

SCHOLARS PROGRAMS

The following programs are available to all undergraduate students.

Benjamin Franklin Scholars

The Benjamin Franklin Scholars (<https://www.curf.upenn.edu/bfs>) are one of Penn's most distinctive undergraduate communities.

Each year we welcome a group of extraordinary incoming students, committed to the transformative power of ideas. Benjamin Franklin Scholars are selected based on their interest in, and demonstrated capacity for, a deep engagement in the liberal arts and sciences, both as ends in themselves and as engines of change in the world. With unique course offerings, and under the guidance of extraordinary faculty and advisors, we encourage our students to pursue, in the spirit of Franklin himself, our guiding principles of breadth, curiosity, and a tinkering habit of mind.

We are a home for students who seek the advantages of wide-ranging knowledge, whatever particular educational path they choose. We look for spirited, independent people who find their own passions and are predisposed to explore their own ideas, wherever they might lead. We welcome restless minds who are not content just to appreciate great ideas as abstractions up on a shelf, but who see them as transformative; changing minds and so changing the world. We are a community of students and faculty who find value in the saying of the great classical writer Plutarch, from whom Franklin himself claims to have "read abundantly," and see a truly great education as a kind of playing with fire.

BFS welcomes students in all the undergraduate schools: The College, Engineering, Wharton, and Nursing. Parts of the program, including admissions, work a bit differently in the different schools. For all our scholars, the BFS experience includes opportunities for overseas internships, a presentation of research to the BFS community, and our Seminars – a set of enriching opportunities to work on challenging topics, without requiring extensive prerequisites, both inside and outside of their major fields of study.

University Scholars

The University Scholars program (<https://www.curf.upenn.edu/university-scholars>) provides an exceptional academic environment for intellectually dynamic students who have already demonstrated their commitment and dedication to research.

Through mentoring, research funding and scholarly events the program encourages and supports students to make the most of their undergraduate years, not only with in-depth research, but also by making an early start in graduate and professional courses, ranging widely or in some cases focusing narrowly on their curricular choices.

The focus of the University Scholars program is undergraduate research. In order to aid students in doing creative and in-depth research, the University Scholars has a fund with which to help students defray research expenses. Funding is meant to cover the expense of the research itself; this most often pertains to room and board costs over the summer months. Occasionally, students' research will take them away from Penn. In those instances, the University Scholars program may be able to fund travel expenses as well.

Civic Scholars

Penn Civic Scholars (<http://www.vpul.upenn.edu/civichouse/civicscholars>) is a unique program providing undergraduates with a sustained four-year experience in civic engagement and scholarship. The program culminates in certification upon graduation and designation as a Civic Scholar on the student's transcript.

The Civic Scholars program is based on a few basic principles:

- Civic engagement and academic work are mutually reinforcing.
- Meaningful and sustained involvement in community affairs while at Penn is the base for life-long civic commitments and contributions.
- Undergraduates can conduct significant applied social and public policy research through a multi-year preparatory process.
- Forming a community of dedicated students and faculty will encourage distinctive civic service and scholarship.

The following programs are available to students in a particular school.

College of Arts and Sciences Integrated Studies Program

The Integrated Studies Program (ISP) (<https://www.college.upenn.edu/integrated-studies>) is the freshman curriculum for Benjamin Franklin Scholars pursuing degrees in the College of Arts and Sciences.

Deeply rooted in the liberal arts tradition of acquiring and applying expansive knowledge, this residential academic program invites highly-motivated students to examine complex themes through the integration of multiple academic disciplines and methodologies.

Students are guided through the semester by some of Penn's leading faculty. By investigating the same ideas under three distinct lenses, drawing simultaneously from the humanities, social sciences and sciences, students sharpen their focus on the similarities—and differences—between the disciplines' habits of mind.

School of Engineering and Applied Science

Rachleff Scholars

The School Of Engineering and Applied Science is pleased to announce the Rachleff Scholars Program (<https://www.seas.upenn.edu/undergraduate/research/rachleff-scholars.php>). The Program offers Penn Engineering undergraduates the opportunity to gain valuable research experiences with standing faculty and to participate in a community of peers who share a common interest in research and scholarly inquiry.

The Rachleff Scholars Program is open to rising sophomores with at least a 3.4 Cumulative GPA and strong interests in engineering research. Each student accepted into the Rachleff Program is required to complete work in three separate areas: summer research experience, honors coursework, and scholarly community activities.

School of Nursing Benjamin Franklin Scholar- Nursing

As a Benjamin Franklin Scholar - Nursing (<https://www.nursing.upenn.edu/academics/a-penn-nursing-education/undergraduate-honors-program>), you will engage in an intensive academic experience, along with peers in the College of Arts and Sciences, the Wharton School and in the School of Engineering and

Applied Science, to complete the undergraduate Nursing major with an intensive liberal arts component. In addition to a variety of campus-wide programs as part of BFS, you will be able to enroll in the justly famed BFS Seminars – course taught by expert faculty from across campus in a variety of topics.

The Wharton School

Joseph Wharton Scholars

Founded in 1988, the Joseph Wharton Scholars (<https://undergrad-inside.wharton.upenn.edu/jws>) program is designed to emphasize the importance of scholarly research and the liberal arts and sciences within the framework of a business education. Students in the program are required to take scholars courses both in Wharton and outside of Wharton (in the College of Arts & Sciences, Nursing, and/or Engineering), engage in a significant research project, and participate in a variety of academic, career-oriented, and social activities.

The JWS program is the Wharton component of the Penn-wide Benjamin Franklin Scholars (<https://undergrad-inside.wharton.upenn.edu/bfs>) program, through which students gain access to BFS Seminars. In addition to the course requirements, students must maintain a minimum 3.4 GPA.

Joseph Wharton Scholar students must take three *non-Wharton* BFS Seminars as well as four Wharton honors courses (which may include Wharton BFS Seminars). The Wharton courses include honors sections of BEPP 250, FNCE 100, FNCE 101, MKTG 101, MGMT 101, MKTG/STAT 476, STAT 430, STAT 431, WH 399; and the Wharton BFS Seminars: LGST 101, LGST 210, and LGST 215. All JWS students must take *WH150x—Evaluating Evidence* as one of their four honors classes in Wharton.

Public Policy Research Scholars

The Public Policy Research Scholars (PPRS) (<https://publicpolicy.wharton.upenn.edu/for-students/public-policy-research-scholars>) offers a unique opportunity for students to study and explore public policy.

PPRS is an interdisciplinary certificate program intended for undergraduates with a background in economics, who want to explore the impact of U.S. public policy on the domestic economy.

The PPRS program is not a major. Instead, it offers a supplemental course of study, focusing on the quantitative analysis of public policy at the federal level, that can be pursued alongside any major, in any of Penn's undergraduate schools. Beyond the curriculum, students also are required to do at least one public policy summer internship, for which they will receive funding from the Penn Wharton Public Policy Initiative. They also will have opportunities to assist with faculty-led policy research on campus. Through PPRS, we aim to create a tight-knit cohort of undergraduates from across the University who are committed to gaining the skills and experience necessary to critically assess U.S. public policy, as well as to prepare for graduate study and career opportunities in the field.

The core skills at the heart of PPRS include:

- Economic and political analysis of public policy, for assessing why, how, and with what degree of success the government designs and implements policy.
- Statistical thinking and quantitative analysis of economic data.
- Knowledge of the policymaking process.

- The application of theoretical and quantitative tools to practical, real-life policy questions.

Students that complete the program will have the designation “Public Policy Research Scholar” noted as an honor on their transcripts and will receive a certificate upon graduation.

Wharton Research Scholars

Wharton Research Scholars (<https://undergrad-inside.wharton.upenn.edu/wrs>) is an intensive one-year research program for a select group of students who are interested in conducting research under the supervision of some of Wharton's preeminent faculty members. As part of the program, participants complete an honors thesis.

Students apply to work on a specific project they propose in consultation with a Wharton faculty member who agrees to act as their faculty mentor. Students are allowed to have more than one faculty mentor provided at least one is a member of the Wharton faculty.

Throughout the year, students convene to discuss progress, strategies, and challenges within their projects. This interaction fosters a strong scholarly community where students can learn from each other's experience. The research scholars also meet regularly with their faculty mentors who advise the students throughout the year. The program culminates with final presentations and publication of research papers on the University of Pennsylvania Libraries' ScholarlyCommons (http://repository.upenn.edu/wharton_research_scholars).
