students with grievances related to their appointment as a teaching assistant, research assistant, or graduate assistant should contact their Dean's Office or the Vice Provost for Education, 215-898-7225.

Suspension of Normal Operations

Although Penn normally never stops operating, emergencies such as severe weather conditions may sometimes result in the cancellation of classes and/or the full or partial closure of certain areas of the University. Decisions affecting work schedules and class cancellation are made by the Executive Vice President in consultation with the Provost.

The University will announce a closing or other modification of work schedules through the following means:

- the University's emergency information number: (215) 898-6358 (215-898-MELT)
- communications from Division of Public Safety
- KYW News Radio (1060 AM)
- the UPennAlert Emergency Notification System (for University related incidents and crises)

The University's emergency radio identification code numbers are "102" for day classes and schools/centers and "2102" for evening classes. The message that accompanies the code number will provide the operating status of the University. Make sure to keep this emergency information in a place you can easily access.

Even when Penn is officially closed due to an emergency, there are some essential services that must still be provided, such as Public Safety or Facilities. Staff members in essential positions are still required to work as normally scheduled under these circumstances.

More information on suspension of normal operations is available online at: https://www.hr.upenn.edu/policies-and-procedures/policy-manual/other-policies/suspension-of-normal-operations(formerly-emergency-closing-policy).

Tobacco-Free Campus Policy

Policy

The University of Pennsylvania is committed to maintaining a healthy and safe learning, working and living environment for all members and guests of our community. Therefore is the policy of the University of Pennsylvania that smoking and tobacco use (including the use of smokeless tobacco) is prohibited in all University buildings and facilities, including but not limited to any meeting rooms, community areas, performance venues and private residential space within University of Pennsylvania housing. Smoking and tobacco use is also prohibited in all University of Pennsylvania vehicles (owned or leased), regardless of location. Finally, smoking and the use of tobacco products is prohibited on any University of Pennsylvania property, including but not limited to outdoor spaces (such as College Green, Shoemaker Green, Locust Walk, etc.), as well as parking lots, paths, fields, sports/recreational areas, and stadiums. Where University of Pennsylvania buildings are adjacent to public sidewalks or streets, smoking and the use of tobacco products is prohibited on those public sidewalks and streets within twenty (20) feet of the entrance to the building.

The tobacco policy covers all smoking methods, including but not limited to the use of electronic smoking devices (e-cigarettes, e-cigars, e-pipes) and hookah-smoked products.

Enforcement

Compliance with the applicable law and this policy is the responsibility of all members and guests of the University of Pennsylvania community. Any person with concerns about the implementation of or compliance with this policy should refer the matter to his or her immediate supervisor or manager for resolution. If the matter cannot be resolved at this level, the concern should be referred to the Division of Human Resources, Staff and Labor Relations or the appropriate Dean or Vice President.

Effective Date: 10/1/2017

Unauthorized Copying or Use of Licensed Software

The University of Pennsylvania does not condone or tolerate unauthorized copying or use of licensed computer software by staff, faculty, or students. The University shall adhere to its contractual responsibilities and shall comply with all copyright laws, and expects all members of the University community to do so as well. Members of the University community who violate this policy may be subject to discipline through standard University procedures. An individual or University department engaged in the unauthorized copying or use of software may also face civil suits, criminal charges, and/or penalties and fines. Subject to the facts and circumstances of each case, such individuals or departments shall be solely responsible for their defense and any resulting liability. If you have questions about the terms and conditions of a software license, please contact the Computing Resource Center at 898-9085.

University of Pennsylvania Required Disclosures

The Higher Education Opportunity Act of 2008 requires the University to provide a list of student-related disclosures and policies, as well as information about how to obtain the required information. This information is provided below in a list format with links to the appropriate information.

I. Non-Loan Related Disclosure Requirements

A. Availability of Institutional Financial Aid Information

2. Contact information for assistance in obtaining institutional or financial aid information: http://www.sfs.upenn.edu/contacts/index.htm

B. Student Financial Assistance

1. Student financial aid information: http://www.sfs.upenn.edu/paying/index.htm

C. General Institutional Information

1. Consumer information on College Navigator website: http://nces.ed.gov/collegenavigator/?q=university+of+pennsylvania&s=all&pg=2&id=215062
2. Price of attendance
   - Undergraduate: http://www.sfs.upenn.edu/paying/cost-of-attendance.htm
   - Graduate: Each graduate/professional school has its own cost of attendance structure. See listing below for links directly to their sites.
3. Net Price Calculator
   b. http://netpricecalculator.collegeboard.org/participating-schools
4. Refund policy, requirements for withdrawal and for the return of Title IV, HEA financial aid: https://catalog.upenn.edu/penbook/financial-policies/
5. Banking Relationship Disclosures
   In compliance with the U.S. Department of Education’s guidelines, Penn makes information on its marketing relationships with financial institutions publicly available. Such disclosures can be found on the PennCard website (https://cms.business-services.upenn.edu/penncard/the-penncard-center/services/banking.html). For additional information on banking options visit: http://www.sfs.upenn.edu/banking/index.htm

- Consumer Information on College Navigator Website:
  http://nces.ed.gov/collegenavigator/?q=university+of+pennsylvania&s=all&pg=2&id=215062
- Transfer of Credit Policies and Articulation Agreements:
Use of Facilities

The facilities of the University of Pennsylvania exist for the primary purpose of education. Priority for the use of facilities is given first to University academic activities and second to programs of University groups. The decision to permit or restrict the use of facilities by University groups will be based first on the prior academic commitment of that facility, then on prior reservation by another University group. University groups are defined as consisting almost entirely of students, faculty, administrators, staff or alumni of the University, or combination thereof, whose primary activities are based at or directly related to the University. Dates that remain open after the spring and fall calendar processes for University groups may be assigned to approved non-University organizations upon request.

The policy governing the use of University facilities was developed under the auspices of the Committee on Open Expression. Before a request of a University group to use any facility is rejected for reasons other than prior commitment of the facility or the like, the Committee on Open Expression should be consulted.

All groups using University facilities must include in their advertising, promotional materials, and other literature distributed on campus the name of the organization (prominently displayed) and sufficient information about the group and the activities it intends to conduct for readers to understand the group’s purpose. Deceptive advertising, soliciting, and recruiting practices are prohibited. It is the responsibility of the Director of Student Life to determine whether adequate standards of disclosure are met. Groups failing to comply with this regulation can be denied access to University facilities for as long as the director may determine. The director’s decision may be reviewed by the Committee on Open Expression.

I. Reservation Procedures

1. All non-academic events requiring the use of Perelman Quadrangle, performing arts facilities, Blanche Levy Park, Locust Walk other VPUL spaces and Central Pool classrooms must be registered with the Office of the Perelman Quad and VPUL Facilities. Applications for space use should be made with the staff in 307 Houston Hall, or online two weeks in advance.

2. The person, whether or not a member of the University community, who requests the use of a University facility shall be responsible for maintaining the requested facility in good condition.

3. The University reserves the right to reject any request for use of its facilities and to terminate use at any time upon failure of a University group or a non-University organization to comply fully with University policy and safety procedures.

4. Requests must be timely. For example, it is expected that auditoria, large multipurpose spaces, and other large spaces must be reserved with a minimum lead time of one month to ensure adequate provision of facilities resources. Smaller venues of fifty persons or fewer should be reserved a minimum of one week in advance of use.

II. Payment of Charges

1. All groups must agree to pay for incurred costs according to the current schedule of University security, maintenance and service fees.

2. University groups desiring to charge admission to a function must deposit all revenue from such admission charges directly into their University account either to help defray expenses of the program or to support future related on-campus programs. All admission charges must be reasonable.

III. Admission Charges

1. Because the University is a tax-exempt corporation, the use of its facilities by external, commercial agents should be limited.
2. University groups desiring to charge admission to a function must deposit all revenue from such admission charges directly into their University account either to help defray expenses of the program or to support future related on-campus programs. All admissions charges must be reasonable.

IV. Use of Outdoor Spaces
The procedures governing the use of University facilities shall apply to the reservation and use of outdoor spaces belonging to the University, with the recognition that permission may be denied, if noise resulting from an event occurring in an outdoor space may at times interfere and conflict with library, office and classroom activities.

Depending on the location of an outdoor event, on scheduled classes in nearby buildings, and on the proximity of offices in use, non-conflicting activities should be scheduled by prior arrangements with the Perelman Quad and VPUL Facilities staff.

Use of University’s Name
Official Use
When representing the University in an official capacity, all units of the University and members of the faculty and administration must use “University of Pennsylvania” in their publications and documents. Approved University stationery must be used for official correspondence.

University names and insignia may be used in connection with any academic University program provided that the program has been approved in advance by the responsible department chair and dean or director, and Provost, as appropriate. University units, faculty, staff and student organizations that wish to use University names or insignia in connection with any non-academic University program, activity, service or product must obtain the approval of the Secretary of the University before proceeding. Requests to use University names or insignia must first be presented to the appropriate department chair and dean, director, or, in the case of student organizations, to the Vice Provost for University Life, for review. If approved by the dean, director, or Vice Provost, a request with supporting information must be submitted to the Secretary for review. The Secretary will review the proposed use and determine whether it is properly related to the University’s missions and, in consultation with the Provost, Executive Vice President and others as appropriate, whether the benefits of the proposed use outweigh any risks associated with the use. The Secretary may approve the proposed use, with or without conditions, or disapprove the proposed use.

Licensed Uses by Outside Entities
University names or insignia may be used on products or in connection with services offered by outside entities only under license from the University. Requests for such licenses are processed jointly through the Office of the Vice President for Business Services ("Business Services") and the Center for Technology Transfer ("the Center"). If Business Services and the Center determine that a proposed licensed use may be beneficial to the University, they may submit a proposal to the Secretary for review. The Secretary will review the proposal and make a determination under the criteria stated above and may take particular note of the nature of the product, the proposed marketing plan, and the capabilities and reputation of the proposed licensee. If the Secretary approves the proposal, the Center is authorized to negotiate a license that is consistent with the terms of approval.

Outside sponsors of University programs or activities often seek to use University names or insignia in promotional or advertising materials. While the University is pleased to recognize the contributions of sponsors, such recognition must not suggest University endorsement of the sponsor’s activities. Therefore, University names or insignia may not be used in connection with any outside entity’s name or logo without prior approval of the Secretary of the University. In general, the Secretary will approve uses which recognize or acknowledge the sponsor’s contribution to the University program or activity. Uses which, in the Secretary’s judgment, may suggest University endorsement or approval of the sponsor’s goods or services will not be permitted.

Private Use
University faculty, staff and students may refer to their affiliation or status with the University in connection with personal activities, including consulting, provided that the affiliation or status is accurately represented and any title or position is accurately identified, and provided that such use does not imply University endorsement of the activity. In some cases, a disclaimer of University endorsement may be required. (See, for example, Handbook for Faculty and Academic Administrators, section II.E.10.). Use of University insignia in connection with personal activities is prohibited. The University’s name must not be used in any announcement, advertising matter, publication, correspondence, or report in connection with personal or non-University activities if such use in any way could be construed as implying University endorsement of or responsibility for any project, product, or service.

Related Policies
All faculty, staff and students are reminded that University equipment, stationery, campus mail service, and electronic media are to be used solely for University business by authorized University personnel and by officially recognized campus organizations. See Human Resources Policy No. 3. Additional information on faculty and staff involvement in extramural activities and organizations can be found in the Conflict of Interest Policy for Faculty Members, and Human Resources Policy Nos. 5 and 6.

(Source: Almanac, May 16, 2000 (https://almanac.upenn.edu/archive/v46/n33/ORuniv-name.html))

Vending Policy
1. In consideration for the University permitting organization to conduct vending or promotional activities on campus, the applicant organization agrees to fully comply with the University’s policies and all applicable, local, state and federal laws, including, but not limited to applicable consumer protection laws.
2. In addition, organization agrees not to discriminate against any employee, student or customer on the basis of race, religion, national origin, gender, sexual preference, age or disability.
3. If the organization is a non-University affiliate, it further agrees to the following terms and conditions:
   a. The University shall not be liable for any injuries to persons or damage to property which organization; other participants or their respective representatives may suffer.
   b. Organization is responsible for any damage to facilities, which might result from its activities.
   c. Organization hereby voluntarily waives and releases any and all claims and causes of action against the University, its trustees,
officers, employees, agents and students that arise from or relate to the activities covered by this permit request.

d. Organization agrees to indemnify, defend and save harmless, the University, its trustees, officers, employees, agents and students from all claims, costs, causes of action, damages, expense and liabilities whatsoever (including attorneys’ fees) that arise from or relate to the activities covered by this permit request.

e. Organization, at its own cost and expense, shall obtain and maintain in force during the period of its activities at the University the following insurance coverage:

i. A policy of Worker’s Compensation insurance, in amounts required by law, covering all officers, employees and agents of the Organization.

ii. A policy of comprehensive general liability insurance with broad form property damage endorsement, with such policy to afford protection to the limit of One Million Dollars ($1,000,000) with respect to bodily injury or the death of any number of persons in any one occurrence and One Million Dollars ($1,000,000) with respect to the property of any one owner for one occurrence.

iii. A policy of comprehensive automobile liability coverage covering the operation of all automobiles, whether owned or not by the Organization, used in connection with the performance of this Agreement with such policy to afford protection to the limit of One Million Dollars ($1,000,000) with respect to bodily injury or death of any number of persons in any one occurrence and Five Hundred Thousand Dollars ($500,000) with respect to damage to property of any one owner from one occurrence.

1 Each of these insurance policies shall be issued by insurance companies licensed to conduct business in the Commonwealth of Pennsylvania and shall name the Trustees of the University of Pennsylvania as an Additional Insured except for Worker’s Compensation. The Organization shall furnish to the Office of the Vice Provost for University Life or the Office of the Vice President for Business Services a certificate of insurance for each of the above-mentioned policies.

**Campus Organizations**

Since the University of Pennsylvania is a tax-exempt organization, the use of its indoor and outdoor facilities for the purpose of selling or promoting any product or service must be strictly regulated. Accordingly, the following guidelines have been established:

1. Machine vending inside University buildings falls under the jurisdiction of the Managing Director of Campus Dining and those others to whom that authority has been given. Any other vending is not permitted in accordance with Human Resource Policy #710.

2. The Director of Student Life or designee is responsible for requests from University affiliates and non-University affiliates to conduct vending or promotional activities on Locust Walk between 36th and 37th Streets, Perelman Quadrangle, Hamilton Village and other University Life Facilities.

3. Apart from approved truck vendors, outdoor sales and promotional activities are generally restricted to registered student organizations and University departments who wish to fundraise for their own benefit. Approval for such activities must be obtained from the Office of Student Life. Outside groups or corporations, however, will not normally be permitted to conduct sales and vending or promotional activities on University property under the sponsorship of University groups.

4. Because the profits raised by Penn Student Agencies (PSA) are transferred into the University’s funds for student financial aid and other services, PSA should be given exclusive rights or preferential treatment in the selling of certain products or services in the outdoor area of campus. Responsibility for such decisions rests with the Director of Student Life, and at the beginning of each academic year, PSA shall provide the Director of Student Life or designee with a list of those products or services it wishes to sell. The Director will share that information with any other student organizations that may be interested in selling similar products or services.

5. Vending/promotions permits are required for all organizations, registered student groups or departments wishing to sell items or conduct promotional activities in outdoor campus areas. Permits must be approved in writing by an authorized employee of the Vice Provost for University Life for the following areas: Locust Walk between 36th and 37th Streets, Perelman Quadrangle, Hamilton Village and other University Life Facilities, and to the Vice President for Business Services for all other areas and must be shown to any University official, including Public Safety officers, on request. Failure to obtain a vending/promotions permit will result in the vendor’s eviction from campus and may result in loss of future privileges.

6. All vending/promotional activities, including ticket sales, credit card applications, etc., will normally be located in the block of Locust Walk between 36th and 37th Streets in order to eliminate traffic congestion elsewhere on campus. Requests to conduct vending or promotional activities in other campus areas may be approved by the Office of Student Life or designee in consultation with other appropriate administrators when unusual circumstances warrant a different location.

7. The distribution of non-commercial handbills or flyers by University groups is generally permitted on Locust Walk as long as the individuals conducting such activities are not impeding traffic, imposing their will on the University community (e.g., forcing people to take handbills), creating a disturbance, or generating an excessive amount of trash. Posting of handbills and flyers is restricted to designated kiosks and bulletin boards. Individuals or groups are responsible to clean up trash related to their activities.

8. Those who conduct vending or promotional activities on Locust Walk close to classroom or residential buildings are asked to keep the volume of noise to a level that does not interfere with normal University activities. The noise level at such activities must be consistent with the standard. Bullhorns and other forms of sound amplification may not be used unless special permission is received from the Office of Student Life.

9. The Division of Public Safety has the right to challenge anyone conducting vending or promotional activities in any University outdoor area and to require them to obtain permission from the appropriate University office or leave the campus.

10. Those who conduct vending or promotional activities must comply with all University, City, Commonwealth and Federal Laws and policies.
