ARTIFICIAL INTELLIGENCE, BSE

The rapid rise of big data, machine learning, and artificial intelligence have resulted in tremendous breakthroughs that are having horizontal impact across many disciplines, in engineering, computing and beyond. The need for cutting edge Al engineers is tremendous, as are the research and innovation opportunities in this rapidly evolving field. Above all there is tremendous potential for having a positive societal impact in numerous applications domains (health, energy, transportation, robotics, computer vision, human machine interfaces, national security) in addition to networks and society.

Curriculum Artificial Intelligence (ARIN) Major Requirements

37 course units are required.

- ¹ The Natural Science elective can be satisfied with appropriate AP credits, e.g., AP Physics. (a list of approved Natural Science course can be found on the SEAS UG Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/natural-science-courses/))
- ² May contain at most one CU of 1000-level courses.
- Must include a Writing Seminar (a list of approved Writing Seminars can be found in the SEAS Undergraduate Handbook (https://ugrad.seas.upenn.edu/student-handbook/courses-requirements/writing-courses/)).

The degree and major requirements displayed are intended as a guide for students entering in the Fall of 2024 and later. Students should consult with their academic program regarding final certifications and requirements for graduation.
