HEALTH CARE MANAGEMENT AND POLICY, BS

The concentration in health care management and policy focuses on the management, financing, and economics of the health care sector. Students learn about health care markets and factors that significantly influence decision making both at the policy level and at the level of the firm or organization. The health care sector includes government agencies, non-profit institutions, major private corporations, medical practices and partnerships, and many small and early-stage health care service and product firms.

This concentration prepares students for careers as managers in health care companies or health care service firms such as consulting, banking or health care IT companies, or government agencies. Students planning careers in the health professions such as medicine, nursing, or dentistry have found the concentration very useful in understanding the context in which they will be working.
