

# VISUAL STUDIES: ART AND CULTURE OF SEEING, BA

Visual Studies at the University of Pennsylvania prepares students to forge innovative connections across the disciplines that study vision and images. Students acquire a critical awareness of seeing and the problems and possibilities for investigating, thinking, and writing about seeing in the 21st century. Fundamentally interdisciplinary, the Visual Studies Program partners with the Departments of Philosophy, Psychology, History of Art, Fine Arts, and Architecture. Students may also find interest in Penn Programs such as Cinema Studies and Gender, Sexuality, and Women’s Studies or outside of the School of Arts and Sciences in the Annenberg School of Communications, and the School of Engineering and Applied Sciences.

In Sector B, students explore the status of images as representations or models of visual experience and as bearers of information, and they develop skills in interpreting artifacts visually.

The minimum total course units (<https://www.college.upenn.edu/credits-needed-major/>) for graduation in this major is 35. Double majors may entail more course units.
